## Check Social Security Status

Hal Geldon, district manager of the Amarillo Social Security office asks: "Are you planning to retire son? Do you keep putting off inquiring about your social security status? If so, do you know what documents will be needed to apply? Don't depend on your neighbor's recollection of what he was asked for—his situation may not apply to you."

Resolve today to prepare for your eventual retirement and inquire before you retire. Generally, you will need the following:

1. Proof of your age.
2. Evidence of earnings — if you work for wages, your Form W-2, withholding tax statement for the year before you apply; if you have your own business, a copy of your complete Federal income tax return for the past year and the cancelled check showing payment of the social security tax will be needed.
3. If your wife is applying at the same time, she will need proof of her age.

Plan to make application at least 60 days before your actual retirement. If you have any doubts about getting the proofs you will need, your social security representative can help you resolve these well ahead of the time your first check is due.

### OILFIELD SALT WATER DISPOSAL CURBED

Texas Water Pollution Control Board agreed, after three public hearings, to outlaw the use of unlined surface pits for disposal of oilfield salt water in eight South Plains counties.

Oil and gas operators were given until Sept. 1 to make other arrangements for disposal of their brine. Water-users in the area, which contains the greatest irrigation section in Texas, had complained that the oilfield salt water was seeping into the fresh water strata known as the Ogallala formation.

Covered by the no-pit order are Bailey, Cochran, Dawson, Hale, Hockley, Lynn, Swisher and Terry counties.

Mr. and Mrs. Don Lacy and Mr. and Mrs. Denzil Lacy were in Austin this past week end to attend the State basketball tournament.

## *Chemistry Has Come to the Cotton Patch, Via Research*

The man with the hoe is going the way the man with the cotton sack went only a few years ago in the cotton growing industry . . . and he will be speeded on his way by research in Collingsworth county.

It was brought out in last week's soil fertility meetings that work done here is the basis for recommendations of the Texas Extension Service through a wide area.

On the high planes, weed control in cotton focuses on flame cultivation. Here it is chemical weed control. The tests have been carried on quietly in the Northwest Texas Research Demonstration plots several years by Dwane Scott, working with the county agents.

Publicity is cautions, for this is experimental work. Nevertheless, it is certain that control of weeds by chemicals is taking its place in the farming set-up in this section of the country.

Like the mechanical harvesting of cotton, chemical cultivation has its geographical limitations. It also is not economically feasible under certain conditions, primarily where the cost of chopping cotton by hoe is already low.

This is one more step in the agricultural revolution that we are deep into. Besides being something of a mechanic and engineer and accountant, the cotton farmer of tomorrow is going to be something of a chemist, too.

## *A Disparity*

A spokesman for the forest and lumber industries in Alabama has chosen the current drouth as the time to conjure up a complaint over inadequate monies for forest fire protection.

The dangers of hugh monetary losses to individuals the giant timber combines, and tax revenue to the state, are serious in this dry autumn when a single match can put a torch to acres of trees.

We would appreciate more complaints by the timber-forest industry spokesman, however, if he could show how many dollars the people in "forestry's free enterprise system" are pouring into fire-fighting projects.

There are many taxpayers who feel the forestry-timber industry gets by without sharing a fair load of state taxes.

This cry for more tax dollars to curb forest fires merely serves to emphasize the disparity in taxes paid by those who are crying for more dollars from the state treasury to protect their business interests.

—The Andalusia (Ala.) Star-Times

## CROSSROADS REPORT

Dear Editor:

My financial underdog neighbor notes the new tax tactic is now in effect, whereby the tax rate is cut, so as to boom the economy and put more money in the federal pot.

And he says if this strategy works, we ought to have been using it long ago, before the country got so deep in debt.

And considering we have hired large herds of hi-fi brains in years past to manager our national business and none of them thought of this plan before, it's plain that somebody goofed, and now ought to be sued for malfunction in office.

—

My hyper-critical neighbor says he is not wagging his tail in gratitude over the tax cut because what is being given us to spend on higher living is our own money anyway.

Which is just the same old fallacy that leads lots of people to say it's "our" money that government is prodigaling away.

After all, anything which the government can take at will, is obviously government property, so any part of what we make that we get to keep is "ours" only by the grace of government.

—

I see where a young Air Force captain in New Hampshire may be thrown out of the service because he is a couple of pounds overweight.

My hefty neighbor guesses our defense rig must be very finely tuned if it can't go on functioning with two pounds of extra lard in the personnel section.

But since Secretary McNamara took over, it may be that the defending of waistlines is about the only type of problem our top brass professional warriors ever get a chance to practice making decisions on.

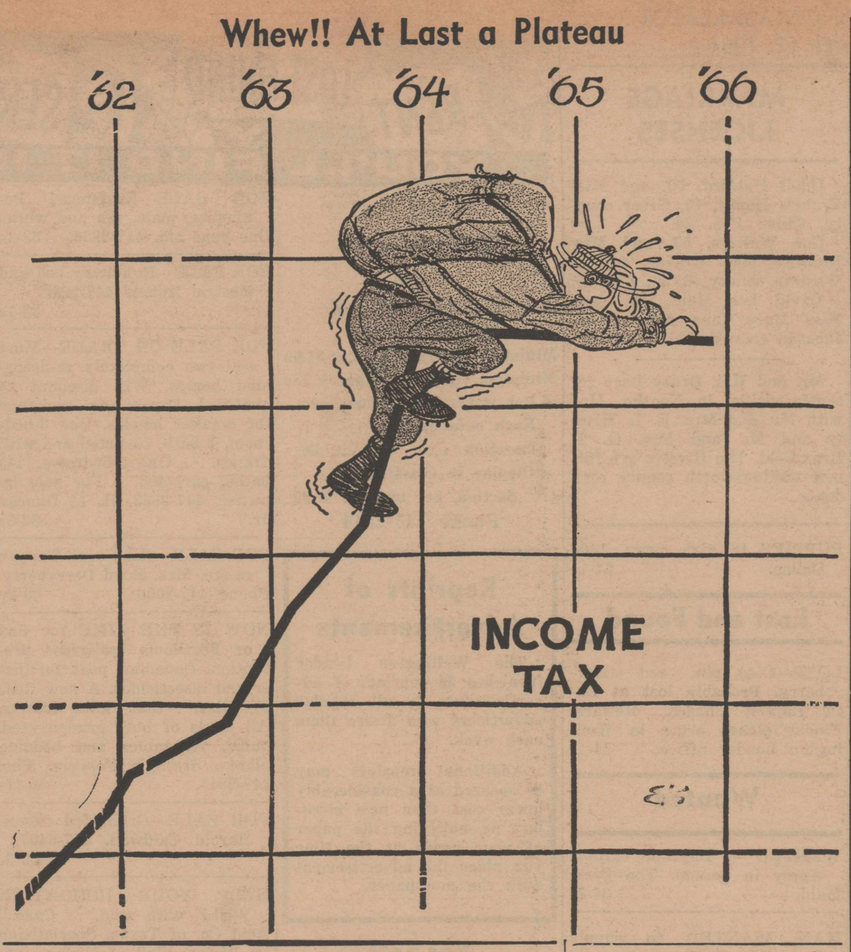

—

I see where it's being Planned to set up a Budget Corps, sort of like the Peace Corps, only to come out among the U.S. poor and show us how to get by.

My poorish neighbor reckons the budget corpsmen will teach us the government way: going deeper in debt; which system he is already using, and has found it works good for a while.

But he says the time always comes when he has to pay up or move, and he guesses this is why the push is on to annex the moon, so the U.S. will have some place to move to.

## NEWS LETTER from Congressman WALTER ROGERS

**CONTINUING PROBLEMS FOR CATTLEMEN**

Proposals are being formulated in the Congress to legislate quotas on beef and meat imports in the wake of unsatisfactory negotiated agreements with the two major foreign suppliers of meat to U.S. markets, Australia and New Zealand.

**Announced this week by the Departments of State and Agriculture, the new import agreement affecting the Australian and New Zealand shipments does nothing in my view but maintain the United States cattle industry at the brink of economic disaster.**

Although the volume of meat coming from Australia and New Zealand is reduced below last year's record level, the agreement helps to make permanent the conditions which have resulted in dangerously low prices paid for U.S. cattle in our own markets.

The decline in prices paid for choice steers at Chicago reflects the current unhealthy situation: Nov. $23.51 per 100 pounds; Dec. $22.30; January, $22.61; the first two weeks in February, $21.73. These are averages. While economists in the Department of Agriculture expect a price rise in the spring, no one can be sure of the future.

Under the terms of this agreement, imports received this year from Australia and New Zealand of beef, veal, and mutton will be limited to approximately the 1962-63 average level—or about 773 million pounds (the great portion of which will consist of beef and veal).

This total is only 48 million pounds below the total imported by the United States from these two nations in the record 1963 year. The Agriculture Department announcement noted that future expansion of beef and veal imports, limited by the agreement to 3.7% annually of the total received the preceding year from Australia and New Zealand, will be "far below recent levels."

This means next to nothing, however, because of the skyrocket rate at which imports from these countries have been increasing. Exports of beef and veal from Australia to the United States jumped 29 times in only six years—from 18 million pounds in 1958 to 517 million pounds in 1963. Therefore a reduction in the rate of expansion would have to be "far below recent levels" or every cattleman in the United States would be facing bankruptcy in a matter of months.

While the expansion has been checked—and for that I suppose we should be glad—the 3.7% annual rate of expansion coupled with the high-volume import base on which it is calculated will mean that our domestic cattle industry will continue to be poised on the edge of a precipice.

**I ask this: How much of an economic recession would be required, how much of a decline from the current rate of consumer spending would be necessary, to plunge the U.S. cattle industry to destruction?**

With imports continuing at dangerously high levels, a cutback of consumer purchasing in U.S. supermarkets could indeed be all that is required to seal the cattleman's doom.

Australia and New Zealand, major beneficiaries of the sugar import largess passed around the world by a too-generous Uncle Sam, accounted for 67% of the 1.750 million pounds of beef and veal imported by the U.S. last year. That total of 1,750 million pounds was 11% of all the meat consumed by our people. And 1,750 million pounds is a lot of beef. Calculations vary, but it is the equivalent of between 3,500,000 and 4,000,000 cattle on the hoof.

Had this number of cattle been produced entirely in the United States, the animals would have consumed some 20 billion pounds of feed—most of it now in surplus. I cite this fact to point out that the problem facing the U.S. cattle industry is a problem facing all of American agriculture.

But cattlemen and American agriculture generally must now face a fact of life that is becoming ever more apparent.

Where once a "farm bloc" held considerable power in the Congress—a group of Congressmen representing primarily rural areas—the shift of Congressional power has been to the metropolitan areas of our country. It is estimated that 7 out of every 10 seats in the House of Representatives are held by members from mainly urban constituencies.

The decrease in the "farm bloc" power makes it increasingly difficult for myself and others from farm and ranch areas to enlist the aid of city members, whose constituents are clamoring for cheaper beef prices. Import quota legislation does not appeal to many of them.

Foreign sources are being permitted to supply too much of the United States market—a market our own people are perfectly ready to serve.

Just as beef imports are too high, so are imports of sugar, petroleum products, lumber, and a variety of other raw materials and manufactured goods.

In order to export, we must import. But surely a less damaging balance CAN be found.

## Mrs. Lamb in Tax Office

Mrs. Harold Lamb began work recently as deputy tax assessor collector in the office of Hubert Mauldin, who assumed duties of the office March 2.

Mrs. Lamb replced Mrs. Rita Owens, who resigned, while Mauldin succeeds Miss Louise Fulcher, who resigned to be married to Olmon Sweat of Quitaque.

## NEWS OF MEN IN SERVICE

SOUTHWESTERN TAIWAN —Marine Private First Class John H. Barton, son of Mr. and Mrs. Morris W. Barton of Wellington, is participating with Headquarters and Service Battalion of the Third Marine Division in a coordinated U.S.-Nationalist Chinese amphibious exercise called "Operation Backpack" being conducted off the coast of Taiwan.

Backpack is an exercise to test the amphibious capabilities and readiness of the forces of the Seventh Fleet and the Nationalist Chinese Navy. The exercise, with 40,000 men and 140 units participating, will culminate in an amphibious assault on beaches of southern Taiwan, and will demonstrate the effectiveness of the U. S. Seventh Fleet to rapidly move a significant combat force to a troubled area in order to assist an ally.

Prior to the assault, aircraft of the Seventh Fleet will soften beach defenses. In addition, support ships will conduct anti-submarine warfare exercises and the area surrounding the beachhead will be cleared of any obstructions and mines.

"Backpack" is similar to those exercises conducted periodically by units of the Seventhe Fleet with SEATO and other allied nations in the Far East to improve their proficiency in coordinated amphibious warfare operations and to maintain working relationships with allied nations.

## Shamrock Gets Ready for St. Patricks Day

SHAMROCK.—The spirit of the Irish is soaring high in Shamrock and Donegal fuzz is growing on the chins of business men who are stepping at a brisk pace, wearing green top hats and ties, in preparation for the 18th annual St. Patrick's Day celebration in this Texas Panhandle town.

Seibert Worley, former mayor of Shamrock, is general chairman of this year's festival.

"In this big event we need everybody," Worley declared, so he has appointed more chairmen than he can "shake a shilleghlagh at."

The steering committee is composed mainly of former general chairmen of the St. Patrick's Day celebration who still make their home in the Irish city.

Back in 1938, the Boosters Club grabbed the idea for the celebration, rolled up their sleeves and went to work. Sol Blonstein was the first general chairman.

This group of young men launched a celebration that was destined to grow into one of the most colorful extravaganzas in the Southwest, which draws some 40,000 visitors to the little town of a few more than 3,000 inhabitants, for a day of merrymaking each year on March 17.

Beautiful young colleens from over the area vie for the title of "Miss Irish Rose" as they ride down Main Street on fabulous floats that would be a credit to any city parade.

The busiest man in town is the "Chief Fuzzer" who is collecting fines from every clean-shaven Irishman he meets unless he can produce a shaving permit.

The big shindig in Shamrock each year is no longer a Panhandle-wide celebration, but it now draws visitors from faraway places. Even the "Auld Country" took notice and had a real Irish shilleglagh flown to Shamrock and presented to the mayor.

Fresh Shamrocks from the banks of the River Shannon are flown to the Irish city each year for distribution to visitors.

Passing tourists are stopping to see what's going on in a town with businessmen swinging up the street in green toppers, chin whiskers, and a broader grin than an Irish Paddy on the rocky road to Dublin.

The countdown is near for the 18th annual festival, and a warm Irish welcome is extended to all who join the throngs at the greenest spot in the Golden Spread on St. Patrick's Day.

# Demand Ups Area Price of Guar Beans

With guar beans in short supply for industrial processing needs, General Mills announces an area price boost of 50¢ per cwt. for domestic guar beans from the Texas-Oklahoma area 1964 crop production for processing needs at Kenedy, Texas processing plant.

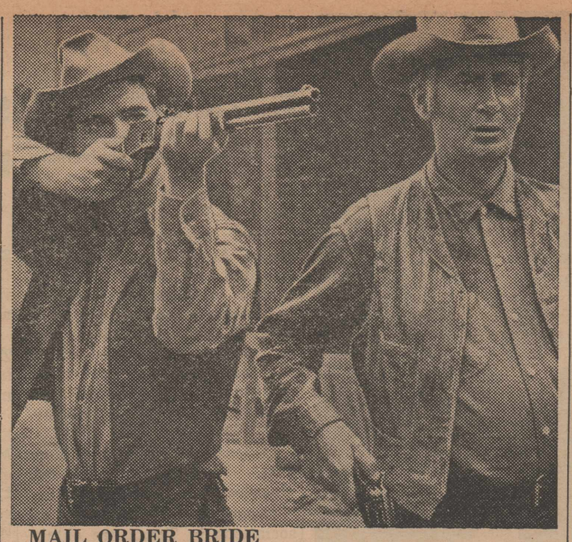

Singley Mill and Elevator is the local buyer for guar beans for General Mills.

For area farmers, this price boost reflects a $4 to $5 per acre increase for additional guar "cash-crop" income over 1963 guar crop market price, for profitable summer legume crop rotation systems important in soil fertility programs and economic farm practices.

The adaptable area for domestic guar bean production extends from the Rio Grande Valley of Texas through southwestern Oklahoma—west of the normal 35-inch rainfall line.

General Mills guar processing plant, established since 1952 at Kenedy offers a continuing market for domestic guar bean production.

In its long-standing program for expanded acreage in more widespread areas, General Mills establishes local guar buying agents to purchase the beans from the farmers at the f.o.b. local market price in new areas where guar acreage warrants such interest through cooperation of local marketing and shipping facilities.

# Deck's DIDACTICS

—By Deskins Wells

Down here in Texas where no presidential primary is held, it is difficult for us to understand all the publicity and TV time that was given the one in New Hampshire this week. After all there will be only 16 in the United States this year with the last one being held in California in June. That means that 34 of the states will express their preference by a different system. Even in the states that do hold presidential primaries the outcome is not really decisive for the delegates have to abide by the selection on only the first or second votes at the national conventions. Anyway Henry Cabot Lodge led the Republican ticket in a write-in campaign with Goldwater second and Rockefeller third.

There is no question as to who will be the standard bearer for the Democrats, with President Johnson practically assured of that position. The big question is going to be who will the Democrats select as the vice-presidential candidate. There are a number of able men who would strengthen the ticket, but if Bobby Kennedy is nominated as is being talked by some groups the fat is going to be in the fire as far as the Midwest and South are concerned.

Here is some news that saddens me not one whit. The National Observer reports that while Cleopatra may not be classed as a "turkey" just yet, the film is showing hen-house ways. That means it is not producing at the box office like it should if Twentieth Century Fox is going to get back a sizeable part of the 44 million dollars they spent on the production. Even if the show were a good one, which reliable critics say it is not, the off stage antics of Liz and Burton is enough to cause many people to stay away.

Personally I have never cared for Elizabeth Taylor. There is something sickening about her even on the screen. Besides I am a Helen Hayes, Claudette Colbert and Rosalyn Russell man myself—Helen for heavy acting and Claudette and Rosalyn for comedy. This may date me, but I will also take Gary Cooper over the singing cowboys of today.

That red station wagon you see members of the Wellington Volunteer Fire Department driving around has more to it than meets the eye. It is equipped with a dynamo capable of generating 2,000 watts continuously. If they are called to a place where the lights are off they can string wire and have twenty 100 watt bulbs glowing in a short time. Or if a building is filled with dangerous smoke, they can set up a fan, open a vent and blow it out making it safer for the firemen. Johnny Cagle is about as proud of the new equipment as he is of the shiny station wagon.

Herman Harris thinks spring will be early this year for a mocking bird has been singing in his yard since the first of the month. We have had our share of birds these last few weeks, robins, cardinals, wrens, three kinds of woodpeckers or maybe they are sapsuckers, one pair of green jays, numerous blue jays, a pair of mourning doves and a flock of blackbirds. But as usual Mrs. J. Frank Johnson comes up with something we do not have. She observed a migration of bluebirds, a host of them, working their way south across the Johnson ranch last week. You can have your collection of birds if you will turn on the sprinkler on dry hot days. It will attract the feathered friends much quicker than trying to feed them.

Mrs. Pearl Crow Coleman, who owns land near Lutie, wants to know about the Shell test south of Salt Fork. I can't tell her much because it is being drilled as a tight hole. No other company is helping Shell with the test and they are not putting out any information. They are still going down at a good clip.

Joe Hemphill writes to say: "Thanks for your reminder about the subscription. Looks to me like Deskins Wells signature has changed a lot, but maybe like me he is growing older." Well, I can remember when Joe Hemphill didn't act too old.

BIG ACTION FOR LITTLE PLAYERS

Wellington's Nickey Watts, extreme right, makes a toss to the basket in one of the exciting moments of the championship finals of the Dodson Peewee Tournament, that saw the Arnett and Wellington youngsters as competitors. Arnett won 27 to 7. James Edward Stevenson, No. 21, is guarding Watts at this point. He lives at Westview Boys Home and attends school at Arnett. At left in the picture is Gary Brewer of Wellington, and at the back, partially visible behind the Arnett boy, is Teddy Martin. Other Arnett players in this game were Mike McClendon, Steve Carter, Bruce Rambaugh, Danny Holder and Robert Scott. "The thing my team was talking about during timeout periods was what good sportsmen the Wellington boys were," said Bob Copeland, superintendent at Arnett, who coached the boys.

## Lcal Churches Take Part in Jubilee Revival

March 29 to April 12 are important dates for members of the 20 Southern Baptist Churches in the North Fork Association area. These dates mark the coming of "Jubilee Revivals." The revival effort will see the joining of hands from seven Baptist groups across the American scene.

For Southern Baptists, the dates will be the climaxing of a six year movement to start 10,000 new churches and 20,000 new missions by the end of 1964.

Known as the "30,000 Movement," the effort has made great progress. Reports showed that at the end of the 1963 year, only 8,000 more churches and missions were needed to reach the goal.

Churches participating in the Jubilee effort include: Allison Bethel, Wellington First, Wellington Faith, Kelton, Lela, McLean, Mobeetie, Quail, Samnorwood, Shamrock, and Wheeler. Rev. Dan Beltz, pastor of the First Baptist Church, McLean, is the chairman of evangelism for the North Fork Association.

Faith Baptist Church, one of the participating Wellington churches, is participating in this revival movement, but at an earlier date. This meeting will be held from March 15 to 22, according to the pastor, the Rev. Kenneth Quaid.

financial report. Vice President Glover will preside as chairman of the meeting.

In special observance of the association's 30th anniversary, gifts of pearl connotation will be presented at a special drawing, Van Pelt said.

The Memphis Production Credit Association, owned and operated by more than 570 farmer and rancher stockholder-borrowers, was organized on Jan. 5, 1934. All federal capital originally advanced for initial capitalization was retired in 1949 and the association has been wholly operator-owned and controlled since that time.

Offices are operated in Memphis, Wellington, Paducah, Matador and Quanah.

"Loan funds for all our associations in Texas are obtained through the sale of bonds to the nation's investing public," Van Pelt pointed out. Federal funds have never been involved for the associations' financing procedures, he emphasized.

Association personnel assisting in annual meeting plans include General Manager Van Pelt of Memphis, Assistant Manager Billy R. # SALT FORK SOIL CONSERVATION DISTRICT NEWS

A number of co-operators of Salt Fork Soil Conservation District are shaping waterways that will be sprigged to Bermuda grass this spring.

Two are Olan Cook and Zook Thomas, who had good luck last year sprigging Bermuda, although it was dry.

Probably the best results, however, were had by Travis McGuire west of town. He sprigged the grass about June 1, fertilized it, and was lucky enough to get a rain right afterward and the waterway was almost covered the first year.

Several co-operators are building diversion terraces also. J. I. Morgan and Ira Morgan of Quail built diversions to protect their land from outside water and help dry up a lake that has flooded them out for several years.

They believe they now can go ahead and raise their regular crops.

Zook Thomas also will start another diversion in the next few days.

M. B. Parrigin has finished his terraces under a cost shared Great Plains program, in which the government paid at the rate of 70%.

Grass seeding is in full swing. Some of those now planting or who have completed planting are Garland Hightower of Dodson, Mrs. Charley Starkey west of town, Marvin Knoll of Lutie, J. F. McIntush of Quail, John Coffee and W. S. Moody of Wellington.

About half a dozen more are due to start soon.

## New Equipment Ordered for Little League

Little League baseball directors met Monday night to order new equipment and continue work on plans for the upcoming season.

"We'll have to spend quite a bit on replacements this year," said Bob Crawford, president.

New uniforms will be ordered for two teams, along with a considerable amount of other equipment, costing altogether around $450, Crawford said.

No new equipment was bought during the last two seasons, he pointed out.
