MRS. R.A. FUTRELL

Cook of the Week

A small "cook witch" hangs above the stove in the kitchen of Mrs. R.A. Futrell. A gift of her grandson's wife, the little hex doll is supposed to prevent burns or boilovers. Carrie smilingly disclaims her powers, however.

Carrie has been cooking meals to please her husband 55 years now and has never had to resort to such superstitions. She and Roy were married Dec. 30, 1923 in the home of her parents in Burnet County. They lived in Williamson County until 1945 when they moved to Olton. Two years later they came to Hart.

The Futrells are parents of two sons, Ralph of Hereford and Weston of Dumas and a daughter, Carol (Mrs. Doug) Carruth of Riverton, Wy. They have seven grandchildren and four great-grandchildren.

A few years ago, Carrie and Roy fixed up a place in their back yard to raise white leghorn chickens. They still have a dozen hens that faithfully provide them with all the eggs they need.

"Just before Christmas they almost stopped laying and I bought a dozen eggs," says Carrie. "They started back to laying and are still at it despite all this cold weather we've been having."

The Futrells enjoy playing dominoes and "42" with friends and belong to the XYZ Club to share that hobby with others. They also like working on jigsaw puzzles.

Carrie is an avid reader. She admits she hasn't time to get interested in handcraft pleasures because she'd be reading. She keeps Roy company on their fishing trips although her enthusiasm is not as great as his.

The Futrells are members of First Baptist Church. Carrie teaches the ladies Sunday School class. She is also a member of Good Neighbors Club.

Carrie shares a recipe for cream pecan pie which she clipped from a farm magazine. The carrot cake recipe is a family favorite which she got several years ago from a friend who is a former resident.

CREAM PECAN PIE
2½ c sugar
⅔ c water
¼ c butter
5 eggs, separated
2 to 3 T flour
1 c half and half
1 t vanilla
1½ c pecans, chopped
¼ t salt
2 8 oz baked pie shells

Combine 2 cups sugar with the water and butter in saucepan. Cook over medium heat until mixture comes to a boil. Remove from heat and partially cool.

Beat egg yolks; stir in flour and half and half. Gradually add yolk mixture to cooked mixture. Cook over medium heat, stirring constantly until thick. Remove from heat. Add vanilla and pecans. Spoon mixture into baked pie shells. Beat egg whites and salt until foamy; gradually add ½ c sugar and beat until mixture is stiff. Spread meringue over pies and bake in 350 degree oven 10 to 15 mins. or until lightly browned. Yields 2 pies.

CARROT CAKE
1½ c Wesson Oil
2 c sugar
3 c flour
2 t soda
½ t salt
1 t cinnamon

Mrs. L.C. McLain Leads Senior Citizens' Laughter

"Let's laugh - the world has tears enough already" was the theme chosen by Mrs. L.C. McLain when she spoke Tuesday to Senior Citizens in a luncheon meeting at First Baptist Church.

Sharing bits of wit and wisdom, Mrs. McLain picked on a few members of her audience for whimsical antidotes.

"The world needs more laughter," she said. "We've all wept many tears and we've laughed a lot but we need to laugh more. The Bible tells us, 'A merry heart doeth good like medicine.' I hope the medicine I share is not a tranquilizer but a purgative for it is with laughter that we can purge our hearts of bitterness, anger, sadness and sorrow and find hope."

Commenting on the title of recent book, "The Devil Wants Me Fat," Mrs. McLain said, "Obesity is the only condition where our Lord doesn't help us when we help ourselves . . and help ourselves and help ourselves."

"Middle age," she explained, is that time when our knees buckle but our belts won't."

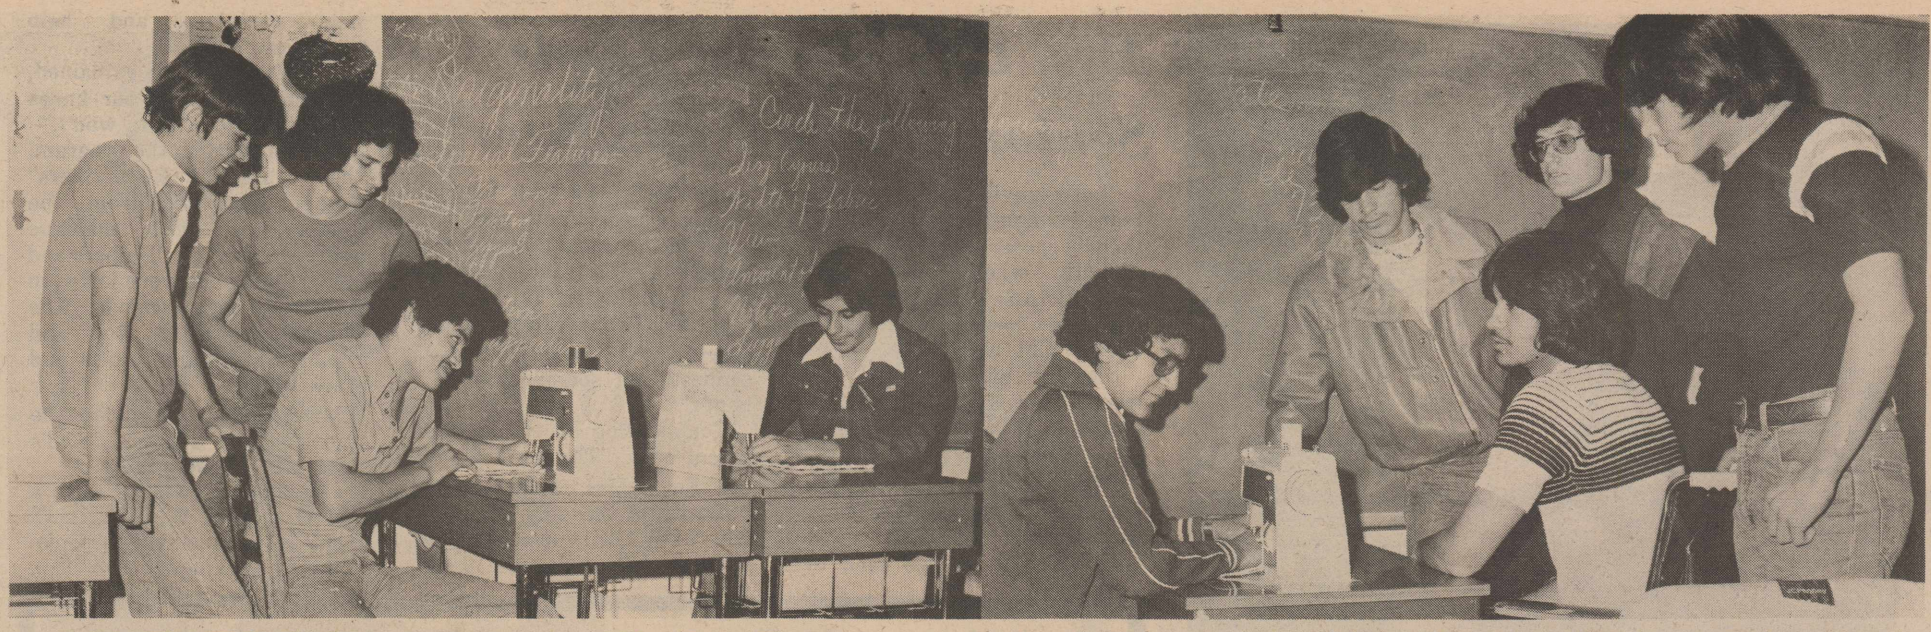

Participating in the program, the "Hart Puppetteers" brought laughter from the dinner crowd with "dialogue and exercises" by "Delbert and Butch" and were were joined in singing by doggy friends. The puppetteers were Roy and Nancy Shave and Linda and Amy McLain.

Mrs. McLain concluded the program with a poem, "God's Bank Ain't Busted Yet."

Other special guests were a former pastor, the Rev. G.C. Applewhite and Mrs. Applewhite of Lockney.

Performance proves...

The top 8 corn hybrids on the Irrigated Plains are all from Pioneer.

That's a pretty bold claim, we admit. But in farmer's fields, county agent test plots, wherever they're grown, these Pioneer® brand corn hybrids consistently out-perform competitive hybrids year after year. Each hybrid has its own particular strong points that make it especially well suited for certain environmental and management conditions. When thoughtfully selected and properly managed to meet the conditions, each of these hybrids delivers top performance . . . winning performance that's head and shoulders above the competition.

Don't take our word for it. Ask your Pioneer dealer about yield data in your area for the last several years and see for yourself. The consistent performers . . . the top 8 performers are all from Pioneer!

Short Supply **3195** — High-yielding, full-season powerhouse! 3195 gets off to a good start with high seedling vigor, then makes the most of High Plains growing conditions. High test weight grain is hard textured and dries down fast. Ideal for grain or silage.

NEW **3183** — Contest winning yield potential with excellent disease tolerance makes 3183 an ideal companion for 3184. It also has excellent seedling vigor plus good standability and stay-green qualities.

3305 — A silage grower's dream come true (even if your plans change mid-season)! Tall with good standability and a high grain-to-stover ratio. Adapts well to the high plant populations required for top silage yields. And if your plans change, excellent grain yields make it a profitable grain crop, too.

Short Supply **3184** — Steady corn maker, popular for excellent yields and consistent performance. Strong stalks, good roots provide outstanding standability.

3780 — The corn you can manage almost like sorghum. Total fertilizer, water and insecticide requirements similar to sorghum. Maximum water use period makes it an ideal companion crop to cotton. Yield average of more than 7,800 lbs./A in four years of High Plains production at 96 locations.

NEW **3311** — A new hybrid you can trust like an old friend! It delivers top yields and is an outstanding companion for 3195. It silks earlier than 3195 and performs better under stress.

3541 — Very early silking, a long kernel fill period, and fast drydown help 3541 produce extremely high yields for its maturity. Give 3541 the management it needs, and it could easily be your top income producer. Excellent standability, ear retention and head smut tolerance.

3360 — Plant this one for your banker! It has the consistency to be the high-yielding workhorse hybrid you can rely on. Outstanding early season vigor. Excellent for silage on the Irrigated Plains.

Ask your Pioneer dealer about them NOW.

TXS115A.

Great yield makes this hybrid really shine. It was No. 1 in 14 yield trials in 1978 This consistent performer has good seedling vigor—a real "popper." Strong, sturdy stalks. Excellent drought and disease tolerance.

Fast dry down and heavy test weight. Excellent combine and picker corn, too.

Lockett 77

Cotton like you've never seen!

This great new variety was introduced for wide-area planting only one year ago. And already it's becoming one of the most popular cotton varieties in the Southwest! Farmers who've seen it are excited about its performance. Here's what they liked about Lockett 77:

* **"Disease was not a problem." Multiple disease tolerance includes protection against the fusarium wilt-nematode complex.**
* **"It came out of the ground real fast." Excellent seedling disease escape and cold tolerance provide good early-season vigor.**
* **"It fit my conditions exactly." Early maturity makes Lockett 77 a good choice for short season production.**
* **"The lint tested out real well." Fiber qualities are outstanding with good strength and uniformity ratings.**
* **"Lockett 77 was a beauty in the field." Foliage is sparse on short- to intermediate-size plants. Short, close-fruiting branches make Lockett 77 ideal for stripper harvest.**
* **"The field looked white with my narrow-row planting." An excellent stripper cotton.**

If you weren't among the farmers who planted Lockett 77 last year, talk to your ginner. If he doesn't have a supply on hand, he can get it for you. You're going to be really excited about the first field of Lockett 77 you see. It might as well be yours.

Corn, Milo, and Cotton makes

makes the most of nitrogen fertilizer . . . with

N-SERVE nitrogen stabilizers.

Get the most from the nitrogen you apply. Add N-SERVE* nitrogen stabilizers to your nitrogen fertilizer. N-SERVE cuts nitrogen loss by slowing the nitrification of the N in the soil. This helps the nitrogen you apply become available to the crop at a slower, more manageable rate. That means more efficient effective use of the nitrogen you apply. Come see us for more information about N-SERVE nitrogen stabilizers. Just look for the sign with the N-SERVE policeman.
