TWENTY-FIRST WEEK

Budding inventors and their machine of the future are shown here. The inventors, all science students at Sonora High School, are Sue Greenhill, Jan Vander Stucken and George Archer. The machine is a solar furnace. Powered by the sun, the furnace reaches a temperature of 2,000 degrees Centigrade and shows great promise for fusing metals, cooking and otherwise taking its place in our scientific future.

Sue, Jan and George exhibited their furnace at the science fair held February 1 at Eldorado High School.

Your Future May Depend On This Project

CONCLUSION

DEVELOPMENT OF FLOOD PREVENTION PLAN ON DRY DEVIL'S RIVER

Field survey work was started on Dry Devil's River on December 9, 1957 for one week, and was resumed on January 6, 1958. It was completed on January 31, 1958. February 28, 1958 is the tentative date set for completion of the plan for explanation to local sponsors for their acceptance or rejection.

The plan will include six large structures and possibly two smaller ones on Dry Devil's River watershed, plus the six smaller structures on Lowrey Draw.

If local sponsors give the completed plan the go-ahead, final completion, printing, approval in Washington, and submission to Congress will be accomplished as rapidly as possible. The U. S. Army Corps of Engineers has 45 days under the law to make recommendations or raise objections. The project must be approved by the House of Representatives Agriculture Committee and by the Senate Public Works Committee. It does not require approval by the entire Congress.

Construction funds are allocated from a lump sum flood prevention appropriation made to the Soil Conservation Service for the United States. Allocations are then made to each state for use on projects ready for construction.

Public Law 566 is a new law, and few projects are ready for construction—Ozona being the first in the United States. The initiative of Sonora people in raising local funds to finance a work plan

CONTINUED TO PAGE TWO

Local Sponsors Vote Unanimously To Secure Flood Project Approval

Paul Kenner, Soil Conservation Service engineer, told a group of 25 local citizens Thursday that flood prevention work on both Lowrey Draw and Dry Devil's River is feasible and practical.

The decision to proceed with efforts to secure approval and construction of the project was unanimously made by the group of county, city, and soil conservation district officials present.

The proposed project includes 13 flood prevention dams or structures, eight on Dry Devil's River and five on Lowrey Draw. The 13 structures will detain or hold back 36,796 acre feet of water—the equivalent of water one foot deep on 37,796 acres of land.

The total watershed on both draws above Sonora is 129,280 acres. Some 76.83 percent or 99,324 acres of this drainage would be above and controlled by the 13 structures. The project is estimated to give 96 percent average annual reduction in flood

damages to the City of Sonora.

As Sonora now stands, without flood protection, expected damages from a 100 year frequency flood would total \$4,821,000. With the structures completed damages from the same storm are expected to be reduced to \$500,000. Torrential rains falling below the structures would cause damage immediately adjacent to the streams, but damage would be only ten percent as great as without structures.

The construction cost of the 13 dams was estimated at \$1,662,349, which will be borne by the Federal Government if the project is approved.

It was agreed that Sutton County will assume responsibility for the completed structures. Since all emergency spillways will be cut in solid rock, maintenance is expected to be a minor expense item. Local people must also furnish easements and rights-of-way, since this cost cannot be paid by the Federal Government under Public Law

566.

It is expected that all easements will be donated by landowners, who will all benefit from the project. Three of four oil and gas companies involved have already indicated their willingness to make adjustments necessary to permit construction, and the fourth company will be contacted soon.

The work plan and compilations are expected to be completed by mid-April when a project agreement will be signed by all local sponsors. Approval by the House and Senate Public Works Committees will then be requested. Local sponsors include the Edwards Plateau SCD, Sutton County, the City of Sonora, Schleicher County, and the Eldorado Divide SCD.

If Congressional approval can be obtained before the current Congress adjourns, and easements from landowners and others can be readily obtained, construction could begin as early as late 1958.

Broncos Lose To Ozona Cagers 60-33

By Frank Joe Potmesil

The Sonora Broncos lost their fifth district game to Ozona 60 to 33 Tuesday night, February 18.

The Broncos put a scare into the Lions the first half, holding as much as a 12 point lead over the Lions. But Nevill, Fields and Brohead fouled out and lack of replacements left Ozona to a runaway.

Jerry Potmesil and freshman Gene West both scored eight for the Broncos to be high point men. Jerry Jacobs of Ozona hit 13 to pace the winners.

Freshmen Win

Sonora's freshmen won their game with Ozona 43 to 40. Gene West was high for Sonora with 20. Wayne Albers was high for Ozona with 13.

"B" Squad Loses

A duel between scorers, Sonora's "B" squad lost to Ozona 51 to 51. Sonora's Jackie Ross hit 21 and Ozona's Humberto Cervantez hit 23. The game was very exciting and Sonora played a very good game and lost in the final minutes.

Mrs. Jack Drennan and Mrs. Raymond Mittel and Theresa returned home Wednesday after a two weeks visit in El Cajon, California the guests of Mr. and Mrs. R. A. Johnson and Douglas.

Heavy Rains Last Weekend Make February '58 Wettest On Record

Track Season To Open Saturday With Broncos Headed For Eldorado Relays

The Sonora Bronco track and field team will enter its first competition of the season at the Eldorado Relays Saturday, March 1 with 20 boys training for participation in events this year. The team will appear in new track uniforms consisting of black pants with white trim, red tops with a black sash and "Sonora" in white. Track shoes and sneakers are red with white linings.

Of the team's chances for district recognition this year, Coach Joe Turner said, "We have been unable to work out due to bad weather. Therefore we will not be organized or in condition to make a showing for two or three weeks."

"Only two lettermen are back out of last year's track team that placed high in the State meet at Austin," Turner went on, "They are Ben Castillo and Vivian Vasquez."

Turner named Junction and Ozona as the two teams to beat for district title, saying that he doesn't believe any two teams combined can match the strength of the Junction squad.

In training for the track season are Bill Fish, Vivian Vasquez, Ben Castillo, Tommy Love, Vicente Garza, Luther Chalk, Bobby Soso, George Caldwell, Mickey Powers, Ram Castillo, Jackie Rosser, Herman Moore, Johnny Fields, Alfred Sykes, Albert Sykes, Armando Reyna, Joe Barcia, Israel Leija, Jerry Potmesil and John Ed Nevill.

TRACK SCHEDULE

The annual Sonora Relays has been scheduled for March 22 with 24 teams invited to participate, according to Coach Joe Turner. Other track and field events for the season are as follows: March 1, Eldorado Relays. March 8, Brady Relays. March 22, Sonora Relays. March 29, Eagle Pass Relays. April 12, District Meet, Ozona. April 19, Regional Meet, Odessa.

Heart Attack Fatal To Frankie R. Franks Buried Here Monday

Funeral services for Frankie Robinson Franks, 48, were held in the First Baptist Church Monday at 3 p.m. with M. R. Phillips, minister of the Church of Christ from San Angelo, and Rev. W. L. Brown, assistant pastor of the Baptist Church here, performing the rites.

Born March 5, 1910, in Sonora, the son of Mrs. Fannie Franks and the late Russel Franks, he had lived here most of his life. He died Sunday, February 23, in Hudspeeth Memorial Hospital.

Mr. Franks served for the duration of World War II in the Navy. He was a member of the Church of Christ.

He is survived by his wife; his mother; one daughter, Miss Mae Franks; one stepdaughter, Miss Betty Ann Farris, all of Sonora; three stepsons, Clifford, Robert and Doug Farris, all of Grants, New Mexico; two brothers, Blanton Franks of Houston and Johnny Franks of Kermit; one sister, Mrs. Jack Drennan of Sonora.

Pallbearers included Curt Schwiening, L. E. Johnson, Sr., W. D. Kring, Wess Hill, James Wilson, W. K. Regeon and Dorsey Archer.

Services Held For Mrs. Harvey Walker Here Saturday

Funeral services for Mrs. Harvey Walker, 88, were held Saturday, February 22 at the home of her daughter, Mrs. C. T. Jones, with Rev. Doyle Morton, assisted by Rev. Allan Guthrie, performing the rites. Burial was in Sutton County Cemetery under direction of Ratliff Funeral Home.

Mrs. Walker died at noon Friday, February 21, at the C. T. Jones ranch where she had made her home for the past eight years. She was born Mary Elizabeth Kennedy, December 25, 1870. Her parents were early day Texans, coming from Alabama after the Civil War. They settled in Smith County near Tyler. Later they moved to Leon County where Mrs. Walker was married December 31, 1892. The couple moved to McCulloch County and in 1917 they moved to Sutton County. Mr. Walker died in 1945.

She is survived by two daughters, Mrs. Jones and Mrs. Ottis Moser of Menard; a son, Olie Walker of Sutton County; a sister, Mrs. Mattie Morris of Sonora; three grandchildren, Jack Moser of Menard, Mrs. H. V. Adams of Dallas and Mrs. Harva Cooper of Sonora and eight great-grandchildren.

By E. B. Keng

Rainfall totaling from 3.00 to 6.00 inches fell over the weekend, making the wettest February ever recorded at Sonora or at San Angelo. After two weeks of drizzle, steady rain began fall-

ing early Friday and continued intermittently through Saturday.

Most of the rain was slow, and runoff was light to moderate. Lowrey Draw and Dry Devil's River ran moderately Friday afternoon and Saturday—for the first time in February in many years. Small streams of clear water were trickling out of most hillsides.

Rainfall was general over Sonora and surrounding areas, with Fred Earwood and Joe B. Ross measuring 6.00 inches or over. The lightest rainfall reported was an adequate 3.06 inches at the Edgar Shurley ranch.

Rainfall from representative gauges in the Edwards Plateau Soil Conservation District included the following:

Sonora Wool and Mohair Company 3.65; Harold Friess 4.10; Howard Espy 3.70; John Ward 5.80; Edgar Shurley (Byrd) 3.80; Alvis Johnson 3.90; Tom Davis 5.00; Jo Hardgrave 4.00; John I. King 3.10; Elmer Wilson 3 to 4.00; and Travis Glasscock 3.70.

O. L. Richardson 4.55; Rip Ward 3.90; Paul Turney 4.00; plus; George Brockman 4 to 5.00; Leonard Gibbs 3.35; Hospital Ranch 3.15; Mack Cauthorn 4.80; Moore and Neill (Thorpe) 3 to 4.00; Experiment Station 4.49; Dan Cauthorn 4.25; Edwice Sawyer 3.90; Mrs. E. E. Sawyer 3.10; and SCD Trial Area 3.90.

Ranchmen are approaching the growing season with the best soil moisture of many years. Soil Conservation Service tests with a 39 inch auger failed to find dry soil even under bare ground.

A heavy crop of winter weeds will require lots of moisture, and more rainfall will be needed to aid grass production. Most ranchmen are stocked light enough to get rapid range recovery if rains continue.

City Election Called For April 1 By Mayor

Mayor Alfred Schwiening has issued an order for an election to be held in the City of Sonora on Tuesday, April 1, for the purpose of electing a mayor and two commissioners. Election will be held at the City Hall. Edwin Sawyer has been appointed presiding judge of the election and Mrs. L. E. Johnson, Sr., and Mrs. A. W. Awalt have been appointed clerks.

Present city officials, all of whom have filed for re-election, are Alfred Schwiening, mayor; A. B. Hightower and Gay Copeland, commissioners.

In order for a candidate's name to appear on the ballot, the candidate must file with the mayor at least 30 days prior to the election date of April 1, or by midnight of Saturday, March 1, a sworn application accompanied by an executed copy of the state required "Loyalty Affidavit", both of which are available at the City Hall.

Pallbearers included R. G. Nance and John I. King of Sonora, Bill Edmiston and Gene Edmiston of Eldorado, Jack Moser of Menard and Glen Morse of Houston.

Cross Country Trip On \$68.95? This Young Couple Managed It

A two week trip from California to Florida may sound like an ideal winter vacation, but two young Californians found it more like a nightmare, even though it cost them only \$68.95 for the entire trip. Mr. and Mrs. Bernard Coyne of Los Angeles, both temporarily out of work as a result of cutbacks in the west coast aircraft industry, decided to make a visit to relatives in Florida and it was just that decision that brought them into Sonora where they spent their first night under a real roof since leaving Los Angeles six days previously.

Hardships beset them from the outset as they boarded their motor scooter packed to beyond capacity with spare clothing, an alarm clock, iron, towels, soap, shaving and toilet gear, folding stove, frying pan, dishes and cutlery for two, coffee pot, salt, pepper, matches, bedroll, spare gasoline, raincoats and a sign "Los Angeles to Tampa".

The young couple roared through the countryside at the rate of 200 miles per day (using only about three gallons of gas per day) ahead of the late January snow storm which closed all roads west of Fort Stockton. It was after spending a cold night in a stone replica of an old stagecoach station near Fort Stockton that they decided to dig into their dwindling pocketbook and buy a night's lodging in Sonora. After a good night's rest the couple proceeded on their way to Tampa.

They stopped back through Sonora Thursday, February 13, en-

route to their home in Los Angeles. A visit with townspeople accompanying photograph was in downtown Sonora resulted in taken.

Mr. and Mrs. Bernard Coyne of Los Angeles made Sonora a stop either way on their motor scooter trip to Tampa, Florida, and home again. The young couple averaged about 200 miles of travel per day and made the California-Florida leg of their trip for a total outlay of \$68.95.

Dam Project Continued From Page 1

should place the project in a favorable position to receive construction funds after the project is approved—provided easements can be obtained from local landowners.

IMPORTANT CONSIDERATIONS AND FACTS CONCERNING THE FLOOD PREVENTION PROGRAM

1. It is a local program, controlled by local people.
2. Local landowners retain ownership of the land on which dams are located. The landowner gives an easement, permitting construction and maintenance of the dam.
3. Landowner retains the use of any water impounded behind the structure, below the draw-down tube. Up to 200 acre feet of water may be permanently stored above each dam (provided the soil will hold water). Under Texas law the landowner cannot use this water for irrigation without a state permit, but he may use it for fish, livestock, recreation, wildlife or other purposes. The local sponsoring organization retains the right to drain the sediment pool if necessary to make repairs, or to use the water in establishing grass on the dam.
4. The flood prevention features are automatic. Each lake remains empty (except for 200 acre feet or smaller sediment pool) and ready for a flood. As water during a storm rushes into the lake it is temporarily held, and automatically released through a 20-36 inch diameter "draw-down" pipe. The lake empties without flooding, and is ready for another storm.
5. Safety for dams.

Each dam will store from 3.5 to 6 inches of runoff water from each acre in the watershed above it. (Ozona had 3.62 inches of runoff from each acre during the 11.21 inch flood producing storm of June 27, 28, 29, 1954).

In the event of a larger rain, each dam has a spillway designed to carry runoff from a 13 inch rain falling in 6 hours and producing 10-12 inches of runoff, or three times the runoff during the Ozona storm. Two feet of freeboard above designed spillway flow gives additional protection.

5. Enlarged conservation program.
Flood prevention dams constructed under Public Law 566 are essentially an extension of the conservation program presently administered by soil conservation districts. Every landowner in Dry Devil's River and Lowrey Draw watersheds will be encouraged, through the regular completely voluntary district program, to keep a good cover of grass for soil protection. A good vegetative cover will materially reduce the onset of floods, and will prevent siltation of lakes.

EXPECTED FLOOD DAMAGES

Any citizen who looks at Ozona or Lampasas, or was in Sonora in 1932, 1936 or 1938, can arrive at only one logical conclusion: SOONER OR LATER, SONORA WILL SUFFER A SEVERAL MILLION DOLLAR PROPERTY LOSS FROM A SEVERE FLOOD—PLUS PROBABLE LOSS OF LIFE UNLESS PROTECTION IS OBTAINED.

Should we wait for the loss, or try to obtain protection now?

1. When a 100 year frequency storm on Dry Devil's River and Lowrey Draw is routed through Sonora, the survey shows that water would be approximately one foot deep in the First National Bank, 8 feet deep in Park Inn Cafe, and 2 feet deep in (not under) the Sonora Wool and Mohair warehouse. An estimated 60 per cent of all homes and business establishments would be moderately to severely damaged. Assuming no loss of life, property damage alone would run into millions of dollars.
2. Damage to City streets, bridges, water and sewer installation, City and Utility electric systems, T.V. system, telephone system, and gas system would be very extensive—and expensive to repair.
3. County owned equipment losses could be severe if flood came at night with little warning.
4. Airstrip, ball park, Scout buildings, fire station, Negro school, L. W. Elliott school, First Baptist Church, Presbyterian Church, Catholic Church and Mexican Baptist Church would be moderately to severely damaged.
5. Damages to highway bridges and fills above it and below Sonora would be heavy.
6. Practically every Sutton County citizen would be affected, either directly or indirectly.

Sutton County has some 115 landowners who also own property in Sonora that is subject to flood damage (or have brothers, sisters, children or parents who own such property.) Some 34 Sutton County resident landowners own no property or have no close relatives owning property subject to flood damage. Fifteen absentee landowners own no property in Sonora subject to flood damage.

7. Twenty-one ranchmen owning land on Dry Devil's River and Lowrey Draw would have heavy fence damage, plus possible loss of livestock and erosion or gravel siltation damage.

WHAT WILL THE PROGRAM COST?

1. Construction of dams on both draws is expected to cost approximately 2 million dollars. This construction cost would be borne entirely by the Federal Government under Public Law 566.

2. Local Costs.
a. Local people must provide easements and rights-of-way. It is hoped that local landowners on whose land dams are proposed will give easements. Benefits to such landowners from enhancement of ranch value, flood irrigation of rangeland above structures, and reduction in fence damages will usually far outweigh any disadvantages.

However, in the event that a landowner should refuse to grant an easement to permit construction, the entire project will necessarily be halted until such time that easements could be acquired.

On the original Lowrey Draw survey it was anticipated that only four dams would be necessary. Consequently, agreements to grant easements were signed with Hunt and Neill, W. A. Miers, and Mrs. Ada Wynn. In order to eliminate the necessity for channel widening on Lowrey Draw through Sonora and to give better protection, two additional dams were planned on the Thompson Estate, and the administrators have not been contacted regarding an easement. Contacts regarding easements have not been made with owners of land on Dry Devil's River. The cooperation of all landowners in developing the work plan has been outstanding. No major difficulties are anticipated in obtaining easements. All landowners on both draws have had years of experience with death losses and fence repair from minor floods, and fully recognize the potential danger to Sonora from a major flood.

b. Easements from oil and gas companies involved.
Humble Pipeline Company and Lone Star Gas Company each have lines crossing a proposed dam site on the W. A. Miers ranch on Lowrey Draw. Both companies have agreed to bear the cost of making necessary changes in their lines to permit construction. Lone Star Gas Company's estimated cost is \$10,560; Humble Pipeline Company's cost is estimated at \$3,500.

Changes in El Paso Natural Gas Company's proposed gas trunk lines were necessary on two dam sites. The Company has already changed their proposed lines to prevent any interference with the flood prevention structures. One El Paso gas well on the E. M. deBerry ranch will require raising several feet to get it above flood level, and the Company has indicated that this problem can be satisfactorily worked out.

A 10 inch oil line owned by the Texas-New Mexico Oil Company crosses under the end of a proposed dam on the G. H. Davis ranch. This company has not been contacted regarding an easement, but is assumed that they will give the same cooperation as shown by the other companies.

All oil and gas companies contacted thus far have given splendid cooperation. They not only recognize our flood problems, but also

appreciate our efforts to obtain protection without voting bonds or raising property valuations for the project.

c. Local people must make any necessary changes in country roads.

One proposed site on the old Fort McKavitt road will necessitate eliminating approximately 2.5 miles of the old road, and constructing 2 miles of new county road. One ranch access road will require changing on another site.

Following heavy rains the discharge pipe from dams will flow from one or two days to two or three weeks, depending on the size of the rain. Several county road crossings of Dry Devil's River and Lowrey Draw may have to be widened, graveled or tubed to permit travel.

d. Local people will administer contracts.

Construction funds are furnished by the Federal Government, but preparation of bids and contracts, etc., must be handled by the local Commissioners Court.

e. Local people must assume maintenance of the completed structures (It would be folly and poor protection to spend 2 million dollars on dams and require no maintenance; therefore, Public Law 566 requires maintenance by local people as a part of their contribution).

This maintenance covers such items as repairing the fence around the dam, clearing draw-down tube grill of any debris, repairing erosion rills on dam or in spillway, etc. It does not include any major repair items or replacement in event of any failure of dam to function properly. Since all dams will have solid rock spillways, and a rock blanket over all or part of the dam, maintenance is expected to be much less than \$100 per year for each structure.

It should be remembered that these dams will fill to spillway capacity only in severe flood producing rains. Rains that would produce a flood will probably necessitate light maintenance work on structures, but without the dams much more work would be required to repair road, bridge and street damage—not to mention property damage.

WHEN COULD CONSTRUCTION WORK BE STARTED, AND WHEN COULD COMPLETION BE EXPECTED?

With the best luck possible it will be a tight squeeze to get the project approved before Congress adjourns this summer. Every effort will be made to accomplish this goal, provided the project gets go-ahead approval from local people.

If approved by the present Congress, and easements can be obtained from landowners, construction could start about December 1958.

If not approved by the current Congress, the project could not be approved before January 1959, with earliest construction possible in the fall of 1959.

An estimated 2 to 5 years will be required for completion, depending primarily upon availability of funds.

FOUR POINTS TO CONSIDER

1. One flood similar to the storm at Ozona or Lampasas would cause 2 to 5 times as much damage as the flood prevention project will cost.
2. In event of a 100 year frequency storm with the Wool House full of wool and mohair, most ranchmen could easily lose more money than the slight tax increase for flood protection would cost.
3. In event of a major flood ranchmen and others not affected directly would voluntarily give more money to the homeless for rehabilitation than the entire local portion of flood prevention will cost.
4. In event of a major flood, losses to tax supported institutions, including county roads and equipment, schools, and city roads, power lines, water and sewer installations, would probably require

financial costs and tax increases that would be many times over the local cost of a flood prevention system.

PLEASE BEAR IN MIND THAT THIS FLOOD PREVENTION PROJECT IS DESIGNED TO PROVIDE APPROXIMATELY 96 PER CENT REDUCTION IN FLOOD DAMAGES FROM A 100 YEAR FREQUENCY FLOOD ON DRY DEVIL'S RIVER AND LOWREY DRAW. SUCH A FLOOD IS EXPECTED TO PUT WATER IN SONORA SOME 3 OR 4 FEET DEEPER THAN THE FLOOD OF 1936.

By L. A. Wilke Gun Care Is Important

This is just a reminder. Chances are good that when you put the scattergun in the closet and got out the fishing rod you just gave the gun a lick and a promise. If so, better retrieve it now and do a little wiping or you may have to polish off some rust, come next hunting season.

While good shotguns are plentiful and more are being made every day, there still is sound economy in using a rag and some good gun oil or grease on the gun you have.

Most of us had pretty good hunting this past year. From the beginning of dove season on September 1, through the close of quail season January 16, there were a lot of shotgun shells burned.

Perhaps our own most interesting hunting was in the Eagle Lake area. There we found some very wonderful goose shooting in the rice fields. For this we used a new Model 50 Winchester, full choke. Shells were Western short magnum, with No. 2 and 4 shot. If you remember, this is the gun that operates on its own gas, reducing recoil, snap back noises and increasing speed of loading.

Accidents Due To Carelessness
From time to time during the coming year you'll be reminded in this column about water safety. Hardly a day goes by that

we don't read about someone drowning, or being seriously injured in a water accident.

Most of these accidents can be traced to just plain carelessness.

Congratulations To These New Parents

Mr. and Mrs. Carl Jones announce the birth of a son, Bruce Leslie, who was born February 5, at Clinic Hospital in San Angelo. His weight was 7 pounds and 5 ounces.

Bruce Leslie has one brother, Ronny, who is 5. His grandparents are Mr. and Mrs. Joe Jones and Mr. and Mrs. J. E. Black all of Bogata.

Mr. and Mrs. David Saunders are the parents of a daughter born January 30, in Hudspeh Memorial Hospital. She weighed 6 pounds and 15 1/2 ounces and has been named Andrea Clare.

Andrea Clare's arrival was welcomed by her brothers, David John and Michael Robert. Her grandparents are Mr. and Mrs. David John Saunders of Houston. Mrs. Minnie Davis of Knoxville, Ill. is her great-grandmother.

MRS. JOHNSON ENTERTAINS TUESDAY NIGHT CLUB

Mrs. L. E. Johnson, Sr. entertained the Tuesday Night Bridge Club in her home last week. Arrangements of jonquils and potted tulips decorated the party rooms and a dessert course was served.

Mrs. Henry Decker won high score prize, Mrs. R. A. Halbert won the guest prize, Mrs. Louie Trainer won the traveling prize and Mrs. Ernest McClelland won at bingo.

Others who attended included Mmes. John Bell, Arthur Carroll, Earl Duncan, L. E. Johnson, Jr., R. G. Nance, Belle Steen, R. C. Vicars and P. J. Taylor.

MRS. KELLEY HOSTESS TO THURSDAY BRIDGE CLUB

Mrs. R. B. Kelley was hostess to the Thursday Bridge Club in her home last week. The party rooms were decorated with arrangements of white stock and carnations, jonquils and flowering potted plants. Cherry pie a la mode and coffee were served.

Mrs. Joe Berger and Mrs. J. P. Smith won high score prizes. Mrs. O. G. Babcock won second high score prize and Mrs. Karer Peterson won the bingo prize.

Also attending were Mmes. R. V. Cook, C. E. Stites, Robert Rees, Lee Labenske, J. W. Trainer, Rose Thorp, A. W. Awalt and Auther Simmons.

Mr. and Mrs. Bill Fields attended funeral services for W. H. Ogilvy which were held in the first Baptist Church in San Angelo last Wednesday. Mr. Ogilvy's son is Mrs. Fields' brother-in-law.

WCS HAS ALL-DAY STUDY AT CHURCH WEDNESDAY

An all-day mission study and covered dish luncheon was observed at the Methodist Church last Wednesday. Mrs. W. L. Davis and Mrs. J. T. Sellman reviewed "The Kingdom Beyond Cost" during the study on "Christ, the Church and Race." Mrs. Cliff Epps gave a review of the history of the Woman's Society of Christian Service which was organized in 1880. Mrs. Alvis Johnson assisted with the program and Mrs. Herman Smith led the prayer.

HAVE FAMILY REUNION

The home of Mr. and Mrs. J. F. Hamby was the scene of a family get-together last weekend honoring Mr. and Mrs. Jimmie Morrow and Valerie Ann of Liberty. Mr. and Mrs. Morrow will leave for South America in the early summer.

Out-of-town guests included Mr. and Mrs. J. R. McLaughlin of Midland, Mr. and Mrs. Winn Murchison of Odessa, Mr. and Mrs. Hayden Ellis, Jane and Judy, and Mrs. R. S. Williams, all of Merton, Mrs. Violet Morrow and John Stanley Hamby of San Angelo. Other members of the family present were Mrs. Clyde Gardner, Mr. and Mrs. Elton Ellis, Mr. and Mrs. J. W. Pepper.

Mr. and Mrs. Vance Eubank had as their guest last weekend their son, Gene, who is a student at Texas Tech, Lubbock.

Mr. and Mrs. Glen Chadwick and children of San Angelo were the guests of Mrs. Chadwick's mother, Mrs. Stella Keene, during the weekend.

Eastern Star To Donate Books To School Libraries

Mrs. James Wilson presented "Our American Way of Life" for Sonora Chapter of Order of Eastern Star at their regular meeting last Tuesday night. Assisting in the program were Mrs. Hut Moore, Mrs. Joe Nance and Mrs. Jack Kerbow.

Members voted to observe Education Week by donating a book to each of the Sonora schools libraries. The committee to purchase the books consists of Mrs. A. E. Lowe and Mrs. James Wilson.

A George Washington birthday theme was featured in room decorations and the centerpiece. Hostesses were Mrs. W. L. Davis, Mrs. R. B. Kelley, Mrs. John Eaton, and Mrs. Hut Moore.

MRS. MAREK ENTERTAINS BORDER PATROL WIVES

Mrs. Ed Marek entertained the Immigration Border Patrol Wives in her home Thursday evening for their monthly social get-together.

Entertainment included several games of bongo with high score prize going to Mrs. Dave Saunders. Mrs. Nolan Moore won the second high score prize.

A dessert course was served to Mmes. G. W. Archer, Sam Dunn, William Hockstatter, Roger Stout, Lee Holder, Max Morris, Nolan Moore and Dave Saunders.

SATURDAY NIGHT CLUB MEETS AT FRIESS HOME

Mr. and Mrs. Harold Friess were hosts to the Saturday Night Dinner Bridge Club in their home Friday night. Arrangements of tulips and jonquils were featured in the decorating scheme.

High score prizes went to A. E. Prugel and Rex Lowe. E. B. Keng won the traveling prize and bingo prizes went to Mrs. Rip Ward and E. D. Shurley.

Those who attended included Messrs and Mmes. A. E. Prugel, Edwin Sawyer, E. B. Keng, Rip Ward, Paul Turney, Rex Lowe and E. D. Shurley.

Carlos Loeffler arrived from Texas Tech, Lubbock, for a weekend visit with his parents, Mr. and Mrs. S. M. Loeffler.

Turney Friess of Lubbock was home last weekend the guest of his parents, Mr. and Mrs. Harold Friess.

Cadillac

The Decision That Needs No Explanation!

There are relatively few personal decisions a man can make that command the unanimous approval of his friends and acquaintances.

And among these is his choice of a Cadillac car.

For the things that inspire a man to Cadillac are simply too numerous to be overlooked.

Considered from a standpoint of its beauty—or its Fleetwood luxury—or its performance—or its craftsmanship—or its soundness of investment—Cadillac occupies a position entirely its own.

At the heart of this great goodness is, of course, Cadillac's experience in the creation of quality cars.

For more than half a century, Cadillac's sole concern in the manufacture of its products has been to make them as fine as automotive science would permit.

It is out of this unique constancy of purpose that has come Cadillac's international recognition as the Standard of the World.

We invite you to see, both in the showroom and on the highway, how brilliantly this latest Cadillac exemplifies all of these great traditions.

Whether you might choose the Sixty-Two Coupe or the Eldorado Brougham—you will find your decision beyond the realm of argument.

Devil's River Philosopher Claims Even The Russians With All Their Science Still Have Farm Problem

Editor's note: The Devil's River Philosopher on his bitter-
weed ranch on Devil's River
claims he's found Russia has a
farm problem. Anything to get
the spotlight off his own farm
problem.

Dear editor:

I know it's customary these
days to believe the Russians can
do anything, they just press a
button and order up a satellite,
they can pause between two
sips of vodka and send off a
guided missile so accurate it
could knock the braces off the
corner post in any corner of
my pasture out here, if they
hadn't already fallen off on their
own before it got here, etc., but
while I never like to discount
the power of the other fellow,
still I've always had my doubts
about some things in Russia.

For instance, doesn't Russia
have a farm problem? I don't
care how smart his own news-
papers say he is, there never was
a dictator so smart he could
farm out in the open and never
get wet, for example. Or run out
of gas, or blow a gasket, or have
a flat.

Well, yesterday I was reading
an article in a newspaper I
found caught on a fence in my
pasture—I don't suppose the pub-
lisher aimed it there that ac-
curately, but it was lodged there,
none the less—that bears out my
suspicions about Russian farm-
ing.

According to it, the Russian
government was having a little
trouble with its grain farmers.
As I understand the system, all
the land belongs to the govern-
ment over there, and a farmer
has to work as many acres and
as many hours as he's told to, and
can keep only a small amount of
grain for his own use, the rest
going to the government.

Well, that's the way the farm-
ers have been farming, but it
turns out most of them don't
have room for much grain stor-
age, so naturally they put their
own grain in what barns or sheds
they have, and carefully pile the
government's share out in the
open. And just when it came
time for the government trucks
to pick up the grain, it started
raining and the roads over there
got muddy, since any dictator
know it's more important to con-

quer space than build roads, and
the grain got rained on, and it
you don't know what that does
to grain, turn the faucet on a

loaf of bread and see for your-
self.

You don't have to go to Rus-
sia to know it has a farm prob-
lem, so long as farming is done
out in the open.

What this proves to me is that
while the farm problem may not
be bigger than any political sys-
tem, it'll last longer.

Yours faithfully,
J. A.

Your Home Business Firms are
THE HIGHEST BIDDERS
for Your Shopping Dollar

**Here
 are the facts
 to prove
 it...**

Actually . . . no matter where you live . . . nobody . . . and that means **NOBODY** . . . can give you more for your dollar than your own home business firms. Let's look at the reason for this advantageous . . . to you . . . situation:

ANY MERCHANT . . . anywhere . . . is ordinarily going to sell goods for some more than he pays for them.

ON AN AVERAGE . . . when you spend a dollar in any retail store . . . here or anywhere else . . . about 70 cents of it pays for **GOODS**, and about 30 cents goes for rent, taxes, donations, hired help, etc., and a few cents (the national average is about 5 cents) pays the proprietor for his work, and for his investment in goods and equipment, credit losses, etc.

NOW . . . when you spend your dollar at home, you get the same 70 cents worth of merchandise that you would get for it anywhere else.

AND THE OTHER 30 CENTS stays here too, to help you pay for schools, churches, roads and streets; to vitalize the community so your property . . . or your job . . . is worth more; to keep more people here to share civic work and expense, and to serve **YOU** when you sometimes direly need their knowledge and their skills.

ONLY when you buy in **YOUR OWN HOME** community do you get back most of this 30-cent retail handling charge . . . and often a great deal more, as your job or your business prospers and your social life broadens with the growth of the entire community.

**It Pays to Buy
 where You Live**

**These Sonora Business Establishments Are Genuinely Interested In The Future Of This Community
 And In Your Welfare -- TRADE AT HOME WHERE YOUR MONEY BENEFITS YOU!**

W. Farley), Tom Walters, Leonard Ward, Bruno Brandt, W. B. Davis, and John W. Clark, individually and as constituting and representative of that class of five-year employees given cash legacies of \$500.00 each under the terms of such purported will of such decedent.

Said suit styled "Dolores Mooers, A Widow, v. H. B. Fuqua, Independent Executor, et al.," being numbered 1525 on the docket of such court and a brief statement of the nature of the suit being as follows:

Plaintiff seeking equitable review asks to set aside a settlement made with her husband, Clifford Mooers, dated May 1, 1956, and this Court's decree of approval entered the next day in cause No. 1464, styled "Ex Parte: Clifford Mooers and Wife, Dolores Mooers," recorded in the minutes, Vol. 6, p. 636, and asks an accounting and for a declaration fixing the identity of the residuary devisee under a purported will of such husband as admitted to probate December 10, 1956, in which suit it is claimed that plaintiff as the wife of such decedent for 27 years before his death was induced to consent to such property settlement and decree by the fraud of her husband and his agents, consisting of false representations and concealment of material facts as to the nature, extent and value of the community property and of plaintiff's true interest therein at such time, and because of further false promises to bequeath and on account of mistake induced by fraud of her husband and coercion; and it is claimed that a fraud was also practiced by such decedent on this Court, and that the proceedings did not comply with Article 2624a.

It is further claimed in such suit that all or substantially all property in decedent's name at the time of such settlement and at the time of his death was community property, and that had the wife received those properties awarded to her in such settlement, such were greatly less than her share at such time, and such contract was grossly unjust and disadvantageous to her, but that there was further material fraud and deceit practiced on her as to those properties which it was recited she was to receive under such settlement because of failure of title and of consideration in material part, and inability to deliver and failure to deliver personal property of the kind and value which it was represented such wife should receive.

Plaintiff offers to do equity and makes a continuing tender to restore that which she has received and asserts that due to her situation, inexperience, ignorance and deception she could not sooner have discovered such fraud and brought this action.

It is further claimed that since such husband's death the defendant H. B. Fuqua, acting as Independent Executor under the purported will of such husband, has come into possession of but has not distributed all of those properties which the husband wrongfully took under such settlement and decree and in which plaintiff had a continuing equitable ownership and interest, and that the other defendants are claiming to own or have some interest in such properties and estate as the respective cash legatees and residuary devisee

Capitol Weather Spotlights News, Says O. C. Fisher

Weather had the news spotlight all to itself in Washington last week where for three days the Capitol city moved at snail's pace, shut down and zeroed-in under a 14-inch snow. It was the coldest in two decades, and the snow was the heaviest since 1936, described as "classic" by the Weather Bureau.

In fact, the Weather Bureau put out a special bulletin trying to explain what happened. "The storm developed as two centers of low pressure moved across the Gulf of Mexico area and combined into one center in Alabama and then moved along the East Coast intensifying rapidly as it passed north. . ."

MISCELLANEOUS

RESPONSIBLE PERSON

Male or female, from this area, wanted to service and collect from automatic vending machines. No selling. Age not essential. Car, references, and \$700 working capital necessary. 7 to 12 hours weekly full time work. For local interview give full particulars, phone. Write P. O. Box 4872 Dallas 6, Texas. 1 tp 21.

CARD OF THANKS

I wish to express my sincere appreciation to the Hospital staff, my friends, neighbors and relatives for cards, letters, flowers and the many kind and thoughtful deeds with which I was remembered during my recent stay in Hudspeth Memorial Hospital. May God bless you all. Joe F. Logan.

under such purported will; and that among such properties are lands and interests in lands within the State of Texas including those described, listed and identified in such petition, including the following: SUTTON COUNTY:

1. A 1/9 royalty interest in the following described land: 360 acres of land being a part of Survey No. 79, in Blk. A, originally granted to G. W. T. & P. Ry. Co. and patented to Branch Masterson, by patent No. 311, Vol. 38, dated Sept. 12, 1884, described by metes and bounds as follows:

BEGINNING at the NE corner of Survey 79; Thence South to the SE corner of same; Thence West to the East line of Survey No. 530, in the name of G. Bode-mann;

Thence North to the middle of the North Llano River; Thence with the middle of said river and following the meanders of same to the N line of said Survey No. 79; Thence East to the place of beginning, and being all of that portion of said survey on the south side of the North Llano River.

And being the same property conveyed to Mrs. Sophie Thiers by Mrs. Sophie Schwiene, a feme sole, by deed dated April 15, 1930, and recorded in Vol. 27, page 303, of Sutton County Deed Records, which deed is here referred to for further description.

The State of Texas

To The Sheriff or any Constable of any County of the State of Texas, GREETING:

You are hereby commanded to serve the foregoing citation by making publication thereof in some newspaper, of legal circulation, published in the County of Sutton for four (4) consecutive weeks, the first publication to be at least 28 days before the return day of the citation.

Herein Fail Not, but on the return day hereinabove named, have you then and there before said court this writ, with your return thereon, showing how you have executed the same.

Issued and given under my hand and seal of said court in Boerne, Texas, this 30th day of January, 1958.

(SEAL) Lorene K. Harz. District Clerk, Kendall County, Texas. 4 tp 18.

Rev. Allan Guthrie, Mrs. Theima Espy, Weldon Nusbaum and Nelson Stubblefield made a business trip to Fort Worth during the weekend.

Scientists got into the act. Baffled by a 14-inch snow that fell within a few hours, they came forth with an explanation. When the air pressure in a given area is low, the air has a tendency to rise, they explained. Higher pressure air comes rushing in to take its place and pushes the old air further up. That's how a storm is born.

As the old air rises, it gets cooler and cooler, and the moisture in it begins to condense, turning into clouds. The faster it rises, the more condensation there is.

If too much moisture condenses, the clouds can't hold it all, and it begins to fall. Whether as rain or snow depends on the temperature. And that's what happened on the weather front.

Traffic Signs Are Silent Policemen

What would you do if all the traffic signs in Texas were suddenly removed?

Traffic signs placed at carefully selected locations act as silent policemen to protect the public and help move traffic safely and efficiently.

Everyone should know and obey traffic signs. Traffic officials, police and engineers make regular checks to see that signs are in good condition. Sometimes the weather, vandalism or other conditions make the signs difficult to read.

Motorists and pedestrians are urged to learn the meaning of signs by their shape alone. They should know their shapes and learn to use this knowledge instinctively in city traffic or on the highway.

The nation-wide over-all attack on traffic accidents is being built around safety's original three E's—engineering, education and enforcement.

First, the engineers design and install aids for moving and controlling traffic. Then it's necessary to educate the public to utilize these aids and protections. Finally, for those people who insist on learning the hard way, there is enforcement. All of these are being continuously stepped up, particularly this year, as part of a national drive to make 1958 traffic safety's decisive year.

Devil's River News-Sonora, Texas, Thursday, February 27, 1958

YOUR

MINISTER

SAYS

By Rev. Bill Brown
"Fears Within"

"For God hath not given us the spirit of fear; but of power, and love, and of a sound mind". 2 Timothy 1:7.

We live in an a dangerous world today when fears possess the souls of many. Julius Caesar, to whom the shouts of thousands of the enemy were but sweet music, was mortally afraid of the sound of thunder, and always wanted to get underground to escape the dreadful noise. Marshal Saxe, who loved to look upon the ranks of opposing armies, fled and screamed in terror at the sight of a cat. Other are

afraid to cross a certain bridge. The number thirteen is considered by some an unlucky number. These are superstitious fears, with no foundation.

There is another fear which springs from one's conscience. The fear of meeting God and the future. As sinners we have every reason for this fear. But to the redeemed it means deliverance from death, bondage and penury. The Lord says—"But now thus saith the Lord that created thee, . . . Fear not, for I have redeemed thee" . . . (Isaiah 43:1) Why not come to Christ and be redeemed? Are you happy without Him?

"Exciting As Mantle" Is Description Of Baseball Prospect George Johnson

A Ganado, Texas subscriber sent us a clipping from the Houston Post's sports column "Post Time" by Clark Nealon in which George Johnson played the star role. In part, the article read:

"The story of George (Tarzan) Johnson of Sonora has been pretty exciting to a lot of aficionados already, but take it from the Milwaukee Braves scout who signed him last week, here is a young man who can be as exciting in baseball as Mickey Mantle of the New York Yankees.

"Granted this is a time of year when baseball men indulge in dreams in advance of reality on green grass, and that understandably a scout is always high on the future of a young phenom he has signed, the comparison of Johnson with Mantle becomes interesting.

"This young man is faster than Mantle right now, has a more accurate arm and has just as much power with the bat as Mickey did at age 19," Halstead reports. "I say that after watching him hit against men pitchers, not kid pitching."

"But now the outfielder-pitcher-centerfielder by preference and by most promising talent—is committed to baseball will go to spring training with the Wichita club of the American Association, the Braves AAA farm.

"He didn't get a princely bonus, but he was well taken care of for his signature. He got \$7,200 a year for three years, with a proviso insisted upon by his dad that \$800 a month for 36 months be deposited in the Sonora bank earmarked for George's education. It all adds up to \$21,600, \$10,800 of which goes to education.

"I've followed this boy since he was 14 years old," added Halstead, "and he was playing against men at that age. So many times you hear about these kids with power against young pitchers but I had a pitcher with four years of professional experience break off good curves to Johnson, and he hit them with power just like he did the fast ball."

"Billy Southworth and Paul Waner have seen him, too, and they recommended his signing."

"I think in three years he can be Milwaukee's center-fielder; in fact, Johnson and another boy I signed, Larry Click of SMU, can team with Hank Aaron to be Milwaukee's outfield in three years."

"No, I can't say that Johnson is the best prospect I ever signed," Halstead went on, "although he and Click rate right behind Walter Peterson."

"Peterson was the native of Round Rock who played 4 games in Florida as Milwaukee's center fielder. But Peterson stepped in a hole trying for a line drive, tore up his knee and never fully recovered.

"In any event, it will be in-

Jimmie Martin was at home last weekend visiting his parents, Mr. and Mrs. Louie Martin. Jimmie is a student at Texas Tech, Lubbock.

RALPH COPELAND CAST IN COLLEGE PLAY

Ralph Copeland of Sonora is a member of the cast of "Bartholomew Fair" which is being produced at the Hill Theatre at Kenyon College, Gambier, Ohio.

Ralph, the son of Mr. and Mrs. Gay Copeland, has the role of "Puppy," a wrestler, in the play.

MAYER TRUST SELLS COWS TO ANGELO ANGUS MAN

The Sol and Ernestine Mayer Trust of Sonora recently sold eight purebred Aberdeen-Angus cows to Joe R. Lemley of San Angelo.

LT. SAVELL ATTENDING FLORIDA RADAR SCHOOL

Second Lieutenant Billy B. Savell is attending the eight-week radar course of the USAF Aircraft Controllers Schools at Tyndall Air Force Base near Panama City, Florida.

Upon being graduated from the school in April, Lt. Savell will be assigned to an Air Defense unit somewhere in the United States or overseas.

IN THE YEAR OF

November 28, 1891

NOTICE TO SHEEPMEN—Whereas, it has come to our knowledge that the sheepmen of Crockett County, have organized and passed resolutions and entered into an agreement to give no drifter water, and;

Whereas, such an agreement tends to throw the majority of such drifters into Sutton County, and;

Whereas, this would work a great hardship upon Sutton County sheepmen,

Therefore, we the undersigned sheepmen of Sutton County, ask that all persons interested in the protection of our range and stock interests, meet in the town of Sonora, Saturday, November 28, 1891, to consider and adopt the best means for our mutual protection.

Signed: A. W. Pride, G. S. Allison, O. Clark, C. F. Adams, John Allison, T. B. Birtong, O. T. Word, C. T. Covington, T. T. Covington, T. T. Thomasen and Bros., Guest Bros., G. P. Hill, R. J. Bean, W. O. Edwards, R. H. Wyatt, Wm. Schupbach, John Rogers, D. R. Holland, Geo. H. McDonald, and several others.

interesting to see how far Tarzan goes down the trail blazed by Mickey Mantle, as well as to watch Click's progress toward Milwaukee.

"The grass gets green pretty quick."

LIONS ROAR

Sonora Lions heard a program of marimba music presented by Dr. C. W. Livingston at their regular Tuesday luncheon meeting at the Methodist Church this week.

J. Wray Campbell, secretary of the U. S. 290 Association, announced that the organization has voted to renew signs and to replenish and distribute trip maps.

Hillman Brown asked Lions to list the things they are most proud of in Sonora.

Ralph P. Mayer announced a meeting of Little League supporters and workers to be held next week.

Guests present were Ifran Guney and Necmi Ertugrul of Turkey, Duncan Frame of Abilene, and A. C. Smith and Ed Marek of Sonora.
