

## Full Extent of Cotton Damage by Freeze Not Known

Freezing weather Friday and Saturday nights, October 25 and 26, damaged the county's cotton crop, but the amount of damage varied with the location, the type of land, and the age of the crop; but it is the opinion of many growers and ginners that the real extent cannot be determined for another week.

Temperature dropped to the high 20's Friday night, and ice formed on tanks and small pools of water.

Most cotton growers do not give an estimate of their loss, but say it is "pretty bad" or "not very bad."

Grades on the cotton coming in is considered as good considering the amount of rain, although returns on the cotton brought to his gin since the freeze were not due in until Wednesday at 5 p. m., Dick Sweat of the Farmers Co-op reported.

County Agent Lefty Thomas pointed out that there is considerable cotton in the county not yet 120 days old, and if this is on irrigated land, it simply hasn't had time to mature a crop. That cotton naturally suffered more from the freeze than the dryland cotton.

Besides this, there has been little or no maturing weather since October 10, when the wet weather started.

Floyd Teutsch, Dodson banker, said that while all cotton in that area was late, and therefore damaged in grade if not in yield by the freeze, that area was still making its best crop since 1949, and most farmers were aware the cotton was growing on borrowed time, since the average date for the first freeze was past.

Many farmers had begun plans to defoliate the heavy growth of leaves, now unnecessary, and this will save an estimated average of \$3 per acre.

## Tow Appointed Game Warden

Calvin Tow was notified Monday, October 28, that he has been appointed a game warden for the State Game, Fish and Wildlife Department. He will report to Capt. Jim Maggard, Amarillo, on November 10 for assignment.

A life-long resident of the county, Tow is the son of Mr. and Mrs. W. T. Tow of Buck Creek. His wife is Cliffa Jean Tow and they have a small daughter, Kathy.

Tow will work in the Panhandle under Maggard until spring, when he will go to the special game warden's school at Texas A&M College.

He was graduated from Quail high school in 1949 and has farmed since then. During the last year he also has been employed at Wellington Hardware and Furniture.

## Mrs. Coffee at Wellington State

Mrs. John Coffee is employed by the Wellington State Bank and is operating the proof department, C. T. Hubbard, executive vice president, announced this week.

Mrs. Coffee worked in local banks several years ago then resigned to devote her full time to her family. Earlier this fall, she was employed in the office of John Rainey, tax assessor-collector to help prepare the tax roll.

The proof department was added to the Wellington State operations in August, Hubbard said, and is used to relieve tellers of work in balancing checks and deposits.

## North Plains Paper Thinks Unit System Good Business Sense

Approval of the County Unit System of road operation has come from the Ochiltree County Herald, Perryton, regarded as one of Texas' leading weekly newspapers.

"This is the first time we knew such a law even existed, but we are highly in favor of it," the Herald said editorially.

"It makes sense to have all county roads operated on a county basis, under a county road supervisor, instead of on a precinct basis."

The Herald adds that the proposal, possible under the 1947 Optional County Road Law, is a step toward greater efficiency, much as the city manager plan for municipalities.

## SENATOR APPROVES DAM SITE

Senator Ralph Yarborough points here to the site of the proposed dam across Salt Fork river, which he had just visited during his trip to the southeast Panhandle Friday, October 25. He gave his back-

ing to the project. Discussing the proposed dam with him are Wellington's mayor, Hiram Cudd, left, and Dr. S. H. Townsend, Childress, president of the Greenbelt Municipal and Industrial Water Authority. —Photo by Allen Graves

## Dudley Phipps Heads Farm Bureau

# Yarborough and Rogers Back Proposed Dam on Salt Fork

"You have a wonderful natural site for your dam, and you will have precious water resources when it is built," Senator Ralph Yarborough told Collingsworth county residents when he spoke at the annual Farm Bureau meeting Friday night, October 25. Along with Congressman Walter Rogers, and representatives of the Greenbelt Municipal and Industrial Water

Authority, he had inspected the site of the proposed dam earlier in the day, and threw his support behind the project.

In his series of speeches in Wellington Friday, Senator Yarborough criticized the government farm program and the Republican Administration, then discussed the guided missile program and Russia's satellite moon.

"With the launching of the Earth Satellite, oceans have been turned into lakes and the void has been turned into oceans. Whoever dominates the oceans of space will dominate this earth and all who live on it, and possibly other worlds," the senator declared.

"There are five 'F's' on the Administration report card," Yarborough said. "We have three down and two to go. 'Tight Money Humphreys' has resigned and 'Lost-the-Missile-Race Wilson' has quit. Now Bungling Brownell has checked out. When we get rid of John Foster Dulles and Ezra Benson, we'll have some real improvement."

A considerable part of his evening speech was given over to the administration farm program. He explained the Kerr-Monroe plan for seeding rangeland damaged by drought. "Then Benson went out West looking at the National Forests. He had been there 100 days when we left Washington, still looking at the trees."

## Commissioners Cannot Employ Member

# Provisions of County Unit Law Explained

High points of the Optional County Road Law of 1947, on which citizens of Collingsworth county will vote November 5, were outlined this week for The Wellington Leader.

This is the "county unit system" of road construction and maintenance, and in brief means that all county roads would be operated under a county engineer, as a whole rather than by the commissioners of the four precincts separately, with four sets of equipment.

Here are provisions of the law: The people can vote to abandon the system after two years of operation if they wish to do so.

Upon approval of the system, a county road department is formed with construction and maintenance of county roads vested in this department.

The commissioners court is the policy determining body. The county road engineer is the chief executive officer.

Construction and maintenance of county roads, and ownership and use of materials is on the basis of the county as a whole, taking care of the roads wherever they need work.

The county engineer will receive his salary from the road and bridge fund of the county.

He will hold office for an indefinite term, but he can be removed from office by a majority vote of the commissioners court after he has received 30 days notice in writing that they intend to vote to remove him.

He has the right to request a public hearing on the question of his removal.

The county road engineer shall be responsible to the commissioners court for the economical construction and maintenance of county roads and he has the authority to appoint county road personnel subject to approval by the commissioners court.

The commissioners shall deal with road personnel through the county road engineer.

On programs of county road construction and maintenance, the county road engineer shall be the representative of the county and shall certify to the correctness of all claims for work done by private contractors.

District Judge Luther Gribble also explained: "The County Road (Continued on back page)"

"We got \$20,000,000 appropriated to help put the topsoil back on the land and there hasn't been a dollar of this emergency conservation fund spent in Texas," he declared.

He closed his talk by paying tribute to the family-type farmers as a stabilizing force in the nation. Congressman Walter Rogers (Continued on back page)

## McCarver Resigns As Police Chief; To Archer Job

Bill McCarver, Wellington chief of police for seven years, told the Wellington Leader Monday he is resigning that place effective November 1 to become deputy sheriff of Archer County, to live at Holiday.

"My family and I hate to leave, and I want to thank all the good people for their co-operation. I feel I have more friends than when I started in law enforcement work."

McCarver is a veteran of 17 years work in Wellington, serving as deputy sheriff under Claude McKinney and Ozro Bartlett and jailer under Paul Bell.

He has been in law enforcement work for the city ten and one-half years and chief of police since 1950.

In his new work, he will have an increase in salary, his expenses paid and a car furnished, McCarver said.

## Kim Martindale Burned Thursday

Kim Grogan Martindale, 18-months-old son of Mr. and Mrs. James Martindale of the Grogan Ranch, Abra, was badly burned Thursday, October 24, when he backed against a bucket of scalding water, lost his balance and fell in.

The accident occurred at the home of the baby's grandparents, Mr. and Mrs. Hugh Grogan. Mrs. Martindale was preparing to take the water to a building outside the house.

The baby has second degree burns over approximately half his body, but he is doing as well as possible, Mrs. Grogan said Tuesday. Deepest burns are on his back, right thigh and right leg. He is under treatment in Shamrock Hospital.

## Pre-Game Pie Supper Set

Sophomores of Wellington high school are sponsoring a pie supper, featuring sandwiches, pie and coffee, Friday night, November 1, before the football game.

These will be served in the new cafeteria from 5:30 to 7:30 p. m.

# Voters Ballot on Two Local, Three State Issues in Election Tuesday

Collingsworth voters will determine two local issues and express their choice on three constitutional amendments in the special election Tuesday, November 5.

A larger-than-usual vote is expected for an off-election year.

The election will be held at the usual voting boxes, County Judge R. L. Templeton points out.

There will be two ballots. Keen interest is being shown in the election to determine if the county goes under the county unit

system for road maintenance and construction, under a road engineer or administrator.

This issue will appear on the ballots as FOR or AGAINST "The County Optional Road Law of 1947".

Explanatory stories and advertisements have been printed in the Wellington Leader last week and this week.

Appearing on the same ballot will be the three constitutional amendments, by which it is proposed to increase aid to the needy, aged, blind and children; make certain changes in the compensation coverage for state employees; and create the Texas Water Development Fund.

It is regarded here that the first two are certain of passage and interest is concentrated on the third. It has been pointed out that the creation of the water fund would make it possible for counties, cities, water districts, and other political entities to borrow money for the development of water resources.

Such a fund could be used to develop various water resources in Collingsworth County that has been impossible heretofore.

Again the issue of separating the office of sheriff and tax assessor-collector is overshadowed in the election, as it is voted on for the third time.

However, it is felt that there is considerable better understanding of the proposal this time. Stress has been laid on the fact that the two offices are completely unalike in their functions and require the talents of different types men.

Supporters point out that a saving to the county would result from having a qualified tax assessor giving the time required to the job. It is pointed out further that under the dual set-up, one man cannot give sufficient time to both offices.

## S. W. Fielding, Longtime Quail Farmer, Dies

S. W. Fielding, who farmed in the Quail area 25 years, died in Goodall Hospital, Memphis, Sunday, October 27, at 1 p. m. He had been in ill health for two years, and on Thursday, October 24, he fell, breaking his right leg.

Mr. and Mrs. Fielding had lived in Memphis for three years.

Funeral services were held Tuesday at First Baptist Church in Memphis, with the Rev. Lanham Campbell of Memphis and the Rev. R. T. Greenwood of Alanreed officiating. Burial was in Fairview cemetery under the direction of Kelson Funeral Home and Spicer Funeral Home.

Active pall bearers were Wayne Prentice, Harold Fielding, Harold Gabeel, Shelton Berry, Buster Gipson and O. E. Rayner. Honorary pall bearers were T. C. Crabtree, Jerry DePauw, P. E. Starr, W. R. Peggram, Z. J. Neeley, Sam Hamilton and Frank Garrett.

Samuel Wesley Fielding was born December 25, 1875 in Chattanooga, Tennessee. While still young, he came to Durant, then in the Indian Territory, and that was his home until moving to Quail 28 years ago.

He was married to Miss Etta Prentice September 11, 1903 in Durant.

Mr. Fielding had been a member of the Baptist Church since 1940, with his membership at Travis Avenue Church, Memphis.

His wife, seven sons and five daughters survive Mr. Fielding. The children are C. D. Fielding, Levelland; John Fielding, Arlington, Calif.; Mike Fielding and Otis Fielding, Corona, Calif.; Dale Fielding, Arlington, Texas; Paul Fielding, Quail; Garland Fielding with the Army at Fort Still, Okla.; Mrs. Ilona Reeves, Santa Paula, Calif.; Mrs. Pauline Wood, Harrell, Mrs. Rhunell Yost, and Mrs. Imadean Johnson, Dallas, and Mrs. Annie Mae Ford, Irving.

Other survivors are a brother, Jack Fielding of Dallas; two sisters, Mrs. Esther Lingerfelt of Chattanooga, Tenn., and Mrs. Nora Warren of Waco. There are 32 grandchildren and 9 great-grandsons.

## Trick-or-Treat by MYF Wednesday

Approximately 25 boys and girls of the Methodist MYF will go trick-or-treating for CROP Wednesday evening, October 30, at 6 p. m. asking Wellington residents for small coins that will be used to provide food for the overseas needy, Mrs. Eldon Holly, church educational director, reminded this week.

The children will meet at First Methodist Church for instructions and to receive their identification tags, along with leaflets describing the work of CROP. These will be left with donors.

After completing the trick-or-treat drive, the boys and girls will return to the church to count their donations.

## Officers Seek Pair In Farm Break-in

Sheriff John Rainey said his office is seeking two youths who broke into a house on the Ed Copeland farm Friday, October 25, about 3 p. m. and took three gallons of anti-freeze, then broke the lock on an overhead gasoline tank and took an undetermined amount of gas.

Copeland saw the boys at the house, but they ran away before he could catch them.

Rainey said that burglary charges will be filed against the two, since breaking and entering is a felony offense.

## QUAIL FFA MARKER

Quail Future Farmers will identify their community and their chapter with this monument, set up on Highway 203 at the east edge of town. Chapter officers, from left to right, are Travis Cummings, secretary; Neal White, president; Glen Harris, sentinel; Billy Moseley, reporter; De Holliman, treasurer; and Don Langford, vice president.

## Perryton's the Team to Beat

# Flu Determining Factor In Game Friday Night

Winner of the Skyrocket-Perryton Ranger game here Friday night, November 1, probably will be determined by the flu, Coach John Hurley and Frank Lindsey conceded this week.

This is the crucial game of the season, and the winner probably will go on to the district championship.

"Most of the club is half-sick, if there is such a thing," Hurley said of his Rockets Monday. Approximately 15 were working out, but some of these could do only the track warmups. Others ran through their plays.

Definitely out is Carroll Nunneley, who has asthma that comes along when he has cold or flu.

Tank Forrester was fighting a heavy cold, Ronnie O'Rear was reported quite sick with flu, and Harry White was still sick. On top of other ailments, Jerry Elbert had a cold.

Perryton, however, had quite a few boys sick Friday night when they played Childress, and it is doubtful if their situation has improved either.

"We're not in too bad shape if we can get the kids to stay doctor-ed up," Hurley commented.

"The whole works is riding on this game," he continued. Perryton has defeated Childress and Quanah, and if they beat us, they will have the district sewed up. If we win, we put ourselves in the position to have a tie almost cinched, and by beating Shamrock and Quanah we'll be able to win. It's a go for broke situation."

Rocket coaches and every boy on the team have definite respect for the Ranger machine.

"The brand of football they play is the most aggressive we've seen

all year," Hurley commented after seeing two Ranger games.

Perryton has a well balanced club. In Don Seymour, fullback, they have a tremendous runner and the boy hardest to stop. Otherwise, no one boy is too outstanding as an individual, but the thing that makes the Rangers so strong is the overall unity in team strength.

Known for their "gang tackles," 5 or 6 boys in on a tackle.

"They really let you have it," the Rocket coach declared.

Pete Peterson is Ranger coach, and with the season more than half over, he still has an 88-man football squad. His team the last two years has been outstanding. Keith Flowers is assistant.

## Mrs. John Shields Dies in California

Mrs. John Shields, who moved from here to California about 20 years ago, died at Redondo Beach October 15 following a long illness. She made her home with a son, Floyd Shields, 5230 Bindwald, Torrance, Calif.

Funeral services were held at Redondo Beach and burial was at that place.

Mrs. Shields came here with her family about 42 years ago, and the late Mr. Shields was a partner with his brother, Pat Shields, in the grain business, and later was a partner in the Shields and Lewis Hardware. It was after his death that she moved to California.

She was active in the work of the Catholic Church.

Surviving are five sons, Frank Shields, Corpus Christi; Edwin, Floyd, J. M. and Lawrence, all of whom live in the Los Angeles area.

## Who Is She?

# High School Crowns Queen Saturday Night

Wellington high school queen, her identity unknown until the hour of her coronation, will be revealed in the ceremony Saturday night, November 2, at the high school auditorium.

It will begin at 8 p. m., sponsored by the junior class.

The coronation will be preceded on Friday by a parade downtown immediately following the parade of the Skyrocket band. The four candidates for queen, Francis Drake, Mary Parsons, Sandra Cooper, and Lynda Orr, will ride in convertibles, followed by floats from business houses, school and civic clubs, a bicycle brigade and horseback riders.

Theme of this year's coronation will center around the seven dwarfs and a sleeping prince in an enchanted forest — a completely new version of an old fairy tale.

Variety show entertainment will include the Freshman quarter; tap dance numbers and accordion solos by Patricia DePauw, Betty Moseley and Judith Wilson of Quail; Ted Parker and the Pride of Dodson, from Dodson School; Pantomime and dance numbers by Kent, Gayle and Kaye Peebles; the Skyrocket band, twirlers in their routines, accordion numbers by Donna Lowrie and reading by Carolyn Keller. Other numbers may be added, Mrs. Calvin Adcock sponsor, said.

## City Schools Out This Week for Flu Epidemic

Wellington schools were dismissed Monday, October 27, after 187 out of the approximately 750 students were absent, sick with flu, Supt. Bennett Goodloe announced.

Classes were to be dismissed for the remainder of the week, with work to be resumed Monday, October 4.

The 187 absentees represents approximately 27 per cent of the student body, Supt. Goodloe pointed out.

## Scott Sigler Dies At Brownwood

Friends here have received word of the death of George Scott Sigler, 68, at Brownfield, October 19.

Mr. Sigler and his family lived here from 1933 to 1936, when he was consigned for Phillips Petroleum Co.

He had lived at Brownwood since 1949 and was foreman on the Circle L Ranch.

Mr. Sigler was born March 3, 1889, at Lewisville.

Funeral services were held in Coggin Avenue Baptist Church, Brownwood, with the Rev. H. A. Hutchins and Dr. H. H. Hargrove officiating. Burial was at Brownwood.

Surviving are his wife of Brownwood; and three children, Mrs. Margie Stroud of San Antonio; Mrs. Billie Locker of Brownwood; and Sgt. L. S. Sigler of Fort Lee, Va. There are 9 grandchildren and three sisters also surviving.

## 4-H Party Set For November 16

The Collingsworth Girls 4-H Club Council has set county-wide party for both boys and girls on Saturday night, November 16, at the American Legion Hall.

Each girl is to bring three dozen cookies. Parents are invited to the party for the fun and fellowship, Miss Kathryn Potter, county home demonstration agent, said.

## An Editorial

## Flood or Famine

Texas is a paradoxical state. It is plains and mountains; tropical and near-arctic at times; desert and swamp; drouth and flood. Illustrative of this fact is the experience Texans have had this year.

In the early part of this year virtually the entire State sustained immeasurable loss from excessive rainfall and the accompanying disastrous floods. A number of rivers, dry for years, were above flood stage for a month.

Then as suddenly as they began, the rains ceased and much of the state experienced a far more serious condition of drouth than at any time during the past nine years. Now within the past week, the state has again been hit by floods.

The need for water has long been proclaimed as the No. 1 problem in Texas. Fantastic proposals to correct the situation have been advanced. These range all the way from pipelines to the Great Lakes, cross-country canals, to the building of huge reservoirs in the Panhandle area for the storage of water imported from other states.

But Texas does not need to import water. Texas gets all the water it needs. The solution to the Texas water problem is not more water, but rather the proper use of

what it gets from the skies each year. Proper utilization of this water means it must be stored to be available as needed.

This is what House Joint Resolution No. 3 proposes to do, if adopted by the public as a constitutional amendment at the Nov. 5 election.

This proposed amendment would authorize the issuance of up to \$200,000,000 in State bonds for construction of facilities for storing and preserving flood waters. The money derived from the sale of these bonds would not be spent by the State, but would be loaned to local governing bodies, such as towns, cities, and water districts, where it would be used in such manner as local needs dictate.

We believe this amendment offers a sound approach to our problem. It leaves control of local problems to local people. It provides safeguards against the larger communities getting more than their share, to the detriment of the smaller ones. It is not a give-away program, but one that will be self-liquidating. It is Texan in its approach in that it recognizes the ability of local governments to solve their problems by themselves, with just a little help.

We think it should be approved by an overwhelming vote.

Seems reasonable that since the Indians once roamed this area, the golf ball must have belonged to some long-gone Indian Chief who didn't have any fiddle to play around with like Nero while his tribe was going to pot.

Well, it looked like there for a while that the Russians had us whipped, getting their sputnik to spinning before we could get the political bugs out of ours.

But Mr. Ike soon got the situation under control by appointing an official propaganda propagator to belittle the Russian moon.

Now when this expert gets his bureau set up and manned by a couple of thousand college graduates in bamboozery, they will quiet all of our fears and, probably, convince the Russians that they haven't even got a sputnik.

I see where a doctor in Africa is making his life's hobby the breeding up of a line of dogs that will weigh 250 pounds each. Evidently for people who want to put on a lot of dog.

My experience with several 10- and 15-pound dogs who could eat their weight every day tells me that a 250-pound dog would be clear out of my bracket.

My solid neighbor says he guesses it's all right for a man to put in 25 years on some project of this nature but that he can name two or three items which the world is crying louder for than for a 250-pound dog.

The famous Cullinan Diamond found in 1905 weighed 3,106 carats in the rough.

Edward VIII abdicated the British throne Dec. 11, 1936.

## CROSSROADS

## ★ REPORT

Dear Editor:

I see where a lady columnist in New York is about to get thrown in jail because she won't tell a Federal judge where she got the dope for a story she wrote.

Where this girl made her mistake, of course, was she didn't join the Communist party before she went into the writing business, on account of no low-ranking Federal district judge would dare to cross one of the Supreme Court's proteges.

I guess if Red soldiers ever got on U. S. soil the Court will rule that it is unconstitutional to shoot at them.

I note that we are fixing to vote next week on the question of taking our county roads away from our precinct commissioners and

turning them over to a college-graduate engineer.

First thing we know, these people who have studied to do a particular job will be in chafe of everything same as they are our schools, and us common folks won't have any say-so left because they are too smart for us.

What we had ought to do is not give them more of our business to run, but take some of it back. Like, say, we ought to do away with our expert-dominated schools; give each school board member his own school bus and school house and let him do the teaching.

I see where a helpful Federal judge from North Dakota was sent to Arkansas here a while back to show the backward Southern judges how to get a job done.

Seems that a judge can keep his docket clear and have time for travel, too, if he keeps a good assortment of pre-hatched decisions on hand at all time, so he don't have to waste time hearing evidence and arguments.

Which is sort of a new idea for judges, but not for lots of us common folks who don't like to have

our opinions disturbed and our minds confused either by listening to the other side of an argument.

Art critic by the name of Atkinson says everybody ought to depend on his own judgment when considering whether he likes a certain piece of music, or a book or a painting.

Says some people have a fit over an art job they don't really like because they figure it rates them with the sophisticated folks who are supposed to have a taste for screwy art.

My unrefined neighbor says he don't know much about art except the kind on calendars, and lecturing on to his wife that he don't like some of these may not be good art criticking, but is pretty good sense.

One of my farming neighbors found a golf ball out in the middle of his field the other day, forty miles from the nearest golf course.

He is a little puzzled about how this strange object got there, on account of all he has ever found in this vicinity before was Indian hatchets and arrowheads.

Further Comments  
In Favor of the  
County Unit Road Law

Personalities should not enter into a discussion of this matter. The proposal is worthy of support on its merits and it is hoped the discussions pro and con will be confined to the proposal and not involve likes or dislikes of any individual. The Precinct System has heretofore been at fault, not necessarily Individual Commissioners.

The bad results of the Precinct System have been very evident here the past few years, and it is believed that adoption of the Unit System will better serve the School Buses, the Mail Routes, and the Community at large — and for far less money on the taxpayers. It is hoped that the Unit System over a period of time, as compared to the Precinct System, can get twice as much in roads for half as much money, and certainly is worthy of a trial.

One thing sure, any time after a 2-year period the voters can vote it out and return to the Precinct System if for any reason they desire to do so.

The Precinct System has had nearly \$100,000 per year in cash for road spending of recent years and in addition ran up the road insolvency that has been such a burden to work out in 1957. This figures around \$200 per mile per year for the estimated 500 miles of County Lanes. Private owners of Maintainers charge \$8.00 per hour, one usually dragging the roads with these at about 4 miles per hour. Both sides of the road cost a total of about \$4 per mile. If the entire 500 miles of County Lanes were dragged 6 times per year, which they are not, the total dragging cost would be only \$12,000. We all know that many miles have not seen a grader in years. Many miles more only once in 1½ years. But assuming 6 times per year for every mile at a total cost of \$12,000 there still is left about \$88,000 per year for other direct and indirect road spending. That is a lot of money!

Under the Precinct System the County has 6 Maintainers. It is understood the new cost on these is now about \$19,000 each. Six at \$19,000 totals \$114,000. If this item alone could be cut to 4 under the Unit System the saving would be \$38,000, and if cut to 3 the saving would be \$57,000. Likewise under the Precinct system the County has some 6 to 8 trucks and pickups. A large saving could be had here, too.

Probably the greatest saving of all would be an indirect one to the landowners. It is well known that these big maintainers in the hands of men that do not know engineering and water problems can cause erosion problems that generations yet to come will have to contend with. In the direction of a trained engineer this tragedy could be avoided. Also a trained Engineer could lay out a system and work to an overall goal of a Countywide System that appears impossible under the Precinct System.

Under the present Precinct System, each Commissioner draws a regular monthly salary of \$180 plus \$50 per month mileage, total of \$230 per month per commissioner, most, if not all attributable to roads. This yearly cost to the County now figures \$11,040. With the terrific burden of roads shifted from each Commissioner to a competent Engineer, it is hoped that future Commissioners will serve on a per diem basis such as \$20 (or even \$50) per day for each monthly meeting, and save the County the present monthly salary and mileage amounts. The thought behind this is that the Commissioners should then run the County not as salaried individuals, but in a similar way like that in which the Board of Directors runs the co-op gin, or board members run a school, etc.

If a favorable vote is had November 5, it is understood the Unit System can start about January 1, 1958. This is a good date, as the heretofore insolvency of the Precinct Road Funds should be nearly wiped clean by then and the new System can be judged under the acid test of its own performance.

Heretofore, many of us have not been satisfied with the County Roads but did not criticise too much as we felt that under the Precinct System there was not much that could be done about it. Now, however, the Legislature has given us a chance AND WE CAN DO SOMETHING ABOUT IT. THAT SOMETHING IS TO VOTE FOR THE UNIT ROAD SYSTEM ON NOVEMBER 5.

Respectfully submitted,

James Doneghy

An outdoorsman, as you would expect, is more sensitive to the weather than other folks. And that doesn't mean he is interested in whether it's hot or cold, wet or dry.

He watches the fishing calendar, the solunar tables, the barometer, and the weather predictions. He is aware of water temperatures at various depths, and he looks for the signs of nature.

All this goes for the hunter as well as the fisherman. As the dove season opened, for example, he recalled heavy rains in the area

late in September, and he thought about cooler weather.

His conclusions were that dove hunting around tanks would not likely be productive because there was water everywhere for the birds. And he figured that doves would be migrating southward in search of warmth.

#### WEATHER SIGNS

Old timers were keen about the weather. Far more so than moderns who live in conditioned air and don't depend entirely on agriculture for their livelihood.

The old folks didn't depend on gadgets to know whether the fish were biting. They understood there is a rhythm in nature, and they watched for signs that they knew were reliable.

If the old cow rested quietly under a shady tree, if the dog slept by the front steps, if there were no birds singing or flying — if all nature seemed at a standstill — that was no time to go fishing.

But when the cow got up and started grazing, the dog stretched himself and dug up a bone, and the birds suddenly appeared in the sky — that was fishing time.

The system still works. One friend of mine keeps a bowl of goldfish and can tell by their action—or inaction—whether to head for the creek or not.

#### SOLUNAR TABLES

Another fellow tells me that by watching the solunar tables he can tell when the workers in his office are going to be most alert, active and industrious. These times coincide with the best fishing hours as indicated by the tables.

It has long been known that the weather affects the way we feel. Benjamin Franklin advised that we "do business with men when the wind is out of the northwest." That's because a northwest wind is a sign of fine weather.

Thus it's not surprising that anglers say "fish bite the best if the wind's from the west."

#### BAROMETER READINGS

Many salesmen refuse to call on customers when the barometer is low. They know that the prospect is likely to be feeling depressed at such a time. Likewise, the old fishermen know that the fishing is best when the barometer is high or rising.

September rains were good for the angling situation. They washed food from surrounding land in the lakes and streams for the fish to eat.

Some big fat bass are going to be caught in Texas during the next two months.

Incidentally the better the land along the shore line, the more food washed into the water by rains. No lake surrounded by poor land can be rich in fish. Consequently, your earnest angler is a booster for soil conservation.

#### SYSTEM FOR BASS

Getting back to black bass fishing for a minute . . . there's a fellow around here who catches them regularly from the Colorado River lakes. He gave me his system the other day, and I'll pass it on for you to try.

He gets in a boat at daybreak and moves slowly along, casting a surface lure to the edge of the weed beds and into pockets among the weeds. He gives the lure plenty of time, twitching it ever so slightly at long intervals.

Recently he has scored one 5½ and two 4 pounders. His favorite bait is a Heddon SOS Silver Flash

—a wounded minnow type with a spinner front and back. He ties on a red and white bucktail.

#### IT'S EXCITING

Many's the black bass that has been caught by similar means — and many more will be. To most fishermen, there's nothing like a big black bass exploding out of the water, hitting the bait as if he were angry at it.

And that is his state of mind, sometimes. He stakes out an area and defies anything to trespass on it. Particularly is this true during the spawning season when he is guarding his nest. (That's right. It's the male black bass that makes the home.)

At other times the bass is just plain hungry—but you can't tell the difference by his charge. He always hits the surface lures with the same ferocity. Usually he leaps two or three times before you get him to the boat, trying to throw the lure. And while under water he tugs hard and runs fast.

It's an old story to bass fishermen. But they never tire of it.

#### TRY UNDER TREES

A bass often will make his home under trees along the bank. He likes the shade and the food that occasionally comes dropping down from above. Woe to the baby bird that drops out of the nest, or the mouse or grasshopper that tumbles into the water — if the bass is there.

An old trick is to cast a lure over a low-hanging tree branch, let it dangle down and splash lightly on the water, then let it rest on top, and after waiting a while, splash it again.

Once I had a bass strike three times on a lure worked that way. Missed it every time. Or maybe just bumping it with his snout for pure cussedness.

Finally I gave up and started to retrieve the lure. My partner cast over by the tree and immediately caught the bass, a three-pounder.

Some days you ought to give up, maybe, but you never do.

#### News of Men in Service

Willis F. Minatrea, USN, son of Mr. and Mrs. Willis Minatrea of Route 1, Wellington, Texas, is now serving with the "Blue Bolts" of Attack Squadron 172 at the Naval Air Station, Jacksonville, Fla.

Before entering the Naval service in January of 1957, Minatrea attended Samnorwood High school, Samnorwood, Texas.

Samuel Bess, Wellington colored man who served seven years in the Army, returned recently after receiving a medical discharge, due to feet injuries.

Bess, specialist third class, served in Korea, Japan and Germany.

Major F. C. Fuson, Jr., son of Mr. and Mrs. F. C. Fuson, recently completed a three-month tour and mission in Africa. He returned to Lake Charles, La., where

he is stationed with the Air Force.

MELBOURNE, Australia—Milton L. Havens, seaman, USN, son of Mr. and Mrs. A. M. Havens of 1303 Dalhart St., Wellington, Tex., aboard the destroyer USS Hamner, departed from Melbourne, Australia, Oct. 12, with Destroyer Squadron - 11, after a six day stopover en route to the Far East to join the U. S. Seventh Fleet.

The squadron left its homeport at San Diego, Calif., Sept. 16. Other stops on the way to Japan will include Manus in the Admiralty Islands, and Guam.

Between operations with the Fleet, the Squadron is scheduled to visit the Philippines, Formosa, Hong Kong and ports in Japan.

#### BITE WORSE THAN BARK

SAN ANTONIO, Tex. — A 79-year-old man was given ten days to pay a \$100 fine for causing a nuisance by playing his radio at a loud volume and barking back at neighborhood dogs.

Five neighbors testified Walters had his radio so loud they had to close their windows and put cotton in their ears before they could sleep.

They complained that the man went to his front porch and imitated dogs when they barked early in the morning.

The accused man conceded the dogs had kept him awake so he retaliated.

**TEA HONORS SENATOR'S WIFE**  
Mrs. Ralph Yarborough, second from right, was honored at a tea in the home of Mrs. Paul Spillman Friday, October 25. This group stopped for a light-hearted moment during their official duties. From left to right are Mrs. Billy Mac Sims, president

of the hostess group, B&PW Clubs; Mrs. Spillman, Mrs. R. L. Templeton, who assisted in the entertaining duties, Mrs. Yarborough, and Mrs. Wallace O'Rear, wife of the president of the Collingsworth County Farm Bureau. —Photo by Allen Graves

## Mrs. Ralph Yarborough Honored at Tea By B&PW Club During Visit in City

Mrs. Ralph Yarborough, wife of Texas junior senator, was honored at a tea Friday afternoon, October 25, in the home of Mrs. Paul Spillman.

Hostesses for the event were members of the Business and Prof-

essional Women's Club.

Mrs. Spillman met the guests and presented them to the honor guest.

The serving table was laid with a white linen cloth and centered with an arrangement of white chrysanthemums. Appointments were of silver.

Mrs. Billy Hatch, president of the B&PW Club, was at the coffee service.

Other members of the club assisted.

Visiting informally with the guests, Mrs. Yarborough told of her life in Washington, her activities as the wife of a senator, and something of the city itself and her home there.

Women from many communities and Wellington called during the tea hours of 3 to 4:30 p. m.

## Mission Study By WMU Circles

The circles of the WMU of the First Baptist Church met Monday, October 28, for Mission Study.

Mrs. Henry Davidson was hostess to the Blanche Groves circle, with Mrs. Oscar Peebles in charge of the Mission study. Taking part on the program were Mmes. Milford Harris, Lee Vaughan, Lloyd Holloway, Doshia Dix, Oscar Peebles, and Mrs. Ben Wilhelm. Mrs. Davidson led the closing prayer.

The Nina Hankins circle met in the home of Mrs. C. C. Bishop. Mrs. J. A. Lowe was in charge of the study. Mrs. P. E. Lowrie led the closing prayer.

Mrs. J. L. Hays was hostess to the Oleta Snell circle, and Mrs. Lester Hunter was in charge of the program. There were seven members present.

The Betty Tension circle was entertained in the home of Mrs. Chas. Cason Sr., with Mrs. R. W. Brantley directing the program. Participating on the program were Mmes. O. D. Holton, J. M. Stowell, C. E. Hall, W. A. Morrow, R. W. Brantley, Chas. Cason, Sr. Eight members were present, and two visitors.

Mrs. Earl Clark was hostess to the Rosemary Kollmar circle. Mrs. O. D. Holton was program leader, with the following taking part: Mmes. Fred Squyres, O. D. Holton, John Hurley, R. T. Reeves. Mrs. Mary Johnson was a visitor.

All circles of the WMU will meet Monday, Nov. 5 at the church for the Royal Service Program.

## Shower Honors Patsy Aaron

Miss Patsy Aaron, bride-elect of Dale Ratliff of Quail, was honored at a shower recently in the home of Mrs. Robert Posey.

Mrs. Posey received the guests and presented them to Miss Aaron, her mother Mrs. Clyde Emmert, and the mother of the bridegroom-to-be, Mrs. Ben Ratliff.

Mrs. C. T. Hubbard registered the guests and Mrs. Oral Bishop directed them to the gift displays.

The candlelit table was laid with a white net cloth over gold, centered with an arrangement of gold chrysanthemums in variegated sizes. Appointments were of crystal and silver. Mrs. Fred Williams poured and Mrs. Bill McCarver served the cake.

Hostesses were Mmes. Posey, Fred Yarborough, Emma Davidson, Frank Falk, Dick Sweat, Oral Bishop, Leslie Moore, C. T. Hubbard, Bill Langford, Henry Langford, Zook Thomas, Buster Bounds, Woodrow Wilson, Earl Gibbs, Lewis Morris, Claude Groves, Rufus Sweat, Fred Williams, Bill McCarver and Miss Martha Johnson.

## Homemakers Initiate Forty

Wellington Future Homemakers recently installed new officers, initiated 40 new members and honored a group of adults.

Linda Brantley was installed as president Barbara Denley first vice president; Sonni White second vice president, Lynda Orr secretary, Jo Ann Langford, treasurer, Jeanetta Gollighugh reporter; Donna Lowrie, historian; Theda Martin, parliamentarian; Myrna Henry, song leader; Wanda Langford, pianist.

New members initiated were Celia Anderson, Betty Durfee, Glynell Elbert, Linda Elbert, Sherry Gibbs, Joline Groves, Virginia Graves, Barbara Hannah, Joy Hartman, Myrna Henry, Betty Holtzclaw, Patricia Judd, Ann Johnson, Cleo Krutten, Wanda Langford, Cozetta McNabb, Lavern Moore, Donna Morrow, Sharon Motesbocker, Jo Ann Ogletree, Lynda Orr, Diane Owens, Quinda Patterson, Shirley Peters, Kaye Peebles, Zonnelle Porter, Patricia Roberts, Barbara Shanks, Donna Sherman, Judy Smith, Patricia Sullivan, Barbara Tarver, Diane Thomas, Vivian Thomason, Adell Ward, Sandra Wooldridge and Patsy Wilkerson.

Also honored were the FHA parents, Mr. and Mrs. Heber Brantley, Mr. and Mrs. Gene Martin, and Mr. and Mrs. Bryan Denley. Chosen as honorary members were Mrs. I. G. Vaden, who resigned recently as homemaking teacher, and Mrs. Charles Cason Sr.

Refreshments were served following the initiation.

## Clothes Make the Small Boy

BY EDNA MILES

CLOTHES for little boys grow better looking and more practical each year. Cotton knit shirts are for year-round wear. They're easily laundered, need no ironing and they're attractive.

Good company for the cotton knit shirt is the terry knit, in short pants or cardigan. The short pants can be changed for overalls when a small boy goes outside to play. Cardigan comes with long sleeves and snap-fastened front.

The terry knit play trunks have elastic leg cuffs and box-type waist for freedom of action. They, like the cardigan and cotton knit polo shirt, can go into the machine for a fast washing.

In this age of the crew cut, American mothers like to keep their sons looking like typical boys. It's easy to do when clothes can be popped in and out of the machine rapidly, dried and put back into service.

Since clothes make the man, color is as important as style. Pick cotton knits in bright matching or contrasting colors and watch your small son perk up.

Dapper small boy is turned out in cotton short and terry cloth trunks. Shoulder straps are useful for keeping overall straps in place when long pants are in order for outdoor play.

Mrs. Bill James spent several days in Wichita Falls recently. She attended the first Fall Concert of the Wichita Symphony, with which her son, Ted James, plays.

Mrs. A. N. Wiseman of Albuquerque, N. M., former Collingsworth County resident, visited with friends here Friday and Saturday.

## Nothing newer in the World!

See it Nov. 7 at your Ford Dealer's

## Personal

Guests of Mr. and Mrs. Robert Karnes over the weekend were Mr. and Mrs. Albert Bonner of Dalhart. Mrs. Bonner is a sister of Mr. Karnes, and they made their home here some years ago.

Mr. and Mrs. Joe Thompson visited Sunday in Altus with his mother, Mrs. Delia Thompson, and her sisters, Mrs. C. E. Vaughan and Mrs. Ethel Britton.

Students attending North Texas State College, Denton, who were here over the weekend to visit with their parents and friends were Anita Savage, Don Raburn and Natalie Younger.

## Announcing the Opening of

## LOUISE'S BEAUTY SHOP

I have opened my shop in the building formerly known as Roberts Beauty Shop, and invite all my friends to call, or to drop by and see me.

### City Clubs Honor 7th District President, Mrs. Robert Lindsey with Tea Thursday

Mrs. Robert R. Lindsey, Borger, president of the 7th District, Texas Federation of Women's Clubs, will be the guest of honor at a tea Thursday, October 31, at 2 p. m., given for members of clubs in the City Federation of Women's Clubs. It will be given in the community building.

Mrs. Lindsey will be the speaker at the tea, but the subject of her talk has not been announced.

Chairman of the committee in charge of arrangements is Mrs. James Sullivan. She is being assisted by members of the federated clubs.

Mrs. Chester Fires, city federation president, will introduce the speaker.

Mrs. Lindsey, who has been in federated club work for more than 20 years, is a former American home chairman of the Texas Federation, vice president of the 7th district, and president and holder of other offices in her own club in Borger. She and Mr. Lindsey have lived in that town for more than 30 years, and she is associated with him in the Lindsey Furniture.

Traveling by car and plane, she is in the process of visiting most of the 240 federated clubs in the 49 county area.

She is the mother of four children and grandmother of two. Her hobbies are china painting, her yard and sewing.

In charge of the table and general decorations at the tea will be the Wellington Garden Club, assisted by the Belles Lettres Club, Domestic Science Club, Excelsior Club, will be in charge of refreshments.

Mrs. James C. Cook spent two weeks in Lubbock recently in the home of her daughter, Mr. and Mrs. Bill Wauer, and children. She was helping care for a new grandson, Mike Eugene Wauer. Susan Wauer returned home with her grandmother for several days visit.

Mr. and Mrs. Forrest Baumgardner and family of Tulsa, Oklahoma have been visiting with their mother, Mrs. J. B. Baumgardner, and brother, Mr. and Mrs. David Baumgardner and Juliana.

**GAY DECEIVER**  
What looks like a jumper and blouse is really a one-piece dress. Co-ordinated plaid and solid colored cotton fabrics have been used in the dress.

## 4-H Leaders Banquet Held

The Collingsworth County 4-H Club adult leaders annual banquet was held Saturday night, October 26, in the American Legion Hall.

The program included songs by the Quail 4-H Club chorus, accompanied by Mrs. Lowell Wells; tap dancing by Patricia DePauw and Betty Moseley; piano solo by Shirley Peters; reading by Karon Breeding; accordion solo, Donna Lowrie; and vocal solo, Harriett Lowry, accompanied by Mrs. Jack Lowry.

Four-H Club girls who served the banquet were Adelle Ward, Katherine Sanders, Sherry Crownover, Gerry Meryl Whitfield and Darlene Rainey.

Approximately 40 leaders and guests attended.

**Lydia Class Names Officers**  
Lydia Sunday School Class members of First Baptist Church named officers for the coming year in business meeting October 17.

Mrs. C. C. Bishop was named teacher and Mrs. Beatrice Jenkins assistant. Other officers are Mrs. W. A. Morrow, president; Mrs. W. C. Minter vice president; Mrs. Ben Brewer secretary-treasurer, Mrs. L. L. Easter assistant.

Group captains are Mrs. G. T. Austin, Mrs. Ross Morrow and Mrs. C. E. Hall, and on the flower committee Mrs. Stella Buerger and Mrs. Hall.

Taking part on the program were Mrs. Austin, and Mrs. Brewer.

A covered dish supper was served following the meeting.

The president, Mrs. Eugene Bawcom, presided during the business meeting, and verses of scripture were given by members in answering roll call.

It was announced a "42" party would be given in the home of Mr. and Mrs. Leonard Karnes, Saturday evening, October 19.

The November club meeting will be in the home of Mr. and Mrs. Willie Smith with a Thanksgiving supper for the club members and their families.

Members present were Mmes. Leonard Karnes, Ray Clubb, Eddie Smith, Willie Smith, John Trew, Eugene Bawcom, R. L. Karnes, Doshia Dix, Frank Thomas, a visitor, Mrs. Ralph Long, and hostess, Mrs. Vernie Long.

2, Tennessee. 19-1-p

## LEGAL NOTICE

No. 1030  
IN THE COUNTY COURT OF  
COLLINGSWORTH COUNTY,  
TEXAS  
GUARDIANSHIP OF DAN  
ERNEST WARRICK,  
A MINOR  
To all Persons Interested in the  
Above Minor or His Estate.  
You are notified that I have on  
the 23 day of October, 1957, filed  
with the county clerk of Collings-  
worth County, Texas, an applica-  
tion under oath for authority to  
make an oil, gas and other miner-  
als lease or leases on that certain  
real estate belonging to such mi-  
nor, described as follows:  
“All of the East 80 acres of the  
South 160 acres of the East  
one-half E. 80 of S. 160 of E½ of  
Section 103, Block M-7, B. S. &  
F. Survey, Castro County, Texas,  
containing 80 acres, more or less.”  
that R. L. Templeton, judge of  
the County Court of Collingsworth  
County, Texas, on the 23rd day of  
October, 1957, duly entered his or-  
der designating the 11th day of  
November, 1957, at 10 A. M. in  
the county court room in the court  
house of such county as the time  
and place when and where such  
application would be heard and  
that such application will be heard  
at such time and place.  
V. E. WARRICK, Guardian of  
the Estate and Person of Dan Er-  
nest Warrick, a Minor. 1c

## SCHOOL BUS SAFETY LAWS

Thousands of school children in  
Texas are transported by school  
buses. Most people are careful  
when approaching a school bus  
which may be standing beside the  
road or school to pick up school  
children or to allow them to a-  
light. However, we have already  
had some very bad accidents this  
year because a child or a motorist  
or both were careless at that very  
time.

Most Texans are aware of the  
law which requires a driver to  
come to a complete stop when ov-  
ertaking a school bus. When over-  
taking a school bus which has stopped  
to receive or discharge school children.  
After stopping immediately be-  
hind the bus, he is then allowed  
by law to proceed past same at a

speed “which is prudent, not ex-  
ceeding ten (10) miles per hour,  
and with due caution for the safe-  
ty of such children.”

What amny persons do not real-  
ize is that the very same rule ap-  
plies when MEETING a stopped  
school bus. While everyone is in-  
terested in protecting our children,  
unthinking violators of this simple  
safety rule probably outnumber  
those who comply. Failure to fol-  
low the law in this case can lead  
to fines up to \$200 even when no  
accident occurs. Following an ac-  
cident in which some child is in-  
jured or killed, the penalties are  
naturally much more serious.

Although the above rule does not  
always apply when passing a stop-  
ped school bus in a business or  
residential district of a town, the  
necessity for extreme caution in  
those locations is obvious.

When it comes to overtaking  
and passing moving vehicles, ex-  
ercise of ordinary common sense  
will generally keep the driver  
within the law. For instance, when  
passing a car it is only common  
sense to proceed on past it a safe  
distance before cutting back to the  
right side of the highway. Also,  
any driver would realize the dan-  
ger of increasing his speed while  
another is attempting to pass him.

In the same category is the pro-  
hibition against passing on the

right under most ordinary condi-  
tions. Of course, you may legally  
pass on the right in a few spe-  
cific instances, such as when the  
vehicle overtaken is making or  
about to make a left turn, or upon  
a one-way street with two or more  
lanes, or upon a four-lane high-  
way.

However, our traffic laws state  
that even when passing on the  
right is allowed, it shall be done  
only under conditions permitting  
such movement in safety. And, in  
no event should such passing be  
accomplished by driving off the  
pavement or main-traveled portion  
of the roadway.

Familiar to all are the no-pass-  
ing zones designated by dash lines  
placed to one side of the center  
stripe of our highways. Not so  
well known are the restrictions  
against crossing the center line  
when approaching within 100 feet  
of or when traversing any inter-  
section or railroad grade crossing.

A driver should never cross the  
center line of a highway when the  
left side of the road is not clear-  
ly visible and free from oncoming  
traffic. Generally speaking, when  
not engaged in passing another ve-  
hicle, one should not drive to the  
left of the center of the roadway.

Earth is the third planet in order  
of distance from the sun.

## PERFECT ALIBI

BAY CITY, Tex. — He wouldn't  
think of an alibi, but a speeder  
who failed to appear in Bay City  
traffic court explained in a letter  
that the Angleton sheriff wouldn't  
let him.

The man wrote: “I can't come  
over and appeal my case because  
I am locked upon a charge of as-  
sault to murder and the sheriff  
won't let me out to come. I guess  
I'll just have to plead guilty and  
pay you when I get out of jail.”

Among great nations of ancient  
times the Romans were last to  
learn the art of cookery, having  
neither cooks nor bakers as late as

## ARTHRITIS

I have been wonderfully blessed  
in being restored to active life af-  
ter being crippled in nearly every  
joint of my body and with mus-  
cular soreness form head to foot.  
According to medical diagnosis I  
had Rheumatoid Arthritis and  
other forms of Rheumatism. For  
FREE information on how I ob-  
tained this wonderful relief write:

MRS. LELA S. WFER  
2805 Arbor Hills Drive - 640  
P. O. Box 2695  
Jackson, Mississippi

# 130,000 BU. CAPACITY

Our new metal grain storage building is now completed, giving us a capacity of 130,000 bushels for grain sorghums and increasing our total storage capacity to 235,000, and we are now ready to serve you with one of the most modern storage plants in the Panhandle.

# TOP MARKET PRICES

We will pay top market prices for your 1957 grain crop if you wish to sell. For courteous service and prompt handling bring your Milo to Singley's.

# GOVERNMENT LOAN

If you want to put your grain in the Government Loan we will be glad to handle it for you. WE ARE ACCEPTING GRAIN FOR GOVERNMENT LOAN STORAGE AT 5c PER POINT DISCOUNT OVER 13% MOISTURE CONTENT.

# INDIVIDUAL STORAGE

Some growers prefer to store their own grain instead of selling or putting it in the loan. We have ample space for individual storage if this is the manner in which you would like to have your grain handled.

COME TO SEE US.

# Singley Mill & Elevator

RUBBER STAMPS. Fast Delivery. Prices 60¢ and up. The Wellington Leader. 51-tfc

## I Saw-

By Virginia Robey

Cameron and Clay Beam home from their short vacation east through the Ozarks, with stops at Fayetteville and Rogers, then on to Memphis and down into Mississippi to see her relatives. At Little Rock they stopped long enough to see the soldiers stationed at Central High School.

Young Stevie Hunter, son of Emory and Linna Hunter, enjoying himself in a grocery store mixing the contents of a basket of raw peanuts and a basket of parched peanuts.

During Wellington's political field day . . . County Democratic Chairman L. B. Bratten's remarks that it takes quite a norther to blow in 2 such fine feathered ducks as Senator Yarbrough and Congressman Walter Rogers . . . State Senator Andy Rogers taking quite a lot of ribbing about being in just the position where people liked to have a politician—with his jaws wired together. He appeared to enjoy the kidding, although this is a serious matter with him. Not long after he appeared at a hearing before the Land Commissioner Earl Rudder, he underwent jaw surgery in Galveston and does in fact have his jaws wired together.

Congressman Rogers saying that

his wife, whom a number of local people know, is back in the Panhandle with him, but under doctors orders not to do the strenuous traveling about the district that he is doing. And at the tea given for Mrs. Yarbrough, a charming and lovely woman, Jean Cudd was seeing friends after 5 years on the Gulf Coast . . . Effie Reavis and Loretta Wright, both with small children, yet look as if they are college girls, discussing the baby sitting problem with Ruby Squyres and Helen Fires. And Lennie Lou Sims being told to bring her twins and come out to the chili supper held with the school carnival.

## Winters Studies at Hardin-Simmons

The Rev. John T. Winters is enrolled in Hardin Simmons University, Abilene, for graduate work this year.

The son of Mrs. W. E. Winters, 1111 Galveston, he is a former pastor of Meridian, Oklahoma, Baptist Church and educational music director of Kennedale Baptist Church and Haskell Baptist Church.

He received his bachelor of science degree from Wayland College, Plainview, and studied at Southwestern Baptist Theological Seminary, Fort Worth. During the past summer he was youth director at Decatur Baptist College.

Dallas' first building was one-room log cabin erected by William Neely Bryan.

Concerning the

## UNIT RULE ELECTION

(Optional County Road Law of 1947)

NOV. 5

## 1. Is the form of operation set up by the unit rule good and practical?

YES. This form of government — a directing board elected by the people and employing an administrative employee to carry out their policy-making is universally employed. It can be observed in operation in Collingsworth County in the following instances:

Samnorwood School District  
Quail School District  
Wellington Ind. School District  
Dodson Ind. School District  
City of Wellington  
Greenbelt R. E. A.

We can think of no institutions better run, freer of big influence and serving the people better than these. Shouldn't they serve as a model for the operation of our county?

## 2. Will voting this rule in raise the cost of operating the county \$10,000?

NO. But it might save \$10,000.00. It would make all equipment and personnel available to all of the precincts, eliminating the need for some equipment. It wouldn't be necessary to buy Precinct 3 a new \$19,000 maintainer while two are setting idle in Precincts 1 and 4. This pooling of equipment will make it possible to care for emergencies better and more expediently because more equipment can be rushed to any area. Too, the commissioners now receive \$9,600 yearly for their services, excepting travel expenses. In none of the very successful operations above do any of the trustees or directors receive any recompense other than token pay. There is no reason to believe there are not men and women in Collingsworth county who would serve their county in the same way.

## 3. Would this form of operation let a few men of influence run the county operation?

NO. Since the road engineer can be hired and fired only by the commissioners court, and works at their direction, we can hardly see how such

conditions can exist unless the people elect weak commissioners who do not fulfill the obligations of their office.

## 4. Will operation under unit rule result in a worsening of the condition of the rural roads?

WHY SHOULD IT? You will be employing an engineer or man trained in building and maintaining roads and bridges. He will spend 100% of his time on roads alone. The condition of the roads of the county as a whole should improve. Roads will be worked every year rather than only in election years.

## 5. Will this operation benefit the county in other ways?

YES. Because it will free the commissioners of the job of maintaining the roads, thereby allowing them more time for managing the business affairs of Collingsworth county, the biggest business in the county.

## 6. Has this operation failed in counties where it has been tried?

ABSOLUTELY NOT. We suggest you contact Judge Fred B. Glass, county judge of Falls county for his opinion. This form of operation is being used in that county and in others. In fact, Judge Glass has a letter to the people of Collingsworth county in this issue of the paper explaining how the system has worked in Falls county.

## 7. Will this operation work in Collingsworth county?

WE BELIEVE IT WILL—if the commissioners will give it their support, cooperation and the benefit of their abilities. It certainly is worth a try. After all, if it doesn't, we can return to our present mode of operation by calling an election and voting it out.

Vote for UNIT RULE Nov. 5

ALSO—We believe voting FOR separate Sheriff and Tax Assessor will benefit the county because it will better provide for people who are trained for both jobs.

(Paid for by Collingsworth County citizens believing in Unit Rule)

## On Display in Wellington

New DeSoto Models  
Make Debuts Friday

Desoto will introduce 13 new models Friday, the largest number in its 29-year history, and two new V-8 Turboflash engines.

A convertible model has been added to the Firesweep series, the new car introduced last year. The Firesweep takes its place with the Firedome and Firelite as a complete DeSoto series.

DeSoto also will offer a convertible and a two-door hardtop Adventurer sports car, available with fuel injection.

The Firesweep is powered by a 280-horsepower, 250-cubic inch displacement engine. A single two-barrel carburetor is standard equipment and a four-barrel carburetor, increasing the Firesweep's horsepower to 295, is available with a power package.

A two-barrel carburetor is standard for the Firedome, giving it 295 horsepower, and a four-barrel carburetor is standard with the Firelite, delivering 305 horsepower.

Torsion-Aire, the suspension system introduced in 1957 as standard equipment, has been improved with the addition of longer outboard-mounted rear springs with an additional half leaf for the rear axle, which further reduces the rear end roll and prevents "acceleration squat".

The Firedome and Firelite se-

Farmers Co-Op  
Gin Installs  
New Machinery

Exemplifying the continuing co-operation between ginners and the cotton grower for betterment of the cotton sample is the recent announcement that the Farmers Co-op Society No. 1 in Wellington, Texas, will be one out of some 80 installations throughout the world of the new Hardwicke-Etter "Lint Master", a triple action comber-blended-cleaner for cotton lint. The first action is to comb and blend the lint fibers. This is done by feeding lint onto a high speed saw cylinder which has a speed ratio of 35 to 1 of that of the feed rollers.

This is approximately double the combing action previously available. This 35 to 1 combing and blending is easily understood by the example that if there is a 1" spot in the lint, it would be combed out and blended to 35", virtually eliminating it from the sample. The 16" diameter saw cylinder uses air blasts for lint removal. Since it is not limited by the old fashioned brush type of doffing, it can be operated at speeds in excess of 1,500 RPM, almost double that of conventional lint cleaners.

A provision to eliminate lint damage in choking is made through a unique system of rocker pedals resembling piano keys. These pedals yield to allow for possible wads of cotton to pass without choking as well as without dropping a bat of cotton across the entire width of the saw cylinder. The yielding action of the pedals is dual in scope in that they yield both from the feed rollers as well as the saw cylinder.

Five grid bars are placed very close to the saws for lint cleaning in addition to the combing and blending. Tests have shown that operation of the saw at a speed of 1500 RPM's did not result in lint loss, but did improve increased removal of trash and motes at the higher speeds. The new single unit lint cleaner-comber combination utilizes the gin's present battery condenser at its intake and cotton is fed out through a smaller condenser to the lint slide to the press, so that lint stays in a bat form throughout.

Reports from ginners who have just completed a very successful season in the Rio Grande Valley are filled with praise for the work this machine is doing in raising the cotton grade and improving the sample. Many cotton buyers have reported increased dollar values from \$7.50 to \$15.00 per bale as a result of the combing-blending and cleaning the Lint Master accomplishes.

Four of the Hardwicke - Etter GreenLeaf and Stick Removers have also been recently installed in the Farmers Co-op Gin.

Large capacity is a special feature of the machine with its superb cleaning qualities and preparation

## Personal

Here for a short visit over the week end were Mrs. Wayne Doering of Fresno, Calif., and Mrs. Alton Abbott, of Amarillo. Mrs. Doering, who will be remembered as Nadine West, was the guest of her aunt, Mrs. Creed Hill. She was accompanied to Pampa by her grandson. Mrs. Doering moved from here about 15 years ago. Mrs. Abbott visited with her brother and sister-in-law, Mr. and Mrs. Harris Royal.

Guests of Mrs. Pat Shields Sunday were three children, Mr. and Mrs. Marlin Craven, Jerry, Johnny and Anna Marie, and Mr. and Mrs. Joe Shields of Amarillo, and Mrs. L. L. Helbert of Childress.

Mr. and Mrs. Joe Johnson and daughters, Nicki and Libby of Amarillo were here over the weekend to visit with her parents, Mr. and Mrs. Bill James.

Mr. and Mrs. Eldon Holley and Dena visited in Ballinger with her parents, Mr. and Mrs. C. B. Hays, and her sister and brother-in-law, Rev. and Mrs. Eugene Robertson, during the weekend.

Among the students attending Texas Tech from this area who were home over the weekend were Elizabeth Hurst, Wanda Shinn and Robert Baxter Jr.

Mrs. Katie Cummings has had visiting with her a sister, Mrs. Ann Robison of Sun Valley, California. She also visited with other relatives here and in Hedley and Memphis.

Mrs. John Graves of Dalhart came Thursday for a short visit in the home of her daughter and family, Mr. and Mrs. Bill Hill and Nancy.

of cotton, with ample open space for adequate trash removal, it furnishes cotton at highest capacity without congesting, choking, or pre-ginning. Removal of sticks before they reach the gin stand increases the efficiency of the entire plant. Cotton is ginned faster by reducing the number of time that seed rolls containing sticks, pen trash and other foreign matter are forcefully thrown from the cotton through a series of grid bars. These high speed saw cylinders have proved effective in throwing off immature locks of stained cotton as well as motes. By making use of natural forces, the cotton is gently fed in a normal easy flow

while burs, sticks, leaves, pen trash are effectively extracted without dribble back or double handling. The cotton at all times follows a natural downward travel in an uninterrupted stream. A reclamer saw is located below the green leaf & stick remover saw cylinders which revolves at a slower speed and picks up stray locks of cotton that might have been through the grid bars of the faster turning saws above. A unique feature is a row of fingers mounted on a floating bar with adjustable counterweights, which are designed to prevent any undesirable loss of cotton. These fingers located below and to the rear of the reclamer saw replace stray locks into the flow of cotton while trash, leaves, and sticks can easily drop between them into the trash conveyor for disposal.

## More Than 100 Improvements

## 1958 Rambler Displayed At Higdon Auto Sales

The new 1958 Rambler, which features more than a hundred major styling and engineering improvements, is designed to "take further advantage of the trend toward compact cars which gained such a strong foothold in 1957." The Rambler is on display at Higdon Auto Sales.

"As record sales this year have demonstrated the Rambler concept of compactness and economy has definitely taken hold with the American public," according to Roy Abernathy, American Motors vice president in charge of automotive distribution and marketing. "The signs everywhere point to a surging demand for cars that are more economical to operate and easier to park and handle—while still maintaining traditional American

roominess and styling. We are confident that our 1958 Ramblers will further clinch American Motors' lead in this direction."

Eleven models, station wagons, sedans and hardtops, in the Six and V-8 series are offered in 1958. Both the V-8, known as the Rambler Rebel, and the Six, are built on the compact 108-inch wheelbase.

New major engineering improvements include push-button controls for the automatic transmission, new and larger brakes, all welded single-unit construction made even stronger and safer by structural changes, step-on parking brakes and the optional Powr-Lok differential which is designed to improve performance while driving through sand, mud, snow or ice. Powr-Lok permits the rear axle to send the greatest driving force to the wheel with the best traction.

Despite increased horsepower ratings in both the Six and the Rebel V-8, both will deliver even better economy, Abernathy said. The Six overhead-valve engine is rated at 127, compared with 125 for the 1957 model. An optional twin-throat carburetor boosts the rating to 138 horsepower. The V-8 develops 215 h.p., up from last year's 190. Greater fuel economy is possible because of increased compression ratios, and in the case of the V-8, a new four-barrel carburetor.

Both the Six and the V-8 engines require only regular grade gasoline, which further lowers the operating costs, Abernathy said.

Major styling changes inside and out are immediately evident. "From the low and wide grille to the gracefully-flared tail fins to the smartly-styled new interiors, the 1958 Rambler conveys a feeling of swiftness, luxury and comfort," Abernathy said.

Over-all dimensions of the 1958 Rambler are the same as last year's model. It is more than a foot and a half shorter than the other low-priced cars, although its interior room is comparable or greater. The Rambler Sedan is 191 1/8 inches long and 71 5/16 inches wide. The Six is 58 inches high; the Rebel V-8 is 57 13/16 inches.

Turning diameters of 37 feet 3 inches for the Six and 37 feet 8 inches for the V-8 are the shortest of any full-size American car.

## MY FEET GET ITCHY

ABILENE, Tex. — Abilene police can usually depend on Mike Garity to stop in for a visit when things get slow.

Recently he came by, with the assistance of eight Negro boys who found him loose about 9:30 p. m. near Lincoln Junior High. They dropped him at the police station. He was armed with a top double-barrel shotgun.

Mike is 7, and a regular visitor with the city officers. Every few weeks, police say, his bare feet itch and he goes for an unauthorized stroll. A while back he got on a tricycle and rode across Abilene to a feed mill building, which he promptly climbed.

Another time Police Radio Operator Allen Hatchett encountered Mike. On a borrowed tricycle he had left home and pedaled the vehicle three miles to Municipal Airport. Hatchett saved him the trip back.

After his last trip an officer jokingly told Mike he might have to spank him if he caught him galivanting around again. The boy studied the policeman a few moments then replied, "My mother will do that when I get home."

## Cawthon at Owens &amp; Scott

Billy Cawthon began work Monday, October 28, as butcher at Owens and Scott Grocery, George Scott has announced.

Mr. Cawthon worked for Piggly-Wiggly here for several months about 12 years ago. Recently he has been working in Chattanooga, Oklahoma.

At present Mr. and Mrs. Cawthon are living in Childress, where he grew up, but they will move to Wellington as soon as they can find a house.

Mr. and Mrs. Cawthon have three children, a girl 12 and in the 7th grade; and boys 10, in the Fifth grade and 5.

G. F. Austin of Denton was in Wellington the first part of the week attending to business and visiting with old friends here. He formerly lived in the old Plymouth Community and farmed there, leaving about 27 years ago to move to Denton, so that the family of six children might attend the schools and college there.

## Harvest Cotton For Top Profit Specialist Says

College Station — Proper harvesting and handling of seed cotton can add from \$2.50 to \$19 a bale to the income from this year's cotton crop, says Fred C. Elliott, extension cotton specialist. Careless methods of harvesting and handling on the other hand can cause great damage to line quality and lower its value.

Here are his suggestions for maintaining the inherent qualities of the crop. Do not harvest cotton when it is wet. Wait until 9 or 9:30 to start harvesting operations regardless of whether hand or machines are used. Cotton harvesting machines should not be operated at night when dew is present.

Machines should be kept clean and in good repair and serviced at the end of each day in accordance with the operator's manual. It must be remembered that the most elaborate gin cannot be expected to remove grass from lint cotton. Elliott advises defoliating when necessary. It will check or prevent boll rot and aid in preventing green leaf stain which lowers quality.

If a stripper is to be used, the specialist advises waiting from 7 to 14 days after penta or other dessicants are applied before starting the stripping operation. A green boll box should be used on the front of a wire-sided or slat-sided trailer and bolls caught, if infested with boll weevils or pink boll worms, should be burned. The stripper should be equipped with a blower under the elevator and cotton should not be tramped in the trailer.

Elliott says cooperation with the ginner in grouping cotton on the gin yard according to method of harvesting, moisture and trash content can add dollars to price of a bale of cotton.

Mechanical harvesting of cotton, points out Elliott, means much more than putting machines into the field. It includes all aspects of production including plant breeding, field management, soil care, crop residue disposal, seedbed preparation, planting, fertilization, weed, insect and disease control, harvesting and improved ginning.

Present-day Brooklyn resulted from the consolidation of numerous small villages, first of which was settled by the Dutch in 1636.

# We Have Installed NEW MACHINERY To Provide a Better Sample of YOUR Cotton

## The "LINT MASTER"

The Hardwicke-Etter "Lint Master" is a triple action Comber-Blender-Cleaner that very definitely improves your sample. The first action is to comb and blend the lint fibres. It has approximately double the combing action previously available. Tests have shown that operation of the saws at a speed of 1500 rpm did not result in lint loss but did improve increased removal of trash at the higher speeds. It is so designed that the lint stays in bat form throughout. Cotton buyers in parts of the state where the machines have been tried report increased dollar values from \$7.50 to \$15.00 per bale.

## Green Leaf and Burr Remover

Large capacity is a special feature of the Hardwicke-Etter Green Leaf and Stick machine with ample open space for trash removal. Removal of sticks prevents baky cotton and it is so designed that it also throws off immature locks of cotton as well as motes. A unique feature is a row of fingers which are designed to prevent any undesirable loss of cotton. These fingers located below and to the rear of the reclaimer saw replace stray locks into the flow of cotton while trash, leaves and sticks can easily drop between them into the trash conveyor for disposal.

Together these machines will provide HIGHEST TURN-OUT and SMOOTHER GRADE SAMPLES. Come in and see the Samples we are getting for our customers.

## FIRST NATIONAL BANK

**Safety Features Stressed****Swept-Wing 58 Dodge  
Due in November**

DETROIT—Significant advances in safety engineering, fuel economy and engine performance, plus dramatic "Swept-Wing" styling, distinguish the 1958 Dodge passenger cars, which will make their debut in dealer showrooms early in November.

The all-new Ram Fire V-8 engine, designed for top economy and performance, as well as quiet operation, heads a long list of important engineering features of the Swept-Wing for 58. Among these is the Sure-Grip differential, that provides pulling power to the rear wheel with the most traction, eliminating wheel-spinning on ice or snow, or in sand and mud.

Dual headlights, mounted side-by-side under bold fender hoods, provide greater safety for after-dark driving, and set the pace for Dodge swept-wing styling.

A strikingly different stainless steel grille design complements the dual headlight styling.

Looking over the low hood of the all 1958 Dodge convertible and Lancer hardtops is the compound-curvature "picture" windshield, which offers true control tower visibility and blends fashionably with the fast lines of Dodge sport models.

New interior and exterior colors and fabrics are available on all 1958 Dodge models.

Offered this year as a single safety package on the 1958 Dodge are the completely new, full-time

Constant Control steering. Total Contact floating brake shoe power brakes, padded dashboard and padded sun visors. Other safety features include Life-Guard safety door latches and safety door handles, both designed to secure doors against accidental opening.

An added safety and comfort feature is Torsion-Aire suspension, regarded as the most modern of any American design. The torsion bar system, combined with an extremely low center of gravity, gives a smoother, more controlled ride.

Torque-Flite automatic transmission is available on all Dodge V-8 models, while Power-Flite is offered on all 1958 Dodge Coronet models.

The 1958 Dodge line consists of the Coronet, Royal, Custom Royal, and station wagon series.

**REAL REALISM**

MIDLAND, Tex. — A Midland Community Theatre play rehearsal became a little too realistic.

The cast was rehearsing the forthcoming production of "Detective Story". Hugh Broyles, a Midland school teacher, was playing the part of a prisoner handcuffed to a chair.

Time came to free him. The key was missing. The wrong handcuffs had been used.

Broyles was taken, chair and all, to Midland police headquarters where Officer Vernon Conn succeeded in picking the lock.

**St. Joseph's  
Hospital Notes**

Patients in St. Joseph's Hospital during the last week have been: Gary and Stanley Oldham, 6 and 8 year old sons of Mr. and Mrs. A. M. Oldham of Samnorwood, were surgical patients October 15 and 16.

Mrs. George Childers, Samnorwood, was admitted as a medical patient October 15 and left October 19.

Mrs. Ray Null was a surgical patient October 15 and 16.

Mrs. Willis Gowin, Shamrock, was surgical patient October 17 to 20.

Mrs. Arline Walker, Wellington, was hospitalized October 17 to 21 for medical treatment.

Mrs. Alice Burns, medical, was admitted October 19 and released October 22.

Diana Snyder, daughter of Mr. and Mrs. R. K. Snyder, Twitty, was a medical patient October 20 and 21.

Mrs. C. A. Cowan, obstetrics, a bop, Charles Steven, 8 pounds and 1 ounce, born October 20.

Mrs. J. M. Morgan, obstetrics, girl, seven pounds and 3 ounces, Jayne Ann, October 21.

Jerry Lee Cummins was a surgical patient October 21 and 22. He is the son of Mr. and Mrs. G. W. Cummins of Hollis.

J. C. Sims has been a medical patient since October 21.

Mrs. John Henard was admitted October 21 for medical treatment.

James Lee White, 14, son of Mr. and Mrs. Lee White, was admitted October 21 for medical treatment.

Mrs. Bura Handley, who was a medical patient in St. Joseph's was released October 19.

Will Ward has been a patient in St. Joseph's Hospital since October 12. Mr. Ward was a patient earlier, then was taken to an Amarillo hospital for three weeks treatment.

**Letters from  
the People**

Find enclosed check for \$1.00 covering three months subscription to the Wellington Leader.

I buy it strictly for the oil news. It appears to me, since you are getting many subscriptions from all over the U. S., you could publish a little oil news in addition to the transfers of assignments. After all, that's what we distant subscribers pay out our money for.

The front page item and picture of well drilling outfit was heartening, but no follow up later, surely a few oil items weekly wouldn't hurt you any, and would hold the outside subscribers. Think it over.

A. R. Saltzman  
(Editor's Note: The Wellington Leader tries to publish news of oil and gas developments at it occurs and in order that subscribers living away from here may understand the picture, we would like to point out that the lack of news along this line is simply due to lack of drilling activity. Present drilling is confined to El Paso Natural Gas Co. in the north Collingsworth county shallow gas field, and of R. C. and E. C. Sidwell in the same area, and the wildcat test Lloyd Hefley of Wheeler is drilling in the southwest part of the county near Quail. There is no other drilling.

Production from the El Paso gas wells will not begin until its pipe line gathering system is complete through the north part of the county.

The major activity, with this exception, during 1957 has been leasing, and the selling or assigning of these same leases, part of them going into the hands of major companies and part into the hands of lease buyers in 10 and 20 acre tracts.

Locations, completions and plugged wells are listed as soon as that information is available from the Railroad Commission, the governing body in Texas for oil and gas production.)

**Dr. Chester L. Harrison  
Optometrist**

# You're Invited

to see

## the beautiful 1958 Dodge & Plymouth

# The PLYMOUTH

to be On Display in  
WELLINGTON FRIDAY, NOVEMBER 1

*It's New -- In So Many Ways --*

**"Silver Dart" Styling . . .**

The bright silver dart along the side of your new PLYMOUTH adds distinction to its appearance, and identifies you as the owner of a car that is both rugged and beautiful, combining the latest in engineering innovations with the traditional features that have made Plymouth the outstanding car on the road.

**Engineering Innovations . . .**

"CONSTANT CONTROL"—a completely new power steering means less parking effort, greater ease in driving, for it takes over 80 per cent of the steering effort, while resisting unwanted motions of the front wheels.

"SURE-GRIP DIFFERENTIAL"—directs power to the rear wheels for greater traction.

DUAL HEADLAMPS . . . for greater visibility ahead and to the right, giving the most efficient illumination ever attained for an automobile.

AIR CONDITIONING . . . which has been improved to give maximum distribution throughout the car.

# CASTLEBERRY MOTOR CO.

INTRODUCING NEW

# Swept-Wing 58

So advanced it leaves the rest behind!

On display for the first time today is a car that stands apart in any company. It is very low, very daring, beautifully proportioned. Its unusual sureness of handling and control reflects the latest engineering advances. To own it is a new adventure.

Swept-Wing 58 by DODGE

## Deck's DIDACTICS

—By Deskins Wells

Thoughts about the coming election on Nov. 5 at which time the people of Collingsworth County will go to the polls to decide on adopting the Optional Road Law, commonly known as the Unit System: If we don't like it after we have tried it, we can vote it out just like we voted it in 2 years or at any time after that enough people want to sign the necessary petition. Do any of you think that the dirt roads could get in worse shape than they have been in two years. It will give us a chance to look and to evaluate.

There are two letters run as paid advertisements in this issue of the paper that we think every person who is interested in knowing the facts and the law should give careful consideration. The first is one from Fred B. Glass, county judge of Falls County, Texas, where the unit system has been in operation since 1947. It is a letter that should be read carefully. The system has improved the roads and the financial position of a county that was practically broke. He further says that only once since 1947 was an attempt made to vote the unit system out, and that attempt was defeated by a vote of 10 to 1.

The other item in this paper is an explanation of the Optional County Road Law of 1947 which was written and signed by Luther Gribble, acting simply as a citizen of Collingsworth County. One of the many pertinent remarks he makes in his article follows: "The Commissioners Court could not employ one of the presently constituted personnel of the court." Luther Gribble's thoughtful and factual explanation of how the plan works also deserves your studied reading.

I do not really know whether all of this information will change many people or not — or whether all of the verbal debate will change many votes or not. I said last week that I did not see how any person could go far wrong by voting FOR every proposition on the two ballots. I am of the same opinion still. A FOR vote on every issue will mean increased old age pensions, better water conservation, better law enforcement, better and more equitable tax collections, better roads, better county finances and a better county government. At this late date there is very little to lose and much to gain by voting FOR.

The only two undefeated football teams in this district will meet on Powell Field next Friday, providing the flu allows them to meet at all. If they can play, it might decide the district championship although Quanah is still in the running with only one loss. At the beginning of the season the Indians were considered the strongest team in the district; but they lost to the Perryton Rangers leaving only the Rockets and the Rangers undefeated in conference play. The Wellington boys are still plagued by the flu and little is known about the physical shape of the Rangers. If they play, and I guess they will, it should be a tremendously exciting game.

How much the freeze hurt the cotton crop is purely a matter of who you talk to and in what part of the county his land is located. Irrigated cotton was hurt on top just as was the late sandy land cotton. Another story comes from the dry land farmers who operate on tight land — many think their cotton was damaged only slightly. The test will be what kind of weather we will have in the next few weeks. Damp and rainy weather could aggravate the damage of the freeze and sunny days could do much to alleviate it and enable the cotton to open.

Donald Curry was coming over to inspect my dahlias and get a few pointers on how I grew them. The freeze ended that business just like it did your tomatoes. However, my old tennis playing buddy is welcome to come over at any time and look at the ground and we can talk about next year.

Congressman Walter Rogers told a joke at the annual meeting of the Farmer Bureau:

"Heard that the President is sending Federal Troops to Lake Texoma."

"No, I had not, why?"  
"Well, it seems that a school of white perch would not have anything to do with a school of black bass."

Told the Congressman's joke to the only two printers remaining in the office with the others out with

**A QUEEN TAKES THE SPOTLIGHT**  
Radiant Vada Bell gave a queenly touch of beauty to a meeting otherwise given over to problems and questions of a serious nature at the annual Farm Bureau meeting Friday night, October 25. She is shown

with Wallace O'Rear, who with that meeting completed his year as Farm Bureau president; and Texas Junior Senator Ralph Yarborough. Miss Bell is district farm bureau queen.

## C. X. Woodruff Dies in Corpus

C. X. Woodruff, 87, long time county resident, died at Corpus Christi October 19. He had lived there since 1935.

Funeral services and burial were in Corpus Christi.

Mr. Woodruff came to Collingsworth county in 1899, living a year in the southwest part of the county. He then moved to near Wellington, but from 1906 to 1911 lived in Yoakum county, returning here in the latter year.

A farmer, his home for many years was just north of Wellington. He is survived by his wife and one daughter, Mrs. Charles Linggreen of Corpus Christi, who will be remembered as Miss Eula Woodruff.

He was a brother-in-law of Mr. and Mrs. John Puryear, Mrs. Ethel Cooley, Mr. and Mrs. Daro Camp and Mrs. C. C. Camp.

## Gene Lewis III In St. Joseph's

Gene Lewis, retired lumber and real estate dealer, and former Wellington mayor, became quite ill at his home Monday about 9 a. m. and was taken to St. Joseph's Hospital for treatment.

Although still hospitalized, his condition was reported as much improved Tuesday by his daughter, Mrs. Harold Watkins.

## Rev. Thomas Holds Revival at Pampa

The Rev. Bill Thomas, pastor of Shiloh Terrace, Baptist Church, Dallas, is holding a revival this week at Central Baptist Church, Pampa, Mrs. J. A. Lowe said. A number of members of First Baptist Church plan to hear him.

Central Baptist Church is located at 513 East Francis St.

## Welfare Workers To Meet Here

A staff meeting for field workers of the State Department of Public Welfare will be held here Friday, November 1, Mrs. Donnita Jones of the local office has announced.

All workers of Area 53, the east part of the Panhandle, will attend.

John B. Hessey, district supervisor, of Pampa, will be in charge.

## News of Men in Service

**MUNICH, Germany (AHTNC)**—Army Sgt. Joe R. Thompson, son of Nathan Thompson, Dozier Route, Shamrock, recently participated in a religious parachute jump in Germany with members of the Saint Michaels Society.

More than one hundred men parachuted onto a drop zone in Munich and reassembled in the area to hear a special Mass.

Sergeant Thompson, assigned to Company A of the 11th Airborne Division's 502d Infantry, entered the Army in May 1954 and completed basic training at Fort Ord, Calif.

The 22-year-old soldier is a 1954 graduate of Samnorwood High School.

the flu and Don Wheeler came up with this one:

"Did you hear that Gov. Faubus is getting a divorce."  
"No, why?"  
"His wife bought a colored TV set."

I told Don his joke was better than the Congressman's.

## PROMOTED

Earl Clement, a former Wellington resident, has been named manager of the newly-formed Wichita Falls Agency of State Reserve Life. Clement had represented State Reserve Life as an agent since 1951. He is the son of Mr. and Mrs. T. C. Clement.

## VINSON

Members of the Baptist WMU met Tuesday in the home of Mrs. Ivan Mitchell with thirteen present. The Mission lesson was taught by Mrs. J. B. Down. Visitors were Mrs. Tom Easter, Mrs. Lum Smith and Mrs. Parker Smith.

American Legion and Auxiliary met Thursday night for regular business meeting and a social. Hostesses were Mrs. G. A. Waller and Mrs. Emery Davidson.

Mrs. Walter Doake of Enid has been a house guest of her sister, Mrs. Bill Burnett, the past few days.

Mrs. Clarence Finney of California is visiting her mother and sister, Mrs. Minnette Hodges and Mrs. Harold McCain.

Mr. and Mrs. Arthur Burt have bought a new home in Mangum and will be moving in the near future.

Mr. and Mrs. B. Merritt were guests of their son and daughter-in-law, Mr. and Mrs. Ray Merritt, over the weekend.

Mr. and Mrs. J. O. Myers returned home to Lansing, Michigan, after being here a week with relatives.

The ladies of the Methodist Church met Monday for an all day prayer program. Mrs. Brogren was leader for the day's discussion. A covered dish luncheon was served at the noon hour.

## UNMERRY GO ROUND

**HOUSTON, Tex.**—Susy Power, two year old daughter of Mr. and Mrs. Tom Power promises to be a fine housekeeper one day. She doesn't like dirt of any kind.

The other day Susy remarked proudly to her mother that "those dirty kitties are going round and round and round".

Mrs. Power let the remark soak in, then gasped and headed for the washing machine. Peering forlornly through the glass port for a wet and frightened kittens, who had indeed been "round and round" — through the full soap cycle!

Mrs. Power hauled the animals out. "Fortunately, the machine was set for lukewarm," she said. "The kittens weren't hurt, but they were certainly clean".

Mrs. W. M. Horton returned home Sunday after a month's visit in Odessa with her daughters and families, Mr. and Mrs. T. D. Connelley and Mr. and Mrs. V. G. Smith. She also visited in Amherst with Mr. and Mrs. John Horton and in Lamesa in the home of her sister, Mr. and Mrs. Allen Ellison. Mr. and Mrs. John Horton returned home with Mrs. Horton to spend a few days and visit with other relatives here.

## Anderson Moves Accounting Office

Clark Anderson this week announced the removal of his office to the law office of Paul Spillman, two doors south of the location he occupied 21 years.

The two will not be connected in their work, but will only occupy the same office building, Spillman said.

Anderson and Judge Luther Gribble had occupied offices together for 21 years.

There will be no change in the nature of his business, Anderson said, and he will continue his income tax and accounting services, and the handling of oil and gas leases.

ter, Leslie White, R. L. Mabery, and W. C. Harwell; west district: John Carson, Darrell Crooks, L. A. Davis, Ben Farmer and Monty Mitchell.

Wallace O'Rear was elected director at large.

Fifteen resolutions were introduced by the resolutions committee as work out in the policy development committee in an open meeting recently, and three from the floor.

In these, Collingsworth county Farm Bureau won on record as follows:

1. supported the election of president and vice president of the United States by popular vote rather than electoral vote.

2. supported the president load limit on highways of 58,420.

3. supported the REA program 100 per cent.

4. approved the selection of the Commissioner of Agriculture as an elective office.

5. opposed use of any and all permanent school fund money, that is the principal, for the support of any of our schools, whether local schools or state schools such as the University of Texas and A & M.

6. favored the election of the state superintendent of schools by popular vote.

7. increased membership dues from \$7.50 to -10 effective November 1, 1957.

8. favored passage of legislation requiring that packaged consumers milk must contain at least 4 per cent butter fat content instead of the present 3 1/2 per cent.

9. opposed any federal aid for public schools other than the present school program.

10. favored 90 per cent parity on all agricultural products.

11. urged grading of cotton by mechanical means similar to that used by cotton mills.

12. urged that Commodity Credit Corporation be required to establish a price on light spot cotton to correspond with recent legislation setting a grade on light spot cotton as set by the Bureau of Standards.

13. opposed the application of the minimum wage law to agricultural workers.

14. favored an increase in postal rates to require second and third class mail pay their own cost of handling.

15. favored legislation requiring the publication of all subsidies, open or hidden.

16. pledged co-operation of the members in the Great Plains Conservation program.

17. opposed compulsory social security payments by farm people on self-employment.

18. opposed the unit system and urged members to study the plan before voting.

Guests recently in the home of Mr. and Mrs. A. B. Clark were his mother, Mrs. J. W. Clark of Bowie and a sister and brother-in-law, Mr. and Mrs. M. R. Kirkland of Wichita Falls. They also visited with Mrs. J. A. Leach and Miss Inez Leach while here.

Buckwheat, by its rapid growth, stifles weeds and leaves the field clean for the next year.

## News Letter

From Congressman WALTER ROGERS

### THE FIRST SESSION OF THE 85TH CONGRESS IN RETROSPECT

On August 30, 1957, at 3 o'clock and 57 minutes p. m., pursuant to House Concurrent Resolution 229, the first session of the 85th Congress adjourned sine die. On the same day at 4 o'clock and 22 minutes p. m., in accordance with the terms of House Concurrent Resolution 339, the Senate of the United States adjourned sine die. Unless there is a special session called by the President of the United States, which is not anticipated, the Congress will not be in session again until January 7, 1958.

Needless to say, this has been a busy session. The House was in session a total of 141 days; the Senate 133 days. However, the Senate was in session 860 hours and 44 minutes, while the House was only in session 585 hours and 19 minutes. You will recall that there was a slight filibuster in the Senate which gave them added hours. It is also recognized that the House of Representatives attends to business in a much speedier manner than the Senate. This is not intended as a reflection on the Senate. The fact is, under the House rules, debate is limited. No Member can talk more than 5 minutes on an amendment to a pending bill without unanimous consent of the entire House. The general debate is usually limited to a few hours; hence, the greater speed in disposing of business. Some argue these same rules should be applied to the Senate,

but that is, in my opinion, wrong. Extended debate in the Senate has, many times, brought about needed changes in legislation and has, on occasion, prevented the passage of legislation which was very dangerous. The Senate used 9,423 pages in the Congressional Record; the House of Representatives used 5,869. The Senate passed 612 Senate bills and 346 House bills. The House passed 276 Senate bills and 610 House bills. Two Senate bills and three House bills were left in conference. These will be considered at the next session of Congress. A total of 1,210 measures, including Senate and House bills, joint resolutions, concurrent resolutions and simple resolutions were passed by the Senate. The House passed 1,198 such measures. A total of 1,319 measures were reported to the Senate. 1,179 measures were reported to the House. The Senate filed 26 special reports; the House 60. Conference reports of the House numbered 36.

In the Senate 3,297 measures were introduced. This figure includes bills, joint resolutions, concurrent resolutions and simple resolutions. The total in the House was much greater. It was 10,716 of which there were 9,609 bills, 461 joint resolutions, 230 concurrent resolutions and 416 simple resolutions. At the date of this writing, the President has vetoed one Senate bill and four House bills.

The House had 120 quorum calls and 100 year-and-nay votes. In other words, the roll was called 220 times. In the Senate there were 139 calls and 111 yea-and-nay votes.

Much more could be said about many measures which came before the Congress; however, probably the most important was the tremendous peacetime budget submitted by the President. He had requested approximately 72 billions of dollars. This included approximately 65 billion for expenditures for operation of the government, plus interest payments on the national debt which amounted to some 7

### Provisions—

(Continued from page one)

Engineer shall be appointed by the Commissioners Court. He shall be a licensed engineer, experienced in road construction and maintenance, who shall meet the qualifications required by the State Highway Department for its county engineers. If the Commissioners Court is not able to employ a licensed professional engineer for any reason, then the Commissioners Court is authorized to employ a qualified road administrative officer, who shall be known as the County Road Administrator, to perform the duties of the County Road Engineer.

Under the provision the Commissioners Court would have to go outside the present members of the Commissioners Court for a County Road Administrator, that is, the Commissioners Court could not employ one of the presently constituted personnel of the court."

Mr. and Mrs. Leon Coleman and son, Mark, of Duncan, Oklahoma, spent the past weekend in Wellington visiting with relatives and friends.

billions of dollars annually. The Congress appropriated approximately 60 billions of dollars for the operation of the government, as against the 65 billion requested by the President. In other words, the budget request was reduced by approximately 5 billions of dollars. This means the sharp economy ax of the Congress resulted in saving every man/ woman and child in this country approximately \$300 each in the operational expense of the federal government for this fiscal year. The same kind of action in the next session of the Congress should result in a tax cut for those people in the middle and lower income brackets who most need relief. Our efforts will continue in that direction.

One of the most encouraging things to me in this past session of Congress was the general reaction of the public on so many of the highly controversial measures. It was very obvious that all Members of the Congress were hearing from the grass roots. This was pointed up in much of the debate and many times on the votes.

Ours is a government by the people. Their response or reaction to proposals and measures which affect their daily lives should be the guiding light of the Members of the legislative bodies, whether local, state or national. I was indeed fortunate to have such a great number of fine letters from the many good people who reside in the 18th Congressional District. These letters gave me unbiased and unprejudiced views. I wish all districts in the United States were made up of such fine, understanding and helpful citizens as we have in the Panhandle of Texas.

Mario Coleman, son of Mr. and Mrs. J. D. Coleman, who is attending North Texas State, visited over the weekend with his parents and other relatives and friends here.

## Highlights and Sidelights FROM Your State CAPITOL

AUSTIN, Tex. — It's time for a showdown, says the Senate Investigating committee.

Our Texas Legislature has gotten a black eye, the committee feels, and it wants to find out why. Said the committee's chairman, Sen. Charles Herring of Austin, "There's been a tendency on the part of the public to blame the Legislature for everything that happens."

He attributed this to: (1) Acts of a few lawmakers who discredited the entire branch, (2) loose and irresponsible talk and (3) a tendency of other state agencies to blame the Legislature in an attempt to cover up their own shortcomings and "even dereliction of duty."

Herring promised a three-pronged attack against these sources of discredit. Grand juries and the legislators have already done "able work" in the first area, said Herring.

In its "loose talk" attack the committee called on the carpet Riggs Shepperd of Hondo, manager of the Medina Electric Cooperatives, Inc. Riggs said The Texas Co-op magazine misquoted him in saying he's been "told to see old so-and-so and he'll get your bill introduced for \$500." He said a national magazine article on alleged corruption in Texas triggered

his remark.

In the third phase of its operation, presumably designed to show that state agencies have fallen down on their jobs, the committee began by subpoenaing three insurance executives.

First on the stand was Largent Parks, president of Preferred Life of Dallas. Parks was closely questioned about State Insurance Board charges that he owes the insurance firm some \$194,000. Senate committee questioning emphasized that Parks' firm had been given a routine examination last March and another special examination in June; but that the report had never been made public.

Also subpoenaed were Pierce Brooks and Lester Hall of National Bankers Life in Dallas.

FEDERAL FORCE DENOUNCED — Despite difficulties among themselves, pro-segregation representatives pushed through a strongly worded resolution against enforced integration.

By a vote of 112 to 24, House members criticized President Eisenhower's action at Little Rock. It did not, said the resolution, "reflect constitutional government deriving its powers from the consent of the governed."

Further, it asked the President not to send troops to Texas to enforce "modern sociological con-

cepts" or interfere with "the constitutional right of the State of Texas to provide, operate, and discipline the public schools of Texas."

Difficulty came with Rep. Joe Pool's efforts to push through a demand-to-the-governor resolution. Pool's proposal would call on Gov. Price Daniel to say at once when he will open the legislature for segregation bills. It was shunted aside for a week.

Many East Texans joined in the postponement move, thus indicating they had faith in the governor's intentions.

MARRIAGE OF MANY — Lobby control proposals are going through the "agonizing reappraisal" stage.

Eight widely varying bills — four in the House, four in Senate, were sent off to subcommittees. Each sub-group is to make a four-way marriage of the proposed bills in the hope of arriving at something that will be acceptable to all.

Some points of difference: whether "controls" should apply only during sessions or year-around, only in Austin or anywhere in state, whether public officials should be exempted, church spokesmen, etc. Each author contends the rival bills have "loopholes."

A new proposal by Sen. Henry B. Gonzalez of San Antonio is that the law should provide for a special enforcement agency. It would be a "disclosure board" to which information on who is lobbying for whom and how much is being spent would be filed.

MUDDY ROAD — Proponents of a statewide water planning bill are having slow going too.

They're having to slog through waters muddled by scores of amendments and objections from various area groups who fear an overall state plan might short-change them.

House members have to struggle with two different bills and 35 proposed amendments. Rep. W. A. Stroman of San Angelo introduced a substitute which cuts out the provision for the state to buy storage space in federal reservoirs. It also would require the water planners to report to the Legislature in 1959 and would not allow the Water Board to have final say on a state plan.

Balloting in next Tuesday's constitutional amendment election may have an effect on legislative efforts. In their vote on the proposed \$200,000,000 water bond issue, Texans will indicate just how strong they are on statewide water programs.

Governor Daniel told the Senate committee he would not want to see the whole water planning bill ditched because of the storage buying feature. But he didn't want to "suggest you drop it."

"MURDER CAPITAL" CITED — Crime study and state practice act — the two other items in the governor's special session call — are generating less legislative static.

A House hearing on the crime study bill brought strong pleas for better law enforcement from Houston civic leaders. Houston (109 murders last year) has been called the "murder capital of the world," they said. Worse than Chicago's gangland days. "It's time we face up to some of these things," said a Jaycee spokesman.

Sen. A. M. Aikin has introduced in the Senate the bill to regulate legal practice before state agencies. A similar bill already is in the House bill.

NARY A DIME — Don't expect to collect from the state for damages you suffer from a state employee. Again the State Supreme Court has held the state is not liable.

Even guarantees in the Texas' constitution that your property

shall not be damaged or applied to public use without compensation are not sufficient to overturn this principle.

This latest decision denied damages to C. C. Benson whose cotton crop was ruined by drift of weed killer sprayed by an employee of the Dallas County Flood Control District.

Similar decision was handed down in 1949.

LOCAL CONTROL URGED — Local control and integration were front and center issues at the state convention of the Texas Association of School Boards in Austin.

Sen. A. M. Aikin Jr. urged the solving of education problems without federal aid and federal control. Integration was discussed mostly off-stage.

### Ring

By Ruby Thomas

Sunday School was held Sunday morning although only a few were present. Bible Study was held Sunday night.

Mr. and Mrs. M. G. Thomas of Amarillo spent the weekend with Mr. and Mrs. Ross Oatman and family.

We have been receiving some good rains which we all have enjoyed very much.

Dinner guests in the home of Rev. and Mrs. J. E. Murdock, Sunday, October 20, were: Mr. and Mrs. Bill Clay, Mr. and Mrs. Lee Minyard, Mr. and Mrs. J. M. Tidwell and Sue, Mr. and Mrs. J. L. O'Hair, Mr. and Mrs. Ross Oatman, Tommy and Lenora, Mr. and Mrs. Clay Oatman, Mrs. Jennie Oatman and Ruby Thomas.

Some bricks made by the Babylonians and Egyptians more than 4,000 years ago are still in perfect condition.

### QUAIL NEWS

By MRS. G. T. STEPHENS

The killing frost and freeze Friday night, October 25, damaged the late cotton crop in the Quail Community considerably. Some of the farmers estimate their crop loss to be as much as one-third.

Mr. and Mrs. Bill Phillips and daughter of Tulsa were weekend guests in the home of Mrs. Phillip's parents, Mr. and Mrs. Clarence Blevins.

Jack Morgan, who is attending Sam Houston State College at Huntsville, visited with his parents, Mr. and Mrs. Ira Morgan over the weekend.

Mr. and Mrs. George W. Stephens and Sherry Leigh visited from Thursday until Sunday in Fort Worth with Mrs. Stephens' parents, Mr. and Mrs. C. H. Montgomery.

A number of Quail High School students appeared on the Coronation program Thursday night, October 24, at the Hedley Cotton Festival in Hedley. They were: Brenda White, Judith Ann Wilson, Annell Lacy, and Patty Patton, who was also a candidate in the race for "Cotton Queen of '57". The Quail High School Chorus accompanied by Mrs. Lowell Wells also appeared on the program Saturday morning, October 26.

Mr. and Mrs. Frank Kennedy and children are visiting in Florida with Mrs. Kennedy's father and other relatives.

The first bale of cotton for the season was ginned at the Quail Gin on Thursday, October 17. The bale was brought in by Carroll Blevins, and weighed 497 lbs. It was grown on his farm near Quail.

School dismissed Friday, October 18, for boll pulling. Supt. Moseley stated classes would be dismissed for four or five weeks.

Min. and Mrs. Scott Mitchell of Abilene spent the weekend here visiting with friends. Min. Scott preached at the Quail Church of Christ last year regularly. He is a student in Abilene Christian College at present.

Mr. and Mrs. Pat O'Hair spent the weekend in the home of Mr. and Mrs. Delbert Timmons and children in Perryton.

Supt. Herman Moseley is in Austin this week attending a school meeting.

Mr. and Mrs. John Alf Thomas who are attending West Texas State College, Canyon, were weekend guests in the home of Mr. and Mrs. Obie White, parents of Mrs. Thomas.

## Plymouth Ups Popularity With New Improvements

DETROIT.—Substantial styling advances in keeping with the trend setting characteristics of the immensely popular current model Plymouth cars, plus a broad new lineup of six engine options and other important new engineering features will be seen when the Plymouth for 1958 is introduced Nov. 1.

"The new Plymouth is improved in appearance, performance, comfort and safety, yet retains many of the outstanding styling, handling and riding features that were so enthusiastically accepted by American motorists this year," John P. Mansfield, Plymouth president, said.

"While the 1957 model year has been one of the finest in our his-

tory, we intend to move even farther ahead with the introduction of finer, more advanced line of new Plymouth cars in November."

Styling features of the new Plymouth include a bright new "Silver Dart" side moulding treatment, sweeping upward at the rear on Relvedere and Sport Suburban models to the tip of Plymouth's familiar high-flung directional stabilizer fins, with optional dart inserts of silvery anodized aluminum or compatible colors. Another distinctive new side trim is available also with Savoy and Plaza models.

Double header dual headlights are standard equipment on all new Plymouths, with the inner beams producing maximum long-range forward visibility and the outer

pair providing supplemental fill-in light when used in combination, or efficient low-beam lighting when used alone. With filaments centered in all lamps, the new dual headlights produce the safest, most scientifically effective night lighting ever attained for automobiles.

The lower front grille of the Plymouth for 1958 has been redesigned with a horizontal bar effect identical to the upper grille section.

New Plymouth colors for 1958 are generally softer and more elegant, with 15 solid color options and 4 two-tone combinations. Luxurious new textured fabrics are offered in all lines.

Air conditioned 1958 Plymouth cars have a new outlet for better distribution of cool, dehumidified air and a more powerful blower. Air conditioning is combined with the heating system of the Plymouth, with a single set of controls.

Torsion-Aire ride, Plymouth's top engineering advance of 1957

for non-sway riding comfort and dip-free starts and stops, is also an outstanding feature for Plymouth in 1958, as are the trouble-free push button automatic transmissions, TorqueFlite and PowerFlite, and Plymouth's sure, safe, Total Contact brakes.

Visitors in the home of Min. and Mrs. John Gay for a short time Thursday were Mrs. R. L. Wright of Shamrock, her mother-in-law, Mrs. H. L. Wright, also of Shamrock, also Mrs. Eddie Norton and Mrs. Annie Bernard, all of Erick, Okla.

Mr. and Mrs. Lonnie Fuson and daughter, who formerly lived here, recently moved to Bethany, Oklahoma, where he enrolled as a sophomore in Bethany College. He has been employed by Cities Service Oil Company for the last year. Fuson is the son of Mr. and Mrs. F. C. Fuson.

Nile River, longest in Africa, extends for 4,100 miles.

## SEE THEM ON DISPLAY THIS WEEK-END

## The PLYMOUTH

Star of Plymouth's line of engines for 1958 is a brand new V-8 . . . The Golden Commando. Following assembly the new engine is dynamically balanced as a complete unit to assure smoothest possible operation.

There are fifteen solid body color and 44 two-tone color combinations in two different treatments and they are optional.

The new cylinder head design of the Plymouth Golden Commando engine reduces the weight by 50 pounds.

The sure-grip differential available on 1958 Plymouth directs power to the wheel that has the most traction . . . assuring maximum pulling power at all times in rain, snow, mud or sand.

## The DE SOTO

The 1958 DeSoto has a group of high displacement engines of new design. Greater fuel economy . . . particularly during warm up and start and stop city driving.

Easier parking, as well as a solid feel of the road on straightaway is provided by a new constant-control full-time power steering.

All DeSotos have a Turboflash engine of new design. Dimensions on the Firedome and the Firelite models are the same bore and stroke. Dual exhaust systems are optional on both of these models.

Come in this week and see these two Sensational New 1958 Cars

# Morton Motor Co.

## STATE OF TEXAS COUNTY OF FALLS Marlin, Texas

TO THE PEOPLE OF COLLINGSWORTH COUNTY:

In 1947 Falls County adopted the provisions of the Optional County Road Law, commonly known as the "Unit System". They did so as an escape from the outmoded system of waste and extravagance. They have had no reason to regret their action. Only once was an attempt made to vote the unit out, and that attempt was defeated by a vote of 10 to 1.

Operating under this system Falls County has saved many thousands of dollars in its operations, purchases and absence of political waste.

At the beginning of 1947 Falls County was practically bankrupt. The Road and Bridge Department was about three years in debt. The County was paying for its purchases and labor with script, which was being discounted 30 cents on the dollar. The County had very little road equipment, none of which could be rated as first class. The roads were in bad condition and numerous bridges had not been replaced after being out several years. The County's credit was at the lowest ebb. Since the Unit System was adopted, many changes have been made. The County employed an engineer to supervise the road department. (This law has been amended to provide for a road administrator in lieu of a licensed engineer. H. B. No. 577, 55th Legislature.) He has charge of all equipment and personnel. The road department is operated on a County Wide basis rather than precincts.

The finances of the County are controlled by the Commissioners Court as a whole, rather than by each Commissioner. All road and bridge funds are deposited in the "County Road Fund" and expended ONLY by approval of the Court in session. The engineer, or administrator, makes requisitions to the Court for purchases. The Court issues orders for purchases upon bid, and approves payment of them. As a result of this system, the County has made tremendous progress. Many new bridges have been built and old ones repaired. All roads are in good condition, and many miles graveled. The County now has over one hundred thousand dollars worth of road equipment, all paid for. This has been done without voting any bonds, without raising the taxes or increasing the valuation.

The engineer, or administrator, is not a dictator, as some have charged, but an advisor to the Commissioners and the Court. He works with the Commissioners in promoting efficiency and economy. He is employed by the county, and is not subject to political influence.

This letter is written at the request of one of your citizens. It is not our intention to tell you how your County should operate. That is your business. It seeks only to explain how Falls County operates, and the people here like it.

Very truly yours,  
FRED B. GLASS, County Judge,  
Falls County, Texas.

## An Explanation of The Optional County Road Law of 1947

Under the provisions of the Optional County Road Law of 1947, as amended, it states: "The County Road Engineer shall be appointed by the Commissioners Court. He shall be a licensed engineer, experienced in road construction and maintenance, who shall meet the qualifications required by the State Highway Department for its county engineers. If the Commissioners Court is not able to employ a licensed professional engineer for any reason, then the Commissioners Court is authorized to employ a qualified road administrative officer, who shall be known as the County Road Administrator, to perform the duties of the County Road Engineer."

Under this provision the Commissioners Court would have to go outside the present members of the Commissioners Court for a County Road Administrator; that is, the Commissioners Court could not employ one of the presently constituted personnel of the court.

This law further provides: "The construction and maintenance of the county roads, the ownership and use of all road department equipment, materials and supplies, and the administration of the county road department shall be on the basis of the county as a whole without regard to commissioners precincts." Thus the county would be operated as a whole, as one unit, instead of four units as is presently done.

Under a one unit system, rather than a four unit system, the saving in the purchase, repair and maintenance of road equipment and machinery alone, would more than offset any reasonable cost of hiring a Road Engineer or Administrator, and at the same time would give us a countywide road system. The people of this county, by voting the additional 30 cent tax this year, expressed their willingness to pay the bill in taxes, but we expected a road system throughout the county. From the experiences of some other counties of our State, we can have a countywide road system by adopting the Optional County Road Law of 1947 on November 5th next.

*Luther Gribble*

## Tree Seedlings Available for Farm Planting

COLLEGE STATION — Over 250,000 tree seedlings will be available to Central and West Texas landowners for windbreak plantings in early 1958, Don Young, head, Forest Management Department of the Texas Forest Service announced today.

"Landowners in critical areas should establish farmstead or field windbreaks to prevent wind erosion of their valuable topsoil," Young said.

Austrian pine, ponderosa pine, Chinese elm, and red cedar will be available for the 1958 winter planting season. These seedlings, procured from the Oklahoma State Nursery at Norman and Boyd's Nursery at McMinnville, Tennessee, will be sold for \$3.00 per hundred. This price includes the cost of shipment to landowners.

Application blanks for ordering the seedlings can be procured from county agents and Soil Conservation District offices in the Central and West Texas area. In addition order forms are available upon request, from the Director, Texas Forest Service, College Station.

The deadline for ordering seedlings will be March 1, 1958. Seedlings will be shipped about the first week of March, 1958 to locations specified on the application blanks. Information on how to store and plant the seedlings is available upon request.

"As the orders will be filled on a first come-first serve basis, we want to urge those interested to get their requests in as soon as possible," Young added.

ATOMIC BLAST churns the Nevada desert and rises skyward as "Frisella" shot of Operation Plumbob, the current series of atomic tests, hurls tremendous forces against a new "ghost town" of shelter structures built as possible prototypes for future blast-resistant buildings and shelters in the more vital target areas. (NTO Lookout Mountain Lab Photo)

Financial assistance may be available to some Central and West Texas landowners for the establishment of farmstead or field windbreaks through the Conservation Reserve section of the Soil Bank Act. Landowners with sufficient acre in windbreaks should contact the ASC office in the county in which the lands are located for information on this program.

### GENTLE REMINDER

BAY CITY, Tex. — A fond father, picking his son up at the football field noted he was more

tired than usual and asked if he had had a rough day.

The son replied that he had forgotten his basket and that he had to run 1,600 yards as some sort of penalty.

Dad thought this was a good idea and would endlely impress the youngster.

"Well after running that many yards I'll bet you won't forget that basket again," he said.

"That reminds me, Dad, take me back to the gym quick — I forgot my basket."

## 55 Named on High School 6 Weeks Honor Roll

Fifty-three students were listed on the Wellington high school honor roll for the first six weeks by Maxey McKnight, principal.

Nine were on the A honor roll: Patricia Sullivan, Betty Jo Sanders, Joy Hartman, VaRue Sweat, Carolyn Keller, Francis Drake, Sherry Bounds, Vada Bell, and Loretta Phipps.

The remaining 44 on the honor roll were: Athen Lowrie, Reggie Scott, Jo Ann Crain, Carolyn Gammill, Pat Wilkins, Charlie Welch, Dickie Sweat, Donna Lowrie, Nell Wilkerson, Doris Wolf, Glenn Ward, Ray Henry, Mary Sanders, Steve Smith, Theda Martin, David Jackson, Patti Hughes, Sandra Cooper,

Harry White, Elouise Bowen, Eugene Vernon, Jimmy Forrester, Linda Brantley, Lonnie Roark, JoLene Groves, Anne McCarver, Kirby Campbell, Barbara Denley, Myrna Henry, Sheri Gibbs, John Wolf, Lynda Orr, Elaine Ledbetter, Wanda Langford,

Adelle Ward, Ralph Coburn, Robert Weir, Judith Smith, Sharon Campbell, Linda Elbert, Betty Durfey, Sharon Herring, Judy Glenn and Zenith Phipps.

### DOZIER

By MRS. ALEX COLEMAN

This community received about an inch of moisture as a whole, although parts received more. This will be a help to wheat and grassland. Some were thinking of

defoliating cotton, but the frost fixed that and we will be saved the expense. Old man Winter must be coming early this year.

Mr. and Mrs. Leo Massey, James and Bob, who have moved to Lubbock, visited their parents, Mr. and Mrs. Frank Massey and Grandmother Riley Sunday.

Mr. and Mrs. Leon Coleman and Mark of Duncan, Okla., were in Wellington over the week end. Mr. and Mrs. Alex Coleman, Mr. and Mrs. Wood Coleman visited with them Sunday and with their mother, Mrs. S. L. Coleman, and Mr. and Mrs. Dee Coleman who have lately moved to Wellington.

Mrs. Rose Ray returned to her home Sunday from Shamrock General Hospital.

The basketball girls attended their practice meeting Monday night.

Mr. and Mrs. Worth Shields motored to San Jon, N. M., to see his sister and family, Mr. and Mrs. Montie Phillips, one day last week. We regret to hear that Mr. Phillips isn't doing so well.

Roy Hoffman, who is in school at Arlington, visited home folks over the weekend.

Mr. and Mrs. Gus Gooch attended the Farm Bureau Meeting and heard Senator Yarbrough speak Friday. They report their son, Ronnie and family, who teach at Darrouzett, have had the flu.

Mr. and Mrs. Guy Bell and children of Amarillo visited their parents, Mr. and Mrs. Alex Coleman and Mrs. Juda Bell Saturday and Sunday. Mrs. Bell is some better after her operation and has moved to Wellington lately.

Mr. and Mrs. Joe Coleman of Wellington drove to Samnorwood Sunday.

Bel Air Impala Sport Coupe—new luxury in the low-price field

## ALMOST TOO NEW TO BE TRUE! '58 CHEVROLET!

The biggest, boldest move any car ever made!

Meet the '58 Chevrolet . . . panther-quick, silk-smooth . . . with a V8 unlike any other, a Full Coil suspension, a real air ride . . . two new super models! Here today!

Look at Chevrolet's airy new styling. That's how new Chevrolet is all over! It's lower, wider—nine inches longer.

There's an all-new Turbo-Thrust V8\* engine. Pair it up with Turboglide\*, and you'll command the quickest combination on the

road. There are two new rides—Full Coil suspension and a real air ride\*. The body-frame design is new, the wheelbase is longer.

There's a new 4-headlight system, new 6 and V8 power, foot-operated parking brake. And two new super models—the Bel Air Impala Sport Coupe and Convertible, most luxurious and distinctive Chevrolets of all. See all that's new at your Chevrolet dealer's soon!

\*Optional at extra cost.

## New Chevrolet Goes on Display Here Thursday

Come in for a peek at the 1958 Chevrolet Thursday, October 31, Clark Chevrolet invited its friends throughout the area this week, for that is the date that new models go on display.

You simply stroll into your Chevrolet dealer's and you'll learn about some of the wonderful new things the '58 Chevrolet offers. Here's a hint of what's in store for you.

The 1958 Chevrolet will be longer, lower and wider and will introduce a spectacular new type of styling. It will be built around a new principle of body-frame design.

It will offer a radical new V8, so unlike present engines that it even looks different on the outside. Goes differently, too!

It will bring astonishing advances in riding comfort with a new development in Full Coil suspension and the first real air ride in its field.

There's an even smoother Powerglide, the one and only Turboglide,

and fuel injection among the superb extra-cost options. Chevy's wheelbase is longer, the body-chassis design sturdier for a more solid ride. There is a new X-type frame, a bigger, deeper windshield, a new foot-operated parking brake with hand release.

The line will include two new luxury models of great elegance and distinction.

The instrument panel is a panorama of newly designed controls. Most interiors are new three-tone styling. And the new Bel Air Impala Sport Coupe and Convertible set new standards of luxury and distinction for the low-price field.

The beautiful new Delray models are lowest priced of all the low-priced Chevrolets. But they're long, low and loaded just the same. A full nine inches longer, dramatically lower, and loaded with new things that make driving happier and riding smoother.

In the new 1958 Corvette there's new sports car styling inside and out — bold and dashing! The Cor-

vette packs power to match its magnificent handling and road-holding ability. And it offers a 4-speed manual shift for expert drivers. America's only sports car is even sportier!

These are only a few of the high spots. You'll find out more when you visit your Chevrolet dealer's, the local dealers said.

## DODSON

Mr. and Mrs. C. E. Hightower and Miss Wilma Hightower were Sunday dinner guests of Mr. and Mrs. Beanland and son, Sherry Beanland in Gould Sunday.

Mr. and Mrs. Bynum Hightower and children visited her parents, Mr. and Mrs. John Aaron and family in Vinson Sunday evening. Mrs. Hightower was guest speaker at the Vinson Nazarene Church, using as her subject, "Behold, I Stand at the Door and Knock". She used as illustrative material an original picture painted by Mrs. O. N. Hightower of Dodson. Mrs. Anson is now pastor of the Vinson church. The family formerly lived at Dodson.

Mr. and Mrs. Frank Smith and daughter, Joy Carolyn, will leave Thursday for Lubbock to visit in the home of his sister and brother-in-law, Mr. and Mrs. Grover C.

Mitchell. Smith will take additional work in the Masonic Lodge.

Miss Barbara Lennon, student in West Texas State College, Canyon, spent the weekend with her parents, Mr. and Mrs. T. E. Lennon and Joe.

Visiting in Dodson recently with her sister, Mrs. Bynum Hightower and family was Miss Ann Aaron. She was graduated from Dodson high school this spring and worked through the summer in Denver. She is now employed in Amarillo.

Ted Parker and the Pride of Dodson have made three appearances this fall, at Dodson, Wellington and Kirkland. Members this year are Parker, director, and Kenneth McClendon, Joy Carolyn Smith, Roger Hugh Painter, Kenneth Hunt, Eddie Hunt, Glen Hunt, Garth Lewis and Joe Lennon.

## Car Inspection Rule Changed

Homer Garrison, Jr., director of the Texas Department of Public Safety, announced today a change in motor vehicle inspection regulations so as to no longer require the removal of a wheel in order to inspect brakes of vehicles.

In an effort to prevent accidents which might occur due to brake

failures, the department's earlier regulation had required that the wheel be removed for the principal purpose of determining the percentage of thickness of the remaining brake lining. Inspection stations found difficulty in making these inspections due to the fact that there was no accurate way of determining the original thickness and the decision in each case was left to the inspecting mechanic who had no satisfactory guide to follow.

The change in regulations, which resulted from action of the Public Safety Commission, does not affect the remainder of the inspection of brakes, which will still be required to have the performance ability required by statute.

Col. Garrison announced that this change in the regulations was made in the interest of fairness to the inspection stations and to the motoring public.

## David Fillpot in Hardin-Simmons

David Fillpot, Dodson, is a student this fall in Hardin-Simmons University, Abilene, where he is a member of the Life Service Band, Ministerial Council and Speech and Drama Club.

## INSPECT NEW MACHINERY

Paul Bell and Dick Sweat of the Farmers Co-op Society No. 1 in Wellington, are shown standing before the new Hardwicke-Etter "Lint Master" recently installed in

the gin. The Hardwicke-Etter "Lint Master" has achieved fame throughout the cotton belt through its ability to raise the cotton sample a full grade or more and removal of trash along with blending out spots.

# The 58 Chevrolet Will Be on Display In Wellington Oct. 31

The 1958 Chevrolet is new from bumper-to-bumper and from frame to roof line. The all-new features include . . .

A completely re-styled car which is longer, lower and wider and emphasizes flowing sculptured lines from the dual headlamps to softly flared rear fenders.

An X-shaped frame which allows a lower silhouette but retains ample head room and increases leg room and luggage space.

Two suspension systems for a more luxurious ride along with remarkable handling, stability and durability. Sturdy coil springs, front and rear, are standard.

A new "Level Air" system which automatically adjusts to all load weights is optional.

A 348-cubic inch engine which is new from fan to flywheel. Designed primarily around a new combustion chamber, the optional Turbo-Thrust V8 offers greater torque for improved mid-range performance.

YOU ARE INVITED TO COME IN AND SEE THE NEW MODELS
