VOL. 2, NO. 357. TWENTY-SIX PAGES WICHITA FALLS, TEXAS, SUNDAY, AUGUST 7, 1921. FIVE CENTS EVERYWHERE

MAINLY ABOUT PEOPLE

By H. N. F.

Congressman Thomas L. Blanton of Texas has a "nawsty" togue and is an ugly customer in debate. On the stump at home he is a rabble rouser extraordinary. He has cattlemen for constituents, sheep men for constituents, goat men for constituents, cotton growers for constituents, peanut growers for constituents—in fact he represents a district that is a large producer of the raw materials of commerce and finance; Congressman Harry M. Wurzbach of the San Antonio district is a republican and protectionist. Wurzbach is an elegant fellow, a native Texan, the son of a confederate father and very popular in his district. Blanton on the fifteenth of July made a speech favoring the amendment to place a fifteen percent duty on hides. Incidentally he made there remarks, "But I am different from my colleague from West Texas, Mr. Wurzbach. He is willing to place this little incidental protection where it is needed, for instance, upon hides, and anyone who knows anything about the cattle business knows that it is needed. The gentleman from Oregon (Mr. Hawley) admits that it is needed; and then Mr. Wurzbach, my colleague, after placing that where it belongs will follow the gentleman from Massachusetts (Mr. Treadway), the gentleman from Connecticut (Mr. Tilson), the gentleman from Oregon (Mr. Hawley), and others from New England, in placing a compensatory duty of 10 cents a pair an every pair of manufactured shoes. Is it necessary? Does the shoe industry need it in order to exist? If it does, I would be willing to vote with him, but such a contention is absolutely absurd. Mr. friend, Mr. Wurzbach, is willing to put $30,000,000 in the cowman's pocket down around San Antonio, Texas, and the other cattle-raising sections in the United States, and then take out of their pocket $34,000,000. In other words, he is to take $4,000,000 more away from these men each year than he gives to them. What benefit do you accord them when you do that? He does it to help the Shoe Trust manufacturer who takes a $2 Texas cowhide and makes 12 pairs of high shoes out of it, and yet while they the making 12 pairs of shoes out of a $2 hide we are charged now $10 for a pair of low-quarter shoes, and they are getting so that, like the most fashionable ladies' costumes, they cut them mighty low, too. I am not willing to go with the gentleman from southwest Texas in that respect. Brother Wurzbach, I am not going to vote with you on that compensatory duty to the Shoe Trust manufacturer proposition, and I shall meet you on the hustings anywhere in Texas before the San Antonio cowmen and farmers and fight that proposition out. I am going to vote for this reasonable and just duty on hides, but when you try to put a compensatory duty on manufactured leather shoes to benefit these Shoe Trust manufacturers who in the war charged us $20 for a pair of shoes and who are now charging us $10 for a pair of low-quarter shoes worth less than $5, I am going to quit you and vote against it. And the intelligent Texans in your district will commend me for it." And the gallant Harry made no reply. Blanton fought Samuel Gompers to a finish. Blanton fought many of the politicians of his district to a finish. Blanton is a man who is said to be neither companionable nor lovable, but as the darky said of the prosecuting attorney who railroaded him, "Dat man sho do take de hide off!"

Representative Thomas L. Blanton of Texas advocated a duty of thirty-five cents a barrel on crude oil. Congressman Bacharach of New Jersey, a republican and a protectionist, advocated free crude from Mexico and free oil importations from Mexico and South American countries. This called Blanton to the road again, and this is what he said: "The great Standard Oil Trust, whose home is in the state of New Jersey, and its subsidiary corporations, such as the Texas Co., the Prairie Oil Co., the Magnolia Co., and the many others too numerous to mention, owns and controls practically all of the big oil fields of Mexico. There, to a large extent, it uses peon Mexican labor. It can produce oil in Mexico for one-fifth of the expense that it costs our little independent companies now trying to develop Texas and Oklahoma. If the Standard Oil Trust can get its unlimited production of oil from Mexico into the United States free, it can run every independent company out of business, and then, as it always does, it will put the price of oil up so high that a Texas gin nor other business enterprise can not use it. It is to protect the great Standard Oil Co. of New Jersey that my friend from New Jersey is so much concerned about, is trying to get this duty out of this bill. Let me talk to some of our colleagues with whom today an attorney representing Standard Oil interests has pleaded with to vote again said '65 cents duty.' The man from Texas declared that gasoline ought to be selling in Washington "right now" for not over 12 cents; that when crude all went down to its present prices in 1912-13 gasoline then sold in Texas for ten cents a gallon; that since then some of the largest oil fields in existence have been discovered in Texas, Oklahoma and California, and then in order that his colleagues might thoroughly understand his remarks, Blanton of Abilene made the statement that "you can buy gasoline today in Texas in some places for fifteen cents a gallon and you are still paying twenty-four cents a gallon for gasoline here in Washington." T. L. B. must be the

W. C. SPURGIN HIDING NEAR MEXICAN CITY

Authorities In Chihuahua Notified By Amercain That He Knows Banker's Place of Refuge.

By Associated Press.

CHIHUAHUA CITY, Aug. 6.—Warren C. Spurgin, missing Chicago bank president, who arrived in Chihuahua City July 22, is in hiding not far from here, accarding to M. E. Clinton, who declared here today he knows the whereabouts of Spurgin, but is waiting for word from Chicago before assisting in his apprehension.

After registering at a hotel in Chihuahua City on July 22 under the name of W. C. Scott, Spurgin met Clinton, a discharged soldier, who is said to have resided in border towns and at one time to have lived at Marfa, Texas. Spurgin disappeared from Chihuahua City the next day, returning July 29, and was seen on the streets several times during the day. He seemed entirely unconcerned but read a number of papers carefully, according to persons who had him under observation.

When questioned, he said he came from Des Moines, Iowa, and intended to purchase a ranch and to make his home in Mexico.

Two residents of Chihuahua City showed him property. He is known to have made a trip to Minaca during the time he was absent from Chihuahua City.

Acquaintances declared Spurgin said later he intended to go to Mexico City.

"I know where Spurgin is and will turn him over for a big reward but not for $2,500," Clinton said.

Clinton was seen on the streets of Chihuahua City with Spurgin two or three times between July 22 and July 30.

FORD'S BID ONLY ONE RECEIVED FOR HUGE NITRATE PLANT

By Associated Press.

WASHINGTON, Aug. 6.—Despite the general invitation for bids sent to every industrial and financial concern in the country, it was announced today that no bid has been received comparable to that submitted by Henry Ford for the Mussel Shoals, Alabama nitrate plants and dams.

Secretaries Weeks and Hoover recently announced they expected to receive a bid from a substantial source but in the absence of the cabinet members acting officials declared the expected offer had not been received.

POSSE HUNTING BANDIT WHO ROBBED CASHIER

By Associated Press.

SPRINGFIELD, Mo., Aug. 6.—A posse with bloodhounds today was endeavoring to pick up the trail of the bandit who yesterday robbed the Farmers State Bank here of $700, locked the cashier in the vault and then hired Virgil Henry, a justice of the peace, who keeps a garage, to drive him out of town. Four miles from Mount Vernon he paid Judge Henry $10 and continued his journey on foot.

MURDERER KILLS SELF IN ILLINOIS

By Associated Press.

AURORA, Ill., Aug. 6.—James Witt, alias Joslyn, 20, who has been hunted over the country for three months as the murderer of Chief of Police George Rehm of West Chicago, last night shot and killed himself after he had been badly wounded in a duel with Sheriff Martin Hextall of Kendall county, in a country road near Yorkville, Ill.

NEW MEXICO OFFICERS HOLD MAN FOR DALLAS

By Associated Press.

DALLAS, Aug. 6.—Otis N. Ward was arrested and is being held at Alamagordo, New Mexico, for Dallas officers on a charge of running away with his four-old-daughter after custody had been awarded to its mother here in district court. Word of Ward's apprehension was received today by Detective Chief Gunning.

SON SHOOTS FATHER FOR STEALING CUSHIONS

By Associated Press.

CHICAGO, Aug. 6.—Shot by his own son after being caught in the latter's garage carrying away several automobile cushions early this morning, Frank Schone lies in a police station cell today with a bullet through his hip. Schone had been separated from his family., He said he owned part of the garage.

HUNT THIEF WHO STOLE FRUIT ORCHARD

By Associated Press.

HAMILTON, Ohio, Aug. 6.—The police today sought a thief who stole a fruit orchard, one hundred and fifty trees.

The only clues are a criss-cross of foot print in the place where the saplings were.

PRINTERS END STRIKE

By Associated Press.

ROCHESTER, N. Y., Aug. 6.—The first break in the printer strike, in progress here since May 6, came today when A. J. Cramback, president of the pressmen's local No. 38, notified the Rochester Typothetae that the men have unanimously voted to return to work.

Fading Romance Comes to Tragic End in New York

By Associated Press.

NEW YORK, Aug. 6.—The story of a thwarted love was told today by Miss Olivia M. P. Stone, Cincinnati nurse, after she had been held without bail on a charge of homicide in connection with the shooting of Ellis Guy Kinkead, former corporation counsel of Cincinnati, near his home in Brooklyn yesterday. In direct contrast to Miss Stone's volubility was the brevity of Mrs Marie Louise Kinkead, who was preparing to take her husband's body tomorrow to her former home in Covington, Ky., for burial. She would only reiterate her faith in her husband.

Nervous and trembling after a sleepless night, Miss Stone recovered her composure during the day, when she first was taken to police headquarters for further questioning and then was arraigned in magistrate's court.

It was while she was riding in a patrol wagon with detectives and newspapermen that she talked most freely. Sketching her acquaintance with Kinkead she said that she had met him in Cincinnati in 1918 when she nursed him for a nervous breakdown; that he then made love to her—"Oh! He was a very fast worker," was the way she put it. She gave him $1,000 to invest for her, but that she never saw it again; that his love waned and she had caused his discharge from the faculty of the Cincinnati Law School in 1920, after he had refused to marry her; that he then had married Miss Marie Louise Gormley of Covington, and disappeared from town—"going to England, according to his political friends;" that she had sued him for divorce, alleging herself to be his common law wife; had been awarded $5,000 alimony but never had received a cent; that she had purchased a revolver for her own protection, came to New York to effect a reconciliation, had located him and had laid in wait for him near his home.

In these words she described last night's shooting:

"When I saw him crossing the street I approached him and said: 'How do you do, Mr. Ellis Kinkead, you dirty rat, you're surprised to see me, aren't you?'"

What followed then?" she was asked.

"I don't remember," she replied. "Where was the gun?"

"In this bag," pointing to a black satin bag.

"Then you pulled the gun from your bag?"

"I don't know. An awful chill overcame me. I don't know what I did.

"I don't regret it at all. I'm the happiest woman in the world. Ellis Kinkead is now in the place 'where the dawn comes up like thunder.'"

Mrs. Kinkead who today visited the morgue to claim her husband's body, refused to confirm or deny the statement of a neighbor that three months ago Miss Sone had threatened to kill both she and her husband. Nor would she reply to any statements made by the nurse.

INCOME LESS THAN THOUGHT BY GOVERNMENT

Approximate Revenue Shrinks $3,300,000 Within Past Three Months, Secretary Mellon Reports.

By Associated Press.

WASHINGTON, Aug. 6.—A shrinkage in three months of $330,000,000, in the estimated government income for this fiscal year based on the present revenue law is disclosed by the statement recently, presented to the house ways and means committee by Secretary Mellon. The total income is estimated now at $4,217,643,000, as against the estimate of $4,547,643,000 contained in Mr. Mellon's letter of last April 30 to Chairman Fordney.

In the same time, the estimated expenditures have decreased only $11,864,216. The estimated excess of disbursements over receipts is placed now at $336,369,517 as compared with an estimate of $18,234,033 made by the treasury last April.

Of the total shrinkage in receipts $130,000,000 is charged to the expected falling off in internal revenue largely as a result of the present business depression. The remaining $200,000,000 is accounted for by a revision of the estimated amount to be received in interest on foreign obligations.

AUTO COLLISION ON TENTH STREET

An automobile driven by R. L. Riley was telescoped and badly damaged when it collided amidships with another car driven by John Keil at the corner of Taylor and Tenth streets about one o'clock Saturday afternoon. None of the occupants of the cars, including Mr. Keil's wife and daughter, were hurt outside of a severe shakeup.

According to the story of both drivers, Mr. Keil was going south on Taylor and was just about to turn east on Tenth when the collision with the fastly moving car going west occurred.

The Keil car was able to go ahead after the accident but the other car was damaged so badly it had to be dragged in.

RESUME DIPLOMATIC RELATIONS WITH POPE

By Associated Press.

PARIS, Aug. 6.—Resumption of formal diplomatic relations between the French government and the vatican, after many years interruption, was completed today.

REPRESENTATIVE DIES.

By Associated Press.

DANVILLE, Va., Aug. 6.—Representative Rorer A. James of the fifth Virginia district, died suddenly today. He was publisher of the Danville Register and Danville Bee.

CHATTANOOGA BEGINS FIGHT FOR FORD

By Associated Press.

CHATTANOOGA, Aug. 6.—Representative of civic and commercial organizations of Chattanooga today decided to enter into the fight for acceptance of the Henry Ford offer for Mussel Shoals.

PROWLERS GET EXPENSIVE PISTOL

An expensive automatic pistol was obtained during Friday night by rooming house prowlers, according to reports filed Saturday with city detectives. The pistol was taken from Albert O'Neil in a downtown rooming house, according to the report.

MEXICANS ASK REVISION OF ARTICLE 27

Members of Congress Make Effort to Have Constitution Amended to Please Foreign Governments.

By Associated Press.

WASHINGTON, Aug. 6.—Determination of at least a part of the Mexican congress to institute a new endeavor to render acceptable to foreign interests article 27 of the constitution was regarded here today as indicative of the desire in Mexico to find a basis on which diplomatic relations with the United States might be restored. State department officials refused to comment, but it was made plain that the policy of the United States government had not been changed.

GOTHAM MUSICIANS REFUSE TO WORK WHEN PAY REDUCED

By Associated Press.

NEW YORK, Aug. 6.—Managers of many vaudeville and moving picture houses felt first effects of the coming strike of musicians today when many musicians failed to appear for the customary Saturday rehearsals. About 1,000 musicians are employed in the houses affected.

IN DALLAS TOO

By Associated Press.

DALAS, Aug. 6.—A walkout of all motion picture operators, stage hands, musicians and organists in local theatres on August 13, is threatened following refusal of several unions involved today to accept proposals by theatre manager of reductions of ten percent in wages.

NAME M'KINNEY ACTING GOVERNOR

DALLAS Aug. 6—B. A. McKinney vice president of the American Exchange National Bank, was elected acting governor of the federal reserve bank here by its board of directors at a meeting today. Mr. McKinney will fill the vacancy occasioned by the absence of Governor R. L. Van Zandt who has been granted leave of absence until October 1.

GREEK DIVISIONS ADVANCING SOUTH

LONDON, Aug. 6.—Two Greek divisions are advancing south of Ismid, a town fifty six miles southeast of Constantinople, which has been in the hands of the Turkish nationalists, says a Constantinople dispatch to the Exchange Telegraph company.

The Greeks are said to have entered without resistence the towns of Vezirhan and Lefke, about thirty miles south of Ismid.

APPOINT ARCH-BISHOP

By Associated Press.

WASHINGTON, Aug. 6.—Official announcement of the appointment of Bishop Micheal J. Curley of St. Augustine, Fla., as Arch-Bishop of Baltimore, succeeding the late Cardinal Gibbons, was received today by the Catholic officials here.

The Weather

Oklahoma: Sunday partly cloudy and showers in east portion. Monday fair.

West Texas: Sunday and Monday partly cloudy.

COMMITTEE GETS DOWN TO BUSINESS

House Members Expect to Seriously Work on Tax Problem Early Part of Week.

Substitute for Excess Profits Planned; Will Relieve Burden to Small Corporations.

By Associated Press.

WASHINGTON, Aug. 6.—Majority members of the house ways and means committee expect to get down to the brass tacks of tax revision next week.

Chairman Fordney said today that the rewriting of levy provisions in 1918 law probably would begin Monday and unless unexpected snags were encountered the new bill should be ready within ten days. Leaders generally say house consideration will require only a few days.

With revision of the administrative features out of the way, the work now before the republican committeemen is to determine the extent of the cuts possible and just where they are to be made. The general belief seems to be that the committee bill will propose repeal of the excess profits tax but whether the effective date will be last January, first or next January first apparently remains to be determined.

As a substitute for the excess profits tax it is planned to increase the corporation income tax from the present ten per cent to fifteen per cent and also to repeal the $2,000 exemption allowed corporations under the existing law Chairman Fordney said today however, that it might be necessary to make some specific provision in the bill to relieve the burden it has been claimed this would impose on the small corporations with limited incomes.

JAPANESE AGREE ON CONFERENCE DATE

By Associated Press.

TOKIO, Aug. 6.—Japan has agreed to November 11 as the date for the beginning of the disarmament conference in Washington as suggested by the United States, according to this morning's newspapers.

KANSAS CITY SWEPT BY HEAVY RAINSTORM

KANSAS CITY, Aug. 6.—Kansas City was swept by a heavy rainstorm early today accompanied by a fifty-mile wind. Telephone and power wires were torn loose in many sections of the city, branches ripped from trees and minor damage done to buildings. Lightning flared incessantly for almost half an hour.

OPEN COFFIN TO FIND LONG LOST UNCLE

KENT, Minn., Aug. 6.—When the children of Frank Weling opened a coffin shipped from St. Louis, Mo., which they supposed contained the body of their brother, John Weling, 24, they found the body of an uncle, Henry Weling, 70, whom they had not seen for 20 years.

DES MOINES MERCHANTS TRY TO STOP STRIKE

DES MOINES, Iowa, Aug. 6.—With motor transportation inadequate to replace the suspended trolley car service here, merchants today continued conferences in an effort to break the deadlock between bus owners and the city over the tenure of bus franchises.

DIES AFTER FASTING FORTY-THREE DAYS

URBANA, Ill., Aug. 6.—Mrs. J. M. Chase, who fasted fifty-three days as a result of stomach trouble died this morning. She retained consciousness and realized her condition to the moment for her death.

Tender Age Is No Bar To Travel

The Prince of Wales traveling in state, attended by a retinue of servants and personal bodyguards could not possibly feel more important than little Miss Grace Cox, aged 8, traveling alone from San Francisco to Hollis, Oklahoma, as she was administered to during her long journey by railroad officials.

Grace arrived in Wichita Falls Saturday afternoon and was promptly welcomed by two railroad men, one of the Denver road over which she travelled from Fort Worth to this city, and the other a Katy representative, by which route she must go to her destination, Hollis, Oklahoma, on the Wellington branch of the Katy. These local railroad men had been notified by wire to look after the little girl.

Looking as self confident as a bootlegger before a jury, the little girl proudly walked between her two chaperons to a waiting car and was taken to the home of O. M. Smith, general agent of the Denver, to stay all night until her train left this morning.

When the reporter asked one of the railroad men if it wasn't rather dangerous for a little girl to travel that far alone, he replied that the unusual tender age of the traveller assured her attention on her long journey.

MASKED MEN SEIZE BENNY PINTO SECOND TIME IN FT. WORTH

FORT WORTH, Aug. 6.—Two cars of masked men seized Benny Pinto, a young white man who was tarred and feathered here several weeks ago, and speeded away to the outskirts of the city at 10:45 o'clock tonight.

At the time Pinto was given the first coat of tar and feathers, he was warned by his abductors to leave Fort Worth under penalty of rougher treatment.

He declined to obey the command, however, asserting that he would remain here.

SECRETARIES ASK EMBARGO ON DYESTUFFS

Weeks and Denby Urge Restoration to Fordney Measure Provision Barring Importations.

Declare Action Essential to Development of Convertible Plants in War Preparation.

WASHINGTON, Aug. 6.—Secretaries Weeks and Denby have come out in support of an embargo on dyes and chemicals and have urged restoration to the Fordney tariff bill of the embargo provision, stricken out by the house. The attitude of the two cabinet officers was made known today when Chairman Penrose of the senate finance committee made public letters from them to the committee on the subject.

The cabinet officers explained that they favored an embargo because of national defense needs.

"It is of great value to the navy," Mr. Denby wrote, "to encourage the development of chemical activities in the manufacture of all products connected with explosives and gases, especially those manufacturers whose establishments can easily be diverted to the manufacture of war materials. The restoration of the embargo clause will be of material help and I will greatly appreciate your assistance to this effect."

Embargo orders have been found necessary in England, Japan, France and Italy, Mr. Weeks said. He also declared that the chemical industry was vital to Germany in prolonging her efforts in the world war and expressed the opinion that high explosives and war gases would play a far more important part in future wars.

In the world war, he said, the United States had found it could mobilize ,train and equip with clothing, four million men far quicker than it could supply the guns and ammunition. He related how the munitions makers had worked feverishly to supply the munitions and war gases, adding that even then little was available for more than a year after the formal declaration of war.

"So fully did Germany realize before, during and after the world war," he continued, "the predominence in the organized chemical industry and particularly the dye industry meant the most valuable measure of preparedness possible that she has united all her organic chemical industries into one great trust.

"The use of high explosives and war gases will unquestionably be far greater in any future struggle than in the world war. It is of the most vital importance to our preparedness that the dye industry be developed to the fullest possible extent in this country. It is felt that this danger is so great that I urge the enactment of the embargo feature of the Fordney tariff bill by the ways and means committee as the only way to prevent crushing of our chemical market by German competition."

SHOT TO DEATH WHILE SEEKING "LUCKY PENNY"

By Associated Press.

LOS ANGELES, Aug. 6.—All police agencies tonight were engaged in running down meager clues in the killing of John B. Kennedy, young Los Anegles insurance broker, shot from ambush late last night while seeking a "lucky penny" which Mrs. Madeline Obenchain, beautiful divorcee, said she had buried on the lawn of Kennedy's cottage at Beverly Glen. Mrs. Obenchain, who had accompanied Kennedy to his cottage following a motor trip to a beach resort, is being held by the police as a material witness to the killing.

According to the police she declared her married life as the wife of R. R. Obenchain, Chicago attorney, was "broken up" because of her "love for Mr. Kennedy."

HIGH WIND DESTROYS PROPERTY IN OKLAHOMA

By Associated Press.

MUSKOGEE, Okla., Aug. 6.—The plant of the Home Ice Company, the home of a negro family, and two other small buildings were demolished by a heavy northeast wind striking Haskell, Okla., 20 miles west of here early tonight. The property loss will prove heavy, it was said. A severe rain storm moderated the wind.

AUTO GUNMEN ROUTED BY OKLAHOMA OFFICERS

By Associated Press.

TULSA, Okla., Aug. 6.—An automobile load of armed men reported routed in a gun battle with officers of Catoosa, Okla., a small town east of here, was headed toward Tulsa late tonight and three automobile loads of police officers from Tulsa were dispatched to meet them, according to Chief of Police George Blain.

HARVEY GOES TO PARIS

LONDON, Aug. 6.—George Harvey, American ambassador to Great Britain, left for Paris this morning to attend the meeting of the supreme allied council.

RUSSIAN FAMINE GROWING WORSE

By Associated Press.

RIGA, Aug. 6.—The general public in Russia so far is apparently ignorant of the fact that the question of the release of American prisoners is involved in famile relief, as Moscow newspapers received here today make no mention of the recent notes of Herbert Hoover and Secretary of State Hughes.

These newspapers, however, report that famine conditions are growing worse, particularly among children, 300,000 of whom in the Volga district are reported by M. Lunarchsky, leader in the soviet relief measures, to have been abandoned by their parents to the care of the state.

M. Lunarchsky is reported to have declared that this action will furnish a better plea for the carrying out of the soviet program of nationalization of children. William D. Haywood, American industrial worker of the world leader, who recently escaped to Russia, is still in Moscow and apparently has changed his mind about returning to America to surrender to the authorities, according to an arrival here, who saw Haywood a few days ago.

Together with the American delegates to the recent congress of the third internationale, Haywood expects to assist in the famine relief work, it was said.

KING ALFONSO IN CONFERENCE WITH POLITICAL LEADERS

By Associated Press.

MADRID, Aug. 6.—Conversations looking toward a settlement of the political crisis which is confronting Spain as a consequence of the news from Morocco and the opposition manifested by parliament toward government measures took place today by King Alfonso and several political leaders.

It is generally considered that Premier Allende Salazar realizes the present crisis will not pass; that he cannot proceed further without listening to the opinions of the party leaders and that he must arrange for a solution of the problems confronting Spain in accordance with their views.

TAKE PASSENGERS FROM STEAMSHIP ON BLUNTS REEF

By Associated Press.

EUREKA, Cal., Aug. 6.—All passengers aboard the steamer Alaska, wrecked on Blunts Reef, have been taken off in the ship's boats, according to a wireless message received by the naval wireless station at Table Bluff, near here.

The steamer Anyox reported to the wireless station it was five miles from the scene of the wreck and was proceeding to the aid of the Alaska. All the Alaska's boats were reported lowered. Blunts Reef is about four miles off shore. The weather is thick and foggy but the sea is comparatively calm.

CANADIAN RAILWAY MEN CONSIDER WAGE SLICE

By Associated Press.

TORONTO, Ont., Aug. 6.—The four big brotherhoods in Canada announced today they would jointly contest the 12 per cent wage cut which has been put into effect on the Canadian railroads. They have applied to the government for a board of conciliation.

SUPPRESS REVOLT IN GUATEMALA

SAN SALVADOR, Republic of Salvador, Aug. 6.—A revolt against the Guatemalan government, which, however, was immediately suppressed, is reported in a dispatch received here from Guatemala City. The result is declared to have been headed by General Isidro Valdes. Many persons connected with the uprising have been captured.

CHANGE OF VENUE ORDERED FOR FRIDAY

DALLAS, Aug. 6.—Indictments, charging Ruth Friddy of Coffman, deputy sheriff and well known business man of that city, with the murder of Mr. and Mrs. J. B. Williard, his wife's parents, have been filed in the criminal district court here on a change of venue from the district court of Coffman.

The murdered couple were found dead in their bed on January 14 of this year.

HARDING ENDS VACATION IN MOUNTAINS

President Motors Across Maine to Take Mayflower for Return Trip to Washington.

Reiterates Prediction That America Will Take Leadership in Move for World Peace.

By Associated Press.

PORTLAND, Maine, Aug. 6.—President Harding ended his vacation visit to the White Mountains of New Hampshire today and crossed Maine to board the yacht Mayflower here for the return voyage to Washington.

Accompanied by Mrs. Harding and other members of the vacation party, the president made the 140 mile cross-country trip by automobile, starting early in the day from Lancaster, N. H., where he has been the guest of Secretary Weeks since Tuesday.

He went out of his way to visit a soldier's sanitarium at Oxford, Me., stopped at Poland Springs for luncheon and a game of golf, and accepted a invitation to pay a brief call and make a speech at Westbrook, just outside of Portland, in the early evening. Sailing late tonight the Mayflower is expected to reach Washington Tuesday noon.

Several thousand gathered at Westbrook to hear the president's speech, greeting the people of the state and reiterating his prediction that America would find it possible to assume the leadership for world peace at the coming world conference for disarmament.

During the stop at Oxford, both Mr. and Mrs. Harding assured the disabled world war veterans under treatment there that the government would do everything possible for their welfare. Both asked many questions about the needs of the patients, most of whom are suffering from the effects of gas and before leaving made a thorough inspection of the whole establishment.

FIND BROKER WITH BULLET IN BREAST

By Associated Press.

MORRISTOWN, N. J., Aug. 6.—Peter Bender, insurance broker, registered at the McAlpin Hotel, New York, was found today on the lawn of Mrs. B. Barber's estate, "Oak" near here, with a bullet wound below his heart. Dr. G. A. Plume, who had the man removed to the Dover hospital, declined to give any information other than saying that "the case was one for the prosecutor's office.

HOLD MAN IN BONHAM FOR DALLAS MURDER

By Associated Press.

BONHAM, Texas, Aug. 6.—Officers announced here today they had in custody a man who signed a confession in connection with the murder and robbery yesterday of Bob James, service car driver, near Honey Grove. The man under arrest says he killed James with a sledge hammer and that an accomplice for whom authorities are looking, robbed the body of more than $1,000, according to Sheriff Whitley.

RED CROSS NEEDS $500,000 FOR RELIEF

WASHINGTON, Aug. 6.—An estimate of $500,000 was made today by the American Red Cross as necessary for adequate relief work in Pueblo, Colo., although that would not cover a building program for homeless flood sufferers. The announcement said $350,000 had been subscribed in response to President Harding's appeal.

WOMAN ADMITS SHE KILLED HER LOVER

By Associated Press.

NEW YORK, Aug. 6.—Miss Olive M. P. Stone, a nurse who shot and killed Ellis Guy Kinkhead, former corporation counsel of Cincinnati, was charged with homicide today when she had sufficiently recovered from hysteria to be told that the shooting was fatal. She said Kinkhead was her common law husband and had deserted her to marry another woman legally.

NO ONE SEEMS TO WANT COMMISSIONS

WASHINGTON, Aug. 6—The war department has one thousand commissions for second lieutenants and only 126 applicants. The examinations for appointment are fixed for August 22 and applications must be in by August 13. The department instructed corps area commanders today to do all they can to increase the number of applications.

DALLASITES COMPLAIN OF EXCESSIVE RENTS

By Associated Press.

DALLAS, Aug. 6.—The first complaints of exorbitant house rent made before the city anti-rent profiteering board in several months were filed today by two suburban residents.

END STRIKE

LANDSFORD, Pa., Aug. 6.—The strike of approximately 5000 workers of the Lehigh Coal and Navigation company in the Panther creek valley, ended today. There was an understanding that the grievances wage rates should be taken up by the anthracite conciliation board.

PRINT DODGERS' NAMES

By Associated Press.

WASHINGTON, Aug. 6.—Upwards of 17,000 names of alleged draft evaders issued by the war department between June 5 and July 1 were published today in the Congressional Record. The list occupied 86 printed pages.

MISS WISDOM IN CHARGE OF INSTITUTION

Miss Geneva Wisdom, who has been principal of the National School of Business for the past two years, has acquired control and assumed active management of the institution, according to announcement made Saturday.

This advancement, the young woman taking the place made vacant by the death of J. R. Bilyeau last week, places Miss Wisdom in one of the most responsible positions held by women in the city, and her friends and associates who have watched her sincere and efficient work as principal of the school feel that her success of the past two years will be repeated in her new position.

In addition to her successful work in her chosen line, Miss Wisdom has been active in various civic affairs since coming to Wichita Falls, and is one of the most interested workers in the Business Women's Clubs, and also in general Y. W. C. A. work and church work in the city.

OUT O' HER LINE

COLUMBUS, Ohio, Aug. 6.—The modern girl does not know so much. She may be able to drive a motor car and master the intricacies of a piano and the mechanism of a talking machine, but she does not know the bedbug (cimex lectularius) from the cockroach (periplaneta orientalis), says Fred Hammond.

To him, bright and early this morning, was referred the vexing bedbug issue in the highway department. He looked once at the samples preserved in bottles. Then he snorted.

He wished to say something that he didn't say because, as superintendent of the state building, he had to be a gentleman.

"They're not bedbugs," he told the girls. "They're just cockroaches. You can't catch bedbugs and stick them in bottles."

Therewith the conclusion was reached that the modern girl was ignorant on certain points. Especially natural

International Banker Suggests Plan of 1899 for Stablizing Argentina's Fluctuating Money

By Associated Press.

BUENOS AIRES, Aug. 4.—Reconstruction of the monetary systems of those countries whose currency has depreciated, on the plan followed by Argentina in 1899, is recommended by Carlos A. Tornquist, international banker, who was Argentine delegate to the Brussels financial conference last year.

Adoption of this plan, he told members of the American Club at a luncheon here, had fixed a permanent value for Argentina's then fluctuating paper currency and quickly enabled the country to emerge from monetary chaos into economic stability and prosperity. Many of the leading men in Germany, he said, were already in favor of adopting a monetary reform patterned after Argentina's.

Explaining the mechanism of the plan, of which his father was the author, Senor Tornquist said under the conversion law of 1899, by which it was carried into effect, a value of 44 cents gold was fixed for the paper peso and the national financial institution, which the law created, was authorized to deliver one paper peso in exchange for that sum in gold or vic eversa. The value, he said, was fixed very much below par, because the depreciation of the paper money had become a permanent one and because values had become adjusted to the depreciation, "that is to say, that, apart from the fluctuations liable to be produced by abnormal causes, the real value of the paper peso measured in gold was 44 cents."

The public immediately responded to the law, having confidence in the plan, with the result that the value of the paper peso became more and more stable and it ceased completely to fluctuate even when the country had obtained only a modest stock of gold. This stock has constantly increased from barely $3,000 in 1902, $90,000,000 in 1905, to $470,000,000 in the present day. Uncovered circulation of 293,000,000 paper pesos was assimilated and placed on a parity with the emissions subsequently made on gold basis. Today, he said, Argentina had a paper circulation of about 1,350,000,000 pesos backed by a metallic guarantee, which, according to the rate established by the law, amounts to 80 per cent.

"I believe," he continued, "that the existence of such a high proportion of yellow metal gives me the right to affirm that Argentine money is today among the soundest in the whole world."

The result had been that from the time of the sanction of the law, foreign capital had flowed into the country on a large scale, production multiplied, commerce attained extraordinary proportions, immigration increased, "until Argentine production today is one of the essential factors in the world's markets in providing foodstuffs for mankind and raw materials for manufacturers."

Senor Tornquist advocated as the first remedy for the European economic disorder, adherence to the recommendations of the Brussels conference for strictest economy, suppression of subsidies and economic barriers, the reduction of armament expenditures and suppression of unproductive works and even certain productive.

"If they will follow these sound recommendations from the conference of Brussels," he continued, "it is my opinion that many countries will in a relatively short space of time be able to place themselves in a normal economic condition, under which their production and consumption will be maintained in a proportion permitting the liquidation of the obligations contracted by reason of the war. Then, in my opinion, will be the time for these nations to begin to think of readjusting their monetary systems.

"It does not appear to me possible to effect this reconstruction of monetary systems by means of disinflation, for this would be a slow process and would not do away with the fluctuations in the value of money; and, worse still, it would impose completely unnecessary sacrifices upon industry, commerce and production.

"On the other hand, I consider the Argentine example perfectly feasible for many countries. Our conversion law, its origin, its results, its economic effects, I consider a subject of great importance and great practical possibilities for many countries, and I think the sooner and the more your countries does in this direction, in view of its enormous moral and material influence in al present world problems the better it will be."

HOBBS WELL SHOWING FOR 1000 BARRELS

The Hobbs Oil Company's No. 3, Milam, in the Ivan pool, north Stephens county, has just been completed, and is making a thousand barrels of oil, and a million and a half feet of gas, according to a report received by Henry Hobbs, president of the company.

This is the company's second completion in the past two weeks on the Milam lease. The Hobbs Oil company is a subsidiary of the Haskell interests, headed by C. N. Haskell, former governor of Oklahoma, now of New York City.

NOTED JUDGE DIES

MILWAUKEE, Wis., Aug. 6.—Judge James G. Jenkins, 87, who declined President Cleveland's offer to nominate him to the bench of the United States supreme court, died here today.

"Invisible Guests" Entertained By Wichitans During Summer

Wichitans, young and old, male and female, as they sip their cooling drinks or eat their delicious ices at the soda fountains, have been having "invisible guests" these past several weeks, the little boys and girls of the Day Nursery, their picture, above the glass free will offering banks at drug store, confectionaries and other places where cold drinks and ices are served, being a constant reminder. The pennies, nickels and dimes that are dropped into the banks constitute the main source of income for the support of the institution these summer days, and for this reason the Day Nursery board of the Federated Missionary Society are particularly grateful to the many contributors, and urge that they keep up their donations.

The operation of the Day Nursery is of vital importance at this time, when employment is on the increase, and the delicate little stomachs and bodies of the babies and little children make unusual demands for pure and proper food, to avoid summer ailments, the board points out. So for this reason they ask that there be no slacking up in the support given by the citizens.

Several of the men and women who are interested in the nursery's operation have made contributions just before their departure for a summer vacation trip, remarking as they did so that they wished to do their parts towards keeping up the splendid work of the day nursery through the summer months, and that they would be thinking of the children during their vacation time.

Again an urgent invitation is extended to all mothers, and fathers to make use of the Day Nursery in the care of their children. The Nursery was planned by some of the mothers of the city, for the benefit of all the mothers. Under the management of Miss Decatur, a trained, efficient worker, who is, above everything else, devoted to children, the board feels that the nursery offers a splendid place for mothers to leave their children through the day if they are employed, or for a few hours, when they wish leisure hours to shop.

Any contributions outside the banks will be gratefully received by the board, and the assurance is given that the money will be spent in the manner to accomplish the greatest good for the children.

Mrs. R. J. Goodale is financial secretary and will receive any contributions that may be given. Mrs. Goodale and her finance committee wish to extend their thanks to the Strand Theater for the benefit of last week, which resulted in a nice sum for the operating fund and also thank those who patronized the show. They also extend their thanks to everyone who through their contributions as they leave the soda fountains are assisting in the maintenance of the Nursery.

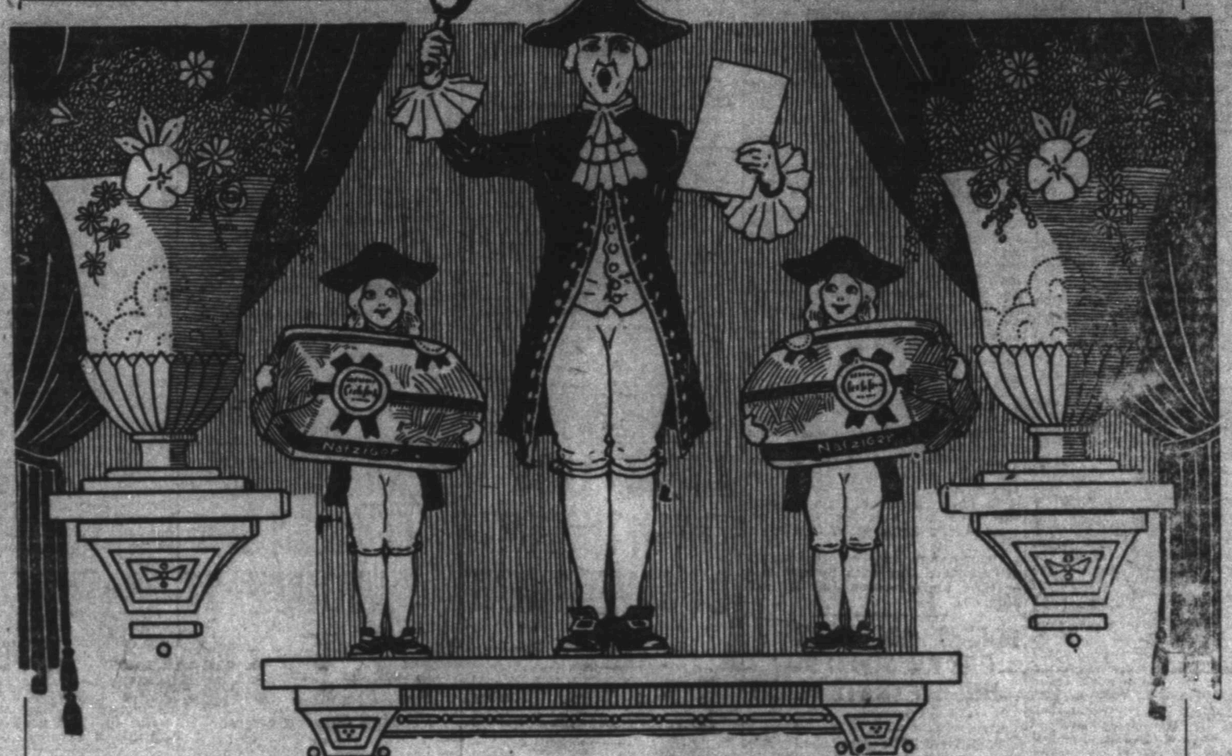

FIRE DESTROYS HAY

Fire of undetermined origin destroyed a small quantity of hay and a barn in Scotland addition, shortly after midnight Saturday, according to the report of firemen, who answered the call. Firemen were unable to give the name of the owner of the property.

Imperious Victoria, Queen and Woman

Strange Facts About VICTORIA'S BIRTH Now Told

Copyright by Harcourt, Brace & Co. Published by arrangement with the McClure Newspaper Syndicate.

Queen Victoria, though she sat on a throne longer than any ruler in history and reigned over more human beings than any other monarch, could not help being a woman. Almost sanctified she is in the legends built about her by her subjects; but the secret records of the great British Museum are proofs that she was very much a human being, subject to the forces, failings and feelings which sway human beings.

Some of these closely guarded secrets have now been given to the world. Lytton Strachey, who has come to the front in England as an authority on matters connected with the "Victorian Age," has been privileged to inspect the secret documents—including the Queen's own diary—and letters, the passages omitted from the published diary of Mr. Cheevy, the keen courtier who jotted down inside truths about royalty, and the unpublished memoirs of Mr. Greville, clerk of the Privy Council. Mr. Strachey has given a new view of many events in "Queen Victoria," a book which has made a sensation not only in Britain but on the continent of Europe and in America.

Mr. Strachey begins with a picture of the critical state of the present British dynasty when the death of Princess Charlotte, November 6, 1817, left no child to inherit the throne. But for this tragedy, Victoria would not have been born to her great career. In the extracts below the strange circumstances are explained.

By LYTTON STRACHEY.
(Author of "Eminnt Victorians.")

George III was still living (1887) an aged lunatic, at Windsor completely impervious to the impressions of the outer world. Of his seven sons, the youngest was of more than middle age and none had legitimate offspring. It seemed highly improbable that the Prince Regent, who had lately been obliged to abandon his stays, and presented a preposterous figure of debauched obesity, could ever again, even on the supposition that he divorced his wife and remarried, become the father of a family.

The Duke of York whose escapades in times past with Mrs. Clarke and the army had brought him into trouble, now divided his life between London and a large, extravagantly ordered and extremely uncomfortable country house where he occupied himself with racing, whist, and improper stories.

He was remarkable among the princes for one reason; he was the only one of them—so we are informed by a highly competent observer—who had the feeling of a gentleman. He had been long married to the Princess Royal of Prussia, a lady who rarely went to bed and was perpetually surrounded by vast numbers of dogs, parrots, and monkeys. They had no children.

The Duke of Clarence had lived for many years in complete obscurity with Mrs. Jordon, the actress, in Bushey Park. By her he had had a large family of sons and daughters, and had appeared, in effect, to be married to her, when suddenly separated from her. Shortly afterwards Mrs. Jordan died in distressed circumstances in Paris.

Son of the King Suspected of Slaying Valet.

The Duke of Cumberland was probably the most unpopular man in England. Hideously ugly, with a distored eye, he was bad-tempered and vindictive in private, a violent reactionary in politics, and was subsequently suspected of murdering his valet and of having carried on an amorous intrigue of an extremely scandalous kind. He had lately married a German Princess, but there were as yet no children.

The Duke of Sussex had mildly literary tastes and collected books. He had married Lady Augusta Murray, by whom he had two children, but the marriage, under the Royal Marriages Act, was declared void. On Lady Augusta's death he married Lady Cecilia Buggin; she changed her name to Underwood; but this marriage also was void.

Of the Duke of Cambridge, the youngest of the brothers, not very much was known. He lived in Hanover, wore a blonde wig, chattered and fidgeted a great deal, and was unmarried.

Besides his seven sons, George III had five surviving daughters. Of these, two—the Queen of Wurtemberg and the Duchess of Gloucester—were married and childless. The three unmarried princesses—Augusta, Elizabeth and Sophia—were all over forty.

The fourth son of George III was Edward, Duke of Kent. He was now fifty—a tall, stout, vigorous man, highly colored, with bushy eyebrows, a bald top to his head, and what hair he had dyed a glossy black.

He had spent his early life in the army—at Gibtraltar, in Canada, in the West Indies—and, under the influence of military training, had become at first a disciplinarian, and at last a martinet. In 1802, having been sent Gibraltar to restore order in a mutinous garrison, he was recalled for undue severity, and his active career had come to an end.

He was hopelessly in debt. He had quarreled with most of his brothers, particularly with the Prince Regent.

After the death of the Princess Charlotte it was clearly important that the Duke of Kent should marry. It was also likely to be highly expedient from the point of view of the Duke. To marry as a public duty, for the sake of the royal succession, would surely deserve some recognition from a grateful country.

The Duke, reflecting upon all these matters with careful attention, happened, about a month after his niece's death, to visit Brussels, and learned that Mr. Lreevey was staying in the town. Mr. Creevey was a close friend of the leading Whigs and an invererate gossip; and it occurred to the Duke that there could be no better channel through which to communicate his views upon the situation to political circles at home. He therefore sent for him on some trival pretext, and a remarkable conversation ensued.

Victoria's Father Lamented His Duty to Marry.

"Should the Duke of Clarence not marry," he said, "the next prince in succession is myself, and although I trust I shall be at all times ready to obey any call my country may make upon me. God only knows the sacrifice it will be to make, whenever I shall think it my duty to become a married man.

"It is now seven-and-twenty years that Madame St. Laureat and I have lived together; we are of the same age, and have been in all climates, and in all difficulties together, and you may well imagine, Mr. Creevey, the pang it will occasion me to part with her. I put it to your own feelings—in the event of any separation between you and Mrs. Creevey. * * * As for Madame St. Laurent herself, I protest I don't know what is to become of her if a marriage is to be forced upon me; her feelings are already so agitated upon the subject.

"My brother, the Duke of Clarence, is the elder brother, and has certainly the right to marry if he chooses, and I would not interfere with him on any account. If he wishes to be king—to be married and have children, poor man—God help him! let him do so.

"For myself—I am a man of no ambition, and wish only to remain as I am. * * * Easter, you know, falls very early this year—the twenty-second of March. If the Duke of Clarence does not take any step before that time. I must find some pretext to reconcile Madame St. Laurent to my going to England forashort time. When once there, it will be easy for me to consult with my friends as to the proper steps

to be taken."

Two names, the Duke said, had been mentioned in this connection—those of the Princess of Baden and the Princess of Saxe-Coburg. The latter, he thought, would perhaps be the better of the two; but before any other steps were taken, he hoped and expected to see justice done to Madame St. Laurent.

As to his own settlement, the Duke observed that he would expect the Duke of York's marriage to be considered the precedent. "That," he said "was a marriage for the succession, and 25,000 pounds for income was settled, in addition to all his other income, purely on that account."

"Milistones," Wellington Called Them

As it turned out, both the brothers decided to marry. The Duke of Kent, selecting the Princess of Saxe-Coburg, was united to her on May 29, 1818. (She was the widow of the Prince of Leiningen, and had two children.) On June 11, the Duke of Clarence followed suit with a daughter of the Duke of Saxe-Meiningen. But they were disappointed in their financial expectations; for though the government brought forward proposals to increase their allowances, the motions were defeated in the House of Commons.

At this the Duke of Wellington was not surprised. "By God!" he said, "there is a great deal to be said about that. They are the damnedest millstones about the necks of any Government that can be imagined. They have insulted—personally insulted—two-thirds of the gentlemen of England."

Eventually, however, Parliament increased the Duke of Kent's annuity to 6,000 pounds, and subsequently by a thousand the Duchess has been transported.

The new Duchess of Kent, Victoria Mary Louisa, was a daughter of Francis, Duke of Saxe-Coburg-Saalfeld, and a niece of Leopold (later the second king) and family was an ancient one, owning a branch of the great House of Wettin, which since the eleventh century had ruled over the march of Meissen on the Elbe.

The duchy of Saxe-Coburg was very small, containing about 60,000 inhabitants, but it enjoyed independent and sovereign rights. During the disturbed years which followed the French Revolution, its affairs became terribly involved. The Napoleonic harrow passed over Saxe-Coburg. The duchy was seized by the French, and the ducal family were reduced to beggary, almost to starvation.

Prince Leopold, thrown upon his own resources at fifteen, made a career for himself and married the heiress of England. The Princess of Leiningen, struggling at Amorbach with poverty, military requisitions, and a futile husband, developed an independence of character and a tenacity of purpose which were to prove useful in very different circumstances.

Her second marriage seemed at first to be chiefly a source of difficulties and discomforts. The Duke, declaring that he was still too poor to live in England, moved about with uneasy precision through Belgium and Germany, attending parades and inspecting barracks in a neat military cap, while the English notabilities looked askance, and the Duke of Wellington dubbed him, the Corporal.

"Damme!" he exclaimed to Mr. Creevey, "d'ye know what his sisters call him They call him Joseph Surface!"

An Odd Journey Gave Victoria English Birth.

Settled down at last at Amorbach, the time hung heavily on the Duke's hands. The establishment was small the country was impoverished. He brooded—for in spite of his piety the Duke was not without a vein of superstition—**over the prophecy of a gypsy at Gibraltar, who told him that he was to have many losses and crosses, that he was to die in happiness, and that his only child was to be a great queen.**

Before long it became clear that a child was to be expected; the Duke decided that it should be borne in England. Funds were lacking for the journey, but his determination was not to be set aside. A carriage was hired, and the Duke himself mounted the box. Inside were the Duchess, her daughter Feodora, a girl of fourteen, with maids, nurses, lapdogs, and canaries.

Off they drove—through Germany, through France: bad roads, cheap inns, were nothing to the rigorous Duke and the equable, abundant Duchess. The Channel was crossed, London was reached in safety. The authorities provided a set of rooms in Kensington Palace; and there, on May 24, 1819, a female infant was born.

The child who, in these not very impressive circumstances, appeared in the world, received but scant attention. There was small reason to forsee her destiny. The Duchess of Clarence, two months before, had given birth to a daughter; this infant, indeed, had died almost immediately; but it seemed highly probable that the Duchess would again become a mother; and so it actually fell out.

Nevertheless, the Duke had other views; there were prophecies. * * * At any rate, he would christen the child Elizabeth, a name of happy augury. In this, however, he reckoned without the Regent, who, seeing a chance of annoying his brother, suddenly announced that he himself would be present at the baptism, and signified at the same time that one of the god-fathers was to be the Emperor Alexander of Russia.

Father's Name Rejected by British Ruler.

And so when the ceremony took place, and the Archbishop of Canterbury asked by what name he was to baptise the child, the Regent replied "Alexandria." At this the Duke ventured to suggest that another name might be added. "Certainly" said the Regent; "Georgina?" "or Elizabeth?" said the Duke.

There was a pause, during which the Archbishop with the baby in his lawn sleeves, looked with some uneasiness from one Prince to the other. "Very well, then," said the Regent at last, "call her after her mother. But Alexandrina must come first." Thus, to the disgust of her father, the child was christened Alexandrina Victoria.

Before long, the world began to be slightly interested in the nursery at Kensington. When early in 1821, the Duchess of Clarence's second child, the Princess Elizabeth, died within three months of its birth, the interest increased.

The fair-haired, blue-eyed child was idolized by her nurses, and her mother's ladies, and her sister (half-sister) Feodora; and for a few yeras there was danger, in spite of her mother's strictness, of her being spoiled. The Duke of Kent had died, January 22, 1820.) From time to time, she would fly into a violent passion, stamp her little foot and set everyone at defiance; whatever they might say, she would not learn her letters—no, she would not; afterwards she was very sorry, and burst into tears; but her letters remained unlearned.

When she was five years old, however, a change came, with the appearance of Fraulein Lehzen. This lady, who was the daughter of a Hanoverian clergyman and had previously been the Princess Feodora's governess, soon succeeded in instilling a new spirit into her charge. At first, indeed, she was appalled by the little Princess' outbursts of temper; never in her life, she declared, had she seen such a passionate and naughty child.

Then she observed something else; the child was extraordinarily truthful; whatever punishment might follow, she never told a lie. Firm, very firm, the new governess yet had the sense to see that all the firmness in the world would be useless, unless she could win her way into little Drina's heart. She did so, and there were no more difficulties.

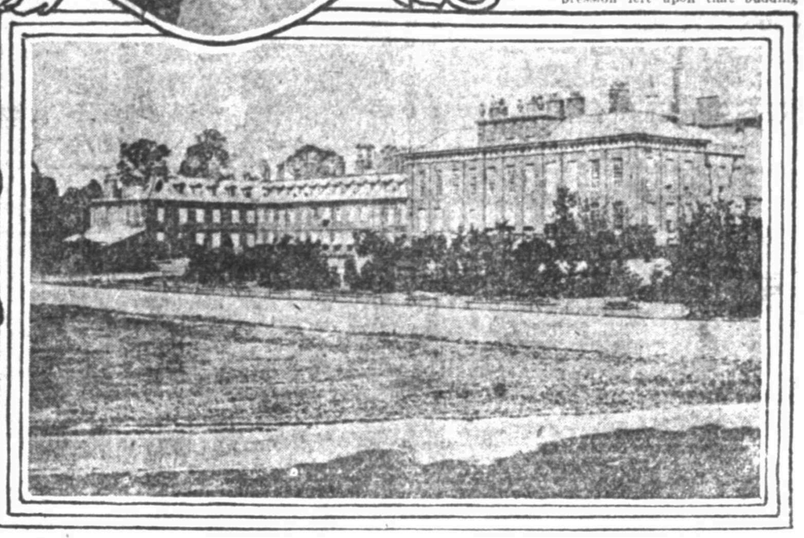

Mother Watched Daytime and Night in Training Her.

The Duchess was determined that her daughter, from the earliest possible moment, should be prepared for her high station in a way that would commend itself to the most respectable. Drina, as she was called in the family circle, should never be allowed to forget for a moment the virtues of simplicity, regularity, and devotion. The little girl however, was really in small need of such lessons.

She understood very well the niceties of her own position. When a child of six Lady Jane Ellice was taken by her grandmother to Kensington Palace, she was put to play with the Princess Victoria, who was the same age as herself.

The young visitor, ignorant of etiquette, began to make free with the toys on the floor, in a way which was a little too familiar.

But "You must not touch those," she was quickly told, "they are mine; and I may call you Jane, but you must not call me Victoria."

In 1827 the Duke of York died. Three years later George IV also died, and the Duke of Clarence reigned in his stead, William IV. The new Queen, it was now clear, would in all probability never again be a mother; the Princess Victoria, therefore, was recognized by Parliament as heir presumptive.

Morning and evening, day and night, there was no relaxation of the maternal vigilance. The child grew into the girl, the girl into the young woman; but still she slept in her mother's bedroom; still she had no place allowed her where she might sit or work by herself. An extraordinary watchfulness surrounded her every step; up to the day of her accession, she never went downstairs without someone beside her holding her hand. Plainness and regularity ruled the household.

It was her misfortune that the mental atmosphere which surrounded her was almost entirely feminine. No father, no brother, was there to break in upon the gentle monotony of the daily round with impetuosity, with rudeness, with careless laughter and wafts of freedom from the outside world. The Princess was never called by a voice that was loud and growling; never felt, as a matter of course, a hard rough cheek on her own soft one; never climbed a wall with a boy.

Female duty, female elegance, female enthusiasm, hemmed her completely in; and her spirit amid the enclosing folds, was hardly reached by those two great influences without which no growing life can truly prosper—humor and imagination.

Governess, Her "Truest Friend," a Silent Power.

The Baroness Lehzen—for she had been raised to that rank in the Hanoverian nobility by George IV before he died—was the real center of the Princesses world. **The Princess gave her mother her dutiful regards; but Lehzen had her heart. The voluble, shrewd daughter of the pastor in Hanover, lavishing her devotion on her royal charge, had reaped her reward in an unbounded confidence and a passionate adoration.**

The girl would have gone through fire for her "precious Lehzen," the "best and truest friend," she declared, that she had since her birth.

When the Princess was fourteen she was delighted by the arrival of a couple of boys from Wurtenberg, the Princes Alexander and Ernst, sons of her mother's sister.

"They are both **extremely tall,**" she noted in her journal, begun when she was thirteen. "Alexander is **very handsome** and Ernst has a **very kind expression.** They are both extremely **amiable.**" And their departure filled her with corresponding regrets.

Two years later two other cousins arrived, the Princes Ferdinand and Augustus. She could not decide which was the handsomer of the two. On the whole, she concluded, "I think Ferdinand handsomer than Augustus, his eyes are so beautiful and he has such a lively clever expression; Ferdinand has something **quite beautiful** in his expression when he speaks and smiles, and he is so good."

But shortly afterwards two more cousins arrived, who threw all the rest into the shade. These were the Princes Ernest and Albert, sons of her mother's eldest brother, the Duke of Saxe-Coburg. "Albert," she wrote, "is extremely handsome; his hair is about the same color as mine; his eyes are large and blue, and he has a beautiful nose and a very sweet mouth with fine teeth; but the charm of his countenance is his expression, which is most delightful, **c'est a la fois** full of goodness and sweetness, and very clever and intelligent."

When, after a stay of three weeks the time came for the young men and their father to return to Germany, the moment of parting was a melancholy one.

Cried Bitterly on Departure of Prince Albert.

"It was our last happy breakfast, with this dear Uncle and those dearest beloved cousins, whom I do love so very very dearly; **much more dearly** than any other cousins in the **world.** Dearly as I love Ferdinand, and also good Augustus, I love Ernest and Albert more than them, oh yes, much more. * * * **They have both learnt a good deal, and are very clever, naturally clever, particularly Albert** * * * **I embraced both my dearest cousins most warmly, as also my dear Uncle. I cried bitterly, very bitterly."**

"Particularly Albert!" She was just seventeen; and deep was the impression left upon that budding or-

Before long, the world began to be slightly interested in the nursery at Kensington. When early in 1821, the Duchess of Clarence's second child, the Princess Elizabeth, died within three months of its birth, the interest increased.

When, after a stay of three weeks the time came for the young men and their father to return to Germany, the moment of parting was a melancholy one.

Cried Bitterly on Departure of Prince Albert.

"It was our last happy breakfast, with this dear Uncle and those dearest beloved cousins, whom I do love so very very dearly; **much more dearly** than any other cousins in the **world.** Dearly as I love Ferdinand, and also good Augustus, I love Ernest and Albert more than them, oh yes, much more. * * * **They have both learnt a good deal, and are very clever, naturally clever, particularly Albert** * * * **I embraced both my dearest cousins most warmly, as also my dear Uncle. I cried bitterly, very bitterly."**

"Particularly Albert!" She was just seventeen; and deep was the impression left upon that budding or-

ganism by the young man.

King William could not agree with his sister-in-law and the Duchess of Kent fully returned his antipathy * * * She had no notion how to deal with him. She was the mother of the heiress of England; and it was for him to recognize that fact.

It was clear there would be a great explosion, and in the hot days of August, 1836, it came. The Duchess and the Princess had gone down to stay at Windsor for the King's birthday party, and the King himself, who was in London for the day to prorogue Parliament, paid a visit at Kensington Palace in their absence. There he found that the Duchess had just appropriated, against his express orders, a suite of seventeen apartments for her own use.

He was extremely angry, and, when he returned to Windsor, after greeting the Princess with affection, he publicly rebuked the Duchess for what she had done. But this was little to what followed.

On the next day was the birthday banquet; there were a hundred guests; the Duchess of Kent sat on the King's right hand, and the Princess Victoria opposite. At the end of the dinner, in reply to the toast of the King's health, he rose, and, in a long, loud, passionate speech, poured out the vials of his wrath upon the Duchess.

She had, he declared, insulted him—grossly and continually; she had kept the Princess away from him in the most improper manner; she was surrounded by evil advisers, and was incompetent to act with propriety in the high station which she filled; but he would bear it no longer; he would have her to know he was King; he was determined that his authority should be respected; henceforth the Princess should attend at every Court function with the utmost regularity; and he hoped to God that his life might be spared for six months longer, so that the calamity of a regency might be avoided, and the functions of the Crown pass directly to the heiress-presumptive instead of into the hands of the "person now near him," upon whose conduct and capacity no reliance whatever could be placed.

Wept as King Denounced Her Mother.

The flood of vituperation rushed on for what semed an interminable period, while the Queen blushed scarlet, the Princess burst into tears, and the hundred guests sat aghast. The Duches said not a word until the tirade was over and the company had retired; then in a tornado of rage and mortification, she called for her carriage and announced her immediate return to Kensington. It was only with the utmost difficulty that some show of a reconciliation was patched up, and the outraged lady was prevailed upon to put off her departure till the morrow.

In her own household the Princess was pursued by bitterness and vexation of spirit. There was a deadly feud between Sir John Conroy (Major-Dono of the Duchess) and Baroness Lehzen. But that was not all. The Duchess had grown too fond of her Major-Dono. There were familiarities, and one day the Princess Victoria discovered the fact. She confided that she had seen to the Baroness, and to the Baroness's be loved ally, Madame de Spath. Unfortunately, Madame de Spath could not hold her tongue, and was actually foolish enough to reprove the Duchess; whereupon she was instantly dismissed.

It was not so easy to get rid of the Baroness. That lady, prudent and reserved, maintained an irreproachable demeaner. Her position was strongly entrenched; she had managed to secure the support of the King; and Sir John found that he could do nothing against her. But henceforward the household was divided into two camps.

The Duchess supported Sir John with all the abundance of her authority. The Princess Victoria said nothing, but she had been much attached to Madame de Spath, and she adored her Lehzen. The Duchess knew only too well that in this horrid embroilment her daughter was against her.

On June 18 the King was visibly sinking. He died in the early hours of June 20, 1837. When all was over, the Archbishop and the Lord Chamberlain drove post-haste from Windsor to Kensington. They arrived at the Palace at 5 o'clock. At 6 o'clock the Duchess woke up her daughter.

First Royal Act Was to Break Mother's Power.

She got out of bed, put on her dressing-gown, and went, alone, into the room where the messengers were standing. Looking at the bending murmuring dignitaries, she knew she was Queen of England.

"Since it has pleased Providence," she wrote in her journal, "to place me in this station, I shall do my utmost to fulfill my duty towards my country; I am very young, and perhaps in many, though not in all things, inexperienced, but I am sure that very few have more real good will and more real desire to do what is fit and right than I have."

At half past eleven she went downstairs into the red saloon to hold her first Council. The great assembly of lords and notables, bishops, generals, and Ministers of State, saw the doors thrown open and a very short, very slim girl in deep plain mourning come into the room alone and move forward to her seat with extraordinary dignity and grace; they saw a countenance, not beautiful, but prepossessing—fair hair, blue prominent eyes, a small revealing the uper teeth, a tiny chin, a clear complexion, and over all, the strangely mingled signs of innocence, of gravity, of youth, and of composure; they heard a high unwavering voice reading aloud with perfect clarity; and then, the ceremony was over, they saw the small figure rise and, with the same consummate grace, the same amazing dignity, pass out from among them, as she had come in, alone.

When she crossed the ante-room and found her mother waiting for her, she said:

"And now, Mamma, am I really and truly Queen?"

"You see, my dear, that it is so."

"Then, dear Mamma, I hope you will grant me the first request I make to you, as Queen. Let me be by myself for an hour."

For an hour she remained in solitude. Then she reappered, and gave a significant order; her bed was to be moved out of her mother's room. It was the doom of the Duchess of Kent. The long years of waiting were over at last; the moment of a lifetime had come; her daughter was Queen of England; and that very moment brought her own annihilation.

She found herself, absolutely and irretrievably, shut off from every vestige of influence, of confidence, of power. Through the mingled formalities of Court etiquette and filial duty, she could never penetrate to Victoria. She was unable to conceal her disappointment and her rage.

At the same time Victoria took another decided step. She had determined she would see no more of Sir John Conroy. She rewarded his past services with liberality; he was given a baronetcy and a pension of 3,000 pounds a year; he remained a member of the Duchess' household, but his personal intercourses with the Queen came to an abrupt conclusion.

The remarkable story of the infatuation of Queen Victoria for Lord Melbourne, a man of fifty-eight with an involved past, will be related in the instalment of Mr. Strachey's book to be printed next Sunday. This attachment also prevented the marriage to Prince Albert. Other secret history of court life is also told.

PANHANDLE PLAINS COUNTRY PROSPEROUS.

No section of Texas is as prosperous at the present as the Panhandle-Plains, visitors from other parts of the state declare. Citizens of this section who have recently traveled in other parts of the state say there is more money and better prospects for good business in this section than in any of the places they have been.

The legitimacy of such a claim may be easily realized when one reflects that the Panhandle is producing this year the greatest grain crop in its history. It is estimated that the yield will be more than 20,000,000 bushels, and this means that at least that many dollars will be turned loose, for wheat is now $1.07, and grain men are expecting it to go higher.

Not only is the wheat crop a course of enormous wealth, but row crops are said to be looking better than ever before in the history of this country at this season of the year. Unusually frequent rains have failed to materially harm the wheat and have aided row crops and cattle ranges.

Harvest of wheat is more than two-thirds completed. Prices of grain are better and conditions seem to be full of promise.

Cattle sales are picking up and stock men expect business to be better by fall. The price of cattle is still so low as to make every sale a loss, but with range conditions good and a better feeling among the livestock men, the outlook is improving.—Randall County News.

There are many ably edited and influential weekly newspapers in the Panhandle-Plains country. It is a pleasure to read their pages. All the stories tell of bumper crops, improved business conditions, of merchants going to the larger markets to purchase their fall and winter stocks, of the optimistic feeling everywhere and the hopeful tone of farmers and business men that the trend is ever upward and that the people of the Panhandle-Plains section of Texas are confident that normalcy has returned and that trade in all its branches and industry in all its fields has stabilized itself.

WOMAN IN RAIL WORK.

Women workers are now flocking to the employ of the nation's railroads.

Nearly one hundred thousand women are helping now to build new lines and maintain and operate existing systems, a forthcoming report of the interstate commerce commission is expected to show.

Women constituted in 1920, nearly 5 per cent of the nation's two million railway employees, assording to a census taken by the interstate commerce commission. The number is increasing daily.

The commission now is preparing a new census of female railway workers for 1921.

The 1920 census shows women are going in for all kinds of rail work, heavy as well as light. They are cleaning engines and headlights in roundhouses, keeping watch at night as well as day at dangerous grade crossings, operating telegraph keys, carrying messages of train dispatchers, and even doing carpentry and other heavy work in the railroad shops.

In some jobs, women, the railroads are learning, are more efficient than male workers. Some jobs in which numbers of women are at work:

Attendants, 1,000; cleanings, 4,000; shop workers, 1,000; station agents and assistants, 1,200; telegraph and telephone signals, 2,000; car department, 1,500; messenger service, roundhouse general work, watch towers, warehouses and docks, more than 4,000 each.

Nearly three hundred women are listed as common laborers and five hundred were taken for round house clerical work. More than one hundred are at work wiping engines in the round houses, while a few are employed at turntables.

The census shows that more than fifty thousand are employed annually in clerical jobs. The proportions of women workers in other lines of endeavor are increasing at a much faster rate.

Governor Neff is said to be preparing a message on over thirty-five subjects. Dr. Manton Mercutio Carrick should prepare a state paper on "Fumigation and Fumigators" or "How the Cash Came Home." He owes it to sanitary science, the living and the dead, the slayers of bubonic rats and to the typhus-infected Mexicans who gave up their coin on the banks of the Rio Grande after they had been dipped in vats as cattle are dipped to remove the ticks. There are political ticks in Texas. They need dipping.

Barron Field sold for twenty-four thousand dollars; cost one million.—News Ispatch. Isn't war two hells?—Jones, the Freight Payer.

NORTHCLIFFE UNABLE TO DESTROY CAREER HE HELPED CREATE.

The Lord Northcliffe-Lloyd George-Lord Curson difference, which wa stransferred to Washington the other day when the British embassy cancelled the dinner it had planned for the owner of the London Times, is no mere surface squabble; it goes much deeper than that, according to A. G. Gardiner, editor of the London Daily News and unfriendly to Northcliffe, in the current Atlantic Monthly, in which he pictures the British parliament in what he terms its twilight.

It is a twilight brought about in part, it seems, by the enterprise of Lord Northcliffe. Northcliffe when a young man introduced a new idea into England journalism, an idea he had gleaned from the success of the publication, Answers, which devoted its columns to such things as how many letters there are in the Bible and how far the streets of London would reach if placed end to end. Northcliffe, then Mr. Harmsworth, tried the idea on the staid and serious daily press. His success was phenomenal and the whole English press underwent a change. Young Mr. Harmsworth became the head of a new journalistic heirarchy. Under the new regime "parliament was treated as a music hall turn. If it was funny it was reported; if it was serious, it was ignored." The press became the real power among the great mass of the English people, and the statesman who would dominate over parliament must make his terms with the lords of the press outside.

Along came Lloyd George, who appreciated this subtle change and made use of it. He cultivated the newspaper men; none was "so poor that he would not do him reverence and entertain him to breakfast." By his ingenious arts, Lloyd George built up a press legend about himself through a period of years and the legend became an invaluable asset to his political career.

"It has not only enabled him to establish his own political fortunes," writes Mr. Gardner, "it has enabled him to destroy the political fortunes of one set of colleagues after another—unhappy gentlemen, who did not know the secret doors of Fleet street, and found themselves frozen out of the public affections by a mysterious wind that emanated from they knew not where. It might be worth while to mention the chief figuers of the press bodyguard with which Mr. George has displaced the authority of parliament and made himself more nearly a dictator than the country has seen since they days of Cromwell. There are really very few, but between them they influence the opinion and control the news supply of nineteen-twentieths of the people of the country. They are Lord Northcliffe, whom he made a viscount; his brother, Lord Rothermere, whom he also made a viscount; a third brother, Sir Leicester Harmsworth, whom he made a baronet; Mr. George Riddell of the News of the World, whom he made Lord Riddell; the manager of the Times, Sir Stuart Campbell, whom he made a knight; the manager of the Mail, whom he made a knight; Sir H. Danziel of the Daily Chronicle and Pall Mall; Sir William Robertson Nicol (also made a knight), who as editor of the British Weekly keeps him right with the Nonconformist public; Sir Edward Hulbar, the owner of a great group of papers in London and Manchester (a baronetcy for him); Lord Beaverbrook of the Daily Express, who was given a peerage or engineering the overthrow of the Asquith ministry. There are others, but these are the leaders of the claque through which Mr. George rules England and, in larger degree than any man living, the continent of Europe. It is a great achievement. The press lords have so indoctrinated the public mind with the Lloyd George legend that it is doubtful whether they themselves can destroy their own creation. Lard Northcliffe, disappointed at not being chosen, as a part of his contract, to represent England at the peace conference, has tried to destroy it, but has found that he did his work too thoroughly to undo it easily. The public has become so attached to the legend that they find it hard to surrender it until the press can agree upon a new legenda to put in its place. That will not be easy, for no other man living has anything approaching Mr. George's genius for manipulating the press, and he has had five years of power in which to consolidate his hold upon the machine of government and to establish his friends in all the strategic positions of influence."

Northcliffe and Lloyd George are commoners. They came up from the ranks. They are Opportunists and neither is wedded to fundamentals or fixed or cherished principles. Lloyd George, an orghan, was educated by an uncle, a most industrious and thrifty Welsh cobbler. He pegged away mending shoes and out of his savings, he defrayed the expenses of the educatinon of his little nephew. Now Lloyd George is prime minister, the most adroit politician and shiftiest debater the British public has ever known. Lord Northcliffe began life as Alfred Harmsworth. He is of Scotch-Irish origin and he worked as a pronter's devil, copy holder and assistant proofreader in his youth. Now he is a titled personage, owner of a hundred publications, possessor of an immense fortune and the most influential publisher in European countries. In England, when a proletarian becomes a menace to the nobility, he is made a knight or a belted earl. Lloyd George may die an earl or he may meet a political Waterloo and be thrown into the discard. Northcliffe will never forgive Lloyd George. During the sessions of the Versailles Peace Conference, the prime minister contemptuously referred to the titled publisher as "a brainless grasshopper." Hell hath no fury like that of a commoner turned into an aristocrat over night when he is made the butt of ridicule or the merry jest of a glib-tongued jiber.

VIEWS OF VETERAN BANKER.

Captain James Gorrity has been president of the First National Bank of Corsicana fifty years. He is widely known as a successful banker, a successful oil producer, a successful farmer and an all-the-time philanthropist. This is his verdict, speaking of conditions in Texas and the Country over: "The business and financial condition is sound and improving rapidly and we can look forward to a good fall business." Down in Central Texas the bankers and the merchants and the farmers are not saturated with the deadly virus of pessimism. They know that conditions are improving; they know that the trend is upward; they know that the safe and sane men and institutions of America are forever planning and forever building. They know that the destructive waste caused by a bloody war can not be replaced in a day of a year. They know that wealth once destroyed has been destroyed forever and must be replaced by hard labor.

SENATORIAL REDISTRICTING BILL.

According to the Austin correspondents, indications are that the elusive senatorial redistricting bill will soon be a law. A compromise bill was reported favorably by the redistricting committee to the senate on August 2nd. Senators Bledson and Burkett are supporters of the compromise bill. Representative Hill of Wheeler county, after reading the senate substitute for his house bill, which had been passed by the house, expressed himself as being perfectly satisfied with the way in which it is drawn and predicted that the house will accept it. There are senators who will not vote for the substitute. They are found in northeast Texas and south central Texas. Should the bill become a law, west Texas gains three senators, and the counties of Harris, Tarrant and Dallas are made separate districts. The house bill made Bexar county a separate district, but the senate substitute adds to Bexar the counties of Gillespie, Kerr and Kendall. The new districts as outlined by the senate compromise or substitute bill are in detail as follows:

1. Red River, Bowie, Marion, Cass, Morris.
2. Harrison, Gregg, Rusk, Panola, Shelby.
3. Cherokee, Nacogdoches, San Augustine, Angelina, Sabine, Newton, Jasper, Tyler.
4. Orange, Jefferson, Hardin, Liberty.
5. Grimes, Montgomery, Trinity, Leon, Houston, Folk, Walker, Madison, San Jacinto.
6. Navarro, Henderson, Anderson, Freestone.
7. Camp, Wood, Upshur, Swith, Van Zandt.
8. Delta, Lamar, Franklin, Raius, Hopkins, Titus.
9. Cooke, Grayson, Fannin.
10. Rockwall, Collin, Hunt, Kaufman.
11. Dallas.
12. Johnson, Hill, Ellis.
13. McLennan, Falls, Limestone.
14. Bastrop, Lee, Burleson, Wasington, Brazos, Robertson.
15. Fayette, Lavaca, Colorado, Auston, Walter.
16. Harris.
17. Wharton, Fort Bend, Matagorda, Brazoria, Galveston, Chambers.
18. Wilson, Atascosa, Karnes, DeWitt, Victoria, Goliad, Live Oak, San Patrico, Bee, Refugio, Arnasas, Calhoun, Jackson.
19. Blanco, Travis, Hays, Comal, Caldwell, Gaudaloupe, Gonsales.
20. San Saba, Lampasas, Llano, Burgett, Williamson, Milam.
21. Bell, Erath, Hood, Somerville, Bosque, Hamilton, Coryell.
22. Montague, Jack, Wise, Denton, Palo Pinto, Parker.
23. Hardeman, Foard, Knox, Wilbarger, Baylor, Wichita, Archer, Young, Clay.
24. Scurry, Fisher, Jones, Haskell, Shackleford, Stephens, Eastland, Callahan, Taylor, Nolan, Mitchell, Throckmorton.
25. Comanche, Mills, Brown, Coleman, McCulloch, Macon, Menard, Concho, Runnels, Coke, Tom Green, Schleicher, Irion, Sterling.
26. Gillespie, Kerr, Kendall, Bexar.
27. Bandera, Medina, Uvalde, Maverick, Zavalla, Frio, McMullen, La Salle, Dimmitt, Webb, Duval, Jim Wells, Kennedy, Nueces, Kleburg, Willacy, Brooks, Jim Hogg, Zapata, Starr, Hidalgo, Cameron.
28. Tarrant.
29. El Paso, Hudspeth, Culbertson, Reeves, Loving, Winkler, Ward, Ector, Hidland, Glasscock, Reagan, Upton, Crane, Crockett, Sutton, Kimball, Edwards, Real, Kinney, Valverde, Terrell, Brewster, Presidio, Jeff Davis, Pecos.
30. Bailey, Lamb, Hale, Floyd, Motley, Cottle, Cochran, Hockley, Lubbock, Crosby, Dickens, King, Yoakum, Terry, Lynn, Garza, Kent, Stonewall, Gaines, Dawson, Borden, Andrews, Martin, Howard.
31. Dallam, Sherman, Hansford, Ochiltree, Lipscomb, Hartley, Moore, Hutchinson, Roberts, Hemphill, Oldham, Potter, Carson, Gray, Wheeler, Deaf Smith, Randall, Armstrong, Donley, Collingsworth, Parmer, Castro, Swisher, Briscoe, Hall, Childress.

ACTIVE SOURCE OF NEW BUSINESS.

Not only has the wave of cancelling that developed before the woolen opening subsided, but clothing manufacturers, predicts, the New York Times, are now looking for something of a shortage to develop on fall mechandise within the next six or eight weeks. The retailers played the market short and bought very conservatively. They were compelled to do this but the uncertainty regarding consumer demand. If fall business turns out to be very scant their present commitments will prove sufficient to carry them over this season. Otherwise manufacturing facilities may be taxed, it is said, to meet reorders on clothing. A point the manufacturers are stressing is that a large part of the business taken during the spring and summer was on sports wear and that the more regular types will be desired in the fall, thus furnishing an active source of new business. Texas wool men may be interested in the following, which is reproduced from the Times of the date of Aug. 2:

"With the announcement by the American Woolen Company that all lines of staples, tropical worsteds and women's wear fabrics have been sold up for the spring, 1922, season just started, the market now occupies a very strong position. Previous to the opening it was known that the mills of the big company were not very hungry for business, since fall production was sold up until November, though shipments were supposed to be completed on this season by Sept. 1. Some very large orders are reported to have been placed after opening last week, necessitating production into February of next year. It is not believed that these deliveries will be finished until March. As a result of the big company being sold up, the independent will intend asking full prices, and expect more than the usual volume of business in the way of surplus orders that the leading factor is not able to take."

IMPERIAL WIZARD MATTERS.

"My attention has been called to the fact that in a recent statement issued by me regarding lawlessness, I was slightly misquoted by the press and I desire to make corrections."—Col. William Joseph Simmons, Imperial Wizard of the Knights of the Klu Kidx Klan. The Record News did not misquote the Imperial Wizard and the Record News does not believe that the press misquoted the Imperial Wizard. He send out a signed statement from Atlanta, Georgia. His statement was not ordered by the newspapers of the country; it was send. All the Texas newspapers that printed his statement paid the wire toll and all the Texas papers printed the story just as the Imperial Wizard sent it. Flowers for the living; the dead can't smell 'em.

ON THE SPUR OF THE MOMENT

AN AMBITION.

It is our ambition
To get a good job some time
With our dear old friend,
The weather bureau.
The reason for this is
That when we are sweltering
Down in the street and the mercury
Is jumping out of the glass,
And the temperature is around 111
According to all thermometers,
The weather bureau,
In a highly optimistic mood,
Blandly informs us that the
Highest temperature that day
Was 82 degrees or 76 degrees,
Or, perhaps in a pinch, 86 degrees.
The weather office must be
One of the finest summer resorts
In the United States—
But, how does it get that way?

Kentucky young woman swallowed five spoons, which is one way to keep the silverware away from burglars.

A western writer says the best way to escape the heat is to forget it. Some people try to escape their debts that way, but it doesn't do much good.

X-ray device has been perfected which will take a picture through a wall. How will grand juries and speak-easies preserve any secrecy in the future?

EXPLAINED.

A reader has asked us to make clear the Lord Northcliffe-Lloyd George feud. Nothing could be simpler.

'Twas a dark and stormy night, or words to that effect, when the wireless with its spiteful sputter flashed a fateful message across the deep and salty sea.

This was the message that caused all the trouble:

t-zzt-zzt, zzt-zzt-zzt, zzt, zzt, zzt-zzt-zzt, zzt, zzt, zzt, zzt, t-zzt, zzt, zzt, zzt, zzt-zzt, zzt-zzt."

This message reached the sensitive ear of Lloyd George, primmer of the rellum, who immediately notified Lord Curzon and the latter immediately cabled the Hambassador at Washington: "If Northcliffe shows up at the bloomin' hembassy, give him the air and tell him to go buy himself a room in an uttel."

They put a heavy padlock on the front gate of the embassy and called out the police reserves, but his ludship did not try to force an entrance. In fact he was quite dignified and decent about it. In the meantime, Lloyd George was busy. He hastened to Buckingham palace and showed the message to the king. Then he hurried to the commons and delivered a scathing speech which removed most of the cuticle from Lord Northcliffe. "It's a malignant shame," he said. "How does his Ludship Northcliffe get that way?"

And then the tight little isle busted wide open and all the politics of the past ten years was spilled on the helpless and weary country.

Meantime, Lord Northcliffe sat down and cabled his king: "I never said it, king, 'pon me word, I didn't." And now his ludship is going back home some day to give Lloyd George a hair cut.

When interviewed, H. Wickham Steed, editor of the London Times, had nothing to say, and maybe he didn't, at that.

That's the whole blawsted, bloomin' story as we know it and we haven't lost a minute's sleep over it yet. But, it's a bally shime, now, ain't it?"

That mystery hooch boat will probably never have to advertise for sailors.

Breakfast Stories

An extremely polite voyager had been for a walk along the deck. When he came to his deck chair he found a very buxom woman in possession of it.

He approached her timidly and said: "Excuse me, madam, but could you tell me—er—without—er—without getting up, whether you are sitting on my hat?"

The dear old lady entered the chemist's shop and looked doubtfully at the youthful assistant behind the counter.

"I suppose," she said, "you are a properly qualified chemist?"

"You have passed all your examinations?"

"Certainly.'

"You've never poisoned anyone by mistake?"

"Not to my knowledge."

She heaved a sigh of relief.

"Very well, then, you can give me a dime's worth of cough drops."

Mary came in from recess chewing gum for dear life. The teacher noticed her and said sharply:

"Mary, come here and put your gum in the waste basket.'

Mary took the gum from her mouth, but did not put it in the waste basket. And again the teacher said: "Mary, I told you to put that gum in the waste basket.'

"Miss J., I won't chew the gum any more, but I can't put it in the basket. It's my sister's gum and I have to give it back at noon.'

RARE ZOO SPECIMENS ARRIVE FROM SOUTH SEA

LOS ANGELES, Aug. 6.—In a collection of wild animals and jungle creatures of the South Sea Islands, declared by experts to be the largest lot of rare specimens of the kind ever brought to America, D. S. Raab of this city, has transported to Los Angeles a new world's heavyweight champion, a 300-pound orang-outang, said to be the largest in captivity.

The collectioin gathered by Mr. Raab, accompained by his wife and one asistant, in the wilds of Java, Inria, Borneo, Sumatra and Celebes Island is valued by experts at more than $40,000. While some of the larger specimens have been sold to the Lincoln Park Zoo, of Chicago, and the New York Zoo, many of the rarer animals will be kept in Los Angeles.

In the Rabb collection are a pair of rare Hawaiian geese, a case of Chinese blue magpies, two otidiphas nobils, beautiful pigeons the size of pheasants, palm civets, five huge pythons, a Bennett's cassowary, rare cockatoos, six pairs of black-headed ibis, sacred pigeons several black panthers from Jahore and Siamese fireback pheasants.

Mr. Raab expects to return to the South Seas in September for other rare animals and birds.

THE FLIMSY DOOR

DOGHILL PARAGRAFS

By GEORGE BINGHAM

Jeff Potlocks, who many years ago served as deputy mail carrier between here and Bounding Billows, still loves to sit in a reminiscent mood and talk about the time he was compelled to throw away nearly all the mail every day before he could get over the bad roads.

Slim Pickens accidentally fell out of a mulberry tree on Musket Ridge Tuesday morning. He was about ready to come down anyhow.

Washington Hocks, who had his hand wrapped up last week was the center of curiosity, as everybody except the blind man asked him how he got it hurt.

SONG.

(Atlanta Constitution.)

Because the rose must fade,
Shall I not love the rose.
Because the summer shade
Passes when winter blows,
Shall I not rest me there
In the cool air?

Because the sunset sky
Make music in my soul,
Only to fall and die,
Shall I not take me whole
Of beauty that it gives
While yet it lives?

Because the sweet of youth
Doth vanish all too soon,
Shall I forget, forsooth,
To learn its lingering tune,
My joy to memorize
In those young eyes?

If, like the summer flower
That blooms—a fragrant death
Keen music hath no power
To live beyond its breath,
Then of this flood of song
Let me drink long!

Ah, yes, because the rose
Fades like the sunset skies;
Because rude winter blows
All bare, and music dies—
Therefore, now is to me
Eternity!

TULSA OFFICERS ARREST WINEGATE

William Wingate, wanted here on a forgery charge, is under arrest at Tulsa, according to information received Saturday at the office of Sheriff Smith.

Chief Deputy Sheriff Dakan left Saturday afternoon for Tulsa and will return here Sunday night with Winegate. The arrest at Tulsa follows several months search conducted at the instigation of the local Western Union office and a bank at Burkburnett. Details leading to the charge against Winegate are not known.

MAINLY ABOUT PEOPLE

(Continued From Page One.)

owner of a flivver. If so, how is it possible for the great Texas tribune of the common people to stand the expense?

Mexico and Japan are sons of the same mother, Prince Hirohito, heir apparent to the throne of Japan, told the Paris correspondent of El Universal recently. "Destiny has willed that the two countries be separated and distant from each other, but the designs of destiny are now clear. Japan and Mexico fill a distinct mission in each continent. They are the guardians of a civilization that is highly moral, then sentinels of two races against the forces of barbarism. Mexico and Japan out to draw near each other in order to fulfill the aims of destiny that are marked out for them. I wish for Mexico that she may gain the power of will that has transformed Japan into the power she is."

Enrico Caruso's income for operatic and special performances and sale of music records for twenty years preceding his death were ten million dollars. His net estate is valued at one million five hundred thousand dollars. That is, he died, possessed of scarcely more than ten percent of the great fortune he had amassed by his marvelous voice. Caruso spent his earnings like wildfire, his friends say. He never refused the appeal for aid of a fellow countryman. He had lots of appeals and always appeased them with hundred-dollar bills. His income tax in 1919 was one hundred and seventy thousand dollars; in 1920 it was one hundred and sixty-five thousand dollars. He made a will a year ago and divided his property in six equal parts. His stepmother, his brother, his two sons, his widow and little Gloria Caruso, daughter by his American wife, are the six beneficiaries. Caruso never took out citizenship papers. He died an Italian. His American wife is also an Italian national, as his little Gloria. In fact, the golden-voiced tenor specially registered Gloria as an Italian citizen at the time of her birth. His fortune necessarily must be distributed according to Italian law and his first love, the mother of his two boys born out of wedlock, threatens to fight for a share of the estate in the courts of her country. She is a native of Italy and never deserted Italy. There appears to be a law of compensation and it works in miraculous fashion under all flags and in all climes.

Henry Ford has been notified by the Interstate Commerce Commission that his second reduction on railroad rates in thirty days is a technical violation of I. C. C. regulations. Henry made the reduction without special permission from the I. C. C. and hence his order will not become effective until September first. This is a funny old world, controlled by red tape and "regulations" to such an extent that the sole owner of a common carrier must first give notice and then obtain special permission before he may make rate concessions to his patrons.

Should personal business become so pressing that he might feel that he could not give proper attention to public affairs, Former Governor Oscar B. Colquitt may withdraw from the race for the United States senate, he declared to a representative of the San Antonio Express, on his way to his home in Dallas from Medina county where he went to inspect some land upon which he has taken options for mineral leases. According to the same authority, since his temporary retirement from public life, at the close of his term as governor, Colquitt has acquired large holdings in various oil fields of the state that require much of his time and attention. In addition to this, he has become associated with other oil operators in a number of counties and may be required to devote further time to their business. Mr. Colquitt said that he had not fully made up his mind whether or not to continue in the race. Plans for his campaign are being deferred pending his decision. His platform, if he does remain in the race, will be based upon a fight for a reduction of taxes, and for the removal of such taxes that appear to hinder business. He also may ask for changes in the policies of the federal reserve banks, which he claims are refusing to lend money to farmers and stock raisers of the Southern and Western states, and at the same time are extending large loans to manufacturers of the East. It is his belief that this action, together with the centralization of the powers of the national government in the hands of a few men in Washington, is largely responsible for the present business depression of the country. Little hope for a reduction of the tax burdens upon small business men during the republican administration is held out by Colquitt. No material relief has been effected since the advent of the republicans to power, he claims, in spite of their campaign promises to revise the national revenue system. What changes have been made, he declared, are for the benefit of Eastern manufacturers, and will not be felt in the South and West. The former governor does not expect a revival of the oil business in Texas, because of the high taxes on oil, aspite the fact that prices on crude oil have made considerable slumps. There is not market for leases or royalties at present, he said, nor does it appear that ther will be within the near future.

Who's Who

FRANK W. MONDELL

Representative Frank W. Mondell of Wyoming, a republican leader of national prominence, has announced his intention of becoming a candidate for the United States senate in 1922. Mr. Mondell, who is Wyoming's only representative, is serving his thirteenth term in the house and his second term as floor leader. The senatorial seat he covets is at present filled by Senator Kendrick, democrat.

Mondell was born in St. Louis November 6, 1869. He was educated at St. Louis and in Iowa. He married Ida Harris, a Wyoming girl, in 1890, twelve years after he settled in that state. From 1890 to 1895 he was mayor of Newcastle, Wyo. He was elected to the first state senate in 1890 and two years later became president of that body. He was assistant commander general of the land office 1897-99. He was a member of the 54th congress and then served in the 56th and 57th. He was a delegate to the G. O. P. conventions four times from Wyoming. He was president of the dry farming congress from 1910 to 1915.

SMALL BLAZE CALLS OUT FIRE FIGHTERS

The careless dropping of a lighted match on a floor mop on the fifth floor of the American National bank building, is reported by firemen to have occasioned a run to Eighth and Indiana streets at 11:45 o'clock Saturday morning. The blaze was extinguished before the arrival of firemen, according to the report.

An electric iron left on an ironing board was reported as the cause of a blaze Saturday morning at 10 o'clock in a servants' house belonging to J. B. Allred, 1210 Kemp boulevard. The ironing board was destroyed, firemen reported.

KIWANIANS WILL MEET SEPT. 5-6

Something unusual in the way of entertainment, including a side trip to Corpus Christi and Laredo, with a trip across the border as a feature for all who desire, is promised the delegates to the District Convention of Texas Kiwanis clubs to be held September 5 and 6in San Antonio, according to letters received by local members. The side trip being extra, the committee at San Antonio requests that all members have their reservation in by August 20.

During the two days of the convention in San Antonio the Alama city will respond in her usual generous manner in entertaining the delegates, the letter says. The convention will be held on two days, Monday and Tuesday.

On Monday formal welcomes will be extended and the opening business of the convention will be taken up Luncheon one for the ladies and one for the men will be given by the local club on the first day. In the afternoon an automobile ride will be given and at night there will be a banquet and dance on the Gunter hotel roof.

Tuesdays program will consist of a business session in the morning, luncheons at noon, business session and election of officers in the afternoon, closing the convention with an automobile ride and a dance at night. On both Monday and Tuesday afternoon while the men are in the business sessions there will be theatre parties for the ladies in San Antonio play houses.

The side trip to Corpus Christi and Laredo has been suggested by the Kiwanis clubs of those places as a special entertainment feature to be taken up after adjournment on Tuesday. Prices for the individual fares and pullmens for the side trips have been figured at $27, in case a sufficient number sign up for the trip. The special train will leave San Antonio about midnight Tuesday and will be in Laredo Wednesday.

The Laredo Kiwanis club has arranged a bull fight, real Mexican dinner, and a trip across the "Rio De Volstead," as it is sometimes called.

Leaving Laredo about midnight the party will arrive in Corpus Christi in time to spend all day Thursday, dallying in the surf and other things. Leaving that city in time to arrive in San Antonio Friday morning to catch the fas trains to the north an deast.

Special reductions of one and one-third fare have been granted by railroads entering San Antonio for this convention. The letter insisted that reservations must be made by August 20.

"THE PRINCESS OF NEW YORK" FILMED AT OXFORD UNIVERSITY

David Powell and Mary Glynne in a scene from the Paramount Picture "The Princess of New York."

Oxford University, that famous seat of learning in England, is beautifully pictured in the Paramount British-made picture, "The Princess of New York," featuring David Powell, which will be shown at the Empress theatre next Monday and Tuesday. The scenes taken around the university grounds embrace the entire campus, but feature the section which includes Oriel College for most of the action. For American audiences especially, the scenes should have an interest because of the wide popularity Oxford University has attained through the many Rhodes scholars who have completed their education there.

These scenes of the university are but few, however, of the novel settings which have been incorporated in the continuity of "The Princess of New York." Among others are surroundings of British social and student life, the quaint old Temple in London's legal corner; a big scene of proceedings at the Bow street police court; the lounge of a famous Strand hotel and dinner parties at a well-known Mayfair restaurant. A thrilling motor chase provides a smashing climax for the story.

Evidence that English stage artists are turning to the screen is furnished in the excellent cast Donald Crisp, the producer, assembled. Included in it are Mary Glynne, a Paramount favorite; Mrs. Saba Raliegh, who is devoting her time to the screen after a successful stage career on both sides of the Atlantic; Ivo Dawson, who after an extensive stage experience is concentrating upon motion pictures, having apepared in several Paramount productions in this country; Dorothy Fane, popular actress; George Bellamy, Philip Hewland, Wyndham Guise, Jane West and Audley Willis.

"The Princess of New York" is from Cosmo Hamilton's novel of the same name; the screen version of which was prepared by Margaret Turnbull.

"THE CUP OF LIFE" AT OLYMPIC MONDAY, TUESDAY AND WEDNESDAY

THOS. H. INCE PRESENTS "THE CUP OF LIFE"

Since Marco Polo first dared the hidden dangers of uncharted oceans to journey his way from Europe to the mysterious shores of India and the Orient, the colorful kingdoms and empires lying "somwhere east of Suez" have beckoned the adventurer with the lure of beauty, romance and glamour.

Singapore, the trade center of the Orient, a port of ancient traditions and modern business, where today rubs shoulders with yesterday, is the alluring background of Thomas H. Ince's latest special production for the Associated Producers, "The Cup of Life," which is announced as the feature of the Olympic theatre program beginning Monday.

The story is a tremendous drama of a father's love for his son and of the unjustified vengeance of a powerful chinese merchant prince. Deftly combined with a delicate love story, and scenes of stirring action, are revealed the fundamental differences that will forever separate the Orient from the Occident—the dividing line of races.

The cosmopolitan atmosphere of Singapore has been exploited to the fullest advantage in attaining powerful an deffective contrast, and in reaching the tremendous dramatic situations which feature the production.

The leading roles are assumed by an all-star cast of exceptional merit. Hobart Bosworth appears as "Bully Brand," the type of characterization for which he has become justly famous. Madge Bellamy, Tully Marshall and Niles Welch are seen in parts no less important. Mone Collins and May Wallace complete the cast.

"The Cup of Life" has been produced in typical Thomas H. Ince fashion, and no effort has been spared to make it one of the artistic and dramatic triumphs of the season.

FILM COMPANIES SEEK ECONOMY WITH QUALITY

LOS ANGELES, Aug. 6.—A new era is drawing in the motion picture world.

According to leading producers the days of extravagant salaries and inefficient methods are gone forever. "Cut the cost, but keep the quality up."

This is the order which has been given in every one of the big studios of Southern California, and for several weeks a general retrenchment has been in progress.

"The motion picture industry has passed from a period of abnormal prosperity," said Jesse L. Lasky, first vice-president of the Famous Players-Lasky Corporation, in analyzing present conditions. "It behooves producers to face present critical conditions courageously and to fight through the period of readjustment to the period of normalcy.

"The motion picture producing organization that does not realize the seriousness of the situation and act accordingly annot survive. It must be absolute efficiency. Extravagance must be replaced by economy. The day of reckless expenditure, I feel certain, has gone forever and economy is to be the watchward of the new era.

"Officials of our organization were called upon each to do his share in putting the corporation on an efficient, economical basis.

"Solely in the interest of economical production, we closed our studio on Long Island, N. Y., and transfered all productions to our studio in Hollywood. We are striving to eliminate all the old extravagances of production and aiming for the greatest economy."

Samuel Goldwyn, president of the Goldwyn Picture Corporation said:

"We are now making pictures at a lower cost than formerly. Many items of expense which formerly were regarded as necessary are being eliminated. Salaries are also being reduced and expenditures watched with a carcful eye. This is necessary in order that motion pictures may remain a popular priced amusement."

Irving G. Thalberg, general manager of the Universal Film Manufacturing Company, said:

"The man who makes motion pictures knows he must make better pictures for less money and start making them now.

"The man who says that the motion picture industry is in a splendid financial condition is just as wrong as the man who says it faces ruin:

"The present unrest is the best thing that could have happened to the industry. No permanent peace was over achieved without revolution.

"When the stories that are now being filmed at a reasonable cost can be released to exhibitors at a cost that will enable them to exhibit them for what they are worth, make a reasonable profit for themselves and return a reasonable profit to the producer and give the purchaser his money's worth of entertainment the motion picture industry will be properly on its feet."

COMPLETE MILE AND HALF OF NEW ROAD

Approximately one and half miles of the concrete road between Electra and Iowa Park had been completed Saturday according to information from the office of the county engineer. Both mixers with two crews were at work most of the time during the past week.

Plenty of materials are on hand and no delay is expected in the continuance of the work.

MOVIE CALENDAR

OLYMPIC.

Monday, Tuesday, Wednesday, Thos. H. Ince's production, "The Cup of Life."

Thursday, Friday and Saturday, Charles Ray in "The Old Swimmin' Hole," by Jas. Whitcomb Riley.

MAJESTIC.

Monday only, William S. Hart in "Wolf Lowry."

Tuesday only, Wallace Reid in "Too Much Speed."

Wednesday and Thursday, "The Flame of Youth," also Eddie Polo in "Do or Die."

Friday and Saturday, Jack Hoxie in "Dead or Alive," also a Sunshine comedy.

STRAND.

EMPRESS.

Monday and Tuesday, "The Princess of New York."

Wednesday and Thursday, Constance Binney in "Such a Little ueen."

Friday and Saturday, Douglas McLean in "Passing Thru." Also Mabel Normand in "The Stolen Majestic."

FRANCIS TO TALK OPTIMISM

"The Philosophy of an Optimist" will be the cheerful subject on which Charles I. Francis, local attorney, will address the weekly luncheon of the Kiwanis club Monday. The local club is said to be one of the most active agencies in this section in promoting the feeling that better times are in the offering.

To quote from the weekly letter from Ben Neal, secretary:

"Judge Gary, head of the United States Steel corporation, issued a statement teeming with optimism, advancing the conviction that the near future would usher in the most prosperous business era ever witnessed in the United States. Judge Ward made the statement this week that "the business sun is shining more brightly, and the silver border to the cloud is growing broader and deeper."

"The newly formed policies and programs of big business all over the country point to large increase in operation. Let's meet the inevitable good times coming! Let's not wait till they are arrived before losing our long cherished grouch! Now's the time to smile—all together, boys! That's better."

Eentertainment for the occasion will be furnished by Gerald Gose, a young violinist said to possess exceptional talent, accompanied by Miss Jo Betsy Miller.

Jim Gant is to give the attendance prize, a coupon book for 2,000 pounds of ice, while George Allman, the chief of the Jesse James crew at the union station, and noted for having won more attendance prizes than any other local member, will give the "silent boost." Walter Robbins will wield the gavel.

DE HAVENS COMING TO STRAND IN "TWIN BEDS," OPENING MONDAY

The picture, "Twin Beds," which Mr. and Mrs. Carter DeHaven bring to the Strand Thursday, is a transfer to the screen of one of the most popular and successful farce comedies that the stage has produced. It comes as the first of these favorites' productions in affiliation with Associated First National Pictures.

The original plot of this ever enjoyable piece has been closely followed in making the picture, and as it is said to be one of the costliest plays ever purchased for picture use, a great deal of expense has been incurred in making the production adequate. It is reported to be a feature of exceptional merit from all angles of presentation. A glance at the cast of characters is sufficient to convince followers of pictures that this is a well-nigh all-star attraction. Beside Mr. and Mrs. DeHaven there are in the cast such luminaries as William Desmond, himself a popular star, Helen Raymond, who created the role of Signora Monti in the original London production of the play, Katherine Lewis and Lottie Williams.

The picture is said to fulfill all the prophecies made concerning it, and with these two popular favorites, supported by so competent a group of players, it bids fair to afford unusual entertainment.

"Cold Steel" is the name of the attraction the first half of the week.

Lady Lena, a barred Plymouth Rock hen registered at the Dominion experimental farm at Kenville, Nova Scotia, laid 104 eggs in 104 days, and is, the Halifax Morning Chronicle asserts, the champion of the world. During 1920 she laid 246 eggs.

FOUR HELD FOR THEFT OF AUTO

Charged with conspiracy to steal an automobile in violation of the national motor vehicle act, Charles Weems, Buck Branch, W. H. Barton and Mike Cohen, were all bound over under $750 bond each to await the action of the federal grand jury following a preliminary hearing before United States Commissioner Lants. Unable to furnish the bond, the men are being held at the county jail. All are residents of Oklahoma.

The four were arrested the first of the week following an investigation by federal officers. According to the officers one of the four men applied for an automobile license at the tax collector's office without at that time having an automobile.

A statement was secured from one of the men indicating according to the officers that the license was to be used in connection with the theft of an automobile.

Fishermen on the north or Block Island sound shore of Montauk Point have found a novel use for old and discarded nets. They make roads of them. They lay them down over the marshes in the rear of the beaches, where their huts and boats are placed and the sand blows into the meshes and is soon compacted into a firm roadway, solid enough for wagons or even light automobiles. The principle is the same as that used by lumbermen in making corduroy roads over swamps.—New York Evening Post.

OLYMPIC THEATRE

Sunday morning at 9:30 the K. K. Men's Class of the M. E. Church, South, will put on a special program.

R. E. Shepherd, the city's favorite vocalist, will sing for us.

Judge Jno. C. Kay, the city's favorite lecturer, will talk to us.

Come out and join us and bring your friends.

Lots of fans and cool breezes.

RECORD NEWS SPORTS

HACK EIBEL'S HOMER NETS FOUR RUNS FOR GASSERS BUT SPUDS HAMMER PILL AND GET ANOTHER

I had thought that the Gassers were wicked,
Were nuts that we might not crack;
But I've learned there's much that I do not know—
Much that I should take back.
The Bears? They were easy pickings,
You'll pardon the slang I sling;
But I thought the Shreveport Gassers
Would be quite another thing—

But I slipped on the old banana,
I fell, and skinned my brow;
My dope was wrong, and the price of a song,
Would be profiteering now.
For the Gassers are players gentle,
E'en softer than Santone,
I 'pologize to the Spudders,
For my unintentional bone.

—By Myself.

The Gassers, or rather Gleason, erstwhile ace, proved exceeding easy for the local stalwarts Saturday afternoon, said stalwarts collecting 17 bingles and 12 runs while Daddy Sewell, rushed to the rescue of Marshall right on the start, was riding Billy Smith's crew with an easy bit.

Consistent battling and forthcoming hits when counters were in the balance spelled the win-out for the Salmites, in spite of the four-run lead they had gathered by reason of Hack Eibel's 26th home run clout before the first inning had hardly gotten under way. The clout was over the left field fence, and put Hack one jump ahead of Clarence Kraft for slugging honors, and, coupled with Bob Bescher's grabbing the batting lead, probably relegated the Panther star from his wonted headline position for some time to come.

The bases were choked when Eibel smote his blow, Watt and Ewoldt having singled in succession, and Ol' Man Jackson drawn free transportation.

Sluggish honors for the homelings were pretty generously divided. Frank Kitchens' home run blow in the fourth with one on, lead the list. It was one of the longest hits ever seen at Athletic park. It tied the score, and kept the locals in the running. Bob Bescher was a big factor in the scoring machine, getting three hits and a walk out of five terms at the rubber. Cecil Griggs' mighty triple in the eighth figured in the scoring, as did a brace of doubles going to the credit of Tex McDonald.

Scoring Machine Starts.

Undeterred by the four run lead garnered off Rube Marshall, who had allowed five hits and a walk, including Eibel's homer, before he was relieved by Sewell, the Spudders got right to their afternoon's work in the first. Bescher singled to center, stayed on first while Gross fanned, but took second when McDonald drew a pass. Clark was out on a pop foul to Henry, and Bescher scored when Miller slammed one down the first base line, which went for a hit when Miller was hit in the back with Gleason's throw. McDonald took third on the play, but died when Griggs flied out and ended the inning.

Bescher led the attack again in the third, beating out an infield roller for a hit, taking second on Gross' sacrifice and scoring on McDonald's double to the right field fence.

Kitchen's homer in the fourth, with Works, who had beat out an infield hit, ahead of him, evened the game.

Gassers Lead Again.

The gassers went back into the lead in their half of the fifth, in spite of a heady double by four of the home crew, which was one of the strangest plays ever seen on the local lot. Gleason was safe on Sewell's fumble of his grounder down the first base line. Watt singled to center, sending Gleason to third. Ewoldt flied to Miller and Gleason was caught trying to score on the play.

The ball bounded over Kitchen's head just as Gleason, seeing he was caught, had turned and started scuttling back to third base. Sewell, who had backed up Kitchens to take the throw, quickly tied on to the ball and tossed it to Kitchens who threw to Works in time to double Datt, the latter having left the base before Ewoldt's fly was caught. Gleason regained third. Jackson doubled against the left field wall, scoring Gleason and came in himself when Eibel singled past Clark.

Another Spud Offensive

The Spudders started a second drive to the front in their own half of the fifth. McDonald edged a single past the Gasser second sacker, and went to third on Danny Clark's double—the latter missing clearing the fence by a narrow margin. Miller grounded out, the runners being held with no advances. Griggs flied to Jackson, McDonald scoring on the play. Works walked and Kitchens ended the inning with a pop fly.

The locals grabbed the lead for the first time during the day in their half of the sixth. Sewell singled over second, and Bescher followed with a Texas leaguer back of third, Sewell going to second. Both scored on McDonald's two base wallop to right center, but the latter was nailed at third trying to stretch the hit.

The seventh was a tightly fought inning, but the Gassers crashed in the eighth. Sewell again opened court with a single, taking second when Watt let the hit get away from him. Bescher flied out to Long, Sewell taking third after the catch. Ewoldt robbed Gross in a beautiful stop, the latter being nailed at first, and Sewell being held at third. McDonald again doubled to right center, scoring Sewell. Clark was safe at first and McDonald scored when Hartford pegged wild after fielding the former's grounder. Miller walked and Griggs tripled to right, scoring Clark and Miller. Works drove to left center, scoring Griggs. Kitchens ended the inning and the scoring by three swings.

HOW SPEAKER MADE WINNING HURLER OF SOTHORON

Allan Sothoron, who a few years back loomed as one of the game's greatest hurlers, gradually slipped until the St. Louis Browns asked for waivers on him a couple of months ago.

Allan Sothoron pitching, and drawings illustrating his fault and how it was corrected.

Sothoron's arm apparently was o. k., but he could not field his position. Teams actually bunted him off the mound. Manager Speaker of the Indians believed he could remedy this fault and took a chance on Sothoron. The Indian boss decided that Sothoron's weakness lay in throwing to bases after fielding a ball. His wildness came from throwing flat-footed instead of taking a step as he does when hurling. Sothoron is now a winning hurler for the tribe.

O'FARRELL WINS GAME WITH HOMER

CHICAGO, Aug. 6.—Bob O'Farrell's home run drive over the right field wall with the bases filled today put Chicago out in front and they won the first game of the series from New York here today, 7 to 4.

DALAS POLICE PROBE ATTACK ON WOMAN

DALAS, August 6.—One man is under arrest and another arrest expected soon in connection with the attack here last night on Miss Louise Russell, 24 years of age, in her home in North Dallas. The man who is being held is not a suspect, according to officers, but believed to be in possession of information which would prove valuable to officers.

Ty Cobb Creeping Up on Heilman In American Loop Batting Race; Hornsby's Lead Safe in National

By Associated Press.

CHICAGO, Aug. 6.—Ty Cobb, manager of the Detroit Tigers, today is creeping up on Harry Heilman, the hard hitting Detroit outfielder, in the race for batting honors of the American league with only twenty-five points separating them. Cobb gained nine points during the week for an average of .398, while Heilman suffered a loss of seven points, his average dropping to .423. Tris Speaker, of Cleveland, remains in third place with .379. The averages include games of Wednesday.

The New York Yankees lead the league for circuit drives with a total of 97, thirty-eight of which were cracked out by Babe Ruth. The tail-end Athletics are second with 59. Ruth, who smashed out a brace of circuit drives during the past week, has registered 106 runs for his club. The big slugger also increased his lead in total base hitting in 274, made on 120 hits, which, besides his home runs, include 24 doubles and 8 triples.

The Washington club is out in front in stolen bases with seventy-nine, nineteen of which were pilfered by Harris woh is showing the way to the base stealers of the league.

Other leading batters who have participated in 55 or more games are: Tobin, St. Louis .368; Williams, St. Louis .368; Ruth, New York .364; Severeid, St. Louis .358; E. Collins, Chicago, .354; Veach, Detroit .350; Sisler, St. Louis .348; Stephenson, Cleveland .338.

Hornsby Has Big Lead

In the National league, Rogers Hornsby of St. Louis is blazing away to the tune of .415 for the batting leadership. Twombly of Chicago is the runner-up with .370, while Nicholson of Boston is third with .364.

The Philadelphia club is out in front for home run honors with 62, while St. Louis and New York are running close for second place, the Cardinals having 54 compared with the Giants' 53. George Kelly of the Giants is the leading four base hitter of this circuit, with 18 to his credit.

Frank Frisch of New York added three bases to his string of stolen bases and is showing the way to the base stealers with 31 thefts. He has been tied for the honor of best run getter by Hornsby, each having scored 82 times.

Other leading batters: Young, New York .362; McHenry, St. Louis .356; Cutshaw, Pittsburgh .351; Cruise, Boston .349; Meusel, New York .341; Fournier, St. Louis .341; Mann St. ouis .341; C. Williams, Philadelphia .340; Maranville, Pittsburgh .328.

STRENGTHENED MARINES TAKE OPENING GAME

DALLAS, Aug. 6.—Dallas defeated Fort Worth in the first game of their crucial four-game series today, 4 to 2, due to the splendid pitching of Tipple and timely hitting of Falk. The smoke ball artist of the Marine staff turned the Panthers back with four scattered hits and one earned run, the other run being the result of errors by Palmer and Falk.

The Marines went after Bill Whittaker, Panther pitching ace, in the first inning. Falk led off with an infield hit, took second on Munson's sacrifice and scored when Galloway sent a clean single into left. They hung up another marker in the third when Falk drove a triple to the center field fence and scored on Skinner's sacrifice fly to Coombs.

Palmer opened the fourth inning with a double against the right field boards and counted on Robertson's single. Decker brought in the fourth run in the seventh when he walked and scored on a double by Falk, the latter's third hit of the game.

Taylor opened the game for Fort Worth by driving a pass, but a fast double play ended chances for a score. Taylor, first up in the third, got a fluke double when Falk misjudged his fly in the sun but was left stranded as the next three batters were easy outs. The Panthers did not threaten again until the seventh when Bratcher was safe on an infield tap, took third on Palmer's error on Hoffman's grounder and scored when Falk muffed Haley's fly. The second Panther run came in the eighth when Taylor walked and counted on Bratcher's double.

Manager Atz of the Panthers was parked by Umpire Miller in the sixth and Catcher Robertson of Dallas in the ninth for protesting too strongly. More than 5,200 fans attended the game, the largest week-end crowd of the season. Score:

WISDOM and WORSE

By C. F. C.

If there has been a period in the Texas League's history when a pennant race was more feverish, or greater interest was shown by the excited to our attention.

A northern club is going to grab the gonfalon, that's a cinch—and the battle down the stretch between the Spudders, Marines and Cats ought to make a Kentucky Derby by comparison resemble a foot race between two mud turtles.

The Shreveport Gassers figure they also are going to have something to say about that championship rag, but frankly, despite the Gassers' recent sprint from the cellar, we're not figuring 'em in.

Ned Gourdin, Harvard's wonderful negro athlete, the greatest jumper the world ever saw, is working his way through the university and will enter Harvard law school next fall, dependent entirely upon the funds he can earn in his hours away from study. When the colored brother hustles like that to better himself, he gets three cheers from us. It's a pity Gourdin is the exception and not the rule.

Jas Connolly, center fielder of the Bears, was shocked severely by Caruso's death:

"I ain't been feeling very well, myself," he explained in the course of a singing bee in the Kemp hotel, "and if I should pass out right now, the world will have to get its tenor music from the phonograph."

Rube Benton was the winner when the Giants handed him his release recently. St. Paul and Kansas City began dickering for his services, with the result that Rube hooked up with the Blues—and all he got was a bonus of $1,500 and a salary equal to his New York contract.

Speaking of southpaws, George Tyler of the Cubs is quoted as saying he didn't really begin to pitch until he found he couldn't burn 'em past the batter any longer, and had to start studying the weakness of various National league sluggers. That also was the story of "Doc" White, old-time Sox portsider, who saw his best years for a while after he lost his speed. He developed a ball so slow the batters did everything but break their backs trying to hit the fool thing before it arrived at the plate.

Mal McGilvery, manager of Jack Arnold, Dallas featherweight, is all "het up" over a recent letter we printed from A. J. Breman, manager of Walt (Kid) Cole, of Burkburnett—and Mal insists on having his turn at bat. Mal says:

"May I point out that in the first meeting of the two boys at Drumright, Okla., July 4, Arnold simply played with the youngster from Burkburnett and in order to give the handful of fans a run for their price of admission—there were only about 100 people at the contest—Arnold prolonged the bout, as the preliminaries were crude to a degree.

In the fifth round, the referee, a personal friend of Breman's, cautioned Arnold to "keep your blows higher, please," the inference being that as Cole had adopted a nasty style of jumping up and in, Arnold's legitimate deliveries MIGHT land low, and it was to prevent this that the caution was handed out by the third man in the ring.

At the start of the tenth round, I sent Arnold in to finish matters and he had Cole down twice, as the official reports in the Drumright newspapers will show. I could have legally claimed the bout on a foul in that round, as J. J. Pargen, Cole's representative, broke all known rules by jumping into the ring and instructing Cole to stay down for the counts.

"In the Eleventh round, Cole was sent to the canvas three times and here again

YANKEES BOW BEFORE ATTACK OF DETROITERS

NEW YORK, Aug. 6.—Detroit took a close game from New York 9 to 8 today. Ruth hit his 39th home run of the season in the sixth inning with two men on base but his failure to get under a short fly in the 9th let in the winning run. Score:

BRAD HOGUE WINNER IN TENNIS PLAY

DALLAS, Aug. 6.—Consistent playing backed up by stonewall defense, enabled Bradley Hogue of Dallas, to retain the singles championship of the southwest today. Hogue defeated Jack Norton of Fort Worth on the courts of the Dallas lawn tennis club in straight sets, 6-2. The champion who usually plays a smashing game, resorted to easy strokes and had his opponent guessing throughout the matches. Norton's playing did not measure up to his usual standard of tennis.

A. B. Adoue and Harvey McQuistion defeated Evan Rees and Louis Thalheimer in the double championship of the southwest. All of the players live in Dallas. That set pitted years against youth and experience won. Thalheimer is a 19 year old school boy and Rees is also a younster on the courts.

INTEREST IN INTERNATIONAL TENNIS MEET QUICKENS WITH ARRIVAL OF FOREIGN STARS

By Associated Press.

NEW YORK, Aug. 6.—The arrival of the Australasian and British Isles tennis teams in this country has quickened interest in the international tennis carnival which will lead up to the challenge round for the Davis cup at Forest Hills, September 2.

The Australians are scheduled to meet Canada in Toronto today, the matches to decide the British Isles opponent in the second round. The players from the antipodes are the outstanding favorites over the Canadians. The British-Australian match which will be played at Pittsburgh, Pa., on August 4, 5 and 6, virtually for the "championship of the British Empire," is expected to be one of the high lights of the international court series.

Although the famous Australian names, Brookes and Patterson are missing from the personnel, players of experience are included on the team, which is considered not unlikely to go through to the challenge round. Captain Norman Beach, Joe Anderson, G. V. Todd and J. B. Hawks compose the quartet.

Beach and Todd represented Australasia in the match with New Zealand last winter when the Davis cup team of the United States visited there for the challenge round.

Beach, in the opinion of the American team members, is not a formidable player. Captain Sam Hardy of the American team saw him in action against a player of fair ability in Auckland and declared on his return home that Beach would rank about No. 50 in the United States.

Joe Anderson is believed by Norman Brookes, the famous veteran, to hold the greatest promise among the younger players in Australia. He is said to play an excellent all-around game with more speed and power than his teammates. In the Davis cup challenge round of 1919, he defeated F. G. Lowe of England in five sets, a feat that denotes much ability. C. V. Todd is the youth who defeated Gerald Patterson in the singles championship of New South Wales last winter. Jack Hawks, a left handed boy of 20, is also brilliant, possessing a puzzling twist service and a ground stroke and net game which is more than fair.

The English quartet, composed of Captain Maxwell Woosnam, F. G. Lowe, O. G. Neville Turnbull and J. B. Gilbert combines experience with youth. Lowe and Turnbull have played in many international tournaments. Gilbert was selected only recently to replace Major Cecil Campbell.

Captain Woosnam, although a comparative newcomer in international play, made his mark in the Olympic competition at Antwerp last summer when, paired with Turnbull, he won a gold medal in the doubles tournament. Previously, he won doubles with Turnbull at Eastbourne and Hythe in 1919. He also represented Cambridge against Oxford in 1919. Woosnam is regarded as one of England's best all-around athletes. He represented Cambridge in association football and golf as well as in tennis and has played for the city of Manchester and for England in football.

Lowe, who is 37 years old, attended Cambridge and represented that university against Oxford in 1906. That was two years after this veteran, who learned his tennis at the Queens club and Wimbledon, had won his first open tournament in doubles at Paris, paired with the late "Tony" Wilding. In 1909, Lowe went to the last eight in the English championships at Wimbledon. He represented England in the Olympic tournament at Stockholm in 1912 and was a member of the English Davis cup team which vsted Australa the same year.

O. G. Nevile Turnbull won the doubles with Woosnam at Eastburne and Hythe in 1919 and represented England in the Davis cup match against France at Deauville in 1919. Last year he won the gold medal in doubles with Woosnam at the Olymuic games and reached the semi-finals in the singles. Last season saw an additional triumph when he captured the doubles championship of Spain with Manuel Alonso at San Sebastian.

CITY LEAGUE

The Telephone company nine made a race track out of their diamond yesterday, trouncing the American National Bankers 13 to 4. Williams was hit hard, while the bankers were able to gather only four safe blows from Faichner.

Town Topics

Accompanied by his daughter, Marie, and his son, Alfred and his sister, Mrs. Earl Ban Dorn of Dallas, W. T. Harris, county clerk, will leave the first of the week for Colorado Springs for a two week's vacation. Mrs. Van Dorn arrived here Saturday from Dallas.

Irven Deaton, county tax assessor and family left Saturday on an automobile trip to Dallas and other points. They will return here the latter part of the week.

J. A. Lants, United States commissioner and family left Saturday for points in Northwest Arkansas. They will return here in ten days or two weeks.

Miss Mary Hanks of the county tax collector's force left Saturday on a month's vacation to point in Oklahoma.

Miss Ethel McDowell, assistant tax collector, returned Saturday from a vacation spent with her parents in Colorado Springs.

Mrs. Clarence Moore has returned from Fort Worth, where she was the guest of relatives.

Miss Betsy Walton of Fort Worth arrived Saturday to be the guest of Mrs. E. F. Duff at 2310 Ninth street.

Mrs. D. Deutser of Beaumont who has been the guest of Mrs. Saul Lebenson will return to her home Sunday. She will be accompanied as far as Fort Worth by Mrs. Lebenson and daughter, Nathalie.

Mr. and Mrs. George Reynolds and daughter, Miss Mary, of Dallas are the guests of Mr. and Mrs. Albert Ellis, of 2301 Ninth street.

Miss Ethel McDowell, left Saturday for Colorado Springs.

M. B. Oates, agricultural agent of the Fort Worth and Denver, returned Saturday from a trip to points on the north Denver.

Shadie Hale, of the City National Bank of Commerce, has goneto Galveston on his vacation.

Charles D. Reymond, cashier of the Trust and Savings Bank of Baton Rouge, La., was a business visitor in the city Saturday.

Miss Juanita, ten-year-old daughter of Mr. and Mrs. Tex McDonald, underwent an operation for adenoids early Saturday, from which she was reported to be rapidly recovering. Mr. and Mrs. McDonald are staying at the home of Mr. and Mrs. D. A. Milcoxin, 1103, Monroe street.

Gould Whaley, banker of Nocona, was a visitor in Wichita Falls during the latter part of the past week.

Mr. and Mrs. W. E. Timblin and baby daughter, Sue Anne, 1208 Kemp Boulevard, accompanied by the mother of Mr. Timblin, recently arrived from Pittsburgh, Pa., and Miss Gladys Horn of Syracuse, Ala., left last week for a six weeks automobile tour of Colorado.

Mike McNamara, deputy supervisor, oil and gas division, Texas railroad Commission, stationed at Graham, is spending the week-end with friends in Wichita Falls.

BOB BESCHER LEADS TEXAS LOOP HITTERS

BY WM. RUGGLES,
Texas League Statistician.

A new batting leader appeared on the Texas League horizon in the past week in the person of the veteran Bob Bescher, who in a rapid week of hard hitting, climbed to the top of the peak, although Big Boy Clarence Kraft of the Panthers, who has played in nearly twice as many games as Bescher, improved his figures and drew away from Hack Eibel. Bescher's average is .364, giving him a three point lead on Kraft, now .361. Eibel droped to .342. The number of .300 hitters decreased during the week, but there are a number of players on the up-grade batting in the .290 class. Only twenty-two survived at the .300 mark.

Kraft scored his hundredth run in the past week, and with 155 hits has a lead of 16 base blows on Connolly of San Antnio, his closest rival in the battle to reach 200 safeties.

Joe Pate Still in Lead.

Joe Pate of Fort Worth is still high man among the winning pitchers, with a percentage of .778. Tiny Goodbred, his team mate, has the same figure, but has pitched far fewer games nor is his record as good. Hollingsworth leads the league in strikeouts, 163. Pate is the wheelhorse, with 241 innings pitched.

Pitchers winning half or better of their games through last Wednesday follow:

Player—Club	G.	IP.	W.	L.	Pct.
Badger, Bt.	6	17	1	0	1.000
Pate, FW	36	241	21	0	.778

Gleason, St.	26	200	12	12	.500

Few Small Hit Games.

But one no-hit game has been pitched in the Texas League this year and no one-hit. Altogether, through last Wednesday's games, only 120 games had been played in the league this year, in which five or fewer hits were allowed by the pitchers. Galveston has been the chief victim, having been held down to a minimum thirty times, a poor showing compared with the other clubs. Fort Worth has the best record as this table shows:

Club—	0	1	2	3	4	5	Ttl.
Fort Worth	0	0	1	2	2		6—11
San Antonio	0	0	0	3	2		7—12
Wichita Falls	0	0	2	4	3		5—14
Shreveport	0	0	0	4	3		8—15
Houston	1	0	0	2	4		8—15
Dallas	0	0	1	3	6		6—16
Beaumont	0	0	2	6	5		3—16
Galveston	0	0	0	7	9		14—30

"ONE-ROUND" HOGAN TRAINING AT BURK FOR BOUT THURSDAY

BURKBURNETT, Texas, Aug. 6.—"One Round" Hogan, the Walters, Okla., featherweight boxer, who meets Jack Dalton, Shreveport, La., in the feature bout at the Liberty Arena here next Thursday evening is attending to his training with an earnestness that presages determination, if nothing else. The Oklahoman, who worked out yesterday for an hour in the broiling sun before a large concourse of spectators, looks to be in the pink of physical condition. His manager is satisfied that his protege will have no difficulty in making the required poundage of 123 pounds on the afternoon of the battle.

Dalton, fresh from his decisive victory over the much-touted Dale Hill of Fort Worth, is within striking distance of the necessary weight and although he is not expected to reach here before Monday evening, his friends assert that two days will be sufficient time in which to loosen him up for the battle against the "one rounder."

The advance disposal of tickets is encouraging to the officials of the Liberty A. C. and it looks like that when the principals duck under the ropes there will be a big attendance of the red-blooded sportsmen of the city and district to see the melee. Good preliminaries will go on before the main attraction.

LOCAL GOLF STARS SET FOR DENVER TILT

DENVER, Colo., Aug. 6.—More than one hundred golfers from western states will tee off Monday and Tuesday in the qualifying rounds of the Trans-Mississippi golf turnament at the Denver Country club here. State champions and runners-up as well as lesser lights from a dozen states will attempt during the week's play to wrest the title from Robert McKee of Des Moines, Ia., winner of the title at the tournament last year at Rock Island, Ill.

McKee, the defending champion, the advance entry sheets indicate, will meet the stiffest kind of opposition. A fellow Iowan, R. E. Knepper of Sioux City, runner-up to Charles (Chick) Evans in the western championship last month at Chicago, is amond the chief contestants.

Match play begins Wednesday and semi-finals, and final will be played Saturday. Early arrivals who have gone around the course in practice pronounce it in perfect condition. It is well trapped and club players' estimates of the low score in the qualifying rounds of 36 holes vary from 142 to 148.

Alexander Graham of Wellington, Kans., who won the state championship at Wichita this year, was among the first arrivals. The first two times out he turned in cards of 74 for the eighteen holes which indicates that he will be a strong contender for the championship. Ralph C. Smith, the club professional, said that under the trapped condition of the course, he did not expect many scores under 80. Smith holds the course record of 69.

Among other entries who are expected to go into the final days of play are Dr. L. D. Bromfield of Denver, Colo., state champion, George Vonnell of Salt Lake City, Blaine Young of Omaha, Nebraska state champion; E. A. Liebmann of Oklahoma City, runner-up in the Kansas state tournament; James Kennedy of Tulsa, Oklahoma state champion, and Tom Cochran of Wichita Falls, Texas.

ANNOUNCEMENT
New Brunswick Shop
What We Found Out—
We'll Show You Gladly

Our decision to offer Brunswick Phonographs and Records to the many music lovers of Wichita Falls was not made over night. We investigated. We examined. We inquired and interrogated experts. We analyzed for we had our choice of the entire field. We easily decided on Brunswick after years of experience with every standard make.

Now you can find out
No matter what your Phonograph experience has been—no matter what you may now own—see, hear and examine The Brunswick.
Even if you've heard all the ment. Find out HOW it plays all others—hear this new-day instrument. Find out how it plays all records—any record—and plays them BETTER. Examine the matchless cabinet work, the design—realize its wonderful versatility.
Remember we are not only glad but anxious to demonstrate—to prove to you what was proven to us. You will not be urged to buy—just come and satisfy your curiosity.

This is "show you" week
We really are not so much interested in making sales this week as we are in answering questions.
We may tell you that the wonderful, oval, all-wood amplifier (or horn) in The Brunswick actually improves the tone of any record—but you must see it and hear it to really BELIEVE.
We may tell you that the Ultona reproducer plays every make of record with just the right weight, just the right needle, and that it is so perfectly balanced hat records wear longer, but we want you to examine it YOURSELF. Hear your favorite record on The Brunswick, and then "Just you hear a Brunswick Record."

Developing Forces That Win

By ROGER W. BABSON

(Copyright, 1921, Fleming H. Revell Company. First published in this newspaper by arrangement with Associated Editors, Chicago.)

Industry, Integrity, Intelligence, Initiative, Intensity and Inspiration, the six I's of prosperity are, as we have already seen, largely spiritual qualities. Therefore, in discussing last week, just how a man should set about acquiring these qualities for himself, we discussed first the ways and means of his spiritual development. At the same time we considered the type of mental training necessary.

In this article are further constructive suggestions for developing the forces that win.

Physical Strength.

If a man's spirit is right and rightly trained, the next most important requisite for securing the six I's is physical strength The value of physical strength is usually under-estimated. The relation between the physical and mental being is a close one. This body of ours is the dwelling place of the soul and mind. Normally a good strong body furnishes the best abiding place for a strong soul and mind. Physical strength is especially necessary in the development of Industry and Initiative.

American city life perhaps is not conducive to the best physical development. There are too much hurry and rush, early and late hours in the whole business. There is too little opportunity for proper rest and recreation except to the wealthy.

I presume the normal life of the average city clerk is to rise at seven, have coffee and doughnuts at a quarter of eight, spend a half hour on the trolley car and be in the office by eight-thirty: Then he has one-half hour to one hour for lunch, out of the office at five, dinner at six, show from eight-thirty to ten-thirty, in bed at eleven-thirty p. m. The same round starts over again the next morning. When passing through the great cities of our land, one cannot help feeling depressed by the inimical influences of the city life on those in the struggle of making good. The great city is one of the prices that nations pay for their industrial development.

Speed Causes Suicides.

Some day American ingenuity will devise means for proper rest, exercise, and recreation for the great mass of the city's inhabitants. Various institutions are already supplying this need in a limited way. Statistics show that a great number of suicides are directly attributable to the fast life that we are living. We sometimes laugh at the Englishman for his conservative way of living and for his antipathy to our American customs—but if we would slacken our pace somewhat it surely would redound to the benefit of our physical well-being.

Executives Larger Physically.

Statistics show that executives are physically stronger and larger of stature than their subordinates. For example, the college presidents as a class are taller and heavier than the college professors. Bank presidents are physically stronger than the clerks. Railway presidents are larger and physically stronger than the employes. The strain of modern business demands as one of the preliminary requirements a strong physical being.

There is no particular secret about securing physical strength. It does not necessarily require wealth, but it does require a certain amount of rest and self control. The best way to develop a strong physical being is: Eat wholesome food. Sleep in well ventilated rooms. Perform a proper amount of work each day. Secure a proper amount of rest and exercise. Give some time to recreation, and above all, live a normal, clean, upright life. Physical welfare is the second qualification for winning the race of making good.

Idle 76 Per cent of Time.

The great mass of us are idle 76 per cent of the time. In this 76 per cent of unemployed time a proper amount of recreation is quite essential. Technically one should be recreated in the interim between the close of one day's work and the beginning of the next. That is, the muscle fiber and the energy used up should be reconstructed and replaced before the next day's toil begins.

In business there must be compensation for the mental fatigue. Business men with weighty problems to solve should have some enjoyable form of recreation. It does not matter particularly what that form may be so long as it is healthy, honest and pure. It may be golf, walking, music, art or flowers. Such forms of recreation are the safety valves and governors for the business man—absolutely, essential to maintain his proper equilibrium. My own particular hobby is my farm. I take my exercises and mental relaxation in God's way. The vast majority of recreational activities are non-productive. I prefer to make my own recreational activity productive and enjoyable at the same time. But everyone to his tastes.

I tried to play golf once myself. I wanted to play for relaxation. I wanted to play to get my mind off my business—but every time I sat down for a moment's rest, one of the players would ask me if Union Pacific was a good buy or what I thought of Chili Copper and when the next period of prosperity would begin. I found that the golf links while giving me physsical exercise did not give me mental relaxation from business affairs. Yet proper recreation should be recognized for its value and importance in retaining physical strength.

Experience.

Experience comes next. Spiritual, physical, or mental development does not end with the educational institution. When a young man leaves the grades, high school, or college, he has just begun to develop. It is for that reason that we term graduations "commencements." The developmental process is just as essential after a man enters business as it is in the college. Here's where so many of our young people fall down.

A young man on a street car was heard to say to his friend, "I have got the best job I ever had. I don't have to do two hours' work a day." Measuring the value of a job by the minimum amount of work required is not conducive to success. For the proper development of the young man it is not the least amount of work that he can get along with and still hold his job that develops him, but the maximum amount of work that he can do.

Generally speaking, a job is good in proportion to the amount of experience required to master it. A boy can learn to run an elevator in two hours. From apprentice to professional in two hours; but he gets an elevator boy's pay. A young man can learn to be a motorman on a street car in one or two weeks and he will receive motorman's pay. A college graduate can enter a medical institution and in four years qualify as a doctor of medicine and he will receive the average doctor's income. The same dictor can spend additional years in specialization and he will receive a specialist's income. The graduation of income in all of these cases varies directly with the time required to learn to do the work.

What a Job Is Worth.

This is generally true throughout all business. The job is worth approximately the time required to learn it. Some one has said: "The gods sell anything to everybody at a fair price." The job that the gods sell for two hours' training is worth just what it cost. The job that the gods sell for two years' training is worth what it costs and the job that sells for ten years' training is worth just what it cost. **The only job that is worth while has tied to it the price tag of constant unceasing study and work.** Experience is that which makes your life more than a dash between two dates.

The elevator boy is open to the competition of almost any young man on the street because any young man can learn his profession within a few hours The motorman is open to the competition of almost any man on the street because the normal man can learn to be a motorman within a couple of weeks. This competition has a tendency to keep down the wages of elevator boys and motormen. It also has a tendency to stimulate trade unionism as a method of eliminating competition to keep wages up. Wages are influenced by the conditions of demand and supply as many other economic factors are. Wages are also influenced by the efficiency of the worker. High wages do not make men more efficient, but efficiency makes high wages. Wages come out of what is produced just the same as do all the factors in the distribution of wealth; so the more there is produced the more there is to be distributed.

These, however, are by-products of the point. The point is that with spiritual, physical and mental development, the real education begins when a young man enters business. No employer is going to ask a young man what grade he made in trigonometry or Greek, but he is going to ask "What can you do?" That is the test of the young man in business. We are all gauged by what we are able to accomplish.

What Can You Do?

Hence a constructive aid to making good in business is a proper industrial development or ability to work. The young man who always has the interest of his employer at heart seldom fails. The young man who is willing to come to work early and to stay late has very little trouble with his employer. The man who takes an interest in his work eventually has an interest in his company. The man who continually dreads to do his task is doing an injury not only to his employer but to himself as well. The clock watcher, who sees how much longer he **must** work before he can go home sometimes gets to stay at home. The clock watcher who sees how much longer he can work before he must go home has no difficulty in making good in business.

If you do not do more than you get paid for you will never get paid for more than you do. In making good in business, work is an important factor. Find the thing that you can do and the thing that you love to do, and then do it with all your might. Be loyal to your employer if you are an employee and you will succeed. If you are in business for yourself, be loyal to your customers.

Co-ordination.

The constructive aids above for securing the Six I's and making good in business are the proper spiritual, physical and mental experiences with a fair amount of recreation. There should be a governor for these activities. Many people develop one of these activities at the expense of another.

It is quite easy to detect the individual who has developed one of the faculties and neglected the others. You meet individuals who think of nothing else but physical development and to them physical culture is all important and nothing else is worth while. We have with us the intellectual gymnasts, book worms, impractical and unsociable, who devote their entire time to working out theories. They are a class of people who spend their time in measuring how thick the ice should be before it is cut and by the time they get their measurements correct, the ice is melted. We have men who devote the greater proportion of their time to golf—men who talk of nothing but golf.

By a systematic training course we can develop our spiritual, physical or mental being so that we can perform feats of strength. This fact is universally known. Systematic concentration and properly guided exercises in mental development, make for wonderful results. The attitude of the majority of people toward systematic training is not satisfactory. If we can get the great mass of people to understand that they have abilities and potentialities, we can make rapid strides in our race of making good. Religion consists not of creeds nor churches. Physical health is not made up of muscle or weight. Education is not designed to cram us full of data and tabulated information.

A Well Balanced Life.

These are all examples of improper coordination. In order to qualify in the race of making good we must not only develop our spiritual, physical, mental and industrial selves, but we must co-ordinate these factors so that each one will function properly with the others. When these faculties are properly developed and properly co-ordinated, then we are ready to enter in Marathon, the race of making good in business in a big way. **Only when these faculties are properly developed and properly co-ordinated are we able to live a well-balanced, normal and useful life.** In the last generation, business has recognized these factors and has created departments to promote them.

The recreational departments for the development of the physical being, the church activities for the development of the spiritual and moral integrity, the educaitonal divisions in industry for the development of one's mental well-being substantiate my points. These divisions of industry are proof that the factors above enumerated are essential for any young man who hopes to make good in business. Else they would not become a permanent part of industry.

PROGRAM FOR INSTITUTE IS RECEIVED HERE

The program of the consolidated teachers institute consiting of Archer, Clay, and Wichita counties, to be held at the city high school building September 5th to 9th was received Saturday by Burl Bryant, county superintendent of schools.

Dr. H. W. Nutt, of the department of education of University of Chicago will act as conductor of the five day program which it is expected will be attended by six hundred teachers from the four counties.

Miss Hooper of the city schools, will have charge of the primary department of the institute. The high school department work will be in charge of W. L. Wilson of the Archer City schools. W. F. Lewis, superintendent o fthe County Line district school, will have charge of the intermediate department.

According to Mr. Bryant in addition to the printed program as announced, there will be a representative of the state colleges present and one from the normal schools both of whom will take an active part in the program.

STAMFORD DAM WITHIN MONTH OF COMPLETION.

Special to the Record News

STAMFORD, Texas, Aug. 6.—The Stamford waterworks dam is within 30 days of completion. Shifts of men are working night and day to put the work over and all finishing touches are being made at this time.

The pipe lines from the dam, 16 miles away, have been laid some months ago, also the settling basins, and the next step after thecompletion of the dam is the acquisition of the local water plant, or the construction of a new one.

The dam, when completed, will impound more than two billion gallons of water. It will be one of the largest lakes of its kind in the country.

No one as yet has disputed the claim of Dr. Louis Benedict Reed, of Los Angeles, to be the oldest living American college graduate. He is an alumnus of New York University '43 —seventy-eigh years out. — Boston Globe.

JUVENILE OFFICER TO BE NAMED

With Burl Bryant, county superintendent of schools, Lee Clark, superintendent of the city schools, and E. J. Woodward, superintendent of the Burkburnett schools, all returned from summer schools, it is understood that a county juvenile officer will be appointed Monday by Judge J. J. Jones of the county court.

Two of the school officials had made their recommendation as to the appointment Saturday. Each submitted three names designating first, second and third choice.

From information obtainable Saturday it appears that the selection of juvenile officer will be made by Judge J. P. Jones choosing from the submitted names of Lenley Humphris, member of the city detective force; R. L. Yates, proprietor of the cigar stand at the courthouse, and H. E. Taylor, boy scout executive.

FRISCO CABARET SCENE OF METRO'S "GREATER CLAIM"

An exact reproduction of one of the best known cafes in San Francisco furnishes the setting for a bizarre jardin de danse scene for Metro's picturization of "The Greater Claim," starring magnetic Alice Lake, which shows at the Gem Tuesday.

"It was a wild, wild party!" said Alice Lake in discussing the scene with a group of friends at the studios afterwards. "For this party, though staged with reckless abandon, was different from any that has ever been filmed. In all the others the heroine has succumbed to the wiles of the 'bad man' of the story, but in this picture she remains unscathed.

"This is the first opportunity I have had for a so-called 'wild' party in one of my pictures. In my recently completed picture, 'Body and Soul', there was a gay scene. But I don't think it was quite as darnig as this one."

"The Greater Claim" is an original story by Izola Forrester and Mann Page. The screen version of the story was prepared by A. S. Le Vino.

The supporting cast includes Jack Dougherty, Edward Cecil, Da Witt C. Jennings, Florence Gilbert and Lenore Lylard. Wesley Ruggles directed the production.

COTTON THRIVING IN WEST TEXAS

Special to the Record News

STAMFORD, Texas, Aug. 6.—Notwithstanding the continued hot weather cotton in Central West Texas continues to thrive. There is some spotted sections where the feed crops has been injured by dry weather, but all together the conditions in this section of the state are much better than elsewhere, according to all reports that are received in Stamford.

With the recent advance in the prices of cotton and the steady tone of the cattle market a better feeling is being manifested.

Fall Apparel

—Each daily express brings many new creations from the center of fashiondom.

—We especially call your attention to——

CANNED CORN AND TOMATOES RISE LOCALLY

Potatoes took another jump in the local wholesale market on Saturday, mounting from $3.25 to $3.50 a hundred pounds. This is the second change that has come during a week. The tendency of the potato market is upward at the present time due to a slight falling off of the supply of this year's product.

The only other change in the prices of any line listed in the fresh vegetable market is a drop in onions from $3.50 a hundred pounds to $3.00.

Grocery lines continue steady. The only fluctuations which have been reported to take effect Monday are in the canned good lines. Tomatoes, standard cans, have advanced from $1 to $1.30 a dozen; corn, standard size cans are now $1.35 instead of $1.10 a dozen.

No other changes have been reported to take effect at the opening of the markets Monday.

The following prices were obtained at the opening of the day's business from local jobbers and can be relied upon as official, although subject to fluctuation:

Fresh Vegetables.

Selling prices in Wichita Falls to retailers: lettuce $1.25 a dozen turnips 6 cents a pound; cabbage 6 cents a pound; yams 6 cents a pound; onions 3½c a pound; parsley 75 cents a dozen bunches; tomatoes 8 3-4 cents a pound, new potatoes, $3.25 a hundred pounds; string beans, $3.50 per 30 pounds, roasting ears 50 cents a dozen; cucumbers 10 cents a pound; beets, 3c a lb.; celery, $3.00 a dozen.

Fresh Fruits.

Selling prices to retailers: Bananas 8½ cents a pound; limes $1.00 a basket; lemons, $7.50 a box; grape fruit $6.00 box; oranges, California, $5.50 and $6.00; apples, $3.50 @$4.00 a box; plums, $3.50 a crate; canteloupes, 40c a dozen; watermelons 2 1-4 cents a pound; grapes $3.50 a crate.

Flour and Meal.

Selling prices to local retailers: Flour, extra high patent, $8.50 basis 196 pounds; bakers, $8.00; high patent $8.00, 196 pounds; meal 65 cents a 28-lb. sack.

Canned Vegetables.

Selling prices to local retailers: Asparagus, fancy quality, No. 1 round, white $3.35, green $3.10; stringless beans, No. 2 fancy, $2.50; No. 2 standard $1.65; corn, extra fancy No. 2 standard $1.65; corn, extra fancy No. 2 $2.25; standard No. 2 $1.35; No. 2½ $1.50; okra and tomatoes, fancy No. 1, $1.10.

Tomatoes, standard, $1.30 a dozen.

Sugar and Syrup.

Selling prices to retailers: Sugar, beet, $7.20 a 100 pounds; pure cane, $7.40 a 100 pounds; Louisiana plantation, $9.50 a 100 pounds. Syrup, Louisiana pure, No. 10 cans $6.00 a case; No. 5 cans $6.25 a case; No. 2½ cans $6.50; Georgia pure cane $7.75; corn syrup No. 10 cans $4.80 a case; No. 5 cans $5.00.

Onion Sets and Seed Potatoes.

Onion sets $1.50 a bushel; Seed potatoes 3½ to 4¼ cents a pound.

Canned Fish.

Prices paid by local elevators to oats 65 cents per bushel. Cotton seed meal, $35 per ton.

Wichita Falls Grain.

Cash wheat No. 1 $1.00; No. 2 97c; No. 3, 94c.

Oats 30c a bushel.

CHICAGO PRODUCE.

By Associated Press.

CHICAGO, Aug. 6.—Butter, no session. Eggs, no session. Receipts, 6400 cases. Poultry alive, lower; fowls, 20@27c.

NEW YORK COTTON.

NEW YORK, Aug. 6.—Week-end realising was absorbed on comparatively slight reactions in the cotton market this morning, owing to the continued bullishness of crop and trade advices. After selling off to 13.78 early, December rallied to 13.95 and closed at 13.89, with the general market closing steady, net 8 points higher to 3 points lower.

There appeared to be quite a reactionary feeling around the ring at the opening, opening to rumors that the speculative short interest had been very substantially reduced by the purchase of about 75,000 bales for western or Wall street account on yesterday's advance. The smaller amount of cotton reported on shipboard awaiting clearance was also commented upon in some quarters as an unfavorable feature, and after opening unchanged to 5 points lower, active months soon showed net losses of 5 to 8 points.

The market showed renewed firmness during the middle of the day on bullish crop advices.

Reports of high temperatures in the southwest and rains in the eastern belt served to color the private crop complaints which accompanied the advance from 13.36 to 13.53 for October and from 13.75 to 13.80 for January. There was continued realizing, however, and last prices were a few points off from the best.

SHORTS HAVE ANOTHER DAY ON EXCHANGE

NEW YORK, Aug. 6—Operations on the short side of the stock market were renewed today and the price movement was downward. It was a typical half holiday session of midsummer, with a small attendance on the floor and perfunctory trading.

United drug was again under pressure. Baldwin Locomotive, Famous players, retail stores, coppers and chemicals were other stocks in which the recession was pronounced. The railroads were dull, with losses of a point or more in Union Pacific, Louisville, Texas and Pacific, Lackawanna and Delaware and Hudson. Absorption of bonds was on a good scale, and some of the representative issues made large fractional gains. United States steel fives were higher, as were New York central debenture sixs. Bethlehem steel 5's, Oregon short-line, refunding fours; Interborough rapid transit fives, and Colorado and Southern refunding four to one halves Liberty bonds were irregular with the victory issues continuing to lose ground.

Foreign exchange rates again moved up. Sterling gained one cent. The feature of the bank statement was an increase of $33,101,000 in reserve, making the total $19,780,000 in excess of legal requirements, in place of the deficit reported last week.

MONEY AND EXCHANGE.

By Associated Press.

NEW YORK, Aug. 6.—Prime mercantile paper, 6@6¼. Exchange, firm. Sterling 60-day bills and commercial 60-day bills on banks, $3.56¾; commercial 60-day bills, $3.56¾; demand, $3.60¼; cables, $3.60⅝; Francs demand, 7.74½; cables, 7.75. Belgian francs demand, 7.34½; cables, 7.45. Guilders' demand, 30.64; cables, 30.770. Lire demand, 4.29½; cables, 4.30. Marks demand, 1.22½; cables, 1.23. Greece demand, 5.50; Sweden demand, 20.50; Norway demand, 12.80; Argentine demand, 29.12; Brazilian demand, 12.12; Montreal, 10 11-16 per cent discount.

Government bonds, irregular; railroad bonds, steady.

NEW YORK CLEARING HOUSES.

By Associated Press.

NEW YORK, Aug. 6.—The actual condition of clearing house banks and trust companies for the week above shows that they hold $19,780,290 reserve in excess of legal requirements. This is an increase of $33,101,410 from last week.

The statement follows. Actual condition:

Loans, discounts, etc., $4,459,498,000; increase $45,322,000.

Cash in own vaults, members federal reserve bank, $72,970,000; increase $1,287,000.

Reserve in federal reserve bank of member banks $473,057,000; increase $22,297,000.

Reserve in own vaults: State banks and trust companies $8,312,000; increase $5,000.

Reserve in depositories, state banks and trust companies, $8,651,000; decrease $735,000.

*Net demand deposits $3,551,116,000; decrease $86,966,000.

Time deposits $207,738,000; decrease $3,788,000.

Circulation $31,450,000; decrease $469,000.

*U. S. deposits deducted $157,879,000.

Aggregate reserve $480,600,000.

Excess reserve $19,780,290; increase $33,101,410.

LIBERTY BONDS.

By Associated Press.

NEW YORK, Aug. 6.—Liberty bonds closed: 3½s, 88.40; first 4s, 87.72 bid; second 4s, 87.52; first 4¼s, 87.92; second 4¼s, 87.70; third 4¼s, 91.94; fourth 4¼s, 87.80; victory 3¾s, 98.64; victory 4¾s, 98.64.

Mrs. R. T. Berens, who has passed her seventy-eighth birthday, has recently wonth the archery championship of England. Her mark of ninety-eight bullseyes out of a possible 100 has never been equaled.

RECEIPTS AT FORT WORTH VERY SMALL

By Associated Press.

FORT WORTH, Texas, Aug. 6.—Only 300 head of cattle appeared as fresh receipts today and of that number 155 were on through billing. However, several cars of holdovers were displayed and the run was more than ample to meet requirements. Out of the 2400 head of cattle here yesterday, local packers purchased but 700 head, the remainder of the supply selling to speculators for shipment, or being forwarded direct to other markets. The few sales negotiated today were about steady.

A run of 400 head of hogs was disposed of on a steady basis. One car sold at $10.75 and another car went at $10.65. Bulk sales ranged from $10.50 to $10.65.

Nothing was offered and nothing was wanted in the sheep house.

Cattle: Beeves, $2.50@6.50; stockers, $2.00@4.75; cows, $3.00@4.50; canners, $1.90@1.75; heifers, $3.00@5.50; bulls, $2.00@3.75; calves, $1.00@5.75; yearlings, $3.00@5.00.

Hogs: Lights, $10.60@10.70; medium, $10.40@10.60; mixed, $10.00@10.40; common, $9.00@9.75; heavy, $9.75@10.50; rough heavy, $8.00@9.75; pigs, $6.00@9.00.

Sheep: Lambs, $5.00@7.00; yearlings, $4.50@4.75; wethers, $4.00@4.50; ewes, $3.00@3.25; culls, $1.00@2.00; goats, $2.00@2.25; stocker wethers, $2.00@2.25.

KANSAS CITY LIVESTOCK.

Special to the Record News.

KANSAS CITY, Aug. 6.—Cattle, 600; for week: Better beef steers, strong to 50c higher; others mostly weak, to 25c lower; she stock, 25@75c lower; canners, weak to 25c lower; calves, 25c@$1.50 lower; bulk down, 50c@$1.00; stockers and feeders, mostly steady to 25c higher; stock cows and cavles, steady to 25c lower.

Hogs, 250. Generally steady; top, $10.25; bulk, $9.90@10.25.

Sheep, 600. For week: Sheep, steady to 25c higher; lambs, fully 75c higher.

RUST AND HAIL STEADY WHEAT PRICE IN PIT

CHICAGO, Aug. 6.—Candian rust and hail reports coupled with evening up operations for over Sunday, steadied the wheat market today but there were no such influences at work on behalf of either corn or oats. Wheat recorded net gains of 1 1-4 to 1 1-2c, corn finished net unchanged to 1-4c lower, and oats from 1-8 to 1-4c lower to 1-8 to 1-4c higher. In provisions lard and ribs were strong but there was no trade in pork.

Wheat trade was light but the undertone was steadier throughout the short session. Candian news came in early and was the predominating influence throughout. Winnipeg advices said there had been considerable damage to wheat in western Canad by heavy rains and hail. Corn sold at a new low figure on the crop for September and the market was generally weak. Crop exports continued to predict big yields. September oats also made a new low for the crop.

Higher hogs and buying by packers caused the rally in provisions after an easy opening.

KANSAS CITY CASH WHEAT.

KANSAS CITY, Aug. 6.—Cash wheat No. 2 hard, $1.08@1.18; No. 2 red, $1.13@1.14.

Corn No. 2 white, 47@47½c; No. 2 yellow 50c; No. 3 yellow, 49c.

Oats No. 2 white, 33½c; No. 2 mixed, 32½@33c.

WEEKLY GRAIN REVIEW.

CHICAGO, Aug. 6.—Material setbacks in the price of wheat have taken place this week largely as a result of big receipts.

Wheat for the week showed declines ranging from 4¼ to 5⅝c, corn was down 3¼ to 3⅝c to 3½c, oats off 1⅞ to 2½c, and provisions lower by 10c to 87c.

Although the rush of wheat to primary centers slackened as compared with last week, the volume remained nearly double that of a year ago.

Credit conditions were said to form the chief stumbling block preventing larger sales to Europe.

Rains and cooler weather had a bearish effect on corn. Large stocks in sight depressed oats.

Weak grain and hogs pulled down provisions.

SPANISH COMMANDER ABANDONS POSITION

By Associated Press.

LONDON, Aug. 6.—General Navarro, commander of the Spanish troops in the Melilla area, who was reported by Spanish airmen Wednesday apparently to have abandoned the position at Mount Arruit, south of Melilla, to which he had retreated under the recent fierce attack by the Moorish rebels, is still holding out against the Moors at Mount Arruit, it is declared in an official dispatch timed at 5:30 p. m., Friday.

WHEAT DROPS TO $1 IN LOCAL GRAIN MART

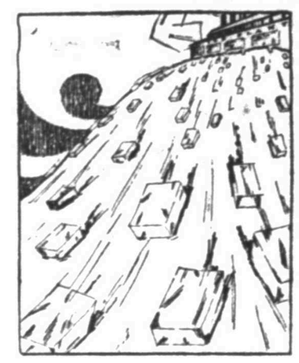

A drop of 5 cents a bushel in the price of cash wheat at the local elevators was posted Friday to take effect Saturday Morning. This makes the price paid by elevators for No. 1 grade $1 a bushel. The drop in the local market was caused by continued small drops in the northern and eastern markets.

Other grades are: No. 2, 97 cents, and No. 3, 94 cents.

Mrs. O. C. Somers of 2910 Tenth street, has returned from a visit to Washington, New York City and Mammoth Cave.

NOTICE OF TRUSTEE'S SALE
Under authority of an order of the United States district court for the northern district of Texas, in bankruptcy, I will offer for sale at public outcry the following property, a part of the assets of the estate of M. O. McDowell, bankrupt, on August 16th, 1921, at the courthouse door, Hereford, Texas, for cash, to the highest bidder, subject to an encumbrance of about $32,000.00, being vendor's lien notes, taxes and other encumbrance:
Sections Nos. 285, 276, 316, 318, and the east half of Sec. 295, Block M-9, located in Castro and Deaf Smith Counties, Texas, and containing approximately 3,633.6 acres of land, with improvements, houses, wells, etc.
Right reserved to reject any and all bids and sales subject to the approval of the court.
THELBERT MARTIN, Trustee.
519 City National Bank Bldg.
Wichita Falls, Texas

CITATION BY PUBLICATION
THE STATE OF TEXAS:
To the sheriff or any constable of Wichita County, greeting:
You are hereby commanded to summon B. C. Armstrong and Rhoda Armstrong by making publication of this citation once each week for four successive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the 78th district court of Wichita County, to be holden at the courthouse thereof in Wichita Falls on the first Monday in September, A. D. 1921, the same being the 6th day of September, A. D. 1921. Then and there to answer a petition filed in said court on the 25th day of July, A. D. 1921, in a suit, numbered on the docket of said court No. 11225-B wherein B. O. Sanford and R. C. Dublin are plaintiffs and B. C. Armstrong and Rhoda Armstrong are defendants, and said petition alleging,
That on the 15th day of January, 1921, defendants executed and delivered to plaintiffs a promissory note in the sum of four thousand, two hundred, fifty dollars ($4,250.00) due six months after its date, bearing interest at the rate of eight (8) per cent per annum and providing for the customary ten (10) per cent attorney's fee. Said note being given in part payment for one Johnson oil well rotary drilling rig and accessories thereto, now located on lease owned by C. Churchill Trust, on the south eighty acres of the east one hundred sixty acres of the south half of section No. five, H. T. & B. survey, Wichita County, Texas. Said note being secured by chattel mortgage on said personal property, but no part of said indebtedness has been paid.
Plaintiffs pray for judgment for said sum of four thousand, two hundred, fifty dollars ($4,250.00) together with interest as aforesaid; and ten (10) per cent attorney's fees, foreclosure of said chattel mortgage, costs of suit and relief general and equitable.
Herein fail not, but have before said court, at its aforesaid next regular term, this writ with your return thereon showing how you have executed the same.
Given under my hand and the seal of said court, at office in Wichita Falls, Texas, this the 1st day of July, A. D. 1921.
A. F. KERR, Clerk,
District Court, Wichita County, Texas.
By EUNICE JACKSON, Deputy.

A. F. KERR,
Clerk, District Court,
Wichita County, Texas.

THE STATE OF TEXAS.
TO THE SHERIFF OR ANY CONSTABLE OF WICHITA COUNTY, GREETING:
You are hereby commanded to summon Rilie Hardin by making publication of this citation once each week for four successive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the Seventy-eighth District court of Wichita County, to be holden in the court house thereof in Wichita Falls on the first Monday in September, A. D. 1921, the same being the 5th day of September, A. D. 1921, in a suit numbered on the docket of said court No. 11055-B wherein Lizzie Hardin is plaintiff and Rilie Hardin is defendant and said petition, alleging, that plaintiff and defendant were lawfully married in August, 1908, though more than five years ago the defendant abandoned plaintiff, without any fault on her part, and refused to live with her continuously during said time and has not during said time, contributed anything to her support.
WHEREFORE, premises considered, plaintiff sues, prays for citation by publication, and upon final hearing for an absolute divorce, for costs of suit, and general and special relief both in law and in equity.
Herein fail not, but have before said court, at its aforesaid next regular term, this writ with your return thereon showing how you have executed the same.
Given under my hand and the seal of said court, at office in Wichita Falls, Texas, this the 1st day of July, A. D. 1921.
A. F. KERR, Clerk,
District Court, Wichita County, Texas.

Say, Young Feller!!

Let's talk a moment about two most interesting subjects in the world—YOURSELF and MONEY. On a bet could you save $5.00 a week from your earnings? Good! We thought you could. Most every young fellow with a good job that will watch his UNNECESSARY expenses can do it. If you will do only this during your earning period, or until you are about 65 years old, your savings bringing 10 per cent interest, will amount in CASH to——

$201,033.00

You will start a new account and stop paying on the old one each ten years in this manner:

20 years old	$ 0	30 years old	$ 0
30 years old	4,000	40 years old	4,000
37 years old	8,000	47 years old	8,000
44 years old	16,000	54 years old	16,000
51 years old	32,000	61 years old	32,000
58 years old	64,000	65 years old	47,360
65 years old	128,000		
40 years old	$ 0	50 years old	$ 0
50 years old	4,000	60 years old	4,000
57 years old	8,000	65 years old	6,520
64 years old	16,000		
65 years old	17,600		
60 years old	$ 0	Totals	$128,000
65 years old	1,553		47,360
			17,600
			6,520
			1,553
		Total	$201,033

There it is, boy. It is up to you to save your own money. No one else is going to do it for you, but you have only saved $10,800 and the rest is interest earnings. This association is earning 10 per cent for its depositors on real estate first mortgage security. Sign the coupon below if you want to assure your future.

The Cyclorain

Dr. I. N. Terrill, Geologist and Meteorologist of this city has invented a machine which by running to make a low barometer storm will cause rain at will of man, and by reversing the wind movement to make a high barometer storm, called an anti-cyclone, will moderate excessively hot weather, stop excessive rainfall and protect people and property from the destructive force of cyclones and tornadoes. A company—The Cyclorain Trust—is organized with home office in Wichita Falls, Texas, a model machine run by four electric motors has been tried out, literature is printed and ready to be mailed thinking and interested people. Dr. Terrill made his first model several years ago and began to talk about harnessing cyclones but was so badly abused by the unthinking rabble that he abandoned the effort. While driving over Texas three years ago his heart was made to beat in sympathy for the drouth stricken, suffering farmers of Texas, and he again turned his thought to producing rain.

The machine promises to be such a blessing to mankind that every Texan, yes, every son of the semi-arid west and every citizen of the storm-plagued gulf coast country should invest in shares and push the building of the machines. Write for facts.

The Cyclorain Trust
716 Seventh Street
Wichita Falls, Texas.

CALL VENIRE FOR MURDER TRIAL MONDAY

A special venire of 100 men will report Monday morning in the Thirtieth District court for the case of Vernon Darby charged with the murder of John Whitman. The venire from which a jury will be selected for the case was drawn two weeks ago.

Darby is charged with having shot and killed Whitman, former proprietor of a local tailor shop, in April. Whitmen was shot from an automobile late at night on Seymour street, as he was returning from a show in the uptown district, accompanied by a girl friend.

The accused man was arrested in Oklahoma after a several week futile investigation of the murder. Darby made a statement to county officials in which he is alleged to have said that he fired the fatal shot. The accused man and Whitman were rivals for the hand of the girl who accompanied Whitman on the night of the tragedy. Darby has since repudiated his alleged confession it is understood.

ENGROSS BILL ON EDUCATION, CUTTING PAY

By Associated Press.

AUSTIN, Aug. 6.—After consideration for more than a week the house engrossed and passed finally today the educational appropriation bill. The constitutional rule requiring bills to be read on three separate days was suspended.

The bill as finally passed totalled approximately $100,000 more for the two years than the original bill submitted by the appropriations committees. This increase was caused by the amendment by Beasley of Hopkins added to the Texas University budget and the reinstating of the experiment stations and provision for the summer school in the A. and M. budget. The Beasley amendment provided that the available funds of the university and A. and M. shall be used for building, equipment and repair purposes only. The adoption of this amendment necessitated the provision for the summer schools and the branches of the two institutions that had heretofore been conducted by the available funds. Thus when provision was made for these branches and added to the bill it exceeded by $100,000 the amount of the original bill.

The bill will now go back to the senate for their action on the house amendments and if the upper branch refuses to concur, a free conference committee will be appointed to work out a compromise. It is expected that the greater part of next week will be taken up with working out this compromise and the adoption of the free conference reports.

SCHOOL BOARD TO DISCUSS BUILDING

Discussion of plans for the proposed new high school building will be taken up at a meeting of the school board to be held early this week, it was announced Saturday by W. W. Brown, business manager of public schools.

Local architects will be called into the discussion and efforts will be made to make use of new building system learned by members of the board, who recently made a trip to Dallas, Fort Worth, Tulsa, Okla., and Oklahoma City.

Preliminary steps looking toward the floating of bonds for taking care of the structure will be taken in the near future, according to announcements.

WAR LEAVES TWO MAJOR PROBLEMS, RAILROADS AND BETTER PRODUCE MARKET

By MARVIN JONES, M. C.

WASHINGTON, Aug. 4.—The aftermath of the war has left unsolved two outstanding economic problems, to wit: The transportation question and the securing of increased credits and better markets for the producer. Of course, there are many other problems of much importance, but none which compare with these two.

The present railway laws have many defects. In the first place the Washington control of the distribution of cars is a great mistake. The man has not lived since the organization of this republic who can sit at a desk in Washington and distribute cars over this broad, big country wihtout getting them into a jam.

When the present railway measure was considered in the house I offered an amendment eliminating the car service section, the amendment being defeated by a small majority. As a matter of fact this provision should have never been included. The car distribution problem should be left to the roads themselves so that the roads might be held responsible and being responsible would, in the nature of things, become more efficient. When complaint is made now they simply pass the "buck" to the car service section of the commission. Practically the entire measure is so drafted as to relieve, in large measure, the individual responsibility of the roads and thus to decrease rather than increase efficiency, and the measure is so drafted as to encourage rather than discourage an increase in rates.

Rates Too High Now

The rates are now so high that they decrease the traffic and thus injure both the public and the railroads themselves. If a merchant were to sell goods at too low a price he would go broke and go out of business. If he raised the price of the goods too high he would destroy his trade and be compelled to close up show, and the more he raised the price above a reasonable figure the less his trade and the less his profit would be. The same is true with railways, the rates may be so high as to bankrupt the railroads.

Prior to the war we had the finest railway laws there were ever devised in any country. The laws actually permitted private management and free development. But the provisions of the present law hamstring the entire situation and require both the railroads and the people to seek a board in Washington every time they have anything to do in connection with railway transportation. Where do the people come in under such a system.

Closely linked with the transportation problem is the question of better credits and market facilities for the farmers and stock raisers. Under existing conditions their prices are too low. Rates are too high and costs of distribution are too much.

All Depends on Producers

There has been too great a tendency heretofore to compliment and throw bouquets at the farmers, but upon getting down to practical matters, refusing to do anything to see that their rights are protected. The success of all business and the prosperity of all the people necessarily thread back to the producer. Just now his products are stagnating on his hands, while a hungry world is crying for these same articles of food. Some of the cooperative organizations are doing fine work, but in order for the situation to really be solved there must be credits and markets. There are plenty of markets in the world if credits were extended to get the products to the market and arrangements were made whereby those persons desiring the products and who are willing to mortgage everything they have in order to secure them could purchase them.

Heretofore those who have controlled the financial credits and the finances of this country have thought their full duty discharged when they took care of the commercial interests of the land. As a matter of fact they have tackled the problem from the wrong angle. If the primary efforts were made first for solving the problems of the producer the relief for the situation confronting other industries would follow in a natural train.

Defective Pumps Cause of Many Serious Engine Troubles

Occasionally the pump fails to deliver water and the cooling system immediately overheats. The inexperienced man is unable to tell whether it is the fault of the pump or not, and he is apt to ruin his engine trying to get the car home or else he pays for a tow when he could just as well have taken the car home under its own power without damaging the engine in the least.

The first intimation one receives that the pump is disabled is the steam spouting out around the filling cap of the radiator. The next symptom is knocking, due to preignition, and if the driver takes off the switch to stop the engine it continues running as the red hot metal in the combustion chamber is firing the charge. If a hill it attempted a loss of power will be noticed, and if the engine is crowded too long the pistons will seize and the engine will stop. Now there are many causes of overheating, such as clogged cooling system, slipping or broken fan belt, running too long on low gear, retarded spark, etc., but the only one we are concerned with now is a broken pump. This may occur in the drive shaft, the coupling, the pin holding the rotor to the shaft, or even a broken rotor. If the water is not circulating the bottom of the radiator will be cold and the top will be hotter than usual. This is because the pump is not pulling the hot water down faster than it can cool.

Bearing in mind the fact that every cooling system is designated primarily as a thermo-siphon system, the obvious thing to do it to establish a thermo-siphon circulation, if possible. This means that the water will circulate if the system is kept filled clear to the top. Let us see why.

The water circulates in the thermo-siphon system without a pump to drive it because the cold water in the radiator is heavier than the hot water in the water jackets. The water from the radiator enters the water jackets at the bottom and pushes the hot water out of the top. It flows along the top pipe to the radiator in case there is sufficient water to fill this pipe. But in case of leakage or other loss there is not enough difference in the weight of the water in the radiator and that in the water acket to force it up and over. So our first care in the case of a disabled pump is to make sure the radiator is completely filled. This is taken care of in the thermo-siphon system by having an extra tank and placing the return pipe far enough from the top so that over a gallon of water may evaporate or leak out without stopping the circulation. This amount of loss would not affect a pump system as long as the pump continued to function. But in the case of a disabled pump the circulation stops, absolutely unless the radiator is filled up to the top.

Having settled this important matter of the water in the radiator, we must bear in mind all the causes of overheating and avoid them as much as possible. We stop the engine going downhill so as to let it cool; we keep the spark lever well advanced, except when going uphill; we do not race the engine, and we throttle down to as slow a pace as we can (still keeping in the high gear, of course) so as to make as few explosions a minute as possible. We nurse the car along, watching the radiator cap for signs of steam. If the engine persists in heating up in spite of our precautions there is nothing to do but stop and let the water cool or change it if opportunity offers.

SMALL WILL GO TO CAPITAL NEXT TUESDAY

By Associated Press.

CHICAGO, Aug. 6.—Governor Small announced here today that he would return to Springfield Tuesday, postponing his good roads tour until Friday of next week in order to be in the capital. It will be his first appearance there since the court overruled his contention that he was not subject to arrest on warrants charging him with embezzlement of state funds.

The governor issued the following statement:

"So that my traducers shall not be permitted, through their newspaper mouthpieces, to misrepresent my official course in performing my duties as governor, I shall not resume my good roads tour until Friday of next week.

"I expect to finish my official business here today and shall be in Springfield Tuesday morning.

"LEN SMALL,
"Governor."

DENVER PASTOR IS RECOMMENDED FOR CONSUL POST

DENVER, July 31.—If the ambitions of Dr. E. L. Krumreig, pastor of Bethel Baptist church, Denver, are realized he soon will forsake the ministry to accept a position as consular agent for the government, "somewhere abroad."

Dr. Krumreig has recently returned from consular examinations at Washington, D. C., and as he has strong endorsements of Colorado's two senators and of Governor Shoup it seems likely that a call soon will be extended the minister. There are eight grades in the consular service, and Dr. Krumreig took examination for all of them.

Dr. Krumreig has had a wide and varied experience. As a boy he went to sea and then entered the nautical college at New Orleans, where he was graduated and at the age of nineteen years found himself master of the bark Alice, whose home port was Scranton, Miss. He has traversed the seven seas both in steamers and wind-jammers and knows the ways and customs of foreign countries as a consul should know them.

The ambition is nor a new one for Dr. Krumreig. For some time he has hoped to represent his government abroad, but, being a republican awaited a return of that party to power.

FUNERAL OF W. P. CONNER ON TUESDAY

Special to the Record News.

DALLAS, Aug. 6.—Funeral services of W. P. Conner, Texas pioneer and former mayor of Dallas, who died Thursday night at Long Beach, Calif., will be held Tuesday morning at 9 o'clock from St. Matthew's cathedral.

The body will arrive here Monday.

"HIJACKERS" HOLD UP MAN; GETS $8

Police Saturday night were scouring the city seeking a lone highwayman, who was reported to have held up Ed Grant, employee of the American Express company, and robbed him of about $8 in currency and a valuable gold watch. The [illegible] occurred on Galveston street, near Mill

World's Woman Tennis Star Explains How to Play Graceful, Winning Game

Mlle. Suzanne Lenglen.

PARIS, Aug. 6—Mlle Suzane Lenglen, world's champion women's singles tennis player, speaks English almost as well as she plays tennis.

She is a typical Frenchwoman, stall, graceful, with a wonderful carriage and a pleasant personality. She radiates vitality. When asked to tell the women tennis players of America how she manages to keep so wonderfully fit she volunteered readily.

"To play tennis well," said Mlle. Lenglen, "one must be in perfect physical condition. It also follows that if you are not in perfect condition you cannot play.

"Skipping and running are good exercises, but they should not be kept on for too long a period. Leave off just before you are getting short of breath.

"But above all things one must become supple. I attribute what agility I possess to doing Lieutenant Muller's exercises. Never a day passes but what I take those exercises—sometimes in the morning, and sometimes in the evening, and sometimes both.

"There is no necessity to strain oneself; five to ten minutes will suffice to keep anyone supple and in good condition.

"If a girl came to me and asked me how to start tennis I should tell her to take Muller's exercises every day and never forget them. Then do some skipping and high kicking.

Value of the Toes.

"When on the courts keep on the toes all the time. It is surprising how many people keep to the flat of their feet or on their heels when playing tenpis.

"It is a fatal mistake for one can never start quickly other than from the toes. Those people who will not heed this advice will discover that they are always just too late for the ball.

"After the pupil has mastered these highly important matters and has become much more supple than she was before she started she should learn to hold her racquet properly.

"There is only one way to do this. Grip the end of the handle firmly in the playing hand and keep the grip on when playing a stroke.

"Always cultivate the 'follow through' in a stroke much in the same way as in driving at golf or at billiards. Don't work from the elbow, but use the whole of the arm when making a stroke. Then the back-hand and volleys will be learned more easily.

"And here is another point which let the ball out of your sight. Watch it every fraction of a second and keep on your toes ready to speed after it.

"If the student will keep these hints in mind she will have something material to go on. The rest is a matter of practice and the development of the instinct of knowing where the ball is going to pitch.

"But above all things she should not forget her Muller exercises, for they are all-important."

(Note—The Muller exercises are gymnastic exercises similar to those taught in America for physical development.)

Fate of Man Accused of Child Murder Rests on Thickness of Spider's Web

BEAVER, Pa., Aug. 6—Did Fred I. Reno slay his five-year-old stepson, Lawrence Kerr, and then hide his body in an old abandoned cistern not far from his home in West Madison street, Rochester, Pa.?

This is a question the Beaver County September grand jury will endeavor to solve. Solution of the mystery through the intricate processes of an investigation that will even take into account the lasting qualities and transparency of a spider's web promises to develop into one of the most interesting and sensational cases that Beaver county has had for years.

Kerr, now in jail and refused a writ of habeas corpus by Judge Frank E. Reader, declares he is not guilty. His wife, the mother of the boy, believes him and declares for a fair and impartial trial.

Boy Disappears From Home.

Chubby-faced Lawrence trotted away to the home of a neighbor, Mrs. Baird, on the afternoon of June 23, this year, to do an errand for his mother. Mrs. Baird said he left her home. He failed to reach home, and a search was started late in the afternoon.

For days it was feared the lad had been kidnapped. One story went that gypsies going through the town the afternoon of the boy's disappearance had picked him up. Then on July 5, fifteen days after his disappearance, his body was found in an old abandoned cistern at the rear of what is known as the Baldwin property, in West Madison street. Kerr, the stepfather, made the gruesome discovery. With him and near at the time was his brother-in-law, Harrison S. Wilson, of East Liverpool, Ohio.

From the moment it appeared that the boy could not have fallen through the slight opening in the covering of the well. Murder was hinted. But police were at sea, never suspecting the stepfather. Coroner J. M. Jackson investigated. At an inquest searching investigation failed to disclose anything of consequence, and the verdict of the jury was merely "accidental death."

Friends Dissatisfied.

Friends of the little lad, among them Daniel Sweeney, an East Liverpool newspaperman, were not satisfied. Sweeney had called the boy his pal and had taken a great fancy to him, so he aided friends in securing the services of Detective J. J. Finerty, of East Liverpool and Youngstown, to probe the mystery.

Detective Finerty came to Rochester on July 6 and made observations. Not until July 8 did he pick up the clue of the stepfather. He "sized-up" Kerr for several days, according to his own story, and observed a certain form of nervousness. "On July 11 I dressed up as a tramp and went to the Conway yards, where Kerr was employed as a brakeman," declared Finerty when he was put on the stand before Justice of the Peace Addison Courtney, in West Bridgewater, at the preliminary hearing. "I picked up an acquaintance with him, won his confidence, told Kerr I had killed a nigger in West Virginia, that I wanted to go west, and so forth."

It came out, according to the detective, that Kerr was frightened. Finerty said on the stand that Kerr confessed to becoming angered when the boy was not at home, of catching him in the dusk of the evening in the hallway of the Kerr home and of choking him. Then, according to the detective, the body was thrust into the well, a stone covering being lifted up that this might be accomplished.

Kerr Held by Justice.

Kerr was held by Justice Courtney to answer to the charge of murder. A habeas corpus petition was filed by Attorney H. Wilson, representing Kerr, who contended that the commonwealth had failed to show that the boy had been murdered. Assistant District Attorney Blaine McGoun contended that the testimony was of such nature as to demand that the case be submitted to the grand jury.

Damaging testimony was given by Kerr's brother-in-law, Harrison S. Wilson, Detective Finerny and Chief of Police J. J. Shephard of Rochester.

Finerty simply repeated the story he had told when Kerr was held by Justice Courtney. Wilson told of the search for the missing lad. He said the well had been found bearded up when he and kerr looked. He walked away, but presently glanced back and saw Kerr coming out of the court yard in which the old cistern was located. He said Kerr was pale, and when he approached Kerr said: "My God, I have found him!" The stone covering had to be lifted, Wilson said, before he could see the body in the water.

Chief Shepard testified as to the exact size of the opening in the cistern cover and of helping remove the body. His next statement proved startling. It was in effect that, with the exception of a hole five inches in diameter, the entire opening in the cistern cover was closed with a heavy coating of cobwebs and dust to the thickness of cheese-cloth. This evidence was sufficient to cause the remanding of Kerr to the custody of Sheriff Charles R. Anderson, but may be a point for argument when the trial comes. How long it takes a spider to perfect construction of a web of the size and texture of that found may enter into the conclusions of the court and jury.

Kerr Appears Innocent.

Kerr maintains the demeanor of an innocent man. Either he is entirely innocent or he is the best actor the jail authorities have had in the county jail for years, they say.

Sentiment is divided. Some thoroughly believe the story of his alleged confession to Detective J. J. Finerty and would convict him on the strength of that. Others believe there is some mystery yet remaining to be cleared that will absolve the man from a charge of extreme brutality and worse.

OFFICERS FIND BURIED LIQUOR

About 12 quarts of corn whiskey buried about two feet under the ground was found south of Holliday creek late Saturday night by Patrolmen Hawkins and Johnson and County Attorney Fulton.

The liquor, according to the officers, was buried near a farm house. Four men and one woman were arrested and placed in the city jail for investigation in connection with the cached liquor.

FIRST YEARS EASIEST IN MARITAL LIFE

LONDON, Aug. 6.—In more than 40 per cent of the divorce suits heard during 1919 there were no children of the marriage.

Husbands are more faithful than wives, and the first five years of married life are the easiest, are the striking facts that are gleaned from a collection of official statistics issued as a White-paper by the home office today.

It deals with the business of all civil courts in 1919 in general, and the divorce court in particular.

The statistics, in themselves, are a revelation of social progress and decline. They show that the courts dealt during this year with less than half the pre-war average. The figures for the county courts, in fact, were only about one-third of the normal number.

The number of divorce suits, however, rose from 2,689 in 1918 to 5,763 in 1919, an increase in one year of 114 per cent. The total for 1919 was three and a half times higher than that of 1913.

The most sensational comparison made in the report is that in which the divorce petitions are classified, as follows:

Petitions by husbands, 4,132; petitions by wives, 1,630.

The parties in more than 40 per cent of the suits had been married for more than 10 years, and in 21 per cent of the suits the parties were under 21 years old at the time of the marriage.

An interesting fact is that no fewer than 2,341 cases were heard under the Poor Persons Rules of 1914.

Imprisonment for debt, owing to the abnormal circumstances of the last few years, almost has ceased.

OFFER RAIN-MAKER THOUSAND DOLLARS FOR INCH OF RAIN

PADUCAH, Ky., Aug. 6.—Paducah business men and bankers today launched an effort to bring C. M. Hatfield, California rain maker, to McCracken County to produce rain.

A thousand dollars an inch will be offered to Hatfield by McCracken County if he can open the clouds within a specified time. Business men estimate that a three-inch rain upon the parched fields of this county would be worth a quarter of a million dollars. They consider $3,000 for a three-inch rainfall to be a good investment.

The Californian earned $8,000 for four inches of rain in the Medicine Hat region.

POLICE AFTER 7 YEARS HUNT FIND MAN IN CITY HALL

PHILADELPHIA, Aug. 6.—William Smith of North Street, near 23d, while sought by police for seven years on a bench warrant charging him with non-support of his wife, has been working as a porter on the second floor of city hall, near the executive offices of the police department.

Smith's arrest came when he was said to have attempted to repeat the treatment on his second wife, who caused a second warrant charging non-support to be issued against him, which resulted in his being held on an additional charge of bigamy.

At a hearing before Magistrate McCleary in the central police court today Smith was held in $600 bail on charges brought by Clementine Smith, whom he married in Washington a year ago.

DREAM CAUSES MOTHER TO KEEP EYE ON BROOD

BALTIMORE, Aug. 6.—Mrs. Minnie Price told police today that, awakened at 2 o'clock this morning, following a dream that harm was about to come to her three children, she went to the rear room on the second floor, where two or her daughters were sleeping, and found a man under the bed.

Before she could seize the intruder, she said, he leaped from the window, landing on a wooden projection over the kitchen door, and jumped to the yard, disappearing finally over the

WHAT HAPPINESS MUST BE THEIRS

WASHINGTON, Aug. 6.—Iceland has become almost literally a "no man's land" half of the year.

One-third of her sturdy male population is away from their homes at far-away fishing grounds between March and October.

This care-free custom of the Iceland males, entirely forsaking their happy spouses for a seven months' period, leaving them to whatever the fates may hold, was the subject of a recent official dispatch from Copenhagen, by American Consul Wurmuth.

Iceland's female population, generally happy and contended, endure their lonely lot with fortitude.

KISSES RUIN DREAM OF LOVE

RICHMOND, Ind., Aug. 6.—Lack of kisses often has been assigned as a reason for a legal separation of marital ties, but it remained for Samuel W. Ketron to allege that the abundance of kisses caused his wife, Minnie P. Ketron, to desert him.

"One day I grabbed her, and it sure did make her mad," he testified in circuit court when his complaint was heard today.

"When I returned that night she was gone. She did not want me to make love to her."

EXERCISE, NOT BEAUTY LOTIONS, MADE THESE GIRLS FAMOUS

A few of the 140 girls selected for their beauty.

WASHINGTON, Aug. 6.—That physical education produces beauty as well as brawn is illustrated in a recent statement to the effect that out of 140 applicants for positions in a well known motion picture organization which emphasizes physical development, it is said that 131 had practiced daily setting-up exercises for at least a year, and that more than half the number had consistently kept up some kind of outdoor sport.

Students of the trend of race development say they note hopeful signs of a marked tendency toward physical development which in the end they believe will produce not only a stronger but a more beautiful race. There are more young women swimmers today than ever before and statistics show there are more young women in athletics than was ever known.

Teachers of dancing—not jazz—explain that the freedom of the body necessary to produce rhythmic motion is serving as an incentive to better physical development of girls. Figures show the younger generation coming on, inspite of sodas, fudge, jazz dancing and late hours, is improving in physical development.

A bill now pending in congress proposes that the federal government assist the states in establishing physical education in all the schools of the United States. It is the contention of those supporting the bill that it is high time the United States should begin to train its children physically, not only for stronger young men, but for better mothers.

The physical education bill has brought to its support such men and women as General Pershing, Walter Camp, Dr. Charles W. Eliot, Mrs. Philip N. Moore, Dr. J. E. Raycroft, James E. West, Mrs. Frederick C. Schoff, Mrs. Ellis Ashby Yost, Mrs. Jane Deeter Rippin, ex-Governor Grumbaugh of Pennsylvania, Senator Arthur Capper, Congressman Simeon D. Fess, and others prominent in organization and educational circles.

GERMAN BACHELORS FIND REFUGE IN MARRYING WIDOWS

BERLIN, Aug. 6.—Young widows with completely furnished homes or apartments, ready to place a second chair at the breakfast and dinner table, are the most desired life partners now sought in marriage in Germany. As a result of the war, there are tens of thousands of widows in Germany, and their advantage over young girls in the race for husband and matrimony is pushing the girls hard against the wall.

This information is the result of a general inquiry made by one of the Berlin newspapers. Formerly, prosperous conditions increased the demand for marriage licenses, and when times were bad there usually was a great drop in the demand for wives.

Today that condition has been reversed. Times are bad in Germany and as they grow worse the demand for a wife, when possible, with her own house, is growing. Thousands of officers in army and navy, who formerly were the matrimonial prizes sought for, but whom the girls from the average middle class could seldom capture, now are being snapped up by girls from those very classes.

Not so much beauty and social accomplishments are now the attractions, as domestic virtues and economic talents.

Matrimonial agencies in Germany are doing a good business in bringing homeless men and women, especially young widows with homes, together.

"Formerly one married a business or a big estate, but today, with the tremendous scarcity of houses, dwellings and homes, men not only are satisfied, but happy, to marry an apartment or a home," explained the Director of a matrimonial agency.

Inquiry also develops that the proverbial saying, "One can five cheaper than two," no longer holds good in Germany.

The bachelors, it is declared, find a wife cheaper than to live alone, and hire their washing and mending done, and eat at hotels and restaurants or boarding houses.

"Matrimony is today in Germany an economic refuge for many a man" it is declared.

HIS FIFTH WIFE PROVES UNDOING OF GAY DON JUAN

INDIANAPOLIS, Ind., Aug. 6.—Forest Warner, with four names and five wives, arrested Saturday on the complaint of the fifth wife, was seated at city prison today on a charge of bigamy, after he had made a statement to detectives confessing, it is alleged, his numerous marriages.

Warner who is 52 years old, is said to have told detectives his first marriage was 32 years ago. He married Mattie R. Wills at Greenville, Ohio, May 15, 1889, he said, and they became the parents of six children.

Warner drifted along with one wife until September, 1908, he said, when he met Laura Begley aged 33, in Canton, Ohio. They went to Toledo, he said, where Warner married her under the name of Elmer Hines.

After they had lived together for a short time Warner, the prisoner asserted, deserted her, and his next venture in matrimony was at Zanesville, Ohio, where he married Pearl Lowry, February, 1919, under the name of Edward Wills.

Next he met Beulah Head, aged 22, at Little Rock, Ark. They were said to have gone to Monroe, La., early in March, where they were married. Warner giving his name as Edward Wills.

Rustic Sleuth Goes Bertillon Just One Better

CHARLESTON, W. Va., Aug. 6.—A. M. Huggins, postmaster and general storekeeper at Stonewall, has improved on the Bertillon system.

Huggins, after discovering that the store and postoffice was looted, also ascertained that the aforesaid robber had taken a bite of cream cheese, which rested temptingly on the cutting block.

Huggins did not run to the police station with his troubles, but instead, cudgeled his brain to recall where he had seen teeth that would be likely to leave such an imprint.

Finally his suspicions fell on John Taylor. Asking Taylor to sample his cheese, Huggins carefully compared the two sets of teeth marks and found them to be identical, he told police. Then Taylor was arrested and held for court.

BREAKERS DISCLOSE TRIANGLE

PORT HURON, Mich., Aug. 6.—The last act in a drama in which the eternal triangle played its part, was enacted here today when the bodies of a gray-haired man and a pretty girl, both attired in bathing suits, were washed ashore on the storm-swept beach of Lake Huron, near this city.

The man's body was identified as that of John W. Rogers, 55 years old, of Detroit. The girl was Alice Jones, 20 years old, his stenographer. Letters found in the pocket of Rogers' clothing, which was found after a search of the beach, established his identity.

One of the letters was from Rogers' wife, written en route from Los Angeles, and telling him she would arrive in Detroit today. It was couched in terms of endearment and pictured the happy reunion with her husband.

The finding of the two bodies on the beach was the first inkling of the double tragedy. Rogers and Miss Jones came to Port Huron Saturday afternoon in an automobile, and in the late afternoon went bathing in a secluded spot north of the life-saving station. Heavy breakers were noted at the time. Cottagers saw the couple in the surf, and when later they were observed to have disappeared it was believed they had returned to their car.

SANCTITY OF HOME PARAMOUNT, GOVERNOR DECLARES

FARNKFORT, Ky., Aug. 6.—The "unwritten law" today was recognized by Governor Edwin P. Morrow in the granting of a pardon to Verne Jones, a traveling salesman, sentenced at Mt. Sterling to serve two years for having killed Woodson Henry, who twice had eloped with Mrs. Jones. The governor declared that Jones "had a right to protect his home; defend his honor."

In a written statement of his reasons Governor Morrow detailed the circumstances of the case. Jones, a traveling salesman, was living with his wife and four children at Mt. Sterling when Henry persuaded the wife to elope to Middleton, Ohio. Jones finally located them in Cincinnati and had Henry arrested.

He took his wife back and moved to Moreland, Ka. Henry later again eloped with Mrs. Jones, taking her to Mt. Sterling. Jones went to the latter city to attend court. Meeting Henry in a restaurant, the deserted man opened fire, killing Henry.

Jones was tried twice, the first jury standing 11 to 1 for acquittal and the second, after standing 6 to 6 for a time, compromised on two years' imprisonment.

In granting the pardon, Governor Morrow said:

"This father and husband had a right to protect his home; defend his honor. Henry gambled with death and lost. I cannot and do not believe that this man, who has served six months in the penitentiary, should be longer confined there. I do not believe that the laws of God or man or the ordinary laws of the human heart demand his longer punishment.

"I believe in the home and the sanctity of the fireside and the purity of wife and mother, and, holding fast to these beliefs, I am persuaded that Vernon Jones, having exercised all other means, at last was driven by desperation to defend his home, his children and his honor."

BRIDE-TO-BE FRIGHTENED BY TRAVELERS' AID

IRVINGTON, N. J., Aug. 6.—Maxie Ball, the eighteen-year-old girl who left her home in Defiance, Ohio, last Friday for Irvington to marry Robert Widaseck, a war veteran, living at 28 Twenty-second street, was been located at the home of her uncle, Joseph W. Ball, 1222 Marmion avenue, Toledo, according to word received here today. Miss Ball was to have reached Irvington last Saturday, and when she failed to arrive Widaseck informed the police at Newark and other cities.

According to the report received here Miss Ball said she was warned by a woman agent or the Travelers' Aid Society at a station in Toledo that it was dangerous to travel alone, and she went to the home of her uncle.

"I have not notified my parents that I changed my mind," she said, "and I didn't write Widaseck either. I shall not go now. He'll have to come out and get me if he wants me."

When seen today Widaseck said: "I have been worried day and night. Maxie has been on my mind continually. I feared something dreadful had happened to her. I don't understand why she didn't notify me. I don't think it was fair on her part. Here I have been worrying while she probably has been having a good time on the money I sent her. It is a terrible blow to me."

Smiles Bring Connubial Bliss Half Century

EVANSTON, Ill., Aug. 6.—Married 50 years and happy all the time.

Smiling was largely responsible, according to Dr. and Mrs. Martin E. Cady, who have just celebrated their golden wedding. Dr. Cady has been a Methodist minister for 30 years.

"Of course, there aren't any rules, but this is how we did it," said Mrs. Cady:

"Begin early to tackle life together.

"Don't worry; smile; if you start doing that while you are young it will become a habit for the rest of your life.

"Have children who will rise up and call you blessed.

"Move often. No not because it's cheaper than to pay rent; but because it gives you an opportunity to meet new people; to start all over again, as it were."

"The Golden Rule makes for a happy golden wedding," said Dr. Cady, "but you can see I have been especially fortunate these 50 years," and he smiled at his partner of half a century.

MRS. OLTORF HOSTESS TO BRIDGE-LUNCHEON CLUB

Mrs. Jack Oltorf was hostess Friday afternoon to the first meeting of the Bridge-Luncheon club, that has been held in several weeks. The meetings having been discontinued on account of the absence of several of the members from town.

Following the serving of a delicious three course luncheon at 1 o'clock, the afternoon was spent in the usual games. Mrs. Warren Dale, won the high score favor, and Mrs. Edward Gordon the guest prize. Miss Nell McKibben of Vernon, made low score, and was consoled with a pretty favor.

Those present other than the members, were Mesdames Lulu O. Oltorf, J. C. Davis, Edward Gordon and Misses Pearl McKay of Marlin and Joyce McLellan of San Antonio.

* * *

MRS. FOX HOSTESS TO HOMECRAFT CLUB.

Mrs. J. L. Fox was hostess to the Homecraft club at a meeting held at her home on Avenue H Friday afternoon. The hours were pleasantly spent in the usual fancy work, after answering to roll call with household hints. At a late hour, fruit punch and white loaf cake were served to Mesdames A. W. West, T. L. McGee, W. P. Wilson, Abbott, Frank E. Lewis, T. Kelly, C. L. Baum, J. M. Sowell, V. L. Shaw and C. H. Featherstone.

MRS. MIVER ENTERTAINS FOR GRANDDAUGHTER

Celebrating the seventh birthday of her little granddaughter, Annie Venita, Mrs. D. D. McIver, 1400 Burnett street, entertained 18 little girls at her home Saturday afternoon. The house was prettily decorated for the occasion, and small dolls were given for favors, for which the small guests sewed during the afternoon.

Refreshments consisting of ice cream and cake were served.

MR. OND MRS SCANNELL HONOR MRS. M'LAUGHLIN.

Mr. and Mrs. Ernest Scannell entertained with a delightful picnic and swimming party at Haven park, complimentary to Mrs. Lottie Jordan of Fort Worth, guest of Mrs. L. E. Stewart, the past week.

After spending an hour or two in the pool, a delicious picnic luncheon was served to Mrs. Jordan, Messrs. and Mesdames L. E. Stewart, J. L. Nabb, John Murphy, E. V. Lesley, H. L. Lesley, W. I. McLoughlin of Gainesville, and Mrs. J. T. Carter.

* * *

EPWORTH LEAGUE MEMBERS ENJOY WATERMELON FEAST.

Members of the Epworth League of the First Methodist Church South, met at Bellevue park Friday evening, and after playing an interesting ball game, motored to Tyson's lake where swimming, singing and games were enjoyed.

Iced watermelon was served to Misses Mozelle Revere, Virginia and Marie Harris, Zula Stokes, Hilda Mathis, Omie Taylor, Ida Baggett, Dolly Gage, Alice Bennett, Lona Brown, Johnnie Young, Stella Baum, Myrtle Bowman, Elvia Allman, Mary M. Akin, Elizabeth Peyton, Ruth Foley, Doris Ragland, Margaret Akin, Zona and Juanita Bachman, and Olivia Harrison, and Messrs. H. H. McBee, Carl Hare, Eldridge Harris, Vernon Graves, A. H. Kass, R. W. McCulloch, Maurice Bennett, Jack Cole, J. W. Thorne, F. H. Williams, J. B. Montgomery, Harold White, Dan Oster, Jr., George Snow, Forest Gholson, Lewis Peyton, N. O. Holland, Merle Hooper, E. O. May, C. W. Ruffner, Bryant Hardeman, Arthur Thompson, and Don Russell Bennett.

Messrs. and Mesdames A. H. Drake, I. E. McWhirter and L. B. Haines were chaperones.

* * *

MRS. PAUL HOSTESS TO WEDNESDAY BRIDGE CLUB.

The Wednesday Bridge Club held a pleasant meeting at the home of Mrs. Dave Paul on Tenth street when two tables of players enjoyed the games. Mrs. Al Horwitz won the high score favor, and a dainty ice course was served late in the afternoon to Mesdames Phillip Kleinman, Al Horwitz, Lazarus Cohen, Arthur Lyons, Ben Kaufman, Charles Greenburg, A. B. Woltson and Miss Rose Risenberg.

* * *

MISS SNOW AND HENDRIX ENTERTAIN ENDEAVOR.

Miss Leona Snow and Louise Hendrix were hostess to the Christian Endeavor of the First Christian Church at a picnic given at the Rod and Gun club Friday evening.

Swimming in the lake featured the entertainment for the evening, after which iced watermelon was served to Mr. and Mrs. S. B. Wilson, Mr. and Mrs. R. E. Shepherd, Mr. and Mrs. C. R. Noles, Mesdames R. L. Miller and Jesse Courtney and Misses Helen Van Deventer, Freida Turmick, Anna and Estelle Keevil, Elsie Oster, Florence, Frances and Catherine Tyson, Mildred Miller, Martha Oster, Winnie Foster, Edith Noles, and Messrs. Edmond Williams, T. E. Durrett, E. Van Deventer, T. W. Caskey, John Bradley, Jr., Joe Keevil, Levy Bradshaw, Jack Ammann, Marcus Laney, Clinton Wilson and Bryant Guernsey.

COMUS CLUB GIVES PICTURE SHOW PARTY.

A "different" picture show party was given by the Comus club for its members and guests Wednesday night at the Palace theater when a special showing of Bebe Daniels latest "The March Hare" and Bobby Vernon in "Hey Rube" was presented.

Some "wise cracks" in the form of slides, arranged by Robert Sparks, manager of the Olympic theater, were enjoyed by those present. The cast of the feature picture was assigned to different members and guests with laughable results.

The next affair to be given by the club will be a dance, the date to be decided upon at a meeting of the board of directors to be held at the Kemp hotel Monday evening.

Those present at the picture show party were: Misses Lillian Evans, Margaret Wheeler, Marguerite Sanders, Ruth Nolen, Sadie Adickes, Hope Hendrix, Mary Smith, Leona Lorimer, Ruth Crowell, Ethel Moran, Lulu Wood, Ruth Barnard, Cecelia Adickes, Bernice Pross, Hallie Duvall, Bernice Millican, Nina Shannon, Painter, Rutledge, Temple Bray and Messrs. John Tancred, J. F. Riggs, Jr., Howard T. Leach, W. E. Bell, A. H. Harris, H. E. Ford, Joe Mears, Jr., Lloyd Taylor, Ben Neal, E. T. Barker, Jr., Milburn Nutt, Ike L. Unchurch, C. R. Barnard, E. C. Blair, Albert Bonneau, S. L. Bullitt, C. H. Angle, Duke Holloway, Nathan Lynch, W. R. Armstrong, C. H. Lobtz, J. M. Monkhouse, John M. Sibley, Frank E. Nicholson, Jim Moran, O. G. Moran, C. Sommers, Temple Shell, Cedric Hamlin, Lewis H. Bussey, Jack Yates, John Barnard and Leo J. Wilmeth.

* * *

MISS SHANNON GIVEN PICNIC AT HAVEN.

Miss Carol Shannon of Whitesboro, house guest of Mrs. Paul Barnett, was the inspiration for an enjoyable picnic given at Haven park Thursday evening. The party motored out and after spending an hour or two in the water, were served with a delicious picnic luncheon.

The guests were Misses Shannon, Ruth Nolen, and Messrs. Henry Moss and Joe Monkhouse.

* * *

MRS. STRINGER HOSTESS TO GIRLS' BRIDGE CLUB.

Mrs. Leslie Stringer was hostess to the Girls' Bridge club at her home Thursday afternoon when two tables of players enjoyed the usual games. Mrs. L. H. Cullum won the high score favor, and Mrs. J. L. Jackson the low.

A dainty ice course was served to Mesdames Jack Speegle, J. L. Jackson Jr., Walter L. Robbins, and Misses Louise Montgomery, guests, and Mesdames W. P. Edwin, Henry Welch, Wayne Hammon and L. H. Cullum.

* * *

Jordan, J. Monkhouse, G. D. Anderson Jr., W. G. Williams, Clifford Sommers, John Barnard, Cedric Hamlin, W. P. Wilson, Robert Nolen, T. J. Taylor, Jr., Paul Davis, J. D. Tracy, L. J. Wilmeth, Bill Evans Bob Rose, John Sibley, Harry Day, Homer Crawford, K. H. Freidly, G D. Peeler, R. S. Bond, Sam McWeeney, Frank Patton, Bill Bannerman, G. P. Bates and Lloyd Taylor.

* * *

MISS BAUM TO LEAD EPWORTH LEAGUE

Miss Stella Baum will lead the Epworth League program at the First Methodist Church South at the meeting which will be held Sunday evening. A testimony meeting will feature the program, with song service led by J. W. Akin, Jr. L. B. Haines will give a "Magnet Lecture." Announcements, offering and the benediction will conclude the service.

ESCALATOR CLASS HONORED WITH PARTY.

Entertaining with one of the most unique and largest attended parties that members of the Escalator class of the First Methodist Church South, have enjoyed this summer, Mr. and Mrs. L. B. Haines and their niece, Miss Stella Baum, were hostesses at their home, 1107 Eleventh street, Thursday evening.

Costumed as Buster Brown, Little Lord Fauntleroys and other small folk of fiction, as well as representing all the fashions of the present day "kiddies" came in short trousers and skirts and enjoyed all sorts of childish games on the lawn, which was well lighted with strings of electric lights. A teeter totter, sliding board, and other equipment for the entertainment of the grown up children, were procided under the supervision of Miss Myrtle Boman, Messrs. I. E. McWhirter and Robert McCulloch and furnished much amusement. A fishing pond, where gifts, consisting of horns, tops and dolls, were fished for, conducted by N. O. Holland and Misses Grace and Margaret Hanie was also quite an attraction.

Small booths, attractively decorated, and arranged on the lawn carnival style, from which refreshments were dispensed, for so many pins, were an added attraction and proved to be popular loafing places for the "kiddies." Miss Zula Stokes and Messrs. Jack Cole and I. E. McWhirter were in charge of the soda pop booth, the watermelon booth was conducted by Mrs. Paul Pearson, Miss Polly Reighner, and Messrs. Harry Kincaid and Grady Hendrix; Miss Ruth Hanie and Messrs. Merle Hooper and Trenton Frank, served ice cream cones from an attractive booth.

Paul Pearson, as proprietor of a mimic show, was assisted by a bevy of boys and girls who rendered music on various kinds of stringed instruments and gave readings and stunts. Members of the caste were Misses Bonnie Rhodes, Margaret Bowman, Messrs. Ernest Highfell and Mr. and Mrs. J. W. Akin Jr. Each refreshment booth, fishing pond and show proprietor called out his wares in true carnival fashion.

Those present included: Messrs. and Mesdames C. C. Randle, J. W. Thorne, J. W. Akin, Jr., Paul Pearson, A. C. Bennett, Jacks, I. E. McWhirter, Mrs. E. Shaw, Misses Genevieve Shaw, Hester Waters, Simmons, Vivienne Harris, Grace Cameron, Dorothy Bennett, Hilda Masters, Twila Reighner, Ruth, Grace and Margaret Hanie, Zula Stokes, Elvia Allman, Florence McCulloch, Johnnie and Ruth Groves, Lona Brown, Mary M. Akin, Elizabeth Peyton, Bonnie Rhodes, Myrtle Boman, Ida Baggett, Ross, Mattie Humphries, Margaret Akin, Lillian Randle, Helen Thompson, Bessie Manley, Helen Potts, Corderey; Messrs. George Snow, Alfred Kass, M. V. Meuler, Joe Dowess, Merle Hooper, George Carter, Earl Baker, Forest Gohlson, Loftis, R. W. H. Culloch, Grady Hendrix, Ernest Highfell, Jack Cole, Tommie Thompson, Vernon Graves, M. P. Albritton, H. H. McBee, N. O. Holland, Trenton Frank, Harry Kincaid and Master Alfred Bennett.

MISS MARIE SOULE GIVES TACKY PARTY

Complimenting Miss Willetta Smith of Hattiesburg, Miss., Miss Marie Soule entertained Mrs. T. B. Smith's Sunday School class of the First Presbyterian church, of which she is a member, and several other friends, with a tacky party Wednesday evening.

The guests came costumed in gowns of earlier periods, with ornaments and accessories to harmonize. Many of them presenting cards bearing "make-believe names." Little Miss Isabel Stone, introducing herself as Sallie Merlinder of 402 Peanut Inn, and dressed in the prevailing style of an earlier period, was given the first prize, a large stick of candy. Miss Lucile Keim dressed in cast-off finery in "vamp" style, was presented the booby favor.

The hostess was assisted in serving lemonade and iced watermelon by her mother and sister, Mrs. Soule, and Miss Maud Oline.

The table was arranged on the lawn, with cover of oil cloth, and the lemonade was served from a stone jar in tin cups. Those present were: Misses Virginia, Woodall, Antoinette DeTurk, Lydia Krisan, Isabel Stone, Melba Ruth Stebbik, Lucile Keim, Elenor Pitman, Flora Gene Honaker Elizabeth Carter, Juanita Erwin, Dorothy Soule and Jimmy Carter.

* * *

WOMAN'S AUXILIARY TO MEET IN CIRCLES

The Woman's Auxiliary of the Central Presbyterian church will meet in circles as follows:

The Young Woman's Circle will meet at the home of Mrs. Phil Kerr, 1312 Fourteenth street, Tuesday morning.

Circles Nos. 2 and 3, will meet at the home of Miss Mary Edminston, 2014 Tenth street Tuesday afternoon at 4 o'clock.

* * *

BURKBURNETT.

Miss Lois Martin of Wichita Falls is visiting Miss Majors this week.

The Rev. C. D. Montgomery, pastor of the Methodist Church South, is taking a vacation. The church committee on public worship will have the pulpit filled each Sunday during his absence.

Prof. E. J. Woodward, superintendent of th Burkburnett public schools, returned home last Saturday after having attended the University of Chicago for the past six weeks. He reports more teachers there from Texas than for many years from any other state except Illinois. Burkburnett was represented by two other teachers, B. S. Majors and Donal Brickley, who will remain there for the second term. Our county superintendent, Bural Bryant, is also there for the summer, and will take the M. A. degree this week.

The Misses Lila and Sara Majors entertained Friday evening in honor of their house guests, Miss Thera Rogers of Breckenridge and Miss Lou Martin of Wichita Falls.

Sunday, July 26, Lenor Hinton and Miss Elsie Anderson, both of Newtown, were united in marriage at the home og Rev. C. C. Blair, 308 W. Main street.

Jimmie Eckles left Monday for several days' visit with relatives in Tulsa, Okla. It is understood he will go from that place to Houston, where he will establish a business.

Bill James left Monday for Houston.

J. J. Fitzpatrick and Sam B. Spence were in Wichita Falls Sunday.

Glenn and Lyan Kincaid left Monday night for St. Louis, where they have gone to buy stock for their Grandfield and Burkburnett stores.

H. Samson has been visiting his family in Fort Worth this week.

Mr. and Mrs. Edward Klien are in Fort Worth and Dallas on business this week.

Sidney Strauss was in Wichita Falls last Sunday.

Dot Parky of Sherman was in Burkburnett on business Tuesday.

Floyd Dickey returned Sunday after serving fifteen days in the Naval Reserve. His cruise included Galveston, Mobile and New Orleans.

E. J. Hunt and C. O. Walling returned Monday with their families from Medicine Park, where they had been for several days fishing and enjoying an outing. They state that they caught plenty of fish.

H. D. Andrus and E. C. Wadley returned from an outing spent at Medicine Park.

Ed Owens of the Rabbit Creek community near Randolett, was in Burkburnett Wednesday. Mr. Owens states that the crop condition in his community is excellent.

Homer H. Martin of Clinton, Mo., was in Burkburnett Monday, the guest of J. P. Roodhouse. Mr. Martin has been visiting relatives in Wichita Falls for the past week. This is his first visit to his part of the state and he was favorably impressed with conditions here.

Eber Hitchcock and "Buddy" Garrett, of this city have been visiting their parents at McKinney, Texas, for the past few days.

Mr. and Mrs. J. A. Matthews of Jacksboro, Texas, Mr. and Mrs. W. A. Woodward and little son, and Mr. W. A. Matthews of Crowell, Texas, Mr. and Mrs. C. Q. Crawford and little daughter of Vernon, Texas, and Miss Philletus Adcock of Alvoyd, Texas, were the week-end guests of Mr. and Mrs. John C. Haning the past week.

SMILES.

An optomist is one who can smile,
Whose joy is never dim,
No matter what happens all the while,
If it doesn't happen to him.

"So Miss Odone will be married! Who is the happy man?"

"Why, her father, to be sure, sir. At last he's worked his plan."

The Woman Citizen

The Making of the Highway.

To make the highway serviceable it must be drained, graded, and nearly always gravelled or macadamized or paved. In this country, this is done either by taxes or by each voter and landowner working so many days each year. In the city work is done by contracting companies.

The makers of roads should be expert road-building engineers and not merely political henchmen. Road building deserves a good lear of study in this country for we are very ignorant about it and waste untold millions in disappointing experiments made by various little communities and from which as a people we do not profit.

The common kinds of roads are gravel, macadam, granite-block, brick, wood-block, and asphalt, and cement.

The gravel road is generally made by dumping loads of gravel upon a graded road and letting the public wear it down. It is usually a successful road with sometimes too high a larch in the center. It would be improved if depressions were filled after a rain.

For the other kinds of road the preparation is much the same: A bed is excavated fifteen or sixteen inches deep, then after rolling it is filled about six inches with concrete upon which is put a two-inch layer of sand. On this cushion is laid the granite-block, the brick, the wood-block which is soaked with tar, or the layers of first coarse and then finer stone which makes the macadam road, or the first small ones in tar and then the asphalt layer of the asphalt road. We have learned to bind our stones down with crude oil for he macadam road or the tracks will cut it up and it will wash or blow away.

The granite block road is very enduring but rough and noisy and is being supplanted with wood-block which is enduring, or with vitrified brick. The wood-block is quieter but the tar oozes out in hot weather. Brick is the most common for business streets, but asphalt is considered most beautiful for residential streets.

Street Cleaning

Many an immaculate housewife has given little thought to the cleaning of her community's streets. In olden time this was done by individual householders in front of their premises. Then neighbors banded together and later cities took the matter over, with greater efficiency and economy.

Mothers, do your children empty their pockets of waste paper on the way home from school? Do you and they throw banana peels and apple cores into the street? Do you allow rubbish and ashes to lie in the street near your house? How are your streets cleaned?

We spend millions of dollars and keep busy a small army of laborers cleaning the streets, and yet we do not begin to keep them as sanitary and attractive as do some cities in Europe, who flush them daily with great deluges of water.

There are many ways of keeping the streets clean, from the cleaning man with his broom and bag, to the great machine, vacuum cleaner-like, which gobbles up all the filth. Different kinds of pavement demand different processes. Sand-filled paving cannot be washed or the sand will be lost. A cleaning process which scatters dust clouds to settle on passers and porche is not only a nuisance but dangerous to health. Thrash-boxes, themselves not unsightly, would help keep the streets in orderly condition.

Open Doors In Business

The Musician.

It is fine for every person of musical taste and talent to develop these "for his own amusement," but it is tragic for so many persons to imagine they have the necessary ability to become great musicians and waste years of time and money in training, only to suffer the bitterest disappointment in the end.

As in painting and literature, only a few great artists in music appear in each generation. In these creative arts, the pity is that "many are called but few are chosen." In literature and painting those who do not succeed greatly may make a fair income by practical work in their line, but this is less true in music. There are many really remarkable musicians who may be heard at so small a cost that we will not pay a good price to hear any but the very best.

One may earn something by giving music lessons, by playing for church or opera or movie, by working for a music sales company and playing the pieces they have to sell to popularise them; one may teach music in school or college; but except in the latter case, the income will not be a comfortable living and will be very uncertain. Furthermore, it is a very expensive thing to become exceptionally well educated in music, and one who would keep "fit" must practice daily.

For all the above reasons music is NOT a good field in which to earn a living. It is a pleasant past-time and should be cultivated for its refining influence, but not as a means of livlihood, except for those who are pretty certain that they have wonderful talent, amounting almost to genius. Even to such, many things may interfere with their success.

The musician who starts on the road of music for a career should consult some great areist and get his expert opinion whether the prospects justify such an undertaking. If not, years of work, hardship, expensive education and disappointment may be saved by abandoning the idea.

This is not meant to discourage the real genius, nor the study of music for everybody as a part of his education.

A striking example of perseverance against the physical disability of blindness is furnished by James H. Rawlinson, ex-Canadian soldier, who has just left Ottawa on the first part of his journey to London, England, where he is to assume the duties of clerk-stenographer in the London office of the department of immigration and colonization. Rawlinson was trained at St. Dunstan's school, in England, and for some time has been working at the Toronto office of the department.

VISITOR FROM BEAUMONT

Miss Gena Lee of Beaumont is the guest of Mrs. R. H. Hollinger, who has given several pretty parties in her honor.

WOMAN-I-TORIALS

The Woman and Americanization.

Under the inspiration of Mrs. Pennybacker, national civics chairman of the Federation of Women's clubs, many committees throughout America are planning to make this Fourth of July a great Americanization Day when processions of the newly enfranchised shall be the guests of honor of their town and with flags flying, music and marching shall catch a new vision of the American spirit.

In these processions, as guests of honor shall be the two classes, those who are just now twenty-one and of age to vote and those foreign born who, during the year, have foresworn their allegiance to a foreign country and have taken on fealty to the United States. Such a ceremony and such a reception into citizenship of these two classes will make them realize the importance and dignity of citizenship and their own responsibility to conduct themselves as citizens worthy of so great an honor.

National Home Economics Meet

The American Home Economics association will hold its fourteenth annual meeting June 27-30, at the New Ocean House, Mass. Mary E. Sweeney of Lexington, is chairman. The purpose of this great group of women is "for bringing together those interested in the betterment of conditions in the home, the school and the institutions of the community."

Parents, especially mothers are waking up to an interest in the movies their children are seeing. Some of these are positively dangerous from a character standpoint. Nebraska after a hard fought battle, saw a bill through its house and senate only to have it vetoed next day on the grounds that it interfered with "personal liberty" and the "sacred rights" of parents.

Indiana has had the first jury made up entirely of colored women. In twelve minutes they decided a case of a damaged coal wagon in Indianapolis.

The National Federation of Business and Professional Women's clubs numbers now about 500,000 women. It has adopted as an emblem for its pin the Nike of Samothrace, popularly known as the "Winged Victory." The National Convention will be held in Cleveland July 18-23. "Chautauqua Week" will be observed by his organization at Chautauqua, N. Y., July 25-30.

Suffrage Leader Pictures Man Of Future as Rival of Woman In Making Baby's Clothes

WASHINGTON, Aug. 6.—"There is no reason why a man can't learn to sew, knit, darn and cook, if women have learned to practice law, medicine and other professions hitherto monopolized by men," says Mrs. Edna L. Johnston, prominent suffrage leader and welfare worker, who believes that the husband of the future will be a model seamstress and housekeeper, in addition to holding a regular job.

Mrs. Johnston, who was congressional chairman of the Equal Suffrage association of New Hampshire and was manager of the first United States employment office opened in New York city during the war, holds that accomplishment is not a matter of sex, nor dependent upon it, but a matter of qualifications regardless of sex. She pictures the future husband as making the baby's clothes, cooking, washing, ironing and doing the family mending right along with his wife.

"The men surely do not want to let the women get ahead of them in the matter of accomplishments," Mrs. Johnston suggests, "and if they assume the attitude of the average man that they should stick to what has been hitherto considered man's work while the women go ahead and learn their's too, that would surely happen.

"But I am happy to say that this is not happening. The men are learning the domestic arts. Not infrequently do we hear of men designers, cooks, etc., and they are doing this in addition to their regular men's work."

Man Often Negative.

Mrs. Johnson pointed to the fact that one man, Charles F. Camplin, of Chicago, went into a bread baking contest with forty-five women at the Evanston (Ill.) county fair and carried away the first prize, while nearly every town has its firemen who are accomplished in the arts of knitting or embroidering.

"The division of work into masculine and feminine is a matter of tradition," the suffrage leader continued. "Because men have always been engineers or electricians, and women mothers, stenographers or housekeepers, some still think the division of work should be sustained. Why continue this foolish custom?

"It is the medical opinion that if women have pronounced positive qualities and men negatives, it not infrequently happens that their talents and qualifications are reversed despite the traditional division of work.

"Thus we have women lawyers, women politicians, women bankers and men artists, sculptors, designers, and so on down the list. And sometimes one hears of a woman stevedore, and the like. During the war many women took up the occupations as a patriotic service, I realize, of course.

"In some marriages the woman is the man of the house, it has been said. She is the positive and responsible person, and the man is the negative and dependent.

"In a certain court case, in fact, the wife was adjudicated to be the man of the family because she was proven to be the head of the house. And the child, a boy, about whose custody a legal contest arose, was given over to the custody of the mother."

Mrs. Johnston is superintendent of the House of Detention here, and she often wonders, she says, why the boys there can't be taught to sew and do the same things as girls."

DOUBLE WEDDING AT ARCHER CITY

ARCHER CITY, Texas, Aug. 6.—The serenity of courthouse officials, attaches and others was suddenly shaken Thursday afternoon when it became known that licenses had been issued and a double wedding was being solemnized by Justice of the Peace M. A. Lee.

Principals in the nuptial covenant were Archer Robert Reed and Miss Texa Lee, O. K. Blackwood and Miss Eva El Tefleeter.

The young people said they were from Gainesville and that they left home to avoid publicity. They were traveling in automobiles, and left immediately after the ceremony for Wichita Falls.

ARCHER JAIL FILLED.

Special to the Record News

ARCHER CITY, Texas, Aug. 6.—There are seven men and women in the Archer county jail, which is a larger number than usual for this county. Bootleggers and illicit whisky makers are in the majority. Realizing that the manufacture and traffic in illicit whisky has become a menace to the best interests of the community, the sheriff's force is putting forth every effort to suppress this evil.

"It is a safe thing to judge a woman by the way she dresses."—Dix.

Madame,

How can you resist the lovely new Fall Fashions we are showing?

We truly believe our early showing for fall is the most beautiful collection of fashions ever shown in this city.

We especially direct your attention to the beautiful coat dresses of tricotine and twill, and are the suits you will be interested in, a three-piece model—a suit and dress all in one.

WE WILL BE HONORED TO HAVE YOU CALL

We feature "House of Youth" Suits, Coats and Dresses

Kimberlin's

Scout Courier

BY

THE RANGER SCOUT

A SCOUT IS HELPFUL

(By Rev. J. W. Loving)

Scout Law Number Three: "A scout is helpful. He must be prepared at any time to save life, help injured persons and share the home duties. He must do at least one good turn to somebody every day."

How this tired old world is reaching out and crying out for the helping hand. Often just a little help given at the critical moment, will suffice. For want of this bit of help some struggler gives up and is overcome—another is added to the many sad failures of time. Thus a little help may mean all the difference between irreparable failure, and splendid success. Can any human being be so dull to the sense of pity, so deaf to the call of duty, so blind to opportunity, so self centered, as not to respond, when a little bit of timely help may save a life, help the injured, and lighten the burden of other loved ones in the home?

The Scout's training has had all these possibilities of help distinctly in view. In practically every point he has been drilled. This training and drill ought to have given him a vision, a power of initiative, so that he will be prepared for the emergency. He is expected to such a master of circumstances as to know how to act when the call comes. His honor is trusted, he has taken the oath to be loyal, now for the doing. He is treasonable and disloyal if he fails. No real Scout can thus fail.

So then he must be prepared. How? By training and in purpose and spirit. He cannot be always found with all the equipment usable, about him. He is expected to be resourceful, inventive, able to do a great thing with small resources. To save life. Not by performing a surgical operation, not by administering proper remedies after carfeul diagnosis; but by wise, thoughtful, cool-headed, warm-hearted, heroic help, such as he can give. Sometimes it means defense, sometimes offensive, aggressive help. The great object of all real training is not to tell just exactly what to do in every case. Many combinations of conditions occur, such as cannot be reckoned on ahead. The design of the training is to qualify for wise, timely, helpful action in any and all emergencies. It is as much a matter of spirit, of heart, as it is of knowledge and means. If a Scout is such only by training under another, and lack the real spirit as set forth in these scout laws, then he is not going to meet the needs or do the work. A human life may be hanging in the balance, there are no scientific appliances at hand, the situation is critical, a few moments will decide. This is the call for the wise action for which the Scout has been trained, this is the opportunity to illustrate the spirit and work of a Scout. Some one has been injured, a bit of timely help may turn the tide towards complete recovery. Delay will turn it the other way. Here is the Scout's call. He must administer first aid as he has been trained to do, and it may be that he is the only one who can summon the aid needed. So he must help the injured in the emergency, as he has been trained to do. And as his big heart will help him to do.

He must share the home duties. Here we come to what may be termed one of this writer's hobbies. A well ordered home is a subject for the artist's brush, the poet's genius, the preacher's plea, the Scout's help. In one of our Savior's parables we have the picture of a landlord who was going on a journey. Before he departed he called his servants to him and allotted to each his duty—to each one his own work. Here was wise forethought, here was the assignment of a definite task. Such is the situation which the Scout is to help make and serve. No catalogue can be made fully covering all the duties and details of an orderly home. But where each is ready and willing to help, no one fearful of doing more than his part, no one willing to do less—here is a place where the Scout may shine. His example and influence will be contagious, he may alter the whole tone of the home transforming a scene of confusion and disorder, jealousy and unhappiness, into one of peace, restfulness and contentment. What a different world this would be if all in it were thus engaged.

"He must do at least one good turn to somebody everyday." Count that day lost which records no such act, count no day lost which witnesses an act, no matter how insignificant in itself. The blessed Master was solicitous lest some disciple of His should want to plead the lack of opportunity for ervice. So he said that even a cup of cold water given in the name, for the reason, of being a disciple will find mention in the record of the skies, and will meet its reward. It is the motive that gives moral worth to the act. Surely there is no Scout who may not each day do some little thing to help somebody. Michalangelo wisely said: "Trifles makes perfection, and perfection is no trifle."

Here's wishing that every Scout may so prize his sacred honor, be so loyal in all his relationships, as to do a good turn to somebody every day.

CO-CA-CHE-LUNK.

When we started in our scouting, tenderfoots as green as grass,
We were slow and we were stupid, but today we head the class.
We were mixed on all our signals, we lost in every wood,
But we've learned a whole lot better, now we think we're pretty good.

But we musn't get conceited for our wise old Master Scout,
Says we have so little knowledge, he's afraid to let us out.
Still he tells us, we're improving, tho' our woodcraft is a crime;
If we keep forever trying, we may have some sense some time.

Scout Song Book.

In last Sunday's paper there appeared an item under Troop News stating that Troop 8 had reorganized and that "we will hear more from them later." Well, Old Ranger Scout, we are right here with that stuff you styled "more 'uv 'em later," and believe me you are going to keep on hearing from us.

You were right in stating that we were reorganizing, but you did not state our "line up" exactly right. For example we read 'em thus, to-wit. Mr. Charles H. Smoot, Active Scoutmaster, and he is active and then some. Jess McLarry, First Assistant Scoutmaster, he is always trying to do something and seldom ever accomplishes anything. Roy E. Carter, Second Assistant Scoutmaster, and some second. Roy has never tried his hand at scouting before, but judging from his success in other achievements, we feel sure that Roy is right there with the goods, as he also has all the necessary requirements of a good assistant scoutmaster.

And, of course, we have a troop committee, and brother, if the scouts attended in as large a percentage and as often as our troop committee does, we would carry off the banner for attendance. In case you do not know them, we take pleasure in naming them. Mr. J. A. De Shu, chairman; Mr. A. C. Addison and Mr. W. B. Johnson.

The pastor of the church is also very much interested in us and is always doing all that he can to help us along—but hold on! I'm just about to put all you guys wise to our strength, just stand around and first thing you know we will be beating you in any and everything that scouts can compete in. Watch our steam and keep going.

THE NEWSBOY WICHITA EIGHT

GRINS.

"Dry Farming."

Rastus: Huh dats nuffin from what ma unkle did.

Jumbo: What's dat?

Rastus: My unkle he done raised potatoes in a desert whar der was no water.

Jumbo: Impossibolutely.

Rastus: Well you see he done put a piece od onion right by de potatoes' nose and dey jest natchually done watered demselves.

This Way Out.

Pete: I hear you have a swell job.

Sam: Nope, I quit.

Pete: Quit? What for?

Sam: The boss said something I didn't like.

Pete: What did he say?

Sam: Get out of here!

WHO'S WHO IN SCOUTING IN WICHITA FALLS.

Frankly scouts, I sorter hate to start anything like this for fear that I will make a bust and everybody'll get mad them no one will tell me any dope on anybody else, and I'd have leave off Who's Who. But here goes.

Of course, we'll start at the top much like most scouts are wont to do and tell you about the scout executive. He's some fellow. Listen to this:

"Born in Texas, raised in Texas, educated in Texas with exception of one year in the University of North Carolina, likes Texas especially Wichita Falls, and in all probability will stay here the rest of his days. He first came into prominence in Denton county where he pestered the life out of his father and mother and made things generally exciting around the Taylor home. He was taken in, named Henry Edward Taylor, spanked and sent to school like a good little boy.

"According to reports he took a keen interest in outdoor sports, played hooky from school whenever possible, and just naturally grew up like a good little scout should. He passed through college during the summer session of the East Texas State Normal at Commerce, Texas, year 1909, decided he liked kids and got a job teaching somewhere on the plains that fall and winter. The fall of 1910 found him again facing the registrar at the normal school. Then the next fall and wioter he taught, returning to the normal in 1912, receiving his B. A. degree in June, 1913.

"Mr. Taylor next went to North Carolina to attend the state university there, receiving his M. A. degree in June, 1914. From there he returned to the plains to try his hand at farming. The fall of 1916 marked his first entrance into the field of scouting when he organized the first troop at Stratford, Texas.

"His whole soul was behind the movement and success crowned his efforts at Stratford. The troop sold approximately one-half of the county's quota for liberty bonds. In return for their services, Mr. Taylor and three of the scouts were awarded liberty bond medals. The troop spent a week at the Palo Duro Canyon in May of 1918, making the 200-mile trip by automobile.

"The draft caught him in June, 1918, and carried him to Camp MacArthur, Texas, at which place he spent some time going thence to Camp Mabry, Texas, from which place he was discharged on November 25, 1918, exactly five months to the day from his date of being drafted. The lure of the oil business drew Mr. Taylor to Wichita Falls in the spring of 1919.

"Finding that scouting had practically been dropped here, he advocated reinstating the movement and in September of the same year reorganized the first troop at the First Methodist Church South. His never tiring service and boosting was a potent factor in the organization of five more troops here during that winter and the next spring. He worked on the scout council idea, never missing an opportunity to sell scouting to anyone until in May, 1920, a successful money raising campaign enabled the council to employ a permanent executive.

"Mr. Taylor was offered the executiveship which place he has filled so admirably that it would be hard to get along without him. The success of the two summer camps for Wichita Falls scouts is due mainly to the efforts of our scout executive.

"Wichita Falls is to be congratulated upon having a man whose sterling character and fine ideals will always be an inspiration to the scouts of the city. 'Frankly stating Mr. Taylor, we never expected much less of you.' Even J. P. Fitch could not have done better. To our mind no greater service can be rendered than through leading boys to the heights of Americanism as only the scout movement can give. We wish you many more successful years in scouting."

(THE RANGER SCOUT).

ANOTHER SUMMER CAMP.

Another summer camp to last a week or ten days has been practically assurred the Wichita Falls scouts provided that sufficient scouts desire to go that will warrant the camp, according to the annauncement of Scout Executive Taylor last week.

Every scout who thinks that he will be able to go on the camp should have his scoutmaster report the name to headquarters at once. There should be thirty or forty scouts to take advantage of this extra camp, and spend a week in the open.

With the tents and cots on hand and the tables already constructed at camp, little time will be required to get the camp in running order. A week filled to the brim with scouting activities and fun is assured every scout who attends this camp.

Mr. Taylor stated that special stress will be laid on advancement work during this camp. Competent instructors will be provided and each day of the camp will include a study hour. Little inclement weather is anticipated as the weather man has promised to be good. Let us hope that he is true to his promise.

The camp will probably be held the last week of August or the first week of September, depending on the opening date of the local public schools. Come along scouts! Let's go spend that week in the open, so we can start to school with a fine coat of tan and a healthy disposition.

ESQUALLAW SAYS:

Don't forget that good turn to someone every day. Opportunity never knocks except to those who seek it.

George Bolin blew into headquarters last week dressed in the height of fashion. Wonders never cease.

It is rumored that a certain well known scout in troop seven has said that he would be an Eagle scout by fall or bust a suspender. Bravo! I wish several other scouts felt that way about scouting.

Some of you fellows must be wearing leaden shoes. You haven't taken a step up the scout ladder in an awful long time.

We couldn't do without our mothers, especially since they have formed mothers clubs to give us feeds once a month.

It's time to get ready for the extra summer camp to be the first of next month. Let's set our school year off right with a coat of heavy tan straight from the Wichita mountains. The water's fine this year. Let's all go. Whoopee!

GOVERNOR SUPPORTS SCOUTS.

Acting Governor W. J. Coyle of Olympia, Washington, has this to say in behalf of Scouting:

"Show me a boy, a member of the scouts and I'll show you an American youth, clean in body and mind and a future citizen of whom we can be proud.

"More Boy Scouts mean less crime, less sorrow to loving parents and less material for our state penal and reformatory institutions.

"The parent who fails to give his active support to the Scout movement is losing an excellent opportunity to help build a good American."

LOOK WHO HAS WOKE UP

(Ranger scout comment: Hooray: Fifteen for the first troop. They have actually come alive and will hereafter, we hope, be regular contributors to this column.)

Last Friday night troop one, that is six scouts from troop one, spent a night in the open at the head of Lake Wichita. Scout Executive Taylor and the scout truck transported us there in time to make camp and have some jolly good fun before the sun took his last wink at us from over the hilltop.

As soon as the two alleged cooks had prepared the evening meal our bugler blew taps or revelle, I don't know which, but it was sufficient to bring all hands on deck cleared for action. At a late hour, we turned up our toes to the stars and cashed in for a good sleep until Old Sol once more showed his face over the eastern hills.

Breakfast was supposedly cooked by two other young scouts who were suffering under the illusion that they too were cooks. Their hunters stew was fair, but, oh, that twist, it would have made good ammunition to chunk at the birds. Following breakfast we indulged in a turbulent game of marbles. The timely arrival of Mr. Taylor and the scout truck saved me from utter defeat. Taking all into consideration, I'll say it was an eventful trip.

(By George—Sitting Bull—Bolin.)

ECHOES FROM THE 8TH TROOP

Our mystery night last Friday proved to be quite a success especially when the refreshments were served. Toasting marshmellows and weiners are great fun after sitting around the camp fire for two hours listening to the palaver of Scoutmaster White and an imported speaker. Taking everything into consideration we will say that this was the most successful meeting held this summer.

We met at the church and played indoor baseball outside for a time. Upon the arrival of the scout truck and Scout Executive Taylor, we loaded every mothers' son into the truck and headed for Cannon Park. Assistant Scoutmaster Elkins directed us in some games while the camp fire was being built. A camp fire program followed, in which the scoutmaster and W. T. Harris, county clerk of Wichita county, shared starring honors.

Mr. Harris told us of his early life in and about Wichita Falls. We learned where the oldest house in town is standing for one thing. At a much too late hour the camp fire was smothered and we boarded the truck for our little trundles beds, every fellow to dream of shooting Indians and punching cattle as the scouts of yore were wont to do.

(The Mockingbird.)

Girls! Lemon Juice Bleaches Freckles

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White, which any drug store will supply for a few cents, shake well, and you have a quarter pint of the best freckle and tan lotion and complexion whitener.

Massage this sweetly fragrant lemon lotion into the face, neck, arms and hands each day and see how freckles and blemishes bleach out and how clear, soft and rosy-white the skin becomes.—Adv.

YOU NEVER CAN TAME A WILD-CAT

Mr. Dodson Warns Against Use of Treacherous, Dangerous Calomel.

Calomel salivates! It's mercury! Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it causing cramping and nausea.

If you feel bilious, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides it may salivate you, while if you take Dodson's Liver Tone you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; they like it.—Adv.

IF YOU ARE SICK

PROFIT BY THE EXPERIENCE OF OTHERS

Consult

Dr. Schultz

THE RELIABLE SPECIALIST

For scientific treatment of chronic, nervous and special diseases of both sexes, catarrh of all mucous membrane, stomach, liver, kidney complaints, blood and skin diseases. Hemorrhoids and prostatis complications treated without the knife, by a safe and humane system of scientific treatment.

If you are sick of experimenting, sick of failures, sick of being sick, come to me. I invite sick people who contemplate taking treatment to come. Special attention given in the combination of curative powers, modern electricity, vibrations, etc., with the scientific administration of selected Specific Medicines. I endeavor to do everything to promote the welfare of my patients.

IF YOU NEED A SPECIALIST WHY NOT THE BEST?

Are you a nervous wreck? Are you worn out and broken down. Are you suffering from vicious Blood and Skin Diseases, that destroy bone tissue, and disfigure for life? Backaches and kidneys give you all-gone feeling? Whether these conditions were caused by early excesses, or contracted by inoculation, it does not matter, for they will all respond to my treatment. Consult Dr. Schultz, the Reliable Specialist, who is well equipped by long experience that enables him to offer his service on a basis that no other can; his charges are lower for cures than the average physician generally charges for failure.

Those who have wasted time and money, and failed to get rid of their ailments, are especially invited to consult FREE. I am giving the benefit of over 30 years' honorable experience; some of my cures are truly wonderful, yet I do not work magic; I do not make the old younger, nor the blind see; I simply apply the knowledge my years of honorable experience have given me, and I do this honestly and intelligently.

Early Autumn Suits and Dresses

—Come down early Monday morning and inspect the new arrivals of Frocks and Suits.

—Daily this store is being filled with new apparel that will mark the way of fashion for Autumn 1921.

—Below we describe a few of the many new styles:

—An appealing style in navy tricotine long waist blouse, blouse and panels on skirt embroidered in byzontine and Moroccain silk. With this frock is a black morie ribbon girdle $110.00

—An unusually striking model of navy serge. A charming effect is obtained in the cut work embroidery at waist line through which a black satin drop shows. Long waist line is emphasized by the finish of a scarlet duvetyne girdle.....$59.50

—An effective straight line model in navy poiret twill enhanced with Marmot and navy wool thread embroidery. Waist and girdle have trimmings of Marmot Canton crepe.....$59.50

—A decidedly attractive dress is navy serge trimmed with silk braid and beads, belt of self material.....$29.50

—Volnay colored Orlonda cloth is used in this youthful model, misses' suit trimmed in heavy self stitching $42.50

—The style tendency is straight lines. In this burro colored Moussyne the graceful straight model is its distinctive feature $115.00

—Another wonderful straight line long coat model is made up of Marabou, silk and cashmere duvetyne.....$149.50

—Other new materials to be seen in our suits and coats are Mochatex, Moussetyne, Panvelaine and Armida.

AUTO AND OIL SECTION

Wichita Falls Record News

AUTO AND OIL SECTION

WICHITA FALLS, TEXAS, SUNDAY, AUGUST 7, 1921.

RICKENBACKER COMPANY STIR OF AUTO WORLD

DETROIT, Mich., Aug. 6.—Announcement of the organization of the Rickenbacker Motor Company with a capitalization of $5,000,000 was the feature of the past week in automotive circles. The action of the American ace of aces and the veteran automobile manufacturer associated with him in launching the new company at this time gave impetus to the optimism that has prevailed the past 30 days and was greeted with much satisfaction by the local manufacturers.

Work in the plant of the company has already begun. Cavtain Rickenbacker asserted that production will be well under way within 30 days. The first "Rickenbacker" automobile will be exhibited January 1 at the New York automobile show.

Style Departure

"The product will set a new style in automobiles," said Captain Rickenbacker, "the most novel departures to be in connection with the clutch, the frame, the motor and the suspension. The lines of the body also will be distinctive of the European cars."

The noted flier, who is the vice president of the new company, of which B. F. Everitt, one of the creators of the old E. M. F. Company, is president, said he is not yet at liberty to give the location of the Detroit plant that has been purchased. Additions to this plant will be begun in a few weeks.

The new model will be the fruit of three years and eight months of experimentation by the former speedway king. Four models have already been produced, and one of them has been making test trips about the country for the past two years, it is said.

The new car will be turned out in large volume, at a moderate price, Captain Rickenbacker said.

Looks Ahead

"There is no question as to the future of the automobile industry," Captain Rickenbacker declared. "Although we may expect flurries in the next six months, normal conditions will be reached next spring. By then the high priced inventories will be worked off and the manufacturers will be able to get back to production on a basis and at a price conforming with existing conditions.

"But we must improve our export trade and toward this end I believe international negotiations now in progress will be effective. There will be a marked improvement in the export of automobiles next year.

"It is 1000 per cent easier to sell a car today than it was in 1908. Then we first had to first sell the idea that the automobile was better than the horse.

"As to the advisability of adding another to the numerous styles of cars on the market, it will be found in every business and profession that there is room for new ideas and improvements. Everyone of the host of cars in the country today is wearing out with every revolution of the wheels. And the owners are going to buy newer and better cars if the prices are right."

Reaches Top.

In entering the production end of the business, Rickenbacker has reached the top rung of the ladder he set out to climb when, as a youth, he qualified as a mechanical engineer.

"The racing game is a turned page with me," he said. "It was just a step up the ladder, mainly to gather experience and knowledge of the best in motors."

Capt. Rickenbacker entered the automobile business in 1902 and since then has been engaged in every branch of the industry. In the new company he will have directions of the sales, but will also have much to do with the engineering.

Associated with Everitt and Rickenbacker in the company are: Harry L. Cunningham, secretary-treasurer, and Walter E. Flanders, Roy Hood, Carl Tichenor and E. R. Evans, directors. All are well known in the automobile manufacturing world.

Everitt and Flanders belonged to the old E. M. F. group, which preceded the present Studebaker corporation. Cunningham is one of their close associates. Hood acquired his experience as purchasing agent with Studebaker, and later with the Maxwell-Chalmers organization. Tichenor has recently been engaged as production manager for the Pierce Motor Car company. During the war he had much to do with the production of the Liberty motor.

Surprise is expressed over the return of B. F. Everitt to the automobile manufacturing field. Since the sale of the old E. M. F. interests he had confined his attention entirely to his original business of automobile body building until today he is the second largest, if not indeed the largest, body builder in the world.

Walter E. Flanders took over the defunct United States Motors company, from which he created the Maxwell company, of which he was head from 1911 to 1920. During this time he earned for the shareholders from what had been "a pile of scrap" $18,000,000 in profits.

A year ago, he announced his intention of retiring from business permanently, as he had all the money he wanted and felt like resting on his laurels. Mr. Flanders's closest friends will be surprised also at the announcement that he will again engage in business, for only a couple of weeks ago he insisted that he was through for good. But while in Detroit he went up to the temporary factory and examined the Rickenbacker car. He stated that it was "the best manufactured proposition" he had ever seen.

It seems the design of this car was started some two and a half years ago, when Capt. Rickenbacker returned from Europe with the determination to enter business for himself, and with a lot of new and novel ideas on engineering, which he had absorbed while in France. Messrs. Everitt, Flanders and Cunningham offered to back him in the enterprise, and C. R. Evans began to put Rickenbacker's ideas into a car.

BLOW-OUTS ALONG THE ROW

BY COLD PATCH

The sympathy of the entire automobile fraternity is extended to F. D. Keim of the Excelsiod Motor Co., in his bereavement. F. D. went to San Francisco to attend a convention of the Knights of Columbus. Upon his arrival in San Francisco, he found a wire awaiting him there announcing the death of a younger brother in Tulsa, Okla. He caught a train immediately for Tulsa in order to arrive in time for the funeral. After the funeral he will return home.

J. M. McFall and L. L. Dixon came in for warm praise at the dealers meeting Friday night for the fine work which they did no the road sign committee of the association. This is a good team. Their ears must have tingled at the compliments heaped upon them.

A. L. Weissenborn, of S. Bemrod Co., was aguest of the Automotive Dealers at their meeting Friday night. A. L. has had considerable experience in the auto game and will make a very valuable asset to the local group. We are glad to welcome him to our midst.

Carl Waelder, of the Franklin Sales Co., has become a politician. As chairman of the stop and go signal committee of the dealer's association it became necessary for him to go before the city council and make them a speech. He evidently won Commissioner Fitts by his oratory. The new commissioner of police promises complete co-operation.

Carl Thompson rises to his feet to announce the sale of two jobs last week. A packard roadster went to A. M. Miller of Bowie, and a twin-six to R. Brannon of 1704 Huff street. Carl has a brand new Single Six on the floor. It's a very beautiful paint job, being blue-black over green.

C. C. Randle says that there is a marked scarcity of some of the popular sizes of all the better grades of tires. The output of the factories is not sufficient to meet the present day demands, according to C. C. He reports business unusually good.

C. L. Hall, of Lloyd Weaver Automobile Co., is back from a very pleasant three-week's vacation spent in the Ozark mountains. During his tour which was made in a Hudson speedster, he went into five different states. He reports a wonderful time and says that the Speedster certainly proved itself a perfect "touring car." We are glad that you are back to help us bear this heat. The more the merrier, you know.

Lloyd Weaver comes as near being a 100 per cent baseball fan as we know. Being a big stockholder in the Wichita Club is not enough for him. He must personally lead the Super-Sixes to victory (or defeat) every time his boys find anyone who will play them.

Clarence has been working since his return from his vacation last week. The results are the sale of several Dodge Brothers cars the past week.

Speaking of mileage—we are reminded of something we saw this week. L. D. Fritz was forced to cut a tire off a Marmon with a knife after it had given 16,000 miles. Fritz says that better mileage is gotten from tires on a Marmon than any car he knows.

Walter, are you sure that Al is behaving himself during the absence of his wife? Don't forget, you are your brother's keeper. Keep that in mind.

The success of Sanders-Haid's fire sale is proving that the clothing man by no means has a "corner" on sales of this variety. Haid is selling parts, accessories and tools to folk who come from hundreds of miles around.

George Moulder, of the Wilhelm-Moulder Co., reports that he is much pleased with their new location. "Heretofore, in our old location, we were more or less apart from the automobile world. But now there is something doing every little minute."

L. L. Dixon has a new hobby and it is not golf, an airdale terrior or ice cream sodas. The secret is out. Buick announces today in this issue of the Record News a "Four." Here's hoping that it will prove to be as satisfactory a car to dealer and owner as the six has always been. It certainly bears an honorable name.

Bland is doing most of the work now-a-days. He says that he hasn't the heart to ask Frank to do any real work." He knows how hard these torrid days are on fat men.

Charlie Nolen is due to go to the senate of the United States. Judging from the way he handled the chair at the dealers meeting Friday night in the absence of President Booth, shows that he is destined for some such office.

Carl Eckman of Eckman and Von Allmen is a gentleman and a scholar. When we called on Carl Friday, he greeted us with a big bucket of lemonade. It was a life-saver, too. Other dealers take notice (that is if you want space in these columns).

The Motorcycle Supply company is doing a rushing business on the Harley-Davidson since the recent reduction in price. Mr. Cox is a live wire and you can bet that when he and the good machine he sells get on a prospect, a sale is sure to result.

OVERLAND HANGS UP PRODUCTION RECORD

DETROIT, Aug. 6.—Willys-Overland has past the peak of sales for the present season, it is believed by officials of the Toledo plant, as orders were posted this week calling for five-day working schedule and lowering of production for August.

The mark set for July was 12,000 cars. This has been reduced to 10,500 cars, and the August schedule set at only 6500. The September program is placed at 2750. These are only tentative figures, and if the trade continues as brisk as it has been during the last few weeks they will have to be revised upward, officials say. The sales of the present week will probably temper the schedule for next month.

Rately has the Overland operated extensively during the summer months. Last week hundreds of men were laid off and during the next week the force will probably be cut by 2500 men. It is planned, to keep a normal force of about 5000 men at work during the fall months.

NEW LINE OF BUICK FOURS ANNOUNCED

Announcement is made today of the presentation before the motoring public of Buick's new four-cylinder line. There are four models in the line, including roadster and five-passenger touring in the open cars, and three-passenger coupe and five-passenger sedan in the closed models.

Inasmuch as it has been known in the automotive trade for some time that Buick purposed adding a line of fours, considerable interest attaches to the specifications covering the new models. In motor construction Buick has adhered to the valve-in-head principle with which its name has been so prominently connected for twenty years. The cylinder bore is 3 and 3-8 inches with stroke of 4 and 3-4 inches. The motor develops between 35 and 40 brake horsepower and road tests have shown that the power plant will deliver up to 50 miles an hour with ease. Features of motor construction are the large three-bearing crankshaft and 12-inch long connecting rods, extra long rods being provided to reduce vibration to a minimum. A circulating splash oiling system gives automatic lubrication throughout. Another important feature, which is standard equipment on all Buick cars, is the automatic carburetor heat control through which ideal vaporising conditions are obtained.

The transmission is of the selective sliding gear type, three speeds forward and one reverse. The universal joint is of standard Buick construction, being virtually an integral part of the transmission and automatically lubricated from the transmission. The clutch is of the multiple disc dry plate type, built in exact accordance with the principles which have guided clutch construction in Buick sixes. All moving driving parts are enclosed.

Front axle of the four-cylinder car is an I-beam forging. The rear axle is three-quarters floating type, all the weight of the car being carried on the axle tubes and only driving torque and steadying of the wheels being taken by the axle driving shafts. The third members is of standard Buick type of construction, designed successfully to eliminate all twisting or weaving in the rear axle. Gear ratio if the rear axle on high speed is 4 and 2-3 to 1.

Wheelbase of all models is 109 designed to give fine riding qualities to a car of this wheelbase. The front springs, semi-elliptic type, are 36 inches long, and the rear springs, also semi-elliptic, are 55 1-2 inches long.

Cord tires are standard equipment on all models. These tires, which are 31x4, are the first straight side cord tires in this size eger manufactured and were built especially to meet Buick requirements for the new four-cylinder cars. The tires have been adopted as standard size.

The chassis is lubricated with the high pressure Alemite system. Delco starting and lighting system is standard equipment. All models are complete with tire carrier and extra rim and all are equipped with non-glare headlight lenses.

Shipping weights of the four models touring car, 2380 pounds; coupe, 2450 pounds; sedan, 2650 pounds.

Prices, f. o. b. factories at Flint, Mich., are: Roadster, $935; touring car $975; coupe, $1475; sedan, $1630.

In adding the four-cylinder models to the seven models of six-cylinder cars now produced, Buick executives feel they haev rounded out their line and constructed cars which are in every respect worthy of the Buick name.

ANSWERS TO QUERIES ABOUT YOUR AUTO

To the Automobile Editor.

I have a new make of car that has been running fine until recently, when, in the act of making a sharp turn to avoid a collision, I put a strain on the rear axle, and now I have to run my car at less than a walk speed, because seemingly the differential does not work. I have taken it apart, but it does no good, as it continues to repeat after about ten miles. Can you tell me what causes this? B. H. N.

Answer—The differential has undoubtedly been sprung so that at times it locks. It is possible that the axle housing itself is out of line. This point should be determined first. Have an experienced repair man go over these parts with you.

To the Automobile Editor:

The No. 2 coil on my Ford car burnes all the time when the switch is turned on. The engine will not run well and fires back into the carbureter. The other three coils work all right. What causes this annoyance? O. T. B.

Answer—This indicates a short circuit on the wire going to the timer. Follow it along and see if it touches metal at any place. This usually occurs where it fastens to the timer. As the sparks is jumping all the time it fires the fresh gas as soon as it centers the cylinder, and so pops out of the inlet manifold. You are fortunate it did not cause a back kick and break your wrist.

To the Automobile Editor:

Please give me all the causes of carbon forming in the cylinders. T. K.

Answer—Rich mixture from the carbureter, too much oil, poor grade of oil, scored cylinders and rings, overheating, running engine idle, gasoline condensing in the oil base, and a few others of less importance.

To the Automobile Editor:

How can I tell if the muffler needs cleaning? When the cut-out is working, does this save the muffler from filling up? The engine is not losing power, but the muffler has not been cleaned for over a year, and I wish to avoid trouble instead of correcting it later. P. T. R.

Answer—If the muffler is clogged with carbon you will note loss of power due to back pressure in the cylinders. This is more evident on a hill. When you use the cut-out the car speeds up; when you cut in the muffler the car slows down. If the engine is smoking badly it will help the muffler slightly to use the cut-out, but this is hardly worth while, as there are prohibition against the use of the cut-out in many localities.

To the Automobile Editor:

When coasting with gas throttle fully retarded, so that it am using about gas enough to run five miles an hour, is it better on the level to have spark lever in its regular position, fully advanced, or should it be fully retarded? On a long coast is there any benefit derived from shutting off spark completely, especially as I cannot completely shut off the gas, as now arranged, therefore presume there is no saving of gas, but does it help the motor? H. J. F.

Answer—You must use judgment as to position of spark lever. If the engine is turning over slowly the spark should not be fully advanced, nor should it be fully retarded. The rule is to keep the spark as far advanced as possible, just short of the point where it causes knocking. On a long coast place your gears in a speed and shut off the ignition entirely. This helps to cool the engine and saves the brakes, but wastes gasoline to a slight extent and has a tendency to produce carbon when the engine is started. The advantages and disadvantages are about even, but there is no question that this method is by far the safest way to go down a steep hill.

WOMEN FAVOR GOOD ROADS.

Evidence of the widespread interest in good highways was shown at the recent meeting of the General Federation of Women's Clubs at Salt Lake City. In endorsing the Townsend bill for national highways, now before congress, Mrs. John Dickinson Sherman of Chicago, chairman of the department of applied education, said:

"It is not necessary for us to point out the real interest of American women in highway matters. The influence of real highways on country life, on economics, on education, is now generally understood. What is needed is a; national highway policy which will conserve government funds, and through concentration of federal money on main highways, will give us a connected system at the earliest moment and the lease expense."

AUTO PLANT FASCINATING

Of interest to every automobile owner is the story of the construction of the car he drives. Few motorists realize the infinite care which attends the construction of every motor car or the immense financial investment that is behind the better known and more standard makes of automobiles.

Take the case of the Maxwell factory for instance. The value of the plant and the current working capital behind the big Detroit automobile plant is approximately $50,00,000. And the cash requirements per week are over $1,500,000.

Believing that the facts relative to the big plants of the Maxwell company of Detroit would be of interest to the genehal motoring public, S. Bemrod, Wichita Falls distributor of the good Maxwell, has gathered some interesting facts on this subject through the courtesy of factory officials which are presented herewith.

"Take the new Maxwell sheet metal plant, recently completed and put into operation. It alone is a fine testimonial to the progressive character of the new and powerful Maxwell organization," says Bemrod.

"The building was erected at a cost of $1,250,000 and is one of the most up-to-date, if not the best, of its kind in the country today. It occupies about 217,000 square feet of floor space and is equipped with two ten-ton electric cranes, by means of which material in any part of the building may be handled.

"Each craneway is 300 feet long, with a span of 60 feet, and contains two rows of huge presses. The freight from cars spotted on a track that runs into the building is placed on the floor as stock. From there, as needed, it is picked up by the cranes and delivered to the proper machines.

"The sequence of processes along these rows of machines is the utmost of efficiency. The presses are placed so closely together and in such a way that truckers or extra men to act as 'go-betweens' are done away with altogether and the time required for the processes is cut down as well.

"It has also been arranged so that each piece is inspected as it goes along, instead of being finished and then sent to some other part of the factory for inspection."

TIRE RUNS 25,000 MILES ON WHEEL BEFORE REMOVAL

This unusual record of tire economy come from the owner of a Marmon 34, J. I. Brandenburg, of New York City. In commenting recenty upon his car which has run 26,000 miles, Mr. Brandenburg stated that he ha done tire that has never been off the wheel for the entire life of the car, and that another original tire, being carried as a spare, is still in good condition. Incidentally, Mr. Brandenburg added that nothing had ever been replaced on the car.

Another instance of Marmon economy in the matter of tires comes from Earl Tiffany, of Astoria, Long Island. "I have gone 16,000 miles on the original tires," is the way he expresses it, "and have not been in the shop yet and don't expect to be for some time to come." In twelve years experience in cross-country motoring from Alaska to New York, Mr. Tiffany has found that the Marmon 34 is the only car that can stand up to his needs.

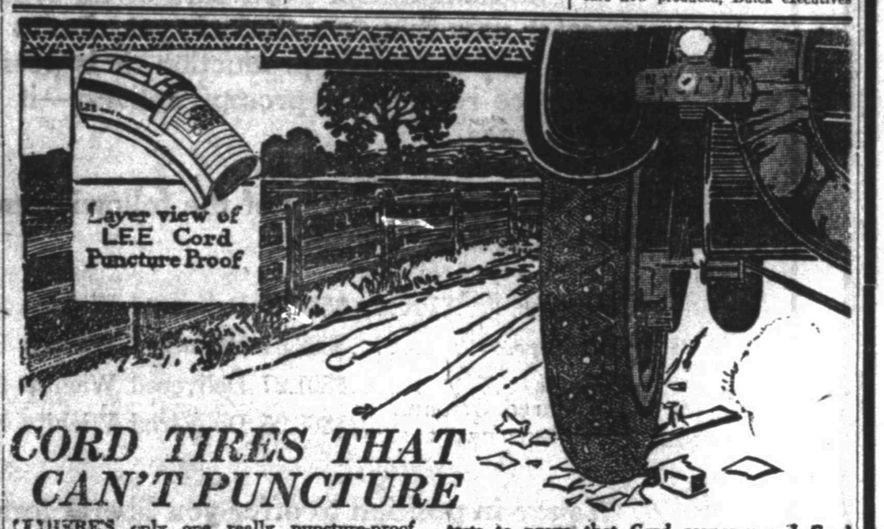

From Minneapolis comes further testimony. Johtn S. Pillsbury, of the Pillsbury Flour Mills company, beginning in February, 1919, still has one tire in service, which has been of the hardest sort. The others showed no signs of trouble until after 18,000 miles.

MOTOR TRUCK FEES.

At the beginning of 1921 there were seven states in which motor trucks were registered at the same rate as passenger cars. In recent years there has been a tendency in most states to increase the fees required for motor trucks above those required for passenger cars. This increase is usually based on the weight of the truck and its carrying capacity, its horse power, or a combination of these factors. The most general practice seems to be toward limiting the maximum total road weight for the vehicle and basing the registration fee on the capacity of the truck.

In Colorado, New Mexico and Oregon, in addition to the registration fees, a state tax on gasoline or other products used for the propulsion of motor vehicles is also levied. In some states motor cars are taxed as personal property in addition to the required registration fees.

The state entomologist of Connecticut has issued a "check list" of the insects of that state, on which 6,781 species and varieties are represented by specimens or reliable records.

CORD TIRES THAT CAN'T PUNCTURE

THERE'S only one really puncture-proof pneumatic—*the Lee.*

Users of Lee Fabric Puncture-Proof Tires urged the making of a Lee Cord Puncture-Proof. Car owners generally hoped for its coming. Endless experiments to combine the exclusive Lee Puncture-Proof feature with Cord construction were finally successful. Then, before the tire was offered to the public it was subjected to 18 months of continuous heart-breaking road tests to prove that *Cord economy* and *Cord resiliency* were preserved.

Tread troubles—so common to Cord tires—were practically eliminated; the tread became as strong and long-lived as the rest of the tire.

They're here now—Lee Puncture-Proof Tires—Fabric or Cord—each alone in its class.

Cut the cost of mileage with Lee Puncture-Proofs.

The Super-Six Motor
—adds 72 per cent power
—adds 80 per cent to efficiency
—Decreases vibration to within 10 per cent of nil, nearer the ideal than any car we know.
—almost doubles endurance

HUDSON SUPER SIX

Stays New and Stays in Service

When men say that Hudsons never wear out, they mean that of course only comparatively. It is because of Hudson endurance and the ease with which inevitable wear is adjusted, that Super-Sixes, which are old in point of years and service, retain their new-like qualities.

And as befits a car built to serve for years Hudson has always held to a basic permanency of design so that its newness of performance is parallelled by the modern appearance of even the oldest Super-Sixes.

In every performance asked of a motor, Hudson's records reveal greater efficiency than any other car has ever shown.

Yet if they stood for only contest supremacy they would have small importance to you.

But when Hudson went further and proved that these great records are but one expression of a new principle which also gives unequalled endurance their real meaning becomes clear. For instance Hudson's 7000 miles continuous trip, twice across the continent in 10 days, 21 hours, has never been equalled.

And the practical application of that endurance is seen in many Hudson's now giving able duty, after six years and more than 100,000 miles of service.

FAVORS LOUD AUTO HORN

The automobile horn that makes the loudest noise has found a warm advocate in Hudson Maxim, inventor of the silencer for guns, whose device raised among innumerable persons irritated by noises the hope that the silencer might some day be applied effectively to garrulous human beings. His discovery of the loud and startling signal for automobiles was made known by Mr. Maxim recently at a gathering of inventors in the offices of Dr. Miller Reese Hutchison, former chief engineer to Thomas A. Edison. Dr. Hutchison is the inventor of the Klaxon horn.

Mr. Maxim, regarded as an authority on the subject of noise and anti-noise devices by the younger inventors who look upon him somewhat as their dean, did not mince any words when he took issue with judges and zealous crusaders against loud automobile signaling devices and other noise producers intended for warning those who may step into the path of danger.

"When a man steps in the way of an approaching automobile," said Mr. Maxim, "he ought to be startled. If he isn't startled he is sure to be run down and probably killed or fatally injured simply because he didn't make any particular effort to get out of the way of danger. Efforts have been made by all kinds of well-meaning persons to suppress the loud automobile signaling devices, but they are in error, and if they stopped to think, they would realize that the loudest and most startling sound that can be produced by a motorits as a warning signal is the very thing which is so necessary nowadays. Indeed, it should be compulsory for motorists to equip their cars with the most nerve-racking sound producers, instead of instruments that emit soft and soothing sounds. For the latter are the kind that give the person in danger a false sense of security by soothing his feelings, and he is all the more likely to stay in the path of an approaching automobile, so equipped for signalling and be killed.

"On the other hand if a man is in the path of a moving automobile and a harsh and loud noise is produced to warn him of danger, his first impulse is to jump, and in ninety-nine cases out of a hundred he will jump to safety if warned in time.

"That the startling noise is the best as a warning signal is confirmed by a study of the elemental laws which govern the lives of lower animals. Animals of prey have developed a sense which tells them that it is wrong to make any harsh noise that will warn their intended victims of their approach. Hence the tiger and the panther and similar beasts attack their victims with the greatest stealth.

"Compare their method of attack with that of the bull. The latter animal makes all the noise he can. He does a great deal of bellowing and cavorting before he charges his victim, and the latter can generally manage to get out of the way in ample time if he wants to avoid being gored."

Mr. Maxim was commended for his views on the subject of the loaud automobile horn, and not one of his associates took issue with him.

INCREASE IN AUTO USE.

Forty-seven states, which in 1920 reported 8,541,005 motor vehicle registrations, report a total of 8,776,533 for the present year, according to figures obtained by the chamber of commerce of Akron, Ohio. The compilation shows an increase in motor vehicle registration this year of 235,528. New York is the only state whose motor registrations are not included. Adding its 1920 registry of 676,260 cars, the grand total would be more than 9,000,000 motor vehicles.

Of the forty-seven states reporting, twenty-two show decrease from the previous year's registration. They are Arizona, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Utah and Washington.

Ohio has the second largest number of vehicles registered, being next to New York. Nevada, which in 1920 was at the bottom of the list with 10,464, shows a still further decline in registrations, reporting only 9822 this year.

Pennsylvania leads in respect to increase, showing 60,861 more registrations than a year ago. Ohio is second with an increase of 55,610. Massachusetts ranks third with an increase of 37,249. California fourth with 35,112 and Illinois next with 18,644.

DRIVE YOUR CAR AND BE HEALTHY

"Because motoring acts as either a physical or mental stimulant, or both, the automobile has become looked upon as either a health creator or a health restorer," says Dan Rubsone, the popular manager of the Marshall-Huff Motor Company.

"There are two big benefits from owning a car-mind-diversion while riding with somebody else driving or physical exercise and mind-diversion when driving. In addition to getting plenty of air the riding motion and changing scenes accelerate the pulse and respiration, steady the nerves, create quick mental response and develop alertness and pep."

HINTS TO MOTORISTS

In case of a broken spring it is sometimes possible to make a temporary repair by means of a heavy block of wood. Lash it securely and drive carefully.

Although the magneto needs very little care it must have some attention in order to carry on its work. Place one or two drops of oil in each oil hole every 1000 miles, clean and test interrupter points every month, wipe off all dust from the distributor, both inside and outside, and you are practically immune from trouble. Use none but the finest sandpaper in cleaning the interrupter points.

Never put lubricant of any kind on the Bendix drive pinion of your self-starter. If oil is put on it the dust will collect and gum it up so that it will not work. In case it does stick because of dirt, squirt kerosene inside the pinion and work it back and forth on the thread, wiping off the dirst as you do so.

Hold the hand over the breather tube occasionally with the engine running. If gas is escaping from the crank case it means that the engine is losing power. The force of the explosion, instead of pushing down the piston is looking into the crank case. This may be due to scored cylinders, defective piston rings, or, in rare cases, a hole in the head of the piston. The pistons or cylinders must be removed to correct this.

In removing a detachable rim it is a good idea to loosen the bolts before jacking up the wheel. The weight of the car will break any rust that would tend to hold the rim and make it hard to remove by hand. If the rims are new and have had no chance to rust this advice does not apply.

AUGUST TO SEE RECORD OUTPUT OF FORD CARS

(Exclusive Dispatch.)

DETROIT, Aug. 6.—While some plants report a slightly decreased demand for their product, the Ford plant will turn out 109,700 automobiles and trucks during August, surpassing all previous records, company officials announced this week. July's output will total 109,000, it was said.

There has been an increase in production since May when 101,464 cars were made, and 108,962 in June. These figures are for the United States alone. The British and Canadian plants expect to increase from 225 cars daily to 300 cars during August.

Added to the car and truck production is the output of the River Rouge tractor plant, which announces a daily output for August of 200 tractors, or 5400 for the month. Thus the output of cars, trucks and tractors for August will be 123,200.

In addition to the complete car production of 4063 cars every working day in August, repair parts which would make 180 cars daily are also being turned out.

The schedule for the motor department calls for a daily output of 4300 motors.

PRODUCTION OF PNEUMATIC TIRES RECEIVES BOOST

AKRON, Ohio, Aug. 6.—The week saw increases in tire production which brings the daily output of tires in Akron to 75,000, and if 1918 can be taken as a fair basis for normal production, the industry is very close to that basis.

The Goodyear Tire and Rubber Company has sent out a new production ticket calling for 25,140 tires a day and 30,00 tubes; the Firestone Tire and Rubber Company has boosted production from 21,00 a day to 25,000 tire and 2,000 additional tubes, and while neither the Miller Rubber Company nor the B. F. Goodrich Company have given out new production figures, it is known that sufficient men have been taken on by both to increase the output of Goodrich at least 2,000 and Miller at least 500.

It may be of interest to know that in 1918 the Goodyear had a daily output of 26,000 tires in Akron, Goodrich an output of 2,000, Firestone 22,000 and Miller 3,500.

Genuine Common Sense

Ford
THE UNIVERSAL CAR

Many Ford owners can afford to own and operate any car they may choose, but they prefer a Ford "because it is a Ford."

For "because it is a Ford" means dependability, ease of operation in traffic, ability to park in small places—and it means quick, sure transportation at a minimum of expense.

And "because it is a Ford" means pride of ownership, good taste and genuine common sense.

A Ford gives all that any car can give—plus real utility, minus extravagance.

The demand for Ford cars of all types is greater now than ever before; yet, due to tremendously increased production, it is possible to secure reasonably prompt delivery—if you act at once.

We can deliver any of the following models at the new low prices:

Roadster .....$535.75 Delivered Wichita Falls
Touring .....$582.61 Delivered Wichita Falls
Couplet .....$801.27 Delivered Wichita Falls
Sedan .....$868.95 Delivered Wichita Falls

We are in position to offer you liberal terms.

BRYAN SUPPORTS HARDING'S PACIFIC CONFERENCE PLAN AS SEED OF WORLD PEACE

ST. LOUIS, Mo., Aug. 6.—The world should look hopefully forward to President Harding's proposed disarmament conference, according to William Jennings Bryan, erstwhile secretary of the state in the cabinet of former President Woodrow Wilson.

"Those who have been hoping and praying for universal peace," declared Bryan, while here on a tour of the west, "have more reason than ever to be hopeful today. President Harding's proposed peace conference, if successful, will be the greatest gathering in centuries. The peace conference at Paris ended one war. This conference may end all wars."

Attacks Booze Law Enforcers.

When shown headlines in a local newspaper detailing the capture of two large whiskey stills, Bryan declared prohibition has come to stay.

"Prohibition is permanent," he declared emphatically. "Before prohibition went into effect carloads of liquor shipped into the cities, hauled by drays to saloons on prominent corners and displayed alluringly on the shelves and in windows.

"Now liquor is brought in handbags at night by bootleggers who sneak through the alleys. That is some change. Where the law is not enforced it is mainly where the enforcing officers are not in sympathy with the law. An officer who sits down and listens to a debate between his appetitie and his oath of office, before starting on a raid, is apt to arrive too late. It's something like allowing horsethieves to elect a sheriff.

"Besides those who aren't willing to cut out their own supply, we have those who are crooked; but we have the same problem to deal with in enforcing all laws. Many automobiles are stolen, but no one suggests that the law against automobile thefts be repealed."

The "wets" Bryan declared smilingly, thought the beer ruling by former Attorney-General A. Mitchell Palmer was a ray of sunshine.

"It turned out to be a ray of 'moonshine,'" he scoffed, "and the 'shine' will soon be taken out of it by an act of congress.

"I don't see how beer can ever come back. If it cannot come back as a medicine, how is it going to have a chance to come back as a beverage?"

The "wet" parade in New York on July 4 didn't have "one-half of one per cent kick," Bryan said.

"The funeral obsequies of John Barleycorn are all over," he continued enthusiastically. "It was estimated that 500,000 persons would march in the New York 'booze coterie,' but it turned out that only 15,000 actually marched in the parade. Nine hundred of those were musicians, paid by sorehead brewery agents. The funeral services are sure over."

Supports Excess Profits Tax

The corpulent, many-time presidential candidate also had a few remarks to make about taxes. The great question is not so much reduction of taxes, he asserted, as the selection of things to be taxed.

"The only tax repeal which has been vociferously demanded," stated Bryan, "is the excess profits tax. This should be the last tax repealed. It is a tax collected only on excess profits—that is the tax that ought no to be taken from the purchaser. It is the only tax that one can repeal himself, without seeking the aid or consent of anyone else. If he will stop stealing he will not have to divide with the government."

The commoner smiled broadly when I mentioned the Irish situation. "A new armistice day," was his description of the day Irish peace is established. It is difficult for anyone not actually affected by the Irish situation, he said, to understand all the difficulties to be overcome. The entire world will rejoice, he stated, if a basis of permanent peace in Ireland is reached.

Has the democratic party a chance to "come back?" he was asked. "Indeed it has a very good chance to again gain control of the administration," he asserted emphatically.

"The reaction against the republicans already has set in," declared Bryan. "It is possible for the democrats to gain control of the next congress if they will stand on the side of the people on all questions.

"The democrats should select a progressive man in every district now represented by a republican and put him to work discussing public questions in his district, with a view to winning the next congressional election; not a man who will make a bid for the vote of the underworld, but a man—or a woman—who will appeal to the consciences of the voters as well as to their judgments, to women as well as to men—a man or a woman who will represent the masses instead of the profiteers and privilege hunters."

HARLEY-DAVIDSON ANNOUNCE CUTS IN MACHINE PRICES

MILWAUKEE, Wis., Aug. 6.—Sweeping price reductions, effective immediately, have been announced by the Harley-Davidson Motor Company, Milwaukee, Wis., manufacturers of the Harley-Davidson motorcycle.

The electrically equipped, three-speed, twin-cylinder machine, the most popular model, has been reduced from $485 to $365, and model 22-JD, a popular sidecar machine, has been cut to $390 from $520. The new prices on side cars and side vans are as much as 28 per cent lower than the former prices. Model 22-LR, the leader in the line of side cars, is now priced at $115, $45 less than the price before August 1. Reductions in the prices of all of the other models are practically in the same proportion as those described.

"The reductions announced have only been made possible by assuming great inventory losses and through putting into effect the utmost economies in every branch of our organization. And these prices are not a preliminary move, a half-way measure, but we believe we have based our prices on the material costs, etc., that will prevail many months hence and cut our prices to bed rock with one big swoop. The quality standards which have characterized our products will be strictly maintained." This statement was released in connection with the announcement by Walter Davidson, president of the company.

Simultaneous with the announcement of the new prices, the 1922 models which feature a striking, new brewster green color, to displace the olive drab army dress used for several years, and also a number of mechanical refinements, have also been announced.

CLAIMS 3 OUT OF EVERY 4 MOTORS ARE NEGLECTED

That three out of every four owners abuse their cars through neglect and carelessness, is the claim made by Mr. Robert H. Hassler, president of Robert H. Hassler, incorporated, manufacturers of shock absorbers.

"In fact, it is quite seldom you see a motor car that is cared for properly," said Mr. Hassler. "How often do you see cars that are allowed to run with rattles and squeaks, that obviously are not greased regularly? How often do you see a driver ruse his car over roads that are rough and entirely unfit for traffic? The answers to these questions are obvious. You see nearly every automobile so treated. A man may own a watch that cost $25, and he will not allow a child to touch it. But he will take a $500 automobile and treat it as if it were so much junk.

"This tendency on the part of car owners makes more desirable those accessories that help protect a motor car. Take Hassler shock absorbers, for instance. With Hasslers on a car the careless driver will not injure his car so much by driving foolishly. Nor will he find things rattling loose so quickly. Of course, we have no control over motor car owners. But if we could convince them of the injury to their cars they are causing, I am sure they would be more careful."

MODERN ENGINE OF AUTOS REMARKABLE BIT OF MECHANISM

Few owners realize, in these swiftly moving days, the remarkable development of power and efficiency that has been made in automobile motors in a comparatively few years.

"Why it took a Sampson to start the one-lungers of but twenty years ago, and a wizard to keep them running," says Andrew Bachle, veteran automotive engineer. "Dirt roads offered difficult obstacles and a hill was a Waterloo. Plenty of strength to go out behind and push was the most desired quality for a mechanic in road races.

"Many a driver won his race by backing up hill which his competitors found too steep to take running forward. Power was a missing requisite.

"Take for example the motors in the Paige motor cars we are turning out today and you get the contract. The new Paige light six motor with cylinders only half the bore of the old one and two-lungers and rated at 23.75 S. A. E. horsepower, develops an efficiency so high that on a recent block test 40 1-2 horsepower was developed at 2400 revolutions per minute.

"The Paige "6-66" motor which Ralph Mulford has been using in setting new stock chassis records develops just under 70 brake horsepower, and does it economically. The possibilities in the way of performance and economy which these modern motors give were undreamed of only a few years ago."

MAXWELL BEATS TRAIN BY HOURS ON 148 MILE RUN

Another record has been hung up by the good Maxwell on the coast, according to S. Bemrod, local Maxwell-Chalmers dealer.

Following closely on the heels of the record smashing performance of the good Maxwell in the recent run between Portland and Oakland, comes information of another privately owned good Maxwell beating the time of the fastest train between Sacramento and Reno.

As on the Portland-Oakland run, this latest achievement was the result of a bet.

I. M. Seymour of San Francisco wagered Fred Rheinsmith, assistant manager of the Sacramento Hotel, that he could beat the train to Reno with his good Maxwell.

Rheinsmith accepted the bet and went along to see that nothing was "put over on him."

The good Maxwell covered the distance of 148 1-2 miles in six hours and 18 minutes, beating the train by two hours and 32 minutes.

The run was made through congested Sunday traffic and the remarkable part of the test was that in climbing the 1700 feet of elevation, the good Maxwell made no stops for gas, oil or water. Only seven gallons of gasoline were used on the trip, despite the fact that the journey was uphill.

According to the local Maxwell organization, this feat is one more instance in which the good Maxwell has thoroughly sustained its country-wide reputation for power, reliability and economy.

MARMON COMPANY TO HOLD COUNTRY WIDE EXHIBITIONS

All preliminary plans have been practically completed for the country-wide demonstration week to be held during teh week of August 15-20 by Nordyke & Marmon company and its representatives.

When the demonstration week was introduced by them last October, its unusual features caught the fancy of the public to such an extent that it was felt that it should be an annual institution. The idea back of such a week is to make a ride in the Marmon 34 an actual experience for any and every one. In conjunction with this ride there was introduced last year the Marmon scorecard, on which the passenger was asked to make his own comparisons of the Marmon and other cars on twelve basic points. It was the beginning of selective buying in the motor car field. No broad claims were made, the comparisons were left entirely to the judgment of the purchaser, the case was in his hands.

The same general scheme will be followed this year. Throughout the entire country Marmon distributors and dealers will be co-operating simultaneously toward the end that during demonstration week the Marmon car will be presented to their community by actual contact. The demonstration week and score card idea is one that will mean a real change in the methods of automobile salesman, and the results of this second annual demonstration week will be watched with great interest.

YOUTH BEARS NAME OF POPULAR AUTO

Dodge Brothers Inc., is an institution, but Dodge Brothers is an individual.

Which, though it sounds somewhat involved and perhaps even enigmatic, is but a very simple and very truthful statement.

Fifteen months ago a son was born to Mr. and Mrs George E. Brothers, Cleveland, O. Mr. Brothers, it happens, is a salesman for the Barnes Motor Co., Cleveland dealer for Dodge Brothers. He had been selling the Dodge Brothers car a long time and was exceedingly proud of it. He was also exceedingly proud of his son. So he decided on a simultaneous tribute to the two. The youngster was christened "Dodge."

Master Dodge Brothers is a very bright young gentleman and gives promise of achieving a renown quite in proportion with the weight of his name.

VALVE-IN-HEAD Buick MOTOR CARS

Announcing

The New Buick "Four"

—A Thoroughbred Four, Completing the Famed Buick Line

The new Four-Cylinder Buick, here announced, is a thoroughbred—a pedigreed car well worthy of its name.

Down to the very last detail, this new model possesses every quality of enduring serviceability, complete comfort, and distinctive appearance that have always characterized Buick automobiles.

The advent of this new Four makes the Buick 1922 line complete. It offers to purchasers of a car of this size all the quality and service that go to make up the name "Buick."

The Buick Valve-in-Head Engine A Power Plant That Has Proved Itself—

The engine, of course, is of the time-tested Buick Valve-in-Head type. The year-after-year concentration of Buick's engineering skill and experience in building Valve-in-Head motors assures the highest standard of performance obtainable today.

Every other unit is of a quality equal to the power plant. The whole assembly constitutes a perfectly balanced chassis which is of typical Buick construction. The equipment of Cord Tires is merely evidence of the quality which characterizes the entire car.

Two open and two closed body types mounted on the *Buick built chassis* comprise the new series.

Even the most casual inspection of the details of design and workmanship will reveal that full measure of quality which motorists have learned to associate with Buick.

A Great Car, Prices Make It An Even Greater Value

Obviously a high grade automobile—a genuine Buick production—the prices listed below make this great Four even greater. A value such as this is possible only because of the combination of Buick engineering skill devoted to the one ideal of quality, Buick production facilities developed over nearly a quarter of a century, and Buick's nation-wide distribution and service organization.

The Buick Motor Company is proud of the Buick Four. It has the faith of long experience in this newest addition to its line. It places upon it unreservedly the Buick guarantee carried by every Buick automobile produced. That its confidence is well placed is manifested not only by the keen interest with which motorists have awaited this announcement, but also the advance orders placed by distributors, dealers, and the general public.

WHEN BETTER AUTOMOBILES ARE BUILT—BUICK WILL BUILD THEM

Hupmobile

—There are four real questions when you buy a car—What will it cost to run? Will repairs be heavy? How long will it last? What will it bring when sold?

—If you get the same answers as the man who buys the Hupmobile, you can be sure you have not paid too much.

—Hupmobile running economy is known to be truly exceptional.

—Owners will tell you their repair bills are unusually light.

—It is a fact that many Hupmobiles serve three or four long-time owners before they wear out.

—Used car dealers all know the car commands a price above the average.

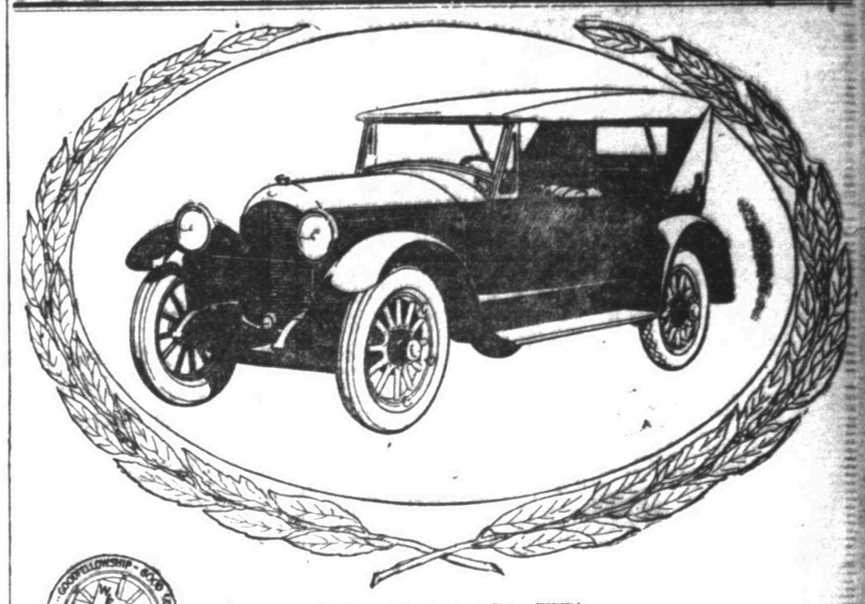

—These things are true of the Hupmobile because it is built to last and to keep going on the minimum of outlay; and because they are true, the car is worth what it costs.

"Our Service Most Efficient"

PAIGE

The Most Beautiful Car in America

It is Changing Buying Habits

The Paige 6-66 model is a truly great motor car because it represents a great economic achievement. It means maximum motoring qualities at minimum cost.

It means sane, sensible investment value instead of extravagance. Therefore it has changed, and will continue to change, buying habits in the fine car field of America.

You have but to look about you for the evidence. The boulevards tell the story. For more than 25% of our total sales have replaced cars costing from one to three thousand dollars more than the Paige.

In short, the fine car buyer has grown weary of paying "excess fare." He now cuts his investment in half—and drives the undisputed champion of road and track. Think it over.

MEXICAN ORDERS FOR OIL, FOLLOWING STRIKES AND SHUT DOWNS, SEND PRICES UP

With the June and July Mexican contracts, which amounted to up into the hundreds of thousands of barrels of fuel oil, and the increasing demand from Texas consumers, refiners in the Wichita Falls district find themselves in a gradually improving condition as August opens, with fuel oil up again a trifle, 40@45 cents.

Mexican conditions are the cause of both elements which are strengthening the refined products market, according to the refiners, the big contracts which have come to the locals being for use on Mexican railroads which have been cut off from their native coal and oil supplies by strikes, shut downs and other reasons.

The Texas railroads buying is increased by the twenty-five cent tariff which the Mexican government has imposed on export oil, it is further stated, the uncertainty of conditions in the republic to the south leading some buyers to make long time contracts with the North Texas refiners.

A third order is expected from the Mexican consignee who has been handling the big shipments to Laredo, and reconsigning them to Mexican points. The June and July shipments from the Wichita Falls district amounted to several hundred cars each of the two months.

Practically all of the larger and more substantial refineries of the district are running near capacity at the present time, the demand for fuel oil being kept pace with by the demand for gasoline. Gasoline output is usually contracted for from 15 to 30 and even 60 days ahead at the present time, and even kerosene, usually of a slow market, is reported picking up with an increased demand from the North.

There are a total of 33 refineries in Wichita county, including field skimming plants, with a united capacity of 74,550 barrels. This amount is practically identical with the total daily pipeline runs of the district for the past week.

Increase Premiums.

The increased demand for crude products, with its ray of hope for the independent refiner, has led to a stiff competition in the purchase of crude, both contract and spot, and consequently to an increase in the payment of premiums. It is understood that practically every independent refinery in the county is paying a premium of from 10 to 25 cents a barrel, and that similar premiums prevail in refineries in nearby counties, both in Texas and Oklahoma. And in the competition for crude contracts the independent must compete with the big company, for this class, too, is busy trying to make new contracts and new connections, according to numerous operators.

Of the 80,000 barrels production in the district, this is potention production, not pipeline runs, approximately 45,000 barrels is produced by the larger companies, leaving 35,000 barrels to the "small" operators and companies.

Where owners of production, or royalty holders, are heavy stockholders in refineries, as is the case in many local plants, the scramble for crude does not offer as much of a problem as where they company has no strings of any sort on production.

Big Drop In Runs

A decrease amounting to 3,000 barrels, daily the biggest weekly drop since dollar oil became a reality, is shown by pipeline runs in the Wichita Falls district for the past week, over the figures of the previously weekly period. This drop pu[illegible] pipeline runs down to around [illegible] barrels daily, the lowest figu[illegible]n at least two years' time.

The big drop came in the Burkburnett northwest, naturally, where the production is the heaviest. There was a slight decrease in the Kemp Munger Allen, a slight increase in the Burkburnett-Texhoma shallow field, and practically no change at either Electra, the Archer County-Texhoma, Petrolia or the South Bend pool.

This drop means that the curtailment of new drilling which has been under way for several weeks, is now showing its effect, and also that the crude buyers have had a slow week. Also the tendency to curtail expenses wherever possible has led to a drop in production on some leases, it is said, where the operating crews have been cut to the bone.

New Producers Limited

New producers for the week were limited to a couple in the new Archer County pool, a couple at Electra and a few other scattered completions on leases already proven, none of them of any decided importance.

Both of Archer County's new wells are Texhoma Oil and Refining Company producers. The No. 2 Taylor is reported a 2500-barrel well and the No. 6 Gose is estimated good for 300 to 350 barrels. Neither has been given a fair test, because of lack of storage and pipelines.

At Electra the Magnolia Petroleum Company's No. 50 H. and T. C. is reported a 60-barrel producer in the 1,980-foot sand, and the Gulf Production Company's No. 2 J. D. Melton is reported a 15-barrel well in the 1,400-foot sand.

In the south Sunshine Hill 1,000-foot sand Baldwin brothers have recently completed a well reported good for 50 barrels.

In the Burkburnett northwest the Humble Oil and Refining Company's No. 5 Brannon, block 83, is reported a 30-barrel well, sand at 1,680 feet.

A recent completion for the Burkburnett townsite is reported the W. M. Priddy No. 1 Fowler, 25 barrels in the 1,700-foot sand.

Dozen Locations Made

There have been possibly a dozen new locations made or rigs moved on during the past week, but all have been on producing leases. Some activity in the older Electra pools to deepen shallow producers is also reported.

A couple of shallow wells on the Chilson tract, South Iowa Park shallow, is reported, drilled by H. H. Haggard et al. The Nos. 1 and 2 are reported 15-barrel pumpers, in the 750-foot sand.

In the Kemp Munger Allen pool the Gulf Production Company's No. 3 Potter Lewis, block 23, west side of the pool, is reported on the 1,50-foot sand, preparing to complete. The C. W. Wallace et al No. 2 Lewis is reported drilling around 90 feet. The Gulf's No. 4 is reported moving in material. In the original K. M. A. pool, the Coleman Drilling Company's No. 1 Munger is reported on the 1,740-foot sand, making preparation to complete. This test got a sand around 1,600 feet, which failed to make a producer.

In the southeast Electra shallow field the Iowa Park Producing and Refining Company is reported on an oil sand at 1,780 feet in their No. 2 Burnett, and preparing to set 5 3-16 to test.

The People's et al No. 1 A. C. Henson is reported ready to be shot, sand a 1,388 feet.

A new derrick is reported up on the Planet Petroleum Company's Burnet lease, the No. 20 and the No. 19 is drilling around 1,20 feet.

Nelson and Donehoo No. 2 Waggoner is reported drilling around 750 feet.

The Texas Electra Oil Company's No. 1 B. B. Cochran is reported cleaning out around 2,200 feet after setting 5 3-16 casing.

The Panhandle's No. 1 Foster and Allen, H. T. and B. R. R. Survey No. 2, is reported drilling around 1,100 feet.

In Gulf Pool

On the Gulf pool, southeast of Fowlkes, the location has been made for the No. 15 Burnett-Lease A, in section 5, and materials are reported moving on. This pool has several sands, varying from 300 to 1,900 feet.

The Magnolia Petroleum Company is reported preparing to deepen several of its old semi-shallow producers in the Electra field.

The Halle Oil Company's No. 1 Fee is reported drilling around 1,640 feet.

Texhoma Archer County

Four wells on the sand and standardized ready for completion will probably be drilled in this week by the Texhoma Oil and Refining Company. Three are on the Gose and the fourth on the W. H. Taylor tract.

The Lee Bass No. 2 Henderson and the J. J. Perkins No. 1 Coffman are also reported due for completion.

The Harper and Jones No. 1 Taylor, which has been fighting water for several weeks with little success, is reported rigging up a standard rig. The rotary is being moved on the No. 2 location.

Very little change is reported from the various wildcats in this section from last week. The Rattlesnake Oil Company's No. 1 Netherton is reported drilling around 1,48 feet. A good oil showing was reported for the 1,370 sand depth, but unable to shut off the water, the test found it impossible to try out this sand.

The Archer City townsite test, the Burk Archer No. 1 Andrews is reported preparing to standardize below 1,800 feet to continue drilling. The No. 2 is reported drilling around 300 feet.

FORMER ENGINEER FOR CADILLAC CO. JOINS NEW FIRM

H. M. Schwarze, electrical engineer of the Cadillac Motor Car company, has resigned to become a member of the engineering staff of R. H. Collins, until recently president and general manager of the Cadillac company and naw engaged in designing a high-grade automobile which will bear his own nameplate.

Mr. Schwarze rejoins his Cadillac associates, B. H. Anibal, chief engineer; F. M. Holden, research engineer and W. R. Milner, body engineer, in the engineering office in the former main plant of the Cadillac, recently purchased by Mr. Collins.

Previously to joining the Cadillac organization nearly fifteen years ago, Mr. Schwarze was employed in electrical construction and maintenance work with the Westinghouse, Bell Telephone and American Car and Foundry companies. He engaged in the same work with Cadillac and, after a few years' absence, returned to join the engineering department, in 1910, when the company was preparing to introduce electric starting, lighting and ignition.

It is stated that to Mr. Schwarze, more than to any other man in the automobile industry, is due the credit for having made practicable the electric self-starting, lighting and ignition principle, as embodied in the 1912 Cadillac, the first car to be equipped with this feature.

In 1915 he patented a double-breaker mechanism which increases the speed and continuous operation of ignition on high-speed engines. This mechanism was used on Liberty motors and other aviation motors, on racing cars and on other high-speed engines, here and abroad.

During the world war, Mr. Schwarze had charge of all electrical work for the aircraft division of the General Motors Corporation.

OLD QUESTIONS TO FEATURE NEXT LEAGUE MEETING

By Associated Press.

GENEVA, Aug. 4.—The agenda of the next meeting of the assembly of the League of Nations to be held here September 5 is not expected to contain any new subject of particular importance, though the members still have time to submit any subjects they would like to have discussed.

Thus far there is only one item put on the agenda at the request of a member, the Tacna-Arica dispute, which will be listed at the request of Bolivia.

Not many such requests are expected, most of the work that will come before the popular body of the league being the outgrowth of work already begun, such as disarmament, the international court and the continuation of work that was referred to special commissions such as the fight against the white slave traffic, against opium and for better transit facilities.

As the work in sight stands, the order of business, with such modifications as may be made necessary by subsequent requests of members will be:

Organiation of the assembly; reports of special committees appointed at the request of the first assembly including amendments to the covenant; registration of treaties; the economic blockade and the interior organiation of the league; the budget; reports of the provisional technical organiations of the league including the financial committee's report on the scheme to resuscitate Austria; election of 11 judges for the international court; the reduction of armaments; Bolivia's request for mediation in the Tacna-Arica dispute; election of four non-permanent members of the council of the league; admission of new members.

Hungary is thus far the only new applicant for membership of the assembly but there are in suspense the previously filed application of Latvia, Lithuania, Ukraine, Azerbaijan, Georgia, Armenia and Lichtenstein.

It is regarded as practically certain in league circles that the assembly will be called upon to pass on the admission of Germany. No intimation has been received of an intention on the part of Germany to make an application herself, but several delegations it is expected will be ready to propose her, taking as an argument for admission the fact that the present German cabinet has shown its intention to loyally execute the country's obligations.

Germany is expected to have the support of Italy, Austria, Bulgaria, Switzerland and the Scandinavian countries as well as that of some of the South American delegations.

The minimum existence expenses of a family of four in Berlin rose from 285 marks a week in May to 311 marks in June, according to data gathered by Dr. Kuczensky's statistical bureau. The weekly minimum in June, 1920, was 304, while in the year preceding the outbreak of the war it averaged 28.80 marks.

When William Bahr, of Beaverton, Ore., captured Chief Joseph, of the Nez Perce tribe of Indians, some thirty-three years ago, he did not know of or claim a reward of $500 that the government offered. His friends recently filed a claim for him and he may receive the money.

NEW STRIKES REPORTED IN SOUTH BEND

Drilling into a grey lime, apparently oil bearing, at 3265 feet, the Del Tex Oil Company's No. 1 Emma West, a short distance east of the town of South Bend, brings another new producing possibility into notice, and adds another point of interest to the South Bend territory, already one of the most active in North Texas. This new strike is to be tested as soon as possible, according to reports from the field.

This past week saw the completion of the first of the western offsets to the North American Oil and Refining Company's No. 3 Ford, which several weeks ago proved up territory to the east of the line of production along the Clear Fork of the Brazos, bringing the rich 2100 foot sand closer to the town of South Bend.

This new well is the No. 5 McCluskey of W. E. Conner of Wisconsin Falls, a 350-barrel well. The sand depth here is reported as 2170 feet, approximately the same as in the North American Ford.

The Oklahoma Petroleum and Gasoline company got the good 1900 foot pay in their No. 3 McCluskey which is offsetting the Keller exact where the Hemphill gusher was drilled a couple of weeks ago. This first 1900 foot well for the Oklahoma Petroleum and Gas company is reported a 300-barrel well, without being shot. The big pay in the Hemphill came after the shot, the flow increasing from a couple of hundred barrels to between 700 and 800 a day.

The third new well for the pool along the river is the No. 2 Graham of Emerick and Dancinger, producing 250 barrels from the sand at 250 feet.

In the Bunger District.

There is the greatest bulk of new operations in the section. The Union Oil Company's No. 1 Askew, which has been giving much promise for weeks, is still fishing on the 1960 foot sand, and this same company's No. 1 Bynum, on the river, is reported also fishing, at 2755 feet. The Ross and Tyrell No. 1 Owens is reported drilling around 500 feet, and the Hedrick and Spoonts, No. 1 Driver, is reported down around 600 feet. The Roddie et al No. 1 Manning is reported drilling around 500 feet.

The Jackson Carbart No. 1 Lisle, offsetting the famous Empire No. 1 Lisle, a sensation of other years, is reported drilling around 550 feet.

Various tests in the general neighborhood of the Del Tex have had such showings at different depths, as to make all tests well worth watching. The No. 1 O. A. McBrayer of J. S. Hoff has not yet been cleaned out after the shot given recently in the 1900 foot sand.

The North American-Roxana No. 1 Holcomb is reported still cleaning out after the shot given the 2120 foot sand. Around 1400 feet of fluid was reported in the hold after the shot.

The Hempflinger et al No. 1 O. A. McBrayer, is reported waiting on 8-inch casing, still at 790 feet.

New Domain Disappointing.

So far the test of the New Domain Oil company on the Addie M. Graham, north of Eliasville, and to the west of the McCluskey-Graham producers, has been disappointing. Casing trouble, necessitating resetting, delayed operations for several weeks, and according to reports from the field the showing when 3820 feet was drilled, has not been duplicated by later performances.

In the main producing pool, along the river, operations are still maintaining a good average. Several wells, all in proven territory, are being drilled by the Shamrock, the Godley, Mid Tex, Armstrong and Haskell and the Panhandle, practically all of them due for completion in a short time.

The activity of the Sinclair Pipeline company, which has been running oil through their new linens nfonr a week, has proven great stimulous to the morale of oil operators in this section, and while there is no premium being offered for oil, and no indication of a raise in the posted price, there is still assurance of a market for oil produced, at the market price, a condition which was foreign to the field a couple of months ago by reason of the limited capacity of the Prairie's line. Now, however, in addition to the Sinclair's new line the Prairie has built anohter unit, enabling the pioneer line to care for more production.

PACKARD

Let us demonstrate to you the uncommon value of the Packard Single-Six at its price today. You will be convinced, as we are, that no other car of fine quality, combines so many advantages of economical size and light weight with so low a price.

YOU CAN SAFELY EXPECT FROM THE PACKARD SINGLE-SIX A YEARLY AVERAGE OF 17 MILES OR BETTER TO THE GALLON OF GASOLINE, 2000 MILES OR BETTER TO THE GALLON OF OIL, AND 15,000 MILES OR BETTER FROM TIRES

Ask the man who owns one

Studebaker

Why All The Enthusiasm?

—We are often asked, "What have you done to Mr. So and So to make him such an enthusiastic Studebaker booster?

—Our answer is always the same: "It's not us," we tell them; "it's the car he is driving."

—That's one reason why we like to sell Studebakers. They make good from the start—and a Studebaker owner is the best asset we have in making other sales.

—When you add to this feeling of general satisfaction among all Studebaker owners, the long list of honors won by Studebaker on the roads of California and Arizona—it's really not hard to decide what car you want to own.

—If you would like to test for yourself the exceptional performance of the Studebaker Sixes, you have but to telephone us and we will send a demonstrator to your door.

This is a Studebaker Year

CURTIS EXPLAINS REASON FOR POSITION IN "RETRENCHMENT" CAMPAIGN ASKED BY NEFF

To The Record News:

AUSTIN, Texas, Aug. 6.—Believing that the reports in your news columns for the last few days, concerning the action of the lower house of the legislature on the educational appropriation bill now pending, does not fully state the position of myself and other members of the overwhelming majority, and that you desire at all times to give the public the benefit of all the facts on each and every issue, I submit the following with a request that you publish it.

For the year ending August 31, 1919, the legislature granted a raise in salaries to the faculties of the different state educational institutions. Another raise was granted for the year ending August 31, 1920, and the heads of the different institutions requested the committees to grant an emergency raise for the year ending August 31, 1921, stating in substance that because of the enormous increase in living expenses, the raise was necessary in order that the institutions might not lose their faculties, but that the teachers might get a living salary. This request was granted. It was generally understood, and was stated numerous times on the floor of the house, that this increase was to be temporary, and to take care of the temporary abnormal conditions. The regular session of this legislature, recognizing that even at that time we were in the midst of a period of financial depression, passed a bill reducing penalties on delinquent taxes, and deferring the publication of delinquent tax lists. Since the adjournment of that session the financial situation has continued to become more unsatisfactory, until a large number of the people of Texas are now unable to earn sufficient to maintain themselves and families, and pay their necessary taxes and other expenses.

Many of the members of the legislature, including myself, were requested by mass meetings of the large taxpayers of the state, to not vote for any appropriations at this session which would compel us to raise the tax rate. I promised to grant this request, and propose to stand by my promise.

The committee reported a bill to the legislature appropriating an itemized total of $1,100,000 per year for the maintenance of the university for the next two years; also giving the university the available fund of approximately $240,000 per year, together with certain fees and other items, bringing the total to approximately $400,000 per year; this appropriation not being itemized, and there being no statement as to what items it might cover, except a statement on the floor that it would cover the summer school, extension work, and other necessary work not itemized in the bill.

The campus of the university is practically covered with shacks which are unfit for human habitation. The available fund derived from the university and other like sources was intended as a building fund. For a period of ten years, it has been diverted and used for the purpose of defraying running expenses. For several years, to my knowledge, this fund has been appropriated in a lump sum without any itemized statement as to the purposes for which it was to be used. Believing that it is the duty of the legislature to see that the public knows just how and for what purposes the public moneys are expended, and also believing that the available fund, together with other incidental fees and income, should be used for the purposes for which they were intended, and thereby gradually place it so that the shacks could be removed and modern buildings erected on the campus, about eighty-five members of the house, including myself, voted for an amendment providing that this fund should not be used except for building purposes, and another amendment prohibiting the use of any of the funds except for the purposes set out as specified. This legislature, at its regular session, passed a bill appropriating $1,250,000 for the purpose of acquiring additional lands for the university, which bill, along with the large majority of the house, I supported.

I submit that in view of my support of the above measures, I should not be classed as an enemy to the university, or to education.

The board of control, the state treasurer, and the state comptroller, submitted to the legislature a written statement of he financial condition of the state, as of September 1, 1921, relating to general revenues. I quote the closing paragraph of this statement:

"We find from the estimates on valuations now being filed with the comptroller by the county tax assessors, that the actual valuations of the state will probably not exceed $3,250,000,000 for the present year; or $150,000,000 less than estimated by the board of control in their first biennial budget, found on page 16, thereof; which valuation was determined by taking the average annual increase in valuation for the past five years; and that the revenue from ad valorem will accordingly be reduced on a basis of 35 cents tax rate, by $500,000 annually. It is not unlikely, but very probable that the revenue derived from other sources, especially from oil, will also be reduced to the extent of $1,000,000 annually, thus reducing the total annual revenues of the state to $15,000,000"

The appropriations already passed, and the bills now reported, provide for annual expenditures for the next two years, as follows:

Totals appropriations of regular session	$7,835,700.00
Educational bill as reported	4,649,951.00
Judiciary bill as passed	1,150,300.00
Eleemosynary bill as reported	2,965,820.00
Departmental bill as reported	2,874,177.50
Total	$10,475,348.50

It will be seen from the above figures that annual appropriations already made, and as recommended, will exceed the available revenues by $4,475,348.50. In addition to this, there is an almost universal demand that at least $1,000,000 annually be appropriated for the rural schools. This makes a deficit, allowing only $1,000,000 per year for the rural schools, of $5,475,348.50 per year.

In view of the financial conditions as above set out, it is absolutely necessary that the appropriations be materially reduced, in order that the available revenues may cover them; or as an alternative there must be an enormous increase in the amount of taxes raised, together with a higher tax rate. Texas are limited by the consstitution, to 35 cents on the one hundred dollars. This limit will not raise the revenue demanded by the different appropriation bills, and additional taxes must be raised to meet same.

Several methods of indirect taxation upon different industries and businesses have been proposed, and the public, in the last analysis, must and will pay these additional taxes after they are levied. I believe that it is better to lower the expenditures proposed, than to raise the tax rate to the limit, and force the people to pay large amounts in indirect taxation. I believe that in taking this position, I am representing the sentiments and desires of the cattlemen whose cattle will not pay the amount for which they are mortgaged; of the cotton farmers whose cotton, if they have raised any, will hardly pay the expenses of producing; of the professional man whose income is practically nil; and of the business man whose business is not now paying its running expenses.

The United States Bureau of Educatio nhas issued a bulletin for the years 1920 and 1921, showing the salaries paid by 401 universities and colleges in the United States. The minimum salary paid for presidents is $2,500, and the maximum salary $12,500; average, $6,647. The minimum salary for professors is $300, and the maximum salary $10,000; average $3,120. The most frequent salaries paid to presidents and professors are $6,000 and $3,000, respectively.

The amendment to the university appropriation bill which I along with about eighty-four other representatives, am supporting, provides a salary for the president of the university of $6,600, and for the professors, $4,000 each. This amendment simply reduces all the salaries to those fixed and paid for the year ending August 31, 1920, prior to the emergency raise above spoken of. There are similar amendments prepared which will be introduced, reducing the salaries in the other educational institutions on the same basis. I also favor a similar reduction in the salaries and expenses of the different state departments.

At present, $1.00 will probably buy as much as $1.50 would a year or two ago. A salary of $4,000 means as much as a salary of $5,000 did in the time of extraordinarily high prices. The time of normal prices has about returned, and it does not seem to me that it is an injustice to reduce the salaries paid the employes of the state to the normal amounts which were prevalent prior to the emergency raise. In justice to the tax payers, this must be done. If it is not done, the state cannot meet its appropriations, and it would be impossible to give any aid to the rural schools.

We all desire to [illegible] the higher educational institut[illegible]n any practical way, but it is more essential that the common schools be properly maintained, and gradually improved. Texas should not be allowed to continue to rank in the thirty-ninth place in public school education.

It is for the purpose of meeting other necessary expenditures that I have supported the amendment reducing the salaries as above set forth, for which support I have been branded over the state as an enemy to education, and to the University. I am a patron of the University, and in my youth had the advantage of some considerable college training; and I believe that I am thoroughly alive to the importance of higher education. However, I am also alive to the absolute necessity of primary education, as well as to the need and demand of the people of Texas that their taxes be held within a reasonable rate.

This article is written without consultation, and without the knowledge of any person except myself. I am not representing any other legislator or any other man, but have written this in order that my position may be made clear to the public.

I shall wait with considerable curiosity to see whether or not you will publish this letter. Yours very truly,

A. B. CURTIS.

GIRL EDITOR GETS LOCAL COLOR BY YEAR OF LABOR

ST. LOUIS, Mo., Aug. 3.—Three months actual experience as a telephone operator following her graduation from the journalistic department of the Missouri State University, in order to obtain needful information for her new job as associate editor of the Southwestern Telephone News, is the unique record made by Miss Mary Sue Patton, of St. Louis. She has held her present position for more than a year and attributes her success in it to the knowledge she gained as a "hello girl" at the switchboard of the Olive Street Exchange, St. Louis. In short, she knows just what sort of material the girls want to see in the monthly magazine and just how to obtain from them what they do know.

The position Miss Patton holds was made for her in the nature of an experiment by the company officials, following their attempt to get one of their girls who could write. They were afraid the average college girl would not get the right slant on the position, hence the giving of such an experience to Miss Patton.

Miss Patton was graduated from college with a bachelor of arts degree in 1920, and went to Canada to do newspaper work. Later she returned and took the journalistic degree. She was then told of the need in St. Louis for such a position if she would work as an operator for several months. Pending the placing of her there she worked on an Oklahoma paper for several weeks.

Then, as she tells the story, "I was sent for to work on the switchboard in St. Louis. I went with fear and trembling and reported to the schools, only to be turned down. However, that matter was fixed up and I started in on the most strenuous work I have ever attempted. Covering the wildest story in the world could not compare with it, and I generally ended the day in a gale of tears. Only my determination kept me there. Finally I arrived at the place where I was a real operator and I certainly had more respect by that time for the girls who had answered my "hello" over the telephone. The girls came to know me just as one of themselves and I liked them. It all stands me in good stead now. In return, I have written for their magazine fairy story of a sort that puts into fanciful shape some of the things they do each day. I have endeavored to give them imagination in their dany tasks and ambition.

"There is no way that helps to hold a position higher as much as by working with those of the ranks first. It gives you understanding that is valuable. My friends tell me the system is better since I quit operating and became an editor—maybe so."

Thirty-three Eskimo skeletons arrived in Halifax recently from the far north, for examination and measurement on behalf of the Canadian government by Dr. John Cameron, professor of anatomy at Dalhousie University. Dr. Cameron estimates that it will take three years to complete the study of skeletons and make the thousands of measurements necessary. When compiled the information will be included in a book to be published by Dr. Cameron on the physical characteristics of the Eskimo race.

According to the British Labar Gazette, the average cost of living in England in June was 119 per cent above the average pre-war level. In May the increase over that level was 128 per cent, in January 165 per cent, and in November, the maximum, 176 per cent.

REPORT BLAMES POLITICAL TAPE AND LACK OF FUNDS FOR HANDICAPPING PUBLIC SCHOOL

NEW YORK, Aug. 6.—Two prime causes of the present "deplorable" condition of American public schools are red tape and the handicapping of boards of education by politicians, according to a survey of public school boards and their receipts and expenditures, directed by the national committee for Chamber of Commerce Co-operation With the Public Schools and the American City Bureau made public here today.

The survey which covered conditions in 377 cities showed, it was said, that in 47 per cent of cases where boards of education were "independent," or free from political manipulation or control, that the most efficient administrative and educational results are obtained.

"The best interests of the public schools," says the report, "cannot be served in a city where the budget of the board of education may be reduced and remodeled by city officials who have not made a definite study of the needs of the schools."

Boards which are really a sub-division of the municipal government and whose budget may be changed by municipal authorities are classified as "dependent" and undesirable from the standpoint of the public good.

It is thus pointed out that in the case of cities in New Jersey, the budget must be passed upon by a special board of school estimate; in Oklahoma cities the school trustees are dependent upon an excise board; in Ohio cities, school budgets may be reduced by a special county commission; in New England, school budgets must be submitted direct to a town meeting and in many western cities the budget is determined by some county authority.

The survey shows that the school receipts in the 377 cities for the past fiscal year were $353,200,000, and that the expenditures of these same cities during this period were about $2,000,000 less than income. The funds are from five sources and are supplied in the following proportions: From the states 11.6 per cent; the federal government 0.3 per cent; the county 5.7 per cent; local taxes 65.4 per cent; non-revenue or miscellaneous sources, including income from sale of bonds or short-time loans, 17.0 per cent. The survey shows that of all cities reporting, 70 per cent do not receive a dollor from the federal government. Teachers' salaries aggregated $180,000,000 or 64 per cent of the total of the current expense of the schools.

The total expenditure for debt service varies from four-tenths of one per cent in the eastern cities, one and one-third per cent in the southern cities and up to nine and one-half per cent in the Great Lakes group. In one-fifth of the Great Lakes cities the expenditure for this item is more than 20 per cent of the total expenditure for all purposes. In a number of Ohio cities it is between 30 and 35 per cent.

The relation of capital outlay, aggregating $51,727,554, to the total expenditures, showed that nearly 85 per cent was utilized on sites and new buildings. A total of $1,341,000 was expended for medical inspection and dental and nurse service in the 377 cities named. The part of the total expenditure spent for the alteration and equipment of old buildings was only 1.8 per cent. Commenting on this the committee said:

"The smallness of this amount is of particular interest in connection with the findings of this committee in their report on school housing conditions in American cities. This report shows that a large percentage of the children in the public schools are continually menaced by the unsanitary conditions and fire hazards in many old school buildings now in use. In Eastern cities the conditions are particularly bad."

An intermediate class of school boards, designated as "special," which are neither dependent nor independent, are also discussed in the report and held to be contrary to the best educational policy.

The basis for the committee's survey was an inquiry sent to the superintendents of schools in cities with populations in excess of 8,000. The present survey is the third of a series. The first report, published last October, presented the facts concerning salaries, training and experience of teachers. A second report, published last March, dealt with school housing conditions.

BARBADOS OPPOSE SESSION TO U. S., SAYS DIPLOMAT

By Associated Press.

PLYMOUTH, Eng., Aug. 5.—The people of the West Indies are wholly opposed to any suggestion that the islands should be ceded to the United States as part payment of Great Britain's war debt, according to Sir Gilbert Carter, who has just returned from the islands.

Sir Gilbert, who has been successively governor of the Bahamas, Barbados and Trinidad, and whose wife is the daughter of the late Francis Parker of Boston, Mass., admitted that the interests of the West Indies are largely American; "but if I know anything of the temperament of the people of Barbados, they would resist a cession to the bitter end," he said.

THE

NOLEN-STRINGER CO.

Takes pleasure in announcing the birth of two members of the Haynes Family

NEW 1922 HAYNES 75

and

NEW 1922 HAYNES 55

Complete specifications and blue prints of these new models are now in our saleserooms, located on the corner of Scott avenue and Tenth street, and may be seen by any interested party.

THE NEW 1922 HAYNES 75 TOURING CAR
$2735 Dilivered, Wichita Falls

The more beautiful and more powerful seven-passenger Haynes Touring Car, with the newly developed Haynes--built, six-cylinder motor. The Haynes 75 is also available in the four-passenger Tourister, the two-passenger Special Speedster, the five-passenger Brougham and the seven-passenger Sedan and Suburban. All the new 1922 Haynes 75 models have full aluminum bodies mounted on a 132-inch wheelbase. Cord tires are standard equipment.

THE NEW 1922 HAYNES 55 TOURING CAR
$1985 Delivered, Wichita Falls

The Haynes 55 Touring Car is a full, five-passenger car, with a 121-inch wheelbase and the famous velvety-powered Haynes-built light-six motor. It surpasses all expectations at the low price—$1985 delivered. The utmost in style, economy, durability and performance has been given this light-weight car. Individual fenders and individual steps fit gracefully into its semi-sporty lines. Exterior side cowl lights, cord tires and genuine leather upholstery add to its appearance. Mechanically, the Haynes 55 more than fills your expectations for ruggedness, dependability and reserve power.

The Haynes 55 is also manufactured in the five-passenger Sedan and the two-passenger Roadster.

HARLEY DAVIDSON PRICES REDUCED

August 1st, Harley-Davidson 1922 rock bottom motorcycle and sidecar prices became effective.

No half way reductions have been made, but substantial cuts to the very lowest prices possible.

Only the prices of Harley-Davidson motorcycles and sidecars have been reduced. The characteristic high quality which has distinguished Harley-Davidson as the "World's Best" remains unchanged.

At these low prices, unequaled motorcycle and sidecar values are offered and Harley-Davidson leadership is more emphatically apparent than ever.

	Old Prices	New Prices	Reductions
74 cu. in. electric twin	$520	$390	$130
74 cu. in. magneto twin	485	360	125
61 cu. in electric twin	485	365	120
61 cu. in. magneto twin	450	385	115
Sport electric twin	445	340	105
Sport magneto twin	415	310	105
Tourist sidecar	145	105	40
Roadster sidecar	160	115	45
Two-passenger sidecar	185	135	50

(Above prices f. o. b. Milwaukee plus federal tax.)

World's Most Powerful Farmers' Co-Operative Marketing Body Formed by Southern Cotten Men

NEW YORK, Aug. 6.—Within the last six months, 80,000 cotton growers in Oklahoma, Texas, Arizona and Mississippi, producing nearly 1,500,000 bales of cotton annually, have organized the world's largest farmers' co-operative marketing association. Organization of these four states is, however, only the starting point of a great nation-wide movement which is in process of development in eight Southern states producing 86 per cent of the American supply of cotton. Representative growers in the remaining four states of the union producing cotton have already met with the states now organizing and have unanimously endorsed the plans of the cotton men.

The idea has spread like wildfire through every cotton-growing state in the Union. By the leaders in agriculture and business alike it is universally admitted that the co-operative plan now being adopted by the cotton growers should eventually raise the standard of living in the South, take the women and children out of the cotton fields and vitally affect the prosperity not only of the cotton growers but bankers and merchants as well.

There is an old adage among those whose business brings them in close contact with the farmer, that "co-operative marketing is born of adversity." The cotton growers of the South in general have always been held up as an exemple of a standard of living lower than the general average throughout the United States. The farmers firmly believe that under the system of marketing cotton which has always prevailed they have never received their share of the consumer's dollar; that the market price of cotton on the New York Cotton Exchange has never been the basis upon which the local cotton buyer bought from the farmers.

The individual purchasing power of the farmers of the South has always been less than the purchasing power of farmers of other localities. When a farmer sells a product at a very hazardous margin of profit he inmairs his purchasing power. When sells at a loss he must take his losses out of his tandard of living. The South has always been behind.

Deflation Brought Awakening.

When the price of cotton was at its high-water mark of last year most of the money received by the cotton growers was used to pay off long-standing debts, which prices of other years had not been able to cover. Then came the unexampled deflation in the price of all agricultural products last fall. The price of cotton fell to approximately 65 per cent of its pre-war buying power, wiping out all of the profits which high prices had given the grower and leaving him in a worse situation than ever. Deflation however, proved the psychological incentive for the immediate adoption of suggested remedies for a situation which had existed ever since cotton became the Southern crop.

Early last year Aaron Sapiro, of California, recognized authority on co-operative marketing, had made suggestions for improving the system of selling cotton. The desire for a better system first found expression in Oklahoma. In City of the Oklahoma Farmer Stockman, one of the South's most pr on Aaron Sapiro to present his plan to Oklahoma farmers, bankers and business men. practically unanimous and under the leadership of the Archer Counties organization of the South Eve was commenced.

This drop mo months 35,000 growers, ment of new 000,000 bales of cotton under way for rth under normal conditions showing its eth 000, had organized the crude buyers Cotton Growers Association. Also the tender first unit of what has wherever possible into the American in production ers' Exchange. The suc- said, where the movement in Oklahoma been cut to the lar associations in every New Pro state in the union.

bales and thousands of farmers in other states organized state associations and have agreed to federate and sell their product through a national agency called the American Cotton Growers' Exchange. Under present plans, when all the states are organized, a minimum of 2,500,000 bales of cotton, worth $250,000,000, or 20 per cent of the country's cotton crop, will be marketed through the new Exchange and present indications are that these figures will be greatly exceeded. All of these associations are co-operativ non-profit organizations, with the farmer himself as the sole beneficiary.

Exchange to Act as Selling Agent.

The American Cotton Growers' Exchange, the national selling agency was planned at a recent meeting in Oklahoma City called by Mr. Williams, who was later selected chairman of a national committee to supervise its organization and to control the marketing activities of all the member states associations. This proposed co-ordination for marketing of the country's greatest agricultural product under one head puts the cotton growers and Mr. Williams in a unique relation to the public.

"Just how will the public be affected by this new organization?" was the question asked of the national chairman.

"These organizations are not price-fixing bodies," said Mr. Williams. "They can have no control over supply and demand, except as they may, by the development of new uses for cotton, increase demand. They are deliberate attempts to improve the agricultural and business conditions of the South by the elimination of waste, country damage and efficiency in the marketing of cotton, and by dealing in wholesale quantities which will permirt any purchaser to supply his complete annual requirements from a single source. They will apply city business methods to the handling and marketing of cotton as a commodity and will sell on the highest available market which is open to them and which the normal operation of supply and demand will justify. Representatives of the consuming public sit on the boards of directors of the state cotton associations in order that the public may be fully informed as to their operations and purposes. Representatives of the Federal government will be invited to sit on the board of the National Exchange.

"For many years cotton farmers have felt that they were the innocent victims of various marketing evils. In other sections of the United States this feeling has also prevailed among farmers, and it has frequently led to attempts to solve these business evils by political means. This means class legislation which, while intended to improve the condition of a specific groups, was at the same time harmful to other classes of citizens. The co-operative cotton marketing movement has nothing to do with politics, it is an attempt to solve business evils by economic methods and not political ones. It has no quarrel with any legitimate cotton business, and its operations need not affect the price which the consumer will finally pay for cotton goods.

Standardization by Federalization Is Aim.

"The associations are officered by technical cotton men who know every phase of the business. They are well financed, and their usefulness is conceded by the great cotton firms who now handle the crop after it has passed out of the country districts and into concentration points.

"The fundamental thing behind overhead selling agency, the American Cotton Growers' Exchange, is that the application of business methods by farmers to the marketing of the South's chief crop will improve the prosperity of all business. Every addition to the farmer's income through efficient marketing methods means additional trade in the stores, increased deposits in the banks and lessened risk by city business men in dealing with country customers.

"The standard of living in the agricultural South is as much below that of other agricultural sections of America as the standard of these other agricultural sections is below that of the well-to-do city family. These associations will aid in correcting that evil without putting a corresponding burden on any other class of men. It is for this reason that they have received the unanimous approval of the business interests of the South and have developed so tremendous a growth in so short a time."

PRODUCTION FOR PRESENT YEAR SHOWS INCREASE

Production reports from the car and truck factories of the country show that the automobile business in the second quarter of 1921 was 87 per cent of the corresponding period in 1920, due largely to the fact that one of the chief manufacturers is operating at 136 per cent of the 1920 basis. The other makers, however, are going on a 57 per cent basis and are manufacturing at 107 per cent, or more than double the rate of the first quarter this year. Motor truck production is more than one-third better than it was during the first quarter.

This return of activity in the third largest industry is expected to be a marked stimulus to other lines. During the second quarter cotton production was at 82 per cent, employment at 75 per cent, zinc at 41 per cent and pig iron at 39 per cent of the same period a year ago. The effect of the large sales of automobiles is expected to be felt in these commodities during the third quarter.

Automobiles not only consume large quantities of raw materials, but also call for production in semi-finished and allied lines, such as electric wire, accessories, tires. The industry itself employs over 300,00 men in its factories, with as many again in the accessory plants.

There are 35,000 dealers in the country employing 100,000 salesmen. This army of salesmen has been one of the most potent forces in turning the tide of depression.
