Loraine's New Fire Truck Arrived Tuesday Official Test Will Be Made In Two Weeks

Loraine has a new fire truck. This is the first brand new truck Loraine has owned in many years. Heretofore used fire fighting equipment had been purchased and the fire department has done the best it could with it. It got to the point, however, when the equipment in use was no longer doing a good job and could not be repaired so that it would meet minimum requirements so the City Council made the decision to purchase a new truck.

Several months ago a contract was entered into with Peter Pirsch of Kenosha, Wisconsin, to build fire fighting equipment and mount it on an International truck chassis. Last week the city was notified that the truck was ready for delivery so Gene Britton was sent to Kenosha to drive it home. He arrived in Loraine with the new truck Tuesday night.

The new fire fighting equipment includes everything needed with which to fight fires. The new truck will be formally accepted by the city when it has been put through a series of tests to see if it meets the requirements. This will be done by Chief Forgay of Sweetwater in about two weeks.

Loraine Fire Department will now be equipped with three fire trucks. One of the trucks is now equipped with a water tank and the old pumper will also be so equipped, according to Fire Chief Butsie Hall. The new truck also has a large water tank.

The new fire truck cost the city approximately $10,000.

Big Wind Damages Feed And Trees Light Rain Will Not Benefit Much

For more than two hours last Sunday night the wind blew at almost hurricane force, carrying sand with it.

The big blow started about 9:30 p. m. when a squall line passed through and lasted until past 11 o'clock.

Some clouds were floating around and lightning was severe but no rain fell until after midnight. The official gauge here measured .40 of an inch moisture. Other gauges measured up to .70 inch.

The wind blew down quite a lot of combine maize that had burned from the intense heat, tree limbs were broken and in some instances fruit was blown from trees, including pecans, and lightning and wind together disrupted electric service in parts of town for a time.

No major damage was reported but shingles were blown off some houses, windmills toppled and small buildings otherwise damaged.

The squall line followed perhaps the hottest day of the year. Sunday afternoon the temperature here reached 106 and at Snyder 112 degrees.

The small amount of moisture that accompanied the storm will do little good.

PEACHES, PEACHES

Uncle Lee May, a spry young man of some 80-odd years, came bouncing into our office last week with a box full of very nice peaches which he gave to the editor and his help.

The bride, given in marriage by her father, descended the stairway in a dress of chantilly lace and tulle over satin. Fashioned with a high neckline, the fitted bodice had long sleeves which tapered to petal points. The floor length skirt was made of alternate layers of lace and tulle. The tiered veil of pure silk illusion fell from a cap encrusted with irridescent sequins and pearls. She carried a bouquet of white lillies.

...at home study time

You'll be giving your child real help with his homework when you see that he has proper light at his study table. For best light from a table lamp, use a 150-watt bulb. The lamp should be properly shaded to conceal the light source from the eyes and should be tall enough to spread light evenly over the work area. A diffusing bowl is recommended to soften the light and prevent glare. If the lamp has no diffusing bowl, use a 150-watt white indirect bulb. It has its own built-in diffusor. See your dealer for the bulbs you need soon.

TEXAS ELECTRIC SERVICE COMPANY

U.S. OIL

Indispensable in our way of life... vital to our national defense

In the 100 years since the drilling of the first oil well in the United States, the usefulness of petroleum has been often demonstrated in many ways . . . It is an economical and efficient source of energy and a raw resource convertible through petrochemistry into innumerable useful materials. . . . It is indispensable in our way of life, and vital to the national defense.

It is comforting to know that today's reserves are ample for today's needs. And if incentives to undergo the heavy risks involved are continued, there is no doubt that more oil will be discovered and produced to replace the oil we use . . .

The United States has found, produced, refined, and used more oil than any other nation. This has made petroleum products a feature of the abundant American life. Americans use more petroleum products than any other people on the globe.

The past is prologue to the future. During its second century, oil can serve you and your grandchildren, and the nation, as well or better than ever before.

1859 1959 OIL'S FIRST CENTURY BORN IN FREEDOM WORKING FOR PROGRESS

The Humble Company, incorporated in 1917, has participated in the development of new and better ways to find and produce oil, and in the research that has improved petroleum products and discovered countless new uses for oil and natural gas. Humble is a major producer of U. S. oil, with production extending all across the southern tier of states from Florida to California. Marketing operations are carried on in Texas, New Mexico and Arizona. Humble's Baytown refinery, near Houston, is one of the great refineries of the world. (Humble Pipe Line Company, a major transporter of crude oil and finished products, operates more than 9000 miles of pipe lines in Texas.)

"What part of a family budget should be for reserve savings?"

According to money-management experts, a family should budget from 7½% to 25% of net income (depending on income group and family size) for reserve savings. Don't underestimate the importance of having an ample cash reserve in the bank. These funds can take up slack from "overspending" in other budget categories; they can help meet unexpected emergencies; they can help reach cherished family goals. More people have their cash reserves in bank savings accounts than anywhere else. We will welcome *your* account at *our* bank!
