By J. W. King, Sr.

That this part of the country needs a good rain should be well known for it has been talked by everybody.

Things are not usually quite as dark as some folks picture them to be but we do need a rain—and soon.

Got that buggy, or whatever you are going to enter in the parade to open the fair, planned so that you can get it ready quickly?

And speaking of the fair—have you made up your mind that you will take part in the community affair where cooperation of everyone is needed to make it a success.

All of us are proud—at least we ought to be—of the things we do and the things we raise in the garden or on the farm. Let us all join in and make the Loraine fair exhibits on October 2-3 the best we have ever had.

Editor and Mrs. King will take off for a higher climate as soon as we have put The News to bed this week. We'll be back on the job early next week refreshed and ready to do a better job. Mrs. King has been pinch-hitting for Mrs. Baird this week and is fond of her job. She has done a good job and she needs a rest from this as well as her home and other duties.

Time For Farmers To Claim Refund Of Federal Gasoline Tax

College Station, Aug. 15—Farm operators have until September 30 to ilaim a refund of the federal gasoline tax on all gasoline used on the farm, acording to Tom E. Prater, extension farm management specialist.

The refund applies to the three cents per gallon federal tax on gasoline which was purchased from July 1, 1958 through June 30, 1959. Those who filed a claim for refund in 1958 will receive form 2240 through the ceive. Others who wish to make a claim should ask the Internal Revenue Service to send them one.

The claim should be sent to the office of the District Director, Internal Revenue Service, Austin or Dallas, Texas, depending on whether you live in the southern or northern part of Texas. Claims made after September 30 will not be paid and no more than one claim can be filed for the twelve months period, states the economist.

Farmers who file claims for refund should keep sufficient records to certify the accuracy of the refund claimed. The records should show the purchase dates, the gallons bought and the gallons used on the farm during the twelve months period. Also the gasoline used by custom operators doing custom work for a farmer should be recorded and can be included in the claim for refund, Prater notes.

Excise taxes paid on diesel fuel or special motor fuels for farm purposes can also be recovered. The farmer should ask the dealer to repay the taxes on the fuel bought. The dealer should be furnished a signed statement, showing the name and address of the purchaser, the date of purchase and gallons purchased, adds Prater.

Additional Education For Korean G. I.

President Eisenhower has signed into law a bill by U. S. Senator Ralph Yarborough which permits some 7,000 Korean War veterans to secure additional edlcation or training under the G. I. Bill of Rights.

SenatorYa rborough's measure corrects a technical error in the Korean G. I. Bill to allow qualified veterans a change of program to secure a higher degree in their chosen field.

For example, qualified veterans enrolling in college to become teachers in many cases set a bachelor's degree as their educational objective. Other veterans planning the same course of study set their objective as a master's degree.

Under the original law, even though the veteran might be qualified for additional educational benefits, if he had mistakenly set a bachelor's degree as his objective under certain circumstances, he was not permitted to go on to college to work on his master's degree.

Senator Yarborough's bill, S. 906, gives veterans the opportunity to have a change of program in their original field of training or education to work for higher degrees.

Registration of Boats Begins In October

Austin, Texas August 10 State Highway Engineer D. C. Greer said today that registration of boats would go into effect in October. The new boating act requiring registration was recently passed by the legislature.

Greer assured boat owners that no penalties or convictions will be involved for this delayed registration date, particularly in view of the fact that the final boat registration date is March 1, 1960. Other features of the act go into effect now.

Greer explained that boat registration was a little foreign to the ordinary function of the Texas Highway Department, but that the Department was already well experienced in handling this type of operation.

"We have been registering motor vehicles for more than forthy years. Nearly four and a half million motor vehicles were registered by the Department this year. The Texas Legislature, cognizant of the experience of the Highway Department, gave us the job in order to take advantage of existing operations and to cut cost. The Texas Highway Department deals solely with registration in this boating bill; we have nothing to do with the safety aspect," Greer said.

The appropriation bill provides funds after September 1. These funds enable the Texas Highway Department to print the necessary forms and place into operation the procedures invested in the Highway Department by the act.

Greer estimated that the registration forms and blanks would be prnted and in the hands of boat dealers, county offices, Highway Department offices, and other public offices in October. Ample notice will be given when these forms are available.

Lottery Is Topic At Press Meeting

Lottery—a problem which frequently confronts newspaper admen—will be a topic for top consideration at the ninth annual Ad Meet held by the Texas Press Association in Austin on Sept. 12.

Speaker will be Austin Postmaster Oliver N. Bruck.

A lottery is defined by the Post Office Department as a game or contest in which three elements—consideration, chance and prize—are present. No such games or contests may be advertised in newspapers which are distributed through the U. S. Mails. Nor may they be mentioned in any way in news stories.

Constantly questioned by newspaper admen and editors are various promotion ideas which may or may not be considered lotteries, depending upon interpretation of the presence of the three necessary elements.

Postmaster Bruck, in his discussion of lottery at the TPA Ad Meet, will outline some of the "tests" which contest ideas must pass in order to be considered mailable.

Bruck, who has distinguished himself with the Post Office Department on a national scale, is one of Austin's outstanding civic leaders. He joined the Austin Post Office staff as a substitute clerk in 1920, and has come up through the ranks to the top post he holds today. Last year he received a rarely-given Certificate of Award for Superior Achievement, in which he was cited for outstanding contributions to the Department in the fields of employe-management and public relations.

Bruck will be one of the featured speakers at the TPA Ad Meet which some 150 admen from Texas daily and weekly newspapers are expected to attend. Program chairman for the meeting is Rigby Owen, publisher of the Conroe Daily Courier.

Hunting And Fishing Poachers Face Stiff Penalties In October

Austin, Aug. 17—A new trespass law will be effective in Texas October 14, it has been announced by the assistant secretary of the Game and Fish Commission. The law which is covered in HB 36, will become effective without the signature of the governor.

It provides penalties of up to 30 days in jail and a $500 fine and forfeiture of hunting or fishing licenses for a period of three years, upon conviction.

The law makes it illegal for any persons to hunt, fish or camp on the enclosed property of another person without the consent of the owner or other person in authority.

The new law is enforceable by any peace officer and arrests may be made without a warrant.

"The trespass problem is a major one in the protection of wildlife," the secretary said. "Persons who climb fences to illegally hunt on the property of others don't usually regard either the season or the bag limit. As a result, prosecutions have been heavy.

"Under the new law, however, enforcement of the trespass law is the work of peace enforcement officers, which preclude the game warden. Now when the game warden finds a poacher the only thing he can do is to notify the landowner. The landowner then can make a complaint and cause the arrest to be made by a peace officer."

More Than Two Million Acres Now Under G. P. Conservation Program

College Station, Aug. 15—Over two and one-third million acres of farm and ranch lands in the Plains areas of Texas have been contracted for cost-share assistance under the Great Plains Conservation Program, reports Lynn Pittard, extension assistant soil and water conservation specialist.

As of June 30, 1959, approximately $5,5000,000 had been obligated to the land-owners for assistance by the Program. In the 78 counties now participating, Pittard says more than 1300 contracts have been signed. The contracts are for three to ten years duration.

This voluntary program applies in the Great Plains area and provides cost-share assistance for many soil and water conservation practices such as, brush control, range reseeding, constructing wells and ponds for livestock water and several others. Operators may receive up to 80 percent assistance, depending on the practice.

Pittard pointed out that the program has several advantages. It is flexible and can be modified to meet the particular individuals' needs. There is no limitation on assistance except on irrigation. Crop allotments are not affected during contract and the program may be used in combination with other government cost-share plans.

At present, range work such as, reseeding, range chiseling or pitting, controlling brush or shrubs, and initial establishment of a permanent vegetative cover accounts for well over half of the fund distribution.

Other practices that come under the program are: Planting trees and shrubs, establishing permanent waterways, constructing terraces and diversion ditches, waterspreading terraces, reorganizing irrigation systems, and land leveling for irrigation.

For a more thorough explanation of the program, Pittard advises obtaining L-410, "The Great Plains Conservation Program—What is it?", from local county agents or the Agricultural Infomation Office, College Station.

Hoegh Says Every Family Needs A Fallout Shelter

Civil and Defense Mobilization Director Leo A. Hoegh says "everyone, even those far from a likely target, would need shelter from fallout" in the event of an enemy attack.

LEO A. HOEGH
. . . most could be saved

In the introduction to "The Family Fallout Shelter," a publication of the Office of Civil and Defense Mobilization, Mr. Hoegh says: "In an atomic war, blast, heat and initial radiation could kill millions close to ground zero of nuclear bursts. Many more millions—everybody else—could be threatened by radioactive fallout. But most of these could be saved."

Mr. Hoegh pointed out that the Federal shelter policy is based on the knowledge that most of those beyond the range of blast and heat will survive if they have adequate protection from fallout.

The OCDM booklet contains building plans for five basic fallout shelters. One is a do-it-yourself project with solid concrete blocks. Cost of the shelters ranges from $150 to $1500.

Copies of "The Family Fallout Shelter" may be obtained from local civil defense offices or by writing: Box Home Shelter, Battle Creek, Mich.

HOW TO SURVIVE—IF NUCLEAR WAR COMES

Substantial protection for families from radioactive fallout can now be developed through construction of simple home shelters. All of the illustrations used on this page are from "The Family Fallout Shelter," a publication of the Office of Civil and Defense Mobilization. Free copies of the booklet may be obtained by writing: Box Home Shelter, Battle Creek, Mich.

Here are some important social security A, B, C's for household workers. A. Show your social security card to your employer as soon as you start working. B. Be sure to obtain a receipt from your employer showing the amount of cash earnings you received for the year. C. Check on your social security account.

Mr. and Mrs. Jerry DuBose of Lampasas were visitors in the home of his niece, Mrs. Royce Mahon and family Sunday afternoon.

Mr. and Mrs. John Mahon took their daughter Mrs. J. C. Rickman and children to their home in Lubbock Sunday afternoon and returned home Monday.

Woodrow Pratt was a business visitor in Dallas the first of the week.

Guest of Mrs. Rosemary Mabry and Rosemarie Saturday afternoon was Mrs. Jerrell Kelley of Midriff, Texas.

Important reminder to employers of household workers: If you paid a household worker $50 or more in cash wages during the calendar quarter ending June 30, (September 30,) you must file your social security tax report by July 31, (October 31.)

If you are a domestic worker, working in a private household, you are probably earning social security credits towards your retirement. If you work in a private household and are paid $50 or more in cash in a calendar quarter, check your employer to see if he is reporting those wages to the Director of Internal Revenue.

"What do the letters F.D.I.C. stand for?"

F.D.I.C. means Federal Deposit Insurance Corporation, an organization created to protect bank depositors against loss. Our bank is a member of F.D.I.C. — which means, first, that we have met the rigid standards necessary to be approved for membership. Our F.D.I.C. membership also means that deposits here are protected by deposit insurance up to $10,000 for each depositor (we and the other member banks pay the entire cost of this insurance). We'll welcome you and your family as depositors!

Better Service Is What You Want
Better Service Is Our Aim

We can't blame you for fussing about poor telephone service!

We realize our service is not good, but good service with the present telephone system would be impossible.

GOOD SERVICE FOR YOU IS ON THE WAY—

Before the first of October we are confident that work will be under way in Loraine on the new dial telephone system. All cables, so far as possible, both in town and the rural area, will be laid underground, guaranteeing that service will be as good as it possibly can be. Questions and Answers

Q. I understand the GI interest rate has been raised by law to 5¼ percent. Am I correct in thinking the higher rate applies only to new loans, and does not affect loans made before the new law?

A. That is correct. Loans closed before July 2, 1959 are in no way affected by the new law. Only loans made on or after this date can be charged the new 5¼ percent interest rate.

Q. My three-year-from-discharge deadline for starting school under the Korean GI Bill will come in August. Can I make application then and start classes when school opens in September?

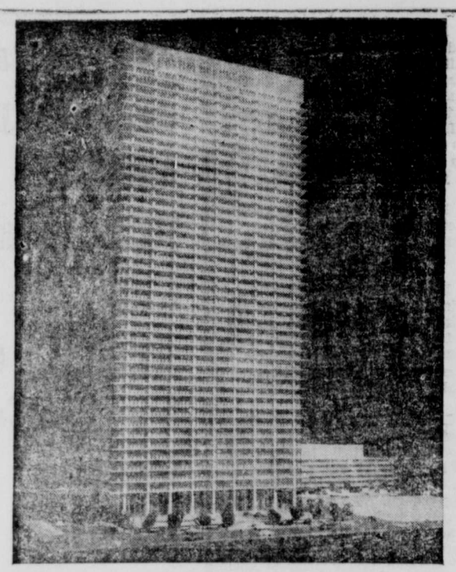

A. No. You must actually be in school by your deadline. You may not make application before the deadline, with the idea of starting after it has passed.

Q. I just got married, and can now claim more GI allowance money this Fall as a GI student. What kind of evidence will VA need, so it can raise my school allowance?

A. To claim an increased allowance, you should send VA a certified copy of either the public record or the church record of your marriage. It must bare the seal and signature of whoever keeps the records in the church or court.

Q. A veteran of my acquaintance is drawing extra pension payments because he requires constant nursing care. Would his extra payments be stopped if a member of his family provided this care, other than someone outside his family hired for the purpose?

A. No. The extra payments would still continue if the nursing care is provided by a member of his family. The law does not speciify who shall provide the regular aid and attendance necessary.

PLANNED HUMBLE BUILDING IN HOUSTON — This model shows Humble Oil & Refinery Company's proposed 44-story office building to be located in downtown Houston. Morgan J. Present plans call for a building with approximately a million square feet of usable space. Initially, Humble expects to use more than half of the building for its offices and to sub-let the remaining space to other tenants.
