FIFTH SUNDAY MEETING

of the Medina River Association, to
be Held with the Junction Bap-
tist Church, May 26 to
30, 1915.

WEDNESDAY

8:00 p. m. Devotional—Fritz
Bierschwald.

8:30 p. m. Sermon—T. C. Lee

THURSDAY

9:00 to 11:00 a. m.—Evangelism:
The Sinner's Condition—C. D.
Potts, 30 minutes.

How to Win the Sinner from
his state.—S. F. Marsh, 30 min-
utes.

What is a Soul-winning Church?
T. F. Huffman, 30 minutes.

How much time annually should
a pastor use away from his pas-
torate in a protracted meeting?
—Rev. Moses, 10 minutes.

How can the Laymen best assist
their pastor during his absence?
from his pastorate? A pro-
tracted meeting.—J. B. Riddle,
30 minutes.

11:15 a. m. to 12:00 Sermon—Rev.
Moses.

2:00 to 4:30 p. m. The Value of our
Associational Missions—A. F.
Robb, 30 minutes.

Praying for our Association Mis-
sionary—T. C. Lee, 10 minutes.
Praying for our pastors in this
Association.—Wilson Finch, 10
minutes.

Praying for the Churches in this
Association—J. B. Riddle, 10
minutes.

The Duty of the Church to the
sick—C. E. Painter, 30 minutes.

The Duty of the Church to the
Poor—S. F. Marsh, 30 minutes.

Should the Baptist pastor attend
every Baptist State Convention?
J. B. Riddle, 30 minutes.

8:00 p. m. Devotional—L. H. Bil-
lings.

8:30 p. m. Sermon—C. D. Potts.

FRIDAY

8:00 to 9:00 a. m. Devotional—
Rev. Miller.

8:00 a. m. to 12:00 Sunday School
Superintendence—J. B. Riddle,
30 minutes.

How the scholars and teachers
should study their lessons—Rev.
Moses, 30 minutes.

The art of getting attention—
T. F. Huffman, 30 minutes.

The art of imparting the lesson—
Wilson Finch, 30 minutes.

How to recite the lesson—S. F.
Marsh, 30 minutes.

General Discussion 30 minutes.

10 to 11:30 p. m. Prayer. Family
Prayer—Rev. Moses, 15 min-
utes.

Mid-week Prayer meeting—C. D.
Potts, 15 minutes.

2:30 Ordination of Deacons, Ord-
ination Sermon—J. B. Riddle.
Presbytery, pastors of Medina
Association.

8:00 p. m. Devotional.

LUTHERANS DEDICATE
CHURCH.

Last Sunday the dedication of

the newly built church at Roose-

vett took place, although the un-

favorable weather reduced the

expected audience remarkably.

There was a representative crowd

to witness the impressive dedica-

tion services.

The dedication ceremony was

conducted by Rev. B. Schleifer.

By him also the dedication ser-

mon was delivered, the subject

of which was "What Should be

Done in This House to Make it a

Temple of the Lord.

The festival sermon was

preached by Rev. A. Wolff in

which he gave encouragement

to build up the spiritual temple

of this community.

In the afternoon Rev. A. Wolff

entertained the audience by de-

scribing the development of the

Sunday School and the young

people's association of his con-

gregation.

During the morning service

Mrs. Theo Hunger played the or-

gan.

From Junction the following

were present: Mr. and Mrs. R.

Leckert, Mr. and Mrs. William

Mueller, Miss Bertha Loeffler,

Mr. Wm. Simon, Mrs. Theo Hun-

ger, Miss Gertrude and George

Hunger and their brothers.

Bring in that sewing machine

and let Jones fix it.

If you want to go to Kerrville—

or any other place—phone East-

man and Tinsley at Junction.

Their service car will take you in

any direction any time. When

they start with you they take

you there.

Commencement Program

Junction High School

Class 1915

Invitations are out for the Commencement exercises of Class
1915, Junction High School, which are to be held in Hankins Riley
Hall Monday evening, May 24. Class roll gives following list of
graduates: Mattie E. Hodges, Jessyee Beatrix Smith, Ruth L.
Stevenson, Lottie Heyman, James Alton Miller, Allen E. Tobey,
Loma Kelley, Effie Roy Blackburn, Clyde C. Randolph, Lodie L.
Tomberlin, Doris W. Hokekamp, Flora Constance Eckert, Elizabeth
Nethery. Class colors: Emerald Green and Gold. Motto: "Noth-
ing Without Labor." The program follows:

Gathering Flowers in May.....Class
Salutatory—"On the Honor Roll,".....Loma Kelley
Life's Merry Morning.....Misses Durst and Ray

WHEN YOU WANT ANY KIND OF
MONUMENT

Hundreds
of designs
to select
from.
Samples of
ALL KINDS
Marble and
Granite

YOU WILL SAVE MONEY
and be assured of SATISFACTION

Scores of beautiful monuments in various parts
of the Kimble country attest our service. Many
pleased customers to which we refer you. Our
prices include all inscriptions and monument com-
plete set up in its place, and there's not a cent of
money due till this is done and you are satisfied
and well pleased with the job. About the first thing
we did when we got big enough was to help erect
monuments—guess we ought to know how it's done.
The fellow that tells you we can't "out" up work
like his is misleading you. We guarantee to
duplicate any monument ever erected. Prices run
from \$10 up to as high as you care to pay. Let us
bring our designs and figure with you. We will
appreciate the opportunity. Buy from a home man.

ARBITRATION DEALT A STAGGERING BLOW

LABOR LEADERS DECLARE
CARDS WERE STACKED ON
THEM IN WAGE AWARD.

Will Find Out Who Was Responsible
for Nagel President Wilson or
the Mediation Board.

Chicago, May 10.—"Arbitration as a means of settling disputes between capital and labor has received one of the greatest blows in its history."

That is the opinion of Warren S. Stone, grand chief of the Brotherhood of Locomotive Engineers, as expressed after it was agreed to accept the award of the arbitration board in the dispute between ninety-eight western railroads and their 65,000 employees.

"The principle of fair arbitration," said one, "are good, but this was not argued. However, we agreed to accept the award. But somebody is going to answer to these 65,000 men for the appointment of Charles D. Nagel of St. Louis as one of the neutral arbiters. We're going to know who is responsible for his selection as a 'neutral' arbitrator. If it was the board of mediation and conciliation, well and good. If it was President Wilson, well and good, but we're going to know."

"The cards were stacked against the brotherhoods in this case from start to finish. It is no uncommon thing for a judge to be impeached when it is proven he has financial interests in a case he decides or tries to decide. It's one of the first things they ask a juror. Yet in this case, with 65,000 men affected, instead of one or two or five, a man set on that board as a neutral arbitrator who himself was a holder of railroad securities and closely connected with railroad interests all his life."

Stone's views were echoed by other labor leaders, many of whom were even more bitter than the engineers' chief.

"As we understand the board of mediation and conciliation," said W. S. Carter, president of the Brotherhood of Firemen, "close identity with the railroad and financial interests makes a person desirable as a neutral arbitrator in arbitrations of wage disputes between railroads and their employees. With this we disagree. We hold that it would have been just as reasonable to select Sam Gompers, president of the American Federation of Labor as a neutral in this arbitration as to select Mr. Nagel. Both probably are intensely honest and each is controlled by what the socialists call 'class consciousness.'"

Regarding the future of arbitration as a means of settling disputes, Stone was undecided. The men, he said, were very bitter in this case. Whether they would consent to arbitration after this, he didn't know.

"But I can tell one thing," he said. "Before we accept arbitration again, we're going to know the cards are not stacked against us."

"We're licked all right, and we're going to accept this award but there will be a different story to tell the next time we sit in a game like this."

Charles D. Nagel resented the criticism directed at him by heads of the labor unions. The criticism, he declared, was "the only phase of the matter he would discuss, and that was unfair, unjust and unwarranted."

"It is a part of the plan of publicity used in such matters," he declared, "and means nothing besides that."

W. L. Park, vice president of the Illinois Central, declared the railroads regarded the award as being liberal with the men. He did not regard the matter as "satisfactorily advancing questions of standardization."

GOOD ROADS MEN

CALL ON GOVERNOR

As Result of the Conference Highway Legislation Will Probably Be Submitted.

Austin, Tex., May 10.—Members of the legislative committee of the State Good Roads Association, after an appointment conference with Governor Ferguson this afternoon, stated that they felt fully assured from his attitude that he would submit the subject of highway

legislation at the current session. The committee included President John W. Warren and Vice President D. E. Colp of San Antonio, Secretary Homer D. Wade of Stamford, Engineer George D. Marshall of the Agricultural and Mechanical College, and Representative Leonard Tillotson. These were reinforced by several members of the House Committee on Roads, Bridges and Ferries, including Judge Rilar of El Paso, who is the co-author of the high commission bill which it is proposed to introduce at the present session.

The Governor told the committee frankly that he was very much interested in any project that would bring about better roads and that he was of the belief that the State needed a uniform road law. He asked the committee to submit any bill or bills it might approve on the subject in order that he might take them under advisement as soon as the appropriation bills are out of the way. He made it plain that it would not be his disposition to submit the good roads and other subjects until pending measures virtually have been disposed of. The committee did not ask him to state definitely whether or not he would submit the State Highway Commission subject, but the inference seems plain that affirmative action by the Governor will be the result.

It is almost as good as settled that the Governor will not submit penitentiary legislation at the present session. In view of the defeat of the emergency penitentiary bill in the closing days of the regular session, belief has been strong in some directions that general legislation along this line would be submitted at the special session. The matter was taken up with the Governor today with results that were not at all reassuring. General penitentiary legislation would cause almost endless discussion and consume a great deal of time, and in view of pending measures and the fact that other matters are certain to be submitted, there would not be left sufficient time to do the big subject justice.

The Agricultural and Mechanical College made practically a clean score in its contest with the senate finance committee this afternoon and was allowed a fat budget without material change in the original estimates set down in the educational section of the general appropriation bill for the next two fiscal years. President W. B. Bizzell and members of the faculty, together with members of the board, were before the committee and expressed themselves as being highly pleased with the handsome manner in which the institution is to be taken care of out of the State treasury.

For the extension work of the college \$37,970 is allowed the first year and \$65,945 the second. Federal aid under the Smith-Lever act will double these amounts. For more than two hours this afternoon Clarence Ousley, head of the extension department, was before the House Committee on Appropriations in the interest of the department. His sole argument was in opposition to a disposition on the part of the committee to reduce the total asked for carrying on the work.

On motion of Senator Nugent the senate committee allowed the Agricultural and Mechanical College \$150,000 for a department of veterinary science and an equal sum for a new agricultural building. Another item of \$150,000 was allowed for an auditorium and \$90,000 for a mechanical engineering building.

Senator Hudspeth secured the insertion of \$15,000 for the establishment of a goat experimental station at or near Del Rio to be under the direction of Professor Youngblood.

ASQUITH ASSERTS

PEOPLE MEET ISSUE

Premier Says Clerks in Many Lines Are at Front and the Women Do Home Tasks.

London, May 10.—Premier Asquith, addressing a meeting of a committee formed to encourage recruiting among employees in the wholesale and retail distributing trades of the country today, said that out of 790,000 clerks, commercial trav-

elers and other workers in these trades, 430,000 have joined the army.

Mr. Asquith pointed out what women had done to release men for the army. Up to April 24 more than 50,000 women had enrolled on the war register initiated by the board of trade. In one of the largest engineering works in New Castle, in the department devoted to manufacture of shells, he saw three or four thousand women at work. If that could be done in an occupation so far removed from the normal activities of women, it ought to be a far easier task in other trades.

The premier insisted that the people recognized the gravity of the war and do not have to be flogged or goaded by rhetorical incitement before they can be induced to obey the call of duty.

NEED FOR MANY MORE WAREHOUSES

Present System in the Cotton Belt Found to Be Full of Defects.

Washington, D. C., May 10.—The cotton warehouses already in existence are ample in aggregate storage capacity, according to a recent survey made by the United States Department of Agriculture, to store as much of the crop as there is any need for, but they are poorly distributed. The best are not available to the farmer and the cargoes of the others are higher than he is disposed to pay. These facts complicate the financing of the crop, and are largely responsible for keeping so many cotton farmers under the blight of the credit system. A better system of warehouses would do much to help the situation.

Cotton, according to the government specialists, is considered the very best collateral, and bankers and business men in general are willing to lend money on it at lower interest than on real estate. An essential condition is, however, that the cotton be properly stored and insured. At the present, however, this is very rarely done. The farmers are accustomed to dispose of their crop at the earliest possible moment and in the nearest town. Much of the crop, if not all of it, is frequently pledged in advance, in order to obtain supplies for the farmer. Even when the price drops as low as it did in the fall of 1914, the need for immediate cash induces the farmer to depress the market still further by throwing all of his cotton upon it. If this is not done much of the crop is left insufficiently protected and, suffers what is known to the trade as "country damage."

On the other hand, it is pointed out in a new publication of the United States Department of Agriculture, Bulletin 16, "Cotton Warehouses," that an adequate warehouse system would enable the farmers to store their cotton at prices lower than those charged for the same service now because the insurance rates on cotton stored in a standard warehouse would be much lower than at the present time. Since cotton is regarded as such a safe collateral, the merchant would be willing to extend time to the farmer if warehouse receipts were deposited with him as collateral. The local bank would take these receipts from the merchant as further accommodation, and the larger bank, from which the local has in all probability obtained the loan, would also extend time. In this way the crop could be marketed gradually and prices stabilized in consequence.

Moreover, such a system would tend to free the farmers, especially those of the tenant class, from the endless chain of debt. It would not, of course, end at once or completely the credit system by which the supply merchant sometimes obtains interest of from 25 cents to 35 cents on a dollar's worth of supplies. If, however, such cotton as was not absolutely necessary to settle accounts was stored and economy in living practised, many of the more determined growers should in the course of two or three years be able to place themselves on a cash basis.

At the present time the best warehouses have been put up by

factories and mills for their own uses, and are of no service to the farmer. The owners of small warehouses in which the farmer can store his cotton are usually losing money on the investment largely because of poor construction and correspondingly high rates of insurance. The government investigators present a number of interesting statistics to show that in many cases it is actually more expensive to put and operate an inferior warehouse than in Georgia and North Carolina the insurance rate is reduced about 80 per cent by the use of sprinklers. Unquestionably, says the report, a great saving could be affected by the erection and proper equipment of modern warehouses. Assuming the annual crop to be 16,000,000 bales, a sufficient number of such warehouses could be constructed and equipped with automatic sprinklers for \$64,000,000 or less. If all of this crop were to be stored for six months the saving in insurance alone would be approximately \$7,000,000. As a matter of fact many of the existing warehouses could be remodeled satisfactorily.

The bulletin does not attempt to give any details of an ideal warehouse system, and there are many difficulties in the way of the establishment of such. It does, however, assert that improvement in this respect will do much to make cotton growing a more stable industry.

INDIANS GIVE THOMAS ROACH HAWK FEATHER

Muskogee, Okla., May 1.—Six silent, stately, full-blooded Indians of the Cherokee Night Hawk clan filed solemnly into the government Indian bureau here today and through an interpreter called for Thomas Roach, the Cherokee Indian who is in the government service.

They presented him with a large Hawk feather, thereby knighting him as a member of the clan. "You have always been our friend. We appreciate it. We bring to you this feather from the Hawk as a sign of our everlasting friendship," said the leader.

Then the procession filed out as silently as they came.

Ferguson Names Hugh Black Austin, Tex., May.—Hugh G. Black of Galveston was today appointed by Governor Ferguson as a member of the Texas naval militia board, created under the act of the last legislature providing for the Texas naval militia. Mr. Black and the governor constitute the board to take steps for carrying out the provisions of this law.

CALL AT 222 TRAVIS STREET

ASK FOR BILLIE

TUBERCULOSIS IN CHILDHOOD.

(By Dr. Theo. Y. Hull.)

Ordinarily I would not presume to inflict upon you another paper upon tuberculosis. However, the importance of this disease, the relationship it bears to individual and racial efficiency, the frequency with which it appears in early life, and the direct connection between infant infection and adult manifestations induces me to call your attention to tuberculosis in childhood. The tubercle bacillus has been definitely known as the causative factor in tuberculosis for a third of a century, and its many and varied characteristics have been thoroughly studied. Yet we have made little, if any, progress in combating the disease. Statisticians tell us 160 in every 100,000 of our population die of tuberculosis annually, that is, the death certificates on file in the various States and from which the statisticians make their reports, so declare. It is highly probable that were all the cases actually dying of the disease so recorded, the number would exceed 200 per 100,000. No doubt many deaths attributed to pneumonia, chronic bronchitis, chronic diarrhoea, and even malaria, were primarily due to tuberculosis. In fact, it is really questionable whether at the present time, in spite of all our sanitary knowledge, the disease is not actually increasing in many parts of the United States.

While as scientists we have studied this parasitic micro-organism for over thirty years, while as sanitarians we have preached for twenty years the doctrine of the annihilation of the tubercle bacillus, and while as pathologists for two centuries we have subjected every abnormal structure in the body to microscopic examination, yet as physicians in over 2,500 years of daily experience with the disease, we have not at this late date evolved an entirely rational treatment based upon the physical, chemical, pathological and nutritional changes that must result from the toxemia following infection. In

truth, we are still treating very much as the early Greek and Roman followers of Aesculapius did consumption, rather tuberculosis.

It is now conceded that infection very largely occurs in childhood, before the individual resistance to bacterial invasion has been fully established. This fact should command our attention, since both prevention and treatment demand the recognition of the disease at the earliest possible moment. It can be safely said that could infection in childhood be prevented, we would have little disease in adult life, and it can be as safely said that could the disease be identified during the early years of life, before pathological changes have occurred, the death rate might be greatly reduced, the average life greatly prolonged, and the individual efficiency greatly increased. The tuberculosis problem thus presents not only a medical, but a sociological aspect.

A. Calmette, noted for his studies in tuberculosis, was responsible for the statement that in a certain French city only 7 to 10 per cent of the people escaped infection during their whole lives; while 25 per cent died as a direct result of infection, and 65 per cent more were carriers of occult tuberculous lesions. Reports from various European cities indicate that tuberculous infection is all but universal, and Cornet says, that in Germany every one has a little tuberculosis.

Those who have much to do with the treatment of children are aware of the fact that tuberculous infection is very frequent in childhood, and furthermore, that it regularly increases in frequency with age. The advent of the tuberculin test, and particularly the cutaneous test, has enabled clinicians to determine this frequency, not only in adults, but in children. Ganghofner reports that of 462 clinically non-tuberculous children under 14 years of age, 38 per cent reacted positively to the cutaneous test, while Mueller found 24 per cent of 949 children of the same ages responded positively to the same test. Aver-

aging the finding of many clinicians in many thousand cases, we find that about 30 per cent of all children under 14 years of age are infected. As a result of the studies of von Pirquet and others, we learn that the frequency of such infection increases regularly and rapidly with years. Among 988 children of various ages tested, the result was as follows:

At 3 months none reacted; at 3 to 6 months, 5 per cent reacted; at 6 to 12 months, 16 per cent reacted; at 1 to 2 years, 24 per cent reacted; at 2 to 4 years, 37 per cent reacted; at 4 to 6 years 53 per cent reacted; at 6 to 10 years, 57 per cent reacted; at 10 to 14 years, 68 per cent reacted; at over 14 years, 90 per cent reacted.

These figures by von Pirquet represent very nearly the average of other observers, although those of some are higher. Calmette, Gryse and Letulle, in 1226 children, report the following result (Lille, France):

Under 1 year, 8.7 per cent reacted; 1 to 2 years, 22.1 per cent reacted; 2 to 5 years, 53.8 per cent reacted; 5 to 15 years, 81.4 per cent reacted; over 15 years, 87.7 per cent reacted.

In interpreting these results we must bear in mind that a positive tuberculin reaction indicates infection, not necessarily clinical tuberculosis. The test, however, is never positive in the absence of infection; and on the other hand, there are certain conditions under which infected persons may not yield a positive reaction, such as very acute tuberculous infection, military tuberculosis, tubercular meningitis, rapidly progressing pulmonary tuberculosis, in the last stage of chronic tuberculosis, and in the presence of other severe infection. This latter condition must be borne in mind in making tests for tubercular adenitis.

While the average findings of the many observers indicate to a practical certainty the frequency of tuberculous infection, they do not indicate the frequency of tuberculous disease. It is estimated that about 25 per cent will develop manifest tuberculosis. In the city of Lille, France, above referred to, it was found that 24 per cent developed active disease, and that 76 per cent escaped.

Some attempts have been made to draw definite conclusions from the intensity of the reaction. In general, no reaction indicates no infection; an intense reaction recent infection, and a mild reaction old quiescent phthisis. Even a positive reaction must be interpreted in the light of other conditions that may exist. A tuberculous patient may be suffering from symptoms due to other causes. A positive reaction may in such cases lead to erroneous conclusions. In the whole, a positive tuberculin reaction in a given case must be taken as confirmatory evidence.

Localization: The manifestations of tuberculosis in early childhood are different from those in the adult. The evidence of acute and progressive changes is usually absent. The reason for this variation may be found in the difference in the anatomical structure of the tissues in the child and the adult. The skin and mucous membrane in the child are much more permeable than the same structures in the adult; the stomata and pores are larger and the lymph vessels broader and more numerous. The tubercle bacillus finds less resistance to passing either the skin or the mucous membrane and finding its way to the glands of the neck, the bronchi or the intestine. On the other hand, these structures in the adult offer great resistance and the bacillus usually finds lodgment in the skin or mucous membrane. These facts led Cornet to propose the law of localization. This law may be stated in these words: the tubercle bacillus develops as a rule in the organ that is susceptible at the point of entry (the skin or mucous membrane) or in the nearest lymph glands (cervical, bronchial or mesenteric). For instance, in the case of the child, the bacilli rubbed into the skin of the head penetrate this protective organ readily and find lodgment in the cervical glands.

Bacilli pressed into the mucous membrane of the mouth may find their way to the same glands; those in the same organ of the bronchi to the bronchial glands, and those in the intestine to the mesenteric glands. This passage of the bacillus is accomplished without leaving any trace of its passage, and we have the glandular enlargements so common in childhood. In the adult the disease develops at the point of entry. This lodgment is manifest in tuberculosis of the skin, tuberculosis of the lung, and tubercular ulceration of the intestines.

In the case of infection by inhalation, the greater amount of the foreign particles in the air are deposited long before reaching the smaller bronchi. The lymph glands situated along this tract are natural filters to which pass the foreign particles, including bacteria, so deposited. The tubercle bacillus especially, because of its small size, readily passes through the bronchial mucous membrane and finds lodgment in the peri-bronchial lymph glands, setting up the usual chronic processes. This is the condition so frequently seen in infancy, tuberculosis of the apices being rarely met.

Channels of Infection: The tubercle bacillus may enter the body at any point. This is especially true in childhood. Infection, however, usually occurs, (1) through inheritance, (2) through the air passages, and (2) through the digestive tract.

In speaking of inherited tuberculosis it is well to bear in mind just what is meant by the term inheritance. In the restricted sense it implies germinal transmission, the passage of the bacillus with either the sperm or egg cell. This probably ever occurs in tuberculosis. As usually employed, inheritance means prenatal infection, which may occur at any time between conception and birth. If the disease is actually present at the time of birth, it is spoken of as congenital tuberculosis. If, on the other hand, infection has occurred, and the bacilli become latent, it is called hereditary tuberculosis. This must be distinguished from hereditary "predisposition," which is quite another thing. For a long period, and by the ablest clinicians, heredity was considered the chief source of tuberculosis, and it is noteworthy that the pendulum is today swinging in that direction. To what extent infection occurs in this way we do not know, but that the tubercle bacillus may pass from mother to foetus prior to birth is certain. From the more recent studies of the subject we must conclude that inheritance in the sense of prenatal infection, though not the chief source of tuberculosis, is an important source. Post natal infection usually occurs either by the direct inhalation of the bacillus, or through their ingestion with the food. Following the doctrine of the theory of inheritance came the almost universal belief in infection through the respiratory tract. Even in infants the inhalation of the bacillus was assigned the chief, if not the sole part. Among tuberculous people the opportunity for such infection is certainly great. Especially so for the child creeping upon the floor. In other words, the opportunity for infection by this method was accepted as proof positive of such infection. But a doubting Thomas arose to ask if this be true, why the bronchial glands became so frequently diseased in children, and primary tuberculosis of the mucous membrane of the larynx and the bronchi so rarely so.

(Continued next week.)

PRISONERS MAKE ESCAPE.

Muskogee, Okla., May 10.—While Charles Huddleston and Dallas Baker, two young prisoners, were sawing their way through the steel bars and out of the county jail here today, James Harris and Charles Hines, two county prisoners working in a convict road camp, were beating up R. Deferri, a camp guard. All made their escape.

This makes nine prisoners who have effected their escape from the county within the past three weeks.

Exclusive rights granted this paper in its territory.

Foster's MAY 1915, Weather Chart.

THIS WEEK'S FORECAST

Average temperatures of May will be close to normal but much warmer before middle of month than from 15 to 25. Hot wave will come in about 23. Severe weather is expected from April 29 to May 9 and severe storms May 19 to 25. Drouth will be most severe in middle northwest May 9 to 15. Most severe storms are expected not far from May 6 and 23. Most rain in southern states. Dry in Russia and drouth in Central Africa. Excessive rains in Australia, the Philippines and southern China. The rain month that is expected to produce the rains as mentioned above covers April 20 to May 20.

Treble line represents seasonal normal temperature, the heavy black line the predicted departures from normal. The black line trending upward indicates rising temperature and downward indicates falling temperature. Where the heavy temperature line goes above normal indications are for warmer, and below cooler than usual. The 1 indicates when storm waves will cross meridian 90 deg, moving eastward. Count one or two days later for east of meridian 90 deg, and one to three days earlier for west of it. Warm waves will be about a day earlier and cool waves a day later.

COIN IS ROLLING IN.

The Manufacturers' Record is pleased to go on the house-tops and proclaim:

"Directly or indirectly the South is sharing in the export movement, which in the first nine months of the current fiscal year has attained a value more than \$36,000,000 greater than in the same period of the preceding year, and which has made a balance as between exports and imports of nearly \$700,000,000 in favor of the former."

WILL GET FACTS FIRST HAND

President Wilson to Hear Story of Mexico from West.

Washington, D. C., May 10.—The state department and the president expect to have the benefit of Duval West's Mexican observations in the course of a week.

President Wilson's personal representative has left Vera on the steamer Morro Castle for Havana. He will remain two days in Havana and in another three days should be in Washington.

Good times are ahead for those
who go after them.

All the world loves a lover, but
the maiden loves him best of all—
if his cash holds out.

Gentle spring—but the subject
is too overworked, time worn
and bedraggled for our versa
tile pen.

With good times hanging onto
our coat tails the proper stunt
is for us to stop yelling "wolf"
and go to work.

A dollar spent on the streets
of Junction is worth ten times
the amount to the people who
have to walk on them. Spend it!

Clean up! Paint up! Screen
up! Boost up! Lift up! Cheer
up! Look up! Dig up! Tune
up! And all together to make
the knocker shut up!

Only our well known neutral-
ity prevents our expressing an
opinion of the fellow who reads
his neighbor's paper and then
gives the paper a roast.

Commissioners Court is now
in very busy session here, sit-
ting as a Board of Equalization.
Their work will continue for sev-
eral days yet. It is expected
that Kimble's taxation will be
placed on a more proportionate
basis when their work is com-
plete. "Here's hopin'!"

HORSE BUYER COMING.
Gorensky, the horse buyer, of
San Antonio, will visit Junction
again May 22 to buy horses.
Horses wanted 15 to 18 hands
high. Remember the date, and
bring in your horses.

LOST—On 19th of April a dark
gray overcoat, somewhere be-
tween Hill ranch on North Llano
and Bear Creek. Thought until
recently coat had been left at
Hill ranch, but it now appears
it was lost somewhere along the
road. Suitable reward for its
return to Citizen office, or to the
undersigned.

Miss Cowser Entertains on
Friday Night.

May 7th Miss Lucy Cowser
entertained the Clover Club.
There were eight boys invited to
make an even number of girls
and boys.

Delightful games and contests
were played throughout the even-
ing. Freddie Mudge and Esther
Mueller winning one prize and
Rowland Martin and Lucy Cowser
the other. A delicious sup-
per was served at ten o'clock.

The yard was the play ing
ground. Apples were hung in
the trees and the boys got them
for the girls.

On account of the cool air all
adjourned at 10:30.
Those present were Flora and
Esther Mueller, Ruth Baker,
Natalie Sandherr, Cecil Martin,
May Louise Prentice, Brown
King, Toot and Bill Hamer and
Freddie Mudge.

Miss Ethel Scarborough and
Roy Baker came as chaperones.

SOUTH LLANO NEWS

Too late for last week.

Henry Abel and brother Joe
are just in from Orange New
Mexico visiting their sister Mrs
Joe Abbott.

Rev. Ely preached at the Ever-
green Church last Sunday,
quite a crowd attended the
meeting.

Ernest Bartley and Leslie Tay-
lor made a flying trip to Junc-
tion Monday morning.

We are sorry to report Mrs
Jno. Hodges on the sick list this
week.

Since the big rains the grass
and weeds are about to get the
best of Mr. farmer.

Mr. Eddie Hunger and sister
Gertrude were in telegraph Wed-
nesday.

Old Maid.

JUNCTION, TEXAS.

BIG W. O. W. PICNIC

JUNCTION, JUNE 4

Whet Up Your Appetite

Junction-on the Llano is one
of the prettiest places on God's
green earth to hold picnics.
Mountain Camp No. 134, Junc-
tion, Texas, aware of this fact,
and they don't let a summer
slip by without having one big,
rousing, fun covered, picnic,
when everybody turns out as
guests of the W. O. W. and en-
joys in the pleasant shades on
the banks of the stream, a feast
such as only Kimble culinary art
ists can prepare.

The annual picnic will this
year be held on Friday, June 4,
and we are instructed to announce
that you are invited to come,
bring your friends and help en-
joy the pleasures of the day.
The camp will furnish bread,
pickles, and coffee, as is its cus-
tom.

There will be a committee on
the grounds to buy all fish that
are brought in on that day in
good condition.
Arrangement committee for
the picnic consist of J. D. Bra-
ley, J. R. Martin, J. L. Wright,
T. T. Randle and B. B. Smith.
They are authorizing this invi-
tation issued and guarantee all
the joy and good eating that you
can use if you attend. We're
going to make it our business
to attend that picnic. How
about you?

CHILDREN'S DAY

Sunday May 16th will be Chil-
dren's Day at the Methodist
Church. A very nice program
is being prepared, and you are
cordially invited to attend.

Let us make it a Rally day for
our Church.

Aged or feeble people who do
not have a way to come will be
provided a way, if they will make
their wants known.

COME.

Jno. C. Campbell, Pastor.

CLOVER CLUB.

The Clover Club met with Nat-
alie Sandherr, Saturday after-
noon, April 24. Everyone gath-
ered at Cecil Martin's so all
could go together. Mrs. Pren-
tice went as far as the bridge
with them.

When they arrived at the
house Natalie and her mother
were awaiting them. All enjoyed
an hour of sewing. Popcorn
was served throughout the after-
noon. Several interesting games
were played, Lucy, Esther, and
May Louise, winning the prizes.
A three course luncheon was
served after which we all gath-
ered in the yard to play. But
we had not started good when
May Louise wanted to come
home because she thought it was
going to rain, we tried to per-
suade her to stay but she would
not, and when we got home the
sun was shining.

Those present were: Ruth Ba-
ker, Flora and Esther Mueller,
May Louise Prentice, Lucy Cow-
ser, Cecil Martin Natalie Sand-
herr.

Crepe de chine, chiffon to
match. P. Joseph.

MOUNTAIN ROARINGS.

Rev. C. W. Ely went to the
Owenville community to visit
people and preach Sunday.

J. F. Ragsdale and A. F. Win-
kel went to town last week on
business.

Mansel Smith went to Menard
last Tuesday to get a load of
freight for M. D. Carson and
son of Roosevelt.

Misses Eunice and Eva Good-
all and brother Monroe went to
Junction Saturday.

S. P. Bennett was a business
caller at Junction Tuesday.

Mrs. F. H. Dunk and daugh-
ters, also Misses Esth and
Ruth Simon of Coperas visited
at the Joiner ranch a few days
last week.

The infant of Mr. and Mrs.
Tom Wilson died last Sunday
and was buried in the Coperas
cemetery Monday evening. Rev.
C. W. Ely conducted the service.

Will Dunk filled his regular ap-
pointment at the Goodall home
of Roosevelt last Sunday and re-
ported the absence of Dock Lo-
gan.

The Lutheran Church of Roose-
velt was dedicated last Sunday
as previously announced. It
was beautifully decorated with
wreaths of cedar and roses.
The eleven o'clock sermon was
preached by Rev. B. Schliefer;
his text was I Kings 8:13. The
congregation was very attentive.
Dinner was served on the ground
and enjoyed by all. At two
o'clock Rev. Wolff of San Anto-
nio delivered an address of wel-
come to the church, and aiso
commented on missionary and
Sunday School work in San An-
tonio.

Rev. Wolff expects to be here
again in August and preach to
the American people if not pro-
videntially hindered. We hope
he will be with us again.

Cheer up Blue Eyes, we have
just begun to gather in the weas
in fun so be quick to dare for
"The Bums" are running every
where.

The Bums.

HABERDASHERY GOODS ARRIVING.

Ragland and Stiphen's new
stock of haberdashery for the
Junction Tailor Shop is now ar-
riving, a portion of which is now
on display at their place of busi-
ness. New shelving and show
cases have been added to the fix-
tures of the shop, and the goods
now on display in them make a
very pretty showing. The arti-
cles carried, such as men's shirts
underwear, neckwear, belts,
hose etc., is a very choice line
of the best brands and the latest
notions for men. Call in and see
the new goods.

Rev. J. D. Boone Preaches.

Rev. J. D. Boone of Junction
occupied the pulpit at the Pres-
byterian Church Sunday morn-
ing and night, fairly good sized
audiences at each service.

Rev. Mr. Boone is a scholarly
man, a minister of many years
service, and as a church builder
he stands at the fore. His ser-
mons were forcible, ably de-
livered, and well received by his
hearers. He returned to Junc-
tion Monday.—Harper Herald.

"S. O. D. did it." Papered my home—painted it too. You bet it's a nice job!

Have you tried that American Beauty flour at City Grocery?

Mr. and Mrs. Walter Tinsley are the proud parents of a fine girl which arrived at their home Monday, May 10.

Did you see those beautiful crepe de chins at P. Joseph's?

Rev. C. W. Ely preached at Owenville last Sunday. Sunday evening he conducted the funeral service of the little babe of Mr. and Mrs. Thomas Wilson Jr. Burial was made in the Copernicus cemetery.

Remember in Spring cleaning that you need new wall paper. Then remember "S.O.D. did it."

B. T. Joiner, the Bear Creek Commissioner, is in Junction this week in the duties of his office.

There is 1471 different names of sewing machines, and I can fit nearly all of them with needles.—Jones.

We have just received a line of the famous old reliable "Quick Meal" Gasoline Stoves. This is the best Gasoline Stove Manufactured. Ask for demonstrations.—Alex J. Hamer Co.

Wanted: Names of 8 young men and 7 young ladies who might be interested in preparing for positions as Stenographers, Private Secretaries, and Bookkeepers; attractive proposition. Draughon's Business College, San Antonio.

Rev. B. Schleifer, accompanied by his wife and babe, came up from Kerrville last week and proceeded on to Roosevelt where Rev. Schleifer conducted dedication services of the new Lutheran church Sunday. The Lutheran minister says he is attending a month or so in our county soon in the interest of the Lutheran Church.

See my new wall paper samples—S. O. Durst.

Rev. A. Wolff, English pastor of Lutheran St John church of San Antonio came up latter part of last week and attended the church dedication services at Roosevelt Sunday, assisting Rev. Schleifer in the ceremonies. Rev. Wolff is representative of Mission board of Texas and a very capable man. He paid our office the honor of a visit Monday. This was his first trip to the Kimble country, and he compliments our country and our people very highly. In coming up from Kerrville he had a new experience in riding on the mail back, and his version of the trip is a very pleasant one.

Well, I should say it is fine! That American Beauty flour at City Grocery.

You need it—The Citizen

Citizen want ads bring results.

Go to J. B. Van Eman's to get your pictures enlarged.

J. T. Wilson was among the visiting ranchmen in our city Monday.

J. R. Eastmans, the Watkins salesman handles Liniments, and Liver medicine.

Commissioner M. C. Reese is up from Red Creek this week for Commissioners Court.

McCall's June Patterns and magazines already here. Get a June fashion sheet free. Alex J. Hamer Co.

Lovely line of ladies slippers just arrived at the Grand Leader store.

The Junction Boy Scouts under the leadership of Rev. J. O. Campbell, scoutmaster, are coming to the front. They have been having some great times lately on their hikes. Last Friday afternoon loaded with their camping equipments they marched through the streets, gave their cheers and proceeded on to Cedar Crossing where they made encampment for the night. They returned home next day. The scouts numbering 20 every one report a "dandy time." Scoutmaster Campbell says he never had a better bunch of lusty young Americans under his care, and all are proud of the progress which is being made in the scoutwork. The new scout suits arrived Friday and they give the boys a pleasing and dignified appearance.

Screen wire rabbit and chicken wire all kinds of wire at Junction Hardware Co.

"IF YOU WANT TO"

If you want to please God believe in Him, for he has said that it is impossible to please Him without faith. If you want to be saved, heed these scriptures: "Repent ye, therefore, and turn, that your sins may be blotted out, and in order that seasons of refreshing shall come from the presence of the Lord." Acts 3:19. And again, "God so loved the world that He gave His only begotten Son that whosoever believeth in Him should not perish, but have eternal life. If you want to hear taught and preached the pure word of God, attend our teaching and preaching services at Junction Baptist Church next Sunday.

The theme of our eleven o'clock morning hour is: SINGING WITH CHRIST IN HEAVENLY PLACES." The subject for our eight thirty evening hour is: "STRAIN NOT OUT THE GRAY AND SWALLOW WHAT?" R. T. Deel, Pastor.

Buy Watkins' extracts and spices.

Shadow Laces at the Grand Leader.

Those new wall paper samples are beauties. The ones that Sod has.

When you have something you want fixed remember Jones, he deals with the ladies.

Commissioner Wm. Miller of Johnson Fork is in for Commissioners Court this week.

E. L. Southall, experienced painter and decorator, of Dewitt Co., is now located in Junction and will be glad to figure with you. Prices are reasonable and satisfaction guaranteed. It will pay you to figure with him.

Edwin Wahl and Walter Holekamp, of the Holekamp Bros. Garage, returned Tuesday from a trip to Fredericksburg. They were accompanied on their return by Mrs. Wahl and baby.

Let Jones fix that old cook stove. I have the fixtures. can make it nearly as good as new

New shipment American Beauty flour just arrived at City Grocery. Phone today and order a sack.

A good Cup of Coffee and a good Cup of Tea Iced or Hot is mighty fine when you use the Golden Gate Brands. Ask us about them. All of our clerks love to talk about our Golden Gate Brands of goods. They know they are good. Alex J. Hamer Co.

Dren C. Reid and family returned last week from a visit in Mason where they attended a double wedding Sunday, May 2, when Mrs. Reid's sister, Miss Florence Sheppard was married to Mr. L. R. Cook, and Miss Anna Mae Cook was married to Mrs. Reid's brother, T. E. Sheppard. This paper prints the many friends in wishing much happiness for the newly wedded couples.

J. R. Eastman is the Watkins man for this county. Need any remedies? Handle everything.

Paint And Not.

Paint was so high the last few years the market was flooded with trash. What is trash? It looks like paint and pretends to be paint, but isn't worth painting. It costs a painter's days work to put on a gallon of paint, good or bad; and a painter's days work is \$3 or \$4.

Add that to the price of a gallon. That is the cost of a gallon. Devoe is \$5 or \$6 a gallon; a d trash a half dollar less.

But Devoe is all paint and more too; you add oil to it; a gallon of 5 or 6 quarts of perfect paint for the painter's pot. But trash is three quarters, two thirds or half paint; you pay a half-dollar less for nobody-knows what it is. 10 gallons Devoe is enough for the average job; it takes 15 to 20 gallons of trash. And the wear same way. Unfortunately, they look alike when first put on. DEVOE.

Alex J. Hamer Co. sells it.

Go to J. B. Van Eman's to get your pictures enlarged.

Come on with those nice pictures and let Jones frame them for you.

Mrs. F. M. Chase spent a few days at the Kelley ranch this week with her friend Mrs. Ora Kelley, who is reported very ill.

"Where did you get that nice fit in a new suit?" "Simon, the tailor, of course."

Juo. M. Hankins is suffering from the effects of a little gasoline explosion which occurred at his place of business one day this week.

We receive a carload of the famous Belle of Wichita flour every 30 days, you get the best and it's always fresh.

Alex J. Hamer Co.

When we start with you in our service car we'll take you there—and we're always ready to start.—Eastman and Tinsley.

Clem Jones and Wiley Fisher went to Ft. Worth this week with a bunch of sheep. Ross Eastman of the Junction Auto Co. is driving the Mason mail car during Mr. Fisher's absence.

"Bread like mother used to make" is a common expression often used in referring to the height of excellency in bread making. Anyone can have such bread by using American Beauty flour. City Grocery handles it.

Wide selection, low price, high quality, pleasing service: these help to make the Grand Leader the GRAND LEADER. Just what the name implies—and then some. A welcome awaits you.—P. Joseph.

Mrs. Atchison entertained the Clover Club in honor of Esther Mueller and May Louise Prentice. Everyone took their sewing. Several interesting games were played. Lucy Cowser and Flora Mueller won the prizes. A delicious luncheon was served. All the Clover Club was there except Natalie Sandherr. Every one enjoyed the afternoon.

A Guest.

HOW TO USE GAS ENGINE

C. C. Short.

There is no one machine that is needed or can be used to much more advantage on the farm than a gas engine. It will do so many things and do it so well that a farm worthy the name can hardly afford to be without it. It pumps water, saws wood, crushes feed, shells corn, runs the cream separator, furnishes electric lights for home, barn and out-buildings at such a low cost for upkeep that any good farmer will make an engine pay for itself in a short time.

Always buy a standard engine, as a cheap engine is dear at any price. Then by buying a standard make of engine you will have little trouble getting repairs for it, which will be necessary on any make of engines. The cheaper the engine the more repairs will be needed.

First of all things, keep your engine clean. Always wipe all the oil off the outside of engine upon stopping it after it has run awhile. This is the cheapest way to keep your engine in order and repair. A clean engine will not catch dirt and grit like one left all covered with oil, and besides it always looks so much better, and if you have to do any work on it you won't get nearly so greasy and black yourself, which in itself is worth the little time and trouble it takes to keep your engine clean.

When you stop your engine always see that all the springs are left to their full length or always stop your engine when on the back stroke after it has passed the sparking point, letting the piston come out just far enough to hide the walls of the cylinder and not expose the outside surface of the piston; then there will be no sand to get inside your cylinder while the engine is idle.

See that your engine has plenty of oil, work valves to see they are working good; then put some gasoline on spark or igniter and work same for some time with screw driver blade or anything suitable. Turn engine over slowly, watch the spark to see if it is working properly; if all seems to be all right throw switch on and give a few turns of the fly wheels when engine should start right off; but in case it don't start don't stand and crank the engine all day. If the engine is all right just a few quick turns of the crank will be sufficient to start it, but if it don't start look for the cause; you will save time and temper. Look for your fuel; see if you have turned on the fuel or batteries, if you use them. See if you have a good blue spark. A white spark or red one will not start an engine, and if it did it would not run long. After looking over the engine again and find nothing wrong go over the gasoline and working it well with batteries connected and switch on; then try again and if engine don't go you have probably flooded your engine which is a very easy thing if engine is hot or if you have a weak spark. Just close fuel valve and turn engine the same as if you were going to start it; turn it some little time real fast if possible, and after you have done this and got no explosion then your trouble is not there. Next look to see if you have plenty of fuel and if pump is working good; see that your engine is getting plenty of gasoline; if so, then your trouble is without doubt in your ignition. Take out your igniter and examine the points; leave switch on the snap the points together, laying body of igniter on some part of engine; if spark is good, or not good, just brighten points good and replace in engine. Unless there is some mechanical trouble the above remedies will start 99 per cent of all balky or cold engines with mechanical igniters.

Will say in conclusion above all things when working with an engine control your temper, for a man cannot reason well when he lets his temper run wild, and you will need all the reason you can muster up when your engine fails to go after several hard attempts to start it. Always stop after you try and fail; just think awhile; look long, examine all parts well and nine times out of ten you will find your trouble.

SPOILING HIS AIM.

An Irishman was shooting ducks with a friend, who noticed that although Mike often aimed his gun at the flying birds he never shot it off. At last he said, "Mike, why didn't you shoot that time? The whole flock was right in front of you."

"I kniw," said Mike, "but every time I aimed me gun at a duck another was would come right between us."—The Youth's Companion.

Mrs. Annie Olson, Seattle, Washington, is believed to be the first housewife in the United States to move by parcel post.

Postoffice clerks were astounded when she appeared at the parcel post window demanding stamps for conveyance of her household goods from this city to Quinault.

"I figured it would be cheaper this way," said Mrs. Olson, handing in a barrel containing her kitchen stove.

Other articles of furniture followed, weighing in all 337 pounds, and including kitchen utensils, a rocking chair and a dining-room table, among other things. They cost her \$4.62 in stamps. It cost her \$20 the other way, she said.

"Uncle Sam for me!" exclaimed Mrs. Olson. "I knew it would be economy."

Merchants wrote their letters, with quill pens 100 years ago. Sand was used to dry the ink, as there was no blotting paper. There were no street letter boxes. Letters had to be carried to the postoffice. It cost 18¢ cents to send a letter from Boston to New York, and 25 cents from Boston to Philadelphia. Every gentleman—

Washington, for example—wore a queue; many powdered their hair. Virginia contained a fifth of the whole population of the country. Two stage coaches carried all the travelers between New York and Boston. Six days were required for the journey. There was not a public library in the United States. A day laborer received two shillings a day. Stoves were unknown. All cooking was done at an open fireplace. Many of the streets were unnamed, and the houses were not numbered.

THE PANAMA CANAL A HUGE EXPERIMENT

Could Not Be Successfully Attacked From Sea, But Could Be Made Hard Proposition by Land.

Dallas, Texas, May 10.—One good, well-directed blow and the Panama canal would be a goner. That, in brief, was the opinion of Congressman Hattin W. Summers of this city before the Dallas Lawyers' club.

Basing his remarks on observations during a recent trip there, the congressman indicated that he has some doubt as to the military and economic advantages of the big ditch. He expressed the belief that a successful attack could not be made from the sea against the canal, but he was not so certain that an effective land attack could be prevented.

In event of war the United States would have the double task of defending the canal and keeping the sea highways open in order to maintain line of communication.

Considering the big ditch from a dollars and cents standpoint, the congressman said that the people's purse may pay the \$20,000,000 a year interest and military equipment charges, unless tolls increase sufficiently to meet this cost. At present, he said, the tolls are sufficient to meet the operating and administration costs.

As a whole, he considered the big ditch project thus far an experiment.

FORMER SENATOR DEPEW'S VIEWS OF EUGENICS

New York, May 10.—Former United States Senator Chauncey M. Depew qualified as an authority on eugenics at a banquet given in his honor at the Mohawk club in Brooklyn tonight.

"Eugenics is a good thing," said Senator Depew, "but its advocates reach an extreme which threatens a setback for their efforts when among the bills its professors are pressing in the legislature is one that all knock-kneed men shall be compelled to marry bow-legged women."

GRAPE JUICE NOT HARD TO PREPARE

Department of Agriculture Gives Directions in New Farmers' Bulletin.

Washington, D. C., May 10.—Anybody who is able to can vegetables can make grape juice, says a new publication of the United States Department of Agriculture, Farmers' Bulletin 644. The principle is the same in both cases—the sterilization of the product before it is stored away. In the case of grape juice, this sterilization prevents the fermentation which in making wine turns the grape juice into alcohol.

Fermentation is caused by various fungi, yeasts and bacteria, which adhere to the skins and stems of the grapes. If these are killed, no fermentation is possible. They can be killed in two ways, but one, the addition of antiseptics, is not possible in the case of any article intended for human consumption, because the antiseptics themselves are injurious. The other method, killing them

by heat, is the one used in the pasteurization of milk, and is equally simple and practicable with grape juice. Practical tests indicate that grape juice is satisfactorily pasteurized without appreciable change of flavor when it is heated to a temperature varying from 165 to 176 degrees Fahrenheit. If the temperature is allowed to reach 200 degrees Fahrenheit the flavor of the juice is changed for the worse.

For home use there are a large number of varieties of grapes which will make a pleasant and healthful drink. No matter what the kind of grape, however, only clean, sound fruit should be used and it should be well ripened, but not over-ripe. The grapes should first be crushed, and pressed in an ordinary cider mill, if the farm possesses one, or by hand if no mill is available. The subsequent procedure depends upon whether a white or a red juice is desired. For a light colored juice, the crushed grapes are put in a cloth sack and twisted until the greater part of the juice is extracted, one person holding each end of the sack. The juice is then put in some convenient form of double boiler in which it does not come into direct contact with the fire, but is surrounded by hot water, and gradually heated to a temperature close to 200 degrees Fahrenheit. As has already been said; however, it should not be allowed to go over this point. If no thermometer is available, it is best to heat the juice until it steams and then to take it from the fire before it is allowed to boil. It should then be poured into a glass or enameled vessel and allowed to settle for twenty-four hours, after which it can be drained from the sediment and run through some form of cloth filter. The strained juice is then put into clean bottles and sterilized once more in a water bath. An ordinary wash boiler with a thin board on the bottom for the filled bottles to rest on is a convenient home device for this purpose. After sterilization the bottles should be corked immediately with new corks, the corks having been previously soaked for about 30 minutes in hot water.

For red juice, the crushed grapes are first heated to the same temperature as before and then strained through a clean cloth or drip bag without pressure. Thereafter, the process is the same as for light colored juice. Grape juice should be stored away in bottles or jars that are not too large, for after these have been opened the juice is likely to spoil. If properly made, however, the juice should keep indefinitely as long as it is kept in sealed bottles. In this respect it is, of course, like other canned goods, which should always be used as soon as possible after they have been opened.

Of the various varieties of grapes common in this country, the Delaware gives a juice of delicate aroma and excellent flavor. The Concord is darker, with a sprightly taste and well-known aroma. The Catawba, Isabella and Salem grapes also yield an excellent product. The California varieties produce a very sweet juice, but in many cases there is little characteristic flavor. For home use, however, the kind of grape that is most abundant in the vicinity will, of course, be used.

JAPANESE ARE NOT TRYING TO GET NAVAL BASE IN MEXICO.

San Francisco, May 10.—Positive denial that the Japanese have attempted to establish a naval base at Turtle Bay, Meico, was made tonight by Capt. T. P. H. Whitelaw, who returned here today from salvaging the Swedish vessel Malanka, at Cedros Island. He declares the Japanese cruiser Asama, which went aground two months ago in the bay, will undoubtedly be released this week. It is absurd to say the Japanese established a naval base," said Whitelaw. "The only activities they have shown at all on shore have been connected with the raising of several large poles which are being used by the salvage operators in ascertaining whether the Asama has moved her position."
