Let's Go To School

It's time for America to proclaim its greatness, not murmur about its shortcomings. And, perhaps Texas will lead the way. The route is through education. In order to put this country, this state back onto the right track, it's time to begin teaching fundamentals again.
For the last 116 years, Texas Public Schools have tried to uphold these principles and characteristics. But, they need your support. They need your encouragement. It starts with a visit to a public school near you March 2nd through 6th. Let your child see that you care-about him and his school. Let him see what you consider to be the really

important values for your life and his. Let us be responsible for providing the kind of education that will let our children know that they are responsible for the kinds of futures they and their families will enjoy.
The time for silence is over. Too long we have listened to the radicals and those who advocate change-overs to non-responsibility. Speak out--and begin by visiting a public school in your community March 2nd through 6th.
Keep the future in the minds and hearts of our children. Help support public schools so they can support you.

Dear Editor

Danger-March 7

Mrs. Sue Cannon, Editor
Olton Enterprise
Olton, Texas.

Dear Mrs. Cannon:

With the solar eclipse due March 7, 1970, there will be scores of people across the nation who will be either partially or totally blinded trying to see this rare phenomenon. You might wish to warn your readers of some of the hazards since many people still believe that they can view an eclipse comfortably and safely with various home-made devices all the way from a smoked glass to dark photographic film sheets. This simply is a mistaken idea. The only safe way is to wait and view it on television after professionals have made pictures of the event.

The real danger comes from the invisible infra-red rays which can cause damaging burns to the eye's light-sensitive retina in a manner similar to the way a magnifying glass will focus the sun's rays on a piece of paper and burn a hole in it. The retina, not being sensitive to pain, would hardly feel a retinal burn at the time. However, all vision specialists realize retinal burns are incurable and produce a blind spot. Should the burn be in the vital macula area (point of most central vision) the patient would most likely lose all usable central vision in that eye permanently.
Other complications of solar damage seen

by eye specialists following the last partial eclipse of the sun on May 20, 1966, include bilateral central scotomata, macular hole, severe macular edema, persistent paracentral scotomata, bilateral macular lesions, macular burn, obstruction of central retina vessels, retinal hemorrhages, etc.
I hope it is possible for the people of our area to get by without a single incident of damage. This is only possible if they fully understand the dangers. The only recommended way to view an eclipse is indirectly. This can be done by taking two pieces of white cardboard and make a pinhole in one, then with the sun at your back focus the eclipse image through the pinhole board onto the second cardboard. Better yet, wait and see it on TV!

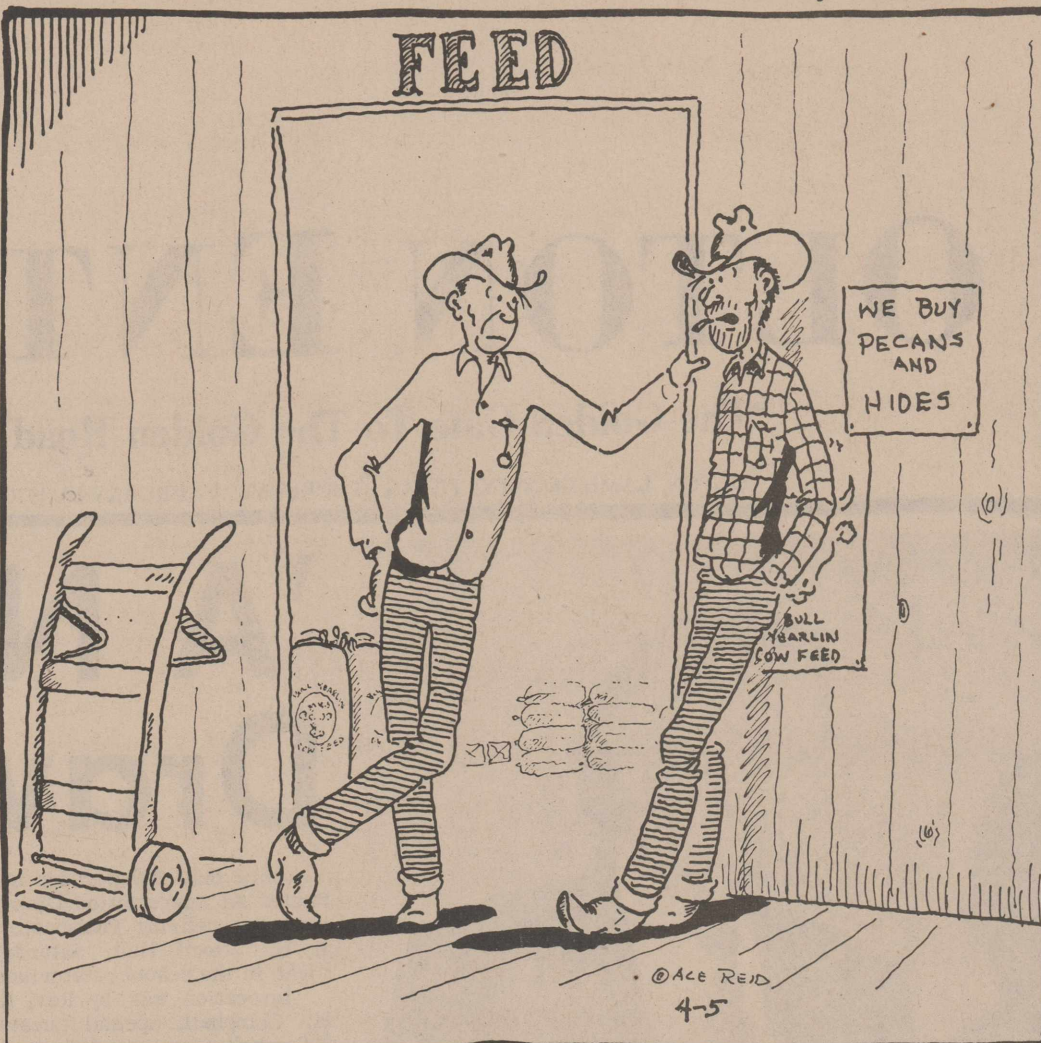

Sincerely yours,
B. W. Armistead, O. D.

It Starts With Us

Dear Editor,
Thank you for your article on SFN. (Something for nothing). It made me stop and think about myself as a parent.
Too many times we expect something for

COW POKES

By Ace Reid

nothing out of our children. Many times laziness gets the best of us. For being a good parent is hard work. We become inconsistent and we lose the upper hand.
It takes time to see that a youngster is staying where you told him to, to see that he is doing a job you gave him, and doing it right. But if we want good kids we've got to do it! We expect improvement of our children. Do we expect it of ourselves?
If we are to train our children effectively, we must first apply the discipline to our own lives.

Thank you
Jo Light

Thanks

Dear Editor:
Since the "Ditty Bag" program was completed in the fall, we have wanted to say "thank you" to the press and the Citizens of Lamb County for their past support in the project. So, in the mail today came the letter which is attached- and it says more than any words that we could mention.

New Camaro. Feb. 26th.

We've never announced a car at this time before.
But then nobody's ever announced a car like this before.

Super Hugger

If it were an ordinary sportster, we'd have introduced it at the ordinary time.
Instead, we took the time to build a whole new Camaro.

We started with a sleek new shape and a low road-hugging stance.

And added more hood. A faster fastback. Wider doors. And new deeply contoured bucket seats.

The instrument panel wraps around you. With enough dials to make you think you're piloting a 747.

There are four transmissions. And six power plants up to the Turbo-Jet 396 V8 that you can order.

Pick the one that best suits your driving. Then go pick on an open road.

And make it one with plenty of twisting turns. Because Camaro has a remarkable new suspension. And standard front disc brakes for a leech-like grip on the road.

New Camaro. The Super Hugger.

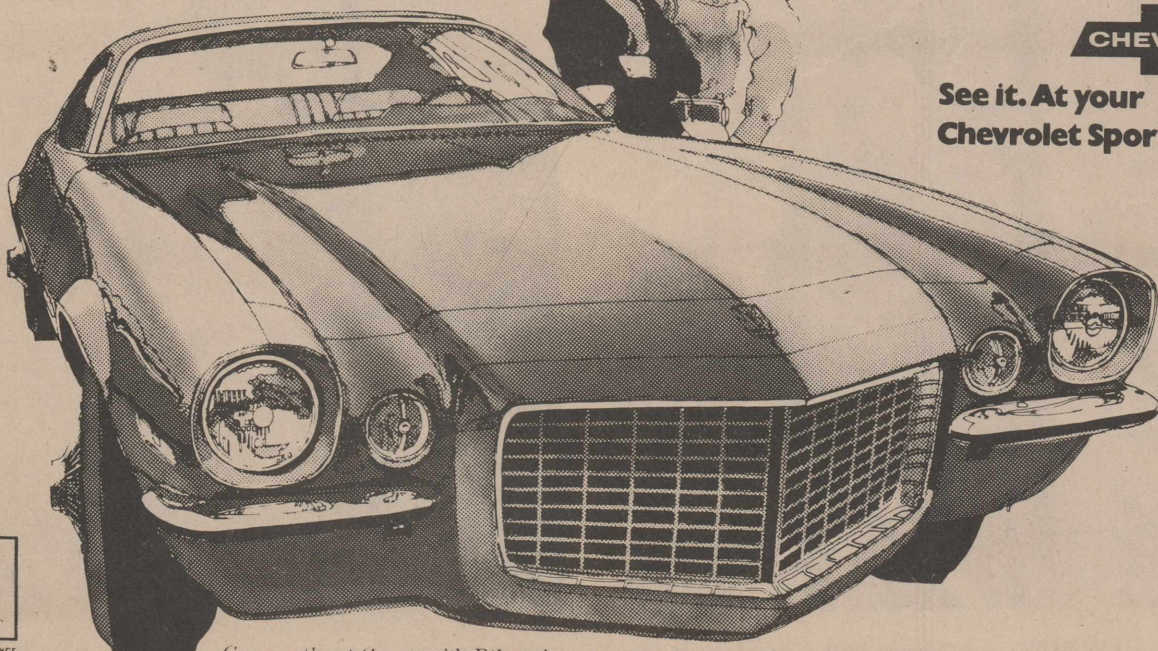

Other sportsters always feared it might come to this.

And they were right. Only their timing was wrong.

Putting you first, keeps us first.

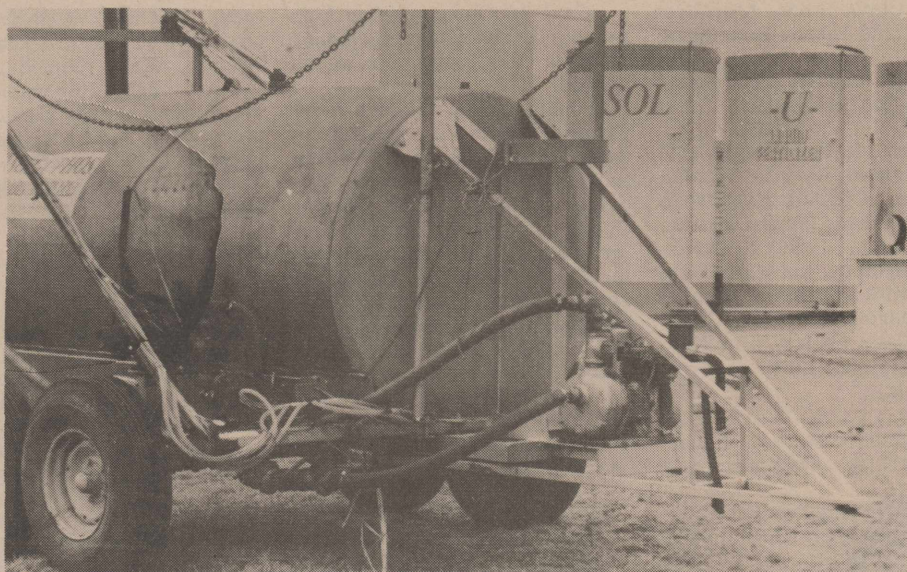

See it. At your

MRS. J. O. BLEDSOE

Cook Of The Week

Favorite recipes, two of which have been in her family for many years, are shared this week by Mrs. J. O. Bledsoe. Coconut Christmas Pie has been a special favorite of her grandchildren and is good at any time of year. The second family favorite - and one which is a "must" at family get-togethers is Corn Pudding.

Mrs. Bledsoe moved with her family to Olton in February 1938 from Hollis, Okla. She moved into town, from their farm home north of Circle, after her husband's death in 1957.

"Digging in the dirt" has always been a hobby and moving into town did not stop her from raising a garden and working with flowers.

"I've dug up this yard several times," she remarked. She has had good luck growing everything but black-eyed peas. Already her front yard is proclaiming spring with daffodils and violets in bloom.

She has always loved to crochet but has given up all except work with heavy threads. She has just completed a crocheted poodle which is really a cover for bathroom tissue.

Mrs. Bledsoe is the mother of two daughters and two sons. Her sons graduated from Olton High School and son James is married to an Olton girl, the former Jean Walthall.

Daughter Mildred, Mrs. H. B. Davis, lives in Sundown. She has three children and five grandchildren. Her daughter, Karen Benton, did illustrations for a Republican Women's Club Cookbook which Mrs. Bledsoe treasures. Perhaps the most clever drawing is one marking a section on meats. The sketch shows Mrs. Elephant baking a Democratic donkey.

Norma and Kenneth Moss live in Enid, Okla. although they still maintain the home they built here while their two

younger children attended high school. Parents of two sons and a daughter, their son Jim was a victim of leukemia in 1968. The Mosses have five grandchildren.

James and Jean Bledsoe live in Odessa. They have two sons and one grandson.

Delroy, Mrs. Bledsoe's youngest son, lives in Vernon. He has three children.

Mrs. Bledsoe is a member of Main Street Church of Christ.
