Jesus said, "Because you are lukewarm, and neither cold or hot, I will spew you out of my mouth," Rev. 3:16. *If that's your bracket you better start getting up some temperature about life's values ... home, children, school, church, God, right and wrong.*

If Jesus died to save you, can't you do some living for Him? Do you believe, "Life is real, life is earnest and the grave is not its goal; dust thou art, to dust returnest, was not spoken of the soul"? Are you lukewarm? Why not get hot for God? *Put righteousness first.*

McCoy-Taylor Vows Said Saturday Evening

Wanda Kay McCoy and Carlton H. (Corky) Taylor were united in marriage Saturday evening in the First Baptist Church, performing

the double ring ceremony was Rev. John Jenkins, pastor of the First Baptist Church in Spur.

Lester Morton of Big Spring pre-

sented wedding music. Mrs. Marvin Carlton was organist.

The bride was given in marriage by her father. Her gown of silk organza had a bodice of Venetian lace accented with seed pearls and sequins. Matching lace enhanced the bouffant skirt. Arganza and

venetian lace fashioned the double chapel train.

A tiara of seed pearls and lace held her veil of illusion. She carried an arrangement of roses and stephanotis centered with a white orchid.

Matron of honor was Mrs. Jimmy Gattis of Cross Plains. Bridesmaids were Suzanne McCoy of Midland and Jan McCoy of Slaton, both cousins of the bride. Ponda Taylor was flower girl.

Bridal attendance wore matching dresses of pink embossed satin fashioned with empire waists and A-line skirts. Pink satin bows held their brief veils. Each carried a cascade of white gladiolas.

Wilburn Taylor of Albuquerque, N. M., served his brother as best man. Groomsmen were Phillip Petty of Rotan and Sam Rackley of Roby.

Guests were seated by Mike and Randy Lvens of Snyder, Charles Joiner of Odessa, and the bride's brother, Larry McCoy.

Future Looks Good for Dairymen
Dairymen are going into June Dairy Month in a strong position relative to future prices, says A. M. Meekma, Extension dairy specialist at Texas A&M University. The continuing decline in dairy cow numbers and a slow down in the increase in milk production per cow make the future price situation favorable. The virtual elimination of any surplus of manufactured milk products has added further strength to the dairy market.

WTU NOTEBOOK-PATTERNS FOR PROGRESS

INDUSTRIAL PROSPECTS ... a must in Economic Development

Obtaining leads on industries that might locate in a community is one of the hardest parts of any sound economic development program. The lack of an industrial prospecting program that produces several leads may cause serious mistakes by a community in financing or other endeavors to attract unsound or unattractive industry. A community needs a well balanced program, combining all the techniques and utilizing all of the sources that will give it increased effectiveness and chances for real success. **LOCAL PEOPLE AS A SOURCE OF INDUSTRIAL PROSPECTS**—usually provide a sound reason or give the community a competitive advantage in attracting the industry.

—**BUSINESSMEN**—should ask the company representatives they buy from if the company needs additional manufacturing facilities to serve this market area, also, service stations, restaurants and motel people can ask their customers.

—**CITIZENS**—who know someone that works for an industry should inquire if that industry might be interested in locating a plant.

—**EXISTING INDUSTRY**—may need a companion industry to supply them with raw materials or services. Expansion of existing industry is sound economic development.

—**LOCAL IDEAS**—can provide leads for the local people to establish an industry of their own or attract a certain type industry.

—**EX-CITIZENS**—should be contacted, advising them and asking their help to obtain leads on any industry that could logically locate in the town.

CHAMBER OF COMMERCE ACTIVITY—should utilize such programs as direct mail, asking local citizens to call on industries when they are on a trip—watching all news media for possible leads or indications that a company might expand.

COOPERATION WITH OTHER AGENCIES—such as utilities, banks, railroads, regional and state development organizations can provide leads for new industry. Keep all of these organizations fully advised of the local programs, advantages, activities and community interest for attracting new industry for improved economy in your community.

ANY and ALL industrial leads should be handled through and by the local group that has been delegated this responsibility, usually the Chamber of Commerce.

Ask your WTU local manager for additional information and services available.

WASHINGTON, D. C. -- Sign-up for the Medicare Program ended last Tuesday May 31. The Program becomes effective July 1.

Efforts have been made to advise people of their right of selection and participation, and to alert them to dates which may later be important to them.

Now that the deadline is passed and its operation soon to begin, it seems in order to also warn against disappointments which some are bound to find in Medicare. Two pamphlets are available in limited quantity for those who may have a need for the publication and who may not have gotten one at the time they signed up under the Medicare Program. If more information is needed, write:

Congressman Omar Burleson
House of Representatives
Washington, D. C. 20515
or inquire at your Social Security office.

The disappointments under the Program may not come just as a matter of individual experience, but to the whole Country. Already 7 States have plans which would take all the money provided for the 50 States. The State of New York has passed a sweeping medical care program, expanding Federal-State medical assistance to the needy of all ages. This State and a few others have acted to take fullest advantage of available Federal funds. It is estimated that in some States and Puerto Rico, 70 percent of the population could qualify under the provisions of State Law as it relates to the receipt of Federal funds. About all that is perfectly obvious is that the cost is staggering. Even this does not seem of concern to some where these new programs are viewed as the forerunner of something vastly larger. The New York Times commented that this set-up "makes it logical for Congress to begin thinking seriously about the desirability of providing comprehensive health insurance for all Americans."

The people of our country have long accepted an obligation to care for those who cannot care for themselves. It is another thing to think that any nation has the resources to provide free medical care for

Boys Ranch Gym Building Program

Joe Vander Stucken, President of West Texas Boys Ranch has announced the appointment of Bill Neil as General Chairman of the Ranch Building Fund Drive to build a new gymnasium to replace the recreation facilities destroyed by fire. Neil, President and General manager of KGKL radio, has set a goal of \$58,750 by September 1st. "Support will be sought in the entire area served by the Ranch," Neil said. "We hope to obtain co-chairmen for the El Paso, Lubbock, and Midland-Odessa areas also." The goal is based on architectural estimates for a new building to house a gymnasium and maintenance shops plus a stage, athletic equipment, storage space, and Student Council store. The proposed building, of fireproof steel and concrete construction, will be built on the site of the recently burned rec hall. Vander Stucken said, "We are pleased that Mr. Neil has accepted this responsibility for the Ranch, and we are confident that with his enthusiasm and demonstrated leadership he will do a wonderful job for the boys."

In view of all the programs passed last year and in the Present Session of Congress, the theories of Dr. Robert Theobald the British economist, do not appear by comparison as radical as when he first proposed a guaranteed income for everyone.

Facing up to what appears to be an early experience with Medicare, this is likely to happen to a age:

First, the wait to get into a hospital for conditions which do not require immediate attention will become longer.

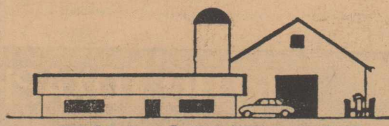

Second, in a great many cities and towns an emergency patient, after July 1, may well find himself bedded in a hospital corridor or a waiting room converted into emergency use.

Third, the medicare patient may find it necessary to go home from the hospital before he feels ready to go, and perhaps even before the doctor thinks he should.
