Anyone happen to remember what the film was?

MIAMI (AP) — National Airlines Flight 51 was high above the plains of Texas when a vision, of sorts, appeared in the aisle. Passengers gasped. Flight attendants stared.

Before them was a young woman. Blonde, lovely, very happy — and nude.

"She had a beautiful body," said a

woman passenger who declined to give her name. "She perched on top of Row 27, guzzling champagne, and the passengers started laughing and clapping. She said she had just inherited \$5 million and that's why she was doing it."

The DC-10 was midway on its trip from Miami to Los Angeles last

Thursday night when the woman, described as — among other things — about 25, streaked down the aisle of the "no frills" tourist section from first-class.

Passengers told the Miami News the woman climbed over six rows of seats in the wide-body jet, whooping and waving a champagne bottle.

The woman's traveling companion,

a young man, "just crawled under the seat," said a passenger. "He didn't ever go after her or anything."

The chief stewardess grabbed a blanket and went after the streaker, but the blonde eluded capture. Passengers applauded as the chase wound up and down the aisles.

After 15 minutes, the stewardess and blanket won out and the young

woman was taken back to a seat, where crew members helped dress her. The pilot, Capt. Ed Mitchell, came out and tried to restore decorum. The blonde slept peacefully the rest of the way to Los Angeles.

The rest of the passengers? "I never saw so many grins in my life," said one woman. "For the rest of the flight we just sat there and

smiled." National declined to identify the young woman but said no charges would be pressed.

"It did happen," said National spokesman Mike Clark. "It's just not part of our standard in-flight entertainment. We intend to stick to movies and stereo."

Soviets indicate desire to keep Cold War cold

MOSCOW (AP) — The official Soviet news agency responded today to Washington's appeal for a mutual reduction of Cold War-style criticism by publishing quotes from the U.S. statement without commentary. This generally is seen as a sign of Soviet agreement.

Tass quoted Wednesday's State Department declaration that said: "There are statements in the Pravda article with which we are obviously not in agreement, but we do not think it would serve a useful purpose to precipitate another round of rhetorical exchanges."

This referred to a blunt denunciation of President Carter last weekend by Pravda, the Soviet Communist Party newspaper, which accused him of "deliberately worsening" Soviet-American relations.

The U.S. statement suggested that instead of exchanging accusations, the two sides get on with a busy schedule of negotiations. The rival superpowers are engaged in talks on strategic arms limitation, a comprehensive nuclear test ban and forces reduction in Europe.

Tass also referred, without comment, to a statement Monday by Secretary of State Cyrus R. Vance, and quoted him as saying: "The most constructive course for both countries as we move ahead would be to concentrate on concrete actions we both can take to reduce tensions and to reach agreement on critical issues now on the agenda."

Tass regularly quotes or summarizes statements on various subjects from around the world, without adding its own commentary. These

are taken to mean the agency agrees with the point of view it is reporting.

A period of reduced rhetoric would be a sharp reversal of a recent escalation of the war of words between Washington and Moscow.

The latest round was touched off at the beginning of the month when Vice President Walter F. Mondale and National Security Adviser Zbigniew Brzezinski made strong statements accusing the Soviet Union of acting contrary to the spirit of detente.

The Kremlin responded by labelling Brzezinski "an enemy of detente."

On June 7, Carter spoke at Annapolis, Md., challenging the Soviet Union to "choose either cooperation or confrontation" and said Moscow is engaged in "a continuing aggressive struggle for political advantage and increased influence" around the world.

On June 17, Pravda made its formal response to Carter's speech.

Meanwhile, two Soviets were accused of espionage in the United States, the Soviet Union in turn accused a former U.S. diplomat here of espionage and an American businessman in Moscow was arrested and charged with currency violations.

A SUMMER in the sun can mean many things, and Midlanders Wednesday managed to find a variety of ways to "celebrate" the first official

day of summer. Five youngsters initiate summer with some hyper-active playing at a local park, while Mrs. Tom Taylor takes a more

serious attitude by working in her garden at 1122 E. Cuthbert Ave. (Staff Photo by Mike Kardos)

Midlander dies in wreck

GARDEN CITY — A Midland woman and a Seminole man, both 27, were killed instantly about 4 a.m. today when their eastbound car collided head-on with a truck-tractor nine miles east of Garden City on Texas Highway 158.

Killed were Delma Ramirez, of 313 Fiesta Ave. in Midland, driver of the car, and Crencencio Hernandez of Seminole, a Texas Department of Public Safety spokesman said today.

They were pronounced dead by Garden City Peace Justice J.E. Wooten about two hours after the mishap.

Marvin Alfred Brown Jr., 45, of San Angelo, driver of the truck-tractor, was not injured, the spokesman said.

The car driven by Ms. Ramirez crossed into the westbound lane after she apparently fell asleep at the wheel, the spokesman said.

Both victims were thrown from the vehicle, he said.

DPS Trooper Ben Lockhart of Big Spring investigated the accident.

WEATHER

Fair and mild tonight with the overnight low near 70. High Friday near 100 degrees. Details on Page 2A.

Legislative veto unconstitutional: Carter

WASHINGTON (AP) — President Carter is squaring off for a possible constitutional fight with Congress over its jealously guarded legislative veto authority — a power that presidents since Herbert Hoover have found distasteful.

In a special message to Congress, Carter said Wednesday he believes such vetoes are unconstitutional. And he served notice that generally he will no longer feel legally bound by legis-

lative vetoes "over the execution of programs."

The legislative veto is a device built into laws affecting the operation and financing of the executive branch. It enables Congress to reject presidential proposals without giving him an opportunity to override the lawmakers. Congress, on the other hand — through constitutional authority — can override a presidential veto on a two-thirds vote by both houses.

The first law containing legislative veto authority was enacted in the early 1930s. The power now is an element of some 300 provisions in about 200 laws.

The president's message cited situations in which Congress insists that "each decision or regulation under a program" be delayed for a specified period, during which time "a majority of both houses, or either house, or even a single committee is authorized

to veto the action."

Attorney General Griffin Bell told reporters at the White House that if Congress had exercised a legislative veto last month over the \$4.8 billion jet warplane sale to Saudi Arabia, Egypt and Israel, Carter "would not be bound, in our view" to accept the rejection as legally binding.

However, Stuart Eizenstat, Carter's chief domestic affairs ad-

viser, said that "as a matter of comity," Carter would continue to abide by any legislative vetoes exercised under the War Powers Act or laws governing foreign military sales.

Rick Neustadt, an aide to Eizenstat, said the message was sent to Congress at this time because some 40 to 50 bills awaiting House action contain provisions for legislative vetoes.

Contaminated pair counting the days

WASHINGTON (AP) — A station wagon pulled up near a gleaming white jet at a Georgia Air Force base and two young men stepped out onto the tarmac. Slipping into hospital gowns and masks, they lay down on military stretchers to be carried up the ramp to the plane.

Neither man looked sick.

Aboard the Air Force hospital plane, they were placed in a special section and the air they breathed was electronically filtered before leaving the plane. When the aircraft landed an hour later, the men donned respirators and shoe covers, were loaded into an Army ambulance and whisked to a small military hospital at Fort Detrick, Md., that few people even knew existed.

They have been there for nearly two weeks.

The men live locked in separate rooms with individual changing rooms and showers; their little suites connected only by a common anteroom occupied at all times by a gowned and masked attendant.

Tvirus when the top of a test tube accidentally came off and exposed the pair to lassa fever, a little-understood disease for which there is no sure treatment or cure.

On Wednesday, the 16th day after the accident, neither man had developed any of the symptoms of the disease.

They can see — but not touch — visitors through windows of darkened glass with venetian blinds.

There are color televisions in the rooms. "It's nothing but a wasteland of reruns," said one.

And they have typewriters and books, but they don't get much done. "The atmosphere isn't really conducive to work."

The telephone is their most important asset. They can talk to friends, who try to keep their spirits up.

Their food — steak, hamburger, whatever they ask for — is delivered through specially designed chambers that disinfect the empty plates and utensils as they are returned to the outside.

"In our work, we talk about risk factors, probabilities and infection rates," said one of the men, whose names were withheld at their request. "When you get infected yourself, it's difficult to think that way."

"But the constant support from friends calling on the telephone helps, so the anxieties are reduced to a minimum. They come and go during the day, but we eat well and sleep well."

"Of course, we're concerned about being sick and how it will be when it comes. Will it be severe or mild? Will it be modified by the immune plasma we were given (from patients who recovered)?"

"But we can be more objective because we know the disease. We're not filled with a blind terror."

Officials at the Center for Disease Control in Atlanta, where

(Continued on Page 2A)

Terror suspects caught

BONN, West Germany (AP) — Four suspected West German terrorists have been captured in Bulgaria and flown to West Germany, the government said today.

It said they included escaped prisoner Till Meyer, 34, and Gabriele Rollnick, 28, suspected of taking part in Meyer's daring rescue from a West Berlin prison May 27. The two others were not immediately named.

The four were seized Tuesday by Bulgarian security forces cooperating with a special "target detection commando" of West German police, Interior Minister Gerhard Baum said.

He said they were flown to West Germany Wednesday night.

Target detection commandos are small units that track down suspects

in a string of Red Army Faction assassinations, kidnappings and other violence that culminated in the slaying of top industrialist Hanns Martin Schleyer Oct. 18.

It was the third major arrest of West German terrorist suspects in recent weeks, and the second time that the arrest took place with the cooperation of Communist East European authorities.

Basin's solar types hot to trot

ODESSA — The struggle to conserve energy is expanding and getting hotter.

In at least one niche in the economy, it's a tug o' war between Odessa's hot air and Midland's hot water. And it all has to do with the sun.

It's a race to sell solar-heating systems.

"I'm a promoter. I hustle every way I can," said Odessa's Tim Rudd, who is marketing a Sol-Tra forced-air collector for Solar Southwest of Odessa.

He also is peddling a hot-water plumbing system, which, in principle, goes straight to the hearts of his rivals over in Midland.

"I'd promote a dead horse if I had to," said the enthusiastic Rudd, who seemed convinced that he's got at hand the alternative heating system of the future.

Kim Huffman and Michael Milloway of Solar Innovations in Midland figure that they do, too.

"We heat water, and he (Rudd) heats air," said Milloway, a draftsman by training, and vice president of the newly-born Solar Innovations. Rudd's outfit has a 2½-year edge on Sol-Tra.

Both systems use solar panels to

ROUSTIN ABOUT with Ed Todd

"collect" — tap — the sun's energy.

The rivalry between the two systems probably is more imagined than real.

What promoters of both companies say they're after right now is merely educating the public to the feasibility of solar systems.

During the first part of the week, the two systems were on display in Winwood Mall in Odessa. For the rest of the week, they'll be set up in Midland's Dellwood Shopping Mall.

"The major thrust of this (exhibit) is education, to educate the public on the validity of the (solar) industry," said Milloway.

Rudd, Solar Southwest's solar adviser, said the same thing in his own way. In another century, Rudd likely would have been a top-notch drum-

beater in the Old West.

One purpose of the side-by-side exhibit, he said, is to tell people that the "shyster" solar-system peddlers are being culled out of the market and that there are some credible solar drummers, such as himself, Milloway, Huffman, Sol-Tra's president, and others around who just didn't "take the initiative" to get their wares on exhibit like these three did.

And Rudd, contrary to the anti-bureaucracy trend, had some kind things to say about the U.S. Department of Housing and Urban Development. HUD, he said, is on the side of legitimate solar-system manufacturers, sellers and installers.

"The only good thing that HUD did was to standardize the solar industry and get all the kinks out of it," said Rudd, who backs in HUD approval. "They eliminated the fly-by-night companies."

HUD, from Rudd's viewpoint, is helping solar systems gain a trustworthy name.

"They're a pain . . . in most everything they do," said Rudd, who was decked in a pin-striped suit that seem to spell success, "but this

Texas area forecasts

West Texas — Sunny and hot today and Friday, fair tonight. Highs near 100, near 110 Big Bend. Lows low 80s mountains and near 70 elsewhere.

North Texas — Mostly fair through Friday. Hot west, continued warm east. Highs 90 east to 100 west. Lows 70 to 75.

South Texas — Partly cloudy and continued hot tonight and morning cloudiness north central portions. Slight chance of mainly afternoon thundershowers extreme east. Highs upper 80s to upper 90s. Lows in the 70s.

Part Arthur to Port O'Connor — Southeasterly winds near 10 knots today, becoming southeasterly 10 to 15 knots tonight and Friday. Seas 2 to 4 feet today, increasing tonight. Winds and seas higher in widely scattered thundershowers.

Port O'Connor to Brownsville — Southeasterly winds 10 to 15 knots through Friday. Seas 3 to 5 feet today. Isolated showers.

New Mexico, Oklahoma

Oklahoma — Partly cloudy through Friday with widely scattered thundershowers today and tonight and east Friday. Highs 80 to 90. Lows tonight mostly in the 60s. Highs Friday in the 80s.

New Mexico — A chance for late afternoon and evening thundershowers southeast. Elsewhere, sunny and continued hot and dry. Highs 80s mountains, 90 to 100 lower elevations. Lows 60s and 50s mountains and northwest, mostly 60s elsewhere.

Hospital parking motion approved

By KAY HORD

The Board of Trustees of the Midland Hospital District Wednesday approved a motion that would allow the hospital to proceed with planning, financing and taking bids on the construction of a multi-level parking facility.

John Dorn, head of the building committee, told trustees a certificate of need would be necessary and that discussions Wednesday with officials in Austin indicated the certificate would be issued for a three-story building.

The facility would be of prefabricated concrete, Dorn said. A local contractor had given the board an estimate of \$850 on the parking facility, which would be located east of the hospital, Dorn said.

Dorn said that, according to a national survey, an average of 3.3 parking spaces are needed for every occupied bed. Using this average, Midland Memorial Hospital needs an additional 305 spaces to bring the present parking up to the national average, he said. Some parking will be provided if the hospital receives permission to close off Ohio Street between Garfield and N streets, Dorn said.

Dorn estimated that the parking might be available by June 1979, but trustees board President Mickey Capadonna estimated that bids would not be taken before March 1979.

Revenue bonds have been suggested as one means of paying for the multi-level parking facility, but the Finance Committee still is studying the matter, Capadonna said.

"They are confident that we can finance it without another election, but if an election is necessary, then I

think we ought to face our people with it. Parking is one of the most serious problems facing this hospital," he said.

In other business, the board discussed past shortages in personnel, especially in the operating room.

Capadonna told trustees that, in the near future, they might be asked to approve six operating teams, rather than the four now available. "We might need to go ahead and begin training these people," he said.

Other efforts to avoid future personnel shortages include six-month estimates of personnel and services needed and a survey of hospital department heads on personnel projections when construction on the hospital is completed.

Trustees also discussed the purchase of monitoring equipment to be used in the critical care unit. A spokesman for the hospital said the equipment will be purchased with a gift from an anonymous donor.

The operations committee offered a recommendation to the board that the hospital pharmacy remain on its established hours. It had been suggested earlier that the pharmacy remain open 24 hours a day, but Tevis Herd, chairman of the operations committee, said a survey of local pharmacies had been conducted.

"All of the pharmacies contacted but one indicated they would provide emergency pharmaceutical services on a 24-hour basis, and it was their opinion that customers would continue to use their usual pharmacy," he said.

Other discussion by the trustees included purchasing plaques recognizing donors to the hospital.

HONEYMOONING in Scotland are King Hussein and Queen Noor of Jordan. The couple, married last Thursday, arrived in Edinburgh Wednesday. Queen Noor is the former Lisa Halaby, an American-born architect. (AP Laserphoto)

Stonington early Wednesday, still contained a load of the precious metals destined for a refinery in Massachusetts. A seal on the truck remained unbroken and there were no signs that anyone had gotten inside by means other than the sealed door, said State Trooper John McLeod.

With a massive air and land search,

police located the truck at 1 p.m. about 10 miles from the hijack site Wednesday. It was partially hidden in a heavily overgrown area, McLeod said.

The hijack occurred at 6 a.m. Wednesday when the truck driver, George A. Smith, had stopped to check an unspecified possible defect. Two masked men armed with guns forced him out of the truck and tied him to a tree, police said. He freed himself and called police after 15 minutes, officials said.

The haul of unrefined gold and silver was traveling from a Handy & Harmon plant in Fairfield to the company's refinery in Attleboro, Mass.

Handy & Harmon makes daily shipments of precious metals between the two locations, said Richard Daniel, company vice president. The firm is the largest single producer of silver in the United States and the primary fabricator of silver and gold, he said.

There was no security guard traveling with the 4,000-pound shipment, authorities said. But Stephen Mudd, the treasurer of Handy & Harmon, said the company has an extensive security system that had "been circumvented in some manner."

Joseph Yablonski, an assistant special agent in charge of the FBI's

Stakeout of hijacked truck ends

Boston office, said "The mechanics involved (in the hijack) are no slicker than taking a truckload of Coca-Cola."

Daniel said if it became clear that security procedures for the daily shipment have been compromised, they will be revised.

Stakeout of hijacked truck ends

VOLUNTOWN, Conn. (AP) — Police called off a stakeout around a hijacked trailer truck today and awaited the arrival of fingerprint experts before opening the trailer to see if its contents of \$1.6 million in gold and silver remained untouched.

Police believed the truck, hijacked by two men on Interstate 95 in North

Hospital district director part of 'corporation'

By LINDA HILL

Midland County Hospital District Director Dr. Michael Burleson is one of five physicians seeking to purchase Parkview Hospital, The Reporter-Telegram has learned.

The hospital district is the governing body for Midland Memorial Hospital.

Burleson said Wednesday he joined four other physicians in January to form a corporation which is seeking to purchase the 60-bed private hospital.

The other four physicians, all officers of the corporation are Dr. Ernest F. Vernezobre, Dr. Viola Coleman, Dr. Jack Walton and Dr. Albert Courtney. Vernezobre said he expects the number of physicians who are shareholders to increase to 10 eventually.

Pair counting the days

(Continued from Page 1A)

The accident occurred, said they have reason to hope the danger is over.

"They're past the usual incubation period," said Dr. John H. Richardson, the center's safety officer. "They're probably out of the woods."

But the disease was discovered only recently, leaving scientists wondering just how much they know about its behavior. So they're taking no chances.

This weekend, officials said, they'll decide when to open the doors.

The corporation, named "Gaddisons" after the doctor in Chaucer's Canterbury Tales, is seeking Securities and Exchange Commission approval to buy the facility from Pell Industries, headquartered in New York.

Vernezobre said Wednesday approval of the sale is expected in July.

Burleson told The Reporter-Telegram that the five doctors agreed to try to buy the hospital in an effort to save the 60 hospital beds for the community. "A lot of us were afraid last winter that the thing would go under and we would lose those 60 beds," he said.

But, Burleson said, since becoming a hospital district director in April, he is "staying out of the action" at Parkview. He said he is not directly involved in management decisions concerning the private facility.

That the sale is pending would make it difficult for him to withdraw financially from the hospital corporation, Burleson said. "The situation is in limbo, and I'm just trying to stay out of the limelight, in the background, and tend to the other (hospital district) business."

"I can't be involved in both of them (the hospitals) directly," he said. But, he added, "I really can't afford to withdraw my financial support from that group under the circumstances."

Burleson declined to say how much money he has invested in the private corporation. "I don't think that would be right. That's kind of a personal thing," he said.

Asked whether he intends to sell his stock if the opportunity arises, Burleson said, "I haven't really thought about it."

The physician said he does not consider his investment in Gaddisons as a conflict of interest. "Everybody knows about it. The only way it could have any adverse effect on my involvement in the district board is if I'm a small and petty person and I have small and petty motives."

He said he has discussed his involvement with Parkview with the other district directors.

"I know that I have some political adversaries that would like to make hay over this," he said. But, it would be "a shame" to have the situation decrease chances of cooperation between the two hospitals, he said.

Hospital District Director Frank Cowden Jr. today said he was aware of Burleson's involvement with Parkview.

"I think we will just have to wait and see (if the interest in the two hospitals creates a conflict of interest). I think it can work out fine for him to do that if he handles his business like he should, but I think we will just have to wait and see," Cowden said.

Burleson said Wednesday his motivation is to provide Midland with as much hospital service as possible. His hope, he said, is to have Parkview develop "really good quality" facilities.

Jaycee group ends national, state ties

CHICAGO (AP) — The Chicago Jaycees have withdrawn from the United States Jaycees because the national organization will not admit women members.

The 350-member Chicago chapter severed its national and state ties Wednesday after delegates to the national Jaycees convention in Atlantic City, N.J., voted to keep male-only membership rules.

A proposed change in Jaycee bylaws which would have permitted women members at the option of state Jaycee chapters was defeated in a voice vote of some 7,000 delegates at the convention.

"The United States Jaycees has shown itself to be an organization that preaches humanity while practicing hypocrisy," said Chicago Jaycee President Joseph K. Lunn in a letter to U.S. Jaycee President Robert Rushton of Tulsa, Okla.

The proposal defeated at the national convention would have allowed state Jaycee organizations to decide whether to allow women as members.

Members of the Chicago chapter voted 115-8 more than a month ago to withdraw from the U.S. Jaycees if the national convention turned down the proposed bylaw change. About 100 of the Chicago Jaycees are women, according to Yvette M. LeGrand, chapter vice president.

Wednesday's vote in Atlantic City was the second veto of women's membership. The first was at the 1975 convention in Miami.

The U.S. Jaycees are one of six national Jaycee groups that retain a male-only rule. Women are allowed in Jaycees in 78 countries, Ms. LeGrand said Wednesday.

In his withdrawal letter, Lunn said, "Without the efforts of men and women working together, our ability to serve Chicago and to train the city's future leaders would be severely diminished."

Temperatures near 100 expected again Friday

Friday is expected to once again bring temperatures nearing 100 degrees, with hot, dry winds continuing to blow, the National Weather Service at Midland Regional Airport said.

The weatherman said it should be fair and hot this afternoon and Friday and fair and hot tonight. The low tonight should be near 70. Winds tonight should be 15 to 20 mph, calming from 15 to 25 mph and gusty today.

Area towns reported clear and hot weather this morning.

Wednesday's high temperature was 96 degrees, the weatherman said. The

overnight low was 71. The record high for June 21 is 107 degrees set in 1934. The record low for today is 60 degrees set in 1973.

Widely scattered thundershowers were expected in extreme Southeast Texas today, but most of the state expected continued mostly clear skies and hot temperatures.

Some isolated thundershowers erupted during the night in West Texas and along the Red River in Northeast Texas, but the remainder of the state had clear skies. The thunderstorm activity died out before dawn.

Forecasts called for mostly clear skies and continued hot temperature readings statewide. Highs were expected to be mostly in the 90s with readings expected to reach the 100-degree mark in some of West Texas and near the 110-degree mark in the Big Bend area of Southwest Texas.

Early morning temperatures were mostly in the 70s with extremes ranging from 68 at Houston to 79 at Galveston.

Some early morning readings included 72 at Amarillo, 76 at Wichita Falls, 73 at Texarkana, 77 at Dallas-Fort Worth, 72 at Austin, 73 at Corpus Christi, 75 at McAllen, 77 at Del Rio, 75 at San Angelo, 70 at El Paso and 74 at Lubbock.

Basin's solar types hot to trot

(Continued from Page 1A)

(HUD) is the only thing that has taken the solar industry and made it legitimate."

Both rival company spokesmen agreed that their systems are, depending on the situation and viewpoint, either the mainstay of a house-and-building heating system or the back-up system in a dwelling heated by gas, electricity- or fuel oil-fed system.

At any rate, a solar system can cut down on utility costs by as much as 60 percent or more, said Rudd.

"It can be higher, and it can be lower."

Milloway said about the same.

"If you know how to use it, it can be 'free' during the day."

Still, Rudd, always the promoter, said his system is best, basically because it's more efficient to heat air than water.

Anyway, he said, "The water in Odessa will eat the foot out of anything; it'll eat the pipes out."

Milloway, who's not yet so aggressive and admittedly is an apprentice in selling and marketing, is more of a technician.

"I install this thing (the system). I'm not a seller."

Current wave of war movies strains relationships

By LAWRENCE SUID
Special to The Washington Post

WASHINGTON — The current wave of movies about the Vietnam War and its aftermath has again focused attention on the long-standing relationship between the film industry and the armed forces.

Within the Pentagon itself, Assistant Secretary of Defense for Public Affairs Thomas Ross has asked the individual services to consider whether the Pentagon should stop making judgments altogether on whether scripts are in the best interest of the Department of Defense.

Of the movies so far released that touch on the Vietnam experience,

only "Heroes", a light comedy about a disturbed veteran who sets out across America to find himself, received even limited Pentagon assistance.

Perhaps realizing the Marines would have nothing to do with a movie that would advertise itself, "To keep their sanity in an insane war, they had to be crazy," the producers of "The Boys in Company C" did not even submit a script to the Defense Department. Instead, they made the movie in the Philippines, ending up with a story that marine officials insist bears almost no resemblance to their procedures, activities or experiences in Vietnam.

The producer of "Rolling Thunder," a story about a returned prisoner of war, did request Air Force assistance. However, the service refused to cooperate on the grounds that there were "no known cases of Air Force officers becoming schizophrenic" as portrayed in the story. While the service conceded that some POWs came home to marital problems, it said there was "nothing beneficial for DoD in the dramatization of this situation."

Over the years the armed services have based their decisions to cooperate on a script on whether assistance would benefit the military by aiding in recruitment or by providing informational value to the public about a

service's activities and procedures. Occasionally the military has provided help on a movie that might not render such benefits, if assistance seemed to be in a service's best interest.

By agreeing to work with a filmmaker on a less-than-desirable script, the armed forces feel they can improve the completed movie's accuracy and the portrayal of the military itself. In all situations, however, regulations have required that assistance be at no cost to the taxpayer.

Before the Vietnam War spawned anti-war sentiment in the country, most Hollywood films about the armed forces helped create an image of the American military as all-con-

quering, invincible and infallible. Vietnam, and more specifically the Tet offensive, destroyed this image.

The controversial nature of the war and its daily appearance on the evening news also eroded the market for movies about the conflict, both during the fighting and in the years immediately afterward.

Beginning with the release of "Midway" in 1976, however, Hollywood has once again turned to the military as a subject. Walter Mirisch's film about the battle that turned the tide in the Pacific, "A Bridge Too Far" and "MacArthur" focused on a "safe" war, one from which the United States emerged victorious.

Concurrently the peacetime mili-

tary also became the subject for filmmakers when Mirisch produced "Gray Lady Down," the story of a stricken nuclear submarine. Even though the completed film resembled a service-produced documentary, the Navy provided cooperation reluctantly and only after rejecting at least four scripts.

To the Navy, the story of submarine disaster offered little benefit to the service's recruitment campaign. What the Navy found worse in the early scripts, however was the rescue of the trapped American sailors by a Russian submarine and diving equipment.

DEATHS

Mrs. Bartlett

FORT STOCKTON — Graveside services for Mrs. Fred (Marion) Bartlett of Fort Stockton, daughter of Mrs. R.B. Bechtel and sister of Robert W. Bechtel, both of Midland, were to be at 10 a.m. today in East Hill Cemetery with the Rev. Jim Elder, Presbyterian minister, officiating. Services will be directed by Fort Stockton Funeral Home.

Mrs. Bartlett died Tuesday in an Abilene hospital.

She was born in Amarillo. She attended high school in Slaton and later attended Trinity University in Waxahachie and The University of Texas at Austin.

Other survivors include a daughter, two sons, a sister and five grandchildren.

The family requests memorials be made to the American Cancer Society or a favorite charity.

James Melton

Services for James William Melton, 43, of 1401 N. Midland Drive will be at 10 a.m. Saturday in Newbie W. Ellis Funeral Home. Burial will be in Resthaven Cemetery.

Melton died Tuesday afternoon in a Dallas hospital.

He moved to Midland in 1965. He owned and operated the J.W. Melton and Sons Millwright Service Co. of Midland.

He is survived by six sons, Phillip Melton, Maxie Melton, Terry Melton, Larry Melton, Ricky Melton and James W. Melton, all of Midland; his father, James Melton of Baytown; three sisters, Doris Garcia of Baytown, Joyce Ann Minshue of Hollandale, Miss., and Eloise Sanders of Charleston, Miss., and four brothers, Ralph Melton, John Melton, Jimmy Melton and Donnie Melton, all of Charleston.

Pallbearers will be Kent Elliott, Harold Moore, Jimmy Steed, C.R. McClure, Richard Foster and Guy Berry.

Aneta Padilla

Services for Aneta Fuentes Padilla, 19, were to be at 10 a.m. today in the Emanuel Baptist Church in Midland. The Rev. Paul Pequeno will officiate. Burial was to be in Fairview Cemetery directed by Thomas Funeral Home.

Miss Padilla died Tuesday afternoon in a Big Spring hospital after an extended illness.

She was born September 26, 1958, in Stanton. She had lived in Midland for more than a year. She graduated from Midland High School and was employed by Texas Instruments. She was a member of the Emanuel Baptist Church.

Survivors include her parents, Mr. and Mrs. Isidro Padilla of Midland; six brothers, Manuel Padilla, Cruz Padilla, Jessie Padilla and Robert Padilla, all of Midland; Isidro G. Padilla Jr. of Albuquerque, N.M., and Carlos Padilla of San Antonio, and three sisters, Mary Rendon, Lucy Lujan and Alecia Padilla, all of Midland.

Inez Luce

Inez Webb Luce, 83, of 202 S. G St. died Wednesday in a Midland hospital following an illness.

Services will be at 10 a.m. Friday in Newbie W. Ellis Funeral Home with the Rev. Roy A. Carley, retired Baptist minister, officiating. Burial will be in Evergreen Cemetery in Stanton.

Mrs. Luce was born Dec. 8, 1894, in Pendleton. She was reared in Martin County, moving there with her family in 1906. She was graduated from West Texas State University with a degree in education. She moved to Midland in 1943 from Petersburg, where she had been an elementary school principal.

After she moved to Midland, she became associated with Midland Independent School District as principal of South Elementary, serving there for a number of years. She retired in 1958. She was a member of the First Baptist Church of Midland. She was named Friend of the Boy by the Midland Rotary Club.

Survivors include four sisters, Pearl Hardy of Hobbs, N.M., Lillie Harvard and Ova Webb, both of Midland, and Flossie Gaskins of Artesia, N.M.

Pallbearers will be James Webb, Jerry Webb, John Harvard, Dan Foreman, Sam Foreman, Bob Eidson, Charles Gaskins and Jason Foreman.

Doyle Mensch

LAMESA — Services for Doyle Mensch, 55, of Lamesa will be at 10 a.m. Friday in Bryan Street Baptist Church here with the Rev. Fred Heath, pastor, and the Rev. Ray Smith of Lubbock officiating.

Burial will be in Lamesa Memorial Park directed by Branon Funeral Home.

Mensch died Tuesday in a Lubbock hospital after a sudden illness.

Mensch was a resident of Dawson County 52 years. He was a veteran of World War II and a 21-year member of Bryan Street Baptist Church.

He was employed by Piggly Wiggly No. 2 here.

Survivors include his wife, Lola Mensch; three daughters, Beth Leatherwood of Lamesa, Nancy Mauldin of Artesia, N.M., and Brenda Richter of Midland; a son, Gary Mensch of Jacksonville; his parents, Mr. and Mrs. S.A. Mensch of Tahoka; three sisters, Mrs. Pierce Mayes of Tahoka, Geraldine Yandell of Hereford and Faye Bradshaw of Graham; four brothers, Otis Mensch of O'Donnell, Clem Mensch of Lorenzo, Alvis Mensch of Carlsbad, N.M., and Leroy Mensch of Lamesa, six grandchildren and two step-grandchildren.

Woman reports abduction, rape

A 23-year-old Midland woman, discovered missing early this morning from a Midland convenience store, reportedly was abducted at gunpoint and raped, police said today.

At approximately 4:28 a.m., an Odessa man reported an open door at the 7-Eleven Store at Midland Drive and Camarie Avenue to Midland police. On arrival, officers said, they found the clerk missing.

The woman called police at 5:51 a.m. from 4805 Andrews Highway. She told officers that a white male in his early 20s, about 6-feet tall, thin build, small mustache and driving a dark green vehicle forced her to leave the store and later attacked her.

The man allegedly threatened the clerk with a revolver.

Short courses slated Monday

Three short courses of special interest to women will be offered by Midland College starting Monday, according to a spokesman for the college. Pre-registration is on Monday and Tuesday from 7 a.m. to 5:30 p.m.

A Typing Brush-Up class will meet Mondays, Tuesdays and Thursdays to teach typing techniques and tabulation. This class also will work to familiarize students with electric machines, keyboards and machine parts, the spokesman said.

The basics of cake decorating, including flowers, borders, and pipings will be explained in Cake Decorating I. Students will not be required to bake cakes for the class, which will meet Tuesdays and Thursdays. The course is limited to 25 students.

Powder Puff Mechanics, an introductory course in "getting to know your car," will meet Tuesdays and Thursdays. While the subject is geared mainly toward women, it also is useful for teenagers, the spokesman said. A full range of car terminology, routines for care and maintenance, and instruction on minor repairs will be taught.

More information may be obtained by telephoning 684-7851, extension 147.

Sidewalk parade slated July 4

The Col. Theunis Dey Chapter of the Daughters of American Revolution is sponsoring the 16th annual sidewalk parade July 4 in Wadley-Barron Park at Cuthbert Avenue and North A Street.

Each participant must be on a pedal-driven vehicle or pulling a sidewalk vehicle with a person in it, according to Mrs. James "Doc" Dodson, with the organization.

Four categories are open for children, and they will register in the age group they were in when school was out in May. The categories are pre-school, ages 0-5 and includes kindergartners; grades 1-3; grades 4-6; and a miscellaneous group which will include children past the sixth grade and family groups.

Mrs. Dodson said ribbons will be given in each category for first, second, third place and honorable mention. Judging will be based on originality, work and effort, colorfulness, decoration and how it represents July 4.

Registration will begin at 9 a.m. July 4 at the corner of Harvard Avenue and North A Street, Mrs. Dodson said. The parade will start at 10 a.m., and the winners will be announced shortly after the parade has ended, she said.

Foundation chooses head

A new president of the Midland College Foundation Board was elected at a recent meeting of board members.

Harvey Herd, former vice president of the board, was named and will fill the vacancy left as a result of the recent death of Veda Hodge. He has been a member of the Foundation since its formation soon after Midland College was established. He is an independent oil operator who is active in the Midland community and petroleum activities.

William F. (Bill) Marshall, a Foundation Board member, will replace Herd as vice president. Marshall is president of Marshall & Winston. The secretary-treasurer of the Foundation is Murray Fasken, chairman of the board of Midland National Bank and president of the Midland College Board of Trustees.

The Foundation is a non-profit, tax-exempt foundation which can accept gifts of money, stocks, real estate, bonds, or other items of value for the benefit of Midland College.

Midland man out on bond

A Midland man was out of jail today in lieu of \$10,000 bond after being charged with theft in connection with the alleged embezzlement of approximately \$20,000 from Sambo's Restaurant in Midland.

Steve Allen Meeker, 23, former manager of the restaurant, was arrested Tuesday after the restaurant chain's area manager and auditor reportedly examined the books and filed a complaint concerning the allegedly missing money.

Bond was set by Peace Justice Robert Pine.

Odessa gas station robbed, attendant reports assault

ODESSA — An Exxon station at Interstate 20 and South Grant Street here was robbed early today by two men armed with guns, according to a spokesman with the Odessa Police Department.

The two men stopped at the station about 4 a.m., purchased some transmission fluid and talked to the attendant about going to Corpus Christi, police were told. When the attendant opened the cash register for the men to pay for the fluid, the two men produced weapons, the attendant told police. They reportedly took money from the register and hit the attendant over the head before leaving, according to the spokesman.

The attendant was treated and released at Odessa Medical Center.

Police were told by the attendant that the two black men had their hair in braids. One man was described as 6 feet tall, weighing about 150 to 160

pounds. The other man was described as 5 feet 8 and weighing about 140 pounds. One man carried a blued, steel revolver and the other man carried a chrome-plated revolver, the attendant said.

The spokesman said the case still is under investigation.

Saddle winners announced

Winners of saddles awarded by the Tall City Youth Horse Club were announced recently.

Sunnie Harris, daughter of Mr. and Mrs. Glenn Harris of Big Spring, received the award in the nine and under age group.

Winner in the 10 and over age group was Terri Otho, daughter of Mr. and Mrs. Oscar Otho of Midland.

West Texas Boys Ranch nearing 30th anniversary

SAN ANGELO — West Texas Boys Ranch will celebrate its 30th anniversary on Saturday, July 8, with a homecoming — Reunion of ex-boys, past staff members, and past directors. The public is invited to visit and tour the Ranch, which is located 17 miles west of San Angelo, a spokesman said.

Public open house will begin at 3 p.m. with guided tours to be conducted by the boys who presently reside at the Ranch. Beginning at 5 p.m., an old-fashioned barbecue will be served along the banks of Spring Creek in the picnic area. Donations to help defray the cost of the barbecue will be appreciated, the spokesman said.

Boy Scouts of America Troop 302 will conduct the flag ceremony at 6:45 p.m. at the center of Boys Ranch circle.

The highlight of the day will be the 16th annual All-Boy Rodeo, beginning at 7 p.m. at the ranch's rodeo arena. Admission is free.

Timely broadcast takes trophy

A KNFM radio public service announcement won a trophy Sunday at the annual convention of American Advertisers Federation held in San Francisco, Calif. The announcement was a promotion reminding people to set their clocks back, said station manager Wayne Weekes.

Mike McLaren, the writer-producer of the winning announcement, and Mike Fitzgerald, general manager at KNFM, were at the convention to accept the award. Weekes said "it is quite an honor. This is the academy award in advertising."

Designer enjoys Craft in Paris

By SUZY PATTERSON
AP Fashion Writer

PARIS (AP) — Paris is providing the finishing touches in the training of a hot young American fashion designer whose life sounds like any young American girl's dream.

Sue Ekahn, a striking, ebullient 6-footer, is only 22, but already has her unique place in the fashion world. Last year Sue, from Merrick, N.Y., and four other American girls won a French government competition for \$5,000 scholarships to study fashion at the Chambre Syndicale de la Couture.

On Sue's first day at school she was appalled to find that she was supposed to cut out a "toile," or linen prototype for a blouse.

"Like, that's not what I came for." She transferred to a professional class.

She had already designed professionally for Seventh Avenue manufacturers, and wears her own models around Paris.

Her clothes are much like herself — big, modern and well-made. She often wears her Paris prize-winning white full dress with matching shawl. "But this is my eye-stopper," she said, hauling out a long caramel mohair coat, which she donned over a ruffled tiered skirt, checked blouse and knit tie, trendy Mary Jane pumps and bobby sox.

"I came to Paris to be inspired," said Sue, who looks continually carried away. She has been soaking up inspiration in her oak-beamed Left Bank studio, liberally decorated with

her own things: a Marilyn Monroe poster, a collection of antique shoes, piles of fashion magazines, and a dummy-mannequin of her size.

Sue sometimes played hooky from school in Paris, but not to gossip in cafes, as most students do; she did it for work, and turned out most of a collection for Chantal Thomass, a young ready-to-wear designer.

Raised in New York and Long Island, Sue habitually collects prizes. False modesty is not one of her faults.

"I was Miss High School," she smiled. "An A student, varsity volleyball and so on."

She worked hard for success at Rhode Island School of Design. "I had dates every night with my sewing machine, and made friends with the nightwatchman so that I could work after hours."

She won the "Mademoiselle" magazine guest editorship, a Capezio shoe design award, the Next Great Designer Award given by the International Ladies Garment Workers Union (ILGWU), and a prize from the American Velvet Company.

Sue was destined for fashion. Her father, a buyer, escorted her as a little girl on tours of the garment district. "And I was always well-dressed," she remembers.

"I designed my first garment line in the fifth grade, and earned a profit of \$5.86 making doll clothes for my friends."

Paris was her dream world. "French women are fantastically chic. Take the Metro: look at the girls in the bank; even my bakery girl dresses in the latest thing."

Mrs. Gary Kip Gorman

Janet Leona Cole marries Gary Kip Gorman in church

Janet Leona Cole was married to Gary Kip Gorman at 2 p.m. Saturday in a double ring ceremony in the home of Don Murphy, 2002 N. C St. The Rev. Bob Mason of Kelview Heights Baptist Church officiated.

The bride is the daughter of Mr. and Mrs. Dale Cole of San Angelo. She is a graduate of Denver City High School and is employed by Lone Star Abstract and Title Co. The bridegroom, son of Elizabeth Gorman of Roswell, N.M., is a graduate of Roswell High School and is employed by Shamrock Building Systems.

After a trip to Lubbock, the couple

is at home at 2200 S. Lamesa Road, No. 2.

Debbie Sparks of Krum, sister of the bride, was matron of honor. The maid of honor was Susan Hester of Denver City. Pat Cole of Amarillo, sister-in-law of the bride; Teri Inman of Hobbs, N.M., cousin of the bride, and Robin Cole of San Angelo, sister of the bride, were other attendants to the bride. Misti Sparks of Krum, niece of the bride, escorted by Matt Sparks, nephew of the bride, was the flower girl. Ring bearer was Tyson Murphy.

Mark Huddle of Roswell was the

best man. The groomsmen were Steve Sparks of Krum, Don Murphy and Lloyd McMahon of Midland and Mark Ernest of Roswell. Randy Cole of Amarillo, brother of the bride, and Tony Inman of Hobbs, cousin of the bride, were the ushers.

Mr. Cole presented his daughter in marriage. She wore a candlelight gown of gunny sack material with pearl buttons down the bodice, which had long sheer sleeves. The skirt was tied in back with an apron effect and fell in ruffles to the floor. She carried yellow and white daisies.

A reception was held following the ceremony.

AT WIT'S END

Children misconstrue phrases

By ERMA BOMBECK

It is rare when adults and children share the same interpretation of a word or phrase.

Thus, water pollution to adults may mean harmful bodies that threaten existence, but to a boy it means "girls simming in the pool at the same time I do."

Invasion of privacy to kids is "assigned homework on weekends."

Parental brutality is "making me wash my help set up chairs and face when I'm not going anywhere."

And incarceration in a penal colony without the advantages of due process of law comes out "summer school."

We've always had a rule in our family. You either get a job or go to summer school. We initiated this ruling when I spent three years with

my son one summer listening to him whine, "There's nothing to do."

We don't care why they take so long as they get out of bed, get dressed, leave the house, and get a credit for it.

Our son appeared at breakfast yesterday morning en route to his first day at summer session.

"Want breakfast?" "Do I have time?" he snarled. "Or do you want me to get there early and check the people in?"

"Why are you so angry?" "Hey, am I hostile?"

believe me, I'm going to do the same things when I have kids...roust 'em out at the break of ten in the morning all summer long papers, notes, quizzes, tests, finals, research, bibliographies, orals, lack of sleep, dates, perimenting with solar

heat in the classroom. There they'll load them down with homework so they can't hear a newborn baby cry, or touch a leaf, or see the sky..."

"Then I'll know why I believe," I said, finishing the song. "It'll never make the top ten."

C'mon," he said, "I don't know what is with you and Dad. I thought you wanted happy children out of your marriage. All you've got is a sweaty, irritable kid without affection who goes through every summer having anxiety attacks."

"I just finished up an entire year of study, study, study, term papers, notes, quizzes, tests, finals, research, bibliographies, orals, lack of sleep, dates, places, I don't know how

much longer I can go without cracking!"

If he hadn't been taking a summer class in party guitar, he might have gotten through to me.

New officers of the Texas Zeta Mu Chapter of Phi Sigma Alpha include Christine Broxson, seated, president, and standing, Nina Sharp, left, treasurer, and Betty Goode, vice president. Not shown are Lorraine Miles, secretary, and Leigh Cerboskas, program moderator. (Staff Photo)

Weight control being urged for U.S. babies

Copley News Service

New concepts in infant feeding in the United States are now being introduced by a major U.S. baby food manufacturer.

Beginning some 10 years ago in West Germany, the nutritionally balanced and calorie controlled product has become the leading infant food in many parts of Europe, and now is available in America.

When solid food first is introduced to the baby, cereals mixed with milk, formula, honey, sugar and fruits usually are added to induce the baby to accept other foods. The new mother must guess at the quantities to add to her baby's diet, and often the mixture becomes far too high in calories for the child's needs.

The need to prevent overweight in babies, even very young ones, is becoming more apparent as adult America continues to fight the battle of the bulge. The time has come to control obesity from the cradle. Training a child in proper eating habits, with controlled calorie intake yet high nutrition foods, probably is one of the best legacies that parents can provide. And it must begin in infancy.

Much of the problem stems from the confusion of what to add to the diet and when to do it. Transition foods from breast feeding and infant formulas to cereals and strained foods often are a "hit and miss" procedure of inaccurate nutritional and caloric levels. Baby formula companies have

not produced strained baby foods and cereals, and the formulas often have a pharmaceutical connotation.

Baby food manufacturers, similarly, have not produced infant formulas. Neither seemingly has the technology to provide both.

The new products, however, bridge the obvious gap by providing total calorie-controlled infant formula cereals and fruits in one package. A new convenience for both pediatricians and new mothers, that meet the child's needs.

So. Africa discussed

Lola Igou, a resident of Midland and native of South Africa, described the economic, cultural and natural assets, as well as the development of the country at the southern tip of Africa, when Texas Zeta Mu Chapter of Phi Sigma Alpha met in the clubroom of Golden Crest Apartments. Nina Sharp was hostess.

Programs and social events for the coming year were planned.

The new president, Christine Broxson, appointed committee chairmen.

Chair stays with family

CHARLESTON, W. Va. (AP)—A little high chair at the home of Mrs. R. W. Fogarty has seen six generations of babies grow up in it.

Mrs. Fogarty's great-grandfather made it in 1850s, before the Civil War, for his first child.

The chair is made of native maple and hickory, with the posts turned on a foot-powered lathe and the rounds slicked out with a drawing knife.

Oil, gas operators stake 150 project in Basin areas

The weekly tabulation of planned exploration and development in the Permian Basin showed 150 applications submitted to the regulatory bodies governing the oil and gas industry.

Included in the count were 27 wildcats, a decrease of two from the 29 planned two weeks ago, while 123 development tests were scheduled.

The overall count rose 56 from the 94 projects planned in the previous week.

Railroad Commission District 8-A, headquartered at Lubbock, topped all districts in wildcat projects, with 10 sites staked, while District 7-C, San Angelo, recorded eight and District 8, Midland, had six.

District 8-A reported 43 field tests; District 8 had 32 and District 7-C showed 25.

The county-by-county tabulation:

| County | Wildcat | Field |
|-----------------------------|------------|------------|
| Andrews | 0 | 4 |
| Crane | 0 | 5 |
| Culberson | 1 | 1 |
| Ector | 0 | 1 |

Traverse will re-enter pair of Garza wells

Traverse Corp. will attempt to open Strawn production in the Tubow field of Garza County with the re-entry of the pools Ellenburger discovery.

The same operator will re-enter the Ellenburger discovery of the Trabow field of Garza County and test for completion in the Strawn.

The Tubow project is No. 1 Tuff and others, 1,980 feet from north and 660 feet from west lines of section 10, block 6, H&G survey and 14 miles southeast of Post. It will be plugged back to 7,750 feet. The site is 1/2 mile south of Strawn production. The old total depth is 8,022 feet.

Traverse No. 1-17 J. F. Lott and others will be re-entered in the Trabow area. It will be plugged back from 8,356 feet to 7,750 feet.

Location is 660 feet from south and 2,640 feet from east lines of section 17, block 2, T&N survey and 11 miles south of Post.

WINKLER PROJECTS
Gifford, Mitchell & Wisenbaker of Midland announced locations for four projects in the Cheyenne (Capitan) area of Winkler County.

No. 1 Ten Bears will be drilled 4,676 feet from north and 467 feet from west lines of section 14, block C-23, psi survey and nine miles northwest of Kermit. It is slated for a 3,900-foot bottom. The site is 1,330 feet south of production.

No. 2 Ten Bears, another 3,900-foot operation, is 1,330 feet south of production and 1,797 feet from north and 467 feet from west lines of section 14, block C-23, psi survey. It is nine miles northwest of Kermit.

Gifford, Mitchell & Wisenbaker No. 3 Ten Bears, also slated for a 3,900-foot bottom, is 3,127 feet from north and 467 feet from west lines of section 14, block C-23, psi survey.

The same operator's No. 8 Black Kettle will be dug 1,310 feet from south and 670 feet from east lines of section 7, block 74, psi survey and eight miles northwest of Kermit. The contract depth is 3,300 feet. The location is 940 feet southwest of production.

ECTOR RE-ENTRY
Getty Oil Co., operating from Midland, will re-enter its No. 25-6 Headlee Devonian Unit, project in the Headlee (Devonian) pool of Ector County, and test a new section of the Devonian.

Location is 660 feet from south and 1,960 feet from west lines of section 21, block 41, T-2-S, T&P survey and 1/2 mile southeast of Odesa.

Tests will be made at 12,100 feet.

SAXON PROJECTS
Saxon Oil Co. of Midland announced locations for four projects in the Spraberry Trend Area field of Reagan County.

Each of the tests will be drilled to 7,700 feet.

No. 1-7 University will be drilled 1/2 mile south and west of production and 1,320 feet from north and east lines of section 7, block 9, University Lands survey.

No. 2-7 University is 1/2 mile south of production and 1,320 feet from north and west lines of section 7, block 9, University Lands survey.

No. 3-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 4-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 5-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 6-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 7-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 8-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 9-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 10-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 11-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 12-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 13-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 14-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 15-7 University is one and one-half miles northwest and southwest of production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

production and 1,320 feet from south and west lines of section 7, block 9, University Lands survey.

No. 4-7 University is to be drilled 3/4 mile northwest and 3/4 mile southwest of production and 1,320 feet from south and east lines of section 7, block 9, University Lands survey.

The tests are eight miles northwest of Big Lake.

TOM GREEN TEST
Saxon Oil Co. also announced location for a new test in the Dove Creek (Canyon D) area of Tom Green County.

The 6,700-foot operation is No. 1-G Wingerbotham, 1/2 mile east of the two-well pay and 660 feet from north and 760 feet from west lines of section 22, block 21, H&T survey and 12 miles southeast of Mertzon.

RUNNELS OPENER
John W. Barbee of Abilene No. 2 Pullin has been completed as a Gray discovery in Runnels County, nine miles northeast of Ballinger.

It completed for a daily flowing potential of 52 barrels of 42-gravity oil, plus 20 barrels of water, through a 1/4-inch choke and perforations from 3,752 to 3,756 feet. Gas-oil ratio is 1,220-1.

The pay section was washed with 250 gallons of mud acid and fractured with 1,600 gallons of solution.

Location is 1,400 feet from south and 515 feet from east lines of T. T. Williamson survey No. 14.

The following tops were picked on kelly bushing elevation of 1,772 feet: Saddle Creek 1,760 feet, Speck Mountain 2,032, Palo Pinto 3,090, Gray sand 3,750, and Caddo 3,892 feet.

GAINES PROJECT
Petro-Lewis Corp. of Levelland No. 1 J. C. Sparks is to be drilled as a southeast offset to the discovery well of the Seminole, North (Devonian) pool of Gaines County, 10 miles northwest of Seminole.

The location for the 11,900-foot test is 750 feet from north and 660 feet from east lines of section 300, block G, CCSD&RGNG survey.

BORDEN RE-ENTRY
Shell Oil Co. will re-enter its No. 1-B Slaughter, depleted Ellenburger discovery of the U Lazy S field of Borden County and attempt completion in the Strawn.

If completed it the Strawn, it will be assigned to the Dunigan (Strawn) field.

The location is one and one-half miles northeast of Dunigan (Strawn) production and 665 feet from north and 662 feet from east lines of section 16, block 30, T-6-N, T&P survey. It will be plugged back to 8,102 feet.

Waste plan gets okay
AUSTIN, Texas (AP) — The railroad commission Monday authorized MFI Energy, Inc., of Grand Prairie to reclaim oil from a waste pit at McCamey.

Senior staff geologist Bill Watson told the commission the pit contains 422,900 barrels of waste material of which 279,118 barrels are marketable crude oil.

Damages awarded
BIRMINGHAM, Ala. (AP) — Survivors of two men killed in a tank explosion have been awarded a total of \$5 million in punitive damages. The Circuit Court jury handed down the verdict Tuesday against Union Oil Co. of California in the deaths of Chester Bagby, 22, and Herman Robertson, 43.

The two men were welders working on a storage tank at the Union Oil depot at Birmingham when the tank exploded Nov. 2, 1976. The awards of \$2.5 million each will go to Bagby's mother and Robertson's widow.

Explorers announced
Clements told his audience there wasn't "anybody in the room that's been poorer than I have" and said he wanted to give minorities the same opportunity to rise to wealth as he had.

One way to do that, he said, would be to create an agency in the governor's office to help small businesses get state-backed loans and to link small firms with larger businesses in the same field to provide advice.

Clements said the Democrats and his opponent, Attorney General John Hill, were to blame for creating "a bloated bureaucracy" that resulted in a "burden of excess taxes."

And Clements told his audience they had been used by the Democrats.

"They've hung a moon up there for you, but you haven't made the trip," he said.

DRY HOLES
COTTLE COUNTY — Bass Enterprises No. 3-A Havins, Stenscott field, 1,140 feet from north and 1,550 feet from west lines of R. N. Gillis survey No. 4154, three miles south of Chalk, salt water disposal well.

CROCKEY COUNTY — Hest Petroleum Corp. No. 1-32 Watson Ranch, wildcat, 1,820 feet from north and 1,370 feet from west lines of section 23, block A, TCRS survey, 23 miles southwest of Osma, id 7,000 feet.

EDDY COUNTY — C. E. Laves & B. N. Mancy Jr. No. 1-E Hamilton, wildcat, 1,990 feet from north and 660 feet from west lines of section 21-25a-28e, seven miles south of Malheur, id 4,200 feet.

C. E. Laves & B. N. Mancy Jr. No. 1-E Wanda, wildcat, 2,185 feet from north and 320 feet from west lines of section 22-15a-28e, 10 miles north of Caprock, id 2,802 feet.

LEA COUNTY — Maralo, Inc. No. 1-7 New Mexico State, wildcat, 960 feet from south and 1,980 feet from west lines of section 1-16a-30e, eight miles west of Lovington, id 14,658 feet.

LEA COUNTY — Maralo, Inc. No. 1-7 New Mexico State, wildcat, 960 feet from south and 1,980 feet from west lines of section 1-16a-30e, eight miles west of Lovington, id 14,658 feet.

Wildcats spotted

Wildcat operations have been announced in McCulloch and Runnels counties.

Sarah Gray of San Angelo No. 1-R Miller is to be drilled as a 650-foot wildcat in McCulloch County, 10 miles north of Lohn.

The location is 230 feet from north and 660 feet from east lines of Henry Cox survey No. 1186. It is 330 feet from west of Production Services No. 1-F Miller, active 1,900-foot wildcat.

RUNNELS TEST
Frank J. King of Abilene No. 1 Emma Cole is to be drilled as a 4,100-foot wildcat in Runnels County, seven miles northeast of Winters.

Location is 2,850 feet from southeast and 467 feet from northeast lines of Thomas J. Hardeman survey No. 267.

The location is one and one-quarter miles east of the Briley, Southeast (upper Gardner, Dog Bend and Cross Cut) field but separated by the depleted Sykes, West (Morris and Goen) pool.

Spraberry well finals

MGF Oil Corp. of Midland has announced completion of a well in the Spraberry Trend Area field of Martin County.

It is No. 1-A Stimson, 11 miles northwest of Stiles and 320 feet from south and east lines of section 31, block 37, T-1-N, T&P survey.

In finalized for a daily pumping potential of 59 barrels of oil and 40 barrels of water, through perforations from 8,911 to 9,930 feet after 2,000 gallons of acid and 60,000 gallons of fracture fluid. The gas-oil ratio and gravity have not been reported.

\$75 billion held by OPEC

ZURICH, Switzerland (AP) — Total financial reserves of the 13 oil exporting states of OPEC climbed to \$75 billion at the end of last year, the Credit Suisse bank said Wednesday.

It said the amount was five times the reserves the Organization of Petroleum Exporting Countries had at the end of 1973 when sharp oil price increases began.

The OPEC oil ministers ended a semi-annual meeting Monday with a decision to leave crude oil prices frozen at \$12.70 a barrel.

The bank, one of Switzerland's top three, said total accumulated foreign assets of the group were estimated at \$155 billion at the end of 1977.

Eighty per cent of total was held by the sparsely populated states of the Saudi Peninsula — Kuwait, Qatar, the United Arab Emirates and Saudi Arabia — whose combined currency reserves were only about one-third of their total foreign assets, the bank said.

Exception granted
AUSTIN, Texas (AP) — The Railroad Commission has granted two oil operators an exception to statewide well spacing rules so they can drill an exploratory test in the bay waters of Nueces County.

The permit went to Galaxy Oil Co. of Wichita, Kan., and Claud Hammill of Houston.

Deepwater authority to evaluate big offer

Casey said, and will be paid off when bond revenues are available.

Casey said Brown & Root Inc., which has already designed 40 percent of the offshore portion of the port, will act as project manager to push the amended application through the DOT.

Combustion Engineering Inc.'s Crest and Lummus subsidiaries have designed 40 percent of the onshore portion of the proposed port.

All professional services to the authority, appointed by Gov. Dolph Briscoe after Seadock folded March 31, are being made available on a contractual basis.

Saudis okay 750-mile peninsula oil carrier

By JIM LANDERS
The Washington Post

JEDDAH, Saudi Arabia — The Saudi government gave the final go-ahead Wednesday for construction of a 750-mile pipeline that will cut across the entire Arabian peninsula to link Persian Gulf oil wells with the Red Sea and establish a major alternate oil transportation route.

The strategic significance of the \$400 million project, scheduled for completion by 1980, is that it will free Saudi Arabia from its complete dependence on the Persian Gulf routes and thus diminish Saudi concern about security in the Gulf area.

"Saudi Arabia has only one export outlet," said Sheikh Zaki Yamani, the Saudi minister of petroleum and mineral resources. And this outlet, the Gulf, "can be blockaded," he added.

Petromin, the Saudi national oil company, was awarded the contract for construction of the pipeline from the eastern oil field terminal of Abqaiq to the Red Sea village of Yanbu. When completed, it will be able to feed tankers bound primarily for Europe with as much oil as is now flowing through the Trans-Alaska pipeline from the North Slope oil fields.

Yamani, in a speech last April at the University of Riyadh, warned that

GSA sales questioned

The Washington Post
WASHINGTON — The General Services Administration has been entering into contracts to sell surplus minerals and chemicals to selected companies at less than half the going market prices, resulting in potential losses to taxpayers of more than \$100 million, GSA auditors have found.

The auditors, in a draft report completed last month, said GSA planned to sell 80 million pounds of stockpiled lithium hydroxide, a chemical compound used in lubricants, at rates as low as one-third of going market prices to two companies.

Competitive bids were not obtained from other companies, said the auditors, and the loss to the taxpayers would amount to \$45 million.

Last year, GSA auditors reported that GSA, which also provides office space and supplies to government workers, had signed contracts to sell bauxite, titanium sponge and metallurgical manganese ore at \$105 million when the minerals and chemical compounds were worth \$235 million.

The auditors said GSA largely ignored last year's report. Ron Royal, the GSA official in charge of the sales, said he is delaying signing the lithium hydroxide contracts until the auditors' objections have been studied.

Royal said that, using a GSA formula for determining costs, it may be cheaper to sell the lithium hydroxide at prices below market value now, rather than selling smaller quantities at market prices over a period of as many as 80 years. That way, he said, the government would have use of the money immediately, reducing charges on its borrowing.

ENERGY OIL & GAS

Under Saudi Arabia's current planning, Yanbu will become one of the largest petroleum complexes in the Middle East by the end of the century. A liquid natural gas pipeline will run alongside the oil line to feed a \$1 billion gas fractionation plant. The crude oil line will feed two refineries with a capacity of 670,000 barrels per day as well as providing 1.6 million barrels a day of crude for export. A giant \$1 billion petrochemicals factory is also planned.

Petromin awarded construction contracts for the pipeline to SAIPEM, an Italian firm under the Italian national oil conglomerate ENI; Sedco, a Houston-based petroleum engineering firm; and Cat, a Lebanese engineering company. The work will be supervised by Mobil Oil Corp's Mobil Pipeline Co.

"This project is like building the Trans-Alaska pipeline through the desert," a Mobil official said.

Daytime temperatures in the regions the pipeline will cross reach as high as 125 degrees Fahrenheit.

the Soviet Union was following a strategy designed to secure a supply of Middle East oil for the future. The

Yanbu, today a sleepy fishing village of about 20,000 residents, is located 220 miles north of Jeddah across the Red Sea from the southern tip of Egypt. Current plans are to utilize the port for oil shipments to Europe via an expanded Suez Canal and the recently completed SUMED pipeline that parallels the canal route along its western side. Saudi Arabia exports 40 percent of its oil to Europe.

The troubled Horn of Africa lies well south of Yanbu.

DRILLING REPORT

ANDREWS COUNTY
John L. Cox No. 1 David Pasken; drilling 12,180 feet.
Amoco No. 12-1 University Consolidated; id 11,001 feet and waiting on completion unit.
Amoco No. 7-M Parker; id 12,400 feet, plug back total depth 7,682 feet, and shut in.
Amoco No. 3-4 University McFarland; id 4,535 feet and set 1-1/2 inch casing at total depth, waiting on cement.

Freshman senator mounting expensive campaign to beat back competition, stress canal opinion

By GLENN STEPHENS

RALEIGH, N.C. (AP) — Republican Sen. Jesse A. Helms, a conservative freshman still fighting the Panama Canal treaties, has mounted what may be the highest-priced campaign in North Carolina history to beat back a Democratic challenge in November.

Although Helms says he won't be disturbed even if he loses, the former Raleigh broadcaster already has raised — and spent — an estimated \$3.5 million. He had no Republican

primary opposition.

Much of the money raised on Helms' behalf has gone for overhead, including computer mailing lists to raise more money. Nationwide mailings have included appeals by former President Gerald Ford and others to help Helms beat back the challenge of more liberal Democrats.

His Democratic opponent, state Insurance Commissioner John R. Ingram, has promised to make an issue of Helms' campaign spending, a tactic he used to help engineer a stunning upset of former bank executive

Luther Hodges Jr. of Charlotte in last Tuesday's Democratic primary runoff.

Ingram, who trailed Hodges by about 14 percent in the first primary, waged a hard-hitting campaign in which he depicted himself as the defender of "the people" against insurance companies, banks and other special interests. He said he'll use the same issue against Helms.

"Every candidate tries to project himself as the people's candidate," Helms said last week. "And I remember my friend, Sen. (Hubert)

Humphrey, once told me that every Russian leader, as well as Fidel Castro, always claimed to be the people's candidate."

"We're all for the people, but to say you're the people's candidate is a good way to avoid discussing the issues and avoid really representing the people," he added.

A leader of the unsuccessful fight to block Senate ratification of the Panama Canal treaties, Helms has said he plans to raise the canal issue as an issue in the campaign, reminding voters it was the Democratic majori-

ty that spearheaded the pro-canal drive.

Ingram spent about \$60,000 compared to more than \$1 million by Hodges, son of popular former governor and U.S. Commerce Secretary Luther Hodges Sr., during the Democratic primary.

But he is expecting help from the national and state party organizations in the race against Helms, the state's first GOP senator in seven decades. "Helms is vulnerable," said Betty McCain, the state Democratic

leader. "The whole key is getting out the vote."

"The thinking on our part is there wasn't much interest in either one of them," Reece said, pointing to the small turnout in the primary. "Twenty-five percent doesn't look too good for the Democratic nominee, whoever he is."

Whatever the outcome, Helms says he will be satisfied. "I figure I can't lose," he said. "If I win the election, I get six more years in the Senate. If I lose, I get to come home to my grandchildren."

Funding increase proposed

Austin Bureau

AUSTIN—A \$5 million increase in funding for the Texas Department of Water Resources has been proposed by the Texas Water Development Board.

The agency—which oversees all matters dealing with water development, rights and quality—is submitting a request to the Legislative Budget Board for the 1980-81 biennium totalling about \$47.5 million which compares to the agency's 1978-79 biennium budget of \$42.7 million.

The chief item showing an increase is a 6.8 percent salary boost per year across-the-board for these state employees.

The so-called exempt salaries of agency's top bureaucrats apparently are not included in the across-the-board 13.6 percent biennial pay hike. However, executive director Harvey Davis current annual \$45,200 salary is proposed for an increase to \$48,300 in 1980 and \$51,600 in 1981.

The agency justifies the 6.8 percent proposal for classified personnel by tying it to the rate of inflation, while salary boosts for top agency officials, including the three members of the Texas Water Commission, "have been made consistent with an analysis of cost of living increases."

Other significant budget increases are proposed in the following areas:

•The Texas Water Commission, including program administration and the office of hearing examiners—\$790,513 in 1980 and \$840,067 in 1981, compared with \$744,096 in 1979.

•Office of General Counsel, including significant increases for water rights adjudications and permitting—\$681,086 in 1980, \$714,914, 1981, compared with \$579,270 in 1979.

•Water resources planning and development, including estuarine and environmental planning and weather modification—\$2,217,291 in 1980, \$2,325,892, 1981, compared with \$1,815,426 in 1979.

Areas of the agency's programs receiving minimum increases or decreases include: Field operations from \$2,880,523 in 1979 to \$2,589,203 and \$2,725,454 in 1981.

•Water quality planning, from \$1,001,608 in 1979 to \$1,098,973 in 1980 and \$1,150,760 in 1981.

The agency is proposing increases in its graphic arts budget from \$940,601 in 1979 to \$1,005,416 in 1980 and \$1,066,268 in 1981.

Bottom line totals are \$23,197,031 in 1980 and \$24,388,506, 1981, compared with the current year's budget of \$20,939,195 and the 1979 appropriation of \$21,772,907.

Commission to vote on modifications

Austin Bureau

AUSTIN—An application by Big Spring State Hospital for approval to make modifications to correct fire safety deficiencies is set for the June 29 voting session of the Texas Health Facilities Commission.

The application is one of several set for that date.
