

On The BEAM

J. W. KING, SR.

I hope that following the program at the Lions Club building Saturday night enough people became interested in the growing of potatoes in this area to get a pilot program under way this year.

Until we try something like this we will not know whether we like it or whether it might be profitable or not. Such a program, if it proved a complete failure, could not hurt any individual very much. If it proved successful, each individual in the program might pocket a little profit. But it would give them an opportunity to learn how to grow and market potatoes, and it might prove to be what we are looking for to supplement the income of the community that is so badly needed because of the ravages of the boll weevil.

On Saturday, May 4, the Democratic primary will be held. At that time we will have an opportunity to select from a sizeable bunch of candidates a governor of Texas and all other state offices to be filled, as well as some county and precinct offices. In addition to this chore we can vote whether or not we want to buy liquor by the drink in Texas rather than by the bottle. And also whether or not we want gambling legalized on horse racing in Texas.

Another very important chore for each voter on election day is the attendance of the precinct convention. This is very important and every Democrat should attend. The meeting will be held at the City Hall in Lorraine, according to precinct chairman Ray Preston, at 1:00 p. b. May 4. Delegates will be elected to the county convention and other business transacted.

Church Services At Same Hour

The Baptist pastor reminds us to remember Sunday School and church service will be at the same hour — by the clock Sunday, April 28, though that will be an hour earlier — that is if you run your clock up an hour on retiring Saturday night, got up at 2 a.m. and run it up, or got up at your usual hour say 8 a.m. for Sunday morning then had to run it up — My, almost Sunday School time.

The new time will keep us confused a few days, we won't like it in the mornings, but just think about that extra hour in the afternoon to play golf on week days, no end of advantages in the afternoon, but those yawning mornings.

POTATO GROWING MAY BECOME REALITY HERE

Growing of Irish potatoes for the market may become a reality in the Lorraine area in the near future. Mr. J. A. Hodges of Hereford, who spoke and showed films to a group of 40 people at the Lions Club building Saturday night, strongly urged that a pilot program be started this year.

A Pilot Program would allow several farmers to band together and share the expense in planting and growing a plot of ten acres of potatoes. By doing this, it could be determined whether or not potato growing might be desirable and profitable here. No action was taken at the meeting on a pilot program, but it is thought that perhaps such a program will be started.

Films showing the growing of lettuce and carrots as well as mlo in the Hereford area were also shown. Also shown were films of the vast cattle feeding industry that is developing in the Hereford area.

Library Week April 21-27

Gov. John Connally has designated the week of April 21-27, 1968, as National Library Week in Texas.

Theme for the National Library Week program is "Be All You Can Be - Read." The library offers a place for the opportunity to learn and to know, to keep informed. The library stands like an open door to all citizens. The more information the library contains, the wider the door is opened, and the greater opportunity it offers for widened horizons and heightened skills and abilities. These are the advantages the library offers, but you are not benefited except you take advantage of the many books contained in the libraries.

Lorraine is fortunate to have a library, which is operated by the First Baptist Church, but open to everyone who wishes to check out books and read them.

Mrs. J. W. King and Mrs. L. E. Crutcher are librarians.

A new book for adults is "The Cross in the Market Place" given in memory of Mrs. Myrtle Martin by Mr. and Mrs. Royce Mahon.

Three new books for children, "Kittens and Puppies," "Baby Farm Animals" and "Animal Panoramia" are very good and filled with colorful pictures that will interest the very small child.

The public is invited to visit the library, and check out books of your choosing

Post Office Has Pamphlet Showing How To Curb Pandering Adv.

Mail patrons offended by pandering advertisements can now take steps to curb such mail. Postmaster Jack Coffee said today in announcing plans for administering a new law which gives each family the right to decide that an ad is "emotionally arousing or sexually provocative."

When an advertisement sent through the mails is offensive on these grounds, a postal patron can now ask the post office to direct the mailer to send no mail to him and to remove immediately the patron's name from all mailing lists he owns, controls or rents.

To assist patrons, the Post Office Department has published a brief pamphlet - How You Can Curb Pandering Advertisements - which is now available at the Lorraine Post Office. In addition to explaining how the law works the pocket-size leaflet contains a form letter one can use when sending his complaint to the post office.

The pamphlet explains that when a patron receives an advertisement which is, in his opinion, pandering, he must send the ad, its envelope and the form letter, or one which includes its language, to his post office with the words, "Request for prohibitory order," on the face of the envelope.

The Postmaster stated: "This new law should give some protection to American families offended by advertisements they believe to be morally harmful, particularly to their children."

"Last year the Post Office Department received some 140,000 complaints from those offended by pandering advertisements. While in most cases the ads were not legally obscene and were therefore mailable, they are often offensive and are usually not the type of material one would want his children to read."

He added that "because the law gives a mail patron the sole right to decide what is offensive, and does not deny others the right to receive the same mail, the Congress felt it does not violate Constitutional guarantees of freedom of speech."

While the patron's complaint will only be directed to the sender, the Postmaster believes that one or two complaints will provide substantial protection because "the great bulk of this advertising comes from fewer than 20 co-called 'smut-dealers' who are frequently swapping mailing lists."

If a mailer does not strike a complainant's name from this mailing list, and the patron receives a second mailing 30 days after the firm has received the

prohibitory order, he may bring the matter to the attention of the postmaster issuing the initial order by writing him and enclosing the second pandering ad with its envelope. If the mailer still fails to respect the order, the Postmaster General may ask the Attorney General to apply for a Federal Court order directing compliance. Failure to observe the order may be punishable by a fine or imprisonment.

Mrs. Glen Coon Host Study Club

Mrs. Glen Coon hosted the Loraine Athenium Study Club in her home on April 16th.

Mrs. Doyle Hester led Salutes to the U. S. and Texas flags, and introduced the program on "Our Neighbors To The South."

Mrs. K. L. Taylor told of Mexican Culture, their literature, music, arts, religion, fiestas and education. Native Indian cultures has influenced each of these to some extent, said Mrs. Taylor. Literature is the most highly honored form of culture in Latin America. Some writers have gained worldwide recognition. Their music often contains simple melodies and rhythm of the native Indians. Education for the masses has been lacking. Only in 1922 did they begin a public school system, with night school for adults. These are progressing rapidly. Higher education is represented by several universities, concluded Mrs. Taylor.

Mrs. Jim Johnson presented the subject of Mexicans of Mexico. She gave brief sketches from a library book by Victor Alba, on Mexicans - The Making of a Nation. This story opened with the coming of the Spaniards who, in 1821, conquered the country and ruled it for three centuries. They found it inhabited by many isolated groups of Indian tribes each with its own way of life and language. There are still remnants of ancient civilizations to be found in museums and pyramids, which prove that they were there long before the white man set foot on American soil.

The name Mexico came from an Aztec god, Maxitilla. He has been proven by archeology that some tribes built great cities, the ruins of which are the wonder of the modern world.

Mrs. Johnson concluded by saying "For those who can't travel abroad, arm chair travel is always rewarding."

Mrs. Hester gave a brief sketch of The Big Thicket, a section of Texas that lies in the heart of the area where Texas won her independence from Mexico in 1836. This is a region of swamp-forest-jungle land of over-powering beauty - a veritable botanical wonderland. Steps are now being taken to preserve portions of it in its virgin state for public recreation centers and botanical research.

Underground moisture is the best we have seen it here in quite a few years. If planting of crops is not delayed too long there should be ample moisture to bring them up. There will probably be more early planting of cotton this year because I think we have learned the past few years that boll weevils will not let late planted cotton make enough.

NEW! For clean Sorghum... spray weeds when you see them! with BANVEL

Velsicol announces Banvel herbicide for control of all hard-to-kill weeds of major importance in grain sorghum. This includes carelessness (pigweed), sunflower, lambs-quarter, purslane, morning glory and other annual broadleaf weeds. Banvel herbicide is applied post-emergence, so there are no wasted sprays in years when rain is scarce and weeds are not a problem. With Banvel you see your weed problem and then spray—all in plenty of time to give young sorghum plants plenty of opportunity to grow.

Banvel is sprayed onto weed leaves and translocates to the roots...for new, total control of weeds. Just apply Banvel between the 10th and 25th day after emergence of grain sorghum (approximately 4 to 12 inches tall).

Banvel is not dependent on soil moisture for its effectiveness, so its results are dependable. And it's a liquid that won't clog your sprayers; nor does Banvel need constant agitation.

Banvel increases yields. It's excellent for use on grain sorghum, wheat, barley, oats and field corn. Order Banvel herbicide to get full potential from your valuable, high-yielding sorghumseed.

See your dealer today. You'll be glad you did!

J. W. KING, SR.

I hope that following the program at the Lions Club building Saturday night enough people became interested in the growing of potatoes in this area to get a pilot program under way this year.

Until we try something like this we will not know whether we like it or whether it might be profitable or not. Such a program, if it proved a complete failure, could not hurt any individual very much. If it proved successful, each individual in the program might pocket a little profit. But it would give them an opportunity to learn how to grow and market potatoes, and it might prove to be what we are looking for to supplement the income of the community that is so badly needed because of the ravages of the boll weevil.

On Saturday, May 4, the Democratic primary will be held. At that time we will have an opportunity to select from a sizeable bunch of candidates a governor of Texas and all other state offices to be filled, as well as some county and precinct offices. In addition to this chore we can vote whether or not we want to buy liquor by the drink in Texas rather than by the bottle. And also whether or not we want gambling legalized on horse racing in Texas.

Another very important chore for each voter on election day is the attendance of the precinct convention. This is very important and every Democrat should attend. The meeting will be held at the City Hall in Loraine, according to precinct chairman Ray Preston, at 1:00 p. b. May 4. Delegates will be elected to the county convention and other business transacted.

Church Services At Same Hour

The Baptist pastor reminds us to remember Sunday School and church service will be at the same hour — by the clock Sunday, April 28, though that will be an hour earlier — that is if you run your clock up an hour on retiring Saturday night, got up at 2 a.m. and run it up, or got up at your usual hour say 8 a.m. for Sunday morning then had to run it up — My, almost Sunday School time.

The new time will keep us confused a few days, we won't like it in the mornings, but just think about that extra hour in the afternoon to play golf on week days, no end of advantages in the afternoon, but those yawning mornings.

Post Office Has Pamphlet Showing How To Curb Pandering Adv.

Mail patrons offended by pandering advertisements can now take steps to curb such mail, Postmaster Jack Coffee said today in announcing plans for administering a new law which gives each family the right to decide that an ad is "offensively arousing or sexually provocative."

When an advertisement sent through the mails is offensive on these grounds, a postal patron can now ask the post office to direct the mailer to send no mail to him and to remove immediately the patron's name from all mailing lists he owns, controls or rents.

To assist patrons, the Post Office Department has published a brief pamphlet - How You Can Curb Pandering Advertisements - which is now available at the Loraine Post Office. In addition to explaining how the law works the pocket-size leaflet contains a form letter one can use when sending his complaint to the post office.

The pamphlet explains that when a patron receives an advertisement which is, in his opinion, pandering, he must send the ad, its envelope and the form letter, or one which includes its language, to his post office with the words, "Request for prohibitory order," on the face of the envelope.

The Postmaster stated: "This new law should give some protection to American families of-fended by advertisements they believe to be morally harmful, particularly to their children."

"Last year the Post Office Department received some 140,000 complaints from those offended by pandering advertisements. While in most cases the ads were not legally obscene and were therefore mailable, they are often offensive and are usually not the type of material one would want his children to read."

He added that "because the law gives a mail patron the sole right to decide what is off-ensive, and does not deny others the right to receive the same mail, the Congress felt it does not violate Constitutional guarantees of freedom of speech."

While the patron's complaint will only be directed to the sender, the Postmaster believes that one or two complaints will provide substantial protection because "the great bulk of this advertising comes from fewer than 20 co-called 'smut-dealers' who are frequently swapping mailing lists."

If a mailer does not strike a complainant's name from this mailing list, and the patron receives a second mailing 30 days after the firm has received the

POTATO GROWING MAY BECOME REALITY HERE

Growing of Irish potatoes for the market may become a reality in the Loraine area in the near future. Mr. J. A. Hodges of Hereford, who spoke and showed films to a group of 40 people at the Lions Club building Saturday night, strongly urged that a pilot program be started this year.

A Pilot Program would allow several farmers to band together and share the expense in planting and growing a plot of ten acres of potatoes. By doing this, it could be determined whether or not potato growing might be desirable and profitable here. No action was taken at the meeting on a pilot pro-

gram, but it is thought that perhaps such a program will be started.

Films showing the growing of lettuce and carrots as well as mato in the Hereford area were also shown. Also shown were films of the vast cattle feeding industry that is developing in the Hereford area.

Library Week April 21-27

Gov. John Connally has designated the week of April 21-27, 1968, as National Library Week in Texas.

Theme for the National Library Week program is "Be All You Can Be - Read." The library offers a place for the opportunity to learn and to know, to keep informed. The library stands like an open door to all citizens. The more information the library contains, the wider the door is opened, and the greater opportunity it offers for widened horizons and heightened skills and abilities. These are the advantages the library offers, but you are not benefited except you take advantage of the many books contained in the libraries.

Loraine is fortunate to have a library, which is operated by the First Baptist Church, but open to everyone who wishes to check out books and read them. Mrs. J. W. King and Mrs. L. E. Crutcher are librarians.

A new book for adults is "The Cross in the Market Place" given in memory of Mrs. Myrtle Martin by Mr. and Mrs. Royce Mahon.

Three new books for children, "Kittens and Puppies," "Baby Farm Animals" and "Animal Panorama" are very good and filled with colorful pictures that will interest the very small child.

The public is invited to visit the library, and check out books of your choosing

Mrs. K. L. Taylor told of Mexican Culture, their literature, music, arts, religion, fiestas and education. Native Indian cultures has influenced each of these to some extent, said Mrs. Taylor. Literature is the most highly honored form of culture in Latin America. Some writers have gained worldwide recognition. Their music often contains simple melodies and rhythm of the native Indians. Education for the masses has been lacking. Only in 1922 did they begin a public school system, with night school for adults. These are progressing rapidly. Higher education is represented by several universities, concluded Mrs. Taylor.

Mrs. Jim Johnson presented the subject of Mexicans of Mexico. She gave brief sketches from a library book by Victor Alba, on Mexicans - The Making of a Nation. This story opened with the coming of the Spaniards who, in 1821, conquered the country and ruled it for three centuries. They found it inhabited by many isolated groups of Indian tribes each with its own way of life and language. There are still remnants of ancient civilizations to be found in museums and pyramids, which prove that they were there long before the white man set foot on American soil.

The name Mexico came from an Aztec god, Mexitilia. He has been proven by archeology that some tribes built great cities, the ruins of which are the wonder of the modern world. Mrs. Johnson concluded by saying "For those who can't travel abroad, arm chair travel is always rewarding."

Mrs. Hester gave a brief sketch of The Big Thicket, a section of Texas that lies in the heart of the area where Texas won her independence from Mexico in 1836. This is a region of swamp-forest-jungle land of over-powering beauty - a veritable botanical wonderland. Steps are now being taken to preserve portions of it in its virgin state for public recreation centers and botanical research.

Mrs. T. L. Finley announced that the week of April 22 to 28 is Public Library Week. She urged all members to visit the library this week. Mrs. Pratt will be hostess Tuesday morning.

Underground moisture is the best we have seen it here in quite a few years. If planting of crops is not delayed too long there should be ample moisture to bring them up. There will probably be more early planting of cotton this year because I think we have learned the past few years that boll weevils will not let late planted cotton make enough.

**NEW! For clean Sorghum...
spray weeds when you see them!
with BANVEL**

HERBICIDE

Velsicol announces Banvel herbicide for control of all hard-to-kill weeds of major importance in grain sorghum. This includes carelessweed (pigweed), sunflower, lambs-quarter, purslane, morning glory and other annual broadleaf weeds. Banvel herbicide is applied post-emergence, so there are no wasted sprays in years when rain is scarce and weeds are not a problem. With Banvel you see your weed problem and then spray—all in plenty of time to give young sorghum plants plenty of opportunity to grow.

Banvel is sprayed onto weed leaves and translocates to the roots...for new, total control of weeds. Just apply Banvel between the 10th and 25th day after emergence of grain sorghum (approximately 4 to 12 inches tall).

Banvel is not dependent on soil moisture for its effectiveness, so its results are dependable. And it's a liquid that won't clog your sprayers; nor does Banvel need constant agitation.

Banvel increases yields. It's excellent for use on grain sorghum, wheat, barley, oats and field corn. Order Banvel herbicide to get full potential from your valuable, high-yielding sorghum seed.

See your dealer today. You'll be glad you did!
