Through the Editor's Spectacles

By GEORGE

ation of an 11-man to serve as a media- agency in labor disputes threaten the progress of production will be the purpose for which intended only if it is as an impartial for publishing the about the situation which it may be called to deal. Bias and par- ship have operated to use and conceal the facts most of the industrial in the past. But public is aware that conflicts have, and are causing serious inter- with necessary produc- and there is a rising of impatience with The growing public sition is to do some- about strikes which interference, regard- of whether it is industry for that is at fault. Al- there are demands labor and capital be- and put to work as the young men of the try are being drafted service into the army.

policy of such conscrip- would be a serious one, might even be a fatal step and totalitarianism. Ob- sly, any other course which would offer a solu- to the problem and at same time maintain in- on a voluntary basis d be preferable. There any question about the public wants. And isn't any question that the public wants, in- try and labor will do, through their own dis- or by govern- demand. The new ad- board may be a of bringing about a airing of the facts healthful results to in- try, labor and the public.

Unless some formula for venting costly industrial icts is worked out now, gathering speed of the ense program and the ular demand for action return for taxes is cer- a to force it. And the d of solution that would forced is no pleasant prospect either for the worker or manager.

Youth Killed When Shotgun Discharged

Curtis Haislip, 16-year-old after in the construction of mp. Bowie at Brownwood, was ally injured when the 12-gauge gun with which he was hunt- seven miles south of Cisco ac- cidentally discharged into his ab- about 12:30 Sunday after- noon.

Haislip and a companion, Bill arber, also of Brownwood, had e to Romney to visit Haislip's ndparents, Mr. and Mrs. K. B. pper. Sunday at noon they urchased some shells for the gun. Cecil Carter's filling station and ere and drove north of Romney to hunt squirrels. According to arber, young Haislip sighted a ured in a tree at a small creek e miles north of Romney and orted to pull the shotgun from e rear seat of the car to shoot hen the hammer hung in the olster and the gun fired, the arge tearing away a portion of e youth's abdomen.

Barber drove the injured and nconscious youth to Rising Star he youth died five minutes ter reaching a doctor.

German Sailors Enroute to Camp

Members of the crew of the scuttled German liner Columbus are shown as they transferred from a train to a bus at Carrizozo, New Mexico, en route to the internment camp at Fort Stanton, New Mexico. They have been on Angel's Island at San Francisco.

Farm Market Is Rotary Subject

The Cisco NYA farm market project, on which construction started yesterday, was explained before the Cisco Rotary club at noon today by Edward Lee, a member of the city commission active in the promotion of the project.

11-Man Strike Mediation Board Named by FDR

WASHINGTON, March 20 (AP)—An 11-man board, headed by Dr. Clarence A. Dykstra, was created by President Roosevelt Wednesday to serve as a mediator in labor disputes which might threaten the progress of national defense production.

The group, to be known as the national defense mediation board, will be called upon to act only after the regular conciliation services of the labor department have failed to bring about labor and industry.

Although the board will have no power to end strikes or other labor controversies by compulsion, it may recommend settlements and make public its findings. This authority to turn the spotlight of publicity upon stale-mated situations was viewed as a powerful weapon toward ending disputes in vital rearmament industries.

Board Make-Up
The board will be composed of four representatives of industry, four of labor and three "disinterested persons" representing the public. Dykstra, who is president of the University of Wisconsin and director of selective service, is one of the public representatives. Other members of the board are:

Public: William Hammett Davis, New York patent attorney; and Frank P. Graham, president of the University of Carolina.

Industry: Walter C. Teagle, of Connecticut, former president of the Standard Oil company; Roger D. Lapham, of California, president of the American Hawaiian Steamship company; Eugene Meyer, publisher of the Washington (D.C.) Post; and Cyrus Ching, director of industrial and public relations of the United States Rubber Products company.

Labor: Gregory Meany of New York, general secretary of the AFL; George M. Harrison of the Brotherhood of Railway and Steamship Clerks; and an AFL vice president; Philip Murray of Pennsylvania, president of the CIO; and Thomas Kennedy, of Pennsylvania, secretary-treasurer of the United Mine Workers of America (CIO).

Miss Wynema Bond has been visiting friends in Fort Worth.

Miss Frances Coidwell is visiting in Fort Worth.

PLANES MADE IN AMERICA REACH GREECE

Movement of Aircraft Is Believed of Considerable Size

By the Associated Press
Britain's campaign to defend the Greeks from probable German attack and to harden Yugoslavia in her reluctance to become a way for Nazi conquest was reported strengthened yesterday by the arrival in Greece in American-built planes.

This information, contained in diplomatic messages, did not specify the number of planes already landed from Cairo by British pilots, but there was implication that it was a continuing movement of considerable size.

Aside from the obvious military advantage to the Greeks of such modern fighting craft, the action of sending them was a piece of diplomacy speaking more loudly than words.

It apparently was meant to symbolize the reality of the American promise to help those who help themselves against the axis, and to answer sympathetically the feeling expressed in the Balkans that the measure of immediate support offered by Britain would largely determine how much further Germany could go there without the challenge of guns.

Almost coincidentally there came from Washington the disclosure of a new outcropping of British-American cooperation. Frank Knox, secretary of the navy, stated that the British had asked for permission to use American navy yards to repair their ships damaged in war, but that no action had been taken. He added that the United States' first naval aid to Britain would be to supply such vessels as submarine chasers, motor torpedo boats and other mosquito ships.

The landing in Greece of planes fashioned in American factories came at a time which seemed opportune in more ways than one, for during the day there were developments that strongly pointed away from Greece.

A Greek source of competence said that his government, which already is fighting a historic battle with the Italians in Albania, was preparing to divert a great body of troops to hold the Bulgarian frontier—in cooperation with British imperial troops already in Greece—against the expected Nazi thrust from that German-occupied country.

The diversion of 500,000 Greek troops was mentioned, but that figure seemed to some observers perhaps excessive, since it would be a large part of the total Greek army.

Cisco Druggist Seriously Ill At Hospital

W. W. Moore of Red Front Drug company was reported seriously ill today at Graham sanitarium, where he is undergoing treatment. Mr. Moore had been ill for some time, but his condition underwent a change for the worse Wednesday evening and he was rushed to the hospital, where his condition was reported unimproved.

G. P. Mitcham, Jr., In Hospital Here

G. P. Mitcham, Jr., Cisco cattleman, was reported resting well at Graham sanitarium today, where he has been for the past few days, suffering from an attack of influenza and an infected throat.

Blood transfusions have been made, and Mitcham is reported recovering.

Mrs. J. F. Benedict and Mrs. James Haynie attended the homecoming of the First Christian church in Breckenridge Wednesday night.

Mrs. Ralph Chandler is spending the afternoon in Ranger.

Cisco Youths Learn Mechanical Rudiments

Travis Farmer, right, looks on as Laymon N. Miller, instructor, gives Clifford Smith, left, some pointers in the use of a chisel at the Cisco public schools defense shop training project.

Congregation Has Fellowship Meet Wednesday

Approximately 50 members of the First Christian church met in the church basement Wednesday evening at 7 o'clock for a fellowship dinner and prayer service.

Each guest brought a covered dish for the dinner, which was given as a get-together in preparation for the forthcoming church revival. The Rev. J. R. Wright, pastor, brought an inspirational message, in which he urged church members to cooperate in and support the revival.

After a song and prayer service, the group was dismissed. The revival meeting is to begin on Sunday, March 23, and to continue through Eastern Sunday, April 13. The Rev. Wright will conduct the services.

To Prevent Smutty Heads in Feed Crops

Seed borne diseases such as head smuts can be controlled in grain sorghums and sweet sorghums by treating the planting seed with half an ounce per bushel of new improved Ceresan, according to Elmo V. Cook, county agent. The same treatment also helps secure a better stand by controlling molds and bacteria that cause some of the seed to rot in the ground. The cost of Ceresan per crop acre is so small and the advantages gained are so great that the practice of seed treatment should be used by all farmers, thinks Cook.

A can of new improved Ceresan costs 75 cents, will treat 32 bushels of sorghums and any part of the can not used can be kept indefinitely for future use.

Must Pay For Or Return Mattress

Ineligible persons receiving mattresses under the mattress-making program of the government for low-income families face two alternatives, according to Miss Ruth Ramey, county home deconstruction agent, under whose direction the program is carried out.

They are: Return the mattress if it has not been used, or pay for it if it has been used at all. The family will be required to pay to the treasurer of the United States \$6.55 for a mattress and \$1.35 for a comfort.

Miss Ramey said that the person receiving the mattress should be advised by the county committee as soon as ineligibility is determined.

Commerce Man To Succeed Dr. Clark

T. A. Smith of Commerce, Texas, has been appointed area project supervisor for adult education in the Eastland area, succeeding Dr. Lee Clark, deceased, it was announced today.

7 BILLIONS BILL IS NOW UP TO SENATE

WASHINGTON, March 20 (AP)—By a vote of 337 to 55, the house approved the \$7,000,000,000 appropriation for help to England last night and sent it to the senate, where the leadership has hopefully arranged for its passage by next Tuesday.

While the house was knocking down opposition amendments, leading senate democrats had drawn up plans for shoving the measure through the senate committee stage this week and bringing it to the floor on Monday.

So far as could be seen, opposition of the type which would delay action on the bill by extensive senate speeches, had all but vanished. But, as always in the senate, there was still a possibility of such speech-making. And senator Nye (R-ND) and Senator Tamm (R-Ohio) each had several amendments to offer.

The appropriation bill would provide the financial sinews for the lease-lend law. It would make \$7,000,000,000 available for the purchase of war equipment to be sent to England, Greece, China, or other countries which may decide to resist attacks from Germany, Italy or Japan.

Provisions
It would provide, among other items, \$1,343,000,000 for big guns and their ammunition; \$2,054,000,000 for that most indispensable modern weapon, the airplane; \$362,000,000 for tanks and armored automobiles; \$629,000,000 for ships and water craft in general; \$725,000,000 for building factories to produce such equipment; and \$200,000,000 for repairing and equipping the vessels of belligerents in American ports.

After the long battle over the lease-lend bill itself, all the arguments were an old story when the appropriation bill came to the house. In addition, the administration was in easy command of the situation.

Consequently, house members were little interested in the measure beyond being present to cast their votes on the final passage. A few irreconcilables submitted amendments only to have them bottled down, and in most cases administration leaders did not even offer a reply to the arguments presented in behalf of the proposed changes.

On the final roll call, many republicans—including the party's floor leader, Rep. Martin (Mass.)—who had voted against the original lend-lease bill—cast their ballots for the appropriation on the basis that the policy had been adopted and should be unitedly carried through. A motion to send the bill back to committee, presented by Rep. Lambertson (R-Kansas) was beaten, 258 to 132.

The chamber turned down amendments to reduce the appropriation by varying amounts, to make the time limit on the fund a flat two years, instead of until June 30, 1943, and to bar the use of American harbors by belligerent warships.

Berry to Preside At Pool, Beach Ass'n

P. G. Berry, manager of the Lake Cisco Amusement company and president of the Texas Beach and Pool association, will preside over the thirteenth annual meeting of the association in Fort Worth on March 29.

The convention will begin with a banquet for the association members and associated groups on Friday evening, March 28 at the Texas hotel. Business sessions will begin at 8:30 Saturday morning and end at 4 o'clock Saturday afternoon.

Experts in pool and beach management, regulation and sanitation, in health development and many other problems relating to the operation of public resorts will appear on the program.

Mrs. W. P. Grace of Moran spent Wednesday here with Mrs. Claude Howell and family.

Miss Betty Elda Clark expects to spend the week-end at TSCW in Denton.

COUNTY MEET EVENTS ARE UNDER WAY

West Ward Wins Third in Choral Singing Contest

The annual Eastland county interscholastic league meet got under way at Eastland Wednesday with contests in one-act plays at 1 p. m. and in choral singing in the evening. Eastland high school was rated first in the one-act play contest; Carbon high school second, and Ranger high school third. Alvin Johnson of Ranger was rated the best boy actor and Olga Leigh Underwood of Carbon the best girl actor. The contest was directed by T. G. Jackson.

Miss Vernelle Stinson of Cisco high directed the choral singing contest last night. Winner of first place was Hodges Oak Park of Ranger, second place, Morton Valley, and third, Cisco west ward.

Contests in declamation, typing, volley ball and junior track and field preliminaries got under way this morning.

During the afternoon contests in typing, declamations and volley ball will continue. Preliminaries in senior track and field events were also due to get under way.

Shorthand contests were to start at 1:30. Story-telling in all grades and playground ball in all divisions were other contests slated for the afternoon program.

Friday morning the rhythm band contests will be held in the Eastland high school auditorium at 9 o'clock, with Raymond Rucker as director. Tennis for all divisions will start on the courts south of the gymnasium building; playground ball will be continued, and picture memory will be held in Room 25 with Mrs. C. A. Claiborn as director. Music memory will be held at 10 a. m. with Mrs. Charles Ballew as director.

Friday afternoon tennis will be continued at 1 p. m., as will the volley ball contests, with the finals in this event staged for that hour.

Spelling and Writing
Spelling and writing divisions will be directed by J. V. Baird beginning at 2 p. m. Ward and rural grades, four and five, will meet in Room 37; ward and rural grades six and seven will meet in Room 35 and high school spelling will be held in Room 20 of the Eastland high school building.

The Three-R contest will be held in Room 5-T at 3 p. m. with T. E. Robinson as director.

Track and field finals will be held for all divisions at Bulldog stadium, Ranger, Friday evening, beginning at 7 o'clock. An admission of 10 cents will be charged.

Saturday morning at 9 o'clock boys and girls will draw for places in debate in Room 20, with Miss Avis McKelvin as director. At the same hour number sense contests will be held in Room 25, with O. L. Stamey as director.

Tennis finals will be held at 9:30; ready writers contests for all divisions will be held at 10 o'clock in Room 37, with V. L. Rucker as director; debate will be continued at 1:30 p. m., and at 2:30 extemporaneous speech for boys and girls will be conducted in Room 20 with Douglas Jackson as director.

Contestants from the Cisco public schools who are entered in the various events of the meet are:

High School
High school contestants and directors are Junior declamation, Mary Alice Hukel and Rex Ramsower, Miss Marion Chambliss, director, and senior boy, Jackie

(Continued on Page Two)

Weather

EAST TEXAS: Mostly cloudy, occasional rain in east portion, somewhat warmer Thursday. Friday partly cloudy and somewhat warmer. Moderate to fresh northerly winds on the coast becoming variable.

WEST TEXAS: Fair Thursday, becoming partly cloudy Friday with scattered showers in south-west portion Friday. Little change in temperature.

Entered as Second Class Matter December 11, 1935, at the post office at Cisco, Texas, under the name of The Cisco Daily Press.

and Patience

LET'S look quite calmly at this matter of strikes and national defense.

There are going to be some strikes and threats of strikes. There always have been, especially when production is rising, employment increasing and spring weather beckons. In spite of the defense effort there will be strikes. England has them even now, while she fights for life.

Why do we permit this at all? Why does England? Because we both have full faith that better production and more of it will come in the long run from free workmen than from the slave-galley factories of continental Europe where strikes have ended, true, but so has liberty.

There are certain kinds of strikes, however, which merit special attention, and which will not occur if American workmen

are as wise and as loyal as we believe they are.

FIRST, there is a possibility that strikes may be fomented by certain groups specifically for the purpose of interfering with the defense program. We believe there are too few American workmen allied with such groups to make this sort of thing dangerous. The greater danger is that all strikes will be put in this class by an emotional public.

Second, there is a possibility of "organization strikes" being called in shops with almost no union members, simply on the hope of labor leaders that recognition can be forced by putting the employer "on the spot" in the defense crisis. It is a denial of democracy for any strike to be called in a shop unless a clear majority of its workers vote for it. A strike for the sheer purpose of organizing workers who have not themselves voted to strike seems without excuse today.

Third, the jurisdictional strike. To strike simply because other workers, members of a legitimate and recognized union working under legal contract, are rivals to the striking union, is out of order today.

Fourth, there may be strikes in plants whose managers will try to take advantage of the defense situation and the unpopularity of strikes to break up well-established unions and nullify their quite legitimate efforts to keep their members afloat in the stream of rising prices and new conditions.

THE Wagner Act provides machinery for showing by orderly vote who represents who in any shop. The federal government offers conciliation and mediation machinery, and is increasing it. Now is the time to use them, and the spirit back of them, as never before.

Some of the labor situations which will arise this spring will be trying. They will require every ounce of patience for settlement without either taking from labor its hard-earned rights or allowing it to ride roughshod over the rights of employers and the public.

If you kicked about your income tax, think of what they're paying in England—and what they get for their money.

Listen, Officer. It Was Like This—

Woods, Ella Jo Cone and Maud's Rose Potter, Mrs. Bernice Hayes, director.

Girls' softball team: Betty Lauffer, Wanda Wilson, Norma Jean Cropper, Nancy Morrison, June Simms, Verna Lee Doyle, Anita Ramirez, Helen Sugg, Ruby Etheridge, and Virginia Eddy, and substitutes, Bonnie Rains, Fay Crowder, Angela Macias, Wanda Hibbert and Mary Lou Fleming, Mrs. Bruce Campbell, director.

Boys' softball team: Alonzo Prickett, Mac Harrison, Harold Rupe, Vernon Ramsower, Truman Smith, Edwin Dunn, Earl Boyett, Hilbert King, Melvin Nobles, Elbert Tipton, Tummie Dunn, Billy Anderson, Delmer Childers, Charles Bell, Harvey Haynie and Johnnie Kent, H. C. Elliott, director.

DESDEMONA

On Tuesday afternoon of last week, the "21" Study club met at the club house and the Texas day program was rendered. Mrs. C. A. Skipping presided. Roll call responses were items about Texas wealth. Leader of the program was Mrs. C. A. Skipping, whose past was a discussion of "Current News in Texas." Mrs. W. H. Davis gave an interesting discussion on "Texas—A Great Empire." "The Heroic Past of Texas," was the subject of a reading by Mrs. W. C. Bedford. Singing concluded the program.

other relatives. Burial was in Desdemona cemetery.

Saturday evening about 5 o'clock, the farm home of Charlie Putty was destroyed by fire.

George Crenshaw and family returned on Tuesday of last week from a visit with relatives in west Texas. They stopped here for a short visit with Mrs. S. E. Snodgrass and Mr. and Mrs. J. E. Heeler before going to their home at Stephenville.

Mr. and Mrs. Ted Rogers and children visited their parents, Mr. and Mrs. Kenneth Lawson, at Gorman Sunday.

Sunday afternoon at the high school gym a splendid program of patriotic songs and readings was given by pupils of the grammar school, under the direction of Miss Della Wall, with Miss Edith Creighton, accompanist.

Frank Gee and family of Talco came in Wednesday and he went to work for the Rudeco company.

Mrs. J. M. Matthews and daughter, Miss Willie Matthews, of Stephenville, were guests of Mr. and Mrs. C. H. Genoway and family Sunday.

Aaron Henslee of Fort Worth came through here on business Saturday and stopped a few minutes with his parents-in-law, Mr. and Mrs. W. H. Davis.

Pupils of the seventh grade and four of the sixth grade pupils of grammar school, accompanied by Mrs. Lucile Caraway, and Harrell Kelley, teachers and Mrs. Durant Putty and Mrs. Whit Richards, parents of some of the pupils, left early Saturday morning for Gatesville, where they visited the state training school for boys.

G. S. Bruce of Gatesville visited his son, Guy Bruce, and wife Tuesday night of last week.

Friends and schoolmates were gathered to hear that Mary Louise Owens died Saturday night. She was the daughter of Mr. and Mrs. Dick Owens and was a member

of the freshman class in high school.

Mr. and Mrs. Howard Williams drove over to Gorman Monday.

The first sewing machine was patented in 1846.

California replaced Texas as the fifth most populous state, according to the 1940 census.

An Englishman sought as early as 1904 to induce the British navy to build submarines. He wanted to use them against Napoleon.

Retail sales in 1,770,904 stores of the U. S. exceed \$42,000,000,000 annually, according to the census bureau.

Ghent, in the thirteenth and fourteenth centuries, was the wealthiest city in Europe.

PRERSVILLE

Mrs. Bailey Whisenant and Mr. and Mrs. Keith Gentry to Corpus Christi for a visit with their daughter, Mrs. Sherrill Whisenant and son, who are employed at there. These industrious boys are at night and attending the day time.

Reverend and Mrs. Jesse Gentry are the proud parents of a baby girl, born last night. Her name is Ruth Margaret.

Gentry, whose parents are the Abilene, about two miles, has returned to the home of her grandparents, Mr. and Mrs. Gilbert Gentry, and has been attending high school at Abilene.

Betty Jo Young spent the day with her friend, Miss Gentry.

A crowd attended the monthly services of the Baptist church at the school Sunday.

Mr. and Mrs. Dave Fambrough and children visited relatives in this community Sunday.

H. T. Sparks, who has been ill for some time isn't doing so well at this time, and was returned to the Graham sanitarium Friday.

Mrs. Floyd White and daughter, June, spent Monday morning with Mrs. Forrest Miller.

Linda and James Slatton visited their aunt, Mrs. Forrest Miller, Sunday.

To Stop Birds From Pulling Up Corn

A home remedy to keep birds from pulling up corn has been given by Elmo V. Cook, county agent as follows:

Mix a tablespoon of crude carbolic acid with two gallons of seed corn. Place the corn in the planter hopper, pour the crude carbolic acid over it and stir thoroughly with a wooden paddle. Do not touch the acid with the hands, as it will injure them.

Eastland County Exhibitors Win at Stock Show

Reports from the Eastland county exhibitors in the Fat Stock show at Fort Worth show that a total of \$316 in premiums were won, which would take care of the expense of showing, according to A. C. Pratt, assistant county agent. This total included the premiums won on 4-H and FFA Jerseys. 4-H club boys and goats entered by J. F. Denley of Ranger.

The 4-H club boys with their Jerseys and hogs totaled \$199, with five second place ribbons, one third, two fourths, six fifths, two sixths, one seventh and two eighths, making a very creditable showing in greater competition than they had ever encountered at the Fat Stock show. It's Dreaming Pioneer, Jersey bull owned by the Eastland chapter of Commerce, made a satisfactory showing with fifth place in the open class. He was criticized for not carrying quite enough weight, and that will be remedied within a few months time for he has gained more than 100 pounds since the purchase of him three months ago.

For the highest individual winner in the show, one animal exhibited from Eastland county was F. L. Spaulden, Golden 4-H club boy, who won \$51 on six fat hogs. This was done with three second place ribbons, including second in the open class, and one fifth place ribbon. F. L. has made a very outstanding demonstration with his hogs. The other 4-H fat hogs exhibited by Raymond Beck and Billy Henderson of Morton Valley won enough in premiums to pay their way in the show.

The 18 registered Angus goats exhibited by J. F. Denley of Ranger took away \$96 in premiums with one first place ribbon, three seconds, eight thirds, one fourth, and one fifth place. The strain of goats owned by Mr. Denley is generally recognized as being the best of the breed, and their rating in the 1940 Fat Stock show was as high as this year.

The leaders in the dairy work in the county regret seeing the boys sell their well bred Jerseys, but it is gratifying to note that when they are sold, they bring a good price. Larkin Akers, Cisco FFA boy, working under the supervision of T. O. Caudle, vocational agriculture teacher, sold his heifer for \$150 cash in the show and Wince Graham, Morton Valley 4-H club boy, sold his heifer for \$130. Both of the heifers were near calving and would have been too old to exhibit as club calves next year, but their type and inherited production records indicate that they would have been good animals to keep.

U. S. manufacturers of equipment for steam railroads in 1939 built 26,129 flat cars, compared with 96,794 in 1937, they reported to the census bureau. This does not include production in railroad shops.

parents, Mr. and Mrs. W. H. Ervin, at Dan Horn Sunday.

Miss Eva Ervin of Dan Horn visited her sister, Mrs. Buck Jessup, over the week-end.

Farmers Urged to Purchase Certified Seed

ABILENE, March 20 (Sp.)—The oil industry in 1941 is far better prepared—and without federal control—to supply wartime needs of the United States than it was in 1917, oil men of this district were told last night by Harold B. Fell, executive vice president of the Independent Petroleum association of America.

Operators attending from Cisco were Charles J. Kleiner, John Kleiner, R. L. Ponsler and J. E. Moriarty.

Fell and C. E. Buchner, executive manager of the association, spoke before about 60 independent operators at a district-wide dinner meeting in the Wooten hotel ballroom. The meeting is one of a series being held in oil producing areas for a discussion of economic, legislative and defense problems facing the industry.

Fell read a telegram from Russell B. Brown, Washington legal representative of the IPAA, quoting a report made public yesterday by the national resources planning board, in which federal regulation of the oil business was urged.

"The report of the board," said Brown's wife, "makes definite recommendations for more drastic measures of control of the petroleum industry than at any time before."

Production in 1917, Fell said, was only 350,000 barrels per year in the United States, while at present, production is 1,350,000 barrels a year, and the price has dropped from \$3 a barrel to \$1.

The number of wells has almost doubled in that period, from 200,000 in 1918 to 400,000 in 1941.

"Improvements in the method and practice of producing oil, in conservation and efficiency have been great. The refining capacity of the industry is three and a half times greater than in 1918, and that capacity can be increased 25 per cent without changing the present equipment. Billions of barrels of production have been saved by development of the cracking process in refining. Pipelines have doubled.

"The number of tankers have increased eight times the tonnage 20 times. There are double the

golden prolific, white Thomas, yellow surecopper and hybrid seed corn.

Oil Industry Is Prepared, Speaker Says

ABILENE, March 20 (Sp.)—The oil industry in 1941 is far better prepared—and without federal control—to supply wartime needs of the United States than it was in 1917, oil men of this district were told last night by Harold B. Fell, executive vice president of the Independent Petroleum association of America.

Operators attending from Cisco were Charles J. Kleiner, John Kleiner, R. L. Ponsler and J. E. Moriarty.

Fell and C. E. Buchner, executive manager of the association, spoke before about 60 independent operators at a district-wide dinner meeting in the Wooten hotel ballroom. The meeting is one of a series being held in oil producing areas for a discussion of economic, legislative and defense problems facing the industry.

Fell read a telegram from Russell B. Brown, Washington legal representative of the IPAA, quoting a report made public yesterday by the national resources planning board, in which federal regulation of the oil business was urged.

"The report of the board," said Brown's wife, "makes definite recommendations for more drastic measures of control of the petroleum industry than at any time before."

Production in 1917, Fell said, was only 350,000 barrels per year in the United States, while at present, production is 1,350,000 barrels a year, and the price has dropped from \$3 a barrel to \$1.

The number of wells has almost doubled in that period, from 200,000 in 1918 to 400,000 in 1941.

"Improvements in the method and practice of producing oil, in conservation and efficiency have been great. The refining capacity of the industry is three and a half times greater than in 1918, and that capacity can be increased 25 per cent without changing the present equipment. Billions of barrels of production have been saved by development of the cracking process in refining. Pipelines have doubled.

"The number of tankers have increased eight times the tonnage 20 times. There are double the

number of railroad tank cars.

"Storage in 1918 amounted to a 38-day supply; now we have a 45-day supply of crude.

"In 1936, the U. S. geological survey placed the nation's reserves at 7,600,000,000 barrels, yet we have produced 20 billion barrels and we still have 19 to 20 billion barrels in reserve this year.

"All this," said Fell, "has been done under our present American system of free enterprise and initiative, without government control or supervision.

"1. Control production.

"2. Control refining.

"3. Control price.

"4. Control use.

"5. Import more petroleum products.

"If this isn't regimentation of industry, I don't know what is," Fell declared.

Fell said he believed only one thing could help the oil industry

right now; that is an increase in crude price. He said later in an open forum discussion that he believed "anyone could cut the price of crude, but only two companies in the United States were capable of raising the price and making it stick."

The United States labor conciliation service has dealt with more than 1,700 controversies since last July 1.

Ice cream and other frozen desserts annually manufactured in 2,734 U. S. factories are valued at \$285,806,781, according to the census.

THE ADVENTURES OF REDDY KILOWATT

Dear Friends: I didn't know what to do, the day those toughies laid their plans to steal Mr. Brown's car. But the idea came to me...

Foiled by a Light Globe

I went to the tool box and got wires and insulators and a hammer and some screws. It doesn't take much to run a line to the garage...

That night those thugs were foiled! I thought, "Why doesn't everyone depend on good light to protect their home and property?" It's the cheapest insurance you can buy. Yours for better light—safer living. REDDY KILOWATT.

PROTECTED at Play

How About Your Home?

WHAT'S THAT NOISE? You awaken with a startled sense of some disturbance outside. Then is when you want the protection afforded by light... light that floods the premises... light that offers safety from prowlers. Outdoor flood lighting gives the protection you want—and need. Lights on the porch gives protection against surprise and alarm when the door is opened and also protects against possible injury in stumbling on the steps. Light in hallways and closets prevents fumbling and bodily injuries. Let our lighting advisers help with your lighting problems. Their service is FREE. Good light is CHEAP. So don't take chances with the safety of your family.

SOCIETY and CLUBS

CATHRYNE RUSSELL, Editor
Phone Numbers 344 and 608Cotton Is Topic
Of Study At
Club Meeting

The First Industrial Arts club met Thursday afternoon at 3 o'clock for an enjoyable program on "Cotton." Mrs. M. E. Underwood was club leader and Mrs. H. B. Allen leader of the program.

Mrs. Arthur Johnson of Eastland was presented in an interesting discussion of "Cotton," after which the Kappa Delta Association ensemble played two selections. The group composed of Mrs. Ben Krumpholtz, director, Misses Dora Jean Thurston, Hope Starr and Peggy Jean Gallagher, played "White Clouds Over Yonah" and "Naughty Waltz."

The meeting was concluded with an exhibit to the members of articles made of cotton, and of cotton tie-graphs.

Those present were Misses H. B. Allen, M. E. Underwood, F. J. Bennett, N. A. Brown, Joe Clements, B. S. Cline, E. Hanks, E. L. Jackson, J. G. Jones, Jr., L. J. Leach, Ruby Miller, Ben Moore, B. F. Morehart, E. J. Fox, J. B. Pratt, O. L. Starnes, M. F. Underwood, W. W. Wallace, Bonnie Peterson, members and two visitors, Miss J. B. Wright and Pearl Ward.

Cecilians Meet
Thursday Night

The Cecilians sang and in the studio of Blanche Berg, singing Thursday evening. Present were: Misses Lora Meyer, W. E. Statham, Loretta Schickel, J. E. Wright, O. M. Thompson, A. E. Jamison, W. C. McDaniel, W. W. Wallace, James Whiter, A. L. Chisholm, O. L. Starnes, Misses Mary Elizabeth Wright, Ella Anderson, Billie Cole, Nina, King, Roy, Lou Powell and Catherine Russell.

Mr. and Mrs. W. C. McDaniel and daughter, Blanche, and Mr. and Mrs. W. W. Wallace and daughter, Mary, were guests of Mr. and Mrs. W. F. Hesterman.

Lake Cisco Club
Has Forty-Two
Party Wednesday

Members of the Lake Cisco Home Demonstration club and their guests met Wednesday evening with Mrs. L. B. Norvell for a forty-two party.

Twelve tables were arranged for playing and winners were Mrs. F. E. Clark and Mrs. C. B. Abbott.

Refreshments were served at the close of the games to 47 members and guests.

Eastland Couple
Marry on Tuesday

Miss Catherine Drake and Mr. Joseph J. Finley, both of Eastland, were married there Tuesday evening, March 18, in the home of the Rev. and Mrs. John W. Tucker. The Rev. Tucker is pastor of the Church of the Nazarenes.

Attending the wedding were Mrs. Philip Cunningham and Mr. and Mrs. Odis Harvey. The couple are well known in Eastland where they have lived for a number of years, and will make their home there.

Circle Meets
With Mrs. Pittman

The B. L. Lockett circle of the First Baptist Women's Missionary society met Tuesday with Mrs. C. Pittman. Mrs. M. F. Underwood presided over the business meeting, and the lesson taken from Job was taught by Mrs. C. Pittman.

Refreshments were served at the close of the meeting in Miss C. N. Pettigatt, M. C. Stevens, M. F. Underwood, C. P. Cole, Joe Britton, W. C. Shelton, Lora McPherson, Shirl Black, E. J. Fox, S. B. Parks, E. L. Kinkaid, W. L. Chandler, G. R. Langston, Misses Mary, Gladys, and J. B. White, Frank Walker, a guest Mrs. J. C. McDaniel, and the hostess, Mrs. Pittman.

Mr. and Mrs. W. C. McDaniel and daughter, Blanche, plan to spend the week-end in Dallas. They will go by Springfield for road show. Daughter, Catherine Mae Taylor, student, who will accompany them.

Jawin' Jawn

Though appearing somewhat aged by his recent experience as the political agent, John L. is still the old dynamic Lewis as he warns joint meeting of unionists and mine operators in New York that his United Mine Workers won't accept a counter-proposal to their wage increase demands.

Dollars to—

(Continued from Page Three)

"Personal affairs," she pointed a smile on her lips. They couldn't possibly recognize her, the very thought was fantastic. To this brick, sharp-eyed woman behind the desk she was only one of hundreds of applicants. She walked up to the desk.

"I'm applying for a sales position," she said lightly.

(To Be Continued)

PERSONALS

Miss Mable Marshall of Brownwood has been visiting relatives here.

Mr. and Mrs. Pete Collins of Odessa, formerly of Cisco, are transacting business here.

Mr. and Mrs. George Swenberry have returned to their home in Liverpool, Kentucky, after spending two weeks here with Mrs. Swenberry's parents, Mr. and Mrs. C. E. West. Their son, Allen West, a senior in high school, will remain with his grandparents and finish the school term here.

According to the census bureau, 18,120 liquor stores in the U. S. selling packaged goods, in an estimated business of \$200,000,000.

Uncle Sam Is Set to Turn on the Juice
At Grand Coulee, Man's Biggest WorkBY PETER EDSON
NEA Service Staff Writer

KICK Moseley in the seat of the pants. Shove Shame out the window. And open the doors to Bragadocio. For the biggest thing on earth is about to get going this month—and it isn't a war. Take all the people in the United States and put them in a pile. It's bigger than that.

Take the Shoope pyramid in Egypt, then take Boulder dam, and then take another Boulder dam. It's bigger than all three put together.

Take the cost of the Panama canal, and twenty-five million dollars to its value.

Take a row of Rockefeller centers three-quarters of a mile long and pour two Niagara falls one on top of the other over the middle. It will be bigger than that. With that fanfare, it is now safe to give you the name—Grand Coulee dam.

It's up in northeast Washington state. On March 22, the first two generating units of the power plant will turn electric current into the Bonneville transmission line, and juice will start flowing to Spokane, 90 miles away, to the shipyards in Tacoma, where defense vessels are being built, to the Boeing plant in Seattle 280 miles away, where aircraft are being built.

Turning on of this current takes place more than a year ahead of schedule, but this is only a start, a mere 20,000 kilowatts, 25,000 horsepower.

When the whole project is completed, there will be available a thousand times that—2,700,000 horsepower, nearly one-tenth of the total electric energy developed in the United States today.

Behind the big dam—12,000,000 barrels of cement, 12,000,000 cubic yards of concrete making a mass 500 feet wide and at least 350 feet high and 4300 feet, or three-quarters of a mile long, or three-quarters of a mile long, a giant artificial lake in the world, 130 miles long, stretching clear to the Canadian border. Drowning you in statistics, this is enough to give every person in the United States 25,000 gallons of water, enough to shake the thirst, wash the clothes and dirty dishes, and bathe greater New York for ten years.

Ahead of Schedule

All this, too, is just a starter. When the job is done, a part of the power will be used to pump a part of the water, by means of the world's twelve largest pumps, to a man-made reservoir nearly 300 feet higher than the big dam, and two miles away. There, behind two little dams no bigger than ten-story buildings, water will be impounded in a reservoir 27 miles long and covering 47 square miles, to be carried by a system of canals 250 miles long to irrigate a fertile but now semi-arid area the size of Delaware, 1,200,000 acres. This won't be completed for a generation, 25 or 50 years, but it is definitely a part of this biggest program for the

PROJECT WILL POWER CITIES HUNDREDS OF MILES AWAY

Suggests things of its kind.

Building this dam in less than eight years is in itself a marvel. Putting even a part of it in operation a year and more ahead of schedule is a record.

Surveys began in 1933. In December the contract was let for clearing 2,000,000 yards of loose dirt from the dam site, getting down to bedrock. A 32-mile railroad, from the Great Northern's main line, two bridges across the river below the dam, two cities to house the workers had to be built.

In July, 1934, a combine of four construction firms, the contract for building the dam was let. Contracts for completion of the dam and power house were let in 1935 to Consolidated Builders, Inc., made up of MWAK, plus the famous Six Companies that built

Boulder dam, plus General Construction company of Seattle. It was too big a job for any one company to tackle.

Engineering problems, however, and underground brought new and amazing solutions.

To remove the most-burdened and clear the bedrock foundation, a best concrete five feet wide and over a mile long was installed, dumping the rubble into nearby canyon.

A Triumph of Man's
Building Ability

Building and gravel would have cost millions, so natural deposits were uncovered nearby and the world's largest gravel pit put in operation. The two world's largest cement mixing plants went to work and in May of 1935 they turned out 29 tons of mixed con-

crete every minute, to set world's record.

When slides threatened to interfere, six miles of pipe were buried in the clay bank, a refrigeration plant set up, and an ice dam 20 feet thick, 45 feet deep and 110 feet long was literally frozen solid from August, 1936, to April, 1937, and so kept in check.

Settling concrete heads and expands, then cools and contracts. To keep even temperatures, 2,000 miles of thin-walled inch pipe are set in the dam and water circulated through the vast cooling system.

In the center 1,650-foot section of the dam, to control the flow of extra water, are 11 movable steel drum gates, each 28 feet high, 135 feet long. To keep them from freezing in cold weather, nine miles of electric heating cable are installed.

A 30-foot highway will surmount the finished dam.

A 12-foot tunnel runs through the heart of the dam, connecting the two powerhouse at each end, each powerhouse over 700 feet long, each to hold nine units gen-

erating 150,000 horsepower. And so on. Consider problems and the things like them was the job who built this huge earth, and the completion is there.
