ALL READY FOR THE BIG CELEBRATION

Preparations About Com-
plete for the Biggest
Celebration in Junc-
tion's History

Next Thursday, July 11th is
the day for Junction's big an-
nual celebration. And we rise
to remark that there will be plen-
ty of meat, bread, pickles, coffee
and other necessities amply pro-
vided to constitute a good dinner
for our guests.

A big cold drink and confec-
tionery stand will have every-
thing in this line which you may
desire.

A big dancing pavilion will be
on the grounds, with music fur-
nished by the Menard String
Band, so all who wish may trip
the light fantastic to their heart's
content.

J. D. Braley is constructing a
chute the chute on the banks of
the river, and an aerial tramway
across the river.

Of course there will be plenty
of orators and political speakers
present.

Junction and Mason ball teams
will cross bats at the baseball
grounds west of Junction—and
of course you don't want to miss
that.

There will be a fine stock show,
broncho busting, and tourna-
ment races, very interesting
features.

Work is begun on the con-
struction of the big Airdome
Theatre, on the grounds, to be
used by the U. D. C., and by the
Junction Band. This theatre is
to be 75x75 feet and will have a
stage 20x20 feet. The place will
be well and comfortably seated,
and arranged in every way for
the best comfort and enjoyment
of the people.

In this theatre on the evening
of the 10th "The Llano Valley
Minstrel Company," composed
of members of the Junction Band
and other home talent, will put
on two solid hours of fun, music,
laughter and song, a treat you
will enjoy.

On the evening of the 11th, in
the Airdome, will be presented,
under the auspices of the U. D.
C., the famous historical and
spectacular play, "Texas Under
Six Flags," undoubtedly the
biggest thing of this kind ever
put on in Junction.

All these features form only a
part of the great round of merri-
ment and genuine pleasure which
is being prepared for the enjoy-
ment of Junction and her guests.
And combined withal will be the
old time West Texas cheer and
hospitality, which draws friends
and neighbors closer together,
and gives the strangers welcome
which he will not forget.

Of course you're coming! Ev-
erybody else is; you can't afford
to miss it. There will be people
here from all over West Texas.
It will be a red-letter day in
Junction's history.

Bring your wives, uncles,
cousins, sweet hearts, friends
and—yes, the mothers-in-law,
bring them along too—and let's
all celebrate. Come in Wednes-
day, and stay until—you get
ready to leave. The fun will be-
gin Wednesday afternoon with a
—well you come and see what
you'll miss something if you're
not here at that time. And from
that time on, everything on the
grounds will work overtime to
give everyone that "glad-I-kum"
feeling. We're expecting you.

LET US PROVE IT!!

That we can save money
for you on ANYTHING
in our line. Drygoods,
Groceries, Notions, Gen-
eral Ranch Supplies, we
can furnish to you at THE
BEST Prices for cash.
And OUR GOODS will
stand the Quality test.
Let us prove it to you.

E.M. BROWNING & CO.

Again Cupid Wins

News is received here of the
marriage of Mr. Boyd Jetton and
Miss Dovie Lamb, at the Baptist
Church at Kerrville last Sunday
night.

Several days ago Boyd put on
mischievous grin and disappear-
ed. After several days of anxiety
we received the news that he
was no more numbered among
the wretched sufferers of single-
cussedness. On learning of his
good fortune our crushed hopes
rise again and we can rally forth
with fresh determination—for
truly it doth seem that Cupid
is not so partial as some would
believe.

Boyd is a jolly good fellow and
an enterprising young man,
and he has our congratulations.

The beautiful bride is a most
charming young lady and has a
wide circle of friends here; she
was a teacher in the public school
here the past term.

The couple has the best wishes
of their many friends; may their
path be attended by the sweetest
joys which life can give.

The lovely ranch home of Capt.
and Mrs. G. K. Gordon was the
scene of a most enjoyable lawn
picnic on Thursday, June 27.
Among those fortunate enough
to be present were: Mr. and Mrs.
E. E. Bolt and family; Mr. and
Mrs. Avery Toney and family;
Mr. and Mrs. Griffith and daugh-
ter Miss Lena; Wilfred Whittle;
Misses Muegge, Doris Holekamp,
Stella Whittle, Alice Geneva and
Della Ethridge, Vida Anderson,
and Jennie Henderson.

WHAT OSTEOPATHY IS

(F. A. Piper, D. O.)

The osteopath looks on the human being as a machine, intended by nature to be perfect in action, and being a machine, its correct working depends only on perfect mechanical adjustment. This adjustment and the modus operandi being as complete and intricate as the structure itself, the whole thing looking very simple, but without requiring the most rigorous education and dextrous ability to accomplish it correctly.

In a rough way, this machine of ours consists of a skeleton or bony framework which acts as a solid support and a protection for the more delicate structures and which affords attachments and levers for the muscles or organs of motion. It is not because he believes that disease originates in bones, that Dr. A. T. Still, the founder, named his system "Osteopathy," but because the bones are the framework of the machine and their mal-adjustment, especially those forming the spine, predisposes to disease by pressure on nerves; the nerve trunks from the entire spinal cord to the integument, muscles, bones, ligaments, fascias, vessels, etc., being exposed to such pressure, at their formation of exit from the spinal column and this congestion, providing there is the slightest mal-adjustment of these vertebrae.

The food or fuel for this machine comes through two great systems, the respiratory furnishing the vital oxygen, and the digestive which prepares the more complex chemicals, necessary to our metabolism; assimilating them from the crude foods which we digest.

During the countless centuries of the development of our organism, the digestive system has accustomed itself to select only certain substances as foods; that is, there are certain chemicals which, when assimilated from the digestive tract will be utilized for the building up and repair of the system and for the liberation of the energy, without at the same time in any way acting as a poison to the system.

When a substance ceases to be a true food, it ceases to be of advantage to the organism. If it is merely useless, it is rejected as waste, but if on the other hand it is harmful, we have a reaction and the system shows a "poisoning," the degree depending on the amount and character of the poison.

Needless to say, those things which the system regards as poisons during health cannot be of real use during disease. If it injures a strong organ, it is much more must it affect a weak one. Drugs which are not true foods, can help, only by making symptoms, and this is a very false security.

For instance, morphine, being a poison and not a food, cannot benefit the system in any way. It can temporarily disguise the sensory nerve so that they will no longer telegraph to the brain that the appendix (for example) is badly inflamed; but this has no effect on the diseased appendix. It merely masks symptoms and tells us into a false security until it is too late for actual curative treatment. It is, or through a general or army would cut off all communication with his army, as soon as he had been told to come in. Pain is not a disease, it is only a messenger from a diseased tissue and an effort should not be made to narcotize the path of communication, but to get at the seat of the trouble and cure that.

No drug that alleviates by masking symptoms is of real benefit and when a drug ceases to do this, it will be found to be one of the food, pure and simple, put up in dining-room style and not in pill form.

Controlling not only the coarsest gastro-intestinal digestive system, but the much more delicate and complicated internal chemical processes of the internal glands, as the liver, stomach, pancreas, kidney, etc., as well as the still finer processes of the blood stream and its interchanges of substances, through the capillary walls, to and from the cellular elements, which comprise the various tissues and organs, is that wonderful and infinitely intricate mechanism of the nervous system.

It is this system that tells us we are cold, that we are warm, that we are in contact with some foreign substance, that some one is talking, that our food is palatable, what the character and condition of the object around us are. It keeps our lungs alternately expanding and contracting, it makes our heart beat, it controls the selection and absorption of the ingested food, sends one kind through the lymphatics, and others to the liver through the portal vein, where it again determines the amount to be stored as "liver starch" and the amount to be sent on to the tissues to use for their repair and for the thermostat of energy; it decides how much of the life and parametric secretions shall be turned blood, exactly how much the blood shall absorb of the almost unknown but essential secretions of the suprarenals, the thyroid, the pituitary and other glands, also how much nourishment each one shall receive.

Through the vaso dilators and constrictors, it determines the amount of blood that any organ, sending an increase to the stomach when it is active, to the glands when they are active, to the muscles when they move and the brain when it thinks.

It is this wonderful system that controls every possible process in the organism, that through the trophic influence of its finer fibers, controls the life and activities of the smallest cells, and makes of us a perfect self-regulating, multiple action machine or automaton, in every way, and yet, paradoxically, allows the automaton to be under its own control, within the limits of safety and utility.

It is through mechanical equilibrium and non-interference with this

CHICAGO FREIGHT MEN SETTLE THEIR STRIKE

Walkout That Affected the Chicago Depots for Nine Weeks Comes to a Close.

Chicago. — The freight-handlers' strike, which began nine weeks ago and affected twenty-three railroads and nearly 1000 men, was settled today, according to an announcement made by Chairman Joseph P. Ryan of the special arbitral commission by Mayor Harrison to carry on negotiations in the interest of peace.

The offer of the railroads to take back 1500 of the strikers and provide places for the others as soon as conditions made it possible, was accepted by the strikers after several days' consideration.

One provision of the settlement, however, is that none of the workmen connected with acts of violence shall be paid back wages.

The principal demand of the men, an increase of 1 cent an hour in wages or a reduction in the working hours from sixty-four to fifty-five hours a week, was not granted.

EVIDENCE ON DARROW

LOS ANGELES, Cal. — For the first time a witness in the Darrow trial today charged Clarence Darrow with having personally offered him a bribe to turn over to him certain evidence against the McNamara brothers.

The witness, Guy Biddinger, a Chicago detective, one of the men who arrested James B. McNamara and Orville McNamara, testified he had pretended to accept Darrow's offer and that Darrow told him he wished to learn who in the inner council of the McNamara defense had been tipping off secret information to Detective W. J. Burns.

Biddinger told him it was E. A. Clancy, a San Francisco lawyer, and that if Darrow came to San Francisco at a certain time he would let Darrow see Clancy and Burns together.

The defense gained what was regarded as an important victory when Judge Hutton sustained an objection to the testimony of Waldo Patton, one of the shorthand reporters, who took down conversations between Darrow and John R. Harlan, through a telephone device. Patton admitted he heard only parts of the conversation.

GREAT GRANDMOTHER AT 57

Albany, Ore. — Four generations live in one house in this city and the oldest is only 57 years old. Mrs. C. M. Mason, who represents the second generation, says she has never seen a woman so young and healthy.

Elizabeth Strinzer, more than a year at a time and that her daughter, Mrs. Lillian Price, and her grandson, Monroe Price, have always lived with her. Mrs. Mason was married when she was 16 and was a grandmother at 25.

Wonderful nervous system that the machine runs smoothly and smoothly and it is only through mechanical derangement that it gets at fault and becomes diseased. Bacteria cannot attack diseased tissue under adverse conditions, but they can attack healthy tissue and cause disease.

Dr. F. A. Piper, D. O., who has been practicing osteopathy for over thirty years, says that the body is a machine and that the nervous system is the engine. He says that the body is a machine and that the nervous system is the engine. He says that the body is a machine and that the nervous system is the engine.

Chiggers and Mosquitoes. Are you in their glory? Their business is to bite you. They are not so easily won by letting them chew on you. Buy a bottle of Lightening Oil applied to exposed parts will keep them off. Immediately remove the irritation caused by their bites. Rub a little oil on and see for yourself.

THIS HELPLESS BOY IS PUZZLE TO BIRMINGHAM

Birmingham, Ala. — A remarkable case which is attracting the attention and interest of the physicians in this section is that of an unknown white boy, called "Leon," at the Jefferson county almshouse. He has not spoken nor moved since he was committed, nearly six months ago. There were no means of identification and nothing has been learned of the boy's parentage.

He is unable to move himself, and if moved, he remains for hours in the exact position he was left. If his hand is raised by an attendant it remains raised until some one lowers it.

Considerable interest was aroused in his case by the report that he had been hypnotized and left in the state. This has been denied by Dr. G. G. Stebbins, physician in charge, who has diagnosed the case as a cataplectic form of mania, which is probably incurable.

The boy is known at the almshouse as "Leon Hostess." When picked up on the street and carried to the institution he had in his pocket a piece of paper on which was written that name.

GIVES UP MILLION DOLLARS

HOOKSETT, N. H. — Renouncing the purple of society for the habit of a nun and giving up a fortune of a million dollars to take the vows of voluntary poverty, Mrs. Gertrude Halls Lamman, society leader of Norwich, Conn., and Boston, has entered the convent of the Sisters of Mercy in this town.

"I have tried all the pleasures this world has to offer," she said to a friend, "all are unsatisfactory. It is easier for a camel to pass through the eye of a needle than for a rich man to enter the Kingdom of Heaven, and I am humbly trying to do his work in laboring for others."

The forswear of her renunciation came in the sale of the magnificent residence in Norwich, Conn. She next sold her automobile and other necessities of her domestic life. Her friends were greatly surprised when she disposed of her collection of rare lace, gathered during years of residence and travel abroad.

Last Christmas Mrs. Lamman, known in this country and abroad, appeared. The secret of her disappearance is now solved by her arrival at the convent of the Sisters of Mercy as "Sister Mary Gertrude." Mrs. Lamman is the widow of William Camp Lamman, a philanthropist. She is beautiful and well. Her father was Dr. A. B. Hall, who died over fifteen years ago, leaving a fortune.

A. F. SUNDERMEYER, Owner

405 Seaboard Building HOUSTON, TEXAS

LOOSE BEAR AT CONEY CAUSE DISTURBANCE

NEW YORK. — In ten minutes at Brighton Beach, Liberty, the train-drawn beach, where one whole theater, drove some few hundred men and girls decorating the sand reedy into the water, frightened a few couples sitting at tables in a rathskeller and brought the Coney Island police reserves over on the run, hot as it was, to make a brave show with drawn revolvers and night sticks. At the end of all this the bear was the worst scared of all at the beach and was glad to slink into his portable cage at a word from his trainer.

It was not behind the scenes at the music hall, where the animal was being exhibited. Just before it was time for him to go on, he ambled out unannounced on the stage. Without paying any attention to anybody, he hopped over the footlights, ambled up a side aisle and climbed the stairs to the first balcony. The spectators did not share in his unconcern by any means.

In search of quietude he jumped out of the window and hopped down to the board walk toward the beach. When he appeared at the edge of the sand a great many bathing suits got wet which were not meant to be, as their owners took to the water for safety. He sniffed disdainfully and turned back toward Hongland's hotel. As he entered everybody else went out.

The bear followed them, the excitement which surrounded him making him a dangerous company. No one wanted to soothe him, so he turned back into the hotel and down stairs to the rathskeller. There were a few tables upset by his entrance. The bear stopped long enough to drink a few beers which had been spilled and then crawled under the flooring of one of the booths. He came out and entered his cage when his keeper spoke a few kind words to him.

WORTH REMEMBERING.

Labor teaches those who wait on him how to climb bravely up those heights of wisdom, influence and glory, which luxury teaches her followers to slide ignominiously down. — Wm. R. Alger.

AND YOU CAN'T OIL A PARROT.

"Why did you give your parrot away? The poor bird meant nothing by its profanity." "I could stand its profanity, but it was learning to imitate my neighbor's rusty lawnmower." — Louisville Courier-Journal.

nesday from his ranch on the
Divide.

J. W. Gardner, of Roosevelt,
was in Junction Wednesday and
came to our office and persuaded
us to take a subscription, dollar.

Do you want to buy a Kimble
county ranch? If so, see M. S.
Nichols at the Citizen office in
Junction.

Miss Leona Garrett returned
home Monday from Georgetown
where she has been attending
the Southwestern University.

Kern Richardson returned
Wednesday from Comanche
where he has been for some time;
he reports crops fine in that part
of the county.

We have a large stock of Mason
and Seal Fruit Jars in our
stock and now half size to come
in about June 15. Better place
your order now before they are
all sold. - Junction Hardware Co.

Walter Halekamp made a trip
to Kerrville and back Wednesday
in his car. He took Dr. Stone
down and brought Mr. and Mrs.
Elsie McCallum back.

If you are from Missouri, we
can show you the farms,
ranches, and good property at a
bargain. M. S. Nichols, at the
Citizen office.

Mrs. W. H. Wilson who has
been in San Antonio several
weeks for treatment returned to
her home in Junction Monday,
and we are glad to say, is very
much improved.

Dr. S. S. Stone, a former resi-
dent of Junction, but now of San
Antonio, came up Monday and
spent Tuesday here, shaking
hands with his many friends in
this place. He returned Wed-
nesday.

T. J. Rowsey and family left
Wednesday for Wood County,
where he has some interests and
will probably locate for a short
while, till the augsters, frogs,
mudpots, and mosquitoes drive
him back to Junction.

Rev. S. L. Hatchler returned
Saturday from Comanche to
where he attended the Summer
School of Theology of the South-
western University. His family
is also here, and from Comanche
county where they have been
visiting several weeks.

If you have friends or relatives
coming in or going away, we will
thank you to call, phone or write
The Citizen office. You like to
read about others. Others like
to read about you. Every news-
item we give, we make this
paper just that much more inter-
esting for the other story, has
drawn readers. And such favors
are not forgotten by the editor.

Big Barbecue

By the People

At

Roosevelt, Texas

July 18

Everybody Invited

LLANO VALLEY MINSTREL COMPANY

PROGRAM

To be presented in Big Airdome Theatre

Junction Texas, July 10

The People's Popular, Peerless, Pleading Per-
formance Properly Presented, Purely to
Please, Put On by the JUNCTION BAND.

Bring the ladies and children. Two solid
hours of fun and laughter. Latest Jokes,
Roaring Blackface Sketches, Popular Song
Hits, Dreamy Music. You mustn't miss it.

Admission, 15c and 25c. Reserved Seats 10c.

Attention Everybody!

Be sure to attend the Big Roosevelt Barbecue
Tuesday, July 18. We have the entire privileges
on the grounds, and there will be a good Cold
Drink and Confectionery stand with everything in
this line which the visitors may desire.

We will also have plenty of feed of all kinds for
your teams.

Come and bring your families and friends and
have a good time. All stands will be in operation
on evening of 17. Big Dance night of 17. Come
on the 17th and stay over the next day and night.

COLLIER & ALLISON

NICHOLAS REHKOPS, VICTIM OF ACCIDENT, CALMLY TELLS OF OCCURRENCE.

EXPERT AGAINST THAW

Called for Prisoner, Says He Is Constitutionally Inferior.

Dr. William A. White, an alien in charge of the United States government hospital at Washington testified that he had examined Thaw on three occasions recently and had found no evidences of paranoia.

"Thaw is not insane," he said "and it would not be unsafe for the community to liberate him now. His memory was good and his talk was entirely rational."

KISSED HIRED MAN IN NAME OF RELIGION

Des Moines, Iowa.—A woman who hugs and kisses the hired man in an attempt to reform him is still in a position to successfully prosecute an action for divorce. Anyway, this is the opinion of Judge Melherry. The court granted a divorce to Mrs. Marion A. Fisher, even though her husband testified as to his wife's obligatory advances upon the said hired man.

"She hugged and kissed the hired man, even when she knew I was looking," Fisher declared. "And what did you say?" asked Judge Melherry. "I expostulated with her. She told me she was doing it to reform him and that her religion demanded that she do everything in her power to point him to a better and higher life," replied the witness. Judge Melherry decided that the couple might be better separated and he granted the divorce to the wife along with \$100 alimony and \$50 for attorney's fees. Mrs. Fisher charged her husband with cruel and inhuman treatment. He filed a cross petition setting forth similar facts, but apparently the wife had the better of the argument in the opinion of the court.

SHERIDAN IN AN ICE JAM

Nome, Alaska.—The United States transport Sheridan, with four companies of troops for St. Michael and Fort Davis, is still imprisoned in the ice which is drifting toward the Arctic Ocean. In five days the Sheridan has moved 100 miles westward and may be carried through Bering straits into the Arctic.

INDUSTRIAL NOTES AND PROGRESS

NEWSY NOTES FOR BUSY MEN AND WOMEN

FINANCIAL NOTES.

Rockdale—Official: Citizens' State Bank is organized with directors thus: H. C. Meyer, E. B. Phillips, G. M. Ryan, J. S. Jacobs, T. B. Kemp and E. R. Wolf. Business is to begin about September 1.

San Antonio—The Alamo Trust Co., capital \$100,000, is reported incorporated by R. U. Rhodus, Max Goodman, Dr. William Wolf, Dr. W. T. Robertson, Frank A. Winerich, G. R. Albers, W. W. McAllister, W. McAllister, A. King, J. B. Bernham, all of San Antonio; Alfred M. Stein of New Braunfels and W. E. Davis of Chicago.

Waco—The Central Texas Exchange National Bank is reported approved by R. U. Rhodus, W. O. Woodson, Waco, Tex.; P. A. Gorman, L. B. Smythe, C. L. Johnson, R. B. Spencer and W. H. McCullough are directors. This succeeds the Central Texas National Bank, and the Exchange National Bank, both of Waco.

FARM NOTES

It would be practically impossible to over-estimate the value of the farmers, individually and to all of the people, collectively, if every farmer would go at once into his wheat, oats and other small grain fields and select in the bundle the choicest yield of the fields, where the grain is the heaviest and freest from weeds, and shock carefully to itself, bundles enough to thresh twice as much seed as will be needed for the coming season. Just as soon as these specially selected bundles are dry enough in the small stacks, and to cap these shocks or stacks with pieces of tent cloth or heavy duck say two yards square. A small piece of old iron, a stone or a small block of wood at each of the four corners of this cloth will hold it in place and will protect the grain from any rain that may fall. When the grain is thoroughly dry and you are ready to thresh it, see that the machine is cleaned of all weed seed and other grain and through these specially selected shocks first and put this grain away in a rat proof bin until such time as you can screen it more carefully and separate the small from the larger grains, so that you will have only the choicest as seed. It will be well to put air pipes at reasonable distances apart through the bin to prevent heating. Any kind of an air pipe that has a few apertures in it and is open and exposed to the air at each end, will answer this purpose. Not having these pipes, planks or rails put through the body of the bin, while not nearly so good as the pipes, will to some extent ventilate it. Or better still, take three pieces of plank, six or eight feet long, and make Y-shaped pipes that are long enough to pass from end to end or side to side of the bin through the grain. These pipes can be made strong enough to stand the pressure and still not be nailed tight enough to prevent the circulation of the air. Later in the season, when the hurry of the harvest time is over, the grain can be put in a bin, properly cared for, in favorable seasons yield from 40 to 60 pounds of honey, selling at prices varying all the way from 7 to 15 cents per pound. The cash revenue from an apiary under such conditions is of course considerable, but unfavorable seasons, disease, lack of skill or insufficient attention on the part of the bee keeper may reduce the yield to much less than this amount, or even wipe it out entirely. Experienced bee keepers have learned that they can not count on an apiary under such conditions, but find that by judicious management and by caring for their bees in bad as well as in good seasons, they get an good average return from their investments.

BEE KEEPERS DEPARTMENT

Texas Bee Keeping Bulletin—Bulletin No. 142 of Texas Agricultural Experiment Stations recently issued, entitled, "Practical Information for Beginners in Bee Keeping," by Wilmon Nowell, State Entomologist and Entomologist of the experiment stations.

This bulletin ought to do well the work for which it is intended. Texas is doing more than the average State for bee keeping. As stated in this bulletin: "By law, the professor of Entomology at the Agricultural and Mechanical College of Texas is made State Entomologist, and as such, is charged with enforcement of the law for control of diseases of bees and with maintaining an experimental apiary in which experiments are conducted for the benefit of Texas beekeepers. Several colonies of pure bred bees are kept on the A. & M. College grounds for use in connection with a course in bee keeping given to students in the agricultural courses of study and for demonstration purposes. A more complete apiary, well equipped with modern tools and implements, is maintained by the present State Entomologist on the Brazos river about 7 miles from the college. This apiary contains at present 40 colonies, and is used for experimental work exclusively."

The author shows a level head when he speaks thus of the money in bees.

The profit from keeping bees on a commercial scale is easy to calculate "on paper," but is not always so easy to realize in practice. It not infrequently happens that good colonies, which are well founded, are lost.

Why Take Colonies? "Foster is an easy and pleasant yet sets just as thoroughly as those harsh purgatives. (In solution in beer only.) Tolerant once used always. Price 25c."

OFFICE MACHINERY and STATIONERY, CIRCULAR LETTERS

is even get an old-fashioned wheat-cleaning machine that will separate the light and small grains from the heavy. Failing to procure a cleaner, the same object can be obtained by using 2x6 plank and making a frame two by four feet with cross pieces, top and bottom, to brace it, and covering the bottom with wire meshing of such size that the small grains will pass through and the larger ones will not. Swing this, which can easily be done, with No. 8 galvanized wire, and pour any a bushel of wheat at a time into this wire bottom box, and shake it until the small grains have passed through on to the floor. Then by unhooking one end of the box, the larger grains can be poured on to a sheet or into a sack, repeating until all is separated. This is, of course, crude, tedious and slow, but if you have no better method of separating the bad from the good, it is worth a dollar for every cent it will cost. The probabilities are that ten per cent of the wheat, oats, barley or other grain in your field this year is infinitely superior to the other 90 per cent. If you plant if you have no better method of separating the bad from the good, it is worth a dollar for every cent it will cost. The probabilities are that ten per cent of the wheat, oats, barley or other grain in your field this year is infinitely superior to the other 90 per cent. Another Wedding

Mr. King Fisher and Miss Aurora Reese were united in holy wedlock at the barbed wire grounds at Black Crossing on the Llano River, on the 26. The bride and groom were too timid to face the large crowd and got the writer to step a few paces away from the gaze of the people and about 3 p. m., under Nature's canopy, were made happy by the ceremony that translated them into the married relationship.

It was a complete surprise even to the relatives of both. So soon as it became known, after their return to the assembly, they received hearty congratulations from their many friends, all of whom wish them a happy and successful life.

J. S. D.

Frightful Polar Winds

blow with terrific force at the far north and play havoc with the skin, causing red, rough or sore chapped hands and lips, that need Bucklen's Arnica Salve to heal them. It makes the skin soft and smooth. Unrivalled for cold sores, also burns, boils, sores, ulcers, cuts, bruises and piles. Only 25c at J. A. Heyman's.

A Hero In A Lighthouse

For years J. S. Donahue, So. Haven, Mich., a civil war captain as a lighthouse keeper, averted awful wrecks, but a queer fact he might have been a wreck himself, if Electric Bitters had not prevented. "They cured me of kidney trouble and chills," he writes "after I had taken other so-called cures for years, without benefit and they also improved my sight. Now at seventy I feel fine." For dyspepsia, indigestion, all stomach, liver and kidney troubles they're without equal. Try them. Only 50c at J. A. Heyman's.

Cataract Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly upon the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in the country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what makes it so successful. Send for testimonial at once. F. J. CHENEY & CO., Props., Toledo, O. Sold by Druggists, everywhere. Take Hall's Family Pills for constipation.

MENARD, - TEXAS.

During the summer months mothers of young children should watch for any unnatural looseness of bowels. When given prompt attention at this time serious trouble may be avoided. Chamberlain's Colic, Cholera and Diarrhea Remedy can always be depended upon. For sale by all dealers.

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHEA REMEDY.

A few doses of this remedy will invariably cure an ordinary attack of diarrhea. It can always be depended upon, even in the more severe attacks of cramp colic and cholera morbus. It is equally successful for summer diarrhea and cholera infantum in children, and is the means of saving the lives of many children each year. When reduced with water and sweetened it is pleasant to take. Every man of a family should keep this remedy in his home. Buy it early. PRICE 25c. LAMSON CO., INC.

Opportunity Knocks

Are You Ready?

Prepare yourself NOW for a better position. Take a course in **GREAT BUSINESS TRAINING SCHOOL** of the Southwest. School endorsed by leading Bankers, Court Reporters, Accountants and Business men everywhere.

New Typewriters, Adding Machines, Multigraphs, etc. - Electric Pens. Every TEACHER an EXPERT.

BOOKKEEPING The system of Bookkeeping we teach is used in over 2400 schools, and in nineteenth of the Business offices of United States - Thorough, Practical, Comp. etc.

BANKING Both National and State Banks use system we teach.

SHORTHAND More Court Reporters and Expert Stenographers use our systems of shorthand THAN ALL OTHER SYSTEMS combined.

TOUCH TYPEWRITING Real Touch Typewriting is taught in our college. All machines are "blinded" and from the first lesson to graduation each pupil must use every finger of each hand without looking at the keys. The result is a remarkable speed, ease and accuracy.

CIVIL SERVICE Is taught in our College under the direct supervision of a former Civil Service Examiner. Specially prepared 1st books.

HOME STUDY FREE To those who cannot leave home but who will enroll NOW we will lend books and give instruction by mail FREE until they can come, or we will teach entire course by mail.

POSITIONS—Our connection and acquaintance with business men makes each of our students doubly sure of obtaining employment upon graduation. Every full graduate in a good position is the record of B. A. B. C.

Special Inducements to Teachers, Public and Private School Graduates and Children of Ministers. No vacation, Catalog and full information FREE. Write TODAY.

307 Alamo Plaza, San Antonio, Texas.

Some Rattle Bug

Chester McCaleb killed a rattlesnake on their place Sunday morning that measured 13 inches around, 7 feet long, and weighed 9 lbs. How's that for a "rattle-bug?"

Call to County and District Trustees

Will be glad to meet all Trustees and Teachers for Kimble County at Courthouse, July 11, 1912, 4 P. M., for general discussion and organization.

E. Hokekamp, Trustee at Large

Revival Meeting

Rev. S. L. Batchelor, assisted by Rev. Frank Hughes, of Duffau, Texas, will conduct a Camp Meeting at Coppars, beginning Sunday July 7. Let all who can come and camp, and join together in a united effort for a great and good meeting.

Strayed or Stolen

One dark brown horse about 15 hands high, about 10 years old, branded "W" on left shoulder, one hind foot white, white spot in forehead, heavy mane and tail, heavy build, will weigh 1000 lbs or more, inclined to be slightly sway-backed, heavy fetlocks, a little on the Norman order.

O. D. Mann & Sons

\$100 Per Plate

was paid at a banquet to Henry Clay, in New Orleans in 1842. Mightily costly for those with stomach trouble or indigestion. Today people everywhere use Dr. King's New Life Pills for these troubles as well as liver, kidney, and bowel disorders. Easy, safe, sure. Only 25c at J. A. Heyman's.

Let an efficient tailor fit you with a new suit. - Edd & Cleve.

A NEW CREATION

Young Man Drowned

Our town and community was shocked Wednesday with the sad news that Mr. Harvey Ragsdale, who has been visiting his brother J. F. Ragsdale, on North Llano, had been drowned while bathing in the river on the Ragsdale ranch. The young man was a fine swimmer, but in this instance was the victim of cramps and drowned before his rescue could be made. A friend who has known the young man for years, hands us the following sketch of the young man's life:

Born, December 23, 1886, at Gainesville, Texas. Joined the M. E. Church at 9 years of age, and lived and worked for his Master up to hour of his death. He graduated at the Gainesville High School in 1907; moved to Corpus Christi in 1910. He moved to Austin in January, 1912, and entered the State University. Leaving there on June 29, 1912, accompanied by mother and sister, came for a visit to his brother, J. F. Ragsdale, whose home is 15 miles west of Junction, on North Llano. He arrived here on the eve of July 2.

He was especially talented in literature and while still a high school pupil received the prize offered by the Daughters of the Revolution for the best essay on "The Mothers of the Revolution" and was the honor pupil in Literature. Only last month he received the prize offered by the State University for best paper on "Individuality."

Some of us have watched with such interest, articles sent out from his versatile pen, and felt that the world would hear from her talented son.

But God knew otherwise and the Master has taken this talented son into his own arms, and now while we see so darkly, we know that in the beyond we shall know—that it is well.

Just to Remind You

that the Menard Hide and Wool Company buys all kinds of Country Produce in all quantities. Our business is of some magnitude and we buy any amount. We buy from the farmer and we buy from the merchant. If you have anything in this line and want to sell it, it will pay you to see us. John Armstrong, Mgr.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, sweeping and doing household all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed you should become both healthy and beautiful. For sale by all dealers.

We have the samples and price. Why not let us order your suit? Edd & Cleve.
