

Texas Mineral Development Stimulates Geological Interest Throughout State

AUSTIN, Jan. 25—Mineral development in Texas in recent years, particularly the spectacular richness of Texas oil fields, has stimulated a keen and widespread interest in geological phenomena existing in this state, not only among scientists and industrialists, but among the laity as well. Relatively little information is available, however, on Texas geology which is sufficiently general and sufficiently non-technical to be of value to the average layman.

It is with the need of the average person in view that the University of Texas bureau of economic geology has been directing a portion of its efforts in recent months. In line with this policy, C. L. Baker, geologist for the bureau has prepared a brief analysis of the study of geology, and particularly of the fossil remains. He discusses the difference between "petrified" and other fossils, and outlines the significance of fossil remains in determining the age of certain geological formations in the earth. He relates the essential factors in the collection of fossils, and discusses briefly the fossils found in the Bureau of economic geology museum.

Applied Science
"Geology is an applied science, utilizing in the investigation of all materials making up the most solid constituents of the earth, the results and principles of the physical sciences, chemistry, physics and astronomy and of the biological sciences, zoology and botany," Mr. Baker explained. "The order and succession in the rocks are determined for all so-called sedimentary rocks through the use of fossils, which are the remains of plants and animals which lived in former times and are entombed in various rocks of sedimentary origin."

"The oldest rocks we know of do not contain fossils and some of the younger rocks do not contain them, at least not in sufficient quantities to enable geologists to use fossils as tools or as measuring sticks of relative time. Then there are rocks which contain fossils, but which are recognized either as being older than those which contain fossils or else their ages and position are determined as near as can be by the relationships which can be ascertained between them and the rocks which do contain fossils sufficient to determine age and relative position."

"Some sedimentary rocks do not contain fossils either because conditions for life were unfavorable or else the fossil remains were destroyed during transportation of the ingredients forming the rock or during subsequent processes which have destroyed the fossils. In par-

ticular many rocks deposited in land areas were formed in deserts or in salt and alkaline lakes or transported so far by streams, glaciers, or wind that the fossil remains were destroyed by attrition or are deposited so slowly that the fossil remains were destroyed by breaking to pieces by disintegration or dissolved away or decomposed by chemical action.

Sea Fossil Deposits
"On the other hand many land deposits contain shells, plants or bones which enable their ages to be determined. The deposits which were formed in the sea are generally the richest in fossils, especially of marine invertebrates, although vertebrate and plant fossils are not lacking in marine deposits."

"The harder parts of plants and animals are those most frequently preserved as fossils. Shells and skeletal parts of animals are composed of hard natural substances, resistant to decay and wear. Under certain very favorable conditions even soft fleshy parts of animals may be preserved in silts and muds; even the soft bodies of jelly-fish have sometimes been preserved as fossils. Fossil mammals are also found occasionally, even in rare instances the skins of great dinosaurs have been found. Mummies of animals which lived not long ago, geologically speaking have been found in caves in dry countries like Utah, New Mexico, and Patagonia."

"In general, however, the fossils are of hard and less destructible parts of animals and plants, originally buried under rapid accumulation of sediments which has protected them from bacterial decay. Destroyed them from bacterial decay, from wastage by the action of gases such as oxygen, carbon dioxide and hydrogen sulphide, from carbohydryl and dissolving mineralized waters, and from being eaten by scavengers. Most animals and plants with entirely soft bodies have left no traces of the existence. Delicate leaves of plants are often preserved as thin films, the residues of the carbonaceous or carbonaceous material which they contained. Woody plant tissues such as trunks, branches, twigs and roots are common, some having changed into siliceous substances."

Most Petrified
"Most fossils found are 'petrified,' that is their original substances have been replaced by mineral substances more common in the rocks enclosing them. Very frequently even the minute original structure is copied by the replacing mineral substance. The most common replacing substances are calcium car-

THIS CURIOUS WORLD

THE EVERGREEN TREE, although a cheerful object in winter, is a dull-looking specimen, when compared with that of the summer-time. The chlorophyll granules are withdrawn from the leaf surfaces, leaving a dull reddish brown color.

bonate silica and various compounds of iron. In other cases, all the original substance has been dissolved entirely, leaving only a mold of the original shape, in an open space in the rock. More rarely, in very fine mud or silts the original shell being filled with all its delicate shades of color.

"Fossils are very useful in determining the structure of the rocks. Originally sedimentary rocks were deposited in flat or nearly flat layers. Often, however, these layers, because of earth movements, have been tilted up to various angles, or thrown into folds or broken and displaced by faulting. Sometimes the layers are now vertical or even overturned, in which cases their true order can be determined from the fossils they contain. Displacement along fractures or faults may vary from a fraction of an inch up to many thousands of feet or miles. The amount of the break or fault can be determined by the fossils in the rocks on the two sides of the fault. The accurate determination of the rock structure if of the utmost importance in mining for all minerals and in the search for drilling for water, oil and gas. Most often, when they know it is one of the greatest factors leading to financial suc-

Birds Chased Away With Roman Candles

PHILADELPHIA, Jan. 25 — The fireworks display recently staged for the purpose of removing the thousands of starlings from around the library here, seems to have succeeded. Last month the library staff gathered around the building and set off a barrage of Roman candles. Much to the discomfort of the birds, today the birds look askance at the inviting eaves of the building and then fly on to other places where they are treated more cordially. Their main location of habitation is now the Academy of Music. Starlings are not averse to noise, they love it — but the Roman candle stunt was too much. They

SISTER MARY'S RECIPES

BY MARY E. DAGUE

NEA Service Staff Writer

THE way a home-maker cooks rice is one of my tests of whether or not she knows her job. That sticky, shapeless mess that some women bring to their tables is my pet abomination. It's completely unnecessary, too.

The mistakes begin with the washing or lack of it. Coated rice should be rubbed between the palms of the hands and washed through many waters. Finally rinse well under running water when the last washing water is clear.

Unpolished and uncoated rice can be washed by putting the grains in a strainer and holding under running water.

A fine way to cook rice is by the Chinese method. Thoroughly washed rice is put into a large round-bottomed sauce pan with three times as much cold water as there is rice. One teaspoon salt is added for each cup of rice. The pan is closely covered and the cover is not lifted during the entire cooking period. Put sauce pan over a hot fire and bring to a "galloping" boiling point. This will take about ten minutes.

Then Boil Gently
Reduce heat and boil gently ten minutes. Remove from direct heat and keep in a warm place for ten minutes. By then the water should be absorbed and the rice tender and flaky. Remove cover and serve.

Another good way to cook rice is by the double-boiler method. This takes about fifty minutes but requires no watching. When cooked in the taller milk can be used in place of water. Rice may also be successfully cooked in a steamer, which takes about 45 minutes. You can boil rice in a large kettle of boiling water, too. Add one cup well washed rice to three quarts rapidly boiling water to which 1 tablespoon salt has been

Tomorrow's Menu

BREAKFAST: Stewed prunes, cereal, cream, toasted codfish, corn bread, milk, coffee.

LUNCHEON: Oysters with rice, celery, green pepper and Chinese cabbage, canned red raspberries with cocoanut cup cakes, milk, tea.

DINNER: Baked bluefish, potatoes au gratin, stewed tomatoes, banana and peanut salad, lemon sponge pie, milk, coffee.

added. Stir with a fork, as a spoon tends to mash the kernels. Drain thoroughly.

When the grains are tender remove from fire and drain through a colander or coarse sieve. Hold the cooked rice over the sink and pour several quarts of boiling water through it to separate the kernels. Dry and reheat in oven.

It's a good idea to avoid potatoes and macaroni if you're planning to serve a rice dessert; and if substituting rice for potatoes in the main course don't serve a tapioca or cornstarch pudding for dessert.

For lunch serve a crisp vegetable salad and a fruit dessert with the following oyster and rice dish.

Oysters With Rice
One cup rice, 1 pint oysters, 2 tablespoons butter, 2 tablespoons flour, 1 1/2 cups milk, 1/2 teaspoon salt, few grains nutmeg, 1/8 teaspoon white pepper, 1 tablespoon minced parsley, paprika.

Cook rice according to preferred method. Drain and wash oysters. Heat until edges curl. Melt butter in sauce pan, add flour and cook and stir until bubbling. Slowly add milk and oyster liquor, stirring constantly. Add salt and pepper. Sprinkle nutmeg over oysters and add to sauce. Put hot boiled rice in a deep platter and sprinkle with paprika. Pour oysters in the sauce around rice, sprinkle with parsley and serve very hot.

SUN LOVERS VARY STYLE IN BEACH WEAR

COLORFUL MAMMY DEAD

WASHINGTON, Jan. 25 — Mrs. Mary Hill, 103-year-old colored mammy born in slavery 30 years before the Civil War, no longer will ramble through the tobacco fields of Madison County, Va. The aged woman died recently at the home of her son here. Until 30 days before her death she had spent her entire life in the tobacco fields. Mrs. Hill delighted in relating tales of the days before the war.

MIAMI, Fla., Jan. 25 — East is East and West is West, Mr. Kipling, but the twain have met and formed an entente cordial.

The new alliance is the outgrowth of the smartest note in beach wear for the resort season and came about when a member of the winter colony made her appearance at the Roney Plaza Cabana Sun Club in a pajama suit of blue and white English

Increased Divorces Mark Better Times

DETROIT, Jan. 25 — If you sign the nation is well on the way to recovery.

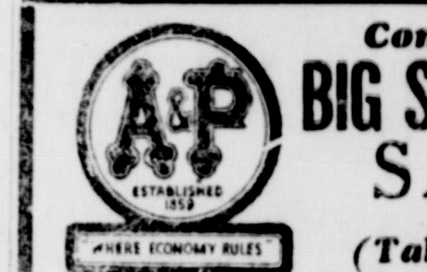

Mounting divorce statistics are an index to better times, says the opinion of Edward J. Egan, Detroit court official, who investigates separation and divorce suits where children are involved. In his 1934 report he declares the divorce rate is plentiful.

Ex-wives in Detroit last year obtained \$965,500, which was \$200,000 more than their spouses contributed in 1933.

Chevigny Says Football Develops "Representative Men"

Texas Coach Guest Speaker at Banquet

Cisco sports fans at the Lobo banquet Thursday night and Jack Chevigny, football coach of the University of Texas Longhorns and former all-American halfback, tell how the nation "real representative men of their community."

"We want the man who gives that extra drive that will overcome anything," Chevigny said. "That is a part of life."

He paid tribute to Coach Dexter Shelley as being one of the greatest halfbacks of the southwest, and said that it is such a man who will be able to give the boys of the nation a start they deserve. For this reason, he pointed out, the coach of the team deserve whatever the citizens and fathers of the state, whether they are on the team or not, can give them in way of encouragement.

Russell To Head Sports Body Here

O. L. Russell was elected chairman of the general committee of the Cisco Athletic association at a meeting held in the Laguna hotel Thursday night, following the Lobo banquet.

Others named on the board are J. E. Coffey, Edward Lee, J. M. and W. J. Leach. This committee will have the power to appoint sub-committees as they are needed, it was announced.

Following the suggestion of the group decided to arrange for the Cisco gym to be used for smaller schools' basketball teams, in order to arouse more interest in Cisco athletics, material that might not otherwise be developed.

THE NEW FANGLES (Mom'n Pop)

FARMERS URGED TO SIGN PEANUT CONTRACTS AS SOON AS POSSIBLE

Farmers wishing to sign their peanut acreage contracts Thursday were urged to do so as soon as possible. The time limit for the signing is Feb. 1.

Robert Tucker and Oscar Schaefer have charge of the contracts for farmers in the Cisco territory. They will be located in the Chamber of Commerce building here during the rest of the period.

"Not very many have filled out their contracts yet," Schaefer said Thursday. "We hope they will come on in and sign them before it is too late."

Only 13 contracts were complete Thursday, he said. This represented 47 acres. Sixteen other contracts, he said, were not yet complete but will be completed soon. This group will represent between 400 and 450 acres. Thirty cards had been given to farmers of the area to be filled out, he said.

Between 30 and 40 hog contracts were delivered to farmers at the Chamber of Commerce Thursday morning, it was announced by Secretary J. E. Spencer. County Agent J. C. Patterson was here to distribute the checks.

Likes Tough Loser

If you aren't a tough loser," Chevigny said, "you don't deserve to win, in football or in life."

Chevigny was introduced by B. A. Butler, toastmaster. Previously, Marion Bruce had presented two vocal solos, accompanied by G. W. Collum. The Collum orchestra, composed of members of the Lobo band, played during the meal, which was at the roof garden of the Laguna hotel. C. C. Duff, vice-principal of the high school, entertained with a free-hand drawing, "The Little Brown Church in the Wildwood."

He was accompanied at the piano by G. W. Collum and a vocal trio composed of Dashed Stephens, J. Hollis Clark, and Wilson Lee Graham. Rev. E. S. James, pastor of the First Baptist church, offered the invocation.

Miss Maxine Francis, dance teacher, and her pupils presented a floor show. In it were Maxine Francis, Geraldine Francis, Helen Rosencrutz, Jackie Belew, Thelma Stokes, Patsy Sparks, Jerry Raley, Marcelle Sheinberg, and Eleanor Harper. Mrs. Troy Powell and Miss Joyce Rainbolt were accompanists.

No Lobo football sweaters were presented at the banquet, due to the fact that grades for the semester had not been checked sufficiently to ascertain how many are eligible to receive them. The sweaters are here, however, and will likely be presented tomorrow, Coach Shelley said.

Flowers in Exhibit Worth Over Million

OMAHA, Neb., Jan. 25.—Total value of exhibits at the annual National Flower show to be held here March 30 to April 7, is expected to be in excess of \$1,000,000, and plant exhibits alone probably will be valued at more than \$100,000.

Fred L. Linsion, Council Bluffs, Ia., chairman of the florist growers' committee, already has received applications from 22 exhibitors in all parts of the country.

His assistant, he said, applications already received constitute only a small part of those that will be received.

Last Minute Entries

"We are sure to get a large percentage of exhibitors who will enter at the last minute, because whether or not they enter depends upon the condition of their plants at the time the show opens," Linsion said.

In an address to heads of local committees working on the show, Dr. B. W. Murphy, St. Joseph, Mo., member of the executive committee, said the show was expected to compare favorably with the 1934 exhibit held at the Century of Progress.

Special Heating

Arrangements already have been made to install special heating apparatus in the Ak-Sar-Ben pavilion where the exhibits will be presented.

Such precautions are necessary to forestall damage to many rare plants which will be exhibited. The entrance committee has been assured of at least two orchid entries while many other rare species, most of them seldom open to public view will be a part of the show.

20 Miles of Vines Planted By C. C. C.

WASHINGTON, Jan. 25.—Civilian Conservation Corps workers in the Acadia National Park, Me., area have planted over 4,000 vines along 20 miles of the Ellsworth-Bar Harbor highway in a joint landscaping and soil preservation program.

The vines are being planted not only to add to the highway's landscape beauty but also to prevent erosion. Many have been placed on banks to steep for ordinary planting.

Vines planted included Virginia creeper, bitter sweet and wild grape, which are regarded as particularly valuable in covering rocky slopes. One vine will cover a 10-foot circle in a few years.

ROME'S GOLF COURSE ONCE WAS CEMETERY

ROME, Jan. 25.—Rome's single golf course, an 18-hole layout, is situated in a suburb known as "Cessati Spiriti" (the ghosts have gone, or the spirits have ended).

The course, which begins near the Gate of St. John and is entirely outside the walls of the city, is on the old site of burial grounds for slaves. Despite the handicap of being constructed in the "Cessati Spiriti," the course has become extremely popular. It is the parent club of the country.

According to legend, spirits and ghosts of slaves once gathered where Romans and visitors now top drives and miss simple putts. The spirits apparently developed the habit of meeting principally among three large trees. Their convales were regular and of great duration.

Finally, so the story goes, the matter of the spirits gathering came to the attention of a farseeing pope. He drove to the district, ordered the trees cut down and blessed the entire area. This action by a holy father apparently provoked the ghosts, who left the "Cessati Spiriti" district never to return.

The golfer who plays the attractive Rome course may find considerable trouble if his second shots are not crisp and true. The course, however, does not offer some of the trying situations found on many links in the British Isles and the United States. Weather hazards in Rome are minimum ones.

Interest in golf has increased greatly during the past three years. There are now over 3,000 members of clubs located in all part of Italy.

The sport has been added to the nation's rapidly expanding athletic program. As yet, however, no player of international rank has been developed. It probably will be several years before teams of amateurs or professionals are developed who could give Britain, the United States or France serious competition.

Asphalt Proves To Be River Problem

WASHINGTON, Jan. 25.—More than nine-tenths of the asphalt used in the United States is manufactured in this country, recent bureau of mines' statistics show.

Formerly the United States was dependent upon the natural pitch lakes in Trinidad and Venezuela for its supply of the material but with recent developments in artificial refining their imports of this product have been reduced to less than 10 per cent of the total used.

Asphalt is used as a binder, preservative and waterproofing material. Seventy-five per cent of the American streets and highways, of a higher grade than untreated macadam, are of asphalt or their binding material is asphalt.

Waterproof mats, impregnated with asphalt, are now being used along the banks of the Mississippi river. United States Army Engineers believe they have "solved the century old problem of rivetting the banks to keep the stream in its channel" by the use of these "asphalt river beds."

Refineries in the United States recover the crude black oils from the fields of Mexico and California and by a distillation process produce a finished asphalt cement in varying degrees of hardness.

By COWAN.

WORK BEGINS ON FERA JOBS THIS MORNING

Work on four FERA projects, including one which was approved some time ago but which has been delayed due to bad weather, began Friday morning. It has been announced by L. I. Hooker, head of the local relief organization.

The Cisco high school campus project, including the filling in of the ground, repair and building of walks, and other improvements, started at the same time as the others. Work on it has been delayed, due to rains when filled a tank where earth for the school ground was to be obtained.

The three new projects, which will amount to more than \$10,000 in money spent, will include two concerned with building and repair of roads and the cleaning up of the Cisco dump grounds.

The total amount to be spent on the projects is \$10,225.70, of which more than half, or \$5,793.60, will be furnished by the FERA. The latter figure represents the amount spent for labor.

The three projects call for a total of 18,720 common labor man hours, divided so that the projects have 20, 40, and 50 respectively working at a time besides the skilled and semi-skilled workers and supervisors.

Have Cooperation

"The relief office wants to take this opportunity to say just how much we appreciate the cooperation which we have received in securing these projects," Hooker said. "Without this effort, we could never have obtained so much."

"Especially have we been helped in this matter by Commissioner Arch Birt, who has gone to bat for us and secured much in the way of road work. The applicant must furnish funds for materials and trucking. Both city and county government have done this."

One of the projects calls for the setting back of a fence, grubbing the roadway and building and setting culverts on the one and a half mile stretch of Reich school-Salt tank road in precinct four. It will require men at 3,200 man hours doing common labor, and four rock masons for 200 hours. This will amount to \$950, to be furnished by FERA. In addition, the county will furnish \$474.60 for trucking material, and supervision, bringing the total cost to \$1,424.60.

Second Road

The other road project calls for the removal of three miles of fence, grubbing and grading the roadway, and building of a 50-foot span bridge on the Eastland-Bedford Chapel road in precincts one and four. Included in this job will be a 600-foot fill, using 1,600 cubic yards of earth. Work will include 40 common laborers at a time doing 5,120 man-hours of work. 18 semi-skilled workers doing 880 man hours a supervisor, and equipment, bringing the FERA cost to \$2,150. In addition, trucking and materials will cost the county \$7,735.50, making a total cost of \$5,985.50.

The third project, which affects Cisco more directly than either of the others, is the cleaning of the city dump ground northeast of the city, including the removal of garbage from the canyon to a hill. Fifty common laborers will be used at a time, with a total of 10,400 man hours. 208 man hours of semi-skilled workers, bringing the FERA cost to \$2,692.60. The city will furnish \$104, which is the amount paid for the supervisor and timekeeper, to make a total cost of \$2,797.60.

TELESCOPE TO SHED LIGHT ON OLD THEORIES

SYRACUSE, N. Y., Jan. 25.—The Cyclopean telescope "eye" now being completed at the Corning Glass Works, may prove or disprove many advanced theories regarding the universe — including Prof. Albert Einstein's latest belief that space is curved and finite, in the opinion of Dr. Harlow Shapley, famous scientist and head of the Harvard Observatory.

Dr. Shapley expressed his opinions here before addressing the Technology Club.

Study Space

"Within six years after the giant telescope has been set up," Dr. Shapley declared, "we may be able to say accurately whether space is curved and finite, or open and boundless."

"And this is only part of what the telescope will do. Astronomers will be able to analyze parts of the universe millions of light years away from us, bringing the nebulae into sharper focus than heretofore possible."

Dr. Shapley pictured verbally the vast depths of the outer universe and told of thousands of new island universes found in the far reaches of space through his survey of the Cosmos.

130,000 New Galaxies

"We have in our survey of the metagalaxy discovered and photographed about 130,000 new galaxies, many of them larger than the earth's immediate universe, he declared."

"Twenty years ago there was no astronomical theory, as we know it. Then the universe was a static thing; today we consider it dynamic."

"Out of our research and the work of mathematicians and physicists has arisen a new picture of the universe in which the laws of cause and effect, once regarded as rigid, no longer have the same meaning."

The doctor told of an exhaustive study he had made of the newly discovered exploding star, Nova Herculis.

"This star," he said, "has increased its brightness more than 200,000 times. The usual exploding star increases only 1,000 times."

ial, and supervision, bringing the total cost to \$1,424.60.

Second Road

The other road project calls for the removal of three miles of fence, grubbing and grading the roadway, and building of a 50-foot span bridge on the Eastland-Bedford Chapel road in precincts one and four. Included in this job will be a 600-foot fill, using 1,600 cubic yards of earth. Work will include 40 common laborers at a time doing 5,120 man-hours of work. 18 semi-skilled workers doing 880 man hours a supervisor, and equipment, bringing the FERA cost to \$2,150. In addition, trucking and materials will cost the county \$7,735.50, making a total cost of \$5,985.50.

The third project, which affects Cisco more directly than either of the others, is the cleaning of the city dump ground northeast of the city, including the removal of garbage from the canyon to a hill. Fifty common laborers will be used at a time, with a total of 10,400 man hours. 208 man hours of semi-skilled workers, bringing the FERA cost to \$2,692.60. The city will furnish \$104, which is the amount paid for the supervisor and timekeeper, to make a total cost of \$2,797.60.

TELESCOPE TO SHED LIGHT ON OLD THEORIES

SYRACUSE, N. Y., Jan. 25.—The Cyclopean telescope "eye" now being completed at the Corning Glass Works, may prove or disprove many advanced theories regarding the universe — including Prof. Albert Einstein's latest belief that space is curved and finite, in the opinion of Dr. Harlow Shapley, famous scientist and head of the Harvard Observatory.

Dr. Shapley expressed his opinions here before addressing the Technology Club.

Study Space

"Within six years after the giant telescope has been set up," Dr. Shapley declared, "we may be able to say accurately whether space is curved and finite, or open and boundless."

"And this is only part of what the telescope will do. Astronomers will be able to analyze parts of the universe millions of light years away from us, bringing the nebulae into sharper focus than heretofore possible."

Dr. Shapley pictured verbally the vast depths of the outer universe and told of thousands of new island universes found in the far reaches of space through his survey of the Cosmos.

130,000 New Galaxies

"We have in our survey of the metagalaxy discovered and photographed about 130,000 new galaxies, many of them larger than the earth's immediate universe, he declared."

"Twenty years ago there was no astronomical theory, as we know it. Then the universe was a static thing; today we consider it dynamic."

"Out of our research and the work of mathematicians and physicists has arisen a new picture of the universe in which the laws of cause and effect, once regarded as rigid, no longer have the same meaning."

The doctor told of an exhaustive study he had made of the newly discovered exploding star, Nova Herculis.

"This star," he said, "has increased its brightness more than 200,000 times. The usual exploding star increases only 1,000 times."

HOARDER CHALLENGES

BELOIT, Wis., Jan. 25.—F. J. McCormick, who claimed a record for a doughnut he kept stowed away in a trunk here for 20 years, was challenged by W. R. Sellick, Paw Paw, Mich., who said he has kept a slice of fruit cake for nearly 51 years.

YOUNG WOMANHOOD

FOR young girls growing into womanhood, for women in middle life going through the "change," or those who suffer from headache, weakening drains, backache, Dr. Pierce's Favorite Prescription is a dependable tonic. Mrs. A. L. Furbush of 112 Roosevelt St., Hot Springs, Ark., said: "Dr. Pierce's Favorite Prescription has been used in our family over a period of years. Both my grandmother and my mother found it an excellent system builder. Before using the Prescription I was so weak, but after taking this tonic I felt just fine."

New size, tablets 50 cts., liquid \$1.00. Large size, tabs. or liquid, \$1.25. All druggists.

Advertisements are a guide to value

Experts can roughly estimate the value of a product by looking at it. More accurately, by handling and examining it. Its appearance, its texture, the "feel" and the balance of it all means something to their trained eyes and fingers.

But no one person can be an expert on steel, brass, wood, leather, food-stuffs, fabrics, and all of the materials that make up a list of personal purchases. And even experts are fooled, sometimes, by concealed flaws and imperfections.

There is a surer index of value than the senses of sight and touch . . . knowledge of the maker's name and for what it stands. Here is the most certain method, except that of actual use, for judging the value of any manufactured goods. Here is the only guarantee against careless workmanship, or the use of shoddy materials.

This is one important reason why it pays to read advertisements and to buy advertised goods. The product that is advertised is worthy of your confidence.

Merchandise Must Be Good or it Could not Be Consistently

Mexico vs. Maguey

When President Lazaro Cardenas of Mexico announced that he would increase the taxes on intoxicating liquors in Mexico so as to decrease their consumption, especially by the Indians, he demonstrated not only his personal courage but deep-seated interest in Mexico's working people. He knows that they can afford neither the price they pay for these intoxicating liquors nor the loss in time, energy and self-control which indulgence brings.

Even the casual tourist in Mexico will appreciate the courage of his action. Field after field of maguey plants, growing in symmetrical rows and carefully cultivated, reveal the extent of this industry. Millions of dollars are invested in the production of this plant from which Mexico's cheapest intoxicating beverages are distilled. Any substantial decrease in the consumption of tequila and pulque will ruin the investments of many business men and will cause them to protest violently against the President's action.

Of this fact the President was aware. With a fair-minded realism, yet with a determination not to recede from his position, he seeks to give the producers of maguey every chance to swing into some other field or to find new uses for this ubiquitous plant. He knows, furthermore, that the industry antedates the colonial period. Undaunted, however, and flying in the face of a potentially dangerous opposition he has set his course.

President Cardenas is not inspired merely by a sentimental love for the Indians of his native land. He understands the economic losses which accumulate from the days of labor which are lost because of drunkenness. But he has a profounder conviction that the habit is morally as well as materially detrimental to the interests of Mexico.

Price Fixing or Profit-Fixing

Hearings before the National Industrial Recovery Board on retaining or abandoning price control clauses in NRA codes reveal a wide division of opinion within the ranks of business as to the desirability of price-fixing even in temperate forms.

Many varieties of price controls are involved, with two or more opinions about each one. There may be outright fixing of minimum price at retail. There may be limitations on production. There are open price-posting systems which, according to method, may be either a form of intimidation or a mere report of past sales. There may be prohibitions against selling below cost—with various ways of calculating cost.

Some speakers, notably George A. Sloan, textile leader, argue forcefully that in certain industries employers have got to be protected against "price demoralization" if they are to go forward with the wages and employment necessary to support recovery. In a few instances this is probably true. Even in these industries, Mr. Sloan admits some mistakes may be made. And the price control devices approved for cases of distress will—unless the consumers' interest in more zealously guarded than it has been—be adopted and intensified by tightly knit industries all too capable of protecting themselves.

The NRA Consumers' Advisory Board discussed this trend illuminatingly in its recent memorandum to the Recovery Board. In practice, it pointed out, it is very difficult to distinguish "destructive price cutting" from any other kind. Any business man who undersells his competitors may be labeled a destructive price cutter. Any device that can be used to check destructive underselling can also be used to destroy legitimate price competition. And while society does not want low prices that are the result of exploitation and misrepresentation, it does want and deserves the fruits of progress and flexibility in trade which make for better standards of living.

The trouble with much of the code-making, as the Consumers Board points out, is that it has gone in not only for stabilizing prices in distressed industries—which is a delicate enough undertaking—but more often for stabilizing profits. Rightfully, profits are the rewards for initiative and risk taking, but business in too many instances has tried to insure profits by removing the spirit of enterprise that would warrant them.

Domestic Peace For Austria Predicted

VIENNA, Jan. 25 — Stormy 1934, with its February revolt and July riots in which Chancellor Engelbert Dollfuss perished, will be followed by a year of domestic peace and progress for Austria, according to the forecast of Ignaz Gartenberg, famous Viennese astrologist.

Many attempts to break the Pact, concluded between Austria, Italy and Hungary in 1934, will fail, so it is written in Gartenberg's stars, while the death of the head of one Central-European country and the resignation of a prominent statesman of the same nation will open the way to the formation of a Danube Confederation, by which Austria and her neighbors will profit economically.

Germany and Japan are seen as potential centers of international conflicts by the astrologist. Under the spell of a technical

invention, which is considered to give her an indisputable military superiority over other nations, Germany may yield to the temptation of appealing again to the luck of war, if Gartenberg has read the stars correctly.

In the Far East, Japan, he claims, will successfully attack Russia and subsequently turn against the Uncle Sam.

Gartenberg's further forecasts predict a number of aviation catastrophes and three attempts to assassinate prominent state leaders. The stars are somewhat vague as to whether they will be successful or not.

Another Earth he expects to behave nicely, no important earthquakes or other natural catastrophes are to be expected.

SCHOOL CLAIMS RECORD

BOSTON, Jan. 25 — The James Russell Lowell school, in Washington, claims a record. Ten sets of twins are enrolled in the school — one set of mixed twins, five sets of boys and four sets of girls.

The Stepfatherland

CONSTITUTION OF POLES HITS AT DEMOCRACY

WARSAW, Jan. 25 — Democracy will be banished from the new Polish constitution which soon will be adopted by the senate, obedient to Marshal Pilsudski.

All basic political rights will be invested in the president. The representative bodies, Sejm and senate, will have no power against the administration.

The president will have the right to appoint and dismiss the government, convene and dissolve the parliament, declare war and conclude peace, ratify treaties with foreign powers, without having to ask for the consent of parliament.

Names Executive Moreover, he also will appoint the chief of the General Staff, the head of the supreme court and the chief controller. Finally, one-third of the members of the senate will not be elected by the people but appointed by the president.

Theoretically, the new constitution will allow the Sejm to demand the removal of the government or of a cabinet member. The president, however, always will be in a position to override the parliament's decision by dissolving it and prescribing new elections.

The new constitution will give the president strong influence over the choice of his own successor. Six months before the expiration of his seven-year term, the president will have the right to nominate a candidate for his succession.

Council Planned An "electors' council," consisting of the prime minister, the president of the supreme court, the chief of the general staff, the speakers of the Sejm and senate, and 50 representatives of the two chambers of parliament, also will nominate a candidate. If the choice of the "electors' council" coincides with that of the president, their candidate will become president without popular election. If, however, the "electors' council" picks a different candidate, decision will be reached by popular vote.

GIRL SOLDIER BURIED WITH SWEETHEART

WASHINGTON, Jan. 25 — The body of a girl soldier who apparently died at the side of her Union sweetheart has been uncovered on the battlefield of Shiloh by CWA workers.

While excavating old Indian mounds on the banks of the Tennessee River, CWA men accidentally drove their picks into a grave of nine unknown Union soldiers. Only skeletons and uniform buttons remained.

Eight of the Northerners were men. The other was a girl, about 17 or 18-years-old.

Killed by Bullet Buttons of an infantryman's coat rested on the fleshless chest of the girl. The Confederate bullet which killed her was found inside the skeleton.

There was no clue to the identity of the men or the girl. They apparently had been found by Northern burial squads and dumped into an unmarked grave. That one of the nine was a girl evidently was not discovered.

The grave was so far from the centers of fighting that it had been overlooked when Shiloh's National Cemetery was established.

Illinois Regiment It was believed the girl was a native of Illinois, Indiana or Ohio.

SCIENTISTS SEEK DATA ON WAR HISTORY

WASHINGTON, Jan. 25 — National Park Service archeologists have undertaken a comprehensive program designed to revive Revolutionary and Civil War chapters of American history.

After nearly 250 years, archeologists are minutely probing the 1,500 acres of Jamestown Island in an effort to reveal the buried story of North America's earliest English settlements.

In Yorktown, scientists are searching vacant lots for significant clues to the Revolutionary War history. In the New York river, divers have located the half-buried hulks of the British frigates, Charon and Gundalope.

Seek Trench Lines Meanwhile, searchers are seeking to determine the lines of the Civil War system of trenches east and south of Richmond. It is believed that this system will be revealed as the mightiest defensive plan of bulwarks known before the World War.

Washington has been made the base of operations, which are being carried on in Revolutionary and Civil War areas of Virginia and Maryland.

It is expected that the entire area eventually will become an American shrine.

Three Jamestowns Among other things, excavators have discovered that there were apparently three distinct "Jamestown" settlements. The first was Capt. John Smith's settlement of 1607. The second followed the destruction of Smith's settlement after 1622, which in turn was replaced by the third after Bacon's Rebellion in 1675.

Archeologists believe Jamestown was a dismal and unhealthy place to live. Swarms of malaria-spreading mosquitoes abounded in the settlement's salt marshes.

It is believed the work will result in formation of a more picturesque story than history painted of the settler's way of life, his troubles and his triumphs over hunger, Indians and mosquitoes.

Says Flying Fish Don't Really Fly

WASHINGTON, Jan. 25 — There are no flying fishes in China Bay, C. M. Breder, Jr., assistant director of New York's Battery Aquarium, says in disputing a famous passage from Kipling's "Mandalay".

Breder believes the author was indulging in a bit of harmless "nature faking" when he wrote of flying fishes playing where "the dawn comes up like thunder out of China's blue bay".

In addition, Breder said, flying fish do not really fly. They are gliders. Some possess a pair of long, narrow main wings and both lateral and vertical rudders. They are called "monoplanes".

"Biplanes," the naturalist added, have long wings, and a pair of underwings which are staggered far back and seem to function as elevators.

He said the fish takes off from the water in much the same manner as a seaplane. When it leaves the water and goes into flight, how-

ever, it does not flap its wings but rides the air currents like a glider.

BEGIN HERE TODAY

GALE HENDERSON, pretty, 23, works in a silk mill. She and her brother, PHIL, 19, support their invalid father.

STEVIE MEYERS, who also works in the mill, asks Gale to marry him. She promises to give him an answer in a few days.

That night Gale goes skating on the river. The ice breaks and she is rescued by BRIAN WESTMORE, whose father, now dead, built the mill. Brian asks Gale to wait while he gets his car but when he returns she is gone.

When STEVE MEYERS, daughter of ROBERT THATCHER, the general manager of the mill, hears Brian has come home she changes her mind about taking a trip to Havana.

Next day MARY CASSIDY is discharged from the mill. Gale goes to Mary's home that night. The baby has cramp. Gale and a neighbor work to save the child's life.

Meanwhile Vicky and Brian attend a party at the Country Club. NOW GO ON WITH THE STORY CHAPTER VIII

LIGHT from the single bulb fell brightly on the kitchen table, leaving the rest of the room in shadows. Gale Henderson, in her printed cover-all apron, sloshed the warm, soapy water over the plates in the dish pan. Gale was thinking pleasantly of the evening before her. She had a new magazine to read. One Josie had loaned her. Gale had had little time to herself lately. Several nights she'd been at Mary Cassidy's—but the baby was better now. Gale had stopped on the way home from work, had met Mary Cassidy's grateful eyes, lighted now with hope.

No, Mary hadn't heard from the mill, but she was going to do a washing next day. The Nicolettis—some of them—would stay with the baby. A couple of washings a week and maybe some cleaning, if she could get it, would mean money enough for food and to keep them warm.

Gale felt relieved that Mary had work to do. If only she could go back to the mill—but that wasn't likely. They weren't taking any more on. Hadn't been since they'd begun speeding up the machines.

Gale turned from the table and caught a glimpse of her brother in the doorway.

"Phil," she said, "there's something wrong with the iron. Do you suppose you could fix it?"

The boy in the doorway straightened. Taller than Gale, slender and loosely built, the two resembled each other only slightly. Phil Henderson's bright red hair remained an unruly shock in spite of brushings and applications of cold water. His blue eyes were wary, rebellious.

Obviously Phil Henderson was young, but it was not a young voice that answered. "Can't tonight. I'm going out."

"But, Phil—"

He stopped her angrily. "I tell you I haven't got time! I'll do it tomorrow if I get around to it."

A voice from the next room

Did You Ever Stop To Think

By Edson R. Waite
Shawnee, Oklahoma

It is said that a pessimist is one who finds a difficulty in every opportunity, and an optimist is one who finds an opportunity in every difficulty.

The day of drawing new industries to a city that does not present its advantages to the world is past.

I note that the tax collectors get more from the utilities than their stockholders.

Advertising in newspapers is not an experiment. It has been tried and tested ever since the day of the first newspaper. It has been weighed in the balance and not found wanting.

Next to self-respect comes the respect of others.

The Chambers of Commerce of every city are entitled to the cooperation and support of not only every business man, but of other citizens of their community in every walk of life, because everything which is done to aid the growth of the community reflects itself in improved conditions of that community.

This generation seems to be able to do little in advancing the cause of peace, but the youngsters now growing up can do a lot and, the least we can do is to see to it that their feet are planted firmly on the right path.

In writing this, business men should make them so plain that the least educated person can read them.

HOOKS AND SLIDES

RECENT success of intercollegiate basketball in Madison Square Garden, where teams from the west and the south have been packing the sports palace to the rafters in competition against eastern rivals, once again indicates that all lines of sport need more promotional managers.

The cage sport always has been a drain on the surplus piled up by college treasuries by football. Intercollegiate contests have been staged for years, but not under the direction and ballistics that competent promoter is able to give. In other words, the college rivalry always present in grid games was missing in basketball.

A New York newspaperman named Ned Irish is responsible for those 16,500 gates which basketball has been pulling in New York. Ned won his spurs plugging professional football for the last couple of years, and when you realize the success the pro grid outfit has enjoyed recently you get an idea of the genius of the man.

Ned's move to bring the greatest basketball teams of the country east is the forerunner of similar action to be taken in other parts of the country. It illustrates the fact that all college sports must be put on a business basis before they can become paying propositions.

Good Luck, Joliat

SOMETIME before the present hockey season is over, little Andre Joliat, French-Canadian hockey star, will round out his 100th game of hockey.

Babe Phelps, acquired by the Dodgers from the Cubs, might see much action, because Senator Al Lopez is behind the plate for the Dodgers in such large fashions.

But there's Cliff Bolton, the holdout at Washington last year who probably will replace Luke Sewell. Pat O'Dea, who went to the Cubs in the Pat Malone deal with the Cards, who is probably as good as out of the game. Gaby Hartnett, Bill Lewis, picked up from Rochester by the Braves, who is looked upon as the successor of Shanty Hogan in Beantown, and Gilly Campbell, the Coast League now bought by the Cincinnati Reds to spell Ernie Lombardi in the seat.

Kid Catchers Coming Up

YOU'LL probably see a lot of kid catchers doing their stuff before the major league dishes this season.

Babe Phelps, acquired by the Dodgers from the Cubs, might see much action, because Senator Al Lopez is behind the plate for the Dodgers in such large fashions.

But there's Cliff Bolton, the holdout at Washington last year who probably will replace Luke Sewell. Pat O'Dea, who went to the Cubs in the Pat Malone deal with the Cards, who is probably as good as out of the game. Gaby Hartnett, Bill Lewis, picked up from Rochester by the Braves, who is looked upon as the successor of Shanty Hogan in Beantown, and Gilly Campbell, the Coast League now bought by the Cincinnati Reds to spell Ernie Lombardi in the seat.

SILKEN SPINDLES

by Laura Lu Brooker © 1935 NEA SERVICE INC.

Gale, worried, fearful, watched her brother leave. She hoped he would keep his promise.

walked down the narrow sidewalk and turned left. He went on several blocks further before he halted in front of a small square house. Phil knocked at the door and waited.

The door swung open and a woman, albeit asked against the lighted room, asked shrilly, "Who is it?"

"It's me—Phil Henderson. Is Ruby here?"

"Ruby? Yes, I guess so. Come on in."

The woman stepped back and Phil entered the house. It was a living room in which he stood, cheerfully furnished and none too clean. Brightly colored calendars and a large tinted photograph hung on the walls. There were paper flowers in a vase on the table and a Kewpie doll, wearing a pink sash, stood on the radio.

"I'll tell Ruby you're here," the woman said and disappeared.

Phil lit a cigarette, finished it and was crushing out the flame when he heard footsteps on the stairs.

A short girl, wearing a green dress and very high heeled shoes, appeared in the doorway, smiling. Hello, Phil," she said.

"Hello, Ruby. Took your time, didn't you?"

"The girl came forward, smiling. A bit too plump for the current fashion, Ruby Griffith, walked with the assurance of a real beauty. She had a large mouth, vividly rouged, and her rather small eyes held a light, as though there were an excellent joke which she was sharing with no one else.

"Did you get tired of waiting?" she asked.

"I didn't say that—but you sure took your time."

"I was busy," Ruby announced, apparently considering this sufficient explanation.

"Well," Phil said, "shall we get going? It's getting late."

"Now, listen, Phil, don't be mad! You see I had a date with Ed Vogel—I promised him a long time ago and then when you asked me to go to the movies I forgot. But Ed came around today and reminded me, so you see I couldn't get out of it, could I?"

"Where're you going?"

"To the dance at Monterey." The girl's lips lowered. "Ed's not a very good guy, you know," she said slowly, distinctly.

"But see here, Ruby—"

A KNOCK on the door interrupted. The girl said quickly, "Maybe that's Ed now! A moment later she had the door open. "Hello, Ed," Ruby said. "Come on in."

The man who entered was not as tall as Phil Henderson but he was squarely built, broad-shouldered. He wore a gray overcoat and gray hat which he pushed back on his head, revealing sandy-colored hair, carefully slicked down.

"Hello, Ruby," Ed Vogel said, and then, turning to Phil, "Well—see you've got company!"

"I'll be on my way," Phil said, but he hesitated. "Go along, Ruby. I'll be right back."

THE outer door closed on the young man. Phil Henderson

son of Tulsa Federal Judge Facing Trial for Murder of Acquaintance

By DAN ROGERS

United Press Staff Correspondent

TULSA, Okla., Jan. 25. — Phil Kennamer, 19-year-old brilliant but erratic son of Federal Judge Franklin E. Kennamer, will go on trial charged with murdering John Gorrell, J., a member of his set.

The slaying, followed in a few days by the suicide, or murder of Sidney Born, Jr., member of the same group of young scions of oil riches, has turned Tulsa society and struck terror into the homes of the city's leaders.

Bribe Offered
A police investigator was offered \$25,000 bribe to "lay off" certain members of the case. Guards have been hired for children of the slaying. Others left on extended leave.

Kennamer told police he killed Gorrell in self defense after he was with Gorrell over the latter's alleged plan to extort \$20,000 from John F. Gorrell, prominent eye, ear, and throat specialist, who owns considerable property and oil royalty.

Sidney Born, Jr., 19, son of Prof. Sidney Born, director of petroleum research at the University of Tulsa, who drove Kennamer to the fatal rendezvous with Gorrell. Police said fear drove him to suicide on Dec. 9. Kennamer said he was murdered.

The Cast
Phil Millholland Kennamer, 19, who "killed" police he "had to kill" Gorrell. McDermott, reckless, left military school at 15, has worked at a score of jobs, is widely traveled.

John Franklin Gorrell, Jr., 23, amateur pilot, student at Kansas City dental college. The son of Dr. John F. Gorrell, prominent eye, ear, and throat specialist, who owns considerable property and oil royalty.

Sidney Born, Jr., 19, son of Prof. Sidney Born, director of petroleum research at the University of Tulsa, who drove Kennamer to the fatal rendezvous with Gorrell. Police said fear drove him to suicide on Dec. 9. Kennamer said he was murdered.

Two Cousins
Eleanor and Betty Lou Vandever, cousins, about 16 members of wealthy Tulsa families, who have been mentioned as companions of Kennamer.

Jack Edder, heir to an oil fortune and member of the Hy Hat Club with Kennamer and Born. He took a knife from Kennamer a few hours before Gorrell was shot.

Preston Cochran, 19, son of W. S. Cochran, attorney for Sinclair-Prairie Pipeline Co. who said he was consulted about the extortion plot. He was an intimate of Kennamer and his companion on some of his travels.

Student Nurse
Eunice Word, 21, student nurse at St. John's Hospital, who with Maxine Williams "double-dated" Gorrell and Bard Thanksgiving night, leaving Gorrell a few minutes before he was killed.

Robert Thomas, son of a real estate man, who said Kennamer told him of killing Gorrell in a conversation in the Sunset Cafe 45 minutes after the shooting.

Jess Harris, 21, a classmate of Gorrell at Kansas City, who loaned Gorrell the death gun and heard Gorrell say he feared that Kennamer might kill him.

Night Rendezvous
Wade Thomas, 39, owner of the Idle Hour Inn night club, said to be a rendezvous for Kennamer and his friends.

Floyd Huff, Kansas City aviator who drove Kennamer from Kansas City to Tulsa, No. 22, who said Kennamer told him he would kill Gorrell and showed him the extortion note.

Doris Rogers, 20, fiancée of Gorrell, whom Kennamer and Huff visited in Pittsburgh, Kans., en route to Tulsa.

Ted Bath, 22, who said Kennamer and Gorrell told him of illegal ventures, including the Wilcox plot, which he refused to join.

Paul Hansen, U. S. Department of Justice agent who investigated the extortion plot. His findings have not been divulged.

Sam Shumate, serving a burglary term in Springfield, Mo., said wealthy Tulsa youths engaged in narcotics parties.

An Expert
Dr. Felix Adams, superintendent of the Northern Oklahoma Hospital for Insane, asked by the state to "observe" Kennamer, in regard to defense insanity suggestion.

J. Berry King, state attorney-general, retained as special prosecutor. Has been intimate friend of prominent persons on both sides of case.

Holly Anderson, Tulsa county attorney, heading local prosecution staff. Tom Wallace and W. F. Gilmer, assistants.

A Flint Moss, Kennamer's chief counsel, and who intimated an insanity defense would be made. His legal associates on the defense: H. R. Young, Judge C. B. Stuart and Charles Coakley.

Henry Batson Maddux, police department criminologist, who worked on the Ruth Judd trunk murder case at Phoenix, Ariz. Has been in charge of city police investigation.

Received training at Northwestern University scientific crime laboratory.

Peanuts Are Jinx To Racing Driver
WASHINGTON, Jan. 25. — "Wild Bill" Cummings national automobile racing champion, believes peanuts are his jinx.

No less an authority than Mrs. Cummings, the racer's wife, is responsible for this peanuts.

Mrs. Cummings said "Wild Bill" won't let her eat peanuts. She said that every time someone has eaten them around him before a race he has been jinxed.

Cummings is so superstitious about the nuts, his wife added, that she doesn't dare eat them even when she is watching him from the stands.

She revealed also that Bill isn't fond of meeting cross-eyed people before a race. And once when he lost his daughter's baby shoes he threatened to quit racing.

Mrs. Cummings said her husband drove well in traffic. She said "he doesn't drive fast, but he weaves around everything."

Cummings, who set a new record while winning the Indianapolis Speedway 500-mile race last year, also likes airplanes and motorcycles.

research at the University of Tulsa, who drove Kennamer to the fatal rendezvous with Gorrell. Police said fear drove him to suicide on Dec. 9. Kennamer said he was murdered.

Stern Judge
Federal Judge Franklin Elmore Kennamer of the northern district of Oklahoma, father of Phil, a native of Alabama. Noted for sternness on the bench.

Virginia Frances Wilcox, 19, daughter of Homer Francis Wilcox, who made his fortune from the oil sand bearing his name.

Homer Francis Wilcox, Jr., 17, Virginia's brother and intimate of Kennamer and who paid a fine for shooting out street lights at the secluded scene of Gorrell's death before the slaying.

Wesley Cunningham, 18, who found Gorrell's body.

Bill Paden, 17, companion of Wilcox during the shooting of lights and who also paid a fine.

Two Cousins
Eleanor and Betty Lou Vandever, cousins, about 16 members of wealthy Tulsa families, who have been mentioned as companions of Kennamer.

Jack Edder, heir to an oil fortune and member of the Hy Hat Club with Kennamer and Born. He took a knife from Kennamer a few hours before Gorrell was shot.

Preston Cochran, 19, son of W. S. Cochran, attorney for Sinclair-Prairie Pipeline Co. who said he was consulted about the extortion plot. He was an intimate of Kennamer and his companion on some of his travels.

Student Nurse
Eunice Word, 21, student nurse at St. John's Hospital, who with Maxine Williams "double-dated" Gorrell and Bard Thanksgiving night, leaving Gorrell a few minutes before he was killed.

Robert Thomas, son of a real estate man, who said Kennamer told him of killing Gorrell in a conversation in the Sunset Cafe 45 minutes after the shooting.

Jess Harris, 21, a classmate of Gorrell at Kansas City, who loaned Gorrell the death gun and heard Gorrell say he feared that Kennamer might kill him.

Night Rendezvous
Wade Thomas, 39, owner of the Idle Hour Inn night club, said to be a rendezvous for Kennamer and his friends.

Floyd Huff, Kansas City aviator who drove Kennamer from Kansas City to Tulsa, No. 22, who said Kennamer told him he would kill Gorrell and showed him the extortion note.

Doris Rogers, 20, fiancée of Gorrell, whom Kennamer and Huff visited in Pittsburgh, Kans., en route to Tulsa.

Ted Bath, 22, who said Kennamer and Gorrell told him of illegal ventures, including the Wilcox plot, which he refused to join.

Paul Hansen, U. S. Department of Justice agent who investigated the extortion plot. His findings have not been divulged.

Sam Shumate, serving a burglary term in Springfield, Mo., said wealthy Tulsa youths engaged in narcotics parties.

An Expert
Dr. Felix Adams, superintendent of the Northern Oklahoma Hospital for Insane, asked by the state to "observe" Kennamer, in regard to defense insanity suggestion.

J. Berry King, state attorney-general, retained as special prosecutor. Has been intimate friend of prominent persons on both sides of case.

Holly Anderson, Tulsa county attorney, heading local prosecution staff. Tom Wallace and W. F. Gilmer, assistants.

A Flint Moss, Kennamer's chief counsel, and who intimated an insanity defense would be made. His legal associates on the defense: H. R. Young, Judge C. B. Stuart and Charles Coakley.

Henry Batson Maddux, police department criminologist, who worked on the Ruth Judd trunk murder case at Phoenix, Ariz. Has been in charge of city police investigation.

Received training at Northwestern University scientific crime laboratory.

Peanuts Are Jinx To Racing Driver
WASHINGTON, Jan. 25. — "Wild Bill" Cummings national automobile racing champion, believes peanuts are his jinx.

No less an authority than Mrs. Cummings, the racer's wife, is responsible for this peanuts.

Mrs. Cummings said "Wild Bill" won't let her eat peanuts. She said that every time someone has eaten them around him before a race he has been jinxed.

Cummings is so superstitious about the nuts, his wife added, that she doesn't dare eat them even when she is watching him from the stands.

She revealed also that Bill isn't fond of meeting cross-eyed people before a race. And once when he lost his daughter's baby shoes he threatened to quit racing.

Mrs. Cummings said her husband drove well in traffic. She said "he doesn't drive fast, but he weaves around everything."

Cummings, who set a new record while winning the Indianapolis Speedway 500-mile race last year, also likes airplanes and motorcycles.

PURIST HELIUM IN COLORADO
PUEBLO, Colo., Jan. 25. — Purist helium in the world is found in Los Animas county in this state. Helium a rare gas which is non-combustible and very buoyant, is used in dirigibles. It is found only in the United States and, until recently, was produced only in Texas. Its export, because of its military importance, outside the country is forbidden.

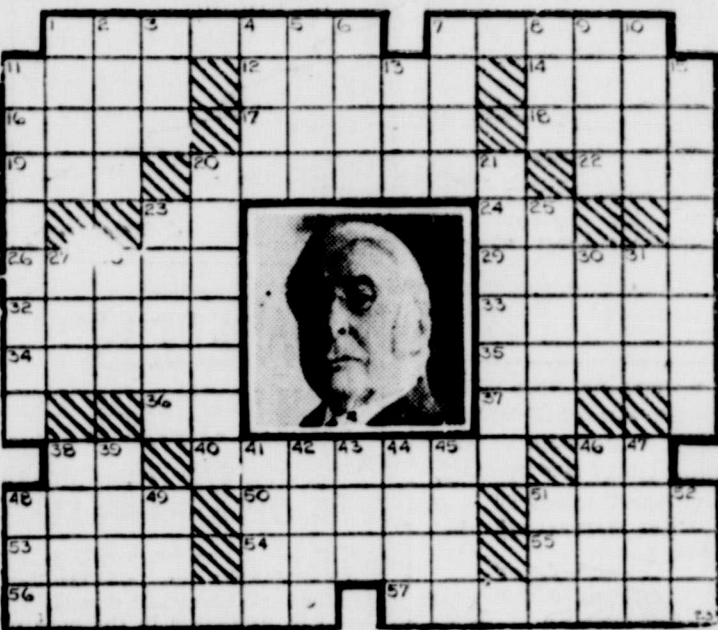

GOLDSBORO, N. C., Jan. 25. — A pine tree cut down near here measured 44 inches in diameter. Two men worked three hours in felling it. A piece of its bark was over three inches thick.

Mae West's Bed and W. C. Fields' Nose Favorite Questions of Studio Visitors

HOLYWOOD, Jan. 25.

Junketing and inquisitive Hollywood visitors, who manage somehow to get inside locked studio gates, let the guides of filmland in on a lot of secrets.

After listening a while, the guides wonder why they ask so many questions since they seem to have more information about the stars than the stars have about themselves.

But the guides answer all the questions, although they're a bit weary of the subject of Mae West's bed.

No, it isn't painted a bright gold, nor is it shaped like a swan in a rose festival parade. It's a good French bed, Louis XV style.

That free-wheeling guest of Mae's is another item of popular interest, and some visitors even grow disappointed when they see her walk in approved feminine style from one place on the lot to another.

On the topic of Marlene Dietrich and her trousers (bi-furcated garb is her name for the fancy pants), almost any visitor is glad to know that she doesn't wear them for evening dress or indeed, doesn't wear them at all any more.

"Is it true that Johnny Weissmuller can't take it when Lupe Valez throws a flatiron at him?" the high-school daughters of visiting parents want to know.

Also, "has he got hair on his chest and was that really his cry in Tarzan or did they get some animal to do it?"

One visitor on the "Mississippi" set at Paramount the other day wanted to ask W. C. Fields if that nose was his or made out of putty. He was told that Fields richly resents the question with an old and indignant answer to wit: "Sir, I deplore your lack of learning. I achieved this proud protuberance after considerable expense and application of proper ingredients."

No matter how important they are as world-wide entertainers, most of the stars are addressed by their first names by associates. They are Mae and Bing and Gary and Sylvia. All except Miss Dietrich and Elissa Landi.

State May Combine Welfare Agencies
SALEM, Ore., Jan. 25. — All of Oregon's welfare commissions may be combined under a new state department of public welfare if a majority report of an interim committee is approved by the 1935 legislature.

The new department would supplant the state relief committee, child welfare commission, state parole board and state probation commission. The department would have jurisdiction over all welfare functions, administration of all state institutions, appointments of all institutional superintendents, administration of federal unemployment relief, mother's pensions, old-

About Cisco Today

CIRCLES TWO AND FOUR OF WOMEN'S COUNCIL MEET.
Circle two and four of the Women's Council of the First Christian church joined together in devotion in the home of Mrs. W. J. Armstrong Tuesday afternoon, with Mrs. Armstrong and Mrs. W. F. Bruce hostesses to circle two and Miss Journe Armstrong hostess to circle four.

The program was opened with songs "More About Jesus" and "Sweet Hour of Prayer." The lesson was taught by Mrs. N. Coffey following the scripture reading. Mrs. Rex Moore closed the program with prayer.

The two circle parted and Mrs. Dyer chairman of circle two presided during that business meeting while Mrs. Louise Shockey, president of circle four presided during that meeting.

Those present were: Circle two, Mesdames Joe Burnham, H. L. Dyer, H. R. Garrett, Chas. George, L. C. Moore, Rex Moore, A. S. Nabors, C. B. Powell, Oran Shackelford, new member Mrs. Haun and two visitors, Mrs. Smith and Bob Winston. Circle four — Mesdames Louise Shockey, Troy Powell, N. Coffey, David Tyndall, Misses Del Francis, Miller, Ethel Mae Wilson, and the hostess.

Personals

Mrs. E. M. Corah of Plainview is the guest of Mrs. Wade Hendricks.

Mrs. Graham Connally left today for East Texas where she will spend the week-end.

Mr. and Mrs. Guy Dalbey have returned from a trip to Austin.

Miss Doris Powell spent today visiting in Abilene.

Lee Kuntz and family of Kansas City are the guests of Mr. and Mrs. C. C. Newton of Humboldt.

Kuntz is the sister of Mr. Newton.

Delmar Borman arrived Thursday to spend "between-terms" holidays with his parents, Mr. and Mrs. F. J. Borman.

Dick Bryant of West Texas is visiting friends in Cisco.

Miss Marian Ghorndley who has been seriously ill is reported to be improving today.

Howard Fuller is transacting business in Dallas.

Mrs. J. B. Cole is spending this week visiting in Breckenridge.

C. H. Parish is a business visitor in Abilene today.

Giant Cacti Get Special Hothouse

SAN MARINO, Calif., Jan. 25 —

Two giant cacti from Arizona, received for the 15-acre cactus garden in the grounds of the Henry F. Huntington Library and Art Gallery are the subject of an unique experiment in building greenhouses.

The greenhouses are built around the plant instead of placing the plant in the greenhouse.

The species sometimes attain a height of 60 feet, and in order to establish the plants during the rainy season, glass houses have been built around each to keep out excessive moisture which tends to rot the base of the plant.

William Herrich, superintendent of the Huntington Botanical Gardens, hopes to acclimatize the strange cacti, which are seldom seen outside of a few groves in Arizona. The cactus garden contains 25,000 specimen plants.

CANT KICK ABOUT COWS.

LONDON, O. Jan. 25 — Londoners sleeping undisturbed by night bovine noises now. A city council ordinance has been amended to forbid the keeping of bawling cows and calves under three months old in sales barns overnight.

Jungle Lures "T. R.'s" Cousin

Inspired by the wanderlust that she says is a family heritage, Lella Roosevelt (above), of New York, who last spring completed a trip around the world in a truck, now is preparing to emulate her illustrious cousin, the late Theodore Roosevelt, and set out to conquer African jungles and the Sahara desert.

CALENDAR

Friday
The Cisco Choral club will meet Friday evening at 7:15 in the First Baptist church.

RANDOLPH NOTES

Little Miss Broxton, she came back to school.

But the light in the room was so dim.

She thought she had joked.

And was sorely provoked.

It was Job Bob, and she'd stuck out her tongue at him.

Ruby Russell and Miss Hiatt have been taking pictures of each other.

Ruby sent her picture to someone, but it is unknown just what Miss Hiatt did with hers.

Texas Aggie (A. G. Holmes) and Ego (Francis) Barnes went duck hunting yesterday and thought they had killed a duck. They came back to the dormitory wagging a decoy and asked Mrs. Davis to cook it for them.

Ferry Thornton found the pendulum to the library clock behind a picture. Just how he knew where to look is a mystery.

The Demosthenian club held their weekly debate last night in the parlor of Bevin Hall. The question for debate was: Resolved: That the book of Matthew contains more essential facts for salvation than the book of Luke. The affirmative debaters were Ivan Little and Elton Dennis. On the negative side were Elmer Lee Burgess and Powell Sharp. The negative won.

The reason Charles Elmore has been absent the last few days is because he is working on his Doctor of Plumber's degree.

Fern Warren has come back to school. She is very cheerful, even though Photo and the train did leave their mark on her.

Francis (Ego) Barnes and Ritchie (Radical) Davis can quarrel ardently and continuously over any subject, regardless of how trivial it is. Their latest quarrel concerned ten-cents hats and cowboy boots. Francis favored the hat and Ritchie favored the boots.

Three Centers Captains

The three centers who were elected captains are: Corner Jones, Ohio State; Reed Kelso, Indiana; and Ed Skoronski, Purdue. During November Jones was ranked as the equal of any center in the center.

Kelso divided his time between center and guard last year. Coach Bo McMillin, Indiana, ranks Kelso as one of the most promising field goal kickers he ever coached. He expects Kelso to break up many a game next fall with his place-kicking.

Skoronski, who showed signs of developing into a star as a sophomore was hampered by injuries last year. Coach Noble Kizer, who is adept at developing centers, believes Skoronski will come back next season, and make one of the best pivot men in the conference.

Center Is Co-Captain

The other center who will figure as a captain is Al Lind, North-western, who will share that honor with Wally Cruise, halfback, Northwestern is the only Big Ten school which will have co-captains, and it is the first time in the history of the Evanston institution that two men have been named for that honor.

Two quarterbacks will captain their teams. They are Glen Seidel, Minnesota's chess-minded signal caller, and Bill Renner, Michigan's great passer who was out of action all last season with injuries. Renner played an important part in Michigan's 1933 championship team.

Jay Berwanger, Chicago's All-American halfback, will lead the Maroons. Berwanger is expected to be one of the greatest ball-carriers and defensive backs in the country again next year. Coach Clark Shaughnessy rates him the equal of any back in the country last season.

Fullback Is Leader

Dick Crayne, Iowa's sterling fullback, was named captain of his team. Crayne was a star last season with a losing team and Coach Ossie Solem expects to build his attack around him in 1935.

The other two captains are linemen — Chuck Galbreath, Illinois' scrapping tackle, and Ray Davis, Wisconsin guard. Galbreath was an all-conference tackle last season, and the leader of the little Illinois line which wasn't outplayed all season.

Daily News and American and Roundup want ads are a good investment. —Phone 80.

OUT OUR WAY

BORN THIRTY YEARS TOO SOON

Freckles and His Friends.

NATIONS PLAN SERVICES FOR EMANCIPATOR

SPRINGFIELD, Ill., Jan. 25 —

Notables of three foreign countries will join with the descendants of fellow townsmen of Abraham Lincoln in paying tribute to the Civil war president on the 126th anniversary of his birth here February 12.

The three nations to be represented are Japan, Italy and Canada. They will speak on Lincoln as he is viewed by their nationalities at services to be held on the eve of the Emancipator's birthday and attend other services the following day.

Foreign Notables

Two of the foreign notables who are to speak are ambassadors Hiroshi Saito of Japan, and Signor Augusto Rosso of Italy. Rev. John Henry Cody, president of the University of Toronto, will be the third guest speaker.

Proceeding the program the visiting dignitaries will visit the Lincoln tomb in Oak Ridge Cemetery, Thetomb, one of the historical spots of the nation, annually attracts thousands of visitors. It recently was reconstructed and remodeled along modern lines.

The services at which Saito, Rosso and Cody will speak will be held under the auspices of the Mid-Day Club, a civic organization. On the day of the anniversary another service will be held by the Abraham

Lincoln association.

Courthouse Services
The latter's services will be held in the Sangamon county courthouse formerly the Illinois state house, in the halls of which Lincoln delivered orations as a young member of the state house of representatives.

Special services also will be held at the tomb where Lincoln's body is enshrined in a reinforced steel-concrete block, ten feet below the floor of the tomb.

Other parts of Central Illinois famed for the presence of Lincoln or members of the Lincoln family are expected to commemorate the day. There also will be ceremonies at New Salem where the village as it existed in the day Lincoln clerked there and wood Ann Rutledge has been restored and at the City of Lincoln.

MILLION DOLLAR DEAL CLOSED

COURAY, Colo., Jan. 25 — A real million dollar mining deal — the first in Colorado for some years, was closed when a syndicate of Denver and Portland, Ore., men made final payment and took title to the Telluride Black Bear Mine, near Telluride. The mine formerly was owned and operated by Harry Payne Whitney, the millionaire New York sportsman.

PERFECT WEDDED BLISS

PEABODY, Mass., Jan. 25 — The distinction of being an ideally married couple is accorded Mr. and Mrs. William Sheen, 89 and 85, respectively. When they celebrated their 67th wedding anniversary, they announced that they never had a verbal skirmish during their married life.

Wanderers to Play For Dance Saturday

The original Wanderers of Dallas, broadcasting over WFAA daily at 11 o'clock, will play for a dance at Lake Cisco Saturday night, it has been announced by Manager A. F. Hunt.

The Wanderers have played for dances at the lake several times during the past few months and have always brought a large crowd.

Weatherman Aiding Yosemite Valley

YOSEMITE NATIONAL PARK, Cal., Jan. 25 — The weatherman is doing his best to make 1935 an outstanding year in the battle against depression.

Recent storms, which brought total seasonal snowfall to 24 1-2 inches in Yosemite Valley, attracted throngs of winter sports enthusiasts into the valley, foremost of California all-year mountain playgrounds.

Above 7,500 feet, four feet of hard-packed snow beckoned to skiers and tobogganers.

El Portal and other valley checking stations reported 999 auto permits were issued during the holiday period from December 20 to January 1, a gain of eleven per cent over

the number issued during the same period last year.
More than 5,000 visitors flocked to the valley for holiday ice and snowsports. Of this number, more than 2,500 drove to the new fields less than a hour's drive from the valley floor, made accessible by completion of part of the new Glacier Point road.

Early this month, precipitation was 17.21 inches, a figure far above normal and almost six inches above the 1934 mark, had been recorded here.

Houses in Houston Filling Up Rapidly

HOUSTON, Jan. 25 — Housing in this city has become a problem and the supply of vacancies held out less than four months at the present rate at which it is diminishing continues, a survey by C. Burchfield, real estate executive, revealed.

Burchfield said vacancies were disappearing at a much more rapid rate than new houses and apartments were being constructed, and added that Houston faces a housing shortage.

CHECK GOES BEGGING

SALEM, Ore., Jan. 25 — A check for \$1,013.67 gave Oregon's state treasurer and adjutant general a headache. Neither knew what it was for. The money was part of a 32-year-old fund sent to Oregon by the government to pay Oregon veterans of the Spanish-American war. For 15 years, the right to recipients have eluded search, so the adjutant general sent in the check to the treasury.

TEACHERS GET BACK ALL CUT
CONNEAUT, O., Jan. 25 — Conneaut's school board has approved a 19 per cent increase in teachers' salaries, restoring them to the standard prior to depression.

Learn About the "All Electric" Kitchen

This is the "Electrical Age." Take advantage of modern electrical servants.

Let Mrs. Jones Tell You

"I am so proud of my all-electric kitchen—it is so easily kept clean, and I know it will be cool this summer."

There are many other reasons why thousands of West Texas Homes are being equipped "all electrically." Modern electric appliances make housekeeping a pleasure ... and you may be surprised how easily you can equip your kitchen with all these conveniences ... at very small cost.

Call us for information and help in planning your kitchen to save you unnecessary time and work. Make your kitchen completely modern—and it will be interesting to know how you can reduce your operating costs by taking advantage of the reasonable rate schedule provided for an "All Electric Kitchen."

Our Kitchen Planning Service is available without any obligation on your part.

STEP BY STEP YOU CAN BUILD AN AUTOMATIC KITCHEN.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule ... and adds only a small amount to your total bill?

West Texas Utilities Company
