

On The BEAM

By J. W. King, Sr.

The sun has been shining every day this week and has given farmers an opportunity to gather some cotton.

It is rather odd here—where we ordinarily have more sunshine than anything else—to want it to quit raining for a while.

Business opportunities are open in Lorraine for several lines of endeavor. Any business that opens with a wide-awake owner ought to do well. We would like to see the first of the new year start with several new business institutions.

Lorraine is in the heart of the irrigated farm land in this part of the country which in addition to dryland farming and ranching in the area affords the business establishments here an opportunity to reach out.

SCHOOL IS OUT

The Lorraine school has been dismissed this week in order that students might help gather the cotton crop.

GIN REPORT

The three Lorraine gins reported Wednesday morning they had ginned a total of 3050 bales of cotton this season.

RECEIVES DISCHARGE

Mr. and Mrs. Leon Callaway came in last week from Ozone, where he received his discharge from the Air Force after serving almost four years. They are visiting her parents, Mr. and Mrs. B. B. Lee, and will leave next week for Lacrosse, Wisconsin, to visit his parents and where they will make their home.

Urges Inspection Before Holidays

With only one-tenth of the motor vehicles in Texas inspected for the year 1958, automobile and truck owners were urged today to obtain their new inspection stickers before the holiday season.

Col. Homer Garrison, Jr., director of the Texas Department of Public Safety, called upon motorists to obtain their 1958 inspection stickers as soon as possible in order to alleviate the last minute rush on the 4200 inspection stations in Texas. Garrison said only about 450,000 of the four million registered vehicles in the state have been inspected and approved.

"While this number exceeds that for the same period last year," he said, "the present rate of inspection will not prevent inspection stations from being rushed again during the last few weeks of the inspection period ending April 15, 1958. Vehicle owners who complete their inspections before the holiday period will avoid the inconvenience of waiting at the inspection stations."

The state police director also said that early inspections will be of benefit to motorists who plan trips during the Thanksgiving to New Year's period by eliminating mechanical defects.

Visitors in the Buck Taylor home Sunday were Mr. and Mrs. W. S. Leslie of San Angelo and Mr. and Mrs. Woodrow Leslie of Odessa.

Mr. and Mrs. Henry Neill visited in San Angelo Sunday.

Mr. and Mrs. Gene Baird and Vicki spent Saturday and Sunday in Wichita Falls visiting Mr. and Mrs. Troy Kegans and sons Rusty and Chad.

ATTEND BANKERS MEET

K. L. Taylor and Herbert Mearse attended the district bankers meeting held at the Wooten Hotel in Abilene Saturday night.

How Long Before S. S. Pay Starts

Many self-employed farmers in this area have been asking, "How long must I work under Social Security to qualify for benefits?" according to R. R. Tuley, Jr., District Manager of the Abilene Social Security office.

In answer to this question, Tuley stated, "a self-employed farmer and ranch operator who reaches age 65 before April 1, 1958, can establish entitlement to benefits if he has social security credit for as little as two years during the three years 1955, 1956, and 1957."

For those who reach retirement age or die on or after April 1, 1958, the required years of credit will vary from as little as two, to as much as ten years, depending on the individual's date of birth or date of death.

The Social Security Administration has a booklet, OAS-35 which contains a table by which the requirements can be determined by any individual now, or at any given time in the future. The booklet is free for the asking.

Tuley cautioned that self-employed farmers and ranchers must report and pay the self-employment tax to receive credit towards social security. The report is a part of the Federal Income Tax Return and is filed annually with the District Director of Internal Revenue. By paying his self-employment tax the farmer builds social security protection for his old age or for his family in case of his death.

Attending the funeral from here were Mrs. George Mahoney and Nubbin, Mrs. Bessie Mahoney, Mr. and Mrs. Arthur Lee Pieper, Ross Marshall, Mr. and Mrs. Jim Hale.

Veterans' News

Questions and Answers

Q. May a veteran take so-called avocational or recreational courses under the Korean GI Bill?

A. Yes, but only if he submits justifications to VA that the course will be of bona fide use in his business or occupation, and if VA gives him prior approval. However, courses in bartending, dancing or personality development are prohibited.

Q. I am a widow of a World War I veteran, and I have decided to continue receiving death compensation payments rather than payments under the Survivor Benefits Act. If I do switch

to Survivor Benefits payments, could I at some later time change again to death compensation payments?

A. No. Once you have elected to receive payments under the Survivor Benefits Act, the law prohibits your switching back to death compensation payments.

Q. May a Spanish-American veteran with a nonservice-connected disability receive VA outpatient treatment?

A. He may. However, veterans of all wars may receive VA outpatient treatment only for service-connected conditions.

Q. I am a disabled Korea veteran taking on-the-job training under the Vocational Rehabilitation Act. As my job training pay goes up, will VA reduce my monthly subsistence allowance?

A. Yes. Your subsistence may be reduced by an amount considered equitable and just.

Research Against TB

Money to finance medical research on TB comes from Christmas Seal contributions. The 3,000 tuberculosis associations are now conducting the 51st annual Christmas Seal Sale.

DAVID E. SOULES, candidate for the Ph.D. in immunology at Wadley Research Institute in Dallas, demonstrates the Institute's newly acquired Spino Analytical and Preparative Ultracentrifuge. One of 275 such machines in existence, the Ultracentrifuge is used for the separation of various components of the blood and for determination of molecular weights. The powerful machine, which is capable of 70,000 rpm, offers new techniques in the study of leukemia and cancer of the blood. Wadley is the first private institution in northeastern Texas to acquire the Ultracentrifuge.
