

THE JUNCTION EAGLE

Volume 45

Junction, Kimble County, Texas, Thursday, August 2, 1928

Number 16

CHAMBER OF COMMERCE AGAIN COMPLIMENTED

The Kimble County Chamber of Commerce is again complimented for the issuance of the folder which this office recently delivered to that body. The Eagle also comes in for a share of nice remarks made by "Think" in San Antonio Express of a few days ago.

The article referred to follows:

"Not the least attractive feature of a pamphlet advertising Junction, just issued by the Chamber of Commerce there, is the fact that it was printed at home. Pictures, brief paragraphs, drawings in colors and a comprehensive map tell their own story and emphasize the appeal; but the imprint of a Junction printing enterprise carries emphasis that a town which produces such printed matter is progressive. A good many towns have overlooked this. Advertising matter prepared away from home may be so apparently a foreign product that its appeal is weakened by the effect. Support of home printing enterprises and home newspapers helps them grow, and they, in turn, help the town."

The Eagle is very appreciative of such praise from such source, and can only offer reciprocity when occasion presents itself.

TO THE VOTERS OF THE 86TH DISTRICT

It seems appropriate at this time to express my thanks to every voter in the 86th district who supported me in Saturday's Primary. No man could be more grateful for such cordial support and whole-hearted assistance than I am. I feel especially thankful to the voters of my home county of Kimble. The splendid majority you have given me will always linger in my memory as a token of real friendship from my home people. The returns received thus far seem to assure my nomination. This credit for this result belongs to you, my friends. No man can say that he is successful in a political race by his own efforts. It is his friends who put him over and thereby cause him to be successful. Therefore, when I realize that you have been faithful and loyal enough to select me as your candidate for Representative of the 86th District, I don't know how to say thank you as forcefully as I would like to. Words are not sufficient and language is not adequate to properly express my sincere appreciation.

My intention is to put some energy into making you the best Representative I am capable of. In order to do this effectively I shall continue to need your help and assistance. I welcome your suggestions and co-operation at all times. This district is developing rapidly. By a unity of effort and co-operation we can advance our development in many ways. The statement: "United we stand; divided we fall," is just as true today as it ever was.

Yours sincerely,
Coke R. Stevenson.

VULCANIZING SHOP TO BE OPENED THIS WEEK

The building formerly occupied by the Junction Battery Shop opposite the McDonald Chevrolet Co. is to house a first class vulcanizing plant, which will be in operation this week.

Messrs. Scott and Roberts are the owners, and they state that they are equipped with the latest tools and machinery for doing vulcanizing of both tires and tubes. They are experts at this line of work, and will guarantee every job turned out.

Mr. Scott comes from Llano and Mr. Roberts was formerly of Willow City.

Mr. John Moleworth, Sr., left Monday for his home in San Antonio after a visit at Red Hollow ranch, as the guest of Mr. and Mrs. A. L. Mudge.

LOCAL ANGORA MAN BUYS REGISTERED GOAT

Mr. W. M. Keen returned from San Angelo where he attended the Angora Goat Sale last week. He informs the Eagle that he purchased the highest priced billie that was sold at the meeting.

Mr. Keen already has a flock of registered Angoras and he purchased this billie to head his flock. He also stated that he now possesses struck his fancy very forcefully, as it did several others attending this sale, as he was afterwards offered double the amount he paid for it. He is well pleased with his purchase and will now devote more time to his flock of Angoras.

With this fine registered billie added to the already numerous registered Angoras in this county, Kimble will soon be known as the home of all registered stock.

TO THE VOTERS OF KIMBLE COUNTY

I take this means of expressing my appreciation of the support I received from the voters in my campaign for Sheriff and Tax Collector of Kimble County.

I regard both my opponents as gentlemen. I will conduct my campaign in the run-off fairly, and not on the demerits of anyone, but on my own merits. If I am elected I will endeavor to do my duty.

To those who may not know me: I was born in Kimble County soon after its organization. It has been my home with the exception of a few years spent in the Western States, and serving as State ranger. I was also with Federal troops on the Mexican border during 1916-17.

As to my character, I refer you to any business firm in Junction.

I need and will appreciate your vote in the run-off.

Respectfully,
Frank Patterson.

CARD OF THANKS

I wish to take this method of expressing my sincere thanks and appreciation to my many friends and acquaintances for the loyal support given me at the recent primary. The overwhelming majority given me proves to me that the public evidently has confidence in my ability to serve them well. When elected at the coming November election, I promise my undivided attention to the office, and to serve you to best of my ability.

To those who did not see fit to support me, I wish to say that I hold no malice or ill will, and that I will be a servant of the people.

Respectfully,
Annie Highsmith.

SWIMMING PARTY

Last Thursday evening the girls of the "Friends" Sunday School Class of the Methodist church with their guests enjoyed a most delightful swim at Price's Camp.

A picnic lunch consisting of sandwiches, potato salad, tomatoes, potato chips, pickles, olives, ice tea and watermelon was served to the following:

Mrs. E. R. Borden, Clara Fritz, Mary Hubert, Natalie Lowry, Eileen Newby, Lena Cowser, Audrey Blackburn, Mrs. M. F. Hill, Miss Anna Bob Taylor of Houston, Ruby Johnson, Ray Munn, Ruth Lee Hoggett, Miss Armstrong of Dallas, and Mrs. Jimmie Taylor of Austin.

Mr. Bascomb Cook and wife and their two nieces, daughters of J. W. Cook of Wichita Falls, and sisters of Mrs. T. E. Sheppard of Junction, and Ruby and Edith Cook of Fort Worth and Mr. Arthur Dyson of Cisco, are visitors at the home of Mr. and Mrs. T. E. Sheppard here and are very much pleased with this section.

Tabulation of Kimble County Election Returns

The election last Saturday was quietly carried on and the results coming in Saturday night received in an orderly manner. The tabulation below shows only returns on county officers, with the vote for Representative of the 86th District, and Judge of the 33rd Judicial District.

Coke R. Stevenson polling a majority over W. C. Baker, for representative; McLean a majority over Stubbs for District Judge; Randolph a majority over King for County Judge; Mrs. Highsmith a majority over Munn for Treasurer; Hodges a majority over Millsap for Commissioner Precinct No. 1.

The offices of Sheriff and Tax Collector, as well as that of County Clerk, were contested for by three candidates each. Gibbs and Patterson being leaders for Sheriff and Tax Collector, and Hodges and Kindrick for County and District Clerk, as leaders, will contest their strength in the coming run-off the latter part of this month.

Returns from 251 or 253 Texas counties, including 144 complete, in Saturday's Democratic primary tabulated by the Texas Election bureau, gave:

United States Senator—Blanton 112,453; Connally 162,485; Cunningham 26,903; Mayfield 182,073; McLemore 9,202; Owsley 116,923.

Governor—Hawkins 29,291; Moody 398,799; Wardlaw 224,798; Wilms 18,583.

Lieutenant Governor—Darwin 41,926; Love 179,825; McCall 40,074; Miller 279,789; Parnell 67,737.

Comptroller—Jones 165,710; Terrell 415,552.

State Treasurer—Harris 204,437; Hatcher 358,471.

Superintendent of Public Instruction—Davis 88,766; Garner 120,090; James 100,445; Marrs 279,896.

Land Commissioner—Britton 75,110; Flint 51,017; Robison 278,634; Terrell 162,031.

Railroad Commissioner—Jefferson Smith 150,801; Lon Smith 415,772.

Judge Court of Criminal Appeals—Morrow 366,920; Pierson 201,901.

Sixteenth District, 38 counties, returns from 31, 10 complete: Hudspeth 16,450; Reid 4,118.

REVIVAL AT THE METHODIST CHURCH

Revival services are now in progress at the Methodist church. The services begin every night at 8 o'clock and morning services will be held. At the request of the church, the pastor, Rev. Milton F. Hill, is preaching, and the music is in charge of Mr. Bob Watkins. Mr. Watkins is not only a fine soloist but a splendid song leader.

It is especially hoped that this meeting will prove of deep and lasting benefit in the community, and all are earnestly invited to attend and have a part in it.

You will enjoy and be benefited by this meeting. Tell others about it; bring your friends; come.

Mrs. A. L. Mudge, Fred Mudge, Mr. and Mrs. Sayres Farmer, Mr. and Mrs. Carl Wolf, Mr. and Mrs. Jack Turner, Mr. and Mrs. S. S. Bundy were among those in attendance at the Sheep and Goat Raisers' convention in San Angelo last week.

BLANTON OFFERS HELP CONNALLY IN RUN-OFF

Dallas, July 31.—Congressman Tom Connally of Marlin Monday sent the following message to Congressman Thomas L. Blanton of Abilene in reply to Mr. Blanton's offer of support in the run-off August 25 for the United States Senate between Connally and Senator Earle B. Mayfield.

"I am grateful for your congratulations and for your splendid support in the run-off. Am happy that we have gone thru the campaign with our long friendship unimpaired. Your assistance will be of great value to me and I am delighted to know you will help me with your services. I deeply appreciate your fine spirit."

Mr. and Mrs. P. Joseph left Sunday for Dallas, where they purchased a stock of merchandise. Mrs. Joseph returning Tuesday, and Mr. Joseph going on to the Eastern markets to purchase a more complete stock. The Dallas purchases will be on display and sale the latter part of this week.

MRS. PEARL CHADWELL LOCATES AT AUSTIN

Austin, Texas, August 1.—Mrs. Pearl Chadwell of San Antonio was named social director of the Woman's Building, girl's dormitory at the University of Texas, by the Board of Regents at their meeting last week, according to President H. Y. Benedict.

Mrs. Chadwell has been matron and teacher in Howard Payne College at Brownwood for twelve years. She is a graduate of that school, and has done graduate work in the University of Southern California. She was appointed to succeed Mrs. Neil Carothers, who resigned a few months ago after celebrating her twenty-fifth anniversary as director of the Building.

Mrs. Chadwell has many friends here in Junction who will be glad to get the above information. She was for a number of months connected with Gann Grocery Company, until she recently sold her interest in that business to Mr. H. G. Hubert.

DAVE GOBEN DEALS FOR KERRVILLE BUSINESS

Information was given the Eagle Wednesday of a deal recently consummated whereby Dave Goblen of Junction becomes the owner of the filling station at Kerrville located at the junction of the Harper and Junction roads, just this side of the bridge.

Mr. Goblen states that he will remain here for the present and that Mr. Barker, a former Junction man, will have charge of the station for him.

Mr. Goblen wishes it stated that Junction people visiting Kerrville will be royally treated when stopping at the place.

AT THE TEXAN

Thursday and Friday of this week the Texan has the comedy of comedies, Harold Teen, of comic strip fame.

Saturday, matinee and night, one of Zane Gray's stories, "Under the Tonto Rim." And remember there will be a continuous show from 2:30 to 10:30, giving you ample opportunity to see this great picture.

For Monday and Tuesday nights of next week Adolph Menjou in "The Serenade," and Wednesday night, Olive Borden in "Paid to Love."

The past week the shows have been above the average but have not received the patronage that such pictures should receive.

AT THE HOSPITAL

Following are the patients at the Standifer Hospital during the past two weeks:

Master Claude Thomas Driskell, tonsilectomy, Sonora. Mrs. Watt Turner, tonsilectomy, Junction.

Mr. Nathan F. Sears, surgical, Wellesley, Massachusetts. Mrs. Fletcher Gardner, surgical, Junction.

Miss Verena Lawler, tonsilectomy, San Antonio. Mr. Frank Fred Pierson, appendectomy, London.

Mrs. Norman Ray, obstetrical, Junction. Miss Loleta Hull, appendectomy, Junction.

BAPTIST NEWS

Sunday School at 10 a. m. Preaching at 11 a. m. and business meeting immediately afterwards. Every member is urged to be present.

B. Y. P. U. at 7:15 p. m. On account of the Methodist meeting there will be no preaching service on Sunday night. Our members are urged to attend the meeting and unite with them in prayer that God's will may be done.

Rev. J. J. Ray, former pastor of the Christian church at Mason, passed through Junction Saturday on his way to Menard.

GULF AND WEST TEXAS RAILROAD CONSIDERED

The following news item in one of the daily papers is quite interesting:

"Junction, Sonora and Eldorado propose to raise \$400,000 in a week to have the San Antonio and San Angelo railroad routed that way."

This is "old news" just at this time, as it has been some weeks since this proposal was put to the promoters of this road. Still, it is well enough to keep the project in the minds of the people, and when the proper time comes it will not then be "news."

While we do not hear a great deal of this railroad project, it is stated that the promoters are working hard and will be only a matter of a short time when something definite will be announced.

WORD OF APPRECIATION TO PEOPLE OF 33rd DIST.

It is deeply gratifying to me that the report of my stewardship for the last four years was approved by your vote in the primary last Saturday. I sincerely thank you for this, and by continuing to administer, with fidelity, the sacred trust reposed in me, my purpose is to give no occasion for regret on your part for the confidence expressed by your action.

Most sincerely,
J. H. McLean.

H. T. RICHARDSON

In the hush of the evening shadows at 9:30 p. m., July 28th, H. T. Richardson fell asleep at his ranch home on the North Llano.

He was one of our pioneer citizens who had borne the burden and heat of life's day for almost 79 years; the fortitude and unselfishness which had characterized his entire life, being manifested to the very end. The passing of this well loved "old timer" leaves an inexpressible sadness in the hearts of the Kimble County folks, and our sympathy goes out to the bereaved family—for their sorrow is our sorrow.

H. T. Richardson leaves two sons, Walter and Kern; a daughter, Mrs. Genella Dawson of Arizona; fifteen grandchildren and six great-grandchildren to mourn his loss.

In looking over his almost four score years H. T. Richardson has demonstrated again and again the patience and courage which was so characteristic of our pioneers as they trod their up-hill, difficult path to success. It would be impossible in this brief space to tell of the hardships, struggles and difficulties so nobly overcome; nor of the wonderful fortitude with which H. T. Richardson has borne the intense physical suffering of the past three years. His one unselfish thought was "not to be a burden to others."

"To live in the hearts of those that love you, is not to die," and the brave unselfish life of this pioneer father has inspired a love in the hearts of his children which will live in their memories forever.

H. T. Richardson was a kind neighbor and friend, and an honorable citizen and his name will ever be spoken with loving respect. But infinitely better than this, the name of H. T. Richardson is written in Heaven in the Lamb's book of life. Twenty-nine years ago he was converted and united with the Baptist church, and now he has passed away to the rest that remaineth for the people of God.

Light after darkness, gain after loss, strength after weakness, crown after cross; joy after sorrow, calm after blast, rest after weariness; sweet rest at last; sheaves after sowing, sun after rain, sight after mystery, peace after pain; after long agony, rapture of bliss, right was the pathway leading to this. Mrs. Frank Wilson.

HINTS FOR THE HOME

(By Nancy Hart)
It is interesting to know that modern preserving methods have eliminated the chance for failure in making jellies and jams.

Under the old long-boiling process even experienced cooks would get fine, firm jelly one time and a syrupy failure the next. The ripper the fruit the less jelly-making substance is contained, so no accurate rule could be made to govern the exact amount of sugar or cooking.

The new short-process rules remove this uncertainty by the use of liquid pectin, which is the natural substance extracted from fruits and concentrated for cooking purposes.

New Recipe for Blueberry Jam

Crush well about two pounds of berries. Add juice of two lemons and grated rind of half lemon. Measure four level cups of mixture into large kettle. Add eight level cups sugar and mix well. Use hottest fire and stir constantly before and while boiling. Bring to full rolling boil and boil hard for one minute. Remove and stir in one bottle liquid pectin. Skim, pour quickly and cover at once with hot melted paraffin.

When Frying Corn Fritters

Many cooks know only one way to fry corn fritters, and that is to drop the batter from a spoon into deep hot fat. If fried as a flat fritter-cake in butter or margarine, the corn fritters will have a decidedly different flavor—one you may like much better than that produced by the other method.

Sour Cream Cake

Half cup butter, two cups sugar, one cup sour cream, three cups prepared cake flour, three eggs, well beaten, half teaspoon soda, scant teaspoon lemon flavoring. Cream butter and sugar, add eggs. Add soda to sour cream; beat cream and flour alternately into sugar mixture. Add flavoring and bake in loaf pan.

Can You Make Uncooked Custard?

Into beaten egg yolk of one egg stir a spoonful of sweetened condensed milk; add two teaspoon lemon juice and mixture will thicken. Then add three teaspoons water and fold in stiffly beaten white of egg. Serve as uncooked custard or pour over fresh fruit.

Shield Furniture from Summer Sun

If you would retain the soft glossy finish of your furniture do not allow the hot sun to beat upon it. Mahogany is especially in need of protection, as strong sun fades it.

Straws for Motor Trips

Someone suggests that we take a supply of straws on the long motor trip so a comfortable drink can be had at small springs and brooks.

When Hanging Curtains

Cap the curtain rod with a thimble and it will push through the curtain heading without catching or endangering the fabric.

Do Your Waffles Stick?

A little olive oil added to the waffle will prevent the waffles from sticking to the iron—and also adds to the finished cake.

Dispels Cooking Odors

Burnt coffee grounds will free the house from cooking odors.

Try This On the Rats

Chloride of lime put down the holes of rats and spread about wherever they are likely to appear is an infallible preventive.

"INSIDE" INFORMATION

Refreshing ices for summer desserts can be made from almost any fruit juice, sweetened to taste and flavored with a little lemon if the juice lacks acidity. White of egg may be added when the ice is partly frozen.

One of the easiest emergency desserts for a "company" menu in summer is shortcake, made with any fresh fruit, whipped cream, and either sponge cake or biscuit dough. Peaches, raspberries and bananas all make good shortcakes.

When binding the neck of a dress, use a double bias fold about three-fourths of an inch wide when folded. Place the raw edge along the neck edge of the garment with the binding lying on the right side. Stitch

about a quarter inch from the edge. Turn the binding over and baste down, without turning in the folded edge. Stitch again on the right side, close to the first stitching. This catches the binding at the back and makes a neat, firm finish.

Chewing gum is hard to remove from clothing, and sometimes leaves a stain. Chewing gum usually contains a gum known as chicle, which has been boiled down, flavored and sweetened. Resins of various kinds are sometimes used. A gum stain can often be softened with egg white and then washed.

Prolonged treatment with carbon tetrachloride is also satisfactory, as a rule, although it may be necessary to remove traces of sugar by sponging with water at intervals.

No matter how careful you are, you will always find weevils or worms in packages of cereal, in the flour bin, or on dried fruits or nuts. These pests come from minute eggs, deposited probably before the package was sealed, or before the food entered your kitchen. Destroy all badly infested food and any paper containers. Wash and scald the flour bin and other permanent containers before using them again. Never leave cereals when going away from home for any length of time. One weevily package will contaminate everything else the insects can reach.

If you diagrammed the paths you travel in doing your ordinary kitchen work, lines would cross and recross each other needlessly. Sometimes a slight change in arrangement will save many steps. Four main kitchen activities follow each other every day and several times a day: food preparation, cooking, serving and clearing away and dishwashing. Compact centers for these four jobs should follow the same order around the room, usually from left to right. Equipment should be placed accordingly. Needed utensils should be kept at each work center, says the Bureau of Home Economics, and there should be good window light and artificial light for any task.

ing them again. Never leave cereals when going away from home for any length of time. One weevily package will contaminate everything else the insects can reach.

MONEY SAVING ON THE FARM

Not only is a tractor superior to teams for plowing, in speed, power and efficiency, but its per acre cost of operation is cheaper as well. A number of framers in the state of Wash-

ington kept records in order to make this comparison and found that where team plowing cost \$1.97 per acre, the tractor did the work for 86 cents.

From this direction greater farm prosperity must come. Modern labor saving machinery and instruments of greater efficiency are the money makers for agriculture.

Heal Those Sore Gums

Stomach, kidneys and your general health. Let's try Foy's Remedy, used as directed. It will save you. Dentists recommend it. Druggists return money if it fails.

once. W. E. Cloud. 141c**HONORS GUEST**A delightful occasion was the
morning party given at the
home of Mrs. S. P. Woodward,
Thursday, by Miss Olive Chad-
well, honoring her house guest,
Miss Thelma Byron of George-
town.Shasta daisies and the dainty
balsam flower, intermingled with
fern, were placed in vases, about
the room.Mrs. Jas. Taylor of Austin,
made high score and was re-
warded with a handsome deck
of cards.At the noon hour a luncheon
of iced watermelon cocktail, jel-
lied chicken, baked peppers stuffed
with corn patties, cucumber
boats, filled with salad, stuffed
baked potatoes, bread and butter
sandwiches, stuffed olives,
angel's delight and iced tea were
served. The luncheon plates
were most attractive with the
colorful foods mentioned above.Those present were Mesdames
A. L. Mudge, Carl Wolf, Jas.
Taylor of Austin, Powell Paxton
of Buena Vista, Va., Earl Barr,
Dorothy Westmoreland, H. G.
Hubert, Miss Clara Fritz and
the honoree, Miss Thelma By-
ron.**LUNCHEON**Thursday Mrs. A. L. Mudge
honored Mrs. George Vierling
of San Antonio with a prettily
appointed bridge luncheon, at
Red Hollow ranch.After a series of interesting
games, Mrs. C. R. Stevenson
was found to have high score
and was rewarded with a deck
of cards, a pretty hand empor-
dered towel was presented to
the honoree, Mrs. Vierling.Shrimp salad on lettuce, suf-
fed olives, potato chips, wafers,
iced tea, pineapple tapioca with
whipped cream and cherry and
sunshine cake was served to
Mesdames George Vierling, Ar-
thur Booz, Trevor Whayne, all
of San Antonio, Carl Wolf, Clay

cents per pound.**THEATRE PARTY**Monday evening Mrs. C. T.
Holekamp entertained the mem-
bers of the Merry Wives Club
and a number of friends with a
theatre party at the Texan,
with Mrs. Rowland Martin, a
recent bride, as honor guest.A section of seats were re-
served at the theatre. These
were designated by ropes of
pink and white crepe paper. The
picture shown was "London After
Midnight," starring Lon
Chaney. Mr. E. G. Lockley,
manager of the Texan extended
every possible courtesy to Mrs.
Holekamp's party during the
evening.Following the show, the party
repaired to the Awbrey-Bell
Drug Co., where an interesting
contest based on the "movies"
was enjoyed. Mrs. Pierce Hog-
gett won the club prize for this
contest, a box of stationery,
while Mrs. H. G. Perry, of Car-
rizo Springs received the guest
prize, a box of correspondence
cards. Mrs. Martin, the honoree,
was presented with a pretty box
of stationery.Strawberry ice-cream and an-
gel food cake further carried
out the color scheme of pink
and white, were served at the
Awbrey-Bell Drug Co.Mrs. Ruth I. Taylor and
daughter, Miss Anna Bob Tay-
lor, and mother, Mrs. Anna
Lankes of Houston, returned
Wednesday to their home in
Houston after a week's stay
at the Fritz Hotel. This is the
fifth summer that Mrs. Taylor
has visited Junction. Mrs. Tay-
lor is enthusiastic in her praise
of Junction. She states that
she has visited every state in
the Union except three and she
prefers Junction for a summer
home above all the rest. Mrs.
Taylor is planning to build a
summer home here at a later
date.Bring clean cotton rags to
Loeffler Motor Co. We pay 6
cents per pound.**\$550,000 STEER SALE
MADE AT UVALDE**Uvalde, Texas, July 31.—The
largest cattle deal on record in
this section of the state was
completed here this week when
Dolph Driscoll and George A.
Kennedy of Uvalde and R. S.
Sterling of Houston sold 6,250
head of steers to Lee Biving
and Frank Corn of Amarillo for
approximately \$550,000. The
first delivery of these steers,
1,250 in number will be made
in October of this year and the
remaining five thousand head
will be delivered in April, 1929.
The cattle are in Kinney and
Dimmit counties.Mrs. Coke R. Stevenson was a
Rocksprings visitor Tuesday.**Sul Ross
Student Cottages****A One-Hundred-Thousand Dollar Invest-
ment in Cottage Homes for Students**Each cottage has two bed rooms, a
living room, a kitchenette, a bath room,
and two linen closets.The cottages are under faculty su-
pervision. They are furnished thruout,
and each cottage rents for \$30 a month.
This price includes sewer rental and
water.Move to Alpine, rent a cottage and

DR. FRANK CRANE SAYS:

Water-Tight Compartments
Every one in a while we hear a man say, "Business is business," or that he follows "art for art's sake," or that he as a scientist cares only for the truth, not for its practical results, and so on. But the fact is humanity is not put in water-tight compartments.

Everything you do affects all parts of your nature.

What you do in business reflects on your art, what you do in art colors your business, and what you think in religion has much to do with your scientific conclusions. Mankind is, one, one organic whole, and its various departments of activity have merely been listed for convenient reference. They do not exist in reality.

If your religion is ugly and cruel your business will be immoral.

If your business is heartless and vindictive your whole life will show it.

The scientist must pay some attention to the practical bearings of his investigations, for it would be foolish for him to spend his whole life on investigating some perfectly useless matter.

Business must be beautiful. Art in some way must rest upon a business basis.

A man cannot have his whole head submerged in literature, he must have sense enough to market his wares.

The beautiful works of art of past generations had their influence upon believers in religion and religion is what it is owing to a thousand other causes within itself.

Much recent art shows contempt for any but aesthetic values. Such art is transient, and will give place to greater art, in which beauty of thought and expression will confer enlarged values.

The total of all values is what counts.

This result can be achieved not by preaching in art nor by making science "practical," but by universal education in values so that artist, business man, or scientist will express himself in synthesis of all values.

ABOUT YOUR HEALTH

(By John Joseph Gaines, M. D.)

"Running a Temperature"

When a fire breaks out, we sound the alarm; we hurry, skurry, breathless, excited—call the department—turn on the hose—a house is burning! If the fire is discovered in time, the building is saved. It is the fire that is overlooked—that destroys.

Now, these bodies of ours are the veritable houses we live in, and they sometimes catch fire, as physicians know. Then we begin to procrastinate; we wonder if the fever-fire won't die out of itself, if we keep on at work and let it alone. We hate to go to a doctor—and we really can't afford to lay off and be sick! You know how it is.

The fire grows into a holocaust. The physician, fire-chief, is called in a hurry; he finds the building in great danger of destruction, if not a total loss—just by neglect of the small fire.

If you are running a temperature—a little every afternoon—which breaks into a pre-spiration just after going to bed at night, consult your physician at once. The stitch in time may save a hundred later on. A fever invariably means that something is radically wrong; it is a warning. A battle is going on inside—the forces of good against the demons of evil; the cause of the warfare must be removed before peace will be declared. You may not recognize the cause, even if you know how to remove it. The physician is your best bet.

If your child is running a temperature, look after his throat, his lungs, his digestive tract; he has a poison somewhere. Find it and force its elimination. But, be sure you are right, before you do a thing;

you cannot afford mistakes—they cost lots of money, and may cost a life. Don't neglect the small fire; it is easier put out. "First aid" is, to clean house. Apply water, outside and inside. And, put nothing into the body that might feed the flame. Call the doctor in time.

PROPOSED CONSTITUTIONAL AMENDMENT—AUTHORIZING LEGISLATURE TO EXEMPT FROM TAXATION PARSONAGES, AND CERTAIN PROPERTY ASSOCIATIONS FOR RELIGIOUS, EDUCATIONAL AND PHYSICAL DEVELOPMENT

(H. J. R. No. 28)
HOUSE JOINT RESOLUTION
Proposing an amendment to Section 2, Article 3 of the Constitution of the State, so as to authorize the Legislature to exempt from taxation any property owned by a church or by a strictly religious society for the ministry of such church or religious society, and which yields no revenue whatever to such church or religious society, and property used exclusively and reasonably in promoting the religious, educational and physical development of boys, girls, young men or young women operated under a State or National organization of like character; also the endowment funds of such institutions of learning and religion not used with a view to profit; and when the same are invested in bonds or mortgages, or in land or other property which is owned and hereafter be bought in by such institutions under foreclosure sales made to satisfy or protect such bonds or mortgages, that such exemption of such land and property shall continue only for two years after the passage of the same at such sale by such institutions and no longer; and all laws exempting property from taxation other than the property above mentioned shall be null and void.

Section 2. The foregoing Constitutional Amendment shall be submitted to the qualified electors of the State at an election to be held on the first Monday in November, 1928, at which election all voters favoring and proposing amendment shall write or have printed on their ballots the words: "For the Amendment to the Constitution of the State of Texas, exempting from taxation property owned by churches or strictly religious societies for the exclusive use as dwellings for the ministry," and all those opposing shall write or have printed on their ballots the words "Against the Amendment to the Constitution of the State of Texas, exempting from taxes property owned by churches or strictly religious societies for the exclusive use as dwellings for the ministry."

Section 3. The Governor of the State is hereby directed to issue the necessary proclamation for said election and have the same published as required by the Constitution and existing laws of the State.

Section 4. The sum of Two Thousand Dollars (\$2,000.00) or so much thereof as may be necessary is hereby appropriated out of any funds in the Treasury of the State not otherwise appropriated to pay the expenses of said publication and election.

PROPOSED CONSTITUTIONAL AMENDMENT—AUTHORIZING LEGISLATURE TO GRANT CONFEDERATE PENSIONS REGARDLESS OF DATE PENSIONER CAME TO TEXAS OR WHEN WIDOW MARRIED PENSIONER OR WHEN SHE WAS BORN
(H. J. R. No. 15)
HOUSE JOINT RESOLUTION
Proposing an amendment to Section 51, Article 3, of the Constitution of the State of Texas, authorizing a tax levy for Confederate soldiers and sailors and their widows, and providing for submission of same to the qualified electors of this State at any election to be held on the first Tuesday after the first Monday in November, A. D. 1928, and provided the necessary proclamation and appropriation to defray expenses of proclamation, publication and election.

Section 1. That the Legislature of the State of Texas be and it is hereby directed to amend the Constitution of the State of Texas so as to read as follows: "The Legislature shall have no power to make any grant or authorize the making of any grant of public moneys to any individual, association of individuals, municipality or other corporation, whatsoever, provided, however, the Legislature may grant aid to indigent and disabled Confederate soldiers and sailors under such regulations and limitations as may be deemed by the Legislature as expedient; to indigent and disabled soldiers who under special laws of the State of Texas, during the war between the States, served in organizations for the protection of the frontier against Indian raids or Mexican marauders, and to indigent and disabled soldiers of the militia who were in active service during the war between the States, and to the widows of such soldiers who are in indigent circumstances; and who are or may be eligible to receive aid under such regulations and limitations as may be deemed by the Legislature as expedient; and also grant for the establishment and maintenance of a home for said soldiers and sailors, their wives and widows and women who aided in the Confederacy, under such regulations and limitations as may be provided for by law; provided the Legislature may provide for husband and wife to remain together in the home. There is hereby levied in addition to other taxes heretofore permitted by the Constitution of Texas, a State ad valorem tax on property of owners (\$0.75) cents on the one hundred (\$100) dollars valuation for the purpose of creating a special fund for the payment of pensions for services in the Confederate army and navy, frontier organizations and the militia of the State of Texas, and for the widows of such soldiers serving in said armies, navies, organizations or militia; provided that the Legislature may reduce the tax rate herein levied, and provided further, that the provisions of this section shall not be construed so as to prevent the grant of aid in cases of public calamity."

Section 2. The foregoing constitutional amendment shall be submitted to the qualified electors of the State at an election to be held on the first Tuesday after the first Monday in November, A. D. 1928, at which election all voters favoring and proposing amendment shall write or have printed on their ballots the words: "For the Amendment to the Constitution of the State of Texas, authorizing a tax levy for Confederate soldiers and sailors and their widows, and providing for submission of same to the qualified electors of this State at any election to be held on the first Tuesday after the first Monday in November, A. D. 1928, and provided the necessary proclamation and appropriation to defray expenses of proclamation, publication and election."

amendment shall be submitted to a vote of the qualified electors of the State at an election to be held on the first Tuesday after the first Monday in November, A. D. 1928, at which all ballots shall have printed thereon "For the constitutional amendment authorizing aid to Confederate soldiers and sailors and their widows in indigent circumstances, and authorizing tax levy therefor," and "Against the constitutional amendment authorizing aid to Confederate soldiers and sailors and their widows in indigent circumstances and authorizing tax levy therefor." Each voter shall scratch out one of said clauses on the ballot, leaving the one expressing his vote on the proposed amendment.

Section 3. The Governor shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of the State. The sum of \$5,000.00 or so much thereof as may be needed is hereby appropriated for the expense of publication of said Amendment.

LAWN PARTY

Tuesday evening the members of the Efficiency Class of the Methodist Sunday School gave a lawn party at the church.

A large crowd was in attendance, in response to the following invitation:

We are giving a party to each of you.
'Tis something novel, 'tis something new,
We are sending to each this little card.

What we want you to do is not very hard.
Just bring as many pennies as years you are old;

We promise the numbers will never be told.
We extend to all a welcome most hearty.

Now surely you'll come to your own birthday party.

A huge birthday cake was placed at the entrance; here each guest deposited their pennies.

After an amusing bean contest, the following program was rendered.

Selection—Junction band

Reading—"Ain't It Funny,"

Miss Audrey Blackburn

Reading—"Choice of Postage

Stamps"—Harry Ethel Hubbell.

Reading—"Seven Ages of Man"

Little Miss Sheppard

In the buttonhole contest, sticks of candy were awarded to Messrs. Clay Secrest and S. A. McDonald for making the best buttonhole. After a hilarious suit case relay race the ladies were judged the winners.

Selection by the band were given at intervals throughout the evening.

Sandwiches, soda pop and cookies were served to about one hundred guests.

\$55.25 was realized from the birthday money, which sum will be applied on the piano fund.

Hats in lovely colors and shapes—just see what we have to offer at remarkably low prices.

These Dresses, Hats and Shoes are the latest creations and are here for your inspection. We invite you to our store.

PHILIP JOSEPH

Mammoths, extinct thousands of years, have been found preserved, skin, hair, flesh, in Northern ice. Hoping that men of the Stone Age might be similarly preserved, an expedition was sent to look.

On an island, far north in cold Alaska, scientists discovered at the top of an almost inaccessible cliff the grave of an ancient Stone Age chief.

His coffin was lined with well cured skins of the sea otter. His shirt was of bird skins, his clothing made of the finest furs. A favorite child, a seamstress to sew for him, a servant and hunter to get game for him, had been killed and buried with him to accompany him on his death journey.

This mummified family from the Stone Age will enlighten scientists. It interests us all, illustrating the unchangeable belief in a future life so deeply planted in the human brain.

Why was the belief put there if only to be disappointed?

The French Government builds a gigantic magnet several thousand times as powerful as any built thus far.

It will be used in scientific experiments in connection with the molecular and atomic construction of matter, etc. The magnet eventually will be of great use in industry.

Here the steel companies use magnets picking up tons of steel rails and loading them on cars, dropping them down, lifting them up, as a boy lifts tacks with his toy magnet.

Man is an intelligent animal, living on a gigantic combination power wheel and magnet—the earth. He constructs his own little power plant, builds his own electric and magnetic power.

In the north day before yesterday man's electric work felt an electric storm, and an amazing aurora borealis, stretching all across the northern part of the continent.

If men could borrow and use the inexhaustible electric power of the earth, they need not turn coal or water falls into electric current.

John D. Rockefeller, beginning his ninetieth year, said: "I never worry, and I am amazed at the kindness of people generally."

Eighty years ago, from his father's cottage doorway, in the Catskill foothills, he watched his uncle drive off, to trade horses—and saw him come back with better horses.

Now his ships go out to every harbor of the world, his scientists are fighting disease in every part of the earth. And looking at his right hand, now wrinkled, he knows it has made gifts to education and human progress totaling hundreds of millions.

A good deal in one life time.

Thomas W. Lamont, partner of J. P. Morgan, and an able citizen, tells business men they can be a distinct factor in preventing future wars.

They can and will be, for they have discovered that war, in the past often promoted by business, DOES NOT PAY.

Another big war would mean not merely sixty per cent income tax, but confiscation of principal, on a gigantic scale. Young men would not again consent to have their bodies sent to war, unless the rich man's dollars also went. Wise business men will oppose war and demand preparation for it.

THINGS WORTH KNOWING

The Wonder Fabric
In 1884 a chemist studying the solution of nitro cellulose which gave very viscous liquids, decided to investigate why he could not precipitate a fiber by spinning, not as cotton is spun, but as the caterpillar spins silk. In this way he actually did produce a fiber, but of course when the solvent had been removed the fiber was nearly as inflammable as gun cotton. This was no serious problem to the

chemist who knew that substances belonging to the family of nitro cellulose are composed by alkali.

When the fiber is treated in this way the cellulose is regenerated in the form of a filament. The chemist who did this fundamental work was Chardonnet and to him we must give the credit of making the first new kind of textile fiber. He was a man of extreme perseverance, and actually when he wanted to put his discovery to commercial use the first four of his companies went bankrupt and still he persisted, living long enough to see the fifth become marvellously successful.

Last year the world produced some 266,000,000 pounds of rayon. The increased demand for good rayon yarn will reach the point within the next six months where it will be in excess of domestic production, according to a statement issued by L. A. Yerkes, president of the du Pont Rayon Company. "Our sales for the first six months of the current year have been well ahead of the sales of the similar period of 1927. It is my opinion that during the last six-month period of 1928 rayon manufacturers will continue to enjoy large sales volume," added Mr. Yerkes.

Sweater Suits and Frocks
The very-much-younger set will be as gay as its elders this winter—and as smartly garbed in the modern manner, which nine times out of ten means that lustrous rayon threads lend life and color to their duller woolen sweater suits and frocks.

An especially interesting four-piece ensemble (and the term suit or set has given way in the case of the infant generation to the more modish word), consists of sweater and leggings, cap and mittens all of pale green angora. Rayon and wool embroidery in bright colors forms the collar and repeats itself in an amusing and animated snowball fight around the bottom of the sweater.

Printed Gowns
The printed gown has come to stay—at least for another season. Not only in silks, as was the case last year, is it in the ascendant, but in transparent velvets and more interesting still in woolen and rayon mix-

tures is the print displaying continued and approved liveliness.

There are said to be 3,424 spoken languages or dialects in the world, distributed as follows. America, 1,624; Asia, 937; Europe, 587; Africa, 276.

RESOLUTIONS OF RESPECT

To the Worthy matron, officers and members of Junction Chapter No. 497: We your committee, appointed to draft resolutions on the death of our beloved Brother, George C. Braley, submit the following:

Whereas, on July 3rd, our Heavenly Father called our Brother, George C. Braley, to the Grand Chapter above; and Whereas, by his death our town has lost one of its worthy citizens, our chapter an honored member and his family a devoted father, husband and son, therefore

Be it resolved, that we tender to his bereaved family our most sincere sympathy in their loss and in evidence thereof that a copy of these resolutions be given his family, a copy furnished the local paper for publication, and that they be spread upon the minutes of our Chapter

Fraternally,
Alice Patterson,
Emma Mae Miller,
Alton Miller.

Normal human blood is too thick to be drawn through the mosquito's small piercing tube. They must first inject a thinning fluid. In that way disease germs are set afloat in the blood stream—bacteria of burning fever and crippling disease. There is also the danger of streptococcal infection (blood poisoning) from scratching the bite. Mosquitoes must be killed. Health authorities advocate FLY-TOX. Simple instructions on each bottle (blue label) for killing ALL household insects. INSIST on FLY-TOX. FLY-TOX is easy to use. Safe, stainless, fragrant, sure.

When the fiber is treated in this way the cellulose is regenerated in the form of a filament. The chemist who did this fundamental work was Chardonnet and to him we must give the credit of making the first new kind of textile fiber. He was a man of extreme perseverance, and actually when he wanted to put his discovery to commercial use the first four of his companies went bankrupt and still he persisted, living long enough to see the fifth become marvellously successful.

Last year the world produced some 266,000,000 pounds of rayon. The increased demand for good rayon yarn will reach the point within the next six months where it will be in excess of domestic production, according to a statement issued by L. A. Yerkes, president of the du Pont Rayon Company. "Our sales for the first six months of the current year have been well ahead of the sales of the similar period of 1927. It is my opinion that during the last six-month period of 1928 rayon manufacturers will continue to enjoy large sales volume," added Mr. Yerkes.

Sweater Suits and Frocks
The very-much-younger set will be as gay as its elders this winter—and as smartly garbed in the modern manner, which nine times out of ten means that lustrous rayon threads lend life and color to their duller woolen sweater suits and frocks.

GIVES HISTORY OF CHINESE FIRE GOD

Shanghai, China
C. P. O. Box No. 1234
July 6th, 1923

Dear Editor:

Herewith two of my Shristian Almanacs—one for you and one for a Chinese in your town. Please feel free to print this letter without payment. I'd be glad for a marked copy if it appears. Indeed I'd be thankful for a sample copy of your paper whether letter appears or not.

I send a Chinese fire-god. His name is "Ho-zwen-bu-ah." He rules fire. When he's displeased with people he sets their houses afire. Ho-zwen was a Taoist priest; but during a great battle he changed himself into a giant with three heads and six arms. He has three eyes, one in the middle of his forehead. He has red hair and he is of a fiery disposition. He rides on a fiery horse which snorts flames, and fire flashes from his hoofs. In the god's six hands he carries a heaven-wide flashing seal, a wheel of five fiery dragons, a gourd enclosing 10,000 fire crowds, and two swords, and a thousand-mile smoke screen filled with swords of fire. No wonder he can scatter fire every where and do untold damage when on a rampage. People in whose house he starts a fire are not welcome in other homes lest, in so doing, they bring Ho-zwen's wrath upon themselves also. People where a fire starts hurry to the temple and plead with Ho-zwen to leave their house at once. When he leaves they thank him for punishing them. Ho-zwen-bu-ah is much feared, also, because of the danger to the one in whose house the fire starts, for if it spreads to other houses and he found, his neighbors throw him into the fire for bringing loss to them. So he runs away and is not seen again or comes back only after a long time. When the houses are rebuilt the old rubbish is put on his lot!

You would be greatly interested to see a Chinese fire and the fire-fighters at work. Crowds of firemen come each with a long name-banner. These banners are left in line against the walls of the narrow streets near the fire. One set of men are carriers having carrying poles with a bucket on each end of the pole. Ahead of each carrier runs a man with a gong beating wildly to make way for the carrier as he brings the water from a creek or canal or well near by. He dumps the water into the tub of a hand-pump which forces the water up a spout onto the fire. This pump working reminds one of an old R. R. hand-car. Wealthy men often keep a hand-pump in their own home; but lest the fire-god give the pump work to do there is written on it, "Be-r-eh-yong"—prepared but may it not be used. A fire in China is a noisy, exciting and very primitive thing in its method of extinguishing; but fierce in its burning.

While the fire is burning, sometimes theatricals are held on the street. These are to please the god-of-fire and get him to go back home. At other times, when people fear troubles are coming, they buy a paper image of the fire-god and burn false money, incense and candles before it and then burn the image itself. This is sending him home with spending money and fragrance to keep him from starting other fires.

I asked the Chinese if the fire-god lit a recent fire on a ship. They answered, "If there was a fire on the ship the fire-god must have been there—at work." We have towers in Shanghai where men watch for fires. When one is discovered the fire-bell is rung. When the old Custom House was built a large clock was placed in its tower. For some weeks after this clock began to strike the hours there were few if any fires. The Chinese said it was because the fire-god thought that every time the clock struck there was a fire announced so he could rest without helping. All these things seem ridiculous to us but are very real to the Chinese. Chinese life and atmosphere is chuck full of such superstitions. Chinese are never free from them and the anxiety they bring—like a superstitious man forced to pass the night in a haunted house. When the Gospel comes the believer goes

free. For he knows the Truth that makes free indeed.

Yours in Christ's glad service,
Rev. H. G. C. Halllock.

BEAUTY THAT WEARS

The last year has seen transparent velvet, a new dress-maker's commodity, spring into importance in the United States. Its development has been watched with much interest by fabric manufacturers, and retail stores. The executives of these organizations saw at once that this scintillating and alluring fabric would "take" with women. But they felt that it was one of those luxuries which only women of great means might buy. This doubt was met by the tremendous nation-wide sales upon its adaptation to the mode. It was still looked upon, however, as a luxury fabric.

The problem then remained to increase serviceability and retain beauty; to assure its dry-cleanability, and to stabilize the price market which had docketed about from \$5 to \$25 a yard; and even higher.

Both the precise industrial problems and the purely commercial problems have not been met, manufacturers in this field feel.

S. Harvey Day, treasurer of Sidney Blumenthal & Company in New York, recently stated that his company had faith in the integrity of transparent velvet from the time of its inception, and that the re-order of satisfied customers substantially proved the worth of this faith.

Not often is it found that "beauty wears;" that a luxury can become a substantial friend—even in the world of fashion.

CHILDREN SHOULD KNOW

Dr. Johnson furnishes a Spanish proverb, and adds to it in a way that should be read and understood by all children who have eyes to see with, and the opportunity to do their part of the kind of traveling that comes to us with electricity and automobiles. Dr. Johnson's combination proverb is as follows:

"He who would bring home the wealth of the Indies must carry the wealth of the Indies with him," so it is in traveling—a man must carry knowledge with him if he would bring home knowledge.

Remember too, that another great author, Carlyle, said: "Nature which is the time-vesture of God, and reveals Him to the wise, hides Him from the foolish."

When you get to the big beautiful hotel, think of something besides "eating." Look at the walls that have been fixed up in new modern colored laquers, and study with your sharp little eyes that God gave you the harmony in the big hotel, where everything is bright and cheerful, just as it is outdoors.

Children, when you travel, use your eyes and wear your thinking cap.

INDIGESTION

Young's Stomach Powders quickly relieve indigestion, bloating, heartburn, gas, constipation, dyspepsia, sick headache and nervousness. Doctors recommend it. Druggists return money if it fails.

AN OUTSTANDING DEVELOPMENT

"It has long been a habit to criticize public service—public utilities like the telephone, street cars, gas and electric service," says the St. Paul Daily News.

"Telephones, especially, have come in for the barrage of jokesmiths, letterwriters and newspaper editors. But the fact is apparent to the fair-minded—that the change and improvement in telephone service in America is one of the most interesting and outstanding developments of modern industrial civilization."

The achievements of the telephone, even though apparently without a spectacular interest, would make as romantic a story as could be wished. It is a story of tremendous labor, against seemingly incontrovertible odds, and a great success that has been of untold social and industrial benefit to humanity.

A BASIC PRINCIPLE WELL STATED

"Society requires certain public activities," said President Coolidge recently, "like highways and drainage, which are used in common, and can best be provided by the government. But in general the country is best served through the competition of private enterprise. If the people are to remain politically free, they must be economically free. Their only hope in that direction is for them to keep their own business in their own hands."

A SUCCESSFUL SIX NOW WINNING EVEN GREATER SUCCESS

QUALITY

that is winning new thousands every week

2 Door Sedan \$745 Body by Fisher

Pontiac Six has long served as an outstanding example of quality—of materials, design and workmanship. No other six so low in price offers bodies by Fisher—with the high-grade coach-work and materials which Fisher provides. None other offers a 186 cu. in. engine—altogether with the stamina and long life for which Pontiac is famed. And none other enjoys the advantages of being built in the world's most modern automobile plant. Why not learn what such high quality of materials, design and construction means to a motor car? Why not drive a Pontiac Six today?

Coupe, \$745; Sport Roadster, \$745; Phaeton, \$775; Cabriolet, \$795; 4-Door Sedan, \$825; Sport Limousine Sedan, \$875. Guaranteed All-American Six, \$1045 to \$1265. All prices at factory. Check Oakland-Pontiac delivered prices—they include lowest handling charges. General Motors Time Payment Plan available at minimum rate.

Junction Trade Notes

W. M. Keen of Kimble County bought the highest priced goat offered for sale at the annual convention of the Sheep and Goat Raisers' Association of Texas. The registered animals offered for sale came from ten States. Mr. Keen's purchase at \$325 was a four-year-old Ringlet type Angora billy from the stud of C. A. Thomas of Oakland, Kentucky.

C. M. Massey of the Llano valley is treating the Junction trade to something extraordinary in watermelons. He began this week marketing 2000 melons of the Dale and Watson type, many of them weighing up to 65 pounds, and guaranteed to be good. Mr. Massey prunes his vines, cutting many small melons from every vine, which accounts in a great measure for the mature growth of the melons left on the vines. "Stone Mountain" melons, raised by B. B. Rees of the Llano valley, continues to be a favorite melon with the local trade. On sale daily at Gann Grocery Company.

Roland Martin, born and raised in Junction, assumed ownership and management of the City Cafe on Monday of this week. H. I. Taylor, former owner, will devote his time to the livestock business, in which he has been more or less interested for a long time.

New crop hay, in the bale, now on sale in the feed department of Gann Grocery Company.

A conference will be held in San Antonio August 6 on the proposed southern transcontinental route of air transportation. San Angelo, Phoenix, Laredo, Houston and New Orleans are among the cities that will be represented at the conference. It is stated that passenger and express business from San Antonio west through El Paso will eventually be effected the same as air mail. This is a matter that Junction may eventually be interested in.

Housekeepers who sometimes want young mustard and turnip greens—and can't get them—will find these products in tins very wholesome and nearly as good as the fresh. A health authority says there is no evidence to show that the vitamin content of the vegetables is materially lowered by canning and he urges, by all means, use of the canned vegetables when the fresh are not to be had. And frugal housewives will not overlook the prunes in tins, prepared and ready to serve, without the trouble of cooking. Gann Grocery Company.

A Houston woman, taking her summer vacation on the Llanos, is so pleased with the perpetual running water, climate and local environment, that she intends to buy and build her a summer lodge here, and will bestow upon it the attractive Spanish name, "Dias Dorados," meaning Golden Days.

LONDON LOCALS

Mrs. E. P. Furr was showing her granddaughter about town Monday. She, too, is proud to be a grandmother. I don't blame her because Martha Ann is a sweet baby.

Mr. Walter Massey brought us the largest melon we have seen this year. It was simply fine and we thank you, Walter.

The evening of the 24th the London Chamber of Commerce attended the regular monthly meeting of the Kimble County Chamber of Commerce at Junction. We were treated real nice and a very pleasant evening was spent with the good people of Junction. Everyone who attended was glad he had gone.

Messrs. J. F. Thurber and E. H. Pettigrew have returned from a trip to Sanderson. They report rain in that section.

S. H. Weaver, Jr., has just handed the writer a sample of

fruit from one peach tree from which he has sold \$24.00 worth of peaches. Can you beat that on the same amount of ground planted to anything else? Counting 19 trees to the acre would give us \$265.00 per acre. To make a liberal allowance we will say 50% of the trees fail to bear fruit, this would leave us \$222.50 per acre. Then to make a further allowance we will say those that bear fruit only bear 50% normal crop, we have a net return from one acre of \$111.25. This is no speculation nor exaggeration. Our sandy land around London will give you just such a yield if set to fruit and cared for properly. Fruit does not grow wild here, neither can you expect an orchard to thrive as a goat pasture.

Mrs. T. R. Brewer and her daughter, Letha, have returned from San Angelo where they have been visiting relatives and friends.

Miss Dora Baker of California and her friend, Miss Evelyn Youngman, are visiting the home of Miss Baker's uncle and aunt, Mr. and Mrs. J. F. Gentry. Miss Baker is by calling a preacher and during her stay with her uncle she is conducting a series of meetings at the Baptist church. Miss Baker is very sincere and she is very

interesting to hear. She will continue over Sunday. Hear her.

Miss Selma Adams is spending a vacation with relatives at Johnson City.

We are informed that a Mr. Gamel of Menard has closed a contract to erect a concrete dwelling for J. B. Fisher on the Fisher ranch, to cost \$5,000.00.

London citizens should take notice that the Kimble County Fair will be held at Junction this fall. Only a few weeks off. This town and country should be represented at that fair. Our people should make the very best display possible in the short time yet remaining to prepare for it. Our people should select their best livestock put them in the best possible condition; their different breeds of poultry; their best farm products. Their finest fruits and vegetables should be on display. Their fruit and vegetables can be displayed in glass jars as well as fresh. There will be people from all parts of the country in attendance and it will be the best opportunity yet to put London and its possibilities on the map. If you are a booster, then root for Kimble County Fair, and arrange to have your products there, labeled "London Products." We are all happy and humbly

thankful for the recent rains. The nice melon Mr. Will Gentry left us yesterday was fine. We ate it with a relish, and thanks combined.

Born to Mr. and Mrs. Norman Ray on July 30th, an 8½ pound boy.

CARD OF THANKS

We wish to thank each one who by word or deed made the burden easier to bear in giving up our dear father. May God bless and comfort each one when called to give their loved ones.

W. R. Richardson and family,
D. A. Dawson,
K. D. Richardson.

CARD OF THANKS

The members of the Fidelis Class are very well pleased with the results of the dinner which they served last Saturday. The way people responded was overwhelming and it certainly was appreciated by the class.

We wish to thank every one who helped us in any way and will say that we could not have succeeded had we not had that outside help.

We especially wish to thank Mr. N. C. Patterson for the use of his store in which we served our dinner.

Members, Fidelis Class.

Bring clean cotton rags to Loeffler Motor Co. We pay 6 cents per pound.

Looking After the Surface

The use of a drying film of linseed oil or of a solution of resins was an old art which gave rise to the paint and varnish industry. In recent years the chemist has made the cellulose molecule contribute. He uses nitro cellulose resins, waxes and softeners dissolved in volatile organic solvents such as butyl ester, hydro carbons and alcohols.

The result is a laquer combining the advantages of paint and varnish. The growth of the production of this laquer is even amazing. The year 1924 saw the production of just 1,500,000 gallons of such laquer. Two years later the production jumped to over 20,000,000 gallons. The curve representing the production is still rising very rapidly.

BY ORDER OF THE EXECUTOR

The lands of Mrs. Julia Wadley, deceased, owned on the death of the Johnson Park Grant in Kimble County, are now being offered for sale. In all there are 1400 acres, of which 250 acres are school lands purchased at a \$1.00, the remainder being donated.

Donation can be given on October 1st, 1928. Reasonable terms can be arranged to suit purchaser.

Sealed bids are asked for, accompanied with a check for \$250.00 as forfeit, bids to be opened September 15th, 1928, by Executive of the Will, right being reserved to reject any and all bids.

For further particulars, see or write, FRANK L. WILSON, Junction, Texas.

You want your land abstracted; then you had better see E. Holcomb; he has complete index of all County lands. (adv)
