PUTTING YOUR MONEY IN THE BANK

When you have it, is nothing more than good business policy.

And the fact that you do maintain such a connection is your best assurance of accommodation when assistance may be necessary for you.

Your credit rating—your community standing—your hope for future prosperity—even your comfort and happiness—demands that you MAINTAIN AN ACCOUNT AT SOME BANK.

MRS. LANCE IN

AUTO ACCIDENT

Monday night as Mr. and Mrs. Lance, father and mother of L. H. and L. L. Lance, J. B. Conley and wife and Luke Lance were returning from Amarillo, the lights of their car were extinguished and car was overturned injuring Mrs. Lance seriously, sustaining a severe cut on the head, and Mr. Lance slightly. Mr. L. H. Lance was called over the telephone and hurried to the scene with Dr. Brewer, who found it necessary to take 17 stitches in the scalp of Mrs. Lance. The other occupants of the car escape with only a bad shaking up.

The Herald extends sympathy and hopes for her speedy recovery.

WAWAKA NEWS

The Wawaka country is still dry. Here's hoping it will rain soon.
The Teachers of the Wawaka School have adopted the hot lunch system for the school children.

The school gave a pie supper last Friday night to raise money to buy wash sink and necessary things for the school. There was a large attendance and plenty of pies to go around. Everybody reported a good time.

Mr. and Mrs. Hermond Barber are the proud parents of a fine boy.

Homer Coberly will begin a meeting soon at Wawaka.

The church has purchased a new piano and will have prayer services every Sunday and Wednesday evenings at 7:30. Everybody is invited to attend. Mrs. Chester Jackson led last Sunday night.

Mr. and Mrs. Dickson of Colorado are here this week visiting Mrs. Dickson's parents, Mr. and Mrs. Dear.

Mr. and Mrs. Roy Leight are re-joining over a 10 pound girl that arrived November 7th.

The new switch board that was installed here several days ago is working fine.

J. W. Rogers is on the sick list.

Mr. and Mrs. Lester Weight has moved to Texline. We hope our lost will be Texline's gain.

COUNTY COURT JURORS

The following is a list of the jurors for the November term of the County Court:

B. L. Barnes.
Hicks McClung.
John North.
Ray Kutch.
E. C. Lee.
W. B. LaMaster.
A. L. Carter.
S. S. Mallett.
J. F. Meade.
Ollie Morris.
John W. Hall.
M. B. Hedgpeth.
G. B. Mears.
W. V. Jones.
Aubin Allen.
W. E. McMillen.
F. C. Spencer.

Miss Johnnie Reeves of Spearman, former pupil of Prof. J. M. Bull t Plainview, Texas was visiting at the home of Mrs. Bull's last Saturday.

F. Bray and family are moving to their ranch near Miami this week. We regret very much to lose these good people from our community.

HERE FROM TEXAS

Van W. Stewart came up from Perryton, Texas, to attend the American Legion convention and to visit his mother, Mrs. Maude Stewart. In connection with his brother Paul, the boys are publishing The Ochiltree County Herald at Perryton and are not only putting out a good paper, but are enjoying a prosperous business. The Herald is the official paper of Ochiltree county and has a wide circulation.—Excelsior Springs Daily Call.

BAPTIST CHURCH

Services next Sunday will be as follows:

Sunday School—10 a. m., Dr. E. R. Jarvis, Supt.

I. W. ROGERS, Pastor.

METHODIST CHURCH

Sunday School promptly at 10:00 a. m.

Preaching at 11 a. m. and 7:30 p. m.

Senior Epworth League at 6:30 p. m.

Junior Epworth League at 6:30 p. m.

Prayer Meeting Wednesday evening at 7:30.

Choir practice Thursday evening at 7:30.

Woman's Missionary Society at 3:00 p. m. Thursday.

Large crowds attended the services last Sunday. We are always glad to have you worship with us and enjoy the splendid music. Come again.

W. A. HITCHCOCK, Pastor.

BAPTIST CHURCH NOTES

The pastor will preach next Sunday morning on "The Church at Philippi—The Spirit-Filled Church." This is the sixth of a series of sermons on "The Churches of the New Testament."

At the evening hour the pastor will speak on "What The Bible Teaches Concerning Divine Healing." This is a subject in which many people are deeply concerned. Such questions as "Are the Days of Miracles Past?" and "Does the Bible warrant the use of Medicine?" Will be answered in the light of God's word. You are cordially invited to be present at both the morning and evening service.

Last Sunday night the congregation adopted in substance the following telegram which was sent Monday.

"Perryton, Texas, 11, 6, 1921
To Warren G. Harding,
President of the United States,
Washington, D. C.

We, the members of the First Baptist Church and friends assembled, realizing something of the awfulness of war, do by standing vote, earnestly and respectfully urge you to use all your power and influence to bring about the disarmament of the nations.

(Signed) Isaac W. Rogers, Pastor.

THE 500 CLUB

The members of the 500 Club were delightfully entertained at the home of Mrs. Lynch Dodson last Wednesday afternoon. Mrs. Fremont Meade won first prize and Mrs. Floyd Griffith second.

A dainty luncheon was served to members and Miss Billie Hunter, who was a guest. The next meeting will be at the Perryton Hotel with Mrs. John North as hostess. At this time the Club will entertain their husbands and friends.

There will be a pie supper at the Cedar Bluff School House on Saturday night, November 12, 1921. Every one is invited to attend. There will be a nice program and entertainment for will is promised.

Guy E. Holt reports the arrival of a fine boy at his house. Mother and baby doing fine and some hopes are entertained for Guy.

A BANK FOR ALL PEOPLE

It is our constant aim to meet the needs of all the people all the time in every particular.

We consider the small depositor is entitled to as much careful attention as the large one.

The Perryton National Bank

NOTICE TO TEACHERS

Will all teachers of the Perryton Independent School District please mail or bring in copies of all examination questions used so far; also, suggestive questions for this month from which selections will be made for our first uniform examination to be given the week following Thanksgiving.

Let us all be present at a teachers' meeting at Perryton School building at 1:30 p. m. Saturday, November 26 to discuss these examinations and other matters of interest to all of us.

RAY L. SHOWALTER, Supt.

J. R. McCaslin of the Panhandle Lumber Company of Spearman was a Perryton visitor Wednesday morning.

CLARK—HOLLAND

W. A. Clark, Jr. and Miss Joyce Holland teachers of the Spearman school came over to Perryton Tuesday evening and were united in marriage at the Methodist parsonage by Rev. W. A. Hitchcock. The Herald extends congratulations and wishes for them a long and happy wedded life.

Perryton, Texas

THE "REXALL" STORE

ONE CENT SALE

Next Thursday, Friday and Saturday, November 17th, 18th and 19th

WHAT IS A ONE-CENT SALE? It is a sale where you buy an item at the regular price—then another item of the same kind for 1c. As an illustration: The standard price of Rexall Tooth Paste is 25c. You buy a tube at this price, and by paying 1c more, you get two tubes. Every article in this sale is high-class standard piece of merchandise, just the same as we sell you every day at regular prices and have sold you for years.

A NEW WAY OF ADVERTISING—This sale was developed by the United Drug Company as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell you a full-size package of high standard merchandise for 1c. It costs money to get new customers, the loss taken on this sale will be well spent if the goods please you.

MAXIMUM HOT-

WATER BOTTLE

The largest selling bottle in the world. The price everywhere is \$2.50 each. Full two-quart capacity. Guaranteed for one year.

NOTICE OF APPLICATION FOR PROBATE OF WILL

THE STATE OF TEXAS.

To the Sheriff or any Constable of Ochiltree County—Greeting:

You are hereby Commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Ochiltree, State of Texas, and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:

Notice of Application for Probate of Will.

The State of Texas,

To all Persons Interested in the Estate of

P. C. EMBERSON, Deceased

Francis E. Emberson has filed in the County Court of Ochiltree County, an application for the Probate of the Last Will and Testament of said P. C. Emberson, Deceased.

Which will be heard at the next term of said Court, commencing on the Third Monday in November A. D. 1921, the same being the 21st day of November A. D. 1921, at the Court House thereof, in Perryton, Texas, at which time all persons interested in said Estate may appear and contest said application, should they desire to do so.

Herein Fail Not, but have you before said Court on the said first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Perryton, Texas, this 31st day of October A. D. 1921.

DAVID D. SHANKS, Clerk. County Court of Ochiltree County, Tex. By E. M. Wilson, Deputy.

If you want to sell your Land or City property, list it with C. E. McLarty. 22-tfc

LAMONA FOWL IS OF GREAT MERIT

Government Poultry Experts Have Produced New Breed Possessing Fine Qualities.

LAYS WHITE-SHELLED EGGS

Body is Long and of Good Depth, and Has Large Capacity for Reproductive Organs—Resistant to Weather Changes.

(Prepared by the United States Department of Agriculture.)

The country will soon have a new breed of poultry, a white fowl with red ear lobes, that lays a white egg developed by the poultry experts of the United States Department of Agriculture at the government experimental farm at Beltsville, Md. Heretofore, it is said, all breeds with red ear lobes have laid brown-shelled eggs. The project was conceived by Harry M.

Lamon, senior poultryman of the bureau of animal industry, and at the suggestion of the chief of that bureau Secretary Wallace named the breed Lamona, for the originator.

The new fowl possesses characteristics of great merit. It has sufficient size to fit the demands of the great number of consumers who want a bird weighing four to six pounds. The body is long and of good depth, giving a large amount of the highly desirable breast meat, and at the same time large capacity for the reproductive organs.

The Lamona fowl is larger than the Leghorn, approaching in size fowls of the American class. It is white, which is most desirable from the market men's viewpoint. It has a comb and wattles of medium size which are not easily frosted, thereby checking development of egg production. It is well feathered, which makes it resistant to sudden changes in temperature.

Foundations of New Breed.

The project resulting in the creation of the new Lamona was started in 1912, when the idea was conceived of combining three varieties of fowls to produce a breed having the shape and the market qualities of the Dorking.

With a yellow skin, white plumage, and four toes, and laying a white egg. A low-stationed, close-feathered White Plymouth Rock male was mated to a Silver-Gray Dorking female; and a Single-Comb White Leghorn male, having a rather small, low comb, was mated to a Silver-Gray Dorking female.

The second year the offspring of these crosses were mated separately, the females being trap-nested, and only the high producers of the largest and whitest eggs were used for breeders. Only males from high-producing females have been used at any time.

The third year the results of the crosses of the second year were mated and in addition, care was taken to select white specimens with yellow skins having only four toes. Since then it has been a task of careful selection and breeding.

The new breed is not yet ready for introduction, and no specimens or eggs will be sold until the characteristic sought have been more firmly fixed. It is as well or better developed than were several of the breeds and varieties when they were introduced by their breeders, but the specialists of the department believe that it is not

sufficient to have a few specimens that measure up to the ideal. They want the characteristics so well fixed that the fowls will produce a high percentage of progeny of the ideal type. When sufficient stock of such birds has been obtained specimens will be sent to state agricultural colleges and experiment stations to test their adaptability to different sections and conditions.

Lamon, senior poultryman of the bureau of animal industry, and at the suggestion of the chief of that bureau Secretary Wallace named the breed Lamona, for the originator.

With a yellow skin, white plumage, and four toes, and laying a white egg. A low-stationed, close-feathered White Plymouth Rock male was mated to a Silver-Gray Dorking female; and a Single-Comb White Leghorn male, having a rather small, low comb, was mated to a Silver-Gray Dorking female.

The second year the offspring of these crosses were mated separately, the females being trap-nested, and only the high producers of the largest and whitest eggs were used for breeders. Only males from high-producing females have been used at any time.

The third year the results of the crosses of the second year were mated and in addition, care was taken to select white specimens with yellow skins having only four toes. Since then it has been a task of careful selection and breeding.

The new breed is not yet ready for introduction, and no specimens or eggs will be sold until the characteristic sought have been more firmly fixed. It is as well or better developed than were several of the breeds and varieties when they were introduced by their breeders, but the specialists of the department believe that it is not

sufficient to have a few specimens that measure up to the ideal. They want the characteristics so well fixed that the fowls will produce a high percentage of progeny of the ideal type. When sufficient stock of such birds has been obtained specimens will be sent to state agricultural colleges and experiment stations to test their adaptability to different sections and conditions.

Lamon, senior poultryman of the bureau of animal industry, and at the suggestion of the chief of that bureau Secretary Wallace named the breed Lamona, for the originator.

The new fowl possesses characteristics of great merit. It has sufficient size to fit the demands of the great number of consumers who want a bird weighing four to six pounds. The body is long and of good depth, giving a large amount of the highly desirable breast meat, and at the same time large capacity for the reproductive organs.

The Lamona fowl is larger than the Leghorn, approaching in size fowls of the American class. It is white, which is most desirable from the market men's viewpoint. It has a comb and wattles of medium size which are not easily frosted, thereby checking development of egg production. It is well feathered, which makes it resistant to sudden changes in temperature.

Foundations of New Breed.

The project resulting in the creation of the new Lamona was started in 1912, when the idea was conceived of combining three varieties of fowls to produce a breed having the shape and the market qualities of the Dorking.

With a yellow skin, white plumage, and four toes, and laying a white egg. A low-stationed, close-feathered White Plymouth Rock male was mated to a Silver-Gray Dorking female; and a Single-Comb White Leghorn male, having a rather small, low comb, was mated to a Silver-Gray Dorking female.

TERM INSECTS MOST FORMIDABLE RIVALS

One of Most Injurious Pests Is the Fly Weevil.

It is Primarily Plague of Wheat and Corn and is Particularly Harmful in Southern States—Ruins Entire Crops.

(Prepared by the United States Department of Agriculture.)

The insects are our most formidable rivals in the struggle for existence.

Economic entomology does not deal alone with insects which attack fruits and growing crops. It must deal with insects that affect grains and foods in storage, that damage our clothing, that kill our domestic animals and, too, that carry disease to man himself, that eat up our wooden buildings, and that honeycomb our books and implements.

We must fight them all along the line.

One of these insect enemies against which the bureau of entomology has been directing a fight, is the angoumois grain moth, popularly known in this country as the fly weevil. It is primarily a pest of wheat and corn in this country, but affects all cereal grains. It is particularly injurious in the Southern states, and does little harm north of central New Jersey, except to cereals in storage.

It is second to the rice, or black, weevil in its capacity to damage grain. Often entire crops of corn and wheat are ruined. Wheat loses through moth attack about 52 per cent of weight. Corn loses from 12 to 24 per cent. Bread made from affected grain is worthless. The moth also eats barley, oats, buckwheat, sorghum, milo, rice, beans, chickpeas and cowpeas.

This is mentioned as an example of avoidable insect pests which the United States Department of Agriculture not only teaches but assists farmers to avoid.

In the case of the angoumois moth, which works damage to stored grain in regions where its propagation among growing crops is prevented by the short seasons, the department is urging farmers to fight the pest systematically by such measures as early threshing, proper storage, and fumigation. It teaches them to take advantage of the weakness of the insect by fighting its further spread.

It is only by constant and intelligent effort that mankind can overcome the ravages of insects of every kind which attack almost every substance on which he depends for his livelihood and comfort. In this effort the public should take advantage of the services rendered by experts of the bureau of entomology and by other experts of the department.

FOR SALE

The trustees of the Perryton Independent School District offer the small building standing just south of the Ochiltree School House for sale. This building was once used as the music room and recently has been used as the Ochiltree Post Office. This is a ceiling 12x14 building. Bids will be received up to November 15. The trustees reserve the right to reject any and all bids.

Published Weekly on Friday

All copy must be in this office by Wednesday noon to insure publication.

A golf player seems to lose both the balls and his temper, and break the clubs and the commandments.

The new baby carriages can be neatly folded up and carried under one's arm, but the baby refuses to shut up as easily.

Boys used to run away from home down East and go West to hunt Indians. Now it is the girls who go West to become movie heroines.

A counter irritant is anything like a mustard plaster. It is also a woman who shops all day and don't buy anything.

Arthur Brisbane, contemplating the arrest and imprisonment of Emperor Karl and the talk of exiling him to America, says he should be tried and executed, same as any other murderer. Brisbane frequently has sane and lucid intervals.

John Hays Hammond is back from a trip to the Orient and says we must build two battleships for every one that Japan builds. John Hays Hammond knows considerable about rocks and metals, but he knows mighty little about anything else. The reason he is quoted at all is because he is rich.

One newspaper is advertising for a printer who is a hard worker, does not drink, smoke or chew, is religious, a Republican and who can sing in the choir. Huh! Any man that is all that would not be fool enough to be a printer. He would be wearing wings and playing a harp in the Celestial City.

Some paragraphers can't give much attention to Congress, the armament conference, the railroad strike, the new peace treaty or anything like that, because their thoughts are taken up by such absorbing topics as low necks and short skirts.

There is argument against virtue which, until analyzed, sounds logical, but it isn't. Better carry your cross. Not only society but fate demands it. There never was more lack of real virtue than right now, and a glance at the daily dispatches shows the results.

Nature sets up the example of optimism. There is nothing pessimistic about Nature. Its promises are all sunshine, fresh air, health growth, beauty, blossoms, life and happiness, and is fulfills these promises and makes good. Live, love, laugh, be healthy, sensible and happy is what Nature says we all ought to do.

The authority of the United States government over such a great public necessity as the railroads of the country is absolutely necessary, and such authority must not be tampered with, either by the railroad companies or their employees. There are a hundred million people in the country who are neither road nor employe, and every one of them are vitally interested and affected.

A big insurance men's convention in Chicago decides that human life is constantly getting longer, and that in time we will all be living 300 years. With national strikes, wars, profiteering, back-breaking taxation to keep up armament, and human greed rampant, we don't want to hang around here no three hundred years, nor the third of it. We'd just as soon die and go to hell and be done with it.

It has to be conceded that our Congress and Senate are largely in the nature of supreme fizzes, as far as accomplishing any real results to the country are concerned. Both houses are floundering around amid a lot of useless claptrap, while the real and big things are sidetracked. There certainly is a crying need in this country for a Lloyd, an Abraham Lincoln, a Conklin and a Blaine.

WHY IS IT?

Why is it that politicians and political parties continually defy the people and refuse to do what the people want and demand? This they all do continually, and they know they can do it with impunity or they would not dare do it. It is getting so that it does not make a particle of difference what the people want, the politicians do as they please about it, anyway, although, of course, they make a big bluff about the servants of the people. The Democrats ran the public expenses up to such an enormous and uncalled for figure that the people were taxed out of half they had to meet it. As a consequence of that the people turned that party out of power at the last election by a majority never heard of before, and put in the Republicans who promised rigid retrenchment in expenses and taxation. The retrenchment and lowering of taxation, however, has not taken place, but is as much as ever, although much talk is made to the contrary. The two big parties are all there are, that amount to anything, and if neither of them will reduce expenses of government and taxation, what can we do about it? One is as bad as the other when it comes to wasting the people's money.

The same is true all over the world. Shortly now the world's armament conference will take place. Leading diplomats from each large nation will assemble to try and bring about a curtailment of armament, owing to the fact that it is bankrupting their nations. The business men of Japan, England and America have all petitioned their respective governments to reduce armies and navies and quit building more battleships. The people of all three countries are overwhelming in favor of curtailing armament, yet nothing of real moment will be accomplished. Why? Do the armament producers, the great trusts, the money-lenders and the bond-holders own our politicians and political parties to an extent that they have to obey them instead of obeying the mandates of the people? It looks very much that way. At any rate, the people can get nothing they want or demand and there must be some reason why they cannot. Who can give the reason?

Seber is about the only word that rhymes with October, but as all the poets were not in that condition the output of verse was below normal for last month.

From what statistics the various states and bureaus are issuing it would seem that it is a close race between the marriage licenses and the automobile licenses.

Ex-Emperor Charles of Hungary is breeding a scab on his nose that is going to break and make his whole phis look like that of a poisoned pup pretty soon. So-called royalty does not seem to be able to understand that the days of "divine right to rule" are over; that education brings intelligence, and that intelligence sloughs off autocracy.

The cave man got mighty little out of life, and he got that for only a short time. A cave was his habitat by night, the wilderness by day. He received no remuneration for his labor; he had no income, therefore he paid no taxes. Pretty soon, the way things are going now, we may pay so many taxes that we will have no incomes left, and then, perhaps, we'll go back to being cave men.

Just as long as strikes, threats of strikes, labor unrest and all that sort of thing continues, just that long times are going to remain dull and business slack. Those who have the money in bank and in tax-exempt securities are not going to draw it out and put it into business channels until they feel safe in doing so, and that is all there is to it. Whether they are right or wrong, the fact remains just the same.

It was only a few years ago, comparatively, that this country told the King of England to go chase himself, or words to that effect; that we would no longer stand for his domination, taxation and exploitation; and that is all that Ireland is saying today. We know of no reason why Ireland is not just as much entitled to freedom as Poland. But, of course, it is not our butt in.

FLATS AND SHARPS

Our aim in life is all right, but some of us don't know when to shoot.

Some girls dance like a zephyr, and some more like a heifer.

Piracy has moved from the high seas to Washington, D. C.

It is rather hard to be both good and interesting.

Men who make history have brains instead of bowels.

There is no use getting up early just to have more loafing time.

It takes years, sometimes, to get what you do not want.

There is a big vulgarian army that never saw service.

Many try, but no doctor can pull one's leg painlessly.

We do not take advertisements of people's manhood that got lost.

There is a difference between being married and just hitched.

No use to know the time table unless you catch the train.

As soon as people get old enough to know better they find out that they don't know anything at all.

Paying income tax is not a past-time any of us relish very much, but still it might be worse—if it happened to be alimony instead.

The person who has seen all there is in life and is tired of the whole bloomin' business, is generally about eighteen to twenty years of age.

A student of English history writes in and asks when it was that old John Runnedmede ran away with Maggie Carter. Well, we used to know all such things, but it has been quite a while since we quit school.

Few of us believe nowadays in the kind of hell that Dante pictured, but still, in view of all that is going on in the world, it must still be doing a devil of a business. If it is not, it ought to be.

Now that the cost of living has come down twenty-five per cent, and farm products lead the drop, the piece of cheese one gets at the store is no longer quite as thin as a cigarette—almost, but not quite.

The forcible disarmament of Germany turns out to be a blessing in disguise to that country, as all its citizens have gone to work instead of putting in half their time in the armies and navies. It is a pity something would not force all the rest of us to do the same thing.

We are one of the common people very common and very poor, in fact, and yet consider that to disagree with three-fourths of the general public on most things is one of the first elements of sanity.

After all is said and done, it may be safely set down that as regards the cost of living, 37 cents of the consumer's dollars represents the cost of producing the article; 14 cents represents profits and the other 49 cents the cost of service. And we all demand service.

With Sherlock Holmes there is always a big black handprint on the wall which he can lamp with a magnifying glass, but the rest of us, in hunting for the finger prints of bum business, unemployment and the high cost of rent and prunes have very little luck finding any.

Coal production is said to be 90,000,000 tons less than it was last year. That being the case the unemployed problem ought to be partially solved right there, but it won't be as long as the coal trusts can buy politicians reasonably cheap.

And now they threaten to exile ex-Emperor Karl of Austria to America. What have we done that such miserable whelps as he shall be wished upon us? We'll get the old Hun Kaiser next, and maybe the Sultan of Turkey and his harem. All of which our melting pot won't melt worth a cent.

A marriage boom is sweeping over the country, and bachelors desiring to escape had better dig cyclone cellars and dig 'em quick. Statistics say that this year will show over a million marriages taking place, and possibly a million and a half. The bachelors get no sympathy from us. They deserve the worst.

Money still continues to talk, but the German mark and the Russian ruble only talk in whispers.

A lot of time is put in storing up energy to chase rainbows we never catch up with.

Work should be as cheering as a song, and as tempting as a sin, but it isn't if the wage is low.

A lot of narrow gauge lines to heaven ought to be consolidated into one grand trunk overair limited.

Cut out some of the diamonds, limousines, champagne and a lot of other highfalutins and flubdubs, and come down to earth.

Our dreams are fanciful and unreal; We wish they were not. Our facts, on the contrary, are brutal, and we wish they were not, also.

When everybody has as much common sense as he thinks he has we won't need traffic cops to regulate autos at all.

All maps of the world should include Utopia; not that any of us will ever get there, but it is nice to contemplate.

Because a picture was painted a thousand years ago don't make it any better picture. Age is not necessarily art.

Congress continues to operate on the theory that it is easier to collect taxes from the people than debts from the Allies, and as long as we, the people, do nothing about it that will be the program.

TEXAS RED CROSS WORKER AIDS THE MEXICANS

The American Red Cross has extended its work beyond the Mexican border, according to information recently received at the headquarters of the Southwestern Division, American Red Cross, at St. Louis. Nine Mexican civilian families left destitute in a recent cloudburst near Eagle Pass, Tex., were assisted by a volunteer Red Cross worker belonging to the Eagle Pass Red Cross Chapter. This volunteer worker was able, through her intimate knowledge of Spanish to render material and worthwhile assistance to many who were in dire need.

Red Cross Fifth Annual Roll Call, Armistice Day to the eve of Thanksgiving.

MICKIE SAYS

DON'T WAIT FOR THE OTHER FELLER TO ADVERTISE YER BUSINESS FER HE JEST NATURALLY WON'T DO IT! GIT BILLY YERSELF!

KANSAS JUNIORS DOING BIG COMMUNITY WORK

The Junior Red Cross of Republic County, Kansas, has been especially active during the last year in organizing classes conducted under the Junior plan, such as health work in the schools, patriotic program, community play, making of toys and hospital supplies, civic training, making of Easter cards and equipment, and preparing bet lunches for school children.

For results in advertising use the Herald's advertising columns.

SCHOOL NOTES

Among the victories reported the Perryton High School ball teams are the ones over man boy's and girl's teams score in the boy's game being 26, Spearman 20. In girls game, Perryton 22 and man 20.

The teams will play a return one is invited to go along and witness a good fast game. All is some encouragement.

The ninth, tenth and eleventh grades have organized a Club for the purpose of reporting schools news and also for the purpose of putting some of the themes written by the English students in the paper.

The Washington Society ended the Jefferson Society with a lowdown party. A good time reported by everyone who attended.

The one thing which the Perryton needs most is the interest in your children's education. Come and visit school. Go to the games which have. In short, stand behind all they do that is sanctified by the teachers. That's the way to a real school.

School Reports

Dr. Powell, the eye, ear, nose and throat Specialist will be at Dr. Powell's office, Thursday, November 14th, 1924. Glasses fitted, tonsils and adenoids removed.

Watch for opening date of new store building of the Mercantile Company. Souvenirs given to all who visit the store that day.

The Herald \$1.50 a year in advance.

Mr. and Mrs. Roy Biasingame of Glazier, Texas was up Sunday visiting Roy's parent's, Mr. and Mrs. J. M. Biasingame at old Ochiltree.

Ben Crow of Alva, Oklahoma, who formerly lived on Wolf Creek came back to see his first love the fore part of this week.

Mr. and Mrs. P. H. Sebastian and Mr. and Mrs. Ray Nelson left Monday morning for California to spend the winter for Mrs. Nelson's health. They will make the trip in their car.

ROAD NOTICE TO NON-RESIDENT LAND OWNERS

STATE OF TEXAS, OCHILTREE COUNTY, ss.

We the undersigned Jury of Freeholders, citizens of said Ochiltree County, Texas, duly appointed by the Commissioners' Court of Ochiltree County, Texas at its September Term, 1921, to view and establish a first class Road from S. E. Cor. of Sec. 73, and having been duly sworn as the law directs, hereby give notice that we will, on the 26th day of November, 1921, assemble at beginning of proposed road and thence proceed to survey, locate, view, mark out and establish said road, beginning at beginning at a point on the Spearman and Canadian road at the S. E. Cor. of Sec. 73, and the S. W. Cor. of Sec. 74, Blk. 13 original grantee T. & N. O. Ry. Co. thence north with section lines to the N. E. Cor. of Sec. 56 and the N. W. Cor. of Sec. 55, Blk. 13, thence W. on section lines to the N. W. Cor. of Sec. 56, Blk. 13, and a point in the E. line of the Ximines survey; thence N. on section lines to the N. E. Cor. of Sec. 7, Blk. J. T., thence W. to the N. W. Cor. of said Sec. 7; thence N. with section lines to the N. W. Cor. of Sec. 1 and the N. E. Cor. of Sec. 2, Blk. J. T. and S. line of Sec. 50, Blk. 4; thence W. on section line to the S. W. Cor. of said Sec. 50, and the town of Farnsworth, Texas, for an ending.

And we do hereby notify Louis J. Hartke and the heirs of F. W. Hartke, Wood Kink and any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages to be paid for the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damages, if any, claimed by them.

Witness our hands, this 22nd day of October, A. D. 1921.

LIVE STOCK NEWS

DISTRIBUTE 130 PURE BULLS

Animals Intended for Breeding Purposes in Different Communities in Kentucky.

Prepared by the United States Department of Agriculture.

The first of the "better-sires" sales held in Kentucky this year resulted in the sale of 130 purebred bulls. These animals are being distributed through the state and will be used for breeding purposes. In describing the sale, Wayland Rhoads of the extension

Type of Bull Used to Build Up Herds in Kentucky.

division, University of Kentucky, states in a letter to the United States Department of Agriculture that "much improvement will come from it."

Notwithstanding the present excellence of much of the live stock in the state, Kentucky farmers are welcoming the opportunity to obtain, at reasonable prices, purebred sires of superior type. Additional sales are to be held.

VERY FEW REAL RUNTS BORN

Undersized and Unthrifty Animals Are Generally Result of Inadequate Feed and Care.

Emphasizing that runty live stock are generally the result of inadequate feed, housing and care, the editor of a farm paper in the Central West adds to the experiences which nearly 1,000 farmers have already reported to the United States Department of Agriculture on the subject of runt prevention.

"There are very few real runts born," he declares. "They may be a little undersized, perhaps a trifle weaker and sometimes of inferior constitution, brought on by improper breeding systems. But poor housing, limited range getting rooted away and cheated by the larger and huskier of the litter—these are the agencies by which most so-called runts are formed. Given proper care and feed until they get a start, the runts will prove money-makers."

These comments agree closely with the opinions of others who contributed their experiences in the matter to the department. Particular care needs to be given live stock at weaning time, since this is the time when the dams fail to give the nourishment required by the growing animal and when the young stock is learning to eat other feed.

WAY OF RAISING MULE COLTS

Best Plan Is to Put Them on Feed After Weaning and Never Retard Best Growth.

The older way of raising mules was to turn them out at weaning time and practically let them rough it until three years old, then get them up, wild as deer, for a shearing and then either span them out to break or put them in the pen for fattening as unbroken stuff. Nowadays the mule colt is put on feed almost before weaning and is never allowed to stop his growing until he is ready for the harness, which time is reached a year sooner by the new method than by the old. The mule at two is a good work animal, but care must be taken not to overdo him at that age, and it is best not to put a two-year-old in as a "regular" until he is well accustomed to the work, better still, don't crowd the youngster until he is three, when he will have attained quite a bit of that strength and grit that makes him the marvel of the working world.

FEEDING NEW CORN TO HOGS

Give Few Stalks Just as Plant Reaches Advanced Milk Stage, Gradually Increasing Amount.

A good way to accustom hogs to the new corn is to cut a few stalks of corn and throw it over the fence to the hogs just as it reaches the advanced milk stage, gradually increasing the amount until in 10 or 12 days when the corn is well denting, the hogs are getting a full feed. Even then, it is necessary to watch them closely to see that none get off feed because of digestive trouble.

SILLO PAYS LARGE DIVIDENDS

Stands as Sentinel to Successful Cropping and Efficient Feeding—More Are Needed.

The silo has been the difference between success and failure on many farms where cows, beef cattle or sheep are kept. The silo stands as a sentinel to successful cropping and efficient feeding. It should be a monument to thrift and progressive husbandry on more farms. Why not ensile your corn and carry your cattle or sheep through the winter economically?

THE KITCHEN CABINET

(By 1921, Western Newspaper Union)

All that is great in man comes through work; and civilization is its product. Success treads on the heels of every right effort.—Samuel Smiles.

SUMMERY DISHES.

Take a choice of any of these appetizing salad combinations which will supply the family for a week or two: Hard-cooked eggs with lettuce and mayonnaise; lettuce and cooked asparagus, or tomato with asparagus; tomato stuffed with chopped cucumbers or asparagus; head lettuce with Roquefort dressing; green pepper shredded, mixed with cottage cheese, boiled dressing; watercress and egg; pepper grass, radishes and French dressing; orange and pineapple with French dressing; spinach with eggs and boiled dressing; lettuce with chopped peanuts, onions and French dressing.

Chicken Jelly Salad.—Soften one-half teaspoonful of gelatin in four tablespoonfuls of cold water, add to one cupful of boiling chicken broth, stir till well dissolved, adding salt, pepper, onion juice and celery salt to season. Chill until cold, then add part of this to a cupful of finely chopped cooked chicken in layers with the broth as it hardens, adding cooked egg, carrots or beets cut in shapes to decorate. Let each layer become firm before adding another. Serve unmolded with mayonnaise dressing.

Raspberry Sherbet.—Take one pint of thin cream, one pint of rich milk, one and one-half cupfuls of sugar and one pint of raspberry juice, prepared by crushing and straining the fruit. Freeze as usual.

Cream of Spinach Soup.—Wash two quarts of spinach and place in a saucepan over a moderate fire, adding no water. Stir with a fork and leave the kettle uncovered. Cooked in this way it loses none of its flavor and little color. When tender put through a sieve and add to it six cupfuls of thin, white sauce prepared as follows: Take one-fourth of a cupful of butter, one-third of a cupful of flour and cook until bubbling hot, then add four cupfuls of chicken broth; cook until smooth and add two cupfuls of milk. Season to taste and serve with croutons.

ROAD NOTICE TO NON-RESIDENT LAND OWNERS

STATE OF TEXAS, OCHILTREE COUNTY, ss.

We the undersigned Jury of Freeholders, citizens of said Ochiltree County, Texas, duly appointed by the Commissioners' Court of Ochiltree County, Texas at its August Term, 1921, to view and establish a first class Road from N. W. Cor. 129, Block, 13 thence west and having been duly sworn as the law directs, hereby give notice that we will, on the 26th day of November, 1921, assemble at N. W. Cor. Sec. 129, Blk. 13, Ochiltree County, Texas and thence proceed to survey, locate, view, mark out and establish said road, beginning at beginning at the N. W. Cor. of Sec. 129, Blk. 13, Ochiltree County, Texas, and the S. E. Cor. 127, same block. Thence due west along the N. Lines of Sections 130, 131, 132, 133 and 134 and the S. Lines of 127, 126, 125, 124 and 123 to the S. E. Cor. of 122; Thence due N. six miles along the W. lines of Sections, 123, 118, 107, 102, 91 and 86; and the E. Lines of Sections 122, 119, 106, 103, 90 and 87 to the S. W. Cor. of Section 75; Thence due W. one mile to the N. E. Cor. of Section 88. All of said sections being in said block 13, sections lines to be the center of said proposed road and the road to be 50 feet in width.

And we do hereby notify A. Waller, Henderson Ky., C. H. Barrett, Hereford, Texas, G. A. Harbaugh, Alva, Oklahoma, (whose agent is Albert Hudson of Perryton, Texas. And any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damages, if any, claimed by them.

Witness our hands, this 22nd day of October, A. D. 1921.

SHOOT SHEEP-KILLING DOGS

No Consideration Should Be Given Such Animals and Should Be Destroyed at Once.

Prepared by the United States Department of Agriculture.

The sheep-killing dog constitutes one of the greatest menaces to the sheep industry. Such dogs not only kill sheep, but keep out of the sheep business men who are otherwise inclined to go into it, say specialists of the United States Department of Agriculture.

Sheep-killing dogs work both singly and in groups, but usually in twos or threes. They do not limit their attacks to the flocks of the immediate vicinity in which they are kept, but travel for miles in all directions, spreading destruction in the flocks with which they come in contact. Because their work is so often done under the cover of darkness it is almost impossible to catch them in the act of worrying sheep.

After a dog has once formed the habit of killing sheep it seemingly becomes a mania with him and he is seldom if ever broken of it. He not only

A Highland Collie, One Year Old.

destroys sheep himself but leads other dogs to the work. No consideration should be given such dogs; and if additional losses from this source are to be avoided, they should be killed as soon as their habits are known.

FEEDING CATTLE FOR PROFIT

Market Requirements for Beef Are Much Higher Than in Former Years—Skill Needed.

The feeding of beef cattle for the market has become a special line of work, which requires a high grade of skill through understanding of the feeding values of different materials used in the production of beef, as well as an appreciation of the requirements of animal nutrition and shrewd business ability. Without these prerequisites the feeder is doomed to receive very small returns for his labor. The market requirements for beef at present are much higher than in former years. It is necessary, therefore, in order to obtain prices which will pay the feeder for his time and outlay, to produce a herd of cattle as nearly uniform as possible in appearance and quality, with a high market finish and symmetrical development, particularly in those parts which yield high-priced cuts in which the profits lie for the butcher.

ARRANGE WALLOWS FOR HOGS

Water Must Be Supplied Not Only for Drinking but for Animals to Cool Bodies.

Hogs in pasture where there is no water are likely to suffer, not only for drinking water, but for water in which to cool their bodies. Slops are not sufficient. The hogs should have water in their troughs and in the wallow to cool themselves when the burning rays of the sun makes their lives a torture. Hogs have a way of ridding themselves of troublesome parasites when they have a muddy wallow. Nature, it seems, helps them to survive as the fittest when there is a struggle for existence with parasites.

Hogs that must be penned should have shade and plenty of water. It is bad enough to be kept in pen without a struggle with heat and thirst. Give them shade and water.

PLAN TO PREVENT INFECTION

Newly Purchased Animals Should Be Quarantined in Separate Pens for Two Weeks.

Do not place newly purchased stock, stock procured or borrowed for breeding purposes, or stock exhibited at fairs immediately with your herd. Keep such stock quarantined in separate pens for at least two weeks, and use care in feeding and attending stock to prevent carrying infection from these to other pens.

BOAR HAS GREAT INFLUENCE

Breeding Animal Should Be Placed in Good-Sized Yard and Away From Rest of Herd.

How about the herd boar? Get him out in a good-sized yard, away from the rest of the herd. Remember he is half of the breeding power of the herd, and that his influence on the profits for the year amounts to more than that of any one sow.

County Health Notes

The Wawaka School is alive and progressive in spite of the crowded condition of the building. They started their hot lunches and their Health Clubs last week and report that they are a great success. To have funds with which to help the work along the district gave a Pie Social from which they made \$66. I guess the way to a man's pocket book as well as his heart, is through his stomach. The Home Nursing class at Perryton met on Monday.

Monday evening the Red Cross Nurse went with Mr. and Mrs. Harvey Holderman and they took her to the Lone Tree School on Tuesday. It was an ideal day as far as the weather was concerned. The patrons of the district were nearly all there for the day and they had a picnic dinner. Mrs. Fletcher made a kettle of soup for the school and the children brought their cups and spoons and the nurse was able to demonstrate the serving of one hot dish with the cold lunch. The children lined up and washed their hands and took their seats. The little girls placed a paper napkin on each desk and the children took their lunches from their pails and placed them on their clean napkins and all formed in a soup line with their cups and had them filled with the hot soup. They all seemed to enjoy it and there was none left. They staid in their seats for 20 minutes during the dinner and while eating listened to the music of the Victrola and to the reading of a story. A nursing demonstration was given in the afternoon.

Little Billie Holdman had the misfortune of being thrown from his pony and his arm broken. He was coming to school to visit.

Mr. Fletcher took Miss Thomas on to Mrs. Castleman's, where she spent the night and went to the Brillhart school on Wednesday. The patrons attended there and Mrs. Castleman furnished the soup for the Hot Lunch demonstration and one of the

little girls was the patient of Home Nursing Demonstration after noon.

On Friday Miss Thomas and Wyman spent the day at the school. Three of the patrons tended and brought a picnic and Mrs. Mears furnished the for the lunch demonstration. the little girls was the patient of the afternoon demonstration.

Notice Children of Ochiltree County Red Cross:

These prizes will be given to every school or school in the county in which 90 per cent of the children gain up to weight or above by next year. Red Cross will give \$5.00 in aid and also a Junior Red Cross Aid Kit with all the necessities in it for first aid at school. Any School Junior Red Cross to buy one of the Kits for school, or the school authorities to buy it for the school, spring, and should such a school prize also, the Red Cross give them the money for the Kit instead of the Kit which they ready have.

The other prizes will be following: \$3.00, \$2.00 and \$1.00 the three best essays written by children in the county on "What I learned from a visit to the Cross Health Center." The Cross Nurse will be at the Center on Saturdays and give all the help they want. It is the street from Perryton, P. O. it.

Order your Thanksgiving from Thompson Brothers.

DEEP PLOWING IS BIG NEED

Soils Are Getting Poorer, Producing Less Per Acre, Thereby Cutting Farmer's Income.

Deep plowing is the greatest need on many farms. It is a fact that soils are getting poorer, producing less per acre and less in the aggregate year after year and less profit per year on many farms. Many of our soils are tired and sick; like their owners they are overworked, underfed, and underpaid. The problem is to get more from the soil without greater expense.

One way is to deepen the soil, letting in air and moisture and permit nature to make this sub-soil or under-soil fertile. The roots of plants cannot penetrate deep enough under the present conditions on many farms to get enough plant food and sufficient moisture to yield a normal crop. What is the remedy? Plow deeper.

Deeper plowing should be done in the fall. Many soils should be sub-soiled, others should be plowed deeper with ordinary breaking plows. Whatever the method, the soil must be made deeper. Plow deeper.

ERADICATION OF CORN SMUT

Fresh Manure Should Not Be Applied and Rotation of Crops Should Be Practiced.

There are things to be done and things not to be done to combat successfully the smut of corn which has damaged the big crop of this year in various parts of the Northwest.

Fresh manure should not be put on corn ground; a rotation of crops should be practiced. Spores germinate and multiply in fresh manure, says E. C. Stakman, plant disease specialist of the University farm, St. Paul. Some other crop than corn should be planted on land grown in smutted corn this year.

Corn smut is not poisonous, say Doctor Stakman; on the contrary, in its early stages it is edible for human beings. It may occur on any part of the corn plant above ground. It has been found that corn smut spores are killed in the silo.

J. W. Rogers of Farnsworth, brother of F. P. Rogers of the First National Bank of this place has been seriously ill for the past several weeks, but is improving at this writing.

PRESIDENT PROCLAIMS RED CROSS SUNDAY

November 13 Is Date Designated by Harding for Special Observance by Churches.

Sunday, November 13, has been designated National Red Cross Sunday by a proclamation of President Harding. In a communication sent out from Washington to the clergy of America, the President says:

"To the Reverend Clergy:

The President of the United States has designated Sunday, November 13th, as RED CROSS SUNDAY.

It is hoped that on that day ministers of religion throughout the length and breadth of the land will make some mention to their congregations of the work of the American Red Cross, and will make an appeal to them that they enroll themselves in its membership.

The Roll Call is not a campaign. It is merely the yearly opportunity for men and women to pay their annual dues and renew their membership in the Red Cross.

The annual dues are One Dollar. Of this amount Fifty Cents is sent to National Headquarters and the chapter enrolling the membership retains Fifty Cents for local Red Cross activities.

Aside from special contributions this provides the working funds for the American Red Cross for the ensuing year.

The American Red Cross is unique in that it is at once a voluntary organization and a chartered agent of the Government of the United States.

Its membership is made up of thousands who voluntarily join, but under its Congressional Charter it is a self-perpetuating organization charged with certain duties and liable to certain obligations.

The object of the American Red Cross has been briefly set forth thus:

"The Union of all who Love In the Service of all who Suffer."

Under its Congressional charter, issued by Act of Congress, January 5, 1905, its duties are not voluntary, but it is stated that the purposes of this organization are and shall be:

1. To furnish volunteer aid to the sick and wounded of armies in time of war and in accordance with the Conventions of Geneva.

2. To act in matters of voluntary relief and in accord with the military and naval authorities as a medium of communication between the American people and their Army and Navy.

3. To continue and carry on a system of national and international relief in time of peace, and to apply the same in mitigating the sufferings caused by pestilence, famine, fire, floods and other great national calamities; and

4. To devise and carry on measures for preventing the same.

Nothing is more significant of the condition of things, both at home and abroad, than is the insistent call for the continued activity of the American Red Cross.

A year ago we thought that the end of the work of the American Red Cross overseas was in sight. A year ago we thought that our program at home would be along lines similar to those of the years before the war.

It is something of a surprise, therefore, today to find how broad and far-reaching are the tasks that the American Red Cross feels called upon to undertake, in response to the demands daily made upon it, and in fulfillment of the provisions of its charter.

The Fifth Membership Roll Call, which will occur simultaneously all over the United States, will be emphasized on Red Cross Sunday. The Red Cross work for the disabled ex-service men, to whom this nation owes such a tremendous obligation, relief of the starving and suffering children overseas, public health nursing in the cities, towns and rural communities of our own country, which is building a sturdier and healthier next generation, community work among the children through the Junior Red Cross, nutrition classes to overcome the appalling high rate of malnourishment found among American children of rich and poor alike, first-aid and life-saving work to prevent the terrible death toll due to accidents annually in the United States, and the disaster relief work, which is so important a part of the peace-time program of the Red Cross, are some of the points emphasized in the President's call to the clergy of the country. In asking for the co-operation of the church and the clergy in the tasks that are set before the Red Cross, that organization is offering a comradeship of common service for the common good in its organization of "The Red Cross of Peace, in the Service of Those Who Suffer."

Enroll during the Red Cross Roll Call, November 11 to 23.

Yes

it's toasted, of course. To seal in the flavor—

LUCKY STRIKE CIGARETTE

FURNISH FOALS WITH GRAIN

When Pastures Begin to Dry Up Young Animals Must Have Feed for Best Development.

As the pastures commence to dry up the proper development of the foal calls for the feeding of a little grain in order to maintain the milk fat and keep the foal developing to the best advantage. Colts that belong to working mares should have a separate feed box and receive a little grain each time the mother is fed. Those on pasture should be provided with a creep where grain can be kept available for the foal at all times. If these methods are followed the colt will continue to gain and will not shrink when weaning time comes.

EWES DISOWN THEIR LAMBS

Trouble Sometimes Overcome by Penning Mother Up With Her Young—Other Plans.

Ewes that will not own their lambs may sometimes be induced to do so by penning ewes up and forcing them to permit the lamb to suck, a few lessons of this sort usually being sufficient. Some shepherds moisten the lamb's head and neck with the ewe's milk, claiming that this will make the ewe own the lamb. Shutting the ewe and her lamb by themselves for a few days should prove effective, though a vicious ewe will sometimes kill her own lamb if shut up alone with it.

The grand jury adjourned Wednesday afternoon having returned only three indictments.

The case of Tarbox vs. Trammell which has been on trial all week was given to the jury Wednesday at noon.

NOTICE OF APPLICATION FOR PROBATE OF WILL

THE STATE OF TEXAS.

To the Sheriff or any Constable of Ochiltree County—Greeting:

You are hereby Commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Ochiltree, State of Texas, and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:

Notice of Application for Probate of Will.

The State of Texas, To all Persons Interested in the Estate of

F. G. NIES, Deceased,

Arthur C. Nies and Ray F. Nies have filed in the County Court of Ochiltree County, an application for the Probate of the last Will and Testament of said F. G. Nies, Deceased,

Which will be heard at the next term of said Court, commencing on the Third Monday in November A. D. 1921, the same being the 21st day of November A. D. 1921, at the Court House thereof, in Perryton, Texas, at which time all persons interested in said Estate may appear and contest said application, should they desire to do so.

Herein Fail Not, but have you before said Court on the said first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Perryton, Texas, this 31st day of October A. D. 1921.

DAVID D. SHANKS, Clerk. County Court, Ochiltree County, Tex. By Bernice Wilson, Deputy.

R. A. Fuller, president of the Sucker's Oil Company is on the jury this week. Uncle Bob says to be an oil magnate and a juror too is almost too much for an ordinary mortal, but he is still able to wear a No. 7 1/2 hat and will speak to common folks occasionally.

We have several good cotton farms located 8 or 10 miles southeast of Wellington which we will trade for the best Ochiltree wheat land at the rate of one acre for two. If you have anything write or see us. We wish to hear from owner only.—Lowery & Buerger, Wellington, Texas. 37-4tc

Don't forget the last day of the Big Removal Sale, Saturday, Nov. 20th. Big reductions in all dry goods.—Farmers Mercantile Company. 40-1tc

Mrs. Viola Rupprecht and daughter Margaret returned last week from several weeks visit with friends and relatives at Fort Worth, Dallas and Cleburne, Texas.

144 50c TUBES OF MAG-LAC TOOTH PASTE.

As a special feature we will present absolutely free, one tube of Mag-Lac Tooth Paste, 50 cent size to each of the first 144 adult persons entering this store after 10 a. m. o'clock on the 17 of November.

We have selected Mag-Lac for this feature because it is a very high class toilet necessity. It contains milk of magnesia which, every dentist knows, is the best corrective of acid mouth, the principal cause of tooth decay.

Mag-Lac Tooth Paste corrects acid mouth and thus prolongs the life and beauty of your teeth. It also cleans and polishes, besides having a most pleasant taste. We know that once you use it, it will always be your choice.

Come and get yours. You are not asked to buy anything. Just be early enough to be one of the first 144. There is no obligation—we want you to have it.

FIFTH ANNUAL ROLL CALL BEGINS ARMISTICE DAY

American Red Cross to Enroll Members Throughout Nation November 11 to 24.

The American Red Cross will conduct its Fifth Annual Roll Call this year beginning on Armistice Day, November 11, and ending the eve of Thanksgiving Day, National headquarters in Washington, Division headquarters in the eight divisions of the Red Cross, and headquarters of each of the more than 2,000 chapters, are busily engaged on their Roll Call program, according to information given out at local Red Cross headquarters. The effort will be to re-enroll every present member of the Red Cross and to add as many new members to the roster as possible in the period given. There are at present 6,041,163 members in the American Red Cross. John Barton Payne, chairman of the Red Cross, hopes to hear the answer, "present," when each one of these names is called between Armistice Day and Thanksgiving Day this year, he says, thus providing for the continuance of the work of service to the public of America and the sufferers in foreign lands which the Red Cross has started and is conducting on the basis of its peace-time program.

In a letter sent out from national headquarters, W. Frank Persons, vice-chairman of the American Red Cross in charge of Domestic Operations, calls attention to the fact that the strength of the Red Cross in the past has been in its volunteer workers. He urges, therefore, that all chapter membership committees seek to re-enlist the largest number possible of the men and women who have served the Red Cross as volunteers in the past, and suggests that the Roll Call is a logical channel for bringing former workers back to service in the Red Cross.

The interest manifested in the Red Cross Convention at Columbus, Ohio, the first week in October, showed that the public is as keen to stand behind the work of the Red Cross in its peace-time program as during the war, and that the thinking public realizes that the Red Cross is as necessary to the welfare of the civilized world in time of peace as in war. Officials of the Red Cross believe, therefore, that the Roll Call this year will result in many more members than were placed on the roster of the American Red Cross last year.

The Red Cross throughout the country is putting on this year its new peacetime program, which includes public welfare service in every direction wherever such service is needed. In health work alone in the last year, 290 chapters have organized health centers with 6,294 clinics and 90,252 cases in these clinics. More than 4,000 health talks have been given by these and other chapters engaged in health work, and health exhibits to the total of 780, both traveling and stationary, have been set up to inform the public on matters pertaining to their own and their community's health.

TEXAS RED CROES READY FOR FLOOD

Chapters Near Stricken District Send Aid Inside Twelve Hours.

The Southwestern Division, so exceptionally hard-hit these last three years by disaster of various kinds, had a fine exhibition of chapter preparedness in the recent Central Texas flood, according to information given out at the headquarters of the Southwestern Division at St. Louis.

When the Brazos River started rising and floods seemed imminent, the Division Disaster Relief Director was notified and as soon as it was found necessary to send relief, a night letter was sent to chapters in the vicinity of the flooded district but outside of the flood area. The call asked for clothing principally, and in less than seven hours in one case and twelve hours in others, supplies were on their way.

Dallas replied at 4 p. m. following the call received in the morning, that clothing had been shipped. Waco not only responded to the first request, but sent a second supply of clothing. Houston sent 883 garments which had been cleaned and sterilized. Other towns in the adjacent territory sent more than their quota within the next two days, and the result was that by the time a sufficient degree of order had been created to look after the stricken inhabitants of the flooded area, there were supplies on hand sufficient to meet all the needs of the situation.

A feature of this wonderfully ready response, it is stated, was that all the garments sent were usable and were the type needed. This showed that the chapters sending them considered the character of the disaster and the conditions of the people needing relief, making their contributions accordingly, and did not use the "hit or miss" method of collecting supplies so frequently seen in cases of similar catastrophes.

The towns contributing to this particular flood, the statement shows, in addition to those mentioned above, were Port Arthur, Jasper, Huntsville, Jacksboro, Greenville, and Denton, Tex., and Okmulgee, Okla. The latter sent its box of clothing, containing seventy-five garments, voluntarily without waiting to be called on by the Division office.

DAIRY FACTS

RECORDS OF GREAT BENEFIT

Much Valuable Information on Relations Between Milk and Butterfat Production.

(Prepared by the United States Department of Agriculture.)

Tabulation of the yearly records of 38,532 cow-testing association cows has brought to light much valuable information on the relations between milk and butterfat production, butterfat test, income over cost of feed, and other factors, say specialists of the United States Department of Agriculture. The average milk production per cow was 5,980 pounds; butterfat, 246 pounds; butterfat test, 4.11 per cent; income over cost of feed, \$55.69; returns for \$1 expended for feed, \$2.11.

The records show that in those associations where the work has been continued for a long period the production has generally increased from

Fall Freshened Cows Produce More Milk and Butterfat Than Those Freshened in Spring or Summer.

year to year. As production increased, the income over cost of feed increased rapidly, and for each increase of 50 pounds in butterfat there was an increase of \$15 in income over cost of feed.

Cows that freshened in the fall produced more milk and butterfat and greater average income over cost of feed than those which freshened in the spring or summer. Large cows excelled small cows of the same breed in production of milk and butterfat and in income over cost of feed. As the butterfat test increased, the average production of butterfat advanced and the average production of milk declined.

These records also indicate that cows remain in the herd an average of about 4.7 years.

BETTER-STOCK CAMPAIGN AID

Poster Issued by Department of Agriculture Illustrates Value of Good Dairy Cows.

"For the Children's Sake" is the title of an attractive poster just issued by the United States Department of Agriculture, to be used in its better-stock campaign. The poster shows two cows, each surrounded by pictures of healthy children. Good milk, it is well known, is a health-giving food for children, but scrub cows do not give enough milk to feed many children. One of the animals shown on the poster is a scrub cow which produced about five quarts of milk a day—enough to supply the five children who are grouped about her. The other cow is a purebred, which gave a daily yield of 20 quarts—enough to feed the 20 children surrounding her. "A good dairy cow," says the poster, "produces enough to feed about twenty children a quart of milk a day. An ordinary cow produces enough to feed about five children a quart a day. Every quart of milk contains health and a smile for some baby."

CORN ALONE FOR MILK COWS

It Can Be Used to Better Advantage With Such Feeds as Bran, Meal and Legumes.

With well-filled corn cribs on many farms, and relatively low prices now in effect, the United States Department of Agriculture believes it is time to correct the impression that corn is no good feed for milk cows. Of course, corn cannot be fed alone, as its function is to supply heat, energy, and fat, rather than such elements as make up bone, muscle and the casein in milk. But it can be used to advantage along with such feeds as bran, linseed, meal, or cottonseed meal. Bran lightens and helps to balance the ration. Alfalfa or clover is usually fed with corn to supply protein.

COW IS EFFICIENT MACHINE

Animal of Big Value in Converting Farm-Grown Feeds into High-Priced Products.

The dairy cow, of all farm animals, is our most efficient machine for converting farm-grown feeds into concentrated, high-priced food products and therefore is entitled to the best of care. She is in this flesh and naturally more susceptible to cold than most other classes of farm stock. If she is compelled to fortify herself against cold, snow, sleet and rain, she must, of course, convert a greater proportion of her feed into heat with which to keep up body temperature and as a result she becomes less efficient for milk production.

FLOUR SACK CAUSES FIRST-AID CALL

An odd case of first-aid was required of a newly installed Red Cross nurse at Bendena, Kan., recently, according to advices from that town.

A deaf man, who was endeavoring to help the woman clerk in a grocery store carry a sack of flour from the store room to his waiting automobile, inadvertently caught the drag-hook in her finger and dragged her instead of the sack of flour across the floor. His back was turned, and being too deaf to hear her cries, he did not know of the accident until he turned to lift the flour into his machine. The hook was so deeply imbedded in the woman's hand that surgery was necessary to remove it, but the Red Cross nurse was able to relieve her pain with first-aid at once while a surgeon was being summoned.

Red Cross nurses in the chapters where public health work is conducted are constantly having just such calls as this, and frequently find themselves the only available help in serious emergencies. In many of the Red Cross Chapters employing public health nurses, the work is financed by the receipts from the annual Roll Call. The Roll Call this year will take place November 11 to 24 and will be simultaneous throughout the United States.

The second episode of the great serial picture "The Son of Tarzan" will be shown Friday night at the American Theatre. Don't fail to see this wonderful picture. 40-1tc
