Pakistan's President Begins Texas Visit

JOHNSON CITY, Tex. (AP) — Pakistan President Mohammad Ayub Khan and his host, Vice President Lyndon B. Johnson, arrived at Johnson's Ranch Saturday night to spend a quiet rural weekend.

A plane bringing them from San Antonio, where cheering crowds welcomed the Pakistan leader to Texas, set down here at 6:23 p.m. (CST).

Johnson promptly got behind the wheel of a golf cart and took his guest on a quick tour of the ranch.

A house party of 21 persons, including Ayub's daughter, Begum Nazeem Akhtar Aurenzeb, flew from San Antonio, where they witnessed a spectacular Air Force demonstration and also visited the Alamo.

Gates to Johnson's LBJ Ranch 65 miles west of Austin, were guarded by State Highway Patrol cars as 60 visitors from abroad and from Washington and Texas gathered for an informal dinner.

The visitors took a brief dip in the LBJ swimming pool, an all-weather hot and cold water facility equipped with telephone outlets for the vice president's convenience.

Sunday morning Ayub and Johnson will tour the ranch at length.

Cannon, jet planes and huge crowds roared salutes to Ayub as he arrived in San Antonio with Johnson for a three-day visit in Texas.

The Far Eastern leader responded by speaking of his high regard for Texas and his love and respect for Vice President Lyndon Johnson, his host.

Crowds estimated at almost 50,000 cheered as Johnson, who met Ayub on a Far Eastern tour earlier this year, praised the Pakistani leader as "a friend of freedom, an ally of the United States and an enemy of Communism."

Thousands of people yelled and waved signs saying "Welcome Ayub" and "Welcome to Texas." Ayub waved his hat and grinned.

At the Alamo — one-time Spanish mission which became a shrine after 187 men died fighting for Texas' freedom from Mexico in 1836 — Ayub placed a wreath of green and white chrysanthemums and gladioli.

Johnson said "The people of Pakistan are ready to stand by our side and die to preserve freedom."

The crowd jammed the flight

line at Randolph Air Force Base 20 miles northeast of here as Kahn and Johnson arrived from Washington after a morning trip to Gettysburg, where Ayub toured the Civil War battlefield and visited former President Eisenhower.

Ayub speaking in English, said of Johnson, "I have fallen in love with this man ever since I met him for his courage and his skill in handling people."

Green and white Pakistan flags fluttered in honor of the visit, which began as Ayub stepped from an Air Force jet at 2:55 p.m. (CST).

He held his hat at his side as a 21-gun artillery salute boomed, 21 Air Force jets flew overhead and an Air Force band played the national anthems of Pakistan and the United States.

Gov. Price Daniel, San Antonio Mayor Walter McAllister and commanders of San Antonio military bases shook hands with the dignitaries as they walked along a red carpet toward a speakers' platform.

Daniel designated Khan an honorary citizen of Texas and McAllister made him honorary alcalde — the Spanish term for Mayor — of San Antonio.

Johnson said "The people of Pakistan are ready to stand by our side and die to preserve freedom."

BULLETIN

GATESVILLE — Eighty-two boys fled in a mass break from the State School for Boys here Saturday night.

Mark Sills, director of the boys' program at the institution, said it was one of the biggest escapes in the history of the central Texas reformatory. There was no report of any violence.

About half of the fugitives were rounded up in a short time. A search continued for the others.

Panels Battle For Solution To Tax Issue

AUSTIN (AP) — House tax writers Saturday postponed the special session's first tax debate while they worked on a double-barrel compromise proposal.

A special subcommittee rewriting Gov. Price Daniel's tax recommendations (HB20) said it could not report to the full committee until late Monday at least.

"In my opinion that may be too late," said Rep. Wilson Foreman, Austin. "We need to get a tax bill out of the House by the middle of next week or there may not be time left to get it through both houses this session."

The House Tax Committee met Saturday expecting to act on the subcommittee's recommendations and clear some version of Daniel's bill for debate on Tuesday.

Foreman pointed out that the delaying committee action until Monday means that debate probably can not begin until next Thursday at the earliest. House rules provide that members be given a chance to study a copy of printed bills for 24 hours before debate begins.

"To be fair to members we should give them a couple of days to write amendments and substitutes," Foreman said.

LONG HOURS
Rep. Charles Sandahl, Austin, head of the special 5-man group studying Daniel's bill, said his subcommittee worked until 12:30 a.m. Saturday.

"We have made substantial progress in eliminating areas of conflict but we are not ready to report," he said. "If we progress the next day or two and we get all the figures we need, we will know by late Monday what type of bills to be reported out by this subcommittee."

Sandahl said new estimates on revenue being obtained from the state comptroller would not be available until some time Monday.

"It seems pretty definite to me that the subcommittee will come out with two bills—Daniel's bill and a substitute proposal," said member of Sandahl's subcommittee who asked that his name not be used. "Daniel's bill will have the Pennsylvania-type tax as he recommended and I imagine the substitute will have a general sales tax feature."

BIG HOLDUP
Sandahl and other members of his group said almost all the discussion is over the sales tax portion of the tax measure. One said that "the big holdup" in revising Daniel's bill came from the state comptroller questioning the revenue estimates presented by the governor, particularly on the provision that would exempt clothing costing less than \$10.

The provisions of Daniel's bill calling for a natural gas pipeline tax and for a revision of the corporation franchise tax remain relatively unchanged, subcommittee members said.

Rep. Charles Ballman, Borger, chairman of the House tax committee and sponsor of Daniel's tax bill, told the committee he agreed with Foreman's remarks "that time is of greatest essence, but I think we have a lot to be gained by waiting until Monday. We've got to have something out of this committee by Monday evening at the latest."

TWO VERSIONS
Members of Sandahl's subcommittee said the two versions being considered would bring in about the same \$339 million as Daniel originally requested. "The main difference is over the theory of sales taxes," said one.

Daniel's Pennsylvania type sales tax names the specific items to be taxed 2 per cent on retail value and items not named are generally exempt. By contrast, the general sales taxes used in 34 other states name the items exempted and those not named are generally subject to tax.

Traffic Deaths Lead Last Year's
AUSTIN (AP) — Texas traffic deaths now are 7 per cent ahead of last year, the Department of Public Safety said Saturday. There have been 6 per cent more accidents in which persons were killed this year than for the same period in 1960.

DPS statistics show 1,134 persons killed in 902 accidents this year compared to 1,049 killed in 852 accidents during the same period last year.

Showdown Looms Over West Berlin

Access To City Is Central Issue

BERLIN (AP) — East and West prepared Saturday for a showdown in divided Berlin on just who is permitted to come to this isolated outpost of the Western world.

From Red-ruled East Germany, refugees were pouring in at a record rate. There were 675 new ones counted at Marienfelde Camp by 11:30 Saturday morning, when the books—but not the reception machinery — closed

down for the weekend. The comparable figure last Saturday was only 477.

These counts are far from complete. Experts say the average of arrivals over the past week has been 1,200 a day. This is as many as Berlin has ever handled, although more people made it across the Iron Curtain in the crisis period of 1953. Then it was easier to escape in other ways as well. Now Berlin, still accessible from East Germany, is almost the only route.

Many refugees indicate fear the Communists are about to close the Berlin escape hatch. Others decided to leave because of party pressure to speed up work in factories and on farms. Central party authorities are pressing all the way down the line for more work to overcome shortages—including the labor shortage helped by the flight of refugees.

There were widespread reports that peasants, annoyed by Communist pressure, are trying to get out of collective farms. All East German land was collectivized in the spring of 1960. Gerhard Grueneberg, a top Communist in farm affairs, warned them they had better give up the idea of going back to individual farming.

There were other reports, still unconfirmed, that Communist police are stepping up their spot checks on trains that may be carrying refugees. This is the peak travel season in East Germany. Since school closed a week ago, it no longer excites much suspicion in an East German town when a whole family packs up and takes off.

For the second time in its history, Lake J. B. Thomas was flowing over the service spillway Saturday.

Elevation of the lake passed the spill level of elevation of 2,258 at about 6:30 p.m. Thursday, and at noon Saturday the elevation had climbed to 2,258.25, where it was hanging steady. This meant that the overflow was about three inches deep at the service spillway, which drains off the lake excess in much the same manner that an overflow does for a bathtub or lavatory. The level would have to rise several feet in order to go over the emergency spillways at either end of the dam.

Lake Thomas had picked up 2.31 feet of water in spilling, and this approximated 20,000 acre feet of water, roughly 6 1/2 billion gallons. Assuming that there will be no more inflow, the amount of water to be spilled out will be about 2,000 acre feet, and this may require some three or four days.

Lake Colorado City came up slightly to 2,065.20 Saturday morning, according to a report from Texas Electric Service Company, accounting for a half foot rise since Thursday. The volume increase was about 750 acre feet. Champion Creek Lake was at 2,058.50, an increase of .4 of a foot.

Moss Creek Lake, now open to the public, continued around the 31-foot mark, about five feet below spillway. Recent rains raised the level only about half a foot. Powell Creek continued right at spillway level of 24 1/2 feet.

Report Missile Bases In Cuba
CHATTANOOGA, Tenn. (AP) — The national head of the Veterans of Foreign Wars said he has been informed by reliable sources in Washington that U2 flights have been made over Cuba and they show missile bases are being built on the island.

The VFW commander-in-chief, Ted Connell of Killeen, Tex., made the statement in a speech Saturday night to the southern conference of the VFW group.

"Only a few hours before I left Texas," Connell said, "I was told that U2 flights have been made over Cuba, only 90 miles from Florida. On the last flight, films were taken."

"I was told these films show definitely that there are three missile bases being constructed."

Since then, on a test basis, scores of large businesses have pledged cooperation. The idea now is to obtain general participation by firms which mail anywhere from several hundred to several thousand pieces of mail a day.

SPECIAL DELIVERY.
Wherever you go, POGO and his friends will be waiting for you—and you can keep up with everything that's happened at home while you were on vacation. Just call THE HERALD at AM 4-4331 and ask for VACATION PAC. It costs nothing, and means that your papers will be delivered to you when you return.

Engineer From W. Germany Wins Miss Universe Contest

MIAMI BEACH, Fla. (AP) — Marlene Schmidt, 5-foot-8 blonde from Stuttgart, Germany, Saturday night became Miss Universe of 1961 in international competition against girls from 47 nations.

Marlene, who said she got into the contest because she thought it would be fun, is a 24-year-old electronics engineer.

She moved with her mother and

Reviewing The Big Spring Week
With Joe Pickle

Weather was back in a dominant place in the news. A surprise thunderstorm a week ago this morning soaked most of the county with rains ranging from half an inch to 2 1/2 inches. Wednesday morning more showers poured out .06 to .60, and then Thursday real soakers ranging from half to 2 1/2 inches (the heaviest part was along the north and east portions of the county) sent creeks and rivers running. Fortunately, there was almost no crop damage. One farmer complained he couldn't get his field worked before another rain made it all to do over again. There has been nothing like it since 1941.

Lake J. B. Thomas was running over Saturday, and there was good prospect, barring more rain, that this would continue to be the case for a few days. A 2 1/2-foot rise added 20,000 acre feet to storage and gave a reserve of 204,000 acre feet, or almost 70 billion gallons.

It seemed as though violence erupted on every hand. In a freak mishap, 16 - months - old Gary (Dusty) Brown got his foot caught in a power mower and died a few hours later of extreme shock. Antonio Perez, 27, a Mexican national, drowned while swimming across a stock tank on the Frank Whitaker place 3 1/2 miles west of Vincent. Nancy Lou Gonzales, 11, and Mary Sue Gonzales, 11 months, were killed when a pickup truck overturned 12 miles south of Lamesa near Sparenburg.

United Fund leaders took two important steps Thursday—one approving a record \$102,000 budget for 12 agencies. The other was in securing Marvin M. Miller as the general campaign chairman. The choice should prove a good one, for the effort will need seasoned, dynamic leadership.

Col. Dick Crowell is departing this week from his tour of duty as commander of the 331st Fighter Interceptor Squadron. A modest and genial man who matches capability with hard work, Col. Crowell has won a world of friends and respect here. Like the rest of Webb, he has kept the 331st an integral part of the community.

The Little Leaguers ended up their season's regular play Friday night with a real thriller. In an extra-inning affair, the Colts, which could do no better than second in the American League, beat out the Pirates, first in the same league, by 2-1 count. Indicative of the brand of ball the youngsters were playing, four of the seven playoff games were decided by one-run margins.

Miss USA Crowned

Being crowned Miss USA at the Miss Universe Beauty Pageant in Miami Beach, Fla., is Sharon Brown of Minden, La. Linda Bement, left, of Salt Lake City, Utah, who was Miss USA last year and went on to become Miss Universe, places the crown on the new Miss USA.

Helping Mercury Climb

Mrs. Mary McConkey, left, and Mrs. Joe Leach help mark the "deb" clearance thermometer at the YMCA Friday, following the first report meeting. The thermometer keeps time with the pledges collected by workers in the campaign. Both are workers in the fund raising effort. Leaders are stressing the need of a good report Tuesday.

Big Chunk Sliced Out Of YMCA Debt

Workers sliced a big chunk out of the YMCA debt in the first few days of the campaign when they reported Friday with \$3,326 in the till.

It was the first report meeting of the 10-day debt clearance campaign. The fund drive was launched Tuesday when about 200 workers picked up prospect cards and hit the streets in an effort to pull the YMCA plant out of debt.

The obligation was listed at \$36,100, left over from the original campaign that raised the necessary money to build the modern building at Eighth and Owens. It was pointed out that interest on the loan

was costing the association \$14 per day.

The campaign got off the ground with several gifts on the opening day of the push. Friday's report brings the total collected or pledged so far to \$18,200, reducing the outstanding debt to \$37,900.

With this good start, section leaders, division leaders, and team captains urged their workers to forge ahead for Tuesday's report meeting. The final report will be made Friday at 5 p.m.

Section leaders Chub McGibbon and Clyde McMahon said that, for number of workers reporting, Friday's figure was very gratifying. "But there were too few of our volunteers on hand," they said. "We are appealing strongly for captains to see to it that workers turn in a report Tuesday."

All the reports are made at the YMCA where money is audited and tabulated. Workers were treated to refreshments while they total up the day's work.

Residents who desire to participate in the clearance, who have not been contacted, may call or stop at the YMCA.

Art Bought
LONDON (AP) — The National Gallery has purchased a work by Giorgione, an Italian Renaissance master whose output was small and now is extremely expensive. However, the price for "Sunset Landscape with St. George and St. Anthony" was comparatively modest. The exact price was not disclosed.

Storm Warnings In Texas Continue Unsettled Weather

By The Associated Press

Fresh turbulence pointed threats of violent weather at much of West Texas again Saturday night. Alerts went out for a possible tornado and vicious thunderstorms in the south part of the South Plains, where battering hail storms destroyed thousands of acres of cotton only the night before.

Another special forecast warned against severe thunderstorms in the south part of the South Plains and an area east of the Pecos River.

Both advisories were in force until 1 a.m. Sunday.

The sector warned against a tornado, lying 70 miles east side of a line from 40 miles southwest of Childress to 80 miles northeast

of Guymon in the Oklahoma Panhandle, also included Borger, Pampa, Plainview and a number of smaller cities.

The other alerted area lay 60 miles east side of a line from 15 miles south - southwest of San Angelo to 30 miles north - northwest of Roswell in southeastern New Mexico. It also embraced Levelland, Lamesa, Midland, Monahans and Odessa.

A special forecast went out earlier Saturday for violent thunderstorms until 10 p.m. in most of north central and northeast Texas. The Weather Bureau revised it before night fall to cover only the sector east of a line between Paris and Grand Saline along the east side of the State.

Thunderstorms were rumbling eastward over Northeast Texas in late afternoon east of a line link-

ing Paris, Sulphur Springs and Grand Saline.

Estimates of cotton destroyed by violent Friday night hailstorms ranged up to 3,000 acres in Hockley County alone. Other cotton crops were damaged northwest of Plainview.

Lightning set two oil tanks afire near Levelland as a thunderstorm with wind gusts to 50 miles an hour dumped up to 2 inches of rain on that area. Plainview had 60 mile-an-hour winds and 1.25 inches in 30 minutes.

Blossom, a small Lamar County town, received 1.80 inches of rain Friday night to raise its three-day total to 5 inches.

Thunderstorms that raked the Red River Valley dumped 1.50 inches on Paris in 40 minutes and gave Texarkana a 24-hour total of 2.17 inches.

Wherever you go, POGO and his friends will be waiting for you—and you can keep up with everything that's happened at home while you were on vacation. Just call THE HERALD at AM 4-4331 and ask for VACATION PAC. It costs nothing, and means that your papers will be delivered to you when you return.

Checks Returned For Lack Of Proper Address

During the month of June, 22 checks were returned to the Veterans Administration because veterans in this area failed to report changes of address. Ray Boren, contact representative at the Veterans Administration Hospital, reports.

These checks, representing payments to veterans or their beneficiaries for disability compensation, pension, death benefits, training allowances and other benefits, totaled \$1,164.98.

Boren emphasized the importance of veterans reporting their new address to both the Post Office and the VA as soon as possible. Upon request, both agencies will furnish forms to be used in reporting a change of address.

Griffin Trial Is In Recess

BEAUMONT (AP) — Trial of suspended District Attorney Ramie Griffin was in recess until Monday after three days of testimony. The state is seeking to remove Griffin from office for alleged official misconduct.

DOES THIS MEAN YOU?

By T. M. Tardel, preacher
Church of Christ, West Highway 80
P.O. Box 1185

"Come unto me, all ye that labour and are heavy laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls. For my yoke is easy, and my burden is light." — Jesus (Matt. 11:28-30).

"And when he came to himself, he said, How many hired servants of my father's have bread enough and to spare, and I perish with hunger?" — The Prodigal son (Luke 15:17).

"And the Spirit and the bride say, Come. And let him that hear-

2-A Big Spring (Texas) Herald, Sunday, July 16, 1961

Gen. Edmunson Speaks To Graduating ROTC Students

USAF ROTC Cadets, 199 strong, rounded out a 28 day Summer Training Camp at Webb AFB Friday. Of the 189, seventeen stood, and repeated the oath of the USAF officer, and received commissions as second lieutenant in the USAF.

Maj. Gen. James V. Edmunson, Deputy Chief of Staff for Personnel, and Director of Personnel Procurement and Training came from his headquarters in Washington to address the graduating class. The general pointed out the job well done, and admitted at the outset that he hoped that something he might say would interest a number of the class to consider the USAF as a career.

"Although the AF ROTC represents the largest single source on which the USAF depends for its officers, the retention rate is the lowest," the general said.

"No matter how exotic the weapons, or how destructive the

hardware, it still will take dedicated men to design, build, fly, and operate these mechanisms," said Gen. Edmunson. The general went on to explain that the old concept of waiting for a national emergency and then beginning an all-out training program was completely out-moded.

"In the next war, we will stand and fight with the weapons we have in our hands; and we shall win or lose on that basis. The weapons systems now existing require a life time of study; they cannot be mastered by a six month's refresher course, even if we had the six months—which we will not!"

The general admitted that there were many jobs and professions open to ROTC graduates that would offer more in material return, but none that could match an Air Force career in satisfaction of a job well done.

"The Air Force offers a challenge—and satisfaction can only come from having successfully met that challenge," concluded Gen. Edmunson.

The general was introduced by Col. Donald W. Eisenhart, Webb Commander. At the conclusion of Gen. Edmunson's remarks, Col. Eisenhart presented the Commandant's Award, to Cadet William R. Spencer, University of Arkansas.

It is the highest honor that can be won by a cadet attending the Summer Training Unit. The award is based on demonstration of exceptional leadership qualities and outstanding abilities in all aspects of the Air Force ROTC program.

Awards were also presented to the physical fitness champion, Cadet Thomas L. Forster; the pistol champion, Cadet Darrell Dean; the tennis singles champion, Cadet William Carpenter; and the captains of the champion football, volleyball and softball teams. Following the graduation exercises, the final parade and review of the camp was held.

Other distinguished graduates

Commandant's Award

AFROTC Cadet William R. Spencer is receiving the Air Force ROTC Commandant's Award from Col. Donald W. Eisenhart, Wing Command, at the graduation exercises Friday.

recognized were: Daryl G. Atwood, University of Missouri; William H. Carpenter Jr., Baylor University; and James H. Thomas, University of Cincinnati.

On the platform with Gen. Edmunson and Col. Eisenhart were Lt. Col. Leland A. Younkman, commander of the Summer Training

SOCIAL SECURITY

Added Benefits Now Available

If you are a man, 62 years of age, and so desire, you can now claim your retirement benefits under the Social Security Program.

H. P. Thomas, manager of the Odessa office of the Social Security District, called attention this week to the recently adopted amendments to the Social Security Law. These amendments became operative last week when President Kennedy signed the bill.

He said the new amendments made it possible for men to retire and receive early benefit rights similar to those women have had since 1956.

The change in the law applies to men between the ages of 62 and 65 years of age. It is designed especially to help those who are unable to find employment because of their age or poor health.

A man now 62 to 65 years of age can start receiving benefits with the month of August under the new amendments. If he retires before he reaches the age of 65, however, the monthly amount to be paid to him will be reduced. And he will continue to be paid at the reduced rate even after he reaches 65 years.

Dependent widowers and dependent fathers of workers who have died also can get benefits at the age 62. Their benefits, like those of widows and dependent mothers, are not reduced.

For men who retire early, the amount by which their benefits will be reduced depends on the number of months for which they will receive benefits while still under 65. A worker who retires and claims his benefits as soon as he reaches 62 will qualify for 80 per cent of the amount that would be payable to him at age 65 based on his average earnings until his retirement. If he waits until he is 63, he will get 85-2-3 per cent of his full benefit; and if he waits until 64, the amount will be 90-1-3 per cent.

The reductions are figured so that a person may expect to receive, on the average, about the same amount if he takes reduced benefits beginning when he is 65, or waits until 65.

Members of the immediate family of a retired worker can get dependents' benefits if the worker retires at 62 or if he waits. Eligible dependents include a wife 62 or older, or a wife at any age if she has in her care children who are eligible for benefits. The child

Dawson Grand Jury Has 11 Indictments

LAMESA (SC) — The Dawson County grand jury returned 11 indictments following day-long deliberations Thursday. Foreman L. I. Dean also indicated the jury passed cases and returned no bills in three other matters.

Indicted were George E. Schenck, worthless check; Willie C. French, forgery; Andrew Narvais, burglary; Billy Reedy and Edward Cline, forgery and passing; Dorothy Faye Bishop, Doningo Guerrero, Derrell James Howard, all for theft; Bill Roy Harris and Bill L. Lacy, burglary; Manuel Sanchez, two counts of forgery and passing.

Judge Truett Smith received the jury report in 106th District Court.

Jessel Settles Paternity Suit

HOLLYWOOD (AP) — Comedian George Jessel, 63, says he has settled a paternity suit brought by actress Joan Tyler and hopes to be married — but not to Miss Tyler.

Jessel identified his intended bride as Marjorie May, a red-haired actress who — like Miss Tyler — is 27.

Miss Tyler, who has said she expects her child in December, disclosed a week ago that she planned to drop her suit against Jessel. At the same time, she said she and the comedian probably would marry.

Work Unit Has Seven Per Cent Of District Area

The Great Plains Conservation Program has 11 participants in the Sterling-Glasscock portion of the North Concho River Soil Conservation District. This portion of the district is served by Sterling City SCS Office.

These 11 farms and ranches include 63,553 acres, or about seven per cent of the entire land area. A complete soil and water conservation program is planned on each of these farms and ranches. Two producers will complete their plans this year after three years of work. Some plans are so large that they require seven to 10 years for completion.

Brush control involves more expenditure of funds than any other one practice in the Great Plains Program. Other practices in the program are: water development for livestock, cross fencing of large pastures, grass seeding, chiseling, pitting, contour furrowing, diversion construction, underground irrigation pipeline, terrace construction and waterway construction.

Great Plains Conservation Program participants in the Sterling City Work Unit area are: James R. Currie, Bryant A. Harris, J. B. Calverley, McDonald and Reed, Currie Cattle Company, J. W. Cox, Bob Ballenger, Wraga-Hendrickson Ranch, Dr. R. E. Glass, Charles and V. E. Probst and George Sheet and Sprague.

Several other producers have made application for participation in the program.

Firemen Answer Two Minor Calls

Two minor fires brought out the fire department Thursday, one a transformer which caught fire, and the other an automobile fire.

A short in a transformer at Donald's Drive Inn, 2406 Gregg, was believed to have started a fire at 10:25 a.m. Thursday. No damage was reported other than to the transformer.

A car belonging to Obie Bristow, 554 Hillside, caught fire at 805 Edwards Blvd. at 8:12 p.m. Thursday, but only light damage to the car was reported. The cause of the fire was listed as a leaking fuel injector.

Short-Changers Clip Station

Short change artists were reported in Big Spring Thursday by Jim Dixon, an employee at the Humble service station at Fourth and Scurry Streets. Dixon told police three Negro males driving a blue and white 1953 automobile with an Arizona

license plate shortchanged him of \$5. Police are investigating the license number for information.

Telephone Code Numbers Give Glimpse Of Future

Area code numbers, a glimpse of the future for telephone service in Big Spring, has been added to the 1961 telephone directory.

This is a step toward eventually dialing any number in the United States. When direct distance dialing is used here, the numbers will be necessary. Now they are given for convenience and to save time.

DIRECT CALLS

"We will have direct distance dialing in Big Spring some time in the future," according to O. B. Alexander, manager, "and we want our customers to be familiar with the system before they use it."

Using area code numbers helps to speed up long distance calls. By simply looking up the number for the city which a person wants to call, the operator can key punch the number and from then on the process becomes automatic.

Machines send the call towards its destination choosing vacant lines as needed. Area codes have been in existence for several years but have been used only by

operators here so far, Alexander said.

"It is easy to look up the code number for places which a person calls often and that number can be listed along with the number in files or memorandum books," he said.

Area code numbers are listed in alphabetical order for most points in Texas. Larger cities for other states and for Canada are also listed.

QUICK GLANCE

Suppose you wanted to call a number in Lubbock. A quick glance gives the area code number as 806. Dial the operator, give her the code number and the number you wish to call and your call will be handled quickly.

Another suggestion by the Telephone Company is to give out of town acquaintances your code the phone number. This will save them time and will save time again when the operator places the call.

Automatic dialing as in Fort Worth, Waxahachie and a few other cities, has not yet reached Big Spring. But code numbers are the next best thing.

KAY'S KLIPBOARD

Registration Set To Begin For Second Summer Session

By KAY LOVELAND

The first six weeks of summer school at HCJC ended Friday. Registration for the second six weeks, which will run July 17 through Aug. 25, begins Monday morning.

Among the courses offered during the day are Introduction to Educational Psychology, trigonometry, algebra 303, physics, chemistry, sophomore English, U.S. history, analytical geometry, freshman composition and Texas government. Day classes begin at 7 a.m. and end at 12:30 p.m.

Night classes, held Monday, Wednesday and Thursday, run from 7 to 9:30 p.m. Offered are child growth and development, freshman composition, sophomore English, Texas government, U.S. history, algebra 303, analytical geometry, calculus and sociology.

Summer school at BSHS continues for another week and a half. It will wind up on July 26.

Officials at the college report that the dormitories are filling up well this summer. B. M. Keese, registrar, says that he receives an average of two applications a day for dormitory space. He feels that the girls dorm,

which holds 32 girls, may be filled by Sept. 1.

I ran into DOYLE PHILLIPS the other day (not with a car.) He says he's thinking seriously about going to Texas Tech come fall. This summer he's still working for the State National Bank.

KOILA GRANT FRANKIE BELL and SELMA ROBERTS, who all work at the State National Bank, just returned from an enviable trip to Florida. The three left here June 30 and drove to Daytona Beach; from there it was down to Pensacola, to Jacksonville and over to Panama City. They took in the beaches, and they reported that Florida is certainly "Where the Boys Are." Of course, they kind of regretted having to return home Sunday night.

The number of junior volunteers at the VA Hospital has reached the highest number ever enrolled in the summer program. 73. New volunteers include JANE CUDD in nursing service; CAROL ROBERTS, also in nursing; CHARLOTTE VOIGHT, registrar and nursing; S H A R O N HOMBERG, doing typing in engineering, laboratory and chaplain's office; and GLENN WHITLEY in laboratory, recreation and engineering.

Three visitors also did some volunteer work while they were visiting here in the past weeks. SUE WILSON and DEE MOCK, both from Lubbock and both visiting CAROLYN and CATHRYN SEAGO, worked at the hospital for two weeks. Sue was in registrar and Dee in nursing. NELLY CARR, niece of VA administrative assistant Carleton Carr, worked in X-ray and library while visiting here.

Mrs. Ara Cunningham, volunteer director, gave an orientation session Wednesday to a new group of volunteers. She believed that it would be about the last group she would orientate this summer. "All the vacancies are filled," she reported.

The Top Ten in the nation this week, as recorded by Billboard, reads like this: 1. "Tossin' and Turnin'" Lewis; 2. "Boll Weevil Song" Benton; 3. "Quarter to Three" Bonds; 4. "Raindrops" Clark; 5. "Writing on the Wall" Wade; 6. "Every Beat of My Heart" Pips; 7. "Moody River" Boone; 8. "Yellow Bird" Lyman; 9. "Hats Off to Larry" Shannon; 10. "Dance On Little Girl" Anka. Listed by Billboard as on the way up are Frankie Avalon's "Voyage to the Bottom of the

Snyder Man Goes On Board

Dan Gibson of Snyder is a member of the board of directors of the newly chartered Beefmaster Breeders Universal, first organization for breeders of Beefmaster cattle. Headquarters of the new organization have been established at San Antonio, and membership rolls are now open.

Announced objectives of Beefmaster Breeders Universal are to further improve and develop the Beefmaster breed and to gain wider acceptance and recognition of Beefmasters throughout the world.

Beefmasters were developed by the Lasater Ranch, located first at Fallurrias, Texas, and now at Matheson, Colo. Their history goes back to 1906, when Edward C. Lasater introduced the first Brahman to South Texas and built a large Brahman herd in addition to a registered Hereford herd and extensive commercial herds of Herefords and Shorthorns. Beefmasters were a result of breeding the herds.

Rains Helped Drive Insects From Fields

Rains of Sunday, Tuesday night and Thursday morning last week have been of great benefit in reducing the number of cotton insects in Howard County fields, Jimmy Taylor, county farm agent, said Saturday.

Most South Plains counties have reported increase in insects in the cotton fields during the past week. Taylor says that rains, which were general over this county, must be responsible for the decrease shown in local fields. In fact, Taylor said, the insect threat this past week is less than it was the week preceding.

REDUCED

The rains appear to have reduced the activity of the damaging bugs while the beneficial insects in the fields continue to be both abundant and industrious.

The beneficial insects found in this county are hooded beetles, lady bugs, flower bugs and spiders.

In the north central part of the county thrips continue to cause some damage to young cotton in the four to 10 leaf stage. Most of the county's cotton however has outgrown the stage where thrips can be regarded as a major hazard.

Aphids are being found in all parts of the county. Heaviest infestations prior to the rains were in the Elbow, Fairview and Moore communities. Taylor said it is doubtful if this insect will build up to the point where control measures will be needed to stop it. In case aphids should develop to the danger stage, the farmer should begin poisoning activities when honeydew forms on the leaves.

SOME DAMAGE

Isolated areas are showing some damage resulting from 4 o'clock beetles. Taylor says that Dieldrin and Heptachlor as a spray are recommended in control of this pest. The use of 3-10-40 at the rate of 15 pounds to the acre applied to the edge of the field and to the turn rows will give control of the beetles.

Fleahoppers lost ground last week. They are still present in

many fields but are doing little damage. Cotton is fruiting satisfactorily and no field was checked that indicated a need for poisoning.

Fewer bollworm eggs were noted last week and very few worms were sighted. Miller or moth activity was not noted. Cloudy cool weather is ideal for bollworm buildup, Taylor warned. He recommended that a close watch be kept on fields.

The only insect which indicates any increase last week were the cabbage loopers. So far the loopers are not sufficiently numerous to justify control action.

INSPECT

Taylor pointed out that although the insect situation at present is

Alcohol Study Set In Austin

Mrs. A. O. Vanderford is due to attend the fourth institute on Alcohol Studies this week in Austin.

The institute is held annually for the purpose of providing a setting where the helping professions can increase their knowledge and understanding of alcoholism and develop techniques practical for use in work with the alcoholic and his family.

Subjects will be of particular interest to doctors, nurses, social workers, ministers, court and correctional officials, civic leaders and others. Physiological, psychological, sociological, religious, and therapeutic aspects of the problem are covered by lectures given by nationally recognized authorities.

The lecturers include Felix Barnbrance, M. D., clinical director of the Adult Mental Health Clinic at San Antonio; C. Stanley Clifton, Ph. D., director of the University of Oklahoma school of social work; Ray Harrison, judge of the municipal court in Des Moines, Iowa; John Park Lee, secretary of the department of health and welfare of the United Presbyterian Church in the U. S.; national mission board; and Marty Mann, executive director of the national council on alcoholism.

Mrs. Vanderford was for many months associated with the Midland Council on Alcoholism and has maintained an active interest in the problems of alcoholism.

Sheriff Cleared, Is Back At Work

LONGVIEW (AP) — Gregg County's veteran sheriff, Noble Crawford, is back on duty after being cleared by a jury of charges of misconduct and incompetence in office.

Crawford is still under a criminal indictment on a charge of perjury, handed down by the grand jury April 29. In reply to an inquiry, the district attorney said the perjury indictment stands "for the present."

The civil removal suit accused Crawford of willful misconduct and negligence in failing to enforce gambling laws, in the handling of county prisoners, of giving false testimony before the grand jury and using prisoners for personal work.

Killed In Crash

SPIRO, Okla. (AP) — A Midland, Tex., woman was killed Friday in a two-car accident eight miles west of here. Dead was Mrs. Yvonne Smith, 29.

Co-Ops Slate Open House

STANTON (SC) — Cap Rock Electric Cooperative and West-Tex Telephone Cooperative have completed enlarging and remodeling their office building.

An open house is set for Sunday, July 23, from 1:30 to 5:30 p.m. Door prizes will be given and the public is invited to attend. Cap Rock Electric Cooperative serves 4,500 members in a 13 county area, while West-Tex Telephone Cooperative provides rural telephone service for 1,200 families over an eight county area.

Smaller Towns Cashing In On Urban Renewal Program

How would you accept a gift of a million dollars? Even if it were given to your city for improvements instead of to you personally?

The residents of Wink, practically a West Texas ghost town, have faced that question and spokesmen report mixed feelings among the populace.

The federal government recently announced that the Urban Renewal Agency will come across with \$1,034,738 to rebuild the long blocks of abandoned, false-front buildings. In addition, a grant of \$891,000 will be thrown into the rebuilding hopper.

1,863 POPULATION
The 1960 population of Wink is recorded at 1,863. Back in oil boom times, it could boast between 20,000 and 30,000. But it

has fallen to a size smaller than Stanton, which incidentally has also applied for such funds.

For comparison, Big Spring with a population of over 31,000, recently voted to tax itself to pay for \$4 million in improvements. And Wink, with a tiny portion of this population, will receive about \$2 million, nearly half of it a gift and the other a loan of dubious stability.

Melvin Dow, publisher of the Wink newspaper, posed the question, "Will we have a well laid-out town and no people?"

His other comments include: "I'm just lukewarm to the whole idea. I've never been sold on this federal giveaway stuff, but we've reached the point where I guess something has to be done."

"I don't know what it's going

to mean; I don't know whether it's going to help us or ruin us. Nearly three years of horrendous government red tape has marked this phase of the program, which is typical of most all federal programs, or anything the bureaucrats have anything to do with. Any private business enterprise which operated in such a manner would go bankrupt in the blueprint stage."

DUE
Here's what is due to happen: All streets in a 221-acre area will be paved; that's about 75 city blocks. And many streets will be relocated to change the present confusing layout.

Twenty-two buildings in the downtown area will be torn down and a planned shopping area will be built, with shaded parking areas.

There are 261 houses that will be demolished to make way for planned housing under a new building code.

It all began when the Chamber of Commerce wrote to Washington to ask for one of those urban renewal projects. Wink got \$72,451 to begin the planning and surveying in order to determine what Wink needed.

A Midland architectural firm received a contract, the voters approved taking the advance, and Donald McBee was hired as executive director of the agency in Wink. McBee had graduated from college only 16 days before he got the job. He is paid \$650 per month and has a \$350 per month secretary. He anticipates enlarging his staff as the project gets under way.

HELP PAY BACK
Incidentally, the grant of \$891,000 was made to help pay the federal government back part of the \$1,034,738.

The federal aid to Wink amounts to \$478 for every man, woman and child living there. At the same ratio, Big Spring would get \$14,818,000; a city the size of New York could almost bankrupt the nation.

Or take the case of Mercedes, Texas. In 1941, this tiny city defaulted on its bond and went into bankruptcy. It was unable or unwilling to collect enough taxes to pay off the defaulted bonds and still maintain essential services. In short, no effort was made to improve the lot of the city by its inhabitants.

MERCEDES
Now, \$1.7 million is being pumped by the federal government into Mercedes, a town of 10,963 people. Paving costing \$560,000 is being installed; sewer and water lines costing \$234,000 are planned; a \$285,000 residential development is getting started.

City officials found out that

spending \$355,000 for a school building would qualify them for an additional \$710,000 in federal funds.

The city's mayor said "This is the greatest thing that's happened to us in years." He added that the town would not have to raise the tax rate.

Stanton has requested \$223,976 to be spent primarily on street paving and sewers. An official said Stanton received preliminary approval for the project to "give them an incentive to do what they should have been doing all along."

Other spokesmen in the various towns have spoken out on the federal aid plan, described by the Wall Street Journal as "the business of building pork barrels."

UN-AMERICAN
"I think it's the most un-American thing that's ever been hatched up," said Dick Strawn, Wink businessman. "The government's got all the business it can attend to. This giving and giving and giving has got to end."

"It's the only way I could sell," said Clyde E. Godfrey, another Wink businessman. He plans to sell his ramshackle buildings to the government and get out of town.

"It's not freedom, but they'll beat you in court anyway," J. J. Kingston, a laborer said concerning his small home. "They've offered me three times what I paid for what I've got," he added. He paid \$700 for his property and is being offered \$2,000.

"It's ideology I can't buy," said Mike Fitzgerald, who violently op-

poses federal aid. His property will go too. "I've already told them to leave me alone and I'd leave them alone. . . I believe the people should support the government and not be supported by it," he said.

"NO RIGHT"

"Nobody on earth has a right to make a man do what he doesn't see fit to do. . .," said Dave Davis, Negro scrap iron dealer. "Seems to me this is just like belonging to somebody."

And so it goes among the residents who are getting a big gift and loan from the government.

Against a backdrop of vacant buildings in Wink and Mercedes, Robert A. Robinson, director of the Housing and Home Finance Agency office in Fort Worth, has this interesting observation:

"For one thing, we have to make sure we're not perpetuating a ghost town."

Knott 4-H Club Meets Wednesday
KNOTT—The Knott 4-H Club met Wednesday night at the school with Robbie Brown, president, presiding.

Mrs. Catherine Crawford, Home Demonstration agent, gave instructions to the girls on how to get their record books ready, and examined the dresses made by the girls.

Lovell Kuykendall discussed some aspects of community improvement programs. Karen Jackson directed the recreational period.

Eight members, two visitors and nine adults were present.

Mushroom Study

MEXICO CITY (AP) — A French scientist is in Mexico studying mushrooms which reportedly produce "dreams in color." Roger Heim, director of the National Museum of Natural History of Paris, said he is interested in possible medical use of Mexican mushrooms.

Fair Grounds Building Enlarged

The north building at the Howard County Fair Grounds has been doubled in size with the addition of a 60 foot by 60 foot extension to the east. The job was recently completed by Stanford Engineering, Midland. The prefabricated steel annex was built by the county at a cost of \$10,693. The south building at the fair grounds has always been two times the size of the east. Now both buildings are of the same size.

Howard County Car Ownership Gains By 365 Since 1960

Howard County showed a total gain this year in motor vehicle ownership of 346.

The information was included in a report by the State Highway Department, which showed a total of 21,848 vehicles of all kinds registered in the county this year, compared to 21,502 last year.

Number of passenger cars increased from 15,161 to 15,517, a gain of 356. Commercial trucks gained sixty, from 3,368 to 3,448; farm trucks showed a decrease from 320 to 370 and truck tractors declined from 321 to 310. There were seventy-seven more trailer owners this year. Increase was from 1,626 to 1,703. House trailers dropped 275 to 205, and motorcycles went down from 340 to 292.

STATEWIDE

Statewide, total motor vehicle registrations climbed near the five million mark, showing an increase of 132,780 vehicles for a total of 4,782,005 in the past year. Passenger cars increased 89,079 for a total of 3,512,421. Commercial trucks increased by 21,130, totaling 630,963, and farm trucks decreased slightly from 192,771 to 192,363.

For the state as a whole, the Department reported a decrease in truck tractors from 49,117 to 48,099, while farm truck tractors

increased from 1,205 to 1,255. Trailers gained from 293,735 to 320,890. House trailers slipped from 27,761 to 26,273, and city

Boys' Club Budget Set

LAMESA (SC) — A budget of \$12,500 was adopted for the coming year and a 24-member auxiliary approved by the directors of Lamesa Boys' Club of America here Friday. The auxiliary is the first organized in Texas.

Harold D. May, executive director, reported that attendance at the club had been 100 a day during the first month of operation and that 363 boys had joined the first club in Lamesa.

The budget was presented and adopted for the coming year. Funds for operation of the club will be procured through the combined efforts of the Dawson County Community Chest later this year.

David Hughes, Rev. Walter G. Horn and Wayne Nolan were also named to the board of directors.

buses dropped from 2,203 to 1,873. Motorcycles increased from 45,696 to 46,206.

Totals in other nearby counties show:

MARTIN

Martin County — total vehicles from 3,778 to 3,673, a drop of 105; passenger cars from 2,247 to 2,167, decrease of 80; commercial trucks from 681 to 676; farm trucks, 528 both years; truck tractors from 43 to 41; trailers from 211 to 201; house trailers, the same, 24; motorcycles from 29 to 22.

MITCHELL

Mitchell County — total vehicles from 6,332 to 6,191, a loss of 341; passenger cars from 4,418 to 4,158, down 260; commercial trucks from 1,053 to 993; farm trucks from 475 to 453; truck tractors from 110 to 89; trailers from 409 to 439; house trailers from 31 to 23; motorcycles from 31 to 34.

STERLING

Sterling County — total vehicles from 806 to 802; passenger cars from 481 to 458; commercial trucks from 137 to 138; farm trucks from 126 to 138; truck tractors from 6 to 8; trailers the same, 5; motorcycles from zero to three.

By KAY LOVELAND

Going to college these days is a major financial undertaking. The cost of tuition at state-supported colleges is low enough that almost everyone can afford that part of the cost, but the tuition is only a minor matter. The majority of the expense is in buying books and clothes and paying for food and lodging.

For most middle class families with more than one child, the \$3,000 to \$5,000 it takes to send a young person away to college for four years does not come easy. Even when the youth stays at home for the first two years and attends a junior college, there is still a great deal of money involved in those last two years away from home.

Often young people work, scrimp and save along with their parents to scrape together enough money to get a higher education, and still they find it difficult to meet expenses. Scholarships which really pay aren't too numerous, either. What is the solution, then, when a young person who really desires a college education, can't seem to manage it financially? The best solution is probably the National Defense Student Loan Program.

This program, set up under the National Defense Education Act of 1958, is designed to meet the needs of the people of our country who sincerely desire to obtain college education but can't seem to manage the cost. Under the terms of the Act, a student may borrow up to \$1,000 in one year and up to \$5,000 during his entire course of higher education, depending upon his need.

Undergraduate and graduate students applying for a loan must be enrolled on a full-time basis, capable in the opinion of their institutions of maintaining good academic standing and in need of the amount of the loan to pursue their courses of study. Fulltime students are defined as those who are undertaking a sufficient number of credit hours of study or their equivalent of college-grade courses to secure the degree toward which they are working within the normal time.

STATUS

The status of interns, residents and graduate students is determined by the individual institutions.

Students on academic probation, who are permitted to continue in attendance at the institution, may be eligible for loans if officials determine that the student is academically in "good standing." Also, students who are or have been recipients of National Defense Graduate Fellowships or National Defense Modern Foreign Language Fellowships or are receiving "financial benefit" from the Veterans Administration are also eligible for loans if the need exists.

Young people wanting to get a loan apply to officials of the institution they are attending or plan to attend. First step after gaining the interview is to fill out a four-page application blank which includes questions on personal life, education, family income and resources and a proposed budget of expenditures during the long session. Students also state what amount of money they feel they will need to complete the year's work.

CHECKS

Once the application is filled out, a committee at the school checks the application and decides whether or not the student actually needs a loan. If approved, the loan is granted to the student on whatever basis the college decides upon.

Final amount of the loan is determined by the committee. "Often, the figure set by the student is found too high by the committee," says Dean Ben Johnson of Howard County Junior College. "The committee sets the amount which it feels is absolutely necessary to the student." Johnson also explains that schools could not possibly loan every student the amount he wants because the allotments to the schools, especially junior colleges, are not great and requests are

numerous. Maximum amount of money loaned to students at HCCJC since the program began is \$750, and the average loan for the nation last year was \$439. The local junior college gives an average of 20 loans per year.

obtained a loan at one college are not guaranteed a loan when they transfer to another college or university.

Ordinarily, security or endorsement is not required of student borrowers. The participating institution, however, may require security or endorsement if the State law prohibits borrowers under 18 or 21 of age from incurring a binding obligation.

Several plans for repayment are offered to the student, but all provide for a three per cent interest rate starting one year after a person ceases to be a fulltime student. Most students choose a plan whereby, if they have borrowed \$1,000, they repay the loan plus \$165 interest over a 10 year period.

10 YEAR LIMIT

The limit of ten years plus the one year of grace is set for repayment of the loan, but many students repay their loans in considerably less time.

The "forgiveness" clause of the Act provides that student borrowers who become fulltime teachers in public elementary or secondary schools need not repay 10 per cent of their loan, plus interest, for each year of teaching, up to 50 per cent of the loan. Under this plan, a student who borrows the maximum of \$5,000 and teaches for five years needs to repay only \$2,500.

Because the Act makes a special mention both of students with superior academic backgrounds who plan to teach and also students whose academic backgrounds indicate superior capacity or preparation in science, math, engineering or a modern foreign language, many students think they do not possibly have a chance to obtain a loan unless they have a high academic average.

Although special consideration is given to such students, the Student Loan Program is designed to help students with college ability — not necessarily those with high grades. In making a loan, the financial aid officer of a participating institution must first determine the extent of the student's financial need.

SPECIAL CONSIDERATION — He then considers whether the student should be given "special consideration" under the terms of the Act. Except for students who fall into the "special consideration" category, the financial aid

officer uses the criteria of high academic achievement only when, because of a shortage of funds, he must choose between two students who have the same financial need.

An exception is also made for young men who go into the armed services. No repayment of the loan is required of them during a period of three years while they are in the service.

In the event that a person who receives a loan should die or become permanently disabled, the unpaid loan is cancelled. Also, if the person should leave school before he has used up the balance of the loan, he is responsible for paying back only what portion he has used.

The program does make it possible for those who have a definite financial need to get an education," said Johnson.

Here's Why Millions Each Year Choose Optometrists for Their Eye Examinations

THERE ARE TWO ASPECTS TO AN EYE EXAMINATION.

1. A Diagnosis Of The Internal Condition Of The Eyes.

With the Ophthalmoscope, an instrument used to examine the interior of the eyes, each eye is examined for evidence of internal disease or defect.

2. An Analysis Of The "Seeing" Function Of The Eyes.

With scientific ophthalmic instruments, the eyes are examined for visual abnormalities such as astigmatism, near-sightedness, far-sightedness, and muscle imbalance. If such defects are present, the amount of each is determined, and lenses are prescribed to correct the patient's symptoms.

OPTOMETRISTS ARE EDUCATED AND LICENSED TO PERFORM SUCH EYE EXAMINATIONS.

To obtain a Doctor of Optometry (O.D.) degree from a recognized college, one must complete five years of classroom, laboratory and clinical study. This extensive education includes courses in pathology, anatomy, physiology and optical sciences. When completed, the Optometrist is well qualified in the recognition of symptoms and physical

evidence of eye diseases and defects, the analysis of visual abnormalities, the formulation of prescriptions for lenses, and the fitting of glasses and contact lenses, or visual training. Before the Optometrist may practice his profession, he must pass a rigid State Board Examination and receive a license.

OPTOMETRISTS ARE SPECIALISTS IN PRESCRIBING AND FITTING VISUAL AIDS SUCH AS SPECTACLES OR CONTACT LENSES TO CORRECT FAULTY VISION

The Optometrist is a specialist in visual science. An example of recent Optometric achievement is the persistent research and development which brought about the perfection of contact lenses. Today, because of this effort by Optometrists, an estimated six million persons are wearing these modern wonders of optical science, rather than regular eyeglasses. To many, contact lenses have meant a new outlook on life itself.

THE OPTOMETRIST PERFORMS SCIENTIFIC EYE EXAMINATIONS, PRESCRIBES GLASSES AND CONTACT LENSES, ALL OF WHICH IS DONE IN THE SAME OFFICE OR LOCATION.

When You Need Eye Care, Glasses or Contact Lenses, See a Competent Doctor of Optometry at TSO

DEAR ABBY

Start Telling Everybody

DEAR ABBY: You've got to help me out of this mess. I am a married man with a family. I was laid off my regular job, so I took a job in another state. I got mixed up with a young girl there. I didn't tell her I was married. I did a foolish thing and gave her an "engagement" ring. I must have been nuts.

She told me last Friday she is in a family way, and we have to get married right away. I can't marry her because I am already married. I know her father, and I'm afraid he will kill me. If I run out on her and am caught, will they put me in jail? My job pays good money, and I don't want to leave town. How do I get out of this mess?

STUPID AND MESSED UP
DEAR STUPID: I doubt if you will be lucky enough to get into a nice, safe jail. Tell your girl friend about your wife. Then tell your wife about your girl friend. Then tell a lawyer about both of them. And pray.

DEAR ABBY: How do you stop a grown man of 24 from licking his plate? Yes, Abby. This husband of mine (and father of two children) just loves to lick his plate. He does it all in fun, and to show me what a good cook I am, but the children are going to start to imitate him. Any suggestions would be appreciated.

DEAR DOTIE: If your great big overgrown boy doesn't stop licking his plate—give HIM a licking.

DEAR ABBY: My daughter was

asked to be a bridesmaid again. This will be the third time this year. Each time she had to buy her own dress and shoes, and get a present for the bride. Each time it has run us about \$60.

Our daughter goes to college, and does not earn her own money. We have another child in college, and have to budget ourselves very closely to make ends meet.

Am I wrong in thinking that if the bride's mother wants her to have a big wedding, with bridesmaids, she should pay for the bridesmaids' dresses?

CUTTING CORNERS
DEAR CUTTING: The most common practice is for the bridesmaid to buy their own gowns. The other way is the exception, and not the rule. The bride's mother has an obligation to keep the dress modestly priced. If she wants super - duper bridesmaids' dresses, she should buy them. Generally, if a bridesmaid can't afford to buy her own dress more than once, she should decline the invitation.

What's bothering you? For a personal reply, write to Abby, Box 3365, Beverly Hills, Calif. Include a stamped, self-addressed envelope.

For Abby's booklet, How To Have A Lovely Wedding, send 50 cents to Abby, Box 3365, Beverly Hills, Calif.

DEAR ABBY: My daughter was

Pigs To Take Over Andrews

Forty greased pigs will be turned loose in the business section of Andrews this week.

The event is being sponsored by the retail committee of the Chamber of Commerce in connection with its Annual Crazy Days Retail promotion. There will also be a hog calling contest.

The Chamber has been trying for two months to insure the pigs for liability reasons and cannot find a company that will take the risk. Even Lloyds of London, who will insure anything, has turned down the greased pigs. The chamber decided to take the risk anyway and turn the pigs loose on schedule.

One side of the Court House Square will be blocked off for the event in order that the pigs can run in any direction. The Chamber is offering a \$10 gift certificate to the person catching each pig.

Weighing 40 to 50 pounds each, each pig will be painted assorted colors and will be bearing the name of a local merchant on its side. Local officials expect 50 per cent of the pigs to run loose in the city streets for days never to be caught.

Rackley Gets Mail Hauling Job

Roy Rackley, 1200 Lloyd, has been awarded contract by the U. S. Post Office Department to pick up and deliver mail for the local office. He will haul mail to and from the Texas and Pacific Railroad depot and the bus station as needed. His bid for the job was \$3,260 per year. Rackley begins his new duties on July 22 and will replace T. E. Wilcox who has been hauling the mail since June, 1959.

20 CASES

Civil Docket Slated Monday

A civil docket will be sounded in 118th District Court at 10 a.m. Monday and a jury panel is ordered to report to the court at 1:30 p.m. the same day.

Judge Ralph Caton said that 20 cases remain on his list as tentatively ready for trial. When he sounds the docket Monday morning, he will know exactly how many cases will be ready to try.

Three of the matters originally set for trial have been settled. Judge Caton has been notified.

The cases which are still on the docket Friday were:

Richard Cannon vs. Johnson Oil Co., damages; Maple Ritchie et al vs. Odie M. Grady, damages; S. E. Clackum et al vs. Jerry L. Davis et al, damages; James L. Crull vs. Mid-Continent Casualty Co., compensation; Earnest W. Heckler vs. Texas and Pacific Railroad Co., damages; Eula McDonald vs. Bickerstaff and Tibbets Drillings Co., damages; AMP Pinsettters Inc. vs. Clover Bowl of Big Spring, Inc., debt; Ollie P. Bailey vs. Texas Employers Insurance Co., damages; Jack A. Kruse vs. U. S. Fidelity & Guaranty Co., compensation; R. E. McClure et al versus Furrs Inc., damages.

Herbert Vinson vs. Gerald Paul Liner, damages; C. M. Holladay et ux vs. Spec Robinson, damages; Mrs. Shelby Hall vs. Safeway Stores, Inc., damages; Ken Wiggins et ux vs. Texas & Pacific Railroad, damages; J. C. Morron vs. Travelers Insurance Co., compensation; John

Regulars

Six Reserve officers, currently in the pilot training program at Webb AFB, were sworn in as regulars in a formal ceremony in the office of the base commander, Col. Donald W. Eisenhower. Maj. Ernest G. Bauman administered the oath, as Col. Eisenhower and members of his staff watched. All of the new regulars were distinguished graduates of their respective college USAF ROTC units. Five are members of Class 62F, and one is a member of 62H. They are, from left, 1st Lt. Leo G. Jaussens; 2nd Lt. Carl L. Walters; 2nd Lt. John M. Wilson Jr.; 2nd Lt. Elgie C. Rath Jr.; 2nd Lt. Dennis B. Wolfe; and 2nd Lt. Harold M. Sistrunk.

Jones Calls Criminal Docket For July 24

Harold L. Murray, a patient in the Big Spring State Hospital, charged with murder in the death on June 1 of a fellow patient, is slated to go on trial in 118th district court on July 24.

Gil Jones, in announcing that the case has been set down, emphasized that the purpose of the trial will be to have Murray given a sanity hearing before the court. If he is found to be mentally ill, as Jones feels will be the case in view of all circumstances—he will be ordered committed to the Texas State Hospital for the Criminal Insane at Rusk.

Jones pointed out that these steps are necessary to remove the man to a maximum security institution. The Big Spring State Hospital where he is now a patient, is not intended as a maximum security establishment.

Murray and a fellow patient, Jimmy Ray Perkins, engaged in a fight in a washroom at the Big Spring State Hospital on June 1. Perkins died of injuries received. Murray is still in the hospital and has not been removed to the

county jail. He will be kept at the hospital until some disposition is made of the case against him, Jones said.

Murray's case was one of 10 criminal matters Jones announced he would call up for trial during the week of July 24.

Five of the defendants slated for trial are indicted under the habitual criminal act. Such indictments could provide life imprisonment for the defendants if convicted.

The habitual offenders named on the docket are:

Frankie Lee Bean, burglary; Pablo Campos, theft; James McAlister, burglary; Levy Leroy Edmonson, burglary; Charles Gilbert Cleary, theft.

Other cases set for July 24 include:

Elwood Frazier Bunton, robbery; Arthur Downs, forgery; William R. Bennett, forgery; Perry Connell, worthless check; Albino Ortega, robbery by assault.

It is possible, Jones said, some of the defendants may elect to enter guilty pleas before their cases are called.

Last week, Cleary, Edmonson, McAlister, Ortega and Downs appeared before Judge Ralph Caton and informed the court they had no attorneys nor money to employ attorneys.

The court appointed lawyers to represent the men when their cases come to trial.

Jurors to serve in the trial of the criminal cases will be notified to report to the court sometime this week.

PREPARING NEW PONDS TO GIVE FISH GOOD START
CRMWD experiments to bolster its mode of new fish stocking

CRMWD Employing Ponds To Help Improve Fishing

The Colorado River Municipal Water District starts this week in an effort to give nature—and sportsmen—a boost.

Four big earthen ponds have been completed and will be filled this week in an effort to step up the propagation of game fish in Lake J. B. Thomas, the district's big reservoir.

There are four tanks, three of them 50x100 feet, and the other roughly 60x80 feet. They are six feet deep at one end, 1 foot at the other, and each contains approx-

imately 150,000 gallons of water. The ponds may be filled—or drained—through a pipe at the base of the structures which are located on the northeast side of the district's boat basin.

Plans are to take the fry (small fish) from the Texas Game and Fish hatchery and to keep them under controlled conditions in the ponds until they are large enough to fend for themselves and thus have a good chance of propagating.

Later, the district hopes to experiment with some hatching, thus stepping up the volume of new fish which can be added to the big lake.

One of the ponds may be given

over exclusively to crappie in an effort to improve the quality of crappie fishing in the lake. At the outset Lake Thomas produced some fabulous catches of king-size crappie, but in the last year or so the number and size have both declined. R. A. Schooling, lake superintendent, is hopeful that by getting them off to a better start in the district's ponds the general run of crappie fishing will be stepped up.

There also may be some experimentation with a new type of perch which is said to compete successfully with rough fish and which frequently reaches 3-4 pounds.

CROWD OUT OTHERS

Rough Fish Big Problem In Management Of Lakes

Rough fish head the list of problems of reservoir management, according to an article by John Gary Wood, aquatic biologist in the current issue of Texas Game & Fish.

There has been some success, such as the selective control of gizzard shad with rotenone, but the surface of the basic problem has scarcely been scratched, says Wood.

In Texas fresh water lakes there are some 25 species of fish classed as undesirable for one reason or another. Their life histories including food habits, reproduction requirements, growth rates, life span and many other facts must be known along with those of game species before practical methods of management can be worked out.

The Texas Game and Fish Commission has initiated such studies, hoping to find a way to effect a healthy balance of fish in new lakes.

The rough fish problem is becoming critical because these fish eat a large portion of the basic food supply in a lake. A lake with no rough fish would produce many more pounds of game fish. Some lakes have a ratio of 90 pounds of rough fish to 10 pounds of game fish. Studies indicate that the majority of rough fish (carp, buffalo, gar, shad, etc.) furnish little or no food supply to the game species.

Studies at Lake Inks illustrate the problem of most Texas inland lakes. Of each 100 pounds of fish trapped in surveys, 35 were carp, a useless fish that strains basic nutrients from lake mud and silt, thus reducing lake fertility. In the same lake gar and shad made up another 45 pounds per 100 pounds, thus 80 per cent of all fish were rough fish.

If carpuckers were suddenly

removed from any major impoundment, the game fish populations would increase rapidly, according to Wood. Many lakes have great fishing when they are new because there is ample nutrient for all species. When the lake has all the fish it can hold, it becomes a matter of competition for "room" to exist. The species which are better adapted to the particular environment will then tend to crowd out species that are less hardy. Thus, carpuckers exclude gradually any species which is less adapted to survival. This happens because in a reservoir a few years old, there is a decline in water fertility due to exhaustion of the nutrient materials which were present when the basin was first filled.

Besides gobbling up more than their share of food, the rough fish also raid nests and sometimes root through nesting areas to disrupt them.

The major task seems to be to find a means—chemical, mechanical or biological—for removing rough fish selectively. Meantime, suggests, Wood, "Fishermen might do much to increase their fishing pleasure by learning to enjoy the popular dough-bait and gar fishing sport."

Bonus Hurler Belted Again

WASHINGTON (AP) — Lew Krausse, Kansas City's \$125,000 bonus pitcher, went down to his fifth straight defeat Saturday as the Washington Senators scored a 7-1 victory behind Dick Donovan. Krausse, 18-year-old right-hander, went three full innings and was roughed up for three runs and five hits. Art Ditmar, Bob Shaw and Norm Bass followed him to the mound.

Donovan blanked the A's on one hit for the last six innings and retired 20 of the last 21 batters he faced. He gave up six hits in registering his fifth victory against eight defeats.

The A's took a 1-0 lead in the second inning but the Senators tied it in their half of the inning on a walk and went ahead in the third.

Washington's lead was 2-0 in the fourth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 5-0 in the sixth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 6-0 in the seventh. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 7-0 in the eighth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 8-0 in the ninth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 9-0 in the tenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 10-0 in the eleventh. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 11-0 in the twelfth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 12-0 in the thirteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 13-0 in the fourteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 14-0 in the fifteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 15-0 in the sixteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 16-0 in the seventeenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 17-0 in the eighteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 18-0 in the nineteenth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 19-0 in the twentieth. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 20-0 in the twenty-first. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 21-0 in the twenty-second. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Washington's lead was 22-0 in the twenty-third. Krausse pitched 2 1/3 innings, allowing three runs and five hits. He was replaced by Art Ditmar in the fifth.

Donovan pitched 2 1/3 innings, allowing no runs and one hit. He was replaced by Norm Bass in the fifth.

Right Label

Tippy Anderson Jr., 1314 Sycamore, wears the right label — "fisherman" — as this 16-inch rainbow trout will attest. Anderson has been fishing at Red River, N. M., where the Trout Association has been stocking regularly with large fish.

Argentine Horse Splashes To Win

OCEANPORT, N.J. (AP) — Argentine-bred Don Poggio, owned by Gustave Ring of Washington, D.C., splashed through the driving rain on a sloppy track Saturday and pulled away to a 3-4 victory over John J. Colando's U.S. Hope in the \$112,300 Monmouth Handicap at Monmouth Park.

US Pair Clinches Zone Cub Berth

ST. LOUIS (AP) — Chuck McKinley, 20, and Dennis Ralston, 19, powered their way to a 6-1, 6-2, 7-5 conquest of Ecuador's Miguel Ovela and Eduardo Zuleta in the doubles Saturday to catapult the United States into the American zone final of the Davis Cup competition.

The one-sided victory enabled the U.S. to take a 3-0 lead in the best-of-5 series and made Sunday's two singles contests just a formality.

McKinley, the muscular St. Louisan who attends Trinity College in Texas, and Ralston, of Bakersfield, Calif., needed only 56 minutes to dispose of the Ecuadorians.

McKinley and Bernard (Tut) Bartenz accounted for two victories in the singles Friday.

Allen Fox, NCAA tennis champion from UCLA, will replace Bartenz against Ovela Sunday with McKinley playing Zuleta.

The U.S. now must wait for two more matches before knowing its next opponent. Mexico plays Canada, with the winner to play Morocco. The U.S. takes on the winner of that match, probably at Cleveland.

Boston Edges Orioles, 2-1

BOSTON (AP) — Boston edged Baltimore 2-1 Saturday on the four-hit pitching of Gene Conley and rookie Chuck Schilling's clutch single.

Conley, the 6-foot-8 right-hander who never let up though he trailed from the first inning, bested Dick Hall on the strength of a two-run uprising in the seventh.

Vic Wertheim tied the score with a pinchhit sacrifice fly after Pete Runnels and Frank Malzone singled. Conley set up the winning run by dropping a single down the right field line.

With Malzone on third, Schilling drove a liner just over the frantic clutch of Jerry Adair into right.

Conley was working on a two-litter until Brooks Robinson and Russ Snyder hit consecutive singles with two down in the eighth.

Gene's walk to Robinson as the first batter in the game, and an infield out produced a Baltimore run when Jackie Brandt singled.

Baltimore's 2-1 lead was 2-1 in the eighth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 3-1 in the ninth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 4-1 in the tenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 5-1 in the eleventh. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 6-1 in the twelfth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 7-1 in the thirteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 8-1 in the fourteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 9-1 in the fifteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 10-1 in the sixteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 11-1 in the seventeenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 12-1 in the eighteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Baltimore's lead was 13-1 in the nineteenth. Conley pitched 7 1/3 innings, allowing two runs and five hits. He was replaced by Chuck Schilling in the ninth.

Arnold Palmer Wins British Open Title

BIRKDALE, England (AP) — Arnold Palmer of Latrobe, Pa., won the British Open Golf Championship by a single stroke Saturday with a 72-hole total of 284.

Palmer, who started the day one stroke behind co-leaders Dai Rees of Wales and Harold Hemming of South Africa, took over the lead after his morning round of 69. He made his second trip of the day in 72 over the rain-soaked Birkdale course, where he was 36-38-72.

Workers were posted at every green with buckets and blankets, which they used as blotters, to keep the course playable. Palmer started his double round in clear

weather but it was raining again by the time he reached the 13th hole of the morning round.

The rains subsided after the luncheon period, however, and a soft breeze sprang up.

Palmer is the first American to win this venerable title, possibly the most cherished in golf, since Ben Hogan triumphed in 1953.

The soft-spoken Pennsylvanian, known for his surging finishes, missed by a stroke. He made today's two rounds in 71-72 for a 285 aggregate.

The only other American in the final 48-man field was Paul Runyan of LaJolla, Calif., the recent winner of the British-American Senior Playoff. He had 75-72 and wound up with 299.

The verdict today was in doubt until the very last stroke. Rees stepped up to the 18th tee knowing he needed an eagle two to tie Rees' second shot rolled dead 12 feet from the pin. He sank it for

birdie but it was raining again by the time he reached the 13th hole of the morning round.

The rains subsided after the luncheon period, however, and a soft breeze sprang up.

Solons Seek Tax On Gas

By MAX B. SKELTON
HOUSTON (AP)—Texas legislators once again have been asked to find a way to increase the state's tax on natural gas being exported to other states.

Such a tax hike eventually affects the gas bills of hundreds of thousands of consumers in Midwestern and Northeastern states.

The objective is to find a tax hike formula that would place most of the added taxes on pipeline companies that move trillions of cubic feet of gas out of the state annually.

The legislature actually has been searching since 1951 for such a formula.

Direct and indirect tax hike plans have been adopted in the past only to be voided in state and federal courts as unconstitutional. The successful court attacks by the pipeline companies have centered on charges the increases were a burden to interstate commerce and were designed to raise state revenue at the expense of citizens of other states.

Texas got nearly \$47 million dollars in the 1959 fiscal year from the current gas production tax of 7 per cent of market value.

This week Gov. Price Daniel asked the legislature to consider a new indirect route that would bring in \$15 million a year in added revenue.

The plan is aimed at produc-

tion from the huge gas reserves of the pipelines held under exclusive, long-term contracts.

The legislature was asked to retain the 7 per cent of market value tax but set a minimum tax of 1-cent per 1,000 cubic feet of gas. In cases wherein the 7 per cent formula amounts to less than 1-cent per 1,000 cubic feet the tax would be increased to 1-cent per 1,000.

Such a plan would affect gas being sold at less than 14 1/2 cents per 1,000 cubic feet.

Daniel's message made no specific reference to exported gas but made frequent references to pipeline companies.

"It is only the gas which has been tied up by the pipeline companies under cheaper prices that is subject to an additional tax," he said. "In all cases where the present tax amounts to less than 1 cent per 1,000 cubic feet, the difference would be levied on the pipeline companies which have the gas production and reserves tied up under exclusive contracts."

Statistics for 1960 indicate the significance of exported natural gas to Texas' economy.

Marketed production exceeded 5.4 trillion cubic feet. More than 2.9 trillion cubic feet, 55 per cent of the state's marketed production, was exported to other states by 30 pipeline companies.

FOR FOSTER FIELD

Odessa Firm Asks Water For Ector Repressuring

Tenneco Oil Company, Odessa, had indicated that proposed rates for surplus water from the Colorado River Municipal Water District are satisfactory.

J. D. Hicks, district production superintendent, has asked E. V. Spence, general manager of CRMWD, for a conference the latter part of this month to work out details of a contract.

Tenneco wants a relatively small quantity of water for repressuring in the Foster Field of Ector County, and contract will be made subject to prior use by member cities.

Tentative rates were quoted by the CRMWD to Coston Petroleum and Varrel in the Moore field, and Hiawatha Oil Company

at a recent meeting of the Board in Big Spring.

In the meantime, the CRMWD is ready to close a contract with Standard Oil of Texas and Sinclair Oil & Gas as soon as they are returned. Attorneys for the companies have cleared the contracts. Water for use in the East Howard-Istan field will be taken from Moss Creek and Powell Lakes and will be supplemented from Lake J. B. Thomas via Big Spring if needed.

Another company, Sun Oil, is negotiating for a limited amount of water in Scurry County, Spence said, but this likely will be handled through SACROC, the original customer for surplus water in repressuring.

Jury Favors Workers In IUOE Damage Suit

STINNETT, Tex. (AP)—A jury of eight men and four women in this Texas Panhandle town has ruled after a week's deliberation that a labor union is liable to its membership for damages resulting from a strike order.

It so decreed Friday in recommending payment of \$1,197,072 to 28 former employees of the Phillips Petroleum Co. who sued the International Union of Operating Engineers after they lost their jobs in complying with a strike order in May of 1958.

The jury returned its verdict after a month-long trial. Its decision was in the form of a recommendation to District Judge Max Beyer, who announced he would make a formal award or judgment in September.

The 28 plaintiffs originally sued for \$4 million in damages, including loss of wages and benefits and credit rating resulting from their dismissal by Phillips Petroleum Co. After their union called them out on strike, the judge reduced this amount to \$2.6 million before the case went to the jury.

The jury specified the amount each plaintiff should receive in damages from the union. It ranged from \$24,158 to \$78,690.

After the verdict, Albert Smith of Lubbock, one of four attorneys for the plaintiffs, issued the following statement:

"It is hoped that this case will

become a spoke in the wheel of a Magna Charta for the working men and women of the United States. The jury verdict truly represents a magnificent testimonial to the soundness of the American jury system working under trying and exhausting circumstances.

"It is to be hoped that this case will forever put to rest the contention made by the international

union that it owes its members no duties and no obligations of any kind or character. It is believed that it is time for international unions to stand responsible financially for a failure to discharge their obligations to their members."

There was no immediate comment from union sources. Both sides are expected to file legal motions before the formal award is made.

600,000 MILES

125 Firms Run Pipeline Network

DALLAS (AP)—The nation has more than 600,000 miles of natural gas pipelines in operation, officials of the Dallas Federal Reserve Bank reported recently. A total of 125 firms operate the intricate network.

The report credits the network with preserving all but about five per cent of the natural gas in the nation. This contrasts with Venezuela and the Middle East, which lose two-thirds of the natural gas they produce, mostly in oil production.

The bank reports that marketed production of natural gas in the nation doubled between 1950 and 1959, with interstate shipments accounting for an increasingly larger portion of all gas sold. These interstate sales moved from 40 per cent in 1950 to 60 per cent in 1959.

About 80 per cent of the gas shipped between states originated in the bank's Southwest Region, with Texas now providing almost one-half the national total of exports.

Over the past 10 years, the most significant rates of increase in interstate shipments from the Southwest have occurred in New Mexico and Louisiana.

While Texas' exports accounted for 50 per cent of the Southwest total in 1959, this was a decline from 66 per cent in 1950.

On the other hand, Louisiana's portion of total shipments rose from one-fifth in 1950 to nearly one-third in 1959. Some of this increase came from offshore wells.

All expansion of interstate facilities since Feb. 7, 1942, re-

Basin Rig Activity Takes Jump

A better than 13 per cent increase in rotary drilling activity drove the Permian Basin rig count up to 238, according to Reed Roller Bit Company's Friday survey.

This figure—for the first time in 1961—tops last year's 205 and last week's 210.

Lea County, N. M., with 44, led West Texas and Southeast New Mexico activity.

Other active counties include Pecos 22, Crane, 16, and Andrews, 15.

The county-by-county survey, with previous totals parenthesized, includes:

Andrews 15 (15), Bailey 1 (0), BORDEN 3 (2), Chaves 1 (1), Coke 2 (2), Concho 2 (0), Crane 16 (8), CROCKETT 6 (5), Culberson 1 (1), DAWSON 4 (5), Dickens 1 (0), Ector 14 (10), Eddy 7 (6), Fisher 3 (2), Gaines 2 (3), GARZA 4 (4), Hale 1 (0), Hockley 4 (4), HOWARD 6 (5), Kent 4 (3), Lea 44 (42), Loving 0 (1), Lynn 0 (1), MARTIN 7 (6), Midland 7 (5), MITCHELL 2 (1), Nolan 2 (2), Pecos 22 (13), Reagan 1 (2), Reeves 0 (5), Roosevelt 6 (11), Runnels 4 (3), Schleicher 2 (3), Scurry 3 (2), STERLING 1 (0), Stonewall 2 (2), Terrell 4 (4), Terry 1 (1), Tom Green 3 (5), Upton 3 (3), Ward 4 (5), Winkler 7 (9), Yoakum 7 (5), TOTALS 238 (210).

Hyer Making Good Recovery

Fred Hyer, veteran oilman, is convalescing satisfactorily at Malone & Hogan Foundation Hospital following major surgery. He underwent an operation on Tuesday, and although progress is good, he still is unable to have company.

Mr. Hyer drilled the discovery well in the Howard-Glasscock oil field, bringing in a producer in November of 1925 on the Clay lease, six months before the more spectacular Chalk discoveries ushered in the oil boom.

338 WELLS DRILLED

Wildcatters Set Faster Pace With Bigger Margin

AUSTIN (AP)—The Railroad Commission reported Saturday that Texas wildcatters continued last week to outstrip by a tremendous margin their performance last year.

They drilled 35 wildcat gas wells last week, bringing their total for the year to 338—nearly seven times the 50 that had been by this time last year.

Eleven of the wells were in

Gulf Expects Higher Figures

HOUSTON—Gulf Oil Corp. expenditures in West Texas in 1961 are expected to exceed last year's figure by some \$10 million, according to company estimates.

About \$170 million was expected to be spent compared to \$160 million last year.

The company's operations in West Texas employ more than 1,500 persons with offices in Midland, Fort Worth, Wichita Falls, Amarillo, Odessa, Crane, Monahans, Andrews and Kermit.

Of 375 development projects drilled in West Texas last year, 243 were producers. Eighteen of 35 wildcats were producers with promising discoveries including the East Dune-Devonian field in Crane County.

Gulf's domestic marketing headquarters were transferred last year from Pittsburgh to Houston. From there, activities of four new regions are now being directed.

Despite the low allowable production days in Texas in 1960—104 days—West Texas daily average production by the company went up 2,000 barrels a day over the 135,000 barrels registered in 1959.

Trans-Western Pipe Line, a 1,809-mile transmission system opened in August of 1960, connects fields in West Texas and the Panhandle with markets in California. The company has a 32 per cent interest in the system capable of delivering more than 300 million cubic feet of gas daily.

Big Production Gains Marked

TULSA (AP)—Daily average domestic oil production advanced 86,595 barrels to 6,981,470 during the week ended July 8, the Oil and Gas Journal said today.

Biggest gains were made in Texas, up 24,700 barrels to 2,447,300; Oklahoma, up 17,940 to 549,940; and Louisiana 14,550 to 1,125,350.

The Journal estimated 1961 production at 1,364,477,200 barrels compared with 1,341,525,900.

New Mexico was up 3,500 barrels to 302,100; Colorado, 300 to 73,700.

Leases Filed For 6 Sections

Texas National Petroleum Co., has filed two oil and gas leases in the Howard County Clerk's office covering six sections of county land

Boys' Ranch Roundup To Be Conducted During August

Time is almost at hand for the second annual Fall Roundup Sale of donated livestock, proceeds of which go to the Boys' Ranch of West Texas near San Angelo.

BEAUTIFUL MODERN SUNSET MOTEL AT AUCTION

TUESDAY, JULY 25th, 1961—1:30 P.M. 6-Blocks West of Scurry County Court House—2604 West 25th, SNYDER, TEXAS. 18—Solid Masonry Units, Knotty Pine or brick interiors, combination tubs & showers, carpeted wall to wall, air-conditioned. Panel Ray heat, well furnished with heavy lined oak, T.V.'s, excellent mattress & springs, most with phones. Swimming pool, dog kennel, linen room, three-room living quarters and office.

1.39 acres of land on US No. 180, affording plenty of parking. Beautifully landscaped with shade trees, lawn furniture.

TERMS: 10% escrow at sale, balance upon approval of title or see your Banker.

Snyder, Texas is on US Highways 180 & 84, State No. 350 and 101. Important oil center, ranch and farming area, other industries & business city.

Present owner is practicing dentist in Oklahoma and will sell this property to highest bidder without reserve or limit. If you miss this sale you have missed a lifetime opportunity.

roundup time this year, when West Texas ranchmen will be asked to donate whatever live stock they can afford—from a good calf to a nearly worthless old ewe.

Donated livestock will be accepted and sold for the benefit of the Ranch, without handling charges, by participating auction firms at any regular sale during the month.

Boys' Ranch of West Texas is home to 55 to 60 boys, who, because of circumstances beyond their control, need a place to live and receive an education.

Last year, a single special sale at Producers Livestock Auction in San Angelo yielded several thousand dollars. But stockmen who sponsored the sale found that many ranchmen were unable to donate because they couldn't work pastures for that single purpose, or because they weren't able to get stock from far distances into San Angelo. For those reasons, this year's roundup sale is spread throughout August and is being assisted by 14 auction firms in various parts of West Texas.

Local "Wagon Bosses" will also participate in the campaign, contacting prospective donors, explaining the program and helping stockmen and auction operators in making the drive effective.

Participating auctions include Big Spring Livestock Auction, Big Spring; Tate Bros. Livestock Auction, Colorado City; and San Angelo Livestock Auction, San Angelo.

Participating Wagon Bosses include Riley J. King, Sterling City; Raymond McCutchen, Robert Lee; Theron Weatherby, Big Lake and E. H. Pinson, San Angelo.

The week of July 23-29 has been designated Farm Safety Week by President Kennedy. Theme of this year's observance is "Safety Is a Family Affair," announced Calvin Pigg, president of the Texas Farm and Ranch Safety Council.

In his proclamation, President Kennedy called attention to the fact that more than a million farm residents are injured and thousands are killed each year in accidents.

A proclamation by Governor Daniel pointed out that a vigorous farm accident prevention education program will be conducted during the week by the Texas Farm Bureau, the Texas Farm and Ranch Safety Council, the Texas Agricultural Extension Service and the Texas Safety Association.

Selected for farm safety emphasis this year are two critical areas: rural highway and farm machinery safety. Motor vehicles claimed the lives of 5,300 farm residents in 1959, including 4,700 non-work deaths. About 1,000 persons are killed each year in farm accidents, one-third of which occur on public roads.

Pigg also announced that a different phase of farm and home safety will be emphasized each day during Farm Safety Week: Sunday, reverence for life; Monday, safety begins at home; Tuesday, agricultural chemicals; Wednesday, prevent falls; Thursday, highway safety; Friday, farm machinery; and Saturday, recreation safety.

Oil Field Worker Killed in Crash

DEL RIO, Tex. (AP)—Henry T. Patterson, 24, an oil field worker from Lewisville, died today in a traffic crash Saturday 15 miles north of here.

Seriously injured were Jimmy Lee Peavy, 21, (2710 E. 8th), Lubbock, and Joel Brington of Petersburg.

Tech Will Admit Negroes

LUBBOCK (AP)—The Texas Tech board chairman said the college will be desegregated any time a Negro applies, provided the applicant is otherwise qualified.

W. J. Durham, Negro lawyer, said in Dallas that the National Association for the Advancement of Colored People was planning a suit unless Negroes are admitted.

C. I. (Stony) Wall of Amarillo, Tech's board chairman, said in a telephone interview from his home town that "if they (Negroes) apply and meet the qualifications, they will be accepted like anyone else."

Tech, a state school with nearly 10,000 students, has not accepted Negro students previously.

Wall said some Negroes had applied for admission, but no applications are on file now. The Lubbock Avalanche Journal said four Negroes applied last year but were turned down.

Wall said the board took no formal action, but "it was the opinion of the board that this should be done. It was a consensus."

Mayor David Casey of Lubbock, working with NAACP leaders, issued a formal announcement about the change in policy. He said he was speaking for Wall.

R. F. FEURSCHUTZ

Feuerschutz Takes Midland Scout Job

Rudolph F. Feuerschutz, newly appointed district executive for the Buffalo Trail Council, Boy Scouts of America will arrive in Midland July 18 and report for duty on July 24 to serve the Coshua District composed of the western half of the city and county of Midland.

Feuerschutz is a native of Shawano, Wis., a graduate of Wartburg College at Waverly, Iowa and is a member of the Episcopal Church.

Feuerschutz will attend the National Training School of the Boy Scouts of America at Schiff Scout Reservation in Mendham, N. J., beginning Aug. 22.

Mobile Marts

MEXICO CITY (AP)—The success of mobile supermarkets here may lead to similar low-price food selling in other large cities, officials report. The pilot project started a week ago sells basic foods at cost to two million low-income residents.

THEY WANTED WINDOWS which would provide a view of the surrounding countryside, did the Lester Mortons when they planned their new home in Coronado Hills. And they have them, wide and deep; they also have a lovely scene, looking over the rolling land

to South Mountain, from the living room windows, which are draped with a green print on beige linen. Chairs pick up the green, while the long divan is in eggshell. Walls are a soft neutral shade which gives opportunity for a play of gay colors for accent.

LIKE LOOKING THROUGH A WINDOW is the mural in the Mortons' dining room, with its mansion set back among lush foliage at the end of a curved drive from the wide open gates. Predominantly green, white and beige, the picture is touched here

and there with just enough coral to make it interesting. Note the convenient built-in cabinet, which adds to the attractiveness of the room, as well as saving steps for the homemaker.

(Photos by Keith McMillin)

Morton Home Says 'Welcome'

By ANNE LEFEVER

First of the residences to be completed in Coronado Hills is that of the Lester Mortons.

Pleasant from the outside with its combination of rosy stone and wood siding painted to the identical shade, the home says, "Welcome, guest", throughout its entire area.

There is the mirror—in which you catch your image as you enter—said to be an ancient sign of welcome. This hangs over a chest in the entrance hall, laid with large flagstones.

Then there's the living room, carpeted in a neutral shade, as is the remainder of the home, with groupings of chairs for easy informal conversation. The home is gay with accents of green, turquoise, teal blue and coral against a background of old ivory walls.

The family room, inviting with comfortable chairs of brown, teal and coral, seems ready for any activity the family and guests might enjoy. Draperies in a continental print repeat colors of the furnishings.

Valued highly by Mrs. Morton is the built-in cabinet at the fireplace end of the room; here is space for books, games, family treasures, a television set and just about anything that might be required for reading, entertaining or relaxing.

Another cabinet, built-in, is in the dining room, where a mural, predominantly green, adds an air of spaciousness to the room. The scene, showing a stately mansion against a background of beige, is accented with light touches of coral.

Giving the effect of a multi-

branched off-white candelabrum is the central lighting fixture of the dining room, which opens into both the living room and the family room.

Seemingly enough cabinet space to please any homemaker abounds in the kitchen, where birch is finished in maple and blends with the maple table and chairs in the breakfast room. Appropriately, draperies are printed in varied groupings of vegetables and fruits in brown, yellow, blue and green.

Louvered doors make an attractive wall for the hallway as well as enclosing closets for storage of out of season clothing, for guests' wraps, for folding chairs and tables and for "everything I don't know what to do with."

Draperies in a map print add interest to the brown and beige room of 13-year-old Bill, while turquoise and white were the choice of his seven-year-old sister, Ann. An unusual touch in their bathroom is the wall paper, which shows advertisements for shops of ancient vintage—a tobacconist, a tea merchant and a grocery store among them.

Individual closets in the master bedroom are a joy to both Mr. and Mrs. Morton; in this room chairs covered in blue linen accompany draperies in blue, lime and dark green, a design which is repeated in the adjoining bath.

Extra touches added for convenience are the half-bath at the back entrance of the home and the nearby utility room, with washer, dryer and freezer, as well as birch cabinets. Fun for the youngsters and a help to their parents is the intercom system, which is used quite frequently by all.

SPACE FOR BOOKS, GAMES, AND FAMILY TREASURES is provided in the cabinet in the family room (above) of the Mortons' home; the idea was brought from the former home of the family when they lived in Odessa and incorporated into the

new home in Coronado Hills. Draperies are a Continental print in teal blue, brown and coral with the same shades repeated in the chairs and divan. Enjoying a reading period are Mrs. Morton, seven-year-old Ann and Bill, who is 12.

LOOK, BUT DON'T TOUCH, says Bill Morton, 12, (photo at left) car model devotee, to his sister Ann, seven, as they sit in his room in their new home discussing some of his models. The map print of his draperies has been responsible for an added interest in geography, according to his mother.

PLENTY OF SPACE for cooking, planning and storage is provided in the attractive kitchen, pictured right. Copper accessories blend nicely with the cabinets of birch in a maple finish, designed to accompany the maple table and chairs in the breakfast room—at lower right.

WOMEN'S NEWS

The Big Spring Herald

SECTION C

BIG SPRING, TEXAS, SUNDAY, JULY 16, 1961

Plans September Nuptials

Mr. and Mrs. Noel D. Morgan, 1011 Main, are announcing the engagement and approaching marriage of their daughter, Brenda, to George A. White. He is the son of Mrs. Jewel White, 603 Gollad, and the late Mr. White. The wedding will take place in the Westside Baptist Church, Sept. 1.

COSDEN CHATTER

Director Is Buried In Hawthorne, N.Y.

William H. Hayes, a former member of Cosden's board of directors, died Sunday night at his home in New York City. Burial was in Hawthorne, N. Y., following a High Requiem Mass in Blessed Sacrament Church, Wednesday. Mr. Hayes had many friends in Big Spring, having visited here several times in his capacity as a director from 1955 to 1960. He was senior member of the law firm of Gasser and Hayes, New York City.

L. T. King, treasurer, was guest speaker Monday evening for the Desk and Derrick Club. Seventeen attended the salad supper, which preceded the meeting.

Mrs. Bill Horne, Billy and Anita have vacationed this week in Red River, N. M.

The Fred Stitzels will be on vacation in Arkansas for two weeks. Barbara Hines was feted with a farewell party last week at the Bowlamas. Fellow workers arranged the social.

The S. Gormans have as guests Mrs. Gorman's sister, Mrs. Ina Mayhew and son, Jim, of Houston. Arnold's Cafeteria was the setting for a birthday party Friday honoring Mrs. Don Yates, Mrs. Clyde Johnson and Mrs. Marie Irwin. Girls in the refinery main office attended.

Jo Ann Darland is the new receptionist at the refinery main office.

Virginia Davis and Mrs. Stan Ballou were honorees at a birthday dinner last Thursday at Cosden Country Club. Women from the timekeeping and personnel offices at the refinery were present.

Mr. and Mrs. Frosty Robison and family are visiting this week in Dallas.

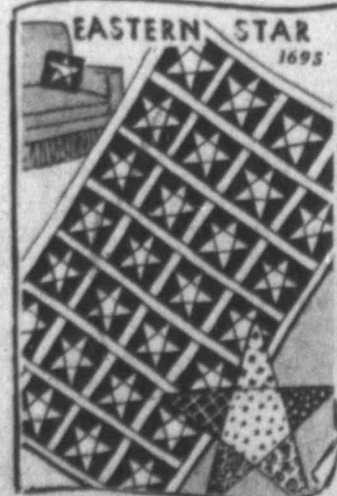

The James Crawford family is in New Orleans, La., for the week, as guests of her folks.

Dorothy Brown is spending a few days in Houston.

Trevor Crawford will be on vacation for three weeks.

Rene Brown has been in New York, Washington, D. C., and New Jersey on business.

Sincere sympathy is extended Marguerite Cooper's sister, Mrs.

Popular Quilt

The Eastern Star is one of the easiest patterns to make. Pattern No. 1692 contains only three pieces. It can be used for pillow top, etc.

Our little quilt catalogue is 25 cents. Send 25 cents in coins for this pattern to MARTHA MADISON, Big Spring Herald, Box 1490, New York 1, N. Y. Add 10 cents for each pattern for first class mailing.

Keel-Laumen Nuptials Celebrated In Seagraves

STANTON (SC) — The South Side Baptist Church of Seagraves was the setting for the wedding of Lois Keel and Gregg Laumen, Friday evening.

Parents of the couple are Mr. and Mrs. Allen W. Keel of Seagraves and Mr. and Mrs. L. D. Laumen of Stanton.

The Rev. Joe A. Mauldin of Mesa, Ariz., read the double ring vows before an arch of greenery, flanked by tall tapers in candelabra and baskets of red gladioli.

Don Ables of Seagraves sang "Always," accompanied by Mrs. Garland Phillips.

Given by her father, the bride wore a waltz-length gown of white Chantilly lace and net over taffeta. The scalloped neckline was outlined with pearls and sequins, while the overskirts of net and lace were topped with a back panel of net and lace in ruffles.

A tiara of seed pearls and sequins held a fingertip veil of illusion with a border of Chantilly lace; she carried a bouquet of white orchids tied with streamers of white ribbon on a white Bible.

Nell Keel, sister of the bride, was her maid of honor; two other sisters of the bride were her bridesmaids. They were Mrs. Bill Trammell of Mesa, Ariz., and Mrs. Randall Thetford of Winslow, Ariz.

Attendants were identically frocked in red cotton satin with scooped necklines and tiny cap sleeves; skirts were pleated. Hats were small white clips, and they carried fans of white gladioli.

Tommy Welch attended as best man, while the bride's brothers-in-law, Bill Trammell and Randall Thetford were ushers. Groomsmen were Gene Smith of Stanton and L. C. Ashworth of Seagraves, both brothers-in-law of the bridegroom.

Nieces of the bride, Randa and Lacense Thetford, were flower girls; tapers were lighted by Linda and Barbara Laumen, sisters of the bridegroom. The four wore dresses identical to those of the other attendants, and each had a wrist corsage of white carnations; they carried baskets of white rose petals.

Following the wedding, guests gathered at the home of the bride's parents, where Mrs. Ashworth was at the register. Members of the house party included Mrs. Smith and Clara Patton.

The tea table was laid with white lace, and the attendants' bouquets formed the centerpiece.

MRS. GREGG LAUMEN

A three-tiered cake was topped with a miniature bridal couple of china.

For a wedding trip to Carlsbad, N. M., the bride was attired in a sheath of white lace with scooped neckline and elbow length sleeves; she used red accessories and wore an orchid corsage.

The couple will make a home in Seagraves, where the bride is employed in the county tax office and her husband works for Columbia Carbon Plant. Both are graduates of Seagraves High School.

MRS. MELVIN G. HERRING

Couple Repeats Vows In Church Ceremony

LAMESA (SC)—The Redeemer Lutheran Church in Lubbock was the scene Saturday at 4 p.m. when Linda Gale Timian became the bride of the Rev. Melvin G. Herring, pastor of the Grace Lutheran Church of Lamesa. Rev. Elmer G. Neunaber read the double ring ceremony.

Parents of the newlyweds are Mr. and Mrs. E. H. Timian of Lubbock and Mr. and Mrs. Tullie Herring of Amarillo.

Given in marriage by her father, the bride wore a gown of Chantilly lace and nylon organza fashioned with scalloped sabrina neckline and long sleeves that tapered to petal points over the hands.

From the fitted bodice flowed a bouffant floor-length skirt of organza highlighted by wide bands of lace to form tiers. A small half-hat of silk organza petals held her fingertip veil of silk illusion.

She carried a white orchid with a spray of stephanotis arranged on a white Bible.

Janice Timian of Lubbock, sister of the bride, was maid of honor. Gladys Jentsch of Austin and Phyllis Swart of Lubbock were bridesmaids.

The bridegroom's brother, Jerry

Herring of Amarillo, served as best man. Groomsmen were the Rev. Otto Urban of Lone Wolf, Okla. and the Rev. Elmer Hohle of Littlefield.

The bride is a graduate of Monterey High School and Concordia Lutheran College. She is a senior at Texas Tech and choir director at Redeemer Lutheran Church in Lubbock.

The Rev. Herring is a graduate of Concordia Lutheran High School in Austin, St. John's Lutheran College at Winfield, Kan., and Concordia Seminary, St. Louis, Mo.

The new residence of the couple will be at the church parsonage, Lamesa.

Open House Will Honor Lamesans

LAMESA (SC)—An open house from 2:30 to 5 p.m. today will honor Mr. and Mrs. A. W. Skinner on their Golden Wedding anniversary. The family and friends will gather at the home of a son, A. R. Skinner, 117 N. 23rd Street, Lamesa.

Ila Pearl Hill became the bride of Skinner in 1911 at Goree. They have resided in Tulsa, Slaton and O'Donnell and at the Five Mile Community in Dawson County before moving to Lamesa.

Children of the couple include two daughters, Mrs. Don P. Millikan of Lubbock, Mrs. Gene Sealy of Lamesa and a son, A. R.

Music Entertains Golden Age Club

WESTBROOK (SC)—Mrs. Sophia Oliver of Colorado City and Hoyt Roberts entertained the Westbrook Golden Age Club Tuesday night when they met at the Cactus Ocoti Building for musical selections.

A mystery game was conducted by Mrs. T. L. McKinney, chairman of the hospitality committee. Mrs. Margaret Powell was asked to be the mystery person and the thirteenth person to shake Mrs. Powell's hand received a prize. Mrs. H. H. Gainey of Colorado City was the winner.

It was announced that the club will have a pot luck supper celebrating its birthday Aug. 1. Each woman is to bring a covered dish and there will be a guest speaker for the memorial service. Fred Beckham of Big Spring will show a film on First Aid.

Pro-Tem Officers Preside Monday

Pro-tem officers presided at Monday night's meeting of the Trainmen Ladies at Carpenters Hall. Presiding were Mrs. A. J. Cain, president; Mrs. George Pittman, vice president and Mrs. W. C. Bell, chaplain.

Mrs. Albert Smith reported for her husband on the Texas-Oklahoma joint meeting of Trainmen and Auxiliary held in June. It was voted that there will be no meeting for the second Monday in August.

Hostesses were Mrs. Frank Powell, Mrs. Ada Vaughn, Mrs. George Pittman, Mrs. Mary Ehlman and Mrs. Bill Cochran.

NCO Wives' Officers

Installed Friday evening as leaders of the NCO Wives' Club were left to right, Mrs. Douglas Voss, vice president, Mrs. James Wilson, president, and Mrs. Donald Hill, treasurer. Installation was held at the NCO Club Friday evening. (USAF Photo by S.Sgt. Hugh Northrup).

Installation Held By NCO Wives

NCO Wives' installation of officers was held Friday night at the NCO Club with Mrs. Vernon Nofziger, outgoing president, opening the ceremony.

Mrs. Donald Hill was presented a \$25 U. S. bond for bringing in the most members during Mrs. Nofziger's term. Mrs. Nofziger introduced special guests, Lt. Col. and Mrs. John Holt and Mrs. B. F. Meacham who spoke on the importance of women's organizations on base, state, city and national levels.

New officers are Mrs. James Wilson, president; Mrs. Douglas Voss, vice president; Mrs. Caldwell Cunningham, secretary and Mrs. Donald Hill, treasurer. Mrs. Harold Dietrich accepted the candle of office for Mrs. Cunningham.

Mrs. James Diaz presented sterling silver engraved bowls to the outgoing board. Table decorations included a centerpiece of roses and multi-colored dogwood. Following the installation a birthday party was held for Sgt. Diaz.

Birthday Party

A birthday party honored Dennis Curran, son of Sgt. and Mrs. Thomas Curran, Monday on his fourth birthday. A rainbow angel food cake with chocolate icing and roses was served to the guests.

C. Millers Are Guests Of Class

Mr. and Mrs. Claude Miller were honored at a dinner Friday evening when members of the First Baptist Bykota Class entertained at Cosden Country Club.

The Millers, who will leave soon to make a home in Snyder, were presented with a silver tray; Mrs. Miller is a long-time member of the class and a past president.

Place cards were arranged for 23 members and guests, among them, Mrs. W. J. Lloyd of Plainview and Dr. and Mrs. P. D. O'Brien. Dr. O'Brien spoke to the group after the meal, which was served in the Blue Room of the club.

Tall Talkers Slate ABWA Program

A model meeting will be presented Monday evening for members of the Cactus Chapter, American Business Women's Association, by a group from the Tall Talkers Toastmistress' Club.

The gathering will be a dinner at Coker's Restaurant at 7:30 p.m. and seven members of the speakers' club will be on the program. Mrs. Phillip Smothermon will be in charge of the presentation.

Scholarship To Be Continued By Club

Continuation of a scholarship was voted by members of the Business and Professional Women's Club Tuesday evening in a meeting at the Settles Hotel.

Recipient of the scholarship is Marilyn Bigham, who is attending Howard County Junior College.

Eighteen were present for the business session; the next meeting will be a dinner, July 25, with the place to be announced.

Webb Windsock

Dr. and Mrs. Jack Petty are vacationing in Iowa, where they plan to spend two weeks, visiting relatives.

The Medical Group wives held their monthly meeting in the home of Mrs. Sam Gardner. This was Mrs. Gardner's last meeting, as her husband, Maj. Sam Gardner will be retiring in July; they will reside in Childersburg, Ala.

"Welcome" to the new doctors and their wives who have just arrived. Dr. and Mrs. Matthew Smith hail from New York City and Dr. and Mrs. John Shubert from Hartford, Conn.

Dr. and Mrs. Lawrence Blumen and daughter, Jill, travel to Dallas this weekend to meet Mrs. Blumen's parents, Mr. and Mrs. Sol Katz of Chicago, Ill. The Katzes will be visiting for a week and will join their granddaughter Jill in celebrating her first birthday anniversary.

It is not too late to sign up for the Water Ballet the OWC is sponsoring in August. Hurry and contact Mrs. Jack Wickard — AM 3-3387 or Mrs. Robert Hartzog — AM 3-4631. First practice session will be held Monday at 1 p.m. in the pool.

Bridge play will begin at 1 p.m. at the Officers' Club on Thursday. Remember to bring your own partner for the afternoon.

During the month of July, please contact Pat Bales — AM 4-509 with your news of trips, visitors, parties or other interests.

Houston Guests Visit Fortsons

Mr. and Mrs. A. L. Fortson, 1106 Sycamore, have had as their guests, their son and his family, Mr. and Mrs. Milton Fortson, Michael and Kay of Houston.

The younger Fortson flew to Chicago Saturday for a school in accounting, while his family remained here to visit. They will spend some time in Midland with Mrs. Fortson's mother, Mrs. S. C. Dougherty.

Austine La Mar's Daytime Casual

No. R-118
Sizes 12-20

So smart to wear, so easy to sew—the daytime casual is interpreted in a brand new shirtwaist style that makes the most effective use of stripes with its deeply pointed yoke and pocket detail. Skirt is gracefully gathered at back, smooth fitting in front. Below-elbow sleeves have shaped fullness, caught into turned back cuffs. Charming in silk or cotton over a bouffant petticoat, to show all of the pretty skirt detail.

Price \$1. No. R-118 is available in sizes 12, 14, 16, 18, 20. Size 14 takes 6 1/4 yards of 39-inch fabric.

To order send one dollar in cash or check. No stamps. Add 19 cents if you wish first class mailing. Send to AUSTINE LA MAR Fashion Pattern, Big Spring Herald, Box 1615, G.P.O., New York 1, N. Y. Print your full name, address, pattern number and size.

Born to Mr. and Mrs. Stinson

Wesley WSCS Conducts Meeting

Mrs. Roy Franklin opened the Wesley Methodist WSCS meeting with a prayer Tuesday morning at the church. Mrs. J. W. Briggance gave the devotion. Treasury reports were made and the group decided to help buy drapes for the church parlor. Mrs. T. C. Richardson nominated Peggy Campbell of Lamesa as the conference daughter, and she was voted for by the club. Twelve members were dismissed with prayer by Mrs. Royce Womack.

Three Members Added By NSA

Three new members joined the local chapter of the National Secretaries Association, Tuesday evening at a dinner meeting at Condon Country Club. The group gathered in the Blue Room of the club. Included in the new members are Mrs. S. Gorman, Mrs. Bill Stone and Mrs. Clydene Johnson. "Secretarial Planning" was the topic of a discussion by Mrs. W. A. Bryans. Mrs. G. G. Callahan was a guest. The next meeting is slated for July 25 at 7 p.m., in the Blue Room.

Junior Halter

Pattern No. 325 contains cutting lines for a halter, sizes 12-24 waist. Also, hot iron transfer pattern for embroidery. This is a very attractive halter. Send 25 cents in coins for this pattern to MARTHA MADISON, Big Spring Herald, Box 1490, New York 1, N. Y. Add 10 cents for each pattern for first class mailing.

Newcomers Plan East Coast Trips

Mr. and Mrs. Garnell Trammell, 1311 Sycamore, think they may be making several trips to the east coast this year, as their son is attending the Coast Guard Academy in New London, Conn. Trammell, who is station manager for Continental Airlines at Howard County Airport, arrived in Big Spring in April and was joined by his wife and son, Mickey, the first of this month. The family comes from San Angelo, their home for 15 years.

In San Angelo the family was active in the Baptist Church, and Trammell belonged to the Rotary Club and the Junior Chamber of Commerce. Since they lived on a lake, the Trammells' favorite activity was fishing and having friends over for fish fries, picnics and barbecues. Trammell also enjoys deer hunting and has made several hunting trips to the Pecos River.

It was the Trammells' 18-year-old son who taught his parents to appreciate music. And since Mickey has left for school, the Trammells spend many an hour listening to his collection of classical music and selections from musicals. "Oklahoma!" is one of their favorites as Mickey played cello for the production's orchestra at San Angelo Jr. College. Another interest of both Trammells is yard work and they are eager to work on their new yard. Originally, Mrs. Trammell is from East Texas and he is from Crosbyton. The two met in Crosbyton when she was teaching grade school there. Mrs. Trammell attended Wayland Baptist College and North Texas State for short periods and received her bachelor of science degree from West Texas State College in 1940.

Both Trammells think they will enjoy Big Spring and are looking forward to meeting new friends and joining one of the Baptist churches.

They're Really Texans

The album held by Mrs. Garnell Trammell may deceive Big Springers into thinking this week's newcomers are from Oklahoma. Both are native-born Texans and moved here from San Angelo. They just like musical comedies and "Oklahoma!" happens to be a favorite. The Trammells live at 1311 Sycamore.

Hales Will Be Honored

LAMESA (SC) — A reception will honor Mr. and Mrs. J. H. Hale on their Golden Wedding anniversary from 2 p.m. until 5 p.m. today in the Women's Study Club building in Lamesa.

Essie Lee Allgood became the bride of Hale on July 16, 1911, at Marietta, Okla. They moved to Dawson County in 1923, residing in Patricia until 17 years ago when they relocated in Lamesa.

He is a retired farmer and realtor. Their children include Mrs. Otis Goodson, Mrs. Elmer Adams, Mrs. Bertie Goodson and Louella Hale, all of Lamesa.

Stanton Rebekahs Set Installation

STANTON (SC) — The Stanton Rebekah Lodge is to have installation of officers Monday night with a staff from Big Spring officiating. Mrs. Fannie Graves is to be noble grand. Mrs. Johnnie Russell of Midland is to be installed as vice grand.

Mrs. Ida Woodward of Rogers, Ark., is visiting in the home of her sister, Mr. and Mrs. G. A. Bridges.

The Rev. and Mrs. J. R. Williams and family of Courtney recently visited in the Bridges home.

Mr. and Mrs. Granville Graves, Terri and Craig of Coahoma were recent guests in the Walter Graves home.

Mrs. Billy Avery, Sherry, Cindy and Rae and Mrs. J. T. Mims have returned from a visit in Stamford and Abilene.

Mr. and Mrs. C. S. Bevers and Charlene have been vacationing in New Mexico and parts of South Texas.

Zinn Circle Meets For Tuesday Lunch

A salad luncheon was served members of the Mary Zinn Circle, First Methodist Church, Tuesday at noon, at the church.

Mrs. W. A. Laswell offered the invocation, and Mrs. H. H. Stephens presented a program on the general theme, "God's Word and Our Words". Mrs. Jake Bishop brought a meditation.

Mrs. Laswell and Mrs. Stephens joined in showing slides taken during the session in Mount Sequoyah, Ark., which they attended.

Planned for the meeting, Aug. 1, is a covered dish luncheon to be served at the church. Fifteen members were present for the session.

Committee Named For Past Matrons

At a dinner of the Past Matrons Club, Tuesday evening, at Coker's Restaurant, Mrs. John Smith, Mrs. Sam McComb and Mrs. J. D. Benson were appointed as a visiting committee.

Hostesses were Mrs. Wyatt Eason, Mrs. Lester Wise and Mrs. Rogers Heffley; they arranged tritoma and daisies for the center decoration of head table, while tuberoses and dahlias decorated side tables.

Star sister gifts were exchanged, and the birthday song honored Mrs. G. C. Graves, Mrs. C. A. Murdock and Fyrie Bradshaw. Thirty-six were present for the affair.

Pink, White Featured In Shower

Pink and white were featured in the party appointments for the miscellaneous shower given Thursday evening for Sue Raymer, who is to be married today to Donald Cook.

Parents of the couple are Mr. and Mrs. Floyd Raymer of Sweetwater and Mr. and Mrs. H. W. Cook, 2002 Runnels.

Guests were entertained in the home of Mrs. Martell Lewis, where she was joined in the hostess duties by Mrs. J. D. Kendrick, Mrs. A. D. Harmon Jr., Mrs. Raymond Smith, Mrs. Allen Alexander, Mrs. Mike Tavaglione, Mrs. R. B. Hall and Mrs. V. H. Alexander.

A pink linen cloth covered the table, which held an arrangement of pink roses in a footed milk-glass bowl. Pink tapers burned in milkglass holders.

Serving was done by Peggy Lewis, who also registered the guests, and Linda Lewis. About 30 were included on the invitation list.

Residents Of Knott Return From Trips

KNOTT (SC) — Alvin Jeffcoat has returned home after a visit with his uncle and aunt, Mr. and Mrs. Cleo Jeffcoat, in Seminole. Janie Jeffcoat was in Stamford for a visit, accompanying Mr. and Mrs. James Howard of Sands.

Relatives of A. B. Williams have learned of his death in Pecos; he was a former resident of Knott. The Rebekah Lodge is furnishing paint for redecorating the 100F Hall, which is undergoing extensive repairs; Odd Fellows are doing the work.

DEAR CUSTOMER:

Once in a while a product so outstanding comes along that we believe everyone should know about it. A perfect example is Bonne Bell Ten-O-Six Lotion.

Ten-O-Six is equally effective as a therapeutic and cosmetic. Because of the many skin conditions for which Ten-O-Six is so beneficial, it has become the largest selling corrective cosmetic in our store. We tell folks about it every day -- but I'm writing this letter as we believe everyone should know about Ten-O-Six.

We first sold Ten-O-Six Lotion as a treatment for various skin ailments to both adolescents and adults. Customer after customer reported gratifying results for everything from teen-age blemishes and acne to dandruff and annoying scalp conditions. Every member of the family found a use for Ten-O-Six. Many women use Ten-O-Six as their cleanser because it leaves their skin immaculately clean.

Now during this season of vacations and family picnics, we believe everyone should have Ten-O-Six. An ideal travel companion, we recommend that Ten-O-Six accompany you on all of your outings. It is a wonderful treatment for cuts and bruises, destroys harmful bacteria, promotes healing and brings quick, comforting relief to any itching skin condition.

Over the years, Bonne Bell has conducted a great deal of scientific research which supports all the claims made for this greaseless, invisible lotion.

Sincerely,

Lena Greer
Cosmetician

F. L. Austin, Agent

What's this little fellow up to? Where's he going? Why?
He knows. Maybe he couldn't put it into words, but he's just as sure as any little man can be.
He is taking in God's world with all his little-child faith. He knows that tree and how God made it strong against the storm.
Those clouds? He knows God painted them in the sky for him to enjoy.
He knows that more of God's wonders are right up ahead—and that's where he's going. Just walking among God!
In the truest sense of the words, our young friend doesn't have to FIND God—he is WITH God.
We are older. A lot of things clutter up our lives. We are busy losing God. When we do search for Him we scarcely know where to turn.
It would be nice to join this young fellow — to share his thoughts, his hopes, his dreams, his God.
We can't do that. We don't have a child's faith. But we can come CLOSER to God and ease our restless hearts.
We can go to our church—God's temple, our place of worship.
God will be there.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Brunch Honors Miss Lurting

Pre-nuptial courtesies began for Sherry Lurting Saturday morning, when she was honored at brunch in the home of Mrs. Jack Woodall. Other hostesses were Mrs. Arch Carson, Mrs. Jimmie

Simmons of Waco and Mrs. Denise Marsalis of Lubbock. Miss Lurting, daughter of Dr. and Mrs. Fred Lurting, 408 W. 16th, is the bride-elect of Frank Lolen Powell, son of Mr. and Mrs. E. L. Powell, 900 Mountain Park Drive. The couple will be married in the First Presbyterian Church, Aug. 18.

About 25 school friends of the honoree brought favorite recipes to present to the honored guest, coming from out of town were Jerilyn McPherson of Snyder; Mrs. Dwaine McRee of Lubbock and Mrs. Ricky Terry of Midland.

A gardenia corsage was a gift from the hostesses to Miss Lurting. Assisting in serving were Kay McGibbon and Marilyn Bigham, who presided at the buffet table. Here, the center of interest was a grouping of tiny rose trees in small pots standing in a shower of raindrops. Individual tables held corresponding decorations.

Other parties planned for the bride-elect include a bridge party, a shower, swim party and luncheon.

Mrs. Howard Is Shower Honoree

FORSAN (SC) — Mrs. Dewey Howard was honored Thursday night with a stork shower in the local club house.

Hostesses were Mrs. L. M. Duffer, Mrs. Doyle Whetsel, Jackie Whetsel, Mrs. Price Stroud, Mrs. L. T. Shoultz, Mrs. Tom Spell, Mrs. Jack McCall and Mrs. Wayne Moore.

They presented the honoree with a dahlia corsage with orchid and white ribbons.

Decorations included gladioli placed in crystal vases of mixed colors. Miss Whetsel presided at the guest book and registered 18 guests.

A box to carry the gifts in covered with blue crepe paper and shaped to resemble a bootie was presented to the honoree.

Out of town guests were Mrs. Zern Miller, Charleston, S. C.; Mrs. Fran Hess of Ozona and Mrs. Ronnie Howard and Mrs. Ed Simpson of Big Spring.

Bishops Return

Mr. and Mrs. Paul Bishop and Paula and their niece, Sandra Bishop of Floydada, returned Friday from a vacation trip to spots in Tennessee, Arkansas and Oklahoma.

Betrothal Revealed

LAMESA (SC) — Mr. and Mrs. G. C. Victory of Lubbock announce the engagement of their daughter, Sara Ann, to Samuel K. Crow, son of Mr. and Mrs. A. D. Crow of Lamesa.

The wedding is planned for 7:30 p.m., Aug. 5, at St. Paul's Episcopal Church in Lubbock.

The bride-elect attended the University of Texas. Crow attended Texas Tech and Hardin-Simmons University. Both are presently employed at Rix Funeral Home in Lubbock.

Big Spring Patient Is Mrs. Breithaupt

FORSAN (SC) — Mrs. T. D. Breithaupt of Odessa is a patient of Malone - Hogan Foundation Hospital in Big Spring. She is the daughter of Mr. and Mrs. J. H. Cardwell of Forsan.

Leaving Sunday for Eagle Nest, N. M., are Mr. and Mrs. T. R. Camp. They will be accompanied by their son and wife, Mr. and Mrs. Thelbert Camp of Big Spring, and Mrs. Camp's brother, M. J. Williams of Coahoma.

Here from Graham are Mr. and Mrs. J. C. Hawkins. They are visiting their son and his family, the A. L. Hawkins.

Guests of Mr. and Mrs. Carlton King and sons have been Mr. and Mrs. Charlie Bright of Pyote and Beverly Dunn of Sterling City.

SARA ANN VICTORY

New Type Pie?

Arrange cooked snap beans in a pie plate; cover with sour cream and top with buttered bread crumbs mixed with grated cheese. Heat in a moderate oven, brown under the broiler.

Here's A Change

Nice for a change: When you are sauteeing onions to serve with liver or steak add some strips of green pepper to the skillet.

Remembering Costa Rica

Some of the few souvenirs from Costa Rica remind the family of Aurelio Gutierrez of their friends and relatives in San Jose. The Rev. Gutierrez is pastor of El Buen Pastor Baptist Church. Pictured left to right are Juvenio, Rev. Gutierrez, Noel and Mrs. Gutierrez.

Costa Rican's Dream Realized By Children

By CAROL BARNES
A dream for young Aurelio Gutierrez was to come to the United States and study medicine. He had a scholarship to study at a college in California, but not enough money for the trip from Costa Rica.

The Rev. Gutierrez of 701 NW 5th now has eight children, six of whom have completed or are completing studies to be doctors or nurses. The youngest daughter is completing medical school at the University of Mexico; another is a nurse in her husband's clinic in San Jose, Costa Rica, and the rest are in the United States studying or working.

If the Rev. and Mrs. Gutierrez are proud of their children, they have reason to be, for all have earned their own way through college. Only one, the daughter in Mexico, has received help from her parents and that is because the Mexican government doesn't allow non-citizens to work.

JOINED FAMILY

It was to be with the children that the Rev. and Mrs. Gutierrez came to the United States three years ago, living at first in Dallas and Fort Worth. The Gutierrezes and their two youngest sons, Noel, 11, and Juvenio, eight, came to Big Spring a year ago when he received a call from El Buen Pastor Baptist Church.

English hasn't been difficult for

the Gutierrezes. Rev. Gutierrez spoke some English before coming to the United States, but Mrs. Gutierrez spoke none of the language. Now Gutierrez speaks English fluently and his wife has little difficulty in understanding it. Noel and Juvenio speak English better than their native tongue, although they speak Spanish at home.

Learning to speak Spanish has been most difficult for the Gutierrezes. That is, learning Spanish as spoken by our native Latin Americans. Gutierrez explains that the Latin Americans have coined words from English, which have no Spanish meaning. For instance, some of the local people call trucks "trocas," and the Spanish word is camiones. An expression that really threw the Costa Rican was "de okes," meaning out of work. Not being familiar with the depression-born term Okie, it was difficult for the pastor to understand the expression's meaning.

Neither Mr. or Mrs. Gutierrez was completely unfamiliar with the U. S. when they moved here. Mrs. Gutierrez had made a trip through the states to New York in 1955 when she attended the World Baptist Alliance in London. At that time she was able to visit one of her sons attending Wayland Baptist College in Plainview. At the same time, Rev. Gutierrez

made a tour of 14 states in the U. S. to get a better understanding of the country.

SMALL DIFFERENCES

Rev. Gutierrez believes that the differences between this country and Costa Rica are small, and that Costa Rica is more like the U. S. than any other Latin American country. Cooking American foods certainly has been no problem for Mrs. Gutierrez as the two countries have similar tastes. When feeling reminiscent Mrs. Gutierrez often prepares a typical Costa Rican dish, pollo con arroz, chicken with rice.

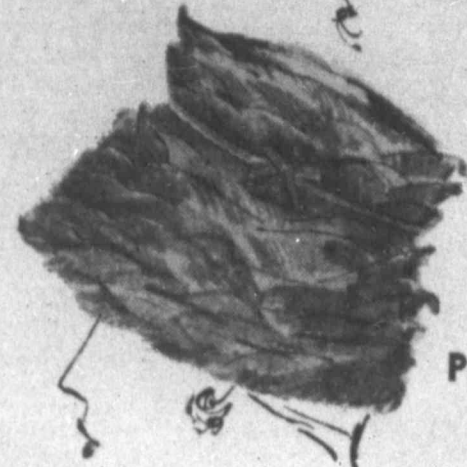

Baptists may best know Rev. Gutierrez for establishing the southern Baptist Church in Costa Rica in 1943. He also edited Lumbra, a missionary magazine, for nine years and has written articles for many Spanish and English periodicals.

Although the Gutierrezes are happy with their new friends and glad to be closer to their children, they sometimes miss their native country where it is always spring, their six room home, the many relatives they left in San Jose, the brightly painted ox carts and the trees filled with orchids. In December, Mrs. Gutierrez hopes to return to San Jose for a visit with her daughter and eight brothers and sisters.

Californians Visit Forsan Relatives

FORSAN (SO) — Guests in the C. L. Draper and Virgil Patton homes recently were Mr. and Mrs. Sam Patton and daughters of Indio, Calif. Also visiting with the Drapers were a son and daughter - in-law, Mr. and Mrs. J. C. Draper of Dallas.

Mrs. Arthur Gooch and children of Andrews are here with her parents, Mr. and Mrs. Leland Camp. Camp is a patient in Howard County Hospital.

Visiting in the home of her parents, Mr. and Mrs. J. D. Gilmore, recently was Mr. Charles McGuire and her family of Abilene. Mr. and Mrs. Leo Parker and Dena were recently accompanied to Luling by Mr. and Mrs. Marco Westmoreland of Coahoma to visit with Parker's relatives.

Mrs. Bill Conger, Bettye and Helen Holladay are in Stephenville for a few days with Mr. and Mrs. George Brauer.

Visiting in Doole with her sons is Mrs. S. C. Crumley. Vacationing at Baytown with Mr. and Mrs. James Madding are Mr. and Mrs. Walter Gressett.

Junior Department Entertained Friday

Twenty-eight juniors from the Junior Training Union of East Fourth Baptist Church met for a wiener roast Friday night at the home of Mr. and Mrs. G. C. Ragsdale.

Ten department workers supervised the youngsters in songs, recreation and prayer.

Cooked Parsnips

Heat sliced cooked parsnips with brown sugar, butter, grated orange rind and a little orange juice.

English Style

English style: Add salt and pepper plus butter to a soft-cooked egg to be eaten from the shell.

Baked Fish

A fish that weighs from three to five pounds is a good choice when you are planning to stuff and bake it. Leave the head and tail on or have them removed—it's up to you. Gourmets vote for leaving them on.

Sponge Cake

Delightful dessert! Bake a sponge cake, roll up and cool. Unroll and spread with chocolate ice cream; roll up again speedily. Wrap in foil and freeze. Serve, sliced, with chocolate sauce.

Richardson Carbon Plant Almost Ready To Begin First Production

By JOE BEYER

After nearly 14 months of continuous building and testing, the new Sid Richardson Carbon Plant is about ready to go on stream.

No figures have been released

on the cost of the plant, but reliable estimates place the cost upwards of four million dollars. Using licensed processes of United Carbon Company, Inc., Houston, about 50 million pounds of carbon

black can be produced if the plant operates at full capacity.

TRACT

The site of the modern structure is a 40-acre tract of land acquired from the Cosden Petroleum Corporation in the northeast

corner of its holdings about three miles east of Big Spring and north of U.S. 80 east.

This plant is Richardson's entry into the field of furnace black, although the company operates the world's largest channel black plant at Odessa and has been a major manufacturer of channel blacks since the company was formed in 1948.

A long-term contract has been entered into between Sid Richardson Carbon and Cosden Petroleum Corporation whereby Cosden will furnish the raw material from which carbon is extracted. The furnace oil is a heavy residual fuel oil of about five degrees gravity.

To recover the carbon at the plant, the oil is heated until the carbon and hydrogen are separated. The chemical reaction is stopped and the carbon extracted by use of cyclone mechanical separators and bag filters. The carbon is then put into pellet form and stored for both bulk and packaged transportation.

After thorough investigation and comparison of the latest manufacturing techniques and processes of leading carbon black companies, the United Carbon process was chosen, according to United President R. W. French and Frank Andrews, vice president and general manager of Richardson Carbon. The licensing agreements between the companies cover current and pending United Carbon patents and engineering design for the production, processing and packaging of the carbon.

VAST COMPLEX

The vast carbon complex was built by Brown and Root, Inc., Houston. The plant is really two separate plants combined into one unit. Two series of reactors (furnaces), and separators produce HAF and ISAF types of carbon black.

The plant is operated with much instrumentation to produce consistent results. About 35 persons are on the work force at present, according to John Hogg, plant manager, and others will be added as the need arises. When operating at full capacity, about 50 or more persons will be required.

Tire and synthetic rubber manufacturers will be the principal outlet for carbon produced by the new plant. The black serves as an abrasive to give rubber its exceptional wearing qualities.

Water used in production and for domestic use at the plant is obtained directly from the Colorado River Municipal Water District through lines branching off the main line carrying water from Lake J. B. Thomas to Big Spring. Cosden Petroleum Corporation and Cabot Carbon were already receiving water through branch lines and a third was added by Sid Richardson. About 200,000 gallons of water will be used each

Goes Long Way

A little carbon black goes a long way. To print this page, about one-twenty thousandths of a pound was used.

stored in a tank capacity of 420,000 gallons.

Oil is pumped to the plant from Cosden's refinery through a four-inch line. There is a dual check system installed to gauge quantities used. The oil is stored in a 10,000 barrel tank located on the northeast part of the Richardson property.

A spur has been run from the Texas and Pacific main line to serve the docks and bulk storage of the new plant. About 56 per cent of the black will be sold in bulk form, according to Hogg, and most of this will be transported in hopper cars.

Hogg has supervised construction since it began and is now manager of the plant. Grant Boardman is assistant manager; Gilbert Gingsold heads the laboratory, and George Hall is office manager.

An important phase of the pro-

duction is experimentation with the carbon produced to see how well it works for the uses intended and to compare it with blacks produced by competitors. This assures that the new plant will not fall behind its competitors because it is unknowingly producing an inferior product.

The plant is a system of clean, painted structures and according to Hogg, it should remain so even after carbon has been produced for an extended period. The gas from which the carbon is extracted has about 99 per cent of the carbon taken out before it leaves through the stacks and there should be little settling of black.

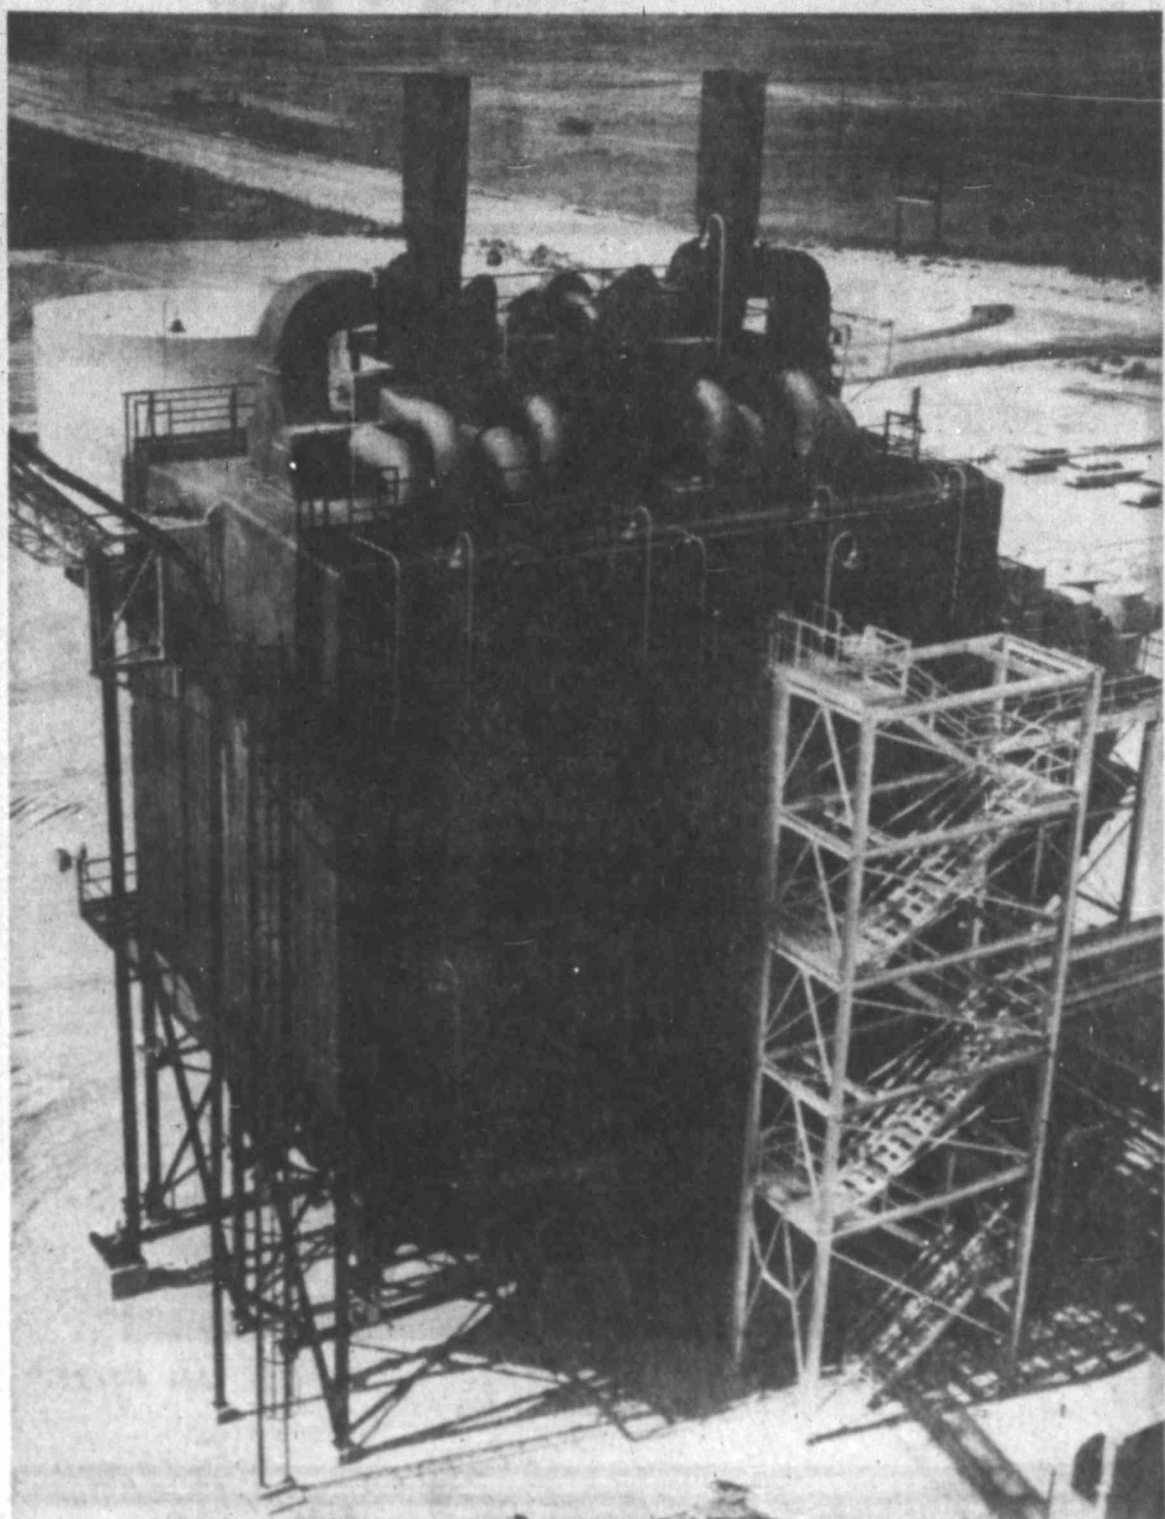

Elements of the plant include reactors, cyclone separators, bag filters, pelletizing and drying units, bulk storage, warehousing for bag storage, loading docks, offices, labs and tank storage.

Carbon Black Made 2 Ways

There are two fundamental ways in which carbon black is made today, the channel method and the thermal process.

In the channel method, natural gas is burned in a series of sheds with just enough air to produce a dense smoke. Black from the smoke is collected on metal plates called channels. The carbon is then scraped off.

The thermal method employs hot firebricks in the furnaces to speed the action. In the Big Spring plant of the Sid Richardson Carbon Company, gas is used to crack oil from which carbon is extracted.

Filters For Free Carbon

The heart of the Sid Richardson Carbon Plant east of Big Spring is this huge structure composed of cyclone separators and a series of filter bags to trap carbon. Once the oil has been cracked and carbon is free in a gas state, it goes to the small round tanks at the top and right of the ascending platform where it receives cyclone treatment to

recover about 60-80 per cent of the carbon. Then it goes into the black structure which is two units, each containing eight compartments with 66 fiber-glass bags to filter out the remaining carbon. This method of recovery is one phase of production where modern techniques used by the plant help recover almost all the carbon present in the gas.

John Hogg Will Manage New Richardson Plant

John M. Hogg, a smiling, friendly man of 29 who looks the part is manager of the new Sid Richardson Carbon Plant in Big Spring.

Hogg has been with the Sid Richardson Company since graduating, going to work at the Kermit plant which produces natural gasoline, propane and butane in 1955. In 1956 he went to work at the Odessa Channel Black Plant. During this time, he was in training.

His apprenticeship was time well spent and Hogg had graduated to assistant to the vice president of Richardson Industries by 1957. For his new job, Hogg and his family moved to Fort Worth where they remained until February of this year.

Born July 15, 1932 in Norfolk, Va., Hogg lived in Parkersburg, W. Va., and attended school at Mercersburg Academy, graduating in 1951, and then he spent four years at Yale University. He

JOHN M. HOGG

graduated in 1955 with a degree in industrial administration. Hogg had never been to Texas before coming to work here and

the state has since retained for him all the glamour which is attached to far-away places.

"At first Texas was only a strange and romantic place," he said, "but now it has come to be home."

The move to Big Spring is not a temporary job until the work is completed and the plant in operation.

"I foresee many other plants in the future of the company, but Big Spring should be my home from now on," he said.

The Hogg family moved to Big Spring from Fort Worth in February and resides at 1708 Yale. They have four children.

Brooks, eight years old, is in the third grade at Washington Elementary School. Jamie, six, is in the first grade there.

Johnny, four, and Elizabeth, two, are the day and night tasks for Mrs. Hogg.

They were married while he was attending Yale. She is from Muskegon, Mich.

IN GIANT REACTOR

First Step In Carbon Black Process Is Separating Hydrogen With Heat

Before the carbon contained in oil can be removed, it must first be separated from hydrogen. This is the function of a reactor, a furnace where heat is applied to the oil to induce the separation.

The oil used as a raw material at the Sid Richardson Carbon Plant is a residual grade fuel oil of about five degrees gravity furnished by Cosden Petroleum Corporation. This extremely heavy oil is pumped into a reactor where it is heated by a burning gas and air mixture. The ratios of oil, gas and air must be carefully controlled to prevent the oil burning also.

A reactor is a long cylindrical structure which has a combustion compartment at one end. Here the gas and air is burned providing heat.

Further along the cylinder the

heat and fire generated in the combustion chamber is applied to the oil causing it to crack (separate into its basic elements). Once this has been accomplished, the chemical reaction must be stopped so that it can go no further and cause the formation of other oil products upon cooling.

This is done farther along the cylinder. Water is introduced into the reactor to produce the desired results.

By the time the oil has made its way through the reactor, all elements are in a gaseous state. Besides carbon there are hydrogen, water, sulphur and other impurities which might have been present in the oil or introduced with the gas or water. In

this gaseous state, the elements make their way to a filter system where the carbon can be recovered and the other elements in the smoke allowed to escape.

The reactor is a crucial point in the recovery of carbon black. The chemical reaction must be kept carefully monitored to insure that black is of the quality and grade desired. This is assured by the high degree of automation of the new plant.

Since more than one grade of carbon black is required by industry, the plant is really two plants in one. A group of six reactors on one side of the plant produce one type of carbon black and four on the other side are used for another variety.

The two types of blacks made by the plant are HAF and ISAF.

Dustless Room

The building and structures which appear to be on stilts above the Sid Richardson Carbon Company freight cars at the left is the site of a series of steps in which carbon particles are pounded into microscopic size, centrifuged for compaction, mixed with water, pelletized and dried. Hidden by the cars are drying chambers. The tall structure at the right is a lift to carry the dried pellets of black to a tank for storage.

Tire, Rubber Companies Are Consumers Of Black

Much of the carbon black produced at the Sid Richardson Carbon Plant will be used by tire and synthetic rubber manufacturers, according to John Hogg, plant manager, so the company prepares the black in pellet form. "The carbon is easier to mix with solutions if it is pelletized," he said, "so these manufacturers prefer to buy it in that form."

When the black is recovered from a series of cyclone separators and bag filters, it is fluffy and difficult to store, transport and bag.

"Trying to ship the black in that form is much like transporting loose feathers," Hogg said. From the filters and separators, the fluffy black is carried to the top of a huge structure known as the dustless room. It is brought in by a pneumatic conveyor system.

Here the black is whirled in a cyclone centrifuge similar to the one used during recovery, but the unit is smaller. This centrifugal treatment takes the black out of the air stream which brought it in and makes it more compact.

The black is then passed through a micro-pulverizer which breaks up any large particles to insure that all carbon particles are the correct size.

Before passing into the next step in the pelletizing phase, the black falls into a surge tank. Until now it has traveled in fluctuating flow and in the surge tank it collects so that it can continue its travel as a steady stream.

From the surge tank the carbon black is fed into a mixer in care-

fully controlled amounts. Water and carbon are mixed in the proper ratio to form a stiff paste. As the paste is formed, it is again centrifuged to force the carbon to collect into small round pellets. These vary in size, but most are about the size of a BB pellet.

They drop out of the mixer into an indirect fire rotary drier. The drier is a huge round tank, 60 feet long and seven feet in diameter. It rotates slowly. The carbon is in an inner stainless steel drum which is heated by burning gas in the water insulated tank.

The drum is maintained at about 350 degrees, Hogg said. Automatic

controls are used at the Richardson plant, and there is little danger of fire because the heat is turned off well before the ignition point of carbon (about 700 degrees) is reached.

As the carbon pellets make their way through the drum, currents of warm air are passed over them to carry off water vapor. By the time the black leaves the drum, about an hour and a half, less than one per cent water remains in the pellets.

Once again the black enters a conveyor system, this time a bucket elevator arrangement, which carries it to the storage tank. Upon arrival at the tank, the pellets drop on a vibrating screen which allows the particles of standard size to pass through and sifts out oversize particles. These are returned to the micro-pulverizer used at the initial stages of this process and the black passes through the process again until it meets the standard size requirements.

Carbon Black Is Diamond Relative

Carbon black is a close relative of diamonds. Except for a few per cent of contamination, it would be chemically the same.

From a comparison of their prices, however, one could hardly draw this conclusion.

Carbon black sells for about eight cents a pound. A pound of quality diamonds, which sell for about one thousand dollars a carat, would cost \$1,866,400.

Despite the great difference in price, the total dollar sales of carbon black each year is more than that of diamonds.

An Estimated 35 Employees Will Operate New Plant

The giant carbon black complex of the new Sid Richardson plant dwarfs the office space, considered a necessary evil in modern industry. The local plant offices are housed in one relatively insignificant building on the plant property.

This is due largely to the fact that little bookkeeping and no sales or billing departments are located here. Such activities of the

firm are located in Fort Worth offices.

The office building here houses the laboratory facilities for the plant and offices for supervisory personnel. Offices have been provided for John Hogg, plant manager; Grant Boardman, assistant plant manager; George Hall, office manager; and Gilbert Gindgold, lab manager. Either three or four secretaries or receptionists are planned for the operation.

A significant phase of the plant's operation is conducted in the laboratories, according to Gindgold. He described them as a quality control lab for the plant and a technical service section for Richardson customers.

Gindgold has a chemistry background and has been employed by a rubber company, (a customer of carbon black plants), and has also worked in the sales department for Richardson.

Basically, his quality control lab acts as a check point for the carbon black product of the plant. But the lab has instruments designed to pinpoint with considerable accuracy the measure of quality in the small BB sized pellets which the plant sells to its customers.

"Our principal aim," he said, "is to keep quality up." For his various testing procedures, Gindgold said a pint size can of black is all that is necessary to run a complete test on the stream.

Other aspects of the lab work is to test the product as it compares with customers specifications, against competing products, and against the firm's own specifications.

He added that all manner of experiments and tests can be made for customers and to customer requirements. This is part of the service to prospective customers.

Gindgold explained that the entire output of this plant would be to rubber and synthetic rubber companies. It is a black designed

High Efficiency Needed To Recover Carbon Black

The Sid Richardson Carbon Plant consists of many units working toward one goal—to recover carbon black so it can be used. In an arrangement of this type, the recovery methods must be efficient or treatment of oil to make recovery possible is virtually useless.

Because of this need for efficiency, the Richardson plant uses a system of mechanical separators and filters which recovers about 90 per cent of the carbon from an oil smoke stream, according to John Hogg, plant manager.

HEATED

Oil is first heated in a reactor to cause separation of its hydrogen and carbon. Once this is accomplished, the separated elements are kept in suspension by quenching with water. This prevents the carbon from reuniting with other elements before it can be recovered.

The black leaves the reactor in

the form of smoke. Most persons associate carbon black with the smoke they see coming from stacks at a plant, but actually, by the time the smoke is visible, it contains only insignificant amounts of black.

In the first phase of recovery the smoke is fed into a cyclone separator where it is whirled in a circular pattern at high speeds. Carbon, being heavier than other elements in the smoke, is hurled toward the outer edge by centrifugal force.

COLLECTS

As the carbon collects on the outer edges it drops down a chute, an inverted pyramid, where it is deposited into a conveyance system which carries it farther along the path of preparation for industrial use.

The smoke is divided so a portion of it passes first through one of four cyclone units then reunites to repeat the process in four more

cyclones. The smoke receives two cyclone treatments.

This is effective, but not quite efficient enough. The cyclone separators recover from 60 to 80 per cent of the carbon. Some other treatment must be used to capture the remaining particles.

After the smoke has passed through the cyclones, it enters a system of fiberglass filter bags. There are two of these huge units at the Richardson plant, each containing eight compartments with 66 bags per compartment. As the smoke billows up through these bags the carbon collects on the inner surface.

CAKED

Some black will fall from the sides when it becomes caked in sufficient quantity, but for most effective recovery the direction of the gas (smoke) is reversed every hour to flush away the black which has collected.

Once again black falls down chutes into a conveyor system to take it to the next step of production.

The filter bags are 30 feet long and 11 inches in diameter. They undergo much flexing as the gas is passed through them, hence they must be durable. Each bag costs about \$20-35 depending on the quality obtained. The life expectancy of the more expensive bags is about two years, according to Hogg.

The smoke has now been cleared of carbon black and by the time a person sees it coming from the stacks, the smoke is essentially pure. Any detectable odor is caused by sulfur and other impurities in the oil, gas or water.

EFFICIENT

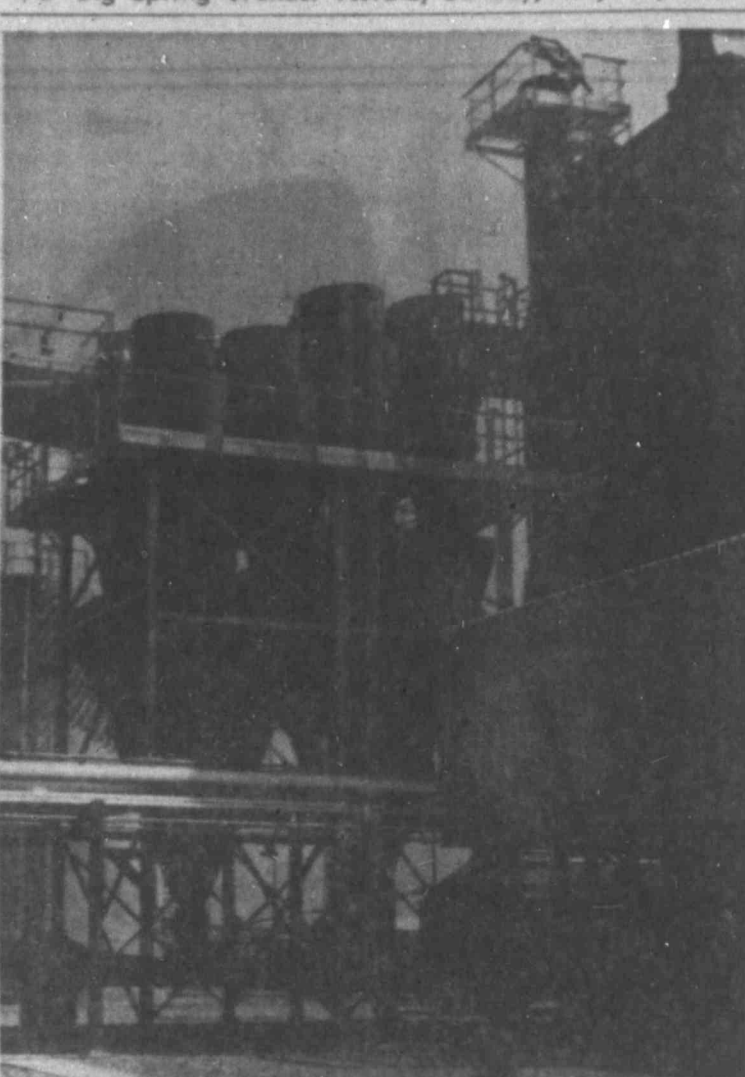

With an efficient system such as is used by the Sid Richardson Carbon Company, about four or five pounds of carbon can be recovered from each gallon of residual fuel oil, Hogg said.

From the time the oil goes into the reactor until it comes out as smoke and carbon black, it is unseen and untouched. It has been separated from other elements and is ready to continue down the path which will eventually shuttle it into industrial use.

It's Really Black

One of the peculiarities for which carbon is known is its blackness. Carbon black absorbs about 98 per cent of the light which strikes it and is probably the deepest black which exists anywhere.

4-D Big Spring (Texas) Herald, Sunday, July 16, 1961

Cyclone Separators

The first step in recovery of carbon is running gas with free carbon through the round tanks shown above. The gas is whirled about and centrifugal force causes the heavy carbon to collect at the inner walls of the tanks and drop into the inverted pyramids below them. Each unit of gas receives two cyclone treatments.

2 MILLION POUNDS

Plant Boasts Ample Storage

Carbon black is transferred from the producing plant to the user in both bulk form and bagged. The procedure for handling this at the Sid Richardson Carbon Plant has been highly mechanized to assure speed and accuracy in delivery.

Black is produced at the plant only as it is needed, plant manager John Hogg said, but when about 50 million pounds of carbon are produced annually, adequate storage must be provided.

MINIMUM

Although the bulk storage tank is only the minimum required, it might be considered more than enough. The single tank can hold two million pounds of carbon.

The tank is made of steel and is separated into four compartments, each with a half-million pounds capacity.

Since the plant is really two plants in one, making HAF and ISAF types of black, the compartments allow control of storage for customers who desire specific types of black.

The bulk storage tank is equipped with an outlet so that carbon can be funneled directly into hopper cars, hopper trucks or bags. About half the black is put in bags, according to Hogg.

HOPPER CARS

A spur leading from the Texas and Pacific main line allows hopper cars easy access to the plant. Most of the bulk shipping is done by rail, but trucks carry no insignificant amount, Hogg said.

Carbon which is bagged must be handled carefully so a customer can be sure of receiving the exact amount specified on each bag. The Sid Richardson Plant uses automatic controls to give accurate measurements. The system can fill about 14 bags a minute.

Bags are tightly constructed and, when shipment is to be with-

in the United States, are usually three ply. Each bag has a small opening into which a nozzle can be fitted for filling and then the opening can be sealed easily to prevent loss. Five ply bags are used for black which is exported.

MOISTURE-PROOF

The black is packed into almost moisture-proof bags of 50 pound weights. Each is marked with the Sid Richardson Plant name, trademark and usually the customer's code number. The printing is done at the plant.

Each bag goes on a weight check platform with a moving belt. It weighs the bags and rejects those which weigh either too much or too little. These unsuitable bags are stacked separately and their weights adjusted to make them conform to specifications.

Company Is World's Largest Maker Of Channel Black

The Sid Richardson Carbon Company, owner of the largest channel black plant in the world, has extended its operations, with the new plant in Big Spring, to become also one of the most modern and automated systems in the world.

In addition to being a producer of carbon black, the company has a gasoline plant in Kermit which produces natural gasoline, propane and butane.

The Richardson plant in Odessa was built and operated by the U.S. Government during World War II and after the war, was sold through the War Assets Administration.

DIFFERENT

Located about 10 miles west of Odessa, this channel type plant burns about two billion cubic feet

of gas a month to produce carbon black. The plant in Big Spring uses a residual fuel oil as stock from which carbon is recovered.

The Odessa plant produces about 60 million pounds of black each year while the Big Spring plant can produce 50 million pounds a year when operating at capacity.

Carbon black is recovered from gas at the Odessa plant. By regulating the quality of gas burned, the air intake and the burning tip in which the gas is burned, the size of black particles can be regulated. There are 560 burner houses at the plant with each building containing 3,000 burner tips. They are 12 feet by 148 feet in size.

The Big Spring plant used gas also in producing carbon, but here

it is used as a heating medium to crack the oil stock into carbon and hydrogen. Ten reactors are used to crack the oil and recovery of carbon is accomplished with a series of cyclone separators and bag filters. The plant is almost fully automated.

FORT WORTH

Heading the Sid Richardson Carbon Company are Perry Bass, president, and Frank Andrews, vice president and general manager of the company. The office is in Fort Worth.

John Hogg is manager of the local plant. He is a 1955 graduate of Yale University and has worked for the company since graduating. He has worked at Odessa, Kermit and Fort Worth before taking control at the Big Spring plant.

GOOD LUCK

Sid Richardson

CONGRATULATIONS TO THE SID RICHARDSON CARBON COMPANY

ON THEIR FORMAL PLANT OPENING

Here is something that merits congratulations. Here is a picture of progress . . . another boost for the growing Big Spring area, both economically and socially. The opening of the Sid Richardson Carbon Company's new carbon black plant means more new business activity and more new families for the community.

That's why we at Cosden take great pleasure in welcoming the Sid Richardson Company as a good neighbor both in the business and in the social life of Big Spring.

ON THE SHELF

THE TWENTY-SEVENTH WIFE. By Irving Wallace. Simon & Schuster. \$4.95.

There is more than the title indicates in this book, for it is a study of Mormon polygamy, with enough of Mormon church history to give it a background. Ann Eliza Webb became the 27th wife of Prophet Brigham Young, and her divorce suit was a major factor in the drive to outlaw polygamy in this country.

Wallace was thorough in his research, digging into the remotest aspects of Mormon life of the period. When he tells of Young's love of the theater and Ann Eliza's brief experience on the stage in Salt Lake, he turns aside for a discussion of the personalities who appeared in the Salt Lake Theater, and how they fared.

And again, when Ann Eliza has fled from Utah after her break with Young and the Mormon faith, the author gives many pages to a recital of how she was received as a lecturer in all parts of the country, how the newspapers covered her talks and what they said. These discursive details detract somewhat from the flow of the story, but it appears that Wallace has assembled more factual information about Ann Eliza than anyone imagined would be possible.

There is a striking difference between Ann Eliza's version of various developments in her life, and that of Mormon sources. Wallace has based most of his narrative on Ann Eliza's statements, and although he has inserted the conflicting Mormon view at many points, it seems unlikely that his book would get a very cordial reception among the Latter Day Saints.

MILES A. SMITH

Piracy Re-Lives In Morgan Story

The daring sea adventures of one of the world's meanest buccaners come to life in Joseph E. Levine's presentation, "Morgan the Pirate," at the Ritz Theater.

The new CinemaScope-Eastman Color production stars Steve Reeves as the swashbuckling Henry Morgan, whose feats on land and sea created a cutlass empire in the Caribbean.

Filmed in the tradition of motion picture spectacles, "Morgan the Pirate" tells the adventures of the near-legendary buccanier who was knighted by England and branded an outlaw by Spain for his exploits.

Co-starring with Reeves in the MGM release are the beautiful Valerie Lagrange, the new French beauty; and sultry Chelo Alonso, in the role of the defiant slave girl who joins Morgan's pirate band.

In making the picture, the notorious Tortuga hide-out of the Caribbean pirates has been brought to the screen. Here audiences will see Morgan vie for power with the other buccanier leaders. In other scenes, Morgan hunts the skull-and-crossbones used by the famed brigand, and all of Morgan's followers in the movie have been selected for

their resemblance to buccanier types of the 17th century.

The film marks the third time Reeves has starred in a Joseph E. Levine spectacle. The muscular actor first worked in Levine's "Hercules" movies.

In filming "Morgan the Pirate," De Toth chose the rugged island of Ischia, in the Tyrrhenian Sea, as the pirate base. The island's broad beaches, rocky hills and blue lagoons provide a natural setting for the numerous land and sea battles in the film.

One big scene takes place when Morgan and his men invade the Spanish stronghold at Panama. Hundreds of pirates pit themselves against the armored night of Spanish troops.

In all, the film boasts five major battle sequences, ranging from hand-to-hand pirate encounters on the high seas to the advance on Panama.

Stamps In The News

By SYD KRONISH
AP Newsfeatures

The third commemorative stamp to be issued by the United Nations Postal Administration will honor the Economic Commission for Latin America and will be placed on sale Sept. 18.

The new stamp, designed by Robert Perrot of France and printed by the Government Printing Bureau in Tokyo, features an outline map of Latin America with a cogwheel in the center. Above the design are the words: "Economic Commission For Latin America." Below is the phrase: "Towards Economic Development."

The 4 cent denomination will be dark blue, light blue, red and green. The 11 cents will be dark green, light green, violet and orange.

Collectors desiring first day cancellations should send their envelopes together with remittances to cover the cost of the stamps to be affixed to the United Nations Postal Administration, United Nations, N. Y. prior to Sept. 18.

To commemorate the installation of the Sultan of Selangor, a special 10 sen stamp has been issued by the Federation of Malaya. The design depicts a portrait of the Sultan and a reproduction of the state crest in full color against a purple background. In 1956 the Sultan was reappointed Regent when his father was elected Supreme Head of the Federation of Malaya. He continued as Regent until Sept. 3, 1960 when, after the death of his father, he was proclaimed Sultan of Selangor.

Australia has issued a new 5 orange.

'Last Sunset' Is Adult Western

Rock Hudson, Kirk Douglas, Dorothy Malone, Joseph Cotton, Carol Lynley and Neville Brand are starred in a tale of the Early West that embodies modern, sophisticated nuances.

In "The Last Sunset," at the Ritz Theatre, romance is frank and explosive, while its wild, unruly action is multiplied by the fury of storms, cattle stampedes and treachery. The weird twist to the story ending is said to be startling. Hudson portrays a relentless man seeking revenge, and Kirk Douglas, a human stick of dynamite ready to explode at any moment. Dorothy Malone, as the pulsating prize for which the two men struggle, portrays of a woman strong in everything but affairs of the heart. Joseph Cotton shocks those who know him as a romantic screen hero with his characterization of a whiskey-sodden, cowardly failure. Teen-ager Carol Lynley is in a role best described as "Lolita with a rifle."

But "The Last Sunset" is far more than just a drama. It is also a comedy and has music, topped by a Ned Washington-Dimitri Tiomkin tune, "Pretty Little Girl in the Yellow Dress." The music score is by Ernest Gold.

Gina's Hobby Is Painting, Taking Photos

Thousands of filmgoers all over the world collect pictures of Gina Lollobrigida, but the actress has also inspired another kind of fan club: collectors of pictures by Gina Lollobrigida.

Although her main claim to fame is her beauty and acting talent, the many-faceted Miss Lollobrigida could probably have made a name for herself wielding a paint brush or clicking her camera. For, in the opinion of experts, she is both a highly skilled painter and an ingenious photographer.

"Painting and photography are my hobbies," she says, "outlets for my creative overflow. If I were to be idle between pictures, I would feel restless and unhappy."

Miss Lollobrigida is quite a glamorous addition to the gallery of such "Sunday painters" as Winston Churchill and Dwight D. Eisenhower. And any collector who latches onto a Lollobrigida work can consider himself lucky because the market isn't exactly flooded.

"The trouble with this hobby," says Miss Lollobrigida, "is that I can't bear to part with my paintings. Oh, I've given some of them away, but there are still a great many left and more on the way. But I'm running out of space. Where to put them?"

The actress paints in a realistic style. No impressionistic or abstract approach for her. She works mostly in oils but sometimes turns to pastels or sketches in pen and ink. Nor is her talent unschooled. Before she ever thought of acting, she won a scholarship to the Academia di Belle Arti in Rome, where she studied art and sculpture for more than three years.

When it comes to photography, her hand itches for a Leica or Rolleiflex whenever a photogenic situation presents itself. Usually, it's when her jet-propelled, three-year-old son, Milko, is around. "Sometimes I think he feels bounded by cameras," she laughed. "I'm always begging him to dance or do some antic for a photo. Now he loves to make faces and usually will put on a show for the benefit of my camera without coaxing."

The Republic of Korea has issued a new 40 won stamp commemorating the May 16th Military Revolution. The new stamp depicts a soldier in the foreground holding aloft a torch of liberty. In the background are outline figures waving Korean flags. The date May 16 is below.

San Marino has issued a "hunting" set of beautiful design. The 1 L illustrates the hunting of roebuck. The 2 L depicts a falconer. The 3 L pictures the hunting of wild boar. The 4 L depicts crossbow hunting. The 5 L portrays a stag hunt. The 10 L shows a falconer on horseback. The 30 L sees a beater with dogs, the 60 L a hunter with dogs, and the 70 L a hunter and beater. The 115 L is a scene displaying a duck hunt.

Morgan Treasure Still Unknown

The whereabouts of the fabulous treasure of pirate Henry Morgan is still unknown after nearly 300 years, but interest in the treasure has been aroused by "Morgan the Pirate," at the Ritz Theater.

An estimated million dollars in gold and silver bullion was buried by the famed buccanier somewhere in the West Indies.

A Love Battle

"Go Naked in the World" features a fight scene between Gina Lollobrigida and Anthony Franciosa. During a lover's quarrel that lasts better than ten minutes, a table, chairs, lamps and glasses are upset.

Plant Will Have High Water Bill

You may think your water bill is high, but what if you required 200,000 gallons per day? That is the peaking requirement for the Sid Richardson Carbon Plant when it goes on full stream.

Water plays an important part in two phases of carbon black production and a ready supply is a necessity.

Water is used first to stop reaction in the huge reactors, an important facet of the plant operation. Secondly, it is used in making a carbon paste, just before the pelletizing process.

These are two most important roles of water. Incidental to the plant operation is drinking water for the personnel.

The Colorado River Municipal Water District supplies water to the plant, through lines of Cabot Carbon and Cosden Petroleum Corp. These lines branch off the main lines running from Lake J. B. Thomas to Big Spring.

The Richardson plant purchased shares in the two existing lines in order to maintain a sufficient supply. A huge pastel blue tank provides 420,000 gallon storage.

After the water arrives at the plant site, it receives a purification treatment similar to the treatment given water in the city's water treatment plant, though not as elaborate.

John Hogg, plant manager, said the water is treated primarily only to remove the heavier silt and impurities that come with raw water. The treatment plant consists of a flocculation process and a filter process.

Chemicals are introduced into the raw water to create "flock," which is a gatherer of impurities. This flock is then filtered out in several filters and the water is ready for use in the plant.

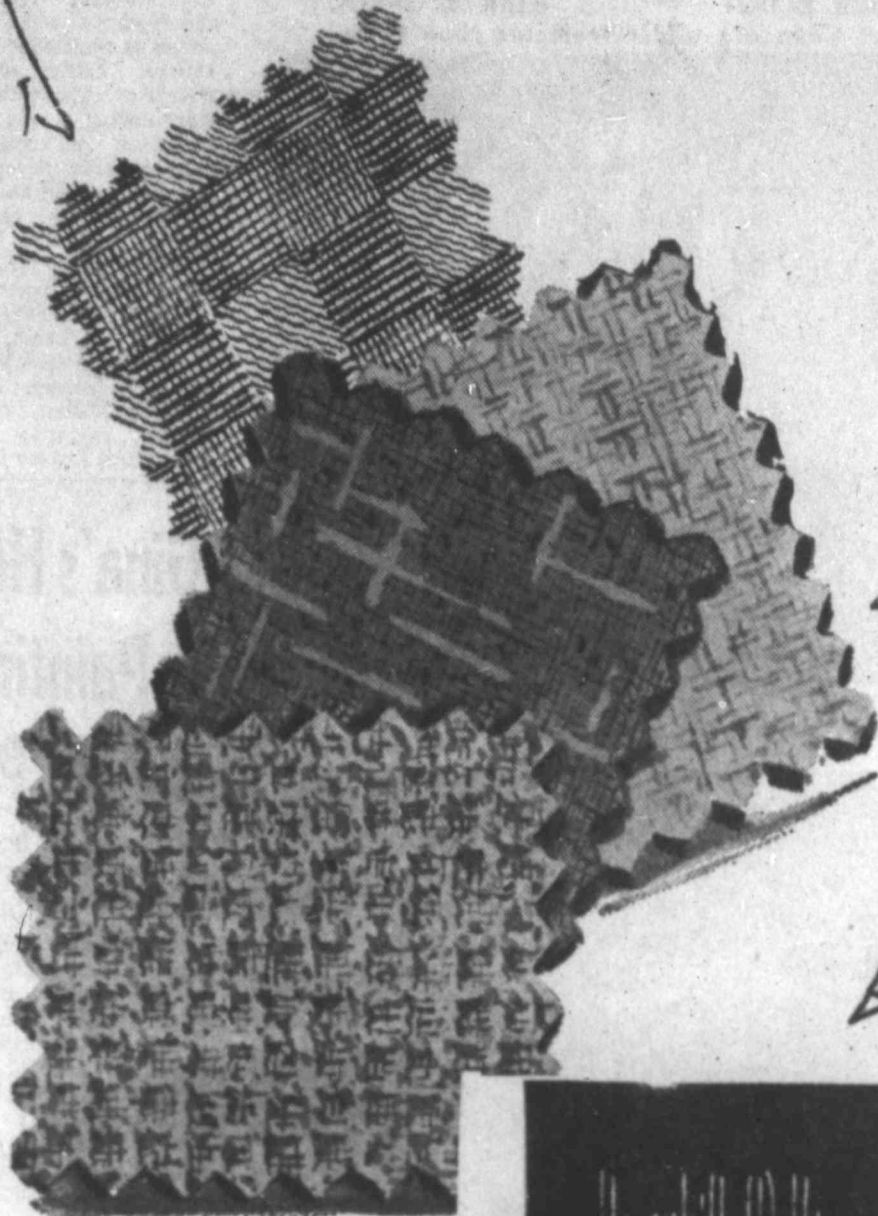

Water that is to be consumed by personnel or used for bathing purposes, gets additional treatment in a smaller tank at the site.

As a water customer, the carbon plant differs from an individual in the city, because it treats its own water. The city treats water for its citizens, charging extra for the service.

At 200,000 gallons per day, the plant is a big customer of CRMWD as well. This compares with a peak for the city of over 10 million gallons per day.

Hempill-Willis

Bulk Storage Tank

Among requirements of any manufacturer is adequate space to store products until they are sent to customers. The Sid Richardson plant has this tank, with a capacity of two million pounds, for bulk storage. It is separated into four compartments so that varying grades can be stored

separately. Hopper cars and trucks can be loaded directly from the tank, or the carbon black can be packaged before shipment. Bagging the carbon is done in the warehouse near the tank. There it is bagged, weighed and checked for accurate measuring.

Been In Use Since Early Times

Useful as carbon black is to the society of a nuclear age, it did not originate in recent years. Carbon black was used about 2,000 years before Christ.

The Egyptians used it in the 17th century BC to write hieroglyphics on papyrus with carbon inks. Romans made ink with carbon recovered from smothered pine pitch fires. The Chinese captured black from flames of burning oil by putting a cool surface into the fire.

Wears Longer

A 7.00 by 16 passenger tire contains about four pounds of carbon black. Without it, the tire would have less than 3,000 miles of potential wear. Carbon black increases this wear to about 30,000 miles or more. About a pound of black goes into every 2½ pounds of rubber hydrocarbons.

Most Plant Employees Work In The Warehouse Area

Adequate storage, on a temporary basis, is available to serve customer needs at the new Sid Richardson Carbon Plant west of Big Spring.

A steel and concrete building, 100 feet by 120 feet, can hold about two million pounds of carbon black.

Man Made Soot

Carbon black is a man-made soot. The particles are so fine that a million of them, laid end to end, would form a chain only as long as a pinhead. A trillion particles would make a dot about the size of a pinhead. A double handful has about the same surface area as a highway 20 feet wide and four miles long.

It's Even Eaten

Carbon black is consumed by persons who probably do not realize they are eating it. It is used as a coloring agent in chocolates, licorice and other products.

R ALL VITAMINS ARE NOT THE SAME

Do not let half-truth advertising mislead you. You know better. For instance ... all butter must comply with government standards to be sold. Yet, some brands are much more tastier. Some cooks bake pies that are a real treat. Others using the same ingredients spoil them.

The quality of vitamins depends on the care of processing and many tests for potency and body absorption. Cheap vitamins eliminate expensive controls. The vitamins we supply are made by the makers of our prescription drugs. Purity and potency is always the best quality that can be made.

YOUR DOCTOR CAN PHONE US when you need a medicine. Pick up your prescription if shopping nearby, or we will deliver promptly without extra charge. A great many people entrust us with their prescriptions. May we compound yours?
