He struck the ground very heavily on his face and shoulder and was picked up a few moments afterward more dead than alive and prompt medical attention summoned. He was found to be very seriously injured on his face and side and the extent of internal injuries is not known but it is feared that he may yet die as he was coughing up blood yesterday afternoon.

Car of Cotton Catches Fire.

A car of cotton en route from Blanket to Brownwood caught fire this afternoon when the train was several miles from town. The car was uncoupled and brought to town about as fast as trains ever run over the road. A fire alarm was turned in and the department responded quickly and put out the blaze before any great amount of damage was done.

The train crew stopped at the water tank near the round house, thinking the fire could be extinguished there, but it was soon found that it would take better fire fighting facilities to keep the car and cotton from burning. The top of the car was burned and the cotton badly damaged but the loss will not exceed 33 per cent.—Brownwood Bulletin, Nov. 25th.

Probable Erath County Candidates.

A recent canvass and not very thorough one of the prospective candidates for the various Erath county offices at the next election discloses the following probabilities:

For sheriff Mack Creswell, G. E. Toliver, Dave Deaton, Bates Cox, Bob English, Geo Dougherty, J. A. Duckett and N. N. Johnson; for county clerk Geo. P. Knight, H. P. Cole and R. A. Morton; for representative J. M. R. Stephens, Lee Young, S. Frank, R. T. Roberts, G. W. Jenks and E. D. Jennings; for district clerk Ed Collier and M. L. Ashworth; for tax collector Bud Oates of Stephenville and Tom Stinnett of Clairette. So far as rumor goes it is not understood that the present county judge, attorney and tax collector will have opposition.

Exhibit of Poultry.

The poultry show held last Saturday in Dublin under the auspices of the Erath County Pet Stock and Poultry Association, was another of the continuous round of successes which has characterized the enterprise of the association. The exhibition of last Saturday had the largest number of entries of any show yet given. Following were the exhibitors and the fowls shown by each. Most of them have the stock exhibited for sale: Eugene Harber and James Reid, bronze turkeys; Lee Carlisle, R. F. Dickson, Mrs. Jno. Neal, D. L. Womack and E. C. Fewell pens of barred plymouth Rocks; E. C. Fewell and S. J. Weaver, white Pymouth Rocks; S. P. Saterwhite and James Brown, buff Plymouth Rocks; J. C. Crawford, Fewell & Phillips and James Brown, brown Leghorns; A. A. Monroe, J. W. Howze and W. S. Newton, buff orphingtons; J. R. Johnston, white Javas; W. T. Strong, silver laced Wyandottes; Orval Bateman, white Wyandottes; D. H. Hurd, buff Cochins; C. A. Morgan, buff Wyandottes. There were about two hundred birds on exhibition and a greater demand for fine stock than the exhibitors could furnish.

Want County Superintendent.

The Erath county Teachers Association held the largest meeting in its history at Tarleton college in Stephenville, Thursday and Friday of last week. Dr. Addison Clark addressed the meeting Friday night and a motion was passed to secure State Superintendent R. B. Cousins to address an early meeting of the association.

A movement was also put on foot to secure a county election to vote upon the question creating the office of county superintendent of schools. A committee was apppointed at the meeting to prepare a petition for the election and secure the necessary two hundred names of votes before presenting it to the commissioners court at its regular meeting in February.

Clearing Axe Injures Man's Skull.

While clearing land on J.N. Rice's place north of town Tuesday morning says the Rising Star Record of last Saturday, John Hammonds cut an ugly gash in his head with an axe. He was cutting a limb off of a tree when the axe caught on a limb behind him, jerking it out of his hand with the above result. The corner of the axe struck him in the temple, cutting to the skull, but the skull was not fractured.

DID NOT RETURN

Owner of Dublin Cotton Exchange Mysteriously Dissappears with Money of Speculators.

Local "Wall street" circles has been in a somewhat excited condition during the past week or ten days by the sudden disappearance on Wednesday of last week, the day after the big rise in cotton prices, of J. T. Bramlette, manager and owner of the Dublin cotton exchange. He announced his intention of going east a few miles on the Central Wednesday, but he was expected back that evening. He failed to return and he was still absent until about Friday before it dawned upon the local speculators that possibly he would not return at all. To this date their fears have been met and a number of the faithful are now deploring the loss of from one hundred to five hundred dollars where they had looked for all their margin money back with from fifty to two hundred per cent profit.

It is now very well established that Mr. Bramlette does not intend to return, though he is credited with not having intentionally defraudedany one of the funds placed in his hands. Personally he believed that the market would decline on the appearance of the government cotton ginning report but most of his customers had put margins against this that Mr. Bramlette retained the margin money paid him and did not put in the purchases, which would have left him a clear profit of all the money paid him if the price had declined. The unexpectedly heavy advance however was such as to place it beyond his power to pay the profits that should have been earned by the money of his customers and seeing his inability he left rather than face the dilemma into which he was thrown.

Maneuvers of Cotton Speculators.

A New York dispatch of late date says that Harvie Jordan, president of the Southern Cotton Growers Association and Joseph Hadley, a big speculator in the staple, had made eight million dollars in the heavy rise in cotton last week. Mr. Jordan denies having done so, however, and also Daniel J. Sully claims that it was a mistake about his losing anything and says he looks for fourteen cent cotton before Christmas. Theodore Price, an enthusiastic market bear, laughingly estimates his loss at fifteen million dollars and still says that he believes the crop will be heavy.

New State Bank at Hamilton.

A recent press dispatch from Dallas says John L. Spurlin of Hamilton, Texas, came to Dallas today to arrange for the purchase of a safe and fixtures to be used in a new state bank he has organized in Hamilton. Mr. Spurlin was also in conference with President Britton of the St. Louis Southwestern railroad, urging the extension of the Cotton Belt from Gatesville to Hamilton. He feels encouraged to believe that the extension will soon be made.

Mrs. Gregory Released.

Mrs. Wallace Gregory, who was recently arrested with her husband on charge with him of the murder of J. I. Gilbreath near Dublin on November 12th, sued out a writ of habeas corpus last week at Stephenville and was released, the counsel for the prosecution making no protest to the release. Mrs. Gregory went out to the poor farm and was entered there, where her children have been since the incarceration of her and her husband. Gregory has disposed of the crop he was making on the Gilbreath farm to use the proceeds to employ counsel to defend himself in the murder case against him which will probably come up at the term of district court which begins at Stephenville next Monday. It is understood that he has relatives in Alabama, who have been advised of his trouble and who will probably assist him in a financial way in his legal fight. Messrs. Riddle and Keith of Stephenville have been employed for the defense and it is understood that relatives of the dead man has or will employ council to assist the prosecution.

Nut Growers To Meet at Dallas.

Messrs. E. W. Kirkpatrick of McKinney and C. Falkner of Waco were in Dublin a short time Tuesday for the purpose of promoting an interest in the forthcoming meeting of the National Nut Growers Association, to be in session at Dallas Dec. 7th to 9th inclusive. Both of the gentlemen named are prominent and enthusiastic nut and fruit growers and the two have probably done more for Texas in the way of inciting an effort toward better products in these lines than any other dozen men in Texas with the exception of E. E. Risien of San Saba. The gentlemen want people interested in the growing of pecans and other nuts to attend the meeting with the assurance that they will have a voice in the proceedings and will learn something of value in dollars and cents to them. They also want exhibits of nuts, principally pecans, from every section of Texas and in all cases of course, want the best showing that can be made. Samples of pints or quarts or half gallons of good pecans may be left with R. H. McCampbell of Dublin or with the Progress and they will be forwarded to Dallas free of cost and exhibited in the name of the producer and his locality. There are many fine producing trees on the Leon within easy reach of Dublin and we hope that some of our good friends will decide to send in an exhibit or better still go to Dallas and take it with them.

Record Train Leaves Union Station.

The early morning Record train en route south due at Dublin about 5 o'clock each morning, has, much to the discomfiture of the travelling public, heretofore been leaving Ft. Worth, from the Frisco yards, more than a mile from the Texas & Pacific or union depot. Passengers for any point on the Frisco line south of Ft. Worth, who wished to take this train were compelled to either hire a cab or walk through the dark and across many railroad tracks at the hours of one or two in the morning in order to catch the train, or to go earlier on a street car by a circuitous route and sit for hours in a stuffy little, cold, clammy, leaky and illy lighted box called a depot, to wait until the train backed up to the station. The train now leaves the elegant Texas & Pacific depot at 1:55 and passengers will hereafter avoid the discomfort mentioned. The change became effective Nov. 19th and the time at the various stations en route to Brownwood remains unchanged.

Light Plant for Whitney.

The Collier Bros Gin Company at Whitney will in the near future install an electric light plant. Orders have been placed for the necessary machinery and they hope to have the plant in operation by the first of the year. They will install a 350-light plant to begin with and their dynamo will operate three separate circuits, one for residence lights, one for street lights and lights for the business part of town and the other for electric fans.

Railroad Company Chartered.

A company has been chartered with the purpose of building a railroad to be known as the West Texas & Northern from Amarillo or some point near there to or near Kerrville. The proposed route lies by way of Big Springs, Sterling City and San Angelo. Overtures for a bonus of sixty thousand dollars, right-of-way through the county and depot grounds has already been made to the Angelo people.

Texan in New York Campaign.

Hon. Fred Opp of Llano, Texas, has been given great credit by the friends of Mayor McClellan of New York for his work during the campaign recently closed, but which is now in the courts at the instance of Wm. R. Hearst, the rival candidate against the Tammany candidate. Mr. Opp served the McClellan interests as a speaker in the campaign in Greater New York.

Change of Managers.

H. R. Fletcher, who has been with the Wapples-Platter Co.'s wholesale house in Dublin for some time past, has been called to Fort Worth by the company and his position here will be filled by W. H. Logan, who comes from Fort Worth. The business here has been jointly managed by Messrs. Wray and Fletcher.

Briscoe Has Examining Trial.

The examining trial of J. H. Brisce for the killing of W. P. Cox at Rising Star recently was held at the Star Wednesday of last week. His bond was fixed at $7,500, which amount he readily gave with H. C. Bauman, Joe Thiele, Henry Loging and T. E. Davis as sureties.

It is stated that a new national bank will be opened in Brownwood early in the new year by Kaufman and Brownwood capital. Messrs. G. B. Davidson and A. L. Self of Kaufman are prime movers in the enterprise.

Arnold Ranch Changes Hands.

J. A. (Sandy) Arnold disposed of his ranch of 320 acres three miles south of Dublin last Friday to Messrs. C. A. Morg [illegible] and R. H. Fowler at a price of [illegible]

HOLD MEETING

Fort Worth and Brownwood Capitalist Propose Building a New Railroad.

Brooke Smith of Brownwood and G. H. Connell and L. B. Comer of Ft. Worth are the leading spirits in the proposed building of a steam railroad from Brownwood by way of Rising Star to Cisco. The capital behind the enterprise has asked of Cisco to furnish depot grounds about midway between Rising Star and Cisco, depot and terminal grounds in Cisco and that the citizens take $30,000 of second mortgage five per cent bonds on said road, the bonds to be paid for as the road progressed at the rate of $1,500 for each mile. The right-of-way for the entire line is to be secured in a satisfactory manner to the company before the proposition is final.

Cisco citizens held an enthusiastic meeeting Tuesday night of last week and at the meeting pledges towards acceptance were received in the sum of $10,335 and this is being augmented by a soliciting committee appointed at the meeting. The people of Rising Star are also at work raising a bonus; Brownwood folks say they are ready to do their part and appearances general look favorable for the ultimate building of the road.

Brooke Smith, mentioned as one of the promoters, is a prominent banker of Brownwood; G. H. Connell is a well to do oil mill operator who is well known and formerly resided in Dublin and L. B. Comer is connected with the traffice department of the Frisco.

Boy Killed Near Lamkin.

On Saturday, Nov. 18th, Grover Glascow, the fifteen year old son of W. H. Glascow, who resides between Lamkin and Wilson, was found dead in the woods about 4 o'clock in the afternoon. He had gone out hunting and stopped to gather some haws, it is supposed, when his gun was accidently discharged, the load taking effect in his side. He was found dead by one of his neighbor boys who had gone to join him in the hunt.

The oldest case in the courts of Bell county has again been reversed and remanded. The case is one in which Alice and Roger Johnson sued the Santa Fe railroad for damages to "Hoppy" Johnson, he having lost his foot under the cars when he was a small boy. He is now a grown man and the case has been in the courts all these years.

Nov. 27th one of the most terrific gales in the history of the Great Lakes occurred in the vicinity of the Apostle Islands. Three big lake steamers were driven ashore and several members of the crew of one of them are believed to have perished. For thirteen hours the wind raged at the rate of sixty or seventy miles an hour.

The military officers at St. Petersburg admit that no reliance whatever can be placed in the line regiments. The spirit of revolt pervades the whole army. The Manchurian forces are almost openly in revolt. The garrison of St. Petersburg has formulated a series of demands involving a remodelling of conditions of service.

The Austrian parliament opened Tuesday one of the most important sessions in its history. Two hundred thousand working men passed in procession by the house of parliament in silent, orderly manner, thus voicing their universal demand for equal universal suffrage. Practically every store in the city of Vienna was closed and iron shutters down. Every Austrian man over twenty-four years of age has a vote but the votes are divided into classes and the higher classes have more influence in elections than the mass of common people. Consequently the masses are demanding the abolition of all suffrage privileges enjoyed at their expense.

Brownwood City Directory.

A city directory of Brownwood has been published containing the name of three thousand residents of that prosperous city. The census taken at the time the names were collected showed a total population of sixty-three hundred.

New Method of Opening Cotton Bolls.

A Grayson county farmer is trying to help or force nature to open his cotton bolls. He is W. C. Tinsley, who resides near Flowing Wells. He conceived the idea of stopping the flow of sap through the stalk and thus hastening the opening of the boll. To stop this sap flow he has been running a turning plow to cut away the land near the root and at the same time clipping the side roots and exposing the whole to the sun and the air.

Owing to the continued rains which have been greatly delaying the opening and picking of cotton. The result of this experiment is not yet apparent, but Mr. Tinsley is confident that his plan will produce the desired effect.

A Fearful Fate.

It is a fearful fate to have to endure the terrible torture of piles. "I can truthfully say," writes Harry Colson of Madisonville, Ia., that for blind, bleeding, itching and protruding piles, Bucklen's Arnica Salve is the best cure made." Also best for cuts, burns and injuries. 25c at Overton Drug Co.

Arrested Again.

Dr. L. E. Knopf of Sterling City was arrested late Wednesday afternoon by Sheriff J. S. McConnell on a charge of adultery and petty theft. Thought His Boy Was Killed.

The Brownwood Bulletin of Thursday, last week, says J. H. Stewart, who arrived in the city this morning from Chico, Wise county, says that he came here in response to a message from May, Texas, announcing that his son, Jim Stewart, had been killed. Immediately upon his arrival he put in a call for May and he says it was answered by his son, who stated that he was all right and would come on to Brownwood to meet his father. An investigation of the matter fails to show that any such a message was sent from Brownwood either by telegraph or telephone, and it is feared the gentleman is either the victim of a cruel joke or suffering from a temporary mental derangement.

Mexicans Sentence Americans.

In Chihuhua Wednesday, Nov. 22nd, Judge Rice sentencend C. T. Richardson, C. S. Harle and William Mason, Americans, to be shot. The men were accused of murdering two men in Chihuhua for life insurance money. Richardson was an insurance agent. Mason, his brother-in-law was the assistant agent, and Harle was the examining physician. It was charged that they murdered a man named Devers whom they decoyed from El Paso and another man named Mitchell, who is said to be a half brother to Mason. Richardson is from Rochester, N. Y., where he married Mason's sister. The case has been in the Mexican courts three years. Harle formerly was an El Paso physician.

In Rochester Mason was known as William Mitchell and Richardson went by the name of Leslie E. Rulbert.

They left there suddenly because of alleged crookedness in divorce cases which they handled. Mrs. Richardson—Miss Mitchell—then was a stenographer in Richardson's office before she married him.

The case is one of the most noted in the history of American manipulation in Mexico and is declared the boldest life insurance swindle on record.

HOOD COUNTY UNION.

Hood county union met with Fort Spunky local union last Friday. An interesting session was held. Delegates were elected to attend the Comanche and Cleburne meetings called by officers of the Southern Cotton Growers Association. R. S. Whitehead was elected to attend the National council which meets at Texarkana, Dec. 7th. A committee was appointed to look into the feasibility of building a warehouse in connection with the farmers gin.

The next county union will be held with Granbury local, Friday, Dec. 15th.

MERCURY-PASSWORDS.

Who said the Farmers Union could have no influence over the price of cotton?

Demand that everything be union made and union raised. That's the idea.

The Farmers Union can now say very appropriately "We told you so." Did you heed the advice? If not, who's to blame?

Market your cotton gradually. Don't sell on a declining market. That's the doctrine on which we are winning.

Slowly but steadily the trend of modern thought is revolutionizing the manner of writing history. The doings and misdoings of the so called "nobility" does not hold the boards to the utter exclusion of the plain people in some of the more popular historical works.

MINEOLA COURIERS.

Never sell below the price.

The pull-back does no good.

We need none but builders.

Of course your stables are warm and nice for the cattle and horses this winter.

A correct price, a steady price is what we must have regardless of the bulls and bears.

The dumper is an enemy not only to himself but to all other producers. He must quit it.

Poor work stock will cause the mortgage to remain awhile longer. The mortgage thrives best where the stock is the poorest.

It takes patience and perseverance to have regularity on the farm, but it pays in dollars and cents and comforts.

While the bulls and bears are fighting we must put in our time organizing for a steady market. A steady market will kill both of them. They could not then catch suckers, the fish, the food on which they live.

The farmer has never had a square deal, owing to the fact that he has not properly understood how to combine his efforts. If we ever get a square deal we will have to make it ourselves. Let's get down to work and paddle our own canoe.

FARMERS JOURNALS.

The northern farmer must sell pork to buy cotton goods because he can't raise the cotton and make the goods. But the southern farmer can raise both the cotton and pork, and yet he is poorer than his northern brother. It isn't because he doesn't work as hard either. Then why is it?

Somebody once said that the remedy for the evils of liberty was more liberty, and we have about concluded that the remedy for the evils of trusts is more trusts. When the people whose labor creates the raw material for clothing and food get together in a trust, then there will be one trust that has a right to exist.

Just for a change—and also for other and better reasons—we would like to see the union drop the slogan, "Reduce Your Cotton Acreage," and adopt in lieu thereof this slogan: "Increase Your Acreage of Food and Forage Crops." An increase of these crops will of itself settle the cotton reduction question, and somehow "increase" sounds better than "reduction."

One of the greatest bars to the progress of the Farmers Union in its fight for higher prices for cotton is tenantry. Tenantry! All the curses combined are too mild to apply to land speculation. It makes it almost impossible to dislodge those who speculate on the products of the land. The very principle of land ownership is in conflict with the right of a human being to live upon the earth, but when it extends beyond actual use and occupancy it becomes a crime against humanity. No individual is to blame, however. We are all guilty alike, collectively, if we consent to it.

SAFETY OF FISHERMEN

Plan to Protect Them While Fishing Near Newfoundland.

NEW OCEAN LANES PROPOSED

France Asks United States to Co-operate in Keeping Steamships Off Newfoundland Banks — Suggests Routes Which Would Prevent Crossing the Fishing Grounds From April 15 to Oct. 15.

Through a note addressed by the French embassy in Washington to E. T. Chamberlain, commissioner of navigation of the department of commerce and labor, France has asked the cooperation of the United States, in the name of humanity, in establishing the ocean routes pursued by mail steamers on the Atlantic in such manner as to assure the safety of fishermen on the banks near Newfoundland, says the Washington correspondent of the New York Herald. M. Charles de Chambrun, secretary of the French embassy, had a conversation with Mr. Chamberlain upon the matter a few weeks ago.

The question of routes was first debated at the maritime conference held in Washington in October, November and December, 1889, but in the opinion of the French nation its conclusions were not wholly satisfactory in that they did not thoroughly safeguard the lives of the fishermen, of whom the note says there are each year about 20,000, one-half Frenchmen and the other half divided between Americans and English.

The French ports in Newfoundland have insisted upon France taking the initiative in proposing to the governments an agreement tending to forbid the fast mail steamers crossing the banks of Newfoundland during the cod fishing season, which is from April 15 to Oct. 15. Independently of any action which the American, English, German and Dutch nations may take, France has in its extension of the mail contract to the Compagnie Generale Transatlantique inserted in the new contract this provision:

> The distance taken as a basis of computation is the average fixed at 3,171 nautical miles of actual course, corresponding to the various trips effected in the year between Havre and New York (meridian of Sandy Hook), provided that the mail steamers shall refrain from crossing the Newfoundland banks between the 15th of April and the 15th of October, except when compelled to do so by causes of vis major, which shall be established by producing the log book. With the exception of cases of vis major, every crossing of the banks of Newfoundland by a mail steamer between the 15th of April and the 15th of October will make the concessionnaire liable to a fine of 2,000 francs.

"It appears from the marine notices published by the British administration in 1891," says the French note, "that the English companies of Liverpool and the North German Lloyd have already adopted the routes, according to which their ships must from Jan. 1 to July 14 of each year clear the southern prong of the great bank of Newfoundland at a distance of about eight miles and cannot go thence northward beyond a line running from that point to the western end of Sable island.

"The way to accomplish serious progress toward the solution of the problem would then be to secure from the several American companies engaged in the fast mail service between Europe and the northern United States or southern Canada a renewed declaration that they accept the above described routes, with the amendment that instead of causing them to be followed by their ships until July 14 inclusive they should promise to do so until Oct. 1, or, at the very least, until Sept. 1.

"In order to make quite sure that the route would be followed it would be distinctly advisable to specify the selection of that route as one of the causes of the contracts let by the postal service of the United States for the transportation of its mail bags to destination on board the ships of those companies.

"If the measure that France has al-

interested powers should fail to meet with their approval or, in their opinion, to meet in an adequate manner the interests involved, the government of the republic would feel inclined to lay before the maritime powers a proposition looking to the calling of an international conference at Paris for the purpose of discussing the rules that should be formed for the protection of the fishermen following their occupation near the banks of Newfoundland against the risk of collision with steamships."

The routes prescribed by the Compagnie Generale Transatlantique by France and which by inference that country desires to have adopted by other countries controlling lines of fast mail steamers are thus given:

"Westward, an arc of great circle, starting from either Fastnet rock or Bishop rock and ending at the foot of the bank, in about 43 degrees 20 minutes north and 52 degrees 20 minutes west, thence a loxodromic line as far as Sandy Hook. Eastward, a loxodromic line to a point some sixty miles south of the point above indicated, thence the arc of great circle from that point to Fasnet rock or Bishop rock."

DIET FOR FEVERS.

Diluted Milk Is the Safest Kind of Food to Employ.

During the first few days of any run of fever there should be no attempt made to give food, for, as neither gastric nor pancreatic juices are secreted, the stomach cannot digest food and it putrefies. After the saliva and other secretions have been restored food should be given that is easiest to digest. Milk, which contains all the food principles, is known as the special diet for fevers of any sort. Diluted milk is easier of digestion than the pure milk, which curdles almost as soon as it enters the stomach. One part of limewater to one of milk is a good proportion. Milk and mineral water is also excellent. Fill a glass half full of milk and then fill up with the mineral water. A little salt increases its palatability. Invalids, by the way, prefer more salt and less sugar in any dish. If plain milk agrees with the patient he may be allowed to have from one to two quarts in twenty-four hours. Milk and barley waters and peptonized milk are all nutritious and digestible. Where a patient gets very tired of the taste of milk the flavor may be varied by adding, with the physician's permission, a little strong coffee or oyster or clam broth.—Chicago News.

The Pimpernel.

Not every one knows what flower is meant by the pimpernel in the famous lines:

The white lake blossom fell into the lake
As the pimpernel dozed on the lea.

It is a pretty English wild flower of the primrose family and commonly known as "poor man's weather glass," because its petals are so sensitive to moisture that they droop before the coming of rain. Garden burnet is sometimes confounded with this English plant because it is called by the French "pimpernelle." But the pimpernel which "dozed on the lea" is a slightly poisonous, acrid plant, not at all suitable in a salad.

Wisdom's End.

"While he was under thirty his parents had too much sense to let him marry."

"Yes."

"While he was under fifty he had too much sense to wed."

"I see."

"Now that he's eighty-five"—

"Well?"

"He's going to take a wife."—Louisville Courier-Journal.

All For Him.

"Your fiancee seems to have a will of her own."

"Yes, and sometimes I half regret that I'm the sole beneficiary."—Philadelphia Press.

Mr. Risien is a capable, honorable and in every way reliable young man and his success is richly deserved.

The fine horse owned by Dr. O'Brien ran away last Tuesday evening with the doctor's son Lee, who was driving the horse hitched to a cart. At the Citizens National Bank corner the jog of the cart caused the single tree to break and the redound threw Lee out. The horse at once took his best speed down the center of Patrick street at a time when the street was crowded but as fortune would have it not one of the many vehicles on the street were seriously damaged by the flying vehicle. The horse was brought to a stop again at a post at the Klondike old stand with no injuries, though the cart was torn to fragments.

On each table was a cut glass bowl of salted peanuts. Mrs. Flack kept score and the afternoon passed all too quickly. Before departing the guests were served with delicious salad and sherbert. FROM BIRTH TO OLD AGE

Life is a constant fight against the dangers of disease, and he holds his own the best who keeps his body and its functions in the best working trim.

There are times in every life when Nature gratefully accepts a little aid. She does not want a whipping up for that is inevitably followed by depressing reaction.

In most cases a tonic and alterative properly compounded will afford the required help by promoting digestion, assimilation and reconstruction of tissue and reducing waste of vital nerve forces.

It must not be *an alcoholic stimulant*—just a vegetable tonic. Meeting these needs and conditions Dr. Pierce's Golden Medical Discovery has been in successful use these forty years and has accumulated a record of cures unequaled in the history of medicine. It is composed of non-alcoholic, glyceric extracts of Golden Seal root, Queen's root, Stone root, Black Cherrybark, Bloodroot and Mandrake root, and by special processes perfected by Dr. Pierce, in his own laboratory, so combined in the most exact proportions, and their medicinal properties preserved without the use of alcohol as to render it a *safe* and *effective* remedy for use in the family without consulting a doctor. Young or old can take it freely as needed, and now that its composition is published, there is no ground for prejudice against it as a patent medicine or secret medicine. It is neither.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists sell them, and nothing is "just as good."

Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 21 one-cent stamps, or cloth-bound for 31 stamps.

THE above picture of the man and fish is the trade-mark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

Rev. G. H. McAnnally of Putnam is visiting in the city this week. He formerly lived at Duffau and is a son-in-law of Math Roberson. Mr. Hicks' father and family were among the earliest settlers of this county. He thinks he has a good place in Clay county, but doesn't deny the possibility of his returning again to his "first love."

John Bird was here from Dustin, I. T., latter part of last week visiting his parents, Mr. and Mrs. J. L. Bird. He has had a run on the road from Dustin to Gutherie as engineer for over two years, and says he will stay with it till they fire him. One important piece of news that many of his old Stephenville friends had not heard until they met him last week, is that he has a fine pair of twins at his home who have been making life interesting to him for the last six or seven months. Mr. Bird says that Dr. Guest, who moved from Lingleville to Dustin a few months ago, is doing well there, notwithstanding that Dustin is a small place and has seven or eight other doctors.

NIGHTS OF UNREST.

No Sleep, No Rest, No Peace for the Sufferer from Kidney Troubles.

No peace for the kidney sufferer—

Pain and distress from morn to night.

Get up with a lame back,

Twinges of backache bother you all day,

Dull aching breaks your rest at night,

Urinary disorderes add to your misery.

Get at the cause—cure the kidneys.

Doan's Kidney Pills will work the cure.

They're for the kidneys only—

Have made great cures in Dublin.

J. D. Sugg, farmer, living three miles southwest of Dublin, Texas, says: "I suffered all last year with lumbago or backache. I had terrible pains in my back and could not stoop or bend over without intense suffering. It was impossible for me to rest at night with any comfort and I never seemed to get any rest. The kidney secretions were highly colored and contained a sediment like brick dust after standing. I tried several remedies but they failed to bring the hoped for relief, and when I went to the Overton Drug Co. for a box of Doan's Kidney Pills I had little faith in them, I have to admit. However, they proved to be exactly what I needed. The pain in my back soon disappeared and the kidney secretions were rendered normal. I cannot tell how much I appreciate this wonderful remedy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Mrs. R. V. Neely has let the contract for a 50 by 150 feet two story stone building on the south side in the vacant space between Catter's store and the meat market, which when finished will be the handsomest in the town. Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of lagrippe with all of its miserable symptoms," says Mr. J. S. Egleston of Maple Landing, Iowa. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a dose of Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completly knocked out the grip." These tablets promote a healthy action of the bowels, liver and kidneys. which is always beneficial when the system is congested by a cold or an attack of grip. For sale by Overton Drug Co.

GORMAN

From the Progress.

Nov. 24th.—Ben Higginbotham of Dublin was visiting relatives in Gorman last week.

Mrs. Mollie Williams, wife of "Uncle" Jim Williams living at Duster, died very suddenly last Sunday at one o'clock. She was sitting at the dinner table and spoke of a pain about the head and then expired almost instantly. She was about forty-five years of age and one of the best beloved ladies of the community. The remains were interred at Oakland cemetery Monday afternoon.

A pretty ominous looking storm cloud gathered in the west yesterday afternoon and came over Gorman with a buster, causing some to hunt peace of mind in that ever valued friend, the storm cellar. At Kokomo Ed Hyatt informs us a church was blown down and the postoffice unroofed. The main body of the cloud passed to the west of Gorman and there was probably other damage done.

A Center Shot.

An exchange gives an account of a man going into an implement house to inspect some buggies with a view of buying one. After looking at some good buggies and pricing them the man said that he could send to Chicago and beat that price. The implement dealer said that he had a buggy up stairs, a better grade than the Chicago buggy for less money. The prospective customer asked to see the buggy. "No, you can't see it," said the dealer. "You don't see the Chicago buggy before buying and you send your money in advance. You can't see my buggy until you pay me the cash." The man saw the point, purchased a good buggy and went away with a resolve to patronize his own town thereafter.

Unique Suit.

Suit was filed this week by C. P. Kendall against E. F. Holcomb and wife for possession of the diamond that was found in a chicken's gizzard some time ago. Plaintiff alleges that the diamond is worth ninety-five dollars. Each side has an attorney employed.

*Perhaps in all the millions of cases filed in the courts of the country, no case is like this one. Years ago C. P. Kendall lost a diamond, and the one in the chicken's gizzard is alleged to be the one he lost, hence the suit.—Sterling City News Record.

Robbery at Eastland.

Some time last night the vault and safe of County Treasurer G. R. Whittington was drilled into and blown open and $200 taken. After the robbers had finished their work at the treasurer's office the horse and buggy of Judge J. R. Stubblefield was stolen ,and driven to Cisco and turned loose on the streets and was found roaming around town this morning. Fortunately our treasurer had carried his deposits to the county depository last evening, or the robbers would have in all probability secured the $20,000 that had just been received by him. Sheriff Bedford is making every effort possible to apprehend the robbers. No clue to the robbers has been discovered at this writing.—Cisco Round-Up.

Child's Narrow Escape.

Late Saturday afternoon little Clara Elizabeth, the daughter of Mr. and Mrs. R. B. Austin, 478 Emerick street, ran into the back yard from the house to play. Her mother missed the little tot and followed her. The child fell into a post hole filled with water and nearly drowned before the mother could locate her. A faint cry of the child caused the mother to see her and to reach her just in time. A second later and the child would have been drowned.—San Angelo Standard.

A Pantomime Performance.

An episode that occurred at the executive offices this morning suggests what contretemps are possible in a democracy, says a late Washington dispatch. Among the president's callers were Baron Henlemuller, the Austrian ambassador, and Booker T Washington, the negro educator.

They arrived almost at the same time and after leaving their coats and hats in an outer room were ushered into the reception room. The baron finished his business first and grabbing up overcoat and hat, hastened away. When almost in front of the White House the baron reached down into a pocket and pulled out a pair of gloves and started to put them on. Then he stopped suddenly. The baron has the hands of a patrician; the gloves were about five sizes too large for him. The baron examined them critically. He must have picked up some one else's gloves by mistake. He had, and also some one's overcoat.

Hurriedly he pulled it off and, with something more of haste than befits the dignity of an ambassador, started back toward the executive offices. He reached them just in time to see Booker Washington putting on the ambassadorial overcoat, bowed most formally. received the ambassadorial overcoat, bowed again and hurried away. Not a word was spoken but it was one of those pantomimes that would have been marred by words.

Found After Long Search.

At Temple a few days ago Officer Miller of the Santa Fe discovered a man in the railroad yards in an almost dying condition. A physician was called and ordered him taken to the King's Daughters' Hospital where he recovered sufficiently to give his name and address and that of his mother, whom he described as a wealthy woman of Burlington, Iowa.

The mother was communicated with and she wired, asking that all possible for money to secure be done for him. She arrived later and it was learned that the young man had been sought by his family and by Pinkerton detectives for a year without success. The young man is one of three sons of wealthy parents. The other two sons were graduates of Harvard and Amherst Universities. The one in Temple had attended Harvard and was in his second year when he received a fall in the gymnasium which injured his head and to an extent impaired his faculties. The most eminent physicians of the country were consulted and failed to give relief. Finally under advice received from a specialist the patient was placed in an institution in Missouri and treated for an affection of the spine for several months. It was finally announced that there was dislocation of the neck, calling for a stretching operation which was very severe.

The night after the operation was performed without success being achieved, the patient escaped from his nurses and left the institution, and although Pinkerton detectives were placed on his trail and a general advertising campaign inaugurated to locate the fugitive, he baffled all attempts at discovery. During the time his mother has traveled to many places far and near to have disinterred the body of men who had been killed or died under unusual circumstances.

The young man had been to Mexico and in many strange places that he could not recall, but his story showed that he had wandered as an object of charity. About a month ago he became ill and had been passed along from town to town until his physical condition was so terrible that when he reached Temple he was ready to give up. His father, who died some years ago, was a wealthy citizen of Burlington and one of the city parks there is named for him. Before he died he distributed his property, consisting largely of railroad stocks, and this son's share included a large block of Missouri, Kansas and Texas railroad stock, amounting to a considerable holding and at the very moment he was riding on the freight trains of the line in hobo fashion, he was one of its owners.

The fear of a repetition of the terrible operation undergone in Missouri preyed upon his mind and induced him to remain silent rather than endure the tortures for a second time.

The mother paid literally for the attentions shown her son and they left at once for their home in Iowa.

A Certain Cure for Croup.

When a child shows symptoms of Croup there is no time to experiment with new remedies no matter how they may be recommended. There is one preparation that can always be depended upon. It has been in use many years and has never been known to fail, viz: Chamberlain's Cough Remedy. Mr. M. F. Compton of Market, Texas, says of it, "I have used Chamberlain's Cough Remedy in severe cases of croup with my children and can truthfully say it has always given prompt relief." Sad Sequel to the Wreck.

A sequel to the recent Texas & Pacific wreck near Fort Worth in which Luther Wilson, fireman on one of the engines was killed, is contained in a pathetic story in which is related the sad details of the wreck of the hopes of a young lady. This young woman was a clerk in a business house in Fort Worth, was loved by her associates, respected and valued by her employers. The day upon which the railroad accident occurred she gave notice that in one week she would retire from the employment of the firm and her young lady companions being apprised of the step gathered about her to beg that she would reconsider and remain with them. She was so determined in her refusal to withdraw her resignation and so pleasant and happy in her demeanor that her companions at once suspected her motives and in chorus the girls accused her of matrimonial intentions. To their surprise the young lady admitted it without hesitation and in response to the numerous demands, "O, tell us about it,'' she bounded upon the counter and with eager listeners gathered about her, she told of her plans; of her engagement to Luther Wilson; of her perfect felicity in contemplating a life of marriage bliss. She told when they were to be married, where they were to reside and extended a cordial invitation to her friends around her to visit her after the wedding.

Hearty congratulations followed and while these formal felicitations were being showered upon the happy girl a messenger boy entered with a telegram. It was addressed to the young lady; who was at that moment the happiest in all Fort Worth. It contained the words: "Luther Wilson killed in wreck.''

The broken hearted girl read the dispatch and fell unconscious into the arms of her companions.—Waco Times-Herald.

Catfish in the Grass.

Hans Detleft of Iowa Park, Texas, says that a few days ago while out in his pasture his little boy saw hundreds of little catfish from three to four inches long in the grass, some dead, others living. Mr. Detleft said they picked up about three hundred lively ones and put them in the tank.

Make Home Pleasant.

Throw open your shutters and let in the bright sunlight. Fade the carpets? Well, supposing it does, isn't it better than being faded yourself and having your children seek sunshine elsewhere? Let them enjoy it at home, and let your face shine forth with happy smiles, and see how soon the reflection is seen on all around you. If it be cold, stir up the fire in the grate and let it crackle and snap and dance up the chimney back, and brighten the home heart. I mind me now of a broad, old-fashioned fire place which was the delight of my childhood days. Large sticks of wood were piled on the andirons, and the flames went leaping up the broad chimney, through which one could look and see the blue sky. Then when bed time came a back log was placed on the heated ashes, and in the morning one mass of glowing coals greeted the early riser. Wasn't that a place for popping corn? All around that home hearth were happy faces, reflecting the mother love that shone over all. Did the boys seek amusement away from home winter evenings, or the girls creep off to bed early saying "it was so lonely?'' No, to them there was no place like home. Never a winter evening too long to suit us. What did we do? First there was reading aloud, in which all took turns, then we would often commit verses to memory and often interspersed with singing which, if it lacked harmony did not lack force. After this came various games with which we are all acquainted—dominos, authors and often some more noisy games, as hunt the handkerchief, puss in the corner, and blind man's buff. Then there were the beech nuts and butter nuts that we had gathered in the fall; and did ever any one make such molasses candy as mother? No matter how thickly the clouds may gather with the coming years, those childhood days will always glow with rosy light.—Exchange.

Large and Famous Diamonds.

The latest sensation of the diamond world was the discovery of a monster diamond on January 26th, 1905, near Pretoria, Africa, and which has been named the Cullinan diamond. It weighs 3,032 carats or one and one-fourth pounds, is four inches long and two and a half inches high and one and a half inches in depth. It is a splendid quality and singularly free from defects. It is valued at about four million dollars. The new diamond will rank as the largest ever found. Some of the others notable for their size or history are the Great Mogul, 188 carats; Regent, 136 carats; Florentine, 139 carats; Southern Star, 72 carats; Koh-i-noor, 86 carats; Shah, 72 carats; Sanci, 53 carats; The Polar Star, 40 carats; Toff, 194 carats.

In point of historical interest the Sanci diamond probably comes first. It weighed 106 carats and belonged to Charles the Bold, who wore it at the battle of Nancy, at which he fell. A Swiss soldier found the jewel and sold it for a gulden. It passed into the possession of the king of Portugal, who sold it for one hundred thousand francs. It then got into the possession of Sanci, a Frenchman, one of whose descendants was sent as ambassador by his sovereign, who required the diamond as a pledge. The servant carrying it was murdered, but not until he had swallowed the diamond; the body was opened and the stone found. The crown of England next possessed it and James II. carried it with him to France in 1688. Louis XV. wore it at his coronation. In 1835 it was purchased by a Russian and later by William Waldorf Astor, who now owns it.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

Rev. G. H. McAnnally of Putnam is visiting in the city this week. He formerly lived at Duffau and is a son-in-law of Math Roberson. R. W. Hicks came in Tuesday and informed us that he would leave in a few days for Blue Grove, Clay county, where he has bought land. Mr. Hicks' father and family were among the earliest settlers of this county. John Bird was here from Dustin, I. T., latter part of last week visiting his parents, Mr. and Mrs. J. L. Bird. He has had a run on the road from Dustin to Gutherie as engineer for over two years, and says he will stay with it till they fire him. One important piece of news that many of his old Stephenville friends had not heard until they met him last week, is that he has a fine pair of twins at his home who have been making life interesting to him for the last six or seven months. Mr. Bird says that Dr. Guest, who moved from Lingleville to Dustin a few months ago, is doing well there, notwithstanding that Dustin is a small place and has seven or eight other doctors.

GRANBURY.

From the News.

Nov. 22nd.—Capt. McD. Reil, wife and little daughter of Stephenville spent last Saturday in the city, guests of Capt. J. H. Doyle and family.

Mrs. Sam Davidson of Fort Worth and Mrs. H. L. Kight of Bluff Dale were among the friends attending the crystal wedding of Jno. G. Swofford and wife.

W. H. Hawkins of Stephenville is spending the week here, assisting his manager, Jack Gordon, in the special sale and making acquaintances among Hood county people.

D. C. Codgell this week sold to a cattle company in Mexico six hundred head of high grade stock cattle, which will be shipped in a few days. He has built a dipping vat at his ranch on Robinson creek, where all these cattle will be dipped in crude oil before they are shipped. This is the first dipping ever done in the county and will be watched with interest by stockmen.

NIGHTS OF UNREST.

No Sleep, No Rest, No Peace for the Sufferer from Kidney Troubles.

No peace for the kidney sufferer—Pain and distress from morn to night.

Get up with a lame back,

Twinges of backache bother you all day,

Dull aching breaks your rest at night,

Urinary disorderes add to your misery.

Get at the cause—cure the kidneys.

Doan's Kidney Pills will work the cure.

They're for the kidneys only—

Have made great cures in Dublin.

J. D. Sugg, farmer, living three miles southwest of Dublin, Texas, says: "I suffered all last year with lumbago or backache. I had terrible pains in my back and could not stoop or bend over without intense suffering. It was impossible for me to rest at night with any comfort and I never seemed to get any rest. The kidney secretions were highly colored and contained a sediment like brick dust after standing. I tried several remedies but they failed to bring the hoped for relief, and when I went to the Overton Drug Co. for a box of Doan's Kidney Pills I had little faith in them, I have to admit. However, they proved to be exactly what I needed. The pain in my back soon disappeared and the kidney secretions were rendered normal. I cannot tell how much I appreciate this wonderful remedy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

COMANCHE.

From the Exponent.

Nov. 24th.—Miss Gene Cooper of Lamkin was here Sunday visiting her sisters, Misses Bertie and Nellie Cooper.

Lee Young of Stephenville was here Friday and sat as district judge in a case in which Judge Lindsey was disqualified.

Miss Arrie Baxley of Goldthwaite was here last week the guest of Miss Christina Hohberger. She went to Dublin Monday.

Last week a very painful operation was performed upon "Uncle" Jake Brown of Beattie, five glands in his throat being removed. He was getting along fairly well at last report.

Harry Brin circulated a subscription list last Friday and secured $56.50 for the benefit of the suffering Jews in Russia, which he sent to the head of the committee at New York. This is considered a very liberal contribution for a town the size of Comanche and on such short notice.

Mrs. R. V. Neely has let the contract for a 50 by 150 feet two story stone building on the south side in the vacant space between Catter's store and the meat market, which when finished will be the handsomest in the town. The lower story will be occupied as stores and the upper part as an office building. Work was begun last Monday.

Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of lagrippe with all of its miserable symptoms," says Mr. J. S. Egleston of Maple Landing, Iowa. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a dose of Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completly knocked out the grip." These tablets promote a healthy action of the bowels, liver and kidneys, which is always beneficial when the system is congested by a cold or an attack of grip. For sale by Overton Drug Co.

GORMAN

From the Progress.

Nov. 24th.—Ben Higginbotham of Dublin was visiting relatives in Gorman last week.

Mrs. Mollie Williams, wife of "Uncle" Jim Williams living at Duster, died very suddenly last Sunday at one o'clock. She was sitting at the dinner table and spoke of a pain about the head and then expired almost instantly. She was about forty-five years of age and one of the best beloved ladies of the community. The remains were interred at Oakland cemetery Monday afternoon.

A pretty ominous looking storm cloud gathered in the west yesterday afternoon and came over Gorman with a buster, causing some to hunt peace of mind in that ever valued friend, the storm cellar. At Kokomo Ed Hyatt informs us a church was blown down and the postoffice unroofed. The main body of the cloud passed to the west of Gorman and there was probably other damage done.

TOLAR.

From the Standard.

Nov. 24th.—Mrs. Edgin visited friends in Lingleville this week.

H. L. Kight spent several days last week in Hasse, looking after his gin interests at that place.

Mrs. H. L. Kight spent Sunday at Granbury and Monday morning with friends at Bluff Dale.

Mrs. Grace McIlroy and son Douglas, returned Friday from a several days' visit with her mother, Mrs. John A. Adams of Dublin.

A Center Shot.

An exchange gives an account of a man going into an implement house to inspect some buggies with a view of buying one. After looking at some good buggies and pricing them the man said that he could send to Chicago and beat that price. The implement dealer said that he had a buggy up stairs, a better grade than the Chicago buggy for less money. The prospective customer asked to see the buggy. "No, you can't see it," said the dealer. "You don't see the Chicago buggy before buying and you send your money in advance. You can't see my buggy until you pay me the cash." The man saw the point, purchased a good buggy and went away with a resolve to patronize his own town thereafter.

Unique Suit.

Suit was filed this week by C. P. Kendall against E. F. Holcomb and wife for possession of the diamond that was found in a chicken's gizzard some time ago. Plaintiff alleges that the diamond is worth ninety-five dollars. Each side has an attorney employed.

*Perhaps in all the millions of cases filed in the courts of the country, no case is like this one. Years ago C. P. Kendall lost a diamond, and the one in the chicken's gizzard is alleged to be the one he lost, hence the suit.—Sterling City News Record.

Robbery at Eastland.

Some time last night the vault and safe of County Treasurer G. R. Whittington was drilled into and blown open and $200 taken. After the robbers had finished their work at the treasurer's office the horse and buggy of Judge J. R. Stubblefield was stolen, and driven to Cisco and turned loose on the streets and was found roaming around town this morning. Fortunately our treasurer had carried his deposits to the county depository last evening, or the robbers would have in all probability secured the $20,000 that had just been received by him. Sheriff Bedford is making every effort possible to apprehend the robbers. No clue to the robbers has been discovered at this writing.—Cisco Round-Up.

Child's Narrow Escape.

Late Saturday afternoon little Clara Elizabeth, the daughter of Mr. and Mrs. R. B. Austin, 478 Emerick street, ran into the back yard from the house to play. Her mother missed the little tot and followed her. The child fell into a post hole filled with water and nearly drowned before the mother could locate her. A faint cry of the child caused the mother to see her and to reach her just in time. A second later and the child would have been drowned.—San Angelo Standard.

A Pantomime Performance.

An episode that occurred at the executive offices this morning suggests what contretemps are possible in a democracy, says a late Washington dispatch. Among the president's callers were Baron Henlemuller, the Austrian ambassador, and Booker T Washington, the negro educator.

They arrived almost at the same time and after leaving their coats and hats in an outer room were ushered into the reception room. The baron finished his business first and grabbing up overcoat and hat, hastened away. When almost in front of the White House the baron reached down into a pocket and pulled out a pair of gloves and started to put them on. Then he stopped suddenly. The baron has the hands of a patrician; the gloves were about five sizes too large for him. The baron examined them critically. He must have picked up some one else's gloves by mistake. He had, and also some one's overcoat.

Hurriedly he pulled it off and, with something more of haste than befits the dignity of an ambassador, started back toward the executive offices. He reached them just in time to see Booker Washington putting on the ambassadorial overcoat, bowed most formally, received the ambassadorial overcoat, bowed again and hurried away. Not a word was spoken but it was one of those pantomimes that would have been marred by words.

Found After Long Search.

At Temple a few days ago Officer Miller of the Santa Fe discovered a man in the railroad yards in an almost dying condition. A physician was called and ordered him taken to the King's Daughters' Hospital where he recovered sufficiently to give his name and address and that of his mother, whom he described as a wealthy woman of Burlington, Iowa.

The mother was communicated with and she wired, asking that all possible for money to secure be done for him. She arrived later and it was learned that the young man had been sought by his family and by Pinkerton detectives for a year without success. The young man is one of three sons of wealthy parents. The other two sons were graduates of Harvard and Amherst Universities. The one in Temple had attended Harvard and was in his second year when he received a fall in the gymnasium which injured his head and to an extent impaired his faculties. The most eminent physicians of the country were consulted and failed to give relief. Finally under advice received from a specialist the patient was placed in an institution in Missouri and treated for an affection of the spine for several months. It was finally announced that there was dislocation of the neck, calling for a stretching operation which was very severe.

The night after the operation was performed without success being achieved, the patient escaped from his nurses and left the institution, and although Pinkerton detectives were placed on his trail and a general advertising campaign inaugurated to locate the fugitive, he baffled all attempts at discovery. During the time his mother has traveled to many places far and near to have disinterred the body of men who had been killed or died under unusual circumstances.

The young man had been to Mexico and in many strange places that he could not recall, but his story showed that he had wandered as an object of charity. About a month ago he became ill and had been passed along from town to town until his physical condition was so terrible that when he reached Temple he was ready to give up. His father, who died some years ago, was a wealthy citizen of Burlington and one of the city parks there is named for him. Before he died he distributed his property, consisting largely of railroad stocks, and this son's share included a large block of Missouri, Kansas and Texas railroad stock, amounting to a considerable holding and at the very moment he was riding on the freight trains of the line in hobo fashion, he was one of its owners.

The fear of a repetition of the terrible operation undergone in Missouri preyed upon his mind and induced him to remain silent rather than endure the tortures for a second time.

The mother paid literally for the attentions shown her son and they left at once for their home in Iowa.

A Certain Cure for Croup.

When a child shows symptoms of Croup there is no time to experiment with new remedies no matter how they may be recommended. There is one preparation that can always be depended upon. It has been in use many years and has never been known to fail, viz: Chamberlain's Cough Remedy. Mr. M. F. Compton of Market, Texas, says of it, "I have used Chamberlain's Cough Remedy in severe cases of croup with my children and can truthfully say it has always given prompt relief." Sad Sequel to the Wreck.

A sequel to the recent Texas & Pacific wreck near Fort Worth in which Luther Wilson, fireman on one of the engines was killed, is contained in a pathetic story in which is related the sad details of the wreck of the hopes of a young lady. This young woman was a clerk in a business house in Fort Worth, was loved by her associates, respected and valued by her employers. The day upon which the railroad accident occurred she gave notice that in one week she would retire from the employment of the firm and her young lady companions being apprised of the step gathered about her to beg that she would reconsider and remain with them. She was so determined in her refusal to withdraw her resignation and so pleasant and happy in her demeanor that her companions at once suspected her motives and in chorus the girls accused her of matrimonial intentions. To their surprise the young lady admitted it without hesitation and in response to the numerous demands, "O, tell us about it," she bounded upon the counter and with eager listeners gathered about her, she told of her plans; of her engagement to Luther Wilson; of her perfect felicity in contemplating a life of marriage bliss. She told when they were to be married, where they were to reside and extended a cordial invitation to her friends around her to visit her after the wedding.

Hearty congratulations followed and while these formal felicitations were being showered upon the happy girl a messenger boy entered with a telegram. It was addressed to the young lady; who was at that moment the happiest in all Fort Worth. It contained the words: "Luther Wilson killed in wreck."

The broken hearted girl read the dispatch and fell unconscious into the arms of her companions.—Waco Times-Herald.

Catfish in the Grass.

Hans Detleft of Iowa Park, Texas, says that a few days ago while out in his pasture his litle boy saw hundreds of little catfish from three to four inches long in the grass, some dead, others living. Mr. Detleft said they picked up about three hundred lively ones and put them in the tank.

Make Home Pleasant.

Throw open your shutters and let in the bright sunlight. Fade the carpets? Well, supposing it does, isn't it better than being faded yourself and having your children seek sunshine elsewhere? Let them enjoy it at home, and let your face shine forth with happy smiles, and see how soon the reflection is seen on all around you. If it be cold, stir up the fire in the grate and let it crackle and snap and dance up the chimney back, and brighten the home heart. I mind me now of a broad, old-fashioned fire place which was the delight of my childhood days. Large sticks of wood were piled on the andirons, and the flames went leaping up the broad chimney, through which one could look and see the blue sky. Then when bed time came a back log was placed on the heated ashes, and in the morning one mass of glowing coals greeted the early riser. Wasn't that a place for popping corn? All around that home hearth were happy faces, reflecting the mother love that shone over all. Did the boys seek amusement away from home winter evenings, or the girls creep off to bed early saying "it was so lonely?" No, to them there was no place like home. Never a winter evening too long to suit us. What did we do? First there was reading aloud, in which all took turns, then we would often commit verses to memory and often interspersed with singing which, if it lacked harmony did not lack force. After this came various games with which we are all acquainted—dominos, authors and often some more noisy games, as hunt the handkerchief, puss in the corner, and blind man's buff. Then there were the beech nuts and butter nuts that we had gathered in the fall; and did ever any one make such molasses candy as mother? No matter how thickly the clouds may gather with the coming years, those childhood days will always glow with rosy light.—Exchange.

Large and Famous Diamonds.

The latest sensation of the diamond world was the discovery of a monster diamond on January 26th, 1905, near Pretoria, Africa, and which has been named the Cullinan diamond. It weighs 3,032 carats or one and one-fourth pounds, is four inches long and two and a half inches high and one and a half inches in depth. It is a splendid quality and singularly free from defects. It is valued at about four million dollars. The new diamond will rank as the largest ever found. Some of the others notable for their size or history are the Great Mogul, 188 carats; Regent, 136 carats; Florentine, 139 carats; Southern Star, 72 carats; Koh-i-noor, 86 carats; Shah, 72 carats; Sanci, 53 carats; The Polar Star, 40 carats; Toff, 194 carats.

In point of historical interest the Sanci diamond probably comes first. It weighed 106 carats and belonged to Charles the Bold, who wore it at the battle of Nancy, at which he fell. A Swiss soldier found the jewel and sold it for a gulden. It passed into the possession of the king of Portugal, who sold it for one hundred thousand francs. It then got into the possession of Sanci, a Frenchman, one of whose descendants was sent as ambassador by his sovereign, who required the diamond as a pledge. The servant carrying it was murdered, but not until he had swallowed the diamond; the body was opened and the stone found. The crown of England next possessed it and James II. carried it with him to France in 1688. Louis XV. wore it at his coronation. In 1835 it was purchased by a Russian and later by William Waldorf Astor, who now owns it.
