## Woman Is Killed In Shooting; Kidnapping

THIS IS WHAT IT'S ALL ABOUT--Jeff Smith, left, and R.B. (Mountain Man) Cunningham were actually captured earlier working at harnessing some of the mules as featured in the Mule Day Festival, scheduled again this year at Smith's barn and arena two miles east and one half mile south of Muleshoe on Highway 70. Plan to attend this bigger than ever event, where all proceeds are earmarked for Girlstown, U.S.A., located near Whiteface in Hockley County.

### \*\*\* Moderate Rain Falls Saturday

Although brilliant lightning lightened up the skies both Saturday and Sunday nights, and heavy thunder rocked residences in the night, little rain fell as a result.

Moving into the Muleshoe area shortly after midnight, the rain officially dropped some .5 of an inch of rain, that fell very hard and very fast before the booming storm moved out of the area.

Again on Sunday night, storms moved through after midnight, but this time, only left .1 in moisture in the official rain gauge.

In spot checking, this also proved to be the case in the county, as the rain was very spotty, and very light, despite promising looking clouds, and the lightning and thunder.

Anywhere from .5 to .75 was recorded in various locations of the county.

The rain was especially welcome on young crops that needed a 'cotton shower' even though there's not much cotton left here.

There is a lot of grain sorghum planted, especially in dryland areas that lost all the young cotton in spring storms.

In the far southwestern part of the county, only 'light sprinkles' were recorded at most farms, while the southeastern part of the county recorded up to .75 during the two nights of light rain.

National Weather Service predicted that the next few days would be dry and the temperatures would range into the mid-90's for daytime highs. No additional moisture was in the NWS predictions for the next few days.

### Second Woman Is Shot; Men Suffer Stab Wounds

Local and area law enforcement officers were kept very busy during the last weekend as a stormy Saturday night of physical violence left one woman dead, one hospitalized; and two men hospitalized from stab wounds in a separate event.

Parmer County Sheriff Bill Morgan said his office received a call at Farwell at 1:10 a.m. Sunday morning, during a driving rainstorm, accompanied by heavy lightning and booming thunder, that a shooting had occurred near Bovina.

According to Sheriff Morgan, his officers drove approximately six miles west of Bovina on FM2290 where they found Christi Sotelo, 25, of Muleshoe, dead of gunshot wounds.

She was pronounced dead at the scene of the shooting by Frances Euler, Justice of the Peace from Friona.

Also at the shooting site was Tonya Parkinson, 23, of Muleshoe. She was shot in the mid-section, Tuesday morning. Parker had been released from High Plains Hospital in Clovis, Ms. Parkinson resided with the Sotelois in Muleshoe.

Others at the shooting site were Hector Sotelo, 12, brother of the dead Sotelo woman, and Rosa Sotelo Vital, 23, sister of the Sotelo woman. They were uninjured, and told officers they had hidden in the darkness when the suspect started firing at the other two women.

Another sister, Ida Sotelo, 17, was with the shooting suspect when he left the shooting scene in Rosa Vital's blue Buick Regal, which bears New Mexico license tags.

Sheriff Morgan was not 'sure' whether Ida Sotelo was accompanying the suspect willingly, or whether or not she was a kidnapping victim.

Officers are seeking another Muleshoe resident, 22-year-old Rene Garcia, who has been charged with the shootings near Bovina. A family dispute apparently led to the fatal shooting, as officers had been seeking Garcia since early Saturday morning, several hours prior to the Sunday morning shooting west of Bovina.

On Saturday morning, it was reported that he had kidnapped Ida Sotelo and her younger brother, Hector, and was driving Rosa Sotelo Vital's automobile.

They had been reported in the Farwell area at approximately 7 a.m. on Saturday, then dropped out of sight for the next 15 or more hours before the shooting.

Graveside services for Christie Sotelo were conducted at 2 p.m. on Wednesday at the Portales, N.M. Cemetery with the Rev. Frank Smith, officiating. Pallbearers included Edmundo Rodriguez, Rudy Diaz, Clemente Casa, Rick Vital, Joe Hernandez and Larry Urioste.

She was born November 11, 1960, and resided in Portales, N.M. before moving to Muleshoe in 1981.

Her survivors include two daughters, Christelda and Jessica Sotelo, both of the home; her father, Manuel Sotelo, Portales; her mother, Maria Sotelo, Muleshoe; three brothers, Frank, Hereford; and Jessie and Hector, both of Muleshoe; six sisters, Beatrice Hernandez, Zeda Villanueva, Natalie Casa and Josie Rodriguez, all of Portales, and Rosa and Ida, both of Muleshoe.

While Parmer County and Bailey County officers were beginning to seek the car involved in the shooting and alleged kidnapping, Bailey County Deputy Sheriff Jim Esquibel was notified that two

### Pesticide O.K. For Corn Mite In This County

Following continuing efforts by the Texas Corn Growers Association for approval of the use of Azodrin to control Banks grass mites in corn, the Environmental Protection Agency, granted the long sought approval.

The Texas Department of Agriculture received notice that Azodrin could be used under the following conditions:

One application only; a maximum of 1.0 pound per acre; and the approval expires on August 31, 1986.

Also, use of the pesticide was approved only for the following 19 counties:

Castro, Deaf Smith, Parmer, Lamb, Hale, Swisher, Briscoe, Hartley, Sherman, Moore, Dallam, Floyd, Hansford, Carson, Randall, Potter, Hutchinson and Gray.

### Track Youth Show Very Well At State Meet

Fourteen young people from the Muleshoe Track Club were in San Antonio for the TAAF State Track Meet last weekend.

Placing were Brenna Matthews, first in the shot and second in discus; Mindy Neal, second in discus; Lisa McGehee, first in the quarter mile, fourth in the 200 meter; Byron Neal, fourth in discus; Michelle Cox, seventh in the quarter mile; Lisa Noble, seventh in the 200 meter.

Other team members at the meet were Barbie Stout, 50 yard dash; Shannon Sinnacher, long jump; Ronnie Perez, 330 hurdles; Richie Tillema, discus; Amy McGehee, 100 meter dash; James Ziegenfuss, shot; Jill Noble, 200 meter; Michelle Stout, sprint relay and sprint relay team, Amy McGehee, Michelle Stout, Michelle Cox and Lisa Noble.

## Warm Winter, Wet Spring Enhance Local Insect Growth

According to Bailey County Extension Agent Spencer Tanksley, "the plant clinic conducted in Muleshoe during the past week showed that home owners with backyard

garden insects had an increase in number and the insects were causing economic loss.

"The source of damage to your lawn, trees, shrubs and garden plants can usually be accurately identified once you know what to look for. Ragged leaf edges generally indicate the presence of chewing insects, while reduced plant vigor and a sickly yellowish appearance are among the more obvious indications that sucking insects are at work."

He continued, "certain insects are so small that you can hardly see them. Some are more active at night, others inhabit the underside of leaves, passing unnoticed by the casual gardener. To complicate matters even further, not all problems are caused by insects. Some sickly plant conditions can be caused by poor soil, inadequate moisture, high temperatures, plant diseases and lack of fertilizer. Iron Chlorosis, a soil deficiency, can cause plants to turn yellow and appear very sickly also."

The following is a brief description of some of the most troublesome pests that can occur around the home. Home owners who have problems with these insects may contact the county Extension office for control measures and correct identification, said the county agent.

#### APHIDS

Sometimes called plant lice, aphids are soft bodied, rounded, or pear shaped insects of many colors, seldom over 1/8 inch long. Some aphids appear woolly or powdery. Aphids, with their tremendous reproductive powers, can increase to fantastic numbers in just a few days. They feed by sucking plant juices, causing a loss of plant vigor, curling, or distortion of leaves. Hardly a plant exists that is not subjected to infestations by one of more of the aphid species.

#### BAGWORMS

Bagworms are soft, brown caterpillars, encased in silken cocoon, like bags covered with bits of leaves from the host plant. Bagworms occur in late May to June and feed on the foliage of evergreens, shrubs, and trees. Bagworms need to be controlled when they are very small.

#### CHINCH BUGS

Yellowish spots in the lawn that rapidly turn into brown, dead areas is a symptom of infestation by lawn chinch bugs. This damage is mostly caused by the young bugs or nymphs that suck plant juices from the

grass. Full-grown nymphs and adults are reddish-black with white markings and are about 1/2 inch long.

#### FOLIAGE FEEDERS

Many different types of foliage feeders occur in the county. Many are better known by these names: corn earworm, cabbage loopers, armyworm.

Cont. Page 6, Col. 1

## New Cotton Program May Inhibit Growers

Implementation of 'sodbuster' provisions in the 1985 federal farm bill, without changes, could dethrone King Cotton as a continuous crop on much of the South Plains, warns an economist with the Texas Agricultural Extension Service in Lubbock.

"If the conservation cross-compliance requirement, specified in the sodbuster provision of the law, remains in effect," said Dr. Jackie Smith, the economist, "it will dramatically change the cropping patterns for this area."

"If this program is brought into effect as it is, it would mean the end of continuous cotton as a cropping system in this area," he said.

The key aspects of the conservation cross-compliance mean that a producer who is farming highly erodible cropland must implement a conservation plan to reduce his erosion to an acceptable level by 1990. If he fails to do so, the producer will lose the benefits of such government programs as price supports, crop loans, federal crop insurance, disaster loans and Farmers Home Administration loans.

"Since almost all our land will be classified as highly erodible and will require a conservation plan, the cost of compliance for price support programs will increase on the South Plains," Smith added.

"This area will be more severely affected than any other part of the state," the Extension economist warned. "Because of our soil types and wind erosion, most of the cropland in the area will be required to have a conservation plan in place by 1990 to participate in government program benefits."

Reasonable estimates suggest that for the average of the area acceptable conservation plans would include two-thirds residue crops. In any given year, two-thirds of the area would

have to be planted to high residue crops.

"Cotton is a low residue crop," Smith noted.

Several South Plains counties have a large number of acres of coarse, sandy soils that won't be considered suitable for any cotton production, he added.

"Those soils will be restricted to production of high residue crops or returned to a permanent grass cover," he explained.

For most of the sandy land areas around Lubbock, high residue crops will probably be required in at least two out of three years, Smith said. "This means cotton could be planted on that land only one out of three years," he said.

By using windstrips, strip

Cont. Page 6, Col. 1

Joe A. Hall, superintendent of the Lazbuddie Independent School District, has announced a special board meeting at 8:30 p.m. on Monday, August 18.

Included on the agenda is a call to order; roll call; recognition of guests and visitors; action items which include regular business; to discuss and take action regarding amendment of 1985-86 budget; and a public hearing and discussion regarding 1986-87 budget; and final adoption of the 1986-87 official budget.

Marilyn Harris reports that her mother, Evelene Harris, is recuperating very well from surgery at Methodist Hospital in Lubbock. She is up walking, and barring complications will be returned to her home in Muleshoe by her husband, Wayland, on Saturday of this week.

Three students from Muleshoe are among the 293 Eastern New Mexico University students named in the 1986 summer semester Dean's Honor Roll.

Dean's Honor roll students from Muleshoe include: junior elementary major Pauline E. Garcia, cum laude; sophomore medical technology major Polly D. Harrison, honors; Sheryl R. Dunham, teacher certification, summa cum laude.

Jim Turner of Clovis was special speaker for the Muleshoe Rotary Club on Tuesday and discussed the Eastern New Mexico University, Clovis branch.

He explained that the Clovis branch of ENMU provides a two year associate degree and that 20 percent of the graduates then transfer to four year schools.

ENMU in Clovis has both one and two year programs for students, said Turner.

Guests at the Rotary meeting included Cindy McCarty, Mrs. Harvey Bass and granddaughters, Ellen and Carol; John Cowart; Douglas Fields; Dell Foley and Dan Bouchelle.

SH-H-H. MASTERS AT WORK--Internationally famous Odessa Chuck Wagon Gang will be in Muleshoe again this weekend to serve lunch at Jeff Smith's barn for the annual Mule Day Festival. They have cooked at various locations over the world, and are recognized everywhere for their good meals and expertise in preparing and serving barbecue.

# Season Dates Adopted For Dove Hunting

The Texas Parks and Wildlife Commission has adopted season dates and bag limits for dove hunting, including provisions for a two-weekend special white-winged dove season in a portion of the South Zone.

Meeting in Austin July 24, the commission adopted a whitewing season of Sept. 6-7 and 13-14 after hearing staff reports indicating that whitewing populations have recovered from reduced numbers during the past two years.

Last year's whitewing season was cancelled by the commission after surveys indicated the December 1983 freeze severely reduced citrus groves which provide important whitewing nesting habitat in the Valley.

The regulation framework provided by the U.S. Fish & Wildlife Service for migratory game bird seasons does not allow opening of any season before September 1 because of international treaties. Therefore, the department was not allowed to open the whitewing season or the mourning dove season on Labor Day weekend which begins on August 30 this year.

The bag limit for the white-wing season in the Special White-winged Dove Hunting Area is 10 white-winged, mourning and white-tipped doves, to include no more than two mourning and two white-tipped doves. As in previous seasons, shooting hours will be noon to sunset during the whitewing season in the special whitewing area, and 30 minutes before sunrise to sunset during the mourning dove seasons.

The mourning dove season in the state's North Zone will be Sept. 1-Nov. 9; the Central Zone season dates are Sept. 1-Oct. 30, 1986, and Jan. 3-12, 1987; the South Zone season is Sept. 20-Nov. 18, 1986 (Sept. 20-Nov. 14 in the Special White-winged Dove Area), and Jan. 3-12, 1987.

The mourning dove bag limit is 12 per day, to include no more than two white-winged doves and two white-tipped doves.

White-tipped doves, a common species in Mexico, increased dramatically in number and expanded their range throughout an eight county area in South Texas from the early 1970s through 1983. The 1983 freeze slowed their rate of growth but white-tipped doves are now continuing their population expansion. Whitetips are common in the areas south of Corpus Christi and Laredo.

Whitetips are similar in size and shape to a whitewing with a bright, rusty-red coloration on the underside of the wing. The name "whitetip" refers to the white on the tip of the tail, but this can be misleading since mourning doves and white-winged doves also have white on the tips of their tails. Whitetips have been a legal game species in Texas since

1984. Ron George, dove program leader for the TPWD, said surveys indicate populations of mourning doves are 26 percent above 1985 levels, and approximately 10 percent above the long-term average.

The commission authorized moving six days of the mourning dove winter season in the South Zone to the fall season. This will result in a 60-day fall

## Sandhills Philosopher

Editor's note: The Sandhills Philosopher on his Johnson grass farm on Sandy Acres gives an off-beat report on the recent British Royal wedding.

Dear editor: As everybody knows, the British can't be beat when it comes to putting on a Royal wedding.

They've got the pomp and ceremony, they've got the carriages, they've got the horses and the men willing to ride them while wearing some of the craziest-looking hats this side of Halloween, and for a thousand years they've produced young princes who need to get married if the Royalty business is to continue.

As for brides, they can be picked from the common masses. It doesn't matter, because the Queen or King, whoever's in charge at the time, can, with a wave of the hand, turn the chosen one into a Princess. Nothing to it. No harder than our turning an ordinary man into a Congressman.

But this time, although it worked out all right when Prince Andrew and Sarah Ferguson got married there was a serious blunder.

While Miss Ferguson was headed for the church as cheering throngs lined the street they had her riding in a glassed-in carriage. That was fine.

But on her return down the same street after the wedding ceremony they had her riding in an open carriage.

Now according to the account I read, the bride wore a wedding dress with a train of skirts that trailed behind her for a length of 17 feet. You put somebody with that kind of rig on in an open carriage and a puff of wind comes along and billows out those 17 feet of cloth and what do you think it'd do to the skittish horses trailing behind with Knights in armor astride trying to keep their hats on? Liable to be the worst run-away in Royal horsemanship.

The British need to shorten the bride's train or keep her glassed in.

Yours faithfully,  
J.A.

season (54 days in the special white-winged dove area) and a 10-day winter season for the South Zone. George said this will permit additional dove hunting opportunity in conjunction with the early portion of the quail season.

Seasons and bag limits for teal, rails and gallinules for 1986-87 will be basically the same as last year. The teal season statewide is Sept. 13-21; the bag limit is four blue-winged, green-winged or cinnamon teal in the aggregate per day; shooting hours are sunrise to sunset. The season for rails and gallinules is Sept. 1-Nov. 9, with shooting hours from 30 minutes before sunrise to sunset.

The daily bag limit on king and clapper rails is 15 in the aggregate; the limit on sora and Virginia rails is 25 in the aggregate (25 in possession); the bag limit for purple and common gallinules is 15 in the aggregate.

Except for sora and Virginia rails, possession limit for all early-season migratory game birds is twice the legal daily bag limit.

As during past seasons, all whitewing hunters participating in the special whitewing season will be required to have a \$6 White-winged Dove Stamp to legally take whitewings anywhere in Texas. These stamps can be obtained from Parks and Wildlife Department offices or retail hunting license outlets.

The web of our life is of a mingled yarn, good and ill together. -Shakespeare.

## Three-Way News by Mrs. H. W. Garvin

Mr. and Mrs. S.G. Long and Mrs. Buclah Toombs visited Mrs. H.W. Garvin Monday evening.

Mrs. Adolph Wittner was in Lubbock Tuesday shopping and visiting her sister.

Mr. and Mrs. Bill Dupler and Mrs. Minnie Dupler spent the week end in Oklahoma visiting and to attend the 95th birthday of Clay Miller, brother of Mrs. Dupler.

Wayland Fox from Clovis spent Wednesday visiting his grandmother Mrs. H.W. Garvin.

Mr. and Mrs. Larry Travathan and children from Canyon spent the week end with the S.G. Longs.

Mr. and Mrs. George Tyson and Mrs. H.W. Garvin attended

the annual Tyson reunion at Lake Brownwood over the week end. It was the 30th Reunion. Over 100 attended the reunion this year. All of Mr. and Mrs. George Tyson's children, grandchildren, and great grand children were there except one grandson-in-law.

The Tyson families honored Mrs. H.W. Garvin with a birthday party Sunday at noon.

Mrs. Williams from Dallas is visiting her son and family the C.W. Williams family.

Mrs. Frances Loter from Houston and Opal Ruth Sowder from Muleshoe were dinner

guests of the Joe Sowder's Sunday.

Mr. and Mrs. Raymond Hanna from Ft. Worth visited in the community Thursday.

Mr. and Mrs. Jow Sowder and Mr. and Mrs. Jack Lane were supper guests in the Bud Huff home Sunday evening.

Mr. and Mrs. Billy Sokora and daughter from Arura, Illinois are visiting her parents the Rayford Mastens. Also visiting Sunday were Mr. and Mrs. Lamar Pollard and boys from Whitherell.

Like your dad and your grandfather, one thing you'll need is a dependable source of long-term credit. A source that sticks with you through good times and bad. . . doesn't panic and pull back when things get a little tough. For generations that source has always been the Federal Land Bank.

When long-term credit is the answer, stop by and see how the Land Bank can help you.

To a young man wondering about his future in farming

**BAILEY COUNTY**  
**CALCULATION OF EFFECTIVE TAX RATE, ESTIMATED UNENCUMBERED FUND BALANCES, AND SCHEDULES**

I, Carl S. Gilbreath, Tax Assessor/Collector for Bailey County, in accordance with Sec. 26.04, Property Tax Code, have calculated \$ 39.16 per \$100 of value as the tax rate which may not be exceeded by more than three percent by the Commissioners' Court of Bailey County without holding a public hearing as required by the code.

\$ 06.100 per \$100 for farm-to-market/flood control tax.  
\$ 32001 per \$100 for the general fund, permanent improvement fund, and road and bridge fund tax.  
\$ 38401 per \$100 TOTAL COUNTY EFFECTIVE TAX RATE

The estimated unencumbered fund balances are as follows:

**Farm to Market/Flood Control**  
Maintenance & Operation: \$ 442,004  
Interest & Sinking: \$

**General Fund**  
Maintenance & Operation: \$ 315,011  
Interest & Sinking: \$

The following schedule lists debt obligations that 1986 property taxes will pay:  
(Expand worksheet as necessary to list debt obligations. If the unit needs additional space, refer the reader to the portion of the notice showing the debt schedule. See examples.)

The following schedule lists indigent health care services required of Bailey County:

	1985 Service Cost	1986 Service Cost
A. Required services that 1986 taxes will pay: (list each service and indicate cost in the 1986 column) Total service cost with 1986 taxes		\$ 75,960
B. Of the required services in A above, these services were provided in the current year and paid for with 1985 taxes: (list each service and indicate cost in the 1985 column) Total service cost with 1985 taxes	\$ -0-	
C. State reimbursement for required services expected during the year:		\$
<b>NET INCREASE FOR REQUIRED SERVICES FOR 1986</b> (Subtract 1985 total cost and expected state reimbursement from 1986 total cost)		\$ 75,960

CARL S. GILBREATH, Chief Appraiser  
July 7, 1986

**CALCULATION OF EFFECTIVE TAX RATE**  
Separate calculations are performed for each type of tax levied by Bailey County in order to determine a 1986 total effective tax rate. The following guide corresponds with the calculations shown: A - Farm-to-Market Road/Flood Control Tax; B - General Fund Tax; C - Maintenance of Public Roads Tax.

MAINTENANCE AND OPERATION (M&O) TAX RATE	Type of Tax: A	Type of Tax: B
1. 1985 total tax levy	\$ 148,931	\$ 759,641
(1985 tax rate for type A: M&O \$ .0651 + I&S \$ .00 = \$ .0651 / \$100)	\$ -0-	
(1985 tax rate for type B: M&O \$ .3253 + I&S \$ .00 = \$ .3253 / \$100)		\$ -0-
2. Subtract 1985 debt service (I&S) levy		\$ -0-
3. Subtract 1985 taxes on property in territory no longer in unit in 1986		\$ 90
4. Subtract 1985 taxes for property becoming exempt in 1986		\$ -0-
5. Subtract 1985 taxes for property appraised at less than market value in 1986		\$ -0-
6. Subtract 1985 taxes used to regain lost 1984 taxes because of appraisal roll errors	\$ 4,358	\$ 21,706
7. Adjusted 1985 M&O levy (subtract #2, #3, #4, #5, and #6 from #1)	\$ 144,570	\$ 737,845
8. 1986 total taxable value of all property	\$ 231,750,000	\$ 236,500,000
9. Subtract 1986 value of new improvements added since 1/1/85	\$ 5,934,976	\$ 5,934,976
10. Subtract 1986 value of annexed property added since 1/1/85	\$ -0-	\$ -0-
11. Adjusted 1986 taxable value for M&O (subtract #9 and #10 from #8)	\$ 225,815,024	\$ 230,565,024
12 A Divide the adjusted 1985 M&O levy (#7 above) by the adjusted 1986 taxable value for M&O (#11 above) (\$ 144,570 ÷ \$ 225,815,024)	\$ .0006400	
12 B Divide the adjusted 1985 M&O levy (#7 above) by the adjusted 1986 taxable value for M&O (#11 above) (\$ 737,845 ÷ \$ 230,565,024)	\$ .0032001	
13. Multiply by \$100 valuation	× \$100	× \$100
14. Effective M&O rate for 1986	\$ .06400 / \$100	\$ .32001 / \$100
<b>APPRAISAL ROLL ERROR RATE</b>

LISA WHALIN AND BRANDI JEAN

## Baby Shower Honors Lisa Whalin, Daughter

Lisa Whalin and new daughter, Brandi Jean, were honored with a baby shower on Saturday, August 2, 10-11 a.m. in the home of Gayla Gear.

As they arrived, guests were greeted by Gayla Gear, Lisa Whalin and Billie Jean Whalin, and were registered by Twyla Gear.

Refreshments were served from a table covered with pink linen, and centered with an ivy with pink bow and baby accessories arranged among the greenery.

Guests were served monkey-

bread, fruit and cranberry juice cocktail.

Special guests included Billie Jean Whalin, Brandi Jean's grandmother.

The honoree's corsage was pink, blue and yellow ruffled baby socks.

A Love Wheels stroller and the centerpiece was presented as the hostess gift by Gayla Gear, Pam Atwood, Terri Precure, Connie James, Martha Young, Darla Poyner, LaNell Stancell, Linda Vinson, Carlene Stroud, Kay Griswold, Margaret Stevens and Hellen Adrian.

## Matters Of Health From West Plains Medical Center.

Why are my children so prone to ear infections?

The ear infections your child suffers from are most likely middle ear infections, known as otitis media. Middle ear infections, which affect half of all children by age one, and ninety percent of them by age six, is a swelling or infection of the middle ear. The problem is caused by any one of a variety of bacteria or viruses, or by allergy or fungus. Often there is a cold or throat infection before the onset of the middle ear infection.

Bacteria and viruses get into the middle ear through the eustachian tube, which opens into the mouth and throat. A cold or sore throat can prevent the tube from draining normally, and a blocked tube is the perfect place for bacteria or viruses to grow. In some cases, the increased pressure of the fluid within the middle ear can force infection into the porous mastoid bone next to the ear, or break the eardrum. The combination of a small eustachian tube and a relatively immature immune system makes children more prone to middle ear

infection. Middle ear infections can be very painful with symptoms that include a sense of fullness in the ear, fever and hearing loss. Hearing is affected when the accumulated fluid prevents the eardrum from vibrating--necessary for transmitting sound into the interior portions of the ear.

Otitis media is never a problem to be treated lightly, because if hearing is impaired for any length of time, a child can quickly get behind in learning and language skills. Otitis media is the most common cause of hearing loss in children.

Antibiotics are used successfully in treating otitis media in most children. However, in children who have stubborn or recurrent middle ear problems that affect hearing and classroom learning, a minor surgical procedure to drain the fluid may be necessary. Some children may, at that time, require the placement of a tiny tube through the eardrum that provides continuous drainage for as long as the tube remains in place, usually between 6 months to a year.

**1936 BANK AND POST OFFICE STATEMENT IS CREDIT TO CITY**  
Bank deposits and post office receipts are generally an inevitable index of the prosperity of a given town and surrounding area, thus the increased business transacted at the Muleshoe office for the year ending June 30, 1936, totaling \$66,086.34, shows an increase of \$11,827.58, or about 23 percent increase over business handled the previous year.

**BANK MAKES FINE STATEMENT**  
The financial statement of the Muleshoe State Bank shows a very healthy and prosperous condition of this financial institution which is an entirely home owned concern and operated for the benefit and accommodation of home people.

Operating on a capital structure of \$28,000, the statement of business at the close of July 9th shows a surplus of \$3,500 and undivided net profits totaling \$5,646.13.

June 30, last year deposits totaled \$185,000, but deposits for approximately the same date this year totaled \$220,000, a very healthy increase, and speaking favorable for the general economic condition of this specific territory.

## Get The Most From Back-To-School Money

For many Texas families the economic downturn means beginning a new school year with less money to outfit the kids.

But a number of alternatives are there for stretching the family's back-to-school clothes budget, says clothing specialist Alma Fonseca.

Start by going through the children's clothes to see what is worn out, what is outgrown and what can be "restyled," advises the Texas A&M University Agricultural Extension Service home economist.

A clothing exchange with relatives, friends and neighbors can help everyone get more wear out of outgrown, but not outworn, children's clothing, she says. Garage sales and resale shops are also a source of inexpensive clothing in good condition.

If you have the time and sewing skills, try altering some dresses, jumpers and other items, suggests Fonseca. Look for deep hems in skirts, pants and sleeves that can be lengthened. Decorative stitching, trim or a fabric insert will hide marks from the old hem. Tucks in bodices, skirts, pant legs and sleeves may also be released to add length.

"When you shop for school clothing, look for durable clothing that can "grow" with the child throughout the school year," says the specialist.

She points out that discount and outlet stores carry less expensive clothing, but it may also be less durable.

Before buying, inspect clothes for wide seams that won't ravel or pull out, and on knits, narrow seams that are stitched and overcast. Double stitched seams or tape inserted in seams that receive the most stress, such as pants crotch or armhole seams is another sign of durability.

If the style, fabric, fit and price are right, you can always add needed reinforcements on your home sewing machine to make less durable clothing last longer.

"When you shop for new clothing, keep in mind the specific features that will allow for the child's growth," advises the specialist. Some of these features include deep hems, adjustable straps and waistbands, raglan sleeves, and stretchy fabrics.

Two piece clothes usually provide more room for growth than one piece items, and dresses without a definite waistline can be worn longer than those with fitted waists, Fonseca adds.

"In general, you'll do best to spend the most money on those clothes that are worn most often, receive the hardest wear and are laundered frequently," the clothing specialist says.

**We Believe Our Youth Of Today Will Provide Effective Leadership Tomorrow!**

**LEADER OF TOMORROW**--Our Leader of Tomorrow this week is Yolanda Garcia. Yolanda is a 1986 graduate of Muleshoe High School and the daughter of Mr. and Mrs. Raul Garcia. Yolanda was a member of the Mighty "M" Band, the Flag Corp and DECA, of which she excelled during her senior year by going to regionals and on to state. Yolanda is employed by Fry and Cox and plans to attend South Plains College at Levelland this fall. We are proud to recognize this young lady as a "Leader of Tomorrow."

**PROUDLY PRESENTED BY:**

## Creative Living with Sheryl Borden

Three topics will be presented on "Creative Living" on Tuesday, August 12 at 12:00 noon and repeated on Saturday, August 16 at 2:00 p.m. (All times are Mountain). According to Lauren Ryan, Public Relations Manager with Dow Consumer Products in Indianapolis, IN, everyone can manage to eat properly by preplanning, batch cooking and storing some meals in zip-top storage bags. In essence, she'll show how to become a "Sunday Afternoon Cook". She will introduce their newest product-microwaveable storage bags that can go directly from the freezer to the microwave. She'll also talk about common nutrition habits and the dilemma of frequent food waste.

Another guest if Joyce Meyer of the Indiana Pork Producers Assn., and she will share a stir fry recipe with us. She'll use pork tenderloin and demonstrate the easiest way to cut strips of meat for stir fry dishes. Joyce will also talk about the cost, nutritional value of pork and the availability of a spice called "Five-Spice Powder". Ms. Meyer is also from Indianapolis.

Emily Patner is with the Safflower Information Bureau, and she will show us that safflower oil can be used for many beauty treatments.

On Tuesday, August 12 at 9:30 p.m. Donna Grant, The Singer Co. from Portland, OR will show how to do monogramming on the sewing machine. She'll demonstrate how to select suitable fabrics for monogramming, how to adjust the sewing machine to show the most common steps for doing monogramming.

Susan Wright, Extension Clothing Specialist with the NM Cooperative Extension Service in Las Cruces will demonstrate how to make soft luggage. This type of luggage can be very durable, depending on fabrics selected, and the manner of lining or reinforcing the luggage that is done. There are so many attractive pieces of fabric available, as well as zippers, handles and other accessories, soft luggage can be made for one's self or for gifts.

Information on citrus garnishing and making cookies for special occasions will be presented on "Creative Living" on August 14 at 12:00 noon. B.J. Doerfling is with Sunkist Growers, Inc. from Van Nuys, CA, and she will show how to make food garnishes from lemons, oranges and other citrus fruits. Using special tools designed for making garnishes, Ms. Doerfling will turn lemons into boats, oranges into shells and make roses and stars—all from citrus fruits.

Another guest will be Zella Junkin, manager of Consumer Affairs with Wilton Enterprises, Inc. from Woodridge, IL. Ms. Junkin will demonstrate making molder cookies, bag and tip

cookies and one "large" cookie in a pan.

"Creative Living" is produced and hosted by Sheryl Borden. The show is distributed by Pacific Mountain Network and is carried on more than 90 PBS stations in the United States, Canada, Guam and Puerto Rico.

### LUGGAGE MADE EASY

Soft luggage made at home can be from a kit-purchased with the fabrics pre-cut and all the notions included—or from fabric and notions selected by the maker. Self-styled luggage allows a great deal of individuality in design and size, as well as more control over the cost of the pieces made.

An excellent advantage of making your own luggage is

that it gives you the opportunity to add pockets in the exact sizes needed and in the locations that are most useful. These pockets may snap, have elasticized tops, tie or zip close. You can also make small bags of matching fabrics for shoes, soiled clothing or other items that need to be separated from the things you pack.

Sewing techniques should not be a problem since everyday methods will work when making soft luggage. The sewing machine needs to be carefully adjusted to be sure it is making a good stitch. Test seams should be made to determine the correct length and thread tension required. The seams may be sewn as conventional seams and top stitched and flat-felled seams may be used. The seam finish is required to add to the durability of the item.

Because some of the fabrics and notions may be more bulky

than those normally used, a large needle such as a size 16 or 100 should be used. Heavier thread may be preferred—especially when top stitching.

Fabrics and notions should be prepared and pretreated as for other homesewing projects if the soft luggage will be laundered. Fabrics, zippers, trims and strapping should be pre-shrunk.

Durability of fabric and notions will be important when selecting materials for luggage. The use the luggage will receive will determine how durable the materials must be. Luggage items which can be made at home include traditional suitcases, duffel bags, garment bags, backpacks, ditty bags and fanny packs. For information and instructions on making a Handy Duffel Bag, viewers can request a handout called "Luggage Made Easy" from KENW-TV.

## Rate Diet For Variety

"Eat a variety of foods" is probably the most common nutrition advice given by physicians and nutritionists.

It's also first in the list of Dietary Guidelines for Americans, released this year by the U.S. Department of Agriculture and the Department of Health and Human Services, and developed with recommendations from national nutrition organizations, the American Heart Association, the American Medical Association and the American Cancer Society.

So why is dietary variety so important?

According to Dr. Alice Hunt, a nutritionist with the Texas A&M University Agricultural Extension Service, the answer is relatively simple.

"People need over 40 different nutrients to stay healthy. These include vitamins and minerals, protein, fat, carbohydrates and water, which are found in foods," she says.

"Since no one food supplies all the essential nutrients in the amounts a person needs, it's important to eat several types of foods each day," Hunt emphasizes.

The major food groups are the protein foods, including meat, poultry, fish, eggs, dry beans and peas; dairy foods like milk, cheese and yogurt; fruits and vegetables; whole grain breads, cereals, pastas and other grain products.

Once you know the major food groups, then the question becomes, how much is enough variety?

As easy rule of thumb, says Hunt, is to remember the "4-4-2-2" guideline. A diet which contains 4 servings of fruits and vegetables, 4 servings of breads and cereals, 2 servings of protein foods and 2 servings of milk each day, has enough variety to provide an adult with essential nutrients.

The nutritionist says a recent USDA report of research conducted at Pennsylvania State University indicates that selecting different foods from within the major groups does not appear to improve nutritional quality beyond choosing foods

from among the major groups.

The report also shows that variety appears to improve the diets of certain population groups more than others, she notes. Women appeared to benefit more than men, and people who eat a small number of foods appeared to benefit more than those who ate a large number of foods.

To rate your diet for variety, simply keep track of the different types of food you eat each day, suggests the nutritionist. "Then if you find you are consistently skipping foods from one category, you may want to balance things out to improve your nutrient intake."

### CITY OR SPECIAL DISTRICT: CITY OF MULESHOE

#### CALCULATION OF EFFECTIVE TAX RATE, ESTIMATED UNENCUMBERED FUND BALANCES, AND SCHEDULES

1. Carl S. Gilbreath, Tax Assessor/Collector for City of Muleshoe, in accordance with Sec. 26.04, Property Tax Code, have calculated \$ 5329 per \$100 of value as the tax rate which may not be exceeded by more than three percent by the governing body of the City of Muleshoe without holding a public hearing as required by the code.

The estimated unencumbered fund balance for Maintenance & Operation fund: \$ -0-

The estimated unencumbered fund balance for Interest & Sinking fund: \$ -0-

The following schedule lists debt obligations that 1986 property taxes will pay:

Carl S. Gilbreath, Chief Appraiser  
July 7, 1986

#### CALCULATION OF EFFECTIVE TAX RATE

##### MAINTENANCE AND OPERATION (M&O) TAX RATE

1. 1985 total tax levy	\$ 487,633
(1985 tax rate: M&O \$ .53 + I&S \$ .0- = \$ .53 /\$100)	
2. Subtract 1985 debt service (I&S) levy	\$ -0-
3. Subtract 1985 taxes on property in territory no longer in unit in 1986	\$ -0-
4. Subtract 1985 taxes for property becoming exempt in 1986	\$ 135
5. Subtract 1985 taxes for property appraised at less than market value in 1986	\$ -0-
6. Subtract 1985 taxes used to regain lost 1984 taxes because of appraisal roll errors	\$ 2,893
7. Adjusted 1985 M&O levy (subtract #2, #3, #4, #5, and #6 from #1)	\$ 484,605
8. 1986 total taxable value of all property	\$ 94,450,000
9. Subtract 1986 value of new improvements added since 1/1/85	\$ 3,525,220
10. Subtract 1986 value of annexed property added since 1/1/85	\$ -0-
11. Adjusted 1986 taxable value for M&O (subtract #9 and #10 from #8)	\$ 90,924,780
12. Divide the adjusted 1985 M&O levy (#7 above) by the adjusted 1986 taxable value for M&O (#11 above) (\$ 484,605 ÷ \$ 90,924,780)	\$ .005329
13. Multiply by \$100 valuation	x \$100
14. Effective M&O rate for 1986	\$ .5329 /\$100

##### APPRAISAL ROLL ERROR RATE

15. Rate to raise the 1985 levy because of appraisal roll errors ( $\frac{\$ -0-}{\$ 94,450,000} \times \$100$ )	\$ -0- /\$100
16. Add rate to regain 1985 taxes lost because of appraisal roll errors ( $\frac{\$ -0-}{\$ 94,450,000} \times \$100$ )	\$ -0- /\$100
17. Total rate to adjust for appraisal roll errors	\$ -0- /\$100

##### TOTAL EFFECTIVE TAX RATE FOR 1986

18. Effective M&O rate (#14 above)	\$ .5329 /\$100
19. Add effective I&S rate	\$ -0- /\$100
20. Add rate to adjust for appraisal roll errors	\$ -0- /\$100
21. 1986 Effective Tax Rate	\$ .5329 /\$100

1986 Effective Tax Rate is the tax rate published as required by Sec. 26.04, Property Tax Code.

22. Rate required for additional indigent health care services ( $\frac{\$ -0-}{\$ 94,450,000} \times \$100$ )	\$ -0- /\$100
---	---------------

## Insect Growth

Cont. from Page 1

beet armyworm, tomato pinworm, tomato hornworm, and leafminer. These worms can have many different colors and size but most eat on the foliage of plants and can totally strip a plant if left uncontrolled. Control measures can keep plants healthy and green.

### GRASSHOPPERS

There are many kinds of grasshoppers most of which feed on any vegetation and may completely destroy plants. The young resemble the adults but are smaller and do not fly.

### LECANIUM SCALE

This common scale insect attacks numerous fruit and shade trees and ornamental plants. The crawlers are newly hatched young, are pale yellow, flattened insects which are very hard to see. The adults are dark brown, 1/8 inch long, convex, and look much like shiny raised "pimples" on the twigs and branches.

### PEACH TREE BORER

The peach tree borer is a clawing moth in the adult stage while the young are immature caterpillars. The larval stage causes the most damage to trees. After a small larva has entered the tree, it feeds in the cambium layer. Destruction of the cambium will hamper the tree's development and cause death of the tree if completely girdled.

### SPIDER MITES

Often called "red spiders", spider mites are tiny eight-legged creatures that attack a wide variety of plants and are particularly troublesome during warm, dry weather. They appear as tiny moving specks on the underside of leaves and may

## Cotton...

Cont. from Page 1

cropping and various approved conservation tillage practices, farmers might be able to work cotton into their rotations more often, he added.

The Extension economist said the U.S. Department of Agriculture has asked for suggestions as to how the conservation program should be implemented. Interested persons have until August 26 to provide written comments to the Director, Dairy, Cotton, Grain and Rice Support Divisions; ASCS-USDA; Box 2415; Washington, D.C. 20013.

Additional information may be obtained by telephoning that division at (202) 447-4542; or from local offices of the Agricultural Stabilization and Conservation Service or the Soil Conservation Office.

form fine silken webs. Infested foliage appears bronzed or rusty.

### SQUASH BUGS

Squash bugs are brownish gray to dark gray bugs about 5/8 inch long. They appear and mate in the spring as cucurbit plants begin to vine. Yellowish to bronze-brown eggs are laid in clusters on the underside of leaves. Leaves attacked by the squash bugs will rapidly and soon become blackened, crisp, and dead.

### THRIPS

Thrips of many species are pests on a variety of plants but are most serious to vegetables and ornamentals. They are slender, usually brownish or yellow, insects varying in size from less than 1/25 to 1/8 inch in length. Infested leaves have a stippled appearance similar to that resulting from mite infestations. Thrip damage occurs in early May and June to young seedling vegetable plants, and year around to flowers and ornamentals.

### WHITE GRUBS

The adults emerge in greatest numbers in early summer. Female beetles lay their eggs 2 to 6 inches deep in the soil. Grubs feed mainly on decaying vegetation at first, but later on the roots of grasses and other plants. Grubs are white in color and can cause grass to roll up like pieces of carpet.

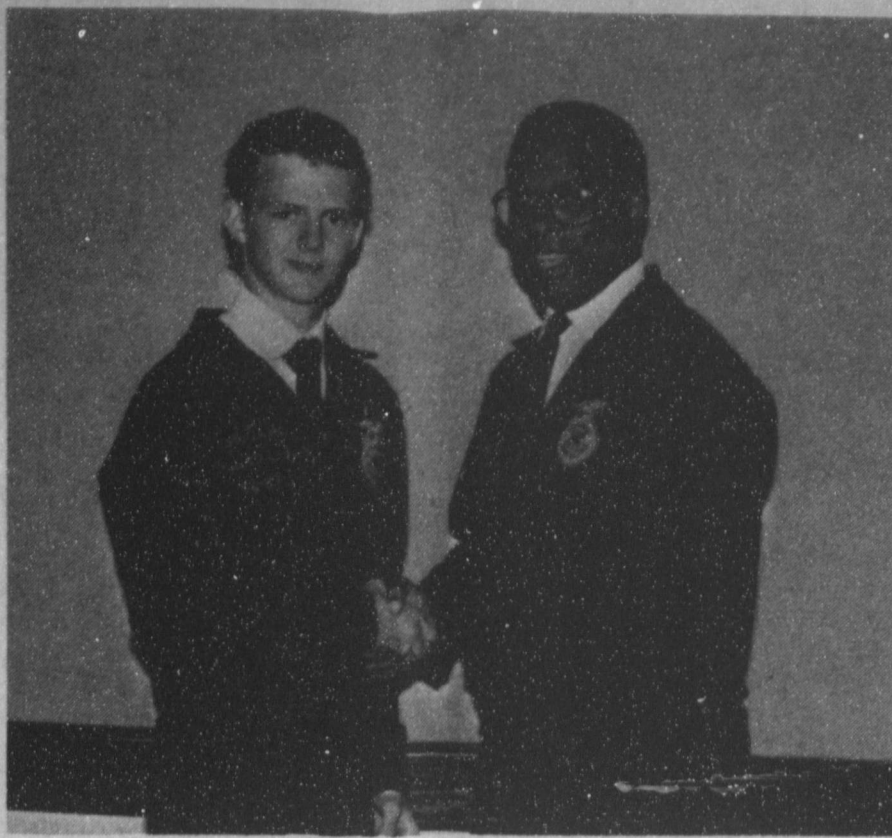

## Study focuses on impact of social support, stress on diet of older people

COLLEGE STATION — A Texas A&M University sociologist has launched one of the first detailed studies examining the impact of social support and stress on the diet and nutrition of older Americans.

The study will also reveal important information about nutritional needs of the elderly, particularly of older Texans, said project director Dr. William A. McIntosh, associate professor of rural sociology.

The three-year project is funded by a \$523,000 grant from the National Institute on Aging, National Institutes of Health. Also participating in the study is Dr. Karen Kubena, a Texas A&M nutritionist, and Dr. Wendell Landmann, a biochemist and professor emeritus of animal science.

The study focuses on 500 older residents in the Houston area and will examine their physical health, diets, nutritional status, stress levels, and social support networks. McIntosh said he wants to know whether older people who have strong friendships and family relationships tend to have better nutrition.

IN WASHINGTON—Matt Sowder, of Three Way School, is greeted in Washington, D.C. by Coby Shorter III, right, of Eagle Lake, TX, Secretary of the National FFA organization. Matt is attending the week-long National FFA Conference Program.

## Soybean Board Sets Elections

The Texas Soybean Producers Board will hold its biennial election on September 22. The terms of three board members will expire at that time.

Counties involved are District I—Deaf Smith, Parmer, Castro, Swisher, Briscoe, Bailey, Lamb, Hale, Floyd, Lubbock and Crosby; and District II—Fannin, Lamar, Red River, Bowie and Delta.

Any person within the counties involved who is engaged in the production of soybeans for commercial purposes may place his name in nomination for membership on the Texas Soybean Producers Board by submitting a petition to the TSPB signed by himself and at least ten other persons eligible to vote in the election.

All applications must be filed at least 30 days prior to the election date in order to have the name placed on the ballot.

All our knowledge is ourselves to know.

—Alexander Pope.

No man is the worse for knowing the worst of himself.

—H.G. Bohn.

The only thing a man knows is himself. The world outside he can only know by hearsay.

—Alexander Smith.

## Matt Sowder In Washington At Conference

Matt Sowder of the Three Way FFA Chapter of Maple, is attending the 1986 Washington Conference Program in our nation's capital.

The week-long program helps FFA members improve leadership skills, develop an understanding of national heritage, and prepare for more effective leadership roles in their chapters and communities.

Sessions on human relations, goal setting, and personal communications develop these skills. Personal outlook, motivation, and pride are also discussed.

Visits to Mount Vernon, the Smithsonian Institute, Arlington National Cemetery, the Jefferson Memorial and other historic sights in Washington are included in the conference.

A highlight of the week is a visit to the office of Congress-

man Larry Combest of Lubbock.

The FFA members also had an opportunity to visit both the House of Representatives and Senate chambers while Congress was in session.

His FFA advisor is Kermit Williams.

The trip to Washington was sponsored by Kay Cole of Dallas.

## Shooting...

Cont. from Page 1

stabbing victims had been taken to a hospital in Littlefield for emergency treatment.

The Lamb County Sheriff's office at Littlefield said the two brothers had been wounded during a fight at Bula, and would be transferred to a hospital in Lubbock.

Deputy Esquibel said brothers Marcos Morales and Jesus Morales each received multiple stab wounds, and were listed Monday afternoon in satisfactory condition at Lubbock General Hospital.

The deputy sheriff said the stabbings occurred during a fight between several men late Saturday night on a parking area of barracks near a cotton gin at Bula.

At presstime, no arrests had been made, and the Bailey County Sheriff's office said an investigation into the double stabbing was continuing.

The Morales brothers had to wait for awhile to be transferred from Littlefield to Lubbock. At the time they were being given emergency treatment at Littlefield, there was a major accident, and a cardiac arrest reported to ambulance personnel, all in or near Littlefield.

With two ambulances, Littlefield found more trouble when one of the ambulances got stuck so deep in a ditch soggy from the rainstorm in the area, that the wreckers had trouble pulling it loose from its muddy prison.

## Sheriff's Office Report

Arrests logged in the jail book at the Bailey County Law Enforcement Center show the following arrests for the last two weeks of July.

Two for aggravated assault: one of aggravated assault on an officer and one for simple assault.

Two for public intoxication and one on DPS warrants.

One booked for murder, and later released on \$10,000 bond, with no indictment by the grand jury.

Ray Allen Lawson, 30, DWI capias, fine, courtcosts and 72 hours jail-time.

## City Police Report

It was a fairly busy week for the Muleshoe City Police Department with two accidents, one of Friday, and another on Sunday, each involving two vehicles, and no injuries.

Also, three cases of criminal mischief were filed. One involved the removal of a street sign and damage of another sign; and the second also involved an additional two damaged street signs. The third involved a rock thrown through the window of a boat.

Two persons were arrested for bad checks and two additional charges of bad checks were filed.

## The Public is Invited to Attend a Lecture and Slide Presentation on THE GASTRIC BUBBLE

This new medical weight loss program is based on the placement of a soft, inflatable device in the patient's stomach.

## CALCULATION OF EFFECTIVE TAX RATE, ESTIMATED UNENCUMBERED FUND BALANCES, AND DEBT SCHEDULE

I, Carl S. Gilbreath, Tax Assessor Collector for Muleshoe I.S.D., in accordance with Sec. 26.04, Property Tax Code, have calculated \$ 76.34 per \$100 of value as the tax rate which may not be exceeded by more than three percent by the governing body of the Muleshoe I.S.D. without holding a public hearing as required by the code.

The estimated unencumbered fund balance for Maintenance & Operation fund: \$ 899,502  
The estimated unencumbered fund balance for Interest & Sinking fund: \$ -0-

The following schedule lists debt obligations that 1986 property taxes will pay:

[Expand worksheet as necessary to list debt obligations. If the unit needs additional space, refer the reader to the portion of the notice showing the debt schedule. See examples.]

Carl S. Gilbreath, Chief Appraiser

July 7, 1986

### CALCULATION OF EFFECTIVE TAX RATE

#### MAINTENANCE AND OPERATION (M&O) TAX RATE

1. 1985 total tax levy	\$ 1,396,760
(1985 tax rate: M&O \$ .79, + I&S \$ .00 = \$ .79 / \$100)	
2. Subtract 1985 debt service (I&S) levy	\$ -0-
3. Subtract 1985 taxes on property in territory no longer in unit in 1986	\$ -0-
4. Subtract 1985 taxes for property becoming exempt in 1986	\$ 235
5. Subtract 1985 taxes for property appraised at less than market value in 1986	\$ -0-
6. Subtract frozen M&O levy of over-65 homesteads	\$ 75,640
7. Subtract 1985 M&O taxes used to regain lost 1984 levy	\$ 48,384
8. Adjusted 1985 M&O levy (subtract #2, #3, #4, #5, #6, and #7 from #1)	\$ 1,322,501
9. 1986 total taxable value of all property	\$ 186,300,000
10. Subtract 1986 value of new improvements added since 1/1/85	\$ 5,037,546
11. Subtract 1986 value of annexed property added since 1/1/85	\$ -0-
12. Subtract 1986 value of over-65 homesteads with frozen taxes	\$ 8,028,410
13. Adjusted 1986 taxable value for M&O (subtract #10, #11, and #12 from #9)	\$ 173,234,044
14. Divide the adjusted 1985 M&O levy (#8 above) by the adjusted 1986 taxable value for M&O (#13 above) (\$ 1,322,501 ÷ \$ 173,234,044)	\$ .007634
15. Multiply by \$100 valuation	× \$100
16. Effective M&O rate for 1986	\$ .7634 / \$100

#### APPRAISAL ROLL ERROR RATE

17. Rate to raise the 1985 levy because of appraisal roll errors	\$ -0- / \$100
18. Add rate to regain 1985 taxes lost because of appraisal roll errors	\$ -0- / \$100
19. Total rate to adjust for appraisal roll errors	\$ -0- / \$100

#### TOTAL EFFECTIVE TAX RATE FOR 1986

20. Effective M&O rate (#16 above)	\$ .7634 / \$100
21. Add effective I&S rate	\$ -0- / \$100
22. Add rate to adjust for appraisal roll errors	\$ -0- / \$100
23. 1986 Effective Tax Rate	\$ .7634 / \$100

1986 Effective Tax Rate is the tax rate published as required by Sec. 26.04, Property Tax Code.

#### STATE AID/EQUALIZATION ENRICHMENT AID RATE

24. Rate to replace lost state aid or qualify for maximum equalization allotment	\$ -0- / \$100
--	----------------

# High Plains Suffers From Drought

When the High Plains suffers from an extended dry period, Dr. Darrell Rosenow wants grain sorghum that can stand it-literally.

Rosenow, grain sorghum breeder for the Texas Agricultural Experiment Station north of Lubbock, explained that late in the growing season when the soil in a field becomes dry, the stalks of many types of sorghum become weakened and the plants then lodge or fall over easily.

But the anticipated release this spring of parental and genetic stock lines resistant to lodging may march grain sorghum closer to the development of commercial varieties that will stand tall in a drought, according to Rosenow.

Throughout his career as a plant breeder, Rosenow has concentrated on converting grain sorghums from the tropics into the correct height and maturity with disease and drought resistance for production in the United States. But work tying sorghum lodging with drought tolerance began in the late 1970's, Rosenow noted, after a number of strains which had been produced experimentally and showed good lodging resistance also tended to stay green during drought stress.

Selecting sorghum lines for drought tolerance, however, has not been simple, the plant breeder explained, because of the variable times in the growing season when moisture stress can occur.

"There are two distinct types of drought tolerance in sorghum and they are expressed at two different stages of growth: Pre-flowering tolerance prior to when the sorghum heads; and post-flowering tolerance during grain filling, which is tied to lodging resistance and the 'stay green' trait," said Rosenow, who has been stationed in Lubbock since 1964. "Breeding only for tolerance during the post-flowering stage will be of little if any use when we have drought stress earlier in the season," he added.

As part of the research, Rosenow has cooperated with scientists at the TAES Center at Chillicothe where screening is for the pre-flowering drought tolerance, while most of the screening for the post-flowering trait is done at the Lubbock Station.

"We are trying to intentionally see how far we can go to get both traits into one line," he said. "And we already have some parental lines that may be able to be used by commercial

seed companies."

A proposal to release the parental and genetic lines is expected to be reviewed in College Station this spring. If the lines are released, he explained, the commercial companies could use the material to breed with their existing varieties. Rosenow said under that scenario, new commercial varieties with improved season-long drought resistance could be available for production on a large scale in three to five years.

Rosenow said some seed companies are using similar screening and selection techniques to improve drought tolerance, while others have been skeptical of drought resistance.

Rosenow said some seed companies are using similar screening and selection techniques to improve drought tolerance, while others have been skeptical of drought resistant grain sorghum because some of the yield potential may be sacrificed in the breeding process.

"From a practical standpoint however, if sorghum is grown under dryland or limited irrigation in West Texas it will not achieve its maximum yield potential anyway," Rosenow said.

He said most commercially available grain sorghums now have good resistance to drought at the pre-flowering stage, while only a few have significant post-flowering drought tolerance. When the post-flowering tolerant types researched by TAES are released, Rosenow said, seed companies should be able to speed up their breeding for the two types of tolerance which should result in season-long drought tolerant varieties.

"We also have to think in terms of more than West Texas when breeding sorghum," Rosenow said. Sorghum has a wider adaptation than most other major crops. "Also, the seed produced here is sold all across the country.

Thus, sorghums should have resistance to a wide range of moisture and lodging stress factors. Also, this stress resistance must be combined with other traits such as disease and insect resistance to be useful commercially.

# Signup For Conservation Reserve Holds New Interest

A third sign-up period for the federal Conservation Reserve Program (CRP) begins Monday (Aug. 4), and there are two major reasons for area farmers to give the program serious consideration, advises an economist with the Texas Agricultural Extension Service.

The sign-up period, which ends Aug. 15, is for the 1987 CRP, said Dr. Jackie Smith, the economist. Interested farmers should go to their county office of the Agricultural Stabilization and Conservation Service, he said.

"I think this program should be considered more seriously than before," Smith said. He cited two principal reasons:

\*Uncertainties surrounding the federal cotton program and other annual price support programs, and

\*Requirements for conservation cross-compliance, which make the CRP a more attractive alternative.

Smith said the cross-compliance provisions require producers who have been farming highly erodible land to begin implementing a conservation

plan by 1990. "In this area, it could significantly increase the cost of compliance in the cotton program and, in some cases, bring an end to program participation altogether," the Extension specialist warned.

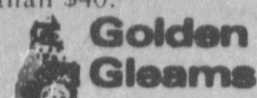

As farmers consider the possible costs of the conservation plans they must have in effect by 1990, CRP may be more attractive, Smith suggested.

Under the CRP, he explained, landowners can offer highly erodible croplands on a bid basis. If the bid is accepted, the owner gets an annual rental payment, equal to his bid, for 10 years. In return, the farmer has to establish and maintain an acceptable cover on the land and won't be allowed to harvest anything off the land during the 10 years.

The farmer will receive cost-share payments of up to 50 percent of the costs of establishing the cover.

The maximum rental rate, of bid, accepted by ASCS for this area during the last sign-up was \$40 an acre.

"Even though, to meet the goals of the CRP, many more acres will have to be accepted than in the two earlier sign-ups, don't take this as a guarantee that the maximum accepted bid will be higher," the Extension economist warned. "The maximum acceptable bid won't be announced until after Aug. 15, and could be higher or lower than \$40."

A man in good health is always full of advice to the sick.

-Menander.

I have good health, good thoughts, and good humor, thanks be to God Almighty.

-William Byrd.

Health and cheerfulness mutually beget each other.

-Joseph Addison.

Health without wealth is half a sickness.

-Thomas Fuller

**DROUGHT TOLERANCE**—Dr. Darrell Rosenow, sorghum breeder with the Texas Agricultural Experiment Station North of Lubbock, checks differences in drought tolerance of sorghum lines. Sorghums have been identified which grow with less water.

BESS EDWARDS

**Bess Edwards Funeral Rites Held Wednesday**

Funeral services for Bess Edwards, 74, were conducted at 11 a.m. on Wednesday, in the First United Methodist Church of Muleshoe, with the Rev. Bill Kent, pastor, officiating, assisted by Rev. Clarence Stephens of Denton. Interment was in Muleshoe Cemetery under direction of Ellis Funeral Home of Muleshoe.

Mrs. Edwards was pronounced dead of natural causes at her home at 8:20 a.m. Monday, by Todd Ellis, Justice of the Peace, Bailey County.

Mrs. Edwards was born May 12, 1912 at Weatherford, and married Ray N. Edwards in Portales, N.M., on September 5, 1945. They moved to Muleshoe in 1945 from Portales. She was retired secretary for the Superintendent of the Muleshoe Independent School District.

Bess Edwards was a member of the First United Methodist Church of Muleshoe, where she was active in the Wesleyan Service Guild of United Methodist Women. She was also secretary for the Muleshoe Senior Citizens organization.

Her survivors include her husband, Ray; one stepson, Horace Edwards, Lubbock; one brother, Syl Kos, Portales, N.M.; several nieces and nephews; two grandchildren and two great-grandchildren.

**Local Relatives At Noble Rites Held In Arizona**

George Randolph (Randy) Noble, 36, and son of Mr. and Mrs. Jim Noble of Muleshoe, died July 10, 1986 in a vehicle accident 13 miles south of Willcox, Arizona, near Elfrida, where he resided.

He was born Sept. 1, 1949 in Cone (TX) and lived there until moving to Muleshoe in 1962. He attended school for two years in Muleshoe before moving to Elfrida, Arizona to complete his senior year in school. He graduated from Valley Union High School in 1966.

Randy Noble was married to the former Belinda Mahaney on August 5, 1969, and they were the parents of two sons, Trent and Brad.

He farmed at Elfrida, where he earlier was named Outstanding Farmer of the Year. He was a member of the Elfrida Baptist Church, Willcox Masonic Lodge and Douglas, Ariz. Elks Lodge No. 955. Active in community and school activities, he coached and managed Little League baseball teams.

Services were held Saturday, July 12, at 2 p.m. in the Elfrida Baptist Church with the Rev. Harry McLaughlin, officiating. Burial was in the Whitewater Cemetery in Elfrida, with Masonic graveside services by the Willcox Lodge members. Services were handled by Curtis Page and Sons, Douglas, Ariz.

**Put on the Full Armour**

"Wherefore take unto you the whole armour of God"

In Paul's letter to the Ephesians, he makes a comparison of the children of God and warriors. He says that our loins should be girt about with truth, and having on the breastplate of righteousness. He makes many more comparisons that exhort us to a proper life. Another thing that Paul urges is that we gather together and worship the Lord. No part of our armour is greater than regular church attendance. Much strength for the week is derived from worshipping with others.

Complete your suit of armour... attend church this week.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, we should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in his Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

**Endangered Texas bird suffers severe blow due to heavy spring rains**

**COLLEGE STATION**—The endangered Attwater's Prairie Chicken, which is found only along the Texas Gulf Coast, suffered a major blow from Mother Nature last year, says a wildlife specialist in Texas A&M University's Department of Wildlife and Fisheries Sciences.

"The heavy spring rains just wiped them out," said Dr. Nova Silvy, a Texas A&M wildlife specialist whose research focuses on land management practices for the chickens. "The April showers last year basically drowned all the young chicks just after they hatched, or their nests were covered with water causing the embryos to die in the eggs."

Only about 874 birds have been found, down from 1,430 last year. The population is the lowest since the first census was taken in 1937, reports Silvy.

The Attwater's Prairie Chicken was placed on the federal endangered species list in 1967. The birds are distinguished by their spring mating rituals in which the males inflate orange air sacs on their necks that billow and make a sound like that made by blowing across the open neck of a bottle. The sound lets females know when males are in the vicinity and may also be used to intimidate other males.

## Texas A&M scientist develops process for sulfur-coating asphalt

**COLLEGE STATION**—A sulphur-coated asphalt pellet, developed by a Texas A&M University materials scientist, may change the way the paving industry makes the asphalt concrete used in the nation's highways.

Dr. Donald Saylak, a professor of civil engineering and a researcher for the Texas Transportation Institute, has applied for a patent on the pellets which were inspired by candy-coated chocolates. The M&M-sized pellets have asphalt centers and a sulfur coating.

Under current methods, the asphalt must be stored and blended with the sulfur at temperatures approaching 300 degrees. This heated mixture is then pumped to a mill where it is mixed with aggregate (rock) that has also been preheated to about 320 degrees to remove moisture.

The pellet concept allows both the asphalt and sulfur to be stored and handled without preheating. This provides a significant saving in fuel costs while minimizing the danger of burns to workers. Instead of being pumped to a mill, the pellets and heated aggregate are carried by conveyor belt to a mixer. During the mixing, the hot aggregate melts the sulfur coating and transfers its heat to the asphalt, Saylak said.

## Weather Signs

Of all subjects, weather is the most universal, with which practically everyone is concerned.

It's surprising, however, how little most people know about the subject. If one will take the time, he can learn the signs valuable in predicting weather.

All you need is a barometer and a wind vane. Here are several:  
 If you have a high and steady barometer, and the wind is from the southwest or the northwest, the weather will probably be fair with little temperature change for day or so.

If the barometer is high and falling rapidly and the wind is from the south or southeast, you will probably have increasing wind and rain within twelve to twenty-four hours.

If you have a high barometer, falling rapidly, and the wind is between the southeast and the northeast, the wind will increase and rain will come within twelve hours, in most cases.

### South Plains Fair Limits Barrow Show

Only 600 barrows will be accepted for the open barrow show scheduled in conjunction with the 69th annual Panhandle South Plains Fair here September 20-27, according to the general manager Steve L. Lewis.

Entries close Sept. 8 and premiums totaling \$6,850 will be offered. This is a terminal show and there will be no take-home barrows. Lewis stressed. A non-returnable entry fee of \$5.00 will be charged.

Gary Cramblett of Lamar, Colo., has been signed to judge the popular event. Other officials include David Kight, Stanley Young and Seth Ralston, superintendents.

Weight limits will be 200 pounds minimum and 250 pounds maximum. Judging will begin at 1 p.m. Sept. 21 in the Swine Barn.

Competition will be among Duroc, Hampshire, Crossbred and all other purebred barrows. Champion barrows of each division will compete for grand champion. The reserve champion barrow the division named grand champion will compete for reserve grand champion of

### Frank Piedra Funeral Rite Set At Morton

Funeral services for Frank Piedra, 90, of Morton, will be conducted at 2 p.m. tomorrow, Friday, at St. Ann Catholic Church with Father Bob Ivc, pastor, officiating. Interment will be in Morton Memorial Cemetery under direction of Ellis Funeral Home of Morton.

He died at 2:59 a.m. Tuesday in Cochran Memorial Hospital in Morton following an illness.

He was born March 12, 1896 in Charlotte, and was a retired farmer. He was married to the former Antonio DeLeon, who preceded him in death. He had resided in Morton for 30 years.

Frank Piedra was a member of St. Ann's Catholic Church.

His survivors include one son, Thomas Piedra of Borger, and a daughter Maria Leal of Morton. One daughter, Lupe Cardona, preceded him in death in 1970. He is also survived by 15 grandchildren and 16 great-grand children.

the show.

The top 4 division winners will collect \$150.00 each, while the grand champion barrow will take home an additional \$1,250.00 and the reserve champion barrow will pick up \$1,000.00. The latter two also will receive trophies.

Last year's winner was exhibited by Will Winter of Idalou.

Six stage shows have been scheduled for Fair Park Coliseum during this year's eight-day run. George Strait will return for 7 p.m. and 9 p.m. shows on opening day to launch the exposition. The remainder of the lineup includes Merle Haggard, 7 p.m. only, Sept. 21; Sawyer Brown, 7 p.m. only Sept. 24; Charley Pride, 7 p.m. only, Sept. 25; Lee Greenwood, 7 p.m. only Sept. 26 and Ronnie Milsap, 7 p.m. and 9 p.m. Sept. 27.

All seats are reserved and all tickets for all shows are \$10.00 each.

Tickets may be obtained at the fair office, 102 E. Broadway, or by writing to Show Tickets, P.O. Box 208, Lubbock, Texas 79408. Mail order requests, which must be accompanied by a stamped, self-addressed envelope, will be processed in the order in which received.

Many free attractions also are being planned for the 1986 fair.

Dorcas R. Hardy, new Social Security head:

"Social Security was never meant to be the total, absolute, only retirement funding mechanism..."

### Scott and White hospital begins screening program for colorectal cancer

TEMPLE—Research on colorectal cancer, the third most common form of cancer with a death rate of more than 50 percent, may receive a significant boost thanks to a new screening program at Scott & White Hospital, said a Texas A&M University faculty member studying a new test procedure.

The new Scott & White program, designed to handle up to 10,000 patients, is used to detect polyps and cancer before symptoms have appeared, said medical director Dr. Monte Anderson, an assistant professor of internal medicine with Texas A&M's medical school.

A goal of the program is to cut the colorectal cancer death rate by half. More than half of all colorectal cancer patients die from the disease within five years, said Anderson.

But he said he also foresees the screening as a major contributor to scientific data and research on colorectal cancer, which is diagnosed in 130,000 new cases each year.

He said the tracking of patients by computer will lessen the chances that their history will be incomplete.

"There's a lot that researchers and clinicians just don't know about colorectal cancer, and in our program we will be collecting detailed data anytime we do something," Anderson explained.

The screening program will be available to Scott & White patients and to patients referred there who will receive test results through their primary physician, he said. Enrollment is free and standard fees are charged for testing.

Life is not merely being alive, but being well.

#### SCHOOL DISTRICT: THREWAY INDEPENDENT SCHOOL DISTRICT

#### CALCULATION OF EFFECTIVE TAX RATE, ESTIMATED UNENCUMBERED FUND BALANCES, AND DEBT SCHEDULE

I, Carl S. Gilbreath, Tax Assessor/Collector for Threway I.S.D., in accordance with Sec. 26.04, Property Tax Code, have calculated \$ 1,184.99 per \$100 of value as the tax rate which may not be exceeded by more than three percent by the governing body of the Threway I.S.D. without holding a public hearing as required by the code.

The estimated unencumbered fund balance for Maintenance & Operation fund: \$ 150,000

The estimated unencumbered fund balance for interest & Sinking fund: \$ 0.

The following schedule lists debt obligations that 1986 property taxes will pay:

[Expand worksheet as necessary to list debt obligations. If the unit needs additional space, refer the reader to the portion of the notice showing the debt schedule. See examples.]

Carl S. Gilbreath, Chief Appraiser

July 7, 1986

#### CALCULATION OF EFFECTIVE TAX RATE

##### MAINTENANCE AND OPERATION (M&O) TAX RATE

1. 1985 total tax levy (1985 tax rate: M&O \$ 1.18 + I&S \$ .00 = \$ 1.18 / \$100)	\$ 464,456
2. Subtract 1985 debt service (I&S) levy	\$ 0.
3. Subtract 1985 taxes on property in territory no longer in unit in 1986	\$ 0.
4. Subtract 1985 taxes for property becoming exempt in 1986	\$ 0.
5. Subtract 1985 taxes for property appraised at less than market value in 1986	\$ 0.
6. Subtract frozen M&O levy of over-65 homesteads	\$ 865
7. Subtract 1985 M&O taxes used to regain lost 1984 levy	\$ 1,645
8. Adjusted 1985 M&O levy (subtract #2, #3, #4, #5, #6, and #7 from #1)	\$ 461,946
9. 1986 total taxable value of all property	\$ 40,025,990
10. Subtract 1986 value of new improvements added since 1/1/85	\$ 648,320
11. Subtract 1986 value of annexed property added since 1/1/85	\$ 0.
12. Subtract 1986 value of over-65 homesteads with frozen taxes	\$ 303,590
13. Adjusted 1986 taxable value for M&O (subtract #10, #11, and #12 from #9)	\$ 38,984,180
14. Divide the adjusted 1985 M&O levy (#8 above) by the adjusted 1986 taxable value for M&O (#13 above) (\$ 461,946 ÷ \$ 38,984,180)	\$ 0.011849
15. Multiply by \$100 valuation	× \$100
16. Effective M&O rate for 1986	\$ 1.1849 / \$100

##### APPRAISAL ROLL ERROR RATE

17. Rate to raise the 1985 levy because of appraisal roll errors \$ 0.00 ÷ (\$ 0.00) × \$100	\$ 0.00 / \$100
