

More Moisture for Part of County

Additional moisture fell over the south half of Collingsworth Saturday night and Sunday, growing lighter to the north and playing out by the time it reached the Samnorwood and Dozier area.

The heaviest rainfall was on the county line south, in the Loco area and to the south along US Highway 62.

Two and a half inches was reported in the vicinity of the Cliff Campbell and Frank Campbell ranches.

At the Earl Alexander place and Loco, however, an inch and a half was measured.

This moisture grew lighter to the west.

Wellington measured only .29 inch, but throughout the Dodson area, approximately an inch fell.

Reports are that the moisture is still making cotton, but the crop will be needing sun right away.

Most of the dryland crop in that area will make half a bale per acre or better, and in isolated spots, the cotton will make more than last year.

Only light rain fell at Quail over the week end, but for the entire spell of moisture, from three to five inches has fallen in that general area.

Tom Crabtree, long-time resident of the area, said that quite a bit of cotton was open in that part of the county, and the wet weather is beginning to damage some of it.

Wednesday morning, Sept. 30, most of the county was foggy and drizzling rain was reported at Dozier. While this area did not receive rain over the week end, the moisture for the last week ranges from three to four inches.

Dub Marchant, manager of the Farmers Co-op Gin in Wellington, said that he believed the moisture was doing a lot more good than harm and that damage to open cotton was very light.

While the insect situation is still good, Marchant did point out that there are a lot of boll weevil in the fields from a late hatch. They are not doing any damage, but they are the ones that will winter over and cause trouble for cotton growers next year.

Rockets Use Open Date to Recuperate

The Wellington Skyrockets have an open date this week and they will use the time to get injured players back in condition.

Although he is the only player expected out due to injuries, Coach Beck said "some are kind of low in grades and unless they pick up we are liable to lose some that way."

With Fire Prevention Week approaching we are reminded of the invaluable service The Wellington Volunteer Fire Department has performed for the people of both Urban and Rural areas for over 47 years. And as we express our thanks to this splendid organization, we would like to remind our friends and customers of some of the instructions The Fire Department itself has given out in the past in their effort to prevent the destruction of lives and property by Fire.

DON'T GAMBLE WITH FIRE THE ODDS ARE AGAINST YOU

Fires start when people forget danger spots—Overloaded Electrical Wires — Overheated Furnaces—Piles of trash — Leaking Gas Lines.

There are hundreds of others, if you are in doubt ask your fire department to check your home for you. Prevent fires before they can destroy you.

Fire Prevention Week October 4-10

We commend the Wellington Fire Department on its splendid rural coverage. We believe that no county in the Panhandle has better protection than Collingsworth . . . but because of the distances the fire truck must run, losses can be heavy.

Because of this, it is common sense and good money sense to "fire-proof" your farm by using electricity. Greenbelt Electric will work with you to eliminate as many fire hazards, both in your farm home and barns and other buildings, as is possible.

Electricity is for your convenience . . . it is your hired hand . . . and a source of fire prevention on the farms of Collingsworth.

Republicans Start Drive for Texas Votes

AUSTIN.—An innovation in Texas politicking was kicked off this week by the nine GOP candidates for state office who began extensive campaign tours on the "Goldwater Special", a gold-painted touring bus.

Jack Crichton of Dallas, the nominee for governor, led the team on the first of two four-day journeys by bus that will take the team criss-crossing over Texas.

A four-day tour by airplane is planned late in the campaign for the candidates, billed as "A Team You Can Trust."

"We believe Texans want to see and hear the Republican candidates for state office who are solidly supporting Senator Goldwater," Crichton said. "I traveled with the Senator on his recent triumphant Texas appearances and I know by the enthusiasm he kindled that Texans want two-party government to promote a healthy political climate."

Crichton is joined by the following candidates: State Representative Horace Houston of Dallas, lieutenant governor; John Trice of Waco, attorney general; T. E. Kennerly of Houston, state supreme court; Don Flanagan of Richardson, railroad commission.

Also Dallas Calmes, Jr., of Houston, comptroller; Fred S. Neumann of Beaumont, treasurer; John Matthews of Abilene, land commissioner; and John Armstrong of Kingsville, agriculture commissioner.

"Beulah," a 3-year-old, 1,000 pound elephant from Houston, will accompany the bus tours. Beulah made her GOP debut at the Republican state convention in Austin Sept. 15, wearing a Crichton sign.

LOOKING AHEAD

by Dr. George S. Benson

TESTING TIME IN VIET NAM

It is amazing when one looks at the record, to discover how much of the tangled confusion in Vietnam actually derives from policies determined by U.S. politics—too much of it approaching the unprincipled, and therefore bad.

One need cite only the betrayal and liquidation of the Diem family, the only really effective anti-Communist leadership South Vietnam has had.

But the dabbling continues, while the same White House courtiers and commentators who saw no virtue whatsoever in Madame Nhu now search in vain for some way out of their dilemma.

Our peace-party neutralists were in real difficulty when they had to line up behind President Johnson in his strike on the PT boat installations, the very sort of action they had been lambasting Senator Goldwater for suggesting. Action of any kind was plainly reckless Goldwaterism.

Whether the President's escalation of the conflict via sea power can smother the conflict before election time, and thereby smother the Republicans, remains to be seen.

The Honolulu plan of June last was supposed to allow some firmness, but leave room for the customary return to negotiated neutralism.

However, the Congress, as a result of the decisive action in the Gulf of Tonkin, has given by resolution its support to the President "to take all necessary measures to repel any armed attack against the forces of the United States and to prevent any further aggression."

Congress apparently meant to leave room for a "win" policy in Southeast Asia, since the prevention of "further aggression" is broad enough to include virtually any kind of action the President cares to take in preventing the Communists from taking Southeast Asia and subsequent control of the Western Pacific.

Actually, the President has said in effect that the reprisal against North Vietnam for its recklessness in international waters was not to be interpreted as part of a new "win" policy. This is a further invitation to negotiated neutralism if U.S. policy is to continue its vacillation and customary lack of initiative.

Speculation as to why Ho Chi Minh sent out his PT boats has now led to the tentative conclusion that some kind of political results rather than military are to be expected.

Currently the political repercussions in Saigon seem tremendous. Meanwhile, the jungle war continues, pretty much on the Viet Cong's terms. The supply routes and sanctuaries in Laos, Cambodia and North Vietnam remain untouched.

Although the PT boat aggressions were directed against U.S. warships, these acts were no different in nature from the unprovoked attacks that have occurred continuously against South Vietnam.

The Viet Cong last month, in

fact, began to throw larger units into its attacks. This was thought to signify that it may be closing out the countryside phase of its attack. The riots in Saigon may mean that infiltrators will attempt to mop up the larger centers next.

If ever there was an example of a people being victimized by their own bad politics and that of their friends, surely this is it. It is little comfort to realize that most of the damage has been done by people having good intentions.

Candidate Johnson is a fighting campaigner. It is to be hoped that in his ambition to achieve greatness among Presidents with his own mandate from the people, he will not undertake some drastic military action that will allow his cohorts to garner votes with the old "don't change horses" theme. If the campaign becomes a real horse race, we hope that both the candidates, the parties, and the voters may keep their senses and allow no mere "electioneering" to betray us with its dirty politics.

If there is an escalation, let it be through principle, not election year expedience.

It is obvious that President Johnson cannot show himself as leader of the only party that favors "peace" and at the same time set up some explosive situation. If there is any explosion, it ought to hit the "soft" crowd on anti-anti-Communists who run the State Department behind the scenes and possibly the Pentagon.

The real confrontation ought to be in Washington. It may be too close to November to expect this, but the people would follow the Johnson banner more enthusiastically if he would throw the appeasers out of his government.

We cannot play politics, however, with the deadly issue of war and peace, national defense, and freedom's future.

A Well-Trained Department Helps Keep Fire Loss Low

This week, we observe the annual Fire Prevention Week, which should not be taken with the lightness we so often give to the many events observed with a "week".

As in other fields relating to our health and our lives, our possessions and property, prevention is the key. There is no remedy for a house that has burned ... a life lost in a fire.

The rules of fire prevention are simple, and they revolve around common sense and care, and a consciousness at all times of the consequences of carelessness. Even then fires occur that seem beyond human control, where the rules of fire prevention have been carried out.

From time to time we have a damaging fire, but over the long run, we have been fortunate in our fire losses.

This, in most part, is due to the efficient and devoted work of the Wellington Volunteer Fire Department, which through the years has been built into an organization that stands high among departments of West Texas.

The stable leadership of the department is in part responsible, for few departments in the state can count as few chiefs over a 40-year history. The other part is the willingness on the part of the department members to train and study—on their own time—what it takes to be a good fireman and how fire loss can be kept down.

These are things to remember, not only in Fire Prevention Week, but every week.

CROSSROADS REPORT

Dear Editor:

I see where all four men in the Presidential-team race have been assayed and their financial weight made known.

Which dope fixes it so the busy American voter can pick his favorite by the same time-saving method that is customarily used to rate his neighbors.

Like a man with a new car is instantly recognized as superior to a man with an old car, and a man with \$14 million naturally over-ranks a man with only \$3 million.

I see where the Americans for Democratic Action and the John Birch Society have been getting lots of free publicity here lately, and the membership lists of both clubs are growing.

But only a few outfits can luck out and get millions of dollars worth of this free notoriety in newspapers and magazines, propagated by big writers and little writers.

NEWS LETTER from Congressman WALTER ROGERS

FAITH IN AMERICA

The United States of America is the finest and the greatest nation in the history of mankind. No civilization, modern or ancient, can produce any comparable accomplishments in the government of mankind. No country in any civilization in the history of mankind has approached our country and its philosophies in guaranteeing, insuring, and preserving the basic rights and dignity of the individual man.

Because of our position, brought about by the blood, the sweat, the tears, and the devotion to duty of our own ancestors, we have living evidence to substantiate the faith and confidence we should all have in our philosophy of life, in our form of government, and in our understanding of the needs of man.

As far as I am personally concerned, this faith and confidence is absolute and concrete, and it is my wholehearted feeling that we can, as a nation, meet and destroy any challenge from within or without.

I have no difficulty in understanding why Nikita Khrushchev would condemn and demean our institutions, our philosophy of government and our achievements. He has visited our country for only a short stay. However, he saw enough to convince him of the great strength, of the great faith, and of the great confidence enjoyed by the American people.

Certainly it would be his mission to return to Communist Russia and try to belittle our institutions, our government, our resources, and our ability.

The same could be said of Mao Tse-tung, except that he has not visited our country. He, too, is a party in interest with Khrushchev to try to destroy the United States of America and all that it stands for. He is a Communist at heart and bent on the domination of mankind in this world.

The same rule could be applied to Castro, who has known

this country much better than any Communist. Castro is fully familiar with our country, our government, our philosophies, our principles, and most of all, our people. He has enjoyed the great luxuries that have been made possible for mankind through the ingenuity of our people in this great country.

We could name others in Communist countries or in borderline countries who are always ready, able, and willing to downgrade, poor mouth, vilify, condemn, castigate, and to eventually destroy us and what we stand for. Yes, I can understand these people who are either misguided or acting with malice aforethought. They feel that they have something to gain.

But what I cannot under-

stand are those Americans among us who leave no stone unturned to cast every suspicion on our government, our institutions, our activities, our way of life, and even their own neighbors. People who, in many instances, are living in the lap of luxury, enjoying every conceivable benefit that has yet been produced by man. Some of whom have not even had to work for the riches they now enjoy and many of whom have received the richest blessings of God and their fellowman, and who, because of their material wealth could help measurably in the solution of many of the ever-present problems of man. I can not believe that they would consciously contribute to the cause of those enemies or freedom who constantly seek our destruction. I

would hope that they would re-evaluate their positions, their activities, and their attitudes, and realize that an unintentional dis-service is as damaging as if it were intentional.

Our country, its institutions, its resources, and all of its people need these other Americans for a united front in the furtherance of the basic philosophy of the freedom and dignity of man as an individual, the bedrock upon which this country stands.

Longer Postal Hours Ordered for Christmas Deliveries

Longer post office window hours, expanded delivery services and large-scale extension of the ZIP-coded parcel post speedup are planned for Christmas, Postmaster General John A. Gronouski has advised the local postmaster, L. B. Bratten.

Gronouski outlined to the Wellington postal head, three major new steps he has taken "for the best Christmas mail service the postal service has ever had":

1. Expanded post office window hours Dec. 5 to 26 as

deemed necessary by the local postmaster.

2. A six-day week Dec. 7-31 for parcel post deliveries, instead of a five-day week.

3. Completion by Nov. 1 of Phase III of ZIP Code parcel handling at about 130 more "sectional center" post offices strategically located-mail massing points, providing faster delivery up to 24 hours or more for parcels with ZIP Code.

In Phase I and II, approximately 75 offices with receipts of \$5 million annually and above activated faster Zip Code sorting and dispatch by Sept.

1. The 130 in Phase III includes offices with receipts of \$1 to \$5 million.

In addition, many other sectional center offices with smaller receipts will have the program in operation by early December, in time to help speed delivery of Christmas gifts mailed with the ZIP Code.

The postmaster general told Bratten the Christmas plans are part of a nationwide program to bring postmasters into more responsible positions in postal management as "real partners in providing better mail service at all levels."

Rockets Hit Paducah With 22 to 0 Score

By JACK FORD

In a game of fumbles and pass interceptions, the Wellington Skyrockets downed a small and scrappy Paducah Dragon eleven at Paducah Friday, Sept. 25 by a score of 22-0.

Capitalizing on two Dragon fumbles the Rockets made the Dragon mistakes pay off with touchdowns.

The Rocket defense of Johnny Maxwell, Skippy Duncan, Joe Rudy, Phillip Hughey, David Caison, Lynn Wolf, Larry Henard, Mike Smith, Roger Weems, Andy Bell, Adam Garcia, Wayne Barton, Jackie Needham, Chester McLain, Gary White and Neal Roberts was again the mainstay of the game, stopping two good Dragon drives on the Rocket 2- and 10-yard lines.

The Rocket offense was slow in getting started and it wasn't until they put together a 55-yard touchdown drive, without a penalty, fumble, or pass interception, that they really got started.

The Dragons won the toss and received. They couldn't

The rest of the first half was just plain hard-knocking football. The Rockets did get one drive going. They moved to the Dragon 17 yard line, but there they were stopped when the Dragons intercepted a pass.

At the start of the second half, the kickoff was taken by Barton on the Rocket 15 and run back to the Rocket 45. McLain and White moved the ball to the Dragon 36. The next play the fans saw a great job of team effort by the Rockets, when Wayne Barton took the ball and behind some fine blocking went all the way for the second Rocket touchdown. A pass from Barton to White was good for 2 extra points. Rockets 14, Dragons 0.

The last Rocket touchdown came close to the end of the third quarter. After an exchange of fumbles, the Dragons lost the ball to the Rockets of the Dragon 11. Plunges by N. Roberts and Olin Moore moved the ball to the Dragon 2 yard line and W. Barton went over for the touchdown. Barton also ran over for the two extra points. Rockets 22, Dragons 0.

Last-Minute TD Gives Skyrocket B Victory

A touchdown in the last three minutes of play gave victory to the Skyrocket B over the Cyclone B, 21 to 14, at Memphis Thursday night, Sept. 24, in the closest contest this season.

During much of the final period, Wellington lagged by one point, as the ball changed hands several times in mid-field.

The Rockets received the kickoff but were unable to make a first down and had to punt. Memphis drove downfield but lost the ball to Wellington on the latter's 40. The Rockets started from there and a few minutes later Donald Wolf broke for a 50-yard gain down to the Memphis 3, behind the effective interference led by Marion Barton, Andy Henard and Dan Hatch.

From that point, Tim White scored on a quarterback keep play, with Lewis Watkins opening the hole for him. Johnny Harris kicked the extra point to give Wellington a 7-0 lead.

Memphis took the kickoff, then fumbled the ball and Wellington again took over in the vicinity of the 40 yard line.

On the first play from scrimmage, Donald Wolf, on a right sweep went all the way for the second Rocket score. Randy West and Freddy Mayhugh

threw key blocks.

The try for the extra point was no good.

From this point, the game was a defensive battle until late in the second quarter when Memphis scored about three minutes before half time, then ran the extra point to give a score of 13-8 favoring Wellington.

The third period was scoreless. Both teams moved the ball but couldn't make the fourth and 10. Wellington fumbled the ball a couple of times, according to Coach Stavenhagen.

Early in the fourth quarter, Memphis was able to mount a sustained drive and about midway in the period the ball went over.

Wellington was unable to score and had to punt. A few minutes later Memphis punted and the ball went back and forth several times.

With three minutes left in the game, the Rockets had the Cyclone backed up against their own 30 yard line and they had to punt on the fourth down situation. Andy Henard blocked the punt and the ball rolled free.

Marion Barton picked up the ball and ran it down to the Memphis 4-yard line.

With only four plays remaining in the game, Tim White

Crackers Win Over Canadian 18 to Nothing

Wellington's Firecrackers trounced the Canadian junior high team 18-0 in a game played here Thursday, Sept. 24.

The teams were about equal in size but Canadian was outplayed during the entire game, according to Coach Carroll Nunnelley.

The Firecrackers scored early in the first period with a 45 yard sweep left run by Joe Brock; Dallas Holland threw a key block and the entire team did exceptionally well on the play, their coach declared.

The try for extra point failed, and the quarter ended 6-0 in favor of Wellington.

Neither team scored in the second quarter. Canadian consistently ran three plays and punted, while the Firecrackers had several bad breaks.

The half ended with Wellington on the Canadian 2-yard line fumbling the ball.

Wellington kicked to Canadian to open the third quarter. Canadian again ran three plays and punted. Gary Brewer tossed a 20 yard pass to Nicky Watts, who then ran the re-

sulted in a quarterback sneak on the second play of the series. Freddy Mayhugh passed to Doyle Stewart for two extra points.

In the final action of the game, Marion Barton intercepted a Cyclone pass.

maintaining 30 yards for a touchdown. Again the try for extra point failed, and the remainder of the quarter was played in mid-field.

The final score, in the fourth quarter, came on a reverse play to the left with Brock again carrying the ball from about 20 yards out, and with Watts throwing a fine block.

The try for the extra point failed this time, too.

Canadian made only three first downs, while the Firecrackers made 12; the Firecrackers did not punt a single time.

The starting lineup included Jerry Wooldridge, center; Teddy Martin, right guard; James Bohannon, right tackle; Nicky Watts, right end; Jesse Morrison, left guard; Mike Poteet, left tackle; Terry Hanna, left end; Gary Brewer, quarterback; Tony Hurst, left half; Victor Bobo, fullback; and Joe Brock, right half.

Every boy on the team played at least part of the game, and these in addition to the starters were Ricky Brown, Larry Kane, Eddie Orr, Mike Little, Jim Clark, Danny Brooks, Tim Cates, Gary Farar, Brice Jackson, Anson Parker, Ricky Nall, Truitt Holton, James Jones, Danny Watts, Rufus Sosa, Joe Cummings, Don Martin, Clyde Harper, Dallas Holland, Bill Ferguson, Charles Mauldin, Danny West and Chuck Wilbur.

Braille Worker Visits Area

Murel Moddrell, representative of the Christian Record Braille Foundation, Inc., has been visiting and speaking in the vicinity about the work this organization is doing in behalf of the blind people of the Wellington area.

The Christian Record Foundation was started back in 1899 by Dr. A. O. Wilson, who became blind at the age of 9, when both eyes were removed. It began with an old hand wringer, which was operated by volunteer workers, and the first month this "press" produced 75 Braille journals entitled "Christian Record." The same journal is published today and is the oldest continuous Braille publication of its type in the world.

However, instead of a hand wringer, modern presses are used, which turn out up to 26,000 pages an hour, making a total of over 12 million pages a year. This would make eight stacks of Braille pages as high as the Empire State Building.

This one journal for which the organization was named,

Oct. 2 Final Date for Wheat Signup

Wheat farmers are reminded that Oct. 2 is the final date to sign up to participate in the 1965 wheat program.

Farmers in Collingsworth county as of Sept. 25 had signed up to divert 2736 acres from wheat production to approved conserving uses under the 1965 voluntary wheat program. W. C. Harwell, chairman of the Agricultural Stabilization and Conservation County Committee, has reported. This is about 20% of the 13,541 acres of allotments on the 220 farms signed up.

Harwell stressed the importance of signing up at the proper time as a necessary first step in qualifying for program benefits. He pointed out that growers who sign up this fall will be able to modify their planting intentions any time before the close of the feed grain program signups early next year.

Nationally, as of Sept. 3, farmers had signed up 759,757 acres could be made in reduced crop wheat to approved conserving uses. This is about 15%

of the 5,150,507 acres of allotments on the 100,484 farms signed.

Benefits available through the 1965 voluntary wheat program include price-support loans on all of the participating farm's wheat production (except any excess wheat stored under bond), marketing certificates on as much as 80% of the normal production of the farm allotment, and diversion payments for reducing wheat acreage at least 10% below the farm allotment and putting the acres into an approved conserving use. The diversion payment rates have been increased to 50% of the county loan rate in order to provide greater incentive for maximum diversion; thus, continued proving excessive grain stocks. No advance payments will be made under the 1965 wheat program.

Stanley Gosnell in Scholarship Contest

Principal Isla Mae Morris of Quail high school announced this week that one of the school's students has been named Semifinalist in the 1964-65 Merit Scholarship competition.

He said this student became a Semifinalist through his outstanding performance on the National Merit Scholarship Qualifying Test. This test of educational development was given in more than 17,000 high schools last March.

The student cited for his high achievement is Stanley Gosnell.

He is among 14,000 seniors throughout the country who attained Semifinalist status. The Semifinalist group is composed of the highest scoring students in each state and in United States territories. Each Semifinalist now moves a step closer to winning a four-year Merit Scholarship to the college of his choice. Semifinalists must substantiate their qualifying test performance on a second examination, be endorsed by their schools, and fulfill certain routine requirements to become Finalists. All Merit Scholars are selected from the Finalist group.

"Semifinalists are representative of our country's most intellectually able young people," said John M. Stalnaker, president of the National Merit Scholarship Corporation.

"They possess the talents and qualities necessary for leadership in the future. They are resourceful, hard-working, and ambitious."

"In honoring them for their attainments, we should recognize also that others have contributed significantly to their success by encouraging the characteristics which produce high achievement. The Semifinalists thus bring honor not only to themselves, but also to their families, their teachers, and their communities."

To "increase their opportunities to obtain financial assistance if they need it, the Merit Corporation sends the names of Semifinalists to all regionally accredited colleges and universities and to other scholarship granting agencies and financial aid sources. Studies show that about 50% of the Semifinalists obtain financial aid from sources other than the Merit Program.

In past years, about 98% of the Semifinalists have become Finalists. All Finalists receive a Certificate of Merit in recognition of their outstanding performance in the program. As Finalists, the students will be eligible for scholarship awards sponsored by NWSC and about 230 business corporations and foundations, colleges, unions, trusts, professional associations and individuals.

Each Merit Scholarship is a four-year award to cover the undergraduate college years. The recipient's stipend is tailored to his need.

Awards may reach a maximum of \$6,000 for the four years of college. For students who already possess financial resources which will enable them to attend the college of

their choice, the awards are \$400 for the four years. Stipends average about \$800 a year, or \$3,200 for the four college years.

A Merit Scholarship is also a form of "educational insurance" for the student who receives it, because the amount of the stipend will be increased at any time if there is a significant change in college cost or in his family's financial situation.

SANDY PARSONS

LYNDON CRELIA

Deck's DIDACTICS

—By Deskins Wells

Warm sunny days are needed for the next five or six weeks and that is exactly what we are not getting. Cotton is doing well, however, and the frost date is all that stands between our cotton growers and another good crop.

Went over to Lubbock last Saturday and was astonished to observe how the cotton plants on the irrigated land were for this time of the year. Of course they plant it thick intentionally in order to keep the size of the plant down for better mechanical harvesting; but even so much of it looked runty to me. Instead of looking like two bales to the acre, some of it looked like it would do well to average a bale.

Yes. I went out to Jones stadium to see the Texas-Texas Tech football game and stayed until the last few minutes while the rain came down in sheets. I haven't been that wet since I fell in the horse trough. Tech may not have the No. 1 team of the nation; but they do have the most loyal group of rooters in the country. There were 47,000 people in the stadium and at least 40,000 of them stayed through the entire contest. It had hailed north of Lubbock and the second rain was icy cold.

Next week is Fire Prevention Week and it is time to say a word about our excellent Volunteer Fire Department. The members perform an unselfish service that is a vital contribution to our prosperity and welfare. There is no way of estimating how much money their work has saved this community through the years. There is the factor of preventing loss by keeping small fires from becoming large ones; but there is also the matter of keeping the insurance rates down to the lowest possible level. Wellington has earned a credit instead of a possible penalty on insurance rates over 90% of the time since this volunteer organization was formed. At the present time the credit is the best that any town or city can receive and our thanks should go to the men of the department.

Cattle are dying by the hundreds in central Australia as the result of a prolonged drought that is far worse than our dust bowl years. There has been little or no rain in a vast area and in the last 5 years the cattle population has shrunk by two thirds. In one place no grass growing rain has fallen since 1953. It is estimated that one million cattle valued at \$57,000,000 have died as a result of the wide-spread drought. Perhaps our cattlemen are not in such bad shape after all.

Eleven Farm Families Receive FHA Loans Here

Don Jennings, county supervisor of Collingsworth county for the Farmers Home Administration, advises that eleven young farm families are receiving loans to assist them in the purchase of farms, the construction of essential farm buildings, the acquisition of livestock and machinery, and funds for the further development of their resources this year.

"Over 1,000 young farmers less than 35 years of age have received the financial and technical assistance of the Farmers Home Administration in Texas this year," stated L. J. Cappelman, state director.

Cappelman reported that "one of the major endeavors of the Farmers Home Administration in 1964 is to assist young farmers in accomplishing the extremely difficult task of acquiring the capital and the skill needed to take over the farms of their retiring elders."

Jennings stated that over the past three years, many young farmers who received the assistance of the Farmers Home Administration have been formally recognized as outstanding young farmers in the state by various publications and farm organizations.

The county supervisor advised that this financial assistance is available to young farm families who are unable to obtain adequate credit from private sources, meet all other eligibility requirements, and have the ability and the desire to become successfully established in farming and ranching operations.

Tom's Red Top in New Site

Tom's Red Top Cafe, a cafe located for several years on the east side of the square, has been moved to 15th Street, one block west of the high school, Tom Wilkins, the owner, announced this week.

It is in the building formerly occupied by Pack-a-Bag Grocery, which has been completely remodeled for the new occupant.

Wilkins said he will continue to serve short orders at lunch and a la carte food such as steaks and fried chicken. He will also serve students of the three schools in the vicinity for the lunch period.

"Everything will be just as it was except that we will not serve plate lunches at noon," Wilkins said. Associated with him in the restaurant is his mother, Mrs. T. B. Wilkins.

Drake Sworn In Texas Bar

The ceremony took place in the state supreme court chambers.

Drake is associated with the Houston law firm of Barrow, Bland, Rehmet and Singleton.

The young lawyer is the son of Mr. and Mrs. Clyde Drake.

Dwight Lists Norwood School Events for Year

Robert Dwight, superintendent of Samnorwood schools has announced the school calendar for the 1964-65 year.

"This calendar is established by the Samnorwood school board for the convenience of school patrons," Dwight said. "However, this schedule may have to be altered by the school if inclement weather should interfere with school attendance."

The present schedule allows four days for bad weather, and if all of these are not used the students will get another holiday on Thursday, May 20, 1965 but it will be a work day at school for the faculty.

The holiday schedule follows: Thanksgiving, Nov. 26 and 27. Christmas, Dec. 21 through 25.

Teachers meeting in Amarillo, March 12.

St. Patrick's Day in Shamrock, March 17.

August Bond Sales \$23,960

John Forbis, chairman of the Collingsworth County Savings Bonds committee, announced that the county's August savings bond sales totaled \$23,960.

Sales for the first 8 months of this year were \$65,050, or 59.1% of the 1964 sales goal.

Total sales in Texas for the first 8 months of the year were \$100,643,333, or 67% of the state goal. Savings Bond sales have increased approximately \$900,000 compared to the same period in 1963.

Motorists Warned to Stop for School Buses

Thousands of school children are now trooping back to school throughout Texas. Many of them will be transported by school buses.

Most people are careful when approaching a school bus that may be standing beside the road or school to pick up children or allow them to alight. However, we have already had some very bad accidents this year because a child or a motorist, or both, were careless at that very time.

Most Texans are aware of the law which requires a driver to come to a complete stop when overtaking from the rear a school bus which has stopped to receive or discharge school children. After stopping immediately behind the bus, he is allowed by law to proceed past same at a speed "which is prudent, not exceeding ten miles per hour, and with due caution for the safety of such children."

What many persons do not realize is that the very same rule applies when MEETING a stopped school bus. While everyone is interested in protecting our children, unthinking violations of this simple safety rule greatly outnumber those who comply.

Failure to follow the law in this case can lead to fine up to \$200 even when no accident occurs. Following an accident in which some child is injured or killed, the penalties are naturally much more serious.

Texas Receives Larger Share of Lunch Funds

Texas schools will get a larger share than last year of national school lunch funds allotted to the states by the U.S. Department of Agriculture.

The increase amounts to \$214,264, which runs the total state allotment for the current school year to \$6,645,429, according to John J. Slaughter, southwest area, food distribution division, Agricultural Marketing Service, Dallas.

This USDA office works with the school lunch division of the Texas Education Agency, in handling the school lunch program.

The increase in the Texas allotment reflects the \$9 million increase in national funds, which total nearly \$130 million for the current school year, explains Mr. Slaughter.

Each state receives school lunch funds on the basis of the number of USDA TypeA lunches served during the 1963-64 school year and adjusted by the state per capita income.

This federal money helps elementary and high school students get wholesome lunches at the lowest possible cost, for it is used to pay the school a certain sum for every Type A

lunch served a student.

Rate of payment for each lunch is determined by the state agency, but it usually represents 10 to 20 per cent of the cost of the lunch to the student.

On the national average, federal assistance in cash, plus foods donated by USDA, make up slightly more than 20 per cent of the cost of school lunches. Payments from children account for nearly 60 per cent, while state and local sources provide the remainder.

Only schools serving Type A lunches under the national school lunch program will share in this \$6,645,429 cash allotment to Texas.
