OFFICIAL CITY PAPER OF PERRYTON, TEXAS

OFFICIAL COUNTY PAPER OF OCHILTREE COUNTY

VOLUME V.

PERRYTON, OCHILTREE COUNTY, TEXAS, FRIDAY, MAY 26, 1922

NUMBER 16.

CHRISTIAN CHURCH ANNOUNCEMENT

A happy day is dawning for the Christian Church folks of Perryton. The Basement Unit of the New Christian Church is near completion and will be ready for public services Sunday May 28th. This is the first time that the Christian Church folks of Ochiltree County have had the joy of their own home. This unit of their splendid new \$12,000.00 church building will make a splendid workshop.

A meeting of the membership will be held in the basement Friday evening and Sunday morning at 9:45 the Christian Sunday School will be organized. All Christian Church members, families, friends and those not now attending any Sunday School are urged to come to the opening services at 3:00 p. m. Sunday May 28th. The people of Perryton are invited to come and meet with us in our housewarming service.

No morning or evening preaching service account of Baptist Revival. Elders Christian Church.

MASONS MET MONDAY NIGHT

The Ochiltree Lodge A. F. & A. M. met in a called session on Monday evening of this week. The Fellowship Degree was conferred on William Thompson and the Master Mason on J. C. Reagan and Marion Manwarren. Their will be another call meeting on Saturday night, May 27th.

DEMOCRATS PERFECT COUNTY ORGANIZATION

The following organization was perfected at the Democratic meeting held last Saturday. County Chairman, Van W. Stewart, County Committeemen, E. A. Greever, J. L. Dodson, J. B. Cartwright and Val. McLanahan. E. A. Greever was the only old member present at the meeting.

KU KLUX ARE RELEASED

Austin, Texas.—The court of appeals Wednesday ordered H. D. Miller, Wallace Martin and Jim Jennings, all of Wichita county, released from the custody of the sheriff of that county. These men were committed to jail and fined \$100 each by District Judge E. W. Napier for failure to answer questions propounded by the Wichita county grand jury. The questions asked these men and which they refused to answer all pertained to the Ku Klux Klan.

The reason given for the order of release was that the questions were not in the form of a criminal investigation by the grand jury, and therefore the men were not in contempt of court for refusal to answer. The first question asked each of these men was: "Have you ever been a member of the Ku Klux Klan?" Another was: "Do you know any one that is a member of the Ku Klux Klan?" To these questions the relators refused to answer.

Both the county and district attorneys were closeted with the grand jury when these questions were asked and both later said that no crime was being investigated by the grand jury.

In the opinion rendered by the court of criminal appeals it was stated that the questions would have been pertinent of they had been asked during a criminal investigation wherein the answers to the questions would have brought to light any lawlessness. An excerpt from the grand jury report is as follows:

"We have not been investigating any crime which we have any thought or reason to believe has been committed at the instance of the Ku Klux Klan in Wichita county."

Woodson Bennett of the contracting firm of Coffey and Bennett had the misfortune to lose part of his thumb in an accident at their shop last Friday. He was running the planer at the time and got it sliced off by one of the knives.

Mrs. R. H. Gamel and children and Mrs. J. D. Waide left the latter part of last week for an extended visit with their father at Marietta, Oklahoma.

REVIVAL MEETING CLOSED SUNDAY NIGHT

The greatest revival meeting that has ever come to Perryton closed Sunday night, May 21st. Rev. Albert C. Fisher, who did the preaching is without question, one of the best evangelists on the platform today. Mrs. Fisher's work with the young people was a great factor in the meeting and the results were simply wonderful. Brother Little, in charge of the song and children's work, was faithful and true.

Two hundred and seventy-six conversions and reclamations was the result of this meeting. The churches are on a different footing now. The church members should have a vision of their responsibility and of what the church stands for in the community. The coming of these people, the servants of God, has been a great blessing to Perryton.

This was a real old time revival. Brother C. E. Forbes opened up his new garage building for the meeting. He is worthy of much praise for this enabled great crowds to hear and receive the Gospel. His blessings are on every one who had a part in this great work. Let's keep the good work going that our little town may be truly a good place for all, no time for knocking, but all need to pull for the right.

Faithfully,
W. A. Hitchcock.

COUNTY BUYS NEW GRADING ENGINE

The County Commissioners at their last meeting made a deal where by the county becomes the owner of a new 30-60 Aultman-Taylor Traction Engine. An old engine was taken in on the trade. This new engine will be used for grading purposes.

GEORGE B. WAGONER

George B. Wagoner was born in Cass County, Missouri on August 7, 1848. He departed from this earth at the home of F. Clarke, near the Blue Mound Church in Beaver County, Oklahoma, on May 18, 1922. He was a Minister of the Christian Church and also a graduate of medicine. Mr. Wagoner was a very educated man, being a graduate of several of the leading colleges of the United States and also completing his education in London, England. He also made a trip to the Holy Land while in the old country. The body was shipped to Harrisonville, Mo. where it will be buried in the family burial ground.

GUN CLUB MEMBERS MADE GOOD SCORE

At a practise shoot staged by members of the Perryton Gun Club a few days ago, some exceptionally good scores were made. There were only five members shooting and they broke 121 birds out of the possible 125. "Cap" Correll was going great, he broke 29 straight and then the shells gave out. "Cap" says that hereafter he is going to have a reserve stock of shells on hand so that he can keep going when he gets right. The following scores were made:

Correll	25
Coffey	25
Coffey	23
Nash	24
Holbs	24
TOTAL	121
Possible	125

PERRYTON BAND HOLDS INITIAL PRACTICE

The band which has been recently organized in Perryton looks like it is going to be a winner. At the first practice on last Monday evening a fairly good number were present. We have quite a number of band musicians here and they should be given the hearty support of everyone in their efforts to give us a real band. The members to date are J. B. Nash, J. A. Corbett, J. E. Barbour, Jim Thompson, Miles Bright, J. E. Rhodes, John Klassen, William Fulton, Mr. Kellam, Marion Manwarren and Raymond Coffey. There are several other experienced players who are expected to join the organization at once. The rehearsals will be held every Monday evening at the Courthouse so if you have had experience, come out and help the boys.

A TRIP TO THE LATEST OIL WELL

On last Friday the Editors of this paper in company with Messrs. M. R. Coffey, Ray Nelson, G. R. Wilson and L. S. Hobbs, made a trip to the newest and also the closest oil field in the Panhandle. The new well is the one lately brought in by the Gulf Company and is known as Dial No. 1. It is located about 70 miles southwest of Perryton and about 35 miles southwest of Spearman. It is about 4 miles west of Plemons, Texas. This well has not been put to a test as yet but the general opinion of the men that brought it in is that it will go about 300 barrels a day. This is a good well and the oil is of a very high grade. It is the first oil well to be brought in north of the Canadian river and it means that the proven pool is getting closer to Ochiltree County every day. This well should be a big boon to Spearman and Hansford county for Spearman is the closest railroad point to this new field. On this trip we also visited the Snorty Gobbler, a well in which many Perryton people are financially interested. This test is on the Whitsett ranch and is about 40 miles southwest of Perryton. They are not drilling at present, operations being held up on account of non-arrival of 10" casing. The development of this field will mean much to this country. The leases around Plemons are sky high. It takes money to dicker with the fortunate owners of the land in that locality.

FIVE HUNDRED CLUB

The members and guests of the Five Hundred Club were delightfully entertained last Wednesday afternoon at the home of Mrs. Lynch Dodson.

The hostess served a delicious three course luncheon at 2 o'clock. After several games of the chosen diversion were played Mrs. R. B. Wakefield held high score. The next meeting will be at the home of Mrs. J. F. Mead, May 31st.

Club Reporter

PERRYTON GUNNERS CLOSE TO TOP

The Amarillo Gun Club is now leading the Panhandle Trapshooting Association, being only a fraction of one per cent ahead of the Hereford Gun Club. Perryton is holding third place, Slaton fourth and Post fifth.

Amarillo's high five tied with Hereford's high five on the day's shooting but on the total score of the day Hereford broke four more targets than Amarillo's thirteen shooters who participated in the shoot. Charles Adams of Amarillo shot the high gun of the day, breaking 98 out of 100 targets, and C. E. Kiser of Amarillo was second high man with 97 out of 100. Hereford men were third with 95. The winning two events and Amarillo shot was shot in events, Hereford two making the shoot a tie. The Hereford Club will come to Amarillo Sunday week to shoot the tie off.

The following is the standing of the teams in the Association, including Wednesday's shoot at Hereford, in which the Amarillo Gun Club competed:

	Shot At	Broke	Pct.
Amarillo	875	808	92.34
Hereford	875	805	92.00
Perryton	875	789	90.17
Slaton	875	718	82.05
Post	375	317	84.53

The Amarillo Gun Club's weekly shoot will be held Sunday afternoon at 5:15 o'clock after the ball game between Amarillo and Abilene.—Amarillo Tribune.

BIG MONEY IN JERSEYS

Ira J. Teurman of the Blue Mound Jersey Farm, reports to us that it sure pays to have a few good Jersey cows and a few old hens. He says that he has sold over \$400.00 worth of produce during the past four months. This beats raising wheat, does it not?

STORK

Born to Mr. and Mrs. E. W. Rogers of Wawaka, Texas, on Wednesday, May 17 a baby girl. The attending physician was Dr. G. P. Gibner of Spearman.

FARMERS MERCANTILE COMPANY MAKES BIG DEAL

W. W. McLarty manager of the Farmers Mercantile Company of this place traded a section of land seven miles south of Farnsworth to The Cecil Company of Plainview, Texas for one of the largest and most up-to-date dry goods stocks in West, Texas on Tuesday of this week. This stock is all new goods, and Mr. McLarty will move this stock to Perryton to be placed in his store here.

C. W. Cecil of the firm of The Cecil Company who lives at Cleburne, Texas was here and made the deal, is certainly a booster for Perryton and Ochiltree County.

A. M. Wilbanks, Jr. and E. W. Ewing of Cleburne, Texas made the deal for the Mr. McLarty and Mr. Cecil.

Mr. McLarty left Wednesday for Plainview to invoice the stock. Miss Lucile Rupprecht, Abe Green, and Bill McLarty, Jr., went with Mr. McLarty to assist in invoicing the stock.

TAKE CARE OF FARM IMPLEMENTS

Lack of care of farm machinery is one of the greatest sources of loss on American farms. Every year the farmers of the United States spend millions of dollars for implements and, as a rule, these implements last only about half as long as they should because they are not kept under cover when not in use.

When implements are given rough usage by operators and are left outdoors, exposed to all kinds of weather, they can not be expected to do good work for more than five years. The life of thousands of machines is cut in two by neglect.

It is just as important to save farm machinery as it is to save the crops after we grow them. Often we almost work our heads off to get a hay crop under cover when a sudden storm threatens. Yet many of us allow our farm implements to stay out in all kinds of weather.

Poor care of machines means waste of labor, waste of money, and waste of crops. We cannot do good work with implements that are in poor condition.

Before putting any machine in the shed after it has been in use it is always best to apply a coating of grease to all polished parts. This will prevent rust. If the moldboard is kept bright, better work will be done by the plow and the energy of both man and horse will be conserved.

A good operator is quick to detect either by sight or by sound when any part of a machine needs attention. If the machine is not working smoothly in all its parts, the cause of the trouble should be immediately ascertained and remedied. A loose nut promptly tightened will not only save valuable time, but will prolong the usefulness of the implement.

All bearings should be kept oiled. In spite of care, bearings sometimes become hot. This trouble can be remedied by mixing graphite with oil.

A little paint will do much to preserve both wood and metal. It also improves the appearance of a machine.

We should carefully go over every machine before it is needed in the field for the purpose of detecting every loose or missing nut or bolt, every worn or broken part. A list of all needed repairs should be made and these should be secured and put in place.

These things should not be put off until the implements are needed.—Edgar W. Cooley in Western Farm Life.

PERRYTON LOSES TO BEAVER

The Perryton base ball club went down in defeat before the team of Beaver on the latter's diamond on last Sunday afternoon by a score of 12 to 7. The boys at Beaver are good ball players and gentlemen with it. They will play a return game here next Sunday. Perryton's ball team is rounding into shape and will soon be able to hold their own with any team in the Panhandle. Batteries for Beaver, Niles, Couch and Meece, Perryton, Clark, Bright, Hall and Thompson.

T. S. McLarty and W. B. LaMaster were over to the oil well at Plemons Tuesday.

FORD RETAIL SALES HIT NEW HIGH MARK

According to a report just received from the Ford Motor Company, Detroit, a daily average of 5,210 retail sales of Ford cars and trucks had been reached by the close of April in the United States alone.

Ford sales of cars and trucks for the month, including both domestic and foreign, totaled 127,249. This establishes a new high record, exceeding the largest previous month, June 1921, by 15,457.

The sale of Fordson tractors has also been steadily climbing. A total of 11,181 Fordsons were sold during April in the United States, a daily average of 469 having been reached by the end of the month. This gives the tractor a new high sales record, and shows 100 per cent increase over the best month in 1921.

The Ford Company is enjoying a banner year in all departments. Output of Ford cars and trucks for the year, according to present estimates, will exceed 1,100,000 which represents a ten percent increase over 1921.

The Ford Company at Detroit is now operating at full capacity, having a force of more than 40,000 men on the payroll. The scheduled output for May will probably reach 135,000 cars and trucks, which will be applied against orders approximating 165,000.

Despite the attempt of the factory and the twenty-three assembling plants in the United States to produce a sufficient number of cars to meet the unusually heavy demand, it has been impossible for Ford dealers in most cases to make immediate deliveries.

LISKE GRAIN CO. BUYS CANADIAN EQUITY

The Liske Grain Co. have purchased the elevator of the Farmers Equity Exchange of Canadian and will build a large new grain elevator. The Liske organization is one of the largest grain companies operating in the Panhandle. They have a big elevator here in Perryton, J. E. Rhodes being their local manager.

STREETS ARE BEING GRADED BY CITY

At the last meeting of the city council the streets were ordered graded and Alderman Hobbs was appointed to look after this work. A force of men and teams immediately started on the job. Several of the side streets have been graded and put in good shape.

It was also decided to put in curbs along Main Street. This will be one of the biggest improvements yet and every owner should get the curbs in as soon as possible.

BAPTIST REVIVAL

The Baptist revival meeting will begin next Sunday morning in the big tabernacle just east of the Church building Brother W. D. Powell of Louisville, Ky. expects to be present at the first service, and will do the preaching for the meeting. Brother Powell needs no recommendation for those who heard him in the one service when he was here last fall. It would be difficult to find a man with a richer experience, both of the grace of God in his own conversion and of service for Him. When Brother Powell was converted he was a student in Union University, Jackson, Tenn. It was late at night, but he went to work immediately, going from room to room praying with his schoolmates, until a large number of them were converted.

For 17-years he was a missionary to Mexico, and has some thrilling experiences to tell of his work there. For years he was secretary of the Baptist State Mission Board of Kentucky. He claims the distinction of having preached the dedication sermon for more Church buildings than any other man in the South of any denomination.

For the past few years he has been traveling over the South in the interest of Foreign Missions, and holding a few meetings each year, in which God has richly blessed his efforts. We are very fortunate to have this man of God with us. We want everybody to come and help us put over a great victory for Christ and for our community.

I. W. ROGERS, Pastor

NEW BOARD OF COUNTY SCHOOL TRUSTEES

A new board of Trustees to supervise the common schools of Ochiltree County was appointed at the last meeting of the County Commissioners. Fred Huston was appointed to represent District No. 1 and W. B. Dennison to represent District No. 2. David D. Shanks was appointed as Trustee from the whole county.

SHIPPERS NOTES

Following is the amount of cattle and hogs shipped from Perryton from the first of May to time of printing this paper:

J. L. Donley, 17 cars of hogs to Los Angeles, J. S. Talley, 3 cars of hogs and 3 cars of cattle to Wichita, Kansas. S. C. Brillhart, 2 cars of cattle to Wichita, Kansas. J. H. Flowers, 2 cars of Cattle to Wichita. Atlas Flowers 1 car of cattle to Wichita. Sam Handley 1 car of cattle to Wichita.

PERRYTON HIGH BEATS OCHILTREE

Last Thursday afternoon the Perryton High School team played the Ochiltree School team at Ochiltree one of the fastest games of base ball that has been played this year. The final score was seven to eleven in favor of Perryton.

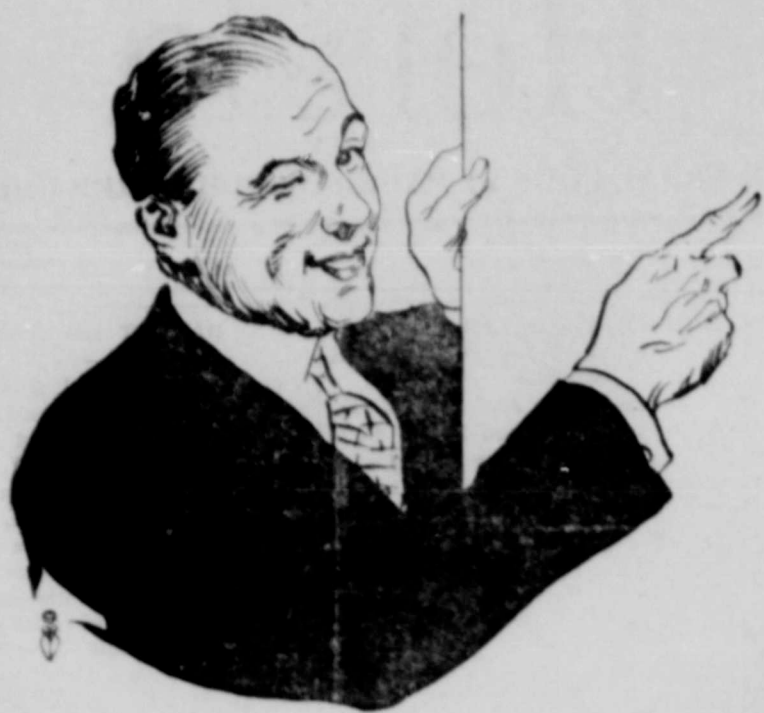

CONTRACTOR STARTS ON STREET CROSSINGS

Contractor G. W. Schackle started a force of men to work on Monday morning at putting in the cement street crossings through out the city. Mr. Schackle was awarded this contract some time ago but was delayed on starting an account of slow arrival of materials.

A DANDY GOOD SHOW

That bunch of bully good fellows, the Perryton Shrine Club, put on a minstrel show in Spearman on Wednesday night, May 10, which was an exceptionally meritorious performance for amateurs. The attendance was over 300. "Bolivar the Great," the baby elephants, performed in high class style, excepting that he sat down on Tower and strained the latter's ankle. James B. Tower of Spearman directed and staged this show. The Reporter regrets that circumstances prevented a mention of this show last week and takes pleasure in reiterating that the performance was good and greatly pleased a large audience.—Spearman Reporter.

The M. W. A. Lodge will meet at the court house in Perryton every first and third Tuesday at the court house.

Luck and Lack

Don't trust to luck. Luck is untrustworthy. Systematic, scientific striving for any goal is far more likely to bring you success than any mere faith in your success.

Just as changing a single letter changes "Luck" to "Lack," so will the reverses of a single day change plenty to want. But you can insure yourself against this by building your success on the habit of saving.

SAVE AND WIN

Be well dressed. Make friends. Increase your influence in your community. Enjoy the respect of all your associates.

These things do not come to those who trust to luck for them. Systematic saving will win them for you. Systematic saving will accumulate for you a small fortune that can safely and readily be expanded to a large one.

Decide on a regular deposit and start depositing NOW.

MANAGEMENT OF GROWING CHICKS.

By J. W. Kinghorne, Animal Husbandry Division, U. S. Department.

The care of growing chicks, especially during very warm weather, is most important to every boy or girl who is a member of a poultry club or is raising chickens should give them the best care at this time if he or she wishes to succeed. The baby chicks may be vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive care and management during their growing period they will not develop properly, and many of them will be lost by sickness or disease.

The chief essentials to proper growth are good coops or houses, cleanliness, proper feed and water shade, and free range.

Growing chicks should be provided with large, roomy coops or houses will give them a comfortable place to stay at night and during stormy weather. No particular kind of house is necessary, but it should be so built that it will provide the chicks with lots of light, pure air, and sunshine, and protect them from dampness and storms of all kinds. It also should be arranged so that it can be cleaned easily and frequently, which is very important.

If brood coops are used, do not let too many chicks go into one coop at night, as crowding will cause them to become overheated, resulting in improper growth and sometimes in dead chicks. As the season advances and the chicks become larger, some should be removed and placed in other coops to prevent crowding. When possible it is best to provide larger quarters.

A good house can be built from drygoods or piano boxes at a small cost. The houses built from two piano boxes and covered with tar paper to keep out the rain, make very satisfactory quarters. In a house of this sort the same care should be taken as in brood coops, that is, not to crowd the chicks.

Every coop and poultry house used for growing chicks should be kept clean at all times. Sickness or disease usually starts in unclean quarters, and in such quarters lice and mites are always more plentiful. The coops and houses should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be got rid of at once by following the directions in Farmers' Bulletin 1110 "Lice, Mites, and Cleanliness."

A variety of feeds, with fresh, clean water, is necessary if chicks are to grow properly. The three feeds most necessary for rapid growth are grain feed, green feed, and dry mash.

In addition to the green feed and dry mash, which should be provided regularly, a grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good grain mixture for growing chicks consists of 3 parts cracked corn, 2 parts wheat, and 2 parts hulled oats. When available, kafir corn or rolled or hulled barley may be substituted for hulled oats. In localities where hulled oats, kafir corn, or rolled barley can not be obtained or is too high in price, a mixture of cracked corn and wheat only may be fed until the chicks are old enough to eat whole oats, when 2 parts oats may be added to the corn and wheat mixture.

A reasonable supply of fresh green feed is almost as necessary as grain for growing chicks if they are to develop properly. If allowed they will obtain much of it for themselves, but if kept in confinement or in quarters where green feed is not abundant, it should be supplied to them regularly. Lawn grass, beet tops cabbage, and lettuce make excellent green feeds.

When chicks are confined to brood coops with runs these should be placed on ground where the grass is green and tender, and as fast as it is eaten off the coop and run should be moved to a place where the grass is plentiful.

In addition to grain and green feeds, dry mash should be kept before growing chicks at all times after they are three or four weeks old. It is best to feed it in a hopper inside the building or where it will not be exposed to rain or wet. If a large number of chicks are raised the mash may be fed in an outdoor hopper.

The following mixture makes a good dry mash. Two pounds corn meal, 2 pounds middlings, 1 pound oatmeal, 2 pounds wheat bran, 1 pound charcoal. When a larger quantity is desired it should be mixed in the same proportion.

Grit and oyster shell should be provided also, so that the chicks may help themselves whenever they wish.

Nothing is better for growing chicks than a liberal supply of sour milk. If it can be obtained, it should be kept always before them in an open dish or pan where they

ROAD NOTICE TO NON-RESIDENT LAND OWNERS

STATE OF TEXAS, OCHILTREE COUNTY, ss.

We the undersigned Jury of Freeholders, citizens of said Ochiltree County, Texas, duly appointed by the Commissioner's Court of Ochiltree County, Texas, at its January Term, 1922 to view and establish a First class 50 ft. Road as hereinafter designated and having been duly sworn as the law directs, hereby give notice that we will, on the 3rd day of June 1922 assemble at The beginning of said proposed road and thence proceed to survey, locate, view, mark out and establish said road, beginning at the N. W. Cor. of Section 12, block 4T and the N. E. Cor. of Section 11, same block.

Thence due south on section lines 10 miles along the west lines of sections 12, 25, 45, 50, 75, 80, 105, 110, 135 and 140 and the east lines of sections 11, 26, 44, 51, 74, 81, 104, 111, 134 and 141, all in said Block 4T.

Thence due east one mile to the northwest corner of section 18, in block R, and the S.E. corner of section 140 in block 4T.

All of said section and blocks being in Ochiltree Co., Texas, and the said section lines to be the center of said proposed road.

And we do hereby notify any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damages, if any, claimed by them.

Witness our hands, this 8th day of May A. D. 1922

London has an organization of Henpecked Husbands, and they are soon to hold a convention. Fellow men, our duty is plain! We should send delegates!

Going in for culture is all right, if you have the time to spare, but going in for agriculture brings in more cats.

We have several double light sockets for sale. See Stewart Printing Co. 51-tf

can eat and drink it freely. When sour milk is fed, the amount of beef scrap in the dry mash may be reduced one-half.

Plenty of fresh, clean water is absolutely necessary for all growing chicks. In hot weather it should be given twice daily and put into fountains or dishes and placed in the shade so as to keep as cool as possible. Clean the water dish thoroughly each day before filling.

An abundance of free range with plenty of shade is necessary if chicks are to grow rapidly and develop into vigorous fowls. Growing chicks that have free range obtain quantities of green feed, bugs, worms, and other things, therefore requiring less grain, and they are also less liable to sickness or disease. Give your chicks free range whenever possible.

If you are in the market for Land, call or write me.—C. E. McLarty, Perryton, Texas. 9-tfc

See "Hurricane Hutch" the greatest of all stunt serials, by Charles Hutchinson starting at the American Theatre June 2, 1922. 14-3tc.

FOR RENT—One bed room, south room, ground floor, electric lights, and water, also two rooms for light housekeeping, vacant June 1st. See J. M. Bull or phone 154. 15-tfc.

FOR SALE OR TRADE—One Case Fractor and one six disc plow in good shape, will take car as part payment.—See Charlie Froage, Perryton, Texas. 14-tfc

FOR SALE—Six good business lots on Main St., 4 with west fronts and town with east fronts. will sell one or all, with small down payment and the rest like rent, small monthly payments. By owner, Geo. F. Rauch, Los Angeles, Calif. 531 San Julian St. 151tfc

Use the Herald for you wants.

VAN W. STEWART, Ass't-Editor
Paul F. and Van W. Stewart, Owners

Subscription price: \$1.50 a year
strictly in advance.

Entered as second class matter,
October the 10th, 1919, at the Post
Office at Perryton, Texas, under the
Act of March 3rd, 1879.

Published Weekly on Friday

All copy must be in this office by
Wednesday noon to insure publica-
tion.

No straight man should vote a
straight ticket unless he knows that
every man on it is also straight.

Former Vice-President Tom Mar-
shall says no man is a good Ameri-
can until he has learned the Ameri-
can language. More truth than
poetry in that, too.

Make the speed regulation so
draconic that when a booze-soaked
fool speeds through the street at
break-neck rate it may be assumed
that he is heading for jail.

A new wave of prosperity, better
times and ample employment is
about to sweep the country, ac-
cording to the figures and deduc-
tions of Secretary of Labor Davis.

A reporter on one of the big city
papers has run down a real live
news item. He has discovered a
citizen that was out late at night
and got almost home before he was
slugged.

Memphis decides to retain its
married women as school teachers.
Well, we don't see how our schools
would have any pupils in them at
all if it were not for the married
women.

If the congressman wants to do
something for his constituency that
will ensure his re-election he should
not only send garden seed but also
a man to spade up the garden in
which to plant it.

Nothing is certain but death and
taxes, according to a true old say-
ing, and it may be added that noth-
ing is feared more than death and
taxes. In the minds of many, both
are great evils, and neither can be
sidestepped.

Remember when little girls used
to put on long skirts that dragged
on the ground and played they were
women? They have a hard time
finding anything of the sort to put
on now.

Thiologos Hirschkeas and Stilian
Galanopoulos, of Texas have just
taken out a license to wed. If they
give the first baby all four of those
names it will have a burden to carry.

Dick Croker, who died the other
day in Ireland, and over which hun-
dreds of papers have been using up
much space, was a millionaire, and
made every bit of it by political
graft of the rankest kind in New
York.

We do not claim to have a Web-
sterian brow or a Bryan brain,
which may be the reason we simply
cannot understand why the dear
ladies trot around with bare breasts
bare arms and bare legs, and yet
with \$500 worth of hot furs wrap-
ped around other parts of their an-
atomy.

Speaking of the Russian propo-
sition to the Allies, here is an
example of how it would work out
if you tried it. Just ask your gro-
cer to cancel what you owe him
and then loan you money with
which to buy more goods. The
proposition will tickle him to death.

The city to be built at Mussel
Shoals, if Congress turns the pro-
ject over to Ford, will be some thing
new in shape, at least. It will be
largely one thoroughfare, since the
city of necessity will be 75 miles
long and presumably extremely
narrow. Most everybody will live
on Main street.

As long as we men continue to
harness ourselves up in form-fitting
coats and turned up trousers, and
wear a devilish contrivance around
our neck that saws our Adam's ap-
ple into sections with its hard-boil-
ed sawteeth, we are in poor business
poking fun at the women for what
they wear, or what they do not wear
either.

FINANCIAL BALM FOR
HURT HEARTS

The industry of supplying large
financial poultices to patch up the
punctured and lacerated hearts of
impecunious females whose chewed-
up-and-spit-out gizzards gleeed gush-
ers of gore all over the right of
way into the courts, is getting to
be considerable of a hoary chestnut,
and juries are beginning to find it
out. Heretofore for many years the
gushing vamp with the palpitating
heart that has been busted by some
rich old fool 75 years old has fur-
nished a regular industry to jury-
men who were full of sympathy and
sob stuff, as well as prunes, but
there seems to be a waning of the
breach of promise boom. In four
recent suits of the kind in Chicago,
in which heart damages totaling
\$175,000 were claimed as the only
salve that would stanch the burst-
ing herat blood vessels, balm was
awarded in all to the amount of \$27,
which was probably \$26.75 more
than real common sense and justice
called for. For years juries of men
have suffered softening of the heart
and head in the presence of weak,
clinging womankind, but now, since
women also serve on juries there is
a marked steeling of the emotions
when some frail young orchid about
forty or fifty staggers to the stand
and testifies that her 80-year-old
lover parked her to the detriment
of her heart, whose robustness she
values at \$50,000. Just as though
love and affection had a momentary
value! True love cannot be assayed
like gold ore, and therefore true
love is a rare factor in any breach
of promise suit. Besides, the field
has been overcrowded and the in-
dustry overdone.

There are thousands of very nice
movie picture people. Because there
are rotten eggs is no sign that there
are not also many good ones.

Two-bits is mighty little money
these days. It won't even buy a
ticket to a good movie show, or a
gallon of gas, so people take it to
church and give it to the Lord.

Common sense is what we as a
people need plenty of. There is
nothing fancy about it, but like
beefsteak and potatoes to a hungry
man, it's fillin' and substantial.

Instead of machine guns, China
put a lot of fire-crackers in Standard
Oil tin cans and shot them off, and
the enemy broke his neck running,
as the noise was identical to ma-
chine guns. Why is that not a good
idea for all the rest of us?

Mrs. Asquith says American men
want to kiss every pretty woman
they meet. Well, say, Margot, what
you souse we U. S. A. men are, any-
how—monks, or something? Any
man who would not like to kiss a
prettypretty woman must be crip-
pled in the brain pan.

In many places in this country
they are advertising for mechanics
and tradesmen of all kinds at \$1 an
hour. When we learned our trade
we got fifty cents a day and won-
dered if we would ever get to be a
millionaire like the fellow who was
making \$3 a day. It's different
now.

H. H. Elmer, manager of the
Globe Iron and Steel Company of
Syracuse, N. Y., traveled 300 miles
in an auto on a gallon of fuel which
cost less than six cents. He con-
structed the engine of the machine
himself and his company is going to
manufacture them. This is the day
and age of new and wonderful
things.

HURRAH FOR NORMALCY

We are sure getting back to nor-
mal conditions fast now, thank the
good Lord and first thing we know
we will have forgotten we ever did
get in bad because of wars and great
and human selfishness. The best
barometer of public business and
finance is the amount of investment
being made, or not made, as the
case may be, and investments now
are beginning to take on quite a
boom. People who have had cold
feet and were afraid to invest, be-
cause of uncertainty, unrest, and a
vague feeling that it would be bet-
ter to wait awhile and see whether
we ever did get out of the kinks or
not but now it is different. They
are getting over their fear and in-
vestments are being made as they
have not been for some years. Hun-
dreds of millions of dollars of
money that has been hiding out in
tin cans, stocking legs and saving
banks are now going into stocks and
bonds, for new enterprises of all
kinds and the natural consequen-
ces are that hundreds of thousands
of more men are being put to work
on such enterprises.

Money is easy on the markets and
many splendid investments are be-
ing offered and taken. Probably
never before in our history have so
many millions been seeking good
investments as they are right now,
and all the money invested in stocks
and bonds goes immediately into
business enterprises and channels,
gives more work and creates more
wealth. Idle dollars are as bad as
idle men—they create nothing. Some
of these millions are also going in-
to foreign investments, in the way
of credits, and this in turn stimu-
lates our foreign trade and makes
work for American industries. And
all these dollars, whether invested
at home or abroad, contribute to the
speedy return to normalcy and good
times for us all.

That is a very nice heaven that
Conan Doyle has fixed up. He of-
fers everything one can wish, ex-
cept a return ticket.

The Armenians must be a hardy
race. Ever since we can remember
they have been massacred by Turks
or were starving to death.

Spring helps to promote that tired
feeling that a whole lot of lazy
folks have also in the summer, fall
and winter.

They really ought to put a better
brand or paint on the automobiles,
for nearly every one we have any
acquaintance with has had the paint
wear off before the mortgage did.

A famous historian announces
that women ruled the world 2500
years before the Christian era. Zat-
so? Well, we don't notice that she
has ever quit since then.

Senator La Follette had an am-
bition in youth to become a trage-
dian on the stage. If he had he
would have deprived the senate of
a comedian.

OUR PUBLIC MEN.

There are many new names in the
House of Congress and the Senate
of whom the people as a whole have
but little knowledge, but it is to be
hoped that some of them will devel-
op into statesmen of whom our
country can be proud. It must be
admitted that the people now have
a very poor opinion of the public
men of the nation as a whole and,
sad to relate, there is much to
justify such opinion. It ought not
to be so, and our public men, public
business leaders as well as public
officials, ought to do away with
such opinions by so living and so
dealing with the public and their
fellow men as to merit the respect
and admiration of us all. It is up
to them to do this; we cannot do it
for them, and as they live and do
and practise, so will they be judged.

When a man is honored by be-
ing selected as the head of this
greatest Government on earth, or
to such positions of honor and trust
as United States Cabinet Member,
Congressman or Senator, one would
think he would have a pride to build
a lasting monument for himself and
his posterity that would live fore-
ever in the hearts of his country-
men, but how few of them do it. We
have many men of great talents,
brains and ability in such places,
honored by their people and given
every chance to accomplish great
things, but the devilish attributes
of selfishness and greed seems to
dominate most of them, and so to
grab riches they sacrifice every-
thing else in life that is worth liv-
ing for. There are so many oppor-
tunities for a public man to do this
that it is hard to withstand the tem-
ptation, and where one is great
enough and man enough to do so a
dozen fall for the glitter of the
gold and the flesh pots. A few
meet our great problems and grapple
with them in honor, ability and
honor, while many others fall for
the temptations and drift into graft
and crime.

The public man should realize
that he has a great responsibility
resting upon him, to represent all
of the people and sink self. This
also applies to our big financiers.
Instead of striving to grab billions
after they already have millions,
why can't they instead give the
benefit of their time and ability
to the welfare of their country?

Men may kiss rouge and lip-stick
varnish if they feel so inclined and
like the taste, but their taste needs
fixing.

Mrs. Astor says the press must
help the world, Sure! That's what
we're doing. But the world should
help the press, also, and right now
is a good time to advertise.

We have just passed through a
"Be Kind to Animals Week," and
now suggest that automobilists get
together and observe a "Be Kind to
Pedestrians' Week."

W. H. Dunlavy
Jeweler
Perryton, Texas

Samuel Gompers, president of the
American Federation of Labor, is
out in a statement that recognition
by the United States of the Bolshe-
vik tyranny in Russia would be a
needless and base right.

If Longfellow were alive today he
would have to revise that "Village
Blacksmith" poem. The village
blacksmith has a garage now, and
wields a monkey-wrench instead of
a hammer and horseshoe.

The Old Mississippi river has sure
been raising all kinds of trouble
this spring, and nobody seems to be
able to handle it. Why not sell it
to Henry Ford and let him put
some kind of a tin crupper under its
tail?

Walt Mason is lamenting because,
thinking he was not pretty enough
in the mug, he sent away and got
some of Dr. Dubb's Beauty Dope
and rubbed it on. Now people tell
him he looks like a piece of beef
that was not cured right.

Leading Republicans now seem
to be fairly well united, except as
to tariff, bonus, ship subsidy, tax
foreign policy, military, prohibi-
tion, the currency, and a few other
or matters.

John D. Rockefeller says the
cret of long life lies in being
Christian and playing golf.
John, how can a man be a Chris-
tian and talk to a caddy and the
and balls like golfers do?

Colored gentlemen used to be
required to deposit their razors in
check room when entering a
room, but now it is the white
in New York and other large
who check their "gats"

If one wants to find Ameri-
cans nowadays, one has to go
South. Such cities as New York
Chicago are mostly foreign. There
are now more Russians in New
York than in Moscow, and more
Italians than there is in Naples.

FEED THE WORK HORSE

The next few months is a season when Texas horses and mules will do their hardest work. This is also a season of short feed supply of satisfactory nature. On account of a variety of feed stuff on many farms the work horses and mules are likely to suffer on account of an unbalanced ration. Most horses will be fed on either milo, kaffir, corn or feterita. These are substantial and strengthening, but when fed alone are inclined to be heating and fattening while they lack the elements which rebuild bone and muscle. Oats and wheat are very satisfactory from the standpoint of bone and muscle feeds. Johnson grass, Sudan grass and sorghum belong to that class of hay which produce largely energy and fat, while cowpeas, peanuts and alfalfa, Bermuda grass, are hays and belong to the muscle and bone building elements.

For the best results as well as the most economical, horses and mules should have a mixture of

these feeds; where only the fat producing grains such as corn or milo are available, the muscle producing hays, alfalfa, cowpeas and peanuts should be fed; while oats and bran are fed, such as Sudan grass, sorghum or Johnson grass can be used to balance the ration. If only the fattening grains and hays are available, the muscle building element may be had by feeding a handful or two of cottonseed meal at each feed. Hard worked horses eat more hay and less grain while mules will eat more hay than horses.

Don't Always Blame Hens When Eggs Are Scarce.

Rats may be getting them—U. S. Government Bulletins prove they know how to get them. Break a cake of RAT-SNAP into small pieces and place where rats travel. If there, RAT-SNAP will get them—positively. Three sizes, 35c 65c, \$1.25. Sold and guaranteed by Plainview Hardware and Furniture Co. and Perryton Drug. 13-4tc

WE ARE MORE THAN LUCKY

Do you ever stop to think how lucky we of this country are, or do you put in most of the time grouching because it is not exactly a Paradise or Garden of Eden? If we would take more time to figure up our thousands of blessings and less time lamenting that we each do not possess a thousand millions like Oily John, which would be more of a curse than a blessing if we did have it, we would enjoy more real happiness and our digestion would be fifty per cent better.

How would you like to be a Russian and starve to death. How would you relish being a Chinaman and earning six cents worth of rice for a day's work that would break a burro's back? How lovely it would be to be any of those wooden-shoe Europeans and expect your next door neighbor to cut your throat with a sharp sinkersnee most any moment, and have your government actually impoverish you, instead of only stealing a fourth, as

it does here! We have the richest country on the face of the earth, richest in gold and richest in all the blessings and good things which speak for progress, prosperity and the joy of living. We are a big-hearted, generous people, and have helped out all the rest of the world to the tune of hundreds of millions, and have taken a joy out of the giving. We have been and are glad and happy to be able to do these great kindnesses for our fellow men all over the globe. Out of our great plenty we hardly miss it, and prove with it that we have the milk of human kindness flowing in our breasts, as well as human selfishness. We have happy homes, well stocked with food, raiment, player pianos and other canned music, and a Lizzie out in the garage. We have, as a general rule, plenty of employment at a wage that insures comfort as well as a living. Our children have the benefits of the finest public school system of education the world ever knew. We raise enough agriculture products to feed the world. We have millions of loved ones in our family circles, kind friends and good neighbors. We have no great public disasters or plagues. We have good health, splendid appetites and plenty to feed them with. All of which should breed in us a spirit of contentment and happiness.

Nature intended that the female should run from the male, but not too fast to be overtaken, and so that is how she does.

FOR SALE—The biggest bargain in a big tractor that you ever saw: 15-30 Mogul. Can be seen at Plainview Hardware & Furniture Company store in Perryton. Good running shape. Would consider good notes and give one and two years time. Make offer with first letter. Write Box 666 Amarillo, Texas. 13-4tc

The Peoples Supply Company have the sole agency in Perryton for the John Deere and Moline line of farming implements and repairs for same. If you are going to need repairs this summer let your wants be made known to them so that they will have them for you when the time comes. 13-1f

If you want to sell your Land or City property, list it with C. E. McLarty. 9-1f-c

MUST INCREASE THE FARMERS' RETURNS

President James R. Howard of the American Farm Bureau Federation is quoted as saying that the producer gets only 37 cents out of the consumer's dollar and it costs the remaining 63 cents to prepare, transport and distribute those products to the consumer. It is going to be necessary for the American farmer to get a higher return for his products or, in other words, a bigger slice of the consumer's dollar. If we are to keep labor employed in this country the farmer must be restored to a condition of prosperity. Some authorities state that in Denmark the producers receive 73 cents out of the consumer's dollar and the difference is so much that we are led to examine very carefully the conditions in Denmark which enable the producer to get such a high percentage of the consumer's dollar.

Cooperative organizations flourish in Denmark. They are perhaps better developed in that country than in any other country. The building up of these cooperative organizations is largely responsible for the high percentage of return that is going to the producer. The Danes not only have the market end of their business organized, but they

also buy cooperatively. In this country the farmers have devoted most of their time and attention toward the cooperative marketing concerns and have paid very little attention to the buying end of the business. Some organizations are going seriously into the buying end and are beginning to buy merchandise in large quantities for their membership.

The Farmers Equity Union has long advocated going to the factory door and buying farm machinery, fencing, binder twine and other commodities. We have no quarrel with the factories. The man who manufactures a useful article occupies a very economic position and is entitled to a just return on his labor and capital. The farmer can go seriously into the buying end of his business. This is because he constitutes the largest single market for manufactured goods in this country. He is the only group that buys farm machinery, binder twine, posts, fencing and other commodities. Wherever the farmers organize their buying machine they are going to be able to buy direct from the manufacturer, as that manufacturer can not sell to any other group.—Equity-Union Exchange

How Ironized Yeast Fills Out Figure

And Puts New "Pep" and Energy in Thin, Nervous, Rundown Folks

Hundreds of thousands of people all over the country are now taking IRONIZED YEAST tablets for health with results which in many cases are actually astonishing. For thin folks to gain five pounds or more on the very first package is not unusual. Complexions blotched with pimples, etc., are very often cleared up within 10 to 14 days. As for increasing "pep" and energy, apparent "miracles" are reported by folks who were formerly run-down, weak, and lacking in physical and mental vigor.

FREE! Mail coupon below for Amazing Three Day Trial Treatment of IRONIZED YEAST. Watch the Results!

quires that we get a proper amount of vitamins and from our systems. But these two essential elements are lacking in the modern diet. That is why so many of us are thin and run-down.

Yeast Best When Ironized

The thing to do is to supply this lack by taking with each meal two tiny IRONIZED YEAST tablets which contain in highly concentrated form, a specially cultured yeast grown under the strictest supervision for medicinal purposes—a yeast unequalled for its richness in the essential Water Soluble B vitamins. In addition it contains the correct amount of the two other vitamins—Fat Soluble A and Water Soluble C—which are equally important to health. These three vitamins bring excellent results even if taken alone—but when taken with a proper amount of easily assimilated organic iron, as in IRONIZED YEAST, these results are secured often in just half the usual time!

Watch The Results!

Note how IRONIZED YEAST immediately increases your appetite—how it enables you to get real joy out of every morsel of food you eat. See how quickly it drives away pimples, blackheads, etc., and how your newly acquired "pep" makes hard work or play a pleasure instead of a task. Try IRONIZED YEAST today! Pleasant to take—will not cause gas or in any way upset the stomach. Each IRONIZED YEAST tablet wrapped air-tight in waxed seal when made, thus assuring 100% purity and strength. Special directions for children. Go to your druggist or mail coupon today—NOW!

WARNING!

Not all yeast will give the desired results. There are certain types of yeast which have absolutely no value medicinally. By insisting on the genuine IRONIZED YEAST, and refusing cheaper imitations or substitutes you can be sure that you are taking a vitamin tonic treatment which is unsurpassed in effectiveness, convenience and genuine health-building value.

Note:—IRONIZED YEAST is sold at all Drug Stores on our guarantee of complete satisfaction from the first package or your money refunded.

TO THE CITIZENS OF OCHILTREE COUNTY

We note the opinion of some party in regard to a number of the Citizens of the Southwest portion of Ochiltree County associating themselves with the delegates from Hansford County at the recent convention of the D-C-D. Highway held at Canadian. We also note the opinion as expressed by the writer, in the Ochiltree County Herald, is very different to the view of the average citizen of the Southwest portion of this County. We do not believe that the article written, is an expression of the true opinion of the majority of the citizens of the County. Nor do we believe that this party has stopped to consider what was the real intention of the citizens and the County Official whom they seem to think have so far overstepped the duties of good citizenship.

The D-C-D enters the County crossing the east line three miles north from the Southwest corner and runs west a distance of sixteen miles where it turns north to the junction point which is six miles from the turn. Here the road divides. One division continuing north through Perryton and to the north line of the County, thence north and west to Guymon where the road again unites to one route leading north and west. From this junction point south of Perryton, the other division of the road makes west to the west line of the County and the entrance to Hansford County and on through Spearman and continuing west and north finally enters Guymon from the south and reunites with that portion of the Highway which passes through Perryton and the central and northern portions of Ochiltree County.

There is a common interest in that division of the Highway leading south and east from this junction point, to both Perryton and Spearman. But from the junction point both north and west it seems that the interest becomes more or less individual. The community through which the Perryton division of the road passes as well as the town of Perryton, is locally and more individually served by that portion of the road. Likewise the road leading west from the junction point is of more direct advantage to Spearman and the community through which it passes. But even so, there is a common interest to the County as a whole in both divisions of the Highway as it gives to many of the citizens of the County a direct way to the County Seat. Then again the western division of the Highway gives to the people of the South and the Southwest parts of the County a direct way to both Canadian and Spearman and in so far as we can see is of no disadvantage to Perryton or any portion of the County reached by the other division of the road.

We note the writers opinion of the citizens who went with the delegates of the neighboring County to this convention. We also note the candid and unqualified expressions as to the Official duties of the Commissioner from this precinct. The writer says, "He has been elected by the voters of his district as a County commissioner and he represents not only his own particular district but the represents the County as a whole and his district is only a fourth part of the entire County." Now let us not lose sight of this above statement and admitting that it is correct we will state that in our opinion, the citizens of this portion of the County who attended the convention with the delegates from Hansford County, have in no way broken faith with the good intentions as to the upbuilding and common interest of the people of the County as a whole. Nor do we agree that the County Commissioner from this precinct has in any way forsaken his oath and duty. The interest of the Hansford County people was in common with the people of this portion of the County, and we believe was a common interest with the County as a whole. The delegates from Hansford County asked us to go with them, not to work against the interest of Perryton and Ochiltree County, but to work in connection with them for their and our good and we believe that this idea was carried out. We do not understand that the Highway has been taken away from Perryton and we were not seeking that this be done. We were asking that the intention shown at the convention five years ago, the logging of a portion of the Highway through this part of the County be carried out.

In conclusion let us say that the Commissioner from this precinct and the people he represents have spent five years in accomplishing a task that was demanded by the D-C-D Association—the opening and grading of thirteen miles of road forming a connecting link from the junction point in the southern part of Ochiltree County to the Black School. Let us further state that we found it necessary to borrow the road machinery required for the grading of this stretch of road and

PROCLAMATION

To the Legionnaires of Texas:

On May 30th the American Public will again bow its heads in solemn thought and prayer honoring the departed heroes of all wars and fresh in the minds of this generation the sacrifice, suffering and death of the builders of our government in order that we might enjoy democratic liberty and the pursuit of happiness.

We, as members of the American Legion of Texas, should sincerely join in the perpetuation of the sentiments called forth by Memorial Day. In addition to the solemn thoughts and sacred memories of our fallen brothers who made the supreme sacrifice and in whose honor this day holds peculiar significance, we can feel both joy and thanksgiving for the triumph and victory of the principles for which our country entered the late war.

We have further battles yet to fight and win—the great battle of peace—the fighting and winning of which will make our country one of peaceful homes and a contented, progressive citizenship. We must continually strive to teach those with whom we mingle the beauty and glory of one hundred per cent Americanism, and the deep sense of satisfaction which a man may only enjoy by absolute loyalty to his flag.

In connection with Memorial Day the American Legion Auxiliary will hold Poppy sales on Saturday May 27th. The entire proceeds of the poppy sale which goes to the Auxiliary will go directly to their hospital relief fund and will be used in relief work, without deduction for administrative or any other expenses.

It is especially fitting that all Legion members participate eagerly in the Poppy sales and render all assistance possible, for the funds derived therefrom will greatly aid those of our comrades who are confined in the homes and hospitals suffering from disabilities accruing from wounds received in line of duty.

I do therefore hereby proclaim May 30th, 1922, as Memorial Day, hereby instructing all posts of the American Legion in Texas to hold such suitable programs and exercises as they may deem proper, keeping in mind that it is a day sacred to the memories of those who did not return.

WAYNE DAVIS,
Department Commander.

Less F. Hall of Follet was a business visitor here last Saturday.

F. Elmore of Gray was a pleasant visitor at the Herald office Wednesday and also left the "necessity" so he can read the Herald for the next year.

GOLDSTEIN WEAKENS

It is reported at this writing that the nomination of the notorious Nat Goldstein of St. Louis to be collector of internal revenue in that city has been withdrawn at the request of Goldstein himself.

Goldstein's nomination was sponsored by Senator Spencer (Rep., Mo.), who vouched for Goldstein's as a man of "absolute integrity." This is the same Senator Spencer who vouched for Senator Newberry and had charge of Newberry's defence in the Senate.

When Goldstein admitted that he had taken \$2,500 of the Lowden campaign money when a candidate for delegate to the Republican National Convention of 1920, Governor Lowden declined to accept his vote. Governor Lowden now states that Goldstein's explanation in his testimony before the Senate Investigating Committee was absolutely false, and says that he was afterwards informed that Goldstein's testimony was given at the suggestion of Senator Spencer, member of the Senate Investigating Committee. Concerning Goldstein's nomination to be revenue collector, Governor Lowden says:

"If he was unfit to sit as a delegate in convention, it is hard to see how he can be regarded as a fit candidate for revenue collector."

Concerning this nomination, the White House said informally that it neither boasts of nor apologizes for its nominations.

Of those directly concerned with his appointment as collector, Goldstein seems to be the only man who realizes the enormity of the offense against decency by asking to have his name withdrawn.

See "Hurricane Hutch" the greatest of all stunt serials, by Charles Hutchinson starting at the American Theatre June 2, 1922. 14-3tc.

The service stations have to raise the price of gasoline a cent quite often, to pay for the chalk they use in marking up the price.

SYSTEM OF HOG SANITATION

Methods Developed by Department of Agriculture Require Little Extra Attention.

(Prepared by the United States Department of Agriculture.)

Methods developed by the United States Department of Agriculture for raising hogs free of worms have proved so successful wherever they have been given a trial, as in McLean county, Ill., that the department feels no hesitancy in recommending them to all hog raisers in the great corn-producing areas of the Middle West.

The system recommended by the department is simple, practically the only requirements being a little extra care and labor. Just before the farrowing season it is necessary to clean the farrowing pens thoroughly with hot water and lye, and before the sows are put in all dirt is carefully washed from their skins. Within two weeks after farrowing the sows and litters, which have not been allowed out of the pens, are moved to a clean pasture—one that has not held hogs since cultivation. The young pigs, in order to get a good start without worms, must be kept on clean pasture away from wormy hog yards without contact with other hogs, except the mothers, for at least four months, after which they are past the greatest danger from worms. To be sure, it is necessary to provide proper feed, water, and shelter, but that is what any pig should have.

Experience has shown that there are four good reasons why this swine-sanitation plan means money to the farmer. In the first place, pigs without worms grow to greater size and make more gain for the same quantity of feed than those that must use a part of their feed to grow an army of worms. It has been shown also that when those parasites are kept under control fewer young pigs are lost from thumps. Pigs that are not weakened by the inroads of worms are, as a rule, less susceptible to the various diseases that are common to them. And,

Young Pigs, Particularly, Should Have Clean Pens.

finally, the quality of the pork produced by clean, healthy pigs is better than that from wormy, unthrifty ones. Veterinarians in the department say that pigs infested with worms seem noticeably more susceptible to mange, necrobacillosis, and possibly other diseases, also, than those that are free of them. Both lots of pigs in the government exhibit at the recent International Live Stock exposition were infested with mange mites, but the worm-free pigs seemed to be highly resistant to their attacks, and in contrast with the wormy pigs showed little evidence of worry by the mites.

All swine raisers in the corn belt should find it profitable to adopt this system of swine sanitation, but breeders of purebred hogs should find it particularly advantageous, for a little gain in size and appearance makes a big difference in the show ring and in the sale ring.

HORSES ARE SOFT IN SPRING

Muscles About Neck and Shoulders Are Full and Plump—Collars Will Need Adjusting.

Most farm horses are at least moderately fat in the spring. In this condition the muscles about the neck and shoulders will be full and plump and it will take a rather large collar to fit. The soft condition of the horses, however, coupled with the long days of hard work, causes them to shrink in flesh rapidly, and a collar that was a good fit at the beginning of the season may be entirely unsatisfactory three or four weeks later. In some cases the collar can be made to fit by using a sweat pad, while in others a new or different collar will be required. It is better, however, to have collars that fit than to use sweat pads.

Make Sow Exercise.
 Whole oats scattered on a close floor are fine to feed sows and keep them up and exercising a portion of the day which gives them vigor and more strength to withstand the ordeal of farrowing.

No Cure for Scours.
 There is no sure cure for scours in calves. It is another case of the old saying that "An ounce of prevention is worth a pound of cure." The main thing is to so handle the calves that scours will not appear.

A Service of Safety

A bank, of course, keeps your money safe, it just as surely can help you handle your money safely.

For instance, a checking account here is more than a simple convenience. It is a guarantee of security to you in the transmission of funds. It enables you to keep your money instantly accessible without danger of loss.

CHECKS PROTECT YOU

Your checks drawn on this bank carry your money to all parts of the country at the cost to you of a postage stamp. Checking enables you to keep your money in a systematic way. The stamp on your check book carry sufficient entries to do so.

The cancelled checks, returned to you each month, are legal receipts for your payments. These many other benefits are your if you establish a checking account here. We will be glad to do it further with you.

Perryton Filling Station

Telephone No. 140

PERRYTON, TEXAS

M. H. Levi of Liberal, Kansas
list in Eye, Ear, Nose and
will be in Perryton on Wed-
June 14th, at Dr. Brewer's.
wishing to have Tonsils and
removed or Glasses Fit-
of Eyes Treated should meet
15-tf.

CORN WANTED—We want good
corn for milling purposes. Bring it
in at once. Perryton Milling and
Ice Co.
All three banks will close next
Tuesday, May 30th, 1922 on ac-
count of it being Memorial Day.

FOUND—Pair of gold rimmed
spectacles on road north of Per-
ryton. Owner may have same by
calling at this office and paying
for this notice. 15-tf.

Conan Doyle says that people who
go to hell will have a chance to
work themselves out. Glad to hear
it, but it sure will be a hot old job,
at best.

The new tariff bill is to put a du-
ty on Brazil nuts, but nothing is
said about a million or so local nuts
that are at large.

Now that a candlestick is sweep-
ing the country, we may expect
hoopskirts, corkscrews curls and
pantalettes to reappear next.

DAMAGED WHEAT

As the new wheat season approach-
es we feel that everyone connect-
ed with the grain trade should use
their best efforts to prevent the
trouble from damaged wheat, which
we have had the last year.

You are aware of the fact we will
have a carryover of low grades of
wheat and no doubt they will make
a wider difference in good quality
and damaged wheat this year.

It will pay every farmer to see
that this wheat goes into stack in
good dry condition and let the
thrasher pass you up when your
wheat is too damp to thrash.

We are anxious to help our
customers and believing a little pre-
vention may save a lot of damage
we took this opportunity of making

a suggestion to you. This sugges-
tion is made for the purpose of pre-
venting heat damage in the grain,
wheat that is threshed before going
through the "sweat" must under-
go this change in the bin and with-
out ventilation musty odor and heat
damaged kernels are very liable to
result.

This condition is the result of
mass wheat in action and cannot
occur where proper ventilation is
maintained. If the owners of wood-
en granaries will make a box, us-
ing two pieces of lumber one inch
thick and six inches wide, and two
pieces one inch thick and eight in-
ches wide, boring a number of inch
augur holes in each of the four
sides and covering them with wire
screen, then cutting a square out of
the floor of the granary the size of
the box and place one of these boxes
for each 10 square feet of the
floor space of the granary very lit-
tle damage will result to grain
stored in bins thus equipped.

Hoping this suggestion will be of
some benefit to you and with best
wishes.

RESIDENT LAND OWNERS**

STATE OF TEXAS
OCHILTREE COUNTY

We the undersigned Jury of
Freeholders, citizens of said Ochil-
tree County, Texas, duly appointed
by the Commissioners' Court of
Ochiltree County, Texas, at its
March (Call) Term, 1922, to view
and establish a 40 ft. First class
Road as hereinafter designated and
having been duly sworn as the law
directs, hereby give notice that we
will, on the 17th day of June 1922
assemble at beginning of above pro-
posed road and thence proceed to
survey, locate view, mark out and
establish said road.

Beginning at the S. E. Corner of
Sec. No. 41 in Block No. 13, T. & N.
O. R. R. Co. the S. W. Cor. of Sec.
No. 42 same block;

Thence East one mile on the
South Section Line of Sec. No. 42
and the north line of Sec. No. 55 in
Block No. 13, T. & N. O. R. R. Co.,
to the S. E. Cor. of Sec. No. 42 the
S. W. Cor. Sec. No. 43 same block;

THENCE North two (2) miles
North on the East Sec. line of Sec.
No. 42 the W. Section Line of Sec.
43 in said block No. 13, T. & N. O.
R. R. Co. to the N. E. Cor. of Sec.
No. 39 the N. W. Cor. of Sec. No. 38
in same block;

THENCE East One (1) mile to
the N. E. Cor. of Sec. No. 38 the S.
E. Cor. of Sec. No. 27 in Block No. 13
T. & N. O. R. R. Co.;

THENCE North one (1) mile to
the N. E. Cor. of Sec. No. 27 in said
Block; No. 13 T. & N. O. R. R. Co.;

THENCE beginning at the N. E.
Cor. of Sec. No. 39 & S. E. Cor. Sec.
No. 26 in Block No. 13, T. & N. O.
R. R. Co.;

THENCE West on Sec. lines two
(2) miles on the N. Line of Sec. No.
39 and 40 in Block No. 13, T. and
N. O. R. R. Co., to intersect the pub-
lic Highway running north.

And we do hereby notify any and
all persons owning lands through
which said road may run, that we
will at the same time proceed to as-
sess the damages incidental to the
opening and establishment of said
road, when they may, either in per-
son or by agent or attorney, present
to us a written statement of the
amount of damages, if any, claimed
by them.

Witness our hands, this 17th day
of May, A. D. 1922

LET'S PRAY FOR EACH OTHER

According to all these talented
English geeks that are continually
coming over here to lecture us on
our shortcomings—at so much a
lecture—we Americans are a bad
lot and past saving. We do not
know what to suggest as a remedy,
unless we set aside a week to pray
for each other. From the English
standpoint we sure are in bad. Mr.
Chasterton came over and told us
how little we knew, and took a
bunch of American money home
with him as a result, which proves
that he is right or we would not have
passed him out our hardearned kale,
Dickens and Thackeray long ago
flagellated us with benevolent sa-
tire. Mrs. Margot Asquith has
just finished mirroring our crudi-
ties, and now Mrs. Astor is busy
instructing us wherein we have fail-
ed, and pointing out the way to at-
tain redemption. How sad it is that
these British highbrows do not stay
here with us and lead us out of the
benighted wilderness through which
we are groping toward the super-
excellence of British ideals.

Mrs. Astor was born here, but
long ago rejected our citizenship, so
we have to get along without her
as best we could. Most of us can-
not get away like she did, but are
tied down here to the land of Wash-
ington, Lincoln, Grant, Lee, Bell,
Edison, the Wrights, Gertrude Ath-
erton, Ida Tarbell, Bryan, Wilson,
Harding and other provincials who
never had the advantages of En-
glish environment. We will just
have to wiggle along and profit by
the occasional visits of those who
know so much more than we do,
but probably the Lord will be good
to us in the future, as He has been
in the past, erring though we are,
and keep us, Protestant, Catholic,
Jew or Pagan, at the task of mak-
ing America nobler, a better and
freer land, and its citizens always
able to pay the price into a British
lecture.

So many people wink at the law
nowadays that they got crow's feet
wrinkles under the left eye.

Federal and State taxes will
never come down until the link
which unites tax-eaters with graft
shall have been broken.

Our Government paid three bil-
lion dollars to profiteers who had
unfinished contracts, but it can't
pay a few million to the men who
wor the war.

ANIMAL FEED IS IMPORTANT

Meat Scrap, Milk and Its Products, Tankage or Fish Scrap Increase Egg Yield.

(Prepared by the United States Department of Agriculture.)
A great increase in our annual egg production may be expected when poultrymen and farmers in general recognize the importance of animal feeds in the rations for the laying flock. The demonstration of the superiority of feed combinations containing meat scrap, milk and its products, tankage, or fish scrap is one of the most valuable additions to our knowledge of poultry management contributed by the United States Department of Agriculture and various experiment stations.

Practically all experimental tests have shown that these feeds will greatly stimulate egg production, especially during the fall and winter months. The fact that many farmers get no eggs at all during this period may usually be attributed to a lack of essential animal feed. The addition of from 10 to 25 per cent of one of those named would in most cases make a remarkable difference. Which one of these feeds should be used depends upon local conditions and prices. They are of about equal value when the protein content is taken into consideration. The fish meal and tankage have given just as good results as meat scrap. Milk is just as good when available at a low cost, and fresh butter-milk and skim milk produce good results. In some sections condensed buttermilk and semi-solid buttermilk have been fed with success.

In a test extending from November 1 to July 10 on the government farm

Hens Need Animal Feed to Make Big Egg Returns.

at Beltsville, Md., 30 hens on a ration without meat scrap or any animal feed averaged 74 eggs each. Another flock of 30 hens of the same breed during the same period laid an average of 113 eggs each, the difference of 39 eggs being attributed to the ration which contained meat scrap. Both flocks were out on range whenever the weather was favorable, which made the difference less than it would have been had the birds been kept in pens. In a test made by Purdue university agricultural experiment station animal feeds were shown to have a decided value in the ration of laying hens and pullets. The pullets fed skim milk averaged 140.2 eggs in a year; those fed meat scrap, 135.9 eggs, and those in the check pen that received no animal feed of any kind laid an average of only 61.2 eggs.

It has been shown that it is impossible to judge the value of a hen as a layer unless she has been fed a ration that would give her an opportunity to demonstrate her capacity. Pullets that have not yielded profitably because of a ration lacking in animal matter have become profitable layers when the defect in the ration was corrected.

CARE FOR INCUBATOR LAMPS

Some of Principal Reasons for Smoking Are Improper Trimming and Poor Oil.

Guard against smoking incubator lamps. Not allowing for wick to creep up as it warms, not fitting lamp shade tightly, improper trimming of wick, filling lamp too full, direct draft on lamp and poor grade of oil are the principal reasons for smoking. All of these can be avoided by care.

SEEK CONSTITUTIONAL VIGOR

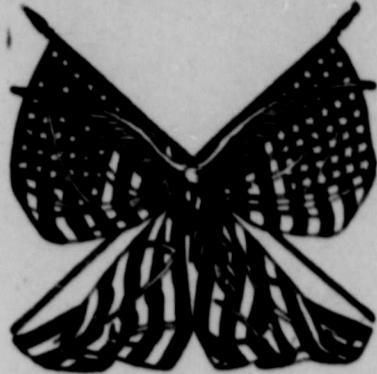

Good, Strong Birds Are of Great Importance in Building Up Flock of Heavy Layers.

Constitutional vigor is most important in building up a flock of heavy layers. No bird should be used for breeding which ever has been sick. Good, strong, vigorous birds may be used for a number of years; longevity is a real test of constitutional vigor.

BEST GESE FOR BREEDERS

Usually Waste of Time to Try to Dispose of Old Fowls—Keep Them for Breeding.

Old geese do not sell well in market, and it is usually a waste of time and money to attempt to so dispose of them. Keep the old ones for breeding purposes, as they will be serviceable for from ten to twenty years, and then sell the young ones at market.

NOTICE

The Blue Mound Cemetery Board will meet at the Cemetery on May 30th at 2:00 p. m. for the purpose of decorating the graves, electing new officers and to attend to all unfinished business. We would like to make out you a deed to your cemetery lot if you have not one. Church services at 3:00 p. m. Every one invited to come.

Ira J. Teurman,
Secretary Cemetery Board.

Rev. Albert C. Fisher and wife and Rev. Little left Monday for their home at Fort Worth, Texas where they will take a few weeks vacation before starting their next meeting at Plainview, Texas on June 4th. They have been continuously in meetings since January 15th.

Mr. and Mrs. Thos. Thompson returned Saturday from a visit with their daughter at Fairview, Oklahoma.

TWO MEN BURNED TO DEATH

About one o'clock, yesterday morning, the Texas well, near the Smith-Caper well, north of Panhandle, caught fire, and two men were burned to death.

The escaping gas from the well caught fire from a shorted electric light wire. The flames following the explosion burned the teamster, who was near the well, so severely that he later died, and the driller, who was at the time, escaped from the burning derrick, but later went back into the well house for some purpose, and was unable to get out again. His body had not been found last night. —Miami Chief.
