## Calves and Registered Herefords Bring \$17,518.00

### Ochiltree County Annual Red Cross Drive Opens Saturday

#### Quota is Less on Third Year

1947 American Red Cross drive will open in Ochiltree County on Saturday, March 1. For this year the quota is \$746, less than the \$2,690 quota set in 1946. Donors are urged to mail or bring their contributions to the First National Bank, National Bank, Stewart Bank Co., or to F. B. Sumpster, Ochiltree County Chapter.

Donations are being solicited for Red Cross activities, and the money raised will go to the national headquarters. Chairman Sumpster expects that there are sufficient funds on hand to meet all local Red Cross needs.

E. Burk, chairman of the local membership and fund raising drive, has asked the cooperation of the public in raising the drive on a voluntary basis this year. He stated that no one would be asked to give over \$5, and that with cooperation of the people, the quota should be raised in a few days. At the end of the war, and the increasing number of personnel, Red Cross activities during the coming year will include, first aid and ambulance services, medical services, and other services, foreign and domestic.

#### Fire Rate Reduced For Coming Year

A good fire record in 1946, when people will receive a 10 per cent credit on fire insurance premiums instead of the 5 per cent credit which was in effect last year, is the reason for the reduction going into 1947.

A list of fire insurance rates in Perryton for past ten years as determined by the State Insurance Office:

- 15 per cent credit
  - 15 per cent credit
  - 20 per cent credit
  - 25 per cent credit
  - 5 per cent charge
  - 10 per cent credit
  - 10 per cent credit
  - 10 per cent credit
  - 5 per cent charge
  - 10 per cent credit
- Perryton had 17 fires during 1946, of which were minor blazes which were quickly extinguished by firemen.

### First National Bank Purchases Grand Champion; C. J. Frantz Pays Top Price for Hereford

### Four Students Top Honor Roll in High School

The 37 registered Hereford cattle and the 30 calves from the Junior Livestock show brought \$17,518 in the First Annual Registered Hereford Sale held Thursday. Top price for a calf was paid by the First National Bank to Max Pearson for his Grand Champion. It brought \$1 per pound, weighing 718 lbs. The Perryton Implement Co. paid 75 cents per pound for the 970 pound Reserve Champion calf, also owned by Max Pearson.

PRIZE WINNERS IN JUNIOR LIVESTOCK SHOW—Shown above are the three boys and their four calves which won major prizes in the Ochiltree County Junior Livestock show held Wednesday, February 19. Shown at the left is Lyndon Flowers with his 660 lb. Hereford calf which won 2nd place in the Junior Division. In the center is Cecil Regier and his 951 lb. Hereford calf which took 2nd place in the Senior Division. Shown at the right is Max Pearson and his two Angus calves which won all of the first places at the show. The larger calf was judged Reserve Champion and also won 1st place in the Senior Division. The smaller calf at the extreme right was the Grand Champion and 1st place winner in the Junior Division.

### School Attendance Is Down Due to Sickness

Attendance at the Perryton schools reached a season's low this week due to the rise in colds and influenza which kept many students at home and away from classrooms. Slightly over one-fourth of all the students were absent on Wednesday, according to records of principals Gilbert Mize and Glen Allison. In the high school, 71 students of the 263 enrollment were absent, while 50 of the 204 students in elementary and junior high school missed classes. This is contrasted with an average attendance record of 93 percent for the entire school during previous school months.

### Legion Auxiliary Ends Subscription Sales

Miss Anna Tevis, president of the Legion Auxiliary, has requested all Auxiliary members to bring their records of subscription sales to the Amarillo Times to the business meeting Monday night. All subscriptions must be in this week so that the Auxiliary may get credit for them, and Miss Tevis asks all persons desiring to subscribe to contact an Auxiliary member this week.

### Perryton Implement First John Deere Day Since Spring of 1941

Farmers of the Perryton area will go back to pre-war days on Wednesday, March 12, when the Perryton Implement Co., local dealers of John Deere farm machinery, stage the first John Deere Day in Perryton since the spring of 1941.

### Three Candidates Seek City Office; Four More May Follow

After a delayed start, the political pot in the Perryton city elections has started bubbling and showing signs of activity. Seven men have been mentioned for the four vacancies which will be filled in the city election April 1. Mayor G. T. Leatherman, City Clerk Milam Cudd and Alderman Howard Holt have announced that they are candidates for re-election. Of these three, Cudd is the only one who has filed a petition, but both Holt and Mayor Leatherman are securing signers for their petitions and will file when the petitions are completed.

### Herald Staff Holds "Personal" Contest

There are 86 different "personals" in this issue of the Herald. If you don't believe it, just count them. The increase in the number of these short items about the day-to-day activities of the people of this community is due to a contest now being staged by the Herald staff. The contest was started this week as a means of further improving the reader interest of the Herald. Points are given for each "personal" turned in, and at the end of the contest, the losing side has to furnish a party to the winners. Believe it or not, at the end of this first week, both sides are exactly tied. One side is composed of Bill Cone, Knute Dowers, Raymond Overby, Jessie Stewart, and Jake Dunkle. The other side has Marvin Walton, Harold Hudson, Van Stewart, Jack Payne and Helen Lee. Vivian Lee is keeping a record of each local turned in, and is the arbitrator in case of argument. The contest will continue for three more issues of the Herald.

### JUST HERE and THERE

Take a tip from us if you want to know about one of the up-and-coming towns of the North Panhandle. In our estimation Gruber is just such a town and if some of Gruber's neighbors don't look out, they'll wake up some morning and find that Gruber has passed them by while they were wrangling in their sleep.

We were in Gruber last Thursday evening and attended a meeting of their community civic club. Went over with O. C. Watson and Walter LaMaster, O. C. was talking street paving and maintenance and all three of us laid the foundation for the organization of a Rotary Club in Gruber.

Enjoyed very much a visit with A. R. Bort, vice president, and Bob Thom, cashier, of the newly organized Gruber State Bank. This bank was organized and opened for business September 7, 1946. Deposits are already more than \$4890,000. We think that is really something for a five months old bank.

### Indian Will Speak Sunday Evening at Christian Church

Peter Solomon, a native of India, will speak at an evening meeting at the Christian Church on March 13 to those people interested in India. Ward H. N. Gregg, pastor of the church, announced this week.

Solomon has been a very successful superintendent of evangelism in the Damoh area and later at Jubulpore. At present he is attending Phillips University at Enid, Okla., studying and making friends for missions in India.

He is a consecrated, enthusiastic and altogether Christian gentleman, stated Gregg, and his talk will be especially timely in view of the latest developments toward Indian self-rule.

SHARES IN AWARD—James Davis Vashbinder, 84, San Antonio, Chisholm Trail driver in 1884, who will share in the award by U. S. Court of Claims for animals lost in Mexican border raids from 1873-1883. In his hand is the old Vashbinder branding iron. Heirs of John Linney, old-time ranch owner, were awarded \$10,000 because of lack of federal troop protection along the Texas-Mexican border from 1873 to 1883.

**Radio Berlin Control Kept by Russians**

**CP Newsfeatures**  
BERLIN—The Russians have now established a series of strong radio stations to serve their zone of Germany but they still steadfastly refuse to yield to proposals by the other three occupying powers to give them a share in control of powerful Radio Berlin.

One of the Russian argument against an American proposal that Radio Berlin be placed under control of a four-power directorate was a claim that they needed it to serve their zone of occupation which surrounds Berlin.

The Russians took control of Radio Berlin when they were sole occupiers of the city and have refused to share it despite the fact the building which houses the station is located in what now is the British sector of the city. Transmitters for the station are located in the French sector.

It has been reported that the Russians have transferred from Radio Berlin substantial equipment and personnel to build up their own stations.

**OPERA TENOR**—New York loves Ferruccio Tagliavini, the new Italian opera tenor. Ferruccio loves New York, too. It's a case of mutual admiration, apparently. In fact, New York claims Ferruccio is the most exciting thing that has happened in the city since the advent of the strapless evening gown. Ferruccio in turn declares that Manhattan is the center of the universe. He can also sing a little bit as well as turn a pretty phrase.

**World's Telephones Now Total 51,500,000**

NEW YORK (AP)—The American Telephone and Telegraph Company reports the world now has 51,500,000 telephones in use.

Stockholm ranks next to San Francisco as the city having the most telephones per individual resident in the world, although New York City, with 2,218,000 instruments, has the greatest number of telephones.

No one city in the United States contains as much as eight per cent of the total number of the nation's 27,687,000 telephones. However, Brussels, Copenhagen and Paris each contain about one-third of their country's telephones.

Britain, with 3,925,000 telephones, has more than three times as many as Soviet Russia' 1,272,500.

More than 115,000,000 miles of telephone wire are in use in the United States, of which nearly 60 per cent is underground cable.

**Home, James, And Step on It**

LOUISVILLE, Ky. (AP)—A police cruiser halted at an intersection here to await a signal change.

A man with a glassy look in his eye opened the door of the car and stepped in.

"Fourth and Magnolia," he said, settling down on the seat. "You mean Sixth and Jefferson (that's the jail)," said Traffic Patrolman Robert Hardin.

In the police court, the defendant was placed under peace bond and told to learn the difference between a taxicab and a police car.

Miss Yvonne Webb of Woodward, Okla. is visiting in the home of M. and Mrs. Ralph Pattison.

Mrs. F. C. Spencer and Grace spent the week-end in Amarillo with Mr. and Mrs. Jim Darnell.

J. F. Hightower, who lives south of Turpin, Okla., was a business visitor last Wednesday.

**ARIZONA INDIAN RUINS**—This 800-year-old ruin, Casa Grande, is one of the mysteries of the Southwest. Archaeologists have no trace of the people that built this large edifice. Today a monument, the ruins are protected by this big umbrella. The construction and wearing quality of the adobe used in this building has made Arizona residents more enthusiastic about building modern homes of this material.

**Polish Production Moves Upward**

WARSAW, Poland (AP)—The Communist-backed newspaper Glos Ludu says figures now available show that Poland's industries in some divisions in 1946 exceeded the production estimated for the year.

The journal said the coal output had been set at 46,000,000 tons but 46,800,000 tons had already been mined by Dec. 12. The target for pig-iron was 691,000 tons with 736,000 produced; rolled goods, 800,000 tons and 810,000 produced.

**It Takes Psychology To Oil Wheelbarrows**

AKRON, O. (AP)—A building contractor, troubled with punctures in pneumatic tires on his wheelbarrows, called engineers of the B. F. Goodrich Co. for help. They prescribed zero-pressure tires—a type containing an air space, but without inflated rubber tubes.

But the laborers complained that the wheelbarrows were harder to push without pneumatic tires. Suspecting that this was imagination, the contractor had dummy valves put through the rim holes. Next day, one by one, his employees told him that pushing was much easier, as "they knew it would be with pneumatic tires."

**Orthodox Church Invited to Parley**

GENEVA, Switzerland (AP)—In an effort to establish closer contact between the World Council of Churches and the Orthodox churches, an official delegation of the Council has left Geneva.

They will go first to Athens, Greece, and successively will have conversations with six Greek speaking Orthodox church bodies.

The delegation will invite orthodox leaders to participate in the world assembly of churches in Amsterdam next year.

The council was reported "in contact with" the Moscow church, but no announcement had been made of sending a delegation there. Canary Team Up

*Don Herald says:*

I drew a cartoon for a man in 1927, for which I charged \$20, as I had agreed.

I was too young to know the cartoon was worth \$50. So now I am going to sue the man for \$30.

Also I forgot to charge the man for delivering the cartoon. That took me 25 minutes each way.

I am going to sue the man for \$1.50 for delivery time.

Also I forgot to charge for the cardboard. That was 11 cents. I am going to sue for that.

If anybody ever underpaid you, no matter what your understanding was, nor how long ago, sue him!

Let's everybody sue everybody! It's such a nice way to make easy money!

**RISEING TRAFFIC TOLL BRINGS THREAT of U. S. LEGISLATION**

**Increase Traced to Faulty Cars**

DETROIT—Evidence that much of the rapidly rising death toll on American highways is due to the poor operating condition of motor vehicles is contained in the startlingly high percentage of cars that are not able to pass the safety lane tests. This was pointed out in Chicago where in a two-week check up 45% of all cars checked were not able to pass the relatively simple safety requirements.

The need for drastic action is seen in the fatality record in the recent report of the International Association of Chiefs of Police.

**TRAFFIC DEATHS**

1945	Number of Deaths	Increase Over 1944
June . . . . .	1920	11%
July . . . . .	2030	15%
August . . . . .	2430	26%
September . . . . .	2830	40%
October . . . . .	3440	53%

**OF ALL CARS ON THE ROAD TODAY**

- 26 out of every hundred are over 10 years old
- 33 out of every hundred are 8 to 10 years old
- 34 out of every hundred are 4 to 8 years old
- 7 out of every hundred are 4 years or less

Thus it is seen that the President and the nation have sound reason to view this rising traffic accident and fatality record with considerable alarm, and that there is a need for something to be done about it before the next tourist season.

**It Takes California To Make Idaho Potato**

BOISE, Idaho (AP)—The Gem State of Idaho is justifiably proud of the fine big potatoes it grows, but now the secret is out—some of the credit belongs to California.

John R. Robertson, University of Idaho extension division potato specialist, discloses that Idaho potato growers have 432 lots of seed potatoes planted in test plots at Oceanside, Calif.

"The test plots are maintained to provide seed growers with advance information on the disease content of the seed they plan to use in growing the 1947 crop of certified seed potatoes," Robertson explains.

### Arboreal Box Seat Needs a Theater

TULARE, Calif. (AP)—When the Lippert Construction Co. started an \$80,000 outdoor theater, a 10-year-old neighbor boy began nailing steps to the only tall tree near the walls.

His tree house is nearly finished, but he'll see no free shows. The civilian production administration called the theater non-essential and stopped the construction.

### CHICKENS AND DOGS

As spring approaches, people commence to think of gardens, yards and flowers. This means that chickens must be confined, also dogs that tear up flower beds and gardens.

There is a city ordinance prohibiting chickens running at large within the corporate limits of the City of Perryton. This law will be enforced, so keep your chickens penned.

Unlicensed dogs are now permitted to roam at large at any time in Perryton. Licensed dogs that destroy property become a nuisance and must be confined.

The rights of property owners must be protected and complaints from property owners as to destruction of property by chickens, dogs or other animals will be prosecuted by the City of Perryton.

### Slaughter and Son Buy Store at Foliatt

John Slaughter and his son, Stanley Slaughter recently purchased the Roger Brothers hardware and furniture store of Foliatt, and took over the business on Saturday, Feb. 15.

Slaughter has been for some time employed by Key and Burton of Perryton. He and his family will move to Foliatt within a short time.

### Perry Opens Studio Saturday in Guymon

W. E. Perry, owner of the Perry Studio, has announced that he will open another studio in Guymon, Oklahoma on Saturday, March 1.

Leroy Cross, who has been employed here since early last summer will be manager at Guymon and Mr. Perry will continue to operate the Perry Studio here.

The Texas Extension Service is urging everyone who can to plant a garden this year . . . for health, for recreation, for a supply of fresh vegetables that will knock dollars off the grocery bill.

### Occupation Debts Worry Burmese in Currency Mixup

RANGOON, Burma—The government of Burma is facing pressing demands for some formula under which debts contracted during the Japanese occupation may be settled fairly.

The Anti-Fascist People's Freedom League pointed out in a petition to the Government that at the time of Japan's fall one hundred Japanese rupees had the value of one British rupee. The British promptly demonized Japanese currency when they reoccupied

Burma. The APPFL contends the courts have no precedents to guide them in the settlement of disputed financial transactions involving the Japanese rupee, and that it would be unfair to require settlement of a debt of 100 Japanese rupees by the payment of 100 British rupees. The league also has asked the government to declare that debts unpaid since the fall of Japan because of this mixup are free of interest for the period since war's end. During Japanese occupation the Japanese rupee alone was legal tender. A statement of policy is expected from the government soon.

### On the Square!

SAN DIEGO, Calif. (AP)—Dancers turned out in such numbers for an old-fashioned Square dance festival that 300 applicants were turned away and the city recreation department, sponsoring the event, had to continue the festival through an extra week.

### Farm People Hold Social Security Meeting Thursday

Farm men and women from Hansford, Hemphill, Lipscomb and Ochiltree counties will meet at the Ochiltree courthouse Thursday to hear John R. Sanderson from the social security field office in Amarillo.

Sanderson will discuss "Social Security for Farm People," and the meeting will start at 2:30 p. m. in the court room.

The Ochiltree county council acting as host to people from the other three counties at this meeting.

### Best Music Offered And GIs Love It

MUNICH, Germany (AP)—Chartered around the fireplace of the 900-year-old beer cellar where Germans listened to Hitler on the night of the "putsch" of 1923, American occupation soldiers today are hearing—and liking—classical music.

Billed by the American Red Cross girls in charge of recreation at the Burgstrasse-Keller Club as "Coffee and Classics," the weekly program brings to newly-converted GI music lovers a kind of music many of them never heard before and artists of a caliber they might never hear at home—members of the Bavarian State Operaetta, soloists from the Munich State Opera House, musicians from the Munich Philharmonic.

### Two Now Head The Red Cross

GENEVA, Switzerland (AP)—Two vice presidents are serving as heads of the International Committee of the Red Cross for the current year following the retirement of Dr. Max Huber, interim president.

They are Ernest Gloor and Martin Bodmer.

Huber, president of the committee since 1928, retired after he reached 70.

don herold says:

Smart men have partly failed—therefore we crack-pots can succeed!

It's a young world, and sanity has not yet had time to produce completely satisfactory results.

So the world right now is full of people who want to try insanity.

They want to try it in art; they want to abandon beauty and try ugliness.

They want to try it in music; they want to abandon harmony and try dissonance.

They want to try insanity in politics and economics. They want to throw away democracy and normal human instincts and try screwball controls from ivory-towers full of ivory heads. Since sane methods are still in a process of evolution, the crack-pots say "Throw them out!" and then they prescribe cockeyed courses—the crazier the better.

Since sanity is still only trying, shall we abandon it for insanity?

### HERE ARE A FEW GOOD BUYS!

Do you want a dandy 3-room house that's worth the money? Here's the dope on it. This house was built out on the farm in the past few months by a man in his spare time. It has living room, dining room, kitchen and bath. It has sheet rock on the inside and boxed up outside with wire over boxing for stucco. It is wired for electricity. Plumbing fixtures will have to be installed after house is moved. A deal has been made to move this house whenever sold. I'm not going to mention the price on this house because I don't want to have everybody on me at once. This is really an attractive buy for someone who needs just a small home.

You who have been looking for wheat land surely won't make me advertise this piece of land again. It's a fine half section of wheat; one-third of crop goes to purchaser. This land is only six miles from Farnsworth, has a good granary, windmill and fence and has been well farmed. I'm not a bit ashamed of the price as it is only \$75.00 per acre.

I'm going to take an old boy down in Lipscomb County today to see this two-section ranch and if he or someone else doesn't buy it by the time you read this, your opportunity is next.

1,280 acres of land in all, 320 acres of good growing wheat. Located in Hemphill county on the pavement. Two pastures, two springs, two dams, one well, 80 acres good feed land. Immediate possession.

Improvements include a good 3 room modern house, chicken houses, sheds, corrals, scales, hog pastures, hog sheds, loading chutes and branding pens. Fences are good and all right on highway for two miles.

One-half mineral rights; all lease money goes to purchaser, present owner on deal to lease land for oil at \$2.00 per acre. \$27,000 loan at 4% interest which may be assumed by new owner.

**IF YOU WANT TO SELL LIST YOUR PROPERTY**  
Well folks, I'm needing listings. I have buyers for wheat land near Perryton. One in particular wants a half section of unimproved land. Another wants a full section. If you contemplate selling, list your land for a quick deal.

One old boy told me yesterday to find him some good grass in Ochiltree County soon or he'd have to sell his cattle. He'll pay a good price if the land is located well and the grass is good.

I have a phone now and if you'll give me a ring, I'll come by to see you and list whatever property you have for sale.

## Hoof and Mouth Disease is Spread By Animals, Humans, and Vehicles

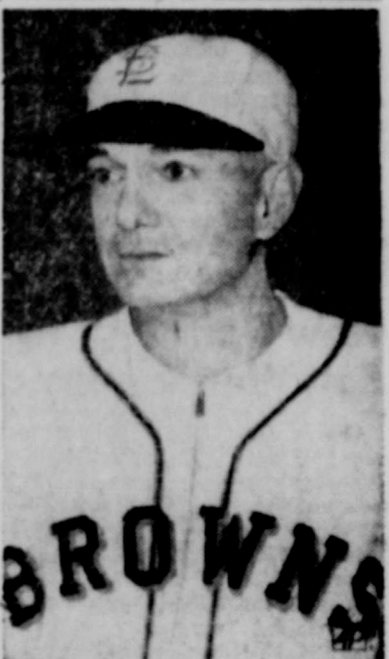

**COLLEGE STATION, Feb. 25**—The outbreak of foot-and-mouth disease in Mexico, with its resulting threat to the United States, has caused USDA officials to repeat the warning that this livestock plague is highly infectious and spread chiefly by animals.

The next most common carrier of infection is persons who visit infected premises, the officials say. A third source of danger comprises infected vehicles and products of various kinds, including garbage that contains fresh meat.

These conclusions are based on evidence obtained from October 1914 to May, 1916, in the most widespread outbreak of the disease in this country. At this time more than 172,000 animals in 22 states and the District of Columbia were infected.

Probable sources of infection were determined in more than three-fourths of the cases.

During that major outbreak approximately 1,600 herds were thought to be infected by animals brought onto the premises from infected stockyards, stables, or pastures. In a few cases dogs and other small animals were identified as carriers. A total of 672 herds were infected by persons. Other known sources of infection that accounted for 411 of the remaining cases were infected stock cars, contaminated feed and drinking water, infected highways, and miscellaneous causes.

## Former Resident Dies in Liberal

L. L. Maxwell, who was an early day farmer near old Ochiltree, died Monday, February 17, at the home of his son, S. J. Maxwell at Liberal, Kansas.

He had lived in Beaver county for a number of years, and went to Liberal from Beaver about five years ago. He had been in ill health for several years.

Six sons and one daughter survive. They are Arthur of Canton; H. D. of Chicago; S. J. of Liberal; F. S. of Denver; Fred of Liberal; Leroy of Cherokee; and Mrs. Mamie Taylor of Cherokee.

He was buried Wednesday beside his wife in the Ochiltree cemetery.

Mr. and Mrs. Irvin Hergert of Canadian were in Perryton Sunday to visit Mr. Hergert's mother, Mrs. Sam Hergert, who recently underwent an operation.

Mrs. Giltner LaMaster and son, Joseph Robert, returned to Perryton from Northwest Texas Hospital Lubbock, last Friday.

## CARD OF THANKS

Thanks to each of my friends who remembered me while I was in the hospital. Your cards, flowers and visits were appreciated. My thanks go to Drs. Kengle and Pearson, special nurses and the entire hospital staff who were especially kind and thoughtful. I am indeed grateful.  
Mrs. Sam Hergert. 9-11-c

# Contract Awarded This Week For 205 Miles of REA Line

The contract for constructing 205 miles of REA electric line for the "D" unit in Ochiltree, Hemphill, Lipscomb, Hansford and Hutchinson counties has been awarded to J. B. and B. T. Reeves, of Deatur, Texas, Earl Waide, manager of the North Plains Electric Cooperative announced this week.

The successful bid by the Reeves brothers was \$48,996.07, which is for labor only. Waide stated, "The North Plains Electric has on hand \$113,254.48 of materials for this 205 mile unit of line.

Construction will start Monday, March 3, and the contract stipulates that the work will be completed within 90 working days after construction begins.

First unit to be completed will be a 15 mile stretch of line in Hemphill county. It was decided to start this line first because no housing accommodations could be secured in Perryton and the construction crew were able to secure housing in Canadiah and Waide. It is hoped to move the crew to Perryton and use this as a working headquarters for the remainder of the construction, if suitable housing can be obtained, Waide added.

This "D" unit consists of 45 miles in Ochiltree county, 70 miles in Hemphill county, 15 miles in Hansford county, and 75 miles in Lipscomb county.

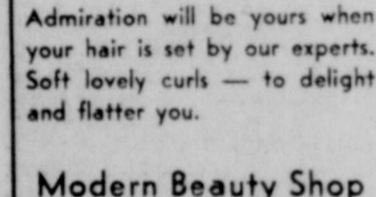

The present "A" unit is 220 miles in length, and has 70 miles in Ochiltree, 30 miles in Hansford, 40 miles in Hutchinson, 30 miles in Hemphill and 50 miles in Lipscomb county.

## New Company To Sell War Surplus

Gibson Bros. of Dallas, Texas, a new Perryton business specializing in surplus war goods, opened this week north of the main tracks on Main Street. Leon and A. B. Gibson, formerly of Hardisty, Okla., are the owners.

A wide variety of war surplus merchandise is already on hand, and a much larger stock is on order according to the owners.

Mr. and Mrs. Lee Harbour of Sunnet, visited over the week-end with Mr. and Mrs. Robert Phelps. Mrs. Harbour and Mrs. Phelps are sisters.

OSLO, Norway (AP)—The bodies of 3,000 German soldiers killed in action during the war in Norway and buried in the so-called "German cemetery of honor" at Ekeberg near Oslo, are going to be removed from the Ministry of Defense says.

Numerous protests have been filed by Norwegians, living in the neighborhood of the cemetery. People demanded the graves to be removed on the grounds that the Nazi idea of honor is inconsistent with that of the Norwegians.

At the Lubbock meeting Red told the Perryton delegation that his company had placed no orders of any kind for either a common battery system or a dial system. He also stated that no new equipment could be installed in less than 18 to 20 months, and that his company was definitely against installing rural telephones except on the basis of one telephone for every one-half mile of rural telephone line. This policy, if adhered to, would offer very dim prospects for rural users in Ochiltree county ever receiving new telephones.

## Airline Hearing Is Postponed Until March 10

Date for the hearing by the Civil Aeronautics Board in Washington which will pass upon an application of the West Central Airlines to establish a feeder air line in Perryton has been moved to March 10. The hearing was originally set for Feb. 24.

In response to letters written by various Perryton civic groups, both Josh Lee, member of the CAB, and Congressman Eugene Worley have written that they would extend all possible support to the application.

The West Central Airlines proposes to establish an airline route between Bismarck, N. D. and Amarillo, via Liberal, Perryton, Guymon, Pampa, and Borger.

The proposed service is to be in two phases, the first phase consisting of the carriage of mail and property for a period of approximately 18 months in order to establish a safety factor before transporting passengers on a new airline route. After this first phase, operations would be broadened to include all sorts of air transportation, including passenger.

The Perryton airport meets all specifications for an air freight stop, as does all other airports along the proposed route.

Other officers of the bank are Coy Holt, pres.; Gay Fletcher, J. C. Harris, L. H. Gruver, William F. D. Etling and A. L. Thoreson, directors.

This \$890,000 banking institution does not even have a permanent home as yet. The office is located in the lobby of the Gruver Hotel. However, they have a building site and expect to build a beautiful banking house just as soon as building conditions improve.

Principal topic at the Gruver meeting was highways and the Gruver folks seem to be very much in favor of a bond issue, either Hansford county-wide or by road district. With the enthusiasm and interest displayed at the meeting, we're placing our bets that it will not be very long until Gruver is served by paved highways in all directions with a system of connecting farm to Gruver surfaced roads. Those folks over there are alive and they're willing to foot the bill to get the job across.

An extensive drilling program is in the air for most of west and north Hansford county. Much of the territory is already proven for big gas production. It could make Gruver. Take a tip from us watch that town.

"She never throws her rank around."—Employer of Millie Douglas, 17, daughter of Supreme Court Justice Douglas, who is soda jerk in Alexandria, Va., drug store.

"They think I'm an old fool!"—Mrs. Laura Muddaugh, 59, Joplin, Mo., who left husband, three children and four grandchildren to go West gold prospecting.

"Industry-wide bargaining is a potential death-trap for both business and free labor."—Pres. James H. McGraw Jr., McGraw-Hill Publishing Co.

"Congress is determined to enact such changes as will make private ownership workable."—Mark Sullivan, columnist, on labor legislation.

"The older you get the more you appreciate Florida."—Joe McCarthy, former Yankee nine manager, wintering there.

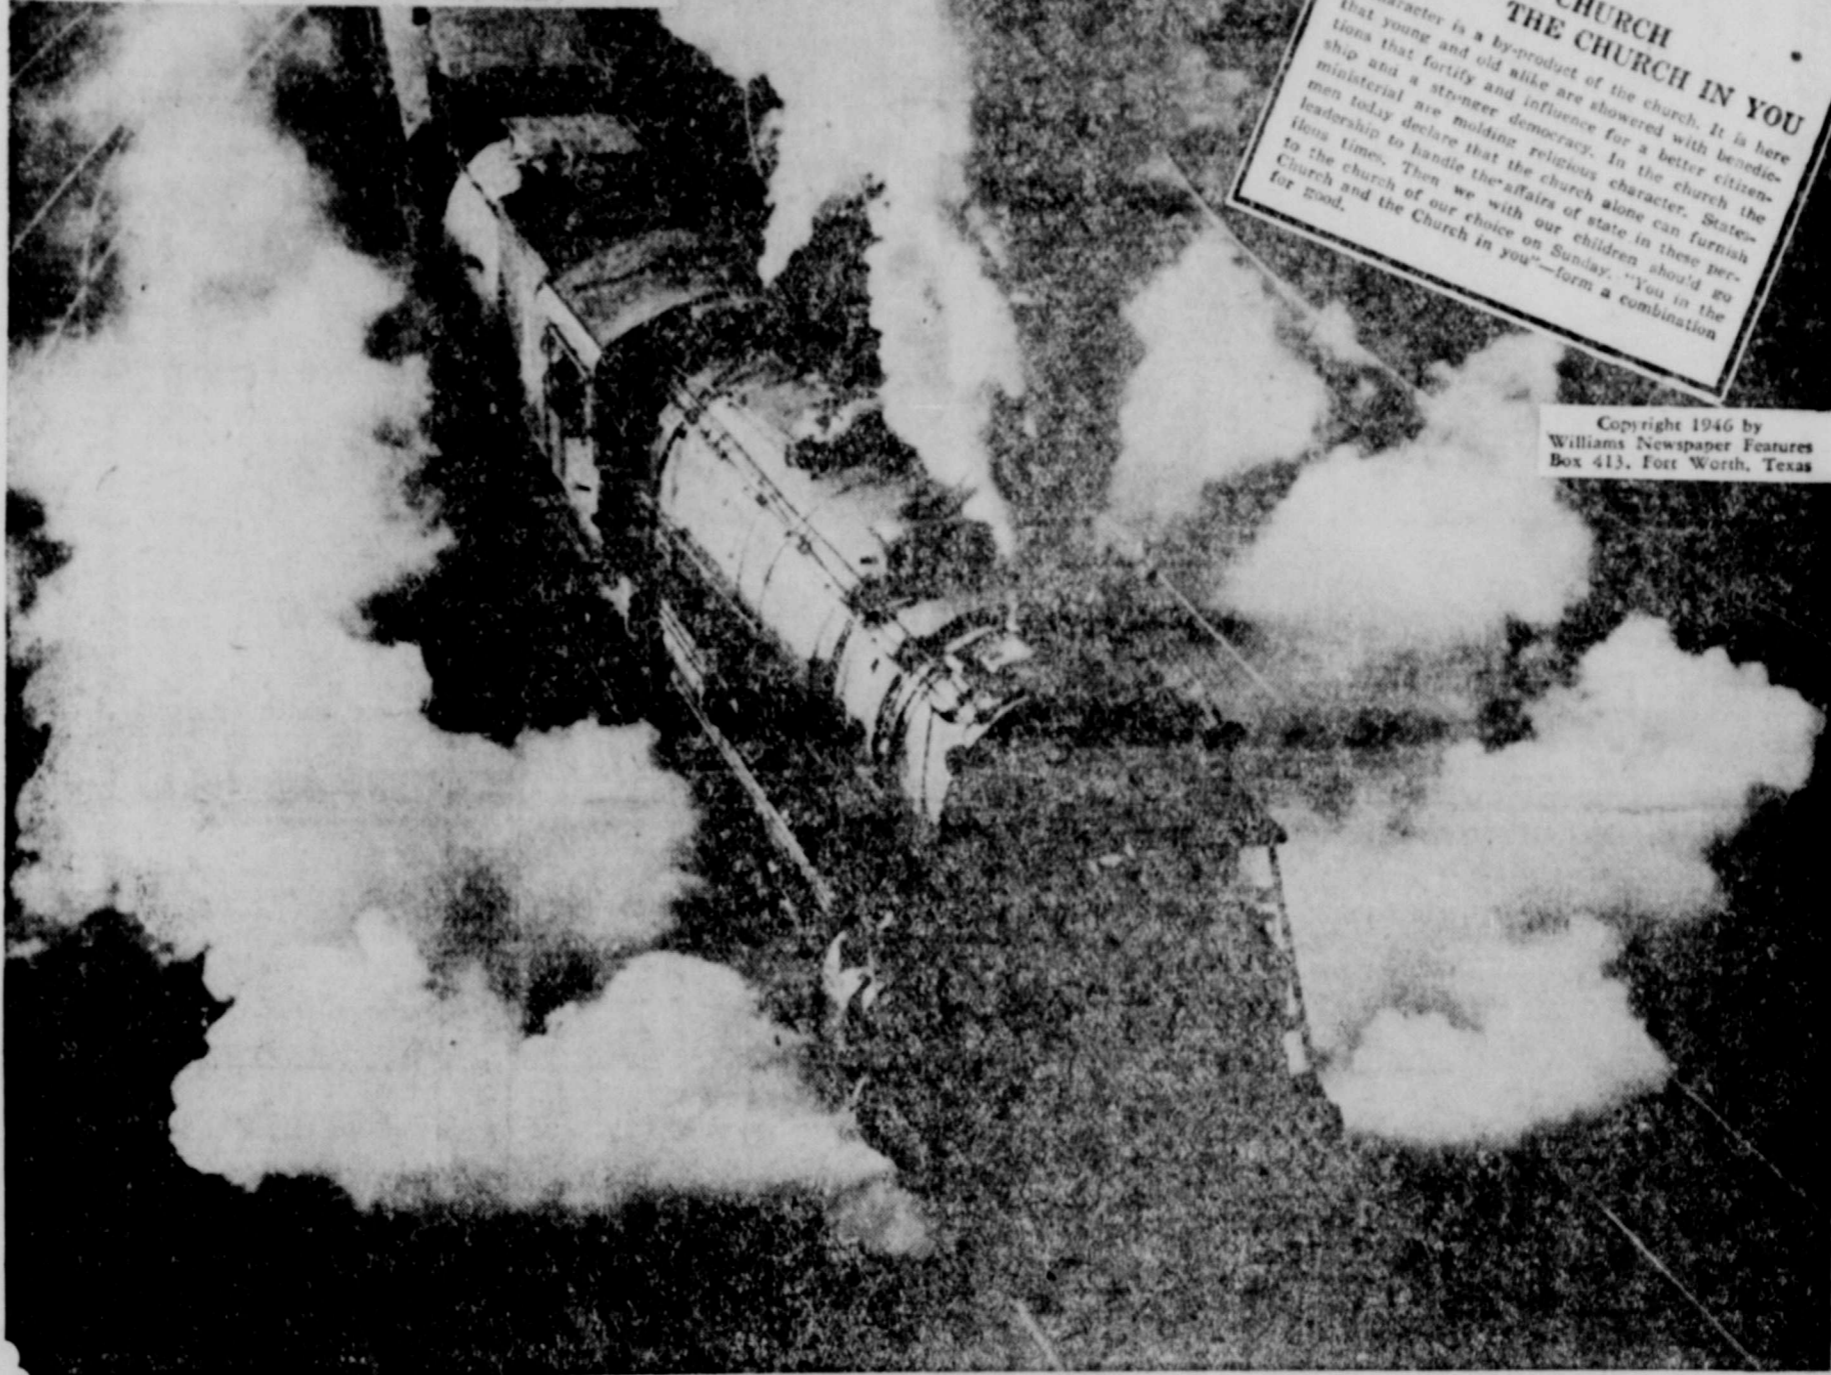

# ALL ABOARD

ALL are travelers. But movement does not necessarily mean progress. There are ways and destinations good and bad. Between these each faces the privilege and necessity of choosing. Be sure that the way selected leads to the destination desired. "There is a way that seemeth right unto a man, but the ends thereof are the ways of death."

FORTUNATELY there is a road which leads to Life Eternal. Jesus the Christ declared: "I am the way!" You may journey in this way if you will. However there is no compulsion. You must travel in that way if you are to reach that destination. "The path of the just is as a dawning light that shineth more and more unto the perfect day."

IN a great Railway Station are trains bound in opposite directions. In life you may move toward the heights, or the depths. Time for departure is scheduled; preceding which each must make decision and take action. Many have dallied until they missed their 'train.' Decision and action should be made promptly.

Whether are you bound? You may choose light, or darkness; honor, or shame; pleasure, or pain; life, or death! Remember it is impossible to travel the wrong road and reach the right end! The Lord's counsel is: "Strive to enter in by the narrow gate!" To those who follow his counsel he says: "Ye shall find rest unto your souls!" ALL ABOARD!

**YOU IN THE CHURCH**  
**THE CHURCH IN YOU**

Character is a by-product of the church. It is here that young and old alike are showered with benedictions that fortify and influence for a better citizenship and a stouter democracy. In the church the ministerial are molding religious character. State leaders declare that the church alone can furnish leadership to handle the affairs of state in these perilous times. Then we with our children should go to the church of our choice on Sunday. "You in the Church and the Church in you"—form a combination for good.

# United States Keeps Sharp Watch Mexico's Hoof and Mouth Disease

By MILT DEAN HILL

WASHINGTON — The United States is keeping a sharp watch on Mexico's foot and mouth disease epidemic. Further movement of Mexican cattle into the U. S. will be prohibited indefinitely.

Four U. S. veterinary experts are in Mexico helping the Mexican government fight the disease. Chairman Clifford Hope (R-Kan.) has named a House agriculture subcommittee to work with the Department of Agriculture in dealing with the threat of invasion by the epidemic.

The Agriculture Department stepped in to aid the Mexican government after urgent appeals from President Miraval Abron.

First Epidemic Since 1929

The epidemic reported spreading slowly north toward the U. S. border, is the first to touch North America since 1929. Herds in Texas, California and other western states were destroyed that year. It cost the nation millions of dollars to halt the epidemic.

The present epidemic came into Mexico with 327 zebu (Brahma) bulls, brought up from Brazil by private importers.

Animal imports from Brazil—or any country where the disease exists—into the United States are permanently prohibited.

Just before Secretary of Agriculture Anderson closed the border to Mexican cattle, sheep, hogs and goats because of the threat of foot and mouth disease. Five months later the border was re-opened. A joint U. S.-Mexican commission reported it could discover no foot and mouth disease in Mexico.

Then It Broke Out

Twelve days later, ranchers in the Vera Cruz area, on Mexico's Gulf coast, reported sickening of cattle. In a few weeks the epidemic had spread west to near Mexico City.

Sanitation precautions, in addition to halting animals at the border, have been sent up by the U. S. Bureau of Animal Industry. While they are hopeful, officials here are not optimistic about keeping an epidemic away from border herds.

Foot and mouth disease is the most highly communicable contagion known to veterinary medicine. It attacks cloven footed animals—cattle, primarily—but also sheep, hogs and goats. Horses and poultry apparently are immune, and humans are not affected.

Animals develop blisters in the

mouth and around the hooves. Veterinarians know no real cure. A German scientist before the war claimed to have perfected a vaccine but he has not been heard from since the war.

Only Two Weapons

Agriculture authorities say the only two real methods of eradication are slaughter and quarantine. In each epidemic both methods are invoked immediately.

The disease has appeared in the United States nine times since 1772. In 1870, 1880, 1894, 1902 and 1908 the epidemics were confined generally to local areas.

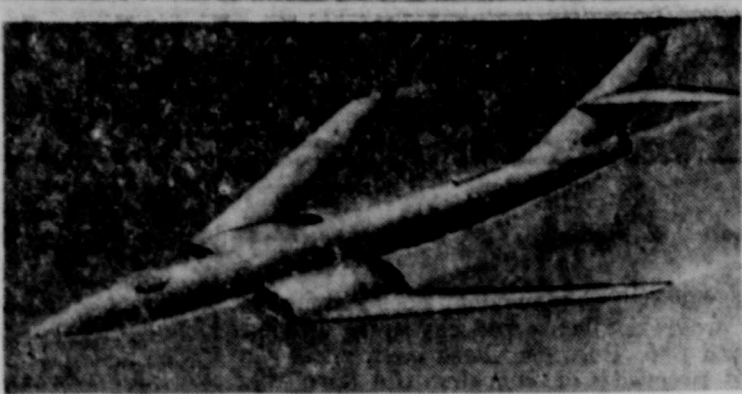

In 1914 the disease spread to 22 states and the District of Columbia. An estimated 175,000 cattle alone were slaughtered and burned or buried.

States affected included New Hampshire, Massachusetts, Rhode Island, Connecticut, West Virginia, Kansas, Ohio, Michigan, Indiana, Kentucky, Wisconsin, Illinois, Minnesota, Iowa, Montana and Washington.

That outbreak alone cost the nation about \$9,000,000.

Ten years later two outbreaks occurred in California and Texas, costing \$5,000,000. In 1929 a small outbreak occurred in southern California.

The Bureau of Animal Industry is in charge of the campaign to keep foot and mouth disease out of the country. Dr. S. O. Pladness, chief of the bureau's field inspection division, is a foot and mouth specialist. He has studied the disease in Argentina and Europe.

**FUTURE JET PLANE**—With this plane, engineers of the National Advisory Committee for Aeronautics estimate that 1,000 miles per hour speeds will be attained. Engines outnumber the passengers, 11, to 10, and most of the fuselage is used for fuel storage. It would travel from California to New York in 3 hours. Some say that after the plane reaches St. Louis from Los Angeles, it would have to start slowing down to keep from shooting over New York.

Never think a watermelon peasant would make a good farmer. But they do. And in the land owned by A. L. Berry, county farmer of Fairview, a watermelon peasant has been a bit of a success. Berry's pocketbook has been a bit better since he put the watermelon peasant on land that County Agent J. Q. Galloway claims has sold for \$10 an acre in 1946.

Berry said Berry decided the watermelon peasant should be made to justify itself. Berry figured out a plan of operation. He planted good seed, cultivating and using lots of fertilizer and legume. In 1946, 29 acres of watermelon brought a profit of \$100.

Part of the five-year plan of Berry's land show up in the way, too. Galloway says the watermelon peasant never be valued at that high again.

**Grow to Be Old By Close Shaves**

DECATUR, Ill. (AP)—Scientists looking into the aging process, with the hope of finding ways and means of assuring everybody a long and active life, ought to drop into Decatur's barber shops.

In a single shop a reporter found barbers who had been in the business 37, 43, 50 and 55 years. In another he found a barber who had shaved the same customer 3,744 times—twice a week for 36 years. Maybe seeing a barber twice a week had nothing to do with it, but the customer is 84.

## Veteran's NEWS

About 900,000 World War II veterans in Texas, Louisiana and Mississippi will soon receive letters from the Veterans Administration acquainting them with their rights to reinstate lapsed GI insurance.

VA's insurance officers in the Dallas Branch Office, 1114 Commerce Street, said that was the approximate number of Southwestern veterans who dropped their National Service Life Insurance following discharge.

About 95 per cent of the 1,300,000 World War II veterans in the Dal-

las Branch Area had GI policies during military service. The minority who had no government insurance are also eligible to receive it on application along with medical evidence satisfactory to VA.

Both the Senate and the House have approved a bill authorizing extension of the deadline for reinstatement of GI term insurance without a physical examination upon payment of two monthly premiums.

The bill was awaiting the President's signature at the time this was written.

VA anticipated that a new deadline of August 1, 1947, would be set. Before August 1, veterans will have only to sign a statement that their health is as good now as it was at the time of lapse to reinstate.

Most lapses came immediately after demobilization before records were decentralized to Branch Offices. The trend has now reversed. Nearly 24,000 veterans reinstated

during January, alone, in the Dallas Branch Area.

VA is now paying out about \$700,000 a month to 18,689 beneficiaries of veterans in Texas, Louisiana and Mississippi, on insurance claims. About 10,000 veterans in the area have received waiver of premiums because of total disability.

The four per cent gratuity payments made by Veterans Administration to the credit of veteran-borrowers under the GI Bill loan provisions are exempt from Federal income tax, the Commissioner of

## Looking Forward—With Hope!

IF THE FEDERAL GOVERNMENT once starts living within its means, the American taxpayer—and no one of us escapes taxes in one form or another—can look forward to:

1. **GETTING OUT OF DEBT.** Our government is not something separate and distinct from us. If it is in debt, we are in debt. If extravagant Federal spending is stopped, the national debt can be readily eliminated.
2. **A DECIDED INCREASE** in production of non-essential Federal employees resume productive work.
3. **AN IMMEDIATE REDUCTION** in the individual's tax burden, with the prospect of more rather than less money available for total tax revenues.

### REMEMBER--when you could buy a good white broadcloth shirt for \$1.95?

BACK in 1939 you could buy a good white broadcloth shirt from almost any men's furnishings shop for \$1.95. Today for a shirt of the same quality you pay approximately twice as much. And what is true of men's shirts is true of most other things you buy. Almost everything has gone up—almost everything except electricity.

As a result of greatly increased use coupled with sound business management, electricity has stayed down in cost while other prices have been going up. Electricity is one of the few things you buy that still sells for pre-war prices or lower. Although your monthly bill may not be less, due to the fact that you're using more electricity, the cost per unit of electric service was never cheaper than it is today.

### Need Free Snuff, Blotting Sand? Become a Member of U.S. Congress

By JANE EADS

WASHINGTON—Congress does its best to encourage its boys and girls to wash their faces and hands and comb their hair before they appear in public.

Cakes of soap, fresh towels and combs and brushes are supplied each member.

Senators are supplied with snuff, too. At the opening of each session of Congress, Miss Grace Genzberger, who has been clerk in the Senate's Sergeant-at-Arms office for 28 years, orders the snuff.

Whether the Senators use the snuff or not, the two little snuff boxes attached to the wall of the Senate Chamber by the doors leading into the lobby have to be filled several times each session.

This has been going on since Congress began. At first the boxes were very ornate. They disappeared every now and then. Miss Genzberger said she finally got just plain boxes that could be screwed on so tightly they couldn't be fished.

In addition to these attentions, senators are supplied little bottles with shaker tops on their desks in the Senate Chamber. The bottles are filled with lemite, a sort of mineral-like sand—that comes from Virginia.

If the senator doesn't carry a blotter or one of those new pens around with him, the lemite can be used to shake over any writing if ink he does while in the Senate. This custom goes back to the old days before blotters.

Frank W. Collier of La Crosse, Wis., is back in his old job as Postmaster of the House of Representatives. Once before when the Republicans held sway over Congress and patronage he served as Postmaster—from 1919 to 1931.

In the interim he served as minority clerk of the House.

When Collier first came to Washington in 1903 he was a postal messenger and helped deliver congressman's mail by horse and wagon. In those days there were no office buildings for the members, and the mail had to be delivered from the central post office downtown to the members' homes or hotels.

Collier said he used to get up at 4 o'clock in the morning and walk to work.

There were six horses and wagons, and they made two trips a day.

Today the House Post Office, located on the main floor of the Old House Office Building, handles as much mail as any city post office, averaging about 50,000 pieces of letter mail daily.

John C. Paige, property custodian of the House of Representatives, has to keep track of about 35,000 pieces of furniture. These include desks, chairs, book cases, filing cabinets, secretaries' desks, typewriter stands, coat racks, book-cases and so on.

The furniture is getting kind of tired-looking. Most of it is over 40 years old. However, experts in the shops of the capitol do their level best to keep it presentable.

## THE WORLD'S GREATEST SCHOOL FOR LEADERSHIP

The Army Ground Forces soldier is famed for his ability to carry out any assignment with resourcefulness and initiative—the qualities that make leaders in civilian life as well as the Army. The Ground Forces not only teach you leadership—they equip you with the fine job training to go with it. In peacetime, the Army is a gigantic school-going organization—with training available in many skills and trades. Courses offered range all the way from automotive mechanics to welding—designed to help you find the work you like and do best.

Increased Army pay scales are now in effect, and you receive 20% additional pay for overseas service. Thousands of outstanding young men, able to meet the new higher standards required, are enlisting in the Regular Army. They are beginning interesting, useful careers by learning leadership along with special skills. Visit your nearest U. S. Army Recruiting Station for details.

### HIGHLIGHTS OF REGULAR ARMY ENLISTMENT

- 1. Choice of any branch of service which still has quotas to be filled, and of certain overseas theaters of assignment.
- 2. Enlistment age from 18 to 34 years (except for men now in Army, who may enlist at any age, and former service men depending on length of service).
- 3. Educational benefits under GI Bill of Rights for men who enlist before official termination of war and remain in service 90 days or more.
- 4. Family allowances for dependents of men enlisting or reenlisting until 6 months after official termination of war.
- 5. Enlistments for 1, 2 or 3 years. (1-year enlistments permitted for men now in the Army with 6 or more months of service.)
- 6. Option to retire at half pay for the rest of your life after 25 years' service—increasing to three-quarters pay after 30 years of service. All previous honorable active federal military service counts toward retirement.

### HIGHER PAY FOR ARMY MEN

INGTON — Courtesy is law to be observed by the members of the Capitol Police Force, says their new captain, William J. Broderick.

For 19 years a member of the Penn. State police, Capt. Broderick figures that the people who come up to Capitol Hill, whether a legislature or just to look, help pay the salaries of the men on the force.

William Ballinger, a veteran of 19 years' service, who led the rookies on the force, says that they must be alert.

He told them how to behave, how to enforce regulations in the Capitol, in the Senate and office buildings and on the surrounding these build-

### Building or Remodeling Homes Takes A Lot of Planning for Future Years

COLLEGE STATION, Feb. 10.—Families planning to build or remodel homes now should do a lot of advanced figuring, warns Mrs. Bernice Claylor, home management specialist of the Texas A. and M. College Extension Service.

It may seem unnecessary to advise that a careful estimate of all costs should be made before a new house starts going up, says Mrs. Claylor, but the fact remains that many people who have built new homes or had remodeling done have been unappreciatedly surprised at the final total cost.

It is often wise to ask the advice of neighbors who have had such work done, says the home management specialist. And of course lumber dealers and contractors can give

help in reaching a fair estimate. To cover unforeseen developments in building costs, adding a small percentage to the final estimate is a wise move, the specialist says.

How much should a family invest in building? Mrs. Claylor suggests this plan in finding an answer to that question: estimate the total income of the family for the next few years—say from seven to 10—then subtract from that figure the expected living expenses for that period, and add the savings on hand. Allowance should also be made for the increased cost in insurance and taxes that will result from the new building.

The matter of financing a new home is doubtless the foremost problem with most families, says the specialist. She urges prospective builders to give much consideration to the question of whether to build now or wait until building costs drop.

Here is another question that the family should ask itself before building: Will the money invested in a new or better home contribute more to the welfare and happiness of the family than if it were spent in some other way—such as for clothing, a new car, household equipment, education travel or entertainment? All these should be balanced against the building program. When it's a farm building being planned the possible increase in family income from the new construction should be considered, says Mrs. Claylor.

If a new home is completely out of the question because of high costs, many families can bridge the gap between "what they have" and "what they want" by remodeling or renovating, Mrs. Claylor says.

Then there's the matter of location and arranging. The specialist points out that far too many families proceed to build with the idea of making work easier and "live more interesting." For the farm family in particular, new building or remodeling should result in arrangements by which the family can get more work done in a given period of time.

Undertaking a debt right now is at best, a risky proposition, the home management specialist says, and folks should certainly not go ahead with building plans until they know that any debt taken on now can be managed satisfactorily.

Eight prominent Texans—all High Masons—will direct the policies of Texas Scottish Rite Hospital for Crippled Children in Dallas for the ensuing year. The new officers shown above were unanimously elected at the annual meeting of the Board of Trustees recently. Reading from left to right (top row) they are: Nathan Adams, chairman of the board; Judge Hiram F. Lively, vice-chairman; W. A. Browning, president; E. R. Germany, 1st vice-president; (bottom row) John L. DeGrazier, 2nd vice-president; Judge Towne Young, 3rd vice-president; George R. Jordan, treasurer, and Asher Mintz, secretary. Dr. Brandon Carrell was re-elected chief surgeon and Miss A. L. Little, superintendent. The Scottish Rite Hospital is nearing the end of a successful state-wide drive for funds with which to operate the hospital for crippled children. A major portion of the funds received have come from the "general Texas territory," according to reports.

## TEXANS IN WASHINGTON

BY TEX EASLEY

(P) Special Washington Service

WASHINGTON, Feb. 11 (AP)—The Rio Grande Valley's Congressman Milton West goes walking through Washington, passerby keep turning a second glance.

Frequently a youngster asks if he is a Texan. The other day a fashionable Statler Hotel stranger came up and put the question to him.

West, who looks like many other Texans, is a Texan through and through. He has a trace of blue eyes twinkling except

for the rare moments when he gets riled up.

You'd never guess it, but the gentleman from Brownsville has seen 58 summers come and go.

He has been in Congress 14 years, and is a lawyer by profession, but before that he was a Texas Ranger. West rode the Mexican border as a ranger in 1911 and 1912, and one of the two .45 Colt revolvers he used to carry is supposed to bear three or four notches.

Born near Gonzales June 30, 1888, he grew up in Floresville. As a boy he delivered milk there and got the nickname "Leche." After his two years as a ranger, West studied in the law office of Judge James A. King of Floresville. Later he was elected District Attorney and then

**CHAMPION HEARTBREAKER**—Slight, Belgin-born Marcel Greeff is a modern age cupid concerned completely with hearts. He spends all his working hours fashioning stylized versions of hearts for a Providence, R. I. manufacturer of bracelets and costume jewelry. He first makes a plaster cast of the type heart desired, and if it doesn't appeal to him, he dashes it to the floor, thereby entitling him to claim that he has broken more hearts than Clark Gable and Cary Grant combined.

Representative to the state legislature from Cameron County.

With that border country background, it's little wonder he sometimes gets a far away look in his eye as he peers out at the snow and ice during a Washington blizzard.

Neither is it surprising that he is Chico's best customer.

Chico Diaz runs the only place in the Washington area where you can get a genuine Mexican dinner. The fact that Chico's place is out near Rockville, Md. 16 miles from downtown Washington, doesn't diminish the congressman's zest for Mexican food.

He drives out to Chico's at least two or three times a week frequently taking several friends with him. There he relaxes and sometimes romps with the three Diaz tots, who are learning Spanish from their parents and English from the customers. Congressman West himself reels off Spanish without hesitation.

When he doesn't go to Chico's West eats in various restaurants. He lives at a downtown hotel, a far cry from his spacious living quarters in Texas. He has a house in Brownsville and a ranch at Mission.

Get him to talking about the ranch and he pulls out snapshots that he took with his pocket camera. A few of the scenes are of the ranch house, but mostly they are of the Brahma bulls and the horses on the place.

West serves in the House as a member of the Ways and Means Committee which, in the next few weeks, will deal with important tax problems that are due for a lot of public attention.

As the only Texan on the committee, and the only Democrat hailing from one of the eight community-property states, West can be counted on to put up a stiff fight against proposed legislation to nullify the tax benefits these states

**ARMY DOG**—"Butch," the mascot of the Biggs Field photo lab, El Paso, Tex., is caught by an AAF official photographer in an austere moment. Butch particularly enjoys accompanying El Paso field photographers on aerial missions and has more than 200 hours to his credit. His owner, T/Sgt. R. D. Burt, says at Lawson Field, Ga., Butch held the rank of staff sergeant, complete with dog tags, class A pass, and personal file.

(P) Photo derive from their particular state laws and constitutions.

Under existing procedure, married couples in community property states may divide their income equally for tax purposes, thus putting their family income in a lower bracket subject to a lower rate of taxation.

West has led successful fights in the House against repeated attempts to modify the federal law and abolish this special tax benefit. Senator Tom Connally has led similar fights in the Senate. Both agree that the fight will be harder now that the Republicans have control of Congress.

On Capitol Hill, West has a well-established reputation as a "conservative." He opposed most New Deal measures. His political beliefs coincide with those of the man whom he succeeded in Congress, former Vice President John Nance Garner.

It was the Sage of Uvalde who first stirred in West the idea of entering public life. As a youth of 16 he attended a political rally where Garner spoke in his first race for Congress. The two have been close friends for many years.

Always an outdoor man, West played golf regularly for recreation until an operation at the beginning of the war prevented him from taking strenuous physical exercise. He says the doctor is about to give him the green light, however, and he expects to be back on the fairways again soon.

West has a son, Milton H. (Mickey) West, Jr., a naval veteran of many battles in the Pacific, who practices law in Houston.

By HAROLD V. RATLIFF  
Associated Press Staff

Lloyd Gregory said goodbye to sports the other day. No, it wasn't exactly that; he bid farewell to sports writing. You can look for him among Saturday's thousands in the fall; he just won't be sitting in the press box.

Probably the only metropolitan managing editor in the country to write a sports column, Gregory turned over the column to a co-worker to become vice-president

and general manager of the Houston Post.

His last column was filled with sentiment.

"The writing of this last column hurts," he said. "Perhaps it's the realization that youth's golden prime has fled, and taken the golden dreams with it."

For ten years the handsome Gregory had been writing the column "Looking 'em Over" while taking care of the multiple duties of managing editor. They said a managing editor in his spare time, of course, that wasn't a fact, but anyway, he loved sports. That's why he knew so many people and that's

why he was so interested in his work.

Lloyd was a Marine in the first World War. In France he wrote his first sports story.

He became sports editor of the Post 20 years ago. He served ten years, then was made managing editor. But by popular demand he continued to write a sports column. It had reader interest because it was filled with names, facts and figures.

During the war "Looking 'em Over" was turned largely into a military column. Men wrote Gregory from all over the world. And they read the column all over the world, too.

Gregory, a native of Beeville, Tex., entered the University of Texas in 1916. But along came the war and he enlisted in the Marines. He wrote that first sports story for Stars and Stripes, when he was 18 years old. That touch of printer's ink was later to remove a promising college professor from the educational scene.

Returning from the war he again entered the university and worked his way washing dishes, doing odd jobs in the library and writing sports for the Daily Texan, university publication.

Gregory lettered in tennis in 1920 when he was Southwest Conference singles champion, and was team captain in 1922. He played with Lewis White to win the Southwest doubles title and lost to White in the singles finals. He played in the national intercollegiate where he was eliminated by the defending champion.

He graduated in 1922, got married and became an instructor of journalism at the university. Then he became correspondent of The Associated Press in Austin. On the

day he quit this job he scored a great news scoop on the tragic crash of a bus carrying Baylor University's basketball team with a train at Round Rock.

Lloyd had delayed his lunch hour that day. He doesn't remember why. The telephone rang. It was the operator at Round Rock. She screamed that there had been a terrible accident—that the Baylor football team had been in a wreck. Gregory's knowledge of sports told him, however, that it wouldn't be the football team but the basketball squad that was coming to Austin that day to play Texas. So he put a bulletin on the wire. Then he got the story and had it on the wires an hour ahead of any other service.

Five times a week for the Post Lloyd wrote the sports column "Looking 'em Over." He not only helped elect coaches but got some of them fired with his comments. Folks paid plenty of attention to what he said because he was one of the best informed sports writers in America.

A couple of years ago Gregory covered the World Series and the first day turned out this classic line: "Due to transportation difficulties and other things incident to the war effort, only 400 sports writers were here today to cover the World Series."

Gregory inaugurated the Houston Post Semi-Pro Baseball Tournament, one of the largest sports events of its kind in the country. It has paid as much as \$14,500 to the competing teams and drawn as many as 65,000 spectators. Some of the major stars have played in it. One summer Howard Pollet and Tex Hughston were opposing pitchers.

Rice was playing Santa Clara at San Francisco one season. The Rice record wasn't very good. Gregory went along to try to build up interest. He told about the great passing game of Rice. In fact, he talked so much about its passing that he obscured the fact that Rice hadn't been able to beat anybody much during the season. So the sports writers at San Francisco took up the cry. They filled their columns with word of Rice's pitching prowess. Came the game and a big crowd out to see the promised aerial circus. Rice threw just one pass and it was intercepted. Rice also took a licking. The day the team and Lloyd left, one of the San Francisco sports writers devoted his column to the declaration that not since the Gold Rush had San Francisco been so "taken" as it had been by the "hick sports writers from Texas."

Then, there was the story of Lloyd and his ex-prize fighter friend whom he called "Slap-happy." WASHINGTON, Feb. 24 (AP)—San Antonio's Congressman Paul J. Kilday, an easy going but positive sort of fellow, should get along all right even as a minority member of the house.

In other words, he is on speaking terms with the Republicans, even though born and reared a Democrat.

A conservative individual by nature, he was doubly welcomed by many legislators on both sides of the aisle when he came here six years ago. He had unseated Maury Maverick.

Back in 1922, when he attended law school here, Kilday got a job with the U. S. shipping board thru the aid of one of the few Texas Republicans ever to serve in Congress, the late Harry M. Wurzbach of San Antonio.

A lawyer by profession, the amiable, hefty six-foot Kilday is a member of one of Bexar county's most prominent families.

He is one of six living brothers. In order of their ages, starting with the oldest, they are: Jim, as assistant U. S. attorney general headquarters here; Owen K., sheriff of Bexar county and a former chief of police of San Antonio; Pat, a Birmingham, Ala., businessman; Paul; Pather Frank A., O. M. I., Catholic Priest in San Antonio; Tom K., a West Point graduate and a Major in the regular Army. There also is a widowed sister, Mrs. Margaret Sandlin of San Antonio.

"With that kind of background, is it any wonder that my main hobby is just plain talking with people," he laughs. "I don't play golf, sing, hunt or ride horseback."

What he does do, and with a fair degree of proficiency, is prepare Mexican dishes. He is happiest when a few friends gather at his

house and, with an apron around his ample waist, he stirs up the ingredients and comes out with chili, enchiladas and guacamole salad.

One of the four Texans in Congress who own a house here—the others are Senators Tom Connally and W. Lee O'Daniel and Rep. Lyndon B. Johnson of the Austin District—Kilday hurries home when the day's business at the Capitol is finished to be with his family. He has two daughters, Mary Catherine, 13, and Betty Ann, 11. His wife is the former Cecile Newton of San Antonio.

Kilday is the only Catholic in the Texas Congressional D-legation and so far as can be checked is the second of that faith ever to serve in Congress from the predominantly Methodist and Baptist populated state.

Hailing from an important Army center, which includes Fort Sam Houston, Randolph and other air fields, it was natural that Kilday's main interest in legislation would be that dealing with military matters.

He was assigned to the House Military Affairs committee when he first came to Congress. He now is a member of the House Armed Services committee, which is a consolidation of the military and naval affairs committees as effected under the Reorganization Act.

Born March 29, 1900, in Sabinal, Uvalde county, Kilday moved with his parents as a boy to San Antonio, where he attended both public and parochial schools. Obtaining his law degree here at Georgetown university in 1922, he returned to San Antonio and began private law practice. From 1935 until entering Congress he served as first assistant district attorney in San Antonio.

OKLAHOMA CITY (AP)—Patrolman R. C. Williams hurriedly placed a call for reinforcements after he thought he heard a blow torch being used in the dead of night at the Oklahoma National Bank. With

guns drawn and silently entering the bank, the officers confronted a steam boiler that had become overheated. Excessive pressure escaping sounded like a blow torch.

## CONSTIPATION Risky in BAD COLDS

Retained undigested food becomes putrefactive, causes toxins, which overload the liver and other vital organs of the body, lessening your resistance to colds and other winter ills and interfering with their treatment. Why take this chance when you can take Calotabs? Calotabs thoroughly yet pleasantly act on every foot of your intestines, sweeping out toxin-laden putrefactive foods and virus-laden mucus, enabling you to more effectively avoid or fight a cold. Nothing acts like good old Calotabs. Use as directed. 10c and 25c at all druggists.

## Nazi Jitters Called Cause of Disease

BERLIN (AP)—A German psychiatrist has discovered a new German disease—"PG" (Nazi party command) Neurosis—which he said leads to depression and ends in suicide.

He prescribed as a remedy a speedup and simplification of the denazification process. Dr. Hanns Schwarz, professor of psychiatry at the university of Griefswald, wrote in the Berlin newspaper the Telegraf.

"It appears among the (Nazi) camp followers today in paralyzed initiative, decreased energy, under-

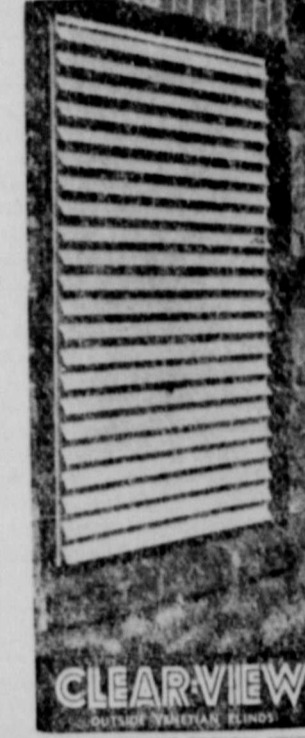

mined self-confidence and paired family life because of inability."

### From where I sit ... by Joe Marsh

### Bert Solves the Labor Problem

You hear a lot about capital and labor nowadays, as if the two could never get together. But look at Bert Childers—who has 320 acres of producing land, a fair-sized herd of cattle, and two farm hands working for him.

If anybody has a beef—whether it's about wages or hours or equipment—they talk it over at those friendly evening sessions.

If you called Bert a "capitalist" he wouldn't know what you meant, and neither would Spike and Sandy, the hired men. Bert works side by side with both of them; and in the evenings they sit around the fire together—sharing a friendly glass of beer or two.

I don't say all labor problems are as simple as Bert's. But from where I sit, the basic principle applies to any farm or factory or business: A principle of confidence and mutual respect, of daily talks together in a friendly and congenial atmosphere.
