PERRYTON, OCHILTREE COUNTY, TEXAS, THURSDAY, MARCH 5, 1942

NUMBER 10

Ochiltree Farmers United for 'Food for Victory'

May Include Ochiltree County in Food Stamp Plan

New Mailing Plan Reduces Program Cost

Hold Conference To Study Plan Friday, 2:30 p. m.

It appears very likely that Ochiltree county will be included in the federal food stamp plan under the new mailing plan for distribution stamps put into operation in the Panhandle counties on Mar. 2. County Judge Dave Shanks, Commissioners Fred Tarbox and W. G. Gary and County Welfare Officer P. L. Garrett attended a conference in Amarillo, Tuesday, at which the plan was outlined by district Supervisor Claude B. Shanks.

The eight counties starting on the plan Monday were Armstrong, Ham, Cottle, Knox, Throckmorton, Haskell, Hardeman and Nolan. A conference of the Commission and Perryton bankers and grocers has been called for Friday, Mar. 6, 2:30 p. m. in the county courtroom by Judge Shanks for consideration of the plan.

Eligible to participate in the food stamp plan are following: recipients of aid to dependent children; recipients of aid to the aged; recipients of aid to the blind; recipients of aid to the physically handicapped; recipients of aid to the unemployed; recipients of aid to the widowed; recipients of aid to the orphaned; recipients of aid to the destitute; recipients of aid to the indigent; recipients of aid to the pauper; recipients of aid to the beggar; recipients of aid to the vagrant; recipients of aid to the homeless; recipients of aid to the hungry; recipients of aid to the thirsty; recipients of aid to the cold; recipients of aid to the naked; recipients of aid to the diseased; recipients of aid to the suffering; recipients of aid to the dying; recipients of aid to the dead.

Ervin R. Buchanan Appointed as Explosive Agent

Ervin R. Buchanan, county clerk, has been appointed explosive agent for Ochiltree county. For the duration of the war, one can purchase explosives of any nature unless they have first obtained a permit from Mr. Buchanan.

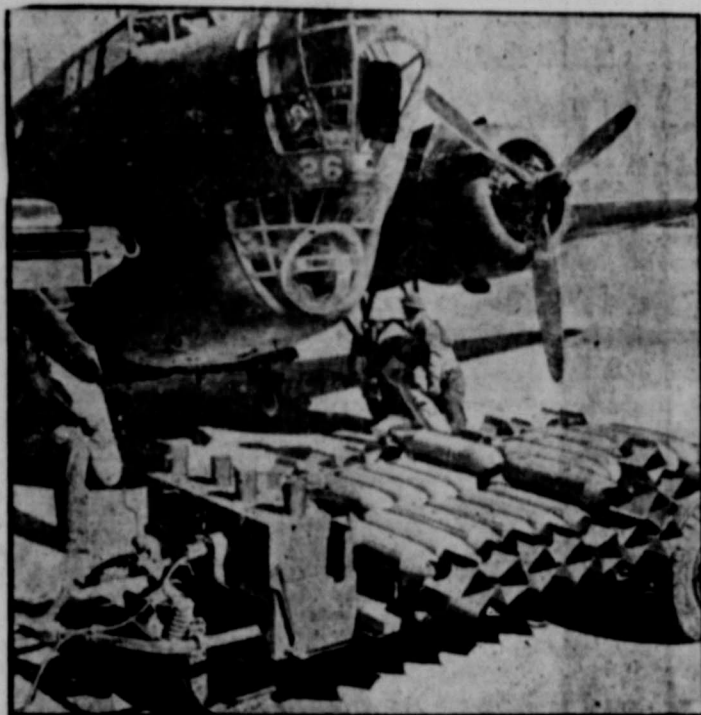

This precautionary measure is taken so that enemy agents cannot secure explosives for sabotage.

Ochiltree County Exceeds Feb. Bond Quota by 35 Per Cent

Even though February is the shortest month in the year, it did not prevent Carl Ellis and his fellow members of the Ochiltree County Defense Bond Sales Committee from over selling the county's quota by 35 per cent. With an assigned quota of \$25,525, Ochiltree county citizens purchased \$34,517.50 worth of bonds and stamps during February.

January bond and stamp sales for the county were \$30,705, bringing the total for the first two months of 1942 to \$65,222.50, almost 28 per cent over the quota. Ochiltree county has been assigned a quota for the year of \$306,300 or a monthly quota of \$25,525. Chairman Ellis stresses the fact that to attain this quota, every single person in Ochiltree county is going to have to put every available cent into stamps and bonds. It means an average of \$70 for every man, woman and child in the county, Mr. Ellis says. "We're off to a good start but we've got to keep the good work up."

Bombardiers Seek Targets

Training bombs, each weighing 100 pounds but containing only one pound of powder, are loaded on a B-18 bombardier training ship at Albuquerque, N. M. Actual target bombing is practiced by aviation cadets from all parts of the country who are receiving advanced training.

Ochiltree USO Book Drive Closes Mar. 10

Tom Elzey, chairman of the Ochiltree County USO Committee, urges that community chairmen exert every effort to bring the drive for books for soldiers to a close on March 10. The chairman and all others wishing to help in this worthy cause are requested to bring their books to the Herald office, where they will be prepared for shipment. There is not a home in Ochiltree county that cannot spare a readable book or two for the boys in the service. The USO expects to obtain millions of books for service men in this nationwide campaign.

First Aid Class Is Organized

A Standard class in First Aid work, the second to be organized since the first of the year, met Tuesday evening in the radio room at the school building for organization and the first lesson.

This course is taught by Hadley Reeve, grade school principal who will be assisted by Ray Veale. It will cover twenty hours of class work, convening twice a week for two-hour periods. Starting March 9, lessons will be held each Monday and Tuesday nights beginning promptly at 7:30 p. m. in the radio room.

A few others may enter this class if they will enroll by the next meeting. It is the intention of the Red Cross to provide classes for everyone who desires to take the First Aid work. Classes will be organized as rapidly as possible and will be arranged to meet the needs of the group. Please contact Leroy Hartman, First Aid chairman, if you want the work.

Friends will Honor Grandma Jackson Sun.

Friends and neighbors of many years standing will gather at the Jackson place down on Wolf Creek Sunday to honor Grandma Jackson who will celebrate her 86th birthday on the following day, Monday, Mar. 9. The annual birthday for Grandma Jackson, the county's first citizen, have come to be regular old timer reunions. Poets come for miles, bring well filled baskets and spend the day talking about "yesterday."

Survey Shows Over One Million Bushels Grain In Elevators and Farm Storage in County

Auto Tags Can Be Placed on Cars

Car owners can put 1942 license plates on cars now, so states Sheriff J. S. Talley.

Plates have been on sale since Feb. 1, but the law did not permit them to be placed on cars until March 1. All vehicles operating on the highways and public roads must be equipped with the new 1942 plates on or before April 1.

A large number of car owners have bought their new 1942 plates.

Extension of Wheat and Barley Loans

WASHINGTON, Mar. 2.—The agriculture department today authorized extension of 1941 loans on wheat, rye and barley stored on farms and in good condition for a period of 12 months from the current Eastern and Southern areas to be designated later.

The department said loans on wheat defined as excess under marketing quota provision whether stored on farms or in approved warehouses, also may be extended until the new date.

The Commodity Credit Corporation, which handles the loan program, announced it would advance seven-cent-a-bushel storage on the number of bushels of farm-stored wheat on which loans are extended, provided this allowance was not advanced at the time the loan was made.

Producers also will be entitled to an additional storage allowance of five cents a bushel on extended farm-stored wheat loans payable on delivery.

Named Best All Round PHS Students

Pretty and intelligent Jane Rogers and handsome Jimmy Hall, both popular members of the senior class, have been selected as the best all-around girl and boy in P. H. S.

Jane has one of the best scholastic averages in high school, takes a keen interest in school dramatics, is art editor of the "Ranger," is a member of the P. H. S. Glee Club, and is a member of the P. H. S. Student Body.

Jimmy is a member of the P. H. S. Football Team, is a member of the P. H. S. Basketball Team, is a member of the P. H. S. Track and Field Team, is a member of the P. H. S. Chess Team, is a member of the P. H. S. Debate Team, is a member of the P. H. S. Dramatic Club, is a member of the P. H. S. Music Club, is a member of the P. H. S. Art Club, is a member of the P. H. S. Science Club, is a member of the P. H. S. History Club, is a member of the P. H. S. Geography Club, is a member of the P. H. S. English Club, is a member of the P. H. S. Mathematics Club, is a member of the P. H. S. Physical Education Club, is a member of the P. H. S. Social Science Club, is a member of the P. H. S. Civics Club, is a member of the P. H. S. Government Club, is a member of the P. H. S. Economics Club, is a member of the P. H. S. Law Club, is a member of the P. H. S. Medicine Club, is a member of the P. H. S. Agriculture Club, is a member of the P. H. S. Home Economics Club, is a member of the P. H. S. Industrial Arts Club, is a member of the P. H. S. Mechanical Arts Club, is a member of the P. H. S. Electrical Arts Club, is a member of the P. H. S. Chemical Arts Club, is a member of the P. H. S. Biological Arts Club, is a member of the P. H. S. Geological Arts Club, is a member of the P. H. S. Income Tax

RETURNS PREPARED!

This is to inform our customers and others who wish to avail themselves of our service, that we have on hand a supply of forms for Income Tax Returns for the year 1941 and are now ready to prepare returns, as has been our policy for the past 23 years.

—Changed Basis for Filing Return—

Single individual or married individual not living with husband or wife, having GROSS INCOME of \$750.00 or more, married individuals living together having a combined GROSS INCOME of \$1,500.00 or more are required to file return.

We have made a special study of the 1941 Income Tax Laws and believe that we can save you considerable money, bother and time by making out a return for you. Our fees are reasonable. We take care of any future correspondence concerning your return.

Ranger '42 Football Conference Schedule

The Perryton Ranger's football conference schedule for fall season, 1942, has been made out. The Rangers will start the season with four let-terms and three men who were ineligible for competition last fall carrying the burden. The schedule is as follows:

Oct. 16—Canadian Here
Oct. 23—Phillips Here
Oct. 30—Open
Nov. 6—Phillips Here
Nov. 13—Panhandle There

These are only the conference games.

Sugar Aplenty For Canning

Housewives are going to have plenty of sugar for home canning this summer and every effort is being made to have it available. That is the assurance of J. B. Joyce, acting manager of the War Production Board's Southwest priorities field office in Dallas.

Mr. Joyce emphasizes that monthly allocations of refined sugar are taking into account the sugar that will be needed this summer for home canning.

"The supply may be somewhat limited," he explained, "just as the supply for daily consumption is limited; but it will be sufficient to enable housewives to can what they need."

He added that reports have come to his office that some housewives are buying more sugar than they need for normal family use, and are explaining that they want to be sure of having enough sugar for home canning this summer.

"That sort of buying is unnecessary and it is also unwise," Mr. Joyce warns. "It aggravates a situation that already is difficult. We're making every effort to see that sugar is made available for home canning next summer and Washington advises us that the Office of Price Administration will handle its distribution."

Buckhaults Leads in Defense Bond Purchase

The sale of Defense Stamps started in Perryton schools early in November. Every student was urged to buy them in order to play their part in the national emergency.

Wallace Buckhaults, a senior, has bought through the school the greatest number of bonds. To date Wallace has purchased as at maturity, \$400 in bonds.

New car registration in Texas dropped off 87 per cent during January in comparison to the same month of 1941, according to University of Texas Bureau of Business Research reports. Only 818 cars were sold in the state.

This is a time when every one is urged to be faithful. The world's need demands that we be faithful. If the church does not mean enough to its members to demand their faithfulness, then we cannot expect the world to be attracted by the church. The only machine that runs better with grit in it is the Human Machine. It takes grit to live a Christian life. It requires no effort to serve the Devil. The Lord says, "Do good." The Devil says, "Do Nothing." Which requires effort? The Lord says, "Be a Christian." The Devil says, "Be Nothing." Which requires grit?

"The Church With a Welcome to All."

Christian Science

"Man" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, March 8, 1942.

The Golden Text is: "Have we not all one father? hath not one God created us?" (Malachi 2:10).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "God that made the world and all things therein, seeing that he is Lord of heaven and earth, dwelleth not in temples made with hands; Neither is worshipped with men's hands, as though he needed any thing, seeing he giveth to all life, and breath, and all things" (Acts 17:24, 25).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Man, in the likeness of his Maker, reflects the central light of being, the invisible God. As there is no corporeality in the mirrored form, which is but a reflection, so man, like all things real, reflects God, his divine Principle, not in a mortal body" (page 308).

SUNDAY SCHOOL LESSON

Temperance Lesson Seeks Reasons Why Liquor Habit Grows

The International Uniform Sunday School Lesson for March 8 Text: Genesis 43:24; Psalm 104:14, 15; Proverbs 31:4-7; Ecclesiastes 2:1-3, 10, 11; Isaiah 56:12; 1 Corinthians 10: 6, 7.

THIS temperance lesson with its many passages is unique among temperance lessons, which in the main tend to have a conventional form and to be based upon the assumption that all those who read and study the lessons are either total abstainers from liquor or consumers of liquor in the cause of temperance reform, or both.

Nevertheless, one must recognize, especially today, that we are in changed conditions where many, even in our churches where this lesson will be studied, are not strict abstainers and are not notably identified with the temperance movement.

It is these circumstances and prevalent conditions today that give significance to a lesson which puts more emphasis upon causes than upon effects and results. I have long felt that we ought to lay more stress upon discovering why people drink and upon stopping the demand for liquor, where the tendency has been to lay emphasis upon stopping the supply. Of course, such a discovery would carry us far beyond this lesson.

But the lesson from a Book that is true to human life and human nature throws considerable light on the problem. It would be interesting to know how large a part an inferiority complex plays in the resort to alcohol. The man who drinks a few glasses gets an inflated conception of himself and of his world.

I have seen immense harm and suffering come through the liquor habit, but I have never known a case where any man, or his home, or his environment, was the worse off for his being an abstainer. This, I think, is rather important testimony, and I believe that it would be borne out in a wide survey of life.

This is why I believe that temperance lessons, despite their somewhat uniform and conventional quality, are still very important. But this is a particularly fine temperance lesson, and one that goes right to the depth of the matter.

Make a Career Of Navy Service

Retirement at age of 37 with pay of \$63 per month, increased to \$110.35 at age 47, is now open to 17 year old youths who choose the Regular Navy for enlistment and make a career of the service. Older men may plan on retirement at corresponding older ages, the recruiting officer, in charge of the U. S. Navy Recruiting Station at Amarillo, announced today.

Enlistments in the Regular Navy are for service until 21st birthday of those between 17 and 18 years of age. Those who have passed their 18th birthday are enlisted to serve for a period of six years. Age limits for first enlistments in the Regular Navy are from 17 to 31 years. Parents' consent is required for those under 21 years of age.

Men who desire to serve in the naval service only during the period of war may still enlist in the Naval Reserve and will be released to inactive duty and returned to their homes as soon as their services can be spared. Age limits for enlistment in the Naval Reserve are from 17 to 50 years.

Add Two Million To Unemployed

AMARILLO, Feb. 9.—Two million workers are expected to be added to the national total of four and one-half million unemployed by next June, according to a report received by WPA District Manager A. A. Meredith at the recent meeting of Texas staff members with WPA Commissioner Howard O. Hunter, of Washington, D. C.

Returning to his office today, Meredith advised that Commissioner Hunter's Texas conference was in connection with his national-wide trip to observe first-hand the changes in employment and unemployment conditions created by the dislocation of workers because of small plant shutdowns due to priorities and the conversion of manufacturing industries to war production.

Of the 1,000,000 persons now employed in the country by WPA, 450,000 were reported by Hunter to be working on military projects directly connected with the war effort program. He pointed out as an example of this type of work that about 85 per cent of the airport construction which has been completed in this country since 1935 has been done through the WPA program.

Hunter emphasized particularly, in his discussion with members of the Texas staff, the necessity of keeping the organization prepared for the work of coping with anticipated post war unemployment problems.

Between 55,000 and 60,000 additional workmen are going to be required by Texas defense industries within the next few months, in the opinion of Dean W. R. Woolrich of the University of Texas College of Engineering.

Texas 1941 Traffic Deaths Just Short of an All-Time Record

AUSTIN, Feb. 10.—Texas fell just short of an all-time high in traffic deaths in 1941, State Police Director Homer Garrison announced today. Final count showed that 1,979 persons were killed in crashes during the year. This was the highest toll of any year on record except bloody 1937, when 2,043 traffic victims perished.

It was a 13 per cent increase over 1940's toll of 1,757 deaths. The national increase was 16 per cent.

December, with 226 fatalities, was the highest death month of the year and second only to December, 1937, which claimed 230 lives.

With Army vehicles on the move, with trucks and cars jamming the highways in defense activities, it was the highways which registered the greatest increase in lives suffered out—an increase of 20 per cent. It was pointed out that, although the Highway Patrol, recently was strengthened by the addition of 90 men, most of these were not on actual duty until Jan. 1, too late to influence 1941's record.

Cities reflected an 11 per cent

increase in fatalities; small towns a 1 per cent increase, and roads, a 7 per cent decrease.

Houston led the big cities in the improvement in traffic safety with a reduction of 9.5 per cent in toll, a drop from 63 in 1940 to 57 in 1941. San Antonio registered a 10 per cent reduction, from 42 deaths, and Fort Worth a 4.5 per cent decrease from 33 to 31 deaths. Dallas' top-ranking safety city, led the year with a 40.9 per cent decrease, from 22 to 13 deaths.

Among cities of 50,000 to 100,000 population, Tyler registered a 33.3 per cent drop from 6 to 4 deaths, while El Paso clinched the position with a 150 per cent decrease, jumping from 16 deaths in 1940 to 25 in 1941.

Ablene, with a 66.7 decrease from 6 to 2 deaths, led all cities of 10,000 to 50,000 population. Tyler dropped from 1 death in 1940 to 0 in 1941, an increase of 700 per cent. Seven cities of between 10,000 and 25,000 had a deathless year. They are Paris, Denton, Temple, De Witt, Harlingen, Terrell and Big Lake.

Edison's Ideas Go to War

American scientists and inventors, many of them working in the laboratories of American industry, will play a big part in helping to win the war.

1. Thomas A. Edison, born 95 years ago on February 11, was one of America's greatest inventors. In addition to his famous lamp . . .

2. . . he built the first America's electric power system, and discovered some of the principles which other scientists used to give us the radio.

3. Today electric light, electric power, and radio—so much improved that Edison wouldn't know them—are performing many vital tasks in America's war effort.

4. And scientists throughout the nation, in laboratories like G-E Research Laboratory, working, as Edison once worked, to bring victory.

General Electric believes that its first duty as a good citizen is to be a good soldier.

GENERAL ELECTRIC

Dr. Ryan To Conduct REGULAR MONTHLY Health Clinic

Dr. Kunkel, Denver Specialist

Will be in Perryton

• Monday
• Tuesday
• Wednesday

March
9-10-11

Health examinations will be given in Dr. Ryan's office Monday, Tuesday and Wednesday, March 9 - 10 - 11 with the aid of the Hemovitometer machine which detects traces of disease as well as other deficiencies of the body through electrical vibration.

The Hemovitometer offers a new form of diagnosis in that it can locate poison toxins in the human body that may be causing arthritis, colitis, constipation, fatigue, high and low blood pressure, headaches, indigestion, gall bladder, heart, kidney and liver trouble, ulcers of stomach and bowels, etc.

If you are overweight and are desirous of reducing, whether your trouble is glandular or improper diet, the proper recommendations will be made to bring back your normal weight. The proper vitamins and minerals will also be recommended in each individual case.

Dr. Kunkel of Denver, Colo., will conduct the three day clinic.

Phone 394 for appointment. A nominal fee of \$2.00 is charged for a complete examination of your case. Remember the dates—

MONDAY - TUESDAY - WEDNESDAY, MAR. 9-10-11

ELECTRIC POWER
helps build America's
FIGHTING POWER

Electric power on the production line helps put fighting power on the battle front. It takes power—and plenty of it—to produce the planes, tanks, ships and guns we need, but America has a lot. More than Germany, Italy and Japan combined. Enough to insure an arms output that will eventually engulf our enemies.

America has this power because America's privately-owned, business-managed electric companies looked ahead. They were ready at the start of our armament program with a reserve power capacity averaging 35% above normal requirements. And they have continued to provide new capacity as new demands have been foreseen. In 1941 over 2½ million horsepower of new generating equipment was added. Another 3½ million is scheduled for completion this year.

We are proud to be part of an industry that has been able to make such a valuable contribution to the nation's war effort. America's business-managed power companies are exerting every effort to meet the urgent demands of defense and at the same time take care of civilian needs.

NORTH-EAST TEXAS PANHANDLE AND WESTERN OKLAHOMA FARM AND RANCH NEWS

CA's Encourage Home Gardens

HOUSTON, Tex., Mar. 3.—Produce Credit Associations are encouraging members to increase their gardening this year as one of the vital phases of war production. According to President Virgil Lee of the Production Credit Association of Texas, the associations, which are far-flung stockman owned cooperatives, provide credit service for every family in Texas, have always maintained that live-at-home programs are a fundamental principle of farm management, he said. This all-out war effort there are incentives for producing and raising food at home. Transportation and distribution facilities for military purposes will be used, families will be better off, and home labor can be used to cash savings.

There are 36 associations in Texas, have 36 member-borrowers and other farmers and ranchmen in their respective territories that they are to take on additional business in the national effort to at-home for Victory goals, Lee pointed out that the associations feel that home gardens are a basic part of the program.

Texas Farmers Pledge Victory Production for War Effort

By B. F. VANCE
Chairman, Texas USDA
War Board

As planting season begins, Texas farmers tackle in earnest the biggest job they have ever been asked to do—the production of a record crop of food.

But it's a job they have said they could do and that they will do. America placed an order with Texas farmers for 615,763,250 gallons of milk; Texas farmers pledged 663,000,000 gallons.

America called for 207,274,000 dozen eggs; Texas pledged 231,585,721 dozen.

America asked for the marketing of 3,531,287 head of beef cattle; Texas pledged 3,776,431 head.

America ordered 2,017,462 hogs; Texas pledged 2,676,694.

All down the line of increased production of crops needed to win the war, Texas farmers have responded wholeheartedly.

Behind this program for increased production are the U. S. Department of Agriculture War Board, composed of representatives of all USDA agencies in the state. These boards, set up by Secretary of Agriculture Claude R. Wickard last July, have been assigned the task of aiding agriculture to shift from a peace-time to a war-time economy. From peace-time production to war-time production. The boards were set up in each state and each agricultural county in the nation.

Heading the war board program in the state is the Texas USDA War Board, which directs the various agricultural war programs, such as scrap iron collection, machinery repair and food production, of the Department of Agriculture. Each agency of the U. S. Department of Agriculture is represented on the board by one member.

But it is upon the 254 county USDA war boards in the state that the state board depends. The county board set-up is along the same lines as that of the state board with the county AAA chairman acting as chairman of the county USDA war board and one member representing each agency of the USDA in the county.

The first big job undertaken by the boards was the farm plan sheet and production pledge sign-up last November. Working principally through the Agricultural Adjustment Administration, the boards conducted

Perryton Markets

Wednesday, March 4, 1942	
Wheat	 \$1.06
Heavy hens	 17
Light hens	 15
Eggs	 24
Roosters	 09
Stags	 11
Cream	 33
Hides	 09

The sign-up to determine just how much food Texas would produce in 1942. The results, a few of which are mentioned at the start of this story, amply demonstrated that Texas farmers were more than ready to do their share in producing food for Victory.

Other jobs were given the boards. One of the most important campaigns being carried on is the collection of scrap iron. Scrap is an essential ingredient of steel, and the supply has been insufficient to keep them running, full blast. The USDA war boards are sponsoring an intensive campaign to get the thousands of tons of scrap steel lying around on farms off the ground and into the mills.

At the same time, the USDA war boards are sponsoring a campaign to get all farm machinery in shape for the big production job ahead. Machinery is necessary for production. Broken-down machinery would impede agriculture's war effort. In this same connection, the war boards have furnished information concerning priority problems arising when farmers and dealers were unable to obtain needed repair parts.

Still another program is intended to increase the acreage planted to tomatoes for canning. The state war board, working with county war boards in tomato areas, conducted meetings to acquaint producers and canners with the program and to encourage the contracting of acreage. In return for cooperation with the program, the U. S. Department of Agriculture will guarantee minimum fair prices to both growers and canners. A tremendous increase is expected in the amount of canned tomatoes produced in Texas.

Other jobs are now in the offing. What they will be, no one can say for sure. But one thing is certain. Texas agriculture, with the help of the USDA war boards, will do everything that is asked of it to help America win through to Victory.

Cans Available For Home Use

Tin cans of the home-canning type will be available in ample supplies for home and institutional canning, according to WPA announcement. The recent WPA order restricting sales of tin cans by manufacturers to commercial canners is not applicable to home canners, it was pointed out, since the order classifies "canners" as those packing for re-sale. The department of Agriculture hopes to raise home canning this year to a level about 100 per cent above 1941.

HOME DEMONSTRATION CLUB NEWS

McMillen Club

The McMillen Home Demonstration Club met Thursday, February 26 with Mrs. Willis Hardy as hostess.

The recreation was conducted by Miss Paye Hardy with Mrs. Willis Hardy receiving the prize. Mrs. Plummer, president, asked the club members to be sure and get their goals made for the improvement of each one's yards. Mrs. Hollis Gossett, council delegate, was elected to have her name submitted to Council to be voted on as a delegate to go to District Meeting in Amarillo sometime during the first part of May. The members voted to meet at 3 p. m. instead of the former hour 2 p. m.

Mrs. James Hardy gave a very informative talk on "The Originator of Home Demonstration Clubs and her Motives." A very interesting round table discussion was conducted by Mrs. Plummer on the "Expansion and Future of the Home Demonstration Clubs."

Those present for the meeting were: Mrs. R. E. Matthews, Mrs. E. L. Barnes, Mrs. Willis Hardy, Mrs. Ellis Matthews, Mrs. B. E. Plummer, Mrs. Fred Tarbox, Mrs. James Hardy, Miss Paye Hardy and Mrs. Paul Hardy, a visitor.

Missouri Ave. Club

The Missouri Avenue Home Demonstration club met with Mrs. H. M. Hawk, Friday, February 27. Roll Call was answered by "What I Have" derived from My Home Demonstration Club. Some of the answers were, "The Association of Friends and Neighbors." "The incentive to make better and more attractive homes, to serve our families better prepared, and well balanced food."

During the program Mrs. Zenor read a paper on Washington, the Father of Our Country. Mrs. A. W. Henry, leader of the program gave the history of Home Demonstration Clubs. "In 1903 Dr. S. A. Knapp started the first Demonstration Farm. The Boys club was organized in 1918. Miss Edna Trigg, Milam County, Texas, was the first Home Demonstration Agent appointed in 1912. The work with adult farm women only really began in 1915. The first club in Ochiltree county was organized in 1933. Miss Crowder was the first agent in the county."

Mrs. C. O. Roach gave a talk on Mrs. Maggie Berry. It was through her efforts that we have the Home Demonstration Agents. She is a little woman with white hair, bright, dark eyes, and a strong ringing voice. Her eloquence and voice are so stirring, that people who listen, forget she's little and nearly eighty years old. The Texas Home Demonstration Association paid tribute to her, by naming its College Scholarship, "The Maggie W. Berry Scholarship."

Perryton Club

The purpose of Home Demonstration clubs is to give the women and girls the basis of home economics and the fullness of living as homemakers, individuals and citizens," stated Mrs. D. K. Baumann to the members of the Perryton Home Demonstration club when they met February 25 in the home of Mrs. M. F. Hethcock with Mrs. Delta Davis, hostess.

Both mothers and fathers are homemakers, therefore each should have training in the things that relate to their work. The children should be given a share in the responsibilities in proportion to their age and understanding. These were further comments of the speaker.

Others present for the meeting were Mrs. V. H. Hawkins, Mrs. A. N. Dowers, Mrs. W. M. Dull, Mrs. Ernest Gyger, Mrs. M. F. Hethcock, Mrs. B. B. Lee, Mrs. Lake Patton, Mrs. Garland Redfern, Mrs. E. W. LeMaster, Mrs. J. R. Gunter, and Miss Elizabeth Huffines.—Mrs. J. E. Mullins, reporter.

Plan Gardens Now

The strawberry is one of the three fruits that are generally adapted to Ochiltree County climatic and soil conditions and a large number of families have grown this fruit successfully for years.

Mr. and Mrs. Marvin Groves of the Waka community have been especially successful for the past several years in growing the crop. Mrs. Groves gives us a few pointers on the spring planting of strawberries. Strawberry plants from 12-18 months bear better than possibly at any other time—for that reason plants should be set out at about six months intervals. Mrs. Groves says that to reset plants now the ground should be well worked and allowed to stand for a few days.

New plants should be separated from the old plants and reset in the new ground, being careful to set crowns at the same level that they have been growing. Plants should be spaced at 18 inch intervals in two foot rows, and should be watered immediately and kept wet until they are established.

Spring plants should be kept free from both blooms and runners until they are well developed. These plants will produce berries this fall but should not be allowed to bear until then.

Runners should be pinched back until late fall then allowed to grow for spring planting.

Strawberries planted in the fall are best for spring production.

From 200 to 300 plants are sufficient for the average family needs for eating and preserving.

Agriculture Is Ready

By GEORGE SLAUGHTER
Chairman, Texas AAA Committee

When war struck the United States, agriculture, unlike so many other industries, already was well underway with its program of conversion to war-time production and thus was well-prepared to do its share towards winning the war—and writing the peace.

For agriculture started its conversion to war production a year ago when Secretary of Agriculture Claude R. Wickard asked for greater production of certain foods which are needed by nations at war. A little later, in July 1941, he ordered the setting-up in every state and every agricultural county in the nation, U. S. Department of Agriculture Defense Boards and to these boards he assigned the task of helping the farmers of America shift from peace-time production to war-time production.

But, as a matter of fact, agriculture's preparedness goes back much farther than 1940. It goes all the way back to 1933, nine years ago this week, when the then Secretary of Agriculture, Henry A. Wallace, called to Washington a group of farmers with the idea in mind of formulating a program for agriculture. Out of that conference came the National Farm Program which helped agriculture through the depression.

The National Farm Program was more than an emergency measure, and the people of the United States today can be thankful that they already have in operation a program which has made the conversion of agriculture to war production a comparatively simple matter. Many of us remember the agricultural measures taken in the last war—measures which resulted in irreparable damage to our soil and which did their part in so damaging the farmer's economic status that it took 20 years to bring him back to a complete level with other groups.

In this war the situation is entirely different. The American farmer already has a program which protects him, which keeps him informed as to what crops are needed, and which guarantees him fair prices for the products he raises.

The peace-time regulations of the AAA were not perfectly adapted to the war-time job, but the basic principles of the program are adapted to any type of economy—war or peace. Regulations which do not fit into the war program are being changed constantly so as to encourage greater production of the foods needed in the war.

Ever since the farm program got underway in 1933, we have said that it was an "adjustment" program

and not just a "curtailment" program. Until war began in Europe, there was no need to adjust any crops upward. The problem was to find markets for the crops we already were raising. The only adjustments which needed to be made were downward—and the farmers were willing to make them.

But when war began in Europe, the situation changed. Beseiged England needed vast amounts of food—enough to feed one-fourth of her population. As the war spread, other countries were laid waste, other countries cried out for food.

American agriculture was ready. It had the farm program to assist in its conversion to war-time production. Agriculture will do its war-time job by producing in plenty for the armed forces, for the workmen who are making implements of war, for the rest of the people, and for our Allies who need our food if they are to carry on to Victory.

When Secretary Wickard called for a survey of the agricultural plant of the nation, the job was handed to the Agricultural Adjustment Administration, since the AAA had the machinery with which to make such a survey.

Thus, last fall the AAA conducted a production pledge sign-up throughout the nation, asking each farmer what he could produce to help win the war. Such a sign-up was possible on short notice only because the AAA program is built of, by, and for farmers. In each agricultural county and community, the AAA is represented by committees who are elected by the farmers themselves to administer the program. These men, working with their neighbors, were able to complete the sign-up and report to Secretary Wickard the amount of food which would be produced this year.

The sign-up job was only one of the many which the AAA is carrying out as its share in helping various changes which have been made in the program. Suffice it to say that any and all changes which will contribute to the war effort and at the same time not deprive the farmer

Victory at Stake At Planting Time

COLLEGE STATION, Mar. 1.—What is done at planting time may mean success or failure of the Food for Victory program.

That's why Texas farmers must be more careful than ever before during this planting season, B. F. Vance, chairman of the Texas USDA War Board, said today in inaugurating Plant for Victory Week, March 1-7.

"Victory may hang in the balance as the farmers of America plant their crops this spring," Vance declared. "You may not feel that crop failure or success on your individual farm will make any substantial difference in the amount of food for our army, navy, workmen and allies, but a crop failure on your farm multiplied by crop failures on thousands of other farms would seriously damage our war effort."

"We must not fail in this greatest food production job in history. Our own people are depending on us. Our Allies are depending on us." Vance emphasized the importance of planting ample supplies of feed crops in order to meet production goals for livestock, eggs, and milk; more oil-bearing crops such as peanuts; and more food crops such as rice and vegetables.

mer of his rights are being made.

We are in this war till Victory and the American farmer will do his share towards winning that Victory. We have the land to produce the foods which are needed, and we have the Farm Program to help us produce them.

The American Eagle poised on guard above a cargo ship is the design which the U. S. Department of Agriculture has made available to identify United States food products wherever they are sent throughout the world.

Not Wheat but Milk and Eggs

In 1918 wheat headed the list of farm products needed for national defense purposes. In today's emergency, however, the emphasis is on foods such as milk and eggs. There is plenty of wheat on hand—in fact, nearly a two year's supply is stored in the nation's Ever-Normal Granary. The U. S. Department of Agriculture urges that farmers, in planning for next year, hold down production of surplus crops such as wheat and at the same time expand production of defense foods needed today.

Teacher Accepts Midland Position

Miss Minnie Elmyr Waincott, teacher of the 4th grade, left Monday, February 23, for Midland where she has accepted a position in the Midland schools.

Miss Waincott has been teaching in Perryton for three years. Her position in Midland will be the same as it was here. Mrs. Ellis Kelley is acting as substitute teacher until a teacher is employed to fill Miss Waincott's place.

John Chick, age 24, will soon be in the United States Army three years. He enlisted in the regular forces Aug. 21, 1939. He is stationed with Battery A, 82nd Field Artillery, Fort Bliss, Texas.

Check Livestock Equipment Needs

COLLEGE STATION, Mar. 1.—

Hog, beef cattle and other meat animal growers are urged by B. F. Vance, chairman, Texas USDA War Board, to check over equipment needs and order repair and new materials.

There are two reasons why this should be done immediately, he says. First production of stock-raising equipment has been lowered because of wartime demands on factories, and second, transportation facilities are going to be bogged down with war materials, making it difficult to get delivery of needed items.

Use of materials for manufacture of new farm equipment is restricted to an average of 83 per cent of the materials similarly used in 1940, while materials for manufacture of repair parts are available in larger quantity than the 1940 level.

For this reason, special emphasis is being placed on repair of used equipment instead of purchase of new materials, Vance said.

No details are permitted for manufacture of hog troughs for which substitutes can be used, and material for manufacture of steel stock tanks is restricted to 52 per cent. At the same time these materials are being cut down, the chairman said, materials in manufacture of wooden stock tanks is permitted at 351 per cent of the 1940 level.

Restrictions in the use of materials for manufacture of other items involved in production of meat animals, include electric fence controllers, ensilage cutters, feed cutters (hand and power) corn shellers, feed grinders and crushers, engines for pumping and grinding, and equipment for wells, reservoirs, sup-

Brooding Equipment

by Lawrence Morris

Associate Extension Poultryman

Are you getting baby chicks right away?

Do you know how many you need to fill the laying house next fall?

Do you have your brooder equipment ready?

Do you know how much feeder and water space you need?

These, and a lot of other questions, need answering before you can have best results brooding your chicks.

First of all, get your chicks in time for them to mature and start laying early next fall. Pullets that start laying then lay more eggs and make more profit than hens that start laying at other seasons. Get your Rhode Island Red, Plymouth Rocks, Wyandottes, and such breeds before April 1, and your Leghorns between March 15 and May 1. Late spring chicks usually grow slower, have higher death loss, and lay fewer eggs than earlier hatched chicks.

On the average, it takes about 3 chicks to produce one mature pullet, so if you want 100 pullets next fall, you will need about 300 mixed sexes, or 150 pullet chicks.

One cause of early chick losses is not having the brooder equipment in readiness when the chicks arrive. Get out the brooder stove, now, and clean it up. Check all parts and, if possible, operate it for a day or so. Maybe the thermostat wafer is dead and a new one is needed, or maybe some part is broken. Remember, spare parts may be hard to get, so play safe.

Metal brooding equipment is fine, if you can get it, but maybe you had

better make your chick feeders. Three ordinary plaster laths nailed in the form of a trough make a pretty good feeder for the first 2 or 3 weeks. A feeder, 4 feet long, will care for 74 one-day old chicks. When the chicks are 2 or 3 weeks old, change to a larger feeder. Plans can be furnished by your county agent.

Get water containers ready. You should have one water container for each 50 chicks; jar fountains are satisfactory. Anything that is used must be easily cleaned and kept clean. Sanitation cannot be over emphasized with chick brooding.

Mattress Prices May Rise

Because of curtailed supplies of sisal, manila and henequin, fibres used in the manufacture of bedding, the use of alternate materials has become necessary. To compensate for this, the Office of Price Administration has provided that bedding manufacturers may add up to \$1.30 to the price of an innerspring mattress. Manufacturers in the bedding industry are operating under a voluntary price ceiling agreement with the OPA.

Faye Pinckley and Hadley Reeve Wed Saturday

The Presbyterian Manse at Denison, Texas, was the scene of a wedding ceremony performed at 7 o'clock Saturday evening. Faye Pinckley, daughter of Mr. and Mrs. J. S. Pinckley of Merkel, and Hadley Reeve, son of Mr. and Mrs. H. A. Reeve of Denison, were united in marriage by Rev. James E. Spivey, pastor of the church. The bride wore a gown of white tulle and carried a bouquet of white roses. The groom wore a tuxedo and carried a sword. The ceremony was attended by many guests, including Mr. and Mrs. J. S. Pinckley, Mr. and Mrs. H. A. Reeve, and many friends. The reception was held at the home of Mr. and Mrs. J. S. Pinckley.

Reeve is the daughter of Mr. and Mrs. J. S. Pinckley of Merkel, completed her high school work at Merkel and received her B. A. in Texas College, Denton. This year she was elected as fifth grade teacher in the Perryton schools. Reeve is teaching his second year in Perryton. He came here to teach as a mathematics instructor and was made grade school principal his second year. His parents, Mr. and Mrs. F. W. Reeve live in Denison, where he completed high school. He received his B. A. degree from Texas College, Canyon, and his M. A. degree in Texas Tech. and Mrs. Reeve returned to Denison Sunday evening and are now in the Murray apartments, southwest fifth street.

Le Mans Club Luncheon

J. H. Brashears entertained members of the bridge club and guests, Mrs. Henry Richardson, Mrs. Paul Harbaugh and Mrs. LeMaster with a lovely luncheon-bridge at the Hotel Perryton. The scores were tallied, high was held by Mrs. Richardson and second high by Mrs. Jake LeMaster. Defense stamps were given each.

Lutheran Church Sponsors Free Sound Picture

Rev. H. M. Daenner, pastor of the Perryton Lutheran Church, announces that his church is sponsoring the free showing of the sound film, "The Power of God." The picture will be exhibited in the school auditorium on the evening of Saturday, March 14, eight o'clock.

The motion picture was filmed on the R. K. O. Pathe lot and tells in the form of a gripping modern story what Christianity is, what it does to the individual, and what the individual should do with it.

The characters might be people next door to you. They enact a true-to-life story that has happened in thousands of villages, towns and cities throughout America. Maybe it has happened to you.

Filled with emotional contrasts, "The Power of God" is a Christian sound-film which you will want to see.

USDA War Board Poster Contest

The teachers of the Perryton high school and grades report much interest in the Essay and Poster contest being sponsored by the Ochiltree County USDA War Board, so reports Audie Conley, president of the board.

The subject of the essay contest is "What Can I Do to Help in the War Effort." The poster contest open to pupils of the lower grades is on the same subject.

Prizes of Defense Stamps will be awarded to first, second and third place winners in each division.

CARD OF THANKS

To Our Many Friends and Neighbors: It has been the wish of God to call from our home, our beloved and only son, Wesley Wayne (Buck) Jones. We wish at this time to thank our many friends and neighbors and all of his dear school mates who stood by him so steadfast in life as well as after the Master had called him home from this troubled world. No words from our sad hearts could express to you our appreciation of the many deeds of kindness, sympathy and the beautiful floral offerings that lightened the burden in our great sorrow. Wayne and Effie Jones and family.

SAVE TIN SCRAP TO BEAT THE JAP!

The Sanford Drug Company

Is Cooperating in the Collection of All Your COLLAPSIBLE TUBES!

Tin is a vital metal in our all-out fight with the Japs and Nazis. It is vital for certain parts of fighting ships and planes, signaling systems, for food containers for our armed forces. Uncle Sam must have every available ounce of this now precious metal to win this fight for victory.

The tubes in which you buy your toothpaste, shaving cream and other products are almost pure tin. Authorities estimate that we, as citizens, have about 6,000 tons of such tubes in our possession at this time. Won't you help your country? Save every one of these valuable tubes and bring them to our store where we have a convenient container to put them . . . Do your part—cooperate!

Popularity Contest to Name Most Popular Boy and Girl in P. H. S.

Much enthusiasm has been worked up in Perryton High School over the contest for the most popular boy and girl. This is a contest among the classes. The Junior and Senior classes have gone together and nominated Philip LaMaster and Mary Kathryn Allen for their most popular boy and girl. The Sophomore and Freshman classes have combined and nominated Donald Enterline and Pat Arnold. Two weeks will be given over to the contest. During the first week, which started Tuesday, Feb. 24, there will be voting on the boys. Philip LaMaster and Donald Enterline. This contest will end Wednesday, March 4. Then, voting will start on the girls, Mary Kathryn Allen and Pat Arnold, and will end Wednesday, March 11.

Annual fund. So, if you do support your candidate, you will be doing more than helping him or her, you will help to make our Annual one of the finest that has ever been produced in Perryton High School. —FOR VICTORY: BUY BONDS—

Clarence Morris is Club Pledge at ETSTC

COMMERCE, Tex. — (Special)—Clarence Morris of Perryton was one of five boys from East Texas State Teachers College to be pledged to the Friar Club, student social organization of the campus.

At the club meeting Monday night, each boy was introduced as a pledge before the regular reports were made.

A War Department report says that wool from 26 sheep, or about 200 pounds is required to outfit a soldier with overcoat, jacket, pants, underwear, socks and hats needed during his first year of service.

Two West Texas Girls Qualify as Air Craft Mechanics

LUBBOCK, Feb. 25 (Spl.)—If any American girls are wondering how they can possibly help out in the national victory effort, here's a way —"Keep 'Em Flying."

Literally, that's the answer two West Texas girls have found. For they have just got jobs as mechanics' helpers at the Lubbock Army Flying School here. And they're doing the work—as real aircraft mechanics.

The girls are Deljuan Clark, daughter of Mr. and Mrs. E. C. Clark of Jayton, and W. Marie Yates, daughter of former Judge and Mrs. W. M. Yates of Lamesa, who is also a licensed pilot with a record of 50 hours in the air.

After spending a year and a half in college, they decided they wanted to play a more direct part in the nation's defense and enrolled in the Texas aircraft school. Upon their recent graduation they were brought here as civil service employees of the Sub-Depot at the Lubbock field.

Now Lt. Col. Harry S. Bishop, Sub-Depot commander, is on the lookout for more like them—girls with practical experience if possible or girls who have had courses of some sort in mechanics. There's a future for them, he thinks, for the duration, at least.

Boxing is New Athletic Activity Perryton Schools

Now that basketball has come to a close it seems that boxing is about to take the spotlight. This sport was organized Monday, Feb. 23. The instructors will be Coach George Philbrick and Coach Tom Slack.

The boys are very proud and glad to have a Golden Gloves champion to instruct them. He is Tom V. Slack who participated in boxing at Canyon in 1934-38. His instructor at Canyon was Herschel Jennings. Mr. Slack entered the Clovis, New Mexico, Golden Gloves Tournament in 1937. It was at this tournament that he won his golden gloves.

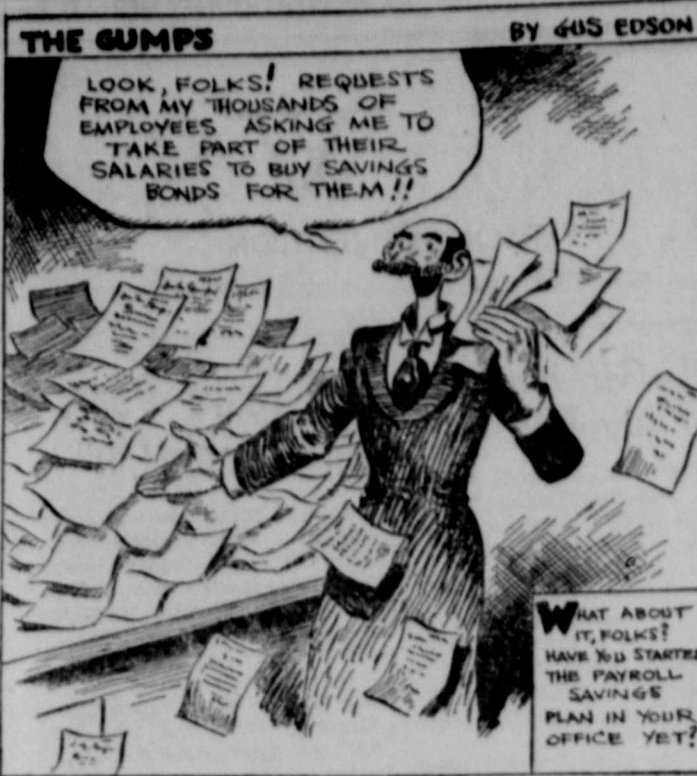

Boxing exhibitions will be given often after it is well organized and under way. There will be admission fees to these fights. All money received from these fights will go to buy equipment for the new boxing program. The equipment is needed greatly at present.

There is also information that our best boxers will go to Canadian on March 6 to put on exhibition fights. Canadian will then come to Perryton Mar. 13, for a return engagement.

Later on in the season there will be a tournament held in the gym between the Seniors who are challenging the Juniors and the Sophomores who are challenging the Freshmen.

If this program is a success, it is now planned that there will be letter awards given and it will be a continued program in the sporting spotlight of P. H. S.

The following boys are participating in boxing: G. K. Rupprecht, Lester Barnes, Clayton Schollenbarger, J. V. Pearson, James Daniels, John Daniels, Dale Parvin, Jack Phelps, John Dunlavy, Jack Igou, Joe McClung, Darrell Seymour, Archie Correll, Donald Enterline, Arthur Schroeder, Jack Dodson, Kenneth LaMaster, Elton Symons, Dock Patton, T. J. Lovett, Emil Reimer, Bob Bray, F. A. Records, Harold Gidley, and Roland Hurter.

Wanna Buy a Swoose?

Half swan, half goose, this swoose at Miami's rare bird farm is one of the few of its kind in existence. Kay Paige is feeding the queer hybrid.

Lower Physical Requirements For Army Draft

Local boards throughout Texas have been directed to reopen and consider anew the case of every registrant who has heretofore been classified in Class I-B or Class IV-P predicated on deficiencies in teeth or eye sight, General J. Watt Page, State Selective Service Director, announced today.

Army physical requirements, General Page pointed out, have heretofore specified that registrants must have an adequate number of serviceable natural teeth (three pairs of biting and three pairs of chewing teeth opposite to each other when chewing) and must be able to read test cards at 20 feet without glasses which a normal person can read at 100 feet without glasses, provided the same matter can be read by the registrant at 40 feet with the use of glasses. Registrants who could not meet these requirements have been placed in Class I-B or Class IV-P according to the degree of deficiency.

The Army has now provided for a liberalization of dental and visual requirements for acceptance of registrants for general military service, General Page said, and the revised physical standards provide:

1. That registrants who have no disqualifying physical defects except a lack of the required number of teeth, when in the opinion of the examining physician they are well nourished, of good musculature, are free of gross dental infections and have sufficient teeth (whether natural or artificial) to subsist on the Army ration, will be accepted for general military service in all branches.
2. That registrants whose visual acuity is below 20/100 but not below 20/200 in each eye without glasses if correctable to 20/40 in each eye, will be accepted for general military service in all noncombatant branches. The actual possession of suitable glasses by an individual is not required for his acceptance under these standards.

General Page stated that all Class I-B and Class IV-P registrants who are found to be eligible for military service under the liberalized dental and visual requirements of the armed forces, unless upon reconsideration of their classification they are deferred for other reasons, will be placed in Class I-A and sent to Army Examining Boards for final

More Civil Service Exams Are Open

Motor transport has assumed such a vital role in defense activity that the United States Civil Service Commission has announced an examination for instructors in over 20 branches of the automotive industry. The instructors are needed by the Quartermaster Corps of the War Department. Salaries range from \$2,600 to \$4,600 a year. There is excellent opportunity for advancement, since the policy of the Quartermaster Corps will be to fill higher positions by promotion from lower grades whenever possible.

Instructors will conduct classes in the following branches: automotive parts; automotive electrical and carburetion; body finishing and upholstery; automotive machinery; tire recapping and sectional repair; fender, body and radiator; Diesel engines; internal-combustion engines; motorcycles; blacksmithing and welding; and general. They will plan the courses in these subjects and prepare and revise text and related instructional material.

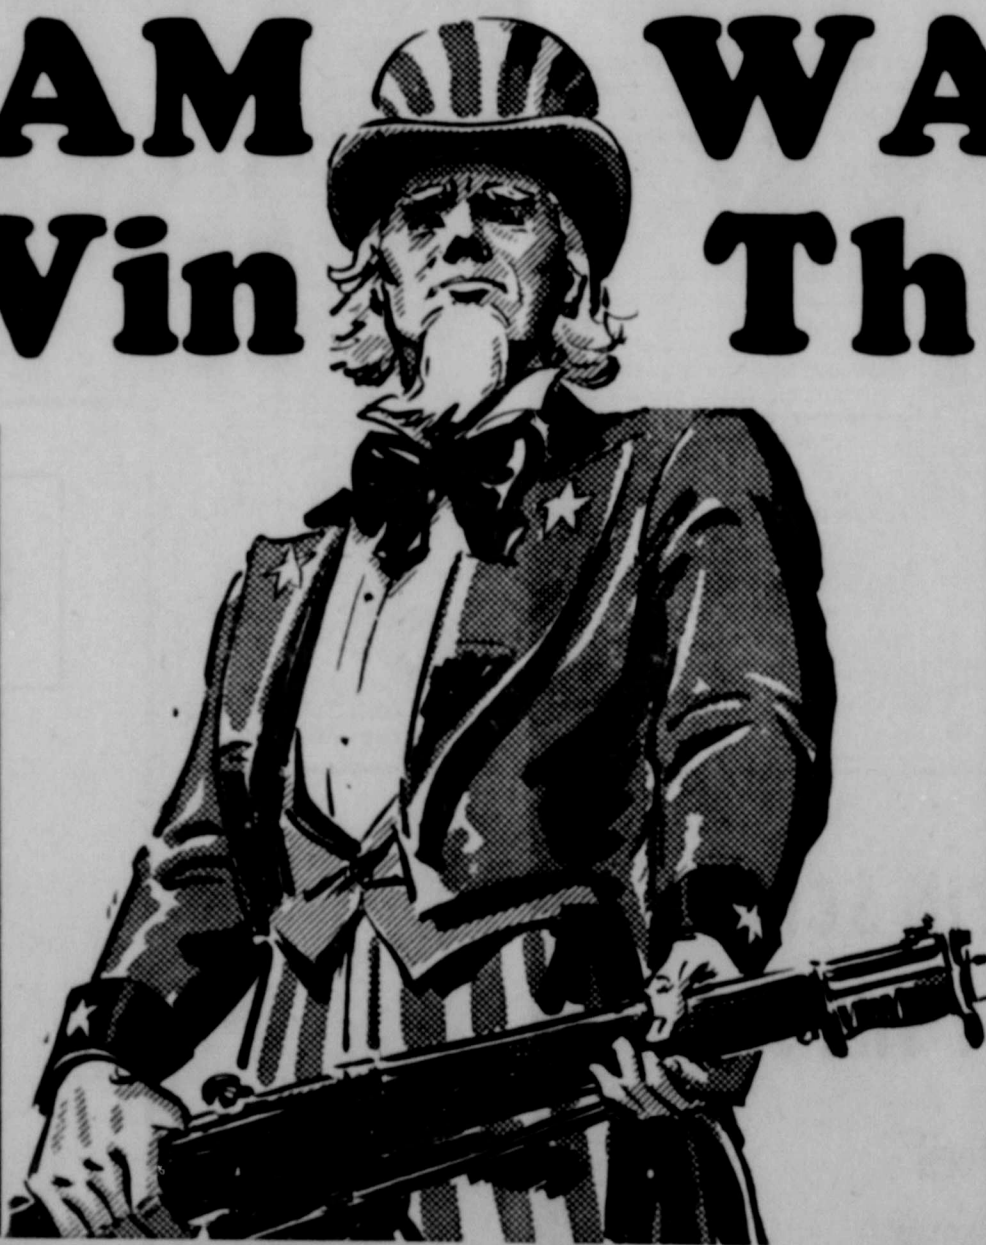

Certain background education or experience is required, such as study in a college or Diesel engine school or experience as a journeyman mechanic. Experience as instructor of organized classes in one of the optional branches is also prescribed. Certain experience of a supervisory nature acquired in the automotive industry may be substituted for part, and in some cases all, of the instructional experience. For the higher positions (\$3,800 and \$4,600) the supervisory experience must have been directly connected with the automotive industry. No written test will be given. The age limit is 60 years. Applicants will be accepted until further notice and must be filed at the Civil Service Commission, Washington, D. C.

Full information as to the requirements for these examinations, and application forms, may be obtained from Arvie Hale, Secretary of the Board of U. S. Civil Service Examiners, at the post office in this city, or from the Secretary of the Board of U. S. Civil Service Examiners, at any first or second-class post office.

determination as to their acceptability. He said:

"These new standards will make available for service in our armed forces many thousands of men who have already been given deferred classifications, as well as a large ratio of the new draftees who would have failed to qualify under the old Army physical requirements."

UNCLE SAM WANTS YOU to help Win This War!

ASK YOUR NEIGHBOR ABOUT EQUITY FEED

Ask your neighbor of the results they are getting from feeding Equity Feeds. That is the best proof of its quality and value for producing better chickens, cows and hogs. Those that use this feed tell us they are getting wonderful results.

We Are Cooperating with the Ochiltree County War Board

It is the job of this board to encourage farmers over this area to plant more gardens, raise more poultry, more beef and more pork with which to feed our army and civilian population. They must have cooperation of everyone to enable them to put their job over and see that all production quotas are met in Ochiltree County.

They Need Your Cooperation!

Ochiltree County Pledge for War Time Production of Food for 1942

INCREASE POULTRY PRODUCTION

FEED BETTER FEEDS FOR GREATER PRODUCTION
 Ochiltree County has been asked to increase poultry production 10%. Instead of meeting this increase, Ochiltree County has pledged to increase production 40%. This means that producers must take advantage of every possible means. Feed the feeds that are raised in this area and prepared for balanced feeding.

MILK MORE COWS

We have been asked to increase our milk production by 15% but we have made a pledge to increase it 50%. Of course this will mean that we milk more cows and it also means that we get full capacity from the cows that we are now milking. In other words, if prepared feeds will do the job to increase milk, then that is what we will want to feed.

PORK PRODUCTION

Proper feeding will turn hogs off faster. We have been asked a 10% increase in pork production but we have pledged a 95% increase. Hogs must go to market quicker, make a larger gain in a shorter time.

Defense Bond Quota

\$306,300.00

Buy Defense Bonds and Stamps Regularly

Keep Up the Monthly Quota — \$25,525.00

REPAIR EQUIPMENT

It is our opinion that farmers are really making a great mistake that are putting off getting their equipment in shape as fast as possible. It is a fact that machinery manufacturers have said that they can supply up to a certain amount of parts for equipment, but if they cannot get material to manufacture these parts, then how are they going to be able to supply them. Get every part that you need now and play safe.

SCRAP METAL NEEDED

It is estimated that there is 200,000 tons of scrap metal on farms over this area. If you have not checked your old metal now is the time to get busy on it. This old scrap metal is vital to defense. It is needed to build war equipment. Bring it in now. You not only will help in the defense program but you will also receive the market price.

PLANT GARDENS

There were 170 gardens planted in Ochiltree County last year. We have pledged 227 gardens for 1942. Many of the foods that we have been able to obtain in the way of canned plants and help raise foods. Complete line of seeds that have been recommended by the Agriculture Department for this area—this seed will be obtainable in bulk quantities.

PERRYTON EQUITY EXCHANGE

Stockpiles of Food for Peace

Here is what the U. S. Department of Agriculture means when it urges farmers to help produce "stockpiles of food for use after the war." The upper picture shows barrels of dried milk, just as good a year from now as today. The lower picture shows a warehouse filled with huge drums of cheese, even better with aging. These farm products, plus condensed milk, dried milk, cured pork, and canned meat and vegetables, constitute the stockpiles of defense food which, says Secretary Claude R. Wickard, will be needed by hungry Europe and "will exert the maximum influence at the peace conference table."

Magic: Five Quarts Equals One

The magic of modern dairy industry makes it possible to shrink five quarts of fluid milk into one quart of dried milk. Add water and dried milk powder becomes fluid again. Dried milk is in great demand for export to friendly nations abroad. It takes little space in the holds of ships, stays sweet without refrigeration, and can be used as a substitute for fresh milk for children. The U. S. Department of Agriculture has placed dried milk high on the list of "defense foods" whose increased production is sought during 1941 and '42.

Planning More Defense Foods

Farmers in this State and elsewhere in America are beginning to make plans for producing more "defense foods" in 1942. Among the highly-nutritious foods needed in greater quantity are milk, cheese, eggs, meats, and vegetables. Good market prices for the year are assured. Every farmer in the nation will be visited this fall by an AAA farm program committeeman who will assist in planning the increases.

Doubling Pork Production Is His Job

W. O. Dawson, right, Taylor County farmer who bought his farm through the Farm Security Administration three years ago, demonstrates to Burton H. Pritchard, chairman of the County USDA War Board, how he plans to double his pork production in 1942 as his share in the Food-For-Freedom campaign.

Wheat Men Get Ready for Quota Vote

COLLEGE STATION, Mar. 3.—Nearly 100 million bushels more than last year, or the greatest supply on record, describes the present wheat situation, according to Charles L. Thomas, state AAA committeeman and wheat grower from Pampa.

"We'll go to the polls, Saturday, May 2, to vote democratically and cooperatively on whether we want to continue marketing quotas, and that's more than other farmers in the world can do," he said.

To be in effect, quotas must be approved by two-thirds of the farmers voting. Last year, in the first referendum, wheat farmers approved quotas by an 81 per cent majority.

"Our wheat market is limited. Quotas simply divide this market fairly among all of us," Thomas said.

Farmers who overplant their acreage allotments are asked to make the same adjustments in marketing as AAA cooperators make at seeding time.

Under AAA regulations, volunteer wheat may be substituted for seeded wheat, Thomas explained. To be in effect, however, total wheat acreage on a farm cannot exceed the wheat acreage allotment.

"Quotas will direct farm production into foods and feeds needed in the Food for Victory program and will smooth the flow of wheat to market, preventing tie-up of railroads which already are loaded to capacity with war materials," the AAA official said.

Sub-Irrigated Frame Garden

Big farmers, little farmers, tenant farmers, and part-time farmers in Ochiltree county this year will join with other farmers throughout the United States in producing a record quantity of foodstuff for the United Nations, according to Mrs. Sallie B. Allen, home management supervisor for the Farm Security Administration.

"Not once in the history of our great democracy have the farmers failed to answer their country's call for help," said Mrs. Allen, "and Hitler and his fellow outlaws can expect the farm families in Ochiltree county to be standing shoulder to shoulder with our boys in the service until victory comes."

"Uncle Sam," Mrs. Allen continued, "knows that we must have more food than ever before if we are to win this war. He knows also that we must protect the health of our own people with better diets from home-grown vegetables."

Mrs. Allen believes almost every family in Ochiltree county can im-

mediately begin growing fresh vegetables at home in a sub-irrigated frame garden such as the one pictured above.

The farm people in this picture are using old tin cans in the place of the more expensive tile to sub-irrigate their frame garden.

An outstanding feature of these frame gardens is the fact that fresh vegetables can be grown for the family tables long before the ordinary gardens are in production, and for many weeks after the first frost in the fall. An ordinary sized frame garden will produce all an average family needs for daily use.

"Complete instructions for building and planting a frame garden can be obtained at the Farm Security Administration office in the courthouse at Spearman or at the county extension office," said Mrs. Allen. "They are inexpensive and very little trouble to build and plant."

Junior Gurley was a week-end guest in the Geo. Latham home at Hurston.

Mr. and Mrs. Jerry Burger and Mr. and Mrs. Lee Carter had a paper hanging party Thursday night.

School Notes

"What did you make," is a familiar saying these days. It has been rather difficult to give six weeks tests as so many children have been absent because of illness.

Sally Ashley was chosen best citizen of the week by the citizenship club.

The latest improvement in the

Texans Want Quality Eggs

COLLEGE STATION—Texas consumers want quality eggs and are willing to pay for them. Myrtle Murray, Extension Service specialist in home industries, says this trend became evident in 1941 when not one of the 14 cooperative egg marketing associations in the state was able to meet all demands for graded eggs packed in specially designed cartons. Most associations received premiums of from 3 to 8

cents per dozen.

Eggs are also popular items at the nine homemakers' markets operated by rural women, the specialist says. For example, Mrs. D. L. Underwood of Tarrant County for months has sold all infertile white eggs "she could spare," at times for as much as 47 cents per dozen.

Premiums of eight cents per dozen of graded, infertile eggs have been received for several months by Mr. and Mrs. Donovan Meisch of Red River County, who sell through two local dealers. The eggs are sold in special cartons containing the producer's guarantee. Each week selected recipes and information about the food value of eggs are enclosed in the cartons, and these leaflets have proved popular with customers who are willing to pay for quality.

Biddy Goes to Work Early

America will need millions of eggs this winter, as part of the "defense food" production. Kathryn Hines, pretty 4-H club girl, shows biddy that soldier hours will be expected. Many poultry producers follow this practice of turning on electric lights in laying houses early in the morning during winter months. The practice compensates for the fewer hours of daylight and gives hens a full day of eating and laying.

Lake View Tattler

Bertha May Nitschke being indisposed, missed several days of school this week.

The Olman Flowers butchered four big hogs last week. One neighbor happened in just at the right time to get in on a big mess of backbones, ribs and sausage.

Little Gayle Gossett, the little seven year old daughter of Mr. and Mrs. Hollis Gossett very ably played "God Bless America" at the defense program at the McMillen school house.

Mr. and Mrs. Olan Williams have been getting around here and there last week visiting.

Mrs. W. Y. Williams spent Tuesday and Wednesday nights with her daughter, Mrs. W. M. Deck.

Mr. and Mrs. S. J. Powell called in the Blodgett and Reed homes Tuesday afternoon.

Genevieve Olson, Anita and Willis King were in the S. J. Powell home Wednesday afternoon for their music and voice lessons.

Kenneth Kenny, our neighbor boy, has some fine looking fat shoats he is very proud of. The shoats decided to visit around and see what was on the other fellow's place, Wednesday afternoon but Kenneth was right on their trail. A disappointment to the shoats as they grunted all the way home.

Bryan Kenny spent Wednesday night with Wayne Edwards and June Edwards spent the week-end with Maxine Kenny. Helen Kenny spent the week-end with Nellie Hamilton and Mrs. Kenny spent Friday with Mrs. Moore.

Mrs. Hollis Gossett painted her sun porch floor last Wednesday. Miss Huffines is helping Mrs. Gossett landscape her front lawn for perennials. The Gossetts and Leona Eumick attended the show "Shut My Big Mouth" in Perryton last week.

Mr. and Mrs. Dennis Reed attended the show in Spearman Saturday night of last week. Margaret spent the night with her grandmother, Mrs. Reed of Spearman.

It really snowed out our way. The Pipkin family shopped in Perryton Wednesday afternoon.—Mrs. S. J. Powell, reporter.

—FOR VICTORY: BUY BONDS—

Mrs. Seldon Caradine came in Tuesday from Clovis, N. M., for a visit with her mother, Mrs. W. W. McLarty. She was accompanied by her cousin, Miss Eva Glasgow, of Clovis and Mrs. W. G. Williams of Cleveland, who will visit their mother, Mrs. Emma Glasgow.

LETTERS FROM OUR READERS

Editors Note: Here's another letter from our old friend "Buck" Garrison. We're always glad to hear from "Buck" and wish that more boys in the service would write us for publication.

Pt. San Houston, Texas, February 25, 1942

Hello Mr. Stewart:

I have a few minutes of my own this evening, so here comes a short letter. So far as I know, everything around here is running on schedule... only the schedule has changed considerably in the past few months... but no more than anyone would expect. We train now on strictly a wartime basis, and of course the hours are a lot longer than they were in peacetime, in fact we do not go by hours anymore, it's get the job done regardless of the number of hours involved.

And all the fellows are taking it like real soldiers... you know... do all the "belly-aching" you want to, but do the job well. But, honestly, the boys as a rule take it as something that's got to be done and think nothing of the little hardships they are expected to go thru. Just charge it up to the Axis and collect off of the first one we meet.

Guess from all reports, we have a little bunch of collectors out over there now, working under orders of General MacArthur.

Have had several letters from the old home town this week and also I may seem slow about answering some of them... it's not that they're not appreciated... but that I am occupied a great part of the time nowadays.

Got my copy of the Herald today, and so far have only glanced over it, but I'll get around to it before long.

Say Mr. Stewart, we have a new commanding officer here who has a surefire way of selling Defense bonds and stamps for the government. Here's how he works it. For example: say Private John Doe is found to be missing at the eleven o'clock bed check, or Private Joe Blow is caught concealing a pair of muddy field shoes in his barracks bag, or Johnnie Jig is determined to sing "Sweet Adeline" at 3 a. m. What actually happens: all three report next day to the C. O. and find out the exact amount of stamps or bonds that they buy the following pay day. Of course the first offense may not come so high, but each one doubles up on you, and around a Post of many thousands of army men, you'd be surprised how long you have to wait in line at the post office on pay day. There's no way to beat it because you must report back to the C.O. with evidence of your purchase.

So you see it really is a surefire method of selling your Uncle's bonds and stamps. Wonder if the same method would work on civilians as efficiently as it does on soldiers?

Well Mr. Stewart, I really don't have any news that I'm permitted to write and even if I were permitted to write anything I cared to, it probably wouldn't be of interest to anyone, so I'm signing off here for now and maybe I'll get around to answering some of these other letters that up-to-date are outstanding.

Sincerely,

Pvt. E. W. (Buck) Garrison, Regimental Radio Section, Headquarters Company, 38th Infantry, Ft. Sam Houston, Texas.

P. S. My regards to all—Buck

Kenneth Edwards

Kenneth Carl Edwards is one Ochiltree county boy who has spent the greatest part of his army life to date in the hospital. He has been in poor health almost since the very day he entered the service. He is now in the station hospital at Camp Grant, Ill. Kenneth, for the past few years has worked for James F. Hardy and other farmers in the southwest part of the county.

CARD OF THANKS

I wish to thank my many friends who were so kind and thoughtful during my hospital stay in Perryton and for the many offers of help in my removal to the hospital here in Temple. Your acts of neighborliness will always be remembered.

W. E. Womble.

Bureau Accomplishments and Objectives

1941 Accomplishments

1. Bankhead Parity Loan Act. \$24.00 extra per bale of cotton. 33¢ per bushel of wheat—over 1940.
2. Peanut Marketing Quota Act.
3. Cotton Crop Insurance.
4. Steagall Act—extending principle of parity protection to all farm commodities.
5. Increased Appropriations — Vocational Training for Rural Youth Defense Jobs.
6. Increased appropriations for Anti-Trust Division of Department of Justice to prosecute monopolies.
7. Appropriations for Conservation and Parity payments.
8. Commodity Committees set up.
9. Supported National Defense Food for Freedom Program.
10. Increased truck load limit to 38,000 pounds.
11. Helped reduce insurance rates on farm storage for wheat from \$2.53 to 43 cents.

1942 Objectives

1. Continuation of the 1941 Bankhead Parity Loan Act as you know this act was passed for only one year, and it must be passed again by congress if farmers are to receive parity prices on basic crops in 1942 and future years.
2. Continuation of Appropriations for Agricultural Conservation, and to give farmers full parity.
3. Sufficient funds to make Steagall Act fully operative to all non-basic crops, so that these crops may receive full parity.
4. Control of Inflation by legislation which recognizes the parity principle between Labor, Industry, and Agriculture.
5. Promotion of National Defense Food for Freedom Program.
6. Complete the set-up of local Farm Bureaus in every Texas community, together with a definite community program geared to the principle of making good farming profitable, and otherwise improving the general standards of rural life.

Ranger Quintet Had Successful Cage Season

The Perryton Rangers ending their basketball season against the Gruver Cagers have had a very successful season. They played 24 games and were defeated six times while ringing up 18 victories. In conference play they placed second in the north district, losing to the Lefors Pirates, who were the North District champions.

The Ranger squad consisted of 13 players as follows: Archie Correll (G), Irvin Williams (G), Jack Park (C), Joe McClung (F), Lindsay McWilliams (F), Jack Allen (G), Ray Veale (F), Elton Symons (G), Jack Phelps (C), Johnny Dunlavy (F), Dale Parvin (G), Tommy Lee Bishop (F), and A. J. Eudy (C).

This squad as a whole were uniform and showed good cooperation during the season.

Due credit should also be given to the coaches, George Philbrick and Tom Slack, who worked hard with the Rangers during the season.

Rubioff in Amarillo on March 6th

AMARILLO, Mar. 3.—Rubioff and his violin will be heard in Amarillo Friday night, March 6. The celebrated performer, who plays the sort of music that appeals to folks like, will be assisted by Alexander Makofka, brilliant Russian pianist.

Rubioff will play several of his own compositions, including "The Eyes," dedicated to his pal, Alexander. The familiar theme, "I Want Cantor" runs throughout the composition. He also will play favorites as Gershwin's "Rhapsody in Blue," the haunting "When the Day Is Done," and Dria's "Souvenir."

Makofka will play two groups of numbers. Among them are "Liebestraum" and "Lecorena's" and "Malaguena." Mail orders may be sent to the Amarillo Chamber of Commerce with check and self-addressed envelope enclosed. They will be shipped with the best seats available upon receipt. Prices are \$2 and \$1.50 for the lower floor, and \$1 in the balcony. Boxes are \$2 and logs \$1.50. These prices include tax. Tickets may also be reserved by telephone.

The concert will begin at 8 o'clock in the Municipal Auditorium.

Prepare to Repair!

Beware of Pearl Harbor Complacency

Investigation of the dastardly attack on Pearl Harbor proves that a complacent, it-can't-happen-here attitude was the principal cause of this disaster. When we say "Remember Pearl Harbor!" let us remember the severe lesson it offers as to the disastrous effects of complacent unpreparedness.

And this applies to the Farm Front as well as to the Army, Navy and Air forces.

Since last July, when OPA Henderson announced a limit of 120% of 1940 in the production of farm equipment, numerous orders have been issued by OPM, and a multitude of press releases by USDA, all "designed" to assure the farmer that he would be furnished with a sufficient supply of farm equipment to carry on the Nation's Food Production program.

Even the most recent farm equipment order by OPM (December 28) starts off with the familiar phraseology, i. e., "A broad program to make available materials for farm equipment to carry out the Agriculture Department's 1942 food program."

The dangerous effect of all these government assurances, released without the qualifying explanations, has been to lull the farmer into a complacent sleep during which he dreams that there will be no shortage of new equipment or repairs, and that the continued efforts of local dealers to arouse him are merely "high-pressure" sales methods.

Even the urgent alarm-clock appeals of the U. S. War Board have evidently failed to arouse him. Despite all of the publicity given to the subject of repairs, many sources of supply state that repair orders are only slightly above normal and that farmers seem to have a feeling that plenty of new goods and repairs will be available when needed.

Many people have entirely mis-interpreted the latest OPM (now WPB) order which gave an A-3 preference rating to farm equipment and repairs and which was accompanied by a schedule of "permissible production." They failed to realize that Order L-26 is a LIMITATION ORDER (limiting production to the percentages specified) and does not in any way allocate materials to enable the manufacturer to produce the equipment.

FOOD-FOR-THOUGHT

Food-For-Britain; Food-For-Freedom; Food-For-Defense; Food-For-Victory and Food-For-Peace—all have been emphasized chronologically in the Department of Agriculture's rallying slogans to farmers. How all of this extra Food is to be produced despite the shortage of farm equipment is giving the farm family plenty of Food-For-Thought.

Also the OPM press release of December 28 would most likely mislead farmers, in stating "An A-3 preference rating is made available for materials necessary to produce machinery, etc." True enough, the A-3 rating is available but that does not signify that the materials are available. Farm machinery and equipment are made of steel, iron and other metals rather than of preference ratings, which are the product of mimeographs and not rolling mills.

Last summer the Farm Equipment industry was given a B-1 rating, which resulted in an acute shortage of fall equipment. Then the rating was moved up to A-10; then A-8 and now A-3—and STILL, manufacturers report their inability to get much-needed materials.

No one questions the good intentions of the USDA or the OADR. It is evident that they have tried to convince Mr. Nelson's oft-initialed offices that the farmer cannot produce more food with less equipment. It is evident, however, that all have erred in giving the farmer monthly assurances that he would be taken care of. Now, they find that the War Boards' cries of "Wolf! Wolf!" are not heeded by the farmer even in the matter of ordering repairs to the extent justified by the seriousness of the situation.

Farm Equipment cannot be produced overnight. After the raw material reaches the factory, it takes months to produce machinery and repairs. Preference rating and limitation orders will never plow a furrow, cultivate a row of cotton, corn or tobacco, cut a swath of grain, feed a pig, or milk a cow.

The farmer who does not get busy right now; place his orders for essential repairs and decide what new equipment he will need to carry on, despite the farm labor shortage, will certainly be out of luck when actual farming operations begin. RIGHT NOW, the

USE YOUR TALENTS

"Let us remember the parable of the talents. History will judge us by what we do with what we have."

—Claude R. Wickard

farmer must tell his local dealer what equipment and repairs he will need, and must notify county war boards if such equipment is not available.

The farmer must be prepared. Uncle Sam is a grand old man but he is mighty busy right now. He may be even busier when it comes time to plow, or plant, or cultivate, or harvest, or milk, or slop the hogs, or feed the chickens.

Yes, we should "Remember Pearl Harbor!" And, especially its lesson as to the serious results of self-complacency.

food stamps will be mailed from the central issuing office in Amarillo to eligible families in the Panhandle counties.

"The food stamp program is primarily designed to help create ready local and national markets for all of the food farmers can produce," Hodges explained. "It helps to relieve the farmer of complex marketing problems at a time when he needs to devote all of his efforts and energy to production."

Explaining how the program works, Hodges said that eligible clients are required to purchase orange food stamps with the money they would ordinarily spend for food and are then issued blue food stamps with which they can obtain at least 50% more food. Hence, the additional form markets.

"Aside from the creation of additional farm markets where they are most needed, this program is helping to build up health and war-time morale by making additional food available to needy families who do not have enough of the proper foods to eat," Hodges explained.

back for herd increase will reduce the amount of beef that can be sold at present high prices. By the time calves from these heifers are ready to market, the country may be in a period when less rather than more beef will be needed. Right now the beef cattle industry has the opportunity to liquidate some of these cattle on a high market, and to put numbers back about the place they occupied at the close of 1940.

Less Wheat Needed

With enough wheat on hand this fall to last two years, the United States needs less instead of more wheat in 1942, and the Farm Defense program calls upon wheat growers to do their part by seeding within their 1942 AAA acreage allotments. In view of the big wheat supply on hand, the national wheat goal is about seven million acres below the 1941 acreage. The Ochiltree county wheat goal is 22,000 acres, the same as the AAA acreage allotment. This is a reduction of nine per cent under the 1941 acreage and is in line with the reduction asked of wheat growers throughout the country.

Gardens

The county goals for family farm gardens was set at 300 and farmers pledged a total of 226, a very substantial increase over 170 gardens reported in 1941.

No. 6 Continued from Front Page

Mr. Conley declares, "We're the first big industry to get everybody working together to meet the nation's full needs, item for item. We're proving to the entire world that democracy can plan and get results better than any dictatorship that ever existed."

Every farmer in the county was contacted during the recent sign-up to determine how he could help out. In reality, says Mr. Conley, the sign-up has proved to be a "census" of expected production. Since similar campaigns have been held in every county in the nation, the U. S. Department of Agriculture now knows months in advance what will be grown on American farms this year. The information is invaluable in planning how to meet the food needs of wartime campaigns.

The war board chairman points out that the present food expansion drive is distinctly different from the food campaign of the first World War. In both cases, an unusual need for food existed. Back in 1918 to 1919, farmers were urged to plant every available acre and especially to increase wheat production. Responding enthusiastically, they plowed up millions of acres better adapted to grass. Today, however, the expansion definitely is a planned one. There is no need to plow up the hillsides. Conservation practices of the last eight years under the AAA Farm Program have built up soil productivity; efficient production on about the same total acreage as was planted to crops in 1941 will make it possible to meet 1942 goals. There is no need to expand production of such commodities as wheat, for there are large supplies already on hand.

While farmers are stepping up

To Washington

Earl McClung, who has been employed with the Department of Agriculture Farm Security Administration, working in the regional office in Amarillo, will report in Washington, D. C. March 9, for temporary duty pending transfer of the national office to Cincinnati, Ohio, where he will be stationed indefinitely.

Earl is the only child of Mr. and Mrs. A. H. McClung, 416 SE Third street. He graduated from P. H. S. and received his degree from McMurray College, Abilene. He will be accompanied to Washington by his wife.

production of victory foods, they are receiving proper market protection. Mr. Conley points out, the Secretary of Agriculture has announced that prices of hogs, eggs, evaporated milk, dry skim milk, cheese, and chickens will be supported at an average of not less than 85 per cent of parity within the limits of funds available through 1942. This means that farmers are able to expand with full assurance of a market for all the "victory foods" they can produce.

No. 7 Continued from Front Page

Navy as a lieutenant commander. This publication, though, still believes that the greatest service our congressman can do for the nation is to get back on his job. This 18th congressional district has much that needs attention at Washington—and no one can substitute for the congressman. If a substitute can do the job as well as Worley, then this district does not need him as congressman any longer.

Did you know that black outs in California brought business to a Perryton dry goods store. A few days ago, the Castle Dry Goods Co. was entirely out of black satin. They had shipped every yard in stock to California for window blackout material.

And by the way, the six inch snow that fell Saturday and Sunday was just about the finest thing that could have happened for crop prospects in this community. We are sure that there was sufficient moisture to penetrate down to the sub-soil moisture. Pretty fine, we say!

With just an average amount of moisture from now until harvest, the Perryton area will do its part in providing food for victory.

And while we're talking about the snow, Mayor Lance did a mighty fine piece of work when he took the city grader out Sunday afternoon and shoveled all the snow on Main Street to the center of the street. Made parking space available next to the curbs and opened up the gutters so that the water could run off.

So Perryton continues to tolerate this unnecessary and dangerous center of Main street parking lot for one and one reason only. That is because a selfish few think that it is of benefit to their business.

Remember back in the old days when you went to town and at noon time dropped into the store, bought a dime slice of cheese and asked the grocer to give you some crackers. Usually, the crackers the grocer gave were more than the cheese you bought.

Newspapers of today have to put up with occasional space buyers that belong to the "cheese and cracker" age. They buy a two or three dollar advertisement once in a blue moon and always have a very important news story (free advertising) that they want you to run.

And you may not know it, but the business man who is a consistent advertiser with newspaper space, seldom ever asks for free space. He goes on, week after week, giving the support that makes it possible to publish a newspaper and you usually have to ask him for information for a story concerning his business.

But to the federal and state agencies goes the fur-lined pot, award for space chiselers and we think at the top of this heap should go the Department of Agriculture. They are also the winners of the dumb bell trophy for being the champion of all paper wasters. Every mail brings pages of space chiseling copy. It's funny that these departments have plenty of money to spend for everything but newspaper space.

Since war was declared on Dec. 7, there has been an ever increasing desire for more knowledge of world geography. We've had numerous inquiries for globes. We started out to buy a few for stock and now after more than two months delay, we've secured a nice assortment of globes.

The Herald office has them in large and small sizes, in both table and floor models. Some are even illuminated. If you are interested, and who is not, in keeping up with the swift moving war, a globe is a most useful and educational investment.

Something different in the way of banquets will be staged at the Perryton Hotel next Monday evening at eight o'clock. It's not the usual kind of a banquet where business men have farmer friends as their guests. But it is a departure when farmers throw a banquet and have business men friends as their guests.

But that is just the kind of a banquet President Audley Conley and his fellow members of the USDA War Board have arranged for Monday night. The banquet will culminate the "Food for Victory" week. One of the high lights will be the broadcast of the talks by President Roosevelt and Secretary of Agriculture Wickard.

We were very well satisfied with the number of people who took advantage of the Herald's offer of 15 months subscription for the price of 12 months provided same was paid in Defense stamps.

It was especially gratifying to see renewals come in from old friends at distant points. There was Mrs. J. M. Willey whose illness has caused her to make an extended visit in the home of a sister at Williamsport, Tenn.

Local Ration Boards Not to Ration Trucks

WASHINGTON, March 4.—A rationing program for all types of new trucks, truck-trailers and trailers, to be administered jointly by the War Production Board and the Office of Defense Transportation, has been announced.

Approximately 106,000 trucks and truck trailers will be available under the plan for rationing during the next 22 months. The rationing, effective March 9, will permit gradual release of stocks of new trucks and trailers which have been "frozen" since the first of the year and will remain so until March 8, under an extension of the original freeze order.

Outside the exempted categories, five usage classifications are established to indicate the order in which new trucks and trailers may be released. These usage classifications include: (1) municipal services, such as police, fire, garbage disposal, and mail, telephone and other communications services; (2) highway maintenance, transportation of materials and persons directly involved in the war effort; (3) transportation services for essential civilian needs, such as repair services, waste and scrap materials, and public and private schools; (4) retail delivery services; (5) vehicles used for non-essential functions. No encouragement is offered by WPB to persons who can qualify only under Classifications 4 and 5.

Application forms will be available through truck and trailer sales agencies. When completed, these forms will be sent to Washington to receive, first, ODT approval, then WPB approval in the form of a "certificate of transfer." Such certificate will enable the buyer to purchase through any dealer. The Office of Price Administration, which is rationing passenger vehicles, has no part in the rationing of commercial vehicles.

Then came a batch of stamps from J. C. Beaver, ex-Perryton postmaster and city clerk, now living at Tacoma, Wash. Greetings and best wishes to Mr. Beaver, way up there on the northeast coast.

And best of all was \$2.50 worth of stamps from a dear lady who was the first Texan that we met when we rolled into old Ochiltree over 34 years ago. We had been on the road all day from Liberal, Kansas riding with Henry H. behind a team of brown mules. Henry carried the mail from Liberal to Ochiltree and Mrs. L. T. Teas was the post mistress at Ochiltree.

Mrs. Teas now lives at Corvallis, Oregon. She is writing a story of her pioneer life in Ochiltree county to be passed down to her grandchildren. Aunt Lou, the Ochiltree County Herald would feel honored to have the privilege of publishing your narrative of early life. We know that with your insistence for accuracy and faculty for vivid portrayal, the story would be of great interest to our readers.

And as we close this week we can truly say that we've saved the best for the last and that's the news about Grandma Jackson's birthday party for next Sunday. While Grandma will not be 86 years of age until March 9, the community get-together will be held on the Sunday preceding.

Neighbors, friends and relatives will gather at the old Jackson home down on Wolf Creek with well filled baskets of food, with steak for the steak fry, to bring best wishes of the day to this

Western Union MOVED TO NEW LOCATION!

Turner Rites Held Friday

Funeral services were held Friday afternoon in the Baptist Church for L. D. Turner, a resident of the county for 41 years, who passed away suddenly at his home in the east part of the city, Tuesday afternoon. Death was due to a heart attack.

Rev. S. R. McClung, Baptist pastor, conducted the last rites. He was assisted with music by Mrs. A. K. Wilson and a quartet composed of Mrs. W. E. Polesong, Mrs. Howard Holt, Irvin R. Buchanan and Troy Bolerjack, who sang three favorite selections.

Pallbearers were Kirt Williams, Charley McCartney, George Yates, Lloyd Black, Claude Crouch and Ted Parnell. Flower girls were Dorothy Woods, Budie Records, Joan Dillingham, Faye Dell Johnson, Lois Todd and Jackie Adams. Interment was in the family plot in the Ochiltree Cemetery.

Obituary

Louis Dawson Turner was born September 23, 1864 at Turnersville, Texas, the youngest child in a family of six, and passed away February 24, 1942 at the age of 77 years, 5 months and one day.

L. D.'s father died a short time before his birth and the mother moved with her family to Denton County, where Louis spent his boyhood days. He with his mother and one sister, moved to Ochiltree County in 1901 and filed on land in the southeast part of the county. The mother died in 1909.

In 1905 he was united in marriage to May Waggoner and they made their home at the ranch home until 1918 when they moved to the town of Ochiltree, where they continued to live until last October, moving then to the present home, 622 SE Second street.

Ten children blessed this home, all surviving except a daughter, Maggie, who passed away September 9, 1937. Mr. Turner was a loving father and husband and a loyal neighbor. It can be truly said, he was a real pioneer, ever ready to help those in need. He will be greatly missed not only by loved ones in his home but by a large circle of friends.

Survivors are the wife and nine children, Mrs. Edna Chambers, Mrs. Robbie Norwood, Frank, Dale and Guy Turner, all of Bixbee, Arizona. Mrs. Pearl Humphrey, Wichita Falls, Mrs. Johnnie Copeland, Mrs. Josephine Yates and Billie Turner of Perryton; nine grandchildren, and one sister, Mrs. R. E. Womble of the Notia community.

Registration Date for Sugar Rationing Latter Part of March

DALLAS, March 4.—State rationing administrators in Texas, Oklahoma and Louisiana—the three states in the Southwest region of the Office of Price Administration—have made public the manner in which sugar rationing books will be issued, probably during the last week of March.

A sugar rationing book for each man, woman and child will be issued, during a four-day period. Thousands of school teachers in each state will serve as registrars under the direction of local rationing boards. Family registrants will go to the elementary school of the district in which the family lives, while retail merchants will register several days earlier at high schools. Registration dates probably will not be set for another week or so.

One adult may register for each family unit, and a family unit, generally speaking, will be considered to be a group, related by blood or marriage, living and eating together under the same roof. Servants,

household must register individually. Meanwhile, state rationing administrators have appealed to all storekeepers now to sell back the sugar until their excess supply is gone, at the daily shelf price they do not, from one to two cents, but it is expected to be a sugar until their excess supply is gone near two pounds per person. Special provisions will be made later to provide householders with sugar for home preserving and canning.

—FOR VICTORY: BUY BONDS—

Mrs. George Norwood, Mrs. Chambers and Frank Turner leave today for their home in Bixbee, Arizona, after a week with their mother, Mrs. L. D. Turner.
