Carnival

What promises to be the biggest Parent-Teacher Association carnival is now in preparation for Friday night November 3. Come and bring your friends and family and enjoy your biggest night of relaxation, fun and fellowship.

The big show starts at 7:30. What will you find? Well, what do you like to do? Eat? Then try one of those delicious, yum may hamburgers made as only Mrs. Charles Raines and Mrs. Ted Dudley can make them. How about pie and coffee? No evening is complete without this.

Now perhaps you are more interested in games. In the Hedley High School auditorium you will find everything for a full evening of fun. You will want to play bingo and win some valuable prizes. There will be tables of 42. Bring your partner and play Men! How about the cake walk? Take home a cake for the wife. Here's just a hint to the boys—girls like cake too.

Have you heard that there are to be boxing matches? A professional performance is guaranteed. And the side show—well, you'll just have to come and see for yourself how much fun and hilarity can be packed into one spot.

The high spot of the evening will come at ten o'clock with the coronation of the carnival queen. Remember—all this takes place Friday night, Nov. 3, at the high school auditorium. Admission to the auditorium is free to all and if you don't go home maybe a trifle tired but very happy, the hard-working committees will be badly mistaken in their guess.

Mrs. Margaret Randel

Mrs. Margaret Charity Randel, 62 years of age and a resident of Donley county for 14 years, passed away Monday at her home near Clarendon. Funeral services were held Tuesday from the Clarendon Methodist church, conducted by the pastor, Rev. Gordon. Interment was made in Citizens cemetery at Clarendon under direction of the Kelso Womack Funeral Home of Hedley. She is survived by her husband, one son and one daughter.

Ernest Neal Hill

Funeral services for Ernest Neal Hill, infant son of Mr. and Mrs. Tode Hill, were conducted Sunday from the Graham Brinson home by Rev. M. E. Wells. Interment was made in Rowe cemetery under direction of Kelso Womack Funeral Home. The child is survived by its parents, one sister and its grand parents, Mr. and Mrs. Graham Brinson and Mr. and Mrs. J. F. Hill.

Revival

The Assembly of God people are having services in the lower floor of the Masonic building. They will begin a series of revival services on Sunday, Nov. 5, with Rev. M. L. King in charge.

Farm for Rent

150 acres of raw land, rent in exchange for breaking out. Farm program allowed House to live in. See me for particulars. W. P. Doherty

Shower

Mesdames Herman Herschler and Marvin Whitfield and Miss Myrtle Reeves were hostesses Wednesday at the home of Mrs. Whitfield at a miscellaneous shower in honor of her niece, Mrs. Leonard Allgire of Amarillo, who was Miss Hazel Whitfield of Hedley, before her marriage.

Decorations were in a Halloween motif. A center piece of autumn leaves decorated the refreshment table, at which Miss Ola Ourd poured. Zinnias and dahlias were also used in decorating.

Mrs. Ray Moreman took the role of a gypsy fortune teller and very cleverly presented the gifts to the bride. Mrs. Allgire received many lovely and useful gifts from friends.

Messer-Monroe

Alvin Messer and Opal Monroe were united in marriage last Saturday, Oct. 28 by Rev. W. H. DeBord at his home. Witnesses were Mrs. DeBord and daughter, Helen.

The bride is the daughter of Mr. and Mrs. M. L. Monroe, former Hedleyans now living near Plainview. She has spent most of her life in and near Hedley, and was a 1937 graduate of Hedley high school.

The groom is the son of Mr. and Mrs. T. N. Messer of Mc Knight, and has lived in that community nearly all his life. He attended the McKnight school.

The couple will make their home at McKnight.

A host of friends will join the Informer in extending congratulations and best wishes to the happy couple.

Mullins-Johnson

Chester Mullins of near McKnight and Miss Edith Johnson, daughter of Mr. and Mrs. Johnson of Oklahoma, were united in marriage Friday, Oct. 27, at the home of Frank Kendall. Mr. Kendall, Justice of the Peace of Precinct 8, performed the ceremony. The couple was accompanied by Mrs. Troy Selby.

They plan to make their home near Hedley. The Informer extends best wishes to the couple.

Former Hedley Boys Are Honored

Officers to head the James Winford Hunt chapter of Alpha Chi for this year were elected by the group at a meeting last Friday morning.

A. V. Hendricks, senior from Turkey was selected by the group for president, with William Cantrell, senior from Delhart, being elected vice president. Lena Catherine Morrison, junior of Aptene, was elected secretary-treasurer, and Francis Gerin-shire, junior from Cooper, reporter. McMurry War Whoop.

Among the 15 students elected to represent West Texas State College at Canyon in "Who's Who in American Colleges and Universities" is Stephen Milner of Canyon. He is a former Hedleyan and is the son of Mr. and Mrs. Dallas Milner.

U. S. Forest Fires Destroy 37 Million Acres of Timber Annually

Property Damage Estimated
At \$37,000,000 in
Past Year.

WASHINGTON, D. C. —Flaming over 33 million acres of timber, forest fires in this country last year blazed out on an average of one every two and a quarter minutes and caused property damage estimated at approximately 37 millions of dollars. The area destroyed is almost equal to the area of the state of Arkansas.

Such facts were revealed in the recent annual report issued by the United States forest service, based on returns from state forestry departments, national forest supervisors and other federal agencies. The summary of the report gives the number of fires for the year as 232,229 or 41,287 above the average for the five-year period 1934-38.

Encouraging, however, was the revelation in the report that the fires destroyed 624,293 less acres during the year than the five year average and the estimated damage ranked a million and a half dollars below the average for the same period.

Principal Causes Listed.

Prolonged spring and summer dry spells, which increased abnormally the hazard of fire from all causes, together with severe and frequent lightning storms in the western mountain country, were cited by the service as the principal reasons for the increase in number of fires. It was pointed out, however, that improvement in methods and equipment for detecting and reporting fires also made for a larger number for the year as compared with previous years. Statistics demonstrate that of a total number of fires on protected lands 82.7 per cent were by man, 8.6 per cent by lightning, and 4.2 per cent were of unknown origin. Of the total, 26.3 per cent were set by incendiaries. As for fires on unprotected lands, though necessarily less complete and reliable, tell in general the same story.

Of the 232,229 forest fires last year, 9,873 occurred upon government-owned or administered lands under the protection of the forest service, while 76,326 were upon state and private property protected by the owner either in co-operation with the United States or otherwise, and 146,030—or 63 per cent of the total—were set by incendiaries.

Preserved

The statistics show that 10 per cent of the 33,615,160 acres burned over in the 1938 fires were on this unprotected private property, that 30,876,230 acres, or 17.5 per cent of all unprotected lands were burned over during the year. This compares with a total burned over area of only 315,600 acres on federal land, and with an acreage of 2,227,270 burned over on protected state and privately owned property.

The great bulk of the property damage from last year's fires was also suffered by the forests of this unprotected private property. The forest service summary shows that of the \$36,888,460 over-all damage, 71 per cent, or an estimated \$26,128,000, was on private property.

Whether you work around the house, in an office, or in a radio, nothing more practical and useful than a smock like this. It is a smock like this that is a yoke, it has a band, it has high shoulders and a decorative well as convenient. The pattern is perforated for two lengths—shown as shown in the sketch, or long enough almost to cover your skirt.

Gaily Colored Materials. Chintz, pongee, gingham and linen are good practical materials for a smock of this type—something tough and washable. Choose gay and bright colors, to cheer you up on a rainy day hours!

Barbara Bell Pattern No. 1845-B is designed for sizes 12, 14, 16, 18, 20, 40, 42 and 44. Corresponding bust measurements 30, 32, 34, 36, 38, 40, 42 and 44. Size 14 (36 inches) requires 3 1/2 yards of 35-inch fabric for short length; smock in longer length, requires 4 1/2 yards of 35 or 39-inch fabric; 1 1/4 yards of bias.

World's First All-Motion Picture Theater

Was Opened in Pittsburgh 34 Years Ago

PITTSBURGH.—With the current nationwide celebration of the fiftieth anniversary of the invention of the moving picture, attention has been focused on the pioneering role played by Pittsburgh, which produced the first all-motion picture theater.

In 1905, 16 years after Thomas A. Edison first saw pictures in motion through the peephole of a kinetoscope, the late Sen. John P. Harris of Pittsburgh opened the box office of the first all-motion picture show in the world, a remodeled store-room in the heart of the city.

Harris, who with Harry Davis, pioneer showman, had shown his first moving picture eight years earlier, called his house the "Nickelodeon"—a synthetic word coined from the slang word for the coin, "nickel," and the Greek "odeon" for theater.

Seated Only 56. Reconditioning of the storeroom had consisted largely of the installation of a white sheet, some opera chairs, stucco, burlap and paint, and glaring incandescent lights. Opened June 19, 1905, the Nickelodeon had a seating capacity of 56,

HERE IT COMES. Leaving across the heavily-wooded slopes of Topanga canyon near Santa Monica, Calif., this fire was one of last year's 232,229, which caused approximately 37 millions of dollars in property damage in the United States.

were upon state or private holdings not protected. The corresponding averages for the years 1934 to 1938 were: federal land, all protected, 9,301 fires; state and private land, protected, 64,033 and unprotected, 117,608.

Protection Is Essential.

The summary reveals that there are 659,202,090 acres of land in the United States on which forest fire protection is essential. Of this total, 191,860,240 acres are under the protection of the forest service and other federal agencies. Of the remainder, owned by state or private interests, 308,458,000 acres, or about 60 per cent, are under some degree of organization. The remainder, largely under Clarke-McNary cooperative agreements which provide for allocations of federal funds to state or private land for protection purposes. This leaves a total of 158,883,850 acres of unprotected lands needing protection by the state.

The statistics show that 10 per cent of the 33,615,160 acres burned over in the 1938 fires were on this unprotected private property, that 30,876,230 acres, or 17.5 per cent of all unprotected lands were burned over during the year. This compares with a total burned over area of only 315,600 acres on federal land, and with an acreage of 2,227,270 burned over on protected state and privately owned property.

The great bulk of the property damage from last year's fires was also suffered by the forests of this unprotected private property. The forest service summary shows that of the \$36,888,460 over-all damage, 71 per cent, or an estimated \$26,128,000, was on private property.

States. INSET SHOWS a home destroyed by the same fire. Not content with sweeping over millions of acres of valuable timber lands, forest fires destroy homes, farms or even whole villages if they lie in the path of the wind.

801,460, was done on land outside the protected areas. The loss on protected state and private property was reported as having been \$7,179,630, while the loss on federal lands was given as \$907,370. The comparable figures in the 1934-1938 averages are: loss on federal land, \$1,011,530; on protected state and private lands, \$6,382,306, and upon land not protected, \$31,045,624.

Incendiary Fires Increase.

There was an increase in the number of incendiary and smoker fires on protected land in 1938 as compared with the average numbers of these types of fires for the years 1934-1938. There were 22,619 incendiary fires on those lands last year as against 18,595 for the five-year average, while the smoker fires for 1938 were 25,053 as compared with an average of 18,350 for the five-year period.

Principal other causes of the fires on protected area in 1938 were debris burners, 11,141; campers, 5,153; railroads, 3,214 and lumbering 1,405. On protected areas smoker fires burned over an area of 625,940 acres; incendiary fires, 947,870; lightning fires, 244,910; debris burning fires, 327,670 and camper fires 146,210.

On federal lands last year there were 5,942 fires that burned over not more than 1/4 acre, 2,970 which burned over between 1/4 and 10 acres and 961 which burned over more than 10 acres while on protected state and private lands, there were 10,382 fires which burned not more than 1/4 acre, 38,523 which burned between 1/4 acre and 10 acres and 27,421 which burned over more than 10 acres.

Blood Transfusion No Longer Restricted to Emergency Use

CHICAGO. — Blood transfusion should no longer be regarded as a desperate emergency measure but as a safe routine procedure supplementing other forms of treatment for numerous diseases, Noah Fabricant, M. D., and Leo M. Zimmerman, M. D., Chicago, declare in a recent issue of Hygeia.

Modern knowledge of blood typing and new methods for preserving and transferring blood have greatly decreased the dangers that once attended this procedure.

As early as the Seventeenth century, blood transfusion was employed. In these early experiments, however, the blood of animals was injected into human beings. This sometimes led to grave consequences. After it was proved that only human blood is safe for men, the fact that there are several types of human blood was still not understood. Four such groups are now recognized, and it is possible to determine by simple and reliable tests into which classification a person's blood falls.

Many Methods in Use.

Many methods have been devised for the safe transfusion of blood from one person to another. The simpler types in current use are most popular. One method is to draw the blood from the donor into large syringes and, before clotting has a chance to occur, immediately inject the blood into the patient's vein. Other devices consist of two or three-way syringes which pump blood from the donor into the recipient.

"Blood Banks," the latest transfusion development, the authors explain, "operate on the principle of having pretested stocks of citrated and refrigerated blood obtainable at a moment's notice. The functions of a blood bank are similar to those of the common variety of financial bank. Regardless of type, the amount of blood drawn from the bank can be paid back with an equal amount of blood. Each ward of the hospital deposits in advance blood taken from the patient's relatives or friends. Against this credit the wards may draw blood whenever required. As a result, precious hours are not lost while prospective donors journey over long

CONSTIPATED?
Here is Amazing Relief of Conditions Due to Stagnant Bowels
Nature's Remedy
If you think all laxatives act alike, just try this all vegetable laxative. So mild, thorough, refreshing, invigorating. Dependable relief from sick headaches, bilious spells, tired feeling when associated with constipation. Get a 25c box of NR from your druggist. Make the test—then if not delighted, return the box to us. We will refund the purchase price. That's fair. Get NR Tablets today.

for Nasal Irritation and Colds
use MENTHOLATUM

Link them together in your mind!

WHEN your nostrils become red, irritated, and stuffy due to a head cold, simply insert some Mentholum. It quickly soothes the irritated membranes, reduces local congestion, and promotes healing. Mentholum also relieves stuffiness, checks sneezing and other discomforts of colds.

How To Relieve Bronchitis

Bronchitis, acute or chronic, is an inflammatory condition of the mucous membranes lining the bronchial tubes. Creomulsion goes right to the seat of the trouble to loosen, germ-laden phlegm, increase secretion and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding that you are to like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

Constipation Relief That Also Pepsin-izes Stomach

When constipation brings on acid indigestion, bloating, dizzy spells, gas, coated tongue, sour taste, and bad breath, your stomach is probably loaded up with certain undigested food and your bowels don't move. So you need both Pepsin to help break up fast that rich undigested food in your stomach, and Laxative Senna to pull the trigger on those lazy bowels. So be sure your laxative also contains Pepsin. Take Dr. Caldwell's Laxative, because its Syrup Pepsin helps you gain that wonderful stomach-relief, while the Laxative Senna moves your bowels. Tests prove the power of Pepsin to dissolve those lumps of undigested protein food which may linger in your stomach, to cause belching, gastric acidity and nausea. This is how pepsinizing your stomach helps relieve it of such distress. At the same time this medicine wakes up lazy nerves and muscles in your bowels to relieve your constipation. So see how much better you feel by taking the laxative that also puts Pepsin to work on that stomach discomfort, too. Even picky children love to taste this pleasant family laxative. Buy Dr. Caldwell's Laxative—Senna with Syrup Pepsin at your druggist today!

DON'T SQUEEZE SURFACE PIMPLES

Don't risk scarring your skin and spreading infection by squeezing unsightly pimples and blackheads. Just apply powerfully soothing Zemo—amazingly successful Doctor's formula which quickly relieves itching soreness and starts right in to help nature promote FAST healing. Results from few days' use of Zemo should thrill you! Its marvelous medication has long been approved by leading skin specialists. So clean, dainty—yet so EFFECTIVE. Ointment or Liquid form. Used in best homes yet costs only 25¢, 50¢, \$1.

STUFFINESS IN NOSE AND HEAD HAY FEVER

CLOTHESPIN NOSE
Sensational extra help for colds—with Luden's! These famous clothespins not only help soothe throat, but release a menthol vapor—which, with every breath, helps penetrate clogged nasal passages, helps relieve "clothespin nose!"

LUDEX'S 5¢
Menthol Cough Drops

Correct Constipation Before—Not After!

An ounce of prevention is worth a pound of emergency relief. Why let yourself suffer those dull lifeless days because of constipation, why bring on the need for emergency medicines, when there may be a far better way? That way is to KEEP regular by getting at the cause of the trouble. If it's common constipation, due to lack of "bulk" in the diet, a pleasant, nutritious, ready-to-eat cereal—Kellogg's All-Bran—goes straight to the cause by supplying the "bulk" you need. Eat this crunchy toasted cereal every day—with milk or cream, or baked into muffins—drink plenty of water, and see if you don't forget all about constipation. Made by Kellogg's in Battle Creek. Sold by every grocer.

INDIGESTION

Sensational Relief from Indigestion and One Dose Proves It
If the first dose of this pleasant-tasting little tablet doesn't bring you the relief you need, you can't get any more. The relief comes from the stomach digest food, makes the excess stomach acids harmless and lets you eat the nourishing foods you need. For heartburn, sick headaches, and upset on even casual eating. Laxative, builds, makes you feel good and eat all you want—JUST ONE DOSE of this new wonder relief. See your grocer.

ARE YOU WORN-OUT?

Waco, Texas—Mrs. J. C. Cotton, 1404 Morrow Ave., says: "When I had no appetite and was nervous, weak and worn-out, I used Dr. Pierce's Favorite Prescription. It is so good to quiet the nerves and it gave me an appetite and made me feel so much stronger." Ask your druggist today for it in liquid or tablets. See how much stronger you feel after taking this tonic.

That Nagging Backache

May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating, drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood. You may suffer nagging backaches, headaches, dizziness, grating up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination. Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

Sanitary Toilets

(Constructed under the super-
vision of the U. S. Public Health
Service)

This toilet may be had for the
cost of material. Plans and la-
bor are supplied by the Public
Health Service. The average
cost of material is approximately
\$12 for each toilet. The cost of
material is determined by the a-
mount of old material that may
be supplied by the owner. If
used lumber is available, the cost
of construction may be cut down
to \$7.75. Confer with your coun-
ty commissioner or see P. O.
Thompson, Clarendon. These
sanitary toilets mean better
health for the household, and the
public in general.

Home Ec Club Meeting

The Home Ec. club girls met
Friday, Oct. 27, in the music
room. The president, Camilla
Doberty, called the meeting to
order. We answered the roll
call by giving a joke. Ida Lou
Johnson gave a talk on care of
the hair. Betty Jo Bowman
gave "Choosing the Make up",
Margie Burdine gave "Using the
Make up" and "Within" by Lee-
va Adamson. Miss Bergner
gave a sketch on make up. We
will meet again in November.
Doris Long, Reporter
Bring your boot orders to Ken-
dalls Shoe Shop and save money

Freshman Queen

Hear ye! Hear ye! Doris Long
is Freshman Queen. Doris may
be new in high school but has al-
ways been a member of our class.
Our 28 classmates are behind her
like a man, so help our queen win.
We may be the youngest and the
greenest, but with your help we
think we can go over the top with
full speed ahead!

Senior Rings

The Seniors have reached one
more marker pointing toward
their destination, their rings.
They could pull bolts with vigor
and enthusiasm because their
rings were their goals. With
this in mind the school bell was
a joyful summons Monday.
It is no wonder they show
them with pride, since they are
such attractive works of art.
They are natural gold with the
numbers 19 and 40 on each side
of the set. The sets are red with
a prominent pearl toffing. They
are graced with a gold owl crest
bearing the inscription, "Hedley".
Ask any Senior what he'll take
for his ring. Ten to one he'll
say no amount of money.

NOTICE

Old newspapers for sale, 10c
per bundle, at the Informer of-
fice.

Sophomore Queen

The classes of high school have
selected candidates for the Queen
Contest on Nov. 3. The Sopho-
mores have selected Jane Ruth
Bain. Jane Ruth is a very
charming personality and is like-
d by all our class as well as the
other classes of high school. She
is very popular and has many
friends in town as well as in high
school. Jane Ruth has always
been a good student and makes
high grades. She has the police
of "Miss America" and the grade
of an Egyptian Queen. If you
want to put your money on the
winner vote for Jane Ruth Bain.

Protect Your Home
with
**Electric
Light**

A 25-watt bulb burns 8 hours
for **1¢** and gives

2,144 Times More Light

than a Penny Box of Matches

WHY TAKE CHANCES with matches when
Electric Service is cheaper and safer?
Remember that it is dangerous to strike matches to
light dark places such as closets, stairways, or base-
ments where it might cause explosions by igniting
trapped gases. A small bulb gives better light—
costs less.

Remember that "The Electric Way Is the Safest Way
to Live." It also is the most economical way and the
most comfortable way. You can safely depend on
Electric Service for Light, Cookery, Refrigeration
and the many odd jobs around the home. The
average daily cost is LESS than the tax on two pack-
ages of Cigarettes!

The full horror of Fire resulting from
matches frequently is related in the daily
press. In the interest of safety, use Electric
Service to dispense with unnecessary fire
hazards.

West Texas Utilities
Company

The Electrical Way Is the Most Centsible Way to Live.

*A penny box of matches averages about 43 to
the box. Each match burns approximately 22
seconds—a total of 15 minutes. Each gives one
foot-candle of light—a total of 15.

In comparison to a match, a 25-watt light bulb
gives 67 foot-candles of light—and burns a total
of 8 hours for only 1 cent. On this basis, the 25-
watt bulb gives 2,144 times more light for a
penny than a penny box of matches.

Light Costs Little!

...and it makes JOBS for this com-
pany's 1,000 employees in West Texas,
whose annual payroll is \$1,300,000.
Your Electric Servant also pays an
annual tax bill of nearly a half million
dollars.

FDR Still Grips Public Fancy After 6 Years in Limelight

Unpredictable New as in 1933, President
May Run for Third Term If Success
Seems Likely

By JOSEPH W. LABINE

Six years ago came March 4 Franklin Roosevelt kissed the Holy Bible and promised to defend the United States constitution. Those six years have been the most unpredictable, topsyturvy years in modern American history, because an unpredictable man has been President.

Once surrounded by an aura of quiet dignity, the White House has emerged a nerve center of the nation, the local point of more eyes and ears than ever before watched a chief executive in his house of glass.

Six years of Roosevelt have jarred America from its inertia—whatever else you may say about the New Deal—and made people think about their government in terms of economics instead of politics.

They have made the most conservative Republican realize that a growing democracy must be a changing democracy, though not necessarily with so many changes as Mr. Roosevelt has offered. That's a matter for debate.

But the most amazing feature is that six years have not called America's interest in this toy called the New Deal. Whether protection, fighting, or as much fresh fighting as in the days of "alpacas" and the blue eagle. The answer is not in the people but in the man, a President whose impulsiveness, whose quicksilver hand and aptness at sensing the public trend has kept foe and friend in a six-year dither.

Still a Mystery Man. Franklin Roosevelt has shattered more precedents than all his predecessors put together, and in some cases it was a fine idea. Since the day he flew dramatically from Albany to Chicago and accepted the presidential nomination, he has been administratively less complete and reliable, tell in general the same story.

Of the 232,229 forest fires last year, 9,873 occurred upon government-owned or administered land under the protection of the forest service, while 78,326 were upon state and private property protected by the owner either in co-operation with the United States or otherwise. That is 146,030—or 63 per cent of the total.

MOST 'SPEECHABLE'—President Roosevelt's radio voice, among the best in the land, is not heard so frequently as during the first term. Here he addresses the Mobilization for Human Needs over a nation-wide radio hook-up.

of Miss Margaret LeHand, the "Missy" who doubles in brass as the President's secretary, guardian and sometimes hostess. Although the 1939 version executive mansion still has its rigidly formal diplomatic banquets, a sample evening guest list is more apt to include a cabinet member, a novelist, a labor leader and two or three miscellaneous visitors.

Then, too, the President is a hobbyist. It takes a heap of shelf space to hold his ship models, and his stamp collection provides a fraternal tie with another group.

Popularity Still Stands.

The essence of this discussion is that President Roosevelt still maintains his personal popularity even though most people think his New Deal has gone through the wringer via court rebuffs and congressional perverseness. Whether this has happened is debatable; most of his advocated principles have actually been adopted. Still to come, provided congress is willing, are more measures along these liberal lines, plus amendments and corrections to existing legislation.

The President maintains we were something like 30 years behind when he took office in 1933. Most of that time has been caught up but we've still a few years to go.

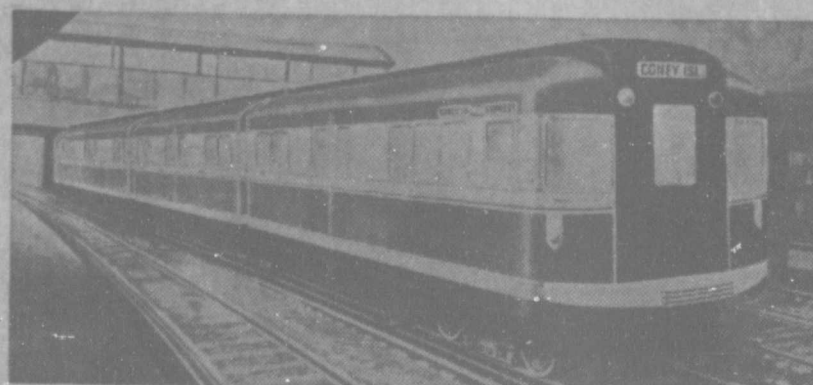

Answering critics who maintain he has forced reforms too abruptly, Mr. Roosevelt points out that Lloyd George did an even more radical job in England 25 years ago.

Halfway through his second term, the President has yet to settle the issue of a third term, but keen observers think he really wants it. As before he will probably jump if the chances look good, and another precedent will go smash. The core of this problem is that he wants the New Deal program preserved above all else; if another man can do it, fine. If not it must be Roosevelt.

For obvious reasons this points to a third term. First, New Deal and Roosevelt are inseparable in the public mind. Second, last autumn's "purge" failure showed what the President's magnetic personality can do for himself, it cannot do for others.

But you can't make predictions—F. D. R. is unpredictable!

New Subway Car Has 3 Parts; Or Is It Three Cars in One?

NEW YORK.—This month a weird looking 80-foot car will pop through Manhattan's subway tunnels, inaugurating a new era in rapid transit. Streamlined, noiseless and comfortable, it will attract even more attention because it's actually three cars in one!

The new unit was perfected after five years of research by scientists purposely chosen from outside the transportation field so they would not be hampered by traditional designs. It has three segments to reduce the weight on each axle of the four underlying trucks.

Specially lighted for reading and general illumination (two kinds), featuring thermostatically controlled temperature and air conditioning, the new cars will sit 84 people. It will stand 200. Working in automatic sequences are three types of brakes, the first utilizing the car's generators, the second a magnetic principle and third a

mechanical process.

Light construction was emphasized in the car, built at Battle Creek, Mich., by the Clark Equipment company in co-operation with engineers of the Aluminum Company of America and the B. F. Goodrich company. A new type rubber spring was developed to support the body, resembling a rounded pyramid or a horizontally ridged cone whose ridges descend one by one when the body strikes a bump.

Wheels also use rubber to advantage in absorbing shock. Bouncing will be further reduced since the body is made of light-weight aluminum. Total weight on the rails is one-third less than that of conventional cars. With twice the power, they start and stop as fast as a large automobile. Proven successful in lowering operating and maintenance costs, the new rubber-protected trucks also increase speed and safety.

Star Dust

- ★ Brushing Off Old Scripts
- ★ Courting Our Neighbors
- ★ Got Breaks; Now Stars

By Virginia Vale

REMEMBER "June Moon"? It's going to return to the screen probably as "Lover Come Back to Me," with Nelson Eddy as its star, and perhaps with Miliza Korjus appearing opposite him. This is just one of the old pictures that will bob up before long in new versions. "Morocco," for instance, the first picture that Marlene Dietrich made in this country, with Gary Cooper as her leading man. Most of us think that it was also her best one. There may be a new "Show Boat." In fact, most of your old favorites will be back, for Hollywood is playing safe and brushing off many of the scripts that brought

MILIZA KORJUS

the public to the box office once upon a time.

Given different directors, stars and sets, they'll practically be new pictures.

When you see "Captain Fury," (with Brian Aherne, Victor McLaglen, and June Lang,) you will see special dances that are authentic of the hectic period of American colonization in which the story is laid. You old-timers will recognize Betty Blythe as the wife of a colonial secretary; she is one of the stars of the silent screen who still likes to appear before a camera occasionally.

There'll be old fashioned dances in "Wuthering Heights," too. The dance director who's responsible for them is Jack Crosby, who once was a cowboy, and then was a railroad fireman.

"Dancing Daughters" made a star of Joan Crawford, and may do the same for Virginia Grey. Metro is going to give her a chance at it, at least. And since the original version appeared in 1928, a new screen audience has grown up who won't feel homesick for Joan when they see the 1939 one.

The European market for films may be shot to pieces, but the Latin-American one is more important than ever. Movita, the Mexican actress who was last seen in "Rose of the Rio Grande," will have the same sort of role in "The Girl From Rio," and will sing songs in both English and Spanish.

RKO is whipping up "The Girl From Mexico" with Lupe Velez as the star. No doubt all the other companies will blossom out with pictures intended to please our good neighbors in South America before the year is over.

Kay Francis will appear on the air in a full length play for the first time in March. She has made few broadcasts in the past, but may turn to radio more frequently if she sticks to her decision to turn her back on the movies.

Many a radio star can thank a lucky break for the boost that brought success. Lanny Ross is one of them. Ten years ago he wanted to join NBC's legal staff. They told him they were looking for singers, not lawyers. He auditioned as a singer, and to his amazement, was engaged. He's never returned to the law.

Gabriel Heatter leaped into national prominence as a commentator when he handled the Hauptmann trial, although he'd been doing an excellent job long before that. Paul Whiteman just happened to hear Joan Edwards singing one day in a music publisher's office, and engaged her to sing with his band. Mark Warnow was a violinist in an orchestra that accompanied Morton Downey. One day the leader was ill, and Warnow substituted for him, with the result that Downey insisted that he conduct all his broadcasts from that time on.

ODDS AND ENDS.—This year's winter carnival at Dartmouth college will save Walter Wanger some money; he's sending a crew of technicians to record plenty of it for background music for his picture, "Winter Carnival." . . . Samuel Goldwyn will use a large cast of unknown players in "Thirteen Go Flying," which will be based on the recent crash of the British flying boat "Cavalier." © Western Newspaper Union.

What to Eat and Why

Advice to Homemakers on How to Feed Families During
Coldest Days of Winter; Essential Nutritive
Values Described in Terms of Everyday Foods

By C. HOUSTON GOUDISS

TOWARD the end of winter we sometimes experience some of the coldest weather of the entire season. Temperatures remain below freezing for days at a time. The air is often raw and penetrating, and blustery winds make it seem as if man is being persecuted by nature.

Moreover, this trying weather comes after months of short and often sunless days . . . days which many people have spent in overheated houses, and without sufficient exercise. So it is no wonder that the body is on trial . . . fighting to maintain health . . . to avoid the colds and other respiratory diseases that are so prevalent. This is, perhaps, one season when food has a mightier power than at any other time to influence physical well-being.

Food Your First Defense

In general, women seem to be more aware of the power of food than men. This is fortunate, because they are charged with the solemn responsibility of determining what foods their families shall eat. Since the right food sometimes makes the difference between sickness and health their husbands and children are the unhappy losers if they fail to recognize the need for even one essential food substance.

Occasionally the homemaker's task is made more difficult by men-folks who pooh-pooh the idea that meals should be planned scientifically, and who point out that generation after generation survived without a specific knowledge of nutrition.

People who hold this view fail to take into consideration that many of our ancestors consumed a satisfactory diet without knowing it.

Safeguarding Health

They should realize also that one can suffer from dietary deficiencies and live . . . though he may not live well! A man can exist upon much less than the amount of iron required for normal health . . . but he probably cannot escape secondary anemia. He may be able to get along on a meager supply of vitamins . . . but the chances are that his vitality will be greatly diminished. And he will face the constant threat of disease that follows in the wake of lowered resistance.

Nothing is more foolish than to suppose that what a man eats is entirely his own business! It is a matter of grave concern to his wife and children. For it has been suggested that fully one-half of the illnesses of the American people may be traceable directly, or indirectly, to dietary deficiencies. Let no man, therefore, twit his wife for trying to feed him correctly!

Time for Good Eating

But don't imagine for a moment that correct eating and good eating cannot be synonymous. It is true that there is no time of year when correct eating is more important. But it is also a fact that there is no time of year when good eating is more distinctly indicated!

These are the days when breakfasts must be especially hearty . . . to satisfy keen appetites, to provide generous amounts of fuel or energy values. That means cereals always, and some form of breadstuffs, pancakes or waffles.

Cereals are primarily energy foods, but they may also carry substantial amounts of precious mineral salts and vitamin B.

Balancing the Big Meal

Whether the main meal of the day is served at noon or at night, it should be well-balanced, to help safeguard health, and appetizing, to make it so enjoyable that it will be digested efficiently.

It should be built first of all around a protein food: meat; fresh, canned, or quick-frozen fish; cheese, chicken, an egg dish, or a casserole of hearty baked beans. There should be an energy food such as sweet or white potatoes, rice, macaroni, or noodles, though frequently this can be combined with the protein food, as in cheese macaroni or beef stew. For variety and palate pleasure, occasionally serve baked bananas. They rank as an energy food, and also contribute important minerals and vitamins.

Vegetables—Raw and Cooked

There should be vegetables—one or two of them. Green leafy vegetables, either fresh or canned, should be served several times a week . . . for their iron and vitamins A, B, C, and sometimes K. These may be alternated with the yellow vegetables which are particularly notable for their vitamin A. Don't overlook onions—they are inexpensive, and a fine source of bulk. Served raw, they provide a substantial amount of vitamin C, the vitamin for which we especially prize oranges, grapefruit and tomatoes.

Include a salad at dinner, lunch or supper; it is well for most normal individuals to eat some raw food daily. In cold weather, dress it generously with salad dressing for extra fuel value.

Dessert may be pie, pudding or gelatin. The choice depends partly upon the other foods served at dinner, partly upon the dessert to be served at the third meal of the day. But here is a good general rule to follow. Serve a fruit dessert at one meal—and a pudding containing milk at the other. Of course, the fruit need not be served plain unless you wish. Fruit pies are splendid for cold weather meals, fruit and gelatin combine nicely, and fruit may be incorporated in cakes, as in apple sauce cake.

Rounding Out Day's Nutrition

Whether the third meal of the day is lunch or supper in your household, it should round out the day's nutrition. If you need to get more milk into the diet, let your lunch or supper include a cream soup. If you haven't served eggs previously during the day, choose a soufflé or a dish containing creamed eggs. A starchy food, a salad, a dessert and a beverage will complete a meal that both satisfies the appetite and meets nutritional requirements.

Let the balanced diet be your ideal—and cold weather will prove a tonic instead of a possible menace to health!

Young Idea Takes to Angora

Angora is all the rage and you, too, can be right in style with the help of your knitting needles. If it's glamor you are after, make the bolero, so lovely for evening wear at any season; use white, black or a pastel shade. The bolero, with its smart ribbed ef-

fect, is just the thing for wear under a suit. Pattern #285 contains directions for making bolero and bolero in sizes 12 to 14 and 16 to 18; illustrations of it and of stitches; materials needed.

To obtain this pattern send 15 cents in coins to The Sewing Circle, Household Arts Dept., 259 West 14th Street, New York, N. Y.

Sergeant Had Several Samples Up His Sleeve

The sergeant grabbed a recruit's rifle after a hopeless exhibition of marksmanship by his squad. Hastily he took aim, fired—and missed the target completely. "Now that," he said coolly, "is how you, Robbins, do it."

Taking aim again, he fired, and again missed miserably. "And that," he exclaimed, "is how you, Hardaker, and you, Phillips, do it."

In despair he again took aim and fired, and managed to score a bull.

"There you are!" he shouted. "That's how I do it, you careless good-for-nothings. In the future do it my way!"

THE HEDLEY INFORMER

THUMBNAIL BIOGRAPHY

William E. Borah, Dean of U. S. Senate, Is Still Vigorous Disciple of 'Isolation'

"I JOIN no crusade; I seek or accept no alliances; I obligate this government to no other power. I make war alone for my countrymen and their rights, for my country and its honor." Well might these words be called the creed of the 74-year-old, individualistic dean of the United States senate—William E. Borah, Republican and senior senator from Idaho. These were the words he used when on April 4, 1917, he cast his vote for this country's entrance into the World war.

His 1939 battle against the Roosevelt administration on the arms embargo has brought one of America's most colorful statesmen once more into the limelight. In a career highlighted by a constant battle to "keep the United States out of Europe" and studded with startling inconsistencies in matters of domestic policy this extreme isolationist has blazed forth once more on his favorite theme—"no foreign entanglements."

The battle this time once more reveals the fundamental beliefs on foreign policy of the man from the West who has served his state for six consecutive terms in the United States senate. Briefly these beliefs are: (1) a violent distrust for the diplomats of Europe; (2) England has but one objective in international politics—advance the interests of the British at any cost. And he wants the United States to stay in her own backyard.

Once called an "enemy of England" he replied that he was not her enemy but her friend. But he said he knew England too well and knew full well that the guiding light over there was purely the advancement of British interests.

In the long years that he had served in the senate up to the coming of the New Deal, Borah had advanced himself to a powerful position in the lawmaking chambers. And for a while it seemed as if the Roosevelt system of things was to "blackout" the last years of a colorful career. Having gained his reputation on his fight against the U. S. entry into the League of Nations, when issues like NRA and WPA and TVA came along, the youngbloods outdistanced him.

But then came the soundings of another war in Europe. And out from his lair came this "champion of Americanism" as he has been called. He dusted off his trusty tennis and rounded up his clan and the fight was on. Noted for his oratory and admired for his sincerity his leadership lent weight to the cause of the "isolationists."

A BRISK STROLL across the Capitol grounds is the order of the day for William E. Borah, dean of the United States senate. Seventy-four years old, the Senator is still a hard hitting westerner when fighting his favorite "keep out of Europe" fight.

But if his record on foreign affairs has been consistent his views on matters at home have been the direct opposite. Called "the great opposer" at times, he has not even been consistent in his opposition. He takes sides purely as he sees fit and then fights for his views—"I join no crusade."

Born June 29, 1865, in Illinois, educated in Kansas (he is a good friend of William Allen White) he moved to Idaho in 1891 and continued a law practice begun two years earlier in Kansas. Striding ahead rapidly he soon became one of the state's outstanding lawyers. Gaining national fame in a legal battle with the great Clarence Darrow, he capitalized on his success and launched a successful senatorial campaign against the strong Republican machine in his state.

His record in the senate is well known. He has been a guardian of state's rights. He has always defended the George Washington poli-

cy of keeping out of Europe. He has used his gift of oratory to bring international issues and domestic quarrels before the halls of congress and the people of the country. He has usually relied upon his speaking ability to influence public opinion and seldom engages in long explanations after stating his views. Mentioned as presidential timber at various times the opportunity or perchance the inclination has never been quite strong enough to start him on the road to the White House. "I seek or accept no alliances."

Southern Forests Are Being Utilized For Public Benefit

MEMPHIS.—The 13 national forests of the South, containing 9,000,000 acres of government-owned mountain and forest land are being developed so that all of their resources, not just their natural beauty, will serve the public. Mile after mile of forest-covered slopes and plains stand as monuments to the forest fire fighting effectiveness of the state and federal forest officers. Water is one of the most important natural resources. Forest-covered slopes give rise to rivulets that join to make creeks, that flow together to form rivers, that produce water power, bear commerce, and, in so many ways, contribute to the well being of mankind. Many cities are dependent upon the regulated flow of water from forested areas for their domestic supply.

Mature timber in national forests is sold for use by local wood-using industries. Forest rangers mark the trees that may be cut. A crop of young trees is always present. Selective logging is the term applied to this method of timber harvest. More than \$800,000 worth of ripe timber was sold from southern national forests during the past year.

Calm Seas

72-YEAR-OLD Captain Zebulon Tilton, New England sea-farer, is pictured at the wheel of his schooner "Alice Wentworth" as he was about to set sail to meet and wed his childhood sweetheart, Mrs. Grace McDonald, 52. Twice married previously, the captain still charts his own course of life, says he.

Chemist Develops New Steel With 'Gem-Like' Glint

NEW YORK.—Discovery that the chemical which produces war smoke, titanium tetrachloride, will produce a stainless steel so lustrous that it can be used to make jewelry, has been announced by the Chemical foundation.

Titanium tetrachloride, made from the dark gray metal titanium, is used for the military smoke screens and smoke bombs of all nations.

Patent Is Issued.

A discovery which the foundation says is amazing was made when scientists at the Massachusetts Institute of Technology mixed this stuff with an acid bath in which stainless steel was placed during experiments to make the steel completely impervious to ordinary corrosion.

The steel came out of this bath

with a "singular luster and corrosion equivalent to that which characterizes precious metals." These are the words of the United States patent which was issued to Herbert Henry Uhlig, of Massachusetts Tech. Uhlig assigned the patent to the non-profit Chemical foundation of the United States.

The surface of the steel scintillates, as if studded with microscopic gems.

The acid bath removes a thin layer of the steel—44 hundred-thousandths of an inch long. In so doing, it produces a surface so mathematically smooth that it prevents pit corrosion, a form of rust that has persisted in stainless steel which has had any type of contact with salt water.

STORY OF THE WEEK

Even Fathers Can Guess Wrong

By VIC YARDMAN

LEN JUMEL was sensible. More sensible than Ursula Newbury. Though you never would have guessed it by looking at them. Len was tall and angular and homely. One of those kind, honest faces, with whimsical eyes and a humorous mouth. There was a shyness about him when you met him by accident on the veranda of the ranch house or inside the great living room or any place where there were things to which he was unaccustomed, but the shyness gave way to self-confidence and sureness when you saw him astride a horse on the open range.

Ursula was the opposite. She was small, gorgeous and delicate. She came from Westchester, N. Y., had attended private schools and traveled abroad: was perfectly at ease in a drawing room, or anywhere with people.

She started in by teasing Len, which was a certain indication that she was fond of him. Presently, however, she stopped teasing him, stopped being merry and gay, and began brooding.

Her parents couldn't understand it. They became worried and anxious. They questioned her without success, talked the matter over in fretful tones, suggested returning home, but changed their minds when Ursula emphatically refused to budge from the ranch.

And then gradually the truth became known, became definitely established when Ursula confirmed their incredulous suspicions herself. The elder Newburys were horrified.

"But, dear child!" Mrs. Newbury exclaimed. "The man—this Len Jumel—is impossible! He's nothing but a common cowboy!"

"Which doesn't make a particle of difference," Ursula tossed her pretty blonde head defiantly. "I love him. He's the first man I've ever loved. And I'm going to marry him."

"Oh, dear, dear!" Mrs. Newbury wrung her hands miserably, and looked about for Mr. Newbury.

Mr. Newbury took the news more calmly. He was a business man, used to crises and quick decisions. He patted his wife's hand and spoke to her reassuringly. "Now, there, mother, don't worry about it. I'll attend to everything."

Newbury found Len Jumel out by the horse corral and came to the point at once. "Len," he said in the faintly familiar and patronizing tone he used for just such moments, "my daughter has been telling me about her—er—interest in you. Now, Len, you're an intelligent man. Above the average." Mr. Newbury hesitated long enough to let this bit of subtle flattery sink in. "I don't have to tell you that a match would be quite impossible. Ursula's young and she's headstrong. She's never met your type before. You interest her and she's become infatuated. But, Len, my boy, you two are as far apart as

the Poles. You could never adjust yourself to her sort of life, nor she to yours. Oh, it would work for a while, but after the romance wore off—well, I must warn you that Ursula's demands are great. She's been used to having whatever money can buy: friends, excitement, parties, travel, clothes and everything else that a daughter of a rich man brought up in society is accustomed to. She wouldn't be happy without them."

Len spat and rolled a cigarette. "Mister, you're taking a lot for granted."

"I beg your pardon?"

"I say, you're taking a lot for granted. And I'm beginning to think you're a little tetch in the head. This here's the first I've known of your daughter's infatuation and I'm danged if it don't strike me plumb

Len spat. "Mister, you're taking a lot for granted."

funny. Mister, when I marry it won't be to no little blonde-haired hussy like your offspring. It'll be to somebody who can earn her salt."

"You—mean you don't love my daughter?"

"Love her. The little hussy? Well, hardly! And don't flatter yourself that a half interest in your hull fortune would induce me to marry her. It wouldn't be worth the price!"

Mr. Newbury reddened and choked a little. He was amazed. He didn't know what to make of it. In the first place, he couldn't understand any man not loving his daughter or any man not interested in the Newbury fortune. He had given Len credit for a lot of intelligence, and discovered his estimate had been wrong. He had an uncomfortable and very annoying feeling that if Len did happen to love his daughter that pretty speech he had made would have been wasted.

It was however a relief to know things were going to turn out as he wanted them to even though he wasn't responsible.

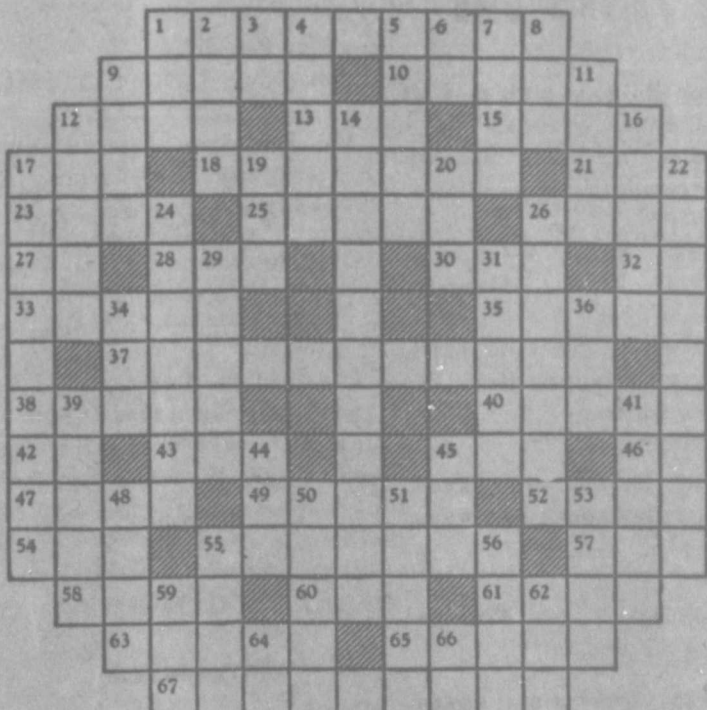

Len demonstrated during the remainder of the time the Newburys stayed at the ranch that his devotion for Ursula was nil. Even Ursula, though it nearly broke her heart, was forced to admit there was no soap as far as Len was concerned.

And so, within the week, the Newburys departed. Len was not pres-

ent. He had ridden away for a very definite purpose that morning. High on a rocky ridge above the ranch he sat his horse and watched the car that carried the Newburys to the station drive out of the yard. His eyes were grave and sober, and in their depths there glowed a look that would probably have brought Ursula into his arms, had she seen it. Presently, sitting there, he reached into a pocket and produced a small wisp of handkerchief. The letter "U" was traced in one corner. Besides the handkerchief there was a tiny photograph from which Ursula's berry blue eyes stared out at him. He looked at them tenderly, reverently before restoring them to his pocket. It would be hard, he thought, riding along on the range trying to forget.
