## On The BEAM

By J. W. King, Sr.

If the landowners along Champion Creek pass up the opportunity to get a flood control project at no cost to them they will be passing up an opportunity that may never come their way again.

A flood control project would be worth a great deal to every farm on or near the stream—it would greatly enhance the value of every piece of land in the watershed.

Local landowners must take the initiative in applying for a flood control project. Somebody ought to make a move now to get the ball to rolling.

One of the greatest things Loraine has done for her youth is the sponsoring of the little league baseball this summer. It keeps a lot of boys busy.

### FUTURE FARMING NEWS

Loraine FFA Chapter Reporter  
Each week in The Mitchell County News and with the cooperation of Mr. King, the members of the Loraine F. F. A. Chapter and their advisor, will publish this column concerning farming and ranching news. We will try to publish latest information concerning insects, crops, livestock and etc. The main person responsible for editing this column and see that it gets to the printer will be the Chapter Reporter, Billy J. Long.

Walnut Caterpillar—Watch out for this insect on your pecan trees. We have had several attacks in Loraine on pecan trees the past week. They will eat the leaves completely where they attack, leaving no leaves to manufacture food, therefore the young pecans will not mature. They are easy to recognize being brown in color with a dark brown stripe running down the middle of the back. They can be controlled by spraying with DDT or Malathion. Use 2 pounds of 50% wettable D. D. T. powder per 100 gallons of water or 1 pint concentrate 50% Malathion per 100 gallons of water. You will not need this much if spraying only one or two trees, but you can mix it proportionally to the amount that you will need.

Each week we would like to leave a thought with you. This week, we have selected the following:

Troubles  
If you talk about your troubles And tell them o'er and o'er, The world will think you like 'em And proceed to give you more."

## Forty-Four Year Landmark Razed New Church To Be Erected On Site

The Church of Christ building, a landmark on the corner of Lightfoot and Crockett Streets for 44 years, is no more. A large group from the congregation gathered there early Monday morning and within a few hours had the building looking as if a storm had lifted the roof off.

Dream for a new building has

tending north 26 by 14 feet which

will be used for Sunday School classrooms. The building is to be constructed of concrete tile with the interior textured. A four stair heating system will be installed.

The church was organized in 1907 and worshipped at that time in a wing of the little white school building which was purchased and moved to a site in West Loraine where the Gospel

Church of Christ, Loraine, Texas

been uppermost in the minds of the members for many years and a building fund was started in 1950 but due to the prolonged drouth the fund was slow in climbing to the required figures to start construction.

Contract for the new building has been given to Lambert Construction Company of Abilene, and work will start when the site is cleared.

The planned auditorium in the new building will be 88 by 40 feet facing east with a wing ex-

Mission now stands.

The building razed this week was built in 1914 with the late S. E. Brown and T. J. Coffey taking the lead in building and together seating the building. Two class rooms and the baptistry were added later.

Dr. Max Leach, head of the psychology department of Abilene Christian College, is present minister for the congregation and was on hand Monday morning early with the crew when the razing job was started.

## Keep Off The Gas Says Safety Official

"Keep off the gas!"

This is not a typographical error, but a life-line of advice from J. O. Musick, general manager of the Texas Safety Association, whose organization is sponsoring the current Slow Down and Live program being conducted throughout the state.

"Summertime—like any other season of the year—means safety time, but a lot of Texans forget this," Musick said. "They let the warm days and balmy nights detract from their driving responsibility as they hurry from one cool spot to another."

"They step on the gas and rush to vacation spots, picnic areas or a day at the water's edge—forgetting to ask themselves: 'How much time do I really gain by speeding, if I get there.'"

Musick pointed out that traffic engineering and enforcement are important in public speed control, but that the final answer lies with the individual driver.

"Every driver on our streets and highways must initiate his own personal campaign to obey all the traffic signs and signals and to regulate his speed so that it is neither too fast or slow," Musick said.

The TSA general manager said the purpose of the Slow Down and Live campaign is to simply draw the public's attention to the fact that speed is dangerous anytime, but especially now, during peak vacation months, through Labor Day.

### Light Rain Fell Here Monday Morning

While some sections of Texas received heavy rains this week, up to 20 inches in Bandera County, the Loraine section only received 25 of an inch.

Though most of the week has been cloudy and threatening no rain has fallen except in the early hours of Monday morning when the quarter inch fell.

Late Monday afternoon a cloud formed in the north and came within a few miles of town preceded by a dust storm, but the clouds parted before it reached here, one section going to the west of us and the other to the east. We got a little of the dust but no rain.

## Johnson Hospital Adds New Room Now Has 22 Beds For Patients

A new room was recently added to the Johnson Hospital and the entire building received a new coat of paint inside. The new wing was painted outside, a new laboratory set-up, bath rooms were finished, all of which adds to the appearance and comfort of the building.

Dr. Bruce Johnson opened a small hospital here in 1938. Soon an addition had to be built to care for the increasing number of patients. A few years later the need for more room was so great a new wing was built and other changes made. The recent addition is a wing west of the main building connecting to the east wing on the north and is in use as the kitchen. The old kitchen is now used as a utility room.

The 22 bedrooms, long hall, in fact the complete interior, has received a new coat of pastel paint which gives the building a more spacious and cooler appearance. The building is completely air conditioned.

The hospital is modern in every respect, has a modern operating room, X-ray machines and other modern equipment adequate to care for any normal illness.

The hospital is owned and operated by Dr. Bruce Johnson and Dr. Joe Terry. They have a corps of nurses, a bookkeeper, receptionist, two laboratory technicians, housekeeper and cooks.

Not every town this size can boast of a hospital of this size and people here are justly proud of the hospital and its growth to be able to care for the needs of the people of this community in their illnesses.

one I've deposited with you?"

Just as soon as our bank collects the amount of the deposited check from the bank on which it is drawn. The time varies with the distance of the other bank. When you deposit a check on another bank, ask our teller how long it will take to collect it. That way, you can avoid the embarrassment of drawing a check against uncollected funds and having it returned unpaid. Fully and properly used, your checking account is an invaluable aid to personal money management; to real efficiency, economy. Make the most of it!

### Questions and Answers

Q. I'm a World War 2 veteran with a GI insurance policy. I also draw disability compensation of \$65 a month. Instead of sending in my insurance premium every month can I just have VA deduct it from my compensation?

A. Yes. So long as disability compensation checks are large enough to cover premiums, you may apply to VA to have premiums taken out of monthly compensation checks.

Q. I have been taking a general science course under the GI Bill, with science teaching as my objective. This summer I'm going to work in an electronics equipment plant and have been told I can qualify for a teaching position in their training division later on, if I take more math and nuclear physics in my classes next year and the year after. Would that be considered a change of course by VA?

A. No. As long as your final

goal remains the same, a change in subjects would not be considered a change of course.

Q. I am the widow of a World War 2 veteran who never used his GI loan privilege. I have never remarried. Recently I noticed that the deadline for loan applications by World War 2 veterans had been extended to July 25, 1960. Does that mean that my right to apply for a loan was also extended?

A. Yes. Eligible unmarried widows of World War 2 veterans have until July 25, 1960, to apply. Q. I will have to take a physical examination to reinstate my lapsed GI insurance policy. Who is supposed to mail my medical application for reinstatement to the VA, me or my physician?

A. Your examining physician should mail it to the VA as soon as your examination is completed.

## Three Mitchell County Farmers Sign Great Plains Conservation Program

Pruitt (Tex) Keel, J. M. Sterling, John D. Beal, Irvin Grant and M. L. Campbell have signed a Great Plains Conservation Program contract on their farms and ranches for a total cost-share of \$35,154.12. Their contracts run for a period of 5 to 8 years, A. V. Sheppard, WUC, Soil Conservation Service, has announced.

These landowners entered into a contract with the Soil Conservation Service following the development of plans of operation that included a plan to use the land within its capability and treat the land for permanent protection. The plans of operation were developed by the landowners with the assistance of the personnel of the Soil Conservation Service. The planned land use and treatment was based on a recently made soil and or range survey. These surveys give the landowner the depth, texture and slope of the land, how fast it will take up water and the extent of the erosion problem. From this information, cropping systems were evolved which are designed to maintain fertility and protect the soil from the forces of wind and water, Sheppard pointed out.

Tex. Keel has been working hard in carrying out the permanent type conservation practices for 1958, and has been doing a fine job. Mr. Keel has rootplowed approximately 90 acres of mesquite covered rangeland and has seeded it to a mixture of native and introduced grasses. The A. S. C. office assisted him with cost share on 50 acres, while the balance was done under the Great Plains Conservation Program. Because of the scarcity of native grass seed, Mr. Keel has planted 30 acres of Sideots grama and 35 acres of Indian grass for a future seed source and cash crop.

Other practices Mr. Keel has carried out include overseeding 159 acres of rootplowed land to a mixture of grasses on which he failed to get a stand last year, reworking 11 miles of old terraces to bring them up to district specifications, constructing 4.5 miles of new terraces under the A. S. C. program, and constructing 7 miles of new terraces under the GPCP. He is also carrying on a weed poisoning program on the land seeded to grass and is spraying mesquite, using the basal oil method. He is also developing a 2 acre orchard in which he has planted pecan trees, blackberries, strawberries, and grapes and is raising quail with which to stock his farm.

In addition to all this, Mr. Keel has 267 acres in the Conservation Reserve which he has planted to sorghum, alnum and blue banicum. Approximately 136 acres of this Soil Bank land was planted to blue panicum grass in the spring of 1956 and is a nice habitat for wildlife.

Any farmer or rancher interested in a permanent type conservation program on their land should contact the Soil Conservation Service office and get information in regards to the Great Plains Conservation Program. It may be just what you have been looking for, Sheppard explained.

Alvin Jarratt of Fort Davis spent Sunday night with Mr. and Mrs. W. J. West and his sons Keith and Jay Lynn returned home with him after spending a week with their grandparents and with their aunt and family, Mr. and Mrs. Leon Duke in Rotan.

### 4-H's Study Bugs

One project that every 4-H boy and girl can undertake concerns insects. It is 4-H Entomology, and provides unlimited opportunities to learn more about control of bugs and pests which annually cause millions of dollars worth of damage in the state.

### Awards Offered

One of the best features is that little or no investment is required to get started in the project. In fact, it pays handsome dividends to 4-H'ers who do an exceptionally good job. The Hercules Powder Co. offers awards like the medal pictured above, an all-expense trip to the National 4-H Club Congress in Chicago, and \$400 college scholarships for six national champions.

### Has Varied Application

The entomology project is one that can be successfully completed by city 4-H'ers as well as those living in rural areas. There are several categories, namely: insect collections; life history studies; insect surveys and control; demonstrations and exhibits.

Already a favorite of many boys and girls, the project frequently leads to an interesting hobby. The Cooperative Extension Service conducts the 4-H Entomology program, and information regarding enrollment can be obtained from the County Extension Agent.
