FIFTH YEAR, NO. 261.

TEN PAGES TODAY

LUBBOCK, TEXAS, THURSDAY, SEPTEMBER 29, 1927.

MEANS "BY ASSOCIATED PRESS"

SCHOOLS TAKE SECOND PLACE AS FAIR BECKONS

FATE OF REBECCA ROGERS WILL BE PLACED WITH JURY TODAY

LAWYERS SEEK TO SHOW WOMAN IS "UNBALANCED"

EXPERTS SAY SHE IS SUFFERING FROM CASE OF MENSTRUAL PRAECOX

HUSBAND ON STAND

DECLARES HE'S PROUD TO BE KNOWN AS HER HUSBAND

(By Associated Press) GEORGETOWN, Texas, Sept. 28.—The fate of Mrs. Rebecca Bradley Rogers, 22-year-old former University of Texas student, on trial here in district court on a charge of arson will rest with the jury Thursday.

Mrs. Rogers, also charged with the robbery of the Farmers' National bank at Buda, Texas, bears the last witness today in connection with her alleged burning of a house in Round Rock. The state has charged that she fired the house to divert attention of the bank employees in an effort to rob the institution. The burning was on December 16, the day prior to the robbery of the Buda bank by a young woman armed with an automatic pistol.

Criminal District Judge Cooper has taken under advisement the charge to will deliver tomorrow to the jury which bears the defense's theory that the state is attempting to prove through the former university co-ed's husband, Orlis Rogers of Amarillo, and others, that she is "mentally unbalanced," a victim of dementia praecox, and some times unable to clearly comprehend the difference between right and wrong.

Fight Circumstantial Evidence. All through the day the defense, which asked the court for certain points, has been making its case.

FIGHT FILM ARRESTS

Franchise Theater Man and Seven of Employees Held; Warrant for Richard Arrest Issued

SAN FRANCISCO, Sept. 28.—A San Francisco theater manager and seven of his employees were arrested here today on federal warrants charging them with violating the Interstate Commerce act by showing the Tunny-Dempsey Chicago fight film, Tex Rickard, in the action and a telegraphic fight promoter, who was named in the warrants, was arrested for his arrest sent to New York.

The arrests were made under a law prohibiting transportation of fight films from one state to another. Assistant District Attorney Eugene Bennett said the government later may arrest Gene Tunney, Jack Dempsey and their manager, and bring them here for trial.

Extend Glad Hand To Amarilloians!

"Howdy Amarillo!—We're glad you came!" That will be the slogan tomorrow morning at 10 o'clock when the special train, bearing 200 smiling Amarilloites, arrives in Lubbock to visit the 1927 Panhandle-South Plains Fair, Texas Tech and the city of Lubbock.

The North Plainsmen, headed by Bob Emmett, president of the Tri-State Fair association and including the entire membership of the Amarillo fair association, will meet at the depot by the high school band, will march to Texas Avenue between Main and Broadway, there will be placed into automobiles and taken for a tour of the city and Tech. After that they will go to the fair grounds.

A committee to furnish cash for the visitors was appointed last night by Fair Manager A. B. Davis. This group, composed of Asa May, W. T. Rayburn and E. B. Hibben, request that every Lubbock citizen who can possibly spare the time, report to them on Texas Avenue between Broadway and Avenue I by 10 o'clock, this morning, where windshield stickers will be furnished, and plans announced. Twenty-five cars are needed.

First Pictures Of Speed Kings — These Fliers Won In Great Cross Country Air Derby, New York To Spokane

Here are pictures of three winners in the Spokane air derby, taken upon their arrival at Spokane. To the left is "Speed" Holman of St. Louis, winner of the Class A derby from New York to Spokane. In the center is J. S. Charles of Richmond, Va., winner of the Class B New York to Spokane event. To the right is Cecil London, winner of the Class B derby from San Francisco to Spokane.

BUSINESS OUTLOOK IMPROVES IN TEXAS

DRY WEATHER AFFECTS SOME GROWING CROPS—STOCK RANGES HOLD UP WELL

DALLAS, Sept. 28.—Despite violent fluctuations in the price of cotton during the past 10 days, the moderate rain again secured in that period has served to strengthen confidence in the business situation of Texas, according to the monthly business review of the Federal Reserve Bank of Dallas released for publication today.

Features from the cotton crop have been given publicity but have detracted from the benefits of both banks and merchantile establishments and to some extent in the expansion of trade. The distribution of merchandise at wholesale has shown a marked seasonal increase in some lines of trade. It is still falling short of a year ago.

Growing crops over a large area of the district have been affected adversely by the dry weather during the past 10 days. In those sections where rain has fallen crops have given up fully but have detracted from the benefits of both banks and merchantile establishments and to some extent in the expansion of trade.

Cotton Detectors' The cotton crop has shown a marked deterioration in nearly all sections due to the drought, the heavy infestation of weeds, and other insects, and the fact that the department of agriculture, September first estimate of the Texas crop is above the average production of the preceding five years.

The condition of a considerable portion of the district's ranges has likewise deteriorated, but livestock has held up fairly well.

Although the number of oil wells completed in August in the district was the smallest of any month since December, 1925, an increase was shown in total output, due to the completion of larger wells and to the yield of older wells being maintained at high level. Production of crude oil in August amounted to 26,725 barrels as compared to 26,500 barrels in July, representing an increase of 225 barrels in the daily average yield.

WEATHER JUST RIGHT

For Maturing Of Crops As Well As For Fair And One's Disposition, Experiment Station Says

Almost perfect weather—for the crops as well as for the South Plains fair and one's general disposition—greeted Lubbock yesterday.

Just such warm, sunny days as yesterday are needed to mature the cotton, according to officials of the experiment station.

A maximum temperature of 75 was reached in the afternoon though the day's minimum, registered in the wee morning hours was 42.

ILLINOIS COAL AGREEMENT TO BE TALKED NEXT FRIDAY

INDIANAPOLIS, Sept. 28.—(AP)—Officials of the Illinois Coal Operators' association and leaders of the United Mine Workers will meet in Chicago next Friday morning to renew negotiations for a new agreement to the Illinois soft coal field, according to announcements tonight by John H. Lewis, president of the Miners' Union.

ROME OPENS ARMS TO LEGIONNAIRES

ITALIANS IN WAR "HELLO" TO MEN WHO FOUGHT IN WAR, POPE TALKS

(By Associated Press) ROME, Sept. 28.—Rome extended open arms today to the 260 members of the American Legion headed by National Commander Howard P. Savage, who made the pilgrimage to the Eternal City. The combination of the Legionnaires of the visit took on various forms, in which the friendship of Italy and America was warmly demonstrated.

First came a solemn ceremony at the tomb of the Unknown Soldier to which the Legionnaires marched through streets where the stars and stripes and the Italian tricolor have been waving. Legions of military cavalry, artillery, the aviation corps and naval personnel lined the route. The Legionnaires, dressed in their black uniforms, saluted the Pope's shrine as they passed. The Pope, who had been ill, appeared in his white robes, welcomed the Legionnaires and later went around among them, shaking their hands. His special benediction was addressed to Frank Schobel of Philadelphia, who though blinded in the war, had joined his comrades in their good will journey to Europe.

The day ended with a great reception in the Capitol, given by the Governor of Rome, Prince Benigno.

THIEVES FOLLOW GOLD SNAP, THREE MISSING OVERCOATS

Winter's chilling threat caused the loss of three overcoats in the business section of the city. Tuesday night, it was reported to police officers yesterday.

D. N. Ehrlich of the Little Hotel, reported the loss of a dark blue coat, stolen from a car and C. R. Bryant suffered likewise while W. R. Jackson of the Little Hotel reported seeing a man take his from a car as it stood parked. Ehrlich offers a reward of \$20 for the recovery and Jackson will give \$25 for the return of his coat.

GIRL INJURED WHEN HIT BY BACKING CAR AT FAIR

Miss Wray Hummel, of Route A, suffered a badly sprained, and bruised leg yesterday afternoon when a car backed into her at the fair grounds. She was rushed to town for medical treatment and examination showed no broken bones. The foot swelled considerably after the accident.

MEXICAN FEDERALS KILL 35 CATHOLICS

INCLUDED IN NUMBER IS ONE PRIEST—TRIO SOLDIERS LOSE LIVES

(By Associated Press) MEXICO CITY, September 28.—Thirty-four rebellious "Catholic" soldiers were killed and a Catholic priest, Father Solano, was captured and summarily court-martialed and executed after two brief combats with Federal troops in the state of Jalisco, says a bulletin issued by the presidential bureau tonight.

One corporal and two soldiers were killed and one officer and nine soldiers were wounded. The report of the affairs was received from Military Commander Ferral. The first fight took place at Las Mesquites, where thirty-eight rebels, headed by Sadano and another chief named Placencia were entrenched. This fighting lasted four hours, and fourteen rebels were killed and two captured and executed. The others fled, Sadano being taken by the troops and later shot.

The second engagement lasted three hours, after 250 rebels commanded by Alberto Parajas, Francisco Lopez, Florencio Zaragosa and Jesus Nunez, attacked federal troops under Colonel Ortiz Sevilla at Portuense. The rebels were dispersed and fled to the mountains, abandoning eighteen dead and many wounded.

BEACH STILL ELUDES THOSE SEEKING HIM IN N. J. MURDER

HAMMONTON, N. J., Sept. 28.—(AP)—Willis Beach, Southland poultry raiser wanted on a charge of aiding and abetting the slaying of Dr. A. William Lillendahl September 15, remained in hiding today while his attorney and the county prosecutor's office issued statements defending their stands.

The warrant for Beach's arrest was issued yesterday when officers were unable to find him at his home. He was free on \$5,000 bail as a material witness.

Runnels Farmers Assail Stand of West Texas C.C. On Water District Plans

(By Associated Press) AUSTIN, Sept. 28.—Assorted efforts of the West Texas Chamber of Commerce to aid in organization of a proposed Hagerman Irrigation district were assailed in a letter to W. C. Haynie, president of the chamber, signed by around 500 Runnels county farmers and ranchers and issued by Charles Furgason, secretary of a committee fighting the district here today.

The chamber's opposition to the syndicate power company's proposed construction of a dam along the Colorado river also was assailed.

The farmers and ranchmen, owning more than 30 per cent of the irrigated land in the Runnels county part of the proposed Hagerman Irrigation district emphatically resent interference of the leaders in the West Texas Chamber of Commerce or any other group of men who are not directly affected by these local affairs, said the letter.

We carried this fight to the Texas Supreme Court and won a victory at a cost of several thousand dollars. We believed that such organization was for the benefit of a group of security buyers, attorneys and engineers who interested themselves actively in promoting the scheme. It was proposed to issue bonds. The debt thus created would have been paid by taxing the land included in the district.

BOY DECLARES GIRL OFTEN HAD KISSED FATHER

PHYSICIANS TESTIFY BAILEY'S DAUGHTER LOOKED DRUGGED

(By Associated Press) ENID, Sept. 29.—Not sufficient poison was found in the stomach of Mrs. Jane Bailey, 18, daughter of the Rev. Charles Bailey, Episcopal minister here, to cause death, Dr. W. H. Bailey, Oklahoma City pathologist reported to Dan Mitchell, Garfield county attorney here tonight.

This last minute crash in the most famous infamy mystery that has gripped Oklahoma came to light late Tuesday. The announcement of a telephone conversation from Dr. Bailey to Mitchell "came like a bolt of lightning out of a clear sky," the county attorney said tonight.

Dr. Bailey reported to the official that he had not found sufficient poison on his research to cause death. He had been employed by the county attorney to conduct the examination.

ENID, Sept. 28.—Evidence seeking to show affectionate relations existing between the Rev. Charles Bailey and Miss Mary Atkinson, 25-year-old niece, was introduced today in the preliminary trial of the young woman on a charge of poisoning the pastor's 18-year-old daughter, Mary Jane.

Stewart Bailey, brother of the dead girl, testified that on more than one occasion he saw the nurse kiss his father soon after the death of his mother, which preceded the death of Mary Jane by less than two weeks.

TRAVELLERS TO MEET

United Commercial Travelers Will Get Together At Hotel Lubbock, Hear Supreme Counsellor.

The Lubbock Council of the United Commercial Travelers will hold an important meeting at Hotel Lubbock, Friday night, at 8 o'clock. R. E. Williams, of Lubbock, local secretary of the organization, announced last night. W. J. Sullivan, of Columbus, Ohio, former past Supreme Counsellor and special representative, will deliver an interesting and timely message. Mr. Williams, who represents the Partin Exchange company, stated.

Members of the United Commercial Travelers will have co-operating with them in the meeting, the manufacturers, wholesalers and retailers of the city. Mr. Williams said, and men in these classifications are especially urged to hear the widely known speaker.

Wanderer-Pastor Held For Bigamy

Here are pictures of three winners in the Spokane air derby, taken upon their arrival at Spokane. To the left is "Speed" Holman of St. Louis, winner of the Class A derby from New York to Spokane. In the center is J. S. Charles of Richmond, Va., winner of the Class B New York to Spokane event. To the right is Cecil London, winner of the Class B derby from San Francisco to Spokane.

Held at Grand Rapids, Mich., the Rev. Willis F. Jordan, late of Lubbock, Ga. is trying to disprove the claims of three women that he has been married. The women, in Charlotte, N. C., Atlanta, Ga., and Roanoke, Va., charge desertion.

Dr. J. E. Barr, president of the fair board, acted as toastmaster of the unparalleled success of the present exposition, the Fair Association was held at banquet at Hotel Lubbock last night. Eighty-five Lubbock and visiting men, with a few out-of-town ladies, were present and a program followed the three course spread, which began promptly at 6:30 o'clock.

NAME ANOTHER IN MORGAN SLAYING

SECOND STATEMENT FROM WIFE SLAIN MAN MAY IMPLICATE NAVE

(By Associated Press) WICHITA FALLS, Sept. 28.—The second alleged confession by Mrs. Zina Morgan, widow of a man charged with murder in connection with the death of her husband, Jack Morgan, may result in involving Fred Nave in the slaying according to a dispatch received by the Wichita Falls Record-News from its Childrens' correspondent.

Nave is held in the Hall County jail on charges of auto-theft and participation in the Dodgeville bank robbery two months ago.

Alma Mahan, Childrens' district attorney, said that Nave may be held in connection with the death of Morgan, whose body was found underneath a culvert north of here last January.

In her alleged confession, which was placed in the hands of the district attorney at Childrens' today, Mrs. Morgan is said to have stated that she and Nave visited the grave of the slain man two days after the body had been hidden and made an effort to remove marks of identification, according to Mahan. A telephone call from the second wife of the man was next his skin was overlooked and later gave officers a clue that led to his identification.

SLATON SHOW PLANNED

Thousand Entries Expected in Poultry Exhibit Due To Be Held Next Dec.; Committee Named.

One thousand entries are expected in the Slaton Poultry show, which has been set for December 1, 2, and 3. It was announced by those interested in the event here last night.

The show will be held under auspices of the Slaton Chamber of Commerce.

The following committee has been appointed to have charge of arrangements: T. L. Kinnel, P. C. Tudor, F. E. Cobb, W. P. Florence, and J. J. Thornton.

BOOKS PLAY SECOND FIDDLE AS KIDDIES FLOCK TO EDUCATIONAL EXHIBITS ARRAYED AT THE FAIR

CHILDREN, PARENTS, TEACHERS, OTHERS WILL HELP MAKE THURSDAY ONE OF BANNER DAYS; LITTLEFIELD PLAYS SLATON ON GRID

With practically all the independent and rural schools of the county closed throughout the day, approximately 9,000 school children will flock through the turnstiles at the Panhandle-South Plains fair here today as the annual "School Day" of the Exposition holds full sway.

The attendance at the fair today, by virtue of the school kiddies, their parents and the teachers, is expected to surpass any of the five days, with the exception of Saturday when hordes of out-of-town people will join Lubbockites in staging a fitting climax to the greatest of all South Plains' exhibits.

EXHIBITORS ARE GUESTS OF FAIR

EIGHTY-FIVE ATTEND DINNER AND PROGRAM AT HOTEL WEDNESDAY NIGHT

Complimenting out-of-town exhibitors at the 1927 Panhandle-South Plains fair and celebrating the unparalleled success of the present exposition, the Fair Association was held at banquet at Hotel Lubbock last night. Eighty-five Lubbock and visiting men, with a few out-of-town ladies, were present and a program followed the three course spread, which began promptly at 6:30 o'clock.

The Weather

A DETOUR IS THE LONGEST DISTANCE BETWEEN TWO DRIVEN POINTS

OKLAHOMA—Thursday cloudy and warmer in central portions; Friday partly cloudy to west portion.

EAST TEXAS—Thursday, partly cloudy, warmer in north; Friday, Friday cloudy, band showers.

WEST TEXAS—Thursday and Friday partly cloudy; cooler in north portions, Friday.

Temperatures Yesterday Maximum 15, Minimum 15.

SLATON WINS OVER PLAINVIEW BY 6-0 SCORE

FUMBLE IN FIRST PART OF GAME GIVES WIN

A break meant victory. Slaton was fortunate yesterday and Plainview unfortunate, as the football game between these two schools ended in a 6 to 0 decision for the Tigers.

Captain Hamilton, hefty tackle of the Slaton Tigers, had loads upon him tucked victory under his arm and galloped for sixty yards on the fourth executed play of the game, the second gridiron classic of the annual South Plains Fair. The break gave the Tigers the big end of a 6 to 0 count.

Up to the time of this play, which brought victory to the Tigers, both games started with early counters and plays run—the kick-off, and line plays by Owens of the Slaton Tigers and backfield, and a fumble by Owens that was recovered by Plainview. The game was tied 0-0.

The game was similar to the first game of the program in that both games started with early counters and a furious battle was waged throughout the remaining quarters. Offensively, the Bulldog machine proved the greater, as they placed the line for quite a few more yards than the Tigers. Inability to break up the Slaton passing combination was quite noticeable on the part of the Allentons. The Tiger passing machine attempted twelve forward passes and completed five for a net of 74 yards.

Most of the game was played in mid-field with an exchange of punts lifting the scene first to the Slaton and then to the Plainview territory. Twice during the game the Bulldogs threatened to tally on the Mitchellmen—but in both instances they failed to penetrate the Tiger defense for the necessary yardage to put them over.

It was the second 6 to 0 defeat the Plainview club has suffered this season; however, neither of the games count against the standing of the Class A school as the teams that rising up defeat on them were of the Class B conference. Last week end the Playdays White winds plastered the first defeat to the Bulldogs.

Backfield Flashy
Allen's backfield proved to be a flash, as he has a well balanced machine with every one of them fast and quick to get on the jump. After constant drilling in whiffing to the backfield, backfield they should prove to be a great combination.

Owens, halfback of the Tiger eleven, turned in a good game and was in the mix-up both on the offense and defense. He carried the big offensive load in crashing through on line plays and on off tackle runs. Hamilton, plucky captain of the Phillies, who scored the winning counter of the afternoon, played a smash up good defensive game and he was repeatedly seen scrambling the attack of the Bulldogs. Nichols, center built wing man of the Slaton entry, received most of the completed passes made by the Mitchellmen and did all the kicking for the Slaton aggregation.

Captain Magill of the Bulldogs, in shift in his work in the back field and along side him to Dutch Schroeder, who gave frequent trouble with his broken field runs. Wadell, the fullback of the Bulldogs, was good for two yards on most every play and gained consistently for Allen.

Good delegations from both Slaton and Plainview were present for the game and assisted the gridironers in every way possible for victory with thunderous yells from the sidelines. Something over 500 people attended the game yesterday afternoon at the fair park.

The Line-up
SLATON: Nichols, L. T., Green, C., Cooper, R. G., Wilmoner, D. H., R. T. Hamilton (C), Carroll, R. E., Arms, C. R., D. H., Rybee, L. H., Schroeder, Magill (P), R. H., Bennett, Wadell, P. H., Woolver.

Substitutes—PLAINVIEW—Laird for T. Bell; Smith for Green; SLATON: Covington for Bennett; McAttee for Shelby.

Officials—Davis (Texas A. M.) referee; McMillan (Texas A. M.) umpire; Lowery (T. C. M.) field judge.

Dallas Polo Team To Play Abilene

DALLAS, Sept. 28 (AP)—The Dallas polo team will have here Friday for Abilene, where it will meet the team of that city in a series of two games at the West Texas Fair. Colonel Eugene DeBorja announced today. The first game will be played Saturday afternoon and the second game Sunday afternoon. The members of the team besides Colonel DeBorja are Dr. Ray Williams, Johnnie Counts and Dudley Moore.

The Prefect of Police of Peking, China, has issued a decree forbidding short hair, short skirts and decorative gowns.

RAIN, OPENDATE HALT MIX-UP, NATIONAL

(By Associated Press)

NEW YORK, Sept. 28.—Rain and an open date caused a pause in the National League pennant scramble today. The league leading Pirates had a recess while the second place Cardinals were rained out at Cincinnati, leaving a margin of two games separating the two front contenders. The Giants defeated the Phillies to gain half a contest.

The Standings

Played Last Pct. To Play

Pittsburgh	93	58	616	3
St. Louis	91	60	603	3
New York	90	61	596	2

The Giants can tie for first place in case the Phillies lose all three games left to play and the Cardinals were rained out at Cincinnati. New Yorkers would have to sweep their three contests. To clinch the leading, Pittsburgh has to come out in front in two contests providing the Cardinals capture all three.

GIANTS WIN FROM PHILLIES BY 5 TO 4

PHILADELPHIA, Sept. 28 (AP)—The Giants helped the Phillies close out their home season today by defeating a 5 to 4 decision from the tail-enders in 10 innings. The triumph allowed the New Yorkers to continue in the pennant chase with the slim possibility of tying the leaders.

Cy Williams gained an edge on Hank Wilson of the Cubs in the National home run races by clouting number 28 with one on base in the sixth to lead the Chicago player by one. Leach of the Phils belted for the circuit in the fifth. CANNED FRUITS

All canned fruits should be stored upside down until cold. This will prevent fruit from sinking permanently to the bottom of the jar.

DRINKING FLOWERS

Geraniums thrive if you feed them cold tea once in a while and hydrangeas seem to like weak coffee. Pour onto the roots only.

TECH GRINDS FOR CLASH WITH SAINTS

Jack Meagher's Catholics of St. Edwards University are expected to furnish one of the hardest games of the Scarlet and Black schedule for the 1927 calendar and the Matadors trio are rapidly whipping their men into shape for the game Saturday afternoon at the fair. Last season, only one point, the kick after touchdown scored the flaming jersey Texas Tech gridironers' victory over the St. Edwards machine. The final score of the 1926 encounter resulted in a 7 to 6 count.

Captain Meagher's outfit has a lefty for every position back this season and last week they bottled the Simmons Cowboys to a scoreless tie. The St. Edwards machine is considered one of the fastest working football combinations in the state and always flaunts a varied attack. The Matadors realize that a team will be in harness to meet them Saturday in the concluding athletic work has been spent on the Matadors offense throughout the week. Coaches Higginbotham and Payne are working diligently with the backs and are striving to put a real offense into the Scarlet and Black for Saturday. The U. N. has let the boys know the weakness shown up in the last week-end event and are putting the linemen through the mill for the battle with the Catholic line.

Since this game is the last one of the football attractions during the 1927 Exposition and is being the only college contest of the program one of the largest attendances every handed to a gridiron shown is expected by the officials of the fair. Seat accommodations for more than 4,000 people have been provided for.

SOLONS DEFEAT BOSTON SOX IN PAIR

BOSTON, Sept. 28.—Washington concluded its season series with the Red Sox by winning both games of a double header today, 2 to 1 and 6 to 4. The Senators won 12 out of the 22 games played with the Red Sox. Hadley's pitching was the deciding factor in the first game.

The Red Sox scored all their runs in the second game by bunching five hits off Fred Marberry in the fourth inning. Braxton went to the box for the Senators in the fifth and pitched brilliantly, holding Boston to two hits.

First Game

Score by innings:

Washington	000	100	010	2-10-2
Boston	000	000	010	1-0-0

Hadley and Ruel; Wilkie, Harris and Moore.

Two base hits: Harris. Three base hits: Carley, Stolen bases: Reeves and Tobin. Base on balls off Hadley 2; Wilkie 2; off Harris 1. Struck out by Hadley 5; by Wilkie 2; by Harris 1. Hits off Wilkie 2 in 7 innings; off Harris 2 in 1 inning. Hit by pitcher, by Hadley (Rollings). Losing pitcher: Wilkie.

Second Game

Score by innings:

Washington	011	100	000	2-14-6
Boston	000	000	000	0-7-2

Marberry, Braxton and Tate; McPayden, Russell and Hartley.

Two base hits: Rice, Gansel. Three base hits: Russell.

Stolen bases: Rice, Goslin. Base on balls off Marberry 3; Braxton 1; McPayden 2. Struck out by Marberry 1; Braxton 4. Hits off Marberry 5 in 4; off McPayden 2 in 5; in 6. Winning pitcher: Braxton. Losing pitcher: McPayden.

The REFEREE

Where did the Senators get Jack Hayes, their new shortstop?—J. R.

He went direct to the Nats from the University of Alabama.

Who won the pennant in the Three-Eye league this year?—C. F. R.

Danville.

KIWANIS WILL LEARN ALL ABOUT NATURAL GAS

B. Hughes, of the West Texas Gas Company, is to be the main speaker on the program of the regular weekly Kiwanis luncheon at the Lubbock hotel today. The program committee announced yesterday. Mr. Hughes will explain about natural gas and answer questions of the members concerning the subject.

J. C. Anderson is chairman of the day and special songs will be led by Prof. W. R. Waggoner, head of the Tech music department.

Dempsey Confident He Will Again Battle Back To Fight With Tunney; Wants Plenty of Matches In Winter

BY EDWARD J. NEIL

(Associated Press Sports Writer)

NEW YORK, Sept. 28 (AP)—Jack Dempsey, the champion boxer, today expressed confidence that he would be able to fight again with Tunney, the champion, and that he would have plenty of matches in winter.

"I am in good luck," Jack said, "and I shall stand back of him. The work he did in bringing me back through victory over Jack Sharkey to the fight with Tunney was more a matter of friendship than business and I can't ever go back on a friend."

Having definitely established his position in the campaign to reverse Tunney's victory Dempsey also stated that the champion was on the floor at least fourteen seconds in the seventh round.

Back to Mountains

"A few weeks of rest and recreation," he said, "and then back to the Colorado mountains, to hike and rough, and wait for the time to climb back into the ring. Right there I'll find out whether I want to fight again. That's all I need now, for I'm in great shape, strong and confident that only a bad break kept me from my old title. If I'm ever to try again now is the time to capitalize on the hard work I did getting back in prime condition after only one fight in three years."

"If I do come back—and I believe I will—I want to fight at least four times to prove my fitness for another shot at Tun-

ney. I'll take on anyone—Phil Scott, the Englishman, Paulino, the Spaniard, this fellow Henney, or Sharkey again. I want these fights through the winter season and into the spring. Then coming on Tunney again and you can say it won't matter then."

Referring briefly to the fight, Jack said he was dazed only in the eighth round when Tunney caught him off balance and bumped him onto the canvas with a right to the chin.

He said he was not told the referee would wait until he entered a neutral corner before counting in case of a knockdown.

Estelle Misunderstood
Jack took special delight in telling of his homecoming after the fight to the hotel apartment, of his wife, Estelle Taylor.

"Mrs. Dempsey was listening in on the radio, Jack said, and when the knockdown occurred she heard the count of nine and then thought the announcer said—out, instead of 'up.' Then she turned off the set."

"When I came in, Estelle said: 'Wasn't it wonderful and you won by a knockout, too?' Then I had to tell her I lost the decision."

CLEAN GAS BURNERS

To clean burners on a gas stove, take them out of their sockets and brush off all loose dirt. Boil for half an hour in a solution of washing soda made by adding one-half pound of soda to each gallon of water. Rinse and wipe dry, then put back in place and light the gas to finish the drying.

LITTLEFIELD VS. TAHOKA TODAY AT FAIR

The Littlefield and Tahoka high school gridiron clubs will meet this afternoon in the third football attraction of the annual South Plains Fair on the exposition grounds. The game is scheduled to start at 3:30 and since both teams are of the Class B conference of the South Plains, the game counts toward the percentage that awards the title of championship to this district. The Littlefield eleven, under the direction of Coach Tucker had an easy victory of the men of the Tahoka high school last season but much strength has been shown in the Lynn county entry this season and it is thought that the game will be a good exhibition of close football tactics.

JOCKEY DIES AS RESULT OF TUMBLE FROM HORSE

LEXINGTON, Sept. 28 (AP)—Freddie O. Armstrong, 16, Lexington, died today at Havre De Grace, Md., as the result of injuries received Monday when Spanish Arabian he was riding at the Havre De Grace track, stumbled and fell on him. Armstrong was under contract to the Audley Farm stable.

Toledo-Buffalo Tilt Rained Out

TOLEDO, Sept. 28 (AP)—Rain forced postponement today of the inaugural game of the "Little World's series" between Toledo champions of the American association and Buffalo, present winners of the International League.

The crisp low hanging clouds began to drip their moisture at noon and by game time, the rain was a steady downpour.

PACIFIC COAST LEAGUE

San Francisco 6; Oakland 1.

Seattle 1; Hollywood 3.

Portland 2; Mission 0.

Los Angeles 5; Sacramento 1.

A census of all horses and mules on farms the first of this year showed a total of 5,018,000 head, a decline of 17 per cent since 1920. The next five years are expected to show a reduction of the present number by 20 or 40 per cent.

The best of workers get out of sorts when the liver fails to act. They feel languid, half sick, "blue" and discouraged and think they are getting lazy. Neglect of these symptoms might result in a "sick spell," therefore the sensible course is to take as dose or two of Herbine. It is just the medicine needed to purify the system and restore the vim and ambition of health. Price 60c. Sold by Lubbock Drug Company.

"Martin Johnson is right—Luckies give the greatest enjoyment"

Said Elmer Wood to Frank Stone while on a hunting trip in the Canadian Rockies.

Martin Johnson, Famous African Explorer, writes:

"While trailing big game in Africa, I have never been without my Lucky Strike Cigarette. Once on the Abyssinian border my shipment of them from America missed us, and I was miserable until the natives followed our tracks across the Kainsout desert to Nairobi with my precious cargo of Luckies. After 4 years of smoking Luckies in wildest Africa, I find my voice in perfect condition for my lecture tour in America."

Martin Johnson

You, too, will find that Lucky Strikes are mild and mellow—the finest cigarettes you ever smoked, made of the finest Turkish and domestic tobaccos, properly aged and blended with great skill, and there is an extra process—"It's toasted"—no harshness, not a bit of bite.

"It's toasted"
No Throat Irritation—No Cough.

above all gods. In His hand are the
deep places of the earth; the strength
of the hills is His also, Psalm 95:3,4.
PRAYER: We rejoice that all things
are in Thy hand, O God, and under
Thy control.

AMERICA'S COMMERCIAL RELATIONS

Discussion of our international commercial relations leads us immediately, of course, into the influence or effect of our tariff schedules and immigration policies upon our population. Within the short period of a decade or two we have developed in this country a change in the relation of capital to labor which enormously broadens the influence and effects of our tariff and immigration laws.

The development of the economic efficiency of this country, which has resulted in what is known as "Big Business" or large corporations whose securities are widely distributed among investors, has so divorced ownership from management as to distinguish more clearly between the contributions which capital, management, labor and the public each make to production. As a result we have developed a relation between capital and labor under which capital is recognized as a commodity entitled to such compensation for its use, risk considered, as the money market may determine from time to time; just as other commodities find their value in the market price regulated by supply and demand. Under this development it has become practically a national policy with us to favor a wage sufficiently higher than the subsistence needs of the workers, to enable them to accumulate a reserve which is gradually converting the great mass of our people into part owners of the Nation's industries, or what might be called the capitalist class. By many corporations the thrift, or saving habit, of the people is being promoted by various schemes assisting the worker to become a stockholder. It must be perfectly obvious that this relation of capital to labor could not be maintained if we permitted the unlimited flow of either labor or labor's products into our country. Hence we have the tariff and immigration laws. It is, however, impossible for us, with our machinery of government as at present developed, to formulate tariff schedules which do not seem unwisely to favor certain interests. Even if we had before us all the facts which would enable us to develop a comprehensive national policy, securing as nearly as possible equality of opportunity for all our numerous working groups, we should still have a difficult problem to solve. Not the least important phase of the problem is how to adjust our foreign relations so as to enable us to import sufficient commodities and services to satisfy our needs and desires and liquidate the debts due us as a creditor nation. This, of course, involves our exporting commodities, services and gold, or credits, in amounts equal to our imports. As our tariff is professedly made only to equalize our cost of production with the production cost of low-wage countries, it follows logically that as a higher wage develops in other countries our tariff barrier will automatically disappear. Considering the vital importance of wisely solving the tariff problem, the Tariff Commission should, in my opinion have advisory supervision over all tariff matters and should function as a scientific body, as independent of political parties as in the Supreme Court of the United States. The Commission should be so abundantly financed as to enable it to assemble all the information essential to the development of a comprehensive national policy, and it should make recommendations to Congress as to tariff schedules. Along with these recommendations should be presented the facts on which they are based, and thus furnish such evidence as will develop an intelligent public opinion. Meantime, we should be extremely cautious in attempting any further legislation bearing upon the tariff, subsidies, immigration laws and other regulations of our commercial relations at home and abroad until we have more reliable facts upon which to develop a sound national policy.

LEAGUE ASSEMBLY VOTES TO OUTLAW AGGRESSIVE WAR

By unanimous vote the League of Nations Assembly has adopted Poland's resolution declaring that all wars of aggression "are and always shall be prohibited." The Assembly has no power to bind the member governments, but the fact that every delegation gave its approval is reassuring. It is seven years since the first Assembly met in Geneva, and the maintenance of world peace was its principal objective. Since that gathering no wars have been waged among countries belonging to the League, the Permanent Court of International Justice has been established and the far-reaching Locarno compacts effectuated. The Covenant is stronger today than at any previous time since it was formulated, and 56 states are carried on the League roll. Poland is one of the original members, but until recently it depended on its alliances with France and Rumania to bolster its position, rather than on the League. Conclusion of the Locarno compacts brought about a better feeling between Warsaw and Berlin. Within the past few months Moscow also has shown an unwonted cordiality toward the Polish government, opening negotiations for a non-aggression compact. Should that treaty be effectuated, both lands would benefit greatly. They have a long common frontier which mostly traverses open country; no natural defenses lie on either side and the line still is heavily guarded throughout. Germany has just signed the compulsory arbitration clause of the protocol creating the Permanent Court of International Justice. Its delegates to Geneva, headed by Foreign Minister Stresemann, have been urging that arrangements for an international conference on armament-reduction be accelerated. Little progress can be achieved in lessening the land, sea and air establishments — particularly Europe — until firmer confidence is developed among the nations. Delegates to the Assembly evidently favor an extension of such security treaties as those concluded at Locarno in October, 1925. The issue between Soviet Russia and Rumania menaces peace in Eastern Europe. Rumania holds Bessarabia Province, which in 1919 it annexed over Soviet Russia's protest that the region was part of the Ukraine. Great Britain, France and Italy have guaranteed that they will protect Rumania against an unprovoked Russian attack; but the situation is still unstable because of continual friction along the Dniester River, which forms the Russo-Rumanian frontier.

One of the statesmen who advocate regional security agreements to prevent war is Don Pedro Iniguez, Chile's former minister of justice and its spokesman in Geneva. His position probably reflects the attitude of the Ibanez government, that has displaced the oligarchy who long ruled Chile. Dr. Iniguez's remarks in Geneva may presage a settlement of the Tanco-Arica issue, which has embittered relations between Chile and Peru.

A security agreement embracing Chile, Peru, Bolivia and Argentina would help bring lasting peace to a vast region in South America.

VALUABLE LIVES

Protection of widows and orphans through insurance is so common that it excites no comment. But when life insurance gets into the millionaire class people whose personal interest in the matter is nil discuss it eagerly. In the list of 182 policyholders of this class printed recently are some men who differ from the average protector of his home only in the greater amount of his insurance. Another kind of policyholder is the man who has been insured by some one else for the protection of certain interests, business scientific, or whatever. Certain stage and screen stars are such a good investment that their backers pay the premiums. Their earning capacity is well known and their loss to the backers, considered solely from the financial side, would be serious unless covered by insurance. The growing recognition of pure science by big business is indicated in the insurance of such men as Dr. Frederick B. Basting of Toronto. It is astonishing to think of a doctor, even the discoverer of insulin and a top-notch laboratory man, carrying insurance of \$5,000,000.

FOOD AND POPULATION

Intensive farming could be relied upon to double the food supply from certain large areas which are producing comparatively small crops. On the Pacific Coast, with its prodigious tillage and harvesting systems, production probably could be doubled on the land now under cultivation, and there are many millions of acres of fairly rich land now producing no food for human beings, but are turned over to cattle, sheep, horses and swine. Just how far we might rely upon science to provide synthetic food to take the place of the natural supply is, of course, problematical. But science always rises to emergencies, and doubtless would rise to this one of the threatened starvation of the race, should it ever have to be faced. Mathias thought that this century would see an overcrowded planet and a starving population. But, due to improved means of tillage and distribution, which have resulted in overproduction, there has been a greater per capita food supply than ever, and there need be no grave doubts that the production will not keep pace with population for many hundreds of years.

OUT OUR WAY

By Williams

SO THINK WE

We think that too many men who run into debt do not even attempt to crawl out.

We think that very often a genial man is one who enjoys fun and comfort at the expense of others.

We think that we may not always recognize it, but only that comes to us that we have seen for.

We think that to neglect good books is to refuse to enter into the most splendid human heritage.

We think that when a jealous man marries a jealous woman there is something done every minute.

We think that since Old Man Winter has postponed his visit to the South Plains the people of this section are all happy.

We think that one of the great things during the South Plains Fair will be present for the contest Saturday when the Matadors meet with the St. Edwards University.

We think that there is already one fellow who is anxious to meet with you on the life and death line and that is the life insurance agent.

We think Old Sol was kind enough to show his face again yesterday and in a result, many hundreds of people attended the second day of the exposition.

We think that money talks, but few of us are in a position to be heard by it.

FERTILIZER ANALYSIS

Ordinary fertilizers now on the market have an average analysis of about 15 or 16 percent plant food constituents. High analysis fertilizers carry from 20 to 30 percent, while concentrated fertilizers carry 30 per cent and more. These fertilizers do not cake and become so hard they must be reground before application to the soil. Therefore it has been the custom to add peat, sawdust, and other low grade or inert material to fertilizer mixtures to prevent caking.

COWS LACK LIFE

If a heavy milking cow does not get sufficient calcium (lime) in her feed she will take it from the reserve supply in her bones to put it into the milk. This drain on the cow's body has a serious effect on her health and ultimately reduces her capacity for milk production and the bringing forth of normal, well-developed offspring. Assimilation of lime from such calcium compounds as ground rock phosphate, ground limestone and bone meal has been found to be much faster than that from either alfalfa or timothy hay.

CORN WEEVIL LOSS

Weevil loss in southern corn can be prevented to a large degree. The question of selling corn in the fall or as soon as weevils are discovered, merely to avoid weevil loss, is unbusinesslike. The farmer can protect his corn from weevil attack, or kill the insects if already present, by thorough fumigation of the grain with carbon disulfide, applied in a tight room.

SANDWICH BREAD

Bread for sandwiches should be 24 hours old. It should be cut in thin slices. If the filling is soft and likely to soak through, both sides should be buttered, otherwise the butter may be mixed with the filling and the spreading may be done in one operation. Cream the butter until soft enough to spread, but do not melt it as the flavor will be changed.

YOUR HEALTH

By DR. MORRIS FISHBEN
Editor Journal of the American Medical Association and of Hygiene, the Health Magazine.

In a recent consideration of mortality rates in the United States a prominent physician analyzed the particularly high rates existing among negroes.

In 1926 there were 16,431,131 negroes in the United States, constituting almost 10 per cent of the population. The death rates in general are decreasing, but for a while were so much higher than those of the white race that the negro population is only one-half in proportion to the whites of what it was a century ago.

At birth a negro child has 14 years less expectancy of life than a white child; at 25 years, seven years less; and at 62 years, two years less. One of the reasons why negroes die faster than do whites is a lessened physical strength and resistance.

It must be remembered that they are a transplanted people living under conditions different from those under which the race grew. They have had, furthermore, less opportunity for education, less knowledge of sanitation and disease prevention.

Among the diseases which occur most frequently in the negro race are tuberculosis and diseases of the kidneys and lungs.

The murder rate is six times that of the whites. The diseases which seem to affect the negroes less frequently are nervous disturbances, eye troubles and skin diseases. Their suicide rate is, moreover, about one-third that of the white race.

Because of their increased rate of mortality, they usually are forced to pay higher insurance rates than do white people.

CROP BOUND FOWLS

The disorder of fowls known as "crop bound" or "impacted crop," is an overdistended and paralyzed condition of the crop, generally caused by overeating or by swallowing coarse and indigestible substances such as feathers or tough vegetation. Sometimes the contents of the crop may be removed by forcing the bird to swallow a teaspoon or more of sweet oil, then massaging the lower part of the crop, if it contains food, or if not, the part of the crop nearest the crop, until a part of the contents is softened and pressed toward the beak. This is made easier by holding the head of the bird downward. By continued manipulation the greater part of the material may be removed. The bird should not be permitted to eat for several hours after it is relieved.

LAND EROSION

Thus far rain-wash or erosion has permanently destroyed approximately ten million acres of land formerly cultivated. By actual survey, it has been found that a single county in the Piedmont region contains 30,000 acres of formerly cultivated land now permanently ruined by erosion. Much of such land could have been saved by timely terracing, and parts of it never should have been plowed in the first place because of its susceptibility to erosion. Instead it should have been maintained in timber or pasture. In addition not less than three million acres of good stream bottom lands have been practically ruined by deposits of inert sand and gravel and by increased swampiness, due to channels choked with soil particles washed out of upland fields.

FEED COWS LIBERALLY

If pigs to feed cows liberally, fattened rations fed according to production pay well in increased return over feed costs.

IT IS REPORTED

It is reported that gas will likely be used in Lubbock before the end of this month.

It is reported that over in England a woman is not permitted to vote until she is thirty.

It is reported that the World Series will begin on October 5. The New York Yankees will either play the New York Giants, Pittsburgh Pirates or the St. Louis Cardinals.

It is reported that many thousands of people of the South Plains Fair went through the gates yesterday as Old Sol beamed down on the exposition grounds.

It is reported that cotton took another leap in prices yesterday, climbing up three dollars a bale.

It is reported that very little winter puddling will be seen around the fair grounds hereafter, as the officers took twenty-five tickets away from people that were striking them out the fences to allow other people to ride in all times.

It is reported that the League of Nations has closed its eighth annual assembly with the feeling that it has aided peace for the world.

It is reported that since weather conditions are more favorable on the South Plains the annual exposition held for the people of this section will be greater in attendance than ever before.

It is reported that after some men get a start in life they do not know when to stop.

LAUGHS

What the Paper Needed
"What you want on this paper," said the favored contributor, who was piloting over a suggested series of articles with the editor, "is a bishop."

"I beg your pardon," said the editor.
"I said you wanted a bishop on the paper," affirmed the contributor.

"What about it?"
"Well," replied the other, picking up his hat, "from what I've seen of it, there are a number of statements which need confirmation."

DISTINCTION

"What does your old man do, Mrs. Rogers?"
"You mean now or when I was married?"
"Well, what did he do and what does he do?"
"Nothing."

APPRECIATION SURE!

"Ted struck me for a loan of five last week."
"But he appreciated it!"
"Yes," said Ted, "he'd demanded several ounces since."

KNEW WHAT WAS COMING

"How'd you know what do you think of it?"
"Well, to tell you the truth, I knew the night he as easy as you can see a star."

South Plains Press

SLEDDING COTTON

Hale County and the Plains have received a great deal of publicity about the cotton harvesting method or the sled, but this year the sled will be put to very little use. With the cotton or better, it is too valuable a crop to use the sled and lower the grade and sample of the cotton besides wasting a great deal in the field. Pickers will come into their own and the old knee pads and socks will come out of storage and go again into the fields.

Sledding cotton has its advantages but when the price of the staple is up so that pickers may be hired and still leave a profit from the crop there is no place in the cotton harvesting for the sled. It is admittedly a wasteful practice but in the years of cheap cotton and bolls it has its place and will always be held in reserve for the Plains cotton — Plainview News.

It is hardly probable either that there will be many years just like last fall. Fact of the business few people would want to see another fall like it. To begin with there was a very unusual thing happened to the cotton early in the fall. Something of unusual nature came along and killed all of the leaves on the cotton stalks but did not damage the bolls, and this left the stalks perfectly bare of leaves early in the fall, and when the cotton opened there were no leaves on the stalks, and the sleds gathered it almost free from that kind of trash. But this will likely never happen again. The price of cotton will also have something to do with it, and the more it is worth the more the growers will strive to get it in good shape. People will hardly try to gather twenty-five cent cotton with a sled.

Double parking is one of the greatest dangers connected with modern-day traffic problems. Motorists must take double care to prevent collisions and the pedestrians have to trust to luck, their wits, their eyes and their muscles.

Especially on Saturday nights does the situation become acute. People love to ride down town and park for a few minutes or a few hours and watch the world go by. It is an interesting diversion and it cultivated becomes intensely fascinating — just to watch the folks.

It so happens that there are more people with the same idea in mind at the same time than there are sidewalks to accommodate them, and double and triple parking results.

A sledding car, a pedestrian stepping from behind double-parked motor, a crash, a scream and then the ambulance — the penalty that only co-operation of public and police can prevent being exacted. In the sanatorium at Plainview today is a little lad, twelve years of age, who is suffering from a broken leg suffered because a motorist failed to observe the parking laws. If you could hear the pitiful wailing coming from the lips of that little child as he cries morning and night in agony, you would think twice and thrice before you disobeyed a traffic law.

Double parking should be stopped. No rule as sledding with citizenship should be necessary to gain full assistance in seeing that it is stopped for all time — Floyd, Dallas, Tex.

It seems strange indeed that people will insist on doing things that they know to be wrong, but somehow or other this is a very common thing. There are so many different ways that a person can be injured in an automobile accident, that people should certainly exercise much care in preventing them. People too often take chances that are not really necessary, and while there are ordinances whereby traffic is supposed to be regulated, still it seems that many people will take a chance of being caught by the act, and then they are also taking a chance of being smashed into by another car.

WHAT WILL IT COST?
Over in "Childless" Lane, a mother a little girl paid with her life the price for an awakening of the citizenship to the traffic dangers existing. What will be the price that Florida will have to pay? Come what will, it should not be a human life. Only the source of preventative is needed before it is too late to apply the pound of cure.

A Breakfast In The Air

Gladys McConnell gives the correspondent some sugar as they breakfast above Los Angeles. To the right is Gladys McConnell, magazine writer.

HOLLYWOOD, Calif., Sept. 28. — This story is being written aboard the Ford all-metal airplane, more than a mile above Hollywood.

With all due respect to the achievements of Charles Lindbergh, our flight was unusual.

Gladys McConnell, screen actress and Warner baby agent last year, started it all by inviting us to breakfast party in the air. Then Will M. Fox, right-hand man to Jack Maddux, owner of the giant plane, decided that printing a newspaper at an altitude of a mile or so would give an air of distinction to the flight.

Drop Paper From Air.
His plan was carried out, and copy for the one-page paper is now being written by members of the party. One thousand copies of the paper will be run off the press, a mimeograph machine, and scattered over the city from the plane.

As I am writing this, Fox, editor of the first newspaper ever printed high, is preparing his copy for the press.

Time out now for breakfast, which Gladys is just commencing to serve.

The finest restaurant in Hollywood couldn't have done better. The most condensed of ice-cold orange juice, bacon and eggs, toast and coffee.

We are heading out over the ocean toward Catalina Island now and I have a suspicion that I know just how these ocean flyers felt.

Today's Poems

QUIET EVENINGS

Oh, some may take the radio and some may see the show.
And some may jump into the car and riding early on.

But now and then away from men I like a quiet nook,
An easy chair,
And time to pass the hours of a book.

Society is well enough and dinner parties please,
But night by night and week by week how wearisome are these!
And so I say

Let come the day

My hat stays on the hook
And I may sit
And read a bit
Of some respected book.

'Tis fine to have good friends drop in or call on you on the weekend,
But now and then the soul rebels
And asks to be alone.

Let him who will
Be disturbed with
Or prying someone's book,
Till bedtime comes.
I'll let my thoughts
Go racing through a book.
— Edgar A. Guest.

SCIENTIST OF THE

CLEAR, CRISP OCTOBER OBSERVATIONS

BY ROBERT (Professor of City)

URBANA, Ill. — clear, crisp evening for excellent viewing of the evening sky overhead, extending to the horizon.

To appreciate the beauty of the sky, one may try a few faint lights.

Dark spots, bright ones, and a few earthy ones.

The main feature of the sky is a clear, crisp evening for excellent viewing of the evening sky overhead, extending to the horizon.

SCIENTIST TELLS
OF THE MILKY WAYCLEAR, CRISP EVENINGS OF
OCTOBER FINE FOR
OBSERVATIONBY ROBERT H. BAKER
(Professor of Astronomy, University of Illinois)

URBANA, Ill., Sept. 28. (AP)—The clear, crisp evenings of October offer excellent opportunities for observing the Milky Way. Early in the evening it is to be seen almost overhead, extending from northeast to southwest across the sky.

To appreciate fully its grandeur, one may well drive into the country away from the glare of artificial lights. Viewed under the best conditions, as from a mountain top or in the clear skies of Arizona, it is a sight unsurpassed by any earthly scenery.

The main features of the Milky Way are readily observed without a telescope. It follows a single course from the northeast horizon up to the zenith. Here it divides into two streams, one of them gradually fading, the other growing brighter and gathering into the bright star-clouds of Sagittarius low in the south-west.

Dark spots appear as well as bright ones. Some call them "coal sacks," two of which are easily located overhead near the top of the Northern Cross.

They look like holes through the Milky Way to the darkness beyond. Actually they are cosmic clouds, great masses of cool gas and dust far out in space, screening the still more distant stars of the galaxy.

Some bright stars and striking configurations of stars along the course of the Milky Way attract attention. Halfway down from the zenith toward the north is the familiar W of Cassiopeia. Below it the arrow-shaped Perseus is seen, and lower still the yellow star, Rigel.

The Northern Cross is directly overhead in early September. Its other name is Cygnus, the Swan. West of the cross one finds the bright blue Vega, the star which marks roughly the direction in which our whole solar system is speeding at the rate of 12 miles a second.

The Milk Dipper is disappearing far down in the southwest. This inverted dipper of six stars forms part of the zodiacal constellation Sagittarius.

Through the telescope the Milky Way is separated into many millions of stars. Tiny stars they seem, because of the great distance. Actually each one is a sun, often larger and brighter than our own sun.

Astronomers are divided in their views concerning the structure of the universe. Many favor the "island universe" theory, namely that our own vast system of stars, numbering at least two billions, is only one of many such systems.

At New York light years in distance, this island system of stars

Mustangs, Out For
Revenge, To Play
Jackets Saturday

(Special To The Avalanche)

DALLAS, Sept. 28.—The Howard Payne Yellow Jackets will be the guests of the S. M. U. Mustangs at O'Connell Stadium Saturday. The last time these eleven met, in 1926, the Yellow Jackets, going the Ponies to defeat, Morrison's men are out for revenge this year.

Nine thousand people, probably the largest crowd ever at an opening day tilt in the Southwestern Conference, sat astonished through the first quarter of the S. M. U. Mustangs' game at the Howard Payne Yellow Jackets.

It seemed to the stands that the Mustangs had lost their best, that they were cocky and glib. Some of the most ardent Red and Blue supporters knelt and their faces and eyes away the smile which they had been wearing during the training season when the Mustangs had been heralded by the press as a wonder offensive team.

But it was just as Coach Morrison wanted it. In fact he had sent his eleven starters in with orders to play a punting game which would keep the Eagles in possession of the ball and put the Mustangs on the defense while the Denton players were fresh. To quote Morrison after the game "I knew what my boys could do on the offensive but I wanted to test their defense and find the weak points before we strike the big games."

In the last three periods Morrison turned loose his second and third years and late in the game his starting eleven, with six points as a result. The Ponies looked great when they had the ball but were nervous of a different order in place when the opposition tested the leather. The first half played nicely but there was a slight weakness in the secondary defense which Morrison will work on during the week. This week preparation for the Howard Payne game Saturday.

has the form of a much flattened ball, around whose circumference great swarms of stars are collected.

As we look out from our position near the center of this system the stars within the big form, the familiar constellations and the colored star-clouds appear as the luminous stars we call the Milky Way.

Beyond our own galaxy at distances measured in millions of light years are other stellar systems. We call them spiral nebulae. Beyond these that we can see—who knows? The structure of the universe is a mighty problem.

Looking Over The
South Plains Fair

Some of these youngsters have different ideas from their fond parents about this fair business. While their elders are looking over the agricultural and livestock exhibits, the youngsters want to take in the show on the midway.

Wednesday afternoon, one family consisting of mother, father, and three small children, were preparing to leave the grounds, when one of the youngsters set up a demonstration against the departure.

"What's the matter, son?" the father asked.

"I haven't rode everything yet," the youngster replied.

Fair weather brought out a crowd to the fair yesterday that far exceeded the huge throngs which greeted the opening Tuesday. Cars were stacked all along the highway near the grounds and countless other autos were parked in the space allotted for this purpose at the south end of the fair grounds.

Automobiles may have taken the place of the horse-drawn carriages formerly performed by horses, but thus far the horse is not ready for the museum. There are many fine specimens on exhibit at the fair, but they are not there as curiosities.

The animals will be judged today by E. M. Rosenbloom, county agent at Martin, Falls county, who is judge of all livestock except the dairy cattle.

The ancient ditty about the little dog named Bingo has nothing in popularity on the game by that name at the fair. The idea of the game is to get five pieces of corn in a row on a piece of cardboard, if the corn were in any other form than shelled there might be a plausible reason for the popularity of the game.

The whirling swing at the north end of the fair is proving another strong drawing card for the diversion-seekers. The higher the swing goes the greater the thrill.

LEAGUE COUNCIL QUITS

American Failure Join World Court Suddenly Made Topic For Argument in Closing Session.

GENEVA, Sept. 28. (AP)—The council of the League of Nations finished its labors this afternoon and will not take up again the various questions pending until its session next December.

American failure to join the World Court of Justice because of the impossibility of granting the United States satisfaction on the question of advisory opinions by that court was suddenly made the subject of discussion in the council today.

GRAIN HEARING ENDS

Testimony Presented Sought to Show Railroads Charged Excessive Rates on Alfalfa

FORT WORTH, Sept. 28. (AP)—With the completing of testimony at the hearing on railroad rates on alfalfa from points in Texas to points in Arkansas and Louisiana before Examiner Martin J. Walsh of the Interstate Commerce Commission here today, the series of freight rate hearings begun here more than a week ago was ended.

Examiner Walsh will prepare the voluminous record of the hearing for presentation to the Interstate Commerce Commission, which will render decisions within the near future. It is believed some of the hearings dealt with cases which have been pending for a year.

Today's hearing was on a protest of North Texas origin, including the West Texas Chamber of Commerce, the Fort Worth Chamber of Commerce, the Fort Worth freight bureau and the Fort Worth grain and cotton exchange, against alleged excessive rates on alfalfa hay which may be charged by several Southwestern railroads.

A higher tariff on such hay was granted carriers at points involved some time ago, but was protested from becoming effective until March, 1925, when protestants alleged it was unreasonably high.

FLOODS SWEEP MEXICO

One Thousand Mud And Brush Homes Lost; Several Killed Due To Rampant River Waters

NOGALES, Ariz., Sept. 28. (AP)—The Herald received reports today that at least 1,000 brush and mud homes in the valley of the Rio Pánuco, state of Vera Cruz have been swept away by floods. Several deaths are attributed to the rampant waters of the river.

Thousands of people are reported to be homeless and many square miles of farming land inundated. Acute situations among the poorer class of Mexican people are declared to exist as a result of almost incessant storms which have visited the country for the past month. Throughout Mexico, the Cruz Banks, the Red Cross and other charitable organizations are beginning drives for food, clothing and financial aid for the storm sufferers.

LOCKE RELEASED ON \$25,000 BOND IN SLAYING OF INDIAN

ANTLER, Sept. 28. (AP)—Victor M. Locke, former superintendent of the five civilized tribes, waived preliminary hearing when arraigned today on a charge of murdering Abner Battiste and was released from jail on a \$25,000 bond.

Battiste, young Choctaw Indian, was shot and killed by Locke Monday night.

Long Distance Hits
May Win For Yanks
Says 'Boss' Huggins

NEW YORK, Sept. 28. (AP)—Long distance hitting, one of the prime factors in the runaway race of the Yankees in the American League race, may decide the World's Series in their favor, in the opinion of manager Miller Huggins.

"As a team, the Pirates may be having a point or two higher," Huggins said today, in a discussion of the pennant possibility of Pittsburgh's being an entry. "But the Yankees have a big edge in total bases, long distance hitting."

"I don't believe there's much difference between the targets offered at Forbes field and the Yankee stadium in right field for our two big guns, Babe Ruth and Lou Gehrig. Both are around 300 feet, but on the left field side the stands are easier to reach at the Yankee stadium than in the Pirates stronghold."

Huggins doesn't expect the snap or dash in the Yankees' attack to lose any of its edge from the fact that the club has clinched the pennant so far in advance and experienced no closing drive such as the National league contenders are having.

If the Pirates clinch the National league flag, the Yankees will hop to Pittsburgh Sunday night. They anticipate workouts on foreign playing ground Monday and Tuesday to put the finishing touches on their preparations.

GOEBEL BACK AT HOME

Winner of Dale Flight Is Cheered Wildly By Bartlesville Folk In Home Port.

BARTLESVILLE, Sept. 28. (AP)—Art Goebel, Dale trans-Pacific flight winner, landed at the Phillips Petroleum Company flying field at 2:03 p. m.

As he appeared over the city, screams shrieked and automobiles raced to the field where he was greeted by Frank Phillips, his principal backer in the trans-Pacific flight. Several planes escorted Goebel to the field after he was sighted.

After being forced back to Amarillo, earlier in the morning by a fog that extended 6,000 feet in the air, Goebel finally took the air again at 11:32 a. m.

EXPECT CITY MANAGER BACK FROM CONFERENCE

City Manager William Perkins was due to return to Lubbock this morning from a conference with the state fire commission chief. He has been seeking to secure a lowering of Lubbock's fire insurance rate.

MILLER WINS RACE

Des Moines Aviator First in 300 Mile Race From Spokane To Portland, Oregon.

PORTLAND, Ore., Sept. 28. (AP)—Facing in the face of a gale that swept the Columbia Gorge today Leslie C. Miller, of Des Moines, Iowa, won first prize of \$1,000 in the class B Spokane to Portland race over a field of 10 starters. His elapsed time for the 299 mile flight was 4 hours, 31 minutes, 55 seconds.

Miller was second in the New York to Spokane class B race last week. Closely following came C. W. Meyers of Detroit, who was the winner of the class B race last week. Meyers won second prize of \$500.

Gerald F. Smith of Tacoma, won third prize of \$250.

E. E. Ballough, Chicago, driving his Laird commercial biplane at 117,003 miles an hour, won the 290 lap race from C. W. (Speed) Holman, St. Paul, at the start of Toledo by events. Holman's speed was 113,542 miles per hour. Ballough won the \$250 prize.

Drugs Excite
the Kidneys,
Drink Water

Take Salts at First Sign of Bladder Irritation or Backache

The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delicious effervescent lithium-water drink and belongs in every home because nobody can make a mistake by having a good kidney flushing any time.

TULLE PREDOMINATES

PARIS—The Charleston, which sailed Europe for so long, has had one lasting effect. It has more or less driven the matron of mature years off the dance floor.

Dance dresses, as designed by Paris, have therefore become notably younger. They are aimed straight at eighteen and choose every and materials suitable for the very young. Tulle is the material favorite for dancing dresses, tulle and lots of it, used in flounces, trills and many thicknesses.

How To Stop
A Headache

Use the improved method—two teaspoonfuls of Capudine in a little water. Being liquid, it acts almost instantly—much quicker than tablets or powders—saves a half hour of suffering.

CAPUDINE relieves pain by soothing the nerves—not by deadening them. Contains no opiates. At your druggists, 50c and 75c sizes. Also trial size, 5c only.

Come, Look And Ask Questions!

The New Process Appliance Company is exclusively devoted to Gas Appliances. We not only guarantee the satisfaction of every New Process range or heater, but do piping, installation, etc., all of which is guaranteed.

NEW PROCESS
Gas Range

Add Warmth and Cheer
to Your Home

YOU can be truly comfortable in your home on cold days if every bit of space in your living room is well heated. Nothing adds the proper warmth and cheer like a New Process Golden-Glow Heater.

Turn on the gas, light the burner and immediately you get intense heat—and plenty of it. Easily cleaned—perfect combustion—can be regulated perfectly regardless of the gas pressure—astronomically economical—free from odor—handsome and artistic.

NEW PROCESS
Golden-Glow
GAS HEATER

Made in various sizes and finishes to meet all requirements. GOLDEN-GLOW Heaters are used in thousands of homes. All are equipped with the famous Golden-Glow Burner. To see one is to want it. Installed in your home. COME IN TODAY!

FREE

This week only

16-Piece Aluminum Cooking Set FREE with each NEW PROCESS Range bought this week.

GUARANTEE!

NEW PROCESS GAS STOVES ALSO SOLD BY NISLAR HARDWARE CO.

PLANNING ANOTHER HAWAIIAN FLIGHT

WOMAN INTENDS TO GO ON LATEST FLIGHT: PLAN TEST NEW DEVICE

(By Associated Press)

OAKLAND, Cal., Sept. 28.—Another Hawaiian flight with a woman aboard is in the making. It is planned to fly over and back to test the invention of a Berkeley man's automatic drift in the air. The mechanism fastens to the side of the plane and records to a cylinder the route flown.

Tracy Dolson, former lieutenant in the eleventh army pursuit squadron will be the head pilot. He will take a co-pilot along, he says. In addition to Miss Dolson, a dancing teacher of Oakland.

His Conover has made a study of the Hawaiian Islands and is an amateur telegraph operator.

Dolson is aware of the opposition to long distance flying in land machines over the ocean, but says he is confident that this can be overcome by demonstration of the plane's worthiness and proof of thoroughness of preparation.

He expects to fly a Maloney motorboat powered with a Pratt-Whitney engine of 425 horsepower. It will carry 550 gallons of gasoline and will have a cruising radius of 2,500 miles, or a margin of 555 miles in excess of the distance between Oakland and Honolulu.

A date for the hop-off has not been fixed definitely, but probably will be in mid-November, depending on weather conditions.

That the tragic fate of Miss Lillard has not deterred Dolson in his ambition to be the first to fly over an ocean is indicated not only by Miss Dolson's determination to attempt the trip, but also by applications for passage from women in Cleveland, Kansas City, Chicago and many other cities.

Carrying virtually every safety instrument of aerial navigation and with a double instrument board, Dolson declares the plane will be equipped in a manner to reduce the hazards to a minimum, and to remove the underlining from the class of the reckless stunt flight.

A radio receiver for reception of the radio beacon signal will be taken along as an additional navigation precaution.

TODAY AT FAIR

(Continued From Page 1)

of a reputation for the balance of the week.

The first department's part in the free attractions was attended by a great deal of favorable comment. The film, "The Great Train Robbery," before the packed grandstand, exciting a fire in an especially excited crowd and "having" two members of the department discussed as newsmen from the (Lubbock) building.

Wednesday passed without any

form of accident on the grounds, but they found on duty reported the finding of a lost child, which was returned to its anxious parents a few minutes after being picked up and taken to the scout headquarters. Police report the crowd orderly and the absence of law violations was most satisfactory, alike to fair officials and to Chief of Police John Lemond. More than a score of special officers have been deputized for service during the fair period.

Grid Game Feature

The principal attraction for this afternoon will be the football game, which will be played between the fast Littlefield and Tahoka high school eleven. It will get under way promptly at 3:30 o'clock.

Judging in the swine department was completed yesterday with the famous Lillard herd being awarded the majority of ribbons. Lillard's "Ace" received the grand champion honors in the Poland China Division, while other animals in the same herd were similarly honored.

As in practically every part of the fair this year, a big gain in swine exhibits is noted.

Mrs. Henry Black, who resides between Idaho and Lorenzo, was awarded the automobile on the second day of the exposition.

EXHIBITORS

(Continued From Page 1)

Malibu, 14, entertained with dancing and music acts which were easily the feature of the program. These youngsters, who have been widely applauded wherever they have appeared, won the plaudits of their audience for their clever and original work.

An introduction of all guests followed the Blathericks, who were accompanied at the piano by C. M. Reese, local music dealer, and who are under the management of Fred Kresmann, of Dallas.

Miss Sullivan Evans, of the Fort Worth Star-Telegram, James L. Dow, D. D. Roderick and Chas. A. Gray, of the Avalanche-Journal, County Agent D. F. Eaton, and Co. Demonstrator Louise Baird were introduced individually after which Mr. Davis closed the program with a talk on Lubbock's appreciation of the fair by the surrounding communities and counties, stressing the fact that it is the whole section's exposition although held each year in Lubbock.

THINK BANDIT CAUGHT IN PUEBLO IS OKLAHOMA MAN

COLORADO SPRINGS, Colo., Sept. 28 (AP)—One of the two alleged bandits captured in Pueblo today following an early morning gun battle here is believed by Pueblo, Okla., officers to be Elmer Farmer.

Inspector E. E. Bruce of the Colorado Springs police department, who is acquainted with Farmer, has left for Pueblo to endeavor to identify the suspect.

TRIAL OF NURSE

(Continued From Page 1)

state, asserted that Mary Jane Bailey, 18-year-old daughter of the defendant, showed symptoms of having been administered an overdose of mixed drugs. The girl died early in September within two weeks after the death of her mother, and an autopsy resulted in the arrest of the nurse, who had been a guest in the Bailey home.

Young Bailey, answering reluctantly questions asked by Dan Mitchell, Garfield county attorney, said that he first saw the nurse, his father's night after his mother's funeral. The three sat on the edge of a bed and discussed plans for the future, Stewart Bailey said. The son is 16.

Left Two Alone

Later, the youth said, he was forced to go to his work leaving the two alone.

Dr. W. L. Kendall, who signed Mary Jane Bailey's death certificate giving as the cause, "some kind of poison," and Dr. S. N. Mayberry and Dr. Paul Champlin, attending physicians, were led through detailed technical tests leading to the conclusion that mixed drugs caused the girl's death.

Dr. Mayberry said that he saw the patient only once. He described her general condition, asserting that she had shown respiratory and pulse, contraction of the pupils and muscular twitching.

"What caused her condition?" Mitchell asked.

"I was greatly puzzled. I was satisfied no disease would cause the picture I have given of her condition."

"State what brought about her condition."

"Her condition was brought about by medication. She was under the influence of some medicine. I was sure she was under the influence of some mixed drug, not commonly used by physicians."

Nurse Calm

Miss Atkinson sat calmly through the hearing. She frequently laughed and talked with her brother, Harry Atkinson, a settlement worker, and she registered obvious contempt at Dr. Champlin's testimony. Her attitude became serious when Stewart was testifying.

Dr. Bailey was not in the courtroom today.

Four letters written by Miss Atkinson to Mr. Bailey and revealing details of her attempt at suicide after she was asked to leave the doctor's home, were read with the consent of defense counsel.

The letters, undated, were found in Miss Atkinson's room after her arrest. C. E. Baker, sheriff, said the state alleged they had been delivered to Mr. Bailey then given to his daughter, and later taken from the Bailey home by Miss Atkinson.

Miss Atkinson has explained that she found them lying on the doctor's dresser and took them away with her to prevent indiscriminate reading of them by members of the Bailey family.

NEW U. S. ATTORNEY

Norman A. Dodge Takes Federal Post Resigned Recently By Henry Zweifel

FORT WORTH, Sept. 28 (AP)—Norman A. Dodge, assistant United States district attorney of the northern district of Texas, Wednesday was appointed acting United States district attorney in a message from Federal Judge James C. Wilson, who was holding court at Abilene.

Mr. Dodge becomes head of the office vacated recently by Henry Zweifel, who resigned to resume private law practice.

ORGANIZE BIBLE UNION

Charter Granted Yesterday to Local Laymen's Association Which Plans Evangelistic Work

Lubbock has added another corporation to her list now, according to advisers received from Austin yesterday. The Laymen's Bible Union of Lubbock was granted a charter by the state.

The Union is an inter-denominational organization and will promote and encourage evangelistic work in the city and rural districts. Regular meetings will be conducted and Bible conference held under the auspices of the Union.

Directors of the organization are: Judge Hill Stewart, W. R. Kelley, Dr. W. M. Lemond, Dr. J. R. Crawford, H. J. Lowery, W. R. Perry, Otto Geisler, Ed. F. Mann, W. J. Curtis, C. E. Cole, A. L. Parr, W. C. Wood, Dell Williams, Paul Barber and John L. Vaughn.

MRS. ROGERS

(Continued From Page 1)

special charges, sought to establish the theory of mental unaccountability to set against the case of circumstantial evidence the state tried to build up yesterday.

Dr. Livingston Anderson, Austin alienist, swore that he examined Mrs. Rogers after she was arrested, finding her afflicted with dementia praecox. He declared she exhibited "delusions of grandeur," "grandiose" gestures, a serene attitude toward her troubles unusual under the circumstances, and a general apparent misunderstanding of the relative gravity of the effect of an action.

Mrs. Rogers' husband, declared he believed her "unbalanced" at the time of the burning of the building and said that after her arrest she seemed to feel that she "was incapable of wrong."

Professors Testify

"She simply isn't here," said Dr. Max Handman, Texas University professor and criminologist. He asserted that Rebecca, who had been in one of his classes, had no sense of right and wrong. Campbell Beard, another university instructor, charged her with "an enlarged egotism," which he claimed substantiated the dementia praecox theory.

The prosecution sought to minimize the claim by its questions. Its theory is that Mrs. Rogers fired the building, which was next to a bank so that bank officials, excited, would leave their posts and she might loot it.

Says Husband Eccentric

Mrs. Bradley testified that her husband, whom she married in Kansas was eccentric, that he had an aversion to meeting people, that he spent most of his time in an effort to invent devices, which never materialized, and that he finally left his family without apparent cause.

Dr. Handman and Dr. Livingston Anderson both testified later that the symptoms developed in dementia praecox were a precocity on some subjects attended by an al-

most total lack of judgment of others. In describing the crime of which she is accused, Dr. Handman said it showed all evidence of the disease.

Mr. Rogers' sympathy for his wife was expressed in his first answer given from the stand when he testified that he "was proud to be called the husband of Rebecca Bradley Rogers."

Rebecca Laughs

Mrs. Rogers took a lively interest in the testimony of the experts and laughed heartily several times as the prosecutor endeavored to trip the experts in their differentiation between criminal and insane behavior.

The court was forced to call for order several times during cross examination as the crowd expressed amusement.

The court room was packed today, some people bringing their lunch in order to hold advantageous seats.

Hope that the trial might be concluded before night was abandoned when it was found that the defense would ask for several special charges on circumstantial evidence and insanity. Judge Sansom decided he would have to consider

these charges for some time before he could rule on them and that some of the exceptions presented by the defense required meditation.

Court will open at nine in the morning and arguments will begin as soon as the charge is read. Harry Dolan, county attorney, will speak for the prosecution and two, and possibly three of the counsel for the defense will speak. The defense intention tonight was to make the summation of Otis Rogers, the defendant's husband, one of their principal closing speeches.

RIO GRANDE RISING: WASHOUT REPORTED

DEL RIO, Sept. 28 (AP)—A washout is reported near Sanderon and the Rio Grande has risen four feet here as the result of heavy rains in this vicinity. The river late today was rising at the rate of a foot an hour.

Traffic over the highway bridge spanning Devil's river, twelve miles west of here, is blocked due to high water.

The only president besides Washington to be elected without opposition was James Monroe.

Know
that the foods you serve
are safe

Frigidaire prevents the unseen mold that imperils health

NOT for a minute would you think of risking the health of yourself and family by serving food on which mold appears. But do you realize that mold is often present from ten to twelve hours before it is visible to the naked eye? The microscope reveals that this is true.

The only protection against this unseen danger is to keep perishable foods in a dry atmosphere and in a refrigerating temperature of less than 50°. Frigidaire electric refrigeration meets both these requirements.

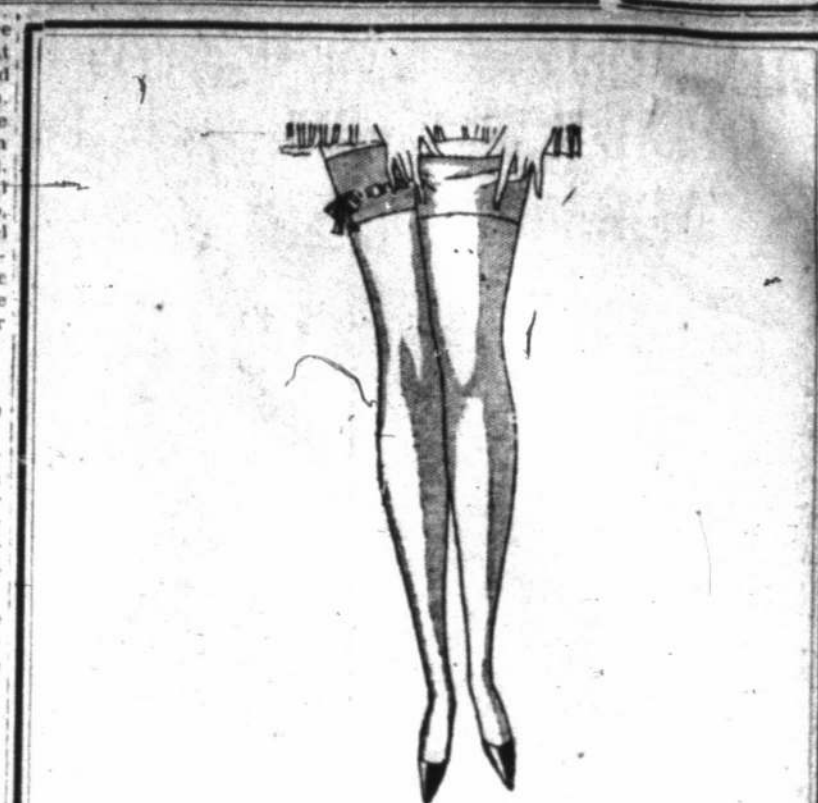

With all its advantages, Frigidaire is low in price. It can now be bought for as small a sum as \$180 f. o. b. Dayton. And terms are so convenient that it is easily within your family budget. See a demonstration now.

LILLARD FARMS LIVESTOCK WINS

SHOWER OF BLUE RIBBONS DESCENDS AFTER FIRST SWINE JUDGING

A veritable shower of blue ribbons descended on the Lillard stock farm of Arlington yesterday morning, when the Poland China department of the fair livestock exhibits was judged by County Agent E. M. Regensbrecht, of Marlin.

Below is the result of the judging: Aged Boar, "Ace," Lillard; Junior Yearling, "Armistice 2nd," Charlie Evans; Senior Boar Pig, "Forever Ace Again," Lillard; Junior Boar Pig, "Monarch's Buster," Lillard; Aged Sow, "Long Lady," Lillard; Senior Yearling Sow, "Tussock Girl," Lillard; Junior Yearling Sow, "Armistice Orange Lady," Lillard; Senior Sow Pig, "Seneca's Maid," Lillard; Junior Sow Pig, "Lady Ace," Lillard; Senior Champion Boar, "Ace," Lillard; Junior Champion Boar, "Armistice 2nd," Lillard; Senior Champion Sow, "Armistice Orange Lady," Lillard; Junior Champion Sow, "Monarch's Maid," Lillard; Grand Champion Boar, "Ace," Lillard; Grand Champion Sow, "Armistice Orange Lady," Lillard; Young Herd, "Young Herd," Lillard; Set of Sire and Produce, "Dam."

BIG SPRING BUSINESS MEN CROWD ROOMS AT INSTITUTE

BIG SPRING, Sept. 28.—The Big Spring Merchants Institute, under the direction of Henry W. Stanley, director of the Trade Extension Bureau of the El Paso chamber of Commerce opened here today with an attendance that taxed the county court room in the Howard County court house.

NEWFOUNDLAND FUTURE

Interest is awakening in the future of Newfoundland which, while known chiefly for its \$15,000,000 annual exports of fish, may soon be a major factor in world trade in lumber, paper, ore and other products. Iron ore deposits are said to be among the largest in the world while the present daily production of 700 tons of paper and pulp is expected to become insignificant when the country's resources are developed.

NOTHING LIKE IT ON EARTH

The new treatment for torn flesh, cuts, wounds, sores or lacerations that is doing such wonderful work in flesh healing is the Boronine liquid and powder combination. Cattle Moving In Vicinity Alpine

ALPINE, Sept. 28.—Cattle shipments of considerable importance were reported this week, the biggest shipment being made by Jackson & Harmon when they loaded out 400 head of cows and calves and 35 bulls for shipment, a part of which went to J. D. McGregor and Sons, Aden, N. Mexico, and the other bunch to C. M. Newman ranch at Hueco. Both of these ranches are near El Paso. Range is said to be in better shape in that vicinity than for several years and ranchers of that section are looking for good cattle with which to re-stock their ranges.

Jackman & Harmon shipped a load of cows to Payton Packing Company, El Paso, yesterday, and today they are sending two loads of steer yearlings to Dallhart, Jim P. Wilson is also shipping a load of yearlings to the same place. According to ranchers cattle are in good shape in this vicinity and ranges are greatly improved since the recent good rains. J. D. Jackson said yesterday that if the country continues to get moisture, that grass will mature before frost, thus assuring plenty of winter range, and sending rains are falling throughout Breckenridge County this week.

THORP SPRING CHRISTIAN COLLEGE OPENS TUESDAY

THORP SPRING, Hood County, Sept. 28.—Thorp Spring Christian college opened on Tuesday, September 26, with normal enrollment. Almost every section of Texas was represented in the student body. The opening address by Dr. G. A. Klingman of the Bible department. Representatives were in attendance of all religious and educational institutions of the county.

FAIR CROWDS ARE VERY LAW ABIDING, SAYS CHIEF

South Plains people are evidently very law-abiding. Despite the general expectation for an increase in law violations during the fair, Chief of Police John Lemond declares that not a single arrest has been made.

STABILIZES COFFEE PRICES

Coffee traders express the belief that the Institute of Coffee of the Coffee Institute of Brazil, which controls coffee exports from that country, may be able to prevent prices from taking a rapid drop, but cannot possibly institute any great increase. They say the Institute, which holds coffee in storage for shipment, is fully able to influence shipments, but cannot control production and that unless a drought strikes the interior plantations, planters will continue to produce. The world's visible supply of coffee was estimated September 1, at 4,727,000 bags, which does not include the interior stocks of Santos, estimated in July at 6,157,000 bags.

Brazil has the greatest water-power resources of any country. Its rivers are estimated to be able to produce 50,000,000 horsepower.

RAILROADS STILL EARN BIG MONEY

RECURRING DULL SEASONS FAIL TO PUT EARNINGS IN THE RED

(By Associated Press)

NEW YORK, Sept. 28.—Monthly earnings of Class I railroads may rise and fall with the varying seasonal demands for transportation, but total earnings and percent of return on property investment have had a decided upward trend since 1921.

The chart shows the trend in monthly earnings, with peaks coming regularly in spring and fall. The fall peak steadily has become higher each year since October, 1924, when earnings reached \$127,223,443. In October, 1925, they were \$138,622,531 and in October last year rose to a new high level of \$146,124,954. Low earnings months regularly have been January and April, while in February, 1921, there was a deficit of \$5,164,971. In recent years, however, even the lower months have shown earnings of approximately \$6,000,000. Earnings for July this year, the latest available, were \$143,383,388.

The percent of return on property investment, based upon the railroads' own valuations, also has risen steadily, mounting from 2.92 percent in 1921 to 5.53 percent in 1926. It was 4.58 percent for the first half of this year.

Total earnings have increased from \$615,545,614 in 1921 to \$1,231,780,929 in 1926, and give an indication of decreasing this year earnings for the first half alone exceeding \$300,000,000.

HUNGARIA TO USE BUSES

Hungarian state and privately owned railways are cooperating in the development of a motor bus system to provide passenger and freight transportation in sections not served by the railways. Railways and bus service generally will be co-ordinated.

'Phone Service To Mexico Is Ready

Telephone and Telegraph Company and the International Telephone and Telegraph Corporation that telephone communication between the United States and several of the principal cities of Mexico will begin on Friday morning, September 30, at 8 o'clock. It will then be possible to talk from any Bell system point to Mexico City, Puebla, Tampico, San Luis Potosi, Sittillo, Monterey and Nuevo Laredo. The total length of the circuit between Washington and Mexico City is 2357 miles.

This new service will bring Mexico's capital city, her principal seaport, Tampico, and the capitals of some of her richest and most progressive states, within the range of American telephone communication. The charge for a three-minute station-to-station call from Lubbock to Mexico City will be \$8.29.

MANY EXPECTED TO ATTEND MASONIC MEET AT EL PASO

The 44th Reunion of the Scottish Rite Bodies of El Paso will be held October 31st to November 3rd, according to R. B. Cook, secretary, who is in the city in the interest of same. A large attendance from practically every section of West Texas is expected. A special program of entertainment has been arranged which will include a luncheon each day of the Reunion for the class and the ladies, a banquet on Thursday, November 3rd, at the conclusion of the Reunion, for all members and their ladies, and a dance thereafter. Special entertainment for the visiting ladies in El Paso has been provided, consisting of a reception at the Country Club, motion picture theatre party, and a ride over the city and valley.

ONE EGG—TWO CHICKS

PAIDNES, Kan.—Twin chicks, hatched from one Rhode Island egg, are reported from the Mathis Hatchery here. The twins are normal and as lively as the rest of the brood. They came from an unusually large egg.

Find Precedent For Coolidge's "Choose" Saying

WASHINGTON, Sept. 28. (AP)—President Coolidge was told by Senator Gillett, republican, Massachusetts, today that he had found a precedent for the executive's political statement of August 2, but that he had to go back into British politics of the Victorian age to find it.

During the time when Lord Palmerston and John Russell, both prime ministers for Queen Victoria, were engaged in a bitter political fight, Lord Palmerston remarked to a friend: "I do not choose to be rubbed into the dirt by John Russell."

Senator Gillett said Mr. Coolidge was greatly amused with this analogy. After his call upon the president, the senator said that Massachusetts was respectfully accepting the president's statement, as meaning that he intended to leave office.

HAWAII HAS BIG CROP

The value of Hawaii's sugar and pineapple crops this year is expected to exceed that of last year by 15 percent. Early surveys indicate the sugar production may be more than 800,000 short tons. The pineapple pack, which in 20 years has increased from 1,250,000 to more than 200,000,000 cans is nearly completed, with growth continuing excellent.

An Open Letter to the Editor

From the President of General Motors

LAST SPRING I wrote you that my belief in the country newspaper had led us in General Motors to decide to advertise our products together in the small-city press of the country.

The returns from the series of the messages recently published have justified that faith; and we shall continue to advertise in your community through your newspaper this fall.

It occurs to me, however, that some of your readers may be asking: "What is General Motors?" and "Why is General Motors?" These are fair questions and I should like to answer them as frankly as I can.

General Motors was organized some years ago on the theory that a group of large companies, working together, could render a better service than they could separately. In this we simply applied to industry a principle that is as old as civilization as regards the human family and human progress.

Original members of the General Motors family were Buick, Cadillac, Chevrolet, Oakland and Oldsmobile, together with the Delco-Light Company and other well-known companies manufacturing automotive equipment. By joining together their resources, we were able to establish great Research Laboratories, a 1245-acre Proving Ground and the GMAC Plan of credit purchase; to effect vast economies in purchase and manufacture and distribution; to assure and maintain the quality of every product in the General Motors family.

Has the General Motors family principle proved itself in practice?

The best answer, I think, is to compare the Chevrolet, Buick, Cadillac, Oldsmobile and Oakland of today with the models of five or ten years ago.

Then add Pontiac, a General Motors creation. Add LaSalle, another General Motors creation. And then consider how General Motors has developed these cars into a complete line, within which any family may find a suitable quality car at the price it plans to pay: "A Car for Every Purse and Purpose."

Another example is Frigidaire, the electric refrigerator. General Motors had the resources to spend millions to develop a satisfactory refrigerator, and then to apply to its manufacture the same processes which have increased the utility and lowered the cost of the automobile.

We believe that this record justifies General Motors as an economic institution. Its products are quality products, first of all. Their prices represent the economies of united effort passed on to the purchaser. In the last year one in each three automobiles chosen by the public has been a General Motors car. The service of Delco-Light electric plants has extended to more than a quarter million homes, while Frigidaire has become the world's largest selling convenience of its kind.

We believe also that the values now offered in the current General Motors products (which are listed below) prove anew that "many minds are better than one" and that a family of companies, working together, can produce results which are decidedly in the public interest and of increasing benefit to the individual family.

Very truly yours,
Alfred P. Sloan, Jr., President
General Motors Corporation

Detroit, September 23, 1927

STUDENT OFFICERS NAMED AT GENERAL CONVOCATION

Officers of the four classes of the college were elected at meetings following the general convocation held in the gymnasium yesterday morning at nine o'clock. President Paul W. Horn made a short informal address to the students regarding various policies of the school.

The second senior class will be headed by Tom B. Morrison, of Lubbock. He has attended the Tech since its opening, transferring from Rice Institute where he took his freshman work. He is editor of the *Tormentor*, the school paper. Marlin E. Hayhurst, of Rush Springs, Oklahoma, was elected vice-president of the class. He is business manager of the paper. Miss Mary Steele, of Lubbock, was elected secretary while Dayle Wallace of Mount Cain, was selected as treasurer.

In the junior class, Floyd "Woody" Driggs, star athlete from Dallas, was elected president and Barton Atchison of Lubbock, vice-president. Mrs. Al Jennings was elected secretary while Charles A. Guy and Samuel H. J. Wainack, of Colorado, were selected to lead the sophomore class and William R. Sewell, of El Paso, as vice-president. Miss Myrtle Morrison was elected secretary-treasurer.

The freshmen elected Homer Handwerker, president of the Lubbock high graduates during the past spring, for their leader and Jack Hardy, diminutive grid star from Marlin, as vice-president. Miss Lucille Burr of Lubbock is secretary-treasurer.

"Y" TO HOLD FIRST MEET AT COLLEGE INN TODAY

The first general meeting of the Y. W. C. A. for the college year will be held this afternoon at 4 o'clock in the college inn at five o'clock, officials of the organization announced yesterday. The meeting will consist of a short program following the devotional, and a musical skit, songs and talks will feature. Miss Iva Wilson, sponsor of the group, will lead of the aims and ideals of the "Y."

Membership cards will be passed out following the program. All girls of the college are requested to be present. Miss Margaret Turner, president, said yesterday.

W. A. A. PLAY PARTY IS POSTPONED FOR WEEK

Due to the incomplete section which the girls will use, the party which was scheduled for tonight by the W. A. A. girls has been postponed until next Thursday night. Miss Johnnie Gilchrist, director of the group, announced yesterday. An interesting program has been prepared for the party, she said.

METHODIST STUDENTS TO BE ENTERTAINED WITH COMEDY

The new Methodist students of the college will be guests tonight of the Methodist Student Federation at a musical comedy which will be given at 8 o'clock in the dramatic room of the administration building.

The play, "Help Yourself," a three act comedy, will be presented by the leading student workers of the Federation. Several of them having had parts in the past productions of Lubbock Little Theatre's plays. The cast includes: Misses Annibel Giffin, Evelyn W.

ARIZONA UNIVERSITY WOMAN VISITS AT TECH YESTERDAY

Miss De Rosette Thomas, former member of the Home Economics faculty of the University of Arizona, was a visitor at the Tech yesterday. She spent several hours on the campus visiting with members of the faculty. She was en route to Amarillo to visit relatives during the program.

TECH TO BE TESTING STATION IN FUTURE, OFFICIALS SAY

Following a request from the United States Bureau of Standards at Washington, D. C., officials of the college are compiling a report of the facilities of the various laboratories of the school for testing products and materials of various kinds with the end in view of establishing a U. S. testing station at the college.

Should the report justify it, the Bureau will refer all testing cases of this section to the college, it was learned. President Paul W. Horn said yesterday that the various departments were already equipped to do a number of tests on materials and products and that he was certain that the station would be established here.

STUDENTS TO SEE GAME AT FT. WORTH NEXT SATURDAY

Through the co-operation of the officials of the Santa Fe railroad, the students of the college will go to Fort Worth next Saturday in a special train to witness the annual clash between the T. C. U. Horned Frogs and the Matadors. All students of the college will be allowed to go. Dr. Paul W. Horn said yesterday, although no pressure will be brought to make any student feel that he should make the trip. Students not financially able to make the trip will be discouraged to make it, he said.

The girls who go on the train must all sign for the special woman's Pullman, he said, or they will not be allowed to go. They must also show permission from their parents.

WOULD USE COTTON BAGS

General use of cotton bags in place of bags made of other materials by the wholesale grocery trade would increase the consumption of American cotton some 250,000 bales, the Department of Agriculture estimates. About 225,000 bales now supply the need.

THREE SPEAK AT ROTARY LUNCHEON

E. W. PROVENCE AND DON JONES FEATURE WITH TALKS WEDNESDAY

Three talks featured the program of the Rotary club here at the meeting held at the Lubbock hotel yesterday noon, the speakers being E. W. Province, R. W. Province, and Don J. Jones.

Warren Clement, of the Tech faculty, was in charge of the program. Mr. Province's talk was an outline of the spreading of college athletics and a discussion of the plans of the Tech college to expand its athletic program. He asked the support of the Rotarians in the coming game with A. & M. on October 28.

Mr. Jones, superintendent of the state agricultural experiment station here, urged the members of the club to attend the livestock exhibits at the fair, and to take a particular interest in the work at the station.

Mr. Dickinson spoke on his club classification. Dr. Sam G. Dunn of the West Texas hospital staff, and Leslie C. Houston, of the F. W. Axell plumbing and hardware company, were introduced as new members being initiated in the Rotary today by Charles A. Guy and J. A. McVee, respectively.

President Walter P. Jennings presided at the meeting.

FISH CAN'T BE CAUGHT "AT REST"

HONOLULU.—The Hawaiian legislature, like those of other states, furnishes a laugh now and then.

During a recent session the lower house voted on a bill to be passed to the industry of fish "during their hours of rest." A committee reporting on the practice of fishing between sunset and sunrise, said it had found that fish were being placed at night and fish were being driven into their hours of rest.

The committee declared the practice was wrong, "as it molests fish during their hours of rest, and drives them from their breeding grounds."

SILLIMAN EVANS HERE TO WRITE UP PLAINS FAIR

Silliman Evans, staff correspondent of the Fort Worth Star-Telegram, was a visitor at the Panhandle and South Plains fair here yesterday. He is the only out-of-town newspaperman to visit the fair thus far.

AMARILLO MEN HERE FOR WEDNESDAY AT THE FAIR

From all directions they are coming to visit the Panhandle-South Plains fair.

Labelled among the visitors to the fair yesterday were the following: R. B. Dickey, R. T. Lobb, J. E. Whitte, M. W. Merry, and James R. Scott of Amarillo.

As One Mayor To Another

Very confidential appears Count Orsi (right) mayor of Venice, as he confabed with Mayor Jimmy Walker, of New York. Venice was one of the high spots Jimmy touched on his swift trip through southern Europe.

HIS HORSE KNEW

NEW YORK.—Hailed by Mounted Patrolman Kelley because he violated a traffic regulation, W. S. Gother stopped his car and listened to a reprimand. Just as he was about to drive on, the patrolman's horse snorted. Kelley, looking for the reason, found a case of liquor in the car.

RUM IS DIVORCE CAUSE

CHICAGO.—If it were not for liquor and the habit of getting into fights there would be few disasters on the sea of matrimony, says Judge Joseph Burke, who has handed 14,000 divorce cases. He placed as the causes of domestic strife in this order: moonshine whiskey, financial worries, the eternal triangle, stubbornness.

Carbonic acid snow, called "dry ice," weighs 76 pounds per cubic foot when pressed into blocks. It yields more than twice as much cold as water ice and evaporates instead of melting.

SOIL FOR POTATOES

If well supplied with organic matter, gravelly or sandy loam soils are in general the most desirable for potato culture. Under suitable conditions a satisfactory crop may be grown on a fairly light sandy soil and a medium heavy clay soil, provided the heavy soil is well drained and the light soil has a good moisture supply. Much peat soils are satisfactory if properly drained and well supplied with available plant food. A reasonably good crop may be expected from any soil other than blow sand and heavy clay, provided the climatic conditions are favorable and the soil is well supplied with organic matter and available plant food.

MEXICO CITY.—Latest principles of teaching are being put into practice in public schools here. Drawing, for example, is no longer taught as a separate subject, but is used in illustrating all branches of study. Teachers find lessons are remembered longer when the pupils illustrate them.

Aggie Herd To Be At Wichita Fair

(Special To The Avantage)

COLLEGE STATION, Sept. 28.—Following their showing at the West Texas Fair at Abilene, Sept. 24-30, the A. & M. College of Texas exhibit dairy herd of eighteen animals will be shipped to Wichita Falls for showing at the Texas-Oklahoma Fair there Oct. 1-8. From Wichita Falls the herd will be sent to Dallas for the State Fair of Texas, Oct. 8-22.

There are eight Holsteins, seven Jerseys and three Guernseys in the herd selected for the fall showings this year. J. L. Darnell, dairy husbandry department, A. & M. College of Texas, who left this week to join the herd at Abilene, has called attention to the fact that all animals that win first places at the State Fair, where the judging will be held Oct. 13-14, will be sent to Memphis, Tenn., as a state herd to represent Texas at the National Show to be held Oct. 13-22. The judging at Memphis will take place Oct. 18-19-20.

SEEKS NEW MARKETS

Porto Rico is seeking new markets for tobacco produced in excess of the demand of the United States. Production in recent years has had a fairly steady increase, with the result that stocks now are estimated at 10,000,000 to 15,000,000 pounds, with little demand. Planters who harvested bumper crops this year have been rather hard hit.

Budweiser Real Hop Malt Syrup

Buy from your neighborhood dealer

A \$40,000,000 PLANT

Behind Budweiser Real Hop Malt Syrup is the finest plant of its kind in the world, a \$40,000,000 structure comprising more than 110 separate buildings and covering more than 70 city blocks. A million-dollar unit is devoted just to sorting, grading, cleaning and malting the natural barley grains.

This entire plant is designed, built and equipped for malting. Facilities for the proper storage of barleys and hops are provided. Every operation is done by automatic machines built to standards set by Anheuser-Busch. And every step of manufacture is under the watchful guidance of the world's foremost maltsters.

It takes a plant like this—an organization like that of Anheuser-Busch—and the experience of Anheuser-Busch—to produce a malt as good as Budweiser Real Hop Malt Syrup. Do you know of any other place on earth where such a combination can be found?

DAILY MARKETS

NEW ORLEANS COTTON

NEW ORLEANS, Sept. 28. (AP)--An advance of approximately \$3 a bale featured the cotton market today when December in the afternoon jumped to 22.35, 61 points above the previous close on the unfavorable weather outlook and reports of an unmet demand for spots in the interior. In the final trading the market lost 17 to 24 points of the gain and December closed at 22.05, 37 points net up with the general ease steady, 37 to 45 points above yesterday's close.

The market opened irregular, 3 points up to 3 down, due mainly to lower cables. The improvement of the belt. Shorts covered and gained momentum when the weekly weather and crop report was considered as bullish. The weather map showed an abundant rainfall in the western and central portions of the belt. Shorts covered and there was more or less trade buying. At the end of the first hour October traded to 21.57 and December to 21.57 and December to 21.57.

NEW YORK COTTON

NEW YORK, Sept. 28. (AP)--Reports of further cold rains in the southwest and increasing apprehensions of a crop outlook, especially for the cotton market, advanced in the cotton market today.

Prices for all months made new high ground off the movement. December contracts selling up to 22.35, 25 points net higher and approximately a cent above the previous low level. They closed at 21.95, the general market closing barely steady in tone, but from 22 to 37 points above yesterday's closing quotation.

The opening was steady at an advance of 1 to 3 points. Relatively easy Liverpool cables were offset by an unfavorable view of the weather news, and the weekly report of the weather bureau made a slight impression on sentiment.

Southern selling and realizing attracted by the early advance was readily absorbed on comparatively slight reactions, and the advance continued through early afternoon. October selling up to 21.94, and March to 22.55, or 45 to 60 points above yesterday's closing quotations.

These prices seemed high enough to bring in more realizing, or perhaps a little southern hedging and the close was 25 to 35 points off from the best on active positions.

A private report published before the opening, pointed to a crop of 12,750,000 bales, but these figures were not mentioned prominently in connection with the ruling of the market. Part of the buying was attributed to covering or replacing of contracts by interests who had held belief that better weather for the earlier part of September might lead to the crop, and who are now becoming uncertain of such a result, owing to bad weather of the past few days.

Some southern hedging was reported during the day, but in comparatively small volume and there were a number of reports of a firm hold in the southern spot market, which may have contributed to the advance.

Private cables reported continued buying supplied by hedging and realizing in the Liverpool market and complained of limited sales of yarns and cloths with buyers showing an inclination to pay advanced prices.

Exports today, 26,778, making \$22,694 so far this season. Port receipts \$4,130. U. S. Port stocks 1,704,475.

COTTON GOODS MARKET

NEW YORK, Sept. 28. (AP)--Cotton goods were quiet and firm today. Trading in gray cloths was light with more inquiry on finer qualities than staple. Raw silk was easier, with more active buying reported. Silk velvets were active. Business was still quiet in the wool goods division, partly affected by holidays, and largely affected by the size of small filling in orders.

COTTONSEED OIL

NEW YORK, Sept. 28. (AP)--The cottonseed oil market was more active and higher today, based on unfavorable weather in the south, and the advance in cotton which more than offset the decline in lint and corn. The close was firm at 31 to 29 points net advance. Sales 38,000 barrels, there were 7,000 barrels tendered on October contracts. Price of cottonseed oil, prime summer yellow spot 19.25; October closed 10.40; December 11.05; January 11.05; March 11.21; May 11.41.

BOSTON WOOL MARKET

BOSTON, Sept. 28. (AP)--Fair quantities of fine territory wool are being taken by mills. Most offerings of strictly combing grade are moving at 1.12 clean basis. Occasional lots of choice selected fine staple have realized 1.15, scored at 1.16. Very little fine territory staple could be purchased at 1.10. Original bag Wyoming wool with the bulk average French combing, sells at 1.00 @ 1.02 clean.

FORT WORTH LIVESTOCK

FORT WORTH, Sept. 28. (AP)--The cattle trade here today was slow with prices generally steady. The calf trade, however, was active and prices 25 cents to 50 cents higher. The hog and sheep trades were steady.

CHICAGO LIVESTOCK

CHICAGO, Sept. 28. (AP)--Cattle 20,000; grain-fed steers strong to 25 cents higher; trade uneven, but generally active, grass steers active; strong, other classes fully steady; best fed steers \$18.25; low high for season; long yearlings, 26-cent steers and yearlings 75 to 9.50; best yearlings 10.00; vealers 14.25 to 17.00; few 17.50.

Hogs 11.00; uneven; better grade hogs 700 pounds up and packing shows fully steady with yesterday's average; heavy hogs, butchers and packers strong to 10

ROOKIE DETECTIVE

LOSES OWN CASE

NEW YORK--With a diamond in his pocket, a shiny tin star under his coat and the lessons from a correspondence course for detectives still fresh in his mind, John Miller, 28, arrived in New York 1600 had come to find some cases so he could practice his new profession.

Within a block of the station, he met a man who looked honest and they dropped into a phone booth. Pretty soon John's memory left him. So did his acquaintance and John's worldly wealth of \$95.

For two days he spurned the police and did his own detecting. Finally he went to headquarters and gave them the serial number of his one, two and five-dollar bills. Said he: "I guess you won't have any trouble catching that crook now."

CATTLE FEED FISH

LINCOLN, Neb.--An excellent bit of co-operation is being practiced on a farm near Fremont by a herd of cows and a school of fish.

The cattle wade into a pond to graze themselves of flies. The fish perch on their nearly submerged backs and the fish pump out of the water and catch them.

CHICAGO FIGHTS CRIME BY SCIENCE

"RACKETEERS" IN CHICAGO MUST FACE MENTAL EXAMINATION

(By the Associated Press)
CHICAGO, Sept. 28.—Chicago is preparing to fight crime with science.

It expects to rid the city of known gangsters, hoodlums and "racketeers" by the simple method of giving them intelligence tests, and by sending them to institutions if they fail.

The plan was inaugurated by Detective Chief William P. O'Connor but the gangsters on whom it was tried put up such a legal battle that the police and Chicago's municipal psychologists decided to proceed cautiously and test a comprehensive campaign could be mapped out.

That will be done soon by Chief O'Connor, Dr. William J. Hickson, head of the municipal psychopathic laboratory, and Judge Harry Olson, presiding officer of the municipal court.

O'Connor and his men corralled a group of the city's most notorious and wealthy gangsters in a luxurious hotel suite and whisked them to the Cook county hospital, because Dr. Hickson was in Europe for intelligence tests. The gangsters, suddenly uncommunicative, were kept in the black jail for several days while their attorneys scurried around to liberate them. Eventually they were turned loose.

The burden of proof in the effort to rid Chicago of its element of firmly entrenched gangsters will fall upon the city's psychopathic laboratory, founded 14 years ago as an experiment.

Assists Husband.
Mrs. Hickson, a motherly woman in her husband's chief assistant. They have operated the bureau since its inception and both have an impressive background of training in this country and abroad. They spent four months last summer at psychopathic clinics in Europe.

The bureau's principal work has been giving intelligence tests to any arrested person about whose rationality there is doubt. It is the contention of Dr. Hickson that crime is caused by a physical defect of the brain and the results of examinations here have been given wide circulation in the United States and in Europe.

The Hicksons use various standard intelligence tests. Often they employ the Benet tests. The subject usually is given a model of a figure, perhaps a peculiarly shaped "X" or the like, and is asked to make a copy of it. Ninety per cent of the gangsters who come to the bureau and who are such "baldies" they are subnormal mentally, Dr. Hickson says. Murderers and reckless automobile drivers usually have "katonias," according to the Hicksons. That is a distortion of emotional development in which the upper and lower minds are dissociated. It shows itself in a test in which the subject is asked to copy a curved "X" and a series of interlocked rectangles. Invariably he makes a figure entirely dissimilar to the model.

U. S. EXPORTS INCREASE.
The United States has passed permanently to the position of a capital exporting nation and it is likely that she will continue for an indefinite period of time to export capital abroad, says the Foreign Policy Association, commenting on the fact that American foreign investments increased some \$557,000,000 last year. The association estimates the interest and dividends accruing to the United States in 1926 at \$688,000,000.

POLAND SELLING EGGS

Poland has replaced China as the world's largest exporter of eggs in the shell, and the Netherlands has succeeded Denmark as the second greatest exporter. Poland exported 84,000,000 dozen last year alone, as compared with the previous high shipment of China, 78,688,000 dozens in 1925. The largest eggs go to Great Britain, while Germany and Austria take the medium sizes, but Germany takes 86 percent of the total production. Eggs shipped in international trade last year were worth more than \$200,000,000.

PANAMA BUYING POTATOES

The Boquete region of Panama is importing potatoes from the United States because of the failure of the local crops. Shortage of other vegetables also is reported to be acute.

BREAD LINE FOR CATS

NEW YORK.—Every morning at 1 o'clock, alley cats of the Bowery gather at Centre Street Place. Soon come Syd Livingston and Count von Schoving, district reporters, who are greeted with loud purrs as they enter a restaurant to buy beef and milk for their friends. Schoving pours out the milk in little paper lids while Livingston cuts the meat and divides it up.

CALLS OWN AMBULANCE

CLEVELAND, O.—Max Biederbach waited for an ambulance to answer his call that a man had jumped to his death from a roof. When the ambulance arrived, Biederbach jumped. His body hurtled to the pavement beside the ambulance attendants who were looking for the source of the call.

Each year there are 50,000 applications for patents in Washington, D. C. Many are not granted but about 50,000 are issued.

Farmers Pay Back Delinquent Taxes

Prosperity is ruling the South Plains just now. If one can judge from the record receipts of delinquent taxes, being registered at the county tax collector's office, Good yields of wheat have given the farmers enough money to make possible a general "pay up" of back taxes. Considerably greater acreage is expected to be put in wheat next season. Already a good season has been put in the ground.

Two New English Courses At Tech

Two new courses, one for teachers and one for advanced students are being offered by the Texas Tech English department. The teachers' class meets Saturday mornings at ten o'clock, in room 205. The poets, Massfield, James, Elroy, Fletcher, Ernest Dawson, and Thomas Hardy are studied. The course for advanced students meets on Wednesday evenings at 7 o'clock, in room 209, philosophy of the English language being studied.

MINE BURNS 68 YEARS

SUMMIT HILL, Pa.—What is believed to be the oldest fire in the world, except in volcanoes, is burning in an old coal mine here. The fire started in 1859 and has been smoldering ever since. It spread from the timbers to the coal deposits and in 39 years has destroyed about 14,000,000 tons of coal. Three million dollars has been wasted in futile efforts to extinguish it.

Good Roads Lead To Lubbock Fair

Visitors to the Fair have the added incentive of generally good roads to send them on their way. Information from George Carver, maintenance superintendent of the state highway department Wednesday stated.

All roads in this section were being dragged and graded yesterday.

LITTLEFIELD MAN RAISES FINE GRADE OF APPLES

LITTLEFIELD, Sept. 28.—B. B. Moulton, living about two miles east of town, was in today exhibiting a number of Missouri Pippin apples grown on his farm. These apples will compare favorably with mountain apples grown anywhere. Moulton states that this tree has been bearing continuously for the past four years, and produced eight bushels this year. Cherries and apples are sure fruits in this country if the trees have any attention whatever.

URGE USE OF COTTON IN MANUFACTURE GROCER BAGS

Manufacture of cotton bags, to replace bags of other materials used in the wholesale grocery trade, would result in an increase in cotton consumption of 750,000 bales annually, it is estimated by government specialists. Already, it is estimated that about 225,000 bales of raw cotton are used in manufacturing the bags.

FOUR PAY FINES FOR ORDINANCE VIOLATIONS

Two who violated the parking ordinances, one speeder, and one disturber of the peace paid fines in city court yesterday, according to Recorder J. T. Innom.

District C. of C. Meet To Be Held In Bowie Nov. 21

(Special To The Avalanche)

BOWIE, Sept. 28.—Rain, coupled with the incongruity of Texas weather and Texas roads, kept the Red River District of the West Texas Chamber of Commerce from holding a 1926 convention, though a meeting was scheduled at Henrietta for several different dates. A 1927 date has been set, and Bowie is making preparation as host city to greet delegates from some 35 towns on November 21.

Graham and Electra have been previous hosts to the Red River district. Among the towns usually represented at the gatherings are: Wichita Falls, Burkburnett, Electra, Vernon, Iowa Park, Gainesville, Alvord, Archer City, Abilene, Bridgeport, Bonham, Bowie, Crystal Falls, Decatur, Dalton City, Dundee, Ellaville, Grapeland, Henrietta, Harrold, Megard, Munday, Nacoma, Newcastle, Oklaunion, Petrolia, Perrin, Ringgold, Seymour, Sunset, South Bend, Throckmorton, Weinert and Woodson.

CIGAR IMPORTS INCREASE

Exports of cigars from the Philippine Islands to the United States during July reached 14,600,000 as compared with 9,000,000 for June, and nearly equalled the shipments of July, 1926.

Sherrod's 8th. Cooking School

Monday Morning, Oct. 3rd at 10 a.m.
We will Begin our 8th Cooking
School in Lubbock

Our friends and customers know the success we have always made of this work, and we are putting more effort and thought and giving more value with each range sold than ever before.

We have selected the stove that has more conveniences, more gas saving features, last longer and look better.

The Estate has the ONLY FRESH AIR OVEN on the market, its patented, and no one else can build it. Look over the construction of our ranges and compare them, get our prices, see if they are not cheaper, considering the value.

If you give as much thought and considering one range as we have in selecting a line, we are sure you will select a range by the end of next week here.

Mr. Dunn, Nationally known in fine cookery, and in the finer points of stoves will be with us next week, and can give one any information on stoves they may want to know.

We will give you a reasonable allowance for your old stoves in on new ones, and give you a year to pay the balance.

\$1 Down puts one in your home this coming week

Visit our store, compare quality, price and service you are getting.
