OFFICIAL CITY PAPER OF PERRYTON, TEXAS

OFFICIAL COUNTY PAPER OF OCHILTREE COUNTY

VOLUME VI.

PERRYTON, OCHILTREE COUNTY, TEXAS, FRIDAY, APRIL 20, 1923.

NUMBER 11.

PERRYTON GUNNERS LEAD PANHANDLE LEAGUE

The members of the Perryton Gun Club are at present leading in the race for supremacy of the Panhandle Trap Shooters Association. At the shoot on last Sunday afternoon, the five high guns broke 120 birds out of 180 shot at. Clyde Cofer of the White House Lumber Company was high man with a perfect score, getting a straight 25 run. Following are the five high men:

Cofor	25
Edwards	24
Correll	24
Levellan	24
Correll	24
Nash	23
The individual averages for the season to date are as follows:	
SA BK Pch.	
Cofor	100 92 .920
Edwards	25 23 .920
Correll	100 90 .900
Nash	100 90 .900
Levellan	100 86 .860
Brandt	75 63 .840
M. Coffee	100 83 .830
Correll	100 83 .830
Smith	50 41 .820
Habbs	100 81 .810
Lane	100 79 .790
G. Coffee	100 76 .760
Tape	75 57 .740
Thompson	75 55 .733
Dunlavy	100 73 .733
Scott	75 54 .706
Tenny	50 30 .600
Wilbanks	25 15 .600
Williams	50 28 .560
Myers	25 8 .320
Green	25 2 .080

MONEY ON HAND FOR SECURITY DEPOSITORS

Checks to all persons who had non-interest bearing deposits in the defunct Security State Bank will be mailed from Austin this afternoon, according to information received by heads of State banks in Fort Worth. The money to pay the holders of these deposits comes from the State Guaranty Fund.

A total of \$781,000 will be paid out to the depositors. The Security Bank closed its doors last November and State banking authorities have been in charge since.

Money to cash the checks sent out from the State guaranty fund has been received from the same fund by other State Banks in Fort Worth. The checks will be cashed by any of the State Banks here. The fund will pay 100 cents on the dollar.

"A bank failure in Fort Worth is a rarity and it is still more rare to have the depositors repaid 100 cents on the dollar," declared Marcus Briggs of the Fort Worth State Bank, in announcing the guaranty fund action Friday.

"During the last two years the guaranty fund of the State has paid out \$10,000,000 in this way. State banks have stood the test well," Fort Worth Star Telegram.

DISTRICT COURT

Advance-Rumley Co. vs. J. P. Bolinger, et al, verdict for plaintiff. R. L. Hanna vs. Willie R. Clark, et al, verdict for plaintiff.

First National Bank of Booker vs. Lucy Meek, verdict for defendant. State of Texas vs. Jack Symons, verdict of acquittal.

Hattie V. Steiner vs. R. H. Francis et al, verdict for plaintiff.

Lena Roembach vs. R. H. Francis et al, verdict for plaintiff.

State of Texas vs. Arthur Selby, verdict to answer questions by State Jury, fined \$100.00 and costs. Fred Butler et al vs. N. B. Fisk et al, verdict for plaintiff.

L. L. PRICE RE-ELECTED FOR ANOTHER SCHOOL YEAR

At the regular meeting of the Board of Perryton Independent School District on April 10th it was voted unanimously to retain the services of Prof. L. L. Price, for another year. When Mr. Price was called upon by the Board to hear the result of the vote the members further expressed their sentiments by hearty applause.

We look to the future of our school with hope and confidence, and that both town and country will continue a long step in advance during the coming year.

BIG WELL BROUGHT IN AT SAYRE

Another big well was brought in last week at Sayre, Oklahoma. This well which is owned by a small company, is located 4 1/2 miles southwest of Sayre and when put on test, flowed 105 barrels in 35 minutes. Every day sees the oil field extended closer to us and the next big strike will be made by the Empire in the Perryton field. From all reports, Sayre was transformed overnight from a sleepy country town to a bustling little oil city. The eyes of all the big oil men are centered on the drilling of our well and a great many of them are very confident that this will be one of the big wild cat discoveries of the year.

RESOLUTIONS

Whereas, On the morning of the 21st day of February, 1920, the messenger of death passed our sentinel and invaded our Chapter and severed the link from our golden chain, summoning from time to eternity Bro. D. P. Tarbox, one of our beloved members, We shall never again enjoy his genial companionship and wise council. His memory will ever be kept fresh and bright in our hearts, as he was loved by all, and therefore be it

Resolved, That it is with sorrow we thus part with our brother. We would emulate his virtues and bow in humble submission to the power of one who "Doeth all things well," hoping for a meeting in the great Chapter of a never ending eternity, where with hands clasped in his, we shall take up the links of the golden chain now severed. Be it

Resolved, That the sympathy of this Chapter be extended to the sorrowing relatives of our brother and their bereaved families.

Resolved That we as a Chapter so conduct ourselves, that when our summons comes, the golden chain will be unbroken in our home on high.

Resolved, That these resolutions be spread upon the minutes of our Chapter and that copies be sent to the families of our departed brother and also to our home papers for publication.

Resolved, That We'll bow before our Father's will, We'll bid our throbbing hearts "be still," We'll watch this beacon shine from far;

Tis our beloved Eastern Star.

"Twill safely guide us through the night,
"Twill lead us to the glorious light,
"Twill join the links now severed here—
They make our Eastern Star more dear.

MRS. BERTIE LANCE,
MRS. MATTIE NASH,
E. C. CARVER,
Ochiltree Chapter No. 161, O. E. S.

EASTERN STAR INSTALL LODGE AT SPEARMAN

A number of the members of the Perryton lodge of the Order of the Eastern Star went to Spearman on Monday night of this week to assist in the installation of a new lodge at that place. The new organization was started off with a membership of about thirty. Those who went report that they were treated royally by the Spearman folks. The following made the trip:

Mr. and Mrs. J. N. Conley, Mr. and Mrs. J. B. Nash, Mr. and Mrs. E. C. Carver, Mr. and Mrs. L. L. Lance, Mr. and Mrs. Edwin Beever, Mr. and Mrs. Chas. E. Whippo, Dr. and Mrs. O. E. Blank, Miss Ruth Allen, Miss Howard, Mrs. Fred Butler, Mrs. John Klapp, Mrs. H. C. Coffee, Mrs. John McLarty, Mrs. J. C. Reagan, Mrs. Clyde Russell, Mrs. Thos. Thompson, Mrs. Imogene May.

BAPTIST CHURCH

Rev. Pennington of Maine will preach at the Baptist church in Perryton on next Sunday morning and evening. Everybody is invited to attend. Rev. Pennington is not a stranger to Perryton folks. Come out and give him a good congregation.

Mr. and Mrs. John W. Hall left Sunday for their home at Waynoka, Oklahoma.

GRAND JURY RETURNS FIVE INDICTMENTS

The Grand Jury slipped one over on some of the boys last week when they took a recess on Thursday. Several who were hiding out to avoid appearance came back to town thinking that the Jurymen were through, and were very much surprised when they were summoned to appear. They were in session Monday, Tuesday, Wednesday, Friday and Saturday and returned a total of five bills, four felonies and one misdemeanor. Two of the bills were against Jeff Neal, living east of Perryton, one bill for making and one for selling intoxicating liquor. A bill was returned against Mrs. Neal charging her with passing bad checks. Neal has been arrested and bond given for his appearance at the next term of court. Ivan Eggleston was indicted and has been arrested on a charge of perjury. The authorities have not made public the name of the party who was favored with the fifth indictment.

SIX YEAR EXPERIENCE IN RAISING BROOM CORN

Below we give a table showing the full details of a six-year period in broom corn production. These figures were furnished us by Mr. Mark Webber, and cover the time of his venture in raising of broom corn.

If you will give this table your careful attention and the averages that we deducted from it you will get some reliable information on the status of this class of farming.

Here is the able as given us, and it is correct in every detail covered by it.

Under the heading "amount," the number before the decimal point is tons and the amount after is pounds. Yr. Acre Amt. pr. ton. Ex. Net Pft

1916	25	3,440	\$180	\$47.12	\$399
1917	50	7,860	200	78.48	903
1918	50	7,160	305	64.10	943
1919	50	6,163	150	78.23	589
1920	44	14,240	65	53.84	157
1922	46	8,154	165	48.89	1019
6 yrs	265	48,017		370.66	5010

By this table you will see that the following are the averages for the full six years:

Average acres, 44 1-6.
Average tons, 8.218.
Average price per ton, \$177.50.

The 1921 crop was a seed crop and does not furnish any brush for this estimate.

The item "Net Profits" is in fact not strictly correct for the reason that the teams, their feed and the labor of Mr. Webber is not estimated and deducted from the totals. If this were done there would not be nearly so large an amount in this item.

Sandy loam is the most productive soil for broom corn. All seed should be graded and weigh 48 lbs in wheat tester. Plant a quart of seed to each acre of this best class and you will get a even product. Mr. Webber says that he plants his own seed the same as he sells and that last year he had a crop free from defective brush. He has done a good business in both the raising of brush and an excellent type of seed. He says that when better seed is grown he will grow it himself. The Vickers Grain Company of Liberal is handling his seed this year.—Tyronc Observer.

METHODIST S. S. GOAL 300

Last Sunday there were 241 present with good lessons, and an offering of \$24.10.

If we can do that well on just an ordinary day with no extra pressure, why not have 300. Let everyone do their best to make this great Sunday school reach and bless all who should come under its influence.

W. A. WITCHCOCK, Pastor.

A FINE RAIN

This section was visited by a fine one and three-quarter inch rain on Thursday last week. The rain came down steady and every drop soaked into the ground. This puts the fields in fine condition for spring work and it will also help the wheat and other grain crops. Prospects for a wheat yield are fairly good although it will be far from a normal crop. We are predicting a bumper barley crop.

The Herald \$1.50 a year in advance.

GRAND JURY ORDERS AUDIT OF COUNTY BOOKS

At the meeting of the Grand Jury last week, it was ordered that an audit of the County books and accounts be made. An auditing committee consisting of J. F. Klapp, C. B. Rogers and J. T. Carlson was appointed by District Judge Ewing. It appears to us that this was a good move on the part of the Grand Jury. We believe that the books are correct and that this audit will harm nobody. At least it will soothe the aches of some of our professional "grippers."

MRS. T. S. McLARTY

Died, at her home south of Perryton, Wednesday, April 11, 1923, Mrs. T. S. McLarty, at the ripe age of 71 years, 1 month and 15 days. "Smooth the locks of silver hair, On our mother's brow with tenderest care.

Gather the roll in final fold Around the form so still and cold; Lay on her bosom, pure as snow, The fairest, sweetest flowers that grow.

Kiss her and leave her our heart's delight; Her pain is over, she sleeps tonight."

Madara Drucilla Winn was born on February 24, 1852, in Paulding County, Georgia. When a child she was converted and became a member of the Methodist Church. On December 20, 1868, she was united in marriage with T. S. McLarty. To this union were born eleven children, seven of whom survive. The husband preceded her to the grave about two years ago. The surviving children are W. W. McLarty, C. E. McLarty, G. T. McLarty, Mrs. J. H. Lovell and Mrs. W. M. Glasgow, all of this county; John G. McLarty of Holland, New York and Marve McLarty, of Wichita, Kansas. All of the children except John were present at the funeral. Besides the children, the deceased is survived by twenty-three grandchildren and four great grand-children.

Mrs. McLarty was one of the pioneer citizens of this county, having moved to this country in 1898. Our county and its hospitable people ever held a warm spot in her heart. It was here that a great many years of her life were spent. All the care and love that skilled physicians and anxious household could devise and apply for her comfort and assistance was brought into play, but the fiat of Him who rules our incomes and outgoings had been issued and after a brief struggle, despite the prayers and entreaties of all who knew and loved her, the sufferer's spirit took its flight to that home the Christian believes is the fulfillment of the life everlasting.

Rev. W. A. Hitchcock, pastor of the Methodist church, had charge of the funeral services which were conducted from the home on last Friday afternoon, the body being laid to rest in the Ochiltree Cemetery. The Herald extends their heartfelt sympathy to the sorrowed relatives in this hour of trial.

A PROCLAMATION

By virtue of the authority vested in me, and following established custom,

I do hereby proclaim and declare that the week beginning Monday, Apr. 23, 1923, shall be "Clean-Up Week" in the City of Perryton.

It is an old but true saying, that "Cleanliness is next to Godliness," and it behooves every citizen of our city to see that it is kept a clean, sanitary city. The city will not pay any part of the expense, but will try to make available necessary wagons, etc., at reasonable charges.

We expect, and like clean homes; clean, earnest unselfish efforts of public officials; clean lives in our people; and we must not neglect another very important factor in the proper growth and development of our city, and that is clean streets, alleys, vacant lots and all other places.

Let us get busy and clean up, brighten up, and in every way make our city the cleanest and most attractive city in the great Panhandle of Texas. A place other people would like to live in, and where we who have homes will enjoy ourselves more by living in a clean, happy, and contented atmosphere.

C. E. FORBES Mayor.

TOPPERWEIN, GREATEST OF ALL SHOOTERS, TO BE HERE

"Ad" Topperwein, the greatest of all trap shooters, who has been out of the game for more than a year, is listed to appear in a coming shoot of the Perryton Gun Club. Topperwein is a member of the Winchester team of trap and rifle shooters and is being sent here by the Shooting Promotion Division of the Winchester Repeating Arms Co. as a treat for local shooters. As much has been written about Topperwein in recent years we take it for granted that everyone knows of his ability. Those who do not can get a line on him by watching him in action when he comes here on Monday, June 25th.

COTTON IN NORTHWEST TEXAS

Substation No. 8, of the Texas Agricultural Experiment Station, is located on the High Plains three miles east of Lubbock, Texas. It's midway between Sweetwater and Amarillo, Texas. Altitude is 3,240 feet.

The cotton production of the counties which are wholly or partly on the plains has increased from 6240 bales in 1909 to 132,489 bales in 1919, or about fourteen hundred per cent. The counties having the largest increase are Crosby, Lubbock and Floyd.

At the present time this is the principal cash crop in the South Plains counties, being exceeded only in value by grain sorghum crops.

Cotton has proven to be one of the most drought resistant crops grown in this section. The average rainfall at this point for the period for which records are available is between 20 and 21 inches.

In the year 1924 a variety test was made and the Mebane Triumph was among the best varieties only taking 54 bales to make a pound, 10 stalks to make a pound, 1778 pounds of seed cotton to acre, and 604 pounds of lint—34 per cent lint—being the yield.

For nine years average Mebane holds second place, with an average of 358 pounds of lint per acre. On a 4-year average it has a record of 418 pounds of lint, and on a 3-year average it has made 437 pounds of lint cotton per acre.

If yield alone was the only factor to consider, the Burnett variety is outstanding. It lacks storm resistance, which does not warrant its recommendation for general and exclusive growing in this section in its present state of development.

On account of its consistent early maturity in this section, however, it can be used very profitably when late planting is necessary at a date too late to be safe with the later maturing varieties. It will be valuable for growing farther north and west in the cotton area in this section where maturity is of first importance.

Mebane has yielded consistently above the average for a long period of years. It has stood the test of time among the growers and held its place as a popular variety in this section. Until some other variety proves to be superior or more profitable, Mebane can be recommended as a safe and reliable variety for general planting.

Among the longer staples and better varieties of cotton, the Acala is among the outstanding varieties with a staple of 1 1-16 inch long. If anyone wishes information about cotton raising on the Plains send to Texas Agricultural Experiment Station, at College Station, Texas, for Bulletins No. 288 and 299.

There has been quite a bit of discussion about cotton here in Ochiltree and Beaver counties. Everybody has his views and should have. I for one do not care to make a cotton country, but under the present conditions, it seems like it might be a good time to plant a small acreage. There is no question about it growing here. There are the improved varieties that will mature here much earlier than it did here in the earlier settlement of this country. At that time people had not begun to improve a cotton adaptable to this climate.

Any kind of a crop will follow-up cotton. It will be almost like summer fallowed ground to sow wheat in this fall. The reports on cotton show that we are on the verge of a cotton famine, and the boll weevil will sure do his part in the cotton belt this year as they had such a light winter

METHODISTS GO TO DISTRICT CONFERENCE

Rev. W. A. Hitchcock of the Methodist Church of this city left Wednesday or Amarillo to attend the sessions of the Panhandle District Conference, which opened at the St Paul's Methodist Church in the latter city Wednesday evening and will continue until Friday night. The following from here are attending the Conference as delegates: Mrs. W. D. Christopher, Misses Mary Garrett and Eula Mae Hitchcock and Roy Christopher.

TRADE AT HOME

Communities grow in proportion to the support given them by their residents. You cannot boost Perryton by trading elsewhere or placing business in other localities that could be placed at home.

Folks who try to save pennies oftentimes lose dollars. The home merchant is generally honest and offers honest values for your money. He can't afford to be otherwise. He depends for his living from the community and must give the community what it wants at a fair price.

When you are tempted to trade outside and purchase "just as good merchandise at greatly reduced prices," you should think twice before buying. If you are "stung" by your home merchant he will no doubt be glad to make an adjustment. The out-of-town merchant is not personally interested in you. He is intent on selling you this once and probably does not expect to sell you again. He does not have to take great care in preserving your good will.

More than owing it to your community to trade at home, thus keeping your money at home, you should give the home merchant first opportunity to serve you, from a sound economic standpoint.

BETTER NOT SAY IT

Bad news travels faster than good news. There is an old saying, "No news is good news." Let a man be converted at a church service and there is not much of a stir, but let a resident be convicted of some crime and the news leaps by word of mouth from one end of the community to the other.

Too thoughtlessly unkind we sometimes are when neighbors of ours suffer misfortune! Troubles are bound to come to us all in some shape or form and what we say about our friends and acquaintances today may apply to us tomorrow. News is no respecter of persons.

We are prone to consider the ways of others not our ways when we should be watching our own step. What folks say of one another sometimes hurts more than anything they could have done. News, either good or bad, grows and becomes exaggerated and distorted with peddling. When the news is good it makes no material difference how it is exaggerated or distorted—it can never do anyone positive harm. But bad news given wings, may bring sorrow and ruin upon people who certainly are not deserving of punishment beyond the penalty of their mistake.

More charity for others will mean more charity for ourselves and we will gradually come to take a keener delight in reporting something good of some person than something bad. Good is constructive, bad is destructive. Just before you are about to let out a bit of "bad news," stop and think a moment. See if you can't think of something good to say in place of it. The chances are ten to one that you can and that you will.

Use The Herald For Your Wants.

that the pest will be in greater numbers than ever.

We will soon know that cotton has gone up, from the price we will have to pay our merchants for cotton in the finished product.

I was able to secure my cotton seed at Canadian, Texas, and they said they would have seed to let the people in this territory have to plant.

I signed up for 20 acres but bought seed to plant 30. If you want to plant some cotton come in to the Farmers & Stockmens Bank and sign up, so we can get the required acreage to justify a gin at Perryton.

J. W. FERGUSON.

HONOR IN BUSINESS

Henry Ford has just handed over four million dollars to the creditors of the old Lincoln Motor company. This was a debt which Mr. Ford did not contract. For the four million dollars, Mr. Ford gets absolutely nothing material. He bought the Lincoln Company at auction, on a contract which specifically exempted him from any responsibility for the company's bad debts. The company had gone bankrupt. It was sold for what it would bring in the market, and the money received from the sale was distributed among the creditors in the usual legal manner. Mr. Ford paid eight million dollars for the plant. That was considered a good price. This sum furnished to the non-preferred creditors forty-seven and one-half cents on the dollar for their bills. The matter was closed.

Legally, it was closed. But not in Henry Ford's business ethics. Mr. Ford has just put up the four million necessary to pay the creditors of the old defunct company in full. Nobody is more surprised by this action than the aforesaid creditors of the Lincoln Company.

The whole Lincoln deal was a matter of honor on the part of Mr. Ford. The men at the head of the Lincoln company were old friends of Mr. Ford. He had a personal affection for them. He said they were good, honest manufacturers, and deserving of success. They did not win success, however. Mr. Ford examined into the causes of their failure and was convinced that the fault did not lie with them. Mr. Ford did not want the Lincoln works. He had no use for it. He was not in the business of

manufacturing high-priced cars. But he bought it anyway, just to do a good turn for his old friends. He maintained these honest men in active charge of the manufacturing business but put enough capital behind the concern to make it go.

So this little flyer in friendship and business honor has cost Mr. Ford twelve million dollars that the world knows about. The chances are that it has cost him much more than that. But even twelve million is a ponderable sum, even in the calculations of a Ford.

The Chicago Tribune described Mr. Ford as an ignorant idealist. An idealist he certainly is. When this old world reaches a stage of civilization commensurate with its present pretensions to civilization, the Ford code of ethics will be the prevailing one in business, small and large. Or, call it the Christian code.—Wichita Eagle.

MIDGET MOTORCAR CARRIES FAMILY

This midget motorcar, invented by A. V. Roe, an Englishman, is big enough to hold his family—but small enough to go through an ordinary doorway and light enough to park on the back porch or even to take up to one's apartment on a good elevator. The car is built on a motorcycle chassis, with two tiny "trailer" wheels that keep it upright. Handlebars takes the place of a steering wheel.

SAVE AUTO FROM WINTER TROUBLE

Care of Finish, Engine and Battery Among Most Important Items in Cold Weather.

HOT WATER QUITE INJURIOUS

Heat is One of Vital Factors in Driving During Severe Weather—Use of Radiator Shutter or Cover is Favored.

Protecting the finish of a highly polished car and conserving the heat energy generated by the motor are two highly important things to any motorist.

Another highly important feature of winter driving is the care of the storage battery in the car.

The finish of a car may be exposed to serious damage during winter, due to the fact that mud and water frozen on the paint dull the finish and cause the paint to chip. During the winter months extreme care should be taken to keep the finish free from dirt. Contrary to popular belief, hot water should not be used in cleaning a car, as it is equally as injurious as mud and ice. If it is not possible to take the car into a warm place for washing, where the ice will thaw and can be easily removed, lukewarm water may be used without injury to the finish.

Heat Vital Factor.

Heat is one of the all-important factors in winter driving. During the summer months the average driver has little trouble with getting his motor warm enough to operate smoothly and economically, but during the winter it is difficult for some cars to warm the motor enough to insure this efficient operation.

As a result gasoline passes by the pistons and gets into the crank case; the gasoline does not give its maximum power and the oil is not heated to such a point where it will lubricate the bearings and gears as it is intended to do.

This passing of gasoline to the crank case may be considerably reduced by the use of a radiator shutter or cover for keeping the engine warm during idle periods when it may be left standing out of doors or in unheated garages. Numerous devices are being marketed for this purpose, ranging from a waterproof covering to an automatic control shutter. A hand-operated shutter which serves the purpose of conserving the heat of the engine to a very great extent and is very economical to install can be purchased from any reliable accessory dealer. There are also on the market several devices which are quickly and easily installed and prove economical heating units.

Battery Important Factor.

The storage battery of a car is an all-important feature of the operation and one too frequently neglected. Care should be taken at the start of the cold weather to see that it is properly charged. Any service station will be glad to give you this information.

During the winter months, due to the short days, the lights of a car are used a great deal more than in summer. The starter, also, is used considerably in getting the car running when it is cold, and this results in drawing a great deal of power from the battery.

For these reasons the battery discharges more quickly than in summer, and it should be remembered that a fully charged battery never freezes, while a run-down one will do so easily. Freezing of a battery will ruin it and cost the owner a large repair bill.

VIBRATION CAUSE OF NOISE

Where Bolts Become Loose at Base Wrench Should Be Applied to Make Everything Tight.

If a motor is subject to considerable vibration there is danger of the bolts coming loose at the base. A wrench should be applied occasionally to make sure that everything is tight. If this is not attended to, almost anything may happen, from oil leakage to wrecked engine.

AUTO GAS POISONING DURING COLD SEASON

Motorists Are Warned of Danger From Carbon Monoxide.

There is an Ever-Present Insecurity to Owners of Cars, More Particularly When Closed With Their Machines.

A writer to the New York Times calls deserved attention to the marked difference in the danger from fumes of illuminating gas as contrasted with the automobile carbon monoxide gas.

"There is a vast difference," he says, "between illuminating gas and the escaping exhaust fumes from an automobile while the engine is running. Properly harnessed, escape from death is easy while using illuminating gas. As to the latter, no escape seems possible even in the open air. There is an ever-present danger to operators of automobiles, more particularly when closed with their machines.

"The attention of the New York board of health has been called to the danger that exists from carbon monoxide gas, particularly to those who sit on low benches along pleasure drives. Examination by blood tests of pleasure-seekers who have suddenly become ill from unforeseen circumstances has proved that exhaust gases from passing automobiles are responsible for their condition. This may appear fishy, but is nevertheless a reality.

The danger is materially increased when the winter months naturally bring persons in close contact with the fumes while automobile engines are started in tightly closed garages, too often the result of carelessness on the part of those who have not been instructed in the peril of such a proceeding.

The general public may be ignorant of the fact that, according to prominent medical authorities, the continued breathing of even extremely weak mixtures of carbon monoxide and air may cause injury to the kidneys, heart, brain and nerves. Automobile manufacturers are fully aware of this danger. It has been stated that the various organs of the body can be seriously affected by poisoning from breathing the air containing so small a quantity as 1-1,000 part of carbon monoxide.

"How many automobile owners know that carbon monoxide is a colorless, odorless, tasteless gas? It is extremely poisonous, because it combines with the red coloring matter of the blood more readily than does oxygen. Exposure to as little as 5 per cent causes headaches. The dangerous symptoms come without warning."

Proper Steering Grip.

The proper way to grip the steering wheel is to straddle a spoke with the fingers of at least one hand, as shown. This is a safe method, especially when driving fast or on a slippery road.

AUTOMOBILE GOSSIP

There are more than 50 parts of a car that need lubrication.

A tire should receive as much attention as any other part of an automobile.

Keep springs tight at the axles; looseness here causes most spring breaks.

To obtain one barrel of gasoline, the oil industry has to produce nearly four barrels of crude petroleum and by-products.

Before driving away in a car that has been blocked on a steep grade, throw the loose stones or other material off the road. They are dangerous to drivers coming along later.

NOTICE TO STOCKHOLDERS

There will be an annual meeting of the stockholders of the Perryton Equity Exchange at 10:00 a. m. on Tuesday, May 1, 1923, in the Court-house at Perryton, Texas, for the purpose of electing three Directors and making any necessary changes in the by-laws, also any other business that may come before the meeting. We urge you to all be present as we will have something of interest for the day including a talk by our President, Mr. Leroy Melton. A free lunch at noon.

FARM BUREAUS

In a spirit of optimism and an at-
titude of genuine satisfaction farm-
ers and business men throughout the
country are expressing their appre-
ciation of the work done by Farm Bu-
reaus wherever these organizations
have been established.

One act alone that Farm Bureaus
have been instrumental in putting over
is worthy of their organization—the
forming of co-operative market-
ing associations. In starting soil
building programs in every commu-
nity, Farm Bureaus are also doing a
great constructive work of much value
to every farmer. Membership in
the Farm Bureau being a family prop-
erty, one can expect some real ac-
complishments along specialized lines
such as better preparation, more
thorough cultivation, more good live-
stock and legislation favorable to the
furtherance of agriculture and its
needs.

It is well known that those who
are not members of the Farm Bu-
reau have been benefited by it. They
have not benefited to the extent of
the members but as in every other
case the co-operative association has
raised the price level and the outside
market prices for their products.
These things the thousands of mem-
bers will testify.

The good done by the Farm Bu-
reau is only a drop in the bucket to
what remains for them to do and
what they will do. The farmer is
soon to come into his own. Organiza-
tion is the force which will place
him there. The business man is not
the farmer's enemy, for the farmer
must prosper in order that the busi-
ness man may make money. It's a
get together proposition and associa-
tion means friendship and understand-
ing, two mighty strong factors in
themselves. A better era is just
ahead. But every farmer must do his
part to reap the full benefits.

Many squibs have been written on
the approach of spring so we will be
different and not say anything.

The United States will soon have
to appoint a foreign bill collector if
things get much worse. Who wants
the job?

What can the Post Office system
do without WORK? This will surely
be a NEW experience! What's in a
name anyway?

Charlie Chaplain's greatest comedy
is now being produced with Pola
Negri as his leading lady.

Until Sam hopes to see the next
war from a cheap bleacher seat.

An evangelist declares that there
will be plenty of liquor in hades, but
but not enough people are telling the
bootleggers to go there.

THE AGE OF WONDERS

We are living in the age of wond-
ers. Where ten years ago folks would
scoff at a new idea and say, "Impos-
sible," they now consider it serious-
ly and admit, "Well, that might be
done. Nothing is really impossible."

Especially does this seem true of
the wireless. The latest discovered
use of wireless is its ability to make
the deaf hear. Many people who
have never heard any sound have
listened to music and the human voice
for the first time in their lives, be-
cause the ear drums were effected by
the finer vibrations of wireless
when the ordinary tuning fork vibra-
tion made no impression.

In a most remarkable book, "A
Dweller On Two Planets," dictated by
Phylas, one who lived on this earth
12,000 years ago, through the medi-
um of automatic writing, we learn
that wireless was developed beyond
our present conception by a civiliza-
tion far superior to the generation of
our day. In ancient Atlantis an in-
strument called the "naim" enabled
one to see distant events as they
transpired and to talk face to face
with friends, though thousands of
miles separated their physical bodies.

We are about to rediscover this re-
markable wireless mirror. At the
present time, Edmond Belin, distin-
guished French scientist, is working
on an invention which he calls the
telephoto device, that when perfected
will equal the "naim," product of
forgotten civilizations.

Nicola Tesla, American electrical
wizard, is also experimenting along
the same line and says that the means
of seeing by wireless as well as hear-
ing can and will be accomplished with-
in a short time.

Imagine sitting in your home and
seeing some world event take place
as vividly as if you were actually
present, even to the hearing of the
things that transpire. Distance is no
barrier. The device will work at a
distance of five thousand miles as easi-
ly as five miles. The vibrations will
pass through the earth's surface un-
broken.

This is a subject which would stand
columns of writing and not decrease
in interest. We are led to make an-
other worn expression at the future
possibilities of our world today.
"Will wonders never cease?"

Memoirs now being all the go, a
book entitled, "My Twenty Years
Among the Poles," is being written
by a well known telephone lineman
at Sudbury, Mass.

Howdy friends! Can you beat the
boob who inquires if they sell cows
on the stock market.

Mother and daughter walking on
the boulevard see young lady with
unbuckled galoshes flapping in the
breeze. Little daughter says, "Mam-
ma, is that one of those bootleggers
that papa talks about?"

Judge Bumble thinks that society
is entirely to blame for all crime. In
other words, the only innocent
people are those who violate the law.

Despite the fact that Indiana soil
lacks sufficient iodine, it raises excel-
lent corn. Thought iodine was a
corn preventative, not stimulant.

ALFALFA NEWS

Several were absent from school
Thursday on account of the rainy
weather.

Several in our community have
been sick with bad colds this week.
Bobbie, the little daughter of Mr.
and Mrs. H. M. Small, had her ton-
sils removed while in Amarillo last
week.

Several from our community have
been attending court this week.

Alice Smith and George Coleman
were absent from school Friday.

B. L. Drake, Mr. and Mrs. Frank
Cox and daughter, Annabel, and Sam
Handly and Miss Clara McDougal
spent Sunday with Mr. and Mrs. O.
T. Glasgow and family.

Merle and Ardath McLanahan
spent the week end with Mrs. Frank
Horton.

Marie Horton is spending this week
with Merle and Leona McLanahan.

Charley and Nealie Dutcher are vis-
iting in Texhoma this week.

Ted Cloud, George Seitz, and Ly-
man McLanahan spent Saturday eve-
ning at Dutcher Bros.

O'Betra and Virginia McLanahan
spent Sunday with Edna Wilkinson.

Mr. and Mrs. Val McLanahan and
George Seitz spent Sunday evening
with Mr. and Mrs. Ray Wilkinson.

Mr. and Mrs. Horace Small and
daughter, Bobbie, visited at Mr. and
Mrs. George Jackson's, Sunday.

R. M. Handly and Sam Handly
made a trip to Spearman, Saturday.

We are commencing to practice
on the program to be given the 11th
of May.

R. M. Handly is visiting with Sam
Handly this week.

WILL DO WELL TO AVOID
ALL ADVERTISING STUNTS

Illegitimate and worthless adver-
tising schemes are the greatest detri-
ment to real newspaper advertising
success. Every dollar put into worth-
less advertising schemes to "help
somebody" is a loss to legitimate ad-
vertising and brings the newspaper
business in disrepute. The smaller
the town the more easily business men
are duped—the real business man in
the larger cities has long since discon-
tinued the practice of giving his mon-
ey to every scheme that is presented.

All schemes are charged up to legiti-
mate advertising. Large newspap-
ers receive from \$1.75 to \$3.50 per
inch for their advertising while the
smaller newspapers receive 25 cents
to 50 cents per inch. The production
of this advertising under present con-
ditions is nearly the same, hence the
wages paid cut a great figure in the
success of the small town newspaper.
Real live business men in the smaller
towns should hesitate before they
give up their money to illegitimate
advertising schemes, especially when

Abstracts

the Public Records"
SHANKS & KLAPP

it will do them no good and irrepar-
ably injure community building and
advancement. In fact newspaper ad-
vertising is a real business builder
and reaches out into new fields.—J.
P. Johnson in Fourth Estate.

In this free and democratic coun-
try almost everybody is willing to
treat members of the upper class as
equals.

Those Egyptian perfumes that last-
ed 3,000 years must be a better brand
than the modern kind that carry 3,000
yards.

France and England still stand in
a close embrace. Neither one dares to
let go.

If France intends to loot Germany
as a measure to recover her repara-
tions, where does America, England,
Italy and some of the other allies
come in?

Grandma is truthful about most
things, but after she has taken care
of little grandson all day she just will
tell his parents that he has been good
about minding her.

Lay A Little Aside Each Week

You can save something, and the amount
you save is not so important, as the fact that
you are saving systematically.

Start this week. The habit will soon
grow on you, and you will be agreeably sur-
prized at the amount you are drawing inter-
est on at the end of the year.

This plan is working with lots of people
who could never save anything before they
tried it.

DAIRY

SUGGESTIONS ON DAIRY CALF

Great Care and Attention is Necessary
to Raise Animal Successfully
on Skim Milk.

In dairying the farmer should
raise his own calves. Many farmers
are not successful in raising them on
skim milk. Whole milk may produce
the best calf, but not necessarily the
best cow. As good an animal can be
produced on skim milk as can be
produced on whole milk, but greater
care and attention is required in pro-
ducing the former.

The calf should nurse its mother
for the first few days, after which it
should be removed and fed by hand.
Whole milk, warm and fresh from
the mother, should be given for ten
days or two weeks at least. Ten to
twelve pounds per day in two or three
feeds should be given at first, and
the length of time that it should be
continued depends upon the strength
of the calf. Ordinarily ten days to
two weeks will be required to make
the change from whole milk to skim
milk.

Gradually substitute skim milk for
whole milk, increasing the former
until the whole milk is entirely re-
placed. This may be a week, or it
may be a month. Skim milk should

Teaching the Calf to Drink.

be warm and sweet when fed, as cold,
sour milk is the greatest cause of
scours. It may be fed for six or seven
months, depending mainly upon the
supply. It should be given until the
calf is five months of age at least.—
Extension Service, Colorado Agricul-
tural College.

SMUTTY SILAGE FED SAFELY

No Harm Follows Test Made by Ex-
pert in Feeding Tainted Material
to Holstein Heifer.

Smutty silage can be fed to live
stock with no danger of ill conse-
quences, says T. W. Gullickson of the
dairy husbandry division at University
farm at St. Paul. Not so long ago
many inquiries were being received at
the dairy division headquarters re-
garding the advisability of feeding
smut-infested corn in the form of en-
silage. To answer these questions au-
thoritatively Mr. Gullickson had col-
lected some 800 pounds of pure corn
smut which he ran through the en-
silage cutter and put in sacks which
he placed in the silo and covered with
about ten feet of ensilage. A few
months later the corn smut in the bags
was substituted for the regular silage
ration and fed to a Holstein heifer at
the rate of 18 to 30 pounds a day. The
heifer was not forewarned of the ab-
surd change in her diet, but took no
exceptions to the corn-smut menu, ap-
pearing in fact to relish it. Mr. Gullickson
says the feeding of the smut
was continued for three weeks, during
which the heifer remained normal in
every respect.

PUMPKIN SEEDS NUTRITIOUS

Mistaken Idea to Think That Material
Will Increase Kidney Secre-
tions in Cows.

There is a tradition among some
farmers that pumpkin seeds increase
kidney secretions, tend to dry up cows,
and therefore should not be fed. There
is no real foundation for such an
opinion. Pumpkin seeds are nutri-
tious and should not be wasted. There
is no danger whatsoever in feeding
them to dairy cows.

CAREFULLY WATCH ALL COWS

Animal Losing Flesh Rapidly Probably
Needs More Feed, or More
Balanced Ration.

Watch the cows. The animal that
loses flesh rapidly probably needs more
feed, or a more perfectly balanced ra-
tion. When a cow takes on fat instead
of giving a full flow of milk, it is prob-
able she needs more protein and less
carbohydrates in her ration.

Lacking in Cow Ration.

It is a well-known fact that lime
and phosphorus are the ash conditions
that are frequently lacking in the ra-
tion of the average dairy cow and es-
pecially during the dry period.

Keep Quarters Clean.

Dairy cattle quarters must be kept
clean and the manure removed daily
from the stalls.

Adds to Productivity.

Lime will add to the productivity
of many pastures.

LIVE STOCK

VALUE OF ALFALFA PASTURE

Farmers and Swine Breeders Inter-
ested in Experiments Con-
ducted in Nebraska.

A story of value to farmers and hog
growers is found in a report of ex-
periments in Nebraska in feeding pigs on
alfalfa pasture.

"During the summer of 1916, three
lots of 20 pigs each were fed corn
and 60 per cent protein tankage in
self-feeders while running in fields of

Pigs on Alfalfa Pasture Do Not Need
Much Grain.

alfalfa. Three similar lots of pigs
were fed the same ration but were
kept in a dry lot where there was no
green feed. Two lots of pigs were on
trial 56 days, two lots on trial 42 days,
and two lots on trial 70 days. The
average weight of the pigs in the vari-
ous lots ranged from 37 to 47 pounds
when the tests began and from 47 to
115 pounds when the tests ended.

"The pigs in the dry lots ate 4.18
pounds of tankage per 100 pounds of
corn and tankage, while those on pas-
ture ate 3.85 pounds of tankage for
each 100 pounds of corn and tankage.
The pigs on alfalfa gained at the rate
of .87 pound per day, while those in
the dry lot gained at the rate of .32
pound a day. The pigs in the dry lots
ate 500 pounds of corn and 23 pounds
of tankage to produce 100 pounds gain,
while those on alfalfa pasture ate 297
pounds of corn and 14 pounds of tank-
age to produce 100 pounds gain. Access
to alfalfa pasture reduced the grain
eaten to produce 100 pounds of gain
nearly one-half."

"Considering corn worth \$1.40 per
bushel or \$50.00 per ton and tank-
age worth \$100 per ton, the cost of
corn and tankage for 100 pounds of
gain in the alfalfa field was \$8.12 as
against \$15.47 in the dry lot. Alfalfa
pasture reduced the cost of gains nearly
one-half."

BITS OF WIRE IN COW FEED

Lodgment of Small Piece of Metal Is
Sure to Cause Injury and Pain
to Animal.

Many farmers and stock keepers are
careless in allowing bits of metal,
nails, wire, etc., to get into the manger
trough and pails where the cows and
calves feed. Cattle are voracious
feeders and take up their feed in large
mouthfuls, chewing it but little and
swallowing it by wholesale. Hence,
nails, pins, small pieces of wire and
such like are quite likely to be taken
up with the feed and pass into the
stomach or lodge at some point along
the channel.

Lodgment of a piece of metal is sure
to cause inflammation and pain to the
animal. Usually a pointed piece of
metal does not remain long in one
place; every movement of the animal
or organ drives it a little farther in the
direction of least resistance, and the
result is that a long line of inflamma-
tion and festering is set up in the suf-
fering animal. A bad feature of the
case is that when a vital organ is
reached by the moving piece of metal
death usually follows, and the owner
often attributes the loss to some other
cause.

WELL-BRED ANIMAL FAVORED

Can Be Put in Good Condition for
Market in Much Shorter Time
Than Can a Scrub.

The well-bred beef animal, owing
to better feeding quality, can be put
in good condition for the market in
shorter time than can a scrub. At the
same time such an animal can also be
fed to advantage for just as long a
period as a scrub. This means that
there is greater opportunity for sell-
ing a well-bred animal on a good
market than is the case with a scrub
that must be fed for a longer period
in order to be salable at a reasonable
price.

Exercise for Horse.

Work provides exercise for the
horse and insures keeping him in vig-
orous, healthy condition. It also ac-
customs him to being handled by a
man, an important factor in the devel-
opment of stallions.

Buttermilk for Pigs.

Stale, buttermilk, if kept clean,
gives just as good results as fresh but-
termilk in pig feeding. The trouble,
when trouble occurs, is generally due
to lack of cleanliness, which causes di-
gestive disturbances.

Perryton's Star Clothing House

NOTICE OF RECEIVERS SALE

By virtue of an order issued out of
the District Court of Ochiltree Coun-
ty, Texas, in cause No. 373, on the
docket of said court wherein W. S.
Nix et al were plaintiffs and Mollie
Davis et al were defendants, I will,
on the first day of May, 1923, being
the first Tuesday of May, 1923, offer
for sale and sell for cash at pub-
lic auction before the courthouse door
in Perryton, Texas, the following de-
scribed real estate situated in Ochil-
tree County, Texas:

All of Section No. Nineteen (19),
in Block No. Forty-four (44), Certi-
ficate No. 3349, J. T. Pollard Survey,
in Ochiltree County, Texas, contain-
ing 615.4 acres of land.

Sale will be made subject only to
the purchase money due the State of
Texas on original purchase price and
accrued taxes.

W. B. LaMaster,

Receiver.

IT IS CALLED "ECONOMY"

BY PRESIDENT HARDING

In an address to the "Members of
the Government's Business Organi-
zation" recently President Harding told
of reduction of the 1923 deficit, which
he attributed in part to an increase in
the anticipated total revenue and to a
policy of economy and co-ordination
of routine business.

The official records concerning this
deficit and the manner in which it
was reduced again expose the admin-
istration claim of economy and show
that the reduction was due entirely
to other causes. Representative Ewin
L. Davis of Tennessee, who has look-
ed up the facts, makes the following
statement concerning it:

"In his message vetoing the Sol-
dier Compensation Bill, President
Harding assigned as one of the rea-
sons for his action, the fact that we
were unable to pay such compensa-
tion and were now confronted with a
deficit of \$670,000,000 this year and
prospects of an even larger deficit
next year. Members of the Appro-
priations Committee at the time
called attention to the fact that our
present year would be \$850,000,000,
which fact was more than corrobor-
ated by a recent statement of the
Chairman of the Budget Committee,
who stated that the deficit against
which the Budget Committee had
been fighting was in reality \$896,
000,000. It is true that this deficit
has been reduced, but how? First,
by the issuance last October of
\$500,000,000 of thirty-year Govern-
ment bonds—the first bonds issued
by the Government since we were in
the midst of the war, more than three
years ago. The Chairman of the
Budget Committee also explains that
some reductions have been effected
by the sale of surplus war materials
and Shipping Board property. How-
ever, there still remains a deficit of
several hundred million dollars."

Borrowing a half million dollars
and selling surplus war materials and
Shipping Board property may be econ-
omy from the Republican viewpoint
and bring satisfaction and happiness
to the President and his advisers, as
was the case with the old lady who
exclaimed, "Oh, I am so happy! I
have just borrowed enough money to
pay all of my debts."

In defying the conventions by wear-
ing outing clothes at a Florida resort
President Harding's friends want it
understand that he did not include
that of 1924.

NOTICE OF ELECTION

FOR CITY SECRETARY

Notice is hereby give that an elec-
tion will be held at the courthouse in
the City of Perryton, Texas, on the
24th day of April, the same being
the fourth Tuesday in April, 1923,
for the purpose of electing a City
Secretary to fill the place made va-
cant by the resignation of the pres-
ent Secretary, Abe Green.

The polls will be opened at the time
specified in the General Election Law
and the election in all things con-
ducted as by said law provided, J. R. Mc-
Millen being Presiding Judge of such
election.

Witness the hand and seal of said
City, acting herein through and by
its Mayor, C. E. Forbes, this 11th
day of April, A. D. 1923.

WHY PAY FOR A HOME AND NOT OWN IT?

Rent paying amounts to a lot of money each year and money spent for rent doesn't buy a dollar's worth of ownership.

Aside from the real joy and satisfaction that attends building and owning your home, there is the added profit of being your own landlord—paying to yourself.

Home building doesn't require a lot of money to begin with. Nearly everyone borrows to build. A home is the best security for a loan.

It is all a matter of getting started. Come in and talk it over, and we will help you get started.

Our Aim—To Help Improve the Panhandle.

POULTRY

POINTERS ON EGG HANDLING

Bulletins issued by Department of Agriculture Give Best Methods and Practices.

(Prepared by the United States Department of Agriculture.)
Breaking eggs and preventing breakage of eggs are both at times the concern of persons engaged in the egg business. The United States Department of Agriculture also has taken an interest in these problems and has published information on methods and practices. Although the bulletins were first issued a few years ago, the department's recommendations to shippers and to persons planning the installation of breaking plants are good today. Several thousand copies are now available for distribution. Persons writing for copies should ask for Department Bulletin 664, The Prevention of Breakage of Eggs in Transit When Shipped in Carlots, and Department Bulletin 668, The Installation and Equipment of an Egg-Breaking Plant. Other bulletins of a similar nature, all prepared by the bureau of chemistry, are available for distribution. The following is a complete list, with the exception of those mentioned above: Department Bulletin 224, A Study of the Preparation of Frozen and Dried Eggs in the Producing Section; Department Bulletin 301, Accuracy in Commercial Grading of Opened Eggs; Department Bulletin 505, How to Candle Eggs; Department Bulletin 17, The Comparative Rate of Decompo-

Eggs Packed in a Carton of This Kind Are Quite Secure From Breakage.

sition in Drawn and Undrawn Market Poultry.

In addition, the department has three circulars on eggs: No. 25, Points for Egg Buyers, including what to sell, what to buy, how to candle, and egg-candling devices; No. 55, How to Load Cars of Eggs; and No. 74, How to Break Eggs for Freezing.

PROMOTE HEALTH OF FLOCKS

Much Good Can Be Accomplished by Spraying Runways and Houses With Lye Solution.

Every poultry raiser knows that fowls thrive best in clean, well ventilated places. By keeping the houses, roosts, nests and runways sprayed with a concentrated lye solution you will do a great deal toward promoting good health and productiveness among your poultry.

Many of the most successful poultry raisers use this lye solution around their poultry houses at least every other week. The solution is made by dissolving a small can of lye in five gallons of water. A sprinkling can, hand spray, or an old whisk broom may be used to apply the solution.

AVOID EXCITEMENT IN PENS

Poultrymen Will Save Several Eggs Every Day by Observing Rules of Silence.

Whistling, or speaking gently, or knocking on the door to let the hens know when he is coming will save the poultryman several eggs in the day's gathering, says Prof. Willard C. Thompson, poultry husbandman of the New Jersey experiment station, in a circular issued on "The Winter Time Management of the Laying Flock." Fright, he continues, is often fatal to and always interferes with normal egg production. Hence the necessity of having the poultryman move slowly so as not to cause excitement in the pens.

CHANGE NEST LITTER OFTEN

Hens Pull Out Material and It Becomes Broken and Packed—Danger of Broken Eggs.

Every few weeks the best of nests will need more litter. The hens pull it out and it becomes broken and packed down until a bare spot of boards may appear in the middle. This increases the danger of a broken egg, which may in turn smear half a dozen good ones.

NOTICE OF APPLICATION FOR PROBATE OF WILL

THE STATE OF TEXAS:

To the Sheriff or any Constable of Ochiltree County, Greeting:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Ochiltree, State of Texas, and you shall cause said notice to be printed at least once each week for a period of ten days exclusive of the first day of publication before the return day hereof:

NOTICE OF APPLICATION FOR PROBATE OF WILL

The State of Texas:

To all persons interested in the estate of D. P. Tarbox, Deceased, Maggie Tarbox has filed in the County Court of Ochiltree County, an application for the Probate of the last will and Testament of said D. P. Tarbox, Deceased, filed with said application, and for Letters Testamentary, which will be heard at the next term of said Court, commencing on the third Monday in May, A. D. 1923, the same being the 21st day of May, A. D. 1923, at the Court House thereof, in Perryton, at which time all persons interested in said estate may appear and contest said application should they desire to do so.

Herein fail not, but have you before said Court on the said first day of the next term thereof this Writ with your return thereon showing how you have executed the same.

Given under my hand and the seal of said Court, at office in Perryton, this 6th day of April, A. D. 1923.

DAVE SHANKS, Clerk,
County Court, Ochiltree County, Texas.

BLACK SCHOOL NEWS

Frank Davenport visited our school Friday evening.
Dan Pearson, and L. P. Brown made a business trip to Perryton Monday.

Mr. and Mrs. Dolph Daniels visited at the home of Mr. and Mrs. S. F. Waide, Saturday afternoon.
Wilma Pearson visited Audrey Jones, Sunday.

Most of the pupils were absent Thursday on account of rain but all were present Friday.

Many of the people from this vicinity attended the singing held at Mrs. Dolph Daniels, Sunday night.

Miss Pauline Shifflett of Wawaka spent Sunday afternoon at the home of Mrs. Wm. Pearson.

Mr. and Mrs. E. A. Greever attended Sunday School at Spearman, Sunday.

There came an inch and a half rain in the Black community, Thursday. Everybody was glad to see the rain as things were getting dry again.

The End of "Endless" Days

DOING farm work with an Allis-Chalmers tractor means more than raising bigger crops at less expense. You can do more and better work in less time and put an end to working days that hold you on the job long after dark.

Whatever the work to be done, you go into the fields with an Allis-Chalmers tractor and finish up on time! The powerful valve-in-head motor is as finely built as the engine of a motor car or truck. Rated conservatively, it is capable of developing and maintaining a power surplus which overcomes emergencies on either drawbar or belt. Two large side-inspection plates give quick access to crankcase; valves are easily reached for grinding or cleaning of carbon by simply removing cylinder heads.

All we ask is the opportunity to give you a demonstration of what an Allis-Chalmers tractor will do on your farm. Come in—ask us for the proof—and for details about our easy time-payment plan.

G. T. LEATHERMAN, Agent

The KITCHEN CABINET

"One's personal enjoyment is a very small thing, but one's personal happiness is a very important thing. Those only are happy who have their minds fixed on some object rather than their own happiness."

TEMPTING DISHES

Apples are so common and so generally found in any market that we are apt to slight and undervalue them. There is no more tempting garnish for a luncheon dish or for dinner than a rosy-cheeked stewed or baked apple on the dinner plate with the roast. These are prepared by cooking them gently until tender with the skins left on or partly removed to keep them from bursting. When tender, carefully remove the red skins (of course they should be of the red-skinned variety) and scrape the red with a knife or spoon from the inside of the skin. Paint it back on the cheek of the apple and it makes the attractive "apple in bloom."

Apple Souffle.—Core, peel and stew four tart apples in just enough water to prevent burning. Pass through a sieve. Put one tablespoonful of butter in a saucepan, add four tablespoonfuls of cornstarch and one tablespoonful of flour, one-fourth of a teaspoonful of salt, four tablespoonfuls of cold water, stir and cook until clear. Add one cupful of hot apple sauce sweetened to taste and one teaspoonful of lemon juice. Remove from the fire, add three well-beaten eggs and cut and fold in the stiffly beaten whites and pour into a well-buttered baking dish; bake until puffed and a delicate brown; serve at once.

Split Pea Soup.—Take one pint of dry legumes, one onion, one-half head of celery, three tablespoonfuls of flour, the same of butter, one-half can of strained tomato and one cupful of cream. Soak the peas over night, drain and simmer until tender, stirring often. When the peas are tender, fry the onion until tender, also the celery cut fine, in a little beef fat. Add to the soup and cook until smooth. Put through a sieve, add the butter and flour cooked until smooth, the tomato and the cream. Serve hot with toasted wafers.

Fish Hash.—Put hot, salted, cooked potatoes through a ricer, add one egg to a pint of the potatoes, two tablespoonfuls of butter and salt and pepper to season. Beat well and add an equal quantity of flaked fish. Fry in bacon fat and serve garnished with parsley.

ANNOUNCEMENT

Having made a deal whereby I became the owner of the Commercial Hotel, formerly known as the Ferguson Hotel, we wish to announce that the name has been changed to the

CENTRAL HOTEL

And that we will be pleased to receive and will appreciate your patronage and will endeavor to give the best service and accommodations possible.

We have several nice rooms upon which we will make special rates by the week.

R. H. DALEY, Prop.

L. S. Hobbs left Sunday for Oklahoma City, to look after Ford business. He will drive several new cars back.

A deal has been made by Allen M. Wilbanks, Jr., of this city whereby B. B. Brown of Wichita, Kansas, becomes the owner of the Snorty-Gobbler string of tools. This equipment will be moved to the Sayre field.

Poultry fountains and feeders, at Holt's Tin Shop. 11-2t-c

Mrs. R. M. McKaig of Fairview, Oklahoma, came in Tuesday for a visit at the home of her parents, Mr. and Mrs. Thos. Thompson.

J. M. Bull and J. B. Cartwright are in Oklahoma City this week. They will drive back new Ford cars which they have recently purchased from the Hobbs Motor Co. of this city.

R. L. Jones, former Postmaster at Gray, Oklahoma, died at the Liberal Hospital at 5:30 Monday morning, the cause of his death being pneumonia. He was buried at the Gray Cemetery on Wednesday afternoon.

Mrs. Ira J. Teurman died at the Liberal Hospital at 1:00 on Tuesday morning. Mrs. Teurman lived near Gray, Oklahoma. Burial was at the Blue Mound Cemetery on Wednesday afternoon.

Mrs. Ida O. Rifenberg left Monday for a few days visit with her daughter at Woodward, Oklahoma.

Ms. Ed. Rooses has accepted a position with the Ochiltree Telephone Co. as operator, taking the place of Mrs. Blansit Carter. Mr. and Mrs. Carter have resigned their positions with the Telephone Company and are moving to the Carter Ranch south of Perryton. Mrs. Rooses is an experienced operator, having had charge of the board at Ochiltree for a number of years.

Walter Allen and mother are visiting relatives at Cimmaron, New Mexico this week.

Why should the savants spend so much time trying to find out when kissing began instead of blessing the inventor?

Economic laws are funny. When more eggs are laid, eggs are cheaper; but when more bricks are laid, bricks are higher.

Gasoline at one dollar a gallon, folks! That's what the U. S. Senate oil investigation committee predicts. Look out for the gasoline bootleggers!

Mr. Business Man

WHY not make your appeal for patronage through the columns of this newspaper? With every issue it carries its message into the homes of all the best people of this community. Don't blame the people for flocking to the store of your competitor. Tell them what you have to sell and if your prices are right you can get the business.

METHODIST CHURCH

Sunday school promptly at 10:00 o'clock. Preaching at 8:30 p. m. Leagues at 6:00 and 7:30 p. m.

Revival meeting begins Sunday, April 29th. Rev. Geo. W. Shearer, Presiding Elder, to do the preaching. Pray for a great meeting. Everyone invited to be with us and take part. W. A. HITCHCOCK, *Pastor.

Dr. W. J. Brewer reports the birth of a son to Mr. and Mrs. W. B. LaMaster on Wednesday night of last week.

H. C. Coffee made a trip to the new oil fields at Sayre, Oklahoma, the fore part of this week.

NOTICE TO THE FARMER
