## SNYDER SPOTLIGHT

By WACIL McNAIR

This is the day we celebrate the greatest event ever to occur, so far as mankind in concerned. It is the day when people everywhere remember their religion, regardless of their activities during the remainder to the year.

Often it is lamented that many people neglect their religious life except for the Christmas and Easter season. On the other hand it may be argued, and not without merit, that it is better to remember twice a year than not at all.

• • •

Snyder takes pride in its churches, and as the community focuses its attention upon industry during the coming week, it is well to remember that environment plays an important role in attracting industrial concerns. Churches, along with schools, good living conditions, ambitious civic activities, etc., are of vital concern to people who manage and operate industries.

For a glimpse of industrial life in Snyder as it exists today, we invite your attention to Section C of today's issue of The Daily News. This city probably has more industries than many citizens realize, and the community appreciates all of them. We believe the fact that they are well supported and thoroughly appreciated should have influence on efforts to acquire more industry through the proposed industrial foundation.

• • •

Weather of the past week might be described as both good and bad. Promising clouds failed to produce enough moisture to be of benefit, but severe weather alerts posted for this area expired without serious damage up to this writing. There was plenty of water southeast of Snyder, with estimates up to five inches in the Inadale area Thursday night, but the moisture virtually played out before it reached Snyder.

• • •

Snyder will have another convention next year. A local delegation invited the U. S. Highway 180 Association to hold its annual meeting here in 1958. The city was well represented at the 1957 meeting last weekend in Hobbs, N.M.

• • •

The local post office, along with others over the nation, was back on its original schedule Saturday, following a "holiday" a week earlier. Postmaster Dawson Moreland received instructions promptly from the Postmaster General, easing curtailments after congress approved additional funds to operate the department until July 1.

### Crash In Sicily Fatal To Texan

CALTANISSETTA, Sicily, April 20 (AP)—Louis White, an oil research specialist from Tyler, Tex., was killed near here tonight in a collision of his automobile and a truck. His wife was injured slightly.

# Storms, Hard Rains Skip Across Texas

By The Associated Press

Tornadoes, hail the size of quarters and up to almost six inches of rain battered Northwest Texas Saturday.

One twister flattened a number of buildings on a farm near Paducah. Another cut a swath around Brownsfield. A third was spotted by an airlines pilot about 20 miles east of Spur.

Highways near Vernon were flooded and more than 50 cars were reported stranded on high spots. A number of South Texas highways also were closed.

Light to heavy hail pounded many points in the western half of Texas.

Afternoon cloudbursts totaled 5.70 inches at Paducah, about 110 miles west of Wichita Falls.

The turbulance came as the Weather Bureau issued severe weather warnings for three areas.

The first, expiring at 9 p.m., called for violent thunderstorms and tornadoes 90 miles northwest and 30 miles southeast of a line from Carlsbad, N.M., to Oklahoma City.

The second warning forecast thunderstorms with large hail and a tornado or two at Texas points north of a line from Coleman to Waxahachie. It expired at midnight.

Severe thunderstorms and danaging surface winds and hail were forecast for East Texas until 9 p.m.

One twister roared down and demolished a six-room house and all other buildings on the Grady Skaggs farm about 14 miles south of Paducah. No one was injured.

The tornado flattened outhouses, barns and windmills. Tractors and other farm machinery were smashed.

In the South Plains, a funnel struck at the Alton Loe Farm six miles southwest of Brownfield but did no damage. It missed the farm house by about 200 yards.

Don Bynum, Brownfield newspaperman, said the funnel headed straight for town after roaring off the farm but swerved and broke up just as it reached Brownfield. About 1,200 yards of telephone line were torn up by the tornado.

Cloudbursts brought usually dry streams surging out of their banks in the Vernon-Matador area.

Highways 183 and 70 southwest of Vernon were flooded and closed, the State Highway Department said. Vernon had 4.40 inches of rain.

Doug Meador, editor of the Matador tribune, said water was running bankfull in some streams in the Matador area. He said high water virtually closed the Matador-Paducah highway.

He said between 50 and 75 autos were temporarily stranded at high points along the route after rains flooded lowlands. Matador had 1.59 inches during a brief period.

Water also was reported over some roads east of Lubbock.

The State Highway Department said farm roads 887 and 81 in South Texas' Karnes County were

## One Injured In Accident

One man was injured, not seriously, in a two-car accident four miles west of here at Union late Friday afternoon.

Highway Patrolman Jim Kinser, who investigated, said that 67-year-old John C. Bearden, Seagraves, Tex., was injured, but was released from a local hospital yesterday morning after treatment Friday night.

He was driving a 1955 Ford coach which ran into the rear of a 1952 model Buick sedan driven by Fred H. Marberry, 33, parts manager for Joe Williamson Buick Co. of Snyder.

Bearden's car was demolished and the Buick was damaged.

Both cars were traveling west on Highway 180 about 6:30 o'clock Friday afternoon when the accident occurred.

Bearden was taken to the hospital by Bell ambulance.

# More Budget Cuts Sought

WASHINGTON, April 20 (AP) — Sen. Ellender (D-La) said today the U. S. Information Agency has "grown like a bad weed" and called for a new 18 million dollar slash in its budget.

At the same time, there were reports that some Republicans are so irked with the vigorous support USIA Director Arthur Larson had given to "modern Republicanism" they will offer little resistance to a Democratic drive to chop the agency's funds.

A Senate Appropriations subcommittee headed by Sen. Lyndon B. Johnson of Texas, the Democratic leader, has before it a bill passed by the House. It gives USIA 106 million dollars to operate in the year beginning July 1 instead of the 144 millions President Eisenhower requested.

Eisenhower said last Wednesday it was "the worst kind of economy" to cut informational funds. But Sen. Mansfield of Montana, assistant Democratic leader, predicted the Senate will cut the House figure even lower.

Ellender, a member of the Johnson subcommittee, put an 18 million dollar tag on this proposed reduction. He said in a radio broadcast recorded for Louisiana that the agency's budget ought to be reduced to about 88 million dollars.

An influential Republican member of the Appropriations Committee told a reporter that in his opinion Larson's political activities are not likely to help the case for his agency.

Larson, author of the book "A Republican Looks At His Party," has been making speeches calling for unified party stands on national issues along the lines laid down by Eisenhower.

Among members of the Johnson subcommittee are Sens. Bridges (R-NH) and McCarthy (R-Wis), who have shown little enthusiasm for the President's "modern Republicanism" philosophy.

Ellender said the USIA had strayed from its original objective, which was to penetrate the Iron Curtain via Voice of America bradcasts. He said there now are 219 information posts in 82 countries.

"Many of our information service posts are not getting the job done," he said. "Others are working hard, spending your money and mine, in countries which already have an ample supply of accurate news.

### Humble Executive Resigns Saturday

MIDLAND, April 20 (AP)—John W. House, superintendent of the Western Division of the Producing Department of Humble Oil and Refining Co. announced his resignation today.

He had held the position since 1938 and had been with the company almost 38 years. Larry H. Byrd, an assistant superintendent in the division, was named to succeed him temporarily.

## Hill County Observance To Be Held

By The Associated Press

Colorful pageants in the Central Texas Hill County marked the beginning of Easter Sunday religious observance in the state.

Cloudy skies and predictions of rain erased hopes for fair Easter Sunday weather as the state prepared for one of the year's most important religious days.

A cast of more than 300 was to present annual Easter pageant Saturday night at Fredericksburg, one of the state's oldest communities in the Hill Country.

In a unique ceremony, fires were lighted on surrounding hilltops as the trial, crucifixation and resurrection of Christ and retold in drame at the century old observance.

The fires have been lighted every Easter since 1846 when a pioneer mother in the German settlement quieted the fears of her children by telling them that the campfires of hostile Indians were those of the Easter rabbit heating water to dye Easter eggs.

Thousands gathered Saturday night on the slope of Lovers Leap Mountain near Junction for the annual Easter Pageant. The hours-long religious dramatization each year continues into early Easter morning.

A Western touch was added to the Junction pageant. Visitors were served coffee by Texas Ranger Capt. Gully Cowsert from his chuch wagon.

Three sunrise Easter services were scheduled Sunday morning at Kerrville, another Hill Country city. One of the services was to be conducted at Tivy Mountain which overloks the city.

Hundreds of other sunrise services were set across Texas. Many churches scheduled additional services to accommodate the large numbers.

### Yarboroughs Will Be Honored In Houston

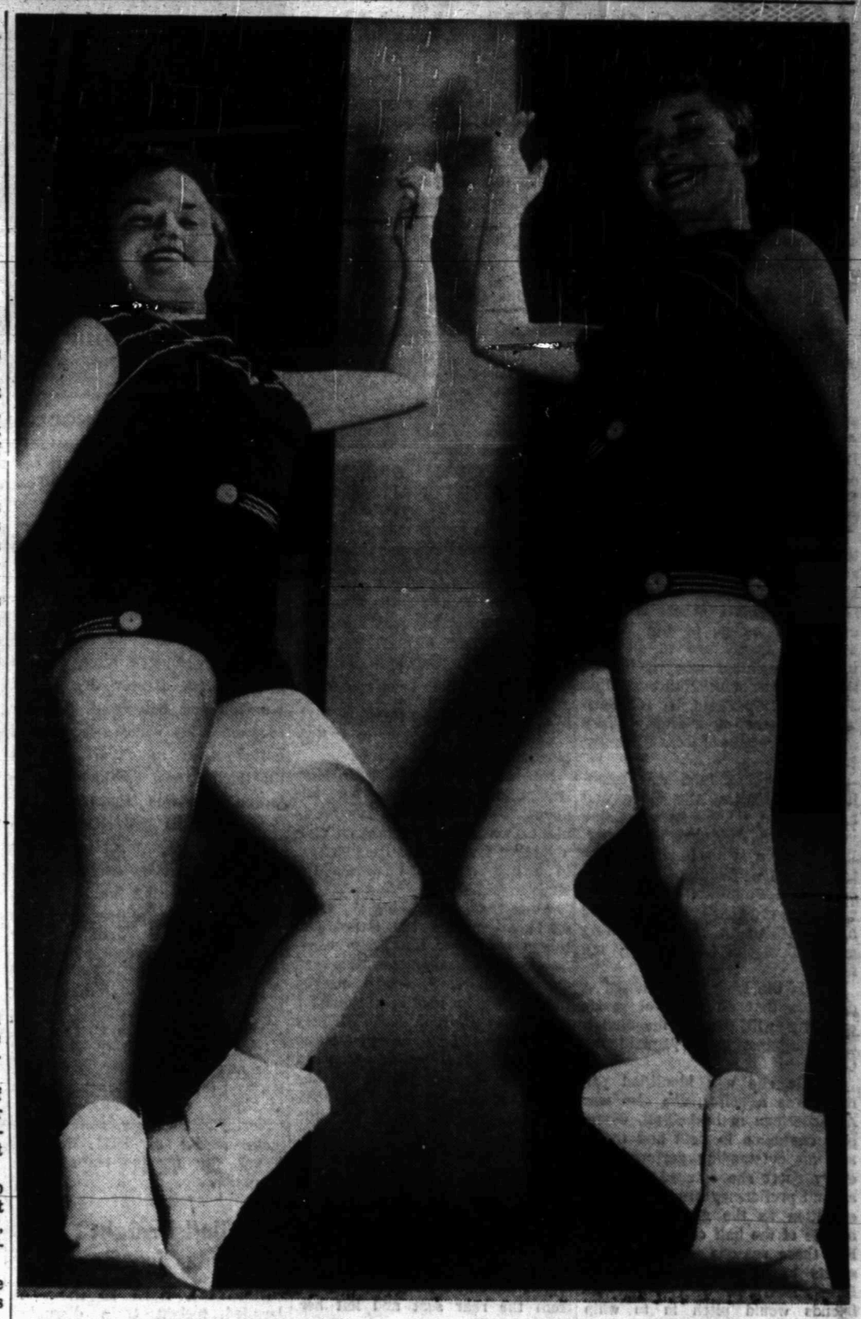

HOUSTON, April 20 (AP) — U.S. Senator-Elect and Mrs. Ralph Yarborough of Austin will be honor guests Tuesday night at the eighth annual gridiron dinner of the Press Club of Houston.

Mrs. R. D. Randolph, Texas Democratic national committeewoman, also announced that the Yarboroughs will be honored at a pubiic reception to be given Wednesday night at a downtown hotel. Mrs. Randolph said the reception was arranged to permit Houston friends to greet Yarbrough before he leaves later next week for Washington.

## WEATHER

SNYDER TEMPERATURES: High Friday, 81 degrees; low 59 degrees; reading at 7:30 a.m. Saturday, 64 degrees; precipitation, trace.

West Texas: Widely scattered thundershowers west of Pecos River and local thunderstorms and scattered showers elsewhere Sunday and Sunday night. Monday local thunderstorms and scattered showers east of Pecos Valley and slow clearing and cooler elsewhere.

SNYDER WINNERS—Barbara Taylor, left, a Snyder High School junior, and Linda Ramsey, sophomore, won second place in the duet twirling contest of the Southwestern Amateur Athletic Union baton twirling last week in Fort Worth. Miss Taylor is the daughter of Mr. and Mrs. Robert Taylor, 3715 Avenue U, and Miss Ramsey is the daughter of Mr. and Mrs. W. J. Ramsey, 3708 Austin. (Lee Watson photograph)

# U. S. Agrees To Ease Trade Barriers With Red Chinese

WASHINGTON, April 20, (AP) — The United States, bowing to British and Japanese pressure, has agreed to an easing of Allied restrictions on trade with Red China. At the same time it has proposed tighter controls on trade with the Soviet bloc in Europe.

However, the ban on all U. S. trade with Red China will stand.

This was disclosed by the State Department today in a statement which said an American proposal on revising the trade control system had been presented to the embassies of 14 Allied countries here during the past week.

Both Britain and Japan have long urged that the United States agree to an increase in Allied trade with the Chinese Communists. Britain particularly has advocated that the embargo on goods to Red China be reduced to the same level as that applied to Russia and its European satellites.

The American proposal constitutes the first major gain for the British and Japanese demands although the whole matter is still subject to negotiation among the 15 countries participating in the system. The 15 are all the NATO countries, except Iceland, plus Japan.

The statement issued by press officer Stewart Lilico, disclosed that the United States proposal made these major points:

1. Some items of trade "for peaceful use" which are now embargoed for Red China would be removed from the control list and placed on the same basis that they now have with the European Soviet bloc. The Soviet embargo list is much shorter than the Red China list.

2. Some other items now embargoed for Red China "would continue under embargo and would be added to the European Soviet bloc list" but under a lesser degree of control. That was interpreted to mean that the sale of these items might be controlled as to quantity.

3. The present "exceptions" proceedure by which Allied countries sometimes sell embargoed items to Red China or Russia in spite of

# Pilots Who Use Drugs Grounded

WASHINGTON, April 20 (AP)—The Army has grounded airplane pilots who use the new tranquilizing drugs.

An order signed by Gen. Maxwell D. Taylor, army chief of staff, said pilots using the drugs may not fly until four weeks after they have stopped using them.

Somewhat similar instructions, were sent out by the Air Force surgeon general's office this month to all commands.

The Army ban disqualified from flight duty individuals who are under treatment with "any of the newer mood-ameliorating, tranquilizing or ataraxic (calming) drugs for hypertension, angina pectoris, nervous tension, iritability, insomnia, etc." They will remain disqualified for four weeks after use of the drug is stopped.

The order also disqualified from flight duty persons under treatment "with any of the antihistaminics or barbiturate preparations." In these cases the four-week "recovery" period was not imposed, however.

Lt. Col. Spurgeon Neel, an Army aviation medical officer, told a reporter the order was issued after it had been learned that some pilots, treated with the drugs for high blood pressure, reporting for duty "just because their pressure was down."

"The Army is not attacking the drugs themselves," Neel said.

"They are wonderful medicines, but they don't mix with flying."

### Breech Of Contract Suit Filed In Dallas

DALLAS, April 20 (AP)—A breech of contract suit seeking either a work halt by Texas Boat Manufacturing Co., Inc., or one million dollars in damages was filed in district court today by Lone Star Boat Co. of Grand Prairie.

The suit named R.W. McDonnell and the Texas Boat Manufacturing Co. as defendants.

# Proposed Paving Program Is Cut

Three blocks were dropped from the proposed 65 block city street paving program by the city council Friday afternoon at the public hearing on the paving.

Several homestead owners, and a few other property owners appeared at the hearing to protest the paving of streets in front of their property.

The three blocks dropped from the program were one block on Avenue L from Thirty-third Street to Thirty-fourth Street, and on Thirty-fourth Street from Avenue K to Avenue L, and one block in Belmont Park addition in north Snyder which has been included in the program plans by error. It was a block which was bounded on both sides by vacant property.

In other actions the council reappointed W. W. Park as city attorney for one year at a salary of $300 per month, and Arthur Blanchard, attorney, as city corporation court judge for one year at a salary of $245 per month.

Malven K. Stevenson, former mayor, was appointed by the council to serve out the unexpired term of Forest G. Sears, who died recently, on the board of directors of the Colorado River Municipal Water District. The term ends in May of 1958.

Venetian blinds for the new fire department sub station in southwest Snyder were purchased from the Levi Kruse Venetian Blind Co. of Snyder for $108. Curtains will be added after painting of the building is complete.

# Teamsters May Ask To Keep Records Of Hearing Secret

WASHINGTON, April 20 (AP) — The Teamsters Union is reported to have asked that no record be kept of its AFL-CIO trial on corruption charges.

AFL-CIO sources interpret this to mean that the Teamsters don't want in existence a written transcript which could be subpoenaed by the Senate Rackets Committee and combed over for possible new evidence against the union.

It is still not clear whether the Teamsters will send representatives to defend the union at the trial, scheduled to be held May 6 behind closed doors.

Such trials are customarily held in secret, and it is up to the defendant union whether a record will be kept.

The 1½-million member Teamsters organization came under charges from its parent AFL-CIO as a result of the Senate committee's disclosures against Teamsters President Dave Beck and other high officers.

The federation has suspended Beck as an AFL-CIO vice president and council member, an action Beck is contesting, and has scheduled a hearing May 20 before the AFL-CIO executive council. Beck claims his suspension is illegal and therefore a "nullity." He has hinted he won't show up for his hearing.

The federation also has accused the Teamsters Union itself of being dominated by corrupt influences. This charge is the basis for the May 6 trial before the AFL-CIO ethical practices committee. If ssustained, the charge could lead to eventual ouster of the AFL-CIO's largest union.

The AFL-CIO has assured the Teamsters no record of the May 6 trial will be kept unless the union wants one. This, it was said, is in line with a policy enunciated by George Meany, AFL-CIO president, that proceedings against Beck and the Teamsters will be conducted impartially in line with past practices.

It has always been optional with unions or leaders whether formal transcripts would be kept of their closed door trials. In nearly every case so far the defendants have wanted one, for use as the basis for appeals, including possible court actions.

Beck's troubles stem from his refusal to tell the Senate investigators under oath about his financial affairs. Outside the hearing he said he "borrowed" $300,000 to $400,000 of Teamster funds for his personal use, without paying interest, but has repaid the money.

Several other high Teamster officers are under indictments. One of these, James R. Hoffa, Midwest Teamster kingpin and Beck's rival for top leadership, has been accused of bribing a Senate investigator to feed Hoffa the committee's secrets. Hoffa's attorneys are due to file preliminary defense motions in Federal Court here Monday.

The Senate Committee, now in an Easter holiday recess after conducting hearings on alleged "goon squad" practices in Scranton, Pa., is expected to hold hearings in early May either on the Beck-Teamsters situation or on New York City area labor-management practices.

# Resurrection Commemorated Today

By The Associated Press

Christians in a world still beset by crisis and human strife commemorate anew today the resurrection of Christ the Savior.

In rituals, prayer and song many lands will pay tribute to the Man of Galillee.

In Jerusalem itself discouragement to Middle East travel since the Sinai war last fall reduced to hundreds instead of thousands the number of Easter pilgrims.

But in the United States millions will enter the quiet, peaceful atmosphere of churches to worship. Other millions rose before dawn to attend ceremonies in the open.

Still others could remain in their homes watching various ceremonies on television. Even in the holy city of Rome, television was used for the first time to carry the annual Easter message of Pope Pius XII to the peoples of Europe.

The Pope's message also was broadcast by the Vatican radio and 14 European networks in 28 languages. The message was to be picked up later for rebroadcast by American, Canadian and British systems.

President and Mrs. Eisenhower will attend Easter services at the Reid Memorial Presbyterian Church in Augusta, Ga., where the chief executive is vacationing.

On the eve of Easter, an estimated 10,000 pilgrims gathered in St. Peter's Square in Rome and were blessed by the 81-year-old head of the Roman Catholic Church. The pontiff appeared briefly at his apartment window to bless the throng.

In Jerusalem yesterday, flames burst from the tomb of Christ as the age-old ritual of the Holy Fire was re-enacted. Thousands of pilgrims packed the Church of the Holy Sepulchre for the Holy Saturday services.

American observances of Easter Sunday took many forms, including the annual parades and Easter egg hunts.

Warm but possibly cloudy weather was forecast for New York and its colorful throng of Easter paraders up Fifth Avenue.

# Slayings Admitted By Brooklyn Man

NEW YORK, April 20 (AP) — A young oil burner service man was picked up on a Brooklyn street today and police said he admitted the hammer slaying of Patricia Ruland, 19.

Chief of Detectives James B. Leggett said the man, Thomas Joseph Higgins, 22, also admitted the slaying of a Brooklyn widow about three months ago and nine other assault cases.

Miss Ruland, pretty employe of an insurance company, was found unconscious on a Brooklyn street shortly after midnight Thursday. Her face and head had been battered. She died two hours later.

Higgins was picked up by two detectives on a tip shortly after noon. Leggett said the man pointed out a green car parked nearby, and the attack weapon — a ball peen hammer — was found there.

Inspector Walter Henning, in charge of Brooklyn West detectives, questioned Higgins at the Fort Hamilton police precinct, and within 33 minutes he broke down.

"I am now very sorry for it," he was quoted as saying of the slaying.

Police said that Higgins was engaged to marry Elizabeth A. Tighe of Brooklyn, and that last Sunday the bans of marriage were announced for the first time at Our Lady of Angels R. C. Church —the church from which Miss Ruland will be buried Tuesday.

Lettett and Henning said Higgins told them this story:

He was acquainted with Miss Ruland, had talked with her, but never took her out. Wednesday night, when she went to a candy store for a soda, Higgins was in a bar and grill across the street.

When the girl left the store, he walked across the street and talked with her. His green car—owned by his employer, Edward T. Minnor & Co.—was parked nearby and he invited the girl for a ride. He said she accepted, they drove a short distance and got into the back seat. He said they agreed the spot was too bright, so they drove to another spot.

When she resisted, he took the hammer from a service tool kit on the seat and struck her on the head. He said he kept hitting her, but couldn't recall how many times.

Then Higgins got into the front seat, drove back to the spot where Miss Ruland was found later, pulled the girl's unconscious form from the rear seat and left her on the curb.

He said he returned to the bar and grill, had a few drinks and left. Then he realized the girl's shoes and handbag were in the car, so he stopped and threw them into a garbage container.

The next day he went to an auto supply store, bought new seat covers for the car, drove to an isolated spot and put them on over the old covers.

When picked up Higgins wore the same dungarees he had on the night of the attack and police said they were bloodstained. He had changed his shirt.

## Drive For Babe's Fund Accelerated

GALVESTON, April 20 (AP)—A stepped-up drive to secure permanent financing for the Babe Didrickson Zharias Memorial Cancer Fund was announced today by Dr. John L. Otton, the fund's executive director.

"We are directing our appeal throughout the nation to persons active in the sports world, to service organizations interested in sponsoring sports events or other events on behalf of the Babe's Memorial Fund, and to all individuals or groups who would like to help fight cancer through this fund," Dr. Otto said. He is associate professor of neuropsychiatry at the University of Texas Medical Branch.

The non-profit fund was established in 195 by the Babe and her husband, George Zaharias, one year before she died of cancer. Its objective is to finance clinics for early detection and treatment of cancer. Following initial warm response, contributions to the fund have trickled in slowly, limiting grants that can be made by the fund.

"It is the hope of our board of directors that all fields of sports endeavor will join in the Babe's battle against cancer," said Dr. Otto.

"While she was identified primarily as a golfer, she also was All-American in basketball, Olympics champion in field and track, and an outstanding performer in every sport she entered. Her all-around proficiency brought her recognition as the greatest woman athlete of the half century in 1949. For these reasons we believe the sports world will respond to the Babe's last great wish — that her friends would pitch in to whip cancer, one of mankind's most formidable enemies."

Dr. Otto said special emphasis will be placed on having sports events dedicated to the fund during June, the Babe's birth month.

"The fund does not require, nor does it ask, that any fixed amount of the proceeds of such events be contributed to the fund. This is left entirely to the discretion of the sponsoring group," Dr. Otto said.

## Venire Is Called In Murder Trial

EDINBURG, April 20 (AP)—A special venire of 150 persons has been called for jury selection Monday for the trial of Delores Haining, 25, of Pharr, who was charged with murder in the death of her newly born daughter.

The body of the girl was found by salvagers at the Pharr city dump last Dec. 1. Officials said the baby had been suffocated. They said the infant had been placed in a cardboard box and left at the city dump shortly after it was born Nov. 30.

## Baylor Signs Two Cleburne Gridders

CLEBURNE, April 20 (AP)—Charles Brown, all-state tackle at Cleburne High School, and fullback David Guinn signed letters of intent today to attend Baylor.

The 220 pound, 6 foot, Brown was on every all-state team in 1956. Oklahoma and all Southwest Conference schools had been after the exceptional defensive tackle.

## Cited At Banquet

WASHINGTON, April 20 (AP) — Priscilla Haines, 9, of Temple, Tex., was cited at an awards banquet of the Children of the American Revolution last night for enrolling 15 new members.

## U. S.

Continued From Page One

the embargo would be tightened up. Britain has used the exceptions procedure increasingly in the last year with the argument that the items sold would not increase the Communist war potential.

4. The United States intends to make no change whatever in its own policy of embargoing "all trade with Communist China." This was put into effect when Red China intered the Korean War.

The State Department did not specify what items were involved in the U. S. proposal. But informants said items now embargoed for Red China, but not for Russia, include such things as farm tractors, some automotive equipment, various types of railroad items, telephone and chemical equipment and iron and steel sheets of a quality too soft to be used in weapons.

Diplomats said Japan hoped to build up a trade with Red China in light machinery and many different categories of consumer goods, and would like to buy from China iron ore, coking coal, salt and soybeans.

Red China has been reported holding back trade on basic materials like iron ore and coking coal unless it can get heavy machinery from Japan which would fit into its industrialization program.

Officials said the basic concept of the trade control lists, which go back to 1949-50, is to deny strategic materials to the Communist bloc.

In the case of Russia, the control list covers 1. totally embargoed goods, 2. items limited in quantity of trade and 3 items traded freely but kept under survey to determine whether at any time they might assume strategic importance for the Soviet bloc.

The effect of the American proposal in reducing the Chinese Communist control list and increasing the Soviet list would be to narrow the gap between the two.

## Houston Hogs Golf Honors

HOUSTON, April 20 (AP)—A University of Houston team of Jim Hiskey, Rex Baxter Jr., Frank Wharton and Bob Pratt, set four records today while sweeping all but the team match play title in the third annual Southwestern Intercollegiate Golf Tournament.

Houston, the 1956 NCAA champions, won team medal play with a 72-hole 1,148, while Hiskey scored a birdie on the first extra hole to break a deadlock with teammate Baxter and grab the individual medal championship.

Hiskey and Baxter had played the 72 holes in 282—six under par for the 6,710-yard, par 72 Pine Forest Country Club course.

Houston also won the four-ball title at 247 and Baxter and Wharton won the two-ball championship at 263.

North Texas State, runnerup in team medal at 1,171, defeated Texas, 5-1, for the team match championship.

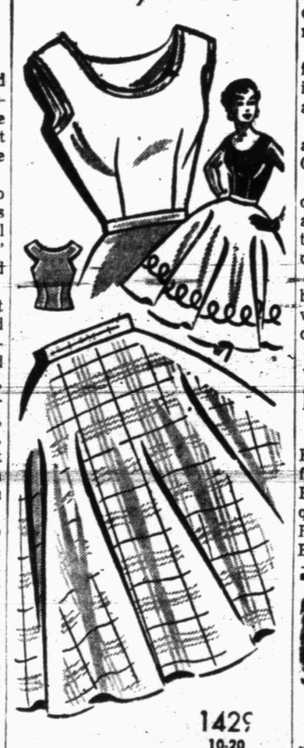

## Derailed Freight Disrupts Traffic

HOUSTON, April 20 (AP) — A derailed freight train disrupted Southern Pacific Railroad traffic northwest of Houston today.

No one was injured when 22 cars from the 100-car freight turned over and ripped up about a half mile of track near Hockley, 2 miles to the northwest.

Buses were sent to Hempstead to bring to Houston about 50 passengers from an overnight train from Dallas. The passenger train was stopped at Hempstead because of the wreck at Hockley, 20 miles to the southeast.

## Wear It Everywhere

## STORMS HIT TEXAS

Continued From Page 1

closed because of high water. The department said the roads would be closed overnight and possibly Sunday.

Heavy hail fell at Lubbock, Quannah, Paducah and Chillicothe.

Plainview's Hale County airport had an even 3 inches of rain in about an hour and a half. Rainfall in town measured about 1.50 inches and water flooded sidewalks and into a few stores.

The State Highway Patrol said farm road 308 between Penelope and Malone in Hill County also was flooded. It said a bridge was out on State Highway 14 between Mexia and Wortham.

Violent storm activity near Guthrie showed on the Weather Bureau radar system telephone circuit to Guthrie were out. Hail and heavy rain storms were reported.

Another funnel was sighted about noon Saturday near Lubbock. Earlier, a tornado dipped down near Dallas but did no damage. At least seven twisters were reported in the state Friday but only minor property damage was reported.

One person was dead and one was missing as result of torrential rains of up to 9.8 inches fell in state Friday and early Saturday. Dozens of others were rescued from flood waters after taking refuge in trees and on the tops of stranded cars.

Between 150 and 200 persons were evacuated from low-lying districts of Waco when rain-swollen streams left their banks and flooded some streets with water up to 1 feet depth.

The heaviest reported rain in the 24-hour period — 9.8 inches—was at a farm near Waco.

Other Central Texas points had deluges. Purdon reported 8 inches and Dawson 7 inches in the Corsicana area. Waco had 5.45 inches during the 24 - hour period, the heaviest since the downpour accompanying the May 11, 1953 tornado. Corsicana had 4.80 inches.

Earlier Friday rains ranging from 6 inches in South Texas to 4 inches in the Red River Valley area swept the state.

Highways were closed temporarily Saturday in a number of Central Texas areas.

At McGregor Harris creek went out of its banks and washed away a section of the McGregor cemetery. About 20 caskets were uncovered and washed away.

The Cotton Belt Railroad was blocked when Richland Creek washed out a trestle near Corsicana.

Along the Mexican border, the Rio Grande, running 24,900 cubic feet a second from rains ranging up to six inches in its watershed, was expected to crest Saturday at Laredo.

The death attributed to the storm was that of Dellous Stitts, 31, of Ben Frranklin who was fatally injured early Saturday when he lost control of his car during a driving rainstorm west of Paris.

Airplanes aided in an intensive search Saturday for Elbert Ussery, 77, after the elderly man's hat was found on the bank of a swollen creek near Abilene.

The additional rain delayed again spring planting. But officials in many cities were gleeful in reporting that lakes furnishing municipal water were brimming.

Since Thursday the three major reservoirs supplying Dallas gained 8,620,000,000 gallons to put the city's water reserve near a record level.

Water was pouring through gates at Lake Waco while at Corsicana, water was going over the spillway of Lake Halbert, the city's principal reservoir, for the first time in 10 years.

## Baytowner Upset

HOUSTON, April 20 (AP)—Billy Buckley of Oklahoma City upset fourth-seeded Doug Bashrum of Baytown, 6-4, 6-4, today in the quarterfinal round of the annual Ricer Oaks Country Club Junior Boys Tennis Tournament.

## Safe 'n Sound

By JOHN BOREN

I've been wondering what it would be like if there were no such thing as insurance . . . Not only would I be in a different business but most of our time would be spent worrying whether some catastrophy would befall us . . . Housewives would go about their work with their apron pockets filled with sand in case a fire broke out at home . . . no one would dare drive their car on a public road . . . all the stores would probably close their doors . . . Maybe this is a slight exaggeration but it might not be . . . The person without adequate insurance wouldn't be at all foolish if he did the above things. It's becoming more important all the time to have a reliable insurance agent plan your coverage . . . To be sure . . . insure . . . Call BOREN & WEST INSURANCE AGENCY, 2607 Avenue S, Phone 3-3651.

## Big Jaycee Parley Set

CORPUS CHRISTI, April 20 (AP)—The Texas Junior Chamber of Commerce state convention which opens here Thursday is expected to draw some 1,500 Jaycees and their wives. It is expected to be the state's biggest to date.

The three-day event will be preceded by executive committee sessions Monday through Wednesday at Aransas Pass. F.E. Hightower of San Angelo, state president, will meet with 18 state vice presidents, and seven national directors to judge club scrapbooks.

Pre - registration will begin Wednesday morning.

State Rep. Jim Wright of Weatherford will speak at the keynote luncheon Thursday.

## Bank President Dies

FORT WORTH, April 20 (AP)—Joe T. Yeargan, 51, president of Riverside State Bank, died at his home today after being stricken with a heart attack.

## Trial Due On Murder Count

LONGVIEW, April 20 (AP)—Perry Ross, 22 of Tatum is due for trial here next week on a charge of murder filed after a Negro, 16, was shot to death in an East Texas cafe.

John Reece was slain at a Negro cafe in October 1955 from a passing car. Two Negro girls in the cafe were wounded.

Judge David Moore granted this week a motion made by Dist. Atty. Ralph Prince that a murder indictment against Joe Simpson, 22, be dismissed. Simpson, charged with Ross in the shooting, is expected to testify next week.

No charges of murder were filed against Simpson after the indictment was dismissed. Prince said the action was taken so that Simpson could testify at Ross' trial.

## Pilot Convention

TYLER, April 20 (AP)—District 8 of Pilot International will hold its annual convention in Tyler April 26-28. The district includes all of Texas except El Paso.

## Women's Meeting

AUSTIN, April 20 (AP)—The Texas Federation of Women's Clubs, founded in Waco May 12, 1897, will hold its convention here May 6-9.

## City Manager Quits In McAlester Dispute

MCALETER, Okla., April 20 (AP)—City Manager Arnold Bookout, center of a controversy over an alleged forged letter of recommendation for his job, resigned today "so I can better deal with the forces against me."

The controversy started when a bonding company notified the city it intended to recall the $25,000 bond posted by Bookout when he was employed March 1. He formerly was a San Antonio policeman.

San Antonio City Manger Steve Matthews denied writing a letter of recommendation received here before Bookout was hired. Bookout also denied knowing anything about the letter and said his enemies probably wrote it.

SPECIAL NOTICE

Manufacturer with sales and dealers in every principal city of the United States is inaugurating a distributorship program to augment the sales effort, inventory control, and warehouse facilities of its dealers.

Sales in the State of Texas necessitate the appointment of distributors in this area. Applicants for these exclusive distributorships must have proven sales ability, a sound business background, and $15,000 to $50,000 in cash.

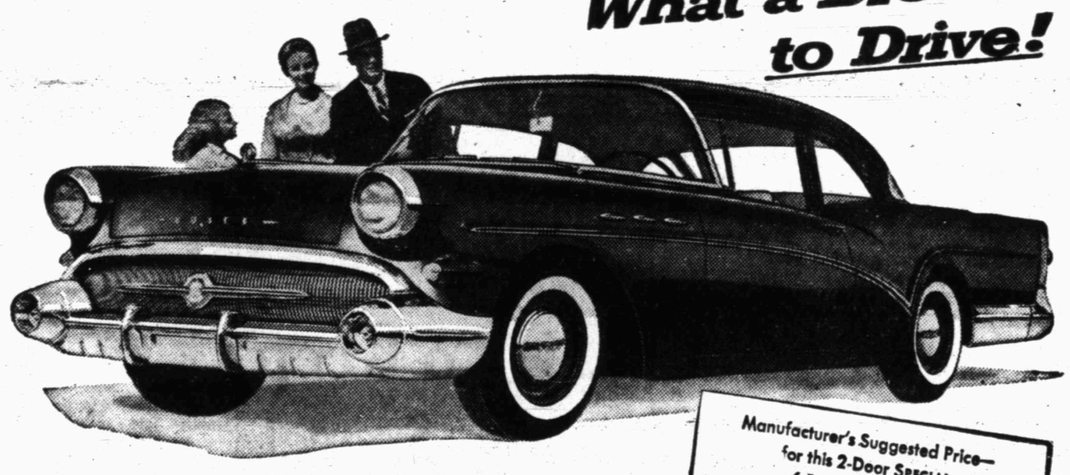

Potential income of distributorships, based on actual income of our present distributors, is in excess of $60,000 per year.

Mr. Irwin Gross, our factory representative, will be at the Town House in San Angelo starting Wednesday, April 17, to personally interview applicants. For appointment write or phone to:

What a Buick! What a Buy!
What a Dream to Drive!

THE more you look at a new Buick, the more you realize what a spectacular car it is.

It has a suave new body, ingenious new frame, 150 new features in its chassis alone. It's so low, *you* feel inches taller. And there's headroom, legroom, *footroom* galore.

***But what you can't see***—what you simply have to *feel* for yourself—is what happens when you take this beauty to the road. *Any* road.

***We came up with*** a new kind of steering, new "nested" torque-tube ride, new braking that's smoother, surer, more powerful.

***We poured our engineering skills*** into a completely new V8 engine with the "power-pack" built right in, at no extra cost—a fire-breather, for fair.

***And we capped the climax*** by building a new Variable Pitch Dynaflow* that can't be beat for snap, sparkle, smoothness.

Granted, you've heard about dream cars, and maybe seen a few at Auto Shows. *But here's the first honest-to-greatness dream car to drive!*

You can afford a Buick if you can afford any new car. So drop in on your Buick dealer today.

*New Advanced Variable Pitch Dynaflow is the only Dynaflow Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special.

Manufacturer's Suggested Price—for this 2-Door SPECIAL 6-Passenger Sedan
$2595.83
(including Delivery and Handling Charges and Federal Excise Taxes)
Transportation charges, state and local taxes, if any, accessories and optional equipment, including Dynaflow transmission, radio, heater and white sidewall tires, additional.

# Crimemobile To Be Brought Here

The Crimemobile of the Texas Law Enforcement Foundation will make a special appearance in Snyder next week.

On Tuesday the Crimemobile will be at Snyder High School for special viewing by high school students, and on Wednesday it will be on the square downtown for the general public to see.

The Crimemobile is a fully-outfitted scientific detection laboratory, complete with more than a dozen examples of moder-day eqquipment, apparatus and devices used by law enforcement officers in solving crimes and apprehending criminals.

The Crimemobile takes away the popular appeal and false glamour of the criminal. Those who see the actual machinery of law enforcement, plus graphic illustrations of their uses, will want to stay as far away from crime as possible.

The Texas Law Enforcement Foundation resulted from a recommendation of John Ben Shepperd, former Texas Attorney General, and his committee on law enforcement. The foundation was chartered as a private non-profit educational corporation in July of 1955.

C. T. McLaughlin, Snyder oilman-rancher, is heading arrangments for the appearance of the Crimemobile in Snyder.

• • •

CRIMEMOBILE PROCLAMATION

WHEREAS, the CRIMEMOBILE is the Texas Law Enforcement Foundation's method of enlisting the aid of good citizens in support of good law enforcement in Texas, and through this medium will call public attention to the great cost of crime in terms of wasted lives, violent deaths, human indignities and property loss estimated at $989 million last year, and

Whereas, the CRIMEMOBILE, by the existence of its many scientific exhibits and displays, should be of appeal to our youth as it travels over the State and may serve to instill a sense of individual obligation in our boys and girls—our leaders of tomorrow—in carrying out the aims and purposes of good law enforcement in Texas, and

WHEREAS, the CRIMEMOBILE, will bring vital information to the citizens of SNYDER pertaining to law enforcement practices and procedures in Texas, and at the same time instill an awareness to the causes of good law enforcement.

NOW, THEREFORE, I, HAROLD BENNETT, Mayor of the City of SNYDER, do hereby set aside APRIL 23 and 24 as CRIMEMOBILE DAY in SNYDER and urge all citizens to visit the CRIMEMOBILE on this date.

Harold Bennett
MAYOR OF THE CITY OF SNYDER

CRIMEMOBILE—Some of the modern criminal detection equipment used in Texas today is displayed above. It is part of the exhibit of the Crimemobile, traveling exhibit of the Texas Law Enforcement Foundation, which will be at the High School here Tuesday, and on the square Wednesday.

# Bond Rate Hike Okayed By Ike

AUGUSTA, Ga., April 20 (AP) — President Eisenhower today signed a bill authorizing an interest rate hike on government savings bonds. He called the bonds "better than ever" and said they "help assure the economic stability of our country."

The bill gives the Treasury Department a go-ahead to pay 3¼ per cent interest compared with the current 3 per cent. The department has indicated it would put the higher rate into effect on all bonds sold on or after Feb. 1.

Eisenhower signed five other bills at his vacation headquarters at the Augusta National Golf Club before going out on the course for another round.

He was accompanied around the links by his Easter weekend guest, Secretary of the Treasury Humphrey. The cabinet officer does not play golf but he rode along with his host in an electric cart.

The President and Mrs. Eisenhower and Humphrey and his wife plan to attend Easter services tomorrow morning at Reid Memorial Presbyterian Church.

Other bills signed by the President provided for:

1. Deferal of Great Britain's interest and principal payments under certain circumstances on the balance of a $3,700,000,000 loan extended by the United States in 1945.

2. A deficiency appropriation of $320,000,000 for the fiscal year ending June 30.

3. Observance of the week starting April 28 as National Mental Health Week.

4. Placing an oil painting and a marble bust of the late Chief Justice Fred M. Vinson in the Supreme Court building.

In a prepared statement on the bill authorizing an increase in the savings bond interest rate, Eisenhower said the purchase program "has become an integral part of the American way of life" and has "taught countless Americans how to save." he added:

"Today, 40 million Americans own over 41 billion dollars in series E and H bonds. We want to see more people continually buying more bonds so that savings bonds provide even greater financial protection for our people in the years ahead and, at the same time, help assure the economic stability of our country."

# Easter Service Slated

VATICAN CITY, April 20 (AP)—Holy Week's mournful rites drew to a close tonight and thousands of Christians prepared to hail the risen Christ in triumphant Easter services.

Under a brilliant spring sun, thousands of pilgrims thronged all day to St. Peter's Basilica. Rome was packed as never before with pilgrims and tourists. Tourist organizations estimated there were more than a quarter of a million in the city.

At noon about 10,000 of them assembled in St. Peter's Square and cheered Pope Pius XII. The 81-year-old head of the Roman Catholic church appeared briefly at his apartment window to bless the throng. Many knelt on the cobble stones.

Although decrees of the Roman Catholic church effective for the first time last Easter now extend austere Lenten observance until midnight tonight, joyful notes marked some of the final Holy Week rites. This was especially so in lighting of the new fire and candles and in the blessing of baptismal founts. These services were held in St. Peter's and in most of Rome's nearly 500 churches.

Preparations, meanwhile were completed for the pontiff's Easter message, which Vatican sources described as "an important one." The Pope will begin his address at noon —6 a.m. EST — from the balcony above St. Peter's central door.

This year it will be televised for the first time. Nearly a score of European networks will be hooked up for direct transmission. Other networks will broadcast it later in the United States and Canada. Vatican radio will broadcast translations in 28 languages.

# Actor Is In Brawl

RENO, Nev. April 20 (AP)—The divorced wife of actor Anthony Franciosa today said his brawl with a Los Angeles photographer was the result of a "strain he's been under. It's too bad his personal worries erupted."

The former Mrs. Beatrice Bakalyar Papaleo was given a divorce yesterday on grounds of willful desertion.

Mrs. Bakalyar said "Tony and I only wish the deepest happiness for one another." She added she had not made a statement attributed to her yesterday. "I did not talk to any reporter—my lawyer may have."

Franciosa faces an assault complaint filed by the photographer. Shelly Winters, the actor's fiancee, stood by during the fight.

# Naval Review Be Held In U.S.

WASHINGTON, April 20 — Plans for the International Naval Review in June, first in this country in half a century, are being broadened to show the 40,000 visiting foreign sailors a sample of life in the United States.

Along with the mighty display of warship power by more than a score of nations at Virginia's great Hampton roadstead, the visitors will have a chance to see some Americana ashore, including:

Cultural affairs — symphony concerts, ballet, instrumental and vocal soloists.

More folk events — hillbilly music, an ice show, Ringling Brothers-Barnum & Bailey Circus, a rodeo, the "biggest beach party in the world," with camp fires and hot dog roasts stretched along eight miles of Virginia Beach.

A county fair — with overtones of an international trade exhibit, where the products of American industry and a cross-section of life in American homes will be displayed, including modern farm kitchens.

Sports — basketball, rowing, swimming. (The sponsors wanted to stage a big league baseball game, but couldn't find a stadium big enough.

Visits to Williamsburg, Va., the almost completely restored village of colnoial days, and to Jamestown Island, where the 350th anniversary of the founding is being observed with pageantry. The naval review is a part of this anniversary celebration.

Officials and representatives of the naval review program, including Ben Wahrman, executive director, and Rear Adm. Howard A. Yeager, outlined the plans at a news conference.

Wahrman explained that it it would have been good if crews of the visiting foreign ships could make inland travels to see the United States. Because that might be too great a financial burden on them "we are trying to bring as much of the United States to them as possible."

Theme for the nacal review, says an announcement, is " 'Freedom of the Seas,' since the Jamestown colony marked the benining of a successful flow of peoples and their cultures across the Atlantic from many lands to form the United States."

The State Department issued the invitations to nations to send ships for the first review held in the United States since 1907. The department, says the announcement "felt that only those nations should be included which might have some reason to participate in celebrating the Jamestown founding and the colonization of North America." Thus the list was "limited to the Americas, those European nations which participated in settlement of this country, and those countries which are members of NATO, which has headquarters (Supreme Allied Command, Atlantic) at Hampton-Roads."

# *Kalser Shows Movie Short In Courtroom*

By CHARLES MERCER

NEW YORK (AP) — One day not long ago a bustling gentleman named Konstantin Kalser was arrested for driving 40 miles an hour in a 35-mile zone on one of New York's suburban parkways. Appearing in court a few days later, he cheerfully paid his $5 fine and then asked and received the judge's permission to show a film.

Onto a portable screen came an astonishing movie short. It had been made by Kalser from the back seat of his car while being driven by his blonde and beautiful wife over the same stretch of parkway where he was arrested. The camera showed the speedometer at 40 miles an hour while other cars sped past. One driver swerved over to berate Mrs. Kalser for driving so slowly.

The judge complimented Kalser on his ingenuity. He received a barrel of complimentary mail and became the subject of newspaper editorials.

"It was almost as much fun as winning the Oscar," says Kalser. "It was the only noncommercial film I've made lately. I like to think of it as a sort of public service."

If you watch television, you often see films made by Kalser's firm, Marathon TV Newsreel, Inc. The sort of ingenuity and craftsmanship he displayed in court is quite typical of his work. An outstanding example was "Crashing the Water Barrier," the filmed story of Donald Campbell's record-breaking speedboat run on Lake Mead, Nev.

Made for an oil company, it won the Academy Award for the best one-reel short subject of the year.

"What we do is public relations on film for television," says Kalser, who cut his movie-making teeth as a combat photographer in World War II. "It's industrial news made palatable for television."

SNYDER, TEX. PH 35611

HE'S TEMPTED

# Doctor Not Ready To Talk

MIDLAND, April 20 (AP) — Dr. Henry Schlichting Jr. said today he was "some times tempted" to tell everyone what he knows about the sensational legislative payoff investigation.

"But then I feel it is best not to say anything right now," he said in his office here today.

"There will be a time when it will all come out and I can talk."

The naturopath has been called a "mystery witness" in the widespread investigation of accusations that legislators have been bribed.

The probe was started by a special House committee in Austin, then abruptly handed to the Travis County grand jury because of "major developments."

After a Grand jury Thursday, Travis County Dist. Atty., Les Parker, said Schlichting had been to Austin. Procter indicated he had made a written statement to the Department of Public Safety.

"I believe I just have no comment on that now," said Schlichting, a prominent civic leader and operator of the Midland Clinic-Hospital. Numerous patients waited in the reception room of his nicely-furnished and well-equipped hospital, which advertises treatment for "acute and chronic diseases of all types."

Schlichting was chairman of the legislive committee of the Texas during the 1955 LegislatAure.

A sign in his office says he also was president of the American Assn. of Naturopathic Physicians in 1955 and 1956.

Five witnesses from a naturopathic association feuding with the TNTA said Thursday before they went into the grand jury room that they believed "Schlichting and his gang" could give all details of funds raised in 1955 in the interest of legislation for and against Texas naturopaths.

Asked if he would like to answer any of the implications, Schlichting said:

"Personally I don't feel that I'm involved but I just rather not say anything right now."

He said "no comment" to all other questions.

Schlichting has been described as a member of most Midland local civic organizations—"a joiner who is very highly respected," one business man said.

Acquaintances said Schlichting has been in Midland for about 20 years.

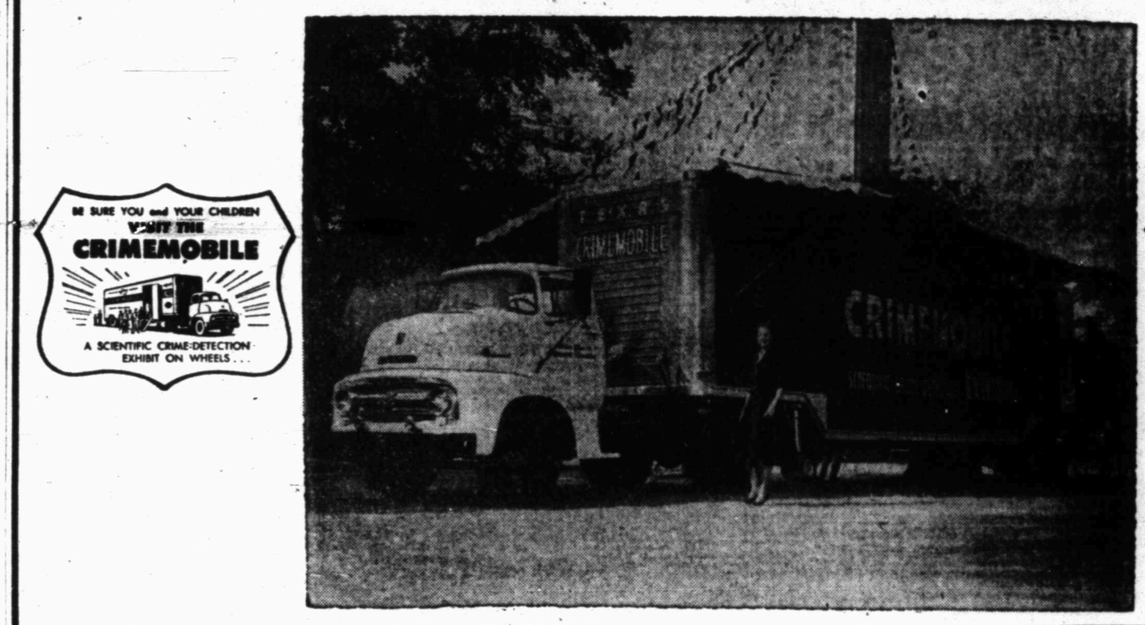

Advertisements of ihs clinic-hospital, directly across the street from the city-operated Midland Memorial Hospital, say he established a clinic here in 1941 and built the hospital unit in 1947.

# The Crimemobile Is Coming To Snyder!

THE CRIMEMOBILE is a fully-outfitted scientific crime detection laboratory, complete with more than a dozen examples of modern-day equipment, apparatus and devices used by law enforcement officers in solving crimes and apprehending criminals.

It is housed in a 40-foot truck trailer so that it can serve as a rolling classroom to impress Texas citizens—particularly young ones—in every corner of the state with the ingenuity and efficiency of modern police technique. It moves from one community to another, by invitation of school officials, youth workers, civic clubs, or local law enforcement officers.

The CRIMEMOBILE takes away the popular appeal and false glamour of the criminal. Those who see the actual machinery of law enforcement, plus graphic illustrations of their uses, will want to stay as far away from crime as possible.

The CRIMEMOBLE is sponsored by the Texas Law Enforcement foundation which resulted from a recommendation of the Texas Attorney General John Ben Shepperd's Committee on Law Enforcement and was chartered in Texas as a private non-profit educational corporation in July of 1955.

# Cary Is On Lookout For Aid To Soil

A. B. Cary, who operates a livestock farm 20 miles southewst of Snyder on the Colorado River, is always on the lookout for a grass or legume that will help him properly utilize the soils that he has.

In the past, he has reseeded some deep sand with sand love grass, buffel grass, a mixture of Blue stem grasses as well as Blue Grama. He reseeded these grasses early last spring in a dead little cover crop. The summer of 1956 was a dry one, but Cary did have an encouraging number of grass seedlings established before winter came on.

Cary said there is now evidence of many more seedlings coming up this spring. He, like many other farmers and stockmen, is now hoping for a period of falling weather.

Cary doesn't stop with the seeding of grasses. Last fall he decided he needed a cover crop on the 112 acres just east of the family home. He began to check around to see what he could use to hold his soil, improve its fertility, and furnish a high residue to improve structure.

He settled on Austrian Winter Peas and barley, and seeded two rows of barley and then two rows of winter peas on the entire 112 acres. Inoculant was applied to the Austrian Winter Peas before they were planted. This insured that the proper bacterial culture would be present in the soil to help the plants make and to store nitrogen.

Cary and SCS technicians from the Snyder work unit have examined the roots of the winter legumes and found nodules present on nearly all of those plants examined. Guy Moore, work unit conservationist for the Soil Conservation Service, said that the barley and legume combination grown by Cary will add residue and nitrogen to the soil and reduce wind and water erosion. Should rains come within the next two weeks, this cooperator of the Upper Colorado Soil Conservation District will turn tons of residue back to the soil.

The barley is now six to 12 inches high, and the winter legumes have runners up to 14 inches long.

There are 461 million acres of commercial forests in the United States.

## Old Custom Revived In Santa Fe

SANTA FE, N. M., April 20 (AP) —An almost forgotten Spanish colonial custom — which once made aristocratic New Mexico belles delighted to have eggs broken over them — is being enthusiastically revived by Santa Fe's younger set for the Easter season.

They will use hollow eggs filled with multicolored confetti.

Two hundred years ago, the custom was similar but somewhat more dignified, perhaps because it was restricted to the aristocratic families and to the formal pre-Lenten ball, held the Tuesday before Ash Wednesday.

To these very fashionable events, the eligible young bachelors would bring "cascarones" — hollowed eggs filled with perfume, cologne or perhaps dried rose petals.

At the climax of the "bails," they would crush the cascarones in their hands over the heads of the senoritas they best loved, and, as a member of the Sociedad Folklorica puts it, "the one with the most eggs crushed over her was considered the most popular belle of the ball."

The Sociedad Folklorica, which devotes itself to preserving the historic customs of the original colonists, revived the old custom in 1940 as part of its post-EKAST in 1940 as part of its post-Easter ball, adding a touch by giving the egg "cascarones" fancy paint jobs and fancy costumes.

Just three years ago, the idea hit students at St. Francis School.

## SUPPORT VALUE IS CUT

WASHINGTON (AP)—Secretary of Agriculture Benson proclaimed today continuance of federal marketing quotas on wheat in 1958. He cut the crop's price support value the equivalent of 198 million dollars or more.

Growers would be limited, as during the past four years, to the planting of 55 million acres free of penalties under legislation designed to hold down production in times of surpluses. The county has an extra year's supply, most of it in government surplus stocks.

The support rate for the 1958 crop—much of which will be seeded this fall—was set at a minimum of $1.78 a bushel compared with $2 for the 1956 and 1957 crops.

On the basis of a below average harvest of 850 million bushels — roughly the amount to be expected under present farm programs —the crop would have an aggregate support value of about $1,513,000,000 compared with $1,700,000,000 at the $2 a bushel rate. Support rates greatly influence market prices.

This reduction in the wheat price floor follows lowering of supports this year for corn, cotton, oats, rye, barley, soybeans, sorghum grain and several other less important crops.

To become operative, the marketing quotas must be approved by at least two-thirds of the growers voting in a referendum to be held June 30 in 36 designated commercial wheat producing states.

# Farm Policy Watched Closely

By OVID A. MARTIN
Associated Press Farm Reporter

WASHINGTON, April 20 (AP) — Time is becoming a vital element in efforts of the Eisenhower administration to leave the farm situation in better shape than it found it in 1953.

Certainly, what the administration does between now and the elections in 1960 may have a lot to do with Republican chances of holding onto the White House that year.

Moving into its fifth year in office, the administration is faced by these three hard facts:

1. Farm prices are 13 per cent below the level prevailing when Eisenhower took office.

2. Farm surpluses are nearly three times as large as they were at that same time.

3. The government has spent more on agriculture during the first four years of the administration than in the preceding 20 years.

As these facts clearly indicate, the administration has a big job getting agriculture back where it was four years ago.

It is a recognition of this task — and the relative shortness of time remaining — that is leading Secretary of Agriculture Benson to say that present programs need drastic overhauling. Otherwise, he says, surpluses at the end of the administration may be as large as they are now.

The government now has $8,360,000,000 invested in farm surpluses. The investment four years ago was $2,912,000,000. This big increase was made in the face of broad use of crop production control programs and expenditure of upwards of four billion dollars in subsidizing exports.

Of course, Benson says that programs of the Truman administration, which by law he was required to use through 1954, contributed heavily to the buildup of surpluses.

Two years of programs patterned largely after Benson's recommendations have cut the investment in surpluses about half a billion dollars. This is not fast enough, however. It would take an annual reduction of more than three times that amount—or about $1,816,000,000 — to get the investment down to the pre-Eisenhower level by election time in 960.

The secretary is counting some on the new soil bank progran to help reduce surpluses. Under this program, the department is authorized to pay farmers up to $1,200,000,000 a year to retire land from production of surplus crops.

But there is serious doubt among farm leaders that it will do the job. In the first place, many farmers are staying out of the program, preferring to take their chances on producing all that is possible under whatever federal limitations that may be in effect.

In the second place, reports show that poorest-producing land is being retired and that extra heavy use of fertilizers is being made on the remainder of the land in an attempt to keep production as close as possible to previous levels.

During the past three years, the administration has had the benefit of a much broader export subsidy program than it is likely to have during the next three. In 1954 Congress authorized the department to sell three billion dollars worth of farm surpluses to friendly countries not only at cutrate prices but for currencies of those countries.

This three billion dollar authorization has been used up and the President has requested an addition of only one billion dollars for the period ahead.

But the things that worry Benson the most are provisions of present crop control and price support laws. Under these laws, he is required to raise price support rates and to liberalize planting allotments as surpluses decline.

Benson says that higher supports and larger planting allotments would encourage unneeded increases in production which could only rebuild new surplus stocks.

He believes his department should have authority to fix price supports and planting allotments at whatever levels it believes would stabilize production at levels required by markets.

In other words, it would be possible, the secretary says, for the price support and production control program—as they now operate — to boost production and largely offset efforts to dispose of surpluses.

But Benson must pattern his programs after the laws as they now stand unless Congress changes them. He recognizes, however, that the lawmakers are have shown that in rejecting proposals for a new corn program in no mood this year to make to take up other farm proposals, changes in farm legislation. They have shown that in rejecting proposals for a new corn program as well as displaying reluctance

Nevertheless, the secretary hopes to get his ideas laid out

## Auto Damaged By Blaze In Snyder

Fire damaged the seats of a 1946 model car in north Snyder about 2:30 o'clock yesterday afternoon.

Firemen who went to the scene and put the fire out said it was probably caused from a cigaret.

Broadway, New York's center of theatrical and night life, was first named by early Dutch settlers as "de Herre Straat," which means grand or lordly.

*IN TEXAS THIS WEEK*

# Farm Conditions Generally Improved

COLLEGE STATION, April 20 (AP)—Texas farm conditions this week generally improved, the Extension Service said today.

District agricultural agents have reported to Director G. G. Gibson that more rain is needed, especially in West Texas, and warm weather is needed in all sections to enable farmers to catch up with field work and for maximum crop growth.

In areas of heavy rainfall, agents reported pasture and livestock conditions improving but that much growth was weeds and spring grass and soon would be past peak forage production.

In the Panhandle, wheat and grass were making slow growth and much moisture was needed along with warm weather. The freeze of last weekend apparently did more direct damge to fruit than to wheat. Cattle were still being fed.

Cold brought field work to a standstill in the South Plains. Surface moisture is about gone. Planting has not started.

Rain was needed in the Vernon District if small grains are to continue their good growth. Winter grain mite was damaging grain in Knox and Baylor counties. Green bug damage was reported from Fisher County. Grain sorghum planting was continuing but cold retarded germination. Livestock were improved.

Moisture was inadequate over most of far West Texas. Most cattle, sheep and goats still are being fed but sheep and goats are getting some grazing from weeds. Ranges are in poor condition. Sheep shearing was in full swing. Cotton planting has started and irrigated crops are in excellent condition.

In the Nacogdoches area, field work again was delayed by showers, and dry, warm weather is needed. Planting of watermelons, tomatoes and other vegetables was about completed. All crops are later than normal. Pastures and livestock were described as good.

Moisture was sufficient over northeast Texas. Field work was delayed by wet weather, but corn has been planted and preparations for cotton planting are going forward. Cattle and pastures are as good.

No damage has shown yet in peaches or small grains in North Texas from last week's freeze. Some farmers fear that lodging will be a problem in small grains where rank growth is occuring. Livestock and pastures improved.

Good surface moisture was reported from Gonzales. Subsoil moisture conditions are improving and small grains are making excellent growth. Grain sorghum is making good progress and cotton planting about completed in southern counties and getting underway in northern counties. Pastures are covered with growth but mostly weeds. Livestock is doing good.

Tractors were humming in southeast Texas as farmers tried to catch up with field work. Some small grain continues to be grazed while some will be cut for hay. Wind damage to melons and tomatoes is reported from some areas but generally conditions for pastures, crops and livestock are good.

High winds have dried surface moisture in parts of the Rio Grande Valley and cotton has made slow progress because of cool weather. Some cotton has been replanted; vegetables are doing good; livestock is in fair to good condition with ranges improved.

Surface moisture is good but weather is too cool for best germination of seeds in central Texas. The last freeze apparently did little damage. Some oats are heading while planting of grain sorghums continues and cotton planting has started. Spring grasses and weeds, he said, were providing grazing.

From San Angelo, small grains generally were reported looking good. In some counties, livestock feeding is continuing but winter weeds and grasses are helping. An excellent lamb crop was reported from Irion County. Small grains were heading in Bandera County. High winds in some counties were continuing to deplete both surface and subsoil moisture.

## Mt. Etna Erupts

CATANIA, Sicily, April 20 (AP)—Mount Etna's on-again off-again volcanic eruptions eased today as a third flow of molten lava came to a halt in the Valley of the Lion at the 7,500-foot level.

An average maple tree yields 15 to 20 gallons of sap, which boils down to a little more than a quart of syrup.

**DAUGHTER OF TEXAS**—The eyes of Texas will be on the Lone Star state's favorite daughter, Kathryn Grant, above, when she is brought to the screen with Tony Curtis and Martha Hyer in Universal-International's new suspense film, "Mister Cory." A native of Houston, Kathryn plays her most important screen role to date in the new film.

## Early Day Actors Appear More Daring

By HUBBARD KEAVY

HOLLYWOOD (AP)—Maybe I was more starry-eyed in those bygone days, but it seems to me that when the Errol Flynns and the John Barrymores strayed from the conventional paths, they did so with a great deal more derring-do than the Sinatras and Mitchums of this era.

When actors of an earlier day got into trouble, and they did so with alarming frequency as newspaper library files attest, they did so with more ingratiating qualities than their counterparts of today.

I was impressed, as were most newsmen, with the great Barrymore, John. There was a man who, whatever he accomplished, did it with brilliance. He loved every second of his eventful life. I found him haughty and aloof one time, roguish and picaresque the next. His conversation sparkled with well-turned phrases and Rabelaisian wit.

For no particular reason, John asked me to help him launch the Infanta, a $15,000 yacht. The party lasted long after the Infanta slid into the water. There were buckets of champagne. I wondered where John would take her on the first trip. "You know, there's a rare South American condor I'd like to have. I'm going down the West Coast and bag one. Crazy people think up crazy things to do. Want to go along?"

It wasn't the bubbly talking, after all. Barrymore went after the condor, bagged it and caged it on his estate in Beverly Hills. The bird was a horrific looking thing, with a penchant for kissing his master. His — or her — name was Murphy.

The three Barrymores, separated when young, were rather cool and formal toward each other. At a dinner party the hostess addressed Ethel, John and Lionel, "You folks have been introduced, haven't you?"

In Hollywood there always have been but two classes: first class and no class. "First class" was well illustrated when a famous producer — famous but broke— gave an elaborate dinner, served on gold plate rented for the occasion, to 50 persons he wanted to impress. The wine and the conversation were sparkling. Suddenly the butler whispered to the host. He excused himself, went to the front door and handed the keys to his new Cadillac to the man who was there to repossess it.

Tom Mix, suddenly catapulted into the millionaire class on his $11,000-a-week salary, went nowhere except in the longest white car—on whose hood was a large silver horse head — and wearing the inevitable white, well-tailored cowboy suit. With black piping. Every fence and newel post, every door, every gate on his acres was adorned with the TM brand. Tom's idea of first class may have been a mite repellent to less flamboyant people, but he was colorful. He helped make a little town—or rather a segment of sprawling Los Angeles — one of the best known datelines in the world.

St. George, Bermuda, is believed to be the oldest English-speaking community in the Western Hemisphere. It was founded in 16-12, eight years before the Pilgrims landed at Plymouth Rick.

## Spring Art Shows Being Held In State

By MARSHALL COMERER
The Associated Press

Now comes the spring art shows. One of the more important, the Fiesta of Art and Crafts sponsored by the Texas Fine Arts Assn., will be held April 26-28 at Austin.

Paintings, sculptures, all the handicrafts and photography will be displayed in gaily decorated covered booths. Numerous regional exhibits are expected.

Programs will be given of folk, creative, Indian and square dancing, Punch and Judy shows, music, styles and discussions and group criticisms of paintings.

Orlando Barera, conductor of the El Paso Symphony Orchestra, is returning to his home in Bologna, Italy, for two months this summer as guest conductor.

The music of Cole Porter will feature the annual pops concert of the Lubbock Symphony Orchestra April 29.

The Corpus Christi Symphony will have a bonus concert for season subscribers next season. The concert will feature Ruth Page's Chicago Opera Ballet Feb. 18.

The Metropolitan Opera Co. will give six of its most colorful productions in the Southwest this May.

The Met will give Il Trovatore, La Boheme, Traviata and Perichole at Dallas May 10-12; Carmen and Tosca at Houston May 13-14, and repeat Tosca at Oklahoma City May 15.

On the show bills....

The Austin Civic Theater closed its season with the light comedy "Janus."

The final play for the Corpus Christi Little Theater will be "The Women," opening May 16.

The El Paso Payhouse is holding readings for its next show, "Night Must Fall."

The Community Players of Beaumont will close with "South Pacific" May 17-18.

The Baylor Music School production of Verdi's opera "Otello" is scheduled for May 9, 10, 11 and 13.

Convair's Wing and Masque Players of Fort Worth are presenting "Witness for the Prosecution" as their next play.

The Greater Fort Worth Community Theater will open "The Philadelphia Story" May 6.

The Texas Western Drama Department has schedule of five plays for its summer festival in June and July. They are "Mister Roberts," "The Tender Trap," "The Fourposter," "House of Bernada Alba," and "Tea and Sympathy."

The first major booking for the Lubbock auditorium next season will be the Paul Gregory production of "The Rivalry." Oct. 9 it is about the Lincoln-Douglas debates.

# AMUSEMENT

## Nothing Wrong With Rock 'N Roll Except The Performers

By ANN RUDD
Written for The Associated Press

AUSTIN, April 20 (AP)—Nothing is wrong with rock 'n' roll music itself, says a professor of music at the University of Texas.

"It's the beer hall atmosphere and some of the people associated with rock 'n' roll that is objectionable," explained Dr. Archie Jones. "It is impossible for any type music to be immoral. The immorality of the question comes in only when people are involved."

Some rock 'n' roll professional performances are not well done and not in good taste, he said.

"It might well be possible," he continued, "that some other performer might take the same songs that Elvis Presley sings and do them well.

"I see nothing harmful about a bunch of kids playing and dancing to rock 'n' roll music in their homes or at a well-supervised school activity."

Jones said rock 'n' roll is no matter of musical importance.

It is only another part of the cycle of "fadism" which has been with us for the last 30 years, he said. The rock 'n' roll era is similar to the black-bottom, bunny hug, and Charleston craze of the '20s or the hysteria exemplified by fans of croners such as Frank Sinatra in the early '40s.

"However, no popular movement ever stays with us as such, but its influence does," Jones continued,

"It is impossible to have any type of music or musical fad that doesn't have an impact or does not color music to a certain extent.

### Nanette Fabray And Writer Get License

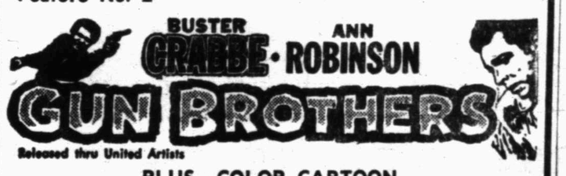

NEW YORK (AP) — Nanette Fabray, television and stage actress, and Ranald MacDougall, motion picture writer and director, obtained a marriage license today.

The actress, listed on the license as Nanette Fabares, said she and MacDougall planned to be married here April 24.

**CRIME SCENE**—A simulated crime scene was one of the highlights of the Texas Department of Public Safety's criminal law and investigation school held here last week. Clint Peoples, right, captain of the Texas Rangers, was instructor in criminal investigation, and the officers which did the investigation in the simulated crime above from left are: A. E. Crowley, polce sergeant; Alfred Khol, and Charile Montgomery, patrolmen. (Lee Watson photograph)

**CERTIFICATES PRESENTED**—Eighteen members of the Snyder police department received certificates of completion of the Department of Public Safety school Friday afternoon at conclusion of the criminal law and investigation school. Tom Laws, right, chief of the educational division of the DPS, presents a certificate to Jack Inman above, while other students and officers look on. Pictured between Inman and Laws from left are, Clint Peoples, captain in the Texas Rangers and instructor of part of the classes, T. L. Steele, Snyder police chief, and W. W. Park, city attorney who instructed part of the classes. Others from left are: Paul Bailey, policeman, L. A. Crenshaw, deputy sheriff, C. E. Carter, patrolman, Jay Massingill, deputy sheriff, Allen Owens, E. D. Allen, Clyde Thomas and Fred Davis, policemen. (Lee Watson photograph)

# Hussein Risks Life And Crown

**Editor's Note:** AP's Correspondent Tom Masterson has just returned from Jordan where he had a first-hand view of the political crisis which threatened to unseat King Hussein and destroy the country. He is now able to write an uncensored account of the royal uprising against a government that was increasingly pro-Soviet.

By TOM MASTERSON

BEIRUT, Lebanon, April 20 (AP)—King Hussein at the moment is the strong man of Jordan.

The 21-year-old ruler, I am told, leaped to the top of a tank at the height of Jordan's recent crisis and dared his soldiers to shoot him.

This display of personal courage, like that of Islam's Saladin and the Christian crusader kings of old, was strong drama. Risking life and crown when he seemed to be facing certain defeat, Hussein turned the tide.

The young ruler, who heretofore seemed more interested in carburetors and fast cars than statecraft, won at least for the time the first really tough political battle of his four-year reign.

When the chips were down the young monarch showed the decisiveness of action of a mature, experienced man and the knack of seizing a good break and making it pay off.

"Perhaps the boy has suddenly reached his manhood," said a leather-skinned old soldier who served under Hussein's tough old grandfather, King Abdullah.

Hussien must share the credit for the success against the Communist elements and their sympathizers with his advisers and supporters — mainly Rahjat Talhouni, chief of the royal cabinet, and Samir Rifai, one-time premier and conservative leader.

But he need not share the credit for the dangerous and dramatic climax that brought him the ultimate victory.

The slender young ruler had started the scrap on April 10 by sacking Premier Suleiman Nabulsi for ignoring the royal ultimatum to suppress Communist propaganda and infiltration.

But on the night of April 13, the king and his advisers had acknowledged defeat by Nabulsi's powerful national socialists and their leftist supporters. The palace was ready to accept a government headed by Nabulsi's uncle.

Hussein was afraid to take the one step open to him — calling on the Jordan army for support and establishing a military government. He had ample reason to be afraid.

His picturesque grandfather, Abdullah, had been assassinated in 1951 on the steps of the mosque of Omar in Jerusalem by an Arab extremist who thought the old king was willing to dicker with Israel for peace.

For months, leftists exploiting Arab nationalistic feeling had been infiltrating into key positions in the army, government and schools.

Even Ali Abu Nuwar, the boy wonder whom Hussein raised from major to major general and made chief of staff of the army, had switched allegiance to the national socialists. The ambitious Nuwar was sure the king's enemies were winning.

So the king hesitated to test the loyalty of his own army. It might mean the loss of his throne and perhaps his life.

Then, for the first time in a well-engineered campaign, the leftists blundered. They began stirring up trouble at the army base at Zarqa. A fight started at the camp. It may never be known officially how many were killed and wounded.

A rumor spread through the turbulent camp that the king had been imprisoned. Tough Bedouin troops, always loyal to the monarchy, went beserk.

At the height of the fighting, Hussein sped from the palace 20 miles to the base. The slight monarch leaped to the top of an army tank and addressed the soldiers.

Eyewitnesses said it was melodrama at its height.

He is reported to have shouted: "If you do not want me as your king, I will go."

One report said he defied them to "shoot me."

A fanatic in the ranks might easily have done so.

Instead, officers and men alike tossed their headdresses to the ground, the ancient Arab sign of loyalty and obedience. The little king had won the day.

When tough, angry Bedouin troops swarmed into Amman, their faces smeared black in the traditional sign that they meant to kill, the opposition caved in.

A Jordan official said this incident seemed to change the king from a playboy who preferred fast cars, fast planes and fast company.

Few observers expect however, it will change a well-known weakness. The monarch is easily influenced. He is a soft touch for a persuasive person.

Optimists voiced the hope that the turn of events might lead Hussein and Queen Dina to patch up their quarrel. They have been estranged for months. She lives with her parents in Cairo.

In theory, Hussein is a constitutional monarch holding no more power than Queen Elizabeth of Britain.

To cool observes the king appears merely to have won the first round. If he loses army support, he could lose all.

## 250 Are Expected

BIG SPRING, April 20 (AP)—Some 250 delegates are expected at the convention of the Texas Graduate Nurses' Assn. April 24-27.

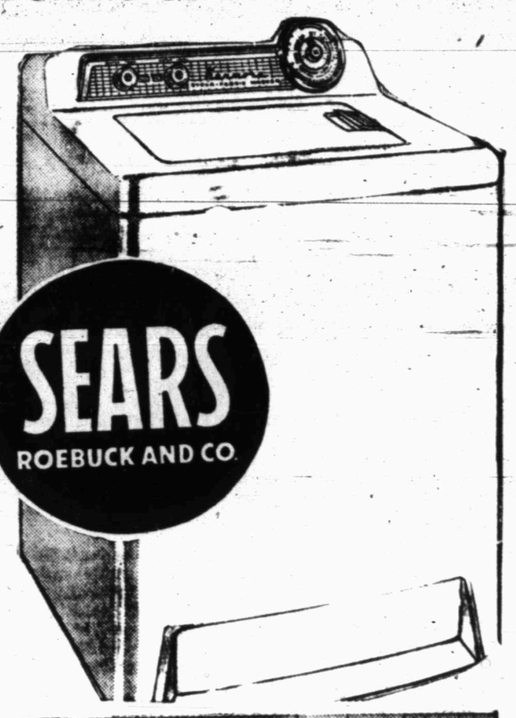

## Gift For Hospital

LUFKIN, April 20 (AP)—A gift of $10,000 for a new wing at the Lufkin Memorial Hospital from N. C. McGowan, president of United Gas Corp., was made at ground breaking ceremonies this week.

When seized by an enemy from behind, a lizard can break off its tail without harm. A new tail grows back.

## BUCKIN' THE LINE

By BUCK FRANCI
News Sports Editor

WHEN THE 1957 TIGER tracksters annexed the District 3-AAA title coupla weeks ago, it wasn't the first district track championship in Snyder High School history.

Thanks to Geral Green, we have learned that the first SHS district track crown came in 1932. And three members of the Tigers' 1932 track team qualified for the state meet and this trio gave Snyder a third-place finish in the team standings in the state meet at Austin.

Tigers qualifying for the state meet in '32 were Bedford McClinton, Buck Howell and Clint Fesmine. McClinton won first place in the low hurdles in 24.8 and 5th in the 100-yard dash. Howell ran second in the 220-yard dash and fourth in the 100.

Fesmire qualified for the 880-yard run but failed to place.

Sherman won the state meet in '32 with only 13 points. North Side of Fort Worth was second with 10 and Snyder third with nine.

### Howell Double Winner In District

In the 1932 district meet held at Abilene, the Tigers finished on top with 28 points. Big Spring was second with 26½ points and Abilene third with 22.

Howell won two first places in the district meet, winning the 100 in 10.2 and the 220 in 22.7. McClinton copped first place in the lows in 24.9.

The writeups in the Scurry County Times concerning the '32 track season did not ever specify the distance of the low hurdles. If our memory serves us correct, the low hurdle distance once was 200 yards and perhaps that was the length of the low hurdle even in '32.

The distance later was cut to 180 yards in the low hurdles.

---

The 1932 Tiger track team, coached by Red Moore, finished second in the San Angelo Invitational, first in the Tech Relays, first in district meet and third in state meet.

Not a bad season, by any means.

McClinton, by the way, is now employed by a railroad company in Fort Worth.

We do not know the whereabouts of Howell and Fesmire, the other two gaining a state meet berth in '32.

McClinton and Howell also competed in the 1931 state meet as did Carrol Greenfield. McClinton's second place finish in the lows and Greenfield's fifth place in the shot were the only points garnered by the locals in the '31 state affair.

Perhaps there have been more district champions won by the Tiger thinlies but right now the number stand at two, in 1932 and 1957, just a quarter of a century apart.

### Morgan Ends King 'Jinx'

Speaking of the current Tiger track team, the locals did right well in the Dallas Invitational Thursday night with all three Tigers taking part placing.

The Dallas meet, though, isn't a true indication of what to expect in the state meet. No preliminaires were held at Dallas so all hurdlers ran against time.

Both Bud Morgan in the lows and Rex Wilson in the highs won their heats. But Morgan's time was one-tenth of a second off the best time of the winner of the other heat, Tommy Minter of Gladewater.

Minter's time was 19.4, Morgan's 19.5.

Morgan gained a little satisfaction at the Dallas meet, though, that of besting Abilene's Iran King. Until the Dallas meet, King was the only lad who had beaten Morgan in the lows, performing the feat twice, at the West Texas Relays and the regional meet.

Wilson won his heat in 14.9 but his time was the third best of the two heats.

---

The Tigers will get their final warmup for the state meet when they take part in the Red Reaider Relays at Lubbock this weekend.

The state meet at Austin will come off the following weekend, May 3-4.

### Houston Claims Paid Trips Were Legal

HOUSTON (AP)—Guy Lewis, University of Houston basketball coach, said yesterday four Indiana schoolboy stars got paid trips to the Houston campus, but said it was permissible under NCAA rules.

L. V. Phillips, commissioner of the Indiana High School Athletic Assn., said Wednesday night at Indianapolis four youths from that state had workouts on the Houston campus "in apparent violation of NCAA rules."

Phillips said he pointed the matter out to Walter Byers, NCAA executive secretary.

The four—Ted Luckenbill of Elkhart, Larry Lakins of Nappanee, Ronnie Horn of Mississinewa, and James Rody, Peru, were ruled ineligible for spring sports in Indiana.

*AT KANSAS RELAYS*

## Texas In 39.9 Sprint Relay

LAWRENCE, Kan., April 20 (AP)—Teas University's fantastic sprinters bettered their own world's record in winning the university quarter-mile relay in 39.9 seconds today, and set the tempo for an all-time high assault on standards in the 32nd annual Kansas Relays.

The weather, wet and miserable yesterday, cooperated with bright sunshine and little wind as records were set in 13 of the 27 university, college and junior college events before 13,000 spectators. Three of the marks were set by Texas' relay teams.

The Texas quarter-mile relay effort came a few minutes after a Kansas team had bettered the intercollegiate record for the 4-mile relay, winning the university class event in 15:57.8.

Texas' 440-yard baton team — Wally Wilson, Eddie Southern, Hollis Gainey and Bobby Whilden —was clocked three tenths of a second faster than the Longhorn's recognized world record of 40.2 seconds for the quarter mile. The mark was set in the California Relays at Modesto in 1955.

A 40.1 effort by Texas in the event here last year still is up for approval as a world mark.

Hal Long, Tom Skutka, Jan Howell and Jerry McNeal were the Kansas runners who surpassed the intercollegiate 4-mile record of 17:08.6 set by Michigan in 1952.

The previous high total for record performances in the Kansas Relays was seven last year.

Here are the other new meet records:

Two-Mile University Relay — 7:32.3 by Kansas' Grant Cookson, Skutka, Bernie Gay and Lowell Janzen.

880-Yard University Relay — 1:24.2 by Texas' Wilson, Laverne Voigt, Gainey and Whilden.

University Distance Medley — 10:04.3 by Texas' Brooks Patrick, George Ferstoer, Walter McNew and Joe Villarreal.

Two-Mile College Relay—7:41.2 by Howard-Payne's Willie Myers, Louie Hayes, Bobby Fullig and Don Shepard.

College Sprint Medley—3:22.6 by Emporia State's Duane McIntire, George Gibbs, Bob Heaney and Billy Tidwell.

Invitational College Sprint Medley—3:32.6 by Ottawa, Kan. University's Ray Cooper, Marvin Wilson, Dick Maack and B.F. Knight.

College Mile Relay—3:15.1 by Emporia State's Heaney, Richard Bliss, McIntire, and Tidwell.

Junior College Sprint Medley—3:34.9 by Hutchinson, Kan. Junior College's Bob Tolar, Bill Wilson, Jim Hayes and Ron Allen.

Discus—178 feet 1 inch by Al Oerter, Kansas' Olympic champion.

400 Meter Hurdles—51.9 seconds by, Cliff Cushman, Kansas.

Hop, Step and Jump—49-9⅞ by Jack Smyth, University of Houston.

Upsets were numerous in the individual events. Parry O'Brien, former Southern California athlete and world record holder in the shot put, was defeated in an exhibition by Kansas' Bill Nieder who made the best heave of his career, 62 feet 2 inches.

## Braves Stay Unbeaten; Nip Redlegs 6-5

MILWAUKEE, April 20 (AP)—The Milwaukee Braves, helped along by a two-run triple by Bobby Thomson and a homer by Del Crandall, today won their third game in as many starts this season by shading the fast - closing Cincinnati Redlegs, 5-4.

The decision enabled the Braves to keep step with the Brooklyn Dodgers in the National League lead. The Dodgers also won their third straight game today.

Cincinnati at Milwaukee—Klippstein (0-1) vs. Spahn (1-0).

*BEHIND PODRES*

## Dodgers Blank Hapless Bucs

BROOKLYN, April 20 (AP)—Icy-nerved Johnny Podres, making his first start since pitching the Dodgers to their 1955 World Series triumph, shut out Pittsburgh today with six hits in leading his unbeaten mates to their third victory, 2-0.

Back-to-back home runs in the fourth inning by Duke Snider and Carl Furillo off th Pirates' Bob Friend provided the chunky, 24-year old southpaw with all the batting support he required.

Friend, one of the top righthanders in the league and conquror of the Giants in his first start of the year, pitched hitless ball for 3 2-3 innings. The lefthand Snider broke the spell with two out in the fourth by smashing the ball over the centerfield screen for his second homer of the year.

Furillo followed with a blast into the lower left field stand. Gil Hodges came close to making it three in a row with a high poke near the left field stand but it barely fell short and Roman Mejias grabbed it with one hand.

Podres won two games from the Yankees in the 1955 World Series including an eight-hit 2-0 thriller in the final game to give the Dodgers their first World Series title. Despite an injured back, Johnny was drafted and inducted into the Navy on March 19, 1955. He was given a medical discharge seven months later.

Although he was outstanding in the series, he had a mediocre season in 1955. He failed to finish his last 13 National League starts.

## Marlene Bauer Hagge Retains Lawton Lead

LAWTON, Okla., April 20 (AP)—Marlene Bauer Hagge, Delray Beach, Fla., held off a mild challenge by Bonnie Randolph of Naples, Fla., today and retained a 3-stroke lead after the second round of the $5,000 Lawton Open Tournament.

Mrs. Hagge added a par 72 to her opening 70 for a 142 total. Miss Randolph made up one stroke by shooting a 1-under par 71 to match a 74 for 145.

Miss Randoph's round was the best of the day and left her in position to overhaul the leader in tomorrow's final round if she can come through with a sub-par effort or should Mrs. Hagge lose complete control of her usual steady game.

## Yanks Win Uphill Battle From Bosox

BOSTON, April 20 (AP)—The New York Yankees shrugged off Don "Perfect Game" Larsen's flop in his first start since his World Series classic against Brooklyn with a flurry of rallies that whipped the Boston Red Sox, 10-7, in 12 innings at Fenway Park today.

Hank Bauer's two-run homer applied the clincher after the hitting of Bill Skowron and Gil McDougald had enabled the world champions to make up an early 7-3 deficit.

## Littler Leads A Las Vegas

LAS VEGAS, Nev., April 20 (AP)—California's Gene Littler shot a 3-under par 69 and lodged a tremendous bid to capture his third straight $40,000 Tournament of Champions golf tourney this cold, windy day.

The 26 - year - old professional from San Diego took command of the event with a score of 215 for three rounds and goes into the final round tomorrow at the Desert Inn Country Club with a one-stroke lead.

One shot back at even par 216 for the distance was rookie pro Don January of Lampasas, Tex., who shot an erratic 73 today.

LEADING TIGER BATSMAN—Gary Vice, above, Tiger centerfield, is leading his team with the willow through 19 games with 20 hits in 60 trips for a .333 average. Vice also leads the Tigers in triples and stolen bases. (Lee Watson Photograph).

## Vice Is Top Tiger Hitter

Centerfielder Gary Vice has taken over hitting homers for the Snyder Tigers, according to the News statistical figures.

Vice has slammed out 20 hits in 60 trips for a .333 mark to top the Tiger regulars.

Jimmy Allen, a part-time regular before reporting to spring football drills, owns the best mark for all players with 10 or more at bats with a .360 average. Allen will rejoin the Tiger baseballers at completion of spring football training a week from tomorrow.

Only one other Tiger regular is hitting above the .300 mark. Second baseman Joe Reaves has collected 22 hits in 69 trips for a .319 average.

Reaves leads the Tigers in hits (22), and doubles(5), home runs (3), runs-batted-in (15) and is tied with Vice for most runs with 14.

Vice, in addition to leading the Tigers in hitting and sharing the lead in most runs scored, tops the Bengals in triples with three, stolen bases with seven, hit-by-pitcher with two, and is tied with Milton Ham in most bases on balls with six.

The Tigers are hitting at a .247 clip as a team, with 125 hits in 514 trips. Coach Speedy Moffett's charges, who have won 11 and lost eight, have outscored their opposition, 84-69, and outhit their foes, 125-94.

Three Tiger pitchers have been credited with three wins apiece, Ronnie Baker, Dwayne Prince and Tim Roberts. Roberts has lost only one game to hold the top won-lost percentage who have pitched an equivalent of three games.

Freshman Norman Gladson is unbeaten in two starts and has had only one earned run scored against him in 1 innings for a 0.42 earned-run-average.

Prince, the workhorse of the Tiger staff with 53 innings, leads the Tiger hurlers in strikeouts with 50.

## Blacks Win Tiger Squad Game, 25-6

The "Blacks" defeated the "Golds" 25-6 in the second Tiger intra-squad game Friday afternoon at Tiger Stadium.

The game wound up the second week of spring football drills at SHS.

Jimmy Allen led the Blacks to victory with two touchdown gallops covering 55 and 45 yards.

Israel Hinojos counted on a three-yard line buck and James Vincent on a one-yarder for the other two Black touchdowns.

Paul Stanley scored the lone touchdown for the Golds.

The two teams battled to a 0-0 stalemate in the first quarter. The Blacks, however, were driving goalward when the first quarter ended.

The Blacks completed their 80-yard drive that began late in the first quarter in the early moments of the second period, Hinojos going the final three yards for the tally.

Midway through the second, the Blacks got possession on the Gold 31 after an against-the-wind Gold punt died on the 31. Vincent went over from the one a few plays later for the second Black touchdown. Dickie Martin added the extra point on a keeper play around end, putting the halftime score at 13-0.

Paul Stanley figured heavily in the only Gold touchdown that came early in the third period. Stanley intercepted a Black pass on the Black 31 and was immediately run out of bounds.

Stanley then climaxed the short drive to touchdown land with a three yard blast at the line.

Allen took over the Black scoring chores at this point, goin g55 yards late in the third to make it 19-6 and then the junior-to-be scampered 45 midway in the fourth to close uot the day's scoring.

The offense generally overshadowed the defense in Friday afternoon's drill. Looking good in the ball carrying department were Dick Hayes and Mickey McGraw of the Golds and Allen and Vincent of the Blacks.

Several Tigers missed the game because of injuries, including quarterback Richard Mahan, center Bill Rinehart, end Bill Dubose and halfbacks Kenny and Johnny Drake.

None of the injuiries are serious although Rinehart and Kenny Drake may miss the remainder of the spring drills.

The Tigers, given a day off yesterday, will resume drills under the lights Monday night.

## Phillies Nip Giants, 6-5

NEW YORK, April 20 (AP)—Veteran Willie Jones and rookie Ed Bouchee teamed up today in a batting spree, driving in all of Philadelphia's runs in pacing the Phillies to their first victory of the year, 6-5 over the New York Giants.

Jones sent home four runs with a two-run homer in the first inning, a single and a fly. Bouchee, a strapping, 200-pound first baseman from Miami, Fla., clouted four consecutive hits, including a homer in the seventh inning for the game-winning run.

## Bold Ruler Wins Wood Memorial

NEW YORK, April 20 (AP)—Bold Ruler answered all the questions today when he outfought Gallant Man in a spine-tingling stretch duel to win the $59,400 Wood Memorial at Jamaica in track record time before a screaming crowd of 42,122.

In a horse race as sensational as the 1955 Wood when Nashua eged out Summer Tan right at the wire, Eddie Arcaro whipped and slashed at Bold Ruler's hide and the speedy Wheatley Stable's colt came from behind with a desperate lunge in the final stride to

## White Sox Rip A's 11-7

CHICAGO, April 20 (AP)—Catcher Sherm Lollar's five RBI's paced the Chicago White Sox to a wild 11-7 triumph over the Kansas City Athletics today and kept the Pale Hose apace with the New York Yankees atop the American League standings.

Lollar smashed a two-run homer, a two-run double and drove in a fifth run with a sacrifice fly.

*16 TEAMS ENTERED*

# City Keg Tourney Starts Tomorrow

Sixteen teams will compete in the Snyder City bowling tournament that gets underway tomorrow night at the Town and Country Bowl.

The tournament will extend through Friday night with Wednesday night off.

A total of $110 of prize money is in store for the winning six teams. The prize money will be divided as follows:

First place—$44.00.
Second place—$22.00.
Third place—$16.50.
Fourth place—$13.20.
Fifth place—$8.80.
Sixth place—$5.50.

Singles and doubles play will begin a week from tomorrow night. Entry fee for singles and doubles must be in by midnight Friday, April 26. Lady bowlers will be eligible to compete for singles and doubles prizes.

Entry fee for singles and doubles is $2.35 per person.

Art Dibble is the tournament director.

Following is the "team event" schedule this week:

**MONDAY**
**6:30 P.M.**

Alleys 1-2—Lone Star Cement vs. R.S.&P.

Alleys 3-4—Ray Taylor Well Service vs. Substar

**TUESDAY**
**6:30 P.M.**

Alleys 1-2—Pinnel Insurance vs. Snyder Heating and Air Conditioning.

Alleys 3-4—Southern Electric vs. M&M Radio.

**9:30 P.M.**

Alleys 1-2—Universal Oil Well Service vs. Pollard Mortors.

**WEDNESDAY**

No games.

**THURSDAY**
**6:30 P.M.**

Alleys 1-2—Pencil Pushers (Sun Oil Co.) vs. Chart Changers (Sun Oil Co.).

Alleys 3-4—Schlumberger vs. Musslewhite Trucking.

**FRIDAY**
**9:00 P.M.**

Alleys 1-2—Scott and Scott vs. Valve Twisters (Sun Oil Co.).

STAR—Team made up of substitutes off other teams.

# Ed Isaacs Top City Loop Kegler

Ed Isaacs compiled the best average in the Men's City Bowling League for the season just completed, according to league statistician Frank LeFeuvre.

Isaacs averaged 178 in 84 games. Isaacs bowled for the Lone tar Cement Co.

Bobby Zetezman of R. S. & P. finished second in scoring and was the only other bowler above 170. Zetezman's average was 171 in 75 games.

Eight others were above 160. They were Viv Deike of Weber Insurance, 165; Jack Sparks of T. C. Goss, 165; Grady Norris of R. S. & P. with 163; Bill Beaver of R. S. P. with 164; Lloyd Smith of Lamb Chevrolet with 163; J. L. Bunch of Universal with 162; LeRoy Weber of Weber Insurance with 161; and Glen Bynum of Pinnell Insurance with 160.

# Winget's 161 Best Average In Sun League

**M. M. Winget of the Silver Pins captured the Sun Bowling League honors with an average of 161, Art Dibble, league secretary and statistician, has announced.**

**Winget's average came over a 78-game season.**

**Victor Deike of the Valve Twisters had the second best average of 159.**

**F. L. Haley, a teammate of Winget's, was the third high Sun League bowler with 185.**

**J. T. Hillyer of the Comets was fourth with 156.**

**Four others topped 150. They were A. L. French of the Comets with 153; and R. E. Schutz of the Pick Handles and Lowell Kimbro of the Comets with 150 each.**

**Following are the final Sun League averages: (Figures in parenthesis indicate how each team finished in the race):**

| NAME. | TL | AVG. |
|---|---|---|
| PENCIL PUSHERS (1) | | |

## Sens Rally For 6-4 Win Over Orioles

WASHINGTON, April 20 (AP) — Connie Johnson sailed along smoothly for six innings today, while Baltimore staked him to a 4-1 lead, but Washington roughed him up for four runs in the seventh and added another off Billy Loes in the eighth to defeat the Orioles, 6-4.

# Southwestern Opens Season Tuesday Night

By The Associated Press

The Class B Southwestern League, featuring youth and speed, opens a 140-game campaign Tuesday night.

The circuit starts its second race with two fewer clubs but with all members left in the field reported in solid shape by League President W. J. Green of San Angelo.

The Southwestern was a 10-club league in 1956. Because of its size and apparent unwieldiness there were predictions that not all of those would finish. Some had rocky financial struggles but all made it. However, two of them —Roswell and San Angelo—were unable to come out for the opening bell this year.

So they start out like this:

Clovis at Carlsbad.
Hobbs at El Paso.
Plainview at Ballinger.
Pampa at Midland.

Green went against pro baseball tradition when he made no forecast on attendance.

"There's been a drouth in West Texas for six or seven years and that has held attendance down," he pointed out. The average last season was only about 50,000 per club and only a couple of the clubs—Hobbs and Ballinger—managed to come through without a loss. I'd say that an attendance boost this year will be governed largely by whether we have rain."

He was optimistic that the league would be well-balanced, that the baseball would be pleasing to watch and that quite a few young ball players would be developed into fancy prices that would help carry the load.

The league has a 2-rookie requirement this season. No rookies had to be carried last year.

"I believe we have about the youngest group of players in the country," Green commented. "That means speed and enthusiastic play."

The concensus is that Midland, Plainview and Ballinger will be among the top clubs.

Midland is tied up with Washington and Clovis with Cincinnati. The other clubs are independents, although all have understandings with clubs of higher classification to get players.

Managers this year are: Midland, Johnny Welaj; Ballinger, Tony York; Plainview, Art Bowland; Pampa, Allan Cross; El Paso, Jim Basso; Hobbs, Thurman Tucker; Clovis, Bert Haas, and Carlsbad, Jodie Phipps.

# Mongoose Set For Battle

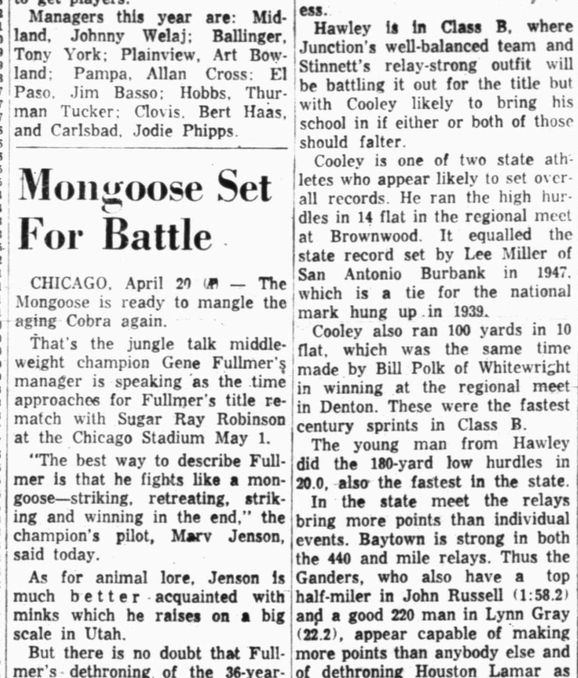

CHICAGO, April 20 (AP) — The Mongoose is ready to mangle the aging Cobra again.

That's the jungle talk middleweight champion Gene Fullmer's manager is speaking as the time approaches for Fullmer's title rematch with Sugar Ray Robinson at the Chicago Stadium May 1.

"The best way to describe Fullmer is that he fights like a mongoose—striking, retreating, striking and winning in the end," the champion's pilot, Marv Jenson, said today.

As for animal lore, Jenson is much better acquainted with minks which he raises on a big scale in Utah.

But there is no doubt that Fullmer's dethroning of the 36-year-old Robinson at New York Jan. 2 had some semblance of a mongoose-cobra scrap, even to the extent of Fullmer seeking a vulnerable spot in the back on Robinson's head.

**TIES RECORD**—Bobby Morrow (left), Abilene Christian College track star tied the world's record for the 100-yard dash at the Dallas Invitation Track and Field meet in Dallas, Texas. Time of 9.3 seconds failed to go into the record book due to a 7-mile per hour wind. Finishing second was Bobby Whilden, University of Texas. (AP Wirephoto).

## Ex-North Texas State Lad Decathlon Champ

LAWRENCE, Kan., April 20 (AP)—Sun-tanned Bob Kelly, former North Texas State star now at Brooke Medical Center, Ft. Sam Houston, Tex., today edged Terry of Arkansas for the decathlon championship in the Kansas Relays.

Kelly's winning total was 5,891 points to Arenz's 5,457. Arenz, a football scholarship sophomore, led Kelly by a mere 28 points 3,502 to 3,474 after yesterday's first five events. But Kelly took the lead on the first event today, winning the 100-meter high hurdles in 15 seconds flat and hung on to win the medal.

Phil Mulkey, Memphis State, who won the decathlon with a meet record total of 6,393 last year, withdrew after the first five events yesterday because of a leg injury suffered several days ago.

**SUMMERS HIT BY BOTTLE**—Veteran umpire Bill Summers sits on the ground at Briggs Stadium, Detroit, Mich., after he was struck on the leg above the knee by a bottle thrown from the upper deck of the stadium. He was not seriously injured but reported a swelling. The bottle was thrown just at the conclusion of the Cleveland-Detroit game. At right is umpire Jim Honochick. Others not identifeid. (AP Wirephoto).

*STAMFORD 1A PICK*

# Baytown Is 2A Track Favorite

By HAROLD V. RATLIFF

Baytown, Stamford and Junction appear the best bets to win Texas schoolboy track championships next week. The feature of the state meet at Austin is likely to be the efforts of a one-man gang to bag a title for his school.

Calvin Cooley of Hawley will go to the big showdown all by himself but he is capable of winning three events and could set a new national scholastic record in the 120-yard high hurdles in the process.

Hawley is in Class B, where Junction's well-balanced team and Stinnett's relay-strong outfit will be battling it out for the title but with Cooley likely to bring his school in if either or both of those should falter.

Cooley is one of two state athletes who appear likely to set overall records. He ran the high hurdles in 14 flat in the regional meet at Brownwood. It equalled the state record set by Lee Miller of San Antonio Burbank in 1947, which is a tie for the national mark hung up in 1939.

Cooley also ran 100 yards in 10 flat, which was the same time made by Bill Polk of Whitewright in winning at the regional meet in Denton. These were the fastest century sprints in Class B.

The young man from Hawley did the 180-yard low hurdles in 20.0, also the fastest in the state.

In the state meet the relays bring more points than individual events. Baytown is strong in both the 440 and mile relays. Thus the Ganders, who also have a top half-miler in John Russell (1:58.2) and a good 220 man in Lynn Gray (22.2), appear capable of making more points than anybody else and of dethroning Houston Lamar as state champion in Class AA. Lamar has a good point potential, too, but not enough to repeat.

Baytown's 440-yard relay team did 42.9 in the regional meet and it also ran 3:27.6 in the mile relay. These two relay teams could give Baytown more than 20 points.

Gladewater, with its own one-man gang, Tommy Minter, sprinter, hurdler and broad jumper; Graham, with its fine hurdler, Bobby Bernard; Odessa and El Paso Jefferson are other teams figuring in title talk.

Stamford, spearheaded by football star Mike McClellan, should win the Class A championship but have to struggle with Refugio and several other teams for it. McClellan ran 100 yards in 9.6 in the regional meet, which is only one-tenth of a second over the state record for the division. He also is a top 220 man.

Stamford has the fastest time in the state for the 440-yard relay and the leading broad jumper in Donald Davis.

In Class B it's going to be Junction, which has the fastest 440-yard relay team (43.3) and SKTIN nett, which has probably the second best 440-yard relay quartet and the top mile relay team (3:33.5) for the title unless Cooley should win his three first places and there should be a slip-up down the line for Junction and Stinnett.

The only other tracksters who might set an overall record is Jack Tayrien of Odessa, who has flung the discus 169 feet 4⅛ inches. The record is 170 feet 10½ inches.

# Detroit Tigers Clip Indians For First Win

DETROIT, April 20 (AP)—Frank Lary blanked the Cleveland Indians on 8 scattered hits today, 7-0, for the Detroit Tigers' first victory of the season.

The strong-armed righthanded, the American League's biggest winner with 21 victories last year, was backed up by a 13-hit attack that included three hits apiece by Bill Tuttle and Frank House and the club's first home run of they year by Frank Bolling.

Tuttle, who had hit safely only once in twelve trips before today drove in two runs and scored another with a double and a pair of singles.

The Tigers had dropped three straight games losing twice to Kansas City and once to the Indians before routing 20-game winner Early Wynn for their first decision.

## Carey Sidelined

BOSTON, April 20 (AP) — Andy Carey, regular third baseman of the New York Yankees, is sidelined due to a sprained left ankle. The injury was sustained in the eighth inning of Thursday's game here when he jammed his foot against first base while being retired on a grounder.

Carey will be out about a wee.

## Kelley First Boston Marathon Winner

BOSTON, April 20 (AP)—Confident Johnny Kelley conquered a powerful foreign delegation, the sun-baked hills and his own fears today to become America's first Boston A. A. Marathon winner in 12 years.

Kelley was timed in 2:20:05 en route to a stirring 1,000-yard triumph over Veikko Karvonen of Finland—regarded as the world's No. 1 marathoner.

The 26-year-old grammer school teacher from Groton, Conn., won the race on the series of three hills over which he lost to Finland's Antti Viskari a year ago.

## Uncle Sam Rejects Hoeft Third Time

DETROIT, April 20 (AP) — Billy Hoeft of the Detroit Tigers again has been rejected for military service.

The Tigers' ace southpaw, a 20-game winner in 1956, was examined by Selective Service officials for the third time a few weeks ago in Milwaukee. He originally was classified 3F several years ago because of a knee ailment.

# Irvin Among Ex Majors In Minors

NEW YORK, April 20 (AP)—Scores of former major leaguers, among them Monte Irvin, Sam Mele, Harry Dorish and Stu Miller, are campaigning on minor league baseball fronts this season.

Many such as the four mentioned are veterans, doggedly holding on and hoping for that one last crack at the big time and the higher salaries, better playing conditions and the improved pension that go with it.

Irvin, who helped the New York Giants to National League championships in 1951 and 1954, is with Los Angeles of the Pacific Coast League. He clubbed a home run in the Angels' opening game.

Monte played for the Chicago Cubs last year, hitting .271 with 15 homers. He's 38 years old and had a major league lifetime batting average of .294 for eight years.

Dorish, a relief ace for the Boston Red Sox and Chicago White Sox, failed with the Baltimore Orioles and was sold to San Francisco (PCL). He's being used as a starting pitcher by the Seals. In his first appearance he shut out Portland. Harry is 34.

Mele, also 34, was released by the Cleveland Indians last month and is playing the outfield for Indianapolis of the American Assn. He had a lifetime big league mark of .267 while performing for six American League teams and Cincinnati of the National League.

Stu Miller, 30, was part of the winter deal that sent Jim Hearn from the Giants to the Philadelphia Phillies. The Giants, in turn, sold Miller to Minneapolis of the American Assn. In his first start with Minneapolis, the veteran righthander pitched a six-inning no-hit no-run game.

Harry Byrd, another journeyman pitcher, is working for Charleston of the AA. Byrd was one of the 11 players involved in the Dec. 16, 1953 trade between the New York Yankees and Philadelphia A's. He moved to New York along with Eddie Robinson and three others for six Yankees including Vic Power.

Forty-year-old Clyde McCullough, a long time favorite of Chicago Cub fans, is catching for Miami of the International League He has 14 major league seasons under his belt, 10 in the Windy City and four in Pittsburgh.

Also with the Miami club are Jim Greengrass, former Philadelphia outfielder and Cal Abrams, ex-Brooklyn Dodger outfielder and pinch-hitter.

Other players big league followers are likely to remember are Sam Jethroe (Boston Braves) with Toronto; Jim Delsing (Detroit and Chicago White Sox) with Indianapolis; Joe Presko (St. Louis Cards) with Charleston; Milo Candini (Washington) with Seattle; Toby Atwell (Pittsburgh and Milwaukee) with Wichita; Danny Schell (Philadelphia Phils) with Richmond, Va. and Wayne Terwilliger (Chicago Cubs and the Giants) with Minneapolis.

## Triandos Lost To Orioles Two Weeks

BALTIMORE, April 20 (AP) — A new examination shows that Gus Triandos, big Baltimore catcher and top RBI man for the Orioles, has a fractured vertebra in his lower back and will be sidelined for two weeks.

The Orioles reported today that the break, involving only a protruding knob on his spine, was discovered after more X-rays were taken.

Triandos was injured Thursday night when Washington's Herb Plews, on second base, took off for home on a single by Eddie Yost, and slid safely into home plate and Triandos on a close play

Johnny Antonelli of the New York Giants hurled 258 innings in 1956, one less than he hurled in 1954.

# Headliners In Army-McCarthy Row Have Faded Into The Background

By ROGER GREENE

WSHINGTON, April 2 0 (AP)—"Lizzie Borden took an ax and gave her mother 40 whacks;
When she saw what she had done
She gave her father 41."

Boston lawyer Joseph N. Welch says the jury was right in acquitting Lizzie, subject of this old jingle, on the basis of the evidence presented in the celebrated Fall River, Mass., murder trial in 1892.

Welch made that summation as narrator in a recent televised production of "The Trial of Lizzie Borden" (BC-TV).

His appearance recalled a 36-day drama of whacks, counter-whacks and verbal blood-letting which opened on Capitol Hill just three years ago next week. That was the celebrated Army-McCarthy ruckus in which Welch figured as Army special counsel.

Almost alone of all the key figures the Army-McCarthy furor, Welch has kept in the public eye in the intervening years. In addition to his role in "Lizzie Borden," he has appeared in several other TV productions. And last year he was named American "Father of the Year," partly for his efforts in championing the U.S. Constitution.

Even Sen. Joseph R. McCarthy (R-Wis) has faded into the background from the linelight which blazed around his Communist-hunting forays in the early 1950s.

The dark-jowled Wisconsin senator, now 47, rarely hits the headlines these days.

A recent item noted that he had again been snubbed by the President and Mrs. Eisenhower. Presidential press secretary James C. Hagerty confirmed that McCarthy was the only member of Congress who was not invited to White House social events during the 1956-57 season. Two weeks ago McCarthy's wife Jean failed to respond to an invitation to attend Mamie Eisenhower's spring luncheon for Senate wives.

What has happened to other headliners in the 1954 hearings? Where are they now?

Former Secretary of the Army Robert T. Stevens, who bitterly argued McCarthy's charges of "Communist coddling" by the Army, resigned from his Pentagon post in June 1955 and returned to his old job as president of the big J. P. Stevens Textile Co. in New York.

Ray N. Jenkins, the jut-jawed Knoxville, Tenn., lawyer who served as special counsel for the Senate subcommittee in airing the Army-McCarthy hassle, has figured in speculation as a possible candidate for the U. S. Senate in 1960. He calls himself an Eisenhower Republican.

Jenkins recently was appointed assistant defense counsel for the court-martial of Col. John Nickerson Jr., guided missiles expert, who is accused of leaking secrets of the Army's hush-hush Redstone Arsenal at Huntsville, La., to members of Congress and the press.

Maj. Gen. Kirke B. Lawton, 62, retired from the Army in August 1954, two months after the books were closed on 80,000 pages and two million words of testimony in the Army-McCarthy drama.

Lawton was commanding officer at Ft. Monmouth, N. J. at the time McCarthy charged that Communist espionage agents were stealing secrets of the Ft. Monmouth radar center. Secretary Stevens said an Army probe failed to disclose any evidence of espionage at the center.

Lawton has been living quietly at his home in Athol, Mass.

John G. Adams, dapper Army counsel during the Senate inquiry, resigned his Army job in 1455 and joined the Washington law firm of Ford, Alder and Adams.

Roy M. Cohn, now 30, McCarthy's legal adviser during the hearings, resigned his $11,700-a-year job as chief aide in McCarthy's Red-hunting investigations in July 1954. McCarthy called him "the most brilliant young fellow I have ever known."

Cohn subsequently accused the press of clamping down a "news blackout" on McCarthy in the wake of the Senate hearings. He is now practicing law in New York City.

Cohn looks back on the hearings as "a colossal waste of the taxpayers' money and of the time of many officials who could have been more productively engaged."

But, he adds, "as a practical matter, it resulted in my becoming well known. I have been fortunate due in a great part to my participation in the hearings."

G. David Schine, 29, known as "the most publicized private in the U. S. Army" during the Army-McCarthy clash, completed his two-year service hitch (as a corporal) in October 1955 and has since resumed his job as president of Schine Enterprises, Inc. His wealthy Russian-born father J. Myer Schine operates a chain of plush resort hotels and movie theaters.

Schine, a close friend of Cohn and former consultant in McCarthy's Communist-hunting inquiries, figured as an off-stage pawn during the stormy Senate hearings.

The Army accused McCarthy and Cohn of exerting improper pressure on the Pentagon to give Schine red-carpet treatment in his GI uniform. The McCarthy forces retorted that the Army used Schine as a "hostage" in an attempt to make McCarthy ease up on his investigation of alleged Reds in the Army.

Now listed as residing at the Waldorf-Astoria Towers in New York, young Schine declines to discuss the 1954 row.

"I love people. I'm friendly toward everyone," he says.

James Juliana, an assistant counsel in the McCarthy camp during the widely televised wrangle, is now minority (Republican) counsel for McCarthy's old Senate Permanent Investigations subcommittee.

Brig. Gen. Ralph W. Zwicker, who tangled with McCarthy over the issue of promoting and giving an honorable discharge to Army dentist Maj. Irving Peress, is now a major general. President Eisenhower recommended the promotion last January and it recently was approved by the Senate over McCarthy's strong objections.

After the Senate hearings, Zwicker was sent to the Far East in August 1954 as commanding general in southwest Japan. Since last May he has been assistant chief of staff G- (personnel) of the U.S. 8th Army, stationed in Zama, Japan.

In a way, the Press case was the firecracker that touched off the whole Army-McCarthy explosion.

While probing for Reds at Camp Kilmer, N. J., where Zwicker was commanding officer in 1954, McCarthy publicly denounced Zwicker as unfit to wear a general's uniform. McCarthy's ire stemmed form the fact that Zwicker promoted Peress after the Wisconsin senator had demanded his court-martial as an alleged "Fifth Amendment Communist."

Stung by McCarthy's blast at a much-decorated general, the Army hit back with a formal "bill of particulars" accusing McCarthy of "browbeating" witnesses, including Zwicker.

Zwicker testified he acted on higher orders in giving Peress an honorable discharge in the face of McCarthy's wrath.

## Truck Overturns

LAMESA, April 20 (AP) — Carl Gardenhire, 32, was killed when his pickup truck overturned last night.

# Javits Hits New Policy With Arabia

WASHINGTON, April 20 (AP) — Sen. Javits (R-NY) accused the State Department tonight of having made "intolerable" concessions in exchange for continued use of the Dhahran air base in Saudi Arabia.

The New York Republican made public an exchange of letters protesting against what he called King Saud's discrimination against American Jews and the Saudi Arabian King's support of Egyptian President Gamal Abdel Nasser.

Javits said the recently concluded five-year extension of the U.S. right to use the Dhahran air base "may be justified on security grounds, and in that I have the greatest respect for the judgment of our President."

But, he said, to "tolerate" barring U. S. soldiers of Jewish faith from the base or Saudi Arabia's backing of Nasser and his defiance of the United Nations is contrary to U. S. interest and to peace.

It is "intolerable," Javits said, and the department's policy "should not allow of it for an indefinite future."

Assistant Secretary of State Robert C. Hill wrote Javits April 17 citing the recent refueling of the round-the-world flight of B52 aircraft over Dhahran as an example of its importance to U. S. national security.

# Mayflower Sails For U.S. Shores

PLYMOUTH, England, April 20 (AP)—Mayflower II, weighted with good wishes and followed by prayer, set sail for America today from this old English port. Her voyage is intended to duplicate that of the Pilgrim Fathers to Plymouth Rock in 1620.

In six weeks, if providence is kind, the 180-ton square-rigger will reach Plymouth, Mass. There, after an exhibition visit to New York, she will remain, a gift of Britain to the people of the United States.

The British sponsors of the new Mayflower, which left here as the sun was lowering in the west, hope she will become a symbol — like the Statue of Liberty — of the Old World's affection.

Mayflower II, which structurally is a replica of the original, was towed past Drake Island, just as the first Mayflower was three centuries ago.

The old Mayflower, say some historians, was pulled out of the shelter of this splendid harbor by rowers in long boats. Mayflower II was pulled out by a smoking tug.

An hour and a half later the sails were let loose, and the Mayflower looked like a graceful swan. When she was lost from sight she was trying to make headway against a somewhat adverse wind.

Cmdr. Alan Villiers, Australian skipper of the Mayflower, hoped to make in about six weeks the journey which took the original Pilgrms 65 days.

There are 32 men aboard Mayflower II — no women, unless there's a stowaway.

The search for stowaways was the last urgent business before the little vessel lifted anchor. None was found.

Villiers' cabin was stacked high with good will messages. Among the last received was one from Prime Minister Harold Macmillan who had an American mother, expressing hope that Mayflower's voyage will strengthen British-American relations.

## Acacia Study Club Hears Young People

The Acacia Study Club met Wednesday at 3:30 p.m. in the Martha Ann Woman's Club, with Mrs. Billy Bob McMullan hostess.

Mrs. SWane Collins presented the program, which was a rountable discussion on "Teenagers of Today."

Teenagers who participated on the program were Jimmy Don Robinson, Charles Merritt, Pat Bills, Betty Longbotham, Tommy Minton, Becky Perkins and John Weaver.

A dessert plate was served to 18 members who attended.

## Meeting Set By Women

Recently organized study groups of the Snyder provisional League of Women Voters will meet for the first time this week.

In order to accommodate all members, two units meeting at different times have been set up.

Unit No. 1 will meet at 3 p.m. Tuesday in the home of Mrs. Bill Butler, 3203 Fortieth Street. Miss Ethel Roberts will be discussion leader.

Unit No. 2 will meet at 7:30 p.m. Thursday in the home of Mrs. W. B. Lee Jr., 2611 Thirty-seventh Street. Miss Roberts will serve as discussion leader for this group also.

Both units will begin concurrent study of the Leauge's background and of the local League's first project, "Know Your Town Government."

All League members and any others interested in League work are urged to attend either, or both meetings.

MR. AND MRS. GARY HILL

## Miss Duncan Becomes Bride Of Gary Hill On April 14

Emma Lee Duncan beccame the bride of Gary Lynn Hill in a doublering ceremony in the First Baptist Church on April 14.

The bride is the daughter of Mr. and Mrs. J. B. Duncan, 2904 Avenue N, and Mr. Hill is the son of Mr. and Mrs. N. J. Hill, Clairmont Road.

The Rev. G. M. Cole was the officiating minister.

The bride was attired in a white street length dress, with lace trim and pearl buttons, and her accessories were white. She carried a strand of pearls, which were a gift of the bridegroom, and wore an orchid shoulder corsage.

Miss Shirley Roland of Abilene was maid of honor. She wore a beige suit and beige accessories with a blue ribbon and white corsage.

Joe Reaves of Snyder was best man.

Wedding music at the organ was provided by Beth Wiman, and Nancy Wiman sang.

Immediately following the wedding, a reception was held in the home of the bride's parents. Sue Hill, sister of the groom, presided at the bride's book, while the three-tiered white bridal cake decorated with a miniature bride and groom was served by Judy and Jane Duncan, twin sisters of the bride.

For the wedding trip to Dallas, the bride chose a brown suit with matching accessories and an orchid corsage.

Both the bride and the groom attended Snyder High School. While in school she was a member of the Gay Twenty Club.

Mr. Hill is employed at the Snyder Meat Co.

Out of town guests here for the wedding included the bride's grandparents, Mr. and Mrs. D. S. Duncan of Rockdale.

## NEWS FROM DUNN

By ELWANDA STEWART

Mrs. J. R. Cantrell visited Mr. and Mrs. Bill Cantrell in Midland Wednesday. Mrs. P. E. Rhodes of Snyder spent Sunday with the Cantrell family.

Sunday guests of Mr. and Mrs. L. Z. Ashley were Mr. and Mrs. Carl Ashley and daughter, of Ruidoso, N. M., Mr. and Mrs. Otto May of Clairemont and Mr. and Mrs. Junior Ashley and children of Hermleigh.

Mr. and Mrs. N. J. Richburg visited Mr. and Mrs. W. H. Long in Loraine Sunday.

Mrs. Donald Ray Haney of Huntsville is visiting her parents, Mr. and Mrs. Morris Ashley, this week.

Mr. and Mrs. Jess Rogers visited Mr. and Mrs. James Stewart Tuesday night.

Mrs. Paul Johnston of Houston visited her parents, Mr. and Mrs. C. A. Moon this week.

Mrs. Houston Cotton visited Mr. and Mrs. L. W. Cotton and Tommy in Snyder Thursday afternoon.

Mrs. Dildy Smith, Mrs. Bettie Smith and Mrs. L. E. Russell visited Mrs. George Cochran in Lamesa Thursday. Mrs. Cochran returned home with Mrs. Dildy Smith for a few days visit.

## Cub Pack Plans For Wiener Roast

Cub Scout Pack No. 35 will have a wiener roast in Towle Memorial Park at 6:30 p.m. Monday.

The pack will furnish wieners, buns and soft drinks, and each den has been asked to bring chili, onions, mustard and other hot dog trimmings. All parents of cubs in the pack have been invited to attend.

## Committees Are Named By Group

GAIL — The executive committee of the Borden County Belles met recently and named committees for next year.

Members of the executive committee are Mrs. Bert Dennis, Mrs. Allen Stephens, Mrs. John Anderson, Mrs. V. L. Clark, Mrs. Frank Miller, Mrs. John Whitmire.

Named to the yearbook committee were Mrs. John Anderson, chairman, Mrs. Mardes Clayton and Mrs. Billy Wills. The finance committee is composed of Mrs. Alton Milliken, chairman, Mrs. Mert Jones and Mrs. Burl Belew. On the program committee are Mrs. Bert Dennis, chairman, Mrs. Frank Miller and Mrs. Borden Gray. Mrs. C. C. Nunnally is historian.

Named to the maintenance committee were Mr. and Mrs. Ben Weathers, Mr. and Mrs. S. P. Stewart, Mr. and Mrs. V. L. Clark.

The social committee is composed of Mr. and Mrs. Dick Jones, Mr. and Mrs. W. L. Wilson Jr. and Bob Beal, and Mrs. Mert Jones, parliamentarian.

**SENIOR TEA**—Four of the more than 50 senior girls and their mothers who attended a tea Thursday in the Martha Ann Women's Club are shown above looking at one of the paintings in the Texas Fine Arts Association exhibit. Shown are Mary Lou Cary and Mrs. H. H. Cary of Knapp and Mrs. Clarence Wade and Pat Wade. The Snyder branch of the American Association of University Women was hostess for the tea, an annual event. Mrs. Edward Kellenberger directed the fine arts program for the afternoon. (Lee Watson photograph)

## Hermleigh Student Winner In P-TA Theme Contest

Carolyn La Von Richburg, seventh grade student in the Hermleigh School, was second place winner in the Safety Theme Contest sponsored by Parent-Teachers Association District No. 18.

Miss Richburg's theme titled "Safety In The Home," was judged runnerup to the entry of June Swenson of Avoca. She is a pupil of Mrs. Dudley Mayes.

The text of Miss Richburg's theme follows:

Living a healthful, happy life, making friends, getting along with others, and developing habits are all part of growing up. And one of the good habits which we should all develop young and old alike is "safety." Wherever we may be, or whatever we may be doing we should practice the safety habit.

Lets take safety in the home, because after all we spend over half of our time there and more than a third of the nation's accidents occur in the home.

First, let's think about some things the whole family can take part in to make your home a safer place in which to live. Take, for instance, falls. Falls are often fatal, especially to children under five and adults past forty-five. Of course not all falls are fatal, but very often they result in a broken arm, leg, or some other part of the body being fractured, sprained or bruised. Since we know the results of falls, we should now find out ways to prevent them. Always pick up toys or any other articles left lying on a stairway, in the middle of the floor, on the sidewalk or anywhere that someone might stumble over them. Repair broken steps, fix throw rugs so they won't slide. Be careful getting in and out of the bath tub; it might be wise to put a rubber mat in the tub to prevent falling. Never stumble around in the dark, always turn a light on.

Falls, however, are not the only cause of home accidents. Fire is simple burns, cuts, and scratches rank high also. Here are some things we might do to prevent burn and cuts. Always use a holder or some other thick cloth to remove hot pans from the stove or oven. Wash sharp knives separately to prevent cut hands. Keep needles, knives, scissors and other sharp, dangerous articles out of the reach of small children. Also keep matches in safe reach of smaller ones and it might be a wise idea to keep matches in a metal box so mice can't get to them. Be careful lighting stoves and always when doing so make sure no gas is escaping and the stove completely cut off. Keep closets, attics, and other places free from trash. Never burn trash on a windy day. Don't be careless with lighted cigarettes and matches.

And above all never play with fire.

Here are a few other precautions you might follow to make your home safer. Always read the label on medicines before taking them, follow directions and know the medicine is approved by a doctor. Keep poisons in a safe place, safe from children and pets.

Be sure the electrical wiring in your home is correct. Never turn off lights by the string or plugs while any part of your body is wet. Of course there are many other safety precautions which we should follow along with the ones I have mentioned.

I hope you make "safety" one of your good habits, now, and lead the way to a safer nation in which to live.

**APPROACHING MARRIAGE**—Mr. and Mrs. Ben Mosley of Ira have announced the engagement and approaching marriage of their daughter, Mary Nell, to James A. (Buddy) Young, son of Mr. and Mrs. J. B. Young of Goliad. The couple, both students at Sam Houston State College in Huntsville, will be married on May 25 in the Ira Baptist Church.

## Borden P-TA Plans Projects

GAIL — The Borden County P-TA met Tuesday night in the Borden High School cafeteria.

Recommendations set by the executive committee and accepted by the association were as follows:

To prepare yearbooks for the P-TA year 1957-58; buy a flash camera for the school use; help with the Boy Scout and Girl Scout banquet to be held May 3 at 7 p. m. in the cafeteria; secure covers for the P-TA scrapbooks that have been made the last three years; start a music library; start the score board fund for the athletic field.

The school employes are to build the score board this summer and P-TA members will paint it. Those wishing to donate to the fund may send contributions to Mrs. Bob Beal, Luther, Tex., or to Mrs. John Stephens, route one, O'Donnell. Checks should be made to the Borden County P-TA Score Board Fund.

MRS. THOMAS J. CURTIS

## Stringer-Curtis Vows Are Read In Church At Houston

Miss Terry Stringer and Lt. Thomas J. Curtis were united in marriage in a candlelighted ceremony April 12 in the Uvalde Baptist Church in Houston.

The Rev. Bill Luton and the Rev. John Osteen officiated.

The bride is the daugher of Mr. and Mrs. V. T. Stringer, formerly of Hamlin, and is the granddaughter of Mr. and Mrs. J. O. Sheid Sr. of Snyder.

The groom's parents are Mr. and Mrs. T. O. Curtis of Houston.

The couple will live in Galena Park, Houston. The bride is a former student at Sam Houston State College and the groom attended the University of Houston, and is now stationed at Ellington Air Force Base.

Miss Doylene Albright was maid of honor, while Miss Anita Jaynes, Miss Sandra Smith and Miss Dolores Teaff of Sweetwater were bridesmaids. Debbie Cunningham was flower girl.

The bride was given in marriage by her father. She wore a gown of Chantilly lace and tulle over satin. It was fashioned with a lace panel in front and a chapel-length train. Her illusion and lace veil was held by a crown of seed pearls. She carried a bouget of lilies, stephanotis and orchids.

Miss Albright's gown was waltz length coral taffeta, with matching crown and shoes. Bridesmaids wore identical dresses in aqua with matching cascade flowers.

The groom was attended by Jimmy Ray Isham. Goomsmen were Gene Mosley, Arley Walters and Norman Curtis, with Phillip Keever and Joel King as ushers. Mike Stovall was ring bearer and Jolene Sheid and Stave Green were candle lighters.

A reception was held following the ceremony in Fellowship Hall of the Church. Assisting at the reception were Miss Marily Sondel, Miss Sandra Beckman, Miss Margie Symones, Miss Barbara Boston and Mrs. Roy Andrew.

Mr. and Mrs. J. O. Sheif Sr. and Mr. and Mrs. J. O. Sheif Jr. and Jolene, Mr. and Mrs. J. B. Teaff, Phillis and Dolores of Sweetwater, and Mr. and Mrs. Jim Burt and Dawn of San Angelo attended the wedding.

### *Home Demonstration Club Meets At Gail*

GAIL — The Gail Home Demonstration Club met Thursday night in the home of Miss Helen Curda, with Mrs. George Rice as cohostess.

Roll call was answered by each member giving her middle name, or full name, if married.

Mrs. R. E. Dunbar of Lamesa and Mrs. J. A. Jones gave an interesting demonstration on textile painting.

Refreshments of open-faced sandwiches, sand tarts, cake squares, nuts, punch and coffee were served to Mrs. Sam Skeen, Mrs. Attie Jackson, Mrs. C. L. Harrison, Mrs. J. C. Chorn, Mrs. Shorty Farmer, Mrs. D. Dorward, Mrs. Roy Pearce, Mrs. J. A. Jones and Mrs. E. R. Dunban.

Secret pal gifts were exchanged.

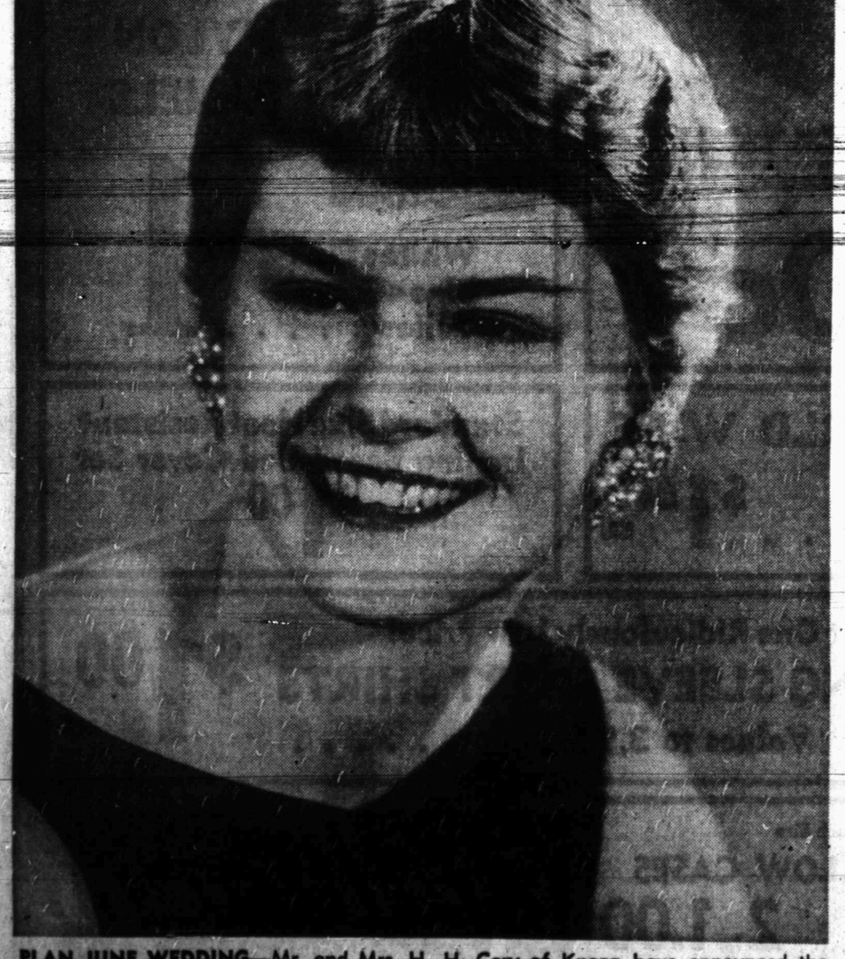

### *Gail Seniors Are On Trip To California*

GAIL — The senior class of Borden High School left on its trip Thursday and will return on April 29.

They will visit California on the trip, and they have tickets to attend the Bob Crosby Show on April 23.

Mrs. Oscar Telchik, Mrs. Roscoe Krepp, Mrs. J. D. Robinson and Sam Davis accompanied them.

The seniors are Barbara Sharp, Nancy Telchik, Mrs. Dorth Jean Jackson, Mrs. Carolyn Franklin, Effie Stewart and Ben Lochart.

PLAN JUNE WEDDING—Mr. and Mrs. H. H. Cary of Knapp have announced the engagement and approaching marriage of their daughter, Mary Lou, to Gerald Taylor, son of Mr. and Mrs. A. J. Taylor, 801 Twenty-seventh Street. They will be married by the Rev. G. M. Cole, pastor of the First Baptist Church, in the home of Mr. and Mrs. Marvin Key, Circle Dr., on June 14. (Craft Studio Photograph)

## DATE DATA

By BEVERLY BRANDOW

Sometimes when a girl won't kiss a boy even after they've dated for weeks, there's a good reason. Especially if the girl seems to like the boy and enjoy being with him, yet carefully keeps two feet of distance between them, there's reason to believe he has a dating complication he doesn't even know about.

Halitosis is a long word that spells "no good night kiss" for many puzzled boys and girls. Before you decide that the girl who enjoys your company but refuses to kiss you is a tease look into the problem of bad breath. Girls who suspect a regular date isn't "really interested romantically" should do the same thing, for bad breath can sneak up on anyone.

For some unfortunate people, it is a chronic problem. In this case the cause, which might be anything from decayed teeth to a fondness for eating garlic, should be found and corrected.

As the tooth paste ads say, it is an embarrassing problem even you best friend won't tell you about. Hence, it's up to everybody to be especially careful.

Why not make it a regular part of your routine to brush your teeth with a good dentifrice and gargle with an antiseptic before every date. It's the only way to know you're safe and "kissing fresh." If you happen to be even an occasional offender, it will certainly pay dividends.

Body odor is another thing that ran ruin a date. Here, however, most people do not have to be told when they are at fault.

If at all possible, it is best to bathe just prior to leaving on a date. If this is too inconvenient, emphaisis then should be placed on a daily bath, at least. This is especially important as the weather becomes warmer and we spend more time out of doors weeding the garden or playing baseball on the vacant lot.

Deodorants are not "sissy," and are as necessary to every he-man as a pack of razor blades.

To be clean and fresh smelling is an asset to everyone who dates.

## NEWS FROM CANYON

By MRS. MARGARET RILEY

Guests of Mr. and Mrs. Ollie Green and Norma have been Mrs. Reid Bates and family of Dumas, Buck Marr of El Centro, Calif., and Mrs. Dixie Bynum and Gleen Marr of Los Angeles, Calif.

Mrs. Bruce Kerley and Michael, Mrs. Margaret Riley and Kenny, and Mrs. J. S. Golden visited Mrs. Butler Barnett in Ira Tuesday afternoon.

Mrs. Alton Sumruld and sons, Mrs. Margaret Riley and Kenny, Norma Clayton, Mr. and Mrs. Jim Stirling and family, Mr. and Mrs. Frank Bryant and family, Mr. and Mrs. Ed Murphy, Mr. and Mrs. Grady Moore and Darla, Mr. and Mrs. Leslie Boatman and family and Lawton Taylor were among those who attended the senior play, "You Can't Kiss Caroline," at Ira Tuesday night.

Mrs. J. L. Birdwell of Lubbock visited Mrs. J. S. Golden Wednesday.

The Women's Missionary Auxiliary of the Canyon Baptist Church met Wednesday night for Bible study. Six members attended.

Mrs. Luke Rollins and daughters visited Sunday in Colorado City with her parents, Mr. and Mrs. J. H. Wiggins.

Mr. and Mrs. Ed Taylor visited Sunday with Mr. and Mrs. Roy Taylor and Patsy in Andrews. Mrs. Roy Taylor is a patient in the hospital in Seminole.

Mrs. Zela Hawkins of Colorado City spent Tuesday night with Mr. and Mrs. Ed Taylor in Snyder. Thursday afternoon Mrs. Taylor visited Mrs. Arkard Barnett and Mrs. Mattie Lee Durden and family in Ira. Thursday night Mr. and Mrs. Taylor visited Mr. and Mrs. J. R. Meadows and Clare Ann in Fluvanna.

## Sorority Picks Woman Of Year

Members of Beta Sigma Phi voted on their woman of the year at their meeting Tuesday at the Country Club, but the winner will not be revealed until the founders day dinner on April 30.

Louise Taylor was hostess for the meeting, and Mrs. Arel Favor was in charge of the program. Mrs. Favor introduced Clois D. Henry, who spoke on civil defense.

Installation of Beta Sigma Phi officers is set for Tuesday night in the home of Mrs. Clois Henry. Pledges will become ritual of jewel members at that time.

Refreshments of cherry tarts and coffee were served to 17 members who attended the meeting.

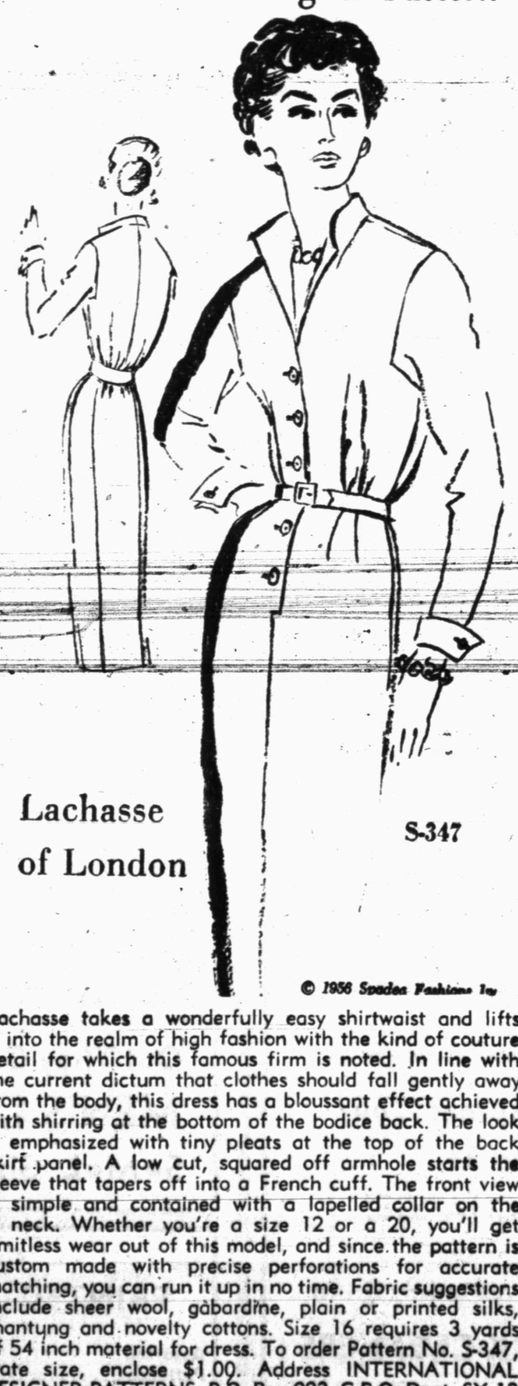

## Garnishes Needed For Lamb Roast

A roast leg of lamb at the Easter dinner table just seems to denote something special. Therefore, special garnishes are expected.

For variety, minted carrots act as a zestful and colorful accompaniment. Pineapple chunks rolled in minced mint are delicious.

Pitted black olives on carrot strips enhance any meat cut. Of course, plain mint or currant jelly is always a timely stand-by for a lamb entree.

## International Designer Pattern

Lachasse of London

S-347

© 1956 Spadea Fashions Inc

Lachasse takes a wonderfully easy shirtwaist and lifts it into the realm of high fashion with the kind of couture detail for which this famous firm is noted. In line with the current dictum that clothes should fall gently away from the body, this dress has a bloussant effect achieved with shirring at the bottom of the bodice back. The look is emphasized with tiny pleats at the top of the back skirt panel. A low cut, squared off armhole starts the sleeve that tapers off into a French cuff. The front view is simple and contained with a lapelled collar on the V neck. Whether you're a size 12 or a 20, you'll get limitless wear out of this model, and since the pattern is custom made with precise perforations for accurate matching, you can run it up in no time. Fabric suggestions include sheer wool, gabardine, plain or printed silks, shantung and novelty cottons. Size 16 requires 3 yards of 54 inch material for dress. To order Pattern No. S-347, state size, enclose $1.00. Address INTERNATIONAL DESIGNER PATTERNS, P.O. Box 993, G.P.O. Dept. SX-13 New York 1, N.Y. Pattern Booklet "B" and all new Pattern Booklet "C"—50c each. LACHASSE label available for 25c extra with pattern order. If paid by check add 4c.

TO WED IN JUNE—Mr. and Mrs. Blake Walker, route three have announced the engagement and approaching marriage of their daughter, Donna Jean, to Billie Jack Wilson, son of Mr. and Mrs. J. C. Wilson, 2412 Twenty-first Street. The wedding will be in the Green Hill Baptist Church on June 1 at 8 p.m. (Craft Studio Photograph)

**CIVIC MUSIC ASSOCIATION OFFICERS**—Officers of the Snyder Civic Music Association who will spearhead the one-week membership drive this coming week are pictured above. From left are Melvin Montgomery, first vice president, Mrs. Mark McLaughlin, second vice president, Mrs. Frank LaFeuvre, secretary, Art Nicholas, president, and H. W. Cargile, treasure. Goal of the drive is 850 members. Memberships are $6 for adults and $3 for students. Drive headquarters is located next door south of Phillip's Bros. Hardware, and the telephone number is 3-5496. (Lee Watson photograph)

**PLANS FOR CMA MEMBERSHIP WEEK**—starting Monday are here being discussed by Campaign Chairman and Division Captains: (left to right back row) DWane Collins, Miss Leah Davis (Co-Campaign Chairman) and Robert Clinton, (front row left to right) Mrs. W. K. Patterson, Mrs. A. L. McFarland( Co-Campaign Chairman), Mrs. W. D. Simms and Mrs. Roy McCloskey. (Steve Melton Photograph)

## Civic Music Association Drive To Start Monday

The annual membership campaign of the Snyder Civic Music Association will open Monday with a kickoff dinner at the Martha Ann Woman's Club.

Mrs. Thomas F. Hartley is chairman of arrangements, assisted by Mrs. J. Mark McLaughlin. The dinner is complimentary to the division leaders, captains and workers.

Seated at the head table will be A. T. Nicholas, president; Melvin Montgomery and Mrs. J. Mark McLaughlin, vice presidents; Mrs. Frank F. LeFeuvre, secretary; H. W. Cargile, treasurer; Miss Leah Davis, chairman of the campaign; Mrs. Armor McFarland, co-chairman of the campaign, and Mrs. Roscoe Clark, Civic Conert representative of Memphis, Tenn.

Nicholas will speak on the plans for the campaign, and Mrs. Clark will speak on the Civic Concert plan.

Division leaders for the campaign are Mrs. W. K. Patterson, Mrs. Marcel Josephson, Robert Clinton, Mrs. Gene L. Dulaney, Mr Thomas F. Hartley, Roy McCloskey, Mrs. W. D. Simms. Campaign headquarters are located at 2616 Avenue S, with Mrs. Frank F. LeFeuvre and Mrs. W. T. Dabbs as chairmen.

## *Vegetables Play Big Role In Providing Child A Good Diet*

By DOROTHY V. WHIPPLE
AP Newsfeatures

DO YOU MAKE a big effort to see to it that your children eat vegetables? Vegetables are an important part of a good diet and it is worth the worry to get them inside the youngsters.

But are the vegetables you serve the valuable nutritional items they should be?

Vegetables are good sources of vitamins and minerals. Most of them contribute roughage which is necessary for human internal workings. Some vegetables have good protein although vegetables are not our main source of protein. Many vegetables are good sources of carbohydrate. But the vitamins and minerals are vegetables greatest claim to fame.

Vitamins are delicate substances, it's easy to destroy them in cooking and minerals can all too readily be removed from vegetables in preparing them for the table.

**Cook 'em Right**

It's a waste to spend time and effort in getting no-account vegetables down the gullets of reluctant children.

Let's make sure that every last vitamin and mineral nature puts into our vegetables gets into our children.

Cook vegetables as little as possible. The longer you cook them the more vitamins you destroy. Cook them in as little water as you can. Try to come out even with the water, so that when the vegetable is tender enough to eat, all the water has been absorbed into the vegetable. If any water is left over, don't throw it away. This left over vegetable water contains a lot of the vitamins of the original vegetables. Have a jar in an open pot and let the water evaporate.

It's really easy to prepare vegetables so that every bit of their nutritional value is retained. In addition, well-cooked vegetables taste a great deal better than water-logged ones.

If you want to get gay and different with your vegetables, experiment with a few herbs. You may be surprised by the wonderful flavors you can produce. Add some summer savory to a cauliflower, or some mint to the peas, or a dash of thyme to stewed celery. Have you ever cooked large cucumbers? They are delicious.

into which you drain left over-water, and use it for making soup or gravy.

To cook vegetables and not have water to drain-off requires covered pots. A pressure cooker is ideal.

**Save Those Vitamins**

The vitamins in vegetables are destroyed more quickly in an alkaline solution than in an acid one. For this reason never add soda to vegetables. Soda does often keep the color greener but the pretty color is at the expense of the truly valuable vitamins. A tablespoonful of vinegar or lemon juice in a pot of vegatables will keep the solution acid and preserve the vitamins. The slight taste of the vinegar disappears in the cooking.

The minerals in vegetables are usually near the outside surface, especially in root vegetables like potatoes, carrots, beets, parsnips. Wash those vegetables thoroughly but do not peel them before cooking unless you are making a stew. Take off just as thin a layer as you possibly can, the less you take off the less you lose. With potatoes use the skin as often as possible, the skin of a baked potatoe is good eating, especially if you bake the potato rapidly and the skin is crisp.

**Serve Attractively**

After you have prepared vegetables for cooking use them right away. Do not let them stand around in a basin of water for hours before cooking. The water dissolves the precious vitamins and minerals.

Frozen vegetables will usually cook in the moisture in the package without the addition of more water. Use a covered pot.

Canned vegetables often have too much water with them Cook them

## NEWS FROM GAIL

By MRS. V. L. CLARK

Mrs. Edward Rinehart left Friday for Long Beach Calif. Mr. Rinehart is in the Navy and is stationed there.

Mr. and Mrs. Rusty Jones and family of Amarillo spent the weekend with Mr. and Mrs. T. G. Hudson.

Guests of the C. L. Harrisons over the weekend were Mr. and Mrs. L. S. Hartison and family of Odessa. The group visited the C. E. Rigs' in Roscoe Sunday afternoon.

The century plant blooms once in its lifetime; nor once in 100 years as its name seems to indicate.

## Church Meet Is Planned

MINERAL WELLS, April 20 (AP)—Men from almost every phase of business and professional life will meet here Thursday and Friday for the Texas Baptist Laymen's Conference.

"God's Program Is Our Business" will be the theme of the conference. Subjects include Christian education, stewardship, medicine, personal witnessing and missions.

Dr. Clifford Ransdell, associate dean at Texas A&M, will speak Thursday night. The speaker at the closing session Friday night on "Baptists and the World Crisis," will be Rep. Brooks Hays of Arkansas, chairman of the Southern Baptist Christian Life Commission.

Other speakers include Bryan Bradbury of Abilene and Dr. James Landes of Wichita Falls. Dr. Landes is pastor of the First Baptist Church in Wichita Falls and chairman of the Christian Education Commission of the Baptist General Convention of Texas.

## 25 YEARS AGO

(Taken from the files of the Scurry County Times, April 21, 1932)

The world famous Royal Russian Chorus will be presented in the high school auditorium at 8:15 o' clock Saturday evening with the school's music department sponsoring. Music lovers of this territory are elated over the coming attraction, which is considered by school officials as the outstanding treat of this kind ever offered in Snyder.

• • •

Prairie do poison is now available through County Judge John E. Sentell at six cents per pound, the commissioners court providing the chemical at cost in order to rid this territory of the little animals.

• • •

Another trophy was added to the Snyder High School collection Saturday when seven athletes, most of them penny-weights, led more than 100 schools from 13 counties in the district track and field meet in Abilene. Abilene was beaten out of first place in the meet for the second time in history. The three high schools: Snyder 28 points; Big Spring, 26½; Abilene, 22.

• • •

Reports from the Blackburn well yesterday indicated that the drill was stepping along at 4,565 feet in a sandy lime formation. The week was featured by a visit of oil scouts from the Empire and Phillips companies, who have never been actively interested here.

• • •

Farmers who hold co-op cotton will received on an average of $2.50 per bale advance about May 1, it was learned by the three Scurry County delegates who attended the district meeting in Haskell Saturday.

• • •

Snyder Country Club golfers will entertain the Big Spring team on the local course next Sunday afternoon in the second of a series game of the Sand Belt Golf Association.

## Rush Party Held By Sorority Here

The Gamma Upsilon chapter, ESA, held a rush party Thursday night in the home of Mrs. Bob Boren, 1806 Thirty-seventh Street.

Cohostess was Mrs. C. U. McDaniel J.R.

Members attending were dressed to express their "suppressed desires." Games were played and prizes were won by Mrs. McDaniel, Mrs. D. E. Richie, and Mrs. Willie Martin. Some of the costumes depicted gypsies, Huckleberry Finn, Greek goddess, cowboys, Miss Texas and Cinderella.

The refreshment table was laid with a pink cloth, centered with a Christmas tree decorated with glittering eggs. Refreshments of frosted Cokes and cookies were served to 10 members and three guests. The guests were Mrs. Max Coffee, Mrs. Darrell Black and Mrs. D. E. Richie.

### To Become Assistant

SAN ANGELO, April 20 (AP)—Robert Augenthaler, West Texas representative of Standard Oil of Texas, will become assistant to the vice president of exploration for the California Exploration Co. in San Francisco May 1.

**WINNERS IN LET'S GET ACQUAINTED CONTEST**—Three of the winners in the Daily News "Let's Get Acquainted Contest" are shown above with the prize winning entries. Sis Ketner, above right, took first place. Her entry was the display at left, constructed in the form of a flowering shrub. Cecil Boren, center, won third place with his entry at right, while Mrs. Thomas Early, left, won fourth place. Pat Gilmore, second place winner, was out of the city when the winners were announced. Prizes totalling $200 were awarded to the winners. (Lee Watson photograph)

# Here's How To Sew For That Angel

AN ANGEL SMOCK and ruffled pants make any little girl look like an angel, even if some cynics insist most children are angels only when asleep.

Perfect for playtime or party time is this charming little set. Local sewing center experts suggest that the gathering and cording attachments on your sewing machine will make quick work of both. They can be made in a few hours from a printed pattern that features inch-rules on the pattern pieces for simplified alterations.

The smock, sleeveless and cool flares out from a gathered yoke underlined with eyelet-embroidered beading, through which a ribbon has been run, and terminates in deep scallops. The scooped neckline, loose sleeves and scalloped hem are piped in contrasting bias tape, and embroidered above one scallop is the head of an angel, complete with wings and a halo, and the phrase "I'm an angel." An iron on transfer is included with the pattern, so that embroidery is merely a matter of stitching over the transferred design.

The pants, made in only four pieces, have elastic run through the waist for a snug fit. Ruffles are make from two straight strips of fabric, gathered and hemmed by machine, then added to the pants. The piped pant-legs are easily gathered by using elastic sewing thread in the bobbin of the machine, and regular mercerized sewing thread on top.

In making children's clothes, it is important to remember to use only durable and washable fabrics and trimmings in clear colors, most becoming to the fair coloring of a small child. Clothes should fit loosely and comfortably to provide for the ease and freedom of movement needed by active youngsters.

Here are a couple of hints to use in making children's clothes: back buttons with a small piece of tape, or an extra piece of fabric, to keep the fabric from ripping when stress is given to fastenings during rambunctious activity. And, if you believe that "a stitch in time saves nine," restitch all seams for added strength.

Another suggestion is to purchase an extra half yard of fabric, beyond that suggested on the pattern envelope. Little girls love to have their dolls dressed in the same fabric, and little boys enjoy stuffed animals to match their clothes. A quick glance through the needlework and transfer catalog at the pattern counter will reveal dozens of suggestions for toys that can be made from left-over fabrics.

# Don't Try Keeping Up Sex Front

By VIVIAN BROWN
AP Newsfeatures Writer

A sweater can be an elegant piece of fashion. Dress it up with a fur collar in winter. Wear it, as is, in summer—and you can be a femme fatale, even though casually dressed.

But don't make the mistake of trying to compete with "cheese cake" models—sweater girls whose livelihood depends on keeping up a sex front for the public. The too-tight sweater was fashionable in another era when emphasis was on the bosom and every girl wanted to compete with her favorite movie star. That kind of glamor when it promotes whistle calls is considered indelicate today.

Sometimes the trouble with a sweater-fit is the bra. A curve in a proper brassiere looks more attractive under a loose-fitting garment, something to keep in mind when you buy a bra, and a sweater.

When you buy a bra, consider the clothes you'll wear over it. It may shape a wonderful figure in a sheath dress, and be unflattering in another type of garment.

A bra to wear under a sweater, for instance, or under a summer-weight knit suit requires less accentuation than the bra you wear with a casual, boxy jacket. The cut of the suit requires a bra that lifts the bosom, proving some accentuation to compensate for the flattening effects of the suit's cut. But not so with the sweater that offers its own high-powered accent.

Some manufacturers make bras with rounded cups and concealed seams, ideal for wear under sweaters. It's a good idea to try on several bras before making a selection—don't take the first choice of the sales girl.

It's your money—make your own choice. Slip on sweater or dress over each bra. You'll find it is surprising how different style bras give your garment a different look.

The brassiere with a two-section cup set on an anchor band is the best type to wear under a sweater. It has a more rounded, less conical look than the four section styles with quarter circles of fabric stitched together to form the cup.

A padded bra will help round out a small bosom. There are various thicknesses of foam rubber in these contour-increasing styles. Select the bra that merely fills out your bustline in proportion to your other measurements and general build. The cups definitely should be rounded for under-sweater wear. The latest fashion in sweaters is the wool knit sweater worn with a matching color skirt and bulky knit cardigan in pastels-yellows, blues, pinks, grays. The bully knit cardigan is available too in bright shades—red, white and navy blue.

# FOR GOOD EATING

Here's a new idea in turnovers—these Rhubarb Griddle Turnovers are baked in the same way you make griddlecakes:

RHUBARB GRIDDLE TURNOVERS

Rhubarb Filling
2 cups sliced fresh rhubarb
½ cup water
1-3 cup sugar
3 tablespoons cornstarch

Combine rhubarb and water in saucepan and cook until rhubarb is tender (about 10 minutes). Mix together sugar and cornstarch. Stir into rhubarb sauce and continue cooking until thick and clear. Set aside to cool while making turnover dough.

Makes about 1½ cups Rhubarb Filling.

Turnovers
2 cups sifted enriched flour
1 tablespoon baking powder
1 teaspoon salt
1-3 cup shortening
2-3 to 3-4 cup milk

Sift together flour, baking powder and salt. Cut or rub in shortening until mixture is crumbly. Add milk to make a soft dough. Turn out on lightly floured board or pastry cloth and knead gently 30 seconds. Divide dough into 6 equal parts. Roll each part out to circle about 6 inches in diameter. Spread ¼ cup Rhubarb Filling on half of each circle. Fold over other half and seal edge. Place on lightly greased griddle over low heat. Bake turnovers slowly until golden brown on under side (about 7 minutes). Turn and brown other side. If desired, turnovers may be baked on ungreased baking sheet in hot over (425 degrees F.) about 15 minutes.

Makes 6 Turnovers.

# Toastmasters To Receive Charter

The Snyder Toastmasters Club will hold its Charter Night party tomorrow night at 7:30 o'clock at the Hilander Drive In restaurant.

Members and their wives and several guests from other clubs in this area are expected to attend.

Fred Balderston, district governor for District 44 of Toastmasters International, from Amarillo, will present the charter to the Snyder club. Jack Cross, president, will receive the charter on behalf of his club.

The charter presentation will follow a regular program of the club's meetings. The club has been organized for about nine months, but so far has not been chartered.

In the program prior to presentation of the charter, a pledge of allegiance to the Flag will be held by past president Bill Schiebel, followed by invocation by Kay A. Barrier.

Guests will be introduced by Cross.

Table topic master for the evening will be Jim Tatum, and table topic speakers will include Lloyd DeArmon, W. D. Durfey, J. W. Harrison, J. T. Haynes, S. P. Hulen, F. F. LeFervre, Ned White, and W. D. McCorkle.

After a short business meeting the speakers will be John Black, W. H. Bunch, and Ed LeMarquand, all introduced by Toastmaster Carl H. Jones.

Those speakers will be evaluated by Art Blanchard, T. W. Wylie, and Gilbert Fields. General master evaluator of the evening program will be Roy J. McCloskey. Prentis Bass is grammarian for the program.

R. W. Howser will be timer and Ah Suppresso Operator.

Plans and preparations for the meeting have been under the direction of W. D. Durfey, chairman of the social committee.

## Ike Signs Deficiency Appropriation Measure

AUGUSTA, Ga., April 20 (AP)—President Eisenhower today signed 320 million dollar deficiency appropriation bill, of which 275 million is for welfare grants to the states. The remaining 45 million is for small business loans.

The measure was one of six signed by Eisenhower at his vacation cottage at the National Golf Club here.

The 275 million dollars is for kpublic assistance grants to the states. It will cover May and June relief checks to needy aged, dependent children, blind and disabled persons.

## Convention Slated

TYLER, April 20 (AP)—The state convention of P.E.O. will be held here April 24-26. Chapters from Texarkana, Sulphur Springs, Commerce, Mineola, Daingerfield and Tyler will be hosts.

# Many Obstacles Still Remain Before Legislature Adjourns

AUSTIN, April 20 (AP)—Fast action in the House and Senate this week moved the Legislature within shouting distance of final adjournment. Numerous major obstacles remain.

Some of Gov. Price Daniel's major program points—such as Insurance Commission reorganization and a statewide watchdog commission on crime—appeared to be bogged down.

The question of teachers' pay raises, and a final agreement on spending likewise must be disposed of before the lawmakers can write off the current session as completed.

The desire to handle major remaining questions quickly and end the session within the 120-day period suggested by the Constitution continued to grow in both houses this week. Marathon sessions were held to push pet bills—plus many major items of legislation—a little further along. Work on many bills was finished.

The House took a Thursday through Monday Easter recess, voting to get back on the job Tuesday at 1 p.m. The Senate held its first Friday meeting of the sessions, showed signs of ill-temper indicating impatience and a desire to finish its work, and adjourned until 10:30 a.m. Tuesday.

The key conference committee on the two billion dollar-plus appropriations bill knocked off for part of the Easter recess, but was called to take up its rewriting of the measure again Monday at 1 p.m. This committee has been working day and night to get the bill in final shape.

Sen. William Fly of Victoria, chairman of the Senate Finance Committee, said he believed the conferees could report their recommendations May 1. That is a week from Wednesday. Both houses could complete action on the money bill and send it to the governor within a few days from that time. It provides cash for all state operations for the two year fiscal period beginning Sept. 1 and is a legislative must.

Bills intended to raise about 20 million dollars for teachers' pay raises made progress this week. This expected new revenue, plus the final outcome of the conference committee's spending recommendations, may tell the story as to how much teachers will get. They are asking an average $399 annual increase in minimum pay.

The water program urged by Daniel moved forward, and other major bills advanced.

One of the most important was the Youth Council bill, reorganizing the state management of such institutions as the Gatesville Training School for delinquent boys. It has been called an effort to find the answer to the problem of juvenile delinquency.

Both houses finished action on the youth measure and sent it to the governor. A council of three with an executive director will manage the state youth institutions at Gainesville, Gatesville, Waco, Corsicana, Crockett and the school and home at Austin for Negro orphans and deaf and blind children.

The House threw a big batch of anti-integration bills at the Senate, which set a special public hearing Wednesday at 8 p.m. on some of them. These bills will be heard by the important State Affairs Committee. A filibuster to defeat them has been threatened if the bills reach the Senate [illegible]

Members of citizens councils from over the state will hold a rally here Tuesday in advance of the hearing. These groups have urged passage of the bills fighting the U.S. Supreme court decisions.

A proposd sweeping change in the state's legislative system already approved by the House advanced to final reading in the Senate. It was the proposed annual sessions constitutional amendment. On one test it got 22 votes, 21 on another. It needs 21 for final approval.

Widely backed by statewide civic and political study groups, it was regarded as having a good chance of final approval for submission to the electorate in the general election in 1958. Under it, the Legislature would meet once a year, with the even-year sessions limited to 60 days.

Another bill of great importance to cities with such urban renewal programs as slum clearance projects also advanced this week. It was the measure permitting cities to do this type of work with strong federal financial aid. The bill passed the House, was reported to the Senate on a minority committee recommendation, and is on the calendar.

But if the Legislature adjourns finally by May 10—the present target date—many measures will be lost in the last-minute rush.

## Transfusions Given Despite Objections

FORT WORTH, April 20 (AP)—Larry Phillips, 15, Arlington boy who was given blood transfusions yesterday after court action overruled his parents' objections, was reported improved today.

The parents, Mr. and Mrs. J. H. Phillips, are members of the Jehovah's Witness sect, which has religious convictions against blood transfusions.

When the boy was seized with internal bleeding after his tonsils were removed, an attorney was contacted who got a court order declaring Larry a neglected child and putting him under jurisdiction of the court.

## Dies In Accident

PARIS, Tex., April 20 (AP) — Dellous Stitts, 31, of Ben Franklin was killed early today when he lost control of his car during a driving rainstorm on Highway 82 west of Paris.

## Work To Start

BIG BEND NATIONAL PARK, April 20 (AP)—Work on residences and utilities for employes of the Big Bend National Park is to start soon, Supt. George Miller reports.

The reign of the Czars in Russia was ended in 1917 when Nicholas 2d was overthrown by revolutions.

HOBBS JUNIOR-SENIOR BANQUET—The gaily decorated banquet room of the Hilander restaurant here was the scene Thursday night of the Hobbs High School junior-senior banquet. The students and their teachers are pictured during the entertainment following dinner above. (Lee Watson photograph)

## 'Get-Tough' Policy On Youths Set

DALLAS, April 20 (AP)—Simon Rodriguez is a slightly-built, dark-eyed teenager who had more than his share of trouble with the law as a juvenile.

He was sent to the state training school for helping burn down a schoolhouse in 1955.

He was on parole when a girl, 12, was shot to death and raped in a slum area of west Dallas Dec. 31. Simon was charged with murder and rape in the case.

James Parks is a husky Wichita Falls youth with a ready smile and dimples. James wasn't known as a trouble-maker.

But he wanted a car of his own. He saved $y00 and asked his parents to put up the rest of the money. When they refused, James said he took a rifle and shot his stepfather 10 times and his mother 6 times.

Simon and James both are 16.

Both are being held until their 17th birthday, when they can be tried as adults, although the maximum penalty they can receive if convicted is life in prison.

Holding juveniles charged with such violent crimes for later trial as adults is not rare.

But these two cases point up what seems to be a growing attitude among officials in Texas: To get tough on juvenile offenders.

The most publicized example of the sterner attitude was the recent campaign by Gray County Judge Bruce Parker of Pampa.

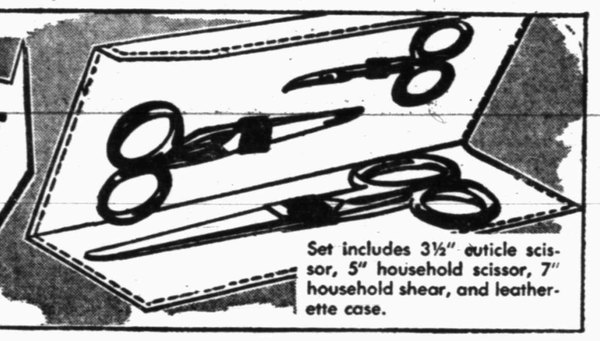

Parker put a curfew on juveniles and said he would refuse to issue beer licenses to pool halls or domino parlors where persons under 17 were allowed to congregate.

The curfew is seen as a solution by many officials. A bill is pending in the Legislature that would give cities formal permission to set up juvenile curfews for youths under 17.

# THE SNYDER DAILY NEWS

VOL. 7, NO. 303 SNYDER, TEXAS, SUNDAY, APRIL 21, 1957 SECTION C

Huge pipe racks at the Drilco Oil Tools, Inc., plant on the Lubbock Highway are significant evidence of the size and scope of industry in Snyder. A drive to launch the Snyder Industrial Foundation will be held all next week, Industrial Week in Snyder.

New tires from old ones has become the main interest of one Snyder industry, Central Tire Service, which does a $60,000 volume of tire retreading each year. The finishing touches applied to retreaded tires above include cleaning, balancing, and wrapping like new. So thorough is the firm that all retreaded tires are given a 12-months road hazard guarantee—a new tire guarantee.

## Snyder's Industry

WHEREAS, Industry is recognized not only as a great factor in the civic and economic development of Snyder and Scurry County, but will play an important role in the future of our community, and

WHEREAS, a unanimous expression of faith in the development of Snyder as an industrial center has been made by citizens, industries and businesses of Snyder, and

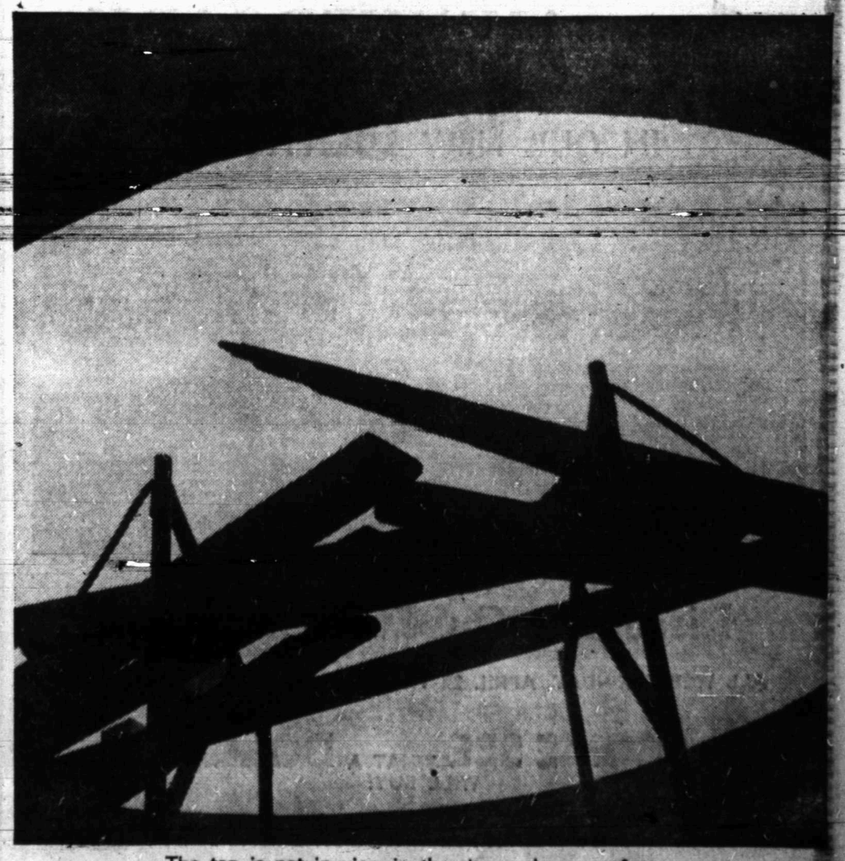

WHEREAS, promotion of the growth of industry can best be done by the concerted effort of our citizens,

THEREFORE, I Harold Bennett, Mayor of Snyder, hereby proclaim the week beginning April 22 to be SNYDER INDUSTRIAL WEEK, and urge all citizens to join in a unified effort to establish the Scurry County Industrial Foundation.

(s) HAROLD BENNETT
Mayor of Snyder

Industrialists above check a conelrad monitor unit which must be used with each radio frequency transmitting station. C. O. Holder, left, of Holder Construction Co., had the unit installed recently to comply with Federal Communications Commission regulations, by Jay R. Huckabee, right, head of Huckabee Radio Engineering of Snyder, DuMont two-way radio distributor for West Texas and New Mexico. The unit is used for continuous monitoring to detect if there has been an attack upon the United States, in which case only radio transmission on certain frequencies would be permitted. (Lee Watson photographs)

The top is not in view in the size and scope of one Snyder industry—the Southwestern Brick & Tile Co., but the dome of a new kiln for making bricks of West Texas clay is nearing completion in the picture above. When completed the hole in the top of the kiln will be closed and bricks will be baked at a temperature of 1,800 degrees inside.

# Drive To Organize Industrial Foundation To Start Thursday

Snyder and Scurry County citizens will meet for a luncheon session Thursday to launch a drive to establish an industrial foundation here.

The luncheon session is set for 11:45 a.m. in the Martha Ann Woman's Club.

All citizens of the county interested in the industrial foundation project have been invited to attend. Efforts are being directed toward subscription of a fund which could be used by the foundation to assist and encourage industries to locate here.

Those attending the luncheon will have opportunity to take memberships in the foundation, which will sell for $1 per share. Those desiring membership may make outright purchases of shares, combination of both.

The foundation would be set up as a non-profit corporation, with its own board of directors and officers to be elected by the members. The board would be in charge of the foundation's funds, with authority to use them to assist industries which might desire to move into Snyder. Such assistance would be authorized to aid in providing suitable property, building facilities, etc.

The assistance would not be in the form of gifts, however. The foundation would merely provide facilities on a lease, or lease-purchase basis. Ultimately, the foundations resources would have a chance to become self perpetuating via lease payments and interest in the case of purchases.

Although no definite goal has been established, persons interested in the project have expressed hope that at least $25,000 can be subscribed to set up the foundation. This amount, they believe, would be sufficient for the foundation to function properly at the outset and in the event a desirable industry should become available to the Snyder area, the foundation could negotiate without a hurried drive for funds.

The industrial foundation project grew out of the Chamber of Commerce industrial committee, largely through the efforts of the late Forest Sears, who served as chairman of that committee last year. Sears did considerable research on the industrial foundation idea, and traveled considerably visiting other cities with similar organizations.

After a period of several months of study and research, the current project was launched, and a charter application and by-laws have been prepared.

(The full text of the by-laws appear elsewhere in this section of The Daily News).

Principapl speaker at the Thursday luncheon will be W. A. Pounds of Tyler, who helped organize the well-known industrial foundation in that city about 10 years ago. Tyler, which has one of the most successful industrial foundations in the country, was one of the cities visited by the late Mr. Sears while he was conducting his study.

Tickets to the luncheon are $1.25 each. The program has been arranged so that the session will be concluded around 1 p.m.

## Tyler Foundation Pioneer To Aid In Forming Group Here

An industrial foundation pioneer, well-known banker and civic leader will be here Thursday to help Scurry County citizens launch their industrial foundation.

The visitor will be W. A. Pounds of Tyler, who will be princial speaker at the kickoff luncheon.

Pounds, at 63, is a veteran banker, having been in that profession since 1914 and serving as president of the Tyler Bank and Trust Co. since 1938.

He helped organize the Tyler Industrial Foundation shortly after the end of World War II, and has served that organization in various capacities. Moreover, he is immediate past president of the East Texas Chamber of Commerce, and has served as president of the East Texas Fair Association and of the Texas Rose Festival. He has been treasurer of the Texas Methodist Conference since 1922.

Recognized as one of the top civic leaders in his home city, Pounds is still very active in Chamber of Commerce, industrial foundation and Methodist Church work.

His association with the Tyler Industrial Foundation has enabled him to witness at first hand the outstanding success and to participate in operation of one of the best known industrial foundations in in existence.

The Tyler organization often is used as a pattern by other cities in organizing industrial foundations of their own. The Tyler Industrial Foundation was among the first to be organized in the Southwest, and its results have been the subject of comment throughout the area.

Pounds will speak during the luncheon program Thursday at the Martha Ann Woman's Club. All Snyder and Scurry County citizens interested in the industrial foundation proposal have been invited to attend the luncheon. Tickets to the luncheon are $1.50 each. Most service clubs in the city have made arrangements for the industrial foundation kickoff to serve as their regular luncheon meeting for next week. Their tickets will be handled through their respective secretaries, or treasurers, in the same manner they follow for regular meetings.

### Actor Handcuffed As Financee Looks On

LOS ANGELES (AP)—Handsome actor Anthony Franciosa got into a ruckus with a newspaper photographer Friday while his financee actress Shelley Winters, stood by screaming. Franciosa was hauled away in handcuffs to a police station.

The Evening Herald-Express said the rising young film figure punched and kicked its photographer, Bill Walker, after objecting to photographers' attempts to take pictures of the couple.

The newspaper said Franciosa's "kick to the groin before he was subdued" nearly knocked the camera out of the photographer's hands.

### Parcel Post Hike

WASHINGTON (AP) — The Post Office Department today asked the Interstate Commerce Commission for authority to raise parcel post rates by about $4,300,000 a year.

### Resumes Duties

AUSTIN (AP)—Joe Gibbs, 68, Seguin banker who resigned in 1952 after 10 years as a state insurance commissioner, reassumed his commissioner's duties today.

### Ike Move Praised

WASHINGTON (AP) — President John S. Coleman of the U.S. Chamber of Commerce today praised President Eisenhower's proposal for cutting the federal budget but said it does not "go far enough."

### Salk Demand High

AUSTIN (AP)—The State Department of Health said today that demand for Salk vaccine is far exceeding the supply in Texas.

*THROUGH CHAMBER WORK*

## Foundation Plans Mapped

The Scurry County Industrial Foundation took its first roots in the Snyder Chamber of Commerce industrial committee.

And, despite the fact that the foundation will become a non-profit corporation in its own right, with no tachincal ties with the Chamber of Commerce, the chamber's industrial committee will figure prominently in the foundation's success.

The foundation will be established to lend assistance to worthy industrial prospects, but the Chamber of Commerce still will be the key factor in promotion work — that is, in contacting and providing information for prospective industries.

In recent months, the Chamber of Commerce has increased its supply of statistical information on Snyder and Scurry County. This program will be continued and expanded constantly with more research into such factors as raw materials, labor supplies.

Some research already has been undertaken, of course, but the chamber plans to keep its storehouse of information constantly abreast of the times.

Prospects who express definite interest in Snyder, and who will need assistance in relocating plants, securing sites, etc., will be referred to the industrial foundation.

Up to now, efforts to attract new industrial concerns here have been limited exclusively to conventional promotion work, such as that undertaken by the Chamber of Commerce.

The foundation will provide the "last step," which has been instrumental in attracting industry to many cities and towns which already have such organizations in operation.

## Daniel To Speak At Landmen Meet

SAN ANTONIO, April 21 — Texas Governor Price Daniel, a Department of Interior official and two oil industry executives will speak at the third annual meeting of the American Association of Petroleum Landmen here April 25-27.

More than 1,000 AAPL members from every part of the United States and Canada will attend, according to Convention Chairman Howard E. Stover of San Antonio.

Edward Woozley, Director of the Bureau of Land Management, Department of Interior, Washington, D. C., will be the principal speaker at the Thursday morning general session at which AAPL President Miller Waggoner of Oklahoma City will preside. Woozley will discuss "Federal Public Land Leasing Problems."

An Industry executive, lecturer, economist and author, Dr. Waldo E. Stephens, Executive Vice President of Esperanza Oils, Incorporated, will talk on "New Frontiers of Security" at the Thursday afternoon general meeting. Robert K. Summy of the Sesnon interests of San Francisco, independent producers, will preside.

One of the high points of the meeting is a speech Friday morning by Texas Governor Price Daniel. Hamilton Rogers, president of Rowan Oil Co., Fort Worth, will preside at the session.

At the final general session, Howard McKinley, Regional Land Superintendent of CATC Marine Region, Continental Oil Co., Houston, will tell about off shore oil operation in a speech entitled "The Adventure at Sea." Jack W. Prothro, Honolulu Oil Corp., Billings, Montana, will preside.

During the three-day meeting three group discussion sessions will be held. John H. Folks of Oklahoma City presides over "The Fair Contribution;" F. P. Woodley of San Antonio, "Oil and Gas Taxation;" and Leslie Moses of Houston will conduct a session on "The Origin and Development of the Oil and Gas Lease."

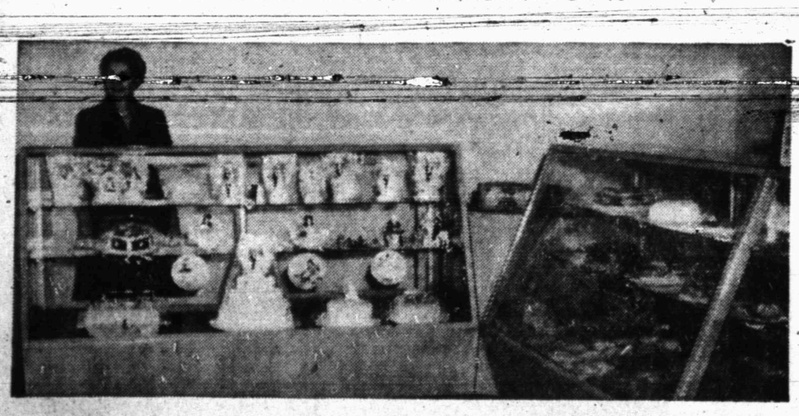

### Canal Boycotted

PARIS (AP)—France nas virtually ordered French-flag shipping to boycott the reopened Suez Canal, informed sources said today.

# 'Hickory House' Products Made Here

If you walk over to the meat department of your favorite grocery store and pick up a package labeled "Hickory House," you have a Snyder product in your hand.

And it may be one of several dozen items in the store carrying the same label.

"Hickory House" is the brand name of products processed, manufactured and distributed by the Snyder Meat Co., a local industry that is well known over a wide area of the Southwest.

The "Hickory House" brand is on 15 different "lunch loaves," such as pickle-pimiento lunch meat, liver loaf, bologna, salami, etc., and, of course, including the popular frankfurter.

These items come from the kitchen, in the same establishment, where of the Snyder Meat Co. Also a variety of cured meats, fresh cuts of both pork and beef, roll to the market every day.

The "market" in this case includes a vast territory of West Texas to the west and Southwest of Snyder.

G. W. Parks, owner and operator of the concern, said the Snyder Meat Co. processes and markets about 100,000 pounds of meat and meat products per month at present — and the frankfurter and lunch loaf season is just ready to begin. In a year's time the firm processes well over a million and a quarter pounds of beef and pork.

To do this, there must be a source of supply, of course. The Snyder Meat Co. keeps a buyer on the road constantly, purchasing the best beef and pork animals available. Livestock markets from Abilene to Clovis, N.M., and from Oklahoma to San Angelo, are visited regularly in the search for animals.

The animals are brought to Snyder for slaughter and processing. The Snyder Meat Co. usually slaughters twice a week, and an inspector is on hand constantly while slaughtering is done. Moreover, the plant gets an inspection by a veterinarian at least twice a month.

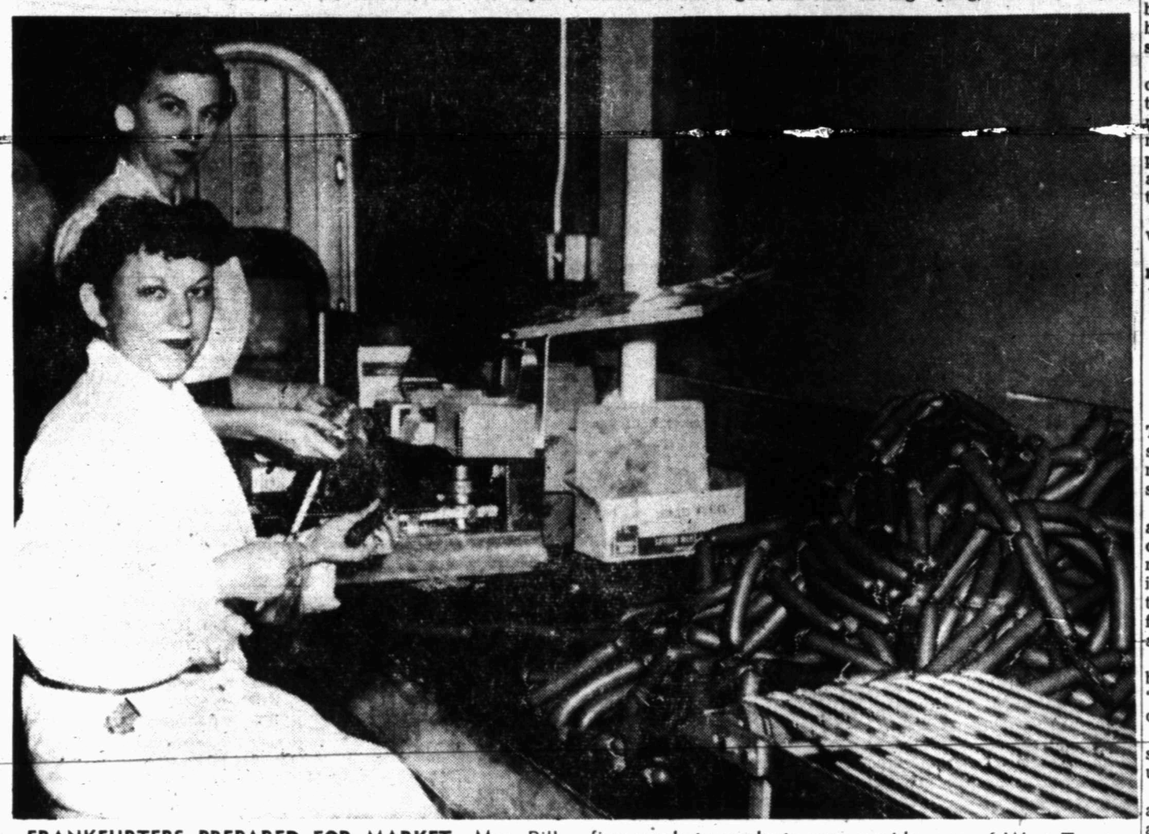

After the products are processed and are ready for the market they go out in Snyder Meat Co. refrigerated trucks to such points as Big Spring, Midland, Odessa, Kermit, Andrews, Seminole, Brownfield and Lamesa. Retail outlets in all of those cities receive delivery of "Hickory House" products twice each week.

The firm operates six vehicles, including huge refrigerated trucks and cattle trucks which brings in the animals for slaughter and processing.

The refrigerated trucks take out such items as slab bacon, cooked ready to eat hams, Hickory House bacon, ranch style bacon, all of the various lunch loaves, block chili, frankfurters, chilled beef carcasses, wholesale cuts of beef and pork, loins, sausage, shoulders, etc.

Ten persons are employed to operate the firm, and the operation moves with amazing smoothness. For example, the lunch meats, frankfurters, etc., are fully prepared in the kitchen designed and equipped for that purpose, and they never move from it until they are ready for the cold storage vaults.

All of the products find a ready market in West Texas.

FRANKFURTERS PREPARED FOR MARKET—Mrs. Bill Early, standing, and Mrs. Mary Reiger, pack frankfurters which have been processed at the Snyder Meat Co. The firm markets products over a wide area of West Texas, operating its own refrigerated trucks for distribution. (Lee Watson photograph)

## Army Seeks New Friends

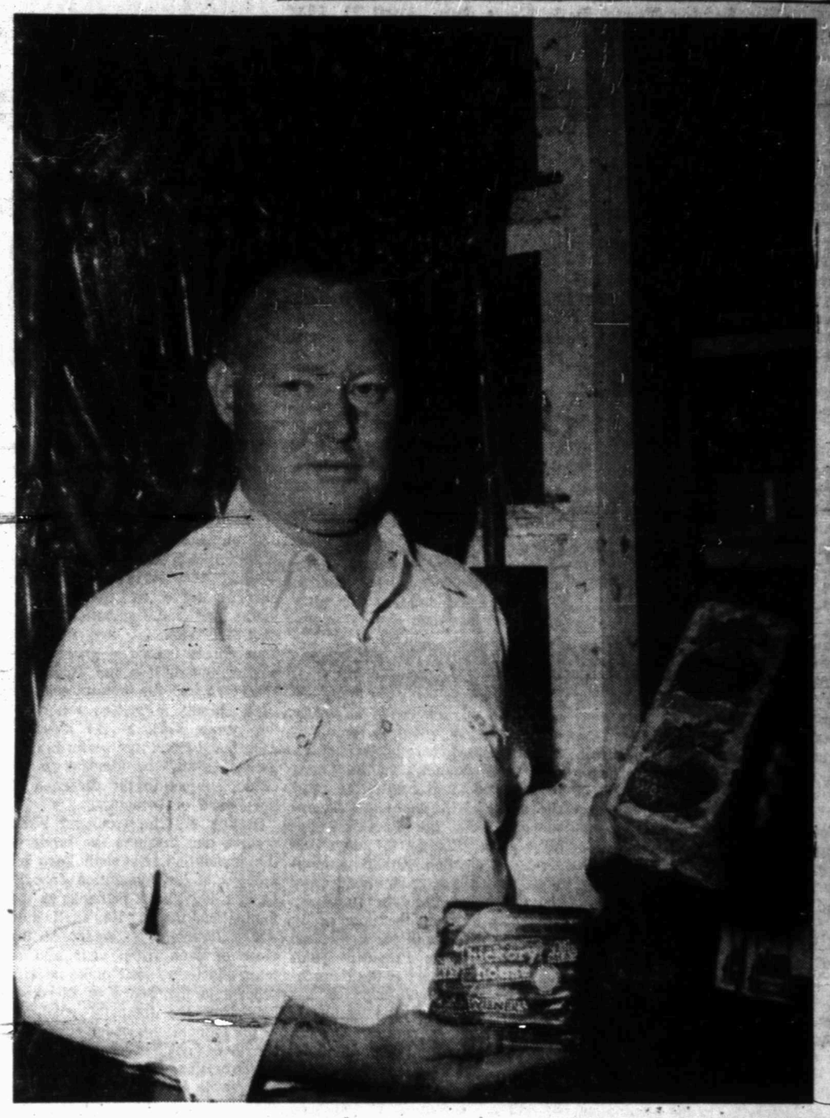

HEIDELBERG, Germany (AP) — The U.S. Army today put new steam behind its program to make friends where troops are stationed.

In a circular designed to create a "friendship-conscious" American community, the Army's European Headquarters listed specific goals for the program. At the top of the list is a "genuine friendly interest in host people and their way of life."

Another item, more on the bread and butter level, urged the "highest ethics in all commercial dealings."

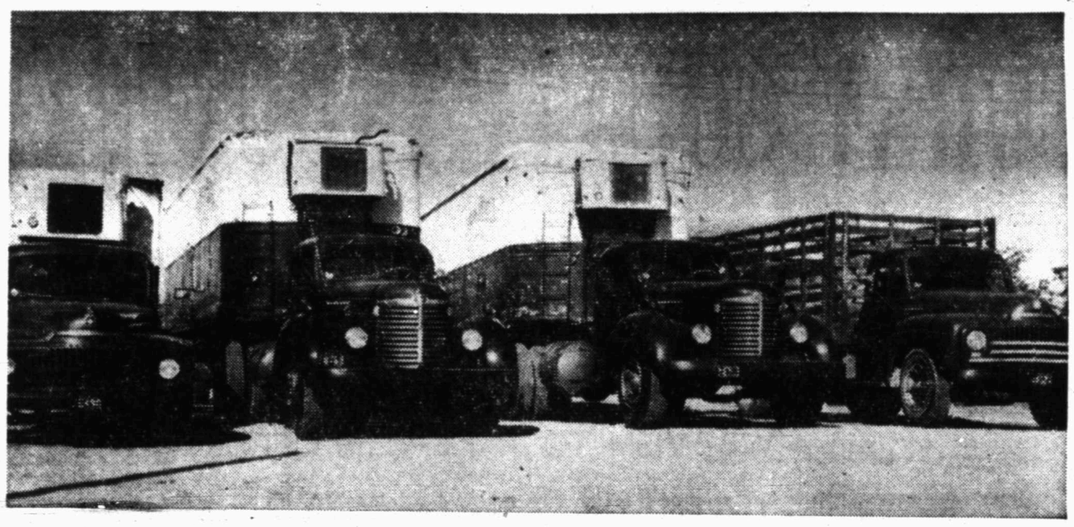

Maximum effort to learn and speak the host language, was urged.

Respect for the customs, history and traditions of the host country and identification and elimination of sources of irritation founded in misunderstanding, were suggested.

VARIETY OF SNYDER PRODUCTS—G. W. Parks, owner of the firm, displays some of the Hickory House products processed and distributed by the Snyder Meat Co. In addition to processing and marketing beef and pork cuts, the firm makes 18 varieties of sandwich leaves, frankfurters, etc. (Lee Watson photograph)

# Foundation By-Laws

Proposed by-laws for the Scurry County Industrial Foundation have been drawn ready for formal charter of the organization.

The by-laws were drafted by Fred Auforth, attorney, after a careful study of by-laws of other industrial foundations, and careful consideration of the objectives of the organization proposed here.

Text of the proposed by-laws for the Scurry County Industrial Foundation follows:

ARTICLE I

Name:

Section 1: This organization is incorporated under the laws of the State of Texas and know as the Scurry County Industrial Foundation. Its principal office and place of business shall be located within the city limits of the City of Snyder, Texas.

ARTICLE II

Objectives and Purpose:

Section 1: The Scurry County Industrial Foundation is organized for the purpose of advancing the commercial and industrial interests of the City of Snyder and Scurry County, Texas; specifically, to purchase, subdivide, sell or lease real property, and to erect or repair any building or improvement for the use of any manufacturing, industrial or other enterprize located within or in the vicinity of the City of Snyder, Texas, and to do all things incident thereto for said purposes as is authorized by Subdivision 53 of Article of 1502 of the Revised Civil Statutes to the State of Texas.

ARTICLE III

Limitations:

Section 1: The foundation shall be non-partisan and non-sectarian; it shall take no part in nor lend influence or facilities, either directly or indirectly, to the nomination, election or appointment of any candidate for office, either city, county, state or nation, nor shall any meetings of a political nature whatsoever be held within the premises occupied by or under the control of the foundation.

Section 2: The foundation shall be non-profit; there shall never be any dividends declared or paid from the profits, and no part of the net earnings of the association shall ever inure to the benefit of any private member or individual, except as hereinabove provided. Any and all profits accruing or earned shall be placed in a surplus fund to be used in the furtherance of the objectives and purposes of the foundation.

ARTICLE IV

Membership Eligibility:

Section 1: Any reputable person, firm, association or corporation interested in the industrial development, growth and general welfare of Snyder and Scurry County, Texas, shall be eligible to membership in this foundation.

Section 2: Members shall be elected at any meeting of the Board of Directors, and shall pay a minimum membership of $1 per membership.

Section 3: Any person, firm association or corporation eligible to membership may acquire any number of memberships, each membership or memberships, to evidenced by a certificate for share, issued by the foundation, and evidencing the contribution by the holder thereof of $1 per share.

Section 4: Any person, firm, association or corporation holding membership shall be entitled to cast one vote per share owned. Each member may vote its own share or shall designate an individual to represent it and cast its vote.

Section 4: Any person, firm association or corporation holding membership shall have the right at any time to change its voting representative upon written notice to the Industrial Foundation.

Section 6: Distinction in public affairs shall confer eligibility to honorary membership. Honorary membership shall include all the privileges of active membership, except that of holding office, with exemption from the payment of dues. Election to honorary membership shall require a two-thirds of the Board of Directors, and may be revoked in the same manner.

Section 7: Applications for membership shall be made in writing to the Board of Directors, and the application shall be regarded as a guarantee on the part of the applicant of his interest in and sympathy with the purposes of the foundation, and of his adherence, if elected, to its by-laws, rules and regulations. Election to membership shall require the affirmative vote of a majority of the Board of Directors.

Section 8: Membership is continuous except in the event of resignation in writing, removal from the community, expulsion, or death.

ARTICLE V

Membership Meetings:

Section 1: There shall be an annual meeting of the membership held in the first quarter of each year, and other meetings at the discretion of the President and Board of Directors.

Section 2: The Board of Director shall call a membership meeting upon the petition signed by not less than 10 per cent of the members.

Section 3: Notice of both regular and special meetings shall be given to each member in person or by mail notice to the last know post-office address at least five days in advance of the date of the meeting.

Section 4: At all membership meetings, 10 percent of the members in good standing shall constitute a quorum.

ARTICLE VI

Board of Directors:

Section 1: The government of the foundation, the direction of its work, and the control of its property shall be vested in a Board of Directors consisting of twelve (12) members, four (4) of whom shall be elected each year for a term of three years, and until their successors shall be elected and shall qualify, and no member of the Board of Directors shall be eligible for reelection until after the lapse of one year from his term as director.

Section 2: Election of the Board of Directors shall be held annually on the second Monday in January.

Section 3: A nomination committee of not less than five (5) members shall be appointed by the President thirty (30) days prior to the election, whose duty it shall be to nominate from the members of the foundation twice as many members to be voted on for members for the Board of Directors as there are vacancies on the Board to be filled. Said committee shall file a list of the nominees recommended with the President not later than fifteen (15) days before the election. Other nominations than those recommended by the Committee may be made by any member from the floor or by filing the name with the President.

Section 4: The President shall mail to all members of the Foundation ten (10) days prior to the election, a list of the nominees recommended by the moninating committee, and any other nominee filed with him.

Section 5: All voting shall be by ballot. The number of nominees corresponding with the number of directors to be elected who receive the highest number of votes shall be declared elected.

Section 6: The President shall appoint and submit to the Board of Directors for approval a committee of not less than three (3) judges who are not members of the Board of Directors, or candidates for election as such, to have supervision of the election, and such committee shall serve until the result has been ascertained.

Section 7: Upon their election, they shall meet, qualify and elect from their own number a president, two vice-presidents, a secretary and a treasurer. The directors shall have power to fill all vacancies on the Board. They may adopt rules for conducting the business of the foundation. They shall meet not less frequently than once each quarter, at such regular time and place as they will determine. They shall submit in writing at the annual meeting a full report of the work and the finances of the organization.

Section 8: The Board of Directors shall have a regular meeting each quarter, the time to be fixed by the Board and special meetings may be called by the President or any member of the Board. Absence from three consecutive regular meetings, without an excuse being valid and so recorded by the Board of Directors, shall be construed as a resignation.

Section 9: A majority of the Board of Directors shall constitute a quorum at any meeting.

Section 10: Inasmuch as the directors of this foundation are likely to be connected with other businesses or corporations, with which from time to time, this foundation may have business dealings, no contract or other transaction between this foundation and any other businesses or corporation shall be affected by the fact that the directors of this foundation also are interested in, or are directors or officers of such other business or corporations, if there shall be present at the meeting of the Board or of the committee of this foundation making, authorizing or confirming such contract, a quorum of directors not so interested; and any director individually may be a party to, or may be interested in any contract or transaction of this foundation, provided that such contract or transaction shall be approved or ratified by the affirmative vote of at least a majority of the members of the Board of Directors who are not so interested.

ARTICLE VII

Officers:

Section 1: Within ten (10) days after the annual election period, the directors shall meet and elect officers for the ensuing year, a president, two vice-presidents, a secretary and a treasurer. All of said officers must be members of the Board of Directors.

Section 2: The president and the treasurer shall each furnish surety bonds in such amount as the Board of directors shall deem necessary the cost to be paid by the Scurry County Industrial Foundation.

Section 3: The president shall preside at all meetings of the foundation and Board of Directors, and perform all duties incident to this office. He shall, subject to the approval of the Board of Directors, appoint all committees, and he shall be ex oficio member of all committees. He shall, at the annual meeting of the Foundation, recommend to the membership of the Board of Directors such matters and make suggestions as may tend to promote the industrial development of Snyder and Scurry County, Texas. He shall have power to sign and execute all contracts and instruments of conveyance in the name of the foundation, to sign checks, drafts, notes and orders for the payment of money, and to appoint and discharge agents and employees, subject to the approval of the Board of Directors. He shall have general active management of the business of the foundation, and shall perform all the duties usually incident to the office of president.

Section 4: The vice-president shall act in the absence of the president, and in the absence or disability of the three officers named (president and two vice-presidents) a member of the Board of Directors shall be chosen to act temporarily.

Section 5: The secretary shall conduct the official correspondence, preserve all books, documents and communications, keep books of accounts, and maintain an accurate record of proceedings of the foundation, the Board of Directors and all committees. He shall submit a written report of the year's work at the close of each fiscal year, and perform such duties as may be incident to his office, subject to the direction of the Board of Directors.

Section 6: The treasurer shall receive and disburse the funds of the foundation. He shall keep all moneys of the foundation deposited in a local bank of banks in the foundation name. He shall submit a financial statement at the close of each fiscal year and at least quarterly, shall make interim reports to the Board of Directors indicating the financial condition of the foundation at such time, and the Board of Directors may, at its discretion, require him to give acceptable bond, in such sum as the Board of Directors may determine, for the faithful performance of his duties.

ARTICLE VIII

Committees, appointments, functions:

Section 1: The Board of Directors shall authorize and define the powers and duties of all standing and special committees, except those committees whose functions are set forth in these by-laws. Subject to confirmation by the Board of Directors, the president shall appoint all committees. Committee appointments shall be at the will and pleasure of the president and in no event shall exceed the term of the appointing president.

Section 2: It shall be the function of the committees to make investigations, conduct hearings, make recommendations to the Board of Directors, and to carry on such activitites as may be delegated to them by the Board. They shall examine into and report on such subjects as may be referred to them by the Board or by the Foundation, and they may originate the report to the Board such views as they may deem proper for its consideration.

ARTICLE IX

Section 1: The executive committee shall be composed of the president, the two vice-presidents, the secretary and the treasurer.

Section 2: In the interim between meetings of the Board, the executive committee shall have charge of the routine business of the foundation. It shall have general charge of the finances and the property of the foundation.

Section 3: The executive committee may refer such matters brought before it to a proper standing committee, which it may designate, or such reference may be to the Board of Directors.

ARTICLE X

Disbursements:

Section 1: No disbursements of the funds of the foundation shall be made unless the same shall have been approved, or authorized by the Board of Directors. All disbursements shall be made by check, and the checks shall be signed by the secretary and countersigned by the treasurer.

Section 2: Each year the Board of Directors shall designate one of the banks in the City of Snyder as depository of the general funds of the foundation, and such designation of depository shall be alternated each year between each of the banks.

ARTICLE XI

Parliamentary Procedure:

Section 1: The proceedings of the foundation shall be governed by and conducted according to the latest edition of Robert's Manual of Parliamentary Rules.

ARTICLE XII

Amendment:

Section 1: The by-laws may be amended or altered by a two-thirds vote of those present at any regular or special meeting of the Industrial Foundation members, provided notice of the proposed change shall have been mailed by the secretary to each member not less than ten days prior to such meeting at his last regular mailing address.

---

At the funeral of King Edward VII of England in 1910, his wire hair ed terrier took precedence over nine kings in the procession.

CAPROCK MATERIALS CO.—The essential pieces of equipment to the operation of Caprock Materials Co., 2300 Avenue Q, are pictured above in front of the firm's huge elevators. One is a cable-dump truck for hauling sand and gravel to the plant, and the other is for mixing concrete en route to where it is to be used. (Lee Watson photograph)

# Caprock Materials Has Rapid Growth

Caprock Materials Co., a unique industry for Snyder, has made a phenominal growth in the past seven years here by furnishing a "foundation" for industry.

Actually Caprock provides the foundation for industry and much more in its service to industry, business and individuals of the Snyder area.

A fleet of huge concrete mixing trucks which deliver pre-mixed concrete to any project any where in the Snyder area is what is most often observed by the Snyder public but they are only a small part of industry.

Before they can make their deliveries of the finished product, much preparation has to go into every load.

First the raw materials — cement, sand and gravel — have to be assembled.

Sand and gravel for the firm is gathered from the Snyder area and the cement is shipped in from distant points.

Then the process of blending the three elements with water and other essentials begins at the plant located at Twenty-third Street and Avenue Q.

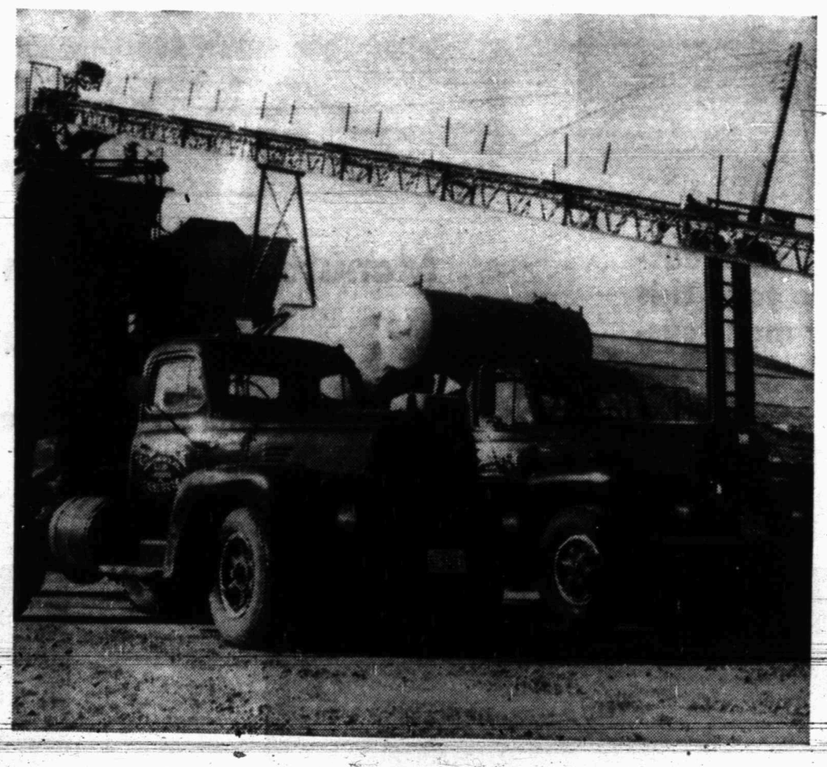

A long elevator with conveyor belt is used to transport the raw materials to the top of huge elevators where each component is carefully weighed and measured as it is fed in to the hopper.

After the blending process is completed the delivery trucks drive under the twin elevators and receive their loads of the basic materials for concrete.

During the drive to the project where the concrete is to be poured rotation of the mixer unit on the truck mixes the concrete.

"We deliver mixed concrete to any job anywhere in this area, for either small back yard jobs where residents are building a barbecue or patio, or to the largest oilfield and industrial constructions," Gene Best, owner, said.

WE SALUTE SCURRY COUNTY INDUSTRY!

Our 7th. Anniversary

WE WISH TO TAKE THIS OPPORTUNITY TO THANK OUR MANY WONDERFUL FRIENDS AND CUSTOMERS FOR THEIR PATRONAGE OVER THE PAST SEVEN YEARS. IT HAS BEEN TRULY A GREAT PLEASURE TO SERVE YOU.

WE ARE ALSO HAPPY TO BE A PART OF THE INDUSTRY OF THIS GREAT AREA. WE KNOW WITH THE FULL COOPERATION OF ALL OF US WE WILL MAKE THIS THE GREATEST AREA IN THE STATE.

GREY TURNS RED—Ray Martin, left, and Albert Martin inspect freshly molded bricks headed for the dryer at the Southwestern Brick and Tile Co. The bricks are grey when molded, but they will be red after they are dried and fired. The local plant turns out about 100,000 bricks per month. (Lee Watson photographs)

For Classified, Dial 3–5486

Bison is the true name of the buffalo. It comes from the old German word, wisent.

# Roma School May Recover Ancient Taxes

ROMA, Tex., April 20 (AP)—The forced partitioning of old Spanish land grants in Starr County may soon bring the Roma School District taxes from land which has been tied up in legal red tape dating back to about 1767.

The tracts of 60,000 acres in 14 porciones were granted by the king of Spain to colonists and developers in what was then "New Spain."

School Board President Joe Guerra, a descendant of one of the oldest families on the lower Texas border, said the earliest grant dated back to 1767.

Nearly all of the tracts are very narrow. Most were 10 to 15 miles long but not over one mile wide. The narrow frontage on the Rio Grande gave each tract the right to water direct from the river.

Guerra said the school district, which received one of the first per capita school apportionments from the State of Texas and has been in operation since 1854, has never been able to collect taxes on the land in the porciones.

The land has never been divided between the estimated 10,000 heirs of the original grantees and even today no individual owner or claimant knows exactly how much land he owns.

School tax payments on the undivided porciones have been stalemated during all the 102 years Roma schools have been operating.

The school district took the matter to court last year after the Legislature passed a law making it possible for a school district to force the partitioning of more than 1,000 acres of land owned by more than 20 persons.

Guerra said the school district was trying to collect an estimated $45,000 in taxes that have accumulated during the last 15 years. He said an estimate of the total taxes due on the land since the school district was organized was beyond calculation.

The school board president said, "What the school district wants is payment of current taxes. And we want oil and gas development made possible so oil and gas taxes can accrue to the district."

The suit now is pending in the 79th District Court of Starr County. More than 7,000 citations have been prepared.

## French Trains Roll

PARIS (AP)—French trains, buses and subways rolled on schedule today, a 48-hour strike by transport workers having ended at midnight.

## Vice Chairman Dies

FORT WORTH (AP)—Frank Taylor, 75, vice chairman of Ben Keith Co., wholesale grocery firm here, died today after a long illness.

# Stock Market Firms Gains, Moves Ahead

NEW YORK April 20 (AP)—The stock market consolidated recent gains this week and moved ahead a bit.

Wall Street was encouraged that the average turnover remained at more than two million shares a day, making the brokerage business profitable once more.

The market ended the week with a remarkable display of confidence. Wall Street pinned this rally on no particular piece of news but rather on the good technical conditions.

Although the market as a whole made very slight movements to the plus or minus side in the first three trading days, aluminums, oils and selected issues in other groups made some wide moves. On the final trading day, which put the week to the upside on balance, it was the industrials which were the pacemakers while rails declined and utilities were unchanged on average.

The terrific jump of 11¾ by Lukens Steel was in a class by itself. Other gains included Gulf Oil 5⅝ Kaiser Aluminum 2¾, General Electric 2⅞, Philadelphia & Reading 3½ and El Paso Natural Gas, 1⅞.

The Associated Press average rose 50 cents to $178.80. This was the eighth consecutive weekly rise in the average. Most advances have been very slight.

The week's news from business, economics and politics was mixed but reports from annual meetings of companies were favorable on the whole.

The five most active issues on the New York Stock Exchange this week were: Lukens Steel, up 11¾ at 88⅜; St. Regis Paper, off 3⅞ at 33; Bethlehem Steel, up ¾ at 44¾; Raytheon up 1 at 20; and Sperry Rand, up 1⅜ at 22⅝.

The Bolsheviks, with Lenin as premier, ruled Russia from 1917 until 1924. In that year Joseph Stalin came into power.

A wall eight feet high and 32 miles long! That would take a lot of bricks. Southwestern Brick and Tile Co. has produced enough brick and tile to do that kind of job since it first went into production three and a half years ago. The firm started with one small kiln, but now has four kilns and has increased its drying capacity from 30,000 bricks in 24 hours to 120,000 in 24 hours. Correspondingly, the firm's labor force has increased from four to 12 men during the same period. The Southwestern Brick and Tile Co. is appreciative of the fine acceptance of its products which has enabled it to become an important West Texas industry, and pledges that it will continue to expand and improve its production to better serve its many fine customers.

# Southwestern Brick And Tile Is Serving Three-State Area

Possibly few Snyder residents know that a purely local industry manufactures products marketed on a wide scale in a three-state area.

The Southwestern Brick and Tile Co. boasts such a market, and demands for the firm's products have increased steadily since the plant first went into production a little over three years ago.

At present, the plant is in the final stages of an expansion program of its own, which has involved construction of an additional kiln, doubling the dryer tunnel facilities, and installation of heavier equipment to crush its raw materials.

The plant, which is located southeast of the city adjacent to the Roscoe, Snyder and Pacific Railway tracks, can turn out half a million bricks per month, and they are gobbled up by the building industry as rapidly as they emerge from the kilns.

The plant is owned and operated by the Martin family. Albert Martin, who boasts half a century of experience with bricks and his two sons, Ray and Billy Don, operate the plant. They employ a minimum of eight laborers to keep the plant in production.

Albert Martin is a former contractor, having handled many jobs in this area, including what is now the Snyder Junior High School main building.

"There's a lot of difference between laying bricks and making them, but I think I know a good brick when I see one," the senior Martin said.

The firm turns out four types of bricks, with a selection of four shades, light pink, dark pink, light red and dark red. The Southwestern Brick and Tile Co. also manufactures clay building tile.

All of the products have found a ready market in Snyder and vicinity, both in commercial and residential building. At the same time, the firm ships bricks into Oklahoma, New Mexico and all parts of Texas, many orders going as far as Houston.

Although the firm has increased its production capacity considerably since it was founded, there always has been a backlog of orders, Ray Martin said.

Bricks are transported by truck in all directions, and many rail cars are loaded out each year at the plant. Shipments to the more distant points, such as Houston and out-of-state cities, usually go by rail.

The plant has four kilns, with a capacity of 80,000 bricks each. There are 12 dryer tunnels now, and these are served by 200 metal dryer cars, which operate on a small railroad system that links up various departments in the operation.

Production of a brick is no simple matter, but the process at Southwestern Brick and Tile Co. moves like clockwork. The raw material is crushed, mixed, molded and cut by machinery, after which the bricks are loaded on the dryer cars for a trip to the dryer.

In the dryer, water is removed gradually from the bricks by moderate heat.

Next the bricks go to the kilns for "firing" at some 1800 degrees fahrenheit. The kilns are fired by natural gas, and it requires 84 hours to bring the heat inside a kiln up to the required temperature. Then the bricks must remain in the steady heat for 66 more hours before they are ready for use.

But that's not all. After the fires are cut off from a kiln, it requires about three days for the kiln to cool enough for workmen to remove the bricks.

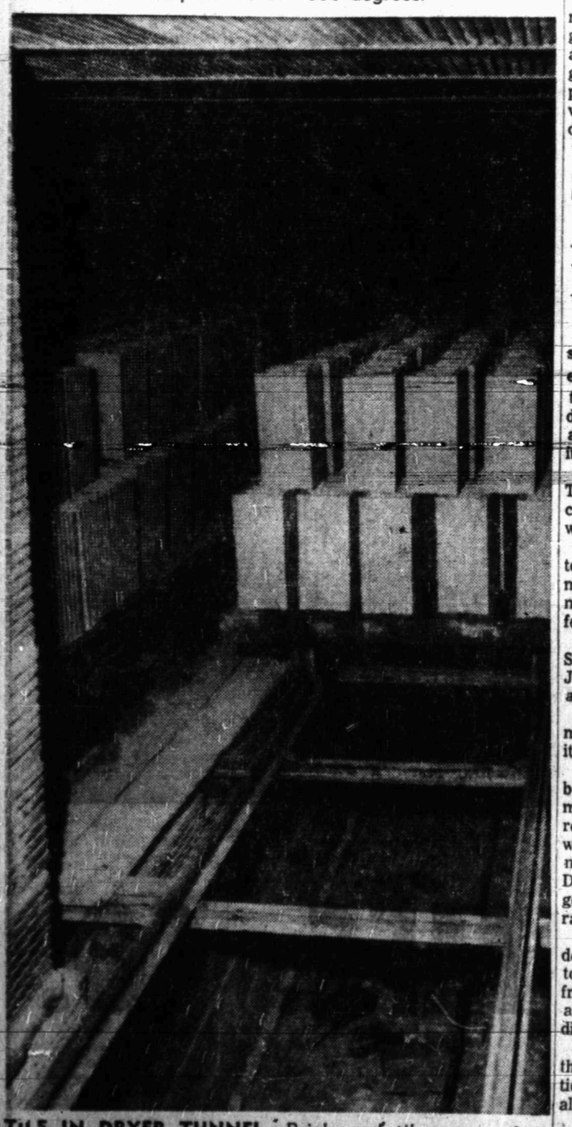

The Southwestern Brick and Tile Co. gets its clay from the Hugh Mason place in Fisher County. The clay is a dusty-looking grey, but it "fires" red. All of the bricks are grey before they go into the dryer, but after they are fired a deep red color prevails. Lighter shades of red and pinks are produced by mixing another type of clay which "fires" white. The latter clay is not suitable for making white bricks, but turns out an excellent product when mixed with the red variety.

Since the plant first launched production, the Martins have improved it steadily, and now have a substantial investment in the concern. The kilns alone are valued at about $30,00 each, and the 200 steel dryer cars represent an investment of $20,000.

But they are making it possible for Snyder products to be distributed throughout the Southwest.

**UNLOADING A KILN**—Workers at the Southwestern Brick and Tile Co. plant remove bricks from a kiln after firing. The firm has four kilns for firing brick and tile at a temperature of 1800 degrees.

**TILE IN DRYER TUNNEL**—Brick and tile go to the dryer on small rail cars after they are molded and cut. The dryer removes moisture gradually before the products go to the kilns for firing at higher temperatures.

## Industrial Uses For Crops Sought

WASHINGTON (AP) — Congress has before it a proposal for a 100 million dollar a year research program to find new industrial uses for farm products and to develop new crops.

The Commission on Increased Industrial Uses for Agricultural Products said in a report yesterday that such a program offered the only hope of putting a "free and efficient" agriculture on a prosperous basis and of reducing taxpayer costs of farm aid programs.

The commission was authorized by Congress and appointed by President Eisenhower.

It said an increased research program may show ways of converting many farm products into materials for making plastics, paints, building and structural materials, glues, waxes, adhesives, pesticides, papers, synthetic fibers, chemicals, industrial oils, coatings, improved clothing materials, detergents and drugs.

The Agriculture Department is now spending about $16,145,000 a year on research of this type.

Commission Chairman Leroy Welsh, Omaha grain operator, said a move may be made soon to put Midwestern farm state governors back of this program.

The commission, which spent eight months studying the farm surplus problem, said overproduction is likely to prevail in agriculture for many years. It predicted production in 1965 would be 7 per cent greater than demand.

Export markets hold no hope as an outlet, it said. Consequently, the only alternative, it said, is to gain outlets in industry.

The commission said it could not recommend a motor fuel program using a mixture of gasoline and alcohol made from surplus grains because the increase in the price of motor fuel to the public would be in excess of one billion dollars a year.

## Stockholders Are Waging Proxy Fight

ST. LOUIS (AP)—A group of Missouri Pacific Railroad stockholders is waging a battle for proxies to win cintrol of the board of directors at the railroad's first annual stockholders meeting since it emerged from bankruptcy.

The challenging group includes T. C. Davis of St. Louis, who was chairman of the debtor company when it was in receivership.

Five members will be named to the 15-member board at the meeting in St. Louis May 15. Five members are elected each year for a five-year term.

Aligned with Davis are Thomas Shearman of Lake Charles, La.; John Balliet of Appelton, Wis.; and Martin Watts of Philadelphia.

The group hopes to defeat four management nominees through its proxy drive.

"We were hopeful there would be no contest at our first annual meeting since we emerged from receivership, but we believe we will be successful in elcting a management slate," said Russel Dearmont, vice president and general counsel of the 11-state railroad.

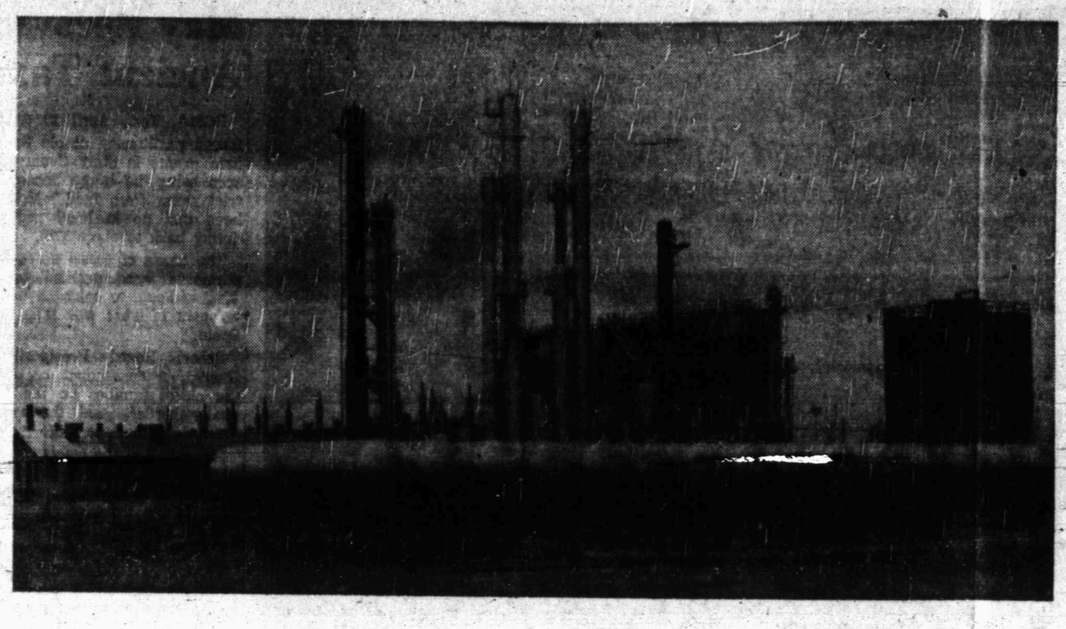

Shearman has filed suit in Independence, Mo., asking the court to enjoin Missouri Pacific officials from holding their annual meeting and to stop a staggered term for directors.

It also asks postponement of the annual meeting until disposition of Sherman's motion to elect all directors at once.

The railroad emerged from trusteeship March 1, 1956, after a series of legal battles over reorganization plans. It went into receivership in 1933.

### Lodge Returns

NEW YORK (AP) — Henry Cabot Lodge, U.S. delegate to the United Nations, returned today by air from a two-week visit to United Nations agencies in Paris, Geneva and Rome.

Industrial Development . . .

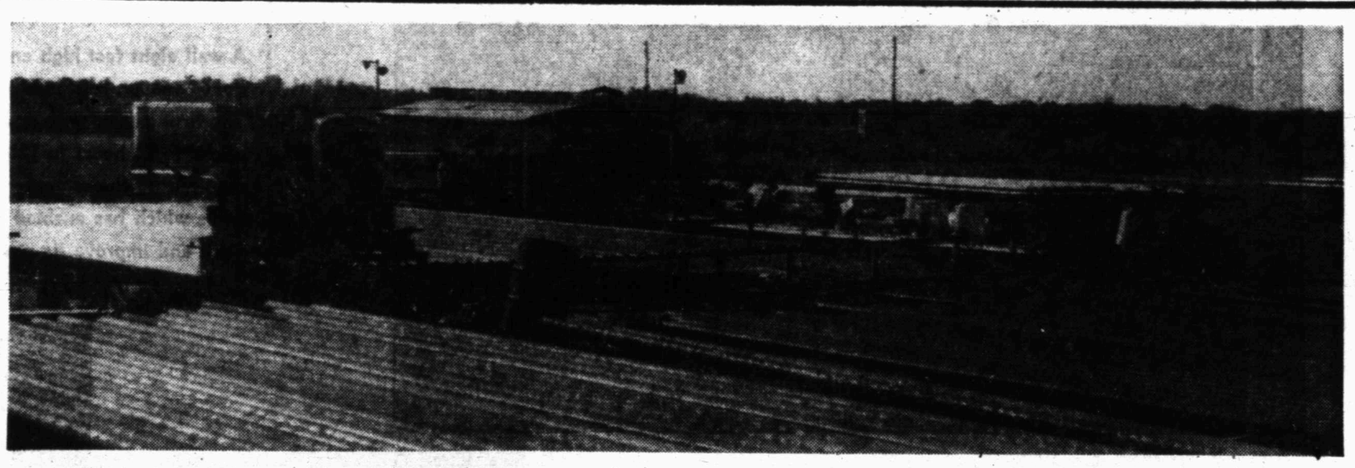

The Most Important Ingredient For Growth And Prosperity

THIS WEEK IS INDUSTRIAL WEEK IN SNYDER!

. . . A week set aside to pay special tribute to the men and companies who have expanded their operations or built their business in Snyder and Scurry County.

These industries are important to us all. They furnish supplies for our use, jobs for many of our citizens and result in better incomes, more security for many people not directly connected with our industrial establishments. The industrial development goes hand in hand with the building of better schools, churches and other facilities to make our city a better place to live. We are proud to be a part of the industry in the Snyder Area.

Diamond M Industries

INDUSTRY!

We Are Proud To Be A Part Of This Area's Progress!

Pipe Coating — Wrapping And Reconditioning

WES-TEX PIPE COATING INC. SERVES THE OIL AND GAS INDUSTRY IN THIS AREA BY PROVIDING THE BEST PROTECTION KNOWN FOR PIPE LINES, TANKS AND ALL STEEL SURFACES, BOTH ABOVE AND UNDER THE GROUND. WITH SPECIAL EQUIPMENT AND TRAINED PERSONNEL WES-TEX OFFERS THIS AREA AN INDUSTRY THAT SERVES TO PROTECT AGAINST CORROSION AND THEREFORE SAVE MAINTENANCE COSTS AND PROLONG THE LIFE OF PIPE BY MANY YEARS.

WE WISH TO THANK OUR MANY FRIENDS AND CUSTOMERS FOR THEIR SUPPORT OVER THE PAST FIVE YEARS. WITHOUT THEIR SUPPORT OUR GROWTH WOULD HAVE BEEN IMPOSSIBLE.

Wes-Tex Pipe Coating Inc.

P.O. Box 1367 Snyder, Texas Phone 3-4291

*AT WHITT'S WELDING*

# Range 'Rain Saver' Constructed Here

A range "rain saver" machine built here by Whitt's Welding Shop, Avenue Q and Twenty-fourth Street, may prove to be an innovation in ranching in Montana — and even in this part of the country.

The machine is monstrous looking thing with six bands of long spiked teeth for pushing deep, pointed holes into range land land so that all the rain which falls on the land will soak in, instead of running off.

Built by H. L. (Whitt) Whitlow and Roy Cobleigh, employe, in Whitt's Welding shop, the machine will dig one of the holes, each 12 inches and will provide a man-make funnel to run rain water directly into the other-wise crusted range land.

Dr. V. E. Sanderson, formerly a Snyder doctor, who now applies full time to his Montana ranch, believes the new machine will save as much as 70 per cent of rain water which now is lost through runoff.

On his 25-section Montana plateau ranch, Dr. Sanderson, believes the machine will double the production and growth of grass and thereby double the production of the range.

Although the machine is designed primarily to increase the intake of rain water into the soil, it is also a multi-purpose machine which can be used as an ensilage roller-packer, a fertilizer spreader and grass seeder, and even as a two wheel trailer if the rancher wishes to use it for those purposes.

The machine is built with a six-inch pipe framework, and has an 890-pound steel drum which can be filled with three barrels of water for additional weight if the 1,800 pounds of the machine will not push the teeth deep enough into the ground. Filled, the thing weighs 3,000 or more pounds.

Six bands of 10-inch long steel teeth encircle the six-foot drum and spacing is such that holes are dug every 12-inches.

"Montana plateau land is like most other land, after the first hard rain, the soil forms a hard crust and water runs off instead of soaking into it," Dr. Sanderson said.

"We believe this machine will prevent most of the runoff," he added.

Pulled by a four-wheel-drive Jeep or a farm tractor, the machine will cover many acres per day, and can be used at anytime the ground is not covered with snow or is too wet. Usable on flat or hilly land, the owner believes that almost every acre of his ranch can be covered by the machine.

The "rain saver" is just one of the many industrial services offered in Snyder by Whitt's Welding Shop, however.

"We build anything anyone needs, from remetaling of bull gears in the drive of heavy track-tractors to sharpening of a plow point or construction of fishing boar anchors," Whitt said.

**UNIQUE IMPLEMENT MADE HERE** — H. L. (Whitt) Whitlow, left above, owner of Whitt's Welding Shop, Avenue Q and Twenty-fourth Street, Roy Cobleigh, center, employe of the firm, and Dr. V. E. Sanderson, Montana rancher, examine a "rain saver" implement constructed here by the shop for the rancher. The long teeth on the heavy drum dig straight deep holes to let water run into crusted range land. (Lee Watson photograph)

## Blaze Kills Four Children

BALTIMORE (AP)—Four children were killed and their parents seriously burned today in a fire at their small frame home in suburban Dundalk.

Walter Lowman, 33, is in City Hospital with burns of the hands, face and arms. His wife, Katherine, 30, was in critical condition with burns over 80 per cent of her body.

Raymond Lowman, 8; Kathlyn, 5; David, 4, and Diane, 3, died of smoke inhalation.

A fifth child, Richard, 11, suffered slight burns on the face.

Firemen said the blaze started in a living room sofa about 6:20 a.m.

### Delayed Rejection

DALLAS, April 20 (AP)—The draft board deferred Van Cliburn, 22, concert pianist from Kilgore yesterday just after he raised his hand to take the oath as an Army private. A medical officer found Cliburn's record showed chronic nasal hemorrhages since a youth and nasal allergies. He was rejected.

### TV Cuts Down On Movies In Britain

LONDON (AP)—One British movie house in 25 closed down last year as more and more people stayed home to watch television. Government figures show attendance dropped 7 per cent, continuing a decline started the previous year.

The government last week revised taxes to help theatres and movies in the struggle against television. It abolished the 33⅓ per cent tax on tickets for the live theater, and reduced it for cinemas.

At the same time it announced that Britons will have to pay $11.20 instead of $8.40 for their licenses to own radio and television sets.

## Natural Gas Measure May Have Trouble

HOUSTON, April 20 (AP)—Despite President Eisenhower's approval, the new natural gas bill before Congress may be heading for trouble.

The bill includes some features which oil and gas operators consider attractive. But its proposed outright recognition of federal controls over gas prices apparently took most operators by surprise.

President Eisenhower last year vetoed a bill which would have freed wellhead prices from federal control. The new bill would authorize the Federal Power Commission (FPC) to establish reasonable market prices after considering natural gas as a commodity instead of as a public utility.

Abandonment of the current public utility rate base cost-of-service formula would be good news to gas producers but it remains to be seen whether they will accept a modified form of federal controls. Industry spokesmen who supported bills vetoed by Presidents Eisenhower and Truman included among their arguments a warning that recognition of federal controls, however small, could lead to even broader regulatory authority.

Eisenhower says his aides have told him the new bill appears to meet the criteria which he fixed last year in his veto message.

Last year's bill was vetoed because of what the President called "arrogant" lobbying by a small segment of the industry. He endorsed principles, however, which would protect both the producer and the consumer.

Olin Culberson, chairman of the Texas Railroad Commission, said the new bill does not provide safeguards needed by gas producers.

"I am not happy over its provisions," he said.

Ernest Thompson, senior member of the commission, said he was very happy over the President's remarks, adding that a reasonable market price is all any producer has been seeking.

"However the consumer must realize that federal regulation would not protect him from an increase in price," Thompson said.

### He'll Take Personal Charge Of This Case

DETROIT (AP)—A certain passer of bad checks in Detroit is heading for a bad time.

Two checks—for $24.70 and $25—bearing the name of Gerald K. O'Brien bounced because nobody by that name has an account at the bank on which they were written.

Wayne County Prosecuting Atty. Gerald K. O'Brien said he would take personal charge of the prosecution if the check passer is caught.

### Paddy Wagon Bare

SAN ANTONIO (AP) — Somebody lifted a padlock off a police paddy wagon jammed with 14 teen-aged culprits last night and when the wagon reached the police station, it was bare.

### Conviction Stands

ABILENE, April 20 (AP)—Federal Judge Whitfield Davidson refused yesterday to set aside the mail fraud conviction of William Estep, former San Antonio man serving a five year sentence. Estep claimed he was without proper counsel when he was convicted of using the mails to defraud in connection with the promotion of the "atomotor," a so-called fuelless, perpetual motion machine.

### Iran Promises No American Bases

TEHRAN, Iran (AP)—The Iranian government has promised Russia that Iran will not permit the United States or any other foreign country to establish military bases in Iran, though it will continue to accept American military aid.

A Foreign Ministry spokesman confirmed today the assurance was given to a Soviet delegation headed by Deputy Foreign Minister Vassily V. Kuznetsov.

### *DATA WITHHELD— SECURITY REASONS*

WHITE SANDS PROVING GROUND, N. M. (AP)—Scientists here have a penciled letter from an 11-year-old in Jasper, Ala. It requests "any information and pictures you can send me on rockets and guided missiles." Then it explains: "I have asked my science teachers, but they don't know too much."

Officials said the boy's name was withheld for "reasons of security—his!"

**STARTING RETREAD PROCESS**—An employe of Central Tire Service, Twenty-fifth Street and Avenue T, is shown above buffing and cleaning a used tire preparing to retread it. Retreading tires has become the main interest of the firm, which is also wholesale and retail dealer here for Gates tires. (Lee Watson photograph)

# Central Tire Retreading Is Big Business

What started out as a side line with one of Snyder's leading industrial firms seven years ago has become the primary interest of that firm.

It is the retreading service offered by Central Tire Service.

Stanley Noah and Johnny Noble, owners, said that the firm began in 1949 here primarily as a retail and wholesale dealer and distributor for new passenger car, truck and tractor tires.

"But now the main interest of the firm has slowly turned from new tire sales to the retread business," Noble Said.

Although the firm still offers all new tire services available, and is distributor for Gates tires for an eight county area surrounding Snyder, its greatest volume of business is in retreading.

Reason for this turn of events is the dual facts that new tires have gone up so much in price, and the guaranteed quality of Central Tire's retreaded tires.

"Each retread that we turn out is accompanied by a one-year written road hazard guarantee," Noble said.

"If anything happens to the tire within the 12 months it is fully guaranteed—even to running over an obstacle in the road and ruining the tire," he added.

In addition to the two owners, the firm has eight full-time employes and keeps three road trucks busy. One of the trucks is a new van-type delivery truck.

Noble estimated that the firm's volume of retreading business this year will be $40,000 in truck and farm tractor tire retreading and service, and in excess of $25,000 in passenger car reteading.

"Retreading tires is a specialty, not a side line, or a one stop procedure of just putting new rubber on an old tire," he said.

A wide range of individual services is necessary in the retreading of each tire.

First the tire body which is to be retreaded is given four seperate inspections to assure that the carcas is one which will give dependable service after it is retreaded.

"No tire which has ever been punctured or has any cord separation is ever retreaded, because we guarantee each retreaded tire to give as many or more miles of service as a new tire does," he said.

After inspection the tire is buffed to perfect roundness, and then 100 per cent cold Gates first class rubber is applied, and the tire is then put into the mold.

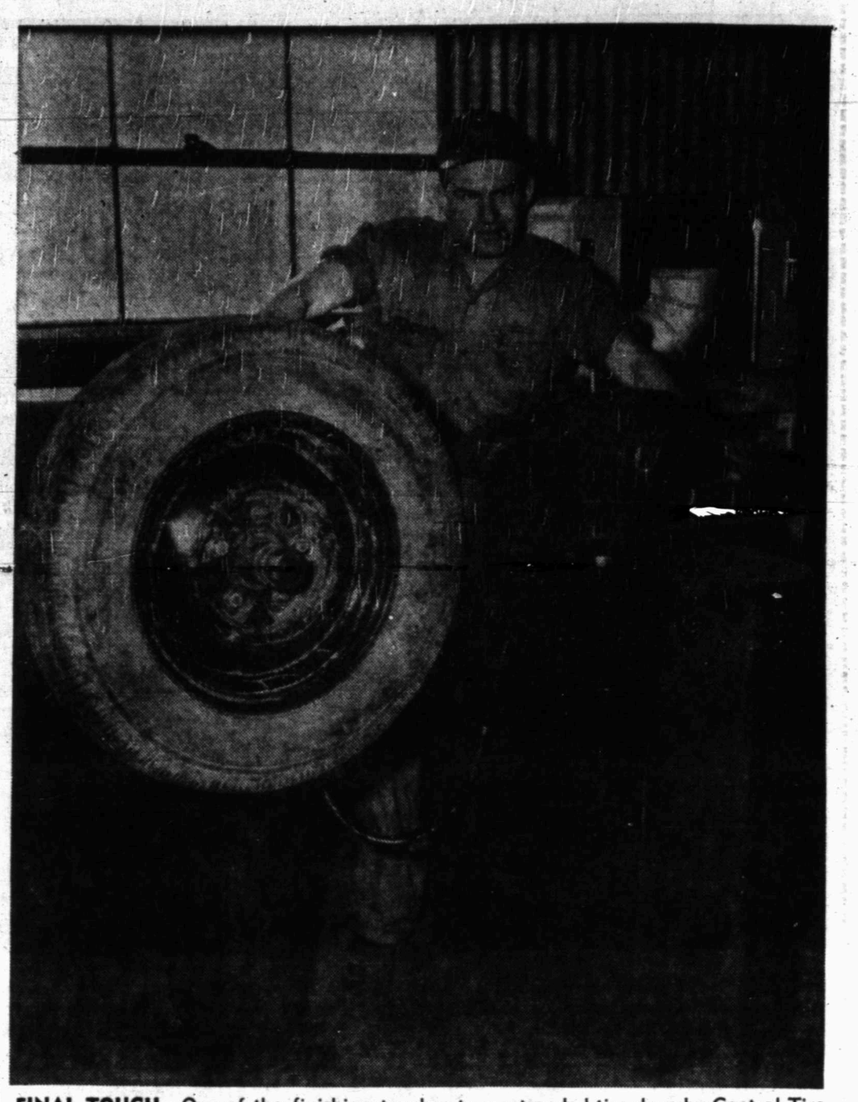

The molds used are the latest and best known in the industry. Each tire is cured in the mold for one hour at 300 degrees temperature while inflated to a pressure of 140 pounds—several times the driving pressure of the tire—to assure a good, solid cure.

After it is completely cured, each tire is taking to the "clean up" room where it is trimmed, cleaned up, painted and balanced (with balance stock added to the inside of the tire when needed) to make the tire not only appear just like a new one, but to give even better service than a new one.

"In balancing the tire we go one step further than the manufacturer of new tires, because new tires are not balanced at the factory," Noble said.

Usually Central Tire Service's retreaded tires do not require further balancing after being installed on a car, unless the wheel or hub of the car is out of balance.

In addition the wholesale and retail sale of Gates tires and the retreading service, Central Tire Service offers a complete front-end alignment, tire truing, wheel balancing, generator and voltage regulator, and battery service.

**FINAL TOUCH**—One of the finishing touches to a retreaded tire done by Central Tire Service is buffing it to perfect roundness after it has been retreaded and balanced to perfection. This and other "extra" services to each retreaded tire enables the firm to give a written 12-months road hazard guarantee with each retreaded tire. (Lee Watson photograph)

## Industy To Get Boost In Request

AUSTIN, April 20 (AP)— One of Texas' least known but fastest growing industries will get a big boost if the 2.6 billion dollars President Eisenhower has requested for guided missiles is approved, says Stanley Arbingast, assistant director of the Bureau of Business Research.

Arbingast wrote in the Texas Business Review that the Chance Vought Aircraft Co. in Dallas has been working with guided missiles over 10 years. The Convair Division of General Dynamics at Dain-gerfield in Northeast Texas has been working on missiles since 1945.

The industry is centered in the Dallas-Fort Worth area, Arbingast said. Anderson Greenwood and Co. and Cameron Iron Works in Houston are also involved in the industry.

Besides Chance Vought, the Temco Aircraft Corp. and the Menasco Manufacturing Co. operate in the Dallas-Fort Worth area and the Radioplane Co. has purchased a large tract of land in El Paso. Two other Texas plants make related products, the bureau assistant director said. These are the Air Force Plant 66 at McGregor owned by the Phillips Petroleum Co. and the Karnack Plant, owned by the Thickol Corp.

Arbingast said it would be impossible to say how many Texans were involved in the industry.

"The total is substantial and is certain to increase greatly within the next decade. Texas manufacturers have proved their competence to produce for this vital industry," he said.

## Colonial Invitation Field Is Completed

FORT WORTH (AP) — The field was completed today for the $25,000 Colonial National Invitation Golf Tournament May 2-5 with the addition of Bill Trombley of Dallas and Don Whitt of Alameda, Calif.

Trombley and Whitt, who had ties for first place on the tour to recommend them, were the choices of the former champions.

## Buffs Acquire Garcia

HOUSTON (AP) — Outfielder Jose Garcia, who hit .330 for Baton Rouge last season, was acquired from Omaha by the Houston Buffs yesterday.

## Texas Newspaperman Takes New Position

VERNON, April 20 (AP)—Bill Werl a Texas newspaperman for nine years, has been named managing editor of the Vernon Daily Record succeeding John Riddle, who has accepted a similar position with the Ardmore, Okla., Ardmoreite.

Werley, who started his newspaper career in Vernon in 1948, also has worked on papers in Wichita Falls, Salt Lake City and Dallas. He recently left the Dallas News after serving three and a half years on the copy desk, the last year as slot man.

He is a native Texan and attended TCU and the University of Oklahoma.

# A Part Of The Growing Industry Since 1905

Yes, since 1905 the Snyder Steam Laundry & Dry Cleaning Plant has served this community. A record that we can all be justly proud. But, we are the first to know Snyder Steam Laundry & Dry Cleaning could not have grown with Snyder without the splendid support you have given us. We have strived throughout the years to give you the latest up-to-date method of laundering and dry cleaning, at the lowest possible cost. We are proud to have made a place in this wonderful community, glad to have worked toward a bigger and better area in which to live.

Snyder Steam Laundry & Dry Cleaning has provided jobs for many of our townspeople, from 4 in 1905 to 37 in 1957, all of which are permanent residents of our town. All of us here wish to thank each of you (our customers) for your wonderful support and sincerely hope you will continue to give us the opportunity of serving you.

Our pledge: to always give friendly, dependable, low cost service to each of our customers.

# Last Matador Records Now At T-Tech

LUBBOCK, April 20 (AP)—The last group of records of the now legendary Matador Land and Cattle Co. reached Texas Tech this week from Dundee, Scotland.

The records, with others already at Tech, gives the Lubbock school the greatest collection about a single major ranching venture ever gathered in one place. The Matador ranch has been called the largest foreign-owned cattle empire in America.

"We feel that we are extremely fortunate in being able to get the Dundee papers," said Dr. Seymour Conner, Tech archivist.

The Matador empire began in 1878 when A.M. Britton entered into a partnership with H.H. Campbell. Campbell had purchased a small herd and made his headquarters in an abandoned dugout at Ballard Springs in Motley County.

Eight thousand cattle were the next addition. Seing the unlimited possibilities, S. W. Lomax soon joined Britton in financing the enterprise, which later reorganized as the Matador Cattle Co. with a capital stock estimated at $50,000.

In December 1882, the company sold out to the new Matador Land and Cattle Co., Ltd., of Dundee. The transaction involved three million acres of land and 60,000 cattle. The land area covered Motley, Dickens, Cottle and Floyd counties.

In 1903, 500,000 more acres were leased from the government on the Sioux Reservation in North Dakota. Another 150,000 acres soon were acquired on the Swift River in Saskatchewan, Canada.

In 1904, t AehalsmotiasvDsoiini

In 1904, the Alamositas Division of the 200,000 acres of XCT ranchland was purchased from the Capitol Syndicate. This included tracts on both sides of the Canadian River in Oldham Counoy

The original ranch was enlarged again, and by 1910, the company owned 861,000 acres in Texas, and had under lease 650,000 more ares in two northern pastures, a total of 1,511,000 acres.

On June 16, 1951, the Denver headquarters office announced the sale of 800,000 shares of Matador stock at $23.70 a share to an American syndicate, Lazard Bros.

**Bermuda has a geological formation where wind, sand and waves have cut up a series of varicolored rocks to resemble a checkerboard.**

# Huckabee Can Get Job Done In A Hurry

One of the by-words of industry in the Snyder area is "get the job done — quickly," and that is the basis on which one Snyder industry operates.

It is Huckabee Radio Engineering, distributor for West Texas and New Mexico for DuMont two-way radio and electronic equipment.

"When a pipeliner, driller, or policeman picks up the microphone from the dash of his car and talks to other men working on the same project many miles away, he is saving time and getting the job done faster," Jay R. Huckabee, owner, said.

Coordination of effort in a widely-spread operation is one of the biggest problems of any industry operating in the great wide-open spaces of West Texas and New Mexico, Huckabee said.

Through the use of two-way radio enabling all parties in any operation to be in constant contact with each other and with their headquarters such coordination is automatic and instantaneous, he added.

All types of electronics services are offered by the firm, and its customers include oil companies, drilling companies, service companies, police departments, city water and sewer departments, fire departments, and all other types of concern which require the fastest and most efficient communication between widely separated units.

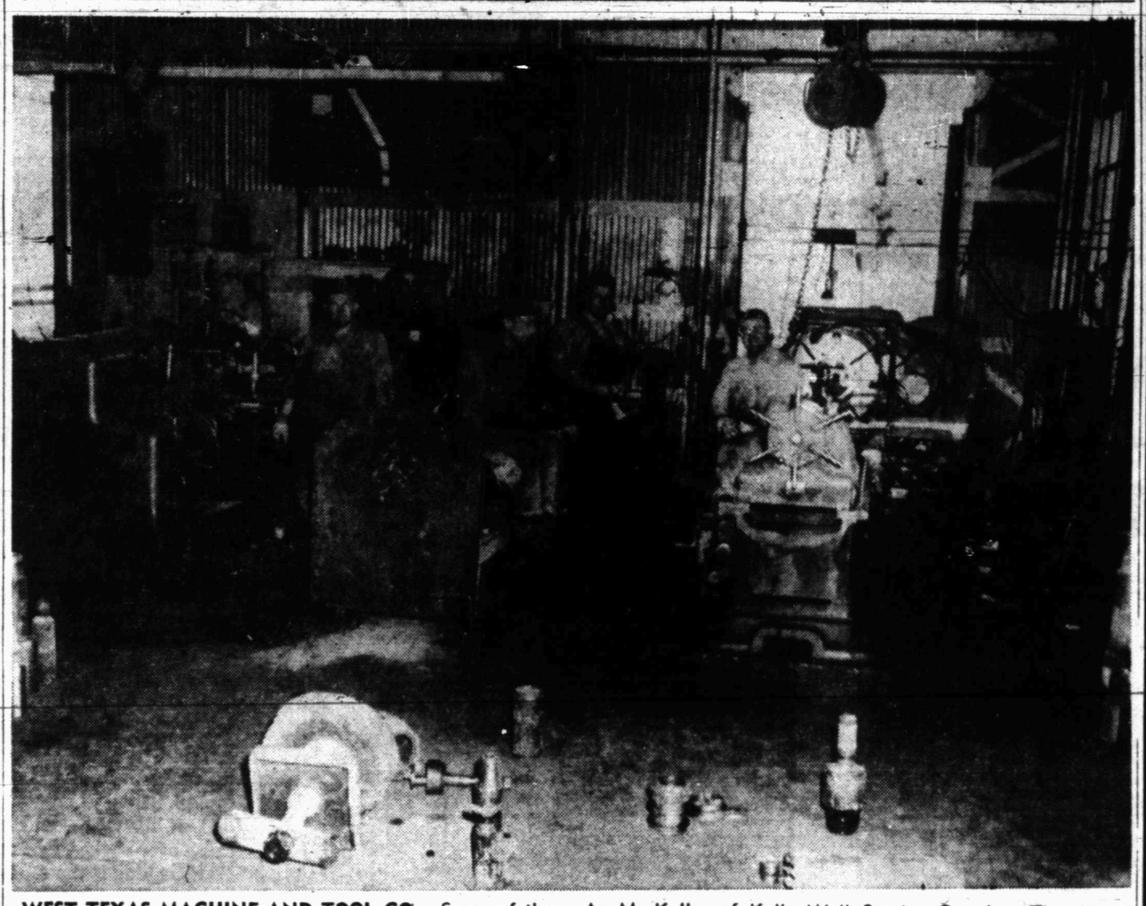

## Suicide Verdict

ELECTRA, April 20 (AP)—Justice of Peace J. R. Carter ruled yesterday that Dalton Blakley, 23, Electra oilfield worker, committed suicide by taking poison.

One of the most popular gathering places for Germans in West Berlin is the American Memorial Library with its 180,000 books.

## Parkette Resigns

SAN ANTONIO (AP)—Mrs. Bonnie Welty, 30, a shapely traffic parkette, resigned today after a furor created when photographs in revealing cheesecake poses turned up at City Hall. Parkettes were hired by the city to keep watch on parking meters, issue traffic tickets and visitors to the city.

**WEST TEXAS MACHINE AND TOOL CO.**—Some of the heavy machine tools of the West Texas Machine & Tool Co., 1911 Avenue T, and men of the firm are shown above. The men are: Robert Boyles, H. L. Vandiver, Leroy Hessler, Hayes Prince, and a customer of the firm, A. M. Kelly, of Kelly Well Service Co., Ira. The firm offers any type of tool and machine service to industry, business, farmers and ranchers and individuals of this area. (Lee Watson photograph)

**WEST-TEX PIPE COATING**—The modern facilities of the Wes-Tex Pipe Coating, Inc., located on Thirty-seventh Street at the Roscoe, Snyder & Pacific railroad tracks, are pictured above. Large quantities of pipe of all sizes for use in Texas oilfields are coated at the plant. (Lee Watson photograph)

# Pipeline Service Provided By Wes-Tex

Providing the best protection known for pipelines, tanks and all steel surfaces is the service to the oil industry of this area provided by Wes - Texas Pipe Coating, Inc., of Snyder.

The protective services provided by Wes-tex are for both pipe and steel apparatus to be located either above or below the surface of the ground.

With special equipment and trained personnel, Wes-Tex offers this area an industry that serves to protect against corrosion and therefore saves maintenance costs and prolong the life of pipe by many years.

Wes-Tex employes from 30 to 70 employees depending on the season and the pipe that is being laid at the time.

C. F. Dugas, 3750 Highland Drive, is president of the corporation, Ross Hemphill, Snyder attorney in the firm of Park, Hemphill & Auforth, is vice president, and Charles Slover, Fort Worth, is secretary-treasurer.

The company has had a steady growth from its inception five years ago.

Wes-Tex Pipe Coating, Inc., coats pipe in all of the southwest area working anywhere within several hundred miles of Snyder with a service fitted to the individual needs of the customer.

Work of coating pipe is done by the firm in three depending on the circumstances of the individual job.

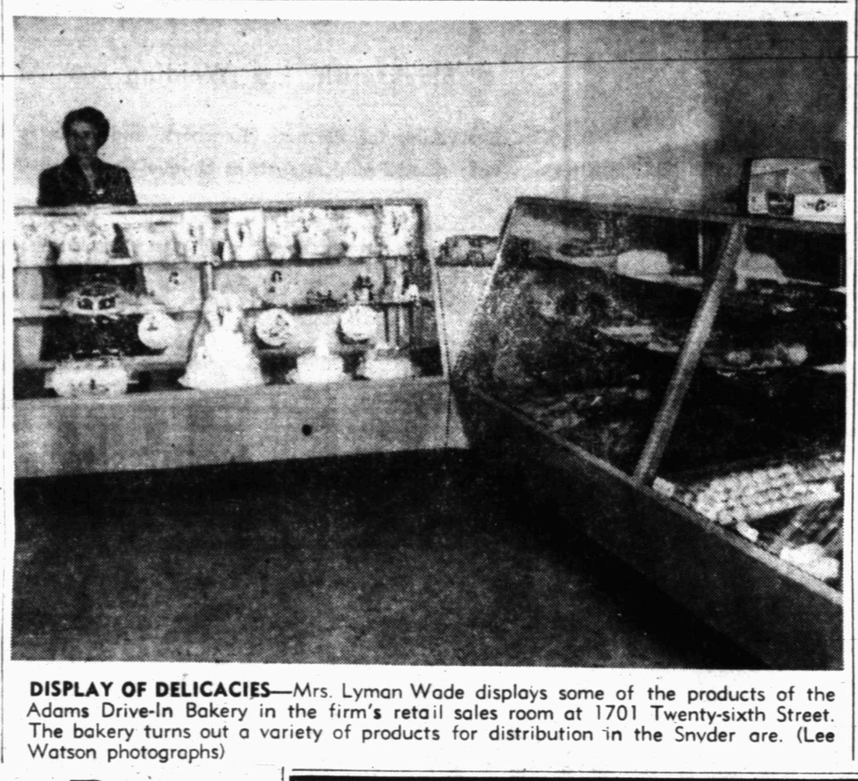

One way is that pipe may be brought to the company's yard on Thirty-seventh Street adjacent to the Roscoe, Snyder & Pacific railroad tracks, coated and wrapped, and then shipped on to the job.

Or the company may move a complete pipe coating plant to the jobsite and coat and wrap the pipe where it is unloaded, or may coat and wrap the pipe over the ditch as it goes into the ground.

Materials used for coating the pipe are usually asphalt or coal tar. Wrapping materials are asbestos felt, fiberglass for reinforcing and kraft paper for ease and protection in handling.

The company also cleans and reconditions used pipe. This may be done in the yard, at the jobsite or over the ditch.

Dugas, head of the firm, has been in the pipe coating business for 12 years, every since he was discharged from the army after World War II. Slover has been in the pipe coating business for eight years.

**DISPLAY OF DELICACIES**—Mrs. Lyman Wade displays some of the products of the Adams Drive-In Bakery in the firm's retail sales room at 1701 Twenty-sixth Street. The bakery turns out a variety of products for distribution in the Snyder are. (Lee Watson photographs)

# Doughnuts Big Item At Adams

**Probably nobody knows how many "kinds" of doughnuts there are, but chances are that most all kinds are made right here in Snyder.**

**Doughnuts are a big item at the Adams Drive-In Bakery, located at 1701 Twenty-sixth Street, although many other bakery products are turned out regularly by the firm.**

**They make doughnuts filled with various fruits, sprinkled with cocoanut, filled with jelly, glazed with chocolate or butter scotch, and just plain doughnuts.**

**Moreover, there are almost as many varieties of rolls, such as cinnamon rolls, nut rolls, jelly rolls, butter scotchrolls, etc.**

**Other products include a big variety of cookies, cakes and pies. Decorated cakes are a major item. They are supplied for weddings, anniversaries, parties, etc., and many are done on special order.**

**Virtually all cafes and soda fountains in the Snyder area serve doughnuts from the Adams Drive-In Bakery.**

**They bake every day, and the products are in the hands of consumers within a few hours after they leave the bakery.**

**The firm is owned by Don Adams and O. R. Adams, and is managed by Mr. and Mrs. Lyman Wade. Mr. Wade is the firm's baker. The bakery will observe its first anniversary in its present location Tuesday. The firm moved to the new site from a building on the east side of the square on April 23, 1956.**

## Search For Man Resumed

MARSHALL, April 20 (AP)—A search for a man who escaped from Sheriff Earl Franklin yesterday was resumed today in the rugged brush area in south Harrison County.

More than 100 possemen with hounds and planes hunted yesterday for Gene Vance, of Monterrey, Calif.

His companion, Charles Ballman 22, of Louisville, Ky., said by authorities to be an AWOL airman, was shot and seriously injured by Franklin.

The sheriff said he found the men asleep in the car. He arrested them after he found Vance's driver's license and the license plates on the car had expired.

The sheriff said Vance broke and ran and he fired at him. He said that when Ballman also started to run, he shot him. The bullet struck Ballman in the hip.

## Dies In Collision

DUMAS, Tex., April 20 (AP)—Florence Gutherie, 28, of Amarillo, was killed in a headon collision south of Stratford yesterday. Two persons in the other vehicle were seriously hurt.

## Denton Celebrates 100th Anniversary

DENTON, April 20 (AP)—A parade led by Gov. Price Daniel Monday will mark a week-long celebration marking Denton's 100th anniversary.

The observance starts officially tomorrow night with an interdenominational religious service in the high school stadium.

Dr. Howard Williams, president of Southwestern Baptist Theological Seminary in Fort Worth, will speak.

A nightly pageant will run all during the week, featuring skits on the story of the city's founding, receptions and open houses.

A rodeo next Saturday will close the celebration.

Lassen Peak in northern California was the most recent active volcano in the United States. It has been a national park since 1916.

Lone Star Gas Company Is Proud To Be A Part Of Progressive, Growing Snyder

GAS BUILT-INS make cooking fully automatic

here is the reason!

**The Roper oven-broiler** is keyed for automation. You set the dial for the *exact temperature* you need, the *time* for controls to come on and off. GAS takes over, does all the work! You can even bake and broil at the same time. Never before was cooking so easy! Or so cool! Only GAS oven-broilers can be vented for the world's coolest cooking.

**This Roper Tem-Trol gas top burner** faithfully holds the *exact* temperature you dial, making every pot and pan an automatic utensil. Then, when you turn the dial off, it's OFF—no Hangover Heat to cause over-cooked foods or messy boil-overs. GAS cooking is the cleanest yet! And every cooking part of the range goes to the sink for easy washing. Cooking with GAS is quicker, too, for the temperature you want is reached instantly by flame-fast gas. This arRANGEable range can be placed wherever most convenient for YOU—away from the wall, if you desire, so you can reach it from *all four sides*. Four times more economical for cooking, gas is the only truly contemporary fuel.

# Dunnam Bros. Matress Factory Deals In Business Of Giving 'Ease And Comfort'

One of the industries of Snyder which probably provides more ease and comfort than any other is the Dunnam Bros. Matteress Factory, 2302 Avenue S.

Owner B. W. Dunnam said that "Ease and comfort" is our specialty, and that is what we try to give all of our customers.

Actually that is what a new mattress is designed to do.

With a factory which can turn out a completely new inner-spring mattress in nine minutes when operating at peak capacity, the factory provides "ease and comfort" for a wide area surrounding Snyder.

"We have customers all over an area more than 50 miles in all directions from Snyder," he said.

"One afternoon we received a rush call for nine mattresses from a store in Post which wanted the mattresses specially built and delivered to the store by 8 o'clock the next morning," he said.

"We started to work on the nine mattresses at 5:30 o'clock that afternoon and had all nine of them completed by 9:15 o'clock that night — less than four hours later," he said.

"They were delivered before the store opened the next morning," he added.

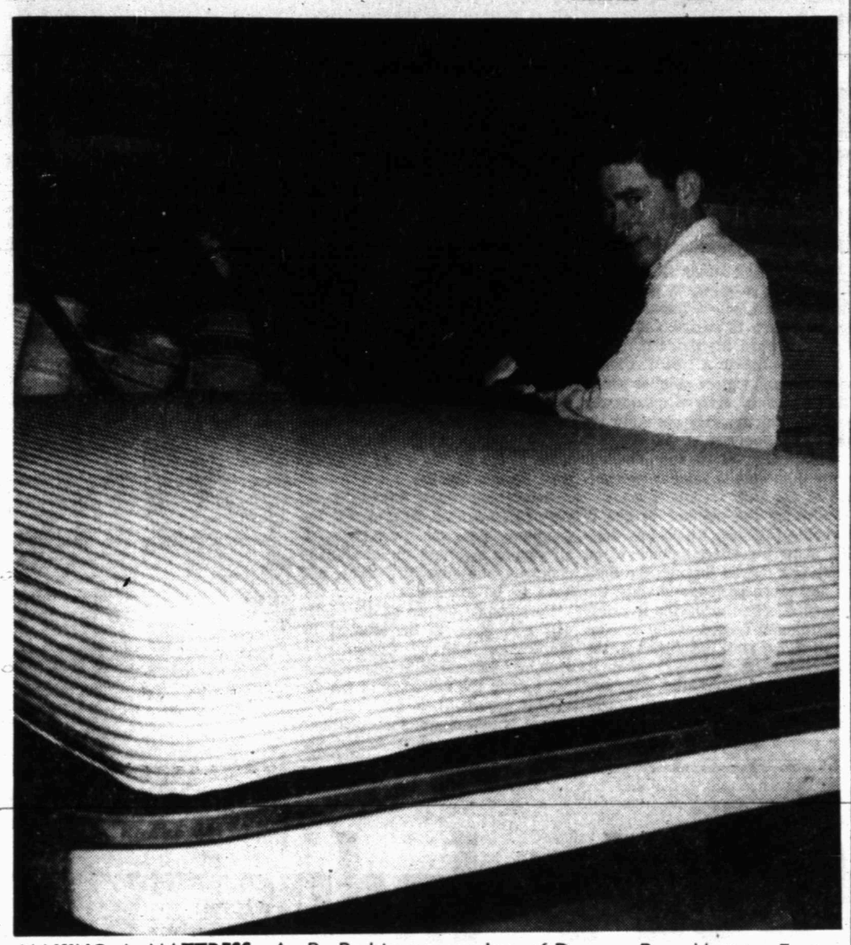

Although a mattress can be turned out in almost record time by the Dunnam Bros Mattress Factory, that is not usually the case with the factory, because more time can be given to each mattress.

Much thought as well as work goes into each new mattress produced by the firm, whether it is a regular cotton mattress, an inner-spring mattress, or a specially built foam rubber mattress.

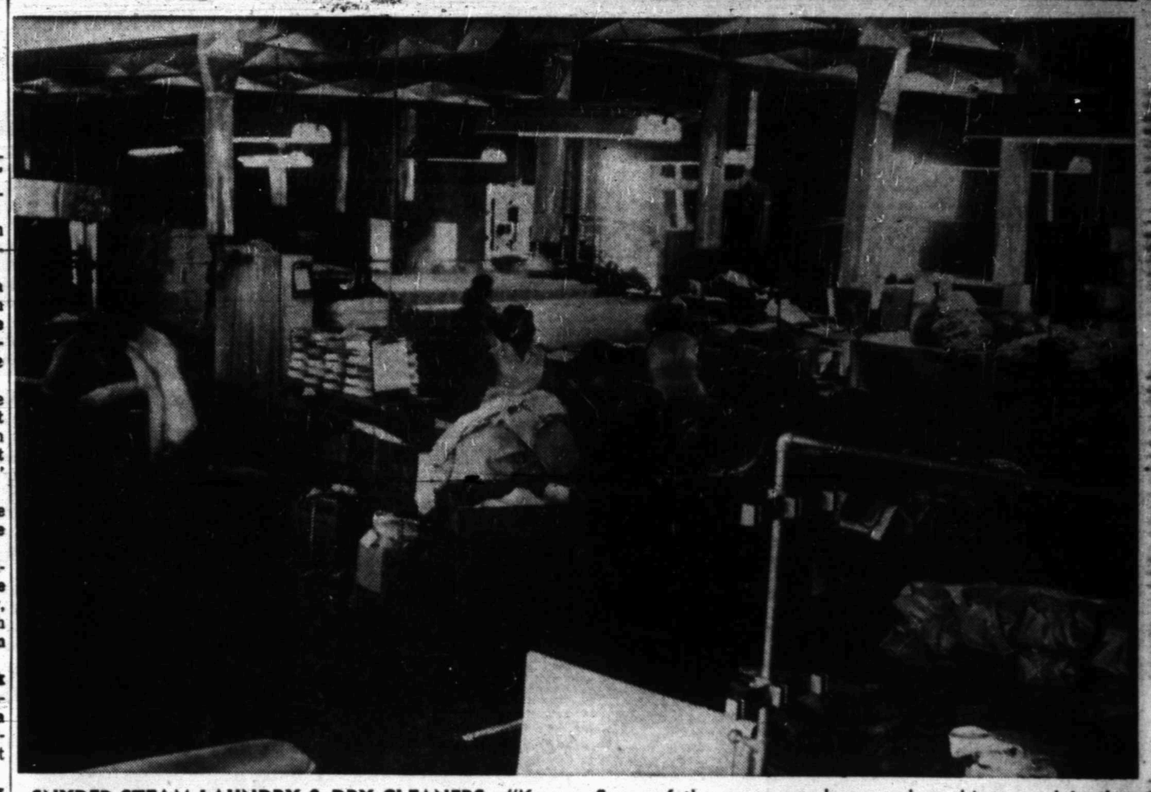

"On the inner-spring mattresses we build, we first start with the springs which are designed with the number of coils which the individual customer wishes for the softness or firmness he or she wants — then we cover all of the springs with a special matting to protect the cotton padding, and clamp the matting over the edges of the springs so that there will never be a hard edge, then put on the cotton padding. Next comes the ticking which the customer chooses from a wide range, and we finish by either tufting for greater softness—just as the customer wants," he said.

These individual services offered by Dunnam Brothers Mattress Factory on new mattresses are also available on rebuilding of old mattressess and box springs.

"We even make special over or under size beds for people who want them, and make them any size," he said.

MAKING A MATTRESS—A. B. Rodriquez, employe of Dunnam Bros. Mattress Factory, 2302 Avenue S, is shown stitching the edging on a new mattress made in the firm. Mattresses, box springs, and similar services of all types are offered by the factory. Even huge, eight-foot-wide over-size beds with box springs and mattresses are made on special order by the firm. (Lee Watson photograph)

SNYDER STEAM LAUNDRY & DRY CLEANERS—"Keep Clean" could easily be the motto of Snyder Steam Laundry & Dry Cleaners, 1401 Twenty-sixth Street, because that is the service provided by the large industrial firm. Some of the many employes and machines used in the cleaning, laundry and flatwork departments are shown above. (Lee Watson photograph)

## Sponsorship Of Project Under Study

ORANGE, April 20 (AP)—The National Rivers and Harbors Congress will be asked next month to accept the sponsorship of the Texas-Louisiana Toledo Bend project.

John Simmons, vice-president of the congress for Texas, said the request will be made to the project committee just prior to the annual meeting of the organization in Washington.

Simmons also is general manager of the Sabine River Authority in Texas, which will create the 35 million dollar Toledo Bend Reservoir jointly with the Sabine River Authority of Louisiana.

This project, now in the planning stage and scheduled for building next year, will be on the middle reach of the Sabine Ricer where it forms the Texas-Louisiana boundary. It will be the nation's sixth largest man - made body of water and will provide a new source of hydro-electric power for the southwest.

Plans call for financing entirely with revenue bonds of the two authorities.

## Teen-Agers Are Shot

HOUSTON, April 20 (AP)—Two teen agers, former Reagan High football players, were shot, one critically, early today, by a Reagan student, 15, who admitted to police that he "was feeling pretty high" from drinking whiskey.

Wallace Atkinson, 18, a star back at Reagan before he left school, was shot once in the right shoulder. The bullet ranged down into his chest cavity. He is in a critical condition.

Also shot was Wendell Shackelford, 18, wounded in the left arm.

The shooting occurred in front of a funeral home, after a heated argument between a group of four youths and the 15-year-old and a friend, 16.

The boy, 15, was turned over to the probation department.

## Killed In Accident

KENEDY, Tex., April 20 (AP)—Dale Rech, 41, of San Antonio, was killed in a one-car auto crash around midnight at the Karnes-Bee County line. He was driving alone when his car swerved over a bridge and smashed into a ditch.

## Space Is Important Resource

SAN ANTONIO — One of the most important economic resources of the Southwest is space.

That is the opinion of Boyd Ladd, Southwest Research Institute economist and editor of the Southwest Resources Handbook.

"Much of the military activity now here was attracted to this area because of the climate and the availability of plenty of room —airspace and groundspace," Ladd notes.

"With the increasing urbanization of the Southwest, space remaining in and about our cities gives us an opportunity to avoid the tragic congestion and waste or poorly planned industrial developments in older sections of the nation.

"This can mean more economic production and a more human environment," he continues.

However, Ladd points out, the Southwest needs to face the problems of municipal services for industry before the cities are built up with inadequate services and without planning for the growth.

"These issues deserve our most careful and creative consideration," he says.

Ladd sees the industrial youth of this area as an advantage as well. It will be possible to benefit from the experiences of older industrial areas he observes.

"We may be able quickly to attain mature concepts of industrial relations and avoid a stormy development period. If we do, coperation of labor and management in the general interest will make Southwestern industry uniquely productive."

## General Telephone Official Promoted

San Angelo, Apil 20 (AP)—Walter Wright, president of the General Telephone Co. of the Southwest, will become vice president in charge of operations of the General Telephone Corp. of New York May 1.

E. H. Danner, vice president, succeeds Wright as president here.

Replacing Danner as vice president here will be Howard Briggs, director of commercial operations of the New York unit.

Danner came here last year from Sherman where he was president of Texas Telephone Co., when the firm became a subsidiary of General.

## Governor Designates Mental Health Week

AUSTIN, April 20 (AP)—Gov. Price Daniel has designated April 28—May 4 as Mental Health Week in Texas, the State Society for Mental Health said today.

"Mental illness is no longer hopeless," Daniel said. "We can help the mentally ill of Texas to be restored to their families and communities by concerted citizen action."

He said that some 16,000 Texans are in state hospitals.

# Holder Has Big Payroll Here

**AUTOMATIC GRAVITY FLOW STATION**—The mechanism above in the Jo-Mill Oilfield in southwest Borden County is the first automatic gravity flow custody transfer unit from tank battery to pipeline ever put in use. C. O. Holder, left, of Holder Construction Co. which installed the setup, and Jack Sheridan, district superintendent for Texas-New Mexico Pipeline Co., survey the unit above. It was designed and engineered by Texas-New Mexico, and installed by Holder Construction Co. (Lee Watson photograph)

A single firm in one industry here in Snyder employes about one per cent of the entire population of Snyder, and has a payroll which annually reaches substantially into six figures.

That firm is Holder Construction Co., a quietly and unboastfully run "big" business which in the past seven years has made a lasting contribution, not only to the industry it serves, but to the community it is in and the area surrounding Snyder.

In the short time the firm has been in Snyder it has laid more than 11,000,000 feet of pipe in this area. If strung out in one continuous string the pipe Holder Construction Co. has laid in West Texas would reach from El Paso across Texas to Texarkana and stick out on the other side of Texas all the way to New York City.

In length the pipe laid by Holder Construction Co. is equal to the celebrated "Big Inch" pipeline from New York City, and much of the pipe itself has been equal in size to, or larger than, the "Big Inch" pipe.

But the work of laying pipelines is not the only thing Holder Construction Co. offers its customers in the oil industry.

Recently the firm completed installation of what is believed to be the first gravity flow automatic custody transfer from tanks to pipeline ever to be put to use in this country. It is now being tested and permission for its use will be asked of the Texas Railroad Commission when the tests are complete.

The installation was made by Holder Construction Co. for Texas-New Mexico Pipeline Co. in the Jo-Mill Oilfield of southwest Borden County, to the pipeline Company's specifications and requirements. The gravity flow custody transfer unit was engineered by Texas-New Mexico and fabricated and installed by Holder Construction Co.

Other automatic custody transfer mechanisms are in use, but all previous ones were power operated.

The only power necessary for operation of the new gravity flow unit is just enough to keep the intricate flow recording devices operating.

An idea of the complexity of the unit can be gained by reading a list of individual control devices involved in the single unit.

First is a strainer to strain out parafine and other impurities in the oil which flows from the tank battery toward the pipeline.

Next in line is a BS&W (basic-sediment and water) monitor which analyzes every drop of oil passing through and not only carefully records the analysis of the oil, but automatically stops the flow if more than just a minute percentage of the flow is impurities.

Following the monitor in line is a visible register, which has dials that show the exact amount of oil which has flowed through the lines for any given period, and when the guager checks the device it prints a permanant record of the amount of oil flow and the time of the flow on a card.

Next is a differential pressure switch which automatically turns on the flow of oil when the down-line pressure and the up line pressure reach a certain balance. When the oil level in the tanks of the battery reaches a certain level and the pressure in the pipeline below the automatic custody transfer unit, the differential pressure switch automatically opens the valves in the device and starts the oil to flowing into the pipeline.

Further down the line in the automatic flow control unit is a sampler which takes a continuous sample of the oil as it flows through the line and stores it for later analysis by conventional methods.

"The automatic gravity flow custody transfer unit will actually increase the accuracy of guaging the flow of oil from the tank battery to the pipeline, and will do it all without manual help," Holder said.

A man will have to sample the oil, check it for temperature gravity, and make a thorough manual test once each month.

The unit was installed in the past few days by Holder Construction Co. for the Texas-New Mexico Pipeline Co. at the J. E. Jones Drilling Co. — W. L. Miller No. 2 lease in the Jo-Mill Field in southwest Borden County.

Before any such automatci device can be used by the pipeline company, however, permission of all parties involved, the production company and royalty owners, will have to be granted.

Permission for use of the device will also have to be granted by the Texas Railroad Commission, but no difficulty is anticipated there after the accuracy of the device is proven.

That is just one of the automatic devices Holder Construction Co. has installed for use in the oilfields.

For the same pipeline company, Holder Construction Co. has installed automatic pipeline pump stations which require no manual labor, except an occassional chart reading and oiling and greasing of the equipment.

So sensitive is the device to the regulating forces that operate it that sun shining on a quarter-inch tube in the measuring device will shut the entire station down merely by expansion of the parafine coating on the inside of the tubing.

But the pipelines through which the pump station pumps the oil are 10 inches in diameter.

Laying pipelines in West Texas is a job requiring a wide variety of expensive equipment. Everything from heavy Caterpillar tractors and huge ditching machines, to small compact two-way radio units to communicate between units and the main office is required.

Some of the equipment used include trucks, trailers, pipe trailers, ditching machines, backhoes, welding machines, electronic pipe and buried object detecting devices and many other specialized pieces of equipment.

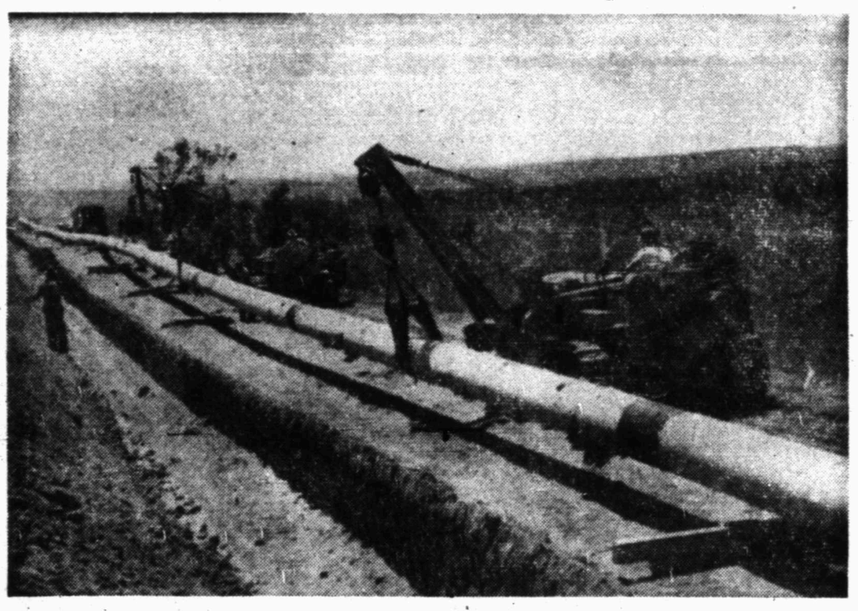

Varying numbers of men are employed by Holder Construction Co. depending on the number of pipeline jobs underway at the time, but the number usually runs from 80 men to 170 men.

One of the biggest single jobs Holder Construction Co. has recently completed was the million-dollar-plus pipeline from Big Spring

See HOLDER, Page 13C

# A Growing Part Of This Area's Industry

**Serving a rapidly growing industry in the Oil Fields of the great Snyder area is the specialty of Holder Construction Co. Specializing in construction and laying of piplines, Holder Construction Co. has laid more than 11,000,000 feet of pipline in Texas. All types of pipelines for crude oil, butane, propane, gasoline, gas, water injection lines, water lines, and other products are laid by Holder Construction Co. Even Coaxial Cable is one of the diversified services offered by the firm.**

# Industry Is Important Here

Snyder, regarded for several years as an industrial city, is interested in expanding its industrial life, and is particularly interested in diversification of its industries.

Although industrial growth here has been substantial during the past decade, a large portion of it has involved the oil industry, which now plays a major role in the area's economy.

However, Snyder and Scurry County appear in excellent condition to serve additional industry in other fields.

Questionnaires circulated by the Snyder Chamber of Commerce in recent years indicate that local citizens are anxious for expansion and diversification of the area's industrial life.

The growing interest among the citizens has been paralleled by which the community is able to offer industrial concerns.

Growth has been experienced in such fields as transportation, all phases of community life, communications, water supply, and many others usually regarded as important to industrial development.

Transportation facilities here are regarded as excellent for a city of Snyder's size. Two federal highways, two state highways and numerous first class lateral roads provide excellent highway connections to all metropolitan areas and to major markets of the Southwest.

The city is served by three intercity bus lines, two railroads, one commercial air line, three motor freight lines and two moving van lines. Thus shipments of merchandise can be dispatched and received to and from all points conveniently and with modern speed.

The area has experienced rapid growth in its civic life. The school system, which serves over 4,000 scholastics, has modern facilities including five elementary schools, a junior high school and senior high school. All school buildings, except part of the junior high plant and part of one elementary school plant have been constructed and occupied within the past six years.

Half a dozen new church buildings have been constructed during the past five years, and others are now under construction.

The new Scurry County Library is scheduled to occupy a new, modern building in Snyder within a few weeks.

Snyder has no less than 77 civic organizations, including service or luncheon clubs for men, federated women's clubs, youth organizations and others.

At the same time, residential districts, embracing thousands of modern homes, have been developed. They are continuing to expand. Moreover, retail shopping facilities have expanded steadily during the past decade.

However, one of the most important developments here in recent years was organization of the Colorado River Municipal Water District. The district has a lake on the Colorado River about 20 miles southwest of Snyder, which is capable of impounding 204,000 acre feet of water. Since the lake was completed and caught its first water, dangers of water shortages have been erased in Snyder, which is one of three cities served by the lake. Snyder is in a position to draw ample supplies for its normal comestic water demands, plus substantial quantities that might be required by industry.

These are some of the advantages which Snyder hopes to press in its quest for new industries, and the industrial foundation now in the process of organization will give this area a substantial boost in its efforts to realize its potential as an industrial center.

## HOLDER

Continued from page 12C

to Abilene for Cosden Petroleum Co.

All together the firm has done pipeline and other construction jobs for more than 25 oil companies and other firms operating in this area.

The gas gathering system for the Sunray-Mid Continent Co.'s Snyder Gasoline Plant was installed by Holder.

The variety of pipes and installations done yy Holder is almost as wide as the number of companies it has worked for.

Pipelines for natural gas, crude, gasoline, propane, butane, water, water injection and other products have been installed by Holder. Even similarly installed coaxial cable has been worked on by the firm to provide wide flung communications.

Owners of the firm are C. O. Holder, and his three sons, C. O. (Bobby) Holder, Jr., T. Wayland Holder, and George Holder, who is still a student in school here, but gets in on the work around the busy industry.

## Playmates Killed By Scalding Water

BURBANK, Calif., April 20 (AP)—Police said a bathtub of scalding water proved a death trap for a pair of 2-year-old playmates at nearby Sun Valley.

Investigators said Karen Andrews and Gary Lee Edwards were burned fatally yesterday when they crawled into the tub which Mrs. Leslie Andrews, 19, Karen's mother, had filled to use in scrubbing floors.

Mrs. Andrews told police she was in another room. The children suffered second and third degree burns. Both died at a hospital in Burbank.

## 'Fishing Camp' Is Well-Stocked

HOUSTON, April 20 (AP)— When sheriff's officers raided a club and tavern near Sheldon Reservoir last night, the two men who operate the club said it was a fishing camp.

The officers started a search. Spotted around the club the officers found three rifles, a pistol, three shotguns, 180 pair of dice, 32 decks of cards, three sets of poker chips, and other gambling paraphernalia.

The two men were placed in county jail and held for questioning. Both are described by officers as "veteran gamblers."

## North Texas Off To Kansas Relays

DENTON (AP)—Eight North Texas State track men go to Lawrence, Kan., this week to cmpete in the Kansas Relays—a track and field meet where the Eagles already hold three records.

## Delaying Of British Debt Is Approved

AUGUSTA, Ga., April 20 (AP)—President Eisenhower signed today a bill granting authority for Great Britain to postpone up to seven annual payments of principal and interest on her debt to this country.

Eisenhower had asked Congress for the authority. Britain sought the deferment because of a financial squeeze resulting from last fall's British-French attack on Egypt and the closing of the Suez Canal.

The new law amends the 1945 agreement which called for Britain to make annual payments of about 134 million dollars on her lend-lease debt and a postwar loan of 3¾ billion dollars.

The seven annual payments may be deferred, if Britain takes full advantage of the new authority, until the year 2001, but would have to be made starting then. That is the year in which Britain was scheduled to pay off the debt under the 1945 agreement.

Secretary of the Treasury Humphrey has said he does not expect Britain to defer seven consecutive annual payments, but to pick the years in which such action would be most advantageous to her.

## Missouri Fisherman Pulled Under Water

MATHIS, Tex., April 20 (AP)—A Missouri fisherman drowned here yesterday when a fishhook caught in his hand and he was pulled under the water.

Billy Marks, 21 of Neosho was freed from the hook after being under water for six minutes. Efforts to revive him failed.

Deputy Sheriff Sam Bell said Marks had dropped a trot line with a 50 pound weight attached into the water when one of the hooks caught his hand. The line pulled him out of the boat into the water.

## Tax Cut Is Called For By Rayburn

DALLAS, April 20 (AP)—Speaker Sam Rayburn, back home to help open the North Texas Water District plant at Wylie today, called for a tax cut "for us poor folk" after Congress completes its budget-whacking.

"I think Congress will cut from 3 to 5 billion dollars from the budget," he said. "And when we do, we will start work immediately on a tax cut to be effective next Jan. 1.

"We have cut 1.4 billion dollars from the budget already and we've had only the little money bills. The big ones—agriculture, foreign aid and defense—are coming up."

As for the tax reduction, Rayburn said:

"I want us poor folk to get some this time."

He said details of any cut would be up to the 25-member ways and means committee but pointed out that "It should go to low-income groups before anyone else."

## Increase In Oil Noted

AUSTIN, April 20 (AP)—The Railroad Commission reported today an increase of 11,790 barrels in the average calendar day oil allowable over last week. The average allowable was 3,568,780 barrels as compared to 3,556,990.

The commission said 358 oil wells were brought in during the past seven days. There were 31 gas well completions. A total of 160 dry holes were recorded.

The oil well completions total for the year rose to 5,051, still below the 5,144 for 1956. Gas well completions increased to 554 compared to 502. Dry holes total 2,520 compared to 2,417.

In unproven territory, 13 oil wildcats and 81 dry holes were recorded. One gas wildcat was completed. A total of 259 wells were plugged during the week.

SNYDER HEATING AND AIR CONDITIONING—The large aluminum building above located on the Big Spring Highway across from the Canyon Drive In theatre will be the new home of Snyder Heating & Air Conditioning. This industrial firm which provides a complete heating, air conditioning, home and business insulation, and duct work will move into the new building within the next few days. (Lee Watson photograph.

## Welex Originated Jet Perforations

Welex Jet Services, Inc., 1601 Avenue R, originators of jet perforation of casing for oil production, offers a wide range of oil field services to the industry in this area.

Ed Schulz, district superintendent for the firm, said that jet perforating was only one of the complete line of such services offered, however.

Included in that type wireline services in addition to jet perforating are: Thru-tube perforating, open hole perforating, wireline squeeze cementing, simultaneous radioactivity logging, formation fracturing tool, down hole junk shots, and other assorted wiring services.

"Perforating is no sideline with Welex, it is the main interest of the firm, and it is done to perfection by the highly skilled and trained employes who use the latest and most complete wireline equipment," he said.

Welex Jet Services, Inc., has a division offices in Midland, general offices in Fort Worth, and district offices in Snyder, Odessa, Hobbs, Pampa, and Abilene.

## Baylor 5 To Play 24 Games Next Season

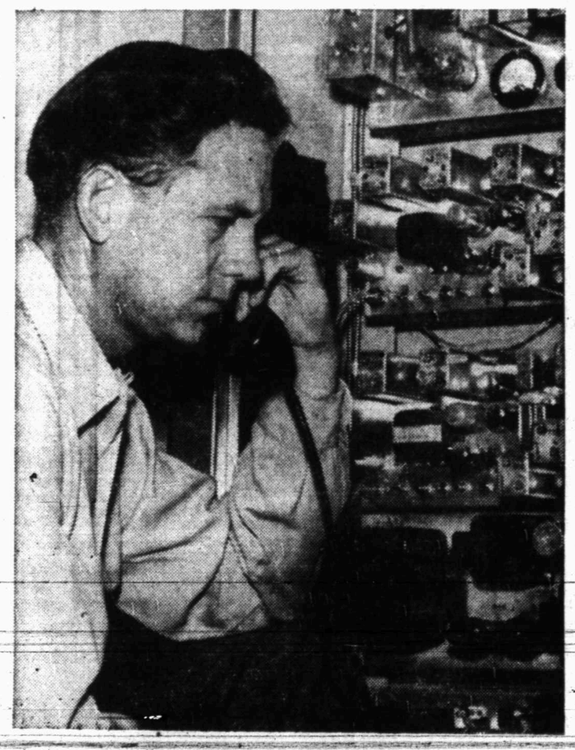

WACO (AP)—Baylor announced a 24-game basketball schedule for next season today with a trip to the West and another to the deep South featuring nonconference play.

Passenger cars account for 80 per cent of all motor vehicle miles traveled in the United States.

# An Industry That Speeds Up Industrial Output

## Mobile Radio Communications Have a Vital Part in Many Industrial Operations

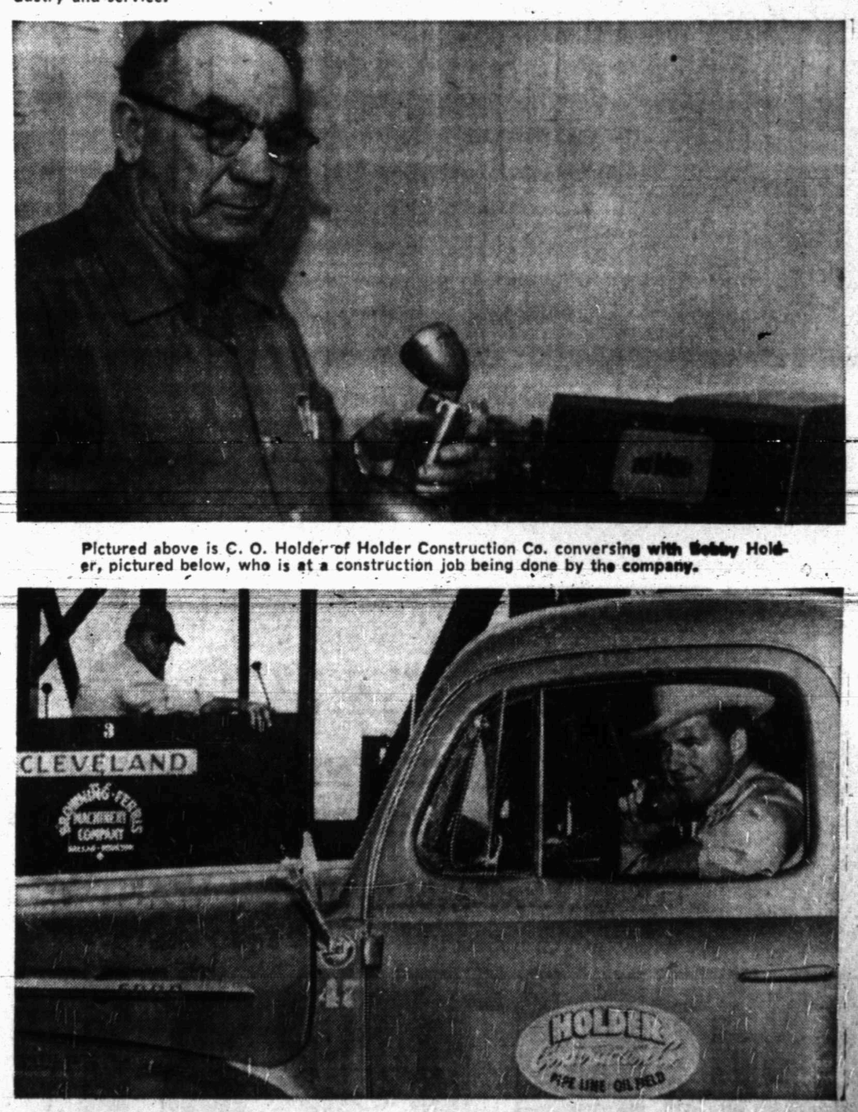

Mobile communications save hundreds of miles of driving and many man hours each week for industrial and other firms whose activities are carried on over a widespread area. Du Mont Mobile Communications permit conversation between any two points within the range of the system. Communication points may be either fixed or mobile. In other words, while riding in a car or truck, you may radiophone to another vehicle equipped with similar equipment, or speak to the base station located in your office or place of business. The use of mobile communications has proved itself a time, money and, in many cases, a life-saving service. Its complete versatility lends itself to practically every industry and service.

Jay R. Huckabee inspects a piece of DuMont equipment and makes necessary adjustments to assure correct performance.

Pictured above is Mrs. Velda McCollum, receptionist for Humble Oil and Refining Company's production district office, uses DuMont two-way radio for constant contact with Humble's production crews.

Pictured above is C. O. Holder of Holder Construction Co. conversing with Bobby Holder, pictured below, who is at a construction job being done by the company.

# TRUCK TIRE SERVICE

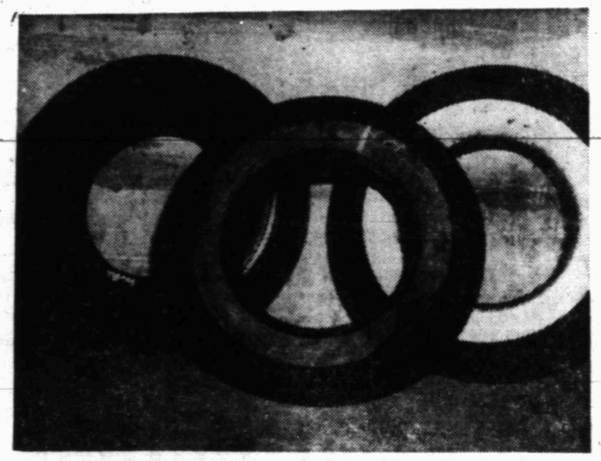

# FOR WEST TEXAS INDUSTRY!

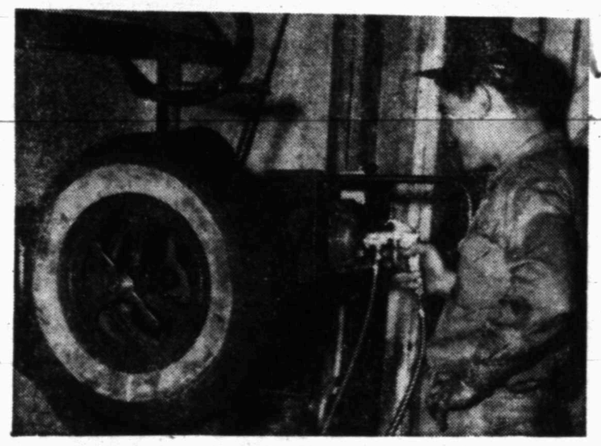

This service truck runs through three counties surrounding Scurry County, having dealers in Justiceburg, Post, Tahoka, O'Donald, Lamesa, Big Spring, Ira, Colorado City, Loraine, Roscoe, Sweetwater, Roby, Rotan, Hamlin and Aspermont. Delivering retreads, new tires, tubes and batteries. It also serves a large part in servicing trucking companies and oil companies in these towns in truck tire retreading and repairing.

(COMPLETE TRUCK & PASSENGER TIRE RETREADING & REPAIRING)

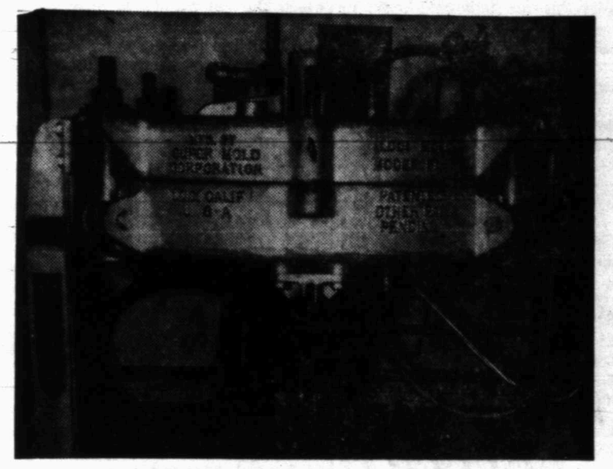

# Serving Snyder And West Texas Area!

Retreading tires is a specialty, not a sideline, or a one-step procedure of just putting new rubber on an old tire. We WILL NOT put a new 3-T Tru-Tread on an old weather-beaten, rotton corded tire. All tires, before they are retreaded at Central Tire Service are run through FOUR COMPLETE INSPECTIONS, to assure the tire is safe when it is put on your car for the safety of you and your family on the highways.

After a tire is completely inspected and shows to be a good sound treadable tire, it is put on the Tru-Arc Buffer as shown here. This buffer is precisioned to a degree of roundness. Only experienced personnel run this machine to assure a round and balanced tire ready to be retreaded.

After the tire is buffed and tread (100% cold Gates 1st class rubber) rubber is put on, it is put into these Lodi F1 Molds, which are the most modern and up to date molds in the industry. The tire is cured for one hour with 300 degree temperature with 140 pounds air pressure. This is to further assure a good solid cure of the tread rubber to give you as many or more miles than you received from your original set of tires.

After the tire is retreaded, it is taken to the cleanup room, here it is trimmed, painted and balanced on the Seiberling Thermo Weld tire balancer with balance stock on the inside of the tire, therefore no wheel weights are needed for the tire. Of course, if the wheel and hub are out of balance, which in most cases are, it will take a small amount of weights to balance for smooth comfortable riding.

Here we show a further process of making a new tire out of a smooth one—It is the famous Elam Tire Truer used in case the tread is not perfectly round. Our 3-T Tru Treads have a tread depth of 12-32 of an inch which is 1-32 of an inch more than a new first line tire. The reason we ordered our matrics to cut 12-32 of an inch was in case the tire was a little out of round (after retreading), we could put on the Elam Tire Truer and make it perfectly round and still have as much or more tread than a new first line tire.

## PROOF POSITIVE!

**Over 3,000 Passenger Tires Retreaded and Sold in Only 11 Months!**

**For This Reason—We Call Our Treads "3-T Tru-Treads"... Tru-Round, Tru-Straight, Tru-Balance!**
