Broncos Open Season Tonight

The 1952 Bronco football team, in good condition and with double the team strength it had last year, opens the season tonight in bracketville. It is the beginning of what will prove a long and arduous ten-game campaign for the Broncos, some of whom seem to be worn out already. District play starts for Sonora October 3, in Menard, and ends November 21, when Ozona comes here.

This year Sonora has a fine backfield offensively and defensively, with fine ball-handling by quarterback George Wright.

The line is big and in good condition, but is only fair on offense and very weak on defense. The line should show vast improvement as the season goes on.

Starting line up for tonight:

- Joe D. Ross End
L. Sanchez Tackle
E. Smith Guard
H. Ehrenburg Center
T. Joy Guard
Jack Johnson Tackle
J. McLaughlin End
Bobby Scott Back
George Wright Back
T. Crites Back

Sonora Girl Describes Mt. Fujiyama Climb

The following story is made up of excerpts from a letter written by Miss Edwina Cardona, civil service employee stationed in Japan. She is the daughter of Mr. and Mrs. Cecelio Cardona of Sonora.

I can't begin to tell you what a wonderful vacation I had. Although I spent over one hundred dollars, I think it was money well spent. Eleven of us girls left Osaka Friday night and arrived in Yokohama Saturday morning. From there we went on to Tokyo. We ate at one of the finest restaurants and shopped at the Tokyo Post Exchange. The PX is a big department store such as found in stateside. From there we took a train to Fujinoshita, then rode a bus up the mountain to Fuji View Hotel. Arriving there Saturday night (July 26). The next day we went on a motor boat ride on Lake Kawaguchi. The Fuji View Hotel is located beside this lake, and is one of the most beautiful hotels in Japan, although it is not as pretty as the Fujia Hotel, which I visited last fall. From the Fuji View Hotel, one can view Fujiyama Mountain. (We called it Mt. Fuji for short). This is regarded as the sacred mountain by the Japanese people. It is 12,437 feet high, making it the highest mountain in Japan. It is world famous, known all over the world.

All of us had our cameras and took many pictures of this mountain, the hotel, lake, and the beautiful scenery around. After having lunch at the hotel on Sunday, we changed into blue jeans, big summer hats, and bought a regular mountain climbing stick, and set out with great determination to reach the top of famous Mt. Fuji. We hired two Japanese men guides to show us the way. It was two o'clock when we left the hotel. We rented horses and rode for about three hours. From then on it was climb, and I mean CLIMB. The climbing was rugged and rough. It seemed like an endless journey. However, we were not the only ones climbing. This is the mountain climbing season in Japan, and thousands of people were climbing Mt. Fuji at the same time we did. Among them were a few American G.I.'s and other members of the U. S. forces in Japan. The climbing consists of ten stations, which makes a total of 12,437 feet. Each station is a hotel or resting place where you can spend the night if you wish. The mountain sticks we used were stamped at each station. We kept on climbing and climbing.

Progeny Test At Experiment Station Begins

More than 100 lamb rams were weighed at the Ranch Experiment Station near here Wednesday, start of the annual ram progeny test.

Shearing of the lambs got under way Monday and was completed late Tuesday, Dr. W. T. Hardy, superintendent of the station, said.

Along with the ram progeny test the station is to feed out a few lambs as commercial sheep. These lambs were sired by some of the rams the station had in last year's experiment.

Dr. Hardy said that most of the rams in this year's test are Rambouilletes. There are 12, Columbias and four Carriedales.

The lambs were born from November through March.

The lambs are to be weighed every 28 days and will be on feed 225 days. A field day program to study results of the test is to be held at the end of the feeding period when all data is available and has been compiled.

Dr. Hardy says the number in this year's test compares with more than 220 last year. Drouth is blamed for the reduced number.

Among breeders having ram in the test are: H. C. Noelke, Jr., Sheffield, Rambouilletes and Corriedales; Wallace Hendricks, San Angelo; Roger Landers, Menard; F. M. Bierschwale and Son, Segovia; Pat Rose, Jr., Del Rio; Ed. Guy Branch, Rankin; Tom Davis, Sonora; Leo Richardson, Iraan; Miles Pierce, Alpine;

Rod Richardson, Iraan; A. B. Culberson, Brownwood; Texas A. and M. College and the Experiment Station, Rambouilletes, and Heard and Whitefield, Friona, Columbias.

NAVY RECRUITER TO BE IN SONORA MONDAY

Chief J. W. Webb, U. S. Navy Recruiter for this area will be in Sonora on Monday, September 15 at the Post Office Building to interview all young men and women who are interested in a Navy career.

Mr. and Mrs. Cleveland Nance arrived Sunday from Camp Polk, La. Nance has received his honorable discharge and plans to make his home in Sonora. He will be in business with his father in The Sonora Gas Co.

We took an elevator from the top of the mountain down. This waterfall was very beautiful. There were souvenir shops all around so we bought a few. I bought a lacquer candy container with the name Nikko carved on the lid. I might add that Nikko is one of Japan's National parks.

The scenery around this place is beautiful. Later in the afternoon we visited Toshogu Shrine, which consists of 23 main premises. This place is magnificent. It is something you have to see in order to realize its beauty. It cannot be compared to ordinary shrines found all over Japan. I found that this particular shrine cost \$10,000,000 to construct, if you figure it in American money. I also found out that it took 4,541,230 men 17 months to construct this shrine.

Its architecture is very colorful and beautiful, and it carving and painting are more so. We also saw the Sacred Bridge and the colorful five storied Pagoda and the treasure museum. We left Nikko Friday morning and arrived in Yokohama in the afternoon. We ate there and visited some friends who formerly lived in Osaka. We left at night and arrived in Osaka Saturday morning.

Electric Power

PRODUCTION FOR FREEDOM

America must produce more and more to stay free! And the key to that vital production is an abundance of electric power. With only six per cent of the world's population and only a small fraction of the world's natural resources, American workers ... utilizing enormous quantities of electrical energy ... produce nearly half the world's goods.

That abundance of electrical power is provided by the heavily taxed, privately owned electric companies financed directly or indirectly by the savings of private citizens. Since 1945 those privately owned companies have spent \$10 billion to increase the nation's electric productive capacity 50 per cent; and in 1954 another \$8 billion will step up generating capacity 100 per cent.

Here in West Texas, your electric service company by 1953 will have increased its capacity for production 151 per cent since 1945. Yes, the privately owned electric companies have proved their ability to provide more ... and more ... and more Electric Power for Production for Freedom.

YOU BET, CREEP FEEDING PAYS

Cattlemen everywhere are finding it pays to creep feed calves. Calves gain faster, improve in quality for a higher price. Cows stay in better condition, too, as calves don't suck as hard or as long when creep fed. Creep feeding is profitable. Ask us about Purina creep feeding rations next time you're in town.

What's the
MOST SURPRISING THING
about this **BUICK**?

2-door, 6-passenger Special Sedan.

WE'LL tell you the answer to that one — it's the figures on the price tag.

For some reason, lots of people just can't believe they can buy a Buick at a price so close to "the low-priced three."

Maybe it's because a Buick seems so much better and bigger.

Maybe it's because they think Buick has so much more power and room—which is true.

Maybe it is because so many distinguished people own Buicks—which is also a fact.

But the fact remains—if you can afford a new car, you can own a Buick—so let's see what you get.

You get the thrilling power of a Fireball 8 Engine, that's a gas-saving high-compression valve-in-head—as much power as you can get in cars costing \$300 to \$400 more.

You get as much room as you'll get in cars costing hundreds of dollars more.

You get a ride that cost an honest-to-goodness million dollars to develop.

You get the silken smoothness of Dynaflo Drive.*

You get big-car comfort, styling, durability.

Don't take our word for it. Come in and see for yourself why so many folks are stepping up to this great car this year.

Equipment, accessories, trim and models are subject to change without notice. *Standard on Roadmaster, optional at extra cost on other Series.

HOME OF COMPLETE BUILDING SERVICE

OUR WEEK HAS TEN DAYS

... AND WE ARE PROUD OF IT!

We are at the service of the community 4 more working days each week than the average retail store. Doing our job in serving the health needs of the community is the reason for our long hours.

Many patients visit the doctor's office during evening hours. A high percentage of the doctor's house calls are made at night. The prescription needs of these patients must be served. The most effective antibiotic ... the most potent pain-killer ... is of no value unless it is available to the patient when he needs it.

We will continue our 10-day work week, just as we have done these many years past. It's our responsibility to our community ... and we are proud of it.

Announcing!

A DISPLAY OF CURRENCY SHOWING MONEY IN USE FROM THE EARLY DAYS OF OUR COUNTRY TO THE PRESENT MAY BE SEEN AT THE BANK SEPTEMBER 15 THROUGH SEPTEMBER 20.

In this interesting presentation is paper money from early Colonial days that in our imagination we might see as having passed through the hands of George Washington or Alexander Hamilton or Thomas Jefferson.

There is money that was in use when the White House was burned in the War of 1812 ... money that could have been used to buy or release slaves ... Texas' own Treasury Notes from the stirring period when this State was a Republic ... money used on both sides while the battle of Gettysburg raged. Practically all phases of history are represented by the money currently in use in each period.
