REDS RELEASE AMERICAN

MAINLY ABOUT PEOPLE

By H. N. F.

Fort Worth has thrown another local sensation on the screen. Fort Worth is noted for its political sensations. Like the poor, they are always with the people of that city. Now petitions are being circulated asking for the recall of Mayor E. R. Cockrell and three of the four commissioners. Finance Commissioner J. B. Townsend, it appears, is like Caesar's wife—above suspicion. Mayor Cockrell at the spring election, and the Hon. W. D. (Bill) Davis by a majority of thirty-six hundred. Cockrell, before his election as a college professor, a teacher of law as well as a practicioner, a writer and a lecturer on the science of government and a champion of municipal government as it is conducted by the highly civilized and thoughly progressive communities of Europe. He didn't know anything about the game of politics and he knew less about the tricks employed by political traffickers. He did know how to talk, how to plan, how to think and how to diffuse the information he had gleaned from books, from travel, and from observation. "Mayor Bill" Davis has been invincible for years. He had some good things to his credit and a winning personality. He was the head as well as the pride of the political machine that had ruled Fort Worth for years. Men destroy themselves. It is decided that he would abolish the Carnegie Library because he did not like its lady librarian, Mrs. Charles Schueber She had been the head of all the welfare and uplift and educational work in Fort Worth for thirty-five years. Davis shut off the funds for the support of the Carnegie Library and established one of his own. He placed Col. Louis J. Wortham at the head of it. Well, Mrs. Schueber's friends rallied and the women of Fort Worth went on the war path. They were twenty-five hundred strong with pool results in their hands. They scalped Big Chief Bill; they threw his municipal library association, with its ashes, into the Trinity river; they turned out the police department; they re-enthroned Mrs. Schueber; the city commission restored the appropriation for the support of the Carnegie Library and E. R. Cockrell succeeded where "Big Bill" had ruled so long. This was the third and last knockout for the Fort Worth political machine. Early in the summer of 1920 the machine was licked to a frazzel by the Fort Worth Record and the followers of Woodrow Wilson triumphed in the democratic primaries. In the gubernatorial primaries the machine was again licked almost beyond recognition; when the spring campaign of 1921 came, the machine rallied its forces for a last ditch fight and W. H. Bagley of the Fort Worth Record threw that paper on one side of the women and Cockrell and what happened to the machine and the Big Chief will not be forgotten in a day or a year by the politicians of the state or local political campaigns. Mayor Cockrell was warned when he made his appointments not to make weak ones. He did not heed the advisors who had counted him on to victory. He named Edna Ridgeway as city attorney, a most important position. He failed to appoint P. J. Conway, the best city superintendent in Texas and one of the most constructive men in that field of endeavor. What happened is history. Mayor Cockrell and three of the commissioners a few days ago ousted Ridgeway from his office and gave incompetency as the ground for his dismissal. Ridgeway has elements of political strength. He is close to the Rev. Frank Norris, and the friends of the enemies of Frank Norris look upon him as a most important and influential personage to be dealt with whenever it comes to politics or any other game in the city of Fort Worth. Ridgeway and his lieutenants launched the recall campaign, urged on no doubt, by the former chief spokesman in the big council of the machine that was toppled in three successive fights by the former publisher of a newspaper who sailed overseas the other day accompanied by his wife to spend the summer months in the Swiss Alps and to regain his health in the most ancient, the smallest, the most patriotic as well as the most democratic of all the nations of Europe. Mayor Cockrell is an honest man, as clean as a hound's tooth, wedded to his convictions of what is right and that which is wrong. He may have had something put over him but he is incapable of crookedness of any sort and it is safe to predict that the recallers will have their trouble for their pains. He is Missouri born, Montana bred, an idealist, has a wife who is as keen as a brier and his chief ambition is to make his city grow faster than ever, to make it a beautiful place to live and to clean out the pullbacks and the mossbacks as well as the idlers and loafers who are the parasites of any city and have long made Fort Worth a favored rendesvous. Regardless of all this, "Big Bill" Davis destroyed himself politically. He challenged a woman to political combat and that woman, the pioneer in all the good works in that city for which the women of America have distinguished themselves, and the woman of Fort Worth whipped the professional politicians, whipped their powerful newspaper advocate, whipped men whose reputation is statewide and made a complete cleanup of their city. Mayor Cockrell should be careful. He should feel his way. He has enemies within and without his child. There are men who were thrown in the ditch of defeat in the city of Fort Worth, who never learn

SOLONS URGE RECOGNITION OF MEXICO

State Legislature Adopts Resolution Memorializing President Harding to Act.

Measure Introduced by Pool of El Paso Congratulates Obregon and People of Southern Republic.

By Associated Press.

AUSTIN, Texas, July 30.—A house concurrent resolution stipulating that it is the sense of the Texas legislature that the interests of the United States and of Texas will be better served by official recognition by the United States of the Republic of Mexico, was adopted in the house late today.

The resolution was introduced by Representative Pool of El Paso and others. It provides that the house and senate declare itself pleased with the election of President Alvaro Obregon and congratulates the people of Mexico upon the "new era of peace, prosperity and amicable relationship." The resolution also expresses friendship of Texas for Mexico and commendation and confidence in President Obregon. Copies of the resolution were ordered sent to President Harding, President Obregon, president of the United States senate, speaker of the house of representatives and to each Texas congressman.

Although the university budget was completed yesterday debate on it sprang up again in the house today when Representative Bonham, leader of the majority that amended the budget to cut the salaries, moved that the appropriations committee be instructed to prepare an itemized budget of the university branches that have been omitted in the bill.

Refers to Summer School.

He referred to the summer school, the university extension bureau and the bureau of technology. These branches had heretofore been operated

ELIASVILLE TRAINS BEGIN RUNNING AUG. 1

Eliasville will have its first train service beginning Tuesday of this week, when the full schedule of the Wichita Falls and Southern will be in effect to that point. Heretofore Eliasville's nearest railroad point has been at Graham.

A slight detour and the insertion of 4500 additional feet of trackage was necessary on the part of the railroad construction to reach the townsite of Eliasville, the cost of which was paid in part by residents of that place.

SIX KILLED IN TRAMWAY WRECK

By Associated Press.

GRAND JUNCTION, Col., July 30.—Six men were killed and six others injured, three seriously, when a tramway car cable slipped out of the swivel late today at the Schuyler Doyle Shale company's plant and plunged to the floor of the gulch two thousand feet below.

QUESTION OF YANK VALUATION UNDECIDED

By Associated Press.

WASHINGTON, July 30.—The questions of whether the American valuation provision shall be retained in the Fordney tariff bill, and whether the dye embargo section shall be restored in the measure, will be decided by the senate finance committee before hearings are held on the proposed duties. Two days more, Monday and Tuesday, will be given over to discussions of the domestic valuation plan and the dye embargo question will be considered Wednesday after which the committee will meet separately to thresh out its program.

KELLOGG BILL SUFFICIENT FOR COWMEN'S NEEDS

Needs of cattlemen will be fully met by the adoption of the bill recently introduced by Senator Kellogg as an administration measure, and as a substitute for the Norris bill, according to Frank Kell, who has been intensely interested in the efforts of the cattlemen to secure relief from the situation which threatens to wreck their herds.

"The bill amends the war finance corporation law in such a way that loans may be made for agricultural purposes, including the breeding, raising and fattening of livestock, which is exactly what the cattlemen are after, and what they need," said Mr. Kell. Cattlemen should give their full support to the measure, he declared.

SOVIET RUSSIA AGREES TO FREE AMERICANS IF U.S. RESUMES RELATIONS

By Associated Press.

RIGA, July 30.—Soviet Russia has agreed to release American prisoners and to accept famine aid from the American relief association just at the moment that United States Senator Joseph I. France of Maryland, has returned to Riga from Moscow determined to advocate renewal of trade relations and perhaps diplomatic relations between Russia and the United States and bringing with him one of the prisoners, Mrs. Marguerite E. Harrison of Baltimore, who was freed by his efforts at Moscow.

Senator France, who entered Russia several weeks ago skeptical of the advantage of immediate diplomatic relations with the soviet but believing that trade relations were advisable, has returned an ardent enthusiast for both.

While American officials in the Baltic are speculating as to what effect the release of the prisoners and the entrance of the American relief association into Russia will have in clearing up the Russian situation, Senator France declared that the Lenine government was starting a new line of development in Russia which "cannot backslide into radical communism again."

"Propaganda Harmless"

In reply to a question as to whether the Moscow bolsheviki were trying to revolutionize the world including the United States, Senator France said "I know nothing about the third internationale; but no man worthy of any attention ever believed that propaganda could start revolutions.

"Conditions are not propaganda, history shows."

The senator talked with both Lenine and Trotzky and was impressed by them.

"I found that the Russian government is handling the situation in a statesman-like way" he said. "Lenine is much interested in American relations. The Russian factories have not all ceased operating; many are working well. They are short of railway material but that is not their fault. Peasants are working the lands and farms are prosperous when not in the famine and drought belt."

Will Export Furs

The senator mentioned furs as one of the possible products of trade with the United States and asserted that there would be plenty of exports when the factories were equipped and agricultural needs were supplied from abroad. He thought a commission of American experts would be welcomed but contended that Russia should have the right to send one to America also.

"I am convinced that Russia will carry out any guarantee or concessions made in return for credit," the senator declared.

Describing his visit, he said he was free to move about and see what he liked and officials frankly admitted bad conditions where they existed. The senator procured Mrs. Harrison's release from prison independent of the Hoover and Hughes notes of which he knew little. Mrs. Harrison was freed from the prison hospital only a few hours before the train left Thursday and was surprised to find herself at liberty.

May Be Friendly Contact

"I cannot comment on reports that terms of the American relief administration have been accepted except to say that any friendly contact whatever that can be effected between Russia and America will be of immeasurable benefit to both countries," Senator France said.

"America has been denied uncolored information about Russia, for most people in a position to give firsthand information are prejudiced witnesses either on one side or the other. I tried to be impartial for my sole interests is in America and without reservation I can say I believe friendly relations should be established for the sake of America, particularly to sell American goods which are rotting and to start fires in furnaces of American factories which are idle."

MISSING BANKER IN CHICAGO!

Police Receive Tip From Taxi Driver That Spurgin There.

By Associated Press.

CHICAGO, July 30.—The countrywide search for Warren C. Spurgin, fugitive president of the Michigan Avenue Trust company, which was closed recently following discovery of a shortage estimated at $1,000,000 was directed toward Detroit today following receipt of reports by the police that the missing banker had been seen there by a taxicab chauffeur.

The chauffeur, according to the police, said that on last Wednesday morning he had picked up a man answering the description of Spurgin and had driven him to a Highland Park address. The name of the driver was withheld.

It had previously been reported that Spurgin was in the vicinity of Mobile, Alabama, on a yacht in the Gulf of Mexico and trying to escape across the Mexican border.

TEXAS COTTON MEN GOING TO MEETING

DALLAS, July 30.—Trustees of the American Cotton Growers' association will leave here Sunday night for Memphis to attend a meeting of representatives of the association on August 2.

John T. Orr, president; W. D. Farris of Ennis, vice president, and Jesse Montgomery of Mount Pleasant, director, are the trustees who will attend from here.

COMMITTEES WORK ON CREDITS BILL

By Associated Press.

WASHINGTON, July 30.—While the senate was in recess today amendments to perfect the pending agricultural credits bill were worked out at conferences of republican and democratic leaders.

The principal change in the committee substitute for the Norris bill said to have been agreed upon today was for elimination of the provision authorizing loans to foreign governments or any sub-divisions thereof.

WHEAT CLEARANCES SURPASS RECORDS

By Associated Press.

GALVESTON, July 30.—What is believed to be a record for all ports, to local custom officials, ended this afternoon with clearances of $4,402,000 bushels of wheat for the past week for European ports. Of this tremendous quantity of wheat Great Britain took 1,286,000; Italy 1,011,000, Holland 865,000; Germany 856,000 and Belgium 346,000.

FIRES CONTINUE IN CANADIAN WILDS

By Associated Press.

SYDNEY, New South Wales, July 30.—Forest fires today continued to rage in northern Cape Breton, threatening the village of Ingonish with its 1,000 population and other fishing communities. Without rain there appears no prospect of checking the blaze.

Already flames have swept an area more than twenty miles long and five miles wide, destroying telegraph poles, bridges and culverts. Most of the timber burned thus far has been in crown lands.

The Weather

Oklahoma: Sunday and Monday partly cloudy, probably scattered showers.

West Texas: Sunday and Monday partly cloudy; unsettled in the Panhandle.

GERMANS SEE FORMAL PEACE WITH AMERICA

Foreign Office Expresses Belief That Negotiations Presage Early Resumption of Relations.

Wirth Cabinet Assents to Proposals Outlined in Knox-Porter Resolution Ending War.

By Associated Press.

BERLIN, July 30.—The German foreign office expressed belief that the negotiations which have been proceeding for the last three weeks between Ellis Loring Dresel, the American commissioner in Berlin, and Dr. Rosen, the foreign minister, have progressed sufficiently to warrant the belief that a general working basis elusion of a formal peace treaty between Germany and the United States at an early date.

It is understood that the German government has assented to a proposition submitted by the American state department through Mr. Dresel, in the way of informal inquiry based on the essential principles enunciated in the Porter-Knox peace resolution. None of these, it is said, had been opposed by the Wirth cabinet, which is declared to be wholly in accord with the American attitude on the prerogatives and privileges and various rights under the treaty of Versailles to which the United States is entitled by virtue of America's participation in the war.

The informal pour parlors here have not touched upon the economic features of the proposed treaty, but have dealt with the cardinal points upon which the United States places emphasis in connection with its interpretation of the Versailles treaty. The conclusions reached as a result of Mr. Dresel's negotiations are being formulated in the manner desired by the Washington authorities and an official memorandum, it is forecast, probably will be ready for publication within a few days. Upon this memorandum, it is understood, the formal treaty will be based.

The question as to who shall be the German envoy to Washington meanwhile remains in abeyance, as the German government prefers to await America's initiative.

The proposition is being made that an economic commission in charge of a professional diplomatist be dispatched to Washington for a beginning, as it is recognized that the resumption of relations will involve the settlement of numerous post-war economic issues.

ENGLISH AGREE TO FRENCH PROPOSALS IN UPPER SILESIA

By Associated Press.

PARIS, July 30.—Lord Hardinge, the British ambassador, informed Premier Briand this evening that Great Britain willingly agrees to proposals contained in the French premier's latest note relative to troop reinforcements for Upper Silesia. The British ambassador at Berlin has been instructed to join his French and Italian colleagues in a common demand that the German government facilitate by all possible means the transport of allied troops across Germany whenever the situation in Upper Silesia renders it necessary.

Marquis Curson, the British foreign secretary, in the note which Lord Hardinge handed M. Briand, proposes August 8 as the date for the meeting of the supreme council, as the Italian premier is unable to attend sooner. Premier Lloyd George will attend if the French desire his presence.

The British reply is extremely cordial. Lord Hardinge expressed satisfaction over dissipation of the recent misunderstandings.

AMERICAN CITIZENS NEED NO PASSPORTS

By Associated Press.

WASHINGTON, July 30.—Under an executive order promulgated today citizens of Mexico desiring to enter the United States through Mexican border ports may do so without presenting to control officers at border ports any travel document whatsoever, provided that such persons have been residents of the forty mile border zone for a period of one year or more, are otherwise admissable and are known or can present proof of identity to immigration officials.

OVERCOME WITH JOY WOMAN DROPS DEAD.

By Associated Press.

PALESTINE, Texas, July 30.—Overjoyed at meeting her daughter in Chicago, whom she had gone to visit, Mrs. M. Winner, widow of the late M. Winner, former prominent Palestine business man, dropped dead in a railroad station at Chicago last night, according to telegrams to relatives here.

FIND $70,000 WORTH OF DIAMONDS SEWN INTO COAT LINING

By Associated Press.

CHICAGO, July 30.—Ripping open a small bag found sewn in a coat lining federal investigators today said they found smuggled unset diamonds and jewelry valued at $70,000. The coat, they said, belonged to Hyman Finerman, a Los Angeles jeweler, who was arrested yesterday charged with smuggling. Included in the find were three diamonds said to weigh ten carats each.

Finerman was held under bond of $2,000, but it was said that in view of today's discovery, an effort would be made to have this bail increased.

DESCENDANT OF BOONE CLAIMED BY DEATH

ELLENSBURG, Washington, July 30.—John B. Jones, said to be a grandson of Daniel Boone, died at home here yesterday. Mr. Jones was bor nin Kentucky in 1843. He had lived in Ellenburg 43 years, coming here from California.

RAILROAD FUNDING BILL UP NEXT WEEK

WASHINGTON, July 30.—Consideration of the administration railroad debit funding bill is to begin next week by senate and house interstate commerce committees. Republican leaders hope that it may be passed by the house ahead of the tax revision bill.

MINNEAPOLIS SEWER GAS BLOWS UP WITH FIRES FOLLOWING

By The Asoociated Press.

MINNEAPOLIS, Minn., July 31.—Twenty-eight persons were hurt, several seriously, and much damage done by a series of explosions in sewers and cable manholes at Sixth street and Nicolett avenue, and Fifth and Nicolett, late last night and early today.

At 1 a. m. today Donaldson's Department store at Sixth and Nicolett, one of the largest department stores in town, caught fire.

Five explosions had rocked the downtown section up to midnight. They occurred at various intervals. A cigar store was badly damaged by the third blast.

The fire is believed to have started from a short circuit in an electric power cable. The first explosion occurred shortly after 10:30 p. m. at Sixth street and Nicolett avenue, in the heart of the loop district.

Many persons were knocked down by the explosions. Others were hit by flying glass.

Fear was expressed by firemen and police that the fire would spread through the entire sewer system of the city. Fire Chief C. W. Ringer said the fire department was powerless to stop the flames.

LITTLE CHANCE FOR ARTICLE 27 CONSIDERATION

"Pernicious" Measure Not Likely to Be Repealed or Amended by Special Mexican Congress.

By Associated Press.

MEXICO CITY, July 30.—There is but a slight hope that article 27 of the Mexican constitution providing for nationalization of oil and other natural resources will receive consideration during the present session of congress, according to statements made by leaders in the chamber of deputies to newspapermen last night. They added, however, that they believed the questions would be taken up when the regular session opens next September.

Indications that the liberal constitutional party known as President Obregon's party, still retains its majority in the chamber of deputies, were seen last night as a result of the roll call for the election of monthly officers.

A split was reported between Obregon and his party but political circles now understand that a reconciliation has been effected and that within the next few days, a resolution of "confidence" in the president will be proposed and properly adopted by the entire party.

Should this resolution be adopted, it would not necessarily mean, however, that President Obregon's request for extraordinary powers to adjust article 27 would be granted, in the opinion of political circles.

RAILROADS REQUIRED TO BE ECONOMICAL

By Associated Press.

MEXICO CITY, July 30.—A deficit of a million pesos, monthly, coupled with the necessity of rehabilitating the generally deteoriating rolling stock and road beds, demands the utmost economy on the national railways, President Obregon told newspaper correspondents last night.

For that reason, he declared, the government was standing firm and would make effective its 20 per cent reduction for all railway employes drawing more than 100 pesos monthly, notwithstanding their strike threats. He also reiterated that there was no intention of rescinding the recent decree increasing the export taxes on petroleum.

The president's declaration relative to the railroad indicate that next Monday may see a general tieup on all federally operated roads.

President Obregon told the correspondents the international situation was unchanged.

COMMITTEE DENOUNCES KANSAS KU KLUX KLAN

By Associated Press.

KANSAS CITY, July 30.—Resolutions characterizing Ku Klux organizations as "undemocratic, vicious and harmful to society," and urging governor Arthur M. Hyde to issue a proclamation calling upon the people of Missouri to refrain from becoming connected with such secret bodies were adopted at a meeting here today of the Interracial committee of Kansas City.

POLICE GUARD SHIP.

HAVANA, July 30.—Port police were placed aboard the shipping board steamer Mazama today upon the request of Captain W. B. Zechel, who declared he feared attempts to blow up the ship.

SELECT JURY FOR TRIAL OF H. J. TOUSSAINT

Twelfth Man in Box Chosen Few Moments Before Adjournment and After Fifty Examined.

A few minutes before time for adjournment and as the fiftieth talesman that had taken the witness chair during the day for examination as a prospective juror W. A. Soule, painter, of this city was accepted by state and defense attorney as the twelfth juror in the case of Henry J. Toussaint on trial in the Thirtieth District court for the murder of his father, T. O. Toussaint.

Although the jury as a body was not sworn in the selection of Mr. Soule's practically assures that the actual trial of the former officer and eastern college graduate will be gotten under way at 9 a. m. Monday with the state opening its evidence at that time.

The jury was not sworn in by Judge H. F. Weldon in order that it would be possible to fill any vacancy that might arise through sickness or other legal causes over the Sunday adjournment.

Has No Bill

As the personnel of the jury is now constituted the case will open

(Continued on page two)

FORDNEY SEEKS TO REDUCE TAX BILL

WASHINGTON, July 30.—Republicans of the house ways and means committee conferred today for a development of views on tax revisions. Many divergent opinions were developed but no decisions were reached.

Emphasizing that he was speaking solely for himself, Chairman Fordney said afterwards that the goal toward which he would strive would be a cut of a half billion dollars in the tax bill next year.

SPANISH IMMIGRATION TO U. S. DECREASING

By Associated Press.

MADRID, July 30.—The flow of Spanish immigration to the United States is decreasing, according to figures by the immigration council. The number of immigrants leaving for Argentina, however, is on the increase.

ELEVEN FORMER HUN SHIPS ORDERED SOLD

By Associated Press.

WASHINGTON, July 30.—Eleven former German cargo steamers and one cargo-passenger steamship were today ordered for sale on a lump sum basis by the shipping board. Bids will be opened August 15.

The vessels, all steel craft averaging around six thousand deadweight tons are the Callao, Arcadia, Casco, Wachuset, Cunica and Yucca at New York; the Artemis and Neuse at Baltimore; the Coosa and Pawnee at Philadelphia, the Isonomia and Armenia at Norfolk.

NEWSPAPER URGES WIRELESS EXTENSION

MADRID, July 30.—La Epoch urges the expansion of Spanish wireless service to South America by way of Teneriffe and Pernambuco. The newspaper asserts, the English and American owned cables between Spain and South American countries hinder Spanish commerce between Spain and the Latin-American countries.

NORTHCLIFFE AFFAIR STIRS BRITISH PRESS

Political Circles Talk Nothing Else Since Lloyd George Branded Story as Falsehood.

Some Newspapers Believe Publisher Due Some Consideration, but Denounces American Visit.

By Associated Press.

LONDON, July 30.—The sensational and unprecedent incident of a British soverign repudiating to parliament, through his prime minister, statements attributed to him in a newspaper interview, is given the greatest prominence in the entire British press this morning.

Political circles have been able to talk of little else since Prime Minister Lloyd-George appeared in the house of commons yesterday and read a statement, authorized by King George, in which the king declared that words attributed to him concerning the government Irish policy in a reported interview in the United States by Lord Northcliffe, owner of the London Times, were "a complete fabrication."

The alleged interview quoted King George as saying to Premier Lloyd-George, just before his majesty left England to open the Ulster parliament:

"Are you going to shoot all the people in Ireland?"

The premier is said to have replied: "No, Your Majesty."

"Well then you must come to some agreement with them," the king was quoted as saying. "This thing cannot go on. I cannot have my people killed in this manner."

Give it Much Space

(The foregoing conversation appeared in an interview published in New York City, July 28, attributed to H. Wickham Steed, editor of the London Times, who is traveling in America with Lord Northcliffe. It was given by Mr. Steed the day after his arrival from England, and subsequently appeared in English papers attributed to Lord Northcliffe. The latter yesterday sent a cablegram from Washington to Lord Samfordham, private secretary to King

(Continued on Page Two.)

GOVERNOR SMALL RETURNS TO HOME

KANAKEE, Ill., July 30.—Governor Len Small returned to his rome in Kankakee tonight after two days inspections of the roads of Cook, ane and Will counties. The governor will spend Sunday here and resume his road tour Monday. He does not expect to return to Springfield before Wednesday or Thursday.

CHICAGO, July 30.—Replying today to a statement issued last night by Governor Len Small in which he defended his conduct while state treasurer, Attorney General Brundage declared that "the sole question that Mr. Small has to answer to the people of Illinois, is—did he place ten millions of the people's money in a fictitious bank for the profit of himself or associates?" the statement says in part:

"Governor Small in his latest statement says that his records have been open for four years and had there been irregularities, I could have easily determined them.

BYRNES DENIES SOUTH THREATENED WITH FAMINE

By Associated Press.

WASHINGTON, July 30.—Representative Byrnes of South Carolina asked President Harding in a letter today to take "appropriate action toward officials who by misrepresenting conditions misled you into making the statement" that parts of the south were "actually menaced with famine and plague."

Replying to the president's letter of yesterday in which Mr. Harding said that if investigation developed that reports had misrepresented conditions, official refutation would be desirable.

FOUR BROTHERHOODS TO MEET EXECUTIVES

CLEVELAND, July 30.—Heads of the four big railroad brotherhoods and the Switchmen's Union of North America, will meet a committee of the Association of railway executives in in New York next Wednesday to consider working rules and conditions.

The meeting is to be held at the request of the brotherhoods, following the meeting of general chairmen of the organizations in Chicago, July 1, which considered the order of the United States railroad labor board reducing wages 22 per cent effective on that day.

DALLAS POLICE STOP HIGHWAY ROBBERY

DALLAS, July 30.—Dallas officers last night frustrated plans of auto bandits to stage holdups on the Fort Worth pike, five miles out of Dallas, when they arrived on the scene shortly after it had been reported that highjackers had piled cord wood across the road to stop automobiles.

The bandits escaped in an automobile.

AVIS SHOWS OIL SAND AT 1800 DEPTH

A showing of oil sand, around 1940 feet, after several good showings of gas had been encountered since the 1800 foot level was reached, has made the test of the Montana Oil and Gas company on the J. D. Avis, farm, a short distance southeast of Wichita Falls, unusually interesting this past week. The test is now drilling slightly below 1950 feet, in grey lime, according to reports from the president of the company, W. A. Patterson, who is actively superintending field operations.

Resumption of operations in the test of William Champion on the Hatfield, just notth of the Montana test, also spurs up interest in this section, which has had several flings at the limelight in the past several years. The Champion test has been shut down for at year, at a depth of 1490 feet, the derrick being blown down recently. Now the derrick has been rebuilt, and work begun. This is Champion's second test for this section, one being drilled down around 1800 feet, with two good sands reported at the time, which were not tested, and the hole was finally junked around the 1800 foot depth.

The General Oil company's test on the George eKith ranch was next the center of excitement, about two years ago, with the reports of an oil sand strike a tvarious depths, but nothing materialized and a new hole started, a part of the derrick collapsed, and several other mishaps occurred to delay operations, and the test was finally shut down some distance below 2,000 feet, largely, it is believed, on account of the litigation in which the General Oil company was involved. The test had stood idle for several months.

AMERICAN TARIFF NOT TO AFFECT CANADIAN WHEAT

By Associated Press.

REGINA, Sask., July 28.—Wheat prices in the Canadian west will not be affected by the new American tariff, except insofar as this interference with free shipment to the United States may be exploited by market manipulators, according to J. M. Musselman, central secretary for the Saskatchewan Grain Growers' association.

"So long as the United States requires Western Canadian hard wheat for blending with her own winter wheat, it would seem that her own people will have to pay the import duty on it, besides its competitive world value. The United States millers will be under a handicap in competition with Canadian millers when it is considered that imported wheat is used for blending in making flour for export to Europe," Mr. Musselman said.

"The Canadian meat industry, however, Mr. Musselman believes, will be hard hit by this new tariff.

"The effect of this tariff on our meat industry is likely to be very much more detrimental to the farmers of this country, especially as Canada has practically no other market for live cattle," he said.

HEAT MAKES ROADS EXPLODE

Whether or not the approach of the Fourth of July had anything to do with it, or whether, after all, there may be a popular demand for changes in the field of excitement, are, of course, unknown—but sections of the country, including the metropolitan district, lately have been experiencing something entirely new in the way of explosions. The new pyrotechnics seem to have developed with Amerley's road building program.

Occasionally a gas main, a manhole or a water main beneath a street lets go in New York, but for a road or a street pavement to explode is indeed a novelty.

The explosion of the pavement in a Brooklyn street a short while ago was a new experience for the borough, but it has at least brought it up to date. Brooklyn, however, has nothing on other parts of the country.

Maywood, Ill., has now come into the limelight by reason of the explosion of a road pavement just outside her limits and Seattle, Wash., reports one that has led to litigation for damages against the county. On the Roosevelt road near Maywood a concrete pavement ten inches thick blew up directly in front of the Fred Millies roadhouse, where a few of the thirsty who may have been indulging in prohibition drinks, but not in hallucinations, were violently shaken up and were rushed from a building that rocked and threatened to collapse.

Highway engineers declared that the extraordinary heat and a lack of sufficient space between the joints of the pavement to care for the expansion of the concrete, as well as the creeping of the heavy roadway caused the joints to fill, as frequently happens in sidewalks. The result was that the roadway, which was ten inches thick and of solid cement, buckled at the lowest point and burst, throwing pieces of heavy pavement several feet into the air and tearing a hole nearly fifty feet square.

The explosion near Seattle occurred on the Des Moines road, a part of the "high line" route between Seattle and Tacoma. The road was built with a concrete base and a monolithic brick surface. During a period of unusually hot weather thirty explosions took place in various parts of this highway.

Near Sunnydale a truck had just passed the crown of a bulge in the pavement when the roadway let go with a roar, showering brick in all directions. The truck was thrown from the road into a ditch and badly damaged. The occupants were injured and the county now faces damage suits for personal injuries and the loss of the truck.

The first woman to pass the final examination for the English bar is a twenty-three-year-old girl of Hull. She can not be called to the bar, however, until she has put in twelve terms, which will not be till next year.

Princess Bibesco, formerly Miss Elizabeth Asquith, daughter of the English statesman, and now the wife of the Roumanian minister in Washington, has signed a contract with an American magazine to write short stories.

HIGH SCHOOL GRADUATES

Miss Lucille Glenn, Girls' Club '20 and '21, Glee Club '19, '20 and '21. She is the daughter of Mr. and Mrs. J. E. Glenn, 1510 Fillmore street.

Miss Mary Underwood, Girls' Club '20 and '21, Glee Club '21, Wi-Chi-Ta Campfire Girls '18, '19, '20 and '21, secretary of Wi-Chi-Ta Campfire Girls '19 and '20. She is the daughter of Mr. and Mrs. W. S. Underwood, 803 Lamar street.

NO. 5 GOSE SWABS SHOW 400 BARRELS

Cleaning out the bridge in the hole, caused by the flows made on Thursday bringing up the bottom plug, the Texhoma Oil and Refining company's No. 5 Gose, in the new Archer county pool, was swabbed for some time Friday, and showed even better than the 300 to 400 barrels estimate placed on the production when the well was first drilled in, according to reports verified by field officials of the company. The Friday swabbing was at the rate of 500 to 600 barrels a day.

The Staley No. 2, Coffman, which this new well offsets, has had water trouble since it was first drilled in, but even with the water trouble has been producing at the rate of 400 to 500 barrels daily, according to reports.

WHACK THIRD OFF SALARIES OF TEACHERS

(Continued From Page One.)

lated in the original bill. His amendment was also tabled by a vote of 80 to 37.

Representative Pope of Nueces offered an amendment late today proposing that the salaries and expenditures for the university budget as prepared by the appropriations committee shall be used for no other purpose than stipulated in the bill; that no instructor or professor shall receive additional salary from an appropriation for another position that is not filled and that such sums or portions thereof unexpended shall be returned to the stae treasury.

Stick to Steam Roller.

On this amendment Representatives Baldwin and Stevenson announced that "they had stuck to the steam roller clear through," but they thought this was going too far and pleaded for the defeat of the amendment. However, it was adopted by viva voce vote after a motion to table by Mr. Stevenson was defeated 38 to 71.

Representative Curtis of Tarrant, joint leader of the salary slashing move, introduced a resolution extending the courtesies of the house to the presidents of all state educational institutions. This was brought about when a point of order was raised yesterday by Perkins of Lamar which forced the courtesies extended to President Vinson of the university to be revoked and his expulsion from the floor. No action was taken on the resolution as time for considering resolutions had passed. It was read and referred to the committee on rules. Representative Perkins later said that he would insist on his point of order and fight adoption of the resolution.

The Texas A. and M. budget of the educational appropriation bill comes up in the house tomorrow.

Ask Neff Defer Bill.

A petition, signed by 93 members of the house, was presented to Governor Neff today requesting that he do not submit the Kerrville hospital appropriation of the regular session for consideration for reduction until the American Legion members of the house have had time to fully investigate conditions and the status of the hospital. The governor was requested some time ago by a petition signed by 74 members to present the hospital appropriation for consideration by the special session.

The senate did little work today, remaining in session but a short time and adjourning over to tomorrow.

The eleemosynary institution's appropriations for the next two years was engrossed and passed finally. It carries $2,965,820 for the first year and $2,782,535 for the second year.

A resolution was introduced by Senator Doyle proposing that a committee of three senators be appointed to investigate the various departments to ascertain if there is overlapping or duplication of work. It was referred to the finance committee.

The joint appropriation committee passed an appropriation of $7500 to the governor to be used in making an audit of any of the state departments where he may deem necessary.

WOMEN SEND "S. O. S."

AUSTIN, Texas, July 29.—An "S. O. S." call to the women of Texas" was sent out tonight by the heads of three state women's organizations located in Austin calling on them to protest against the reduction of salaries in the state educational institutions.

EDITH KELLY GOULD DIVORCE DISMISSED

NEW YORK, July 29.—The suit for divorce brought by Edith Kelly Gould against Frank Jay Gould, was dismissed today by state Supreme Court Justice Mullan. The court upheld Mr. Gould's contention that he had already obtained a divorce in Paris.

JUDGE ENDS DOG TRIAL ABRUPTLY

"I don't want any more evidence in this case and you lawyers can argue for five minutes each if you want to but I warn you that it won't do you any good," declared Justice of the Peace Gwinn Friday as he brought a "dog" trial to an abrupt ending. Attorneys agreed to pass up the five minute privilege and the justice immediately rendered a verdict in favor of the defendant.

The suit involved the ownership of a bird dog bearing the name of "Joe" with an alias or two alleged in the petition to be owned by the plaintiff O. J. Stalling. The latter claimed to have purchased the dog which was on exhibition last fall and produced a bill of sale showing the purchase.

The defendant, Marvin McDaniels, claimed that he had owned the dog up to last fall when it disappeared. He produced photographs of the dog which he said had been taken while in his possession.

MAYBE HE DREAMED HE WAS IN FRISCO

Firemen Friday expressed themselves as worried about the general condition of Captain Smiley Turner of the central station.

According to their version of Smiley's conduct, he spent two months of the early summer planning an extensive trip through California when his vacation time came. They declare he had his locker well filled with literature describing in loquacious and minute detail the many attractions of various California resorts and left the station some two weeks ago, apparently bound for San Francisco.

On Wednesday Smiley was again back at his duties. The firemen declare that no evidence can be obtained to show that he ever got out of Texas and further assert that he spent most of his vacation time at Mineral Wells.

LOCAL OPERATORS CALL COMPANY'S HAND

(Continued From Page One.)

ita Falls at this time of the year is not burning much over a million feet per day.

"While we are still figuring on the lines, we have gone pretty thoroughly over the ground as it is, and have the approval of a competent engineer on the entire project. It looks to me as if it were in mighty good shape and as if the Wichita Falls operators, if the gas company sees fit to come to terms with us, could do both Wichita Falls and themselves a good turn."

PREPARE TO INTERVENE IN INJUNCTION SUIT

To be filed in the name of a citizen of Wichita Falls, who is a patron of the North Texas Gas company, a petition for intervention in the suit between the North Texas and Lone Star Gas companies is being prepared, it was announced Friday by City Attorney E. M. Mann. Mr. Mann is a member of the committee of lawyers from North Texas cities, selected to intervene in the suit, should any citizen so desire, at a meeting of representatives from the 21 towns and cities affected by litigation between the companies. The other members of the committee are: Hamp P. Abney, city attorney of Sherman and Mayor Chancellor of Bowie.

The petition being prepared by Mr. Mann will ask a mandatory order to prevent either company from raising the rates of consumers, and will refer to an agreement made last fall with the North Texas people, in which a raise was permitted. It will state that the Lone Star people were a party to the agreement, according to the announcement, and will maintain that they have received an advanced rate through their percentage share from the monthy payments of consumers.

Mr. Mann declared that although it was believed that there is a real legal battle in progress between the two companies that it is believed that an effort to increase rates as a result of the suit will likely be made, unless consumers take steps to protect themselves.

"What is bread worth, today?" she asked, pointing to a loaf about the size of a biscuit.

"Worth about two cents, lady," responded the truthful grocer, "but we're charging ten."—Puck.

HAPPY THOUGHT

When folks find fault with you for not doing things as they should do them, take comfort in this: "There's more than one way to skin a cat."

According to Scottish custom, the gift of a bunch of heather to a Highland lassie is equal to an offer of marriage.

Town Topics

Mr. and Mrs. Sam Kruger and children have returned from Fort Worth where they spent a few days with relatives.

Mr. and Mrs. George T. Henderson of 1620 Elizabeth street announce the arrival of a ten pound boy whom they have named George T. Henderson, Jr.

Mr. and Mrs. O. C. Blanton left for Synder, Okla., where they will be guests of Mrs. Blanton's sister, Mrs. E. S. Shults. They will also visit in Frederick and Walters before they return.

Miss Lucy King of Stephensville, arrived Friday to be the guest of Miss Leoti Clark. Miss King was Miss Clark's roommate at John Tarleton college last year.

Mrs. E. F. Funston will leave this week for Colorado, where she will spend the remainder of the summer.

Mesdames R. R. Longino of Fort Stockton, Texas, and J. A. Olsen of Dallas, daughters of Mrs. S. P. Bunsford of 1722 Ninth street, arrived Thmursday for a visit to their parents. Mrs. Longino has accepted a position as stenographer to Superintendent Lee Clark for the coming school term.

Mrs. J. F. Gilcrease and daughter, Miss Virginia, left Friday afternoon for their home in El Paso after a six weeks visit with Mr. and Mrs. Herbert Myers, 1309 Monroe street.

Miss Margaret Dubose, executive secretary of the Y. W. C. A., leaves today for Colorado Springs to spend her vacation.

Miss Alma Fienhold, of the City National Bank of Commerce, leaves today for Denver to spend part of the summer.

C. A. and L. J. Bryan, of the Bryan Oil Corporation, left Friday night for Detroit, New York and other points.

Mr. and Mrs. F. P. Timberlake have returned from a month's stay in New York and eastern points.

Mrs. G. C. Wood leaves today for Leesville, La.,

Mr. and Mrs. E. H. Moss left Friday for Dallas.

Misses Don and Bob Sandifer, of Vernon, were in the city Friday to attend the Comus Club dance at the lake Friday night.

Miss Ruth Broome, of the Denver freight office, is on her vacation. She will leave today for Beaumont to visit relatives.

Miss Hazel Kuykendall and Mrs. C. A. Davis left Friday night for Rogers, Arkansas.

Mrs. H. W. Funston left Friday for Colorado Springs.

W. K. Niles of Fort Worth, who a number of years ago was a resident of Wichita Falls, was here on a business trip Thursday.

W. A. Roussell, a prominent dry goods man of Brownwood, was here Thursday visiting Vaughn Ray.

Mr. and Mrs. H. O. Cravens, accompanied by their sister, Miss Nira Dent, motored to Oklahoma City Thursday where Miss Dent will join her brother and sister, of that city, for an automobile trip to Chicago and other eastern points. Mr. and Mrs. Cravens will return home some time next week after spending a few days at Medicine Park.

C. M. Mann and E. D. Trevathan and families have returned from a 10 day outing at Medicine Park.

Mr. and Mrs. F. A. Medlin and Louis Erwin of Burkburnett, who have been guets of Mr. and Mrs. H. A. Erwin, at 2007 Ninth street, have returned home.

Miss Carrah Holland of Mount Pleasant, Texas, who has been the guest of Miss Margaret Holland of 2013 Eighth street, returned home Wednesday accompanied by her hostess.

Mrs. W. E. Carter and children will leave Friday for a two weeks' visit in Medicine Park.

Harry Naylor and E. Stanley Field left Thursday night for a business trip to Fort Worth.

T. J. Waggoner, Jr., is spending a few days here with his parents from the summer school of Southern Methodist University at Dallas.

John Barnard of the P. B. M. store, is reported on the sick list.

Mrs. John W. Owens returned Thursday afternoon from Chickasha, Okla., where she has been on a visit. Mrs. Owens will leave the latter part of the week for Colorado Springs.

Miss Geraldine Adair left Thursday afternoon for Colorado Springs.

W. C. Montgomery left Thursday afternoon for Memphis, Texas, to visit relatives.

Leslie Turner has returned from a six weeks trip to New York City, Chicago and other northern and eastern points.

E. W. Maxwell of Oklahoma City, is in the city on business.

Jim Jennings, of Electra, is in the city on business.

Pat Simmons, vice president of the Wichita State Bank, is expected to return Saturday from Oklahoma City, where he has been for several days on business.

S. A. Pitzer, of Abilene, is in the city on business.

Mr. and Mrs. C. L. Anderson have returned from their wedding trip, which included New York City and other northern and eastern points.

R. C. Dunkelberg was in Burkburnett on business Friday.

Austin Huffines of the Southern Electric company has returned from his vacation which was spent in Dallas.

Miss Anis Campbell leaves today for Childress where she will visit during her vacation.

George H. Wharton, of the Perkins-Timberlake company, is leaving in a short time on his vacation to Waco.

Dr. Percy Luecke, of Philadelphia, is visiting his parents, Mr. and Mrs. H. C. Luecke of 900 Brook street. Dr. Luecke was recently promoted to be assistant chief visiting doctor at the general hospital of Philadelphia after serving as intern there for over a year. He is a graduate of the University of Texas medical school.

FILE CHARGE AGAINST MEN FROM YOUNG

J. A. Jackson, W. C. Shipper, Marcelle McDonnell and Chick Garard, arrested near South Bend in Young county by federal prohibition officers Thursday, were brought to this city Friday where complaints of selling beer and whisky were filed against them by the federal officers.

At a preliminary hearing Friday before United States Commissioner Lantz, the charges were dismissed against the two women Marcelle McDonnell and Chick Garard with Shipper being held under $750 bond to await the action of the grand jury.

Jackson waived preliminary hearing and was also placed under $750 to wait the action of the grand jury. The McDonnell woman was placed under $200 bond as a witness.

According to the officers making the arrest the whisky and beer was being sold from soft drink stand and dance hall owned by Jackson. The officers said that the whisky was being stored in a false partition in the building to which access was obtained by removing a base board.

DELAY GARBAGE BOND PERFECTION

Some delay in perfecting bonds for successful bidders for garbage hauling contracts because of the necessity of forwarding the bonds to Dallas for approval by the bonding companies is expected, it was announced Friday by Dr. A. H. Douglass, city sanitary officer.

It was expected to put the new city garbage ordinance in effect on August 1, according to Dr. Douglass, but it is now expected the date will be several days later.

SOLONS URGE RECOGNITION OF MEXICO

State Legislature Adopts Resolution Memorializing President Harding to Act.

Measure Introduced by Pool of El Paso Congratulates Obregon and People of Southern Republic.

By Associated Press.

AUSTIN, Texas, July 30.—A house concurrent resolution stipulating that it is the sense of the Texas legislature that the interests of the United States and of Texas will be better served by official recognition by the United States of the Republic of Mexico, was adopted in the house late today.

The resolution was introduced by Representative Pool of El Paso and others. It provides that the house and senate declare itself pleased with the election of President Alvaro Obregon and congratulates the people of Mexico upon the "new era of peace, prosperity and amicable relationship." The resolution also expresses friendship of Texas for Mexico and commendation and confidence in President Obregon. Copies of the resolution were ordered sent to President Harding, President Obregon, president of the United States senate, speaker of the house of representatives and to each Texas congressman.

Although the university budget was completed yesterday debate on it sprang up again in the house today when Representative Bonham, leader of the majority that amended the budget to cut the salaries, moved that the appropriations committee be instructed to prepare an itemised budget of the university branches that have been omitted in the bill.

Refers to Summer School.

He referred to the summer school, the university extension bureau and the bureau of technology. These branches had heretofore been operated

ELIASVILLE TRAINS BEGIN RUNNING AUG. 1

Eliasville will have its first train service beginning Tuesday of this week, when the full schedule of the Wichita Falls and Southern will be in effect to that point. Heretofore Eliasville's nearest railroad point has been at Graham.

A slight detour and the insertion of 4500 additional feet of trackage was necessary on the part of the railroad construction to reach the townsite of Eliasville, the cost of which was paid in part by residents of that place.

SIX KILLED IN TRAMWAY WRECK

By Associated Press.

GRAND JUNCTION, Col., July 30.—Six men were killed and six others injured, three seriously, when a tramway car cable slipped out of the swivel late today at the Schuyler Doyle Shale company's plant and plunged to the floor of the gulch two thousand feet below.

QUESTION OF YANK VALUATION UNDECIDED

By Associated Press.

WASHINGTON, July 30.—The questions of whether the American valuation provision shall be retained in the Fordney tariff bill, and whether the dye embargo section shall be restored in the measure, will be decided by the senate finance committee before hearings are held on the proposed duties. Two days more, Monday and Tuesday, will be given over to discussions of the domestic valuation plan and the dye embargo question will be considered Wednesday after which the committee will meet separately to thresh out its program.

KELLOGG BILL SUFFICIENT FOR COWMEN'S NEEDS

Needs of cattlemen will be fully met by the adoption of the bill recently introduced by Senator Kellogg as an administration measure, and as a substitute for the Norris bill, according to Frank Kell, who has been intensely interested in the efforts of the cattlemen to secure relief from the situation which threatens to wreck their herds.

"The bill amends the war finance corporation law in such a way that loans may be made for agricultural purposes, including the breeding, raising and fattening of livestock, which is exactly what the cattlemen are after, and what they need," said Mr. Kell. Cattlemen should give their full support to the measure, he declared.

SOVIET RUSSIA AGREES TO FREE AMERICANS IF U. S. RESUMES RELATIONS

By Associated Press.

RIGA, July 30.—Soviet Russia has agreed to release American prisoners and to accept famine aid from the American relief association just at the moment that United States Senator Joseph I. France of Maryland, has returned to Riga from Moscow determined to advocate renewal of trade relations and perhaps diplomatic relations between Russia and the United States and bringing with him one of the prisoners, Mrs. Marguerite E. Harrison of Baltimore, who was freed by his efforts at Moscow.

Senator France, who entered Russia several weeks ago skeptical of the advantage of immediate diplomatic relations with the soviet but believing that trade relations were advisable, has returned an ardent enthusiast for both.

While American officials in the Baltic are speculating as to what effect the release of the prisoners and the entrance of the American relief association into Russia will have in clearing up the Russian situation, Senator France declared that the Lenine government was starting a new line of development in Russia which "cannot backslide into radical communism again."

"Propaganda Harmless"

In reply to a question as to whether the Moscow bolsheviki were trying to revolutionize the world including the United States, Senator France said "I know nothing about the third internationale; but no man worthy of any attention ever believed that propaganda could start revolutions.

"Conditions are not propaganda, history shows."

The senator talked with both Lenine and Trotzky and was impressed by them.

"I found that the Russian government is handling the situation in a statesman-like way" he said. "Lenine is much interested in American relations. The Russian factories have not all ceased operating; many are working well. They are short of railway material but that is not their fault. Peasants are working the lands and farms are prosperous when not in the famine and drought belt."

Will Export Furs

The senator mentioned furs as one of the possible products of trade with the United States and asserted that there would be plenty of exports when the factories were equipped and agricultural needs were supplied from abroad. He thought a commission of American experts would be welcomed but contended that Russia should have the right to send one to America also.

"I am convinced that Russia will carry out any guarantee or concessions made in return for credit," the senator declared.

Describing his visit, he said he was free to move about and see what he liked and officials frankly admitted bad conditions where they existed. The senator procured Mrs. Harrison's release from prison independent of the Hoover and Hughes notes of which he knew little. Mrs. Harrison was freed from the prison hospital only a few hours before the train left Thursday and was surprised to find herself at liberty.

May Be Friendly Contact

"I cannot comment on reports that terms of the American relief administration have been accepted except to say that any friendly contact whatever that can be effected between Russia and America will be of immeasurable benefit to both countries," Senator France said.

"America has been denied uncolored information about Russia, for most people in a position to give firsthand information are prejudiced witnesses either on one side or the other. I tried to be impartial for my sole interests is in America and without reservation I can say I believe friendly relations should be established for the sake of America, particularly to sell American goods which are rotting and to start fires in furnaces of American factories which are idle."

MISSING BANKER IN CHICAGO!

Police Receive Tip From Taxi Driver That Spurgin There.

By Associated Press.

CHICAGO, July 30.—The countrywide search for Warren C. Spurgin, fugitive president of the Michigan Avenue Trust company, which was closed recently following discovery of a shortage estimated at $1,000,000 was directed toward Detroit today following receipt of reports by the police that the missing banker had been seen there by a taxicab chauffeur.

The chauffeur, according to the police, said that on last Wednesday morning he had picked up a man answering the description of Spurgin and had driven him to a Highland Park address. The name of the driver was withheld.

It had previously been reported that Spurgin was in the vicinity of Mobile, Alabama, on a yacht in the Gulf of Mexico and trying to escape across the Mexican border.

TEXAS COTTON MEN GOING TO MEETING

DALLAS, July 30.—Trustees of the American Cotton Growers' association will leave here Sunday night for Memphis to attend a meeting of representatives of the association on August 2.

John T. Orr, president; W. D. Farris of Ennis, vice president, and Jesse Montgomery of Mount Pleasant, director, are the trustees who will attend from here.

COMMITTEES WORK ON CREDITS BILL

By Associated Press.

WASHINGTON, July 30.—While the senate was in recess today amendments to perfect the pending agricultural credits bill were worked out at conferences of republican and democratic leaders.

The principal change in the committee substitute for the Norris bill said to have been agreed upon today was for elimination of the provision authorizing loans to foreign governments or any sub-divisions thereof.

WHEAT CLEARANCES SURPASS RECORDS

By Associated Press.

GALVESTON, July 30.—What is believed to be a record for all ports, to local custom officials, ended this afternoon with clearances of $4,402,000 bushels of wheat for the past week for European ports. Of this tremendous quantity of wheat Great Britain took 1,286,000; Italy 1,011,000, Holland 865,000; Germany 856,000 and Belgium 346,000.

FIRES CONTINUE IN CANADIAN WILDS

By Associated Press.

SYDNEY, New South Wales, July 30.—Forest fires today continued to rage in northern Cape Breton, threatening the village of Ingonish with its 1,000 population and other fishing communities. Without rain there appears no prospect of checking the blaze.

Already flames have swept an area more than twenty miles long and five miles wide, destroying telegraph poles, bridges and culverts. Most of the timber burned thus far has been in crown lands.

The Weather

Oklahoma: Sunday and Monday partly cloudy, probably scattered showers.

West Texas: Sunday and Monday partly cloudy; unsettled in the Panhandle.

GERMANS SEE FORMAL PEACE WITH AMERICA

Foreign Office Expresses Belief That Negotiations Presage Early Resumption of Relations.

Wirth Cabinet Assents to Proposals Outlined in Knox-Porter Resolution Ending War.

By Associated Press.

BERLIN, July 30.—The German foreign office expressed belief that the negotiations which have been proceeding for the last three weeks between Ellis Loring Dresel, the American commissioner in Berlin, and Dr. Rosen, the foreign minister, have progressed sufficiently to warrant the belief that a general working basis clusion of a formal peace treaty between Germany and the United States at an early date.

It is understood that the German government has assented to a proposition submitted by the American state department through Mr. Dresel, in the way of informal inquiry based on the essential principles enunciated in the Porter-Knox peace resolution. None of these, it is said, had been opposed by the Wirth cabinet, which is declared to be wholly in accord with the American attitude on the prerogatives and privileges and various rights under the treaty of Versailles to which the United States is entitled by virtue of America's participation in the war.

The informal pour parlors here have not touched upon the economic features of the proposed treaty, but have dealt with the cardinal points upon which the United States places emphasis in connection with its interpretation of the Versailles treaty. The conclusions reached as a result of Mr. Dresel's negotiations are being formulated in the manner desired by the Washington authorities and an official memorandum, it is forecast, probably will be ready for publication within a few days. Upon this memorandum, it is understood, the formal treaty will be based.

The question as to who shall be the German envoy to Washington meanwhile remains in abeyance, as the German government prefers to await America's initiative.

The proposition is being made that an economic commission in charge of a professional diplomatist be dispatched to Washington for a beginning, as it is recognized that the resumption of relations will involve the settlement of numerous post-war economic issues.

ENGLISH AGREE TO FRENCH PROPOSALS IN UPPER SILESIA

By Associated Press.

PARIS, July 30.—Lord Hardinge, the British ambassador, informed Premier Briand this evening that Great Britain willingly agrees to proposals contained in the French premier's latest note relative to troop reinforcements for Upper Silesia. The British ambassador at Berlin has been instructed to join his French and Italian colleagues in a common demand that the German government facilitate by all possible means the transport of allied troops across Germany whenever the situation in Upper Silesia renders it necessary.

Marquis Curzon, the British foreign secretary, in the note which Lord Hardinge handed M. Briand, proposes August 8 as the date for the meeting of the supreme council, as the Italian premier is unable to attend sooner. Premier Lloyd George will attend if the French desire his presence.

The British reply is extremely cordial. Lord Hardinge expressed satisfaction over dissipation of the recent misunderstandings.

AMERICAN CITIZENS NEED NO PASSPORTS

By Associated Press.

WASHINGTON, July 30.—Under an executive order promulgated today citizens of Mexico desiring to enter the United States through Mexican border ports may do so without presenting to control officers at border ports any travel document whatsoever, provided that such persons have been residents of the forty mile border zone for a period of one year or more, are otherwise admissable and are known or can present proof of identity to immigration officials.

OVERCOME WITH JOY WOMAN DROPS DEAD.

By Associated Press.

PALESTINE, Texas, July 30.—Overjoyed at meeting her daughter in Chicago, whom she had gone to visit, Mrs. M. Winner, widow of the late M. Winner, former prominent Palestine business man, dropped dead in a railroad station at Chicago last night, according to telegrams to relatives here.

FIND $70,000 WORTH OF DIAMONDS SEWN INTO COAT LINING

By Associated Press.

CHICAGO, July 30.—Ripping open a small bag found sewn in a coat lining federal investigators today said they found smuggled unset diamonds and jewelry valued at $70,000. The coat, they said, belonged to Hyman Finerman, a Los Angeles jeweler, who was arrested yesterday charged with smuggling. Included in the find were three diamonds said to weigh ten carats each.

Finerman was held under bond of $2,000, but it was said that in view of today's discovery, an effort would be made to have this bail increased.

DESCENDANT OF BOONE CLAIMED BY DEATH

ELLENSBURG, Washington, July 30.—John B. Jones, said to be a grandson of Daniel Boone, died at home here yesterday. Mr. Jones was bor nin Kentucky in 1843. He had lived in Ellenburg 43 years, coming here from California.

RAILROAD FUNDING BILL UP NEXT WEEK

WASHINGTON, July 30.—Consideration of the administration railroad debit funding bill is to begin next week by senate and house interstate commerce committees. Republican leaders hope that it may be passed by the house ahead of the tax revision bill.

MINNEAPOLIS SEWER GAS BLOWS UP WITH FIRES FOLLOWING

By The Asoociated Press.

MINNEAPOLIS, Minn., July 31.—Twenty-eight persons were hurt, several seriously, and much damage done by a series of explosions in sewers and cable manholes at Sixth street and Nicolett avenue, and Fifth and Nicolett, late last night and early today.

At 1 a. m. today Donaldson's Department store at Sixth and Nicolett, one of the largest department stores in town, caught fire.

Five explosions had rocked the downtown section up to midnight. They occurred at various intervals. A cigar store was badly damaged by the third blast.

The fire is believed to have started from a short circuit in an electric power cable. The first explosion occurred shortly after 10:30 p. m. at Sixth street and Nicolett avenue, in the heart of the loop district.

Many persons were knocked down by the explosions. Others were hit by flying glass.

Fear was expressed by firemen and police that the fire would spread through the entire sewer system of the city. Fire Chief C. W. Ringer said the fire department was powerless to stop the flames.

LITTLE CHANCE FOR ARTICLE 27 CONSIDERATION

"Pernicious" Measure Not Likely to Be Repealed or Amended by Special Mexican Congress.

By Associated Press.

MEXICO CITY, July 30.—There is but a slight hope that article 27 of the Mexican constitution providing for nationalization of oil and other natural resources will receive consideration during the present session of congress, according to statements made by leaders in the chamber of deputies to newspapermen last night. They added, however, that they believed the questions would be taken up when the regular session opens next September.

Indications that the liberal constitutional party known as President Obregon's party, still retains its majority in the chamber of deputies, were seen last night as a result of the roll call for the election of monthly officers.

A split was reported between Obregon and his party but political circles now understand that a reconciliation has been effected and that within the next few days, a resolution of "confidence" in the president will be proposed and properly adopted by the entire party.

Should this resolution be adopted, it would not necessarily mean, however, that President Obregon's request for extraordinary powers to adjust article 27 would be granted, in the opinion of political circles.

RAILROADS REQUIRED TO BE ECONOMICAL

By Associated Press.

MEXICO CITY, July 30.—A deficit of a million pesos monthly, coupled with the necessity of rehabilitating the generally deteoriating rolling stock and road beds, demands the utmost economy on the national railways, President Obregon told newspaper correspondents last night.

For that reason, he declared, the government was standing firm and would make effective its 20 per cent reduction for all railway employes drawing more than 100 pesos monthly, notwithstanding their strike threats. He also reiterated that there was no intention of rescinding the recent decree increasing the export taxes on petroleum.

The president's declaration relative to the railroad indicate that next Monday may see a general tieup on all federally operated roads.

President Obregon told the correspondents the international situation was unchanged.

COMMITTEE DENOUNCES KANSAS KU KLUX KLAN

By Associated Press.

KANSAS CITY, July 30.—Resolutions characterizing Ku Klux organizations as "undemocratic, vicious and harmful to society," and urging governor Arthur M. Hyde to issue a proclamation calling upon the people of Missouri to refrain from becoming connected with such secret bodies were adopted at a meeting here today of the Interracial committee of Kansas City.

POLICE GUARD SHIP.

HAVANA, July 30.—Port police were placed aboard the shipping board steamer Mazama today upon the request of Captain W. B. Zechel, who declared he feared attempts to blow up the ship.

SELECT JURY FOR TRIAL OF H. J. TOUSSAINT

Twelfth Man in Box Chosen Few Moments Before Adjournment and After Fifty Examined.

A few minutes before time for adjournment and as the fiftieth talesman that had taken the witness chair during the day for examination as a prospective juror W. A. Soule, painter, of this city was accepted by state and defense attorney as the twelfth juror in the case of Henry J. Toussaint on trial in the Thirtieth District court for the murder of his father, T. O. Toussaint.

Although the jury as a body was not sworn in the selection of Mr. Soule's practically assures that the actual trial of the former officer and eastern college graduate will be gotten under way at 9 a. m. Monday with the state opening its evidence at that time.

The jury was not sworn in by Judge H. F. Weldon in order that it would be possible to fill any vacancy that might arise through sickness or other legal causes over the Sunday adjournment.

Has No Bill

As the personnel of the jury is now constituted the case will open

(Continued on page two)

FORDNEY SEEKS TO REDUCE TAX BILL

WASHINGTON, July 30.—Republicans of the house ways and means committee conferred today for a development of views on tax revisions. Many divergent opinions were developed but no decisions were reached.

Emphasizing that he was speaking solely for himself, Chairman Fordney said afterwards that the goal toward which he would strive would be a cut of a half billion dollars in the tax bill next year.

SPANISH IMMIGRATION TO U. S. DECREASING

By Associated Press.

MADRID, July 30.—The flow of Spanish immigration to the United States in decreasing, according to figures by the immigration council. The number of immigrants leaving for Argentina, however, is on the increase.

ELEVEN FORMER HUN SHIPS ORDERED SOLD

By Associated Press.

WASHINGTON, July 30.—Eleven former German cargo steamers and one cargo-passenger steamship were today ordered for sale on a lump sum basis by the shipping board. Bids will be opened August 15.

The vessels, all steel craft averaging around six thousand deadweight tons are the Callao, Arcadia, Casco, Wachuset, Cunica and Yucca at New York; the Artemis and Neuse at Baltimore; the Coosa and Pawnee at Philadelphia, the Isonomia and Armenia at Norfolk.

NEWSPAPER URGES WIRELESS EXTENSION

MADRID, July 30.—La Epoch urges the expansion of Spanish wireless service to South America by way of Teneriffe and Pernambuco. The newspaper asserts the English and American owned cables between Spain and South American countries hinder Spanish commerce between Spain and the Latin-American countries.

NORTHCLIFFE AFFAIR STIRS BRITISH PRESS

Political Circles Talk Nothing Else Since Lloyd George Branded Story as Falsehood.

Some Newspapers Believe Publisher Due Some Consideration, but Denounces American Visit.

By Associated Press.

LONDON, July 30.—The sensational and unprecedent incident of a British soverign repudiating to parliament, through his prime minister, statements attributed to him in a newspaper interview, is given the greatest prominence in the entire British press this morning.

Political circles have been able to talk of little else since Prime Minister Lloyd-George appeared in the house of commons yesterday and read a statement, authorized by King George, in which the king declared that words attributed to him concerning the government Irish policy in a reported interview in the United States by Lord Northcliffe, owner of the London Times, were "a complete fabrication."

The alleged interview quoted King George as saying to Premier Lloyd-George, just before his majesty left England to open the Ulster parliament:

"Are you going to shoot all the people in Ireland?"

The premier is said to have replied: "No, Your Majesty."

"Well then you must come to some agreement with them," the king was quoted as saying. "This thing cannot go on. I cannot have my people killed in this manner."

Give it Much Space

(The foregoing conversation appeared in an interview published in New York City, July 23, attributed to H. Wickham Steed, editor of the London Times, who is traveling in America with Lord Northcliffe. It was given by Mr. Steed the day after his arrival from England, and subsequently appeared in English papers attributed to Lord Northcliffe. The latter yesterday sent a cablegram from Washington to Lord Samford-ham, private secretary to King

(Continued on Page Two.)

GOVERNOR SMALL RETURNS TO HOME

KANAKEE, Ill., July 30.—Governor Len Small returned to his rome in Kankakee tonight after two days inspections of the roads of Cook, ane and Will counties. The governor will spend Sunday here and resume his road tour Monday. He does not expect to return to Springfield before Wednesday or Thursday.

CHICAGO, July 30.—Replying today to a statement issued last night by Governor Len Small in which he defended his conduct while state treasurer, Attorney General Brundage declared that "the sole question that Mr. Small has to answer to the people of Illinois, is—did he place ten millions of the people's money in a fictitious bank for the profit of himself or associates?" the statement says in part:

"Governor Small in his latest statement says that his records have been open for four years and had there been irregularities, I could have easily determined them.

BYRNES DENIES SOUTH THREATENED WITH FAMINE

By Associated Press.

WASHINGTON, July 30.—Representative Byrnes of South Carolina asked President Harding in a letter today to take "appropriate action toward officials who by misrepresenting conditions misled you into making the statement" that parts of the south were "actually menaced with famine and plague."

Replying to the president's letter of yesterday in which Mr. Harding said that if investigation developed that reports had misrepresented conditions, official refutation would be desirable.

FOUR BROTHERHOODS TO MEET EXECUTIVES

CLEVELAND, July 30.—Heads of the four big railroad brotherhoods and the Switchmen's Union of North America, will meet a committee of the Association of railway executives in in New York next Wednesday to consider working rules and conditions.

The meeting is to be held at the request of the brotherhoods, following the meeting of general chairmen of the organizations in Chicago, July 1, which considered the order of the United States railroad labor board reducing wages 22 per cent effective on that day.

DALLAS POLICE STOP HIGHWAY ROBBERY

DALLAS, July 30.—Dallas officers last night frustrated plans of auto bandits to stage holdups on the Fort Worth pike, five miles out of Dallas, when they arrived on the scene shortly after it had been reported that highjackers had piled cord wood across the road to stop automobiles.

The bandits escaped in an automobile.

"Adamless Eden" Founded By Cornell Women Grads Who "Man" New Paradise

Miss Anne P. Fisher & Miss Alice L. Peck.

DE SOTA, Mo., July 30.—The "Adamless Eden" fifty-five acres in area, has been created near here. "Manned" entirely by Miss Alice L. Peck of Batavia, New York and Miss Anne P. Fisher, of St. Louis, Cedarbrow Farm is becoming famous throughout the great Southwest.

The novel idea of having an utterly "manless" farm was born at Cornell of which university the owners of the place are graduates. The science of farming is bringing dividends with good health, both Miss Peck and Miss Fisher declare.

Out over their vast expanse of unpolluted air, the two women look with pleasure upon growing crops that yield up young fortunes each year. Located in a valley at the foot of the Ozarks, the "Adamless Eden" is one of the most fruitful sections of Missouri.

Berries and fruit especially thrive in the soil of the Ozarks. Money gained from such crops, the two young women have proven to pioneer farmers of the section, rolls up a larger bank account than would ordinary crops.

Miss Peck, a trained horticulturist, is the "man" of the place. She supervises the work of growing the crops, while Miss Fisher, a specialist in domestic science, does the canning of jams and jellies that bring shekeles rolling into the coffers of Cedarbrow.

Ten acres of the little farm are given over to the growing of fruits and berries, eighteen acres are of woodland, with fifteen sowed in oats and corn. The remaining comprise pasture and a yard for the farmhouse.

A small dairy is the pride of Miss Peck. There hold forth the denizens of tested pure bred Jersey stock.

Lady Farmers Wear Army Clothes.

The care of the poultry yard falls to Miss Fisher, who permits nothing but pure bred Barred Rock pullets and roosters to peck food from the gravelly pen in which they live and produce.

While Miss Peck has been busy, during the two years of residence on the farm, in influencing De Soto farmers to introduce modern methods into their farm work, Miss Fisher has shown housewives the latest and most modern methods of canning and drying vegetables and fruits. Diversity always is preached by the two women.

The details of farm labor is performed by the two young women attired in army trousers and regulation skirts. After the chores of the day have been completed, Misses Peck and Fisher take "Elijah" and go for a ride. "Elijah" is their Ford car.

Nature is the hallmark of good health is the philosophy of the "lady farmers." They serve their meals under the canopy of heaven and sleep on the front porch throughout the year.

"Joy comes from healthful work," declares Miss Peck. "There is no lethargy here next to nature. My health was poor when I decided that I would live longer on a farm. Nothing succeeds like profiting in health."

AMERICANS CONTROL COLLEGES OF PERU

By Associated Press.

LIMA, Peru, July 30.—Virtually the entire educational system of Peru is now under the direction of American professors who were called here recently to complete an educational reform movement begun 10 years ago.

The foreign educational experts are to develop the system, from the primary grades to the university, in accordance with the special needs of each section of the country.

Doctor Harry Erwin Bard, formerly secretary of the Pan-American Society of the United States and formerly connected with the Philippine educational mission, was chosen by President Leguia to direct the re-organization. Dr. Bard has been appointed general of education and under him are more than 20 American professors.

The country has been divided into three regions. The regional directors are John K. Breedin of South Carolina; William W. Andrews of Massachusetts, and Glenn L. Caulkins of Washington. F. B. Spaulding of Vermont, is director of libraries; L. M. Wilson of Illinois, is director of examinations and studies and F. L. Crone, formerly director of the Philippine school system, is director of schoolhouse construction.

A new university called the University of Technical Schools has been created. Its branches are engineering, agriculture, pedagogical, sciences, industrial arts and commerce. The last three branches are respectively under the direction of H. G. Lull of Kansas; E. C. Phillips and Dr. William E. Dunn, formerly of the University of Texas.

Fourteen other American professors have been distributed among the secondary colleges.

FIND PREHISTORIC RELICS IN AUSTRIAN CAVE

By Associated Press.

MIXNITX, Austria, July 30.—One of the most comprehensive of the many finds of relics of prehistoric man in Austria has been discovered a cave near this place.

The cavern known as the "Dra Den" is being excavated for its mous deposits of phosphate in shape of bird lime. In a side some 1,000 yards from the ope the evidences of human occupatio ancient times were uncovered. G quantities of quarts implements other human bones have been t out.

Flounders are found along shores of almost all countries.

THE MOST BEAUTIFUL CAR IN AMERICA

INVESTMENT VALUE

When a man first looks at our "Glenbrook" Model he is captured by the exquisite finish and long, graceful lines. He realizes that it is an unusual art creation—a newer and finer conception of the five passenger vehicle.

And then comes a trial on the road—one thrilling experience behind the motor that accelerates from five to twenty-five miles per hour in nine seconds flat. That ride is never forgotten and it leads inevitably to proud, enthusiastic adoption.

Later comes indisputable proof of low gasoline consumption, long life of tires and care-free, untroubled mileage. And last—but far from least—comes the confidence and respect that only fine products command.

Here, surely, is amazing investment value at $1635.

OOD CROP PRODUCTION PREDICTED

ociated Press.
HICAGO, July 30.—Crops this will generally be plentiful and diversity greater than ever re, according to reports from idents of 30 leading railroads and umber of agricultural publications ered here by the Standard Farm rs. The reports, in greater part July 1, are thus summarized by agency:

Condition of crops throughout territory served by the Illinois tral is very satisfactory and inations point to a normal yield. wheat harvest has been comed in many sections and threshing un. Reports indicate that the d will be slightly better than average, corn making an excelgrowth and the condition of s, barley and rye being satisfact-

Wheat has been cut and threshcommenced. The condition was ch better than the average and a e yield is expected, says the bash and there are similar reports m the Chicago & Alton, the Chigo, Rock Island and Pacific, the icago Great Western railroad and Atchison, Topeka and Santa Fe. Rock Island Lines estimate the nsas wheat crop at between 113,000,000 bushels and 130,000,000 shels. The rice crop in South kas shows a good growth and reports indicate a heavy yield, the ck Island adds.

The Chicago and Northwestern d and the Chicago, Milwaukee St. Paul report winter wheat a d average over their entire terry with crops about two weeks ad of normal.

Conditions in Iowa are practicalperfect, reports the Chicago, Milukee and St. Paul. There is nty of moisture and all other ns are doing well. In its Transsouri division, the weather has n very favorable for crops roughout the Musselshell Division, thern Montana, the Rock Mountns and Idaho and Washington.

Corn is splendid and gives ev- promise of a good crop," decres the Santa Fe. "Cotton is wing a good growth and an inased demand during the last month two from both domestic and forn spinners has been rapidly abbing that portion of last year's n which has been in storage. In thern and eastern Texas and Louana, rice is satisfactory and truck ps are turning out well. Cantaupes and sugar beets in western nsas, Colorado and New Mexico developing rapidly. The second d third cuttings of alfalfa in parts our territory are making better lds than the first crop.

Orange and lemon growers in lifornia are finding a ready marfor their fruit at attractive ces and the movement to eastrn rkets is in excess of what it was year ago.

On the eastern section of its ks, the Pennsylvania railroad sysn reports wheat equal to last ar, corn doing well, with an unually large acreage of potatoes. n the western portion, wheat, corn d oats are normal with the wheat rvest about two weeks earlier than ual. The New York Central lines y the general crops will be good t that early fruits and vegetables re damaged some by frosts.

In New England, the rains came ong just in time to prevent serious terioration of pasture lands and e hay crop, the Boston and Maine ilroad reports. Fruits will be ht. Massachusetts has a good pply of peaches but a few apples. rn is normal. Tobacco is normal t was slow in starting.

There is a reduction of acreage cotton and tobacco amounting to out thirty per cent in the territry of the Atlantic Coast line, hich is offset by increases in sweet tatoes, early fruit and truck crops. he south is undergoing an economic change that will, if continued for few years, make her farmers independent," reports the president of e railroad.

Peaches and watermelons in profusion is the story from the Carolinas told by the Seaboard Air Line ilway. Tobacco and cotton acreage ows a decrease while grass and rage crops are normal. The supply of citrus fruits from Florida ill be about the same as last year, e railroad reports.

The editors of the agricultural blications heard from, report as vorably on the condition of the ops and see improvement in the nomic condition of the farmer er last year."

ANDITS RIFLE MAIL AFTER WOUNDING CLERK

PITTSBURGH, Pa., July 30.—our bandits boarded the Manhattan imited, westbound on the Pennsylnia railroad, at Cassandra, 90 iles east of here, this morning at :45 o'clock and after wounding A. Lantz, a mail clerk, rifled the mail r and escaped.

ROMANCE OF AIR HERO IS BROKEN BY RICH FIANCEE BECAUSE NAVY PAY IS LOW

Miss Alexandra Flowerton.

NEW YORK, July 19.—"N. G."

This is the stamp which has been placed upon Lieutenant Louis A. Kloor, U. S. N., gentleman and hero, by Miss Alexandra Flowerton, wealthy Long Island society girl, in returning to him the troth he plighted for, with the announcement that their engagement is broken for lack of funds.

The boy leader of last December's involuntary balloon expedition into the frozen wastes of the Northland, commenting on the breaking of the engagement, said:

"Just say it was broken by mutual agreement. We are the same friends that we always were."

Said Mrs. Alexander J. Flowerton, the mother of the pretty young society belle:

"The engagement was broken because of the small salary which a naval officer receives. My daughter, Alexandra, has always been accustomed to a living that could not be continued on a naval lieutenant's salary. We all think Lieutenant Kloor is a brilliant young man. There is no other man or woman involved."

The romance of the young pair started several summers ago and the engagement was announced immediately following the safe return from the Canadian icefields of the three naval heroes—Kloor, Hinton and Farrell. Miss Flowerton lives in Far Rockaway, close by the Rockaway station.

It was through means of a letter written in isolated Moose Factory, on the bleak western coast of Hudson Bay, by Lieutenant Kloor and addressed to Miss Flowerton that the world first learned the details of the adventures and privations which the three naval lieutenants underwent.

Miss Flowerton loomed large in the limelight at the time and expressed herself to newspapermen as impatient for the return of her husband-to-be. It will be remembered that Lieutenant Kloor was the only one of the trio of balloonists who kept his record unsullied to the end, for his two comrades engaged in fisticuffs over personal differences discovered on reaching the nearest post of civilization.

But the glamour of the almost fatal expedition into the Ontario plains of whiteness wore off when the calm superseded the storm.

Young Kloor is not "down in the mouth," at least not openly. He exhibits a good cheer that is healthy, as well perhaps as wise. The smile he made famous following the rescue from the northern icefields is still on deck.

In the meantime the girl who has refused Uncle Sam's famous young flyer has left for an indefinite rest among the Thousand Islands.

One might wonder if an engagement broken for lack of sufficient funds would weather the seasons if the funds were there. And pondering, one might wonder further anent the modern girl.

FAIR LADY TO ADDRESS KIWANIANS

Mrs. Hugh Nugent Fitzgerald will make a talk to the weekly assemblage of Kiwanians on a subject of her own choosing Monday noon at the Kemp hotel, according to the announcement of Ben Neal, secretary. This is the first time since the local club has been organized that one of the fair sex has been chosen to deliver the principal talk of the weekly program. The fact that Mrs. Fitzgerald is a well known literary light, promises something out of the ordinary, the announcement states.

Other features of the program will be entertainment in the form of daneing by Miss Anna Mae Cato, accompanied by music furnished by the Dosch Electric company. This number will be known as the "Pierrot" dance, the program committee announces.

The favors for the week will be: attendance prize, donated by Dr. Wells and silent boost by Joe Stokes. Dr. Colman will handle the gavel for the day.

In addition to the program the announcement reads that there will be several business matters to come up at the meeting.

The population of Alberta, Canada, is said to average two persons to the square mile of territory.

SPANIARDS LOSE 4000 FIGHTING TRIBESMEN.

By Associated Press.

LONDON, July 29.—Casualties suffered by the Spanish forces in the first two days of the recent fighting near Melilla numbered about 4,000, says the Melilla correspondent of the London Times, while they lost forty guns, many machine guns and eighty-five tons of munitions in addition to automobiles and a great quantity of arms and ammunition left in abandoned posts.

WARD WILL MAKE TALK TO VARSITY

Judge Robert H. Ward, who as first assistant attorney general of Texas in 1895 handled the famous Texas-Louisiana boundary dispute in which Texas was victorious, and who has practised law and sat on the bench in the state for nearly fifty years, will make a talk at the weekly luncheon of the University Club Tuesday noon on "Optimism."

Judge Ward has resided in Wichita Falls since he came to this city two years ago to represent the Bass and Kirby interests in the Red River litigation.

The talk on "Optimism," the judge's friends believe, will bring up a number of incidents from the past, which have been experienced by the veteran lawyer and advocate.

The following sketch of the life of Judge Ward was written by a friend:

"Judge Robert Hamilton Ward, son on Dr. John W. Ward, who resigned as an officer physician of the United States Navy after 18 years service to take a similar commission in the Confederate sea forces, was born in Virginia before the Civil war. He comes from a long line of distinguished Virginia and English ancestors. His youth and early manhood were spent in the place of his birth where for four long years many battles of the blue and gray were witnessed by him.

"Coming to Texas while a young man he located in Austin and in 1873 was licensed to practise law. He there represented Travis county as a member of the legislature. In 1895, Judge Ward became first assistant attorney general, and while holding that important post handled the boundary dispute between Texas and Louisiana, in which Texas was the victor. Removing to San Antonio in 1890, Judge Ward took the attorneyship of several large corporations besides doing a general practise. He continued in this capacity until coming to Wichita Falls as a counsel for the Bass and Kirby interests.

ICELANDERS GREET FIRST KING WITH SOLEMN CEREMONY

By Associated Press.

REYKJAVIK, Iceland, July 29.—The first king of Iceland set foot for for first time recently on Icelandic soil. The welcome extended by the islanders to Christian X, of Denmark, and also of Iceland, bore a solemnly fervent character, apparently more solemn than was anticpated by the gay, easy-going crowd of Danish visitors who had come over for the occasion.

The Icelanders themselves took their king's visit tremendously seriously, and regarded it as an event of momentous import. The majority of the capital's 18,000 inhabitants spent the day around the public school building, which was made the official residence of the Danish royalties, and rebaptized "the Castle." Reykjavik's 190 automobiles were taxed heavily carrying important-looking uniformed and decorated dignitaries to and from "the Castle."

At a gala dinner, Queen Alexandrine wore the Icelandic national dress, the 70,000-kroner gift of the women of Iceland. With her heavy golden crown, it made the queen look like a tapestry picture of a viking queen of old Edda times.

Iceland being "dry," the loyal toasts were honored in mineral waters and lemonade.

In commeration of his visit, King Christian has instituted a new decoration; the order of the Icelandic Falcom.

Both the king and the queen will visit historical Icelandic places on horseback. The king will be mounted on a beautiful white charger fourteen hands high; the tallest horse in Iceland.

Several excursions plannned have had to be bandoned owing to the swollen state of the rivers.

BERMUDA WOULD PREVENT LIQUOR SMUGGLING TO U. S.

By Associated Press.

HAMILTON, Bermuda, July 30.—The Colonial Parliament has just passed a special law to prevent liquor smuggling from Bermuda to the United States. Anyone putting intoxicants aboard a vessel bound to American ports incurs a fine of £25 and the penalty for a second offense is £50. Local dealers who are found to be in connivance with the law-breakers are penalised and may be deprived of their licenses.

This law, which is now in effect, was brought about, thanks to the reckless manner of carrying on illict operations during the past year. Not only were hiding places for "booze" in all parts of the ships utilised, but the smugglers went so far as to open up barrels of potatoes in the hold and insert whiskey bottles.

Discovery of this practice led to an outcry from local produce shippers who foresaw interference with their deliveries entailing delay and money losses. The Bermudians were concerned over the possibility of having the lines held up at New York by federal agents to the peril of legitimate trade and the interruption of tourist traffic on which local prosperity so largely depends.

SOME OF THE BUSINESS SIGNS OF THE TIMES.

All the world over, men are taking their losses and are beginning on a bedrock basis. There were infested business enterprises, inflated profits as well as inflated and spectacular minds in the days that have fled. There are newspapers which are devoted to the dissemination of trade information and it would be well for the pessimistic and the timid to read these journals and get their viewpoints.

Postal receipts are esteemed highly in some quarters as an indication of the general course of business, according to The Nation's Business. When compared by the months of this year with the corresponding months of last year they began to show a decline in March, and in April they reached their largest decrease, over 8 per cent. In May the decrease was not so large, and in June it almost disappeared, being but nineteen hundredths of 1 per cent. As the receipts for June, 1920, were the largest for that month in any year, the receipts for June this year are pretty near the top.

Among the 50 cities for which postal receipts are announced, 29 had increases in June, 1921, over their receipts for June of last year. St. Paul had an increase of 25 per cent, the largest proportion, with Los Angeles, Milwaukee, Richmond and San Francisco following in the figures.

According to the same authority, taxes as indications of the volumn of business may have their fallacies but are not the least interesting.

Figures now available show that in the current year the government is collecting more than last year from taxes on freight charges; the tax has remained the same, the volume of freight has fallen off, but the freight rates have gone up, to the advantage of the public exchequer. The tax upon decedents' estates has yielded 50 per cent more than in the earlier year, not because more Americans are dying, but for the reason that the full yield of such a tax is not at once reflected in the treasury's receipts.

The Panama Canal had the biggest year in its history, and produced over $12,000,000 in tolls. The tax on admission to theaters and other entertainments has produced approximately 25 per cent more than last year. On the face of the tax returns, outdoor life is regaining its feet, after the effects of war.

At any rate, the taxes on sporting goods, yachts, cameras and films show larger figures than in 1919-20, sporting goods alone accounting for a $1,000,000 increase. Chewing gum keeps pace with the articles of outdoor life. On the other hand, there must be increased inclination for comfort indoors, for the tax on electric fans will produce $130,000 extra in the last twelve months and the tax on toilet soap, etc., will turn in over $200,000 extra.

It is the contention of many of the foremost railroad executives of America that the Panama Canal is ruining their transcontinental business. All the western coast freight is carried in the bottoms of ships through the Panama Canal to Atlantic ports. The figures are a bit startling. They follow:

The Panama Canal handled 381,000 tons of cargo from the Atlantic to the Pacific in May. Sixty-four per cent originated on the eastern coast of the United States, 23 per cent (all petroleum) came from Mexico, 7 per cent from the United Kingdom and 5 per cent from continental Europe.

Of this westward traffic, 36 per cent went to our own western states, 24 per cent to the Far East, 20 per cent to the west coast of South America and 15 per cent to Australia.

The traffic moving eastward was heavier, totaling 411,000 tons of cargo. Our western coast led in the proportion of shipments, having 44 per cent. The west coast of South America followed, with 26 per cent. Australia was third, with 12 per cent, and Hawaii fourth, with practically 10 per cent (all sugar.)

Of this eastward traffic 36 per cent moved to the eastern coast of the United States, 28 per cent to the United Kingdom and 26 per cent to continental Europe.

The year which has closed was the best the Panama Canal has yet had. Even so, receipts from tolls, $12,280,000, lacked $4,200,000 of meeting the government's expenditures for the canal.

President Harding has inveighed against the cost of government. Secretary Mellon has bluntly told the national lawmakers that they must make sweeping reductions in appropriations for all the departments. All heads of state governments are singing the same song. Governor Neff has preached economy almost until he is back in the race and the Texas lawmakers are catching the spirit. According to one of the most influential of American financial and trade journals, the cost of government had not deflated with any such rapidity as say, wholesale prices for commodities. Keeping books by fiscal years that end with June, the government is not ready with its detailed figures until the middle of July. The totals are pretty accurately available, however, immediately after the Fourth of July. The total expenditure for the twelve months ended on June 30 this year was around $5,115,000,000. The corresponding figure for 1916 was $724,000,000 and for 1914 was $678,000,000.

If one follows the prevailing fashion among statisticians and takes the figure for 1913 as 100, the index figure for government expenditures in the last twelve months has been 750. The Federal Reserve Board's comparable index number for wholesale prices of all commodities never got above 204 and now is around 140. The index figure of the department of labor for retail prices of articles of food touched 219 as its peak and now is under 150. It is perfectly apparent that the government's expenditures are not altered in the same way as some folks' wages—in relation to the cost of living.

Regardless of the fact that July is the dullest month of the year in Texas, regardless of the fact that a republican congress has crept along at a snail's pace regardless of the fact that the past twelve months are looked upon as one of the most critical years since 1865 the perridical known as The Nation's Business finds some silver linings and prints them in its current issue:

The American railroads show an increase in earnings of $7,007,000 in May over April.

May operations in the building industry are described as distinctly satisfactory. For the first five months in 1921 projected building expenditures, while below those of 1920, were $250,000,000 above 1919.

There is every indication of satisfactory crops.

The Federal Reserve Board reports that banking has shown a steady growth in strength and liquidity.

A national budget system has been put into operation.

An agreement has been reached on the German reparations terms.

The English coal miners' strike has ended.

Subject "to tomorrow's news," there are good prospects for peace in Ireland.

Uncle Sam's finances are given space in the pages of the same publication. They possess value of an informative nature and they show just what happened for the twelve months of the fiscal year that has ended on June 30, 1920, or more than a year ago, when the adjustment of all matters of finance and commerce begin to show itself and the descent began from the high peaks of war prices and war traffic.

Customs fell off by a matter of $24,000,000. The receipts from sales of surplus war property, public lands and all of the odds and ends that make up the item of miscellaneous revenue decreased by $250,000,000. The productivity of the various excise taxes declined by $50,000,000. But the great fall was in the yield of taxes on incomes and profits; they dropped by $738,000,000. That would have been three-quarters of the amount necessary to pay the interest on the entire national debt.

Within a total income from revenues of $5,624,000,000 in the year which has just closed, the government managed to keep within a margin of $500,000,000. The big end of the expenditures was for governmental expenses, as they are ordinarily understood, $4,000,000,000 going for this purpose. The interest bill on the public debt took $999,000,000 more.

Of the margin of income over expenditures, almost an even $100,000,000 went to retire bonds of the Liberty loans, about $130,000,000 were paid back on war savings securities, and a good sum was used to retire Victory notes.

Old Horace Greely, according to tradition, said to the financiers of the '70's, who were discussing the resumption of specie payment, "The way to resume is to resume." Greely was a philosopher as well as a prophet. There is only one way to resume anything, that is to do it. Decades later William Jennings Bryan went over the country roaring at the top of his lungs of the dangers of imperialistic expansion, on the part of the American government. "Hell," replied Old Dave Culberson to the Peerless, "We have done expanded." In the days of Greely the ship of state rode the breakers. In the days of David B. Culberson the ship of state came safely into harbor. It is coming again.

WHERE PRINTING PRESSES ARE RUSTY.

Former Postmaster General Albert Sydney Burleson has returned to Berlin, after investigating conditions in all the countries in Central Europe. This former Wilson cabinet officer declared it is not reasonable to talk about foreign loans to Central Europe as long as the printing presses continue to pour out paper money without any gold guarantees or any prospect that the paper money will be retired.

Germany he found in far better condition than the other countries of Central Europe, but he insists foreign bankers want to see definite plans to guarantee paper money retirement and the creation of a larger gold reserve before they take a chance on making loans to the countries of Central Europe.

A very wise man and yet a very bull-headed and domineering individual in this Texan, but he is right. There can be no stability or commerce or finance in any country where the rulers of the country keep the printing presses running issuing additional bundles of paper currency and this too without a gold reserve. Business is business.

HOW HOOCH IS HANDLED.

Dr. Atticus Webb of Dallas has whispered in the large ear of the senate committee on criminal jurisprudence how hooch is handled. There is only one legitimate way of handling it. Pour it into a large size glass container. If there is no container present or near by drink it out of the bottle. That's the way they did in "the good old days." Dr. Atticus is always springing something sensational. He is able to catch the scent of hooch a hundred miles away and he just knows that county officers everywhere are in combination with the hooch sellers to prevent detection as well as to divide the swag. If the doctor had as large a stock of vision as he has imagination he would be the ninth wonder of the world. Gone are the saloon, the distillery and the brewery, never to return. There are bootleggers and moonshiners, of course, but why shoot Krupp guns at sparrows? Just now most of the people are paying taxes and giving all their time to providing their families or dependents with the necessities of life. Hooch isn't a paramount issue and the hooch hound has lost his popularity. He is in the discard and he knows it.

DROP IN MILLIONAIRES DUE TO WAR PROFITS' END.

Two explanations are given by officials of the federal treasury department why only sixty-five persons reported an income of $1,000,000 or more during the calendar year 1919, against sixty-seven in 1918 and more in the previous years.

One reason for the decrease, it was said, was the cessation of huge war profits and the other was the heavy investment in tax-exempt securities.

It was pointed out, however, that the net income of the sixty-five individuals was $152,650,245, as against $137,486,892 for the sixty-seven millionaires in 1918. The taxes collected on this class amounted to $90,026,996 in 1919 and $88,885,240 in 1918.

For 1919 the average tax was $1,523,492.25, while for 1918 it was $1,326,645.51. In 1917 an average tax of $776,063.82 was paid by 141 millionaires on a net income of $306,835,914.

The statement from which the 1919 figures were compiled is of a preliminary character. When the detailed report is made out it may be possible to speculate on the identity of the millionaires from the states in which the $1,000,000 incomes are reported. This data is not yet available.

Tables show that of the total net income of $19,859,491,448, reported for 1918, there was a personal exemption of $0,424,203,200, dividends amounting to $2,453,774,825 and interest on government obligations not wholly exempt from tax of $63,377,222, totaling $11,941,445,247. This left a net income of $7,918,045,201 subject to the normal tax.

Congress has sidetracked the tariff. Republican congressional leaders have decided to repeal the excess profits tax, to abolish the surtaxes, and that simplifies the income tax. Secretary Mellon says the sales tax proposition will not be accepted as a substitute. For four months a republican congress has been grinding. For two years the business interests of the country have been clammoring for the repeal of the excess profits tax. President Harding saw the point. Secretary Mellon saw the point. Now the congressional leaders have been whipped into line. There can be no general nor widespread prosperity until the excess profits tax has been repealed. This is the verdict of all classes and conditions of men whose activities tend to the development of new territory and new enterprises as well as the creation of new wealth.

GET EMPLOYMENT FOR THE MEN.

A campaign has been launched by the business interests of Philadelphia with this slogan, "Get employment for the men." It is said that the housing problem is acute in Philadelphia and the leaders of business thought in that city have discovered that new structures can be built cheaper now than a year ago. There are no restrictions on the production of the workers. Philadelphia newspapers advise their mayor to build school houses which are needed as well as to start other city enterprises which are needed. These public prints advise manufacturers to build additions to their plants that are needed. Richard Spillane, the noted economist, furnishes copy for one of the leading newspapers of that city. This is the advice of Spillane, "Get the men at work. They need it. They have spent their savings. Their credit at the grocery and the meat shop is exhausted. The wives and the children must not suffer. There is no profit in idleness. There has been too much idleness. The way to resume is to resume." This advice might be given with profit in other cities of America. There is a way to start the procession. There is a way to dissipate the army of idle men. Furnish work for them to do. Paying them a living wage and let them do an honest day's work for an honest day's pay.

GENERAL REVIVAL IN TEXAS.

It is gratifying to be told by the Dallas News that its reports from representative points throughout Texas show general revival of business. These reports show a feeling of confidence on the part of the people from the farms to the factories. They show crop conditions to be good, livestock to be in excellent shape and harvest satisfactory. They show industrial plants are increasing their forces. They show closed mills are reopening. They show trade is picking up. They show that West Texas has generally had her good crop season. They show East Texas with more confidence. They show that the farming and lumber industries in East Texas are looking forward to resumption of good business in a short time. They show that high priced merchandise that was in the stores has been reduced to a minimum. They show that merchants anticipating a heavy fall business are buying stocks of goods, fully believing that business this fall will reach a normal basis. They show that there is plenty of life and pep in the people and that the trend is ever upward as the Record News has contended and as all the signs of the times warrant.

WHERE NORRIS ERRED.

Senator George W. Norris of Nebraska had a slight collapse after he had delivered himself of a three-hour bitter denunciation of "the tactics of the administration. Foolish man! He should have relegated the job to Senator Jim Reed of Missouri or Senator Tom Watson of Georgia. Their tongues never tire, their flow of speech never exhausts the vital force and their words of bitter denunciation never make them fit subjects for sanitariums or seaside. Reed and Watson have India rubber throats and asbestus lungs. Give them a monopoly of the vitrol throwing.

Brazil is the United States of South America. It has a larger area than our forty-eight states and a population of only twenty-nine million. It has a large consuming population. Now why should the English and the Germans control the trade of Brazil? Why shouldn't the American exporter gather the cream of this trade? America has hundreds of idle ships. They were built by the American people. They must be paid for by the American people. Why talk of an open door in China when there is an open door for all citizens of the United States in South America?

Hides are on the free list. Oil is on the free list. What party is responsible? This is referred to the countless thousands of democrats and independents in the oil producing states and cattle producing states of the west and the southwest. Who voted for "a change?"

CONGRATULATIONS

NEWSPAPER SHOULD CO-OPERATE.

(From the Editor of the Iowa Park Herald.)

IOWA PARK, Texas, July 27.—Dear Mr. Fitzgerald: Wichita county is to be congratulated in securing your services and you are to be congratulated on moving to Wichita county. Now the newspapers of the county should co-operate with each other in making the county the best in the old state. I know you are in for doing your utmost to the end.

W. DICKSON.

(The makers of the Record News believe in co-operation and the community spirit and the markers of the Record News are willing to join hands at all times and extend hearty co-operation to all men who believe in the forward march of the race and in all the good works that are necessary for the advancement of the best moral and material interests of home and state and country.

BEWARE WHEN ALL MEN SPEAK WELL OF YOU.

(From an anonymous letter writer)

To the Record News:

Wichita Falls, Texas, July 28.—Don't you think it about time for you to quit publishing encomiums on Hugh Nugent Fitzgerald? Not that he is not a good fellow and a smart man but the reflex action is a handicap. Macauley, himself, Washington Irvine nor the inscrutable Brann could occupy the high pinnacle upon which they might be placed by their fulsome brothers.

NO SIGNATURE.

This recalls a story. "Fingy" Conner was a famous New York state political boss and the owner of two influential Buffalo newspapers. "Fingy's" enemies said he was a dock rat but he arose from poverty to vast riches and great political power. Wilson Bissell was the law partner of Grover Cleveland and when Cleveland became president, Bissell became a cabinet officer. When wealth and fame came to Conner he was adopted into the clubs of Buffalo. In his accumulation of wealth he gathered into the Conner casket a large collection of costly sparklers. On dress parade in his evening attire he bedecked himself. At a club function one night, Bissell remarked to "Fingy" Conner, "It isn't good form to wear so many diamonds, either at public or private functions." "Fingy" looked lovingly at the sparkler on his finger, toyed with the immaculate jewel on his immaculate shirt-front, played with the gem suspended from his platinum watch chain, made a calm survey of the bejewelled men and women around him and turning to the eminent lawyer and political leader replied: "Wilson, thim that have thim is wearin' thim."

MAINLY ABOUT PEOPLE

(Continued From Page One.)

and who never forget. If the mayor gives them an opening, they will insert their blades. They would destroy him without scruples or without remorse of conscience in order to rebuild their old and broken machine and restore to place the barnacles who always did the bidding of the big and the little bosses.

"Baseball is two-thirds psychological and one-third physical," remarked Rev. H. D. Knickerbocker to H. N. F. the other day as they watched the ball tossers perform, from Box Sixteen. Dr. Knickerbocker is a fan. He knows the game as the scholar knows his books. "Baseball is a science," he continued. "It is largely brain work. I am reminded of this by an article I read the other day in a newspaper. The writer thereof said: "That the ball players of the future would be exclusively college men." Preachers and editors are over-worked individuals. Next Tuesday the doctor is going to Los Angeles for a five weeks vacation. He preached his first sermon there when he entered the ministry twenty-seven years ago. Los Angeles had a population of fifty thousand then and when the choicest business lot in the heart of the city sold for fifty thousand dollars. The natives were reduced to a comatose condition ten years after the same lot sold for two hundred and fifty thousand dollars. More than likely it is worth a million dollars today, without improvements. Los Angeles boosters had only climate to sell. They have built a city of more than a million which shows they are some salesmen. Of course the doctor is to be congratulated. It is a joy forever to take a daily plunge in the Pacific, to motor over the finest roads in America and to cast the eye upon some of the most gorgeous show places in the continent. He is wise in taking it. Overworked preachers, like overworked editors need recreation. If H. N. F. were a preacher, and it goes without saying that if he were he would be over worked, he would permit the sinners to go to hell four or five weeks every year just when dog days were approaching. On their return from hell, they would either mend their ways, and expiate their expect when summoned to take the sins or they would know just what to Long Long Trail.

SAYS MOSCOW FOOD CRISIS SHOULD BE OVER.

By Associated Press.

RIGA, July 20.—Moscow papers say that the local food crisis there should now be over, as food shipments have come in both from abroad and from the provinces, and that regular distribution should now proceed. The basis of current distribution of bread is, however, only three pounds for five days to workmen of the "preferred" classes, and only one pound for five days to the "non-preferred" classes. The former are also to get four pounds of herrings.

Reports from Petrograd state that 41,000 tons of food stuffs, mostly flour, herrings, beans, rice, etc., have either arrived or are en route for the capital. More than 1,000,000 scythes and thousands of other agricultural implements have already arrived there.

MEN CHARGED WITH UNLAWFUL ASSEMBLY

Special to the Record News.

AMARILLO, July 30.—Six men, charged with unlawful assembly in connection with a night visit last week to the home of Henry Adams, near Matador, Texas, entered pleas of guilty and were fined $82 each on Wednesday, according to belated matador advices. C. L. Burden, alleged seventh member of the visiting band, was killed when Adams opened fire from within his home. Adams is under bond pending official investigation of the affair.

UNCLE SAM'S DEADLY AIM WILL SOON PUT THE OLD RASCAL OU OF THE RUNNING

OIL SHALE INDUSTRY CALLS FOR NEW LINE OF ENDEAVOR

WASHINGTON, D. C., July 30.—The future of the oil shale industry in this country depends largely on the relative supply and demand for petroleum products, particularly in the Rocky Mountain district, according to the U. S. Bureau of Mones. There is a strong probability that in years to come the production of petroleum may so decrease and the demand so increase that oil shales may be largely needed to supply the deficit of crude petroleum as a source of refined products.

The oil shales of this country contain enormous quantities of oil, but large amounts of money will have to be invested before the oil shale industry becomes of commercial importance. Estimates of the cost of a complete retorting plant, handling 1,000 tons of shale a day, are between $1,000,000 and $5,000,000 and if the average shale treated yielded 42 gallons of oil a ton it would probably require at least 130 such plants operating 365 days a year to supply the volume of crude oil that was consumed in this country in 1920, and the shale mined daily would amount to approximately one-half the coal mined daily in this country. However, it is hardly to be expected that shale oil will be called upon to replace petroleum completely, for a great many years. Although the Scotch industry has been existent for more than 50 years the amount of shale oil produced in Scotland during 1920 was less than two days' average production of crude oil in the United States during the same year.

Calls For New Training.

The oil shale industry is not strictly comparable to the petroleum industry. It is a completely new industry for this country and calls for new training and experience. After the oil has been removed from the shale the problems connected with its refining are much more complex than are those of refining petroleum. Obtaining oil from shale is not comparable to obtaining crude oil by drilling. In drilling an oil well the element of chance has to be taken into consideration, but there is always the possibility of a large immediate reward on a relatively small investment. After oil has been struck the cost of transporting it to the refinery is in most cases relatively small, as there are systems of pipe lines lines throughout the oil fields.

In producing oil from shale the original cost of the shale in place is practically nothing at present. Estimating the supply of oil recoverable from a given tract involves little difficulty for a few test holes and analysis can establish the thickness and the richness of the bed in a similar manner as the value and extent of a coal deposit is estimated.

It must be realized that the production of oil from oil shale is a large scale manufacturing enterprise that involves the handling of large amounts of low-grade material. It is comparable in many respects to the extraction of gold or copper from low-grade ores. The original investment for equipment is heavy, the operating expenses high, the profit per ton probably small, and a large daily capacity and good management are essential for profits.

A Question of Time.

In this country the oil shale industry can not be developed over night and probably can not attain success until large sums of money have been spent in perfecting mining, retorting and refining methods. A company to be successful, whenever oil shale operations become commercially feasible, must be able to employ the best technical, business and engineering skill available, be prepared to operate on a large scale, and be financially strong enough to wait several years for any large return on the money invested. A large amount of credit will naturally be due those pioneering companies that will carry development work so far that whenever the petroleum industry fails to meet the demands for its products the oil shale industry will be in a position to make up the deficit. It is unfortunate that a large number of the many companies organized to deal with oil shale are devoting their efforts to stock selling rather than assisting in building a firm basis for the industry.

Up to the present time, more than 150 companies have been organized in this country for the purpose of developing or selling stock in oil shale enterprises. At present there are no shale oil operations that have reached commercial production, although there is a great deal of activity in Colorado, Utah, Montana, Nevada and California, where there are large and easily accessible deposits of rich shale and some shale oil has been and is being produced. Other parts of the country also contain large deposits of bituminous shale.

Large Deposits of Shale.

Several small plants have been completed and are operating from time to time and others are under construction near DeBeque, Colo., one plant is under construction and one operating near Watson, Utah, besides two small plants near Elko, Nev., one near Dillon, Mont., and one in California. Several experimental and demonstration plants have been erected in the large cities contiguous to the shale fields. A few plants are also being constructed in some of the eastern shale districts. To date none of these plants have operated under conditions that could be considered commercial, nor have they produced more than small quantities of oil during intermittent or short runs.

In a bulletin reviewing the oil shale situation, just issued by the Bureau of Mines, the following conclusions are drawn:

Theer are no commercial oil shale plants operating in this country at the present time, although there is a well established industry in Scotland. Many American shale deposits are richer in recoverable oil than Scotch shales now being worked and probably nearly equal in nitrogen content, which is a measure of recoverable ammonia.

Market conditions for shale products are less favorable in this country than in Scotland.

Great quantities of American shales are of greater thickness and better suited for mining than Scotch shales.

No Process Has Been Used.

As yet no process for obtaining oil from oil shale has been used in actual commercial practice in this country.

Indications are that the United Staes can not continue long to depend on domestic petroleum production to supply completely the demand for petroleum products, and that sooner or later our shales will have to be used to help supply the deficit.

The shale oil industry can not hope to supplant the petroleum industry in a large way for many years, but will probably grow up from local industries in favorable places.

Costs of oil shale operations can not be reliably estimated until commercial practice in this country furnishes the necessary basic data.

The quantity, quality and value of products and by-products to be obtained from oil shale in this country are not known with any degree of certainty.

The oil shale industry is a large scale, low-grade raw materials manufacturing enterprise, requiring large capital, high technical and business ability, and probably making slow return on the investment. Only when economic conditions become favorable for the development of the oil shale industry and satisfactory mining, sorting and refining processes worked out and markets established, should be only ordinary business risks connected with the industry.

WARNS BRITISH OF AMERICANIZATION OF CHINESE PEOPL

By Associated Press.

LONDON, July 30.—A solemn warning on the menace to Britain of the "Americanization of China" is uttered by a special far-eastern correspondent of the Daily Mail, who recently attended the tenth anniversary celebration of the American University (Tsing Hua) College in Peking.

The college was established as a result of the United States government remitting part of its share of the Boxer indemnity.

"The boys here are China's future leaders," the correspondent says, after pointing out that they all go to America after completing their studies in Peking, he continues:

"Educated under the American system, aware that they owe the scholarship to American justice, and saturated with American sentiment by five to eight years' residence in the United States, they will look to America solely for cooperation in the troublous years to come. America is rearing the China of tomorrow.

"What should not we? (the Britsh) he demands, "share an influence that we formerly monopolized and that is now slipping away from us?" and he goes on:

"I asked a returned student as he watched the boys at baseball what China did not look to England as an educational field.

"Sure we will," he replied, "when you remit the Boxer indemnity."

The Chinese president of the college put it to the correspondent this way:

"Chinese-American friendship has become so proverbial that few people take the trouble to investigate the cause of such good international understanding. Any country that wishes to captivate the hearts of the Chinese can do not better than follow the example set by America."

B. Lenox-Simpson, an Englishman who holds the post of political adviser to the Chinese government, and who is at present in London, writing to the Daily Mail that the process of the American section of China is very real one.

"Big business," he says, "is tending to go more and more to America firms, because the Chinese believe in favoring those who favor them," and he concludes:

"The helpfulness of America, not only to Young China but also to Old China is a subject of common conversation, throughout the immense Chinese society which fills the far eastern continent. So far the results of this have not been felt or understood in this country, but unless we take speedy action, we are destined to drop during the next few months to third or fourth place in the Chinese republic, and thereby at our feet our whole standing throughout Asia.'

Japanese paper currency of 188 bears the figure of Jingo-Kogo, who was empress of Japan in the third century.

WOMEN ARE GAINING ON TEXAS MEN

Census Figures Show Female Population Tending Toward Numerical Equality.

By B N. TIMMONS
Record News Staff Correspondent

WASHINGTON, July 21—The female population of Texas is increasing more rapidly than the male, according to figures for the state announced today by the census bureau.

These figures show that from 1910 to 1920 the male poulation increased 19.4 percent and the female population increased 20 percent. The males increased from 2,017,626 to 2,409,222. The female population increased from 1,878,016 to 2,54,000.

In 1910 there were 107.4 males to every hundred females and in 1920 there were 106.9. Should the percentage of females continue to increase there would soon be as many women in the state as men.

The white population of Texas increased 22.3 percent from 1910 to 1920, while the negro population increased but 7.5 percent.

The foreign-born element increased in the last decade, constituting but 6.2 percent of the total in 1910 and 7.7 percent in 1920.

The white population of Texas increased from 3,024,848 in 1910 to 3,-918,165 in 1920. The negro population increased from 690,049 to 741,-694; Indian 702 to 2,100; Chinese from 595 to 773; Japanese from 340 to 449; all others, including Fillipino, Hindu and Korean, from 8 to 38. The foreign-born whites in the state increased 239,984 to 360,519.

FALLS HEIR TO BREWERY IN BAVARIA

Special to The Record News.

WASHINGTON, July 27.—How would you like to inherit a brewery?

Clair Simmons, a grocery clerk of Lima, Ohio, has just fallen heir to what many persons in the United States would consider the most desirable thing which one might possess. For it is a brewery in full working order and unrestricted as to its product by any prohibitory laws.

But the brewery is in Bavaria and the thing that is bothering Mr. Simmons is how he is going to get possession of it.

Simmons and his mother, who is a widow, have just been notified by lawyers in Berlin that they are sole heirs to an estate of relatives who have died in Baden-Baden, Bavaria, leaving the brewery property and the real estate on which it is situated to them.

All the members of the family were either killed in the world war or died following the war and the Lima relatives are all that are left to take over the property.

Mr. Simmons has been interviewing the state department for several days with a view to getting passports for himself and his mother to proceed to Germany and take over the brewery property.

FIRE GUTS AVIS HOME ON NINTH

Fire, believed to have been started from burning grass, partially destroyed the temporary home of Jake Avis, 2700 Ninth street at about 2:30 o'clock Saturday afternoon, causing damage estimated at $3,500, according to the report of Fire Chief J. L. McClure.

The building, which was destroyed, had recently been completed and was to have been used by Mr. Avis as a temporary home until his permanent residence could be erected. He had just moved several truck loads of furniture into the house and had not yet begun to occupy it as his home.

Mr. Avis was not certain whether the furnishings were protected by insurance at the time of the fire or not.

MUSGRAVE FUNERAL TO BE HELD TODAY

Funeral services for Jimmy Musgrave, 17 year old son of Mr. and Mrs J. H. Musgrave, who died Thursday afternoon at 5 o'clock following an accident on his father's farm, will be held Sunday morning at 10 o'clock at the Freiberg church.

The deceased was fatally injured when his team became frightened and bolted, while he was plowing with a disc harrow. He was thrown in front of the harrow which passed over his body, fracturing his skull and severely mangling his body about the head and shoulders. The accident occurred about 10 o'clock Thursday morning.

Burial will be at the Thornberry cemetery.

DISMISSED OFFICER SCORES GOVERNOR

MONTGOMERY, Ala., July 27.—Conrad W. Austin, dismissed last night by Governor Kilby as chief of the law enforcement department of the state, today asserted there was no complaint against the department until its activities touched the "rich, prominent and politically influential." In a letter to the governor, Mr. Rustin asserted "your whisky bunch at Mobile have called you to dance, music or no music, and you are dancing."

INAUGURATE NEW PORTO RICAN GOVERNOR

By Associated Press.

SAN JUAN, Porto Rico, July 30.—The new governor of Porto Rico, E. Mont Reilly, was inaugurated today with the customary ceremony.

A TENDERFOOT'S EXPERIENCE IN OKLAHOMA

By T. A. B.

Some few years ago, when I was just a gaiky youth, working in a general merchandise store, down in a remote mountain district in Kentucky, it became my lot to read of the extraordinary possibilities of the great Oklahoma, the queen of the prairies, printed in glaring headlines, arranged by some two-by-four real estate dealer who could possibly muster up the price of ham and.

To me, a boy who had been reared on a farm, gradually getting together enough education to master the multiplication table, and later getting a job—not a position thank you!—in a store, where my principle duties were the feeding of horses, doing the chores around the proprietor's home, freighting merchandise from the railroad station, candling eassng and packing eggs, these possibilities looked to be a veritable "Fritter tree and honey pond" proposition. Especially so, because for my renumeration I was paid the enormous salary of fifteen dollars per month.

By denying myself a few of the luxuries of life, I finally managed to save up the required amount of a railroad ticket, and presenting myself at the station agent's window requested a ticket to Altus, Okla.

"There ain't no sich place ez Altus" insisted the agent as he shifted his chew of tobacco to the opposite side of his face, "Leastwise this here map don't show it" and adjusting his spectacles he scrutinized the railway map from A to Z.

I insisted that there must be such a place, and produced a letter bearing the post-mark of Altus, in which the writer assured me that he was blessed with a railroad station in this city. Nevertheless my good friend the agent, not being able to find such a place on the map, consequently could not sell me a ticket to it.

I later learned the reason for this omission. The town mentioned was once called Leger, but the few inhabitants decided they would change the name to Altus, and at the same time of the compilation of the above railway time table they had not fully decided which name it should possess, consequently both names were omitted.

I knew that the town of my quest was in close proximity to Mangum, and finding such a burg on the map, I lost no time in divorcing myself of my hard-earned kale to the tune of a paste board bearing the name of "Mangum, Okla." So boarding a home-seeker's excursion train, I turned my back upon the hills and hollows of old Kentucky, and my face toward Oklahoma, the land of my dreams.

None Can Appreciate.

None but those who have traveled on a homeseekers' excursion can hardly appreciate the extraordinary (in) conveniences of this mode of travel—good soft cushions—and never having to experience the pain of having the Pullman porter to worry you by arranging your berth, or to be troubled with the dining car's husky summons, "First call for breakfast."

About three or four days of this excellent trip found us winding our way through the broad expansive plains of what I thought the greatest country in the world, the land of the west, where a young man is wont to go and "grow up with the weeds (I mean the country.) After switching our train over divers roads, we headed west on the Frisco and finally pulled up to a little station where we heard a loud and furious call of "A-L-T-U-S!"

Grabbing my valise I headed for the platform, where I was greeted with many yells of "Bus for any part of the city." I looked around and absolutely no town could I see, but climbing into a cab, the hungry looking driver assured me that the city was located some ways out in the country and that if his horses could make the riffle we would arrive there in time for dinner. On my way up I very innocently asked why the depot was located so far from town, and was informed that it was in order to have it near the railroad.

Suffice it to say that a week or two of residence in this town caused me to become acquainted with all the citizens, including a young banker, with whom I formed a warm friendship. He had his room over the bank and at that time all buildings in that city were not blessed with janitors, so needing someone to help him care for his domicile, he very cordially invited me to take up my abode with him, which I willingly did.

Things went well with me, and I was fast becoming accustomed to the ways of the "wild and woolly west" and could no longer be called an absolute "tenderfoot," until one night I had an experience which I will long remember.

Remembers Jesse James.

In my boyhood days I had read many hair-raising stories of the Jesse James type, and had pictured in my mind that all throughout the west lurked bandits, train robbers, bank robbers and murderers, and it was so impressed upon me, that even until that time I was not so sure that it was not a fact.

Upon the occasion mentioned above, after I had performed my duties at the store, which kept me until a late hour, I very promptly went to my room and lost no time in "hitting the hay." My friend, the banker, being out "doing society," I turned the light down low (a coal oil lamp being our only mode of illumination) as I was in the habit of doing when he was not in. I was just beginning to doze, when I heard a heavy step coming down the hall, and as it had a peculiar sound like the rattle of spurs, I breathlessly waited. Reaching the door of our room, he opened it and there in the dim light of the coal oil lamp I saw by first bandit. Dressed from head to foot exactly the same as I had always pictured them—big white hat, heavy shirt, corduroy trousers, boots, spurs, belt scabbord and six-shooter, long black shaggy hair, short stubby beard and long black mustasche. Walking over to the table he unbuckled his six-shooter and slammed it down upon the table and turning he gazed at me from underneath the brim of his big Stetson.

By that time I was having many thoughts, and I was fearing that my bandit would detect my scare but the unusual thumping of my heart,—in fact the more I would swallow, the more determined my heart would be to remain in my throat.

"Where is Mr. ....." he asked, in about as gruff a voice as was possible.

I Don't Know.

My answer as near as I can remember was "I-I-I-don't know, sir."

Seeming to be disappointed he turned to the table, buckled on his gun and without a word left the room. I listened until the last sound of the boots and spurs died away down the hall, and then I began to get real scared. Was his motive bank robbery, if not what could he want with my banker friend? My first thought was that he was in search of the bank keys—but how was I to warn my room mate.

Vague thoughts of robbery, and murder were flying through my mind, when I heard the sound of two persons coming up the hall. This time I recognized the voice of my banker friend, and hearing what seemed to be a very friendly conversation, my fears left me. They came into the room and turned up the light, and there stood my friend and the awful bandit, seemingly the best of pals.

The mystery was soon solved. I learned that my bandit was a prosperous cattle man who lived some ways in the country, and who was a personal friend of my room-mate and a patron of his band. Being in town until a late hour, and imbibing just a little too freely he decided to spend the night with the banker. But finding a new face in the room he decided he was in the wrong pew.

On going just a short distance up the street he met my room mate who was returning from his society stunt, and returning with him spent the remainder of the night without any further mishap. Later, my "bandit" friend whose name I'll not disclose at this time took "the cure" and bade John Barleycorn adieu, and we also became good friends, but you can guess that he always made it convenient to relate my tenderfoot experience when he got me in a crowd.

Local Merchants Preparing for Biggest Men's Season in Years

Wichita Falls merchants dealing in men's goods, as well as dealers in all parts of the country, are preparing for the biggest men's season they have ever experienced this fall, according to Harry Baum.

"The men have not bought any clothes, that is as buying clothes goes, for nearly three years," Mr. Baum says. "They realized that clothes, as well as everything else, had gotten too high, and would have to come down. So they have waited.

"Now, they are satisfied that they are as low as they will go.

"In fact, buying has been such, already, that the clothing market has strengthened, and is even a shade higher than it was during the depth of the depression which came on it. It has hit bottom, and has recovered some.

"We find even now, before the fall clothing has hardly started moving to the retailer, evidences of the character of business that is coming this fall. Our customers are already indicating their intentions this way.

"They are going to buy good stuff all right. But that does not mean that they are going to do the reckless buying which characterized the boom here. They won't. They will be more discriminating.

"They are not going to buy any carry-over stuff—merchants are closing that out—if they know the signs of the times—at prices which will move it out. And that means offering of exceptional values, by the way.

"We have been through a depression, but I firmly believe that is past. I believe that most of the people of Wichita Falls are much better off than they ever were before—that is unless you mean the flash prosperity of the boom. I am talking about prewar times. Everyone has a good deal more money than they had before the war, and their dollar will now buy about as much.

"And I am taking that into consideration when I say that we will have a great men's season this fall. When I say the biggest business in years, I don't mean the wild orgy that the oil boom brought. I mean a good old fashioned prosperity, such as we used to have, when the profits of all will be real, and both business men and their customers will be better off than they have really been for years."

INSURANCE MEN GIVEN BIG BANQUET

Celebrating the victory of the panylocal agency of the American National Insurance Company which led every local office in the United States in a contest which was started on January 1 and ended June 30, a banquet was tendered the local force Friday afternoon at the Kemp hotel, with the headquarters office as the host.

Y. C. Keen, superintendent and Ed J. Senac, assistant superintendent, were announced as winners of first prizes in their class. This was declared a distinct honor for the two men, as the American Insurance company has agencies in every state in the United States.

Those attending the banquet were announced as follows: Y. C. Keen, Ed J. Senac, A. B. Sims, W. R. Chance, M. Newlin, J. H. Holden, E. W. Hanks, Mr. and Mrs. O. C. Blanton, Misses Robbye Harrison and Eva Chance and Dr. F. R. Collard.

CATTLE CAR SHORTAGE TO BE RELIEVED

WASHINGTON, July 30.—Shortage of cattle cars in Northwest Texas is to be relieved as a result of action of the Interstate Commerce Commission.

Representative Parrish today sent the following telegram to Representative Hudspeth at Comstock, setting out the situation.

"The Interstate Commerce Commission advises that the Kansas City, Mexico and Orient railroad reports that it is short one hundred single deck and twenty double deck cars. Orders have been placed with its connections, the Santa Fe, the Missouri Pacific, the Rock Island, and the Texas and Pacific railroads for these cars. The Rock Island is furnishing the Orient twenty single deck cars, the Texas and Pacific is returning a number of cars to the Orient under the rules. General Manager Bernardi of the Orient states that if he can get twenty more double deck cars from the Missouri Pacific or the Rock Island, he will be able to take care of all orders.

WICHITANS PLEASED ON GAS OFFER

Members of the city council, in common with other Wichitans in most all of the local walks of life, displayed a lively interest in the project of W. M. Priddy and other local operators by which they have made an offer to supply the North Texas Gas company with gas at a rate which will permit the lowering of the rate here, as told in an exclusive story in the Record News Saturday.

Commissioners agreed with the general interpretation given by the Record News as that of those Wichitans who knew of the affair, that the offer calls the hand of the North Texas Gas company, and of the Lone Star Gas company, with which they are in litigation, as the real nature of the apparent break between them.

Belief that the project of the operators here, who own around 25,000,-000 feet of gas per day in the Duncan pool, was entirely feasible, was expressed by members of the council.

Members of the commission expressed themselves as feeling that the project afforded the local distributing company a real chance to give cheaper gas in Wichita Falls, if taken advantage of.

A sentiment to the effect that the city, with this production available, as well as that available through the Texhoma gas field in the South Burkburnett field, will have cheaper gas this fall regardless of the subsequent actions of the gas companies, through active steps taken by the city in the matter.

"We will have 50 cent gas back by December, at least," predicted one member of the council.

HUGHES AND GEDDES TALK CONFERENCE

By Associated Press.

WASHINGTON, July 30.—Secretary Hughes and Sir Auckland Geddes, the British ambassador, spent more than an hour in conference today discussing, it is understood, the details which must be arranged frior to delivery of formal invitations to the proposed conference on limitations or armaments and the Far East.

No official report of the conversation was afforded but it was said that the British government probably would not insist further upon a preliminary conference and would not interpose serious objection to having the conference convened early in November.

It also developed during the day that the French government is not adverse to November eleventh, the anniversary of armistice day as the day for the first meeting and that unofficially Italy, Japan and China have indicated their willingness to accept that date.

Satisfaction with recent developments was expressed by officials and there were indications that the invitations would be sent out early next week.

NEW MATRON SELECTED FOR Y. W. HOME

Mrs. Beulah Bush Boggis, formerly matron at Trinity University, will have charge of the Y. W. C. A. boarding home, Charlotte Kemp Hall, after September 1, according to announcement made Saturday by the association headquarters. Mrs. Boggis is acting as Travelers Aid substitute during the summer, when the regular secertaries are taking their vacation.

The older residents of Wichita Falls will be much interested to know that Mrs. Boggis is a daughter of the late Dr. Bush, at one time pastor of the First Christian Church of this city.

THEIR ADVENTURE HAS COME A CROPPER

By Associated Press.

QUINCY, Ill., July 30.—Two 18-year-old boys from Oklahoma City and two girls from Kansas City, arrested here for passing worthless checks, have confessed, according to police, that they started out to see the country and pay their way with bogus paper as they went along. The boys are B. M. Newland and Winard Shaefer. In Kansas City, they picked up Eva Gordon and Stella Marshall. They were traveling in au tomobile which Newland said belonged to his mother.

SELECT JURY FOR TRIAL OF H. J. TOUSSAINT

(Continued From Page One.)

Monday morning without the defense at this time having a bill of exceptions which might later be the grounds of reversal or remanding, should the verdict be unfavorable to the defendant and the case be appealed.

Every member of the jury is a member of a protestant church or is inclined toward the protestant faith. Several are members of secret orders but none are members of any secret organization to which membership is ordinarily not open to members of protestant churches. This condition was brought about by the defense who have carefully questioned all prospective jurors on these points throughout the four days of examination and have used their right of pre-emptory challenge where necessary to bring about this result. It is understood that this will have a bearing in the case as presented by the defensee.

Favor Death Penalty

All members of the jury are in favor of the death penalty as a punishment for crime where allowed by law and the evidence in their opinions warrent it. All members have no objections to insanity as a defense for any crime and will acquit the accused should they find from the testimony to be presented in the case that by a preponderance of the veidence the accused was insane at the time he took the life of his father in the manner alleged.

In the selection of the jury the state used thirteen of the fifteen pre-emptory challenges allowed it by law while the defense exercised the same right in twelve cases.

Following is the personnel of the jury in the order of its selection:

Guy Roberts, 35 years, old, farmer, married, living three miles northwest of this city.

G. W. Lawler, 38 years old, barber, married, living in this city.

E. D. Mason, 25 years old, farmer, married, living near Burkburnett.

E. B. Gosline, 60 years old, retired real estate owner, married, living in this city.

J. W. Mix, 46 years old, gardner, single, living in this city.

C. E. Adams, 34 years old, cafe proprietor, married, living in this city.

J. S. Owens, 50 years old, driller, married, living at Iowa Park.

J. W. Bradley, 45 years old, furniture business, married, living in this city.

Sam Ashmore, 40 years old, former railroad employee, married, living in this city.

G. W. Stanfield, age not stated, insurance business, married, living in this city.

H. H. Karrenbrock, 26 years old, real estate business, single, living in this city.

W. A. Soule, 43 years old, painter, married, living in this city.

Exhaust Two Veneirs

In the selection of the jury, which has consumed more time than that of any case tried in local courts in recent years two special veneirs of 200 men each were exhausted and in addition the sheriff's department secured 150 talesmen all of whom, however, were not examined. One hundred and forty-six men have actually been examined from the witness stand as to their qualifications as jurors in the case. A large number of those summoned were excused on general grounds by the court.

A feature of the examination of the prospective jurors Saturday was the decreasing number of talesmen who claimed to have conscientious objections to the death penalty. In the three previous days a majority of the men excused had presented that cause.

Saturday only a few of the 50 examined objected to capital punishment with an increasing number excused because they had formed opinions deemed prejudicial to the rights of the defendant.

J. C. Bradshaw, H. B. Hayes, Sheldon Smith, J. A. Harris, and L. H. Frank were challenged Saturday by the defense without cause after being accepted by the state while the state exercised its right of peremptory challenge in the cases of C. J. Arrington, Travis Lanier, T. C. Sisk, Joe L. Art, S. Walker, B. M. Burgan and Solon Humphries.

Defense Shows Heat

While the examination of J. A. Harris was being conducted defense attorneys after some heated queries to the prospective juror as to whether or not he had expressed opinions in regard to the case, asked for a judicial inquiry as to the truth of his answers to questions. Defense attorneys claimed that a short time before he was called to the stand Harris had expressed an opinion against the defendant. The inquiry was dropped a few minutes later at the request of the defendant's attorneys who exercised their right of peremptory challenge to keep the talesman off the jury.

Following are the talesmen examined Saturday: F. E. Curtis, W. H. Streel, E. J. Harrison, O. H. Watland, Dave Paul, A. G. Savelli Sr., L. E. Cowling, J. C. Bradshaw, S. M. Winters, C. J. Arrington, H. B. Hayes, Sam Ashmore, Travis Lanier, A. B. Maples, W. S. Malone, A. B. Womack, T. C. Sisk, Jack Gotcher, J. A. Harris, Jim Young, W. W. Noe, W. B. Reeves, J. H. King, C. A. Simmons, J. B. Williams, R. L. Yates, H. H. Karrenbrock, Fred Taylor, H. S. Ford, R. S. Dunaway, C. H. Hardeman, E. W. Wood, B. M. Burgen, Joe L. Art, J. B. Young, Walker Hendricks, H. S. Zaum, G. W. Stanfield, S. Walker, W. M. Frank, R. F. Gvame, Joe Young, J. D. Parnell, Solon Humphreys, Sheldon Smith, L. H. Frank, Kit Cowan, C. W. Staley and W. A. Soules.

TIRE RING BLOWS OUT, CUTTING MAN

Struck across the forehead by an automobile tire wedge ring, which was blown from its place, while he was putting air into the tire, J. L. Zachary, manager of the Quailty station, sustained a painful cut Saturday afternoon at 5:30 o'clock.

Zachary was stooping directly in front of the wheel and holding the air tube, when the accident occurred. The inner tube blew out, throwing the wedge ring with such force that Zachary was dazed for a short time, according to witnesses. He was rushed to the Wichita General hospital in an O. W. Hines Undertaking company ambulance, where it was learned that the wound was not serious

SOLONS URGE RECOGNITION OF MEXICO

(Continued From Page One.)

by using the available fund but when an amendment added several days ago providing that this fund shall be used for buildings and repairs only no provision was made for these branches. Representative Satterwhite offered a substitute to the Bonham amendment which would have allowed the available fund to be used for these purposes but it was defeated. The Bonham motion carried.

The house devoted the morning to debating whether remarks written by Representative Smith of Travis came under a point of personal privilege. He asked that a letter be read and printed in the journal in which he said that in the thirty-eighth legislature he would seek to repeal the bill passed at the thirty-seventh regular session allowing the taxes of seven counties surrounding Nueces county to be used for twenty-five years for improving the Corpus Christi port. After debate as to whether the remarks were privileged Mr. Smith sought to withdraw the letter in which he had rebutted Representative Pope for the amendment he offered to the university bill yesterday.

Remarks Not Printed.

Finally the house voted that the remarks should not go in the journal on a ruling which the speaker submitted to the house.

President Hardings' move to call a worldwide conference to discuss disarmament was adopted by the senate. It has already passed the house.

Telegrams were read in the senate from the Rotary clubs at Waco and Ranger protesting against cutting the salaries of university professors and those of other state educational institutions. A similar letter from ex-university students at Mineral Wells was read.

No action was taken on the report of the penitentiary investigating committee was submitted today. It will be considered in the house next Tuesday.

The senate concurrent resolution authorizing the committee to investigate the killing of two convicts recently on the Eastham prison farm by a state guard was adopted in the house. A similar resolution by Martin of Lamar that the committee investigate the killing of Louis Smith, a convict, by another convict on the Eastham farm on May 10 was also adopted after Mr. Martin had pointed out that the prisoner's parents had been unable to obtain details of their son's death.

NORTHCLIFFE AFFAIR STIR BRITISH PRESS

(Continued From Page One.)

George, denying the reported interview.)

British newspapers display the entire affair at great length and under large headlines this morning. The papers controlled by Lord Northcliffe contain brief editorials, calling attention to the denials of both King George and Lord Northcliffe.

The Times, in an early edition, assumed that the reporter who took the alleged interview was "mislead by ignorance of British constitutional practices, but dramatized the conversation with such technical skill," that the government was induced to accept his version "of a purely imaginary conversation between King George and the prime minister."

Not in Later Editions

This statement does not appear in later editions of the Times, neither does the Times nor the Daily Mail, another Northcliffe paper, offer a further explanation of Lord Northcliffe's share in the incident, but both devote considerabe space in commenting upon the king's correct attitude in relation to the opening of the Belfast parliament.

The Mail says that it is unnecessary to remind its readers regarding the attitude of the Northcliffe press "toward the throne of England and the revered sovereign who occupies it."

"The king," it continues, "has done more than anybody to bring about a new understanding of the Irish problem, and to advance the cause of Irish peace, but he has acted, as he always acts, within the limits of his constitutional position."

After ridiculing the attribution of such "nonsense" to the king, the Morning Post says that Lord Northcliffe's denial was needed "as the words ascribed to him were not entirely out of character to other authentic utterances from the same lips."

The Daily News, suggesting that the whole affair may prove to have been a hoax, adds:

May Prove Hoax

"The lesson to be drawn will be simply the danger of semi-royal progress in foreign countries of peripatetic potentates of undefined status. They not only are a jest in themselves, but are an invitation to the practical joker, and a joke in these serious times may be exceedingly serious and exceedingly costly."

The Chronicle says that Lord Northcliffe appears to have gone to America with the intention of doing what he could to make Premier Lloyd-George unpopular there, and "thus queer the pitch for the British government in the coming disarmament negotiations in Washington."

Herald Censures Both

Both Premier Lloyd-George and Lord Northcliffe are censured by the Herald, which says editorially:

"It is a diverting piece of low comedy, with two great demagogues as back-chat comedians. * * * The whole silly squabble is just a music hall turn put on for two purposes, first, to gratify the vanity of these two worthies, and secondly, to divert the people's mind from things that really mtater."

TEST SANDS IN REXFORD

Three sands were tested in the No. 1 Rexford of Verschoyle and Tate during the past week, according to reports from the lease Saturday, none of them proving sufficiently productive. The test is now drilling around 1350 feet.

The three sands were encountered at 1197, 1216 and 1375 feet, it is reported. This test is in the new north Texhoma gas and oil pool, where the sand is found from 1360 to 1380 feet

Fort Worth & Denver Railroad Makes Arrangements to Conduct Schools for Culling Poultry

Arrangements have been completed by M. B. Oates, agricultural agent of the Fort Worth & Denver railroad, for poultry culling schools for county agents and demonstrators in 17 counties on this road to be followed by an extensive campaign among the farmers to rid their flocks of "non-producers." These schools will start about the first of September, Mr. Oates said, and will be given at centrally located places.

Each of the county agents and demonstrators along the Denver has been informed of the movement to rid the poultry flocks of the non laying hens and it is understood that they are working up interest in scientific culling. With a favorable field to work in, Mr. Oates believes the schools will accomplish much good.

About one third of all of the hens in the average farmers flocks are non producers, Mr. Oates says, figures have shown, and with this dependent class of hens eliminated, he says, a saving of a considerable figure will be shown. From $50,000 to $100,000 will be saved in the 17 counties along the Denver by an intellingent culling of the poultry each year, he says, which is greater than the combined salaries of the home agents and demonstrators.

The culling campaign has been purposely postponed until this time of the year, Mr. Oates said, on account of the fact that experience has shown that hens which molt late in the summer are the best layers. This fact is one of the chief tests employed in culling.

Mr. Oates was in College Station the past week attending the annual meeting of county agents and agricultural agents of Texas. He reports a very profitable session and much good resulting from the lectures and demonstrations on subjects of interest and importance in his line of work.

migration is no more a question with America than with great Britain which is Japan's ally. Such a problem can be solved with the progress of civilization and mutual understanding. It is not the whole American nation that objects to Asiatic immigration on racial grounds. America is free country, where any sort of opinion can be expressed with perfect freedom. It is not surprising, therefore, that from the Japanese standpoint some of the arguments in America about Japan may seem too bold and reckless. It is a mistake to think, however, that these views represent public opinion in America.

"The question pending between Japan and the United States at present are likely to be solved with the passage of time. It is true that there are some Americans who are not satisfied with Japan's doings in China and Korea, while there are other Americans who perfectly understand Japan's position.

Japan is not without faults. During the progress of the war, Japan concluded with China what is known as a military agreement, by which it was undertaken that Japanese officers should be engaged as instructors in the Chinese army, and the common use of arms by the Japanese and Chinese was stipulated in the agreement. This not unnaturally gave rise to the suspicion among the Occidentals that Japan is attempting the Japonisation of China in the same way as Germany contrived the Germanization of Turkey.

"But really educated, thoughful Americans do not believe in such a thing as war between Japan and America."

COMPLETE 4000 FEET OF PAVING

Approximately 4,000 feet of the concrete road now in the process of construction between Iowa Park and Electra was completed during the last week according to information Saturday from the office of Potts and Prentice, road contractors. The week was the first during which both mixers were at work on the road between two towns.

One crew with mixer is working west from the Abernathy corner just west of Iowa Park and the other is also working west from a point near the Tom Burnett ranch house.

Work has not as yet started on any of two sub-contracts let for the construction 6 miles of paving in and near Iowa Park and Electra. Several culverts are in the process of construction between Iowa Park and Electra on the highway which will be paved.

PROFESSOR STEINBRUGGE SAYS

In dramatic art much is made of motivation, planting, dramaturgy and climax. The theater is fundamentally a place of amusement and incidentally a place of education. To amuse and educate at the same time is genius. That which is artistic is often the mental attitude which is taken toward a thing. The imagination plays such an important part in dramatic productions that it is not advisable to be too theoretical in producing a play. The recent prize fight was the outcome of conditions which exist at the present time. Perhaps the same men would not have been matched to meet each other, let us say, ten years ago. Dramatically speaking, it was wonderful. Financially speaking, it was gorgeous.

The play must have a human interest and must deal with a subject which is easily understood or can be taught to the public with the aid of the press. It does not matter if the audience understands it in various ways and according to each individual's mentality. It might deal with a temporary fad or pet idea. The magnetism of an actor or actress might make it a success. Patriotism has been used to good advantage in the drama and morality has been treated from all angles—triangular and otherwise.

Playwriting is so easy that it is remarkable that more people do not take it up.—Marcel Steinbrugge.

PAST AND FUTURE

Look not on the receding past;
You cannot call it back;
(That vessel drifts with shattered mast—
It is a ghastly wrack.
Look not behind on youthful loves;
Time sweeps them with its waves;
The heart of former summers roves
'Mong unresponsive graves.
Gaze forward on that distant shore
That's called Futurity,
And let your dreams sail on before
Across life's restless sea.

No rocks shall gore your vessel's side,
No storms shall stay your course;
But you shall cross the ocean wide
And never know remorse.

The goal is aye before your face,
Burnt cities in your wake.
Gaze backwards not, ahead's the place;
Thence keep your eye awake.
—Frederick Schenck Schlesinger.

Prices have been cut, but the cuts are very thin.

TRASH FIRE.

Fire in a large galvanized trash tank in the rear of the Dosch Electric company Saturday night at 11:15 o'clock occasioned a short run by firemen.

The fire was extinguished without damage

RECOMMEND LAW TO OUST COMMISSION

AUSTIN, July 30.—That a law so that prison commissioners can be removed by trial be enacted and then such proceedings be instituted to oust G. W. Pryor, member of the prison commission, from office because of his "indifference and willful failure in discharge of his duties," is recommended in the report of the joint legislative investigation committee submitted to the special legislative session today. This law is recommended "in order that the cumbersome and enormously expensive methods of impeachment need not be resorted to," the report states.

The report is thirty-five pages in length and describes the findings and gives recommendations of the committee which was authorized by a resolution in the regular session last February.

The committee recommends that the use of chains as a means of punishment be abolished; that the segregation and classification of prisoners be carried out by law. They charge the latter has been grosely neglected.

A board of supervision composed of three members, one of whom shall be a woman, to serve without pay, is recommended. This board shall visit the prison and farms and report their findings to the governor quarterly; a law requiring proper sanitary conditions is recommended; sufficient money to support a discharged convict for thirty days after discharge is recommended as is a reward for meritorious conduct.

The committee found that Commissioners Pryor and Sam D. W. Low, the latter since resigned and now a member of the house, purchased 260 mules and horses for thirty nine thousand dollars and that these animals were actually worth $15,880 and that the state was grossly defrauded out of $23,400. The committee recommends that the attorney general's department investigate this deal and bring suit against Bassett Blakely, seller of the mules, for damages. They also recommend that the deferred payments on the Fort Bend cotton oil mill be not paid and that the attorney general's department bring suit to set aside this purchase. The committee found that the mill was purchased for $125,000 which was far above its worth.

The committeee rcommends that Gus Harris, present warden of the main penitentiary, be discharged permanently, finding that he had been re-employed after being discharged.

The committee recommends a centralization of the entire system, with absolute sale of all lands and relocating the centralized system at a point within fifty miles of Austin. They recommend that factories be constructed and properly equipped with sufficient farm land adjoining it for the employment of convicts peculiarly fitted for farm work; that no farming be done to any extent with the exception of that which would make the penitentiary system self-supporting. Under the centralized plan they point out that separation of prisoners as to age, sex, color, prison record and criminal inclination would be more practical and effective.

A rock crushing plant to be operated in conjunction with the state highway department is recommended.

The committee points out that they have given careful thought to the penitentiary system and are convinced that until a centralized system is adopted, mismanagement, brutalities and mistreatment of prisoners, and financial loss will continue. When the system is centralized and placed under efficient management "then, and not until then, can the people of Texas, expect relief from the enormous burden of taxation for the support of this system."

The committee found nearly every regulation and law of the penitentiary had been violated, that the sanitary, food and living conditions were grossly neglected and cited specific instances confirming their findings. The educational, spiritual and medical attention of the prisoners has been grossly neglected and in this connection the committee recommended the discharge of a number of sub-heads.

Senator Lewis of Nacogdoches, submitted a minority report in which he objected to removing the main plant at Huntsville. He recommended that the system go out of the farming business except barely enough to feed the prisoners. He also said he thought failure and refusal of convicts to do a reasonable amount of work under proper conditions should be a sufficient reason for punishment.

DALLAS STREET CAR MEN GET WAGE CUT

DALLAS, July 30.—Approximately 1,000 employes of the Dallas Street Railway company, including office workers, conductors, motormen and common laborers will be affected by a 10 per cent reduction in wages, which is announced to take effect Monday morning.

MIGHTY (SOMETIMES) SLABSMAN ABRAHAM BOWMAN, LACES APPLE O'ER THE FIELDS AND FAR AWAY

Oh! See the ball go over the fence!
Good-bye, old game, good-bye.
'Twas none but Abe that slammed it hence
Good-bye, old game, good-bye.
—With apologies to Anybody.

Truly fans, 'twas none other than that doughty slabman, that mighty (sometimes) swatsman, our distinguished fellow citizen, Abraham Bowman who whanged that horsehide, imparting thereto sufficient propelling force to send it sailing over Bert Bean's coffee pan in the distant part of left center, paralyzed proceedings sufficiently to allow himself and two fellow spuds to pat the pan, untie the count, and sufficiently subdue that brash crew at Beaumont that the Spudder onrush continued unchecked to the seventh straight victory, 10 to 6.

Nay, more than that, Abraham's mighty wallop and its consequences allowed the Salmites to crawl up right beside Hampat's Marines and secure sufficient foothold that they will be in a position to shove them off into the water today, should the aforesaid Hampat win or lose.

However, after carefully and judiciously considering the situation from all angles, it appears that it was a matter that was squarely up to Abe. He couldn't do anything else. Nothing else could have quite filled the bill.

Abe Thinks It Out.

For, as it no doubt occurred to Abe as he carefully analyzed the situation while dragging his no inconsiderable proportions toward the battters box, the thing must be done now or never. Here was a bunch of ruthless and irreverant invaders, who had most impolitely taken advantage of the consideration accorded them by the courtly Rube Marshall, and had even for a time threatened to run away with a game which the fans had rightfully decided belonged in the Spudder mit bag. Even now, the score was tied, and if events should finally transpire in such fashion as to require a goat from the local crew, the goat would without a doube be Abe. Convinced, therefore, that it was the proper thing to do, Abe toed the mark and performed to the entire satisfaction of all.

Moreover, with the lead gained by his own lusty swat and that of his mates during the consequent break in the Exporter morale, Abe did yeoman's duty on the slab, and held some rubber out of alien reach, except in the sixth, when an invader slipped through with the aid of one of those weird performances which Tex McDonnid has to get off his system once in a great while.

Not Whole Show.

Abe, however, was not the whole show—not by a considerable amount. When timely blows were desirable, the Spudders produced them, and although lacking one of the total accredited to the visitory, they made them do double duty as far as the run column was concerned.

Bob Bescher, the terror of the base paths, and Cecil Griggs, the speedy successor to Froggy Rothfuss, were outstanding figures in the offensive. Bob's offerings for the day included a double and a triple, and Cecil produced three safeties, one a perfect bunt which he beat out clean, and another crashing double, all figuring in the scoring. Jake Miller also furnished diversion at one stage of the game with a three-ply blow against the left field fence, which missed going over the top by inches.

Scott did not furnish even as great a problem for the Spudder offense as Rube did for the Exporters, for the Spudders slammed him offerings right back each time his mates counted against Rube, for that many and more. Kraft was some better, and made the going tougher for the local bastmen, but they did not strike anything really wicked until the eighth, when Meine was sent in and fanned Bescher. Gross and McDonald in a row.

The Dirty Work

The visitors started the dirty work in the second frame, when they counted twice. Alexander picked four balls, and was sent to second when Durst singled to center, Ripperton grounded to Works, whose throw to Clark, covering first, was off color, and all hands were safe. Alexander counting and Durst taking third. Doyle popped to McDonald, but Durst scored when McDonald booted Scott's bounder, Ripperton getting second. Stansbury forced Scott at second, ending the session.

Jake Miller started out to get revenge for the Spudders, by driving to the boards of the left field fence for a triple. He scored on Grigg's safety to center, Works walked, and Kitchens got a lucky double through Stansbury, Griggs counting and Works getting third. Rube Marshall took three swings, but Bescher cleaned the sacks with a double down the third base line. Gross and McDonald went out in order.

Beaumont started to the top again in the third when Mathis was safe on a scratch hit through the box. Smith singled to center, Mathis advancing. Both runners took another on Alexander's sacrifice, Mathis scored on Marshall's wild heave, Smith getting third. Durst singled over center, scoring Smith, and going to second himself when Miller fumbled the ball. Ripperton flew out to Griggs, Durst going to third after the catch. He scored on Doyle's single to left. Marshall was yanked at this place and Abe Bowman relieved him. The scoring stopped when Scott flew out to Griggs.

As set out above, the Spudders got back all that they had lost and more without delay. Clark walked. Miller flew out to Smith, but Griggs beat out a perfect bunt which crossed up the opposition, Clark getting second. Works got an infield hit to Mathis, beating the Beaumont first sacker when both slid for the plate, Clark scoring. Griggs got second on the play. Kitchens forced Works at second, Griggs taking third. Kitchens stole second. Both counted a second later when Abe Bowman lifted his wallop over the fence. Bescher slammed one against the boards in left and continued right on to the home plate when Stansbury's relay hit him in the back. Kraft rushed to the rescue at this point, Gross touched him up for a single, but McDonald made the third out, to Mathis unassisted.

Beaumont added another in the sixth when with one down Kraft doubled between Bescher and Miller, and scored a moment later when Tex McDonald stood in a trance and watched Jake's peg go into the Beaumont dugout.

Wichita Falls's last one came in the eighth when with one down Griggs doubled to left center, and scored on Caddy Works' single to right. The score:

CATS 4; BEARS 2

FORT WORTH, July 30.—Fort Worth defeated San Antonio in the first game of the series this afternoon 4 to 2, through the excellent pitching of Buzzer Bill Whittaker, the one eyed pitching ace of the Cats. Moore turned in a brace of doubles off Mutt Williams, Bruin flinger. It was as perfect a game as has been seen here this season, not a batter reaching first on a walk or through being hit by a pitched ball. Score:

GLEASON AND EDDIE COLLINS MAKING REORGANIZED WHITE SOX TOUGH FOE

Kid Gleason, left, and Collins.

Last spring the consensus of opinion was that the devastated but cleansed White Sox would be lucky to escape last place. But they have kept far from that berth so far. With youngsters in the infield and outfield and only two good catchers they have given the league leaders a battle. The bulk of credit for their winning goes to Kid Gleason for his keen management and Eddie Collins, who has steadied the team on the field and helped Gleason put fighting spirit into the new outfit.

BABE RUTH PASSES CENTURY MARK IN RUNS SCORED, REGISTERING 101: HEILMANN AND HORNSBY HOLD LEAD

By Associated Press.

CHICAGO, July 30.—Babe Ruth, baseball's home run king, has the distinction of being the first player in the major leagues to pass the century mark this season in runs scored. The American League slugger has registered 101 times for the Yankees. In the National League Frank Frisch of the Giants leads in runs scored with 77, according to averages released today which include games of last Wednesday.

Ruth batted out only three singles in the four Yankee games since compilation of the last averages, but stretched his total base record to 259 bases. This total is the result of 113 hits, which include his 36 home runs, which are unchanged from a week ago, 24 doubles and 7 triples. Ruth is batting .355.

Harry Heilmann, the slugging outfielder of the Detroit Tigers, was the only member of the leading seven batters, who have played in 55 or more games, who added to his mark of a week ago. He added one point and is heading the list with an average of .430. Ty Cobb, pilot of the Tigers, dropped a point, but continued to trail his outfielder with an average of .380, while Tris Speaker, manager of the world's champion Indians, slumped three notches behind the Georgia Peach with .381.

S. Harris of Washington added a brace of stolen bases to his string and is showing the way to the base stealers with 19. His closest rival is George Sisler, the St. Louis star, who is trailing with 16.

Other leading batters: Tobin, St. Louis .378; Severeid, St. Louis .366; William, St. Louis .362; Veach, Detroit. 351; E. Collins, Chicago .351; Sisler, St. Louis .351; Sewell, Cleveland .346.

Kelly Comes to Life

George Kelly of the Giants got back into his home run stride during the past week and cracked out four circuit drives, bringing his total for the season to 17, according to averages released today including games of last Wednesday. Meusel, formerly with the Phillies and now a teammate of the slugging New York first baseman, and Rogers Hornsby, the St. Louis star, are Kelly's closest rivals for four-ply drives, being tied with 12.

Hornsby, who brought his total base collection to 235 during the past week, continues to top the National league batters with an average of .416. He made his total base record on 147 hits, which included 26 doubles and 13 triples.

Pep Young of the Giants has tied Cutshaw of Pittsburgh for the runner-up honors to Hornsby for players who have participated in 55 or more games. They are tied with .362, while McHenry of St. Louis, is next with .358.

Frisch of New York, who with 77 is high man for runs scored in the league is out in front among the base stealers, having pilfered two bases during the past week. His string now is 28.

Other leading batters: Meusel, New York .354; Maranville, Pittsburgh .341; Fournier, St. Louis .340; R. Grimes, Chicago .339; C. Williams, Philadelphia .339; Maisel, Chicago .333; Roush, Cincinnati .333; Mann, St. Louis .333.

GUN CLUB MEN MISS "LATE" LITTLE, THEIR FORMER SECRETARY

J. L. Nabb was high gun in both the singles and the doubles event at the weekly shoot of the Wichita Falls Gun Club, breaking 48x50 in the singles and 20x24 in the doubles. The affair, as one member of the club expressed it, was "a nice little morning shoot, but we all felt rather blue without the smiling presence of Layton Little." Little, former secretary of the club who was drowned on a fishing trip a few weeks ago, has been sadly missed by hundreds of Wichita Falls men and women.

The results:

J. L. Nabb	48
Painter	45
Greenburg	43
Frazier	43
Dempsey	42
Winston	41
Bowen	40
Henson	40
Hopkins	40
McDaniels	39
Cameron	34

Double Event, Possible 24.

Knab	20
Winston	18
Greenburg	17
Henson	16
McDaniel	15

Annie Laurie, of the famous song, really lived, but the composer of the song, William Douglas, did not marry her, for he was killed when fighting under Marlborough in Flanders.

MOTOR SUPPLY LOSES TO METHODISTS

The Methodists made a runaway race of their Twilight league game, with the Motor Supply last evening, winnig 17 to 4, the game being called after the first half of the fourth on account of darkness. Score:

BOB BESCHER'S BAT WORRYING LOOP LEADERS

By WILLIAM B. RUGGLES.
Statistician, Texas League.

Clarence Kraft and Hack Eibel kept their relative batting averages about in statu quo during a week of fairly light hitting. The Forth Worth first sacker tops the circuit with a .355 figure, Eibel is eight points behind him. Frenzied batting has gone into a decline and the top notchers are sliding backwards. Jim Galloway has lost out in his bid for the time being and the present shadow is thrown over the leaders by the swinging bludgeons of Bob Bescher and Joe Munson. Charle McDonald fought his way into the .300 class with his notable feat of eleven consecutive hits. Kraft is still an easy leader in runs scored. The .300 hitters through last Wednesday's games follows:

Player—	G	AB	R	H	BA
Badger, Bt.	5	1	1	1	1.000
Kraft, FW	102	394	91	140	.355
Bolden, Hn.	28	69	5	24	.355
Eibel, St.	103	363	71	126	.347

Kitchens, WF	91	320	39	97	.303
McDonald, WF	93	346	64	104	.301

Pitching Statistics.

Joe Pate continues to top the winning pitchers in spite of a challenge by the veteral Eddie Donalds and a defeat in the week. Pitching averages show a tendency to stabilize, the high men losing a few games and the low figures coming up. Pate has now participated in the most innings, leading his team-mate Wachtel by five. Holingsworth of Wichita Falls has fanned 155 batsmen, 55 more than Red Bird, his closest challenger.

Thirty pitchers have won half or better of their games to date. Those with this record through Wednesday's games follows:

Pitcher—	G	IP	W	L	Pct	BB	SO
Badger, Bt.	6	16	1	0	1.000	7	0
A. Miller, WF	1	9	1	0	1.000	9	6
Pate, FW	34	220	19	6	.760	42	38
Donalds, Hn.	21	136	11	4	.733	42	38
Goodbr'd, FW	17	87	5	2	.714	11	25

Eibel, St.	3	10	1	1	.500	8	7

Slugging Leaders.

Kraft and Eibel are still hooked up in a battle for the slugging honors with the Panther in the lead by four extra bases. Leaders of the league are:

Player—	2b	3b	4b	RB
Kraft, FW	27	12	23	120
Eibel, St.	27	13	21	116
Clark, WF	29	5	13	78
Connolly, SA	29	7	10	73
Galloway, Ds	29	5	8	65
Rigney, FW	23	29	7	62
Sears, FW	24	5	9	61
Moore, FW	26	3	8	59
Munson, Ds	29	7	8	57
Whiteman, Hn.	37	7	3	57

Clarence Kraft has driven in an even hundred runs this season. Other tally makers are: Eibel, St., 87; Connolly, S. A., 71; Clark, W. F., 70; Jackson, St., 66; Sears, F. W., 66; Galloway, Ds., 62; Kitchens, W. F., 54; Rigney, F. W., 53; Whiteman, Hn., 53; Schliebner, Gv. 50; McDonald, W. F., 50.

GULF DEFEATS TELEPHONE CO.

In a six inning game between the Gulf Production Company and Telephone company teams of the City League Saturday the oil producers did the heaviest hitting and won by a score of 12 to 8. Norwood for the Gulf team knocked a home run in the fourth with three bases occupied, Luersey for the Telephoners knocked a three bagger with three on in the fourth. Score by innings:

YOUNG CATCHER IS MAKING A NAME WITH BROOKLYNS

J. W. Taylor.

J. W. Taylor, young backstop with the Dodgers, has been getting a good chance to show his worth behind the bat this season and shows the makings of a star.

CONQUERS MONT BLANC

CHAMONIX, France, July 30.—Mount Blanc, the highest summit of the Alps, was conquered today by an aviator. The successful airman was Durafour a Swiss flier, who had previously failed in two attempts to land on the summit.

Today, setting out from Lusanne, he rose to a great height and ultimately effected a landing on the mountain peak, 15,782 feet above sea level.

Taking off from the summit, Durafour made a favorable descent, finally landing at Chamonix.

Of the 300 medals with which Marshal Foch has been honored by France and the various governments, he wears only one decoration—the simple Croix de Guerre.

BRAND "SOX" AS MURDERERS OF BASEBALL

CHICAGO, July 30.—Branding the indicted White Sox players as "murderers of sport, who if allowed to go free, would ruin baseball just as racing and boxing were ruined," Attorney Edward Prindiville today concluded the first half of the state's closing argument in the baseball trial.

Monday the defense will begin ten hours of argument allotted it with indications that Judge Friend will hold court long enough for the nine attorneys to finish their pleas. The state will make its final rebuttal Tuesday and the case should be in the hands of the jury the same day. Six weeks will have been taken up then.

Mr. Prindiville demanded the maximum punishment for the indicted men.

"These men are killers," he told the jury. "They conspired to kill baseball, to murder our greatest sport, to defraud the public and their comrades—even to defraud the children of this country—your children and my children to pay their bleacher admission fee to watch their he

GIANTS AND REDS SPLIT DOUBLE BILL

CINCINNATI, July 30.—New York and Cincinnati in a doubleheader today broke even, the locals taking the first 8 to 1 and the Giants the second 12 to 1. Kelly made his eighteenth home run in the second game. Score:

PRESBYTERIANS STOP TEXAS CO.

The winning streak of the Texas company baseball team of the City League was stopped by the brethren of the Presbyterian church by a score of 13 to 7 in a free hitting contest Tuesday afternoon. Home runs by Sandifer, of the Texas company, and Wesendinger, of the Presbyterians, in both cases with the bases two-thirds inhabited, were features of the game.

The batteries were: Texas company, Smith, Basham and Davis; Presbyterians, Wesendinger and Shankle.

CONDUCTING REVIVAL.

Special to the Record News.

CLARENDON, Texas, July 30.—Dr. John W. Tyndall of Atlanta, Ga., has been having a revival here by the Christian church in a large tabernacle erected for the purpose. The revival will continue next week. Dr. Tyndal is both an able as well as a very forcible speaker and has brought many into the church during his stay here. $125,000, but the university board of trustees authorized only the initial units.

When these are completed, probably by the opening of the football season, the field will seat 5,000. Twenty other sections are to be built from time to time as athletics develop at the municipal university, ultimately bringing the seating capacity to 15,000.

Probably no stadium in the country will have a more picturesque setting than Cincinnati's. Designed in the shape of a horseshoe, the open end at the north will give a wide sweep of country, while the east and west flanks will be built on rather steep hillsides. This natural advantage will substantially cut the cost of construction. The stadium will be of concrete with ornamental entrances.

CINCINNATI ALUMNAE TO BUILD STADIUM

By Associated Press.

CINCINNATI, July 30.—Students and alumni of the University of Cincinnati this autumn will engage in a drive for $15,000 to build the first three sections of a new stadium at Carson field. Originally it was the plan to erect the stadium complete at an estimated cost of

GREAT BRITAIN'S DEBT SHOWS DECREASE.

By Associated Press.

LONDON, July 29.—Great Britain's external debt now amounts to 1,161,563,000 pounds, a decrease for the year ending March 31 of 117,151,000 pounds, an official return states.

The chief creditors are: The United States, 972,704,000 pounds and Canada, 53,339,000 pounds.

We wish to thank the good people of Wichita Falls for their love, sympathy, and support so generously given our brother J. R. Bilyeu, while he lived and worked among them; and especially those who gave their assistance during his recent illness; and for the many floral offerings sent to his funeral.

UNION PRINTERS IN ATHLETIC MEET

By Associated Press.

DETROIT, Mich, July 30.—Twelve cities will compete for the championship of the Union Printers' National baseball league here July 31 to August 6.

Union printers and apprentices make up the amateur nines. The cities they hail from are New York, Washington, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Cincinnati, Indianapolis, Pittsburgh and St. Paul. Games will be played on Navin Field, home of the Detroit Tigers.

An application from Toronto, Canada, for a membership in the league will be considered at a meeting preceding the games.

A cup donated by Garry Hermann of Cincinnati is among prizes to be played for.

This league, which covers more territory than the major leagues, is maintained with the idea of educating the younger members of the printing industry in the arts of the craft and making them better men physically, according to Secretary-Treasurer Ed Springmeyer of St. Louis.

You must add Victor Record 18742 to your musical library. Nunn Electric Co., 909 Scott, Phone 5837. —Adv.

Town Topics

Mr. and Mrs. Fred Morris and Mrs. W. W. Murphy and daughter, Faire, will leave Sunday for Dallas, where they will spend two weeks visiting relatives and friends.

Miss Margaret Grow, Latin teacher in the Hockaday school at Dallas, will arrive Monday to be the guest of her sister, Mrs. E. S. Goodner, for several days.

Mrs. Ed Gardner and daughter, Pauline, of Archer City, are guests of Mrs. D. G. Whitney.

Mr. and Mrs. C. C. Foster and daughter, Mary, left Saturday for a two weeks' trip to their former home in South Texas. They will visit friends in various cities on the way.

Mrs. S. E. Funston left Saturday afternoon for Colorado Springs and Denver, where she will spend the remainder of the summer.

Mrs. Lottie Jordan of Fort Worth will arrive Monday to be the guest of Mrs. L. E. Stewart on Austin street.

F. A. Helgerson, of Helgerson Bros., local real estate dealers, returned Friday from a six weeks' vacation in Colorado and Illinois points. Mr. Helgerson reports some building going on in Chicago as there is a great shortage of homes, but that many of the factories are closed down or running part time, with many men out of employment. In Kansas City, there are a great many vacant stores in good locations. Everything considered, he believes Wichita Falls is in splendid condition compared with cities he visited.

Roy E. Carfer, secretary to Superintendent Grace of the Katy, left Saturday afternoon for Fort Worth, where he will visit over Sunday.

J. C. Wittenberg, of the aKty office, left Saturday for Waco.

Mrs. H. J. Crozier, night secretary of the Travellers Aid, has returned from her vacation spent in Fort Worth and other points.

Lawrence Nolen, of the First National Bank, Tully Brown, of the American National Bank, and Lee Haney, of the First National Bank, leave today for a trip to Mineral Wells, Fort Worth and other points.

Mrs. W. O. Davidson and daughters, Miss Irene and Mrs. Le Doux Smith, leave today for a vacation trip to Medicine Park, Okla.

Mr. and Mrs. J. W. Stone, and son, Robert Allen, and Mrs. C. L. Anderson, left Saturday by automobile for Long Beach, California.

Mrs. O. E. Maer and daughter, Miss Marian expect to leave Tuesday for Colorado Springs on a vacation trip.

ROLLS ROYCE PLANT TEMPORARILY SUSPENDS.

SPRINGFIELD, Mass., July 30.—The Rolls-Royce company of America, closed its plant in East Springfield today for five weeks. Approximately 800 employes have been at work in the factory which has been operating on a full time basis. Recent passing of dividends by corporations has seriously affected prospective buyers of the cars, it was aid.

GRAY LAG WINS HANDICAP PURSE

WINDSOR, Ont., July 30.—Grey Leg, Sam Hildreth's star 3 year old won the $20,000 international handicap at Devonshire park here this afternoon. Black Servant was second and Bygone Days third. The time was 1:50 and the distance one mile and a furlong.

Service

—Is a little and seemingly simple word, but it is one of the cardinal principles upon which our business is conducted upon which, we realize, rests success or failure.

—We are trying to carefully watch and study every detail that enters into Service. We have an honest desire to make our Service as nearly PERFECT as possible.

—If you don't get the Service to which you feel, as one of our patrons, you are entitled, we will consider it a favor if you will advise us. You will find us ready and anxious to correct any defects.

——You will always find us glad to hear from you——

KEMP HOTEL ANNOUNCES

That commencing Monday, August 1st, there will be a

Reduction in Price of Food

—IN—

MAIN DINING ROOM

LUNCHEONS 11:30 TO 2 P. M.

Fifty and Seventy-five Cents

A cold bottle of Blatz Beer served with luncheon if preferred

—We have set aside a part of the main dining room, behind screens, exclusively for gentlemen. Here business men can come for a quick cold lunch, without the necessity of wearing their coats. Service quick and informal.

Dinners 5:30 to 8:30

One Dollar and One Dollar and a Quarter

—These dinners will appeal to the tired housewife after a long hot day. Why worry with preparing a meal over a hot range when you can get a delicious dinner at such a reasonable price?

SERVICE A LA CARTE

—The above menus do not in any way affect our regular a la carte service, which has also been materially reduced.

Dated this the 23rd day of July, A. D., 1921.
F. H. MERRIAM.

THE STATE OF TEXAS.
TO THE SHERIFF OR ANY CONSTABLE OF WICHITA COUNTY, GREETING:
You are hereby commanded to summon Ellie Hardin by making publication of this citation once each week for four successive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the Seventy-eighth District court of Wichita County, to be holden at the court house thereof in Wichita Falls, on the first Monday in September, A. D., 1921, the same being the 5th day of September, A. D., 1921, in a suit numbered on the docket of said court No. 11055-B wherein Lizzie Hardin is plaintiff and Ellie Hardin is defendant and said petition alleging, that plaintiff and defendant were lawfully married in August, 1908, though more than five years ago the defendant abandoned plaintiff, without any fault on her part, and refused to live with her continously during said time and has not during said time contributed anything to her support.
WHEREFORE, premises considered, plaintiff sues, prays for citation by publication, and upon final hearing for an absolute divorce, for costs of suit, and general and special relief both in law and in equity.
Herein fail not, but have before said court, at its aforesaid next regular term, this writ with your return thereon showing how you have executed the same.
Given under my hand and the seal of said court, at office in Wichita Falls, Texas, this the 1st day of July, A. D., 1921.
A. P. KERR, Clerk.
District Court, Wichita County, Texas.
By EUNICE JACKSON, Deputy.

Important Announcement

For owners of production located in the northwest and Electra fields.

I have completed arrangements whereby an almost unlimited amount of money will be invested in production located in the northwest fields and Electra fields. I assure you that this arrangement does not refer to the "So-called New York concerns" that have pretended to buy production here for the past two years. These purchasers are real oil people and your production will be inspected by experienced oil men.

You will not be asked to sell for part cash and balance in part of the production, but an outright purchase will be made without an option or a tieup of any kind. If you really want to sell and willing to sell at a price which would be in line with present conditions, either call, phone or wire me at

FILE CHARGE AGAINST NEGRO FOR FORGERY

Alleged by complaint of officers to have forged an indorsement of the Dixon Motor company on an American Express company money order, Charley Nash, negro, was taken into custody Saturday by City Detectives Lenly Humphries and Bob Hembree.

The money order was reported by officers to have been for $35.

A white man also was taken into custody Saturday by City Detectives Jack Miller and John Boone. Checks drawn on Judge John C. Kay for a total of $107 were reported by the detectives as the cause of this arrest. Two of the checks were for $36 each and the third for $35.

According to the officers the bank officials declared that the signature to the checks were forged. One of the checks was indorsed in the name of W. W. Morley and two of them in the name of H. M. Morley.

FIND LINGERIE STOLEN FROM P. B. M. AT NEGRO'S HOME

Four pieces of women's silk underwear, said by officials to have been a part of the loot taken when the P. B. M. store was burglarized last week were recovered Saturday by City Detectives Humphries and Hembree.

The articles which were said to be worth approximately $30 were reported to have been found in the possession of a negress.

The officers reported that the woman identified one of the negroes, now being held in the county jail in connection with the robbery, as the man who sold her the goods. The two negroes were arrested last week by City Detectives Jack Miller and John Boone, immediately following the recovery of about $2,000 worth of the goods.

KEMP HOTEL CUTS PRICE FOR DINERS

General reductions in prices of meals served in the main dining room to individuals and of dinners and luncheons served to clubs at the Kemp hotel will take effect Monday, it was announced Saturday afternoon by H. J. Foerester, manager of the culinary department.

Luncheons, to be served at 50 and 75 cents in the main dining room, are announced from 11:30 a. m. to 2:30 p. m., these prices to carry with them the option of a cold bottle of Blatz beer.

As a special feature of the luncheon service of the Kemp hotel, Mr. Foerester announces that a portion of the dining room will be marked off with screens where the business man is invited to come in his shirt sleeves and join his fellows for a midday meal.

The dinners, which are to be served between the hours of 5:30 and 8:30 every evening are announced at the prices of $1.00 and $1.25. Mr. Foerester declared that he expected this dinner to have an especial appeal to the housewife during the hot summer months, when their dinners at the reduced price will relieve the necessity of preparing their meals, when the dinner can be obtained at his hostelry at these reduced prices.

Prices for the noon-day luncheons for the various organizations, which meet at the Kemp hotel during the week will in the future be 50 and 75 cents, according to the announcement.

Prices in the a la carte service have also been materially reduced, Mr. Foerester announced.

FUNERAL SERVICES FOR DIGGS TODAY

Funeral services for Herbert Diggs 18 years old, who was crushed to death Thursday afternoon when caught beneath an overturned tractor near Sharon, Okla., will be held Sunday afternoon at 1:30 o'clock at the residence of Mrs. Ella Schultz, 2100 Tenth street, grandmother of the deceased. The services will be conducted by Rev. C. M. Byers, pastor of the local Lutheran church.

The body arrived late Saturday evening from Woodward, Okla., accompanied by C. A. Carpenter, brother-in-law of the deceased. It was received by the Merkle-Lunn Undertaking company.

Besides the grandmother, with whom he made his home, the deceased is survived by two brothers, Robert and Harold and one sister, Mrs. C. A. Carpenter, all of this city.

AVIS WILL CONDUCT SCHOOL IN CHAPTER

A school in the chapter and council will be conducted at the Masonic Temple during the coming week by J. D. Avis, illustrious grand conductor of the work of the Grand Chapter of Texas, it was announced Saturday by W. J. Webb, secretary of Masonic bodies of Wichita Falls.

The class will begin each evening at 7 o'clock, according to the announcement.

Trotzky Declares Soviet Leaders Cured of Some of Their Illusions

Leon Trotzky.

NEW YORK, July 18.—Penetrating for the first time the fog of conflicting reports and rumors as to the mental attitude of the Russian Soviet chieftains—their hopes and disappointments—the International News Service is able to give exclusively today the judgment of Leon Trotzky himself as to what he thinks has been and can be accomplished by the doctrines upon which the Soviet republic is founded.

In a speech before the International Communist conference at Moscow, held in the later part of June, and which has not been published, even partly, on this side of the Atlantic, the Bolshevist War Minister Lenine's right-hand man, admited for the first time that the Bolshevist's goal is "not so near the hand as it seemed to many of us three or four years ago." He gave what he believed to be the reasons therefor, and added an expression of confidence that the Soviets would yet attain their aims. He showed at the same time that Moscow has not yet given up its hope for a "worldr evolution."

The text of the speech, as wirelessed from Moscow to Berlin, was received by the International News Service in a circuitous route. It is this speech presumably, upon which were based the many recent erroneous cable dispatches to the effect that Lenine and Trotzky, had confessed to collapse of their doctrine and system. While the Red War minister's speech contains no such admission it does bear unmistable earmarks of deep disappointment, if not partial disillusionment.

To avoid errors or garbling in transmission the speech was forwarded to New York in the original form and language—German—in which it was cabled to Berlin, neatly pasted up in strips upon profusely stamped blanks of the "Telegraphic des Deutschen Reiches," which still bear the Prussian eagle in the top center.

Proletarian Pressure Urged.

Trotzky's speech, which throws an illuminating light on the present temper of the Soviet leaders, follows:

"Your conference occurs at a time which is longer as clear and well-defined as was the period immediately following the end of the war. Our enemies assert that the proletarit has proved its omnipotence and capitalism its vitality since the last two or three years capitalism has not been destroyed.

"The Third Internationale is now confronted with the question as to wether the immediate future is to be a period of the reconstruction and re-establishment of capitalism or of a growing proletarian pressure. This question I shall attempt to answer exhaustively before the plenary conference of the Communist Internationale.

"For the present I will only point out these facts:

"The war has destroyed millions of lives and billions of economic value. Capitalism proposes to re-establish the shaken equilibrium.

Agitation Will Spread to U. S.

"We cannot figure out with a pencil whether capitalism will succeed in this plan in the immediate future. We can only say that if the lessons of the war of the Russian revolution and of the semi-revolution in Germany and Austria, if the lessons of the last seven years have made no impression upon the proletariat, and if the proletariat were to bow its head willingly under the old yoke, then the bouregeoise would succeed in rehabitating its former domination, **and the weight of its agitation would be transferred to America, Asia and Africa.**

"The diplomats and political agents of the bouregeoisie are at work trying to realize this plan.

"Our goal in the battle against world capitalism is not as near at hand as it seemed to us three or four years ago.

"The proletariat consists of many diverse sections, all different in their past and their political education. Owing to the enormous change wrought by the war most of the oppressed and backward elements of the proletariat are today the most impatient and most revolutionary **while those sections that have long taken part in the political evolution are more cautious and more reserved and, indeed, are displaying a certain degree of conservatism.**

"It is for this reason that the feminist movement has such a great significance for the development of the revolutionary struggle. The army of women wage workers has been tremendously impressed during the war and revolution.

"This is particularly noticeable in the Far East. In Japan, for instance the number of women wage workers is greater than that of men. That alone is proof that the participation of workers in the common revolutionary movement must grow.

"Among the tasks of the Third Internationale is also that revolution of the western proletariat.

"On the whole, it is hoped that we have grown stronger during the past year, even though events are taking a slower course than we would like.

"We are cured of some of the illusions regarding the rapidity of the pace of the world revolution, but on the other hand communist organizations have been stronger and more numerous eevrywhere and are winning over new countries and new sections of the proletariat. In this movement women also must hold their sector of the revolutionary front."

One of the speakers at the conference was Frau Zetkin, German radical feminist leader and member of the Reichstag.

FOOD RESTRICTIONS IN ITAL LIFTED

ROME, July 30.—Meatless days, bread and macaroni restrictions and sugar embargoes, which until now have been in force since the beginning of the war, have finally been abolished. Food cards are now no longer needed to procure the bare necessities of life and gradually such luxuries as pastry, cakes, ice cream and other delicacies are being sold in their pre-war quality and amount.

Mr. and Mrs. M. S. Kauffman of 1201 Burnett, announce the arrival of a nine pound girl at her home Friday.

PARROCK RELEASED ON BOND

D. M. Parrock, former officer and deputy constable arrested Friday night by Constable Frank Morgan and deputies was placed under $1,500 bond Saturday after he had waived a preliminary hearing on charges of impersonating an officer and robbery. He furnished the bond and was released from the county jail Saturday morning.

Parrock, according to officers making the arrest, has impersonated Art Blasingame, a member of the constable force and on Friday night accepted $100 in cash from a man by the name of Smith living on the south edge of the city the money representing a bribe by Smith to the supposed officer.

Constable Frank Morgan, and Deputies Lay and Blasingame, according to their statements, stood in the house Friday night and watched Smith pay over the $100 to Parrock who is alleged to have been at that time personating as Blasingame. The accused was wearing a deputy constable's badge at the time of his arrest.

The arrest Friday night followed a several day investigation by the constable's department. Parrock is alleged to previously accepted $180 from Smith, $100 of which was in the presence of an officer. The accused and another man not under arrest at this time who claimed to be a deputy sheriff are said to have gone to Smith's house to arrest them. According to the officers making the investigation they released Smith after he had paid them $80 and had promised to pay $200 later.

H. T. "Scotty" Scott and H. Saunders arrested in connection with the investigation were released Saturday and the charges against them dropped.

CALOMEL LOSING OUT IN SOUTH

Mr. Dodson, the "Liver Tone" Man, Responsible for Change for the Better.

Every druggist in town has noticed a great falling off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people knew it." Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle doesn't cost very much but if it fails to give easy relief in every case of liver sluggishness and constipation, just ask for your money back.

Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day.—Adv

MANY CHANGES ARE REPORTED IN FRUIT MART

The local fresh fruit markets reported quite a few changes to take effect Monday. Lemons will drop from $13.50 a box to $12 and $12.50; oranges will be $5.50 and $6 a box instead of $5 and $6; grapes will be $5.50 a crate in place of $4.50; bananas will drop from 8½ cents a pound to 8 cents; canteloupes 40 cents a dozen instead of $4.50 a crate.

In fresh vegetables the motst important developments are seen in the withdrawal from the market of several lines as cauliflower, egg plant, mustard, squash, and price changes in lines such as turnips, and yams. Turnips will go up from 4 cents a pound to 6 cents and yams will go from 5 cents to 6 cents a pound.

Outside of the fresh fruit and vegetables there were no changes of any importance reported to take effect Monday. Grocery lines continue unusually steady as do poultry, eggs and other items listed in this column.

The following prices were obtained at the opening of the day's business from local jobbers and can be relied upon as official, although subject to fluctuation:

Fresh Vegetables.

Selling prices in Wichita Falls to retailers: lettuce $1.25 a dozen turnips 6 cents a pound; cabbage 5 cents a pound; yams 6 cents a pound; onions 3½c a pound; parsley 75 cents a dozen bunches; tomatoes 8 3-4 cents a pound, new potatoes $2.85 a hundred pounds; string beans, $3.50 per 30 pounds, roasting ears 50 cents a dozen; cucumbers 10 cents a pound; beets, 3c a lb.; celery, $3.00 a dozen.

Oats 30c a bushel.

CHICAGO PRODUCE

CHICAGO, July 30.—Butter no sessions; eggs no session, receipts 10,558 cases. Poultry alive, lower; fowls 22c; broilers 25@30c.

AMERICAN BLUNTNESS.

By Associated Press.

LONDON, July 29.—The reputation which Americans have of blunt speaking even in the face of royalty, is likely to be enhanced by a remark that passed between King George and Mr. Klumph, of Cleveland, Ohio, on the occasion of the Rotarians' reception at Buckingham Palace, the other day.

King George affably said to Mr. Klumph that he, too, would like to become a Rotarian.

"I don't see what is to stop you," said Mr. Klumph.

KU KLUX KLAN DEAD IN KANSAS

TOPEKA, Kas., July 30.—The Ku Klux Klan is dead in Kansas. This was the opinion expressed today by Governor Allen. He said he doubted that any chapter is still alive in this state, the members refusing to meet because of recent publicity tending to discredit the organization in Texas.

CLEVELAND PAPERS REDUCE PRICE ONE CENT

CLEVELAND, July 30.—Effective Monday, August 1, the price of the Cleveland News and the Cleveland Press, evening dailies, will be two cents per copy instead of three cents.

If you like dance music you should have Victor Record 18742. Nunn Electric Co., 909 Scott, Phone 5837. —Adv.

STOCKS SHOW IRREGULARITY IN SHORT DAY

NEW YORK, July 30.—Although stocks were irregular throughout today's short session there appeared to be some anxious short covering the majority issues shortly before the close, this being especially true in the rails and steels stocks. The absence of traders was noticeable and the turnover of shares was small.

The closing showed several substantial recoveries being made from the low prices of the day. The closing in United States steel had advanced a full point from the low of the day. Other steel and equipment shares also showed small gains. Scarcity of stocks caused a large part of the late advance when shorts endeavored to cover some of their committments.

International stocks displayed a steadier tone and made moderate gains for the day. Sterling demand bills were stronger.

Government and railroad bonds were strong. The strength in the latter issues was looked upon as an encouraging feature of the market.

MONEY AND EXCHANGE

NEW YORK, July 30.—Prime mercantile paper 6@6 1-2. Exchange firm. Sterling 60 day and commercial 60 day bills on banks $3.52 1-8; commercial 60 day bills $3.52; demand 3.56 1-8; cables 3.56 5-8. Francs demand 7.62c; cables 7.63c. Belgian francs demand 7.36; cables 7.37. Guilders demand 30.70; cables 30.76. Lire demand 4.21; cables 4.22. Marks demand 1.23; cables 1.24. Greece demand 5.45; Sweden 20.40; Norway demand 12.80; Argentine demand 20.50; Brazilian demand 11.75; Montreal 10 1-16 per cent discount.

Government and railroad bonds steady.

LIBERTY BONDS

NEW YORK, July 30.—Liberty bonds closed; 3½s $87.76; first 4s $87.70 bid; second 4s $87.50 bid; first 4¼s $87.82; second 4¼s $87.60; third 4¼s $91.80; fourth 4¼s $87.90; Victory 3¾s $98.62; Victory 4¾s $98.60.

CLEARING HOUSES

NEW YORK, July 30.—The actual condition of clearing house banks and trust companies for the week shows a deficit of $13,320,120 in legal reserve. This is a decrease of $19,616,410 from last week.

PORTO RICANS SET ASIDE MILLION FOR PUBLIC SCHOOLS

By Associated Press.

SAN JUAN, P. R., July 30.—Out of a budget of $10,000,000 passed by the recent legislature and just approved by Acting Governor Jose Benedicto, a little more than $4,000,000 is set aside for the public schools of the island. This is $1,000,000 more than the last school budget and the largest amount ever appropriated for education in any one year.

The budget is the largest ever approved. Including bond issues and direct appropriations, the legislature voted expenditures of $20,000,000 but several of the projects involving large sums may be vetoed by the governor. Among the bond issues authorized were those for $3,000,000 for the extending of a railroad around the island $1,000,000 for an insular bank; $2,000,000 road extension and improvement bonds and $1,000,000 for rural schools.

A new income tax law provides a normal tax rate of three per cent for both individual and corporate incomes and limits the additional income tax to 15 per cent for individuals and to 20 per cent for corporations.

The law provides that "additional returns" may be filed where revisions are necessary for individuals or firms whose returns last August were based on anticipated profits which were not received.

A commission was authorized to study a proposal that the insular government purchase steamships from the United States Shipping Board to provide better transportation for the island.

WHEAT DROPS ON PROSPECTS OF RECEIPTS

CHICAGO, July 30.—Wheat averaged lower today chiefly as a result of prospective large receipts Monday and slowness of export demand. The market closed unsettled, 3-4c net lower to 1c up, with September $1.23 1-4 to $1.23 1-2 and December $1.26 1-4 to $1.26 1-2. Corn finished 2 1-8c off to 3-8@12c advance, oats down 1-8c to 7-8c and provisions ranging from 10c decline to a rise of 7c.

With primary receipts this week, the largest in years, if not the largest on record, bears in the wheat market were in position to emphasize the effect of a continuance of heavy arrivals. July delivery scored gains at the last after being depressed earlier by settlement of a spread against large sales of rye.

Insufficiency of rains made corn firm except for a month end sag of July in the last few minutes of trading.

Huge stocks on hand pulled down oats.

Packer buying gave firmness to lard but provisions were easier in line with hogs.

KANSAS CITY CASH WHEAT

KANSAS CITY, July 30.—Cash wheat No. 2 hard $1.12@$1.27; No. 2 red $1.18@$1.19.

Corn No. 2 white 52c; No. 2 yellow 54@54½c.

Oats No. 2 white 35½c@36c; No. 2 mixed 33½c@34½c.

WEEKLY GRAIN REVIEW

CHICAGO, July 30.—(Weekly grain and provisions.)—Sudden stoppage of export buying has done much to bring about lower prices in the wheat market this week. Compared with a week ago, wheat this morning showed losses ranging from 1c to 2 1-2c a bushel, with corn varying from 3-4c@7-8c decline to 1-8c advance, and oats down 1 7-8c@2c to 3 1-8c. In provisionss, the net changee extended from 12c decline to 17c advance.

The Canadian crop was reported to be a "bumper" and subsequently European demand seemed to come almost to a halt. Inquiry from domestic millers ceased also to be of an interesting character, and with a renewal of heavy receipts, the gains which had been scored earlier in the week were more than wiped out.

Rains eased the corn market somewhat. Oats were depressed by rural selling.

Hog prices at the highest yevel yet this season gave steadiness to provisions.

Court Notes

78th District Court.

Wichita State Bank and Trust Company vs. Locomobile-Cole et al, debt.

H. D. Bell vs. J. S. Curehart, debt.

H. D. Bell vs. Gulf Production Company et al, garnishment.

Webb to F. B. Jackson Jr., each sold 1-4 acre out of the J. F. Barker subdivision of block 96 of the Red River Valley lands, $1 and other considerations.

ITALY TO HAVE TWO CENT CIGAR

By Associated Press.

ROME, July 30.—Somehow the Italian government has solved the problem of a cheap national cigar. Prices of tobacco have been soaring to such luxurious heights that the ordinary cigar smoker could not purchase. Accordingly, experts were assigned the task of getting up a new cigar. They have just announced their accomplishments of the task. The new cigar will soon be put on the market and will sell for two cents. It will resemble the Pittsburgh stogie in shape.

Miss Maud Nored left Friday for a month's vacation which will include a visit to Galveston, Fort Worth, Houston and other Texas cities.

Mr. and Mrs. M. S. Kauffman of 1201 Burnett, announce the arrival of a nine pound girl at her home Friday.

COTTON HAS SOME ADVANCE ON COVERINGS

NEW ORLEANS, July 30.—The one factor at work in cotton today was the covering of the short interest and the market responded by opening higher, remaining at the advance throughout the session and reaching highest levels toward the end when trading months were 17 to 21 points up with October at 11.74. The close was at net gains of nine to 13 points with October at 11.66.

The main reason for covering on shorts seemed to be fear of a bullish government report on condition Monday and such expectations were increased by a local condition report of 67.8, pointing to a drop of 8,550,000 bales. The action of the market on this report was accepted as meaning that it would require an idicated crop of around 8,800,000 bales to cause much selling following the pending condition report.

Weather over the belt was called favorable, the map showing up warm and dry in practically all sections, but this aroused no selling and the explanation was that traders generally are looking for severe August deterioration regardless of weather conditions. Messages from Texas strengthened this feeling, one telegram from Dallas claiming that deterioration had already set in over that portion of the belt.

NEW YORK COTTON.

NEW YORK, July 30.—Scattered room covering which took place in the cotton market today, served to advance prices moderately and at the close the list was ten to fifteen points net higher after having at one time been 14 to 20 points above the previous night.

Opening was steady and three to seven points higher based on New Orleans buying and a renewal of unfavorable crop reports from the belt, notably from Texas. Many complaints of shedding were received and a wire from Dallas said that the crop in the Brazos sections was nil and that shedding was spreading all over the state. There was also more or less talk about boll weevil activity notwithstanding recent dry weather, but the forenoon support was mainly based on fears that shedding was really becoming serious.

At its highest October sold at 12.16 and December at 12.70. Weekly statistics were considered rather bullish and reports from the dry goods district continued activity in ginghams. Further good exports next week are indicated by the large amount of cotton reported on shipboard awaiting

CONDITION OF SENATOR NORRIS LESS FAVORABLE

By Associated Press.

WASHINGTON, July 30.—The condition of Senator Norris of Nebraska today was reported less favorable. Since his collapse in the senate Thursday after a long address, Mr. Norris, it was said ,had taken virtually no nourishment.

A specialist was consulted today and the senator's friends expressed considerable concern over his condition.

An oak whose life Washington saved in 1791 is still flourishing on the Hampton plantation, Santee river, South Carolina, and has been nominated for a place in the Hall of Fame for trees with a history that is being compiled by the American Forestry Association. The nomination is made by J. Danforth Bush of Wilmington, Del., who informs the association that the best of care is given the famous tree by Colonel Henry Rutledge, the owner of the plantation. The beautiful old home was built by Daniel Horry, a French Huguenot, about 1750. Washington persuaded Mrs. Horry to abandon her plan to cut down the tree.

GOOD DEMAND FOR PACKERS AT FT. WORTH

FORT WORTH, July 30.—More than the average number of cattle and calves were booked today, the supply measuring close to 600 head of cattle and 400 calves, but a fairly good demand prevailed and most of the run cleared at steady prices. Four cars of good steers sold at $7 and a couple of loads went at $5.50.

Only 500 head of hogs arrived and the quality was not very good. Prices were steady, the top being $11.30, although choice hogs were quotable at $11.40. Bulk sales ranged from $11.00 to $11.25.

Sheep receipts were limited to about 250 head most of the supply being stockers. Market conditions were unchanged.

Cattle — Beeves $3.00@$7.25; stockers $3.00@$5.00; cows $3.00 @$4.50; canners $1.00@$2.00; heifers $3.00@$6.00; bulls $2.00@$4.00; calves $2.00@$6.50; yearlings $3.00 @$7.50.

Hogs—Light $11.25@$11.40; medium $11.00@$11.25; mixed $10.50@ $11.00; common $10.00@$10.50; heavy $10.50@$10.85; rough heavy $8.00@$10.00; pigs $8.00@$9.50

Sheep—Lambs $5.50@$8.00; yearling $4.50@$5.00; wethers $4.50@ $2.85; ewes $3.00@$3.50; culls $1.00 @$2.00; goats $2.00@$2.50; stocker weathers $2.00@$2.50.

K. C. LIVESTOCK

KANSAS CITY, July 30.—Cattle 1,100. For week: Beef steers yearlings fat she stock and canners mostly 25 to 50c higher; some common light steers up less; other classes uneven but mostly steady.

Hogs 250; active; mostly steady to strong; best lights and mediums to packers $11.25; bulk of sales $10.70@11.20; stock pigs $10.50.

Sheep 1000; for week: Sheep steady; lambs 50@75c lower. —Day market stands for night.

AISHE HANUM, JOAN OF ARC OF TURKEY, LEADS BRIGADE

By Associated Press.

ANGORA, Turkey, July 30.—A Turkish Joan of Arc, Aishe Hanum, has started a woman's fighting brigade against the Greeks. Her organization, called the Kaln brigade, has already taken part in active fighting and she is constantly enrolling new recruits.

This is the first time in Turkish history that a woman has been so militantly active. She has been dubbed by the people of Anatolia, "The Conqueror." Her personality is in distinct contrast to the beautiful Hallde Edib Hanum, the writer and graduate of the American Constantinople College, who has been so active in Nationalist politics for two years and fled to the interior in March, 1920, to escape imprisonment by the allies.

Aishe Hanum is a stern, dark woman of the soil, aged 52, who sees visions and believes she is inspired by the prophet. She wears a veil but has cast aside skirts. She carries a rifle and when not at the front goes through the villages accompanied by her 15-year old son, urging the peasants to contribute feed and money and their able bodied women to cast out the enemy stranger from the homeland.

As Nationalist soldiers, the uniform of the Kadin Brigade corresponds to that of its leader.

Indirectly, Aishe Hanum is doing as much as Halide Hanum to emancipate the Turkish woman, when she began her work the Turkish men, who dislike to have women interfere in politics, tried to force her to return to her farm. But, by the courage born of her visions, Aishe Hanum has continued until she is recognized as an aid to the Nationalist cause.

Eight hundred and thirty-three thousand divorcees have been granted in this country during the past twenty years.

B. M. TO MEET URCH MONDAY

Christian Woman's Board of ns of the First Christian will meet at the church Monafternoon at 4 o'clock. The will be in charge of Mrs. urn's division, and all members urged to be present.

ATTRIBUTES EVILS TO JAZZ MUSIC

"Dancing to Mozart minuets, Strauss waltzes and Sousa two-steps would never lead to the corset-check room which now holds sway in hotels, clubs and dance halls. Nor would a girl who wore corsets in those days have been dubbed 'Old Ironsides' and left a disconsolate wall-flower in a corner of the ball room," says Mrs. Marx E. Oberndorf, national music chairman of the General Federation of Music Clubs.

The quotation above appears in an article entitled "Does Jazz Put the Sin in Syncopation?" written by Mrs. Oberndorfer in the interest of better music, and is the first of a series of articles in which the General Federation of Music Clubs will feature in the Ladies' Home Journal this fall. The article declares music may become an influence for evil, and directs particular criticism to jazz.

Offering evidence that jazz produces a definite demoralizing effect on the human brain, Mrs. Oberndorfer continues: "Jazz originally was the accompaniment of the Voodoo dancer, stimulating the half-crazed barbarian to the vilest deeds."

After pointing out the evils which she says are created by jazz, Mrs. Oberndorfer concludes with a plea for good music because of the help and inspiration it can and will give. She says: "The music department of the General Federation of Music Clubs has taken for its motto: 'To Make Good Music Popular and Popular Music Good.'"

The article describes how the women of America can help the club women carry out this motto in every home, firmly, steadfastly, determinedly, until all the music in our land becomes an influence for good.

The synopsis of this first article was sent to Mrs. Walter S. Robertson, state chairman of junior and juvenile work of the federation by Mrs. Oberndorfer.

MISS ROBINSON HOSTESS AT PRETTY PARTY.

Miss Ina Myrl Robinson was hostess at one of the prettiest parties given for the younger set this season at her home, 1601 Mays street, Saturday afternoon.

The house was beautifully decorated with crepe paper in various colors and cut flowers for the occasion, and an original operetta, with solo dances between acts, in which the guests took part, featured the entertainment.

Following the program, a dainty refreshment course consisting of pimento sandwiches, potato chips, salad, olives, mints and punch was served to Misses Charlotte Keevil, Sibyl Hancock, Leah Ford, Evelyn Barker, Herma Pounds, Henrietta Allen, Anna Bruton, Frances Ann Saunders and Electra B. Reasor.

Mrs. Robinson, mother of the hostess, was assisted in entertaining the young people by Mrs. H. S. Ford.

* * *

B. Y. P. U. ANNOUNCE LESSON SUBJECT

"Our Foreign Mission Boards, New Fields in Europe," will be the topic of the lesson at the meeting of the Eugene Sullee B. Y. P. U. of the First Baptist church, which will meet at 6:45 Sunday evening. This is an interesting topic, and all who attend the meeting are invited to join in the discussion.

MISS MAER HOSTESS TO GIRL'S BRIDGE CLUB.

Miss Marion Maer was hostess to the Girl's Bridge club at her home Thursday afternoon when two tables of players enjoyed the usual games. Mrs. Charles Anderson won the high score favor, a pretty vanity case. Mrs. Leslie Stringer made the low score, and was consoled with a dainty hand embroidered linen handkerchief. At the close of the games a dainty ice course was served to the members present, and to Miss Louise Montgomery, a guest.

EPWORTH LEAGUE MEMBERS ENJOY BASKET PICNIC.

Members of the Epworth league of the First Methodist Church South, enjoyed a basket picnic at Tyson's lake Friday evening following a baseball game between the two league teams, which was staged at Bellevue park.

Swimming and games featured the entertainment at the lake with a delicious luncheon served.

The social department of the league, under the direction of I. E. McWhirter, is conducting weekly twilight parties during the warm weather, which are proving a welcome diversion.

A watermelon feast will be given next week. Those attending the affair Friday evening, included: Misses Stokes, Edwards, Nell Smith, Ruth and Jonnie Groves, Belle Ragsdale, Ida Baggett, Alene Covey, Vivienne Harris, Marjorie Bright, Dolly Gage, Fay Delaney, Minnie Mae Peyton, Thelma Stuck, Mozelle Revere, Jennie V. Shaw, Margaret and Grace Haney, Florence McCulloch, Bruce Dickson, Elvia Allman, Thelma Pross, Simmons, Jessie Vaughan, Helen Potts and Dora Reason and Messrs. Hendrix, Kinkead, Montgomery, Thorne, Hare, Baker, Kass, Dowis, Highfill, Allbritton, Barnes, May, McCulloch, Henry D. and J. W. Akin, Jr., Tillerson, Williams, Hardeman, McBee, Hooper, Graves, Raney, Harris, Carter, Ruffner, Gholson, Snow, Bright, Baggett, and Peyton and Messrs. and Mesdames Paul Pearson, T. A. Ruchards, J. D. Bright, T. A. Baggett, A. H. Drake, J. M. Hooper, I. E. McWhirter and H. L. Ray.

* * *

REV. GRAFTON TO LEAD ENDEAVOR MEETING.

Rev. N. F. Grafton will lead the Christian Endeavor meeting which will be held at the First Presbyterian church Sunday evening at 7:00 o'clock. The theme will be "Americans, Work For the American Red Man." R. E. Shepherd will render a vocal number and prayer will be led by the Rev. C. C. Dooly. Dr. Grafton will give a short talk on the lesson and little Miss Elizabeth Langford will give a reading. Miss Dorothy Warren will give a reading entitled "In the Steps of Marcus Whitman." Miss Gertrude Bauch will render a piano solo which will be followed by short talks to the members. Master Dan White will give a reading.

* * *

MRS. THAMES GIVES DINNER FOR GUESTS.

Mesdames Charles Hutchison and Enid Stallings of Bowie, Texas, house guests of Mrs. H. F. Weldon, were inspiration for a delightful dinner given by Mrs. C. E. Thames Wednesday evening, when covers were laid for eight. The party was also in the nature of a surprise for Miss Ethel Thompson of New York city, house guest of Mrs. Thames.

The table was beautifully decorated for the affair, carrying out a color scheme of yellow and white. A huge boquet of garden flowers formed the center, surrounded by candles in dainty holders. Pretty novelty roses were given for favors. Following the serving of a six course dinner, the evening was enjoyed with music and dancing. The guests included the honorees, Mesdames Hutchinson, Stallings, Miss Thompson, Judge and Mrs. H. F. Weldon and J. Hoffman.

* * *

HOSTESS ANNOUNCED FOR LADIES' DAY

Hostess for Ladies' Day at the Golf and Country club Tuesday morning are announced as follows: Mesdames Sanders Walker, C. Y. Tully, George Thornburn, Bert T. Shaw, Jeff Waggoner, Lloyd Weaver, C. J. Waelder, W. T. Willis, James Martin, Williams and J. W. Powers. The games will begin as usual at 9:30 o'clock.

CHRISTIAN ENDEAVOR TO GIVE PROGRAM

A special program will feature the Christian Endeavor meeting at the Central Presbyterian church Sunday evening, beginning at 7:15 o'clock. Classes in history, geography, reading and arithmetic taken from the text book "Christian Progress Among the Indians," will be held.

Special musical numbers by the Endeavor orchestra, composed of five stringed instruments and piano, will also be given.

Members are all urged to be present, and visitors are welcome. Every one is asked to be on time, and tardiness will be inexcusable, it is announced.

* * *

BURKBURNETT.

Mr. and Mrs. J. B. Riddle were over from Grandfield Sunday, guests in the home of Mr. and Mrs. Carl Hart.

Mrs. T. A. Freeze and daughter, Miss Nina Freeze, returned home Wednesday from an extended visit in Fort Smith, Ark.

Miss Lyn Davis, was called home Friday on account of the serious illness of her mother in Ryan, Okla.

Mr. F. M. Treseder, who has been in ill health for some time, left Friday for Salt Lake City, where he will spend a while with his sister and other relatives in that city.

On Thursday evening the home of Mr. and Mrs. T. H. Hughes, 310 West Main street, was the center of a happy gathering of boys and girls, the guests of Miss Lealla Hughes, a daughter. Music, games and a general good time is reported, during which all enjoyed a summer treat of lemonade and cake. Miss Hughes' guests were Mildred Keith, Edna Marie Blair, Elmos Blair, Leroy Eddy, Leatress Southerland, Shelva Southerland, Horace Wood, Mary Kate Ellis, Eula Erratton, Ruby Johnson, Jimmie Matthews, Roy Lee Parker and Mitchel Wolfe.

Mrs. C. L. Mayes entertained Friday evening with dainty luncheon at her home, 117 B avenue, complimentary to Mr. and Mrs. L. A. Grigg and the latter's house guest, Miss Mary Slantifer of Pleasant Hill, La.

M. G. Davis and family returned Saturday from an overland tour through Calhoun county, Mineral Wells and other points, making the trip in a commodious camping truck. Mr. Davis, who has been in ill health reports much benefit from his six weeks outing.

Mr. and Mrs. L. A. Grigg and family returned this week from a visit among relatives and friends in North Texas, Arkansas and Louisiana.

Mr. and Mrs. W. H. Kizer left this week for Houston where they will make their future home.

Misses Myrtle and Mozelle Stokes are spending their vacation season with their mother, Mrs. W. R. Stokes in McLane, Texas.

Mrs. Ed Heimie left Saturday for an extended tour through the South visiting relatives and friends in Shreveport, New Orleans, Natchez, Miss., and other cities. She will be away several weeks.

Mrs. J. M. F. Gill and daughter, Miss Pauline Gill, left for Galveston Thursday where they will take passage on the steamer Concho sailing Saturday for New York city. They will spend a short season at Atlantic City, returning home early in September by rail. They will visit Washington, Philadelphia, Pittsburgh and St. Louis en route.

Mrs. F. L. Pilkerton entertained twentyodd little boys and girls on her lawn Tuesday afternoon in honor of the little daughter of the home, Mildred Pilkerton. Out-door games, impromptu readings, and fun and frolic generally fill the hours making the occasion just what little folks enjoy—a regular "play party." And best of all was a big saucer of ice cream and cake that was served by the sweet mother hostess to a big circle of happy children, all sitting on grass. The little guests were Christine Boase, Margie Lake Clevenger, Opal Krudenger, Velma and Thelma Moss, Robert and Nancy Favors, Janie, Jack and Joe Woodward, Landers, Mary Ellen and Margaret Sue Kidd, Faith Webb, Evelyn Montgomery, Vincent and Wade Goodlett, Johnnie Dunn, Erma Montgomery, Rosa Nell Lowery, Irene Goff. A few grown-ups were among the guests also: Mesdames C. D. Montgomery, Collins, Kidd, Gill and Misses Etta Jowell and Pauline Gill.

One of the most enjoyable social functions of the week was the surprise party tendered the Rev. C. D. Montgomery, Monday evening by a large number of his church members, both ladies and gentlemen. While Dr. and Mrs. Palmley took the pastor and his family out for a drive.

Mrs. A. N. Bliss and daughter-in-law, Mrs. A. L. Bills and baby, Dorothy Lee, were guests this week in the home of her daughter, Mrs. A. G. Dunn.

Mr. and Mrs. Mason of Harald, Texas, and Mr. an Mrs. H. O. Smith and family are leaving this week for a vacation season in Glenrose, Texas.

Chris Smocher and daughter, Miss Mary Smocher, left Tuesday for Colorado Springs, Colo., and will go to Excelsior Springs, Mo., later in the season to visit relatives before returning home.

The marriage of Miss Rachel Hubert and Hollis Bonds was solemnized by the Rev. T. J. Furness in the home of the bride a few miles from the city, July 23rd.

WAR ROMANCE STILL LIVES

With bandaged feet and the buoying spirit of being freed, which let her ever on, Refugee, the only name she would give, came down the road from Montmedy and into the town of Stenay. In this little town on the Meuse were several second division outfits, billeted temporarily, awaiting the jumpoff to follow up the evacuating German army and finally to occupy their sector in the American bridgehead area at Coblenz.

It was only two or three days after the armistice and thousands of "enemy aliens" who have been detained during the war were choking into the roads from Germany and Northern France.

"Monsieur, please," said Mlle. Refugee in French, aproaching Sergeant Bobby Roberts, in charge of the officers' mess at Stenay, "a piece of bread?"

And Bobby, without looking up, called good naturedly, as he had called to any number of poor refugees before: "Allez! I have only enough rations for my chow hounds."

Of course Bobby's explanation of why he couldn't give any bread was said in English. He thought only the "allez" would be understood, and the fact that he sid it good naturedly would suffice to excuse him.

Talked English

"Please, Sergeant?" pleaded a sweet voice in English.

Astonished, Bobby looked up and beheld a beautiful little refugee who had caused sturdy second division truck drivers to slow down their supply and ammunition trains to run off the crowns of roads and slip into the mud, so as not to run down the fair plodder.

So it was that Mlle. Refugee got white bread—a whole loaf of white bread, even though Bobby did have to steal it. And incidentally Bobby "salvaked the smallest pair of army bobnails he could find. And that night Mademoiselle slept on a bed of hay in Bobby's blankets while Bobby and his billet mates took to the boards in less comfortable quarters.

Next day Mademoiselle went on her way happy without divulging her real name, her story or where she learned to speak English. Needless to say she carried away some more of the officers' mess rations and a condiment can filled with sugar and coffee. Hidden in the sugar were several francs, a collection which Bobby had taken up for her.

But before going on a stray camera—G. H. Q. orders to the contrary notwithstanding—had snapped a picture of Mademoiselle Refugee standing with Sergeant Roberts. The film was quickly developed and Mademoiselle called one of these snapshots away with her. She treasured it.

Now to get down to the last chapter.

Out on a beach, near Manhattan, is a life guard, a strong, husky, sunburned fellow, a D. S. C. man who was transferred from the Ninth infantry to do light duty, owing to his reclassification due to his wounds. That explains how Roberts happened to be taking a hand as mess sergeant in Stenay that day in November of 1918 when Mademoiselle Refugee came down the road from Montmedy.

The "Movie" Ending.

Like a good life guard, Bobby had his eyes out to sea, watching the bathers—men as well as women. But this day in particular Bobby spied a "tuckered" girl beyond the lifelines. He went out to help her ashore. Safe on the beach, she thanked him, and then assailed him for having torn off her locket and chain when he had grabbed her.

Rowing out to the spot, Roberts dived several times and retrieved the locket. It happened to be open. To his amazement it was a picture of himself and Mademoiselle Refugee.

Thus Bobby and mademoiselle met again and now Mr. and Mrs. Roberts are entertaining old buddies of Bobby's at thei Brooklyn home. Occasionally one of the boys who happened to be on kitchen police when Bobby stole tthe "life saving" bread and shoes for Mademoiselle Refugee that cold, bleak day in November get around there to "chow."

As for Mademoiselle Regufee, she was the daughter of an American who was visiting her French relatives in the North of France, near Rheims when the war broke out in 1914. While her relatives had been killed, she had been captured by the Germans, sent to the rear and forced to work in an ammunition shop in Longwar, France, on the border near the duchy of Luxembourg.—From The New York Sun.

OUR DIET IMPROVING.

Whether from the propaganda of the dieticians or from other causes, it is a fact that American people are eating different foods from those chosen twenty years ago. The department of agriculture has proved this in a survey of nearly fifteen hundred homes in forty-six states. The average cost of food is about fifty cents a day per person.

Meat in the diet has diminished eight per cent, grain products eleven per cent, dairy products, milk, butter, cheese, have increased six per cent; vegetables, four per cent, and fruit eight per cent.

This is in line with what science tells us we should eat so we are to be congratulated as a people in that we are feeding ourselves better. There is still room for improvement.

HAPPY THOUGHT

—or is it.

Oh dey's times fu' bein' pleasant an fu' goin' smilin' roun,'
'Cause I don't believe in people allus totin' roun' a frown.
But it's easy 'nough to titter w'en de stew is smokin' hot,
But hit's highty ha'd to giggle w'en dey's nuffin in de pot.

—Paul Laurence Dunbar.

FRISCO READY FOR KNIGHTS OF COLUMBUS

SAN FRANCISCO, July 30.—Approximately two-thirds of the 20,000 delegates and their ladies to attend the thirty-ninth annual International Supreme Council of the Knights of Columbus, which will formally open August 2, have already arrived in San Francisco. Although the convention itself does not open until next Tuesday, three days of preliminary events had been arranged, starting today, for those who have come in advance.

One of the largest delegations from east came by special boat via the Panama Canal. They sailed from Baltimore three weeks ago, touching at Havana and several other ports en route. Several special trains brought other delegations. Delegates will continue to arrive until the convention opens.

The initial event on the program today was an automobile sightseeing tour of points of interest in and near San Francisco participated in by practically all who arrived so far. The automobile trip will continue into the afternoon, and stops will be made at the Marine hospital and Letterman General hospital in the Presidio here, where hundreds of wounded and disabled American veterans of the World Warr will receive comforts from the visiting K. C.'s and be the guests of the Knights at entertainments to be staged at both institutions. Tonight San Francisco Council, 615, K. of C., will conduct an exemplification of the third degree to a large class, with the supreme officers of the order conferring the gree.

As a special feature for the ladies tonight arrangements have been made for them to tour San Francisco's famous Chinatown, while the San Francisco Council initiates candidates at their hall.

Sunday special Knights of Columbus services will be held in all churches. In the afternoon a brilliant exemplification of the fourth degree to a class of 200 candidates will be held under the direction of Supreme Master John H. Reddin. In the evening a formal banquet will be held at the Palace hotel.

Not all of the time will be devoted to ceremonials, for the program calls forvisits to the bay cities and an aeroplane pageant led by Captain Eddie Rickenbacker tomorrow afternoon.

Monday will be spent in automobiling "down the peninsulla," taking in points of interest, with a picnic luncheon at noon.

The convention will formally open Tuesday.

The City National Bank of Commerce is constantly studying and developing new ways and means of serving its customers and of making their connections with it of greater value to them. What it is doing for hundreds of others it will gladly do for you.—Adv.

Kickers Here to Stay for Sport Wardrobe of Summer

Absolute freedom in the matter of clothing and especially for the sports wardrobe is more and more coming into its own. And for that reason increasing interest is being demonstrated in the simple knickers which may be worn either for golf or tennis. The knickers shown in the picture are patterned after the simple boy's regulation "knicks" with the exception of the wide cuff, and may be found in various models. The only distinguished note to them is the banded stripe at either side.

The coats of golf suits are made up of both pleated and straight line styles. These suits come in three pieces, the skirts being buttoned down the front. Following the lines of the English mannish suit is a model developed with a free swing pleat at either side of the back and pinch pleats at the waist line. Other golf coats match the knickers and show the straight line cut with the introduction of an inverted pleat with the pinch tucks and omitting the free swing skirt.

The coat shown in the picture, worn by Agnes Ayres, newest Paramount star, is of tan colored tweed with patch pockets, with the added interest of the inverted pleats in three rows at the back. The hat is of soft green jade angora trimmed with a pheasant quill.

Next in importance, Miss Ayres claims for the sports rig, is the sleeveless coat which has been in great demand, and will be found made up in golf suits and in separate coats. One in tweed has a deep rolling collar of white. Then there is another model that is collarless and entirely bound in white. Other coats follow the Norfolk line and have shaped yokes and slot seams, while novelty effects are gained by introducing a wide band in the form of a box pleat at either side back.

Miss Ayres has also invested in flannel sport clothes, in which such tremendous interest has been manifested this season. This fabric in high shades and in black and white has formed one of the outstanding features of the season. The latest sports suits, however, tend slightly toward elaboration, this taking form in flannel box coats with contrasting braid or ribbon binding. Suits of this type have Eton collars and usually bell sleeves.

One of the newest scarfs seen this season is shown in the sketch. The coloring is its chief charm, the scarf being of jade green with three shades of roman striping in burnt orange.

HELIODORUS SAID TO BE FURTHERING NEW CHURCH WAR

By Associated Press.

RIGA, Latvia, July 30—The monk Illiodor (Heliodorus) former preceptor and afterward antagonist of the notorious Rasputin, is again attracting attention in Russia by announcing his purpose to start a revolution in the Orthodox Russian church. Heliodorus fled from Russia after his break with Rasputin in the early part of the war but returned after the Bolsheviki gained control. He was unfrocked by the church.

His reappearance in public in Russia was almost simultaneous with a revival of ferver in the Orthodox church, which the Bolsheviki now are trying to combat. In an address at the Tsaritsin (of which he was formerly abbot) he recently declared:

"I consecrate myself to the fight for the people's cause and to start a campaign against the popes (priests) which is to make a revolution within the church.'

Every Sunday and on many religious feast days in Russia the churches now are crowded. Communists, themselves are attending the services and this has brought down on their heads a warning from the government "not to set so bad an example for the peasants." On that subject, the Moscow Pravda says that some of the Communists even have used soviet official automobiles to take their families to church services, weddings and christenings. The newspaper printed the following warning from the party heads:

"The Soviet power has no intention to compel anyone by forcible means to leave off the services of professional darkness, but the Communist party as a whole has a right and is bound to demand from its responsible members that they not only should not take part in religious ceremonies and services but should try by example and explanation to others to overcome all religious superstition. Every member of the party directly and openly should recognize and strengthen by the example of his own conduct the truth that religion and scientific Communism are absolutely incompatible."

RUSSIANS RELEASE YANK NEWSPAPERWOMAN

RIGA, July 30.—Mrs. Marguerite Harrison of Baltimore, a newspaper correspondent, who was among the American citizens held prisoner in Russia, has been released by the soviet authorities and arrived here this morning.

A WIFE IN THE MAKING

BY RHYLLIS PHILLIPS

PARTY PLANS.

Mrs. Randall consented to the party being held, but insisted that it be on Saturday instead of Sunday evening, as it would be too hard for Ned to get up early after a very late night to go to work the next morning. Of course, all of the young people were included in the invitations, and Cherry's heart was set on having it a great success. She decided on yellow and white chrysanthemums as decorations, with banks of autumn leaves to relieve them.

Even Jack, for all his scorn of the female race, divine, seemed to enter heartily into the spirit of the thing. He ran hither and thither for Cherry and no task was too great to put him to.

"Gee, any party that you'd give, Cherry, jes' naturally has to be great," he told her as they were picking armfuls of leaves the day before the party. "An' won't it be fun dancing on the varanda? Of course there isn't any skirt that I'd think of twirling—but—well, you know when it comes to dancing—that's different."

"Such splendid exercise and all that sort of thing, eh, Jack?" suggested Cherry, tactfully.

"That's the idea exactly. You always get things right for a fellow," he answered eagerly.

"But just in case you can, work it so I get a seat near that pretty new teacher. You know, the 18-year-old one, dark eyes and everything. You'll help me, won't you?"

"Deed I will, you can count on me, Jack, old pal," she assured him, warmly.

"See, it's this a-way: There's a guy down from Waynesville that's hanging around her something fierce. He's older, 'bout twenty-two or so, I guess, and that sort of cuts a younger fellow out. And this little girl is real classy, Cherry. Not a bit like the rest of the dead ones around here. All pep and smiles and snap, and white teeth, and those eyes!" here a low groan from Jack told its own story. "If I was only a couple of years older!" broke from him again. But this time Cherry did not need to ask why.

"Now cheer up. We'll arrange everything beautifully. And let me give you some advice: Just don't act too keen about her, Jack, and you'll have her curious first, then eating out of your hand. Specially if you wear that new tie of yours, my boy."

"Thanks, Cherry, you're a peach, I'll say. And we'll make the old veranda look like a million dollars before we're through. And I'll stop and get some dance records for the Vic this afternoon. Mother never thinks of all these things when she gives a party, but it's different, now that you are giving it. Jane is all excited, too, says that she's found a new beau and that she's asked him to the party. Do you know him?"

"No," answered Cherry slowly.

(To be continued.)

Because the whole nation gravely felt the effects of the sugar shortage during the world war, France has planned to mobilize bees for honey during the next war.

Officers of the French army are to have three uniforms—full dress, undress and field service.

"TIN PLATE KING" LOSES WIFE BUT FIGHTS OVER D

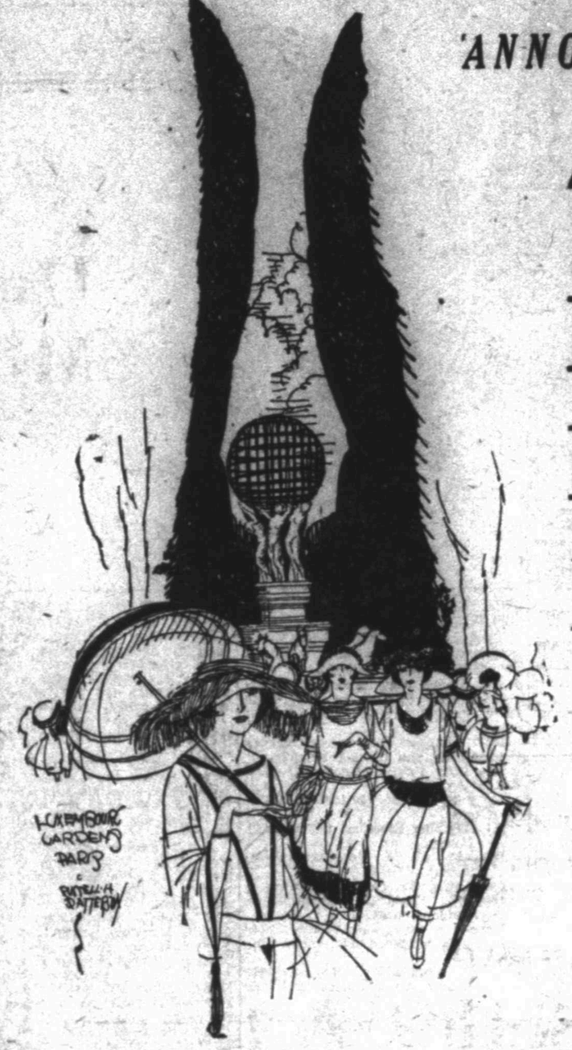

NEW YORK, July 30.—Is family pet dog a household ef That is one of the recent queries to the New York courts, and not a tax, but a divorce question legal battle is being waged by D G. Reid, "tin plate" magnate, Mabel Carriee Reid, from whom was divorced several months ago stake is a Pekingese pup.

Many men would consider quishing a Pekingese pup in course of a divorce case as on their steps toward "freedom." so Reid, who seems entirely in est in taking the matter to c The bitter recriminations and nu ous co-respondents of the divorce itself appear to have been forg in the canine contention.

At the divorce, Reid made a settlement of $20,000 to Mrs. and agreed to pay her $50,000 nually. The household effects to be submitted to arbitration. was acceptable, until Mrs. Reid pared to arbitrate on the Pekin which Reid apparently had not in ed to deed over.

'ANNOUNCING—

The New Fall Dresses

Which have just reached us from the workshops of the country's leading designers.

—Come in and give us the pleasure of showing you the new things.

Among the latest creations for Fall and Winter there is little unity of line, color and fabric to be observed. Uneven lengths in skirts, sashes hanging below skirts, short sleeves, rather short skirts, very ample panier effects, long, straight models and long sleeves, all are seen alike.

This frock has entire foundation and sleeves of jade georgette crepe over which is a straight line creation of crepe back satin, ribbon-trimmed, at $69.50

Black and white are always smart as this frock proves. It is trimmed in a most effective and unusual manner with black silk ricrac braid and white crepe. The material used in the dress is burrbarr crepe. At $69.50.

In this showing is a brown crepe back satin dress of unusual beauty, having straight graceful lines. The over-dress is trimmed in apliqued leaf designs of plush combined with embroidery, all in brown, making a very pleasing and attractive garment. At $75.00.

A wonderfully attractive costume is made up of navy kittens' ear crepe. The surplice bodice is trimmed at the neck with rows of jet beads, sleeves are finished with six-inch fringe, waist is outlined in jet girdle, having one yard fringed tassel at fastening. At $59.50.

P.B.M.G. DEPARTMENT STORE

"The Satisfactory Store."

Mrs. Reilley's Home-Made Bread

Reduced to

15c

The installation of additional ovens will enable us to increase our production to a point which will permit us to reduce the price of our bread and rolls.

We are just as happy over this reduction as our customers could possibly be, for it has always been our ambition to produce the best bread in town at the fairest price.

THE RANGER SCOUT

allaw Says:

is department is going to the f some of you scouts don't come gh with troop reports.

met a boy scout the other day. was the most polite little fellow ve ever known. He gave his on the street car to an old without hesitation. God speed day when our boys can drive the lesson of chivalry to the of today. The chivalry of our fathers will live on in the Boy its.

couting in Wichita Falls at the ent time is very much like the business. There ain't none!

u fellers who didn't get in on first summer camp will have her chance to spend a week in pen before the summer is over. miss the fun this time.

you don't believe a summer means fun just read George 's version on the last summer He'll tell 'em, Reginald!

E. (Big Chief) Taylor has a nice garage for the scout The poor thing should feel l of its new home after having ay out in the rain so long.

e Fallon thinks he is some car- er now. He was an understudy the executive while building the t garage. Incidentally, he al- passed his merit badge on car- ry.

his column may not please some, even Napoleon didn't please ybody.

TROOP NOTES.

roop One is meeting at the pub- library every Friday evening for summer. Most of the meetings devoted to outdoor practice of ting and games.

roop Two will start their regu- meetings soon. The troop meet- were abandoned during the re- revival meeting, and have not been resumed. However, the utmaster has announced meetings commence right away. Luck to t, second troopers. You have a e troop and we want to see you en up and do something.

Troop Three meets regularly now. eir scoutmaster has announced an tdoor program for most of the etings this summer. We are glad see them up and doing things en under great handicap.

Troop Four has been having some etings during the summer, but so as we can learn, they are not g much. That must be a case another good troop gone wrong.

roop Five has no active scoutmas- now. However, they hope to get ted again in the fall.

roop Six holds regular meetings a good attendance considering summer time. "Nuf Sed!"

roop Seven has abandoned meet- during the summer. Most of boys are working too hard to be thinking of scouting.

oop Eight is here with the They are reorganizing next y night with Chas. Smoot as aster and Jess McClary as as- ite. More will be heard from t of time rolls on.

ka Nine continues to meet with success despite the fact that their scouts are vacation- the summer. We will surely from them real soon.

oop Ten is ? ? ? ?

oop Eleven took a hike the day with nearly 100 per cent their membership present. But, Ranger scout didn't receive any t of the affair. Wake up, you Billies." Let us know about activities.

ill the band please play the h march for the Twelfth troop? are no more!

oop Thirteen hasn't said wheth- ey were dead or alive. Guess have the "hiflatus" (if you what that means, please tell

oop Fifteen will be reorganiz- the fall. They are dependent a schoolteacher for a scout- er, and during the summer lteachers are hard to find. (If one, a man will never admit the summer time.)

a word of explanation, the er scout wants every troop to that this department is operat- or their benefit, and chime in us by sending in a report of meetings.

last Sunday's paper there ap- ed an article in regard to an air meeting, sometime this mer to be held at Bellevue park y suitable place that the scout- ers might see fit to hold it. has appealed to me and I can hat I am strongly in favor of a meeting. Troop Eight will nd to participate in any such ng and at any time, the soon- e better.

s kind of a meeting is just the scouts here need—some- that will revive their inter- nd what better time than now we ask for? Some night when oon is shining real bright (and not raining) and the weather t so hot that it will scorch hair, if you take your hat off— tter time could be found. You will be too hot? Well, if you until winter it is going to be and when it is cold in Wich- lls it is COLD, and you know wouldn't get out on such night nyway it is not so awful hot sunset as you may imagine. couts, let us get together real and show Wichita Falls that couts of Wichita Falls are still nd here to stay, hot or cold, r or winter. Come on ye, every scout, let us have your n and your scoutmaster's, too.

JESS M'LARRY,
"Wichita Eight."

LOYAL.

(By Rev. J. W. Loving.)

Scout law number two: "A scout is loyal to all to whom loyalty is due; his scout leader, his home, and parents and country."

Loyal is another form of legal; and legal means according to law. So the loyal man is he who strictly and conscientiously lives up to the law governing his life. It may be worth while here to look for a bit into the idea of law. Law is not a meaningless, unrelated form of words, an arbitrary standard set up for regulating conduct. It is not in its nature and essence an abstract thing. Law is but the statement, the formal statement, of the principles rightly embodied in life and conduct. We have statutary laws enacted by bodies chosen for the purpose. Even these are not to be looked upon as something evolved out of pure idealism. It has become a common observation that no law can be enforced if it be too far ahead of, or too far behind the public sentiment among those for whom it is intended. "All just government derives its power from the consent of the governed." Laws to be valid must be governed not in expediency but in justice. Hence law does not make right but is the expression of right principles of action. For example, murder is not wrong because the law forbids it, but the law forbids it because it is wrong.

There are laws written and unwritten. Paul in Romans speaks of the Gentiles who have no (written) law, but are a law unto themselves.

All national action is conformable to law. There are laws govrning our well-being, in the physical, mental and moral spheres. Who disregards the law of his well-being in any sphere must pay the penalty. We speak of the laws of logic, not meaning some arbitrary forms of rules pressed upon our thinking, but the expression of the principles that obtain in all valid thinking.

Another thing needs to be said here. There is sometimes a real distinction between the letter and the spirit of the law. An extreme literalism may miss the very heart and spirit of the law. Remember too, that we are speaking of human law now. The formulation of principles as made by man. God's law, like His nature, is perfect, but the trail of the serpent is over all things human. Hence laws are not ideal nor for ideal people, but for struggling, erring, imperfect people.

With these observations we consider what is involved in the second scout law. A scout is loyal, that is, he regards, honors, tries to practice the laws inhering in his relationships. To his scout leader he is closely related. His entrance into the troop was voluntarily. If he be not willing to obey the laws governing scouts, then he is not honorbale, and hence he breaks the first scout law which we considered last week. His honor is trusted, he is bound by that law to obey the scout laws. The leader is officially over the scout, by reason of years experience and other qualifications that make him officially superior to the scout. The loyalty of the scout compels him to yield to obediences. It is impossible to tabulate all the orders that the leader will give, must give, but loyalty covers them all.

A scout is loyal to his parents. God's perfect law specifically covers this; but it is impossible to set down all the acts which loyalty compels the scout to perform in his relation of sonship. The law is not something cut and dried, it is the expression of vital principles. By virtue of their relationship parents are qualified for inculcating and declaring law; likewise it is the duty, the privilege, and should be the joy of children to obey; loyalty compels obedience.

No greater people than the Jews have ever figured in the world's history. One great element in their greatness has been loyalty to parents. Touching incidents come to mind here but lack of space hurries us on, we do need a revival of this in our day. Years ago Charles Dickens visited in our country. He remarked that there was a great deal of parental obedience in America, but it was the obedience of parents to children. I fear the condition has grown more pronounced since Mr. Dickens' visit. As I see it there is no more serious thought for our times. If our land is to maintain its lead among the nations of the earth there must be a return to, a revival of, loyalty to parents.

The scout is loyal to his home. What sweeter word than this. One of the great attractions of Heaven is that it will be home. I'm thinking of some tender lines of Robert Louis Stevenson as he drew toward the close of his brave but pathetic life. He looked forward to getting home. This ought to be the dearest spot on earth. Here ought each vie with the other in living life to its best. The reign of law—not arbitrary, despotic, heartless, but the law of love that cares enough for its commands to get them obeyed, ought to obtain in this hallowed spot. Every successful enterprise or institution must have a head. The home must have its head. Every other member should be loyal to the head. Each has his part, loyalty compels him to act well that part. The scout is in honor bound to be loyal to his home. The home is what it is partly by his making. It were treason in him to fall short of loyalty to his home. A nation of homes is the strong nation. No nation will long survive the downfall of the home. Woe to that nation whose homes become the breeding places of corruption, disloyalty and consequent vices; manhood deteriorates, and:

"Ill fares the law, to hastening ills a prey,
Where wealth accumulates and men decay."

When manhood decays the very tap root is cut and it will lead to sure ruin and rapid decline, no matter how great or diversified the material resources. How nationally this blends with loyalty to one's country. Not my party, my country right or wrong: My country, let me help to make and keep it the best. No country or society can rise above the aggregate of the individuals composing it. There is no pressing demand today than that for loyal citizens, loyal in all the relationships of life. Never was there a time when there was a more clamant, persistent imperative call for men above petty, partisan, sordid, servile narrowness. To the makers of our laws the demand, the necessity is that they rise above party spirit, partisan narrowness, selfish gain, personal preferment, into a loyalty, a patriotism, a statesmanship that will set out law forward by knowing God, observing his laws and thus doing duty to all the people. The call comes to the officers of the law that they do not connive at or collude with, violations of the law; that they conscientiously respect and perform their oaths of office. Showing no partiality, but bravely enforcing the law as they swore they would. To our courts the call is imperious and imperative that there be no quibbling, or haggling over technicalities while justice weeps, wrong doing entrenches itself, greed and graft not only flourish but become defraud. If men lose respect for the way law is practiced or enforced, they soon lose respect for the law itself. I believe such a spirit of loyalty would not only clear the dockets of our courts, but would greatly diminish the number of crimes and criminals. Let EVERY scout do his duty as loyalty demands.

Yep!

"More than five thousand elephants a year go to make our piano keys," remarked the bright first-class scout, looking up from his books.

"Really!" exclaimed the tenderfoot, "it's remarkable what those beasts can be trained to do."

"SCOUT."

The word "scout" is protected. The federal government gives this protection.

Firms are not permitted to use this label in connection with manufactured articles except as it is done in reference to goods prepared for the Boy Scouts of America. There is a tendency among firms to do this. Many do it ignorantly. They readily cease to do so when informed. Others are wilful and knowingly continue the practice. A service will be rendered the boy scout movement if information regarding either the fraudulent of innocent use of the word "scout" is sent to the national office.

BARNSTORMING TRIPS.

These are the days of hikes, and all kinds of trips by scouts and others. Whenever a group of scouts is permitted to make trips of any sort whatsoever, several fundamental rules must apply.

First, they must always be conducted under wise adult leadership. Boys must not be permitted to roam abroad without adequate leadership.

Second, they must be orderly and thoroughly organized. They must have objectives and proper rules to govern. They must not be haphazard.

Third, they must be dignified, the boys should be neatly attired, courteous, and obey all rules of the road. They should be scouting trips and contribute to a better and finer knowledge of the game.

Fourth, they must be honest. Boys should never start out with the idea of getting lifts, of borrowing rides, of begging food. Such are classed as vagrants, and in some towns and villages are arrested and reprimanded. A scout earns or pays his way, and truly represents the cause wherever he goes. He should be known as a knight of the road, exhibiting a true knightly chivalry.

TROOP LAPSES.

A cursory review of some of the replies which have been received at the national office with reference to the dropping of troops reveals the following facts:

First, that many troops that are dropped are later reorganized; second, that many troops that are disbanded are merged with other troops; and third, that the outstanding cause of lapses is practically in every instance due to the lack of a strong troop committee. It is apparent that the actual lapses are much below those which we have ordinarily stated.

This leads to the conclusion that the policy of the Boy Scouts of America is perfectly right in its endeavor to get every troop under some form of first-class council organization where there will be thorough preliminary organization effort and careful follow-up and in the emphasis upon the organization of strong troop committees.

CORSICANAN ELECTROCUTED.

By Associated Press.

CORSICANA, Texas, July 30.—T. J. House, 30, was instantly killed late yesterday at an interurban power substation near here when he came in contact with a wire carrying 2300 voltage.

Mangrove treees form dense groves to the very edge of the ocean.

THE NEWSPAPERS OF TEXAS

have been virtually unanimous in urging our legislature to pass an Optometry Law similar to those in force in EVERY OTHER STATE. The people of Texas should be protected from the "eye glass faker" and an Optometry Law is the only means of gaining this protection. See your Legislators and request them to favor the law regulating the fitting of glasses in this State so that the "quacks" may be kept out and our citizens protected.

IF YOU ARE SICK

PROFIT BY THE EXPERIENCE OF OTHERS

Consult

Dr. Schultz

THE RELIABLE SPECIALIST

For scientific treatment of chronic, nervous and special diseases of both sexes, catarrh of all mucous membrane, stomach, liver, kidney complaints, blood and skin diseases. Hemorrhoids and prostatis complications treated without the knife, by a safe and humane system of scientific treatment.

If you are sick of experimenting, sick of faflures, sick of being sick, come to me. I invite sick people who contemplate taking treatment to come. Special attention given in the combination of curative powers, modern electricity, vibrations, etc., with the scientific administration of selected Specific Medicines. I endeavor to do everything to promote the welfare of my patients.

IF YOU NEED A SPECIALIST WHY NOT THE BEST?

Are you a nervous wreck? Are you worn out and broken down. Are you suffering from vicious Blood and Skin Diseases, that destroy bone tissue, and disfigure for life? Backaches and kidneys give you all-gone feeling? Whether these conditions were caused by early excesses, or contracted by inoculation, it does not matter, for they will all respond to my treatment. Consult Dr. Schultz, the Reliable Specialist, who is well equipped by long experience that enables him to offer his service on a basis that no other can; his charges are lower for cures than the average physician generally charges for failure.

Those who have wasted time and money, and failed to get rid of their ailments, are especially invited to consult FREE. I am giving the benefit of over 30 years' honorable experience; some of my cures are truly wonderful, yet I do not work magic; I do not make the old younger, nor the blind see; I simply apply the knowledge my years of honorable experience have given me, and I do this honestly and intelligently.

Perkins-Timberlake Co. — Perkins-Timberlake Co. Associated Stores

ASK ME

Christopher—Jewel Carmen is the star in "Nobody." She is married to Roland West, the well-known producer. It was Dorothy Phillips who played the lead in "A Soul for Sale." You are right, she appeared on the stage before her screen career. She is married to Allen Holubar. They have one child.

Pearl W.—Josephine Hill is working on a co-feature picture with Geo. Larkin, entitled "Man Trackers." The addresses you wish are as follows: Elinor Field, 827 Glendale avenue, Glendale, Calif.; Elinor Faire, Fox Film Corp., Hollywood, Cal.; Texas Guinan, Bullseye Studio, Hollywood, Calif.; Fay Tincher, Christie Studio, Los Angeles, Calif.; Ruth Dwyer, 1533 East Third street, Brooklyn, N. Y.; Helen Gibson, Capitol Film Co., Los Angeles, Calif.; Josephine Hill, University City, Calif.

Scotty—If you will follow the suggestions and advice given by successful moving picture writers, I am certain that you will find it helpful. You say you think you have the necessary qualifications, but unless your qualifications have been recognized it will be difficult for you to break into moving pictures. It requires adequate preparation and an indomitable will to succeed. Passing this, you will no doubt win out.

Felicity—It is true that Will Rogers is to organize his own producing company. Courtenay Foote plays a dual role in "The Bronze Bell," a Louis Joseph Vance story.

Curious—Wallace Reid was born in 1892. The motion pictures are not an advertising medium and it is not customary to give the names of the various automobiles, airplanes and other properties used in the making of pictures. However, I have no doubt that Wallace Reid will answer your question as to ownership of the roadster if you apply to him personally.

H. H. B.—The address of Hobart Bosworth's productions is care of Ince Studios, Culver City, Calif.

Jay Bee—The Fox Film company is located at Fifty-first street and Tenth avenue, New York city. Buck Jones is with the Fox Company at the above address.

Josie—Every day I tell some one the age of Eddie Polo. Why this great interest in Eddie's age? Yes, he is married to Pearl Grant. Malvin Polo is his daughter.

H. N. W.—So you are tremendously interested in the titles of pictures. Ralph Spence was the author of the title of "A Connecticut Yankee in King Arthur's Court." Very amusing and clever I'll agree with you. Irvin Cobb wrote the titles for "Peck's Bad Boy", in which Jackie Coogan was starred.

Gullible Gussie—Marshall Neilan's newest picture is "Bits of Life." In one of the episodes, Hugh Wiley's story "Hop" which appeared in the Saturday Evening Post is used.

MOVIE CALENDAR

OLYMPIC.
Monday, Tuesday and Wednesday—Gloria Swanson in "The Great Moment."
Thursday, Friday and Saturday—Bebe Daniels in "The March Hare." Bobby Vernon in "Hey, Rube."

MAJESTIC
Monday—Thomas Meighan in "White and Unmarried."
Tuesday—"The Call of the North."
Wednesday and Thursday—Eddie Polo in "Do or Die"; also "The Silent Rider" a Western.
Friday and Saturday—"Wolves of the Street" and a Sunshine comedy.

EMPRESS
Monday and Tuesday—George Melford's "A Wise Fool."
Wednesday and Thursday—May McAvoy in "A Private Scandal."
Friday and Saturday—"A Voice in the Dark."

STRAND.
Monday, Tuesday and Wednesday—Edith Storey in "The Beach of Dreams."
Also: Pathe News and Topics of the Day.
Thursday, Friday and Saturday—Lionel Barrymore in "The Devil's Garden."
Also: Century Comedy.

GEM.
Monday—Rex Beach's famous story, "Going Some."
Tuesday—Nazimova in "Madame Peacock."
Wednesday—William Russell in "Quick Action."
Thursday—Pearl White in "The Thief."
Friday—William Desmond, in "Princess Betty."
Saturday—Big special feature.

GLORIA SWANSON IN GREAT MOMENT

The first picture to present Gloria Swanson as a star in her own right is "The Great Moment," by Mme. Elinor Glyn, a Paramount picture, which comes to the Olympic theater next Monday, Tuesday and Wednesday.

Miss Swanson has the role of a half gypsy girl who tries vainly to still the tumult in her heart engendered by her partially normadic ancestry, and the role is said to fit her wonderfully.

Miss Swanson had just completed her work in the all-star cast of Cecil B. De Mille's "The Affairs of Anatol" when she was called upon to embark on her first stellar production. With her accustomed vigor she entered upon her duties with a full determination to excell anything she had done before.

From all accounts it is one of the most satisfactory films ever produced. Milton Sills is leading man and other notables in the cast include Alec B. Francis, F. R. Butler, Arthur Hull, Raymond Brathwayt, Helen Dunbar, Clarence Geldart and Julia Faye.

Those who saw Bebe Daniels, the popular Realart star, in the original Elmer Harris play, "Ducks and Drakes," will welcome her return to the Olympic theater here next Thursday, Friday and Saturday, in another play by the same author, entitled "The March Hare."

It is the story of a wealthy young hayden, whose properly chaperoned trip from her home in Los Angeles to New York is somewhat complicated by her falling in love with an unknown hero in the railway station, her refusal to go to the home of her prospective hostess, and her laying a wager that she can live for a whole week in the great city on the meager sum of seventy-five cents.

The Harris ingenuity in constructing brisk comedy situations has never been more active than in building this swift-moving play, and how well Miss Daniels interprets the role designed for her can easily be imagined by those who saw her in "Ducks and Drakes." The vivacious little star needs no coaching when it comes to playing dashing, good-little-bad-girl roles.

To add to the gaiety of the occasion a fine supporting cast was chosen, headed by Harry Myers, of "Connecticut Yankee" fame. Helen Jerome Eddy, Sidney Bracey, Maym Kelso, Grace Morse, Herbert Sherwood, Melbourne McDowell and Frances Raymond.

Your best reference is a bank book which shows steadily increasing deposits. The City National Bank of Commerce will welcome your deposits in any amount from one dollar upwards and pay you 4% compound interest, in addition to providing the highest form of protection for your money.—Adv.

"THE BEACH OF DREAMS," FEATURED BY ALL STAR CAST. AT STRAND MONDAY

EDITH STOREY and NOAH BEERY in the ROBERTSON-COLE RELEASE "BEACH of DREAMS"

"The Beach of Dreams," a new Haworth production released by Robertson-Cole, in which Edith Storey is featured with an all-star cast, will open at the Strand theater on Monday, for a run of three days. Here is one of the best dramas ever projected on the silver sheet. Taken from the novel of the same name by H. DeVere Stacpoole, the screen adaptation is even more thrilling than the story itself because of the smashing manner in which the camera puts the vital scenes and situations before the eye.

There are any number of exciting scenes, including a collision at sea between a four-masted whaler and the yacht of a European prince. In order to obtain a locale to conform as nearly as possible with descriptions in Mr. Stacpoole's book, the company spent three weeks exploring the Pacific coast from a point fifty miles north of Santa Barbara, California, as far southward as Mexico. The ideal spot was located near the California-Mexican border line.

For the shipwreck scenes, which are second to none ever registered by a moving picture camera, it was necessary for the Haworth company to purchase outright an elaborately furnished pleasure yacht and a great four-masted whaler. The expense was great, but the results obtained justified the expedition. When the camera stopped grinding, both yacht and whaler were total losses.

Briefly, the interesting story of "The Beach of Dreams" tells of Mlle. Cleo De Bromsart (Edith Storey), a wealthy French woman, who is bored by the social parasites who surround her, and has her own ideas on marriage. She wishes to spend a short while away from Paris and in the great outdoors. She accepts an invitation from Prince Selm to join a yachting party he is giving. Before she leaves, Maurice Chenet, wealthy and indolent, asks her to marry. She promises her answer upon her return.

The yacht is in collision with a big whaler in Antarctic waters and founders. Mlle. De Bromsart is rescued by two sailors. They manage to make the shore, where, after a few days, one of the sailors is lost in quicksand. The other she is forced to kill when he makes an attack upon her. She is dying in one of the cliff caves when Jack Raft, who was one of the crew of the whaler and who managed to swim ashore, finds her. He nurses her and she at last finds a man whom she respects.

Cleo and Raft finally discover a band of seal poachers on the opposite side of the island and, after a battle, Raft overcomes the officers of the poaching vessel and takes command. They set sail for the steamship lanes and are finally rescued.

THE GOOD LITTLE BAD GIRL AT OLYMPIC THURSDAY, FRIDAY, SATURDAY

"THE SMART SEX" SUNDAY PICTURE

The Universal Special Attraction "The Smart Set," featuring Eva Novak as "Rose of the Crorus," will be shown Sunday at the Palace, for members of the American Club. Arrangements have been made to secure the latest Universal releases each week, and the continued success of the Club is assured by the fact the membership has grown to more than 500 in a little more than two weeks. The Club plans to offer additional amusements in the near future. The Board of Governors have directed that no applications for membership be accepted at the theater, therefore those desiring to become members should apply at the office of the Club, 205 Bob Waggoner Bldg.

It has been found that production can be increased by the elimination of noises in a factory.

MADAME PEACOCK NAZIMOVA'S LATEST

Nazimova will appear Tuesday at the Gem theater in two characters each resembling in some measure the great Russian star's own career. The picture is "Madame Peacock," from a story by Rita Weiman, and it brings Nazimova to the screen first as Jane Goring, a resplendent stage star, and then as Gloria Gromwell, a young girl as naive and charming as Jane is brilliant.

Certainly Nazimova should make this story live, for she has been in the course of her remarkable career both the young girl of great promise and the great actress who has fulfilled promise.

In this her latest Metro picture Nazimova has chosen George Probert for her leading man. The star herself adapted the picture for direction by Ray C. Smallwood. Rudolph Bergquist photographed it and Edward Shulter provided special art settings.

GRANDMOTHER SAYS:

If peeling either oranges or tomatoes, scald them a few minutes in hot water and then dash them into cold water to restore their firmness. Skins will come off easily then.

Among the many uses for, sour milk is that of silver polish. Put the silverware in the liquid and let it remain for twenty or thirty minutes. Then wash as usual. It will look as if it had been polished.

The Japanese sauce or catsup made from the black soy bean is excellent for flavoring gravies, soups, etc.

The secret of good pastry is to be niggardly with water as if it cost a dollar a drop.

An orange, apple, or lemon put in the box with sweet cakes gives a delicious flavor.

Put a bag over the head of the food chopper when grinding dry bread crumbs.

SUMMER DRINKS.

Fruit Julep—Cook together one quart of fresh blackberries, one cup of sugar and one quart of water for half an hour and then strain. Add the juice of one orange and the juice of a lemon. Let this get cold and then add three glasses of ice water or spring water and one pint of raspberries, slightly crushed, and several sprigs of mint.

Ginger Punch—Cook a good handful of ginger-root, two cups of sugar and two quarts of water together. Let this simmer slowly for half an hour. Then remove the ginger-root, wash it, let it get thoroughly dry and put away to be used again. Add to the ginger-water the juice of an orange and a lemon. Let it get very cold and serve with a little ice in it.

Sugar Syrup—A sugar syrup is essential in all iced drinks if one wants to get the real fruit flavor and help save sugar—for unless a cold drink is allowed to stand for several hours before serving to allow the sugar to melt properly a great deal of sugar is wasted. It can be made by boiling two cups of sugar with two cups of water for ten minutes. If placed in a tightly sealed preserve jar and put in a cool place this syrup will keep for some time. Corn syrup or honey can also be used in all cold drinks in place of sugar, and makes perfect substitutes.

Summer Lemonade—This is a little different from the ordinary quickly made drink, but it is delicious and nourishing as well. Allow six lemons for one quart of water, squeeze out all the juice and stand aside. Use sugar syrup or boil the sugar and water together until they form a syrup, allowing one cup of sugar to one quart of water. At the time of serving stir in some well beaten eggs, one to every three glasses is the measure. If you have a lemonade shaker turn it into that and shake hard for a few minutes and then pour over crushed ice and serve.

MOVIELAND

Douglas Fairbanks is dividing leading honors with three pretty women in "The Three Musketeers," his newest picture. The film will be released in the fall and it promises to be a record breaker according to all reports. There is every reason why it should. Costume plays are taking well now and it is one of the best of costume plays. The swashbuckler here is beloved by everyone and nobody could play the part any better than Doug himself.

Then, too, Doug is just about as popular as d'Artagnan was supposed to have been and the combination of a beloved character and a popular actor all in one will surely be irresistible.

Mary MacLaren will play Queen Anne of Austria. Barbara LaMarr will play milady and Marguerite De La Motte will be Constance. This trio would make any picture worth while. "The Mark of Borro" was one of Fairbanks' very best efforts and "The Three Musketeers" should prove even beter for that dynamic actor.

WHAT THEY'RE DOING.

Gareth Hughes has completed "Garments of Truth" and is ready to go ahead with a long list of pictures which have been selected for him. Among them are "Little Eva Ascends," "Barber John's Boy," "The Gay and Festive Claverhouse" and "Tommy Carteret."

"The Old Nest" is to be generally released September 11.

"The Cup of Life" is Maude Bellamy's first picture.

Bert Lytell appears as his own grandfather in "Junk."

Doris May has been signed as a star by Robertson-Cole.

THE WOMAN CITIZEN

"Practical Politicians."

A "practical politician" is one who is able to get things done in politics—merely that. The term carries no stigma of reproach.

He, or she, is to the government what the mechanician is to the automobile; he knows how to make it go. The bungler, who works at it but cannot make it move, is not the mechanic nor the practical politician. He is the novice or theorist. To make machinery run two things are needful; first a thorough knowledge of its mechanism; second, experience in managing it. Government is no exception to this rule.

Women can never be more than a sentimental value to their government until, as a class, they become "practical politicians."

This involves no trickery, nor unscrupulous dealings. Unfortunately, some think of politics as "dirty work" and of politicians as rascals. Too often this has been correct but politics is growing cleaner all the time, as the light of publicity is more and more turned on it. How pure it will be depends in large part upon how large a percent of the people take a hand in it, how closely we watch its processes, how much we concern ourselves with it. If we pay no attention to government, but let those in office manage everything themselves, we place upon them in continual temptation to manage it to their own profit, forgetting the public good.

To take a hand in government, to be "practical politicians," we must know governmental machinery—how to start the starter and make the engine go, how to keep it going, to slow down, to speed up, and all about it. For the woman citizen this means study of civil government, and more. It means the experience which comes only by practice.

In the city elections which occur this year we are to have our chance. A share in city government is now opening to women.

Whenever a political meeting is announced, women should attend. They must accept offices and help shoulder the burdens of state if they are to get the necessary experience to become "practical politicians."

And this women must become if they are to justify their suffrage, to make themselves equally sovereign with men, to become a force and not merely inert subjects of government, obeying slavishly but having no influence in shaping affairs.

A WORD TO THE WISE.

Stained Hands—When your hands are stained from the fruits of canning season, or from vegetable peeling, you may make them soft and white by this method: Put in the palm of one hand a very small pinch of bicarbonate of potassium and the same amount of oxalic acid. Add a few drops of water to moisten these. The mixture will soon begin to seethe and grow warm but does no harm. Rub the hands all over as if washing them, then wash first in cold, clear water and afterwards in warm soap suds.

Walter Hiers, is the sturdy oak in Wanda Hawley's "Her Sturdy Oak."

Robert Bruce, scenic photographer and Hamish McLaurin, scenario writer, had a narrow escape from death when their canoe capsized in a whirlpool in the Willamette river.

Ross D. Whytock has written a series of two-reel dramas called "Tales of the Tenements."

"A WISE FOOL" COMING TO EMPRESS THEATER FIRST HALF OF COMING WEE

James Kirkwood and Ann Forrest in a scene from the Paramount Picture "A WISE FOOL"—A George Melford Production.

When George Melford's latest Paramount production, "A Wise Fool" comes to the Empress theater Monday, the public will see one of the strongest casts ever assembled for a photoplay. James Kirkwood, an eminent screen actor and director, is the featured player.

As the erratic Jean Jacques Barbille, the hero of Sir Gilbert Parker's original novel, of which the picture is an adaptation, Mrs. Kirkwood has a most delightful and entertaining role. Alice Hollister, a delightful actress, has the leading woman's role. Ann Forrest, who played the principal feminine role in "The Fa... Healer," is seen as Zoe Barbi... Alan Hale is excellent as Mass... and Fred Huntley, as Sebastian L... lores, a scoundrelly Spanish ex... provokes amusement by his rasc... ity. Edward Sutherland has... leading juvenile role and Truly Sh... tuck, a once famous comic op... star, plays Virginia Poucette. "T... Charles Ogle, John Herdman a... cast is completed by Harry Duffie... Lillian Le'shton. Sir Gilbert Par... and George Melford collaborated ... the scenario and William Marsh... was camerman.

OPEN DOORS IN BUSINESS

The Jewelry Craft.

There is a large class of women earning their livlihood by the commercial arts, stencilling patterns on boxes, designing wall paper, stage scenery, patterns for fabrics, and jewelry.

This work appeals to the beauty loving girl, but it is not a well paid work. It requires thorough specialized training, a three years course at an art school or three years or more with a capable practical jeweler. The school costs about the same as any other school. While working as an apprentice the student will receive expensive as the rent and advertis... about four or five dollars a we... later $10 to $15, but only exceptio... girls receive much more than this.

To enter the business for oneself ... ing, such as will appeal to people ... wealth, will be high and equipm... is costly.

One difficulty in this business ... that most people are satisfied w... conventional jewelry and do not c... to have it designed and made to ... der.

The work is close and confining ... therefore hard on the eyes and n... vous system, but delightful to ... whose taste fits her for it.

In the large industrial establi... ments making jewelry in quantiti... it does not require much intelligen... on the part of the worker and t... hours are long, the work hard on t... eyes, and the pay small.

THE SUN'S CORONA (SEEN DURING ECLIPSE BY THE MOON) IS NOW KNOWN TO BE A CLOUD OF DUST

TRAP FOR A SUNBEAM — THE RAY, THROWN INTO A DARK ROOM, IS CHOPPED UP AND ANALYZED

Likely That They Will Be Inhabited Long After the Earth Has Become a Dead Globe, Dried Up Like the Planet Mars.

BY RENE BACHE

"THIS is a small world."

How often do we hear that said! But we do not realize what a tiny globe this Earth of ours is until we compare its size with that of the larger planets of the Solar System.

It would take twelve hundred and thirty globes the size of the Earth to make a sphere as big as the planet Jupiter. Saturn is six hundred times as large as the world on which we dwell.

Jupiter and Saturn are certainly not inhabited at the present time. They are hot and steaming. The waters of their future oceans are suspended around them in the form of vapors.

All the other seven planets rolled into one would not equal Jupiter in size.

Jupiter is an unfinished world, incapable of supporting life until it has had time to cool and solidify. That process will require hundreds of millions of years, but the time will pass.

There can be no question that at a remotely ancient epoch the Earth must have been so hot as to be unfitted to retain water, except in the shape of steam. The waters now contained in the oceans must then have encompassed the globe in the form of vapors; and the planet, though no heavier than now, must have been much larger, its physical condition resembling that of Jupiter today.

Quite possibly the huge Jovian sphere has a very solid core, but the average of its total material is less than one-fourth as heavy as that of which the Earth is composed. Hence it comes about that Jupiter weighs only three hundred and ten times as much as our own globe. When cooled and shrunken to an equal density, it will be not more than one-fourth its present size.

Even then, however, it will be three hundred and ten times as big as the Earth. What a monster world, to be sure! Think of the size of its oceans and continents, and of the room available on the latter for population!

What Will Jupiterians Be Like?

Suppose the Jupiter of today to be sufficiently shrunken and cooled to make it possible to live upon. Human beings, constituted as we are, would not find it at all a comfortable dwelling place, if only for the reason that an average man on that planet, owing to the tremendous force of its gravitation, would weigh several tons. How do you imagine that you could get about and attend to your business if you weighed more than the largest elephant? It must be supposed either that the future Jupiterians will be pigmies in size, or else that their bodies will be of exceedingly light construction.

Important among the conditions, different from ours, to which the future inhabitants of Jupiter must adapt themselves, are those of heat and light. The giant planet is more than five times as far away from the sun as we are, and from that source it gets (per given area of surface) only one twenty-fifth as much light and heat.

There are four Jovian moons, which run up in size from Europa (about as big as our moon) to Ganymede, which is the greatest of all moons in the Solar System, being 3,480 miles in diameter. Our moon has a diameter of only 2,160 miles. Observation of their eclipses furnished the first data for estimating the velocity of light—186,000 miles a second. But nobody has ever really beheld the surface of Jupiter, nor yet that of Saturn. There are too many clouds in the way—vapors in thick layers thousands of miles deep.

Question Of Heat Supply

The atmosphere of Jupiter, as we know it today, is very different from ours. It is of vastly greater depth, and much more dense. When the planet is viewed through the telescope, it is seen to be covered by masses of vapor thousands of miles thick. The giant globe turns on its own axis so rapidly that its day is only ten hours long, and by its swift rotation the enveloping clouds are drawn out into bands. If one watches them for an hour or two, one can actually see the planet revolving.

Jupiter's average distance from the Sun is 482,000,000 miles. Its diameter at the equator is eleven times that of the Earth; but, owing to the swiftness of its revolution and the lightness of its material, it is much bulged out, so to speak, about its middle, and its diameter from pole to pole is 5,000 miles less.

The great planet, in its journey around the Sun, moves eight miles a second, or about 480 miles a minute. This is less than half as fast as the Earth travels. But eight miles a second is sixteen times the speed of a bullet when it leaves the muzzle of a modern rifle; and one gets a vivid notion of the size of the huge sphere when one realizes that Jupiter requires three hours to move through a distance equal to its own diameter.

Saturn And Its Rings

Now let us turn aside from Jupiter and take a look at Saturn, which is the most wonder-inspiring of all the planets. Though a little less than half the size of the Jovian globe, it is six hundred times as big as the Earth. Its material, however, is only half as heavy as that of which Jupiter is composed, relatively to volume, and thus the total weight of Saturn is but one hundred times as great as that of the orb on which we dwell.

Saturn, in fact, weighs little more than two-thirds as much as a globe of water of equal size. A solid sphere of equal size and weight would float on water. But unquestionably the planet is largely gaseous—though quite conceivably the core of its mighty bulk may be as dense as any materials that go to compose the Earth.

Saturn is certainly very hot, but not hot enough to give forth light of its own. Like the other planets, it shines merely by reflected sunlight. When viewed through the telescope, the globe shows quite black where the shadow of its ring is cast upon it; which would not be the case if it retained any of its original luminosity.

Since time immemorial the ring of Saturn has been to stargazers a marvel and a puzzle. As a matter of fact, it has three rings, the outer one being 11,846 miles wide, with an external diameter of 173,115 miles. Inside of this is a second ring 17,181 miles wide and 145,828 miles in diameter; and further inside is the so-called "crepe ring," 11,583 miles in breadth. Between the inner edge of the crepe ring and the ball of the planet is a space 6,730 miles wide.

These figures (given by Prof. T. J. See, of the U. S. Naval Observatory) convey a sufficient impression of immensity. But what is to be said about the nature of these rings—the material of which they are composed?

Rings Of Star Dust

Only within very recent years have the astronomers found an answer to this question. They say that beyond a doubt the rings are composed of particles of meteoric matter—star dust it might be called—which revolve about the planet in obedience to the same law that governs all satellites.

Perhaps the rings of Saturn will some day coalesce into moons. Of the latter, one might think, he already possesses a sufficient number. He has eight. One of them, Titan, is much bigger than our moon, being 3,300 miles in diameter. The others are Iapetus (1,800 miles), Rhea (1,200 miles), Mimas (600 miles), Dione and Tethys (each 500 miles), and Enceladus and Hyperion, very little fellows.

Beyond A Gap Of Space

The four little planets—Mercury, Venus, Earth and Mars—are relatively close to the Sun. We are 93,000,000 miles distant from that luminary; Mars half again as far away. Then comes a great gap of empty space before Jupiter, the innermost of the four outer planets, is reached. As already stated, the Jovian orb is more than five times as far from the sun as we are.

But those four outer planets are the giants, the really worthwhile members of the Sun's family. Uranus, 35,000 miles in diameter, is more than sixty times the size of the Earth; Neptune is one hundred times as big as our own globe, or thereabouts.

Seen from Uranus, the Sun looks only one 400th as large as it does to us. It is a hot and vaporous planet, the bulk of it in a semi-liquid state—solid perhaps in the middle, but with no permanent consistency at or near the surface. On Uranus the Sun rises in the west and sets in the east. Its four little mons—Ariel, Umbriel, Titania and Oberon—rise in the north and set in the south. As it makes its long journey around the Sun, the latter shines almost perpendicularly first upon one pole and then upon the other. Measured by our time standard, forty years of continuous daylight are followed by forty years of uninterrupted night.

Neptune is nearly 3,000 million miles distant from the Sun. It is the outermost of all the planets, occupying the remotest frontier of the Solar System. Like Uranus, it is hot and vaporous, and it has about the same density.

What is to be the future of these four giant worlds, compared with which the four planets of the inner group are mere pigmies?

Among the MOVIE STARS

DORIS MAY IN "THE FOOLISH MATRONS"

EILEEN SEDGWICK

CONWAY TEARLE

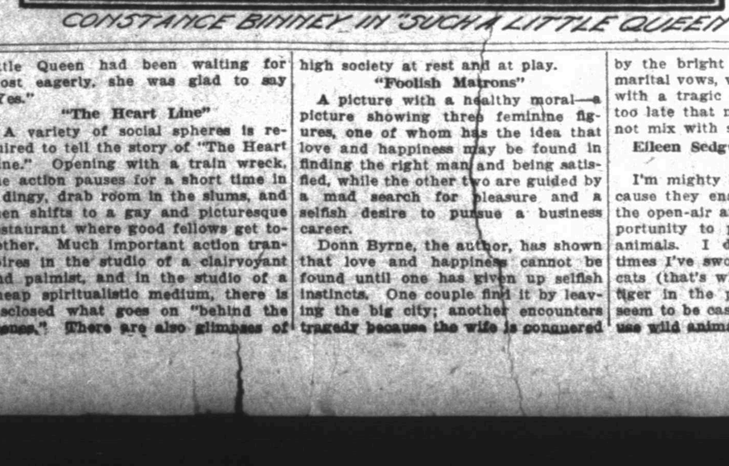

VIVIAN MARTIN AND WALLACE RAY IN "PARDON MY FRENCH"

GLORIA PAYTON IN "WHERE LIGHTS ARE LOW"

LEAH BAIRD AND JEROME PATRICK IN "THE HEART LINE"

CONSTANCE BINNEY IN "SUCH A LITTLE QUEEN"

"Such a Little Queen"—From Slums To Society—Three Character Studies—"Bucking the Tiger"—"Pardon My French".

MISS BINNEY, as the little Queen who has to flee her country when a revolutionary uprising overthrows her gilded throne, is equally appealing in the gorgeous atmosphere of her court, or in the sordid surroundings of a New York flat, where, as a penniless but courageous and sensible little exile, she manages to maintain her quaint dignity even while struggling to cook her own meals, wash her own clothes, and earn her own living.

There are several princes in the piece, some of them plain American, one, the royally born youngster to whom she was betrothed for reasons of state just on the eve of her little country's downfall. Incognito, he followed the Queen to America, and asked her to marry him, not for reasons of state, but because he loved her. As this was what the wistful little Queen had been waiting for most eagerly, she was glad to say "Yes."

"The Heart Line"

A variety of social spheres is required to tell the story of "The Heart Line." Opening with a train wreck, the action pauses for a short time in a dingy, drab room in the slums, and then shifts to a gay and picturesque restaurant where good fellows get together. Much important action transpires in the studio of a clairvoyant and palmist, and in the studio of a cheap spiritualistic medium, there is disclosed what goes on "behind the scenes." There are also glimpses of high society at rest and at play.

"Foolish Matrons"

A picture with a healthy moral—a picture showing three feminine figures, one of whom has the idea that love and happiness may be found in finding the right man and being satisfied, while the other two are guided by a mad search for pleasure and a selfish desire to pursue a business career.

Donn Byrne, the author, has shown that love and happiness cannot be found until one has given up selfish instincts. One couple find it by leaving the big city; another encounters tragedy because the wife is conquered by the bright lights and forgets her marital vows, while still another meets with a tragic end, the wife realizing too late that mercenary impulses will not mix with sentiment and romance.

Eileen Sedgwick Tells Of Screen Career

I'm mighty keen about pictures because they enable me to keep out in the open-air and they give me an opportunity to play around with wild animals. I don't know how many times I've sworn off fooling with the cats (that's what we call any lion or tiger in the pictures), but I always seem to be cast for serials where they use wild animals instead of extra people. Of course, I get the worst of it occasionally—there are a couple of scars on my shoulder which aren't birthmarks.

"Bucking The Tiger"

In MacDonald, the black sheep of a wealthy family who have slipped him out west to keep him out of the newspapers scandal pages, Conway Tearle is said to have a role that is excellently adapted to his personality. It is one of those nonchalant, ever-ready-with-his-fist parts into which this star simply seems to seep himself.

"Pardon My French"

"Pardon My French," starring Vivian Martin, provides a delightful medium for that very vivacious star. Miss Martin plays the part of a young actress who finds her profession too unlucrative and is forced to take the position of maid in a newly rich household. While another member of the company plays the part of the butler in the family.

Gloria Payton

Gloria Payton is a newcomer on the screen. In "Where Lights Are Low," she plays the part of "Yin," the gardener's daughter, who falls in love with the prince and is sent to America, where she is about to be sold as a slave girl, but is rescued by the prince (Sessue Hayakawa.)

AMERICAN BUSINESS MEN HAVE TAKEN LOSSES "LARGE SALES AND SMALL PROFITS" SLOGAN NOW

It is well to get the viewpoint of close observers, of men who visit the busy marts of finance and commerce, the great manufacturing and jobbing centers of the country where industrial and commercial activities are the first felt, the icy breath of depression as well as first to awaken under the warm influence of that sound confidence which inspires all classes and conditions of men to move onward and upward in all the fields of human endeavor.

Dr. R. D. Kennedy of Perkins-Pinberlake has returned from an extended visit to New York and other eastern markets. He brings cheering news. This country is practically over the period of business disturbance, which began in the spring of 1920. Mr. Kennedy, is hopeful, nay confident of brisk fall and winter business throughout the country but he does not exaggerate conditions or let loose inflated words or ideas that would have a tendency to create false confidence or encourage false hopes.

It goes without saying that the changes which have taken place in the past fourteen months have not as yet been recognized by the public for two main reasons. First a period of normal mid-summer dullness has obscured the certain evidences of improvement and, as the financiers say, there has been lacking a thorough comprehension of credit condition. Mr. Kennedy found the textile trade cheery and brisk, anxious for orders and easier to fill them. He found the jobbers as alert as they were before the so-called depression came. They are more cautious, more conservative, but they say that the trend has been upward for some months and they anticiptae a steady and ever increasing trade from this time on.

Manufacturers and millers have disposed of their surplus or carry over stocks. This should be helpful to the sellers of raw material as well as reduce largely the number of idle workers in the industrial centers of New England and elsewhere.

Eastern financiers say that the crisis was passed months ago. They too are hopeful of an advance in foreign exchange and a fairly active foreign demand for cotton and other American staples. Mr. Kennedy found in his travels that the millers and manufacturers have taken their losses; he found that the jobbers have taken their losses. Labor is loath to surrender. The concession won when prices were at or near the peak, but regardless of this the prevailing sentiment is that adjustment has taken place or nearly so and that the day of normalcy is fast returning.

There are some millers and manufacturers and jobbeers who are not willing to admit that they will have to take their losses and adjust their operations to make profits on real values only but these men are only battling against the inevitable for Mr. Kennedy says it is the concensus of opinion in manufacturing and mercantile circles as well as in the counting rooms of finance and commerce that all classes and conditions must take their losses without a grimace and adjust their operations in order to make profits on real values only as the vast numbers of men of vision have done from ocean to ocean.

Moreover, he says that high cost stocks the country over have been largely disposed of and price stabilization is here. Men of vision are placing their orders for heavy stocks of fall and winter goods. They do not expect the profits of past years. They do expect large sales and fair profits, counting on prices ranging fully twenty-five percent below those of a year ago. Texans are buyers of the best makes and brands, of wearing apparel and all that goes with it and the prices the coming season, Mr. Kennedy informed the writer, will show that business men who look ahead, have not only counted the cost, but are ready for the adjustment of retail prices that the conditions demand.

He has been in the mercantile business for many years. He is a keen observer, familiar with all the ramifications of business life. His father conducted a large mercantile establishment in Hunt County away back in the 70's and the son has watched the steady growth of the state in population and wealth and in building and development throughout the years that have witnessed the remarkable revolution in all things material as well as moral under Lone Star Skies.

Texas is the fifth state today in population and wealth and in 1919-20 it was the only state in the union whose soil products had a value of more than a billion dollars. In the boyhood of Mr. Kennedy, his father carried his farmer patrons from fall until fall, that is they paid once a year. There were very few dishonest men carried on the books of the pioneer merchant of Hunt County.

He never refused credit to an agriculturist. If someone chided him he would remark, "Well someone has to feed and carry them until the crop has been gathered." He never lost confidence in his fellows and he had very few bad accounts on his books. This was the Texas of old. There is a new Texas now and the new Texas ranking fifth today should easily take fourth place in 1930.

An hours chat with R. D. Kennedy on business conditions as he found them in New York and other important eastern markets, would convince the most obtuse minded that safe and sane business is claiming its own and that safe and sane methods backed by sound judgment and prices that correspond with the conditions are to prevail in future.

CUBA'S FINANCIAL DEPRESSION ACUTE

By Associated Press.

HAVANA, July 30.—Signs of Cuba's business and financial depression are evident to the most casual observer. Three big banks, with scores of branches, are closed. The parks are full of idlers. Stores are blasoning what they call "bargain sales," with goods marked down sometimes as much as five per cent from mid-war prices, which is the Spanish merchant's idea of sacrificing profits.

The papers are full of the governmental plans for buying 1,000,000 tons of surplus sugar at a price that will save producers and dealers from ruin, for reestablishing banking facilities that will relieve the pressing scarcity of currency, for cutting the cost of running the government from $104,000,000 to about $60,000,000 a year and for reducing the cost of living.

Politicians within reaching distance of the political plum basket are dogged day and night by swarms of job hunters. Hundreds of stocky Gallegos, the transient laborers from across the Atlantic, are straggling in from the sugar plantations and walking the streets, waiting for ships to take them back to Spain.

Tennants with Latin enthusiasm, are organizing "Don't Pay Rent" campaigns until landlords come down to the 1914 scale and the government forces the cost of primary necessities down a couple of hundred per cent.

Out of the nooks and corners where they have lived on the bounty of relatives since the war sent sugar sky high and started a flood of gold into Cuba, they are coming—tapping canes, propelling wheeled chairs, following dogs, being led by children or hopping on crutches—the beggars are coming to town.

M'LENNAN COUNTY GETS FIRST BALE

WACO, Texas, July 30.—The first bale of cotton raised in this county this year arrived here today. It was raised by Charles Johnson on his Bosque river farm. The first bale last year was four days earlier.

The Lady Who Changed Her Mind

"You know, for ever so long I had been hearing about the Pond Laundry but I couldn't seem to make up my mind to send out my best linens and laces. I hadn't realized, you see, just what a really modern and up-to-date laundry was like.

"But some neighbors of ours had been sending their things to the Pond Laundry for several months and I was amazed when I saw how beautifully they laundered even the finest and most precious table linens, lace curtains and articles of clothing.

"So I changed my ideas entirely about laundries. I know now that they have developed a lot since I was a girl. And I always feel now that I can safely send anything to the wonderful Pond Laundry."

Ask YOUR Neighbors about POND LAUNDRY. YOU will change your mind, too.

WICHITA FALLS, TEXAS, SUNDAY, JULY 31, 1921.

Ford Outwits Wall Street in Raising Mo

CONFRONTED WITH NECESSITY OF AMASSING MILLIONS, GENIUS FOUND NEW WAY OF FINANCING

DETROIT, Mich., July 30—James Swenehart, writing in the Detroit News, tells the inside story of how Henry Ford got the best of Wall street, obtaining $88,000,000 last winter to finance his automobile manufacturing operation and meet obligations totaling $58,000,000 without having to "split with" New York financiers. That feat in finance he accomplished without borrowing a cent, although financial circles for months had reported he was broke. Furthermore, except for a brief shutdown for necessary adjustments his plants continued in full operation, increasing the output. Machines now are being turned out at a rate of one every few seconds.

On a late January afternoon last winter a high-powered motorcar rolled up to the door of Henry Ford's home in Dearborn and out stepped a banker, formerly of Detroit, now, connected with one of the biggest banks on Broadway.

In answer to his ring, the door swung wide and a moment later he was shaking hands with the motor manufacturer.

This banker, according to Mr. Ford's associates, was the official emissary of a group of Wall street banking interests, come to offer the manufacturer a loan.

"But I do not need to borrow money. I can finance all my own companies' operations myself."

"I think not," the banker confidently went on. "We know your obligations, we know your cash. Now I have written out here a plan by which we can assist you. I would like to read it to you."

The manufacturer is reported to have told him his effort would be a waste of time and breath, but if he still wished to read his proposition he might do so. The manufacturer would do him the courtesy of listening.

The reading went on for several minutes. Then the banker, suddenly breaking off, asked, "Who's going to be the new treasurer of your company?"

The former treasurer had recently resigned.

"That makes no difference to you, does it?" the manufacturer answered.

"Oh, yes it does," the banker came back. "We'll have to have some say as to who the new treasurer shall be."

That remark closed the interview.

"I handed him his hat," said Mr. Ford, "showed him where the door was and told him to take his things and get out right quick. The next time I saw Edsel I told him that, in the future, he was to be the treasurer as well as president of the Ford Motor Co."

This meeting was the showdown in a situation which, developing for months, had been watched with intense interest by Industrial America. During the previous summer and fall industry generally, the country over, had been gradually slowing down. In Detroit plant after plant had closed down or reduced production ten to a minimum. The number of the unemployed was rising steadily. Everywhere there was talk of a "black winter."

Only at the Ford Motor Company production rushed on unabated with full forces and three shifts a day. It was the "wonder plant" not only of Detroit, but of the whole country. It engendered a strong feeling of confidence in the community.

Then, in September, the country was startled and electrified by announcement of a big cut in the price of the Ford cars. The company announced that it made the cut in anticipation of lowered prices of raw materials in the future, that for a time it must manufacture at a loss, but that, in the hope of hastening a general return to the basic prices of peace times, it would take its loss now—and it charged off to loss $17,000,000. That is, it put a value of $88,000,000 on stock, raw and manufactured, that had cost it $105,000,000 and continued full production on the new basis.

When Rumor Started.

In the weeks following Ford business was appreciably stimulated, but generally speaking, on both the local and national basis, the closing down of industry went steadily on. Then suddenly, overnight it seemed, sprang up a host of rumors that even the Ford company was affected. Vague intangible reports spread over the country that, due to the cut in price and to other causes, grave financial problems now confronted the Ford company, and soon it must close down or go bankrupt, or both.

Reports, ostensibly emanating in New York, Chicago, London and about every place else except the South Sea Islands and always "on highly creditable authority," had it that Mr. Ford, his back to the wall, was making a supreme effort, using every resource at his command to borrow money in every market at home and abroad—but always in vain. The end was not to be far off, and when, early in December, came an official announcement that on December 23 the great plant at Highland Park would close down "two weeks for inventory," confirmation was given the rumors in the popular mind, and, with a hundred variations, there seemed to be sufficient of fact behind them to get them on the news wires, and thus they were carried to the ends of the earth.

Even sobered, level-headed business men began to believe that within the Ford organization something was fundamentally wrong. Two weeks passed, but no reopening, and then announcement that the time of resumption of operations was "indefinite."

Wall street clamored that Ford was "broke," and that if the plants ever opened up again they would be in new hands; that Mr. Ford was ready to retire. Just at this juncture, according to Mr. Ford's associates, different New York banking groups sent representatives to Detroit offering loans on different terms. According to Mr. Ford, only one of these representatives ever discussed such an offer. He was the gentleman who was shown the door.

In twenty minutes Wall street found out very definitely whether Mr. Ford needed funds. Within ten days after that meeting postcards went out from their office calling 10,000 men back to their machines. Within six weeks more the plant was again in full operation.

Since that time, with production records smashed almost weekly, the company's increasing sales and product on have become the marvel of the industrial world. On July 12, 4,461 cars were turned out in a single day. Total production for July will be close to 100,000 cars, and still Mr. Ford says production is far behind orders.

How Ford Met Crisis

What brought this change? The answer is in two words—liquidation and economy.

Ford did to his business what the doctor does to a man prostrated by overeating and drinking—he administered a stern regime of fasting and diet. He stopped buying. Then, by turning all his stock on hand, rough and manufactured, into cash and, by eliminating every element and unit throughout the whole vast organization that did not produce, he forced his industry, for a time, to live off its own fat. He met obligations, not by borrowing money, and thus perpetuating numberless extravagances that had crept in during the war, but by devising new methods of buying, in distribution, administration, accounting and by eliminating waste.

The story of how Henry and Edsel Ford, with methods long planned to meet the coming storm, engineered their industry into a position such that there never was a moment when it was pressed for ready cash for its needs, and thus, to the amazement of Wall street "turned the corner" is a kind of business and industrial epic.

Out at the plant of the Dearborn Independent the other day, Mr. Ford sat, coat off, watching a never-ending procession, moving along the roadway just outside, of mowers, threshing machines and wagons, hauled by tractors, on their way to and from the harvest fields of his estate. The day was hot. He was reluctant to talk.

"I'm thinking now of the present and future," he said. "That financial matter is a thing of the past. Let it stay there."

"But," some one suggested, "there are other plants, big and little, throughout the country, that today face the same problems you had. They might benefit by your experience."

His face brightened and then broke into a smile as he said:

"Now, you've said something. Maybe it would be worth while."

An Account of Expenses

So he sent for a lot of records and data, illuminative of what was done by the company in the ten months just past, and with this before him, said:

"If there's anything in my experience during the last year that will help anybody, they can have it right off. My father used to say to me: 'Never buy things until you need them; if you've got anything lying around that you don't need, sell it.' I used to laugh at him, but now I know he was right. Then, too, there are ways of meeting financial obligations other than borrowing money. Increasing efficiency to get decreased manufacturing costs, and thus turning waste into dollars—that's one of them. When you need, it is a poor time to borrow money—the man with the money can demand too high terms."

"Is there any one thing,' I asked Mr. Ford, "to which you can ascribe your success in mastering all your problems—any basic formula principle that I could express in a few words?"

"Oh, yes, there is," said the man-

(Continued on Page 8)

PICKINGS POOR FOR THIEVES

"In the drive on the motor car thief," said L. L. Dixon of the Dixon Motor Company, yesterday, Wichita Falls might do well to follow the plan adopted in New York in addition to her own excellent methods for nabbing the thief.

"The New York police, every patrolman on every beat, is required to identify 080 kinds of automobiles. That is one of the things that makes it easy for the thief, the number of models now on the market and the possibility of hiding the identity of the car by a little camouflage.

"But the policeman of Gotham can tell the make of a car from any angle, any of the 080 models, so that he ought to be a real connoisseur on the lines of a car. And he is required to keep up-to-date on the automobile market, too. He must know when the new models come out and look them over before they are put in the salesrooms.

"And, in spite of the fact that there were a great many dubious folks, who said that it couldn't be done and that the patrolmen would raise a tremendous kick at the extra work, it did work and the patrolmen like it. They think it's the greatest game in the world and when you visit New York try the cop out on his new accomplishment. You'll find he'll pass the examination.

"The cops are required to note the position of tail light, how it shines on the license plate, the width of the tonneau, and type of rear springs, the type and number of rear windows.

"They are taught, of course, to recognize the radiator and the radiator cap at any angle and even the shape of fenders and headlights are items of the test. It's a good scheme because it works. Eighty-one per cent of the cars stolen in New York in the last six months have been recovered."

CADILLAC ENGINEER JOINS CHIEF

F. M. Holden, research engineer of the Cadillac Motor Car company has resigned to join the engineering staff of R. H. Collins, until recently president and general manager of the Cadillac company and now head of the company which will manufacture a car bearing the Collins name-plate.

Like the former Cadillac chief engineer, B. H. Anibal, and body engineer, W. R. Milner, whose affiliation with Mr. Collins has already been announced, Mr. Holden has returned to the office which he occupied for the last thirteen years in the former Cadillac main plant, recently purchased by Mr. Collins.

At the time Mr. Holden started with the Cadillac engineering department in 1908, the company was preparing for production the Model 30 four-cylinder car, on which the foundation of the Cadillac reputation was built.

He was assistant to the research engineer for five years, and became head of the department in 1913. In charge of all experimental work, he was responsible for the approval of every step in the development of the first eight-cylinder car manufactured in this country, and tested the merit and practicability of all parts of the Cadillac for the last eight years.

He was selected from the Cadillac engineering department as a member of the Bolling commission, appointed to investigate the aircraft industry in France, England and Italy for the United States government. After this war service abroad, Mr. Holden returned to take care of research work, both for Cadillac and the aircraft division of General Motors corporation.

Mr. Holden was one of the engineers who investigated and reported to the committee appointed by the government for the examination and approval of Liberty motors.

The City National Bank of Commerce—the "big bank of West Texas"—is helping many people of this district to create their success. It will gladly help you.—Adv.

"CRANK YOUR OWN"

When the auto wizard "winds her up."

We don't know whether or not Henry Ford started this Elizabeth without any trouble, but he seems to be turning the engine over in handy style. Ford is as familiar with his product as any man in his huge factory and can locate the trouble instantly when one balks.

ANSWERS TO QUERIES ABOUT YOUR AUTO

To the Automobile Editor:

I ran my car 9,500 miles without having the valves ground, and they were in a fair condition then. Is this exceptional? I put considerable kerosene oil once a week in the cylinders. Did this account for the valves running so long, and is kerosene oil better than alcohol for keeping cylinders clean? Please answer at your convenience. T. R. E.

Answer—It is exceptional to have the valves in good condition after so long use. Kerosene will help to reduce carbon deposit and keep the valves clean, but not for such a long period. The exhaust valves especially should be reseated at frequent intervals in order to keep them in good condition. Alcohol is supposed to be better than kerosene for reducing kerosene deposits.

To the Automobile Editor:

What is the best way to remove carbon? Can it be removed as fast as it accumulates or must one wait until the engine is taken down?

H. F. S.

Answer—Carbon can be removed without taking the engine down, but the methods differ according to the design of the engine. Where the head is removable every part of the combustion chamber can be reached and the carbon be removed by scraping. If the head is not removable it is best to burn out the carbon as it is difficult to reach all of it with the scrapers.

To the Automobile Editor:

I have a five-passenger touring car which has the full floating type axle, and there is a torque rod running from the axle forward. In going over car tracks and rough roads there seems to be more noise than necessary coming from the rear construction. I am told that the trouble lies in the torque rod. Will you please advise what part of the torque rod is apt to give trouble and how I can repair it? I want to make all my own repairs if possible. T. E. P.

Answer—The forward part of the torque rod is usually a ball and socket joint fastened in such a manner that it will relieve the rear axle housing of the strain which tends to revolve it. There is a heavy spring on top of this ball and socket joint and another one on the bottom. Usually there is an adjusting nut on the bottom of this socket which will permit increasing or decreasing the tension of these springs. If these springs are weak or broken there is bound to be more or less rattle in passing over rough places. Would suggest that you take this ball and socket joint and examine it carefully. It is possible that the springs need greater tension.

To the Automobile Editor:

I have a car fitted with battery and magneto ignition and one set of spark plugs. I find at low speeds the engine fires perfectly on the battery but not on the magneto. I have adjusted the carbureter without improving the results. What do you think the trouble is? M. L. G.

Answer—the spark plug points are set too far apart for the current produced by the magneto at low speeds. Set them to the thickness of a hack-saw blade or about forty thousands (.040) of an inch.

To the Automobile Editor:

The float pin or tickler has been broken off of the carbureter, and I would like to know whether this makes any difference. Since the pin has been broken I have had trouble with the carbureter flooding when standing. Will you please advise whether this pin is necessary and, if not, why the carbureter should flood?

B. C. N.

AnswerThe carbureter tickler is simply a device to push down the float and flood the carbureter. The flooding, if not overdone, facilitates starting an engine, as it gives the rich mixture necessary for the purpose. If it is taken off it will not affect the carbureter in any way. The broken part may be touching the float and causing it to flood. In this case it should be removed and a new one substituted. If the part you mean is the guide rod of the float which extends up through the top of the float chamber, the matter is more serious. It should be replaced by a new one, as it is apt to jamb and refuse to open, causing the engine to stall when you least want it to do so.

VALUE IDEA TAKES THE STAGE NOW

That the automobile sales market has passed a price stage to a value stage is the assertion of Hugh Weaver of the King-Weaver Automobile Company, distributors for the Nash car.

According to Mr. Weaver, the new prices, which went into effect recently on all Nash cars, have resulted in greatly stimulated business. In commenting on the situation, Mr. Weaver said:

"The fact that the public realizes the prices of standard lines of cars are becoming stabilized is proven in the increased volume of business that this company has had since the reductions went into effect.

"For a number of months the public has been basing its judgment in car purchasing on price. Now, however, the true standard, that of quality, is again being used, as the majority of cars are now being sold at figures closely approximating those of prewar times. The present Nash reductions represent lowered production costs in the two Nash plants, one ta Kenosha and the other at Milwaukee. These savings, attainable only because of the efficient and economical methods of Charles W. Nash, one of the country's highest authorities on production methods, are now being passed on to Nash buyers.

"It has been along the established Nash policy, which has been carried on to the Nash distributor and dealer organization, to always deal fairly and squarely with the public. It is our belief that the policy has been as highly important in our success as has been the quality of the Nash product."

TEXHOMA WILDCAT AND WALKER TEST REPORT DEPTHS

The Texhoma Oil and Refining company's north Wilbarger wildcat, on the E. P. Hicks land, is reported drilling around 1750 feet.

The Walker Consolidated test on the Allingham, about a mile and a half to the east of the Texhoma, is reported drilling around 2940 feet. This test will probably be put down to 3,500 feet, it is understood, if oil is not found at a lesser level.

GOES TO A. AND M. TO TAKE SHORT COURSE.

LOCAL FIRM PLAYS PART IN GENERAL SCHEME WHICH FORD W

Wichita Falls and Wichita county had it's share, one, in the triumphant carrying out of Henry Ford's d share came through the nerve, aggressiveness and sheer S. Langford, proprietor of the Motor Supply company its branches in Electra and Burkburnett, and the orga built up.

The playing of their part and the manner it was carried only writes a bright page in the business history of Wichita but is a brilliant object lesson of what can be accomplished by sive and intelligent effort in a business way, regardless of the tions which happen to play at the time.

Big Sum Involved.

A total of 220 cars was the size of the bite in this cause which Mr. Langford picked out for himself and his organization. It represented a tying up of over $100,000 and this in the face of the deepest depression which business in this section has seen for many a year.

He had his place full of cars. He had cars stored in practically every garage and warehouse in town. Business men and bankers, who at that time didn't have a real inkling of what was coming off, thought Mr. Langford had suddenly gone "buying mad."

"It might have seriously hurt him financially," said one prominent business man recently, in talking of the part the local business played. "But he and his men went out and sold them."

They did sell them. The cars were delivered late in February, and by the first of April the local business was ordering cars from the factory again. And they have sold 50 cars since that time.

Go After Business.

They sold them because they, like Mr. Langford, firmly believed in the inherent worth of their product, and the need for that product. They were sure that there was this need for their cars, and they went out to demonstrate this need to the buyers of cars. They believed in the Ford car, and they were sure that there was a need for them.

The building up of his organization was the first step taken by Mr. Langford in his campaign to dispose of the cars. He secured the services of Frank Queisser as general manager of the business. And he placed W. B. Omohundro in charge of the sales campaign as sales and service manager.

Believes in Advertising.

Advertising played a prominent part in the campaign. Mr. Langford expresses himself as a firm believer in advertising in keeping business going, regardless of conditions prevailing. "Tell the people what you have for them, and how it will fill their needs. If you really have the goods, and the price is right, they will get in touch with you for further investigation.

"This is the value of advertising. In one issue you can tell more people what you have than you could personally tell them in months, regardless of the number you have in your organization to do the telling. And on the other hand, the person who is buying, utilizes the s ing pages, for he can th cover the field and make seve tative selections in a fractio of the time it would take h make the first hand investiga the field."

This is substantially the wa Langford summed up the val advertising to a representativ the Record News.

"I am still telling them a my cars, and the Fordson tra and we are steadily in this ma getting in touch with people need one or the other of them. are selling all we can get ho either," he said, "and I have advertising freely in telling the ing public, in telling of my fin ing plan by which they can "pay they ride," and am finding it eq ly as valuable."

PRACTICAL IDE FOR SAFETY AUTO SIGNAL DEVIC

The need of safety signals for a tomobiles is rapidly being recogniz by officials and already seve states have passed laws requir their use. Hand signaling has b found unreliable for night drivi and a number of safety signals ha been put on the market to supp a growing demand.

One of the best devices of th kind now on sale is the Protex S nal, which has several features other safety signal has duplicate The Protex device is entirely au matic, being operated by pressu on the foot brake. When the dri ers put on his brakes, the signal illuminated, warning cars behind stop. The danger signal disappe when the brakes are released.

Since its introduction in this c a few days ago, the Protex Sign has been installed on a number cars. The signals can be had stra from the W. W. Company at Tenth and Scott or the Electric Servi Station at 1100 Scott street.

Miss Aileen d'Orme, a leading e ress in a musical play that has ju completed a record-breaking run London, has played the same role mo than 2,000 times and she has su one song to more than 2,000,000 p ple.

The manufacturer, faced by ... costs of materials, comes ... little heed to expense and ... to make his prices higher ... to make profits over ... labor, getting unprecedented ... instead of increasing effort ... production, reduces it, trying to ... higher wages. War by its ... stimulation undermines ... organization suffered along ... the rest. We took a lot of war ... eagle boats, motors, helmets, ... and other things. This opened ... in our organization. We ... in office and shop. Yet ... we could not be as ... as we had been in ... times. ... enormously increased ... and expense was built up; ... conditions seemed to com- ... In peace times it would be ... weight utterly useless. Con- ... with the war over, we ... that ... the country settled be- ... peace conditions some stern re- ... ments would be necessary. It ... come and we were on the look- ... for its beginning.

First Signs of Trouble.

The first indications came early ... 1920—here and there a business ... manufacturing failure. They were ... concerns manufacturing lux- ... or staple commodities that had ... during the war and had ... got a footing. People were ... to buy. Firms of this char- ... were first to go to the wall. ... failures became general. ... meant something to us. It ... a question—when will the ... curtail or cease buying sta- ... commodities? When will they ... buying Ford cars?

We did not have long to wait. ... sales were falling off at a ... rate. Everything began to ... down. Yet in the face of that ... you think the suppliers of raw ... rials would cut their price or ... labor would give more for un- ... alleled wages? not for a second. ... terial men demanded more and ... seemed to give less and less. ... of manufacturing went soar- ...

It was up to us to do something. ... In September, we cut the price of ... car. On the face of things the ... was not justified. We still had ... supplies of stock bought at ... prices. The cut brought the ... below the cost of manufacture. ... Over the country we were con- ... demned. Other manufacturers said ... were crazy. But the whole coun ... was on an inflated, distorted ... basis, and we felt that if we cut ... price of the car we could demand ... material suppliers cut their ... prices to us. That would tend to ... the price-raising orgy, other ... prices would slump off and the re- ... justment would come with a min- ... imum of discomfort to everybody.

"To an extent the cut brought the ... desired results. Sales took a bound. ... few other manufacturers cut. But ... our sales fell off again, and, as a ... rule, the artificial conditions con- ... tinued. We soon saw that more ... drastic treatment was needed.

"We made up our minds that our ... next step toward lowering prices ... must be more powerful and decisive. ... During the fall one plant after an- ... other—the country over had been ... closing down, and as winter set in ... cessation of industry became general. ... But we kept right on, full tilt. Sales ... did not justify our large production. ... If we kept on making 90,000 to ... 100,000 cars a month because when ... a halt came we wished to have as ... much as possible of our stock man- ... ufactured into cars. We wanted the ... next bump, when it came, to be one ... at no one selling us supplies could ... fail to understand.

"Now, to see what happened, you ... must understand that our company ... buys in tremendous quantities. Right ... now we are buying $50,000,000 worth ... of materials a month. There are ... hundreds of concerns from which we ... take the major part of their output. ... Back of them are other firms, who ... sell the greater part of their output ... to the suppliers from whom we ... buy. So when we pull the switches ... at the Ford plant and stop the ma- ... chinery, the same thing happens in ... thousands of smaller plants the ... country over.

"It's just like when you stand ... dominoes close together in a row—if ... you knock over the first one, the ... whole line falls. As long as we keep ... our buying these plants would con- ... tinue to hold prices up. Some of ... them did cut, but on the part of ... most of them, we felt, it was only a ... bluff to make it appear that they ... had reached the new low basic price ... for peace times.

"We saw that if the lowering pro- ... cess was to be hastened at all we ... must do something drastic. So, late ... in December, we closed down, re- ... solved not to resume production until ... we could buy materials at peace-time ... prices, and in the meantime to have ... a thorough housecleaning. We ... figured it would require but two ... months, as it turned out, it re- ...

... all this time a financial ... situation had been developing. Back ... in 1919 we had borrowed $70,000,- ... 000 on notes with which to buy out ... all other interests. Of this we had ... paid back $37,000,000, leaving $33,- ... 000,000 still to pay and falling due ... April 18. Then, because of adjust- ... ments pending, we still had the final ... installment of the 1920 Federal in- ... come tax to pay, which, with the in- ... stallment due April 15, made $18,- ... 000,000 due the government. Also, ... we intended to pay our men their ... usual bonus on last year's work, ... which would amount to $7,000,000 ... more. So all in all, between Janu- ... ary 1 and April 18 we had to meet ... obligations totaling $58,000,000.

"What did we have to meet this?" ... asked the manufacturer of himself ... as he sat up and leaned forward, his ... eyes atwinkle.

"At the time," he went on, "we ... had only $20,000,000 in cash. That, ... I think, is where the Wall street ... bankers went wrong—they couldn't ... see where we could get $40,000,000 ... more to meet our obligations. It ... was their best bet that we could ... not. They didn't know our men ... here or the spirit behind our organ- ... ization"—and the motor manufac- ... turer's face overspread with a ... smile. Faith and pride in his organ- ... ization is one of Henry Ford's most ... outstanding characteristics.

"Wall street was all stirred up ... over the misinformation that we had ... to make a loan," Mr. Ford continued. ... "The fact was, we didn't need a ... nickel. That's where the faith ... comes in. Spread over the country ... we had immense quantities of raw ... materials, parts and finished cars ... and I had faith. I knew that our ... organization would turn them into ... more than enough cash to meet our ... needs.

He's Showed Them.

"I'll show you what we did," said Mr. Ford turning to the desk and pushing across pencil and paper. "Put down, 'cash on hand $20,000,000.'"

"We wished as usual to pay a bonus to our men on last year's work. This would take approximately $7,000,000, which we wished to pay as soon after January 1 as clerks could make out the checks. That was our only immediate outlay—we had almost enough cash to pay it three times over.

"Then we turned our attention to liquidation. When we closed down we had on hand approximately 93,- 000 finished cars. At Highland Park we had been shipping out cars and parts to dealers and branches as fast as they were finished. This plant was cleared of materials. Every department closed down.

"But we have thirty-five branches scattered over the country, at twenty-two of which we both manufacture parts and assemble. At these the manufacturing and parts stopped but the assembling of finished parts went on adding week after week through January to our finished cars. That was why during January there was a Ford car famine in Detroit, and to fill local orders we were driving cars here from Chicago and Columbus, Ohio.

"Our first move was to sell some of our cars on hand. In our contracts with dealers they agreed to take a certain quota each year, each acording to his district. We shipped to each dealer enough cars to take care of approximately twenty-five days' sales. During January we sold nearly 60,000 cars, which showed us what we could do when we tried, and from then on sales steadily mounted above production. Assembling went on at all the branches, and on January 23 we reopened the Highland Park plant and began building up production there. But still sales kept ahead of production. Between January 1 and April 1 we turned put that down.

"Then we looked over our foreign accounts and found our agents at foreign ports owed us $300,000 which we collected. We had also sold by-products, for which we had accounts receivable of $3,709,000 more, which we got in. Put down those two items. On top of that, we sold $7,- 000,000 worth of Liberty bonds.

"If you total those, you'll find they come to $59,300,000, more than enough to meet our impending obligations. But we did not stop there. The war had led us into many extravagances of administration and accounting. We went through the plant, offices and shops, and made economies which I'll detail later, eliminating everything non-productive.

"Then, we had acquired the Toledo Detroit and Ironton railroad. We saw possibilities of reducing the vast amount which we had formerly kept tied up invested in goods in transit. We found ways to cut the time our goods are in tarnsit. By that one move we released $28,000,000, took it from funds invested in stock in transit and put it to other uses. Thus, when April 1 came around, we had $87,300,000 to meet $58,- 000,000 in obligations. We paid them all, weeks in advance."

Mr. Ford leaned back in his chair and laughed.

About the "Mere Economies."

"And all the while," he said, "these New York bankers were fussing around here trying to get us to take a loan."

"But how could you create such immense sums of ready cash by mere economies?" I asked.

"Mere economies," Mr. Ford repeated, with emphasises on the "mere." "There's nothing mere about our economies; they're the big thing. Take that item of $28,000,- 000 released from investmnet in goods in transit. We were able to do things by a combination of two things. By using our railroad we were able to speed up movement of raw materials to the factory, movement of finished cars from the factory to the dealers, better methods in the factory cut the time needed to manufacture the material into machines. Then we stopped carrying immense reserve supplies of raw material. The first economy made the second possible. Here's the way it worked out:

"Before we got control of the D., T. & I., it required an average of twenty-two days to haul raw material to the factories, making it into cars and get them to the dealers. We had to buy three weeks in advance of need. With no way of knowing future conditions we had to keep immense reserves on hand. The money tied up in these and the goods moving stood continuously at about $88,000,000.

"But the early months of 1921 brought great changes. General cessation of industry made materials and cars in which to carry them plentiful; then the D., T. & I. is really one great terminal—it crosses every transcontinental line in the country. When stock consigned to us reaches the D., T. & I. it can be speeded along to its destination. Parts of cars, outbound, can be made into through trains and thus the running time to destination greatly reduced.

"Then, in the offices of the D., T. & I. they did away with a deal of antiquated railroad red tape. Whole systems of useless accounting were abolished, the offices themselves have been brought to Detroit, and the road is operated as a single unit. All these elements combined have reduced the time of our movement of stock from the suppliers of raw materials through the factory and the cars into the hands of the dealers from twenty-two to fourteen days, and that isn't the end—we'll cut it still more.

"Where, before, we had $88,000,- 000 tied up in moving and reserve stocks required to make 93,000 cars a month, now we handle the stock required to make 114,210 cars a month, for less than $60,000,000. This $28,000,000 goes into cash accounts, to be used for other purposes—as paying debts, for example," and Mr. Ford's intense expression gave place to smiles.

Closer Watch on Stock Buying.

"But there is another angle to that," he continued. "Able to get stock so much more rapidly, we do not have to keep so much on hand. Operating on a narrow margin we have to keep very close account of stock, and, to meet this need, we have completely changed our system of purchasing and accounting. Formerly we bought in vast bulk lots, using up stock as we nedeed it. But that would not do under our changed conditions. We have worked out a new system which I believe is not duplicated anywhere.

"There are 8,000 parts to the Ford car. Each one of those parts is given a number symbol. Once each month we make a schedule of the exact number of cars we will make the next month. Then we figure out the exact amount of stock needed to make just the number of parts to fill that schedule and buy that amount of stock and no more.

"We are following my father's advice and not loading up with things we don't need.

"Office and shops also come in for a house cleaning. We went through the offices and cut out hundreds of jobs created during the handling of war work. We literally took out a train load of desks, and furniture and sold them. We told the men that occupied those desks that back in the shops were plenty of good jobs at good pay—if they wanted to take them. Most of them did.

"We cut the office forces from 1074 to 528 persons. Telephone extensions were cut about 60 per cent. Interesting but useless systems of statistics were abolished, as well as the forms made necessary by them.

"We went through the shops in the same way. During the war production we had a foreman for about every three to five men. Too many foremen sat at desks all day long looking on. We have sold all the desks, and most of the former foremen are now at machines. We now have a foreman to about every twenty men. Everything and everybody that was not producing was put in a position where they would produce or were eliminated.

"A comparison of our operating costs before and after the housecleaning is really a startling lesson in what manufacturers can do if they look sharp to economy. Big plant or little plant, the same thing can be done and the same methods will win every time. Back in November, 1920, before the housecleaning our daily expense for labor and commercial overhead charges, cost of materials not included, averaged $465,- 200 to get out an average of 3,146 cars a day, or $146 a car. Look what we do in June, 1921—$412,500 a day to produce an average of 4,302 cars a day, or $93 a car. What do you mean by talking about 'mere economy?'" and the manufacturer beamed all over.

"And the men helped a whole lot," said Mr. Ford. "They respond to right treatment. We use to have to employ fifteen men per car per day. Now it requires but nine. Look at the saving on payroll.

The motor man again gazed out the window at the procession of agricultural implements and across the pond beyond. If he had any worries his face didn't show it.

"How about the future?" I asked.

"It looks to me," he said, "that we're at the beginning of a long period of prosperity."

Municipal Baths For Kiddies.

WESTFIELD, Mass., July 30.—The "kiddies" will have shower baths free in this city.

Children can get the benefit of a refreshing shower without the attendant dangers of going bathing in the Westfield river. Certain hours during the day will be given over to the opening of the showers, which are to be attached to fire hydrants.

THERMO-SIPHON SYSTEM FOR SMALL HORSE POWER CARS

Freedom From Mechanism Is a Big Feature, Only Moving Parts Being the Fan and Belt, Which Are Easily Inspected.

BY ALBERT N. ATKINSON.

On account of its freedom from mechanism the thermo-siphon cooling system is preferred for cars of small horse power. The only moving parts are the fan and belt, which are easily inspected. The other parts are the same as in the pump system—the radiator, water jackets and connecting pipes. As there is no pump the water is forced to circulate by heat alone—hence the name, as "thermo" means heat. The water in the water jackets is heated by the explosions. The water in the radiator is cooled by the air passing through it. As cold water is heavier than hot water, the cold water in the radiator pushes the hot water out of the water jackets as fast as it heats up, causing a circulation. The hot water flows into the radiator, descending gradually as it cools, until it is cold enough to force the hot water out of the water jackets. By this means a continual circulation is kept up all the time the engine is running and for some time afterward.

On account of having no pump the circulation is not very rapid, so large pipes must be used. It will also be noticed that the return pipe at the top of the radiator does not fasten directly to thetop, but well below it, usually to the bottom of a small tank built uet from the back of the radiator. The reason for the extra tank and for the pipe being set so low is to allow for evaporation and leakage. If there is not enough water in the system to fill the return pipe it cannot circulate.

But even if the water gets to be lower than the return pipe the engine will not necessarily be damaged. The water jackets are still full, taking the heat from the cylinders as before. But as the water can not circulate, the temperature rises and the water boils. This is not so serious as it may seem, because when water boils a great deal of heat becomes latent or used up, doing no further harm. Of course the engine must not be run long with the water boiling, as the cylinder oil will burn eventually and do serious damage. Then the first precaution is to have the engine make as few explosions as possible. We must throttle down and keep in the high speed. We also make sure that the fan belt is not slipping so as to get all the draft possible through the radiator. If we go down hill we shut off the ignition and use the engine as a brake. This draws cold air through the cylinders and aids in cooling. Then, as soon as possible, we shall fill up with fresh water and go on our way rejoicing.

It will be evident that the most important detail of care of the thermo-siphon system is to keep it filled with water. Equally important is it to watch for leakage and to keep the fan belt tight, for a great deal depends on having a good draft through the radiator whenever the engine is running. Watch for symptoms of overheating, such as steam and knocking, and do what you can to prevent it. There will be less danger from this source if you clean out the cooling system with washing soda twice a year or oftener. In winter protect the system from freezing with a 30 per cent mixture of equal parts of glycerine and alcohol. With proper care and attention to the above details your thermo-siphon system will give you every reason for satisfaction.

PEACETIME REFLECTIONS

ATLANTA, Ga., July 30.—If the peace resolution ending the state of war with Germany, recently signed by the president, had been made into law Tuesday, June 28, W. N. Boy-Ed a German, nephew of the famous German spy, would not have seen his warrant charging Swift Tyler, Jr., a young attorney, with attempting to get him to swear falsely, thrown out out of court, because Boy-Ed was a citizen of a country with which we are at war and an alien enemy. The case grew out of a divorce suit Boy-Ed's wife had brought. The court ruled Boy-Ed was a German citizen and could not testify, and the case was thrown out of court.

AERIAL MAIL IS DISTANCE CONQUEROR.

By Associated Press.

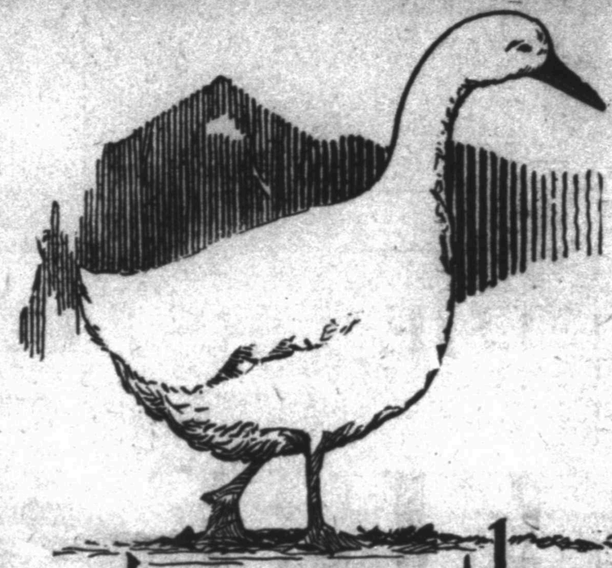

LONDON, July 5.—Regions that would have to wait many years before they could be traversed by railways are now quickly mastered by aerial transport. News comes today from the air ministry that a new air route has been opened up across the desert between Palestine and Mesopotamia. Notification has been received of the arival at Bagdad of three airplanes of the Royal Air Force which have flown over this route.

The new route is about 580 miles long. It is an extension of the present Cairo-Ramleh route. It starts from Ramleh, where is the main Royal Air Force aerodrome in Palestine, passes through Amman (sst of the Jordan) and Kasr Azrak, where landing grounds have been prepared, and proceeds thence in an almost straight line across the Arabian desert to Ramadie on the Euphrates, and thence to England.

The distances between the principal stations are as follows: Ramleh to Amman, 65 miles; Amman to Kasr Azrak, 55 miles; Kasr Azrak to Ramadie, 400 miles; Ramadie to Bagdad, 60 miles.

TROUSSEAU TROUBLES.

BOSTON, July 30.—Charged with larceny of a trunk containing the trousseau of his bride-to-be, Caesar Matteucci, twenty-seven years old, a Harrison avenue shoemaker, appeared in municipal court. According to Nellie F. Noloainelli, of Roxbury, she was to marry Matteucci on June 10 and had sent the trunk to the aHrrison avenue home. Later she asked Mattoucci to return it. Matteucci pleaded not guilty and the case was continued.

The goose that lays the golden egg

Twenty years ago the exclusive plaything of the rich—a parasite. Today the product of the world's second largest industry—"the goose that lays the golden egg" for every phase of the world's commercial, industrial and social life.

Such is the achievement of the Automobile.

Today the automobile is accepted as a national necessity—a mighty economical factor that exerts a quickening influence in all human activity.

The automobile industry has a very definite place in the world's reconstruction. Not only because it employs hundreds of thousands, but as a business facility upon which the nation depends as an indispensable factor of transportation.

Twenty-two years ago the first sale of a motor car was made in the United States. Last year (1920) there were 1,900,000 motor vehicles sold in this country.

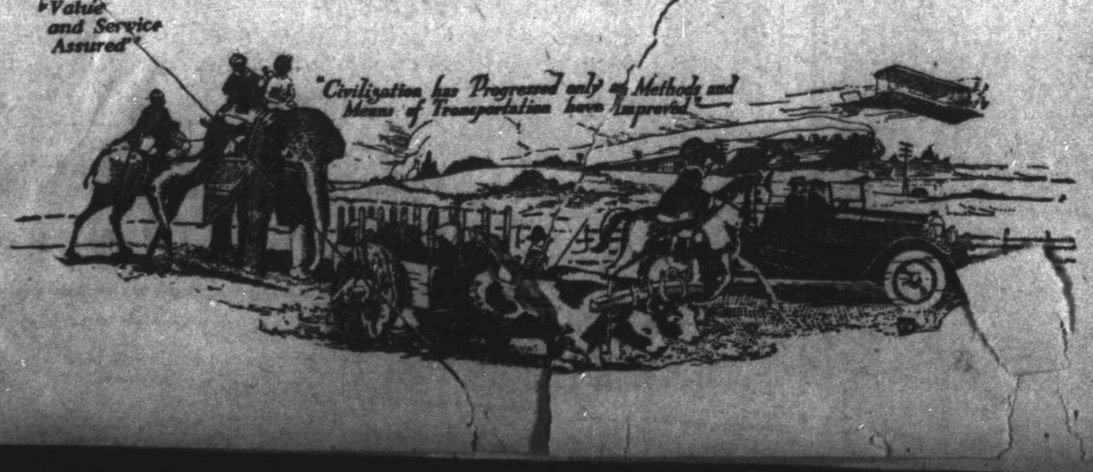

There are registered in the United States approximately 9,000,000 automobiles.

Production is hard pressed to keep pace with the demand. The growth of the industry is yet in its infancy.

The capital employed in the automobile industry is $1,802,302,862. This is greater than the combined capital of all of the national banks of the country, which took about three times as long to reach their present total. The annual product of the industry based on figures for 1919, is $2,506,834,594.

Tested Eighteen Months to Prove Perfection

TWO years ago a puncture-proof cord tire was unheard of.

Many experts believed the final development in pneumatic tire-making had been reached with the production of a *Fabric* puncture-proof—the only one, the LEE.

Motorists naturally looked to LEE for a puncture-proof cord.

LEE has succeeded in building such a tire. It has all the *economy* and *resiliency* of the best cord tires. It practically eliminates blowouts, tread separation, broken sidewalls and other common tire troubles. And it is *positively puncture-proof!*

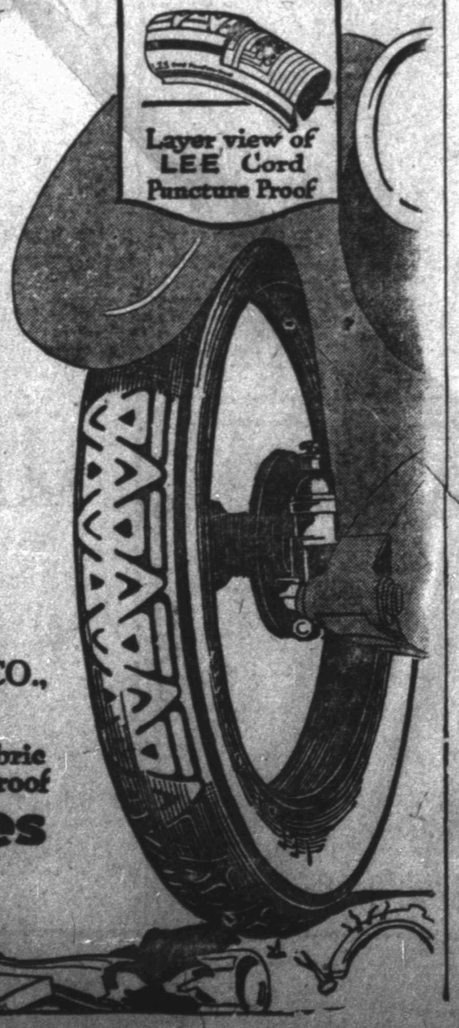

For 18 months this tire was cruelly tested before being offered to the public. It rode as lightly and as smoothly as a cord without the puncture-proof feature. It was as economical on fuel and oil. It was easier on tubes. And—*it outlasted cord tires that were not puncture-proof!*

Let us demonstrate the economy of the new LEE CORD PUNCTURE-PROOF.

Declare Dividend.

...Of the 3,200 employes on the pay ...oll of the Franklin company, 1,328 ...r 40 per cent, have purchased com...on stock of the company. The com...any has just declared a common ...tock dividend of 50 cents a share ...nd announced that profits for the ...ive months of 1921 are estimated at ...ore than $775,000, after taxes. The ...fficials advise the workers to in...est their savings in government, ...tate, municipal, town and county ...onds, many of which will afford a ...ound income on a basis of 4 1-2 ...o 5 1-2 per cent.

...Declaring that the Willys-Overland ...s in a greatly improved financial ...ondition and on August 1 will ...ake a substantial payment on its ...utstanding bank loans, John N. ...Willys announced that the company ...s nearing the completion of its ...ost successful production month ...since the war.

...Willys, in a statement, declared ...the company has $10,000,000 cash ...n hand and its outstanding bank ...obligations are $20,000,000.

..."Our $125,000,000 assets assets ...are employed to better advantage at ...present than at any other time," ...he said.

...Willys announced there would be ...no further price cuts in Overland ...cars, declaring an approximate re...duction of 33 per cent already had ...been made in hope of getting greatly ...increased business. The purpose of ...the price cut is being fully achieved ...he said.

..."We are nearing the completion ...of one of the most successful pro...duction months we have had since ...the war," Willys said. "The public ...has welcomed the great price re...duction, in Overland and Willys-...Knight cars with open arms.

..."I have been asked several times ...lately about the future price situa...tion. So far as we are concerned ...it is very simply answered. There ...have been one or two so-called sec...ond cuts on certain automobiles ...which in reality were just a slight ...trimming down of price, but I want ...to say most emphatically that there ...is absolutely no thought on the part ...of this company of any such step. ...Furthermore, we are set definitely ...on the present model cars which were ...planned and developed to fill a defi...nite need.

Went All the Way.

..."When we decided to reduce our ...prices we went all the way. The ...present extraordinary low price of ...$695 on Overlands is, I believe, the ...greatest reduction made by any au...tomobile—approximately 33 per cent. ...We made this reduction because we ...wanted to get the benefit of big vol...ume business, and we are getting it.

..."We have developed the Overland ...car during the last several months ...to a point of perfection on which ...we are proud. We get nothing but ...praise on every hand from Overland ...owners. There are actually thirty-...three features of the Overland car ...which are superior in every way to ...any car near its price, and the pub...lic is rapidly finding out about these ...features.

..."The Willys-Overland car likewise ...is a wonderful value and we expect ...it to sell in increasing numbers as ...we are able to take care of the de...mand for increased distribution.

..."Another very important matter ...both for the persent and future of ...the industry is the rapidity with ...which dealers are turning their in...ventories. With our simplified line ...especially, dealers are able to do a ...greater volume with less investment ...and this is progress of decided im...portance in the financing of the ...entire dealer organization."

RUSSIANS ACCEPT AID FROM HERBERT HOOVER

RIGA, July 30.—The offer of Herbert Hoover to aid Russia in relieving suffering due to famine on condition that all Americans now held prisoners in Russia be released, has been accepted by the Russian authorities, who suggest immediate negotiations in order to realize speedy assistance, according to a dispatch from the Rosta news agency of Moscow, received here today.

HINTS FOR MOTORISTS

You will avoid much trouble if you look over the four following details before taking out a car: Gasoline, water, oil and air in tires. Then try out your brakes as soon as you get outside. Most of our troubles lie among these and beginners are especially apt to overlook them.

Do not neglect the universal joint. "Out of sight, out of mind" is the usual motto, but the result is to let this part run dry, which means loss of power, wear and sometimes a broken joint. If you have a fabric joint this advice does not apply, but it is etxremely important with all other kinds.

If your engine refuses to run and you suspect the ignition system, a good test is to remove the wire from the coil to the distributor, loosening the distributor end and leaving one end still attached to the coil. Set the free end near the cylinder, so that a spark can jump and crank the engine by hand or self-starter. If a good spark jumps the trouble may be in the distributer. If no spark jumps the trouble is in the battery circuit, which takes in the switch, coil, resistance unit and interrupter. The trouble is usually a loose connection or dirty interrupter points.

Are you sure you have located all the grease cups and oil holes under the car? There are several on the brake levers and other connections at the rear which may be suffering from neglect. Your oiling chart is a good guide, but the best way to find them is to go under the car with an extension lamp or a flashlight and locate them. If any of these bearings run dry and seize serious results may follow.

Popping back in the carburetor is a serious trouble as it may set fire to the car, but it also means a loss of power in the engine. Look for the cause among the following: Lean mixture (carburetor out of adjustment or a leaky inlet manifold), leaky inlet valve, valve tappet adjustment set too close, short-circuit in the distributer or on the ignition wires.

Draw off a few drops of oil occasionally from the oil base and catch it on the palm. If it is thinner than usual it means that gasoline is condensing in the crank case, damaging the oil and consequently the bearings. This increases the friction and reduces the power of the engine. If the oil is thin, change it immediately. If it is simply black it does not matter so much, but it should always be changed every 1,000 miles.

If a joint in the gasoline line persists in leaking, rub a little soap in the threads. This is not soluble in gasoline and so makes a tight joint. Red or white lead could be used, but they make a permanent cement which would damage the joint when removing. Soap is better, as it does not prevent the joint from being taken apart.

If your engine has overhead valves do not neglect the rocker arms. If these are not oiled every day they will run dry and wear. This makes them noisy, besides cutting down the efficiency of the engine.

HE MADE GOOD, BUT DID IT BADLY

CLINTON, Mass., July 30.—Because "a Welch always made good any statement he made," John Welch, once noted as a distance runner, leaped eighty feet from a railroad bridge into the Nashua river. He was taken to the hospital, where he was found to be suffering from fractured ribs and internal hurts in his chest.

THE FIRST FIVE DAYS
—of Our—
FIRE SALE

Have Exceeded Our Expectations

—Hundreds of motorists and garage men have bought supplies and accessories at a small part of their real worth.

The $15,000 Stock Has as Yet Been Scarcely Disturbed

—Thousands of values yet remain for those who are wise enough to come.

—Much of the stock as good as new.

Come in Monday and see what we have and the price asked.

Sanders-Haid Auto Supply Company
908 NINTH STREET

Studebaker

LIGHT SIX PERFORMANCE

—If you would like to test for yourself, the exceptional performance of the Studebaker Light-Six, you have but to telephone us and we will send a demonstrator to your door.

—When you have studied the advanced engineering design of this car you will understand why it was able to set up such a wonderful series of records on California and Arizona roads. You will appreciate the enthusiasm of Studebaker owners over their cars' performance and know the reason why Studebaker cars are favorites the country over.

—Its stamina means longer life, almost no repair bills, and unequalled performance among light cars and such owner's enthusiasm as we believe to be unparalleled.

This is a Studebaker Year

BLOW-OUTS ALONG THE ROW
BY COLD PATCH

Don't forget the dealers meeting next Friday night.

"Herb" Dodson had a visitor last week in the person of W. D. Downey, truck tire representative of the Firestone Tire and Rubber company. After a week spent in canvasing the local truck tire situation, these boys were enthusiastic over the prospect of business for fall. "As far as that goes," Herb said. "Business is good now, having shown very satisfactory gains of late."

Dan Rubsam, manager of the Marshall-Huff Motor company, reports the sale of two Oaklands last week. One, a job with white wire wheels and cord tires, went to Eugene Seigle of the Cot Rate Tire company. The other Oakland was sold to Mr. George Smith. Rubsam is expecting a carload of Sensible Sixes any day now, the shipment already being overdue.

Five carloads of Fords are being unloaded by the Motor Supply Co. "This is the first time in the past sixty days," said Frank Queisser, the general manager of this firm, "that we have been able to make immediate deliveries."

Wilhelm-Moulder Auto Co. moved last Tuesday into very spacious and well-arranged quarters at 608 Indiana avenue. The carpenters and the plasterers and painters have been busy all week in dressing up the new home. This move adds one more good firm to those already located on lower Indiana and makes it look more like "auto row" than ever.

For the benefit of his new neighbors, we feel called on to remind them that G. J. Moulder has won quite a bit of fame as a boxer. The fact is that he is so good that some of his friends are trying to get him to enter his name for a bout with Dempsey. His ability as a hard hitter was demonstrated this week.

Rich Ramming is evidently bent and determined to get the best of mileage and service out of his new Marmon, according to D. L. Fritz of the Fritz Motor company. Mr. Fritz has just received a wire from Mr. Ramming sent from the summit of Pikes Peak in which he declares that the Marmon was running "cool as a cucumber." "Wheel 'em and Turn," is the conclusion of Mr. Ramming's message. With Mr. Ramming are J. A. Staley in a four-passenger Marmon and J. I. Staley in a two-passenger Marmon speedster.

Mr. Ramming got his Marmon on May 30, getting it at the factory at Indianapolis, Ind. He then drove to Chicago, Milwaukee, St. Paul, Minneapolis, Kansas City and back to Texas, getting a mileage of 5,021 out of the new car in 40 days. Since then he has made one trip to New Mexico and return, and, as told above, is now in Colorado on another tour. He says that his Marmon has never given him the slightest bit of trouble, despite the tough assignments he has given it since he got it.

Clarence is back. He reports having had a wonderful time at Colorado Springs. Welcome to the city, Dodge. We are glad you are here to help us beat this heat. McFall Brothers looks more natural with you buzzing around.

Paul Von Allman of Eckman and Von Allman, reports the used car market very active. This firm has disposed of practically their entire holdings during this week. "Nothing left but a Ford roadster," said Paul, "and I haven't got the heart to sell it, and ride it myself sometimes."

Carl Eckman of the firm of Eckman and Von Allman, has just returned from a few days visit with J. R. Overstreet, distributor for the Hupmobile in Fort Worth. The Fort Worth firm reports the business for July far in excess of business done in June.

C. C. Randle's trouble now is that he just don't seem to be able to "get 'em." According to C. C. there is a perpetual shortage on certain sizes of Goodyears. "The demand so far exceeds the supply," said Randle, "that it is impossible for the factory to supply certain sizes fast enough." According to reports received the Goodyear factories are turning out more casings now than they have at any period for some time past.

W. S. Haid of the Sanders-Haid company, is delighted with the way his fire sale of supplies and accessories has gone for the first five days. "We are having a splendid business," said Mr. Haid, "and the genuine values we are offering are being appreciated by the public."

W. K. Thompson of the Williams-Thompson Motor company, reports the sale of a seven-passenger Packard to T. Brannon of 1704 Huff avenue.

White of the Excelsior Motor company, reports the sale of a Studebaker six to U. S. Edwards of the Kent Grain company of this city.

F. D. Keim of the Excelsior Motor company is in San Francisco attending a national convention of the Knights of Columbus. F. D. went as state delegate from Texas.

When we called on Al Booth this week we found him doing a wild Indian dance and singing at the top of his voice the popular anthem "My Wife's Gone to the Country." Yes, Booth is a bachelor for a while, and is elbowing every good member of the population to help him behave during his trying period. The very first crack out of the box that mean Frank Buchanan and Captain Langford had both in a ton game. If we hear of Mrs. again, we will wire the Mrs. to return at once.

Walter Daugherty of the Overland Sales company reports the sale of Willys-Knight Model 20 touring to O. Cutter. Walter also states that used jobs are moving swiftly.

George W. Waddell of the Overland-Sales company of Amarillo, was in the city Friday visiting Messers. Roth and Daugherty of the Overland Sales company.

W. L. Kent of Kent Brothers reports business very active on Goodrich Silvertown cords last week.

Frank Weaver of the King-Weaver Automobile company, reports the sale of two Nash jobs this week. The cars went to two brothers, Adolph Michna getting a roadster and E. J. Michna a Nash touring. "These boys showed excellent judgment," said Hugh.

D. L. Fritz of the Fritz Motor company is a live bird. Those who have seen the June issue of Marmon News, a house-organ gotten out by the Nordyke and Marmon Co., will testify that we are correct. Pages 4 and 5 of this issue are devoted exclusively to this immediate section of Texas. Across the top of the pages runs a view of Burkburnett with its derricks and tanks. A very well written description of Wichita Falls and its remarkable growth follows with splendid illustrations of the Fritz Motor company's sales rooms, J. I. Staley, Guy C. Brown and C. W. Delp in their marmon cars. The page also contains some splendid letters from Marmon owners, men who occupy high positions in the financial and industrial life of the community. It's a great idea and the city will receive much favorable publicity from the tremendous circulation of this organ which is sent throughout America.

BURSUM ONE OF SENATE'S CHARACTERS

WASHINGTON, D. C., July 30.—When President Harding selected Senator Fall to be secretary of the interior it left a vacancy, and it rested upon Governor Mechem to appoint a man to serve in Mr. Fall's place as one of the senators from New Mexico. He appointed Holm O. Bursum of Socorro.

Senator Bursum is a typically western character, virile and unafraid. He was born at Fort Dodge, Ia., in the early part of 1867, and, after receiving a little education, was compelled by the death of his parents to go to work. He migrated to Colorado and became bus boy in a restaurant called the "English Kitchen" in Denver. He also was a general handy boy about the place.

In addition to his "board and keep," meaning room, board and laundry, the lad received the large wage of $3.50 a month. At spare times he read. Another position he occupied in the state was switchboard tender, for which he received $30 a month, out of which he paid for his room and board. Quitting this job he became boss of a railroad gang, arising at 3 a. m. and continuing labor until the sun had set. This and other jobs kept him in Colorado until the spring of 1881, when he hit the trail for New Mexico. His railroad experience has given him an insight to the fact the money could be madee by ngaging in the contracting business, so he hired out as a "mule skinner."

A Cowpuncher, Too.

Finding that contracting was declining he traded the mules and horses off for a band of thirteen hundred sheep. The man who got the mules lost half of them. Bursum lost half of the herd of sheep. Each one of the traders was satisfied with the deal and each contended that the laugh was on the other fellow. The sheep were driven to Socorro and sold. Mr. Bursum then engaged in the pursuit of feeding cattle, and like many another good man, he went "broke" in 1893.

From time to time in a place where there might happen to be a night school the young mule skinner would put in a leisure hour or so trying to perfect his education.

There is hardly a man of the early days of New Mexico who has not some time or other in his career punched cows. Bursum was no exception.

During the time he had been carving out his fortune, Mr. Bursum had been active in the affairs of the state. He had been elected a member of the territorial senate from 1899 to 1900. He had been made a delegate to the republican national convention of 1904, 1908 and 1912. He was made chairman of the republican territorial central committee from 1905 to 1911. He was a member and the republican leader of the constitutional convention held in 1910 and has been a member of the republican national committee since 1919.

Doesn't Play Golf.

The senator is tall, of athletic build, smooth face, gray hair and has clear, gray eyes. He gives one the impression that he is a strong, resourceful and a determined fighter. When he talks to you he looks you straight in the eye. He is the kind of a man who would not carry an ace up his sleeve, and he is also the kind of a man who wouldn't permit you to carry one in your sleeve.

He prepars to take much delight in smoking a pipe. He carried his tobacco in a pouch that is reminiscent of his cowboy days. He wads down the tobacco so that it does not splutter out, another trick of the plainsman.

PARADISE! MEN RULE IN CHURCH

DETROIT, Mich., July 30.—Paradise! Men rule, women are silent. "Women in the Lutheran church subordinate themselves to the men," the Rev. G. C. Koenig, Brooklyn, attending the Walther league conference in Milwaukee, said, commenting on the equal rights of women with men in the church. "They are not allowed to vote, have absolutely no voice in affairs.

"Of course it's an old teaching of theology, founded on Scriptures, that women shall obey men. Our church has always stuck to that."

When St. Paul wrote to Timothy, he said: "I suffer not a woman to teach nor to usurp authority over the men, but to be in silence."

And that's what the Lutherans adhere to—silence for women.

"Dewomanizing woman is the work equal suffrage is doing and I don't believe in it," says the Rev. T. C. Heyne, St. Paul, president of the Minnesota district.

"If equal suffrage means women shall take the place of men in public life, then I'm against it. Woman's place in the home has been consecrated and she should stay there."

The Rev. C. S. Brand, Pittsburgh field secretary of the Pennsylvania district, believes women's influence is as powerful as a vote.

"Men are the heads, but women are the necks that turn the heads" he said.

Lutheran women accept the position of subordination, which they have inherited for generations and generations, with meek confidence in the power of men to do things better than they ever could.

"It never occurs to us to compete with men," says Miss Lydia Hoffman, secretary of the national executive committee at the Milwaukee headquarters. "They've always done the work well, so why should we try to do it better? Of course women have their auxiliary societies and charity work—that's enough for them. That's more like home work which is after all, their place."

Thousands of factory girls in England are leaving the mills for domestic work.

COMPLETION OF SCHOOL IN ELECTRA NEAR

Special to the Record News.

ELECTRA, Texas, July 30.—Construction projects, aggregating $100,000 in cost are now nearing completion in Electra. The largest of these projects is the new South side school, the erection of which has been made necessary by the large increase of the scholastic population during the past two years.

The Electra Steam Laundry, another project financed entirely by local capital, will open for busines on or about August 8th. The new laundry, housed in a building of modern fireproof brick and concrete construction, is fully equipped with modern machinery, provided with every obtainable protective device. The steam power plant of the laundry includes an electric generator which will eliminate the necessity of even temporary shut down which might be caused by interruption of electric service, which the city now receives by high line from Wichita Fals. The new laundry represents an investment of approximately $25,000 and will be operated and managed by J. J. Douglass, who comes to this city with twenty years experience as a laundry man in Montana and Idaho.

Construction was tarted this week on the concrete walls of the municipal swimming pool located in Electra's new public park. This pool, 75x150 feet, is one of the largest pools in Wichita county and will be open to the public on or about August 20th.

The officers of the City National Bank of Commerce make a feature of furnishing each customer with helpful, friendly service and co-operation regardless of whether the transaction involved is large or small.—Adv.

GOLDEN DAYS FOR MOTORIST

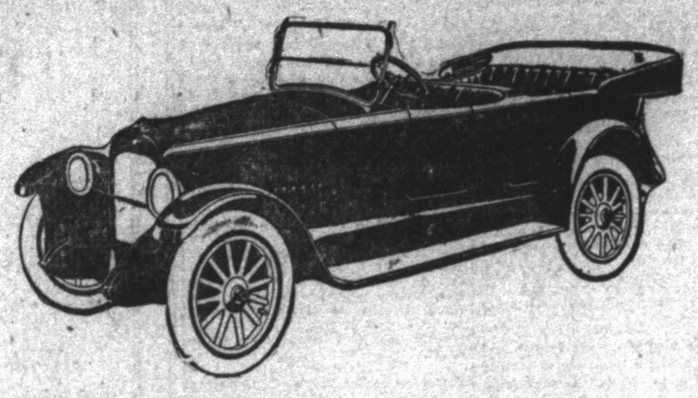

"These are the golden days for the motorist," declares W. C. Leland, vice-president and general manager of the Lincoln Motor Company.

"Not only is the price of automobiles at a level far below that of the last five years, but the cost of gasoline, oil and service is at a reasonable figure. Analysts are of the opinion that the price of motor-fuel is going still lower. Cars are becoming more economical of fuel, too.

"Probably the aggregate cost of motoring is down 25 per cent or more—and this at a time when the cost of other [illegible] been steadily mou[illegible] mendous road-buildi[illegible] under way by the federal government [illegible] lights of touring, a[illegible] feet costs.

"These factors alr[illegible] felt favorably in the [illegible] ume of business at [illegible] plant. In the typical [illegible] cago, our June business [illegible] cent larger than May; [illegible] been very good. Prosp[illegible] last half of 1921 are [illegible] aging.

"The automobile indus[illegible] ing not only because of [illegible] forts to fix fair prices, [illegible] drop in the cost of ever[illegible] nected with motoring. [illegible] of the biggest touring [illegible] record."

NASH SIX
and
FOUR

—The courteous and thoroughly competent services of this firm are available to you as a Nash owner.

—We are pledged to carry out Nash service policies to the letter. We were selected because of our ability and willingness to furnish service up to the high quality of Nash products themselves.

—Investigate our service facilities. Let us interpret Nash service policies to you. Ask other Nash owners what treatment they receive in this respect. Compare the Nash with other cars. You will find the time profitably spent.

A Man's Spirit Rules

ROGER W. BABSON

(Copyright, 1921, Fleming H. Revell Company. First published in this newspaper by arrangement with Associated Editors, Chicago.)

Development of the Six "I's."

How shall we develop these six "I's" of prosperity? How shall we enable our children to develop them? This is the most difficult part of our problem.

If statistics have taught me any one thing, it is the truth of that statement of Towson's namely:

"The biggest thing in business is not machinery, materials or markets; but rather men. The biggest thing in men is not body, mind, or music; but soul. Wages, prices and conditions can be adjusted; but attitudes, motives and relationships can only be converted." Health, education and money may get young people diplomas, but only religion causes them truly to benefit from that Industry, Integrity, Intelligence, Initiative, Intensity and Inspiration, which bring true success.

The Right Training.

Being a parent myself, I know the difficulties of training our young folks rightly. Talking and scolding do little good. The greatest factor is the power of example, and yet we cannot make a plant grow simply by setting it a good example. It needs a good soil in which to grow and much sunshine. So as I have grown older, I feel that these six "I's" of success need a good soil in which to grow and much sunshine.

What is the needed soil? It seems to me that the needed soil is good health and good habits. There are instances where a person with unclean habits or unkind habits has been successful, but such instances are few. Get the young people to form good habits and the chances are very much more in their favor. Hence the importance of regular meals, sleeping with the windows open, taking good care of the teeth, and of saying only kind things to and of others.

What Is a Habit?

Yess,—what is habit? In my hand I may hold a piece of paper. When I fold the piece of paper the first time it may fold at any point. After I have folded it once, it will always fold in the same way, no matter how often I flatten it out. It is the same with life. We are continually making creases, or habits. Every time we make a good crease or good habit it is easier for us to do the right thing next time. Every time we make a wrong crease, it is harder for us to do the right thing next time.

Life is largely a matter of habit. In order for young people to be successful, in business, they must form good habits. In order for them to have good habits, we older ones must set them a good example. Those who are unsuccessful, usually have poor habits, while those who are successful usually can in many instances, thank their good habits for the success.

The Driving Forces.

I ask you to consider again the six "I's" that bring prosperity—Industry, Integrity, Intelligence, Initiative, Intensity and Inspiration.

Are these physical qualities? Are they qualities that increase in proportion to a man's height or weight? No, they are not.

Are they mental qualities? Do you acquire them by studying books and by going to school? Only to a small degree.

They are essentially spiritual qualities.

It is a man's spirit that makes the difference between failure and success. The driving power from within that urges men on to strife and achievement is in reality a spiritual power. It is not of the body and not of the mind.

Spiritual Development.

The basis of permanent success is a well-grounded spiritual development. Such a development is far more important than the physical, mental, industrial, or recreational. Moreover, I say this purely as a business man and statistician. This aid is far more essential for individual success or making good in business than any other above enumerated. You will remember that reference has already been made to an investigation of the leading industries of the United States. That investigation showed that 30 per cent of our prominent business men of America are the sons of ministers and farmers. It showed that success comes to those who have been reared in a family where religion and hard work made up the program.

Spiritual development is especially necessary as a foundation to the two I's—Integrity and Inspiration. Integrity is the Ten Commandments boiled down into one word; while Inspiration is that faith which comes only to those who are imbued with a desire to serve. Integrity is the keynote of the Old Testament and is that feature which differentiates Chrisianity from the other religions.

Service Brings Civilization.

Years and years ago there were no business activities in which a man might make good. Why? Simply because men produced only for their own consumption. They had never heard of the Gospel of Service. There were plunder, rapine, hunger, and a lack of regard for the rights of others. Men were physically strong and mentally developed in accordance with the standards of their time; but they lacked integrity. I have said that there was a time also when civilization are the products of religion. Not until there developed in the minds of the people a regard for the rights of others could business or civilization develop.

Years ago tribes of Indians roamed through the fields and forests of this fertile country. The Indians were physically strong and they had a standard of mental development, but they lacked integrity. On account of that lack of integrity no civilization developed on this continent until the coming of the white man with his religious standards. Only as the missionaries, the harbingers of industrial enterprise, inculcated integrity in the mind of man, appended the dawn of a new era.

The Indian did not care to construct a log canoe because he knew it would be stolen from him. He did not catch more game than he and his family could consume in a day because it would be carried away by others. But as soon as integrity was taught by the missionaries, the Indians began to construct their canoes, which were the beginning of our merchant marine. The Indians then began to preserve their game and that was the forerunner of the packing house industry. Business enterprises and civilization itself are the products of spiritual teachings.

Religion, Not Creeds.

The best way to develop moral and spiritual integrity is through the religious process. By religion I do not mean theology. I have not in mind your creed or my creed, or your denomination or my denomination, but rather that form of religion which develops in man a desire to deal justly, to love mercy, and keep himself unspotted from the world without the development of the qualities inculcated by religious teachings it is impossible to make good, even though you have physical strength, industry and intellect.

There are many men in business who lack moral and spiritual development. Temporarily some of them make good; but before a long period no man will ultimately succeed who lacks religion. No doubt there are religious people who are not in the churches. No doubt there are people in the churches who are not religious, but to my mind the best way to develop your spiritual well-being is to affiliate yourself with a church and take a direct part in its work. But this will be treated more fully in the last chapter.

The Right Education.

Closely allied with definite religious training is education in general. It is through mental development that one learns to think for himself. Learning to think for oneself is best accomplished through some educational process.

Many reforms should be made in America's educational system. Too many frills and fads have found places in our schools and colleges. Too much time is required to accomplish results. Too many impractical theories are being taught. There are too many teachers with book knowledge. Despite all these things the educational process, even in its present state, is one of the most constructive aids to making good. The educational period of a man's life is the most important period of life. It is the formative period. It is the period in which habits, character, associates, friendships, moral and religious attributes are made, formed, and acquired. The educational period is the foundation builder of our future existence.

Money Value of Education.

Not only does our individual success depend upon religious education, but even the national prosperity of our country depends upon it. In Spain, Russia, Turkey, and Mexico, where there is a lack of Christian education, there is the same story of poverty, revolution and misery regardless of race, climate, or abundance of natural resources. On the other hand, wherever there is adequate provision for such education there follow industrial efficiency and national wealth. Witness such countries as Denmark, Scotland, Switzerland, England and the United States.

Statistics have been tabulated showing that productivity per man varies directly with the schooling. The poor farmers of Asia, Russia and India receive from 3 to 14 cents per day and only 5 per cent of them are literates. In Russia about 40 per cent of the people read and write. In the United States, 92.3 per cent of the people read and write. From the shoulders down neither men nor nations are worth more than the product of their labors.

There is a class of individuals who still insist that manual labor is the only kind of productive labor. Statistics show that the contributions of intellect are far more productive than manual labor. I say this with the highest regard for manual labor—a most honorable kind of work. At the same time we must not close our eyes to the contributions of the intellect. Had it not been for the mechanical invention industry would not be developed as it is today. We could not clothe our people or feed them under primitive methods of production. If prices have been high during the past few years, think what they would be if production were still in the household stage.

Who Succeeds?

Some years ago a study was made of the names listed in the book of "Who's Who in America." This book contains 30,000 names of those who have made good in certain walks of life. Of the 5,000,000 uneducated people in the United States, only 31 of them were listed in the book. This represents only one individual out of 150,000. Of the 33,000,000 grammar students, 808 are listed in the book, or 4 out of every 150,000. Of the 2,000,000 high school graduates, 1,245 are listed in the book, or 87 out of 150,000; and of the 000,000 college graduates, 5,768 are tabulated, or 800 out of 150,000. In other words, the child with no schooling has one chance out of 150,000 of making good a big way. The child with an elementary education has four times the chance. The child with a high school education has 87 times the chance, while the child with a college education has 800 times the chance.

From a statistical standpoint it may be interesting to know that while less than 1 per cent of American men are college graduates has furnished 55 per cent of Presidents, 36 per cent of our Members of Congress, 47 per cent of the Speakers of the House, 54 per cent of the Vice Presidents, 62 per cent of the Secretaries of State, 50 per cent of the Secretaries of the Treasury, 67 per cent of the Attorney Generals, and 69 per cent of the Justices of the Supreme Court. These are colossal statistical facts that we must accept as a handicap or an advantage in the race of making good.

Inconsistency of Students.

In my college days I was considerably surprised at the attitude of the general student toward physical and mental training. Probably the same attitude prevails to a greater or less degree today. Put the average student on the athletic field and he will obey the physical coach to the letter because he knows it is absolutely necessary to observe the rules in order to make the team. The athletic coach often regulates the hours of sleep and designates the diet. His dictum is accepted without a murmur on the part of the student. Put the same student in the classroom and his attitude toward the mental instructor changes considerably. If the instructor assigns a chapter from the history of Rome, the student at once questions the advisability of the lesson. "I do not care what the Romans did. What I want is to know what they are doing today," is a very common statement heard in college halls. Whereas, those of experience and training in educational lines know that what is happening today is the result of past years of experience.

The Marathon.

The race of making good is not unlike an athletic event. There are races at all stages beginning with the lowest amateur and ending with the Marathon. The Marathon of making good is achieving success in its fullest measure. In a professional race of any kind there are usually preliminaries. Just the same in the race of making good. If one expects to possess the "I's" he must prepare and qualify in the preliminaries. There are many persons who have some of the I's, but in order to have them all, self-development is necessary.

CHINESE PEOPLE IN STATE OF UNREST WHEN SOLDIERS MUTINY FOR LACK OF PAY

By Associated Press.

SHANGHAI, July 30.—Following upon outbreaks of mutinous soldiers in which several hundred Chinese were killed, property worth millions was destroyed and large portions of two important cities were burned, a wave of general alarm spread swiftly through all the length of the great Yangtsze valley in the month of June and while measures of various kinds were being discussed at Peking, communities along the Yangtsze were adopting measures to defend themselves.

More or less unrelated t osinister political conflicts that were brewing in widely separated parts of China the first defection of Chinese troops took place in the province of Hupeh at Ichang, a city of about 40,000 inhabitants located a ahousand miles from the coast. Six months before, in November last, the Ichang garrison mutinied and after an attack on the city in which about 60 Chinese were killed the soldiers looted a part of the city and burned down portions of it.

In the second outbreak which began on the night of June 4 more than a hundred persons were shot down by the soldiers, virtually every Chinese home and shop in the city was looted and a determined effort was made to destroy the entire city by fire. Several foreign business establishments were looted and burned and an attack was made upon the residence of the Japanese Consul.

The outbreak of last November developed, according to report, because the soldiers had been unpaid for a period of months. Reports from up the Yangtsze say that the recent mutiny grew out of conflicts between opium raiders and soldiers who have been trfficking in the drug.

American Officer Wounded.

Two American companies that suffered loss in the recent uprising are the Standard Oil company, whose agencies were looted and the Robert Dollar company whose offices were wrecked after they had been looted. All the government offices of the port were sacked and the buildings occupied by the Ichang branch of the Bank of China and Young Brothers Banking Corporation were burned after they had been looted. It was estimated that property losses will run considerably over $2,000,000.

Though American, British and Japanese gunboats were dispatched to Ichang when the first reports of the outbreak were received, it was reported that there was little for them to do after they arrived as the disturbances had then subsided. So far as is known, none of the fifty-odd foreign residents of Ichang suffered injury.

Second Mutiny.

The second mutiny of Hpeh troops followed closely upon that at Ichang and took place on the night of June 7 at Wuchang, capital from the important city of Hankow. Orders for the disbandment of the Wuchang troops that had been issued by Wang Chuan-yuan, military governor of the province, are said to have displeased the soldiers and this led to the outbreak.

Though Hankow across the river has a large foreign population with many foreign commercial interests there is little or no foreign activity in Wuchang. In the upsising the Wuchang mint was wrecked and looted of everything it contained, including a large number of gold and silver bars, but no attacks were made upon the quarters of the military governor. Hundreds of shops and homes were stripped and a considerable portion of the city was swept away in the numerous fires taht were started.

On the second day after the outbreak when a semblance of order had been restored in Wuchang, Chinese authorities set about dispersing troops that had been active in the mutiny by loading them on to trains and sending them to distant points from the city. The authorities deemed it the part of wisdom to permit the soldiers to take their loot with them. The first trainload, however, proceeded only to Siaokan, a short distance north of Hankow. After it had been sidetracked at this point a battery of machine guns manned by forces that had been concealed among the track sprayed the coaches with fire and it is thought that every soldier on the train was killed.

According to reports of the incident a number of soldiers who sought to escape from the coaches were bayonetted or shot down. It is estimated that 350 were killed. Another trainload of troops sent out of Wuchang was halted at Sinyangchow in Honan and the soldiers stripped of all the booty they had carried away from Wuchang by Honan troops.

Concessions Granted.

On the day after the Wuchang uprising, by orders of the military governor the sum of $13,000 was distributed to the troops in Hankow and they were placated with gifts and concessions that were granted to them.

The alarm that was felt in Hankow quickly spread to Nanking, capital of Kiangsu province, and even to Shanghai, as it was reported that back pay due to the Kinagsu troops amounted to $2,000,000 and that they were showing signs of unrest.

Though no fears were entertained of disturbances at Shankhai a significant incident that followed the outbreaks in the Yangtsze valley was a call issued by the French Consul-General at Shanghai announcing that the Volunteer Corps of the French Concession, which has been inactive since before the war, would be reorganized. In calling for volunteers, Mr. A. Wilden, the consul-general said that the corps would function like the Shanghai Volunteer Corps of the International Settlement of Shanghai and would supplement the police department of the French Concession.

ARGONNE HERO HAS THRILLING LOVE ROMANCE

By Associated Press.

NEW YORK, July 30.—The post-war romance of Salvator Filippo, blind hero of the Argonne, is as full of thrills as was his military service, according to the story he told here today, prior to his departure for Erie, Pa., with his 16-year-old Italian bride, Isabella. They arrived on the steamship Argentina yesterday.

Filippo lost his ight as a result of wounds suffered while rescuing a member of his squad from No Man's Land in the Argonne, and he went to the land of his birth a year ago with his mother. In a little village in the province of Lucca, he met Isabella Bruna, and charmed by her soft voice, began to woo her.

The girl's father objected to the mariage. Filippo persisted, and finally he and Isabella were secretly married. Then, acording to Filippo her relatives broke into his ouse at night and stabbed him, leaving him for dead and taking Isabella away.

They succeeded, he said, in temporarily turning Isabella's affection away from him, but he induced her to visit him on board the Argentina just before she sailed. Telling her the boat did not sail until 4 o'clock he led her below decks and when 4 o'clock came Isabella found she was 20 miles at sea.

Say Wheat Selling Too Low for 150 Million Bushel Surplus When 350 Million Were Shipped in 1920

Present indications are that the exportable surplus of the 1921 wheat crop of the United States will be less than 150 million bushels. The actual exports in the twelve months just ended were more than 350 million bushels. The striking contrast between the two figures raises the question whether wheat is not selling lower than the existing conditions justify.

Latest official estimate of this year's crop is the same as last year's 787 million bushels, but the past twelve months' supply was augmented by 50 million bushels carried over a year ago, and an indeterminable quantity of flour held at that time by consumers and dealers in excess of normal; also by at least 50 million bushels imported from Canada.

This year there will be practically no carry-over at terminal markets and probably not much on the farm, for the old wheat has been disposed of in the last few weeks in unprecedented volume for this time of year. Moreover, the invisible flour supplies at the present time are far below those of a year ago.

Spring Wheat Crop in Doubt.

There seems to be no likelihood that wheat will turn out better than the June government estimates, and there is a chance that the outcome will be a good deal below the June estimate. Some damage has been done to spring wheat, and a good many reports indicate disappointing winter wheat yields.

It is practically certain that the United States will have less than half as much wheat for export in the next twelve months as was shipped in the past twelve months.

As a partial offset to this decrease the Canadian crop promises to be the largest on record; Argentina has a large proportion of this year's crop still to ship, and European crops generally promise to yield more than last year, though recent drought reports raise some question about the outcome.

Despite the statistical showing there is a rather widespread bearish sentiment in the market for the immediate future, based on the expectation of a big winter wheat movement this month, and on a rather indifferent attitude of foreign buyers. It seems certain, however, that Europe will want all the wheat the United States can spare in the next twelve months.

Responding chiefly to pressure of new crop offerings wheat prices continued to seek lower levels last week, carlots in some cases selling at the lowest prices of the season. Both the future and carlot markets were extremely unsettled and irregular and there were frequent wide swings in prices, due to occasional export buying and to pessimistic crop reports from the spring wheat sales. In a general way the market continued to show a tendrency to return to a normal basis, as carlot premiums in many cases were further reduced and the deferred deliveries were nearer to a carrying charge basis.

July wheat closed Friday 8 to 10 cents lower than a wek ago and September deliveries were down about 4 cents. Daily fluctuations generally ranged from 5 to 10 cents, the market at one time showing net declines of 9 to 13 cents. That latter month went to a premium over July in Kansas City and Minneapolis and was within a fraction of the July price in Chicago. Indications that supplies this month would be more than ample for export and domestic requirements caused relatively more selling in this delivery than in September. Trade in December wheat started Friday at a premium of one-half to two cents over September.

Liberal New Wheat Offering.

Most of the selling of futures was attributed directly to the tendency of the country to offer new wheat for nearby delivery. General selling on the part of the country early in the week caused an extreme break of about 10 cents in the July price and as much as 22 cents in carlot prices, the latter being the largest daily fluctuation in the market this season. The reduction in carlot basis caused a decrease in offerings the later part of the week, but bidders at terminal markets found no difficulty in filling their requirements. The atitude of the country was taken as an indication that the early movement of wheat would probably be considerably in excess of current requirements, especially as foreign demand has shown persistent dullness.

Moderate quantities of new wheat were received at southwestern markets last week, the first important shipments from the 1921 crop. Kansas City received about thirty cars, most of which sold at discounts of 3 to 10 cents under old, due to heavy moisture content or poor color. The first Nebraska wheat arrived. Arrvals from the new crop are expected to form a substantial proportion of the receipts this week. Clear, warm weather prevailed in most of the middle West last week and harvesting made rapid progress.

As the demand for cars increases, the supply is found to be smaller than indicated by railroads several weeks ago, but it is thought that only local shortages will result from time to time. The condition of cars continues unsatisfactory and promises to be a factor again this season. As a whole, however, transportation conditions probably will be much better this season than alst.

Moderate Export Demand.

A moderate revival in export demand for wheat was reported due to the break in prices, but offerings at all times were in excess of requirements and bearish sentiment was not affected. Total acceptances were estimated at two million bushels, a large part of which was handled at Kansas City. Cables indicated that importing countries have adequate supplies for immediate needs and are inclined to await the new crop movement in this country before making further commitments.

Exports of wheat and flour from the United States and Canada continued liberal last week, according to Bradstreet's, 8,536,000 bushels, compared with 9 3-4 million bushels the preceding week.

Export trade in Argentina continues to lag. Shipments of wheat last week were 2,113,000 bushels, compared with 2,856,000 bushels, the preceding week and 7,162,000 bushels a year ago. Fairly liberal shipments are reported from Australia.

Extreme irregularity prevailed in the carlot market. Early in the week there was an urgent milling demand for choice dark hard wheat and practically no inquiry for the poorer samples of ordinary wheat. The range of prices widened rapidly and at one time was as much as 40 cents for the same grades. Milling demand was soon satisfied, however, and the entire market slumped. Quotations for hard wheat yesterday were 3 to 12 cents lower, choice dark bringing as high as $1.53 and and ordinary hard selling at $1.17 to $1.35. Trade in red wheat was quiet, with declines of 3 to 9 cents for the week. Choice sold Friday at $1.25.

Receipts at the principal markets for five days last week were 3,225 cars, a decrease of 31 per cent, compared with the preceding week, and 6 per cent more than a year ago. Unsettled weather in the Southwest which interfered with loadings the preceding week and the slump in carlot prices accounted chiefly for the smaller movement.

The improved demand for flour reported about ten days ago has been well maintained, according to most reports from the spring and winter wheat districts. The fact that reserve supplies on practically all parts of the country are low accounts for the better inquiry. The erractic fluctuations in wheat last week, which ordinarily would have checked demand for flour, caused only a slight reduction in new bookings. Export inquiry continues fairly good. With two mills idle, the Kansas City output last week was 81,00 barrels, the largest since the last week in January. Compared with the preceding week, there was an increase of 14,500 barrels and with a year ago an increase of 7,800 barrels.

Lower Tendency For Corn.

Highly favorable reports on the general condition of the new crop, together with the weakness in other grains, prompted moderate selling of corn futures. Closing prices Friday were near the low levels of the week in Kansas City, net losses ranging from 2 5-8 to 5 1-8 cents, while Chicago showed irregular changes 1-4 to 1 1-8 cents lower. Some of the deferred deliveries reached new low levels for the season.

A fair export demand for corn was reported from day to day, but as in the case of wheat offerings were more than adequate for requirements and the declining tendency in prices was not checked.

The new corn crop is in excellent condition in all sections, with the possible exception of the spring wheat states, where earlier prospects are not being maintained as a result of inadequate moisture. In parts of the big eastern states the crop has been laid by. Reports by several Chicago firms last week placed the condition of the crop around 90, the highest in ten years. The acreage was estimated about the same as last year and the yield around three billion bushels, compared with a final estimate of 3,232 million bushels last year.

The primary movement of corn decreased moderately last week, the four important markets receiving 2,254 cars, 800 less than in the week before and 384 less than a year ago. All markets reported moderate decreases.

Demand for carlots was moderate, coming chiefly from mills in the Southwest, as it has done nearly all season. Compared with a week ago, white corn yesterday was steady to 3-4 cent higher, yellow was down 4 cents lower. Prices ranged from 47 to 62 cents.

Oats futures closed Friday with losses of 1 5-8 to 4 cents for the week, the Kansas City July showing the largest prices followed the trend in futures, most quotations dropping 1to 2 1-2 cents. Receipts at the principal markets last were about 10 per cent smaller than in the preceding week and 28 per cent larger than a year ago.

GERMAN DYESTUFF PRODUCTION SAID TO BE SUB-NORMAL

Record News Staff Wires.

LEVERKUSEN, Germany, July 20.—German dyestuff manufacturers total production this year will not exceed 60,000 tons, which will make it impossible to "flood" the markets of England or America, or even compete successfuly against American manufacturers, asserts Dr. Carl Duisberg, head of Germany's greatest dye manufacturing organization.

"We have recently increased our capital to 1,762,300,000 marks, which is 719,000,000 more than our previous capital, but this was the inevitable consequence of the tremendous depreciation of our currency and resultant increase in the prices of commodities," he said. "It has nothing to do with intended attacks on the world market, which it has been reported we were planning.

"Labor difficulties, shortage of coal, the unsatisfactory traffic condition as far as the Rhineland is concerned, the obstacles, caused by the Rhine customs barriers, all prevent us, in any case, from increasing our output and leave us in a far from satisfactory position. This position is made worse by the hindrances placed in our way in many foreign countries.

Dr. Duisberg characterized a reported demand in some American quarters for the closing of German dye works because "they might be used for the manufacture of explosives or poison gas in another war," was "utterly senseless, since Germany has been deprived of the means of employing poison gas for war purposes even if she wanted to." He added that "no sane man in Germany thinks of fresh wars.

"It is difficult to understand American anxiety," he continued, "since the American industry is incomparably stronger than ours."

The road to success is marked with the footprints of those who have won real prosperity by systematic saving. The City National Bank of Commerce will gladly help you to reach your goal of success. Its facilities are at your disposal for the handling of all banking matters and it will pay you 4% on your savings.—Adv.

District Pipeline Runs Incre...e 1000 Barrels

URKBURNETT NORTHWEST POOL CONTRIBUTES LARGEST MEASURE OF ADDED PRODUCTION HERE

An increase of approximately one thousand barrels in pipe line runs as registered during the past week, over the daily runs for the previous eek, the total daily average being right at 77,800 barrels. The increase omes in greater part from the Burburnett northwest, and is attributed in art to the firmer demand for crude by refineries of the district, storage ocks being drawn on. New production in the district, as reported during e past week has amounted to between 700 and 800 barrels.

A feature of the crude oil market has been the strengthening of rices, in one instance a bonus contract having been raised from seventeen d a half to twenty-five cents.

The Burkburnett townsite, northwest extensions and river bed pools now running a daily average of 40,900 barrels, leaving 10,000 barrels ss as the production of the old Burkburnett pools, and the Texhoma-rk Burk shallow.

The Iectra pool remains at the 12,000 figure.

The Kemp-Munger-Allen and Iowa Park shallow field accounts for 0 more barrels.

The new Archer county-Texhoma pool, averaged 1,600 barrels run ng the past week, the Panther-Holliday runs bringing the totals above 8 barrels.

Petrolia accounted for 360 more barrels, and the South Bend pool's rease was 9,370 barrels.

The New Well in Archer

With only one new producer ded in during the week, the cher county-Texhoma pool regis-s new production in excess of all er pools in the district combined. Texhoma's No. 5 Goss, coming in 300 to 400 barrels production. ave hundred barrel well is re-ted from the Red river pool, un-the Federal receivership, and s are a few fair shallow pumpers ted from the Iowa Park shal-field, in addition to a couple medium sized completions at Elec-

The receivership area leads in new ations and new drilling, for the k, it being reported that five wells, carrying out the sched-of operations, have been started will be started in a short time, being locations.

Archer county, south half, also s more activity than for some s, the Miller Airplane company pleting their No. 1 Andrews for 15-barrel pumper, from the 820 d 850-foot sand, while two new s have been started.

The Archer City townsite test reported drilling below 1700 feet, d around 1300 and 1600 feet ving been passed up. The No. 2 this company, the Burk-Archer the Andrews, is reported with derrick up and getting ready to ill.

Sun Drilling Another

The Sun company's No. 1 Mc-dy, offsetting the same com-y's No. 1 Farmer recently com-ded for a small producer, is re-ted drilling around 1100 feet.

Between these two tests, in the ker survey and on the Farmer ct, the Guaranty Leasing company reported getting its derrick up, d materials on the ground to drill.

To the north of Archer City, the ritory is also getting a nice play, present, the P. E. Walsh No. 1 F. Wilson attracting attention s week by striking a gas sand und 950 feet. This test is now wn around 1200 feet.

The Markley and Johnston, No. 1 F. Wilson, Block 118 A. T. N. C. ds, east of the Walsh test, is re-ted to have just started drilling d a mile to the northwest the rton and Ruff is reported down ound 1500 feet.

Between these tests and Archer y, on the Annie P. Jackson land, new derrick is reported up, the lloway Oil company's No. 1 An-, derrick went up here several eks ago, the Bluff Creek Oil com-y's No. 1 and in a short time Jackson tract is due to have o tests under way.

In Texhoma Pool.

The Texhoma's No. 5 Goss, men-ned above, is the only completion orted up to the latter part of the ek from the Texhoma proven pool. Three new Texhoma tests have casing on the sand, the No. 7 se at 1620 feet, the No. 8 Goss 1605 feet, and the No. 3 Taylor 1612 feet. No. 7 Goss is stand-dized to drill in. No. 2 Canadian troleum-Goss lease and No. 6 se have been standardized to drill for several days, and the No. 2 ylor is running a string of 5 3-16 paratory to completing.

There is no great speed made in lling in wells in this pool at this e, due to the limited pipeline fa-ities.

Runs from the pool have been av-ging better than 1500 barrels ily it is reported, and production pacity is said to be above 2,000 rels, with the present producers lf.

The Canadian Petroleum company d Nelson Brothers, No. 1 Goss, a rt distance to the south of the xhoma and Staley south producers, reported setting a liner to a sand lled around 1640 feet the shal-sand failing to make a producer.

The J. J. Perkins No. 1 Coff-n is reported drilling below 1200 t.

The Griswold No. 1 Henderson is orted making around 50 barrels oil and no water, while the rper and Jones No. 1 Taylor is orted swabbing around 70 barrels oil, with considerable water.

The cable tool test of the Rattle-ake Oil company on the Nether-, is reported drilling around 1400 t. A sand was encountered ound 1370 feet, but drilling was stopped, according to reports.

The Bartlett et al No. 1 Nether-, is reported going deeper, after me time spent in testing the 1600-t sand, which proved no good.

The shallow pool immediately south the town of Iowa Park has had eral completions reported within week. The Kinnard et al No. 2 rien is reported a 15-barrel well the 660-foot sand, and the Nos. and 4 are reported good for 20 rels each, in the 800-foot sand.

The Kerbow and Hester No. 2 rien is reported a 15-barrel pro-er, in the 800-foot sand, and the rtle Oil company's No. 6 Zink is orted a 30-barrel well in the 0-foot sand.

C. W. Wallace et al are reported ting up their No. 1 G. W. Lewis pump, and the No. 2 is reported paring to drill. These wells are the west side of the Kemp-Mun-Allen fields in the 1200-foot sand.

SOUTH BEND OPERATIONS NOW NORMAL

Operations are continuing at a fairly normal rate in the South Bend field, though there have been no completions reported during the past week. The major development was the completion of the Sinclair Pipeline company's line from Eliasville to the pool, and the first run of oil made on Wednesday. This gives an additional outlet to the production of the pool, that is much needed. The first day's run was 1,100 barrels.

The pool averaged a run of around 9,500 barrels for the week just past, the production remaining steady despite the lack of new production.

There is no change in the status of various outside tests, according to available reports.

The New Domain test on the Addie Graham, 10 miles north of Eliasville, on the oil line at 3370 feet, is reported re-setting casing and cleaning out.

In the Bunger district the Union Oil company's No. 1 Askey is reported still fishing on the sand around 1900 feet. The C. W. Tyrell test is reported drilling around 1050 feet. The Roddie et al No. 1 Manning is reported drilling around 500 feet.

Just south of the town of South Bend, the North American-Roxana's No. 1 Holcomb is reported being rigged up to pump, with about 1300 feet of oil standing in the hole. The sand, 2120 feet, was shot last week, and the well has been cleaning out, and preparing to complete since that time.

To the east of South Bend the No. 1 J. R. McCluskey of Dawes and Tuck is reported drilling.

The No. 1 O. A. McBrayer of J. S. Hoff et al is reported still cleaning out, after shooting the sand at 1920 feet.

The Canadian Pacific Company's No. 1 O. A. McBrayer is reported drilling around 1850 feet.

Little Change in McCluskey-Graham

In the McCluskey-Graham producing area there appears to be little change in conditions.

The W. E. Conner No. 2 Graham is reported preparing to shoot the 2570 foot sand. The No. 3 McCluskey, same operator, is reported drilling around 1980 feet.

The Danciger and Emerich No. 2 Graham is reported drilling around 2,000 feet.

The Seaboard Oil and Gas company's No. 3 Graham is reported drilling around 1,000 feet.

The Shamrock Oil Corporation's No. 8 and No. 9 Graham, are reported on the deeper 2500-foot sand, and the No. 10 is reported drilling around 2100 feet.

The Mid-Texas Oil and Gas company is reported drilling around 2500 feet in its No. 3 Graham. Nos. 4 and 5 are reported still rigs, and No. 6 is a location.

The Panhandle's No. 12 McCluskey, is reported drilling around 700 feet, the No. 14 is reported drilling around 1900 feet, and the No. 15 drilling around 1400 feet.

The Anderson et al No. 1 State lands, in the bed of the Cleark Fork of the Brazos, is reported drilling around 1750 feet.

The Armstrong and Hassell, No. 5 State lands, also in the river bed, is reported rigging up to pump, plugged back from 2500 feet to the 2100-foot sand.

Twelve officers hold the rank of field marshal in the British army, the only non-British holders being the emperor of Japan and Marshal Foch.

SALT WATER SAND TO BE ANALYZED

Salt water sand, which has been the Nemesis of oil operators in Archer county, is to be turned to educational account by some operators, who are preparing to have an analysis made of the salt water sands in that section.

According to J. E. Walsh, who is drilling a test on the Luke Wilson, several miles to the east of the new Texhoma pool, and to the north of Archer City, the salt water analysis, which has been employed by California companies with good results, and also in the Gulf Coast fields, should greatly minimize the difficulties of drilling, and should be a good guide as to where to drill, the analysis taking into consideration the relation that salt water has to oil.

The Walsh test, which is being drilled for Hogan and Company of New York, is being drilled partially on geological reports, and with all due care for handling the water problem, drilling with a small bit, and then reaming out. Mr. Hudspeth connected with the Walsh interests, and also of the Canadian Petroleum company, part owner of the Gose A lease on which the Texhoma drilled in the second producer in the pool some times called the Ryner and Bailey, Mr. Walsh states, has submitted a geological report, which calls for pay formations somewhere between 1849 and 1960 feet. Failure of the 1,000-foot sand drilled into last week, to test out productive was nor disappointing, he stated, in view of this report, which showed gas showing and a thin oil sand to be expected around this depth.

"We feel encouraged over Mr. Hudspeth's report," Mr. Walsh stated, "from the partial verification of the findings to date, and also the fact that he made a favorable report on the structure where the new Texhoma pool is now developing. From geological indications there are still other pools in this section of Archer county and the present drilling may possibl open up a new one.

"There have been disappointments in Archer county drilling to date, but a lot of operators still have faith and are keeping up drilling. Water trouble, which has been quite an item, but from the experience of other companies in other fields, I believe that this trouble can be turned into an aid.

The Shell company of California has applied the results of water analysis with successful results, and I understand that some big companies operating on the Gulf Coast have also found this helpful. If it works for the big companies, it should certainly be good for us little fellows.

"We are prepared for any formations that may be encountered, drilling practically two holes, going ahead with a small bit, then reaming. Another test, the Monte Valley Oil company, just starting on their lease about four miles to the southwest of our Wilson test, is planning to follow these same tactics. All sands will be carefully cored, and there can be no possibility of passing up any showings."

TOOK HIS BED TO GRAVE

POPLAR BLUFF, Mo., July 30.—Brown Hughlett, Howell county's pioneer settler, has been buried with a feather mattress in his rude home-hewed coffin. He was garbed in his nightshirt as he entered the "long sleep."

These oddities of his funeral were in compliance with his last request.

NEW WELLS IN ELECTRA BROUGHT IN

Electra furnishes two important new wells this week, neither sensational in size, but both of the type that has enabled this "mother pool" to stand up in producion for more than a decade with only a trifling difference in daily output for the twelve month periods.

The Gulf Production Company's No. 4 Collett, which has been in process of testing out the 1900-foot sand for several weeks, got on the pump the first of the week, and showed a run of 80 barrels for the first day or so, and is now reported pumping around 50 or 60 barrels. This well serves to open up a new pool for the old deep Electra sand, being four miles south of the town of Electra, in a locality where production has been at shallow depths up to the present.

To the southeast of Electra, just due west of Fowlkes Station, the 1780 foot sand picked up by the Gloria Oil company's No. 1 Douglas, has been drilled by Scott, Gates and Sheegog in their No. 1 Fisher, 350 feet north of the discovery well. The sand was drilled into 13 feet and then shot, and cleaning out and testing is now in progress. The well is said to show promise of better production than the discovery well, which has been completed for the present in the first few feet of the sand, with 50 barrels production on the pump.

A third completion for Electra, this in the South Electra shallow fields, is reported, the Planet Petroleum's No. 8 Burnett A lease, a 70-barrel well, at 940 feet.

The thousand foot sand which the Modern Petroleum company tested out the first of the week in their No. 1 W. T. Waggoner, south Electra, proved no good, according to reports from the field, and the well is being taken down deeper.

The No. 5 of J. S. Bridwell et al on the W. T. Waggoner, north of the Modern Petroleum lease, is reported temporarily shut down at 1446 feet.

The Arco Trust company's No. 1 W. T. Waggoner, in this same southwest Electra shallow pool, has passed up the 900-foot sand, after testing, according to reports, and has started drilling for the 1400-foot sand.

The 1650-foot sand in the Iowa Park Producing and Refining company No. 1 Burnett, proved non-productive, according to reports from the field, and the test is now drilling below 1700 feet.

The Carter and Lane No. 1 Burnett Lease A is reported having water trouble, down below the 1650-foot sand.

The Royal Oil company is reported still shut down on the 1970 foot sand, and the Texas Electra company on the B. B. Cochran is reported drilling around 2200 feet.

On the Henson tract, the William Peoples No. 1 is reported preparing to set casing on an oil sand drilled around 1390 feet.

The Halle Oil company's No. 3 Fee is reported drilling around 1550 feet.

From Wilbarger county comes the report of a small pumper in semi-wildcat territory. The No. 1 Zeiset of Kemp and Ferris, which drilled into an oil sand at 1820 feet more than two years ago, and which has endless trouble, is reported finally on the pump, with about 35 barrels production.

BIG GASSER IS TEXHOMA COMPLETION

Gas production of the Texhoma field, South Burkburnett, received a four million foot increase this past week, in the completion of the Texhoma Oil and Refining Company's No. 2 Rexford, in the sand at 1360 feet. This well is in the new north pool, where deeper drilling, past the gas sand has opened up a good oil sand, but the Texhoma chose to complete in the gas sand, a plan which it is understood several other operators in the pool are to follow in wells scheduled for completion in the near future. A large amount of gas is used by Wichita Falls residents, and industrial users, through the Texhoma line to this city.

Reports From Wildcats.

The Pope Erwin Syndicate's No. 1 Cooper, is reported drilling again, after a test of the sand drilled around 1600 feet showed water. The test of the 1300-foot sand, a couple of weeks ago, was sufficient to show paying production in this sand, it was reported, but on account of the condition of the hole, decision was made to drill deeper.

The Reising Trustee company's No. 1 W. E. Moore, east of the Texhoma pool proper, and northwest of the Pope-Erwin test, is reported in a second sand around 1600 feet, after testing the top sand as water.

A star has been rigged up to drill into this second sand, it is reported. This is the Reising Trustee's second hole on this lease, the first being abandoned several weeks ago after weeks of fruitless effort to shut off water.

The test had a sand around 1600 fee which is reported to have shown both gas and oil.

SALVAGE SUBSCRIPTION

GLOUSCESTER, Mass., July 30.—The return of the steamship Fabia to Sable Island to again attempt the raising of the racing schooner Esperanto was assured when a subscription was started to finance the second expedition. Following a meeting in the Chamber of Commerce, when the first pledge was made by A. B. Sadger, head of the salvage concern which made the first attempt, collections were begun and it is believed the Fabia will be under way Friday.

Of twelve "deaf and dumb" beggars recently arrested in Paris, eleven were found to be in full possession of faculties of speech and hearing.

Girls! Lemon Juice Bleaches Freckles

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White, which any drug store will supply for a few cents, shake well, and you have a quarter pint of the best freckle and tan lotion and complexion whitener.

Massage this sweetly fragrant lemon lotion into the face, neck, arms and hands each day and see how freckles and blemishes bleach out and how clear, soft and rosy-white the skin becomes.—Adv.

A Cow Kicked Over a Lantern and Chicago Burned

MRS. O'LEARY of DeKoven Street, on the west side of Chicago, on Sunday Evening, October 8, 1871, took her little coal oil lantern and went out to the barn to milk her cow.

The Cow kicked over Mrs. O'Leary's Lantern—the straw scattered about the barn floor took fire—and that was the beginning of the great conflagration that destroyed Chicago.

For two days the fire raged. It swept an aera of over 2,021 acres, and destroyed 17,450 buildings. It rendered seventy-thousand people homeless. It caused a money loss of one hundred and ninety million dollars. It took a toll of two hundred lives.

That was a costly kick. It kicked Chicago into disaster. If Mrs. O'Leary's barn had been lighted by electricity the kick of her cow could not have endangered the lives and property of her neighbors.

Electric light and power spells SAFETY PLUS SERVICE. It means greater comfort and convenience, with economy of time and energy. It makes brighter, better, SAFER living and working conditions.

Your electric light and power system is active evidence of the PROGRESS that has been made in SAFETY PLUS SERVICE since that Sunday evening when Mrs. O'Leary lighted her lantern and Chicago burned.
