Tahoka Schools To Stay With Clock

The Tahoka Schools will stay with the clock as Daylight Saving Time becomes effective this weekend. This announcement was made by Superintendent Harold Reynolds today as he explained that complications of going against the clock out-weighted those of early starting time. The Tahoka Schools will continue to begin classes at 8:30 a.m. and dismiss at 3:52 p.m. Grades K-3 will continue to dismiss at 3:00 p.m.

The Superintendent acknowledged the early boarding of buses by some pupils as a definite hardship, but he cited the matter of high school students involved with work stations at various businesses being unable to schedule their time to coincide with that

of the businesses if classes were delayed by a later starting time. Students involved in on-the-job-training at various businesses use these experiences for credit in those courses where part-time work is a part of the course of study, such as Distributive Education, Cooperative Homemaking and Vocational Ag. Cooperative programs. Some high school students are involved in a contract program for the study of hair design at Lubbock, and these students must also meet schedules.

Also cited as a matter of concern should the daily schedule be delayed was that of working parents bringing their children to school as they go to their jobs in the morning.

Wilson School Resumes Today

The Wilson Independent School District would like to remind all parents and students concerning the following informational items.

School will resume after the holidays on Thursday, January 3rd at 8:30 a.m. The usual school hours will be observed on Thursday, January 3rd, and Friday, January 4th. A decision will be made prior to January 7th concerning the hours that the school system will observe after daylight saving time is in effect. Students will be notified on Friday before the weekend of the time change concerning this decision.

Bus routes will be reversed from what they are at the present time on January 3rd, the first school day after the holidays. This means the students being picked up last now will be picked up first on the morning of January 3rd.

Lunchroom prices have been raised 5 cents per meal on all cafeteria lunches. This price increase will become effective on January 3rd, beginning with the second semester. Prices of all school lunches will be as follows: Kindergarten thru 345 cents, Grades 4 thru 1250 cents.

CHEMICAL WEED CONTROL MEETING TO BE HELD FRI.

Mr. Jim Valentine and Dr. Robert B. Metzger, area specialist with the Texas Agricultural Extension Service, will provide the program.

Southwestern To Install New Facilities

More than \$266,000,000 will be invested in new equipment and improvements during the next five years by Southwestern Public Service Company, Roy Tolk, chairman and president of the electric company, announced today.

New generating facilities to be installed during the 5-year period will increase the capability of the system by almost 1-million kilowatts, bringing the total capability to approximately 3-million kilowatts.

One of the new generating stations included in this 5-year program is the addition to the Nichols Plant, northeast of Amarillo. Construction has just recently started and completion is scheduled for June of 1976. It will have a capability of 350,000 kilowatts and will use coal as its primary fuel. Long-term contracts with the Atlantic Richfield Company have been negotiated for low-sulphur coal from Wyoming, thus assuring an entirely adequate supply of this fuel.

Scheduled for completion in

mid-1974 is a 256,000 kilowatt unit at Jones Station near Lubbock. This will bring the total capability of this plant to 512,000 kilowatts and it will become the largest of Southwestern's 10 interconnected generating stations.

"In the latter part of the 5-year period, projections call for another coal-fired generating unit to be built, probably in the north part of the company's service area. It will be in the 350-450 thousand kilowatt range, depending on the load requirements at that time," Tolk said.

"In order to assure a clean environment when using coal as the primary fuel, it is necessary to spend an additional 30-percent of the cost of the unit for equipment to prevent objectionable products of combustion from reaching the atmosphere. The installation of both electrostatic precipitators and stack gas scrubbers will insure that we equal or exceed applicable stack

"TWO

BITS

WORTH"

BY JOHNNY VALENTINE

Here is an article brought to the office by Leland White.

THIS IS A FARMER

Farmers are found in fields plowing up, seeding down, returning from planting to, fertilizing with, spraying for and harvesting it. Wives help them, little boys follow them, the Agriculture Department confuses them, city relatives visit them, salesmen detain them, meals wait for them, weather can delay them, but it takes Heaven to stop them.

When your car stalls along the way, a farmer is a considerate, courteous inexpensive road service. When a farmer's wife suggests he buy a new suit, he can quote from memory every expense involved in operating the farm last year, plus the added expense he is certain will crop up this year. Or else he assumes the role of the indignant shopper, impressing upon everyone within ear shot the pounds of pork he must produce in order to pay for a suit at today's prices.

A farmer is a paradox--he is an "overalled" executive with his home or tractor cab, his office; a scientist using fertilizer attachments; a purchasing agent in an old straw hat; a personnel director with grease under his fingernails; a dietitian with a passion for alfalfa, animals and antibiotics; a production expert

faced with a surplus; and a manager battling a price-cost squeeze. He manages more capital than most of the businessmen in town.

He likes sunshine, good food,

state fairs, dinner at NOON, auctions, his neighbors, soaking rain in August.

He is not much for droughts, ditches, throughways, experts, weeds, the eight-hour day, helping with the housework, or grasshoppers.

Nobody else is so far from the telephone or so close to God. Nobody else gets so much satisfaction out of modern plumbing, favorable weather and good ice cream.

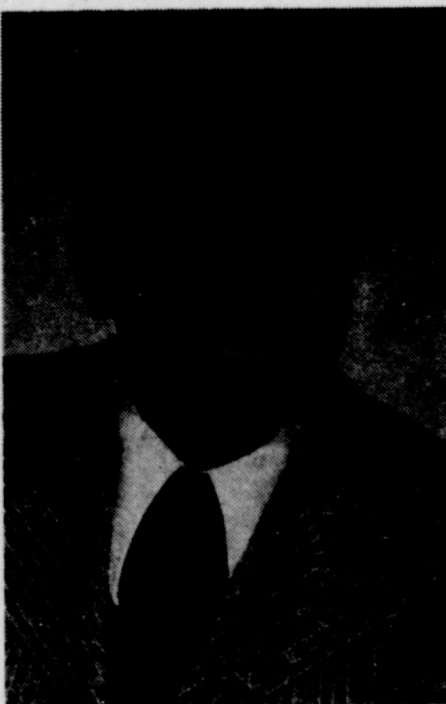

Nobody else can remove all those things from his pockets and on washday still have overlooked: five 'steeple's, one cotter key, a rusty spike, three grains of corn, the stub end of a lead pencil, a square tape, a \$4.98 pocket watch, and a cupful of chaff in each trouser cuff.

A farmer is both Faith and Fatalist--he must have faith to continually meet the challenges of his capacities amid an ever-present possibility that an act of God (a late spring, an early frost, tornado, flood, drought) can bring his business to a standstill. You can REDUCE HIS ACREAGE, but you can't RESTRAIN HIS AMBITION.

Might as well put up with him--he is your friend, your competitor, your customer, your source of food and fiber, and self-reliant young citizens to help replenish your cities.

He is your countryman--a denim-dressed, business-wise, fast growing statesman of stature.

And when he comes in at noon having spent the energy of his hopes and dreams, he can be recharged anew with the magic words: "The Market's Up."

C. W. ROBERTS

C. W. Roberts Asks Re-Election

I wish to make my announcement for re-election to the office of County Clerk of Lynn County, Texas.

In doing so I want to thank you very much for the privilege of serving in this capacity, and assure you that your continued support would be greatly appreciated.

If elected, I will endeavor to perform the duties of this office to the best of my ability.

Again I say thanks

gas emission standards," Tolk said.

"Southwestern's peak load for 1973 was 1,758,000 kilowatts and that is expected to climb to 2,392,000 kilowatts by 1978. The addition of these new generating facilities will more than take care of that increase," Tolk added.

Conservation of the area's water supply will continue to be a prime consideration at Southwestern Public Service Company's electric generating stations. When the two units now

under construction are completed, they will save, on the average day, 14,000,000 gallons of potable water through the use of sewage effluent. That's the equivalent of the daily water needs of a city of 100,000 people.

Another important construction project that is a part of the 5-year program and currently under way, is a 230,000 volt transmission line from the Tuco interchange, north of Abernathy, to Nichols Station, northeast of Amarillo. This new line will provide a second 230,000 volt line for the interconnected transmission system and make the

Lynn County News

movement of power between

major generating stations and the areas of greatest use more efficient, reliable and economical. This project is also scheduled for completion in mid-1974.

Looking toward the future, Southwestern Public Service Company is continuing its efforts to help make the generation of electricity by nuclear fusion a reality through its membership in the Texas Atomic Energy Research Foundation. Also, the company is actively engaged in an experimental project with

the Occidental Petroleum Corporation to produce oil from shale by in situ combustion. The test project 30 miles west of Rifle, Colorado has succeeded in creating permeability in the formation and thus obtaining an oil flow.

"We at Southwestern Public Service Company have great confidence in the future of our country in spite of the problems we are facing at the present time. Our area is growing and the new industrial announcements made during 1973 are of great significance. We have always planned for the future in order to meet our customers needs. We are

still planning and we intend to see that our customers continue to have the kind of dependable electric service they have had in the past-even better," Tolk concluded.

The tree was brought to her room in Lynn County Hospital and most of the family were there to help her enjoy it. "Mam-Moo" as family and friends call her, was in Methodist Hospital for several days but was transferred back to the local hospital on Dec. 21. She has 3 more weeks to go before putting her foot to the floor and putting her weight

on it. She spends the time working on a quilt top she is piecing, if she doesn't have a visitor in her room.

White weeds will produce 100 million seed per acre in heavily infested areas. The seed will emerge from 1" to 4" in the soil with a 48 percent germination. Seedlings with the first two leaves were capable of regrowth indicating that vegetative buds form rapidly in white seedlings. Herbicidal or mechanical control of the white weed at a young age is essential or the plants will be perennial in nature and vegetative regrowth will occur after treatments have been applied.

The star weed or cotton weed was first reported in 1970 as a weed problem. We have several areas with this weed. The weed is similar in growth and appearance to cotton and was difficult to control with herbicides. In field investigations, cotton weed was not controlled by pre or postemergence herbicides. However, Propazine or Atrazine were highly effective in control of the cotton weed in grain sorghums. Prometryne has been effective as a pre-emergence treatment in cotton in New Mexico. Harvest 80 To 90 Percent Complete

The South Plains cotton harvest was 80 to 90 percent complete the week-end before Christmas, according to Paul R. Dickson, in charge of the U.S.D.A. Cotton Classing Office in Lubbock.

Samples from 1,827,000 bales had been classed at the Lubbock, Brownfield, Lamesa, and Levelland offices through Friday, December 21st, and the four offices had 27,000 unclassified samples on hand at that time. Estimates indicate that there were an additional 300,000 to 400,000 bales out of the fields.

Personnel at the four offices tested and classed samples from 329,000 bales during the week ending the 21st.

Quality of cotton continued excellent and this crop continues to be one of the highest quality crops ever produced on the South Plains.

Grades 31 and 41 continued the predominant grades at Lubbock, making up 71 percent of all classed. Grade 31 made up 26 percent, Grade 41, 45 percent and Grade 32, 16 percent.

Staples were predominantly 30 to 32. Seventy-seven percent had staple lengths of 31 and shorter and the remaining twenty-three percent stapled 32 and longer.

Micronaire readings continued excellent. Seventy-seven percent of all cotton tested at Lubbock had micronaire readings in the premium range of 3.5 to 4.9, 5 percent was in the high micronaire range of 5.0 to 5.2 and 1 percent was in the very high range of 5.3 and above.

The Agricultural Marketing Service of the U.S.D.A. reported cotton prices \$5.00 to \$7.50 per bale higher on the Lubbock market during the past week. This was the third consecutive week that prices were higher. Demand continued strongest for cotton with staple lengths of 31 and longer but was strong for cotton with staple lengths of 29 and 30. Prices ranged from 3300 points over the Government Loan for

short staple cotton up to 5000 points over the loan for long staple cotton. Typical lots were bringing an average of 39 cents per pound over the loan and were selling in the price range of 55 to 65 cents per pound.

Average prices paid for the most predominant qualities in the 3.5 to 4.9 premium micronaire range were: Grade 31, Staple 30-57.65 cents per pound, Grade 31, Staple 31-62.40, Grade 31, Staple 32-66.40, Grade 40, Staple 30-56.70, Grade 41, Staple 31-61.25 and Grade 41, Staple 32-64.95.

Cottonseed prices were steady and farmers received \$95 to \$110 per ton.

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

The 1973 cotton year on the High Plains, in retrospect, has to be seen as a "once in a lifetime" year.

Winter moisture which played havoc with the harvest of the 1972 crop (2,242,850 bales of 480 pounds net weight) left underground moisture content that proved a Godsend for the crop of 1973. Most dry land areas got timely rains for planting and some 90 percent or more of the entire crop was put in the ground during the optimum planting

period of May 5 to May 20. And it came up growing.

Then, in June and July, when it is almost an unwritten law that 150,000 acres or more of cotton will be lost to hail and sand on the Plains, good fortune continued. Less cotton was lost to the elements in these two months of 1973 than any year in a long time. Firm acreage figures won't be available for several more months, but of an estimated 2,750,000 acres planted, something over 2,700,000 acres re-

mained for harvest, it is thought.

August provided the only departure from a season-long success story. In August the crop needed more moisture than was forthcoming. And even that situation was relieved in time to prevent drastic damage, generally speaking, to yields.

Then came the Fall. It didn't freeze officially until November 28, making the 1974 growing season one of the longest on record, which provided one of the most mature, if not THE most mature crops ever produced on the Plains. Micronaire, a measurement of maturity, on the first 1,200,000 bales averaged 4.26 according to the first seasonal quality report of Plains Cotton Growers, Inc. It is now almost a certainty that the entire crop will average well above the record average micronaire of 3.7 established in 1964 and equaled again in 1969 and 1970. Grades, too, have been amazingly good, with over 78 percent classed as white cotton so far.

October, November and December (to date), could not have been much better for the harvest-dry, cool but not cold, and only a few days of high winds. Probably 80 or 85 percent of the 2,725,000 bales projected for PCG's 25 counties was off the stalk as of December 21. About 1,850,000 bales had gone through USDA Classing Offices at Lubbock, Brownfield, Levelland, and Lamesa, there's another 50,000 bale carryover at the four offices, maybe 100,000 bales "in the pipeline" between gins, compresses and classing offices, and a wild guess at the amount of

cotton in ricks waiting to be ginned over the Plains would be around 200,000 bales. In the unlikely event that all these guesses are correct, the total harvested by December 21 would come to 2.3 million bales.

What's it all going to be worth? A cool \$750 million or more at the farm level. That value estimates the average price at 40 cents a pound for lint and \$100 a ton for seed. A portion of the crop was contracted for sale prior to harvest, maybe as much as 70 percent at prices ranging from about 24 or 25 cents a pound all the way up to 70 cents and better. And there were contracts written at almost every price level in between. So the 40 cent average for the Plains may or may not be high enough. Either way, three quarters of a billion dollars for a single crop on the Plains is really something--at least \$300 million above the value of any previous year's crop.

How long since farmers had excellent underground moisture, an almost perfect planting and growing season, a late frost, near ideal harvesting weather, and then sold for excellent prices?

Never before, say the old timers.

But it makes for a very, very Merry Christmas.

Frank Lisemby Buried Dec. 20

Farm Fuel On Annual Basis

Farm fuel for 1973 will be based on annual rather than monthly allocations. This was decided by an agricultural advisory committee to the Federal Energy Office, Tuesday, Dec. 18, in a Washington meeting.

Farmers may receive up to 125 percent of the fuel they used in 1972, providing it is available, an FEO spokesman said.

A.W. (Dub) Anthony, Jr. of Friona, Texas, president of Grain Sorghum Producers Association, is a member of the agricultural advisory committee and attended the Washington meeting with Jack King of Lubbock, GSPA research director.

"We told the federal people that the monthly allocation system set up several months ago simply will not work in agriculture," Anthony said on his return to Lubbock.

"The FEO people assured us they will set up a new system for the distribution of agricultural fuel based on 1972 consumption," Anthony said.

The GSPA president explained that farmers may receive up to 125 percent of their 1972 fuel "if it's available, and that's the big question," but Washington officials are predicting a fuel shortage of 17 to 25 percent.

Farmers will have draw ahead privileges under the new system to take care of seasonal changes in fuel requirements," Anthony continued.

Diesel fuel is critical for most American farmers, Anthony pointed out, since about 70 percent of the country's farm tractors are diesel powered.

Nursing Home News

Corine Izard speaking, I left Lubbock airport December 18 for San Antonio, Texas to visit with Charles, (Bug), Barbara, Johnnie and Ruth Pennington. I really enjoyed myself-seeing many friends I knew when I lived in San Antonio. The weather was not very pleasant as it was hot then cold. They told me it rained, but I was lazy sleeping late. Johnnie was on a 10 day leave from Norfolk, Va. where his ship is in. Helen and husband, John Fleschman, called from Tampa, Florida. It was Helen's first Christmas away from her parents. I think she was a wee bit homesick.

As I was waiting for the plane in Lubbock I met up with Mrs. Gladys Cobb, who was on her way to visit her daughter, Nancy and family who are stationed at Randolph Air Force Base. I left San Antonio at 8:00 a.m. and was met in Lubbock by Garland Pennington. I was glad to get back here at Colonial as it's home sweet home.

Mrs. Price reported the Christmas party for the staff was a huge success. Also the party for all of us patients was a big success. All of the patients received many gifts. There were several relatives present at the party. On Christmas Day there was turkey and all the trimmings which was sure enjoyed by all.

The Methodist Church brought our services which were sure enjoyed by all.

Virginia Dann spent 4 days at Big Spring. Several other patients were out visiting. Some ate with their families for Christmas Day.

Lee McFadden spent a night and one day at Lynn County Hospital. He is back home now and doing well.

Granny Alice Reed, age 97, enjoyed cake and punch on her birthday. Virgie Pebsworth and both J.A. Pebsworth and son were here with their grandmother. Mrs. Othell Freeman was also a guest. Again visitors were many.

Mr. Nored is here in the home with us now. His wife, Mrs. Nored moved in before the holidays, so now the home is full with no vacancies.

The 5th Sunday services were given by the Assembly of God Church and Bro. Tyler. We were honored by specials from Nelma Lynn and Denise Gandy of Tahoka. Also Vera, Cindy and Janis Adamson and Mrs. W. Lew of Lubbock. Mrs. Hammonds read scripture from Matthew 25 where we should accept God's help as he is always close by.

Singing was good as usual. We always enjoy Monday afternoons.

It's the last day of 1973 and we should try to be happy and thankful for our wonderful Colonial Nursing Home in Tahoka.

We would like to list gifts to our home during the holidays. We would also like to tell each and every person who thought of us how grateful we are to you for making our holidays so happy and meaningful. You can never imagine how grateful we are to find that people still think of all of us and remember to do things for us that make us so happy and make us feel we are still a part of the community even though we aren't able to be out much and participate in things. We love you all so much.

If we have missed someone, please accept our most humble apology. We all tried very hard to keep a list of everything brought in, but it is possible we did miss a few.

M.F. Jones brought cabbage,

As we say, we feel like there were probably some gifts or items we missed getting the names of the persons responsible, but please give us a call and we will be more than happy to make a note of it because we do so want to print everyone's names who have been so thoughtful.

See you next year.

This has been a good year for Tahoka, and the Chamber wishes to express its gratitude to all those who have helped.

Governor Briscoe Awards Grants

Governor Dolph Briscoe today awarded two grants totaling \$126,760 for improving law enforcement and justice in the area served by the South Plains Association of Governments at Lubbock.

The money will come from the Governor's Office, Criminal Justice Division. CJD administers the state's block grant from the Law Enforcement Assistance Administration under the Crime

Control Act of 1973.

Largest of the grants, \$103,565, goes to Lubbock County for organization and implementation of the newly established office of the Criminal District Attorney for the county.

With a staff of 13 attorneys, three investigators and eight secretaries, the criminal district attorney's office takes the place of the offices of the district attorney for the 72nd Judicial District and the county attorney of Lubbock County. The change was brought about by an act of the 63rd Legislature.

A CJD grant of \$26,195 goes to the South Plains Association of Governments for continuation of the regional law enforcement training project.

Two sessions of a 240-hour basic training school will be offered to 40 area peace officers. Advanced training will also be offered to approximately 20 police officers.

The courses which are approved by the Texas Commission on Law Enforcement Officer Standards & Education, are offered to peace officers in all SPAG law enforcement agencies on a tuition-free basis.

The SPAG grant applications were among 52, for a total of \$3,766,578, considered by the CJD Executive Committee at its December 14 meeting.
