Conservation Program Sign-Up Is Underway

Friday, March 14 Final
Date To Certify Acres

Sign-up begins tomorrow, Monday, for all farmers and ranchers interested in placing their erodible land in the new Conservation Reserve Program. Interested producers will have two weeks, through April 14, to sign up and bid their land for the program.

U.S. Department of Agricul-

ture agencies are cooperating across the nation in an effort to entice some 40 million of the nation's estimated 69 million erodible acres into the program. Land, if accepted into the program, must have a permanent cover, such as grass or trees planted, and maintained on it, for 10 years.

To be eligible, and to enter the program, a landowner submits a bid which is the price per acre he would accept for taking the land out of production.

If the Agricultural Stabilization and Conservation Service accepts the bid, the operator must abide by a conservation plan for 10 years and in turn, receive in annual payments, the amount he bid.

In addition, the government officials say they will pay 50 percent of the cost necessary to establish the permanent cover.

In Bailey County, it has been estimated that some 25 percent of the land will qualify for the

Teacher Tests

Will Be Given

Here March 10

Muleshoe Independent School District Superintendent H. John Fuller said the local teachers in the Muleshoe school system will be administered TECAT (Teacher Literacy Tests) on Monday, March 10, in the Muleshoe High School cafeteria.

The superintendent said the cafeteria will be set up to give the tests to 65 teachers each session, and he expected teachers from outside the local system to be tested in Muleshoe.

According to predictions, some 10,000 teachers in Texas will fail the test. This will be five percent of the teachers in the school system in the state. Superintendent Fuller says that if five percent of the local teachers fail the test, that will be five teachers, but, he does not expect that many (five) to fail.

Coordinator for the local testing will be former Muleshoe resident, Mattie Hicks, who is now with South Plains College, Levelland. Mrs. Hicks was formerly Director of Nursing at West Plains Medical Center.

Testing will begin at 7:30 a.m. on Monday, March 10, and although the test is expected to take 2-3 hours to complete, the teacher has unlimited time to complete the test, added Fuller.

At a future date, all administrators will also be required to take the test in order to keep their Texas certification, said the superintendent. He said that even the Texas Commissioner of Education will be required to take the Teacher Literacy Test.

There will be no school on the Monday the tests are conducted.

Local Schools To Celebrate School Week

Texas Public Schools Week is coming up March 3-7, and Muleshoe Independent School District students are among three million young Texans planning activities to show off what they're learning.

Schools will issue special invitations to parents and the community to visit classrooms and watch education in action, according to H. John Fuller, superintendent.

In conjunction with the Texas Sesquicentennial, school districts will be utilizing the theme "Celebrate Texas Education."

"Naturally, taxpayers and parents are always welcome in our schools," Fuller said. "But, this special week, we're going all out to get them to come to see the exciting things happening in our district. There will be open houses and displays of student work in the secondary schools," he said.

Elementary schools observed American Education Week in November, but parents are welcome to visit Neal B. Dillman and Mary DeShazo Elementary schools at anytime.

Texas Public Schools Week was begun by the Masonic Lodges of Texas to recognize the contributions made by the state's free system of education. It was planned to coincide with, or to follow, the anniversary of Texas Independence on March 2.

Special activities are scheduled for Watson Junior High and High School on Thursday, March 6 from 7-9 p.m.

Fred Mardis, principal, announces that a Science Fair and History Fair are scheduled for the Junior High and students will display their projects, posters, and reports.

At Muleshoe High School, principal Wayland Ethridge invites parents and patrons to visit with teachers and view students' work which will be displayed.

A slide presentation will be highlighting the Muleshoe Independent School District -- "A Texas School District With High Expectations" -- and will be shown in the High School library during the evening.

A special emphasis will be placed on the Texas Sesquicentennial Celebration during Patriotic Week - April 21-25.

DRAGGIN' HIS TAIL BEHIND HIM--Friday morning, at approximately 10:25 a.m. Mickey Price was flying north about four miles east of Muleshoe. Price was piloting a plane owned by the Lockers, and clipped a highline pole, snapping the highline pole off midway and stringing high-tension wires across the highway. Price crash-landed in a wheat field just north of the highway, and walked away from the crash uninjured. He is pictured here (in the cap) talking with one of the Lockers. The debris in the background is part of the plane, including the wheel, which were snapped off.

Two Essay Entries Received For Sesquicentennial Contest

In an effort to add 'spice' to the local celebration of Texas' 150th birthday, which is going on all this year, the Muleshoe Chamber of Commerce and Agriculture, through its manager, Toni Eagle, planned an essay contest.

Unfortunately, very little interest has been exhibited toward the essay contest, and only two entries were received.

Because of the efforts expended by the two youth who entered the contest, it has been determined to reproduce both their essays, and to state definitely, they are BOTH winners.

The essays are as follows:

The Texas Revolution

Texas leaders after a few battles with Mexican soldiers met in Austin on November 3, 1835. A temporary government was organized; Colonel Benjamin Milam led Texas

Troops in an attack on San Antonio. The Mexicans surrendered on December 11. Santa Anna was alarmed by the fall of San Antonio. A few Texans in the city withdrew behind the walls of the Alamo. Santa Anna's forces attacked the Alamo on February 23 to March 6, 1836 when it fell. Jim Bowie, Davy Crockett, and William B. Travis were killed in the battle. On March 2, Texas leaders met at Washington-on-the-Brazos. A declaration of independence from Mexico was made. Texas chose David G. Burnet as a temporary president and Sam Houston as commander of the army.

Santa Anna moved swiftly, after the fall of the Alamo, to put down the revolution. More than 330 Texas prisoners were shot to death at Goliad on March 27. Texas continued to fight, they were inspired by the battle cries of Remember the

Alamo. After a long retreat the army of Sam Houston camped near Santa Anna's forces. April 21, Texas took the Mexicans by surprise. They captured Santa Anna's army in the battle of San Jacinto.

By April Franklin

An Exciting Moment In Texas History

It was the Texas Centennial year of 1936. Governor James V. Alfred needed extra help in his office. He asked Senator Nelson of Lubbock to send him a good secretary for a short time. Senator Nelson sent my grandmother the late Olabella Singleton Lamb. Governor Alfred liked her work so much she never went back to the Senator's office.

My grandmother also became Mrs. Alfred's personal secretary in the mansion. Because the First Lady did not like politics, Grandmother helped entertain people like Mrs. Roosevelt whom she said was most charming. Vice President John Nance Garner, and Oveta Culp Hobby. Lyndon Johnson who was a young politician was a frequent visitor.

Each of the Governor's secretaries had a Centennial project. My grandmother kept scrapbooks for the Alfred administration for her project. She thought it was so important that she kept them for all 4 years he was in office. Because of her, the scrapbooks are on loan now for

Cont. Page 6, Col. 2

Little Dribblers In Action Here Thursday Night

Thursday night, four games were played by the Muleshoe Little Dribbler teams, and results were as follows:

Wilson Appliance 23, with George Tolles high scorer with 12 points; and Sonic 16, with Robbie Guana high scorer at 10 points.

Pay and Save downed First Bank, 16-8. Evan Kelly was high scorer for Pay and Save with eight and Roy Perez Jr. had four points for First Bank for high scorer on that team.

Poyners outlasted Muleshoe State Bank 14-8, with top scoring for Poyners shared by Chad McCormick, Chris Fuller and Chad Mason, each with four points; Chad Freeman was high scorer for Muleshoe State with six.

Unbeaten Western '66' kept their unblemished record as they defeated the Fair Store, 24-12. High scoring for Western '66' with eight points each were Shawn Roberts, Justin Morris and Arturo Ruiz. Tommy Gutierrez had six points to lead scoring for The Fair Store.

CLEANING UP THE MESS--Workmen from Southwestern Public Service Company, Bailey County Electric Company and the Texas Department of Highways and Transportation were on hand to clean up the debris following a plane crash four miles east of Muleshoe Friday morning. One highline pole was snapped off and several 'short arms' were broken, with high voltage wires strung all over the place. The highway was blocked by members of the Bailey County Sheriff's office while the wires were removed from the highway.

Around Muleshoe

Just after lunchtime Friday, Jack Reamy, administrator at West Plains Medical Center, called The Journal to inform them he had resigned his position at WPMC to move from Muleshoe.

He said he was moving from Muleshoe, and had submitted his resignation to be effective on Friday, February 28.

Muleshoe City Police Chief Les Irvin informed The Journal Friday afternoon that Muleshoe City Patrolman Dewayne Haney had been awarded the "Lone Star Transfer Scholarship Award," to attend Eastern New Mexico University at Portales in the Fall of 1986.

The scholarship is for \$500 each year to complete his Bachelor's degree or four full semesters, (whichever comes first). Chief Irvin said Haney was told the scholarship would be adjusted upward to compensate for out-of-state tuition fees.

Haney, who has attended the Clovis Campus of ENMU for the past two years, was awarded the scholarship due to his 'outstanding academic record.' He carries a grade point average of 3.87 of a possible 4.0.

All interested parents of juniors and seniors at Muleshoe High School are encouraged to attend a special meeting of the junior-senior prom group at 5 p.m. on Monday, March 3, at K-Bob's.

Committees will be named during this meeting.

On February 13, the Three Way School Board of Trustees called a trustee election for April 5, 1986, with absentee voting being conducted March 17-April 1.

Joe Sowder was appointed election judge, with Jack Hodnett, R.L. Davis and George Tyson being appointed clerks. Estela Duarte will serve as absentee clerk.

Prospective candidates may pick up applications for candidacy in the school business office. Terms of Jack Lane and Mickey Sowder will expire. Deadline for filing as a candidate is March 5.

Staci Vandiver, daughter of Mr. and Mrs. Butch Vandiver, is one of 648 Abilene Christian University students listed on the Dean's Honor Roll for the 1985 fall semester.

The Lazbuddie ISD Board of Trustees has three places on the ballot for the April 5, 1986 trustee election. Two openings will be filled for three year terms, and one will be for one year term.

For persons planning to place their name on the official ballot, the deadline for filing for a position is March 5. Persons filing for a position on the ballot should designate which term they are applying for.

Absentee voting will begin March 17, and proceed through April 1. Absentee voting will be from 8 a.m.-4 p.m. weekdays at the Lazbuddie ISD administration office.

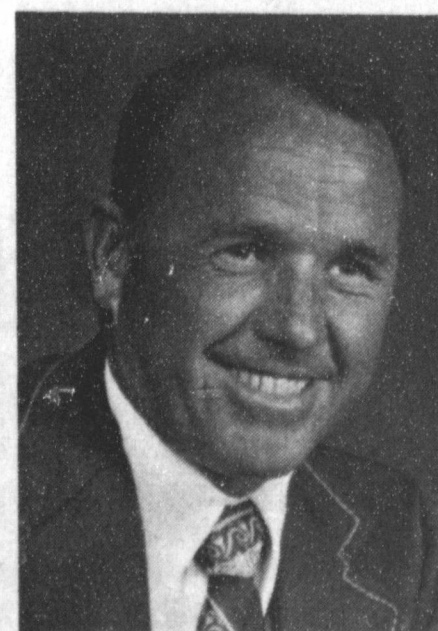

More than 1,950 students at Texas Tech University qualified for the president's and dean's honor rolls in the university's six colleges during the 1985 fall semester.

Students from Muleshoe Making the honor rolls included:

Kristi Campbell, on the president's list; Cynthia Phillips, Kelly Hamblen, Kristi Ethridge, Kenneth Craft, Stacey Campbell, Preston Scoggin and Toni Rae Wheeler, on the dean's list.

Bailey County Commissioners Court will meet in Special Session in the Bailey County courthouse, Monday, March 3, beginning at 10 a.m., according to Bailey County Judge Gordon H. Green.

Items on the agenda include

HOWARD WATSON

ranked for the honor.

Honored were Ralph Godfrey, James 'Pat' Hancock, and Fritz Struve, all of Lubbock and Howard Watson of Muleshoe.

Howard Watson currently serves as district training chairman, Webelos leader, Troop committee chairman, and is on the property committee for the South Plains Council.

He holds the District Award of Merit, Scouter Training Award, Woodbadge Beads, Brotherhood Honor in the Order of the Arrow, Cub Leader Training Award, and the Scouters Key.

Watson has served in various positions in Scouting, such as District sustaining membership enrollment chairman, staff for National Jamboree, staff for Woodbadge, Scouting coordinator, Pack committee chairman and assistant scoutmaster.

He has served Muleshoe through Jaycees, Kiwanis Club, Airport Advisory Board, Chamber of Commerce, 4-H and the Muleshoe School Board.

Watson currently serves as secretary of the school board in the Muleshoe Independent School District; sits on the Board of Directors for the Muleshoe Kiwanis Club; serves on the Airport Advisory Committee for the City of Muleshoe; participates in 4-H leadership as Shooting Sports project leader; and is Troop committee chairman for Troop 620 of the Muleshoe Boy Scouts.

Howard and his wife, Judy, have two sons, Troy and Neal. They have lived in Muleshoe since 1958, and are members of the Primitive Baptist Church.

Miss Withrow, Corley United In Marriage

Rozella Marie Withrow became the bride of John Lance Corley in a candlelight ceremony Saturday Feb. 15 at the Sudan Church of Christ. Mike McDonald, minister, read the double ring vows.

Parents of the couple are Mr. and Mrs. James Withrow of Sudan, Mr. and Mrs. George Pyle of Clovis, N.M., and Mr. and Mrs. Vernon Corley, Jr. of Albuquerque, N.M.

The church was decorated with spiraling brass candelabra. Centering the rostrum was the couple's memory candle.

The wedding music was provided by a choral group from Lubbock. Sherry Fisher sang the "Theme From Ice Castles".

Presented in marriage by her father, the bride wore a gown styled in white silk organza and lavishly trimmed in Chantilly lace. The Queen Ann neckline featured a standup ruffle of soft organza. The bodice was styled with an empire waistline and was overlaid with appliques of Chantilly lace, lavishly embroidered with seed pearls. Further lace appliques circled the waistline. The back of the bodice featured a soft circled yoke and was outlined with lace. The full sleeves were of Chantilly lace ending in fitted cuffs and narrow ruffles of organza. The cuffs were embroidered with seed pearls.

The full skirt featured two rows of Chantilly lace and six rows of ruffled organza which formed a cascade from the center of the skirt to the floor in front. The back of the skirt featured twelve rows of Chantilly lace and ruffled organza which swept into a full chapel train.

Her fingertip veil of illusion

TOPS CLUB

Muleshoe TOPS Club chapter No. 34 met at 6:30 p.m. Thursday, Feb. 20 in the meeting room of Bailey County Electric. Clara Lou Jones, president, called the meeting to order. The TOPS pledge was recited and the fellowship song sung.

Ernestine Steinbock, weight recorder, called the roll with ten members present. Evelene Harris, secretary, read the minutes of the previous meeting and they were approved as read.

Everyone was reminded of the SRD (State Recognition Day) to be held April 25-26 at the Civic Center in El Paso. Deadline to register will be March 21.

Ernestine Steinbock was named best loser for the week. Laverne James was first runner up and Evelene Harris was second runner up.

The meeting was closed with the singing of the goodnight song.

was gathered to a cap of Chantilly lace embroidered in seed pearls. The veil was edged in Chantilly lace. The bride carried a cascading bouquet of mauve silk flowers atop a white Bible which her mother and sisters has used in their weddings.

She used the Bible as something borrowed. She carried two rings her grandmothers wore and also her pearl necklace, given to her by her aunt, as something old. She wore the traditional blue garter. In her shoes she wore pennies minted in the year of their births.

Attending the bride were her sisters, Martha Drake of Littlefield, and Ruth Lance of Sudan. The junior bridesmaid was Lisa Kirby of Abilene. The bride's attendants wore formal length gowns of mauve polyester featuring a sheer overdress and carried mauve colored bouquets.

Best man was Eric Lundering, of Clovis, N.M. and groomsman was Bryce Corley, brother of the

groom, also of Clovis. The groomsmen wore dark gray tuxedos and the groom wore a white tuxedo.

Ushers were Dale Johnson and Randy Wiseman of Lubbock. Jolene and Janey Corley of Clovis, sisters of the groom, registered the guests.

A reception was held following the ceremony in the fellowship hall. The bride's table was covered with a white lace cloth with silver and crystal appointments.

Serving at the table were Judy Wiseman of Canyon and Sandra Johnson of Lubbock. Members of the houseparty were Mrs. Pudd Wiseman, Mrs. Calvin Wiseman, Mrs. Jerry Ray, Mrs. Wayne Swart and Connie Hill.

The bride is a graduate of Sudan High School and attended Lubbock Christian College. Corley is a graduate of Clovis High School and attends Eastern New Mexico University at Clovis.

SMALL PIECE OF WORLD'S LARGEST CAKE--Mrs. Jeanett Fine shows a small piece of the World's Largest Cake, a 45 ton, 110 by 80 feet birthday cake marking the 150th anniversary of Texas' independence. Mrs. Fine was in Austin Feb. 20 when Britain's Prince Charles cut the cake to celebrate Texas Sesquicentennial, and decided to bring a small piece home to her grandchildren, Misty and Dusty Ramage. Mrs. Fine said that although she didn't see the Prince, she did get to help eat the cake, which was decorated in red, white and blue.

He that hath right, fears; he that hath wrong, hopes.
--John Ray.

It is possible to go wrong in many ways, but right in only one.
--Aristotle.

Blake Lacewell In This Week's Senior Spotlight

Blake Lacewell, 18 year old son of Tommy and Pat Lacewell, is in this week's Senior Spotlight at Sudan High School. He was born in Clovis, N.M. on Dec. 5, 1967, and is 5 feet and 11 inches tall, has blonde hair and blue eyes.

He has been active in football; golf; FTA, where he serves as president; and Industrial Arts but he says, "I'll be glad when I get out."

It was reported that Blake likes to go to sleep with the radio on as loud as it will go, but when his favorite song "Minutes to Memories" comes on he is wide awake.

Some of his favorites include: singer, Don Williams; group, Exile; food, steak; color, black; season, winter; sport, football; and TV show, Airwolf; Blake also enjoyed the movie "Back To The Future" and his favorite actor and actress are Jan-Michael Vincent and Lea Thompson.

He hopes to attend Texas A&M upon graduation. At SHS drafting is his favorite subject and Coach Quisenberry is his favorite teacher.

Blake said his goal in life is to own a two-story house and have a whole bunch of kids.

BIBLE VERSE

Know ye that the Lord he is God: it is he that hath made us, and not we ourselves.

1. Who is the author of this verse?
2. What does this verse warn us against?
3. What is the rest of the verse?

Answers
1. The Psalmist--probably King David.
2. Against the sin of worry.
3. "We are his people, and the sheep of his pasture."

Rebekah Lodge

Muleshoe Rebekah Lodge met Tuesday, Feb. 25 at the Lodge Hall. Noble Grand Mary Franklin called the meeting to order and Ona Berry presented the American Flag. Opening prayer was given by Terrie Snell after which the roll was called. Twenty members were present.

Minutes of the previous meeting were read and approved. It was reported by Dimple Sims and Adele Tompkins that the Love offering was delivered to Clinton and Juanita Busby last Friday afternoon.

Sandi Robinson, Patsy Chance and Fern Davis reported on the Pre-Association meeting held in Levelland last Saturday evening. They told the group that the Muleshoe Lodge will be presenting the Memorial Service at the Association, which will be held in Levelland on the 4th or 12th of April. A letter is

expected to give the exact date. It was also reported that Levelland Lodge will present a Rebekah Degree Drill Team and also a Competition Drill Team so they urged all Muleshoe members to begin working hard on their parts so a good showing will be made at competition.

The Secretary-Scribes Association will be meeting in Muleshoe on March 9th. This was the meeting that was postponed during the last snow storm.

The committee on extending the drape on the charter reported that they would be performing this ceremony next week on March 4th.

The lodge elected to buy matching material and pattern for dresses to wear to Levelland for the Association and also to wear during any initiations held here in Muleshoe.

Thursie Reid, Fern Davis and Louise Allen were appointed to the committee to work on the Memorial Ceremony to be given at Association.

With no further business lodge was closed and refreshments were served.

Sudan Firemen's Auxiliary Hosts Valentine Party

A "Valentine Party" was held by the Sudan Firemen's Auxiliary for their husbands, Friday, Feb. 14 at the community room of the First National Bank.

Mexican food was served by the members to the following couples who attended: Doris and Harold May, Norma and Charles Burnett, Louise and Sam DeLaRiva; Mary Ann and Philip Gordon, LaRhonda and Rick Hill, Shonda and Mike Hill, Linda and Bob Summer, Dorothy and Orville Hill and associate member, Ila Ruth Gilreath.

Following the meal, games and dominoes were played. Mike Hill and Ila Ruth Gilreath won the door prizes.

The auxiliary met Feb. 10 for their regular meeting for February. Plans were finalized for a "Fingerprinting Clinic" to be held March 15, to fingerprint the children of the Sudan community.

Refreshments were served by Linda Summer to other members who were present, including: Dorothy Hill, Norma Burnett, Ann Carson, Doris May, Mary Lou Burns, LaRhonda Hill, Shonda Hill, Louise DeLaRiva and Mary Ann Gordon.

FEBRUARY BIRTHDAYS--Five residents of the Muleshoe Nursing Home celebrated their birthdays during February and were honored with a birthday party Thursday afternoon in the nursing home day room. Hosting the party was the Needmore Community Club. Muleshoe Floral and Gift provided the flowers and Odessa Shanks played the piano. Celebrating birthdays were B.B. Street (standing) who was born Feb. 10, 1895; D.J. Gage, born Feb. 19, 1912; and Margaret Beard, born Feb. 2, 1910. Others celebrating birthdays but unable to attend the party were; Josephine Wenner, born Feb. 14, 1890; and Inez Allgood, born Feb. 11, 1896.

WIFE Sponsors Speaker From Unemployment Agency

WIFE is sponsoring a speaker from Texas Unemployment Agency at Lubbock on March 3 at 7:30 p.m. in the Castro County Expo Building. With the quarterly payment due March 31 everyone needs to be aware of the particulars of the law. This meeting is open to the public. At the February 17 meeting,

Panhandle Agri Partners was selected as the name of the local organization of WIFE. After the business meeting, everyone was asked to write letters to members of the Tax Reform Commission urging the continuance of investment credit and the averaging of taxes.

Letters were also written to area Representative Combest and Senators Gramm and Bensten encouraging them to vote for higher loan prices and mandatory layout, on the Farm Bill now being considered.

WIFE is dedicated to the belief that the economic stability of the United States is directly related to prosperity in agriculture, the largest industry in the nation. WIFE is working for parity at the marketplace for all raw agriculture products whether food or fiber.

All of us can play a part in preserving our natural resources and our environment. While kitchen appliances use only a small percentage of the total energy used in the home, small amounts multiplied by repeated conservation and many people, can add up to significant energy savings. And, think of how you might invest the dollars saved by your personal conservation efforts.

Here is a list of energy-saving practices for you to consider: -Keep cooking appliances in good working condition. Have faulty elements or switches serviced as soon as possible for top efficiency and safety.

-Use a heavy pan with a tight fitting lid on the surface of the range for slow cooking.

-Cook vegetables in a minimum of liquid to conserve energy and vitamins.

-Do not use aluminum foil to line the oven. This blocks air circulation and could change the oven temperature as much as 50 degrees. Wrap foods in foil with the shiny side in to shorten cooking time.

-Avoid peeking! Each time you open the oven door the temperature drops from 25-50 percent and you lose up to 20 percent of the heat.

-If you are preparing a dish that can be cooked either on top of the range or in the oven, use the range top.

-Fill the oven when you have it on. Plan menus with foods that cook at the same temp in the oven, like vegetables, main dish, bread, dessert, plus something for the next day. Variations of 25 degrees can still produce good results except for baked goods.

-Preheating the oven isn't necessary in most cases. Research findings indicate that as much as 10 percent of the energy used for baking can be saved by eliminating preheating.

-Match pan size to cooking unit so that heat enters the pan instead of the air in the room. Research indicates that using larger sized pans on smaller units is even more efficient.

-Plan ahead! Thaw frozen casseroles, meat and other frozen foods in the refrigerator to reduce boiling or baking time.

WMU Weekly Meeting

WMU of the Trinity Baptist Church met Tuesday, Feb. 25 at the church for Bible study. Doris Barber led the opening prayer.

"When Losing Is Winning" was the topic of the Royal Service. It was reported that Week of Prayer will begin next Tuesday.

Clara Coffman dismissed the group with a prayer. Those present included: Ms. Coffman, Ms. Barber, Maxine Carter, Pearl Dunlap and Wenona Spears.

Ms. Spears reported that they had a wonderful day and received many blessings.

One good thing about the advice that editors pass out is that no one has to take it.

Journal Society Policy

A processing charge of \$3 is made when a photo accompanies any wedding, engagement, or anniversary with the exception of anniversary of 50 years or more.

Five dollars will be charged for any shower picture taken by the Journal and \$3 charged for any shower picture accompanying a story. Pictures may be picked up after the article appears in the paper.

Wedding, engagement, and anniversary stories must be in the Journal office by Monday noon for the Thursday paper, and by Thursday noon for the Sunday paper.

After that time, stories will be run on a space available basis. Any wedding more than two weeks old, when received, will be edited and only the basic information will be included.

Shower pictures will not be taken without a 24 hour notice and copy must be in the office by 5 p.m. Monday for the Thursday paper and 5 p.m. Thursday, for the Sunday paper.

WARRANTY DEEDS

Vijay Mittal and wife, Ameeta Mittal to Joe Dean Smith and wife, Betty Gayle Smith--All of Lot No. (6), Parkridge Addition, First Installment to the City of Muleshoe, Bailey County, Texas.

Bailey County Farm Bureau to Hector J. Leal--A tract of land out of the (W/2) of Section (40), Block Y, WD&FW Johnson Subdivision No. 2, in Bailey County, Texas.

Myrtle Jones to H.D. Ramage and wife, Betty Ramage--TRACT NUMBER ONE: Tracts Numbers (1) containing 75.5 acres, (6) 79.85 acres, and (7) containing 76.56 acres of the John DePauw Subdivision of parts of Sections Numbers (38), (39), (54), and (55), Block Y, WD&FW Johnson's Subdivision No. 2, Bailey County, Texas.

TRACT NUMBER TWO: (7.85) acres of land out of Tracts Numbers (2) and (3), John DePauw Subdivision of part of Section Numbers (38), (39), (54), and (55), Block Y, WD&FW Johnson's Subdivision No. 2, Bailey County, Texas.

Charles Shaw and wife, Sharon Shaw to Chalmer L. Davis and wife, Mary E. Davis--All of Lot (4), Block (2), Harvey Addition to the City of Muleshoe, Bailey County, Texas.

W.T. Millen and wife, Argilee Millen to Jesse Ansil Locke and wife, Linda Joyce Locke--A (1) acre tract of land out of the

Alvin Lingnau

Local Man's Father Dies

Funeral services for Alvin Lingnau, 70, of Littlefield were held at 2 p.m. Friday, Feb. 28 in the Emmanuel Lutheran Church with the Rev. Gary Archbold, pastor, officiating.

Interment was in Littlefield Memorial Park under the direction of Hammons Funeral Home. Lingnau died at 2:45 a.m. Wednesday at his residence following an illness.

Born in Vernon, he moved to Littlefield in 1947. He married Ruby Ogerly on Dec. 26, 1937, in Littlefield. He was a farmer and a member of the Emmanuel Lutheran Church.

Survivors include his wife; two sons, Alfred of Lubbock and Hubert of Muleshoe; a daughter, Carolina Bessie of Lubbock; a brother, Otto of Farwell; a half brother, Wilbert Kalbas of Farwell; and 10 grandchildren.

N/2 of Section 77, Block Y, WD&FW Johnson Subdivision No. 2, Bailey County, Texas.

W.T. Millen and wife, Argilee Millen to Kenneth Wayne Powell and wife, Rose Lee M. Powell--A 0.36 acre tract of land, more or less, out of the (N/2) of Fractional Section Number (91), Block Y, WD&FW Johnson's Subdivision No. 2, in Bailey County, Texas.

Kenneth Wayne Powell and wife, Rose Lee M. Powell to Grady Lee Free and wife, Valerie M. Free--A 2.5 acre tract of land out of the Northwest corner of Section 91, Block Y, WD&FW Johnson Subdivision, Bailey County, Texas.

Conservation Reserve Question

The following questions and answers are based on preliminary information about the Conservation Reserve Program (CRP).

PURPOSE

1. Q What is the purpose of the Conservation Reserve Program (CRP)?

A To protect the Nation's natural resource base by removing highly erodible cropland from production. Removal will reduce sedimentation in streams and enhance wildlife habitat. Another goal of the program is to increase commodity prices received by farmers by curbing production.

2. Q Why the big push on a conservation reserve now?

A The current state of the farm economy calls for a production adjustment program to decrease supply and thereby increase the prices received by farmers. At the same time, highly erodible cropland is being farmed, thereby contributing to the nation's soil erosion. The CRP is a way to achieve erosion control on cropland over the long term while immediately helping to stabilize farm income and the overall farm economy.

3. Q With the concern over reducing the federal budget deficit, how can the Department justify this new program?

A Depending upon the total enrollment and the average accepted bid per acre, this program may reduce net Commodity Credit Corporation (CCC) outlays by reducing expenditures in price support programs.

4. Q What does "highly erodible" mean?

A For CRP purposes, highly erodible means land capability classes II-V eroding at higher than two times the soil less tolerance, or land capability classes VI-VIII.

5. Q How will this program work?

A Annual rental payments up to \$50,000 per year in cash or commodities will be made to farm owners or operators who enter a ten-year contract to convert highly erodible cropland to permanent vegetative cover. A 50% cost-share payment will also be made to participants for establishment of the cover.

6. Q What is "soil loss tolerance"?

A Soil scientists say soil loss tolerance approximates the rate at which natural processes can replace soil. On deep soils, the "tolerable" rate of erosion -- expressed as the "T" rate -- is usually 4 to 5 tons per acre per year. On shallower, more fragile soils the T rate is much lower.

7. Q Will the land just sit idle?

A The designated area will be devoted to a conserving use during the life of the contract. Harvesting, grazing, or other commercial use of forage is NOT allowed. Maintenance measures, such as weed control, will be required. The area may be managed for wildlife habitat and thinning, pruning, and other maintenance of tree plantings may be conducted if specified in the conservation plan.

8. Q How does the CRP differ from the old Soil Bank of the 50's?

A There was no attempt on USDA's part to limit the lands enrolled in the Soil Bank to croplands that were highly erodible or otherwise fragile. It was primarily a production reduction program.

The CRP, however, is primarily an erosion control program and is aimed at the most highly erodible cropland in the Nation. Therefore, the on-site and off-site damages caused by soil erosion will certainly be reduced more sharply.

9. Q What would prevent this fragile land from being overworked again at the end of the program? Couldn't the cycle start all over?

A If possible, one-eighth of the acreage placed in the CRP will be planted to trees. Tree plantations tend not to be converted to row crops quickly. Many acres will be planted to native grasses which will be less likely to be plowed out than pasture grasses. It is anticipated that breaking out class IVE-VIII land will be discouraged by sodbuster provisions and conservation compliance at the end of the contract period.

ACREAGE

10. Q How much acreage is involved? What are the yearly enrollment goals?

A USDA may accept up to 45 million acres during the life of the CRP. The yearly goals are as follows:

- 1986 crop year: at least 5 million acres.
- 1987 crop year: 10 million or more.
- 1988 crop year: 10 million or more.
- 1989 crop year: 10 million or more.
- 1990 crop year: 5 million or more.

11. Q How much land is eligible?

A Approximately 104 million acres meet the land capability class and erosion rate criteria. Those that meet the definition of eligible cropland may be somewhat less.

12. Q Where is the major erosion danger? Will the money go there?

A Nearly every county in the nation has some highly erodible cropland. The location of acres placed under contract will be determined by where the sign-up occurs and by the bids accepted.

13. Q How will the program be applied nationwide?

A "Pools" will be set up across the country. Farmers will submit bids to county offices stating the annual rental payment they would accept to enroll their land in the CRP. County offices will submit the bids to the pool in which they are located. Bid acceptance will be based on the rental rates per acre offered.

14. Q What sections of the country have the largest amount of land eligible for the reserve?

A The Corn Belt with 25%, has the largest amount of eligible acreage. The Southern Plains, Northern Plains, and Mountain States account for 49%. Texas has the most acres of any individual state.

15. Q If my farm has a farm program commodity base, how will it be affected by participation in the CRP?

A The aggregate total of all bases, allotments and quotas will be temporarily reduced during the life of the contract in the same ratio as the acreage placed in the CRP is to the total cropland acres on the farm.

16. Q My farm has a wheat base, a corn base, and a tobacco base. Can I select which base is to be reduced? Can I retain my tobacco base?

A Yes. Your aggregate base will be reduced. However, you designate which individual crop bases to reduce.

COST-SHARING AND RENTAL PAYMENTS

17. Q How much money can I expect to receive for placing cropland in the conservation reserve?

A You will receive annual rental payments for the 10 years that your land is in the reserve. The actual amount you receive will depend on your bid per acre and the number of acres under contract. You will also receive 50 percent of eligible costs of establishing trees or grass on the acreage placed in the reserve.

18. Q How long is the contract between a farmer and USDA?

A 10 years.

19. Q When can a farmer expect payment?

A Regarding any annual rental payment, as soon as practicable after October 1 of each calendar year. Regarding cost-sharing payment, as soon as possible after the farmer reports that the practice is installed.

20. Q What percentage will USDA pay on conservation payments to farmers?

A Fifty percent of the eligible costs of establishing eligible cover.

21. Q How is the amount of annual rental payments to farmers determined?

A Through submission of bids which state the annual rental rate per acre the farmer is willing to accept.

22. Q What's the difference between a rental and conservation payments?

A A rental payment compensates a farmer for retiring highly erodible cropland from crop production. A conservation payment partly reimburses a farmer for one half of the one-time cost of establishing vegetative cover.

23. Q Are payments taxable as gross income for federal income tax purposes?

A All rental payments are. Cover establishment cost shares may be. IRS will be making a decision on this.

24. Q If a farmer is delinquent on an FmHA loan, will the CRP rental payment be made to the farmer, or will it be used to repay the delinquent loan?

A CRP payments will be set-off to cover indebtedness to the Federal Treasury.

25. Q Are there any limitations on CRP payments?

A The total amount of rental payments for any fiscal year may not exceed \$50,000. There is no payment limit on cost-sharing for cover establishment.

26. Q Does the CRP rental payment limitation affect other USDA program payments a farmer may be eligible for?

A No, they are in addition to the total amount of payments a farmer is otherwise eligible to receive.

27. Q How will the cost of the CRP be offset?

A Over the 10-year period, CRP outlays will be offset by reduced outlays for annual loans, deficiency payments and storage costs under existing commodity price support and land retirement programs.

28. Q What are the benefits of CRP?

A The CRP will:

- Remove the most highly erodible and severely eroding cropland from production, thereby reducing erosion and sedimentation, improving water and quality, and improving wildlife habitat.
- Reduce production of commodities and thereby reduce expenses of ongoing commodity programs.
- Increase commodity prices received by farmers, and somewhat reduce the need for annual production adjustment programs.

29. Q What specific environmental effects are projected for the reserve?

A No adverse environmental effects are projected for the CRP. The positive environmental benefits of the CRP include:

- Approximately 760 million tons of annual soil erosion will be prevented based on an enrollment of 10 percent of all cropland. Much of this erosion reduction could be permanent, if farmers elect to retain protective cover even after the contracts expire.
- The amount of sediment reaching streams and other surface water from reserve lands will be reduced annually by 211 million tons.
- The amount of pesticides applied annually will be reduced by about 60 million pounds, or more than 15 percent of that applied on cropland in 1982. It is possible, though, that some pesticides will be used in preparing the land for seeding or tree planting.
- Wildlife habitat quality will improve significantly, particularly where retired lands are near wetlands.

30. Q How do I know if my cropland is eligible for the reserve?

A Your cropland is eligible for the program if:

- it is in capability classes II - V and it is eroding at more than twice the tolerance rate for the soil as specified by SCS field office technical guides, or
- it is in capability class VI or higher, or
- a combination of both

To find the capability classes of your land, consult the soil survey for your county. Soil Conservation Service technicians can help you determine the erosion rate on your land through use of the Universal Soil Loss Equation and the Wind Erosion Equation.

31. Q What is the definition of cropland for CRP purposes?

A The general definition is land that has been planted to produce an agricultural commodity (planted annually and sugarcane) other than orchards, vineyards, or ornamental plantings in two of the 1981 through 1985 crop years and is still available for crop production. This includes acreage considered to have been planted under 1981-1985 ASCS land retirement programs.

32. Q Is participation in this program mandatory?

A No, participation in the conservation reserve is strictly voluntary. Farmers who find the program attractive will be free to elect not to bid.

33. Q What is the smallest eligible acreage I can sign up?

A Ten acres, unless the State has established a higher minimum acreage. However, a whole established field will be accepted no matter what the acreage is.

34. Q Can corporations and partnerships sign up?

A Yes.

35. Q How many years must a farmer have owned the land before placing in into a reserve contract?

A Land must be owned a minimum of three years prior to the signing of the contract, or prior to January 1, 1985, -- which ever is later.

36. Q Will cropland affected by high salinity concentration be eligible for the program even if it does not meet the erodibility requirement?

A No. The goal of the CRP is to reduce erosion on highly erodible cropland.

37. Q I have land in two states. Can I sign up in each state?

A Sign up will be on a farm-by-farm basis. Where you sign up will depend upon how your farm(s) are constituted. Check with your ASCS office(s).

38. Q If I have a field with some eligible land, is it all eligible?

Sponsored In The Pu

Dent & Co.

Pay -N-Save

Muleshoe Co-Op Gins

Questions And Answers

the Conservation Reserve Program (CRP). Administrative Procedures are subject to change.

A Possibly. If the eligible land is at least two-thirds of the field, and the non-eligible land can't be separated into a manageable unit, the entire field is eligible. If it is less than two-thirds, the field is not eligible unless the field is redefined.

39. Q Do I have to put a whole field in the reserve?

A Not if a field can be logically split into more than one field. Fields less than 10 acres cannot be split into smaller fields unless there is an area of ineligible land separating eligible areas.

40. Q I have a section of Class IV land that doesn't have much sheet and rill water erosion, but wind erosion is a serious problem. Is it eligible?

A Yes, if it meets the total erosion rate greater than 2T criteria. Wind and water erosion rates are added together when checking eligibility.

41. Q I haven't been growing crops that have commodity bases but my land meets all the other criteria (erosion rate, capability class and planted 2 years during 1981-1985). Is my land eligible?

A Yes, if you can establish through certification that it was planted 2 years during 1981-1985.

42. Q When will the CRP sign up begin?

A USDA plans to begin sign up within 60 days after enactment of the Food Security Act of 1985. Plans are for a 10-day nationwide sign up beginning in early March for the 1986 crop year. A second sign up will take place in early summer for 1987 crops.

43. Q What do you mean by a "second sign up" in the early summer? Will I get other chances?

A Sign ups may occur each year from 1986-1990.

44. Q What materials should I take with me to the county ASCS office when I am ready to sign up for the CRP?

A Please bring a map of your farm showing the locations of the fields you propose to retire, a cropping history of the fields (from 1981 to present), and the conservation plan of your farm, if you have one.

45. Q How long after the close of sign up will I be notified of the status of my bid?

A It is anticipated that applicants will be notified of bid acceptance or rejection with a short period of time after the close of sign-up. Some final eligibility determinations may still need to be made after bid acceptance before a contract can be finalized.

46. Q I don't have a conservation plan. Can I still participate? Or, can I have a conservation plan done later? How long does it take?

A Conservation Districts will develop plans for offered fields not covered by a current conservation plan as quickly as possible.

47. Q In my county there is only one technician and no soil survey. How will SCS determine if my land is eligible? Can I request a private consultant to do the classification and determination of eligibility?

A SCS must determine eligibility for all farms. Every effort will be made by SCS and other cooperating USDA agencies to quickly determine soil scientist approved by SCS to determine the necessary soil map unit data.

48. Q How do I sign up?

A The Agricultural Stabilization and Conservation Service (ASCS) will administer the program. For specific instructions on how to enroll, contact the ASCS office in your county.

49. Q What if all my neighbors want to participate also? Is there any limit on the amount of cropland in each county that can be included in the reserve?

A Not more than 25 percent of the land in each county may be entered in the conservation reserve. If too much land in a county were put into the conservation reserve, it might have an adverse impact on the local agricultural or community economics. Farm equipment, seed, fertilizer, and herbicide dealers might be unfairly affected.

50. Q Last year I planted a stand of grass on Class VI land. Is this field eligible?

A Yes, if the field was cropped at least 2 years during the years 1981-1985.

51. Q I broke Class VI range land out in 1984 and fallowed it that year. In 1985, because of drought, I planted but did not harvest a crop on that land. Would this land be eligible for the program?

A This land will not qualify. Land must have been planted 2 years during the years 1981-1985.

CONTRACT SPECIFICATIONS

52. Q Can a farmer have a CRP contract in addition to an ACP Long Term Agreement, Waterbank, or Great Plains Contract?

A Yes, existing contracts may be modified to accommodate participation in the CRP.

53. Q If trees or grass die from drought or disease are re-establishment costs cost-shared?

A Yes, if the farmer followed the recommendation of the technical agency and the loss resulted from circumstances beyond the farmer's control.

54. Q Can a farmer modify an existing CRP contract to include additional acres at the rate the initial contract was approved?

A No. However, a new bid may be made during a subsequent sign up period and a new contract executed if the bid is accepted by the COC.

55. Q If the farmer sells or transfers the land does the contract also transfer to the new owners?

A The contract can be transferred if the new owners are willing to carry out its terms and conditions and sign a transfer agreement or new contract. Otherwise, the farmer would be responsible for refunding rental and cost-share payments as determined by the Secretary.

56. Q Can I have more than one contract on a farm?

A Yes, if the contracts are started in different years and based on separate bids. Only one contract per farm per year otherwise.

57. Q Will construction of a road, pipeline or other structure across a CRP planting be in violation of the CRP contract?

A You will not be in violation if you protect the area from erosion. However, land that is no longer considered available for cropping would be removed from the contract.

58. Q Will the harvesting of tame or native grass seed be allowed on CRP acres?

A No.

59. Q If I am accepted, how long will I be obligated to maintain cover on my land?

A You will sign a contract to maintain the cover for ten years.

60. Q Can I still charge the local Rod and Gun Club a fee to use my land?

A Yes.

61. Q When the contract expires, what restriction will be placed on my use of the land?

my use of the land?

A After the contract expires, you may return your land to crop production if you choose. Under the "Conservation compliance" provision of the farm bill, though, you could participate in certain USDA farm and commodity programs if your land is in capability classes IV, VI, VII, VIII (that is, "highly erodible"), only if you have and follow a conservation plan approved by your local conservation district.

62. Q What are the penalties for not complying if I wish to return my land to cropping before my contract expires?

A Should you decide to return your land to production during that time, you may do so if you repay the government, with interest, all of its costs for annual rental and establishing cover. In the event of national need, the Secretary of Agriculture may declare that any farmer who wants to return the land to production may do so without penalty.

63. Q Are legumes eligible as permanent cover?

A Any recommended seeding mixture is eligible. Recommended seeding mixtures will be developed at the state and county levels. 100% legume seedings that are short-lived will not provide adequate cover for 10 years and will not be recommended.

64. Q To what level does erosion on the field have to be reduced?

A There must be adequate erosion control as determined by the District Conservationist using the local field office technical guide.

65. Q Can I plant field windbreaks in a CRP field?

A Yes, if the area between the rows of wind breaks have permanent vegetation established between the rows. Windbreak rows are not eligible if you elect to continue farming between the rows.

66. Q How will compliance be checked?

A representative of SCS or the State Forester's representative will verify permanent vegetative cover practice completion. Thereafter, ASCS will perform random spot-checks to ensure program compliance.

67. Q Do filter strips around streams qualify for CRP?

A Filter strips are not eligible. However, a field along a stream that meets the eligibility criteria would be eligible.

68. Q What are the main benefits of planting trees?

A Soil, water, and wildlife benefits from tree planting will continue for decades beyond the contract period. Trees may provide additional income through recreational use, such as hunting. When harvested, trees provided income for the landowner, wood for the consumer, and employment for the local community.

69. Q What happens to the trees when the contract period is fulfilled?

A The trees belong to the landowner. When the 10-year contract period is fulfilled, an additional bonus to the landowner will be ownership of a valuable stand of income-producing timber.

70. Q Where will the seedlings come from the Conservation Reserve plantings?

A State and private tree nurseries, and the forestry industry are expected to provide the necessary seedlings.

71. Q Who will plant the seedlings?

A Participants will either do the planting themselves, or hire someone to do the planting. Private contractors will plant many of the trees, adding to local employment opportunities.

72. Q Is pruning and thinning allowed on acres planted to trees?

A Yes. Any activity that is consistent with customary forestry practices such as pruning, thinning, or stand improvement, is allowed if included in the conservation plan. Any wood products removed during this process may not be sold or otherwise commercially used.

73. Q Can Christmas trees be planted to protect CRP land?

A Christmas trees alone are not an eligible cover. They also cannot be harvested during the contract period.

74. Q Will the CRP replace other federal tree planting assistance, such as the Forestry Incentives Program (FIP) and the Agricultural Conservation Program (ACP)?

A No, tree planting under the CRP will supplement other tree planting programs, not replace them. However, since it will be more beneficial for the owner of highly erodible cropland to plant trees on that land through the CRP, FIP will probably be used more to reforest lands which are not eligible for the Conservation Reserve Program.

75. Q Will the USDA Forest Service be involved in this program?

A The Forest Service will coordinate and provide technical assistance to the state Forestry Agencies. These agencies will help landowners develop tree planting plans, approve the plans, and inspect and certify the plantings.

76. Q Isn't tree planting receiving a major emphasis in this program? How many acres will be planted as part of the Conservation Reserve?

A To the extent practicable, one-eighth of the total acreage placed under contract will be planted to trees. This means five million acres of trees if the reserve reaches 40 million acres.

77. Q Does it cost the landowner more to plant trees than to establish grass?

A In many cases where tree planting is a suitable choice, it actually costs less. Trees can generally be planted with less site preparation and without the use of expensive fertilizers. Planting trees is sometimes the least expensive method of establishing vegetative cover. Temporary vegetative cover may sometimes be necessary to provide adequate growth to provide acceptable control.

78. Q What are the responsibilities of the various federal and state agencies involved? What about conservation districts and county ASC committees?

A The Agricultural Stabilization and Conservation Service will verify cropping history, the Soil Conservation Service will determine eligibility of the land, the Extension Service will lead public information and education efforts, the Forest Service will coordinate and provide technical assistance for tree planting, and cooperating state forestry agencies will help prepare and approve tree planting plans where appropriate. ASCS will receive, rank, and accept or reject the bids. SCS will help farmers with preparation of conservation plans. Representatives of the State wildlife agencies will serve on the conservation review group at both the State and local levels to recommend and assist in determining the cover practice specifications necessary for wildlife enhancement. The local conservation district will approve all plans. ASCS county committees will sign contracts with producers, ASCS, SCS, and the state foresters, as appropriate, will help install planned practices. ASCS will verify annual program compliance.

Letter To The Editor

An Open Letter to the people of Muleshoe; and surrounding area:

It has been my pleasure to have taught the recent Emergency Medical Technician class in your city.

At this time, I commend the following people: Kenneth Wilhite, Claude (Pudge) Rose, Starla Ellis, Joe Don Prather, Margaret Gingery, and Dorothy Easley for their hard work and effort they put forth to become E.M.T.'s.

Also, I take my hat off to these other folks in Muleshoe for their assistance: Todd Ellis, Misty Prater, Randy Watkins, Wayne Wauson, Richelle Watkins, the wrecking yard, The Muleshoe Fire Dept. who has one of the best "Jaws" units I've worked with, and the hospital, which gave a classroom and a pot of coffee each class night.

These EMT's will support an already fine ambulance service in Muleshoe. Some will help in day service hours, others at night and weekends. Their participation will help hold back

Angels Of Mercy of West Plains Medical Center

The other day an older gentleman, a resident in the Muleshoe Nursing Home, asked me if I would get "his" nurse. I asked him which one was "his" and he replied, "That tall, lanky girl. Why she's the tallest one here!" If you are around Muleshoe Nursing Home very much you know he is probably talking about Minnie Singletery, Medication Aide.

Minnie has lived in Muleshoe for the past 7 years and has worked at Muleshoe Nursing Home the entire time. She has two sons who keep her very busy when she is not working at the Nursing Home.

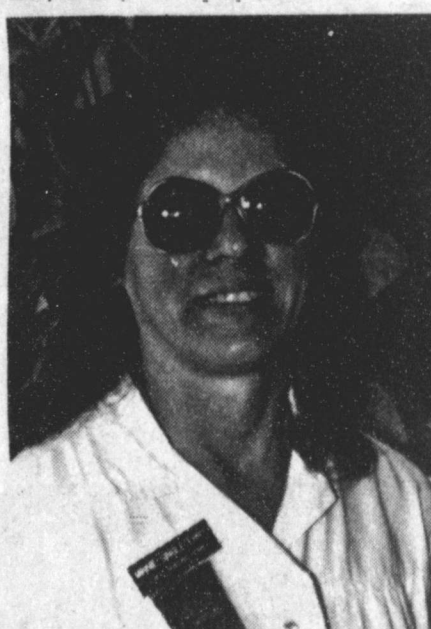

She enjoys taking care of the geriatric residents because their needs are so great. Putting a smile on her patients faces is the greatest reward of her day. Minnie is especially good at brightening up the patients with her small talk and devotion to her job. It's not all hapiness and light though.

The hardest task she ever has to contend with is caring for the terminally ill.

As with all situations, Minnie rises to the occasion with her usual spunk.

It would make Minnie's day if all her patients could recover and be back home doing the things they enjoy most.

Minnie is a special Lady. She is an Angel of Mercy. H. Bayless LVN/T. Wilson RN

MINNIE SINGLETERY

expenses as well as upgrade care in the EMS system.

I commend the hospital for providing the people of your area with modern equipment, a modern EMS facility and Paramedic level care. Very few towns the size of Muleshoe have Paramedics in their system, soon Muleshoe will have two, and several EMT's in service.

These people have spent many hours in training and in hospitals at Muleshoe and Lubbock. They have been tested numerous times and have all done very well in many categories of Emergency Medical Care.

Hopefully, I can return to Muleshoe and teach another class, hopefully I'll have 25 students or more.

Again, to my students, you were an excellent class, and a joy to teach. You are special people and made my job as an instructor easier.

Remember what I've taught you, what you have learned for yourselves and The Lord be with you on your calls.

Yours,
Raymond Davis, EMT/P
EMT/Instructor

First Aid Kits

Available

From Red Cross

As part of its ongoing campaign to promote home and business safety, the South Plains Regional Chapter of the American Red Cross is making inexpensive first aid kits available to area residents.

The kits include a first aid handbook and the medical supplies required during minor medical emergencies. They are constructed of heavy-gauge steel and are weather and dust resistant. The kits may be wall-mounted and are small enough to be placed under an automobile seat. They comply with OSHA, Mine Safety Act, and certain other federal and state laws requiring first aid kits in the work place.

The cost of the kits is \$25. Anyone with current Red Cross first aid certification receives a \$5 discount. There is an additional handling fee when shipping is requested.

Persons interested in the first aid kits or in Red Cross first aid training may call the Red Cross office, 765-8534 in Lubbock, or come by the Red Cross office at 2201 Avenue X.

Former MHS Athlete Arrested; Drug Sale

Yesterday -- he played football for Muleshoe High School -- and he was outstanding; -- he played basketball for MHS -- and he was outstanding; --he was in track for MHS -- and he was outstanding; he was Prince of Friendship at MHS; he was Senior Class Favorite at MHS and the same year was named Mr. MHS.

Today -- Charles Briscoe, former outstanding athlete at Muleshoe High School and 1979 graduate of the school, is charged with a felony count of selling marijuana to an undercover officer at Big Spring where he is a teacher and coach at Big Spring High School.

Arrested on Wednesday, Charles Briscoe was released on a \$10,000 bond and was suspended by the school pending the outcome of the charges he faces.

Briscoe had an impressive list of credentials listed in the Muletrain yearbook during his senior year at Muleshoe High School. It included:

"Student Council 1, 2, Parliamentarian 2; DECA 3; HERO 4; Football 1, 2, 3, 4, All District 3, 4, Hon. Men. All South Plains 3, All South Plains 4, KELP-ALL District 4, 2nd Team All State Safety; Basketball 1, 213, 4, Captain 4, All Tournament 3, All District 3, 4, Basketball award 4, Homecoming King 3; Trace 2, 3, 4, Regional Qualifier High Jump 3; Class Favorite 4; Mr. MSH 4; FTA 3, 4; Powderpuff Coach 3,4; Drama 1, 2, Speech 3; and Prince of Friendship 3."

According to the Thursday Lubbock Avalanche-Journal:

"A 26-year old high school football coach was arrested at

school shortly after 10 a.m. Wednesday on charges of felony delivery of marijuana according to police officials.

"Charles Allen 'Chaz' Briscoe, a history teacher, assistant football coach and track coach in his third year for former professional football player for the Denver Gold, was arraigned on state charges and a \$10,000 bond set by Justice of the Peace China Long.

"Briscoe, who played college football at West Texas State University, is accused of selling an undisclosed amount of marijuana to a Big Spring undercover officer, according to police.

"The former Denver Gold player's arrest is one of several arrests expected in the next two days and the tenth since last Thursday, all of which are part of nine-months undercover investigations which surfaced last week, according to police chief Rich Turner.

"Big Spring High School principal Murry Murphy confirmed that Briscoe was arrested while at school. He said that the arrest had taken him by surprise.

"I was surprised. I visited with the chief and we went over just a few formalities that were involved in this particular case and what they had to do," he said.

Also, according to the Friday morning edition of The Lubbock Avalanche Journal, arrests in connection with the drug investigation case have continued, and those arrested have all been released on \$10,000 bonds.

5 years to the Muleshoe Public Library. Then they will be sent to the Alfred collection at the Houston Library.

The other Centennial project my grandmother had was to research the life of Sam Houston for Paramount Studies. The premier was shown in San Antonio, and all the Alfred staff was special guest. Later she got a VIP tour of the studio in Hollywood.

Grandmother Olabelle was not an average person! She had muscular dystrophy and was at the top of her high school and college classes.

She was very bright and very patriotic. She would not walk over the state seal in the rotunda of the Capital. Newspapers even wrote about her patriotism, but she had muscular dystrophy and was scared to walk over it because it was so slick.

This was all thrilling for a young lady from a small West Texas town of Tahoka to be a part of the Texas Centennial-an exciting moment in Texas history.

By: Gilbert Rennels

VISITORS IN MULESHOE--Visiting Muleshoe Thursday morning were Gerald McCathern, left, farmer/rancher/author, who was making a swing through the South Plains with his candidacy for Congressman for the 19th District. Accompanying him was Don Kimbrell, right, a Castro County farmer, who formerly lived in the Lazbuddie area.

Temperature Important To Get Cotton 'Started'

Soil temperature plays a key role in getting an early, uniform stand of cotton, so farmers need to keep a close check on this situation.

On the High Plains, early research has shown that a 10-day average minimum soil temperature of 60 degrees F. at the eight-inch depth is a recommended time to start planting cotton. Although this may appear conservative, using soil temperature as a guide has resulted in earlier plantings and established stands more often than when optimum dates are used, points out Dr. Bob Metzger, cotton specialist with the Texas Agricultural Extension Service, the Texas A&M University System.

In other production areas, farmers have used an average soil temperature of 60-65 degrees F. at the four-inch depth, Metzger points out.

To avoid wide daily fluctuations, take daily readings at 7 to 8 a.m. for a period of one week to 10 days, suggests the specialist. Use this soil temperature planting guide only to establish the earliest possible planting date. Soil temperature becomes less of a determining factor for late-season planting when soil becomes warmer.

Unless highly vigorous seed are used, poor seedling survival can be expected if seed remains in soil with an average temperature below 60 degrees F. over a prolonged period, notes Metzger. Only high quality, vigorous seed have the ability to remain in

cold soil over a prolonged period and germinate once a favorable soil temperature is reached.

Unfavorable soil conditions plus weak, low quality seed can result in decayed seed, slow emergence and poor, erratic stands. Matters become even worse if weak seed have broken seed coats or gin cuts that allow soil borne organisms to enter.

The lower the soil temperature, the greater the number of days necessary for seedlings to emerge, says Metzger. If soil temperature averages 55 degrees F. during the planting period, 15 to 20 days may be needed for seedling emergence. However, with soil temperature at 70 degrees F., seedlings will likely emerge in only six days.

Planting early in cold soil at temperatures below 60 degrees F. does not necessarily insure earlier fruiting, adds the specialist. First bloom may be delayed as long as 65 to 85 days after planting in soils that average lower than 60 degrees F. But when the soil temperature at planting goes above 60 degrees, the first bloom may appear as soon as 45 to 55 days. This indicates that more rapid plant development occurs in warmer soil.

So, as planting season looms ahead, cotton farmers should keep tabs on soil temperature as well as the five-day weather forecast. "Jumping the gun" on planting could mean a poor stand of cotton and the added expense of replanting, cautions Metzger.

Demo Candidate Visits Muleshoe; Asks For Votes

Gerald McCathern, democratic candidate for Congress from the 19th Congressional District, was in Muleshoe Thursday morning on a campaign swing through the western counties of the district.

McCathern, a farmer-rancher from Hereford, said that he is very concerned that the present administration is allowing industries and small businesses to be destroyed by a flood of debased foreign imports under the guise of free-trade.

"There is no such animal as 'free-trade,' McCathern said. "Every other nation of the world protects its economy from cheap imports through the use of tariffs and quotas. We have allowed the United States to become the dumping ground for the world, and it is destroying business and industry which relates directly to the loss of jobs for our working people. Under this 'free-trade' philosophy, we are exporting our

dollars and importing our unemployment.

"I believe in 'America First,' McCathern added. "Our people should not be forced to lower their living standards to those of the peons, coolies and aborigines of the world who work for 20 cents an hour.

"Agriculture, which is the foundation of Muleshoe's economy, is being destroyed by the same philosophy when we have a policy which forces U.S. farmers to export their production at only half its true value, in an effort to complete with the same peon, coolie and aborigine labor," McCathern concluded. "The closed up main-street businesses and the shut-down farm related industries are a direct result of this failing agriculture policy. I pledge to fight for higher prices and a workable supply management program for agriculture when I am elected."

FOSSIL FIND

More than 100,000 bits of bones from crocodiles, dinosaurs and fish that lived 200 million years ago were found in Nova Scotia, Canada, forming the largest fossil find in North America, scientists said recently.

GO FLY A KITE—It's that time of the year, and many residents are beginning to get outside, and actually 'fly a kite.' Late Wednesday afternoon, Jo Gear and his daughter were caught on the northwest corner of the playground area at Watson Junior High School with a kite high in the air. Gear held Twila Marie, who held tightly to the kite string.

Soil Fertility Programs Aids Crop Production

When planting seed is hauled to the field next spring, scientists at the Texas Agricultural Experiment Station north of Lubbock will be opening more than the bags.

Under the direction of Dr. Ark Onken, researchers will open a novel study of how sorghum genetics affect the use of fertilizer within the plant.

Onken, who has been a part of the station's soil fertility program since 1964, said the upcoming trials will mark the first time that fertility studies have been linked to plant breeding.

"This research began in earnest about four years ago, but we pinned it down during the past three years," Onken explained. "We found that the response (of a sorghum to fertilizer) is genetically controlled."

Using sorghum breeding materials (that which has not been developed as commercial varieties), the scientists will plant six different trial plots at the Lubbock and at the Halfway sites.

Four of the plantings will be to investigate nitrogen response differences and two will be to investigate phosphorus use efficiency differences, he said. The plots will include dryland and irrigated trials.

Onken said soil fertility is important on the High Plains because there is such a variation in soil, climate and crop production techniques in the station's 20-county service area.

"In this area, water and soil fertility are most often the limiting factors on crop yield," Onken noted. "Nitrogen and phosphorus are the most limiting soil nutrients."

"But fertilizer is not cheap. It is a production expense and an economic investment," he added. "So the farmer needs to be reasonably sure when he applies

a fertilizer that he will get a good return on that investment."

He said that to make the most efficient use of fertilizer, and thus his capital, the farmer must apply the appropriate amount. Currently, the farmer may have soil from a field tested by the Texas Agricultural Extension Service or a private laboratory to determine which, if any, nutrients are needed.

SBA Office Names New Director

Walter Fronstin has been named District Director of the Lubbock office of the U.S. Small Business Administration SBA, according to Reynaldo H. Lopez, SBA's Regional Administrator. Fronstin succeeds Philip J. O'Jibway who retired from the Agency on January 31, 1986.

Prior to his transfer to Lubbock, Fronstin was director of the Phoenix, Arizona district office of the SBA.

Fronstin's SBA career began in May, 1975 when he joined the Agency as an Economic Development Specialist for the State of Arizona. In 1980 he was named District Director of the Columbus, Ohio SBA office where he served until his transfer to the Phoenix office in April of 1982.

In addition to his years in Federal service, Fronstin's career includes 17 years in the Phoenix banking community. He served in a variety of managerial positions, ranging from marketing and credit department administration to Vice-President of a billion dollar bank. He was also employed in the consumer finance and lending industry in Cleveland, Ohio during the early years of his career.

Fronstin and his wife, Helen, are in the process of moving to Lubbock. The 57-year old SBA executive has three children and three grandchildren.

Woman's Ulcer, Treatments

A newly recognized medical problem in the American work force is "successful woman's ulcer," a condition that can lead to guilt as well as stomach pain and discomfort, a Baylor College of Medicine physician reports.

The successful woman's ulcer affects up to 25 percent of all women in this country and is really not an ulcer, but a nervous or spastic stomach. It affects both men and women, but is more common in women.

Men are more susceptible to developing ulcers because they produce more stomach acid under stress than women.

It is not known why women are more susceptible, said John C. McKechnie, M.D., an intestinal disease specialist at Baylor.

"The number of women affected also varies depending on whether you count visits to the doctor's office or poll women in the workplace."

"If you do the latter, you will find that up to 25 percent have symptoms, but they won't all see a doctor," McKechnie said.

Nervous stomach has a variety of symptoms. The most common is a burning, stabbing pain that can occur in the chest, stomach or abdomen when muscles contract due to stress and tension. These spasms can also cause nausea, diarrhea, constipation, indigestion, and even depression.

People who are very meticulous, orderly and insist on things running on schedule are candidates for the nervous stomach.

"Because they set very high goals for themselves and those around them, they are eternally disappointed when they and those around them fail to meet those goals," McKechnie said.

Many women feel guilty about having a spastic stomach, he said.

"A woman may feel more justified in telling her boss or her husband that she has an ulcer, because most ulcers can be cured. If she says it is a nervous stomach, the boss or the husband is more likely to think it is all in her mind."

It is also difficult for the working woman because she has to explain to her boss and family why she must leave work because of pain, he said.

There is no reason for guilt because the pain is real, McKechnie said.

"It is a very common problem that is seen in successful people, from the homemaker to the corporate executive."

The nervous stomach cannot be cured, but it can be alleviated by adding bulk to the diet and staying away from foods that cause pain. Cereal grains, like bran, will absorb water and expand, keeping the muscles from contracting fully and causing pain. Foods that cause discomfort will vary with each individual.

"Learning to relax will also ease the pain," McKechnie said.

People often seek excuses for their failures instead of trying to do something about them.

"The nervous stomach is an early warning system. It is your body's way of telling you to relax and take stock. Find out what is bothering you and learn to deal with that problem, or seek help from your family and friends."

Exercise, reading, meditation and the relaxation therapy called biofeedback can help some people relax.

Very few people with a nervous stomach will need medicine such as tranquilizers, sedatives or antidepressants, McKechnie said.

"We cannot cure these patients," he said. "We can only help them. Usually, it is better not to take medicine than to take a drug that is costing money and is not very effective."

World Day Of Prayer Is Scheduled

First United Methodist Church of Muleshoe will host World Day of Prayer Services on Friday, March 7 at 7 p.m.

World Day of Prayer is a worldwide call to prayer observed by Christian women of many traditions in the United States and more than 170 countries and regions of the world. "Choose Life," theme of the 1986 service, articulates the hard choices women are called upon to make if peace is to be achieved in today's world said Mrs. George Mitchell.

"This service is a challenge to women of the world from Christian women of Australia who wrote this year's World Day of Prayer worship materials. It calls women to make decisions and take actions that will begin to change the

injustices and inequities that cause suffering to countless numbers of the world's people," said Mrs. Mitchell.

World Day of Prayer, celebrated this year for the 99th consecutive year, began in the United States in 1887 as a day of prayer for mission by laywomen in the Presbyterian church. It now has spread worldwide and acts as a catalyst for women to come together in continuing relationships of prayer and action for peace.

Church Women United, sponsor of World Day of Prayer in the United States, is the ecumenical Movement that brings Protestant, Roman Catholic and Orthodox women together into one Christian community of prayer, advocacy and service, added Mrs. Mitchell.

Church Women United (CWU) represents a broad spectrum of religious tradition, race, age, economic status and ethnic background and works through a national unit, 52 state units (including ones in Greater Washington, D.C. and Puerto Rico) and 1,800 local units.

World Day of Prayer offerings make possible, in part, the mission of Church Women United, including the Intercontinental Grants for Mission program that funds national and international projects in support of the empowerment of women, human rights and justice and peace.

Chairman Gives Info On Election

Bailey County Democratic Chairman Gerald Reid said primary elections will be held May 3, 7 a.m.-7 p.m. He said to be eligible to vote, you must be registered 30 days prior to the election. Final date to register is April 3.

Absentee voting will begin on April 14 and you must cast your absentee ballot in person. A ballot will be mailed on written request.

Reid said the primary is both a Democratic and Republican election, with both state and county offices on the ballot. County offices to be decided for the general election in November will include for the Democrats:

County Judge, Gordon H. Green (incumbent); District Clerk, Nelda Merriott (incumbent); County Clerk, Barbara McCamish, (incumbent); County Treasurer, Dorothy Turner (incumbent); Commissioner, Precinct Two, Roy Whitt (incumbent); Bill C. Vinson and Don Seales; Commissioner, Precinct Four, Rudolph Moraw (incumbent); Justice of the Peace, Precinct One, Jack Bates (incumbent); District Judge, Jack Young (incumbent).

In the Republican Primary, James Warren is a candidate for the position of County Judge.

Voting boxes will be located in the following places for the Democratic Primary: Box One, courthouse; Box Two, Civic Center; Box Three, Three Way School; Box Four, Methodist Church; Box Five, Bula Community Center; Box Six, Needmore Community Center; and Box Seven, City Hall.

Bailey County Republicans have not designated a voting place/places for the Republican Primary.

Nursing Home

By Joy Stancell

Bro. Row Linebarger of the Circle Back Baptist Church will bring his puppet show to entertain at the Nursing Home Friday March 21st at 2:30 P.M. We invite all our friends and families to come and enjoy this fun time with us.

Thursday morning Clara Jones, Zora Bellar and Josephine Mitchell came to share a music Devotional with the residents, employees and visitors.

Thursday afternoon Laverne James, Retta Shipp, Lena Hawkins and J.E. Embry came to play 42 and dominoes with the residents. Residents participating were Lois Ethridge, Mrs. Schuster, B.B. Street, D.J. Gage, Mrs. Alfa Laney, Edith Bruns, Ernest Kerr, and Eric Smith watched the games from the "side lines" to make sure the game went right.

Friday morning Lena Rutherford came to show the residents two films from the Library.

Sat. afternoon Velma Gwyn visited the Nursing Home and entertained with her piano music. Sat. morning J.C. Shanks shaved the men and cut their hair. Sun. morning Earl Peterson came for Bible Study. The Progress Baptist church came to play and sing gospel music to the residents.

Emmett Dean was glad to see Lewis Scoggins Wed. Mr. Scoggins had been out of town for a few days.

Cyclists Plan Annual Rally For March 22

Saturday morning, at presstime, members of the Muleshoe Roadriders were visiting local businesses following a special meeting at 9 a.m.

Dividing into couples, the Roadriders were going to the local businesses, explaining the upcoming motorcycle rally in Muleshoe. They are seeking gifts and prizes to be presented during the rally.

At this time, 24 out of town registrants have indicated they would be attending the rally in Muleshoe. They and the rest of the registrants will be eligible to win the local prizes.

"We do want the townspeople's support," said a spokesperson for the Muleshoe Roadriders. "We would like to invite them to come see the motorcycles on display during the rally."

Mrs. Schuster's daughter Mrs. Wrinkle, took her to Lubbock Tues. for a Doc. Appointment. We were happy to hear the good report Mrs. Schuster received from her Doc. Mrs. Schuster went to Tulia with her daughter last weekend.

Lewis Shafer was visited by his wife, Jimmie Crawford, Mr. Dillman, Mrs. Black and her great granddaughter this week.

Mrs. M.E. Hickman was visited by her daughter from Friona this week.

Lois Ethridge went out with Betty Barker Tues. to visit with Mrs. Barker in her home.

Alfa Laney, Lois Ethridge, Emma Schuster and D.J. Gage attended the Sr. Citizens meeting at The Methodist Church Mon. Our thanks to Eva Atwood for going with us and helping us.

Inez Allgood was visited this week by Dr. and Anita Allgood and Jackie Johnson.

Bailey County Electric Co-Op Names Directors

This year, Bailey Electric Cooperative Association held their annual meeting at Morton, with a total of 184 persons registering for the lunch and meeting.

From a field of Lewis Wayne Shafer, Rusty Gore and Randy Marlow, Shafer was chosen director for District Four; Nelson Carlile was elected director for District Five, with other candidates J.W. Tyson and Archie (Joe) Sowder and for candidates Ernest Trull, Elree Gandy and Ray O'Brien, Trull was elected director for District Seven.

Members of the nominating committee were W.B. (Buster) Kittrell, Delbert Watson, Don Lowe, Robert Kindle Jr., Lloyd Miller, Rex Griffin, Joe Simnacher and Curtis Griffith. Election judges included Chester Setliff, Bob Byrd, Sharon Dale and Ted Bryant.

Completing the seven member district board are J.W. Herington, District One; Alfred Hicks, District Two; Guy F. Kelly, District Three and Tommy Kirk, District Six.

Named to the nominating committee for the 1987 director meeting are Jimmy Craft and Jack Angeley, District Three and Jimmy Cannon and Bob Newton for District Six, with Chester Setliff chosen committeeman at large.

J.W. Herington was chosen board president during the meeting; Lewis Wayne Shafer, vice president and Guy F. Kelly, secretary-treasurer.

Our thanks to Irene Steinbock for helping in the beauty Shop Tues. We really did appreciate the work you did and your friendly touch.

Ernest Kerr was visited by Ruby Lee, Carolyn, Melinda and Shane Wed. afternoon. We are so pleased to see Ernest up and about and feeling better after a few days of being under the weather.

Lucy Fay Smith took her husband Eric Smith out for ice cream Monday.

Chubby Douglass took Lois Ethridge to her beauty shop Mon. for a new perm.

Lena Hawkins, Retta Shipp, Laverne James and J.E. Embry came Thursday to play Skip-Bo and 42 with the residents.

Laverne James and Ruth Clements of the Hospital and Nursing Home aux. came Monday to play Bingo with the residents.

We have been enjoying the beautiful weather. It is nice to see the residents taking short walks and strolls outside with the help and assistance of an aide, family members or volunteer.

Mabel Caldwell and Jackie Johnson visited the Nursing Home Wed. afternoon.

Jackie Johnson visited Beryl Halls Tues. afternoon. She was also visited by Mr. and Mrs. Helmar McCarty. Ruth McCarty took Mrs. Halls to the Beauty Shop Monday, to get a new perm.

Sherry, from Main Street Beauty Shop, came Wed. morning to give Edith Goucher a new perm. Annie Flayd assisted them.

The New Covenant Church came Sunday afternoon to sing Gospel songs to the residents.

There has been, and still is, a

lot of moving around and spending the night with another resident due to the remodeling. The residents have been so patient and cooperative and so have their families.

Inez Allgood is still in W.P.M.C. at this time she is improving daily.

Lena Hawkins visited her brother, D.J. Gage, Wed. on his 74th birthday.

Lona Embry visited the Nursing Home Tues. and brought us a nice elec. can opener.

Curtis Shelburne was among our visitors this week.

Fruit, Nut Trees Need Annual Lube Job

Have you given your fruit and nut trees their annual "lube" job? This refers, of course, to an application of dormant oil to control scale insects, points out Spencer Tanksley, county agent with the Texas Agricultural Extension Service, The Texas A&M University System.

Why control scale insects? The answer is simply to save the tree. If a scale insect such as the San Jose scale or white peach gets started, it could kill your tree.

Dormant oil can be purchased at many different stores where garden supplies are sold. Be sure to follow all label directions and apply the mixture when the temperature is between 40-70 degrees F. Do not apply if a freeze is likely within 48 hours after application, and do not apply after the tree has budded out, cautions Tanksley. Dormant oil is applied when the tree is dormant. Spraying flowers and leaves could cause leaf burn and flower drop.

Scale insects are difficult for most people to detect, so dormant oil should be applied once each year. Sooner or later your tree will probably be attacked by scale insects, so be ready by guarding against them with an application of dormant oil, suggests Tanksley.

Legal Notice

The Texas Corn producers Board will hold its biennial election on May 2, 1986. The terms of three present Board members will expire at that time. Any person within the following counties who is engaged in the business of producing, or causing to be produced, corn for commercial purposes, is eligible to vote, including owners of farms and their tenants and share croppers, if such person is required to pay assessment that is collected on corn within the following counties: Bailey, Castro, Deaf Smith, Hale, Lamb, Parmer and Swisher.
The election will be held by mail ballot, which will be provided to all eligible voters not later than April 3, 1986. Ballots must be mailed to the polling place at 218 East Bedford, Dimmitt, Texas 79027 before midnight on May 2, 1986.
Any person qualified to vote who does not receive a ballot in the mail may obtain one at his local County Extension Office.
Any producer in the 7 county check-off named above subject to paying the assessment on corn may have his name placed in the ballot for anyone of the 3 positions accompanied by 10 signatures of legal corn producers within the counties described above.
Producers have 30 days after this notice to have names placed on the ballot and mailed to Texas Corn Producers, 218 East Bedford, Dimmitt, Texas 79027.

STATE CAPITAL

HIGHLIGHTS

By Lyndell Williams
TEXAS PRESS ASSOCIATION

AUSTIN—All in all, last week wasn't a good one for Gov. Mark White, now an embattled figure fighting for reelection.

For months now, White's campaign has figured to skate past the Democratic primary small fries in May to take on the lone survivor of three tough GOP challengers in November.

But last week, as Texas was slapped with predicted gloom in the oil patch and dried-up federal revenues, White found:

—His reelection announcement staged in his mother's old Houston classroom was upstaged by an angry reaction from his once-staunch supporters, Texas teachers.

—One of his small fry Democratic opponents launched an offensive by depicting him as "Gov. Goldcard" and the "original nerd" of Texas high schools.

Zingers, Ouches

White did manage to throw some zingers which landed, particularly on the record of GOP nemesis Bill Clements.

Clements criticized White's lease-purchase plan for prison construction, and White responded that Clements one-time veto of \$80 million for prison building made today's construction more necessary and more expensive.

Almost simultaneously, it was reported that Clements, who has really jumped White this year for seeking out-of-state funds, accepted some 120,000 such dollars when he beat John Hill in 1978. Clements had asserted that he had never accepted non-Texas funds.

Goldcard, Nerd

But White almost said such when he defended his lackluster high school record against an attack by opponent Don Crowder.

Crowder had circulated copies of White's senior yearbook page which listed no extracurricular activities for him. No wonder White wanted to punish extracurricular-minded students, Crowder crowed, dubbing White the original nerd of Texas.

For the first time, White got teary-eyed at a press conference, explaining that his father's ill health necessitated him taking two jobs after school.

Crowder took other opportunities to dub White "Gov. Goldcard" for his spending proclivities and tax hikes, and suddenly, White found himself bleeding politically from a political unknown in his own party primary.

Teachers Incensed

After he took television crews to his mother's old Houston classroom to stage his official reelection bid around his concern for excellence in education, the top two teachers associations called it hypocritical.

The head of the Association of Texas Professional Educators said teachers were incensed by it and White was clearly out of tune with the feelings of the teacher corps.

The Texas Classroom Teachers Association, one of White's pillar groups in '82, added their opposition to White's policies.

The week's fray caused one GOP opponent, Kent Hance, to quip in San Antonio, "Sure, the teachers are behind Mark White... but they're chasing him!"

Reforms Today

Part of White's problem is that some 30,000 Texas teachers began preparing last week for the controversial state tests March 10, and another 30,000 start this week.

Also, the Texas Education Agency applied the no-pass, no-play rule by forbidding several Dallas Highland Park football players from attending their annual football banquet because they failed a course.

Additionally, the U.S. Census Bureau reported last week that Texas has the largest public school debt in the nation, \$5.6 billion.

The heavy migration of students to Texas has caused the building of new buildings and incurring new debt.

More Bids

Three heavyweights who got lost in the White-Crowder-teachers melee were Attorney General Jim Mattox, Treasurer Ann Richards and Agriculture Commissioner Jim Hightower, all Democrats who filed for reelection.

Hightower will be opposed by a GOP farmer Charles Trompler of Malone.

Charles Ben Howell became the first GOP candidate for Texas Supreme Court, announcing against incumbent Sears McGee.

A&M researcher designs device to aid medics during chemical attack

COLLEGE STATION — A hand-held device that during a chemical warfare attack could help battlefield medics determine the condition of unconscious personnel without removing the victim's protective garments is being developed by a Texas A&M University researcher.

Under a grant from the Air Force, Dr. Charles Lessard, an associate professor of bioengineering, is leading several graduate students in the construction of a portable life-sign detector to be used by medical personnel in a triage situation. Triage is the allocation of treatment to battle or disaster victims based on a classification system designed to increase the number of survivors.

"During an attack, the chemical environment would prohibit removal of the protective garments that soldiers would be wearing, thus making the job of identifying injuries and treating victims much more difficult," said Lessard, a retired Air Force lieutenant colonel.

"We have found that there is an area at the neck of the protective suits near the throat under which a small medical instrument can be placed," he said. "By placing sensors at this area, we have been able to get accurate readings on heart rate and respiration."

In chemical warfare, Lessard said, the lungs can receive the most damage from such substances as organophosphates and chlorine gas.

"The condition of the lungs will be very vital information," he said.

BIBLE

VERSE

Before him shall be gathered all nations: and he shall separate them one from another, as the shepherd separateth the sheep from the goats.

1. Where does this quotation occur in the Bible?
2. Who spoke these words?
3. To what event do they refer?
4. Does this quotation appear elsewhere in the Bible?

Answers to Bible Verse

1. Matthew 25:32.
2. Jesus in a parable.
3. The last judgment.
4. No.

Texas A&M leads nation in preparing students to teach math, science

COLLEGE STATION — Texas A&M ranks first in the nation in the number of students preparing to become science and mathematics teachers, according to figures compiled by national education officials and the Texas Education Agency.

"America's greatest treasure is its outstanding teachers," said Dr. Dean Corrigan, dean of education. "Most school systems face a critical shortage of math and science teachers. We are addressing that need."

A new Center for Mathematics and Science Education has enabled the university to become a "lighthouse" for other state and national institutions seeking to meet teacher needs in these fields, Corrigan said.

The center identifies and recruits outstanding high school students and designs special programs for public school students such as math and science fairs, competitions and summer institutes. It also provides a visible entity for improving inservice programs of career teachers and the school curriculum at all grade levels, Corrigan said.

The university's long-range plan for improving teacher training includes a privately supported \$250,000 scholarship loan program that has helped the college become nationally known for recruiting student scholars for math and science teaching.

"In true Aggie fashion, the Math Science Scholars give something to get something. For every year an Aggie teaches, a year of the loan is forgiven. The program serves the dual purpose of attracting outstanding students and solving the teacher shortage," Corrigan said.

Important principles may and must be flexible.

—Abraham Lincoln.

The value of a principle is the number of things it will explain.

HORNETS 1-1 IN PRACTICE GAMES

In getting ready for the playoffs, the Hornets played two practice games.

February 14, The Hornets were beaten by the Olton Mustangs 53-46. In the first quarter John Taylor and David Wood each had four points. Jeff Dodson and Lee Bartley each hit a goal. Brent Kirkland sunk two free shots. At the end of the first quarter Sudan led 14-10.

Eddy Boyles came in and scored four points for Sudan in the 2nd period. David Wood added three more points. The Mustangs scored seventeen points and at halftime led 27-21.

In the third quarter Jeff Kinzie hit three goals for six points. John Taylor made a goal and two free throws. Brent Kirkland hit two free shots and Jeff Dodson hit one free shot. Going into the final quarter Olton led 38-34.

In the fourth quarter Jeff Kinzie scored another six points. Brent Kirkland put in another four points, and Eddy Boyles scored two more points.

Jeff Kinzie led Sudan with 12 points. He had one foul. Brent Kirkland scored 8 points and had one foul. John Taylor also had 8 points. John committed five fouls. David Wood scored 7 points and was called for four fouls. Eddy Boyles hit 6 points and had no fouls. Jeff Dodson sunk three points and had no fouls. Lee Bartley hit two points and had four fouls.

The Hornets turned around and beat the Shallowater Mustangs 62-56, Monday February 17.

In the first quarter Lee Bartley scored on two goals. Jeff Kinzie and David Wood each hit one goal. John Taylor sunk two free throws. It was a very tight and physical game as at the end of the first quarter the score was 10-10.

David Wood poured on eight points in the second quarter to put the Hornets at a 32-30 halftime lead. Also scoring in the second period was Brent Kirkland with six points, Jeff Kinzie with four points, and John Taylor and Lee Bartley with two points each.

Jeff Kinzie sunk six more points in the third quarter. John Taylor and Lee Bartley again scored two points each.

With eight minutes to play Sudan led 42-37. The Hornets hit 20 points in the final quarter, 14 of these points coming from the free throw line. Jeff Kinzie and John Taylor each hit a goal and four free shots. David Wood hit a goal and two free shots. Lee Bartley sunk a pair from the free throw line. Brent Kirkland and Jeff Dodson hit one each from the charity stripe.

The Hornets finished the night with four players in the double figures. Jeff Kinzie scored 18 points, David Wood had 14 points, John Taylor scored 12 points and Lee Bartley sunk 10 points. Brent Kirkland wasn't far behind as he scored 7 points. Jeff Dodson hit one free throw.

Jeff Kinzie committed four fouls, David four fouls, John one foul, and Lee had five fouls called against him. Brent had two fouls and Jeff Dodson had

no fouls.

In the area game Tuesday night, the Nazareth Swiftettes kept their State Championship quest alive with a 44-30 win over the Hornets. The Swiftettes led at the end of the first quarter 10-2. JoAnn Wooley hit the only goal scored in the first quarter for Sudan.

In the second quarter JoAnn Wooley hit another eight points. Krista Kirkland added four points. Nazareth led 22-14 at halftime.

JoAnn Wooley was the only person to score in the third quarter for Sudan. She hit another eight points, including two free throws.

Going into the final eight minutes Sudan was behind 34-22. In the final quarter Krista Kirkland sunk two free shots and a goal for four points. JoAnn Wooley also hit four points.

JoAnn Wooley scored 22 points for Sudan. Krista Kirkland made the other 8 points. Krista finished the night with one foul and JoAnn and three fouls.

SUDAN ENDS DISTRICT WITH PLAYOFF BERTHS

The Hornets finished up district with a 10-0 record with a 73-26 win over Spade last Friday night.

Krista Kirkland got things rollin' with 12 points in the first quarter. JoAnn Wooley sunk 6 points and Melissa Nix hit 4 points. After the first quarter was over the Hornets led 22-1.

In the second quarter JoAnn and Kathy Powell each hit 4 points. Shannon Peck made a goal and Kim Crowson and Krista Kirkland hit two free throws. At halftime the score was 38-7.

Krista again led the quarter scoring with 6 points. Darlene Henley, Melissa Nix, and Kathy Powell all made 4 points in the third quarter. JoAnn Wooley made two points.

Going into the final quarter the Hornets led 58-13. In this quarter Teena Newman and JoAnn Wooley hit two goals each. Misty Bartley, Star Tennyson, and Darlene Henley each hit two free throws. Kim Crowson sunk one free shot.

Krista Kirkland led the scoring with 20 points. She had three fouls. JoAnn Wooley had 16 points and three fouls. Melissa Nix and Kathy Powell each had 8 points. Kathy had two fouls and Melissa had five fouls. Darlene Henley and Teena Newman scored six points each. Teena had two fouls and Darlene had three.

Kim Crowson had three points for the night. She had one foul. Misty Bartley, Star Tennyson, and Shannon Peck all had two points. Shannon had no fouls, Star had two, and Misty had five fouls.

The Varsity Hornets finished with a 8-2 district record. Spade once again squeezed past the Hornets 53-49.

In the first quarter Lee Bartley scored four points. David Wood and Jeff Kinzie each had two points. After the first quarter Spade led 13-8.

Jeff Kinzie scored all the Hornets' points in the second quarter. Jeff hit five goals for ten points. At halftime the score was 29-18 with the Longhorns in the lead.

The Hornets scored 20 points in the third quarter while the Longhorns only scored ten points. John Taylor led Sudan with eight points. Brent Kirkland & Jeff Kinzie each had four points. David Wood and Lee Bartley each scored two points. After playing three quarters the score was 39-38 as Spade led now by one.

In the final quarter Brent Kirkland hit five points. Jeff Kinzie, Jeff Dodson, and David Wood all had two points. Jeff Kinzie led the Hornets with 18 points and two fouls. Brent Kirkland scored 9 points and had four fouls. John Taylor had eight points and five fouls. David Wood and Lee Bartley each had 6 points. David had one foul and Lee had four fouls. Jeff Dodson hit two points and committed two fouls.

New drilling equipment allows researchers to drill into solid rock

COLLEGE STATION — Drilling in to solid rock in the world's largest underwater mountain range, engineers say they have developed equipment that is allowing scientists to retrieve previously inaccessible core samples from deep in the Atlantic Ocean.

The engineers are part of the international Ocean Drilling Program, a 10-year scientific cruise in which scientists hope to discover new information about the Earth's origins.

The core retrieval has been made possible by a specially designed guide base that keeps the drill bit from spinning off the hard, rocky surface, said Dr. Philip Rabinowitz, a Texas A&M University oceanographer and director of ODP. ODP is headquartered at Texas A&M and the university is science operator for the project.

Traditional drilling methods have depended on thick layers of sediment to provide stability for the drill bit before it hit bare rock.

Because the ocean floor at this site does not have a protective sediment layer, drilling into the newly formed crust called for an innovative technique, Rabinowitz said.

Enochs News by Mrs. J.D. Bayless

Mr. and Mrs. Ray Spencer and children of Friona were visitors at the Baptist Church Sunday and visited her dad, Mr. and Mrs. J.C. Snitker, they also visited her grandparents, Mr. and Mrs. Clifford Snitker. J.C. was dismissed from the Littlefield Hospital Sunday. Get well soon J.C.!

Kenneth Petree of Clovis, N.M. visited his mother, Mrs. Wilma Petree, Friday and they went to Lubbock on business Saturday.

Kerry Jay and Kelly Mosser spent the weekend with their grandparents, Mr. and Mrs. E.N. McCall. Mr. McCall took his grandson, Kerry Jay, to the 50th Anniversary of the Wild Life Refuge celebration Saturday at the Refuge. Enjoyed seeing a film shown by Dean Gilliam how the ducks were led poisoned, they carried the grandchildren home Sunday afternoon and visited their daughter, Mr. and Mrs. Steve Mosser at Slaton.

Mrs. Wilma Petree gave a report on her Mission trip to Yoleta, Texas Sunday morning at the church.

Rev. Mike Heady preached his last sermon at the Baptist Church Sunday Feb. 16, where he had been pastor of the last six years and three months, there was dinner in the fellowship hall of the Church following the morning service. The Heady's moved Monday to Shamrock where he will be pastor of the Eleventh St. Baptist Church there. They will be missed very much.

Mr. and Mrs. Edd Autry received word her brother, Bill Willhoit of Burkburnett, died Friday morning. She was gone two days to attend his services. Mr. and Mrs. Marvin Short of Morton stayed with Mr. Autry while she was gone.

Mrs. Wilma Petree and Mrs. Bill Key visited in the home of the Bud Huff's Monday afternoon.

Guests in the home of Mr. and Mrs. Edd Autry was a niece and husband, Mr. and Mrs. A.T. Denton from Denver, Colo. They left for home Tuesday morning.

Mrs. Kelly Robinson and children of Whitharral, visited her grandmother, Mrs. Willie Byars Friday.

Mr. and Mrs. Clifford Snitker received word that a cousin, Leta McClain of Wichita Falls died Thursday.

A correction about the grain weighed in the elevator, it was between a hundred and thirty and one hundred million pounds of grain.

Sid and Linda Key of Muleshoe has visited his parents, the Bill Keys recently.

Mr. and Mrs. Goldman Stroud visited Mr. and Mrs. Loyd Maxey in Littlefield Friday.

Mr. and Mrs. Dennis Turney were guests in the home of her parents, Mr. and Mrs. Truman Nix in Littlefield Saturday.

Mr. and Mrs. Goldman Stroud visited their son Mr. and Mrs. Glynn Stroud in Muleshoe Monday evening.

Monty and Brittany Kirby of Three Way spent the weekend with their grandparents, the Goldman Strouds.

Rev. Ilif Lenord of Lubbock formerly of Enoch's preached both services at the Baptist Church Sunday and was dinner guest in the home of Mr. and Mrs. Clifford Snitker.

Harold and Robert Layton of Dell City spent two nights with his mother, Mrs. Etta Layton and took care of business in Muleshoe.

Linda and Sid Key of Muleshoe have moved back to his parents Mr. and Mrs. Bill Keys farm west of Enoch's. Welcome back Linda and Sid.

Visiting Mr. and Mrs. Elwood Autry last Sunday was their son, Mr. and Mrs. Mitch Autry and children of Lazbuddie, Texas.

Several from our area attended the Annual Bailey County Electric Cooperative Meeting Saturday Feb. 22, 1 p.m. in the Community Activity Building in Morton. The Bob Newton's Clifford Snitker and J.D. Bayless won door prizes.

Mrs. Etta Layton and Mrs. Edward Crume visited their sister, Mrs. Juanita Snow in Muleshoe Wednesday.

Visiting in the home of Mr. and Mrs. Bill Key Tuesday were friends, Mrs. Gevena Mitchell and grandson, Steve Wakefield of Dimmitt.

Mr. and Mrs. Glynn of Muleshoe visited his parents, Mr. and Mrs. Goldman Stroud during the weekend.

Mr. and Mrs. Jarrol Layton visited friends Sunday evening at Maple, Texas.

WHO KNOWS

1. How many pecks are there in one bushel?
2. What is the difference between the adjournment of Congress and a recess?

Answers to Who Knows

1. Four.
2. Adjournment terminates a session, but a recess sets a date for reconvening.
