VISITORS FROM HOLLAND --- Mrs. Theo Dora Dannenburg and Mrs. Leny Wuurman of Amsterdam, Holland have been house guests of Mr. and Mrs. Rick Taylor of Earth for the past five weeks. Mrs. Taylor is the daughter and sister of the visitors.

Visitors From Holland Think U. S. Is 'Too Quiet'

"I like it but it's too quiet," was response given by Leny Wuurman to the question about how she liked the United States.

Mrs. Wuurman, 21-year-old native of Holland, and her mother, Mrs. Theo Dora Dannenburg, have been visiting for the past five weeks with Mrs. Rick Taylor, who lives on Route One, Dimmitt, near Earth.

Mrs. Taylor was visiting her mother and sister in Holland, when she fell ill and had to return home where she underwent surgery. Mrs. Wuurman and Mrs. Dannenburg returned to the United States with her and have been guests in her home since that time.

This is Mrs. Dannenburg's fourth time to be in the United States, visiting in her daughter's home each time. Mrs. Taylor met her husband while he was stationed in Germany during the time he was in the service.

The first trip for Mrs. Wuurman, she said she half expected to see cowboys and Indians in Texas. She said that it was so much quieter here than in Amsterdam.

Asked if she had been to any of our larger cities, such as Amarillo or Lubbock, she

replied that she had, "but it's still too quiet."

"There's not much to do here. In Amsterdam, you walk about five minutes and there is something to do. Here you have to drive about an hour or so."

"I make a bad time to come ... We get in a snowstorm and a tornado! We don't have these in Amsterdam," Leny laughed.

"Maybe when I come back, it will be better."

Although the temperature is higher in Amsterdam, the summer days are "just warm" according to Leny. Just about every day it rains, except in the summer.

She said that she liked the people in the United States. "Everyone is so kind, they'll help you if you need something. But I don't like New York. If you fall dead, they say go ahead, they don't care."

Mrs. Dannenburg agreed with her daughter that she would not like to come to live in the United States although they both liked to visit.

Leny said she learned to speak English from English speaking people and "a little in school." Her native tongue is Dutch.

Comparing prices of dif-

ferent things here in the U. S. with those in Amsterdam, Mrs. Dannenburg and Mrs. Wuurman were amazed at the cost of things in the U. S.

"Roses...one cost a \$1 here! In Holland we can get 20 beautiful roses for a guilder, which is 25¢ American money."

Clothes are much cheaper they stated. "A very nice dress costs about 60 guilden, I'm sorry...some may get sad, but we have prettier shoes than you, cheaper and more choice."

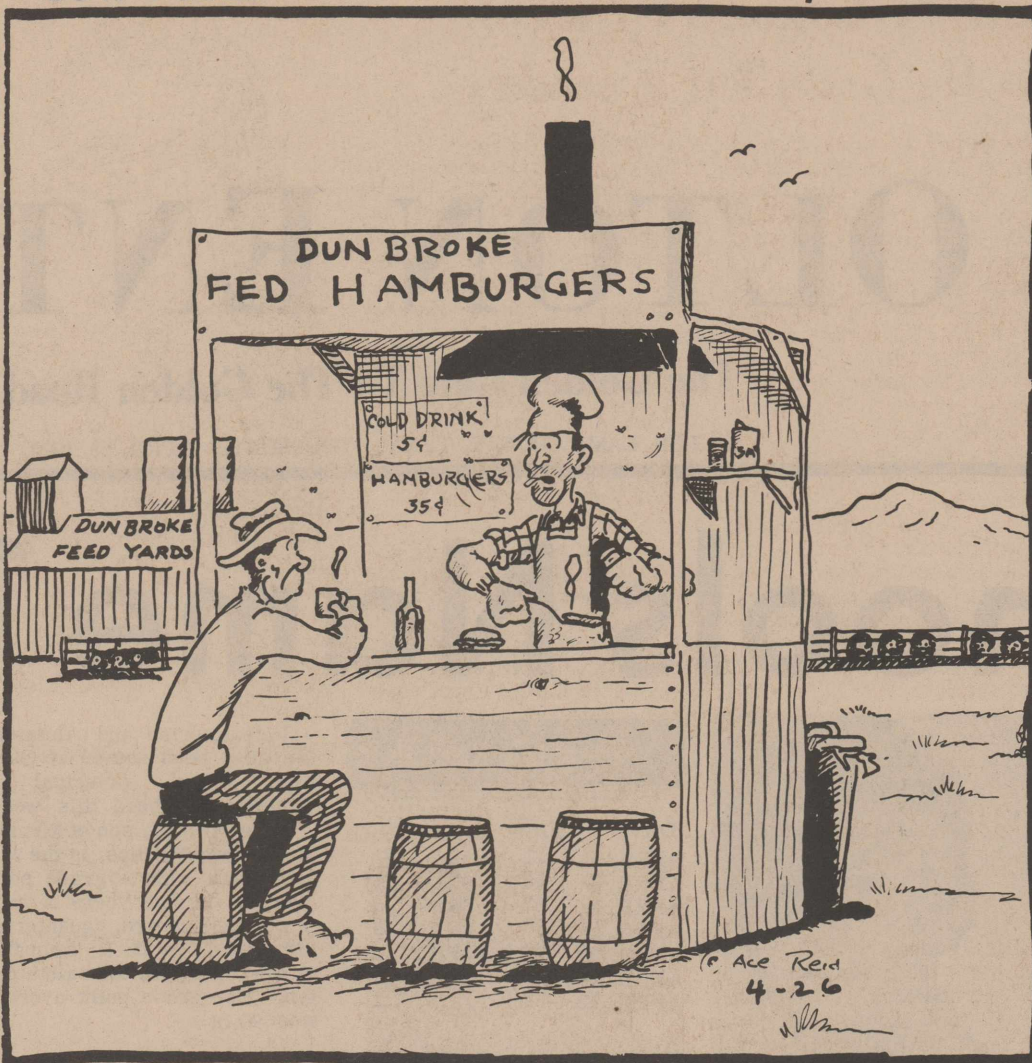

The maxi styles are seen very little. Most everyone wears the mini dress, which by the way is shorter than U. S. mini dresses, they said.

The two visitors left Wednesday for Amsterdam, flying from Lubbock to Dallas, then on to New York to board a flight for Amsterdam.

Leny's 17-year-old sister Thea Dannenburg has visited with Mrs. Taylor twice and her brother and family, Mr. and Mrs. Leo Dannenburg, Regina and Claudia will be visiting in July.

Sue's Views

The Great Designer

BY SUE CANNON

Here it is Wednesday night and not an inspiration one as far as an original column.

But there was this piece about the universe in a Church bulletin from Sunray that I got when I visited there during the Easter Holidays that I would like to share with you.

I'm sure the astronauts would say "Amen" to everything in it after their experiences, especially.

The designed demands a designer! So argued our forefathers, but in recent times this argument for the existence of God has been neglected by an ultra sophisticated generation. However, Dr. A. Cressy Morrison former president of the New York Academy of Science, has reaffirmed it in the book, "Man Does Not Stand Alone". He argues that it is possible to demonstrate mathematically that the universe could not have happened by chance, but was designed purposefully.

Thus, Dr. Morrison points out that the earth rotates on its axis at 1,000 miles per hour. If it rotated at only 100 miles per hour, our days and nights would be ten times as long as they are now and the earth would alternately burn and freeze. Under such circumstances vegetation could not live. Again, the sun has a surface temperature of 12,000 degrees F., and our earth is at the exact

distance from the sun that it must get just enough heat, but not too much.

The earth is tilted at an angle of 23 degrees and this enables us to have four seasons. If it were not tilted at this angle, vapors from the ocean would move north and south piling up continents of ice. If the moon were not at the exact distance it is from the earth, the ocean tides would inundate the land mass completely twice a day.

If the ocean were just a few feet deeper than it is, the carbon dioxide and oxygen in the earth's atmosphere would be completely absorbed and no vegetation could exist on the earth. If the earth's atmosphere were just a little thinner, many of the meteors which are not burned out in space would bombard us, starting great fires every where.

Could this delicate balance have happened by chance? Not a chance in ten million, says Dr. Morrison. The earth evidences design; design demands a designer; and the designer is God!

Sutan[®]
+ atrazine
lets your
corn
grow free

Your corn grows free from all major grasses and weeds. Free from the growth stress that weeds cause. Free to develop strong, vigorous roots that reach down to make maximum use of soil nutrients and moisture. Free from extra cultivations, possible root damage and free of trashy fields at harvest time.

This season, use dependable, economical Sutan plus atrazine on all your corn acreage. Stop the toughest grasses and weeds—nutgrass, wild cane, foxtails, fall panicum, Johnsongrass seedlings, crabgrass, annual morningglory, lambsquarters, pigweed, ragweed, nightshade and others that lower your profits. Mix Sutan plus atrazine in the soil as you prepare your seedbed. There's no need to depend on unpredictable rainfall to move the herbicide into the weed seed zone. Sutan and atrazine will be waiting to control weeds as they sprout. Used as directed, Sutan controls weeds without leaving harmful residues in the soil. Free yourself from work and worry...see us today for your supply of Sutan.
