On The BEAM

By J. W. King, Sr.

The cool weather the past few days is nice following the day or two of summer-like weather. Spring rains have started and we are hopeful that a good supply will come before planting time rolls around.

We would like to see enough rain come to fill up the new lake on Champion Creek which is receiving final touches getting ready for it.

We still would like to see the landowners along Champion Creek get together on a program of soil and water conservation and flood control.

Salem Lutheran Church Observing 50th Anniversary

Salem Lutheran Church, four miles East of Lorraine on Interstate Highway 20, will celebrate the 50th anniversary of its organization on Sunday, April 12 in an all-day meeting.

Farm Bureau Opposes Legislation

The Mitchell County Farm Bureau, through its directors, has gone on record as opposing proposed legislation concerning farm labor. In a meeting Tuesday night the following resolution was adopted by unanimous vote:

"Be it resolved, that we oppose the imposition of further regulations and restrictions as proposed by federal legislation on farm labor, including placing agricultural workers under wage and hour law, or compulsory regulation on housing requirements, prevailing wages and transportation costs of domestic workers, and be it further resolved, that we work collectively and individually to prevent the enactment of such legislation, which we feel could be disastrous to the agricultural economy of our county, state and nation."

It was also voted by the directors to work with retail outlets, service organizations, and small businesses who may be seriously effected, along with the farmer, by the same legislation regarding the minimum wage and hour law.

A meeting is called for Monday, April 13, at 3 p. m. at the Howard County Junior College to which individuals and organizations, both farm and business will be invited in an effort to coordinate interests of all.

Another Half Inch Rain Soaks In But More Is Needed

Slow falling showers that began about 7 p. m. Tuesday and continued at intervals until 4 a. m. Wednesday, led to 55 inch of moisture that soaked into the ground where it fell.

The showers fell during an alert period but this section of the country was barely in the southern edge of the alert zone. Rains of as much as an inch fell at various points on the Plains and several funnel clouds were spotted there but none touched ground and caused no damage.

The moisture, though not enough, will help to put planting moisture in the soil.

More rain was expected Wednesday.

TWO LOCAL SCOUTS ON CAMP STAFF

Two members of Lorraine Troop 124, Boy Scouts of America, have been selected as staff members for summer camp at the Buffalo Trail Scout Ranch in the Davis Mountains near Toyahvale, Texas. Stanley will be serving in the position of dining hall steward and song leader at all the meals and campfires during the camping period. Tim will be serving as assistant wrangler for the first three weeks and as an instructor in map reading and compass use the last two weeks.

They will also perform other duties that will help to make the camping period of each Scout more enjoyable and worthwhile. The staff members are selected from Scouts throughout the Buffalo Trail Council and upon the recommendation of local troops, Advancement, leadership, cooperation, interest, and other points are considered in the selection of staff members.

Radio Speakers Taken from Drive-In

Evidently drive-in theatres throughout the country are suffering considerable loss from the theft of radio speakers. The following notice was handed us by Mrs. Percy Bond, who with her husband, operates the Donna Lynn Drive-In Theatre here:

MOTHERS AND DADS TAKE NOTE

Recently, at the Texas Drive-In Theatre Owners Association Convention in Dallas a resolution was adopted to ask all law enforcement officers in the State of Texas to look closely in the cars of teenagers when they are stopped for traffic violations for back seat radio speakers in their cars. It was pointed out that some teenagers who have their own car often take Drive-In Theatre speakers and install them in the back seat of their car for a second radio speaker. Mothers and dads should take note to see if their son has a Drive-In Theatre speaker in the back seat of his car. And if he does have a Drive-In speaker in his car, the speaker should be turned into the sheriff's office at once. The possession of one of these speakers is unlawful, even if your son said he found it along the roadside or bought this stolen speaker from some unknown person.

Quick action eases threat to
Texas grainmen

Texas important grain industry
was recently faced with its worst
insect threat in modern times
when the dread grain-mangling
Khaphra Beetle was sighted in
the state for the first time in far
West Texas.

First location of the beetle
by agriculture inspectors in an
El Paso grain and feed milling
operation promoted an immediate
investigation, and emergency
crew of inspectors was rushed
to El Paso from other points
in the state. Findings thus far
indicate that the infestation is
likely localized, and that spread
of infestation is being curbed by
government supervised fumiga-
tion operations of all suspicious
grain products moving out of the
area.

A native of India, the Khaphra
beetle is the most feared pest
known to grainmen, capable of
destroying or seriously down-
grading every form of grain and
feed stuffs. The beetle is very
difficult to eradicate, requiring
that the entire infested store-
house be covered with impervious
material (usually plastic), includ-
ing the ground area surrounding
the building for a radius of
about 30 feet. Then the interior
is fumigated with methyl bromide
allowing plenty of time for fumes
to seep into every crack and
crevice of the building where
the Khaphras may cling.

The Khaphra beetle is primarily
a stored grain pest and is not
found in open grain fields. It
can survive for as long as three
years without any food at all,
but in the larva stage the pest has
an enormous appetite. Grain
damage, depending on weather
conditions, varies from 5 to 30
percent although up to 75 percent
damage has been reported. The
beetle is a "dirty" feeder, break-
ing or powdering more kernels
than it consumes.

The adult Khaphra which be-
long to the same family as the
carpet beetle is small, about
1/16 inch in length. It is pale
red-brown to dark brown or
black in color with wing covers
that usually have distinct red-
brown markings. The larvae 1/8
inch long, are yellowish brown
and clothed with long brown
hairs. The area between the
segments and the underside of
the body is pale yellow in color,
giving the worm a ranged ap-
pearance when viewed from
above.

Presence of Khaphra beetle in-
festations is usually first noticed
by the presence of the fuzzy
larvae or their cast skins in
clusters around the corners of
grain bins or in used sacks.

Any suspected infestation
should be immediately reported
to John C. White, Commis-
sioner, Texas Department of
Agriculture, Capitol Station,
Austin, Texas.

"How should I reconcile
my checking account balance?"

When you receive your statement of account, com-
pare it with cancelled checks enclosed; compare those
with your stubs. Reduce your checkbook balance by
the amount of any service charges. Reduce the state-
ment balance by the amount of outstanding checks;
add to it deposits not yet recorded. The two balances
should now agree ... This way, you make the state-
ment a "double-check" on your expenditure records
— a helpful safety valve that is yours only when you
pay bills by check ... Make full use of your account!

Income TAX FAX

Questions and Answers About Your Individual

Income Tax Report for 1958, as Presented

By the Texas Press Association.

Casualty losses are deductible. The loss of your property by reason of flood, fire, storm, shipwreck and other casualty, or by theft, is deductible.

If the property was used in your business, the deduction is taken on separate Schedule C.

If the property was personal the deduction is taken on page two of the tax return form.

This deduction is lost if you file short form 1040 or 1040-A, or take the standard deduction. In the case of a residence, the damage to the residence, ornamental fixtures, trees, shrubbery, lawns, tools, fences, equipment, or any property you owned is deductible. Of course, it is important to be able to prove you owned the property, and the amount of the loss.

Where the loss consists only of damage, then ordinarily the cost of repairs would be the amount of your loss. In other cases the loss is the difference between the fair market value of the property before the loss and the fair market value of the property after the loss.

Any insurance recovery must be deducted from the amount of the loss before you make the deduction on your tax return.

Also, the loss can never exceed the cost or other basis of

the property regardless of the fair market value at the time of loss.

If the loss is any amount greater than your income for 1958 then you would carry the excess back to 1956 and apply it against 1956 income and file a claim for refund of the income tax paid for 1956. If the amount of the loss was such that your 1956 income did not absorb the excess, then any unused loss could be carried forward to 1957 in the same way, and if the 1957 income did not absorb all the loss, then any excess could be carried forward for the next five years and applied against the income of those years.

In other words, if you sustain a very large casualty loss you would apply it first against 1958 income, then against 1956 and 1957 income, and then carry forward any unused excess for the next five succeeding years or until the loss was fully covered by income, but not longer than five years.

It is important to get all your bills, pictures, and other information together at the time of filing your tax return and keep them with your copy of your tax return so that you can prove your loss if necessary.

"HIGH SCHOOL ECHOES"

SPEAKS TO STUDENTS

Mrs. Alfred Richey brought a colorful report of her visit on the Hawaiian Islands to the 4th, 5th, and 6th grades Monday afternoon. She had spent the past six months on the islands visiting her daughter, Mrs. Harris Hamilton, and granddaughter Charla.

She told of her trip by Pan American Clipper from Abilene through Albuquerque, Las Vegas and San Francisco. She came over Hawaii at 4,000 feet and observed that it looked like small stepping stones in the blue ocean. She was greeted by the Hamiltons who loaded her down with leis made from orchids and carnations strung into necklaces. She was there during two great celebrations, statehood and the festival for the king of Japan wedding. She saw the troupeau

of his bride who is a commoner. There was much red velvet and broadcloth gold in it.

She visited all of the places of interest on the islands, among them Pearl Harbor, the Punch Bowl cemetery where the war dead have been buried, and the water falls that go back up. She dined in Royal Hawaiian Hotel and was impressed by the beauty of the garden and all of the blooming trees. The hula dancers were prominent in all the celebrations, particularly the statehood celebration.

Mrs. Richey was dressed in the traditional dress of Hawaiian women. She exhibited the leis that she was given as she departed from the islands. They were made of enumerable carnations and orchids. She brought many beautiful seeds that the natives use in making costume

jewelry.

About Social Security

Q. I am a minister and in addition to my salary I am furnished a home by the church. Do I include the rent value of

the home in my gross income? A. For taxable years ending on or after December 31, 1957, you should include the rental value of the home in your gross income.

Q. I am a full time minister and would like to come under social security; what must I do to become eligible for coverage?

A. You should file a Waiver Certificate with the District Director of Internal Revenue indicating that you elect to be covered by social security. The necessary form is available at all social security district offices or Internal Revenue Service offices. You should ask for Form 2031. You must file this certificate not later than April 15, 1959, in order to secure social security coverage if you have been a minister for at least 2 years.
