## Can U.S. block drugs at source?

Bush to reveal battle plan Tuesday

WASHINGTON (AP) — President Bush's national drug strategy envisions sending up to \$260 million in economic and military aid to Colombia, Bolivia and Peru in an effort to stomp out cocaine where it's produced, an administration source says.

The final version of the president's plan, which he will unveil in a nationally televised speech Tuesday night, will be much like the draft proposed by drug czar William J. Bennett, according to another source.

It will be tough on users, heavy on law enforcement and call for a new emphasis on treatment, the source said.

But it won't threaten states with a loss of federal highway funds if they don't impose strict anti-drug laws, as

Bennett's draft had proposed, and it won't include the \$25 million National Drug Intelligence Center, said the source, who spoke on condition of anonymity.

The other administration source, also speaking on condition of anonymity, said Wednesday that Bush's strategy will call for \$250 million to \$260 million in economic and military aid for the three main cocaine producing countries — Colombia, Bolivia and Peru.

Also Wednesday, Sen. Joseph Biden, D-DeL., unveiled "debt-for-drugs" legislation intended to offer debt-relief incentives to Latin American nations to subsidize the withdrawal of farm land from producing coca crops, which are refined to produce cocaine.

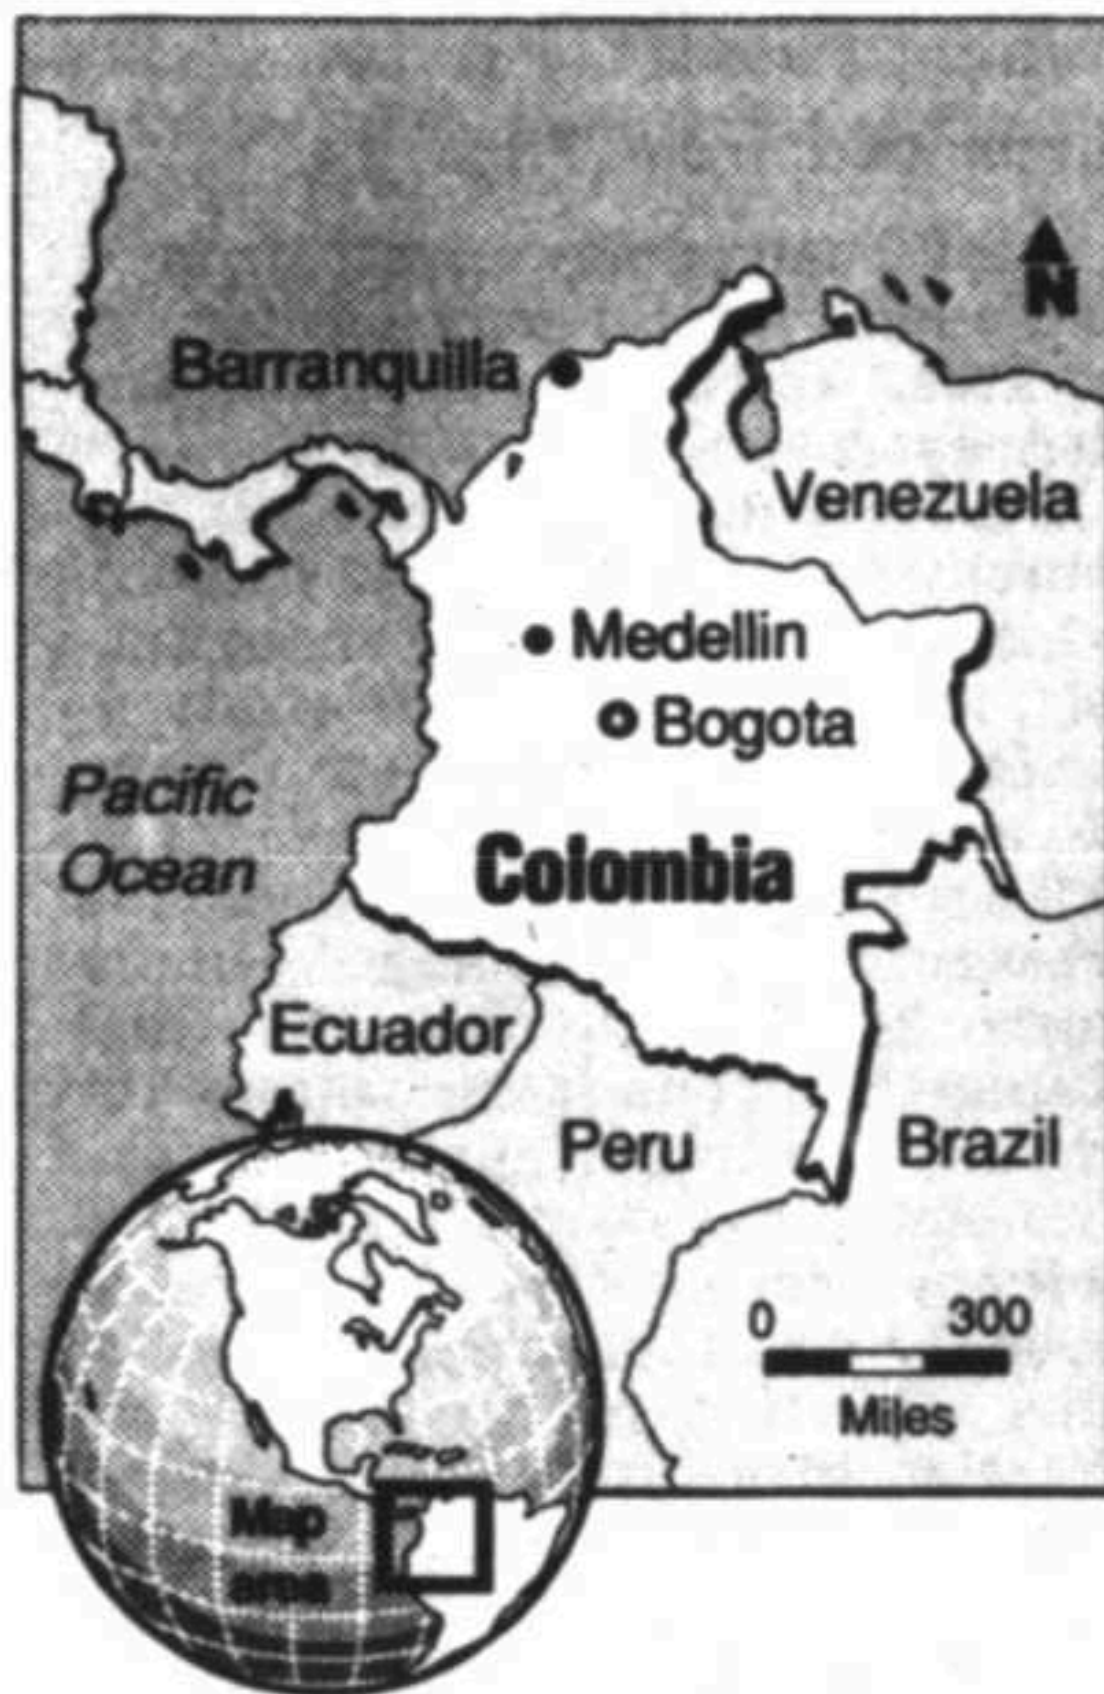

A U.S. investment of \$400 million

in such a plan could free enough funds to subsidize the withdrawal of every acre in Bolivia, Colombia and Peru in coca production, said Biden, who plans to introduce the legislation when Congress reconvenes next month.

Sources who had seen the classified section of the draft containing information about proposed aid to the three Latin American countries had said the figure could reach \$300 million, and National Security Adviser Brent Scowcroft indicated Tuesday that it would be even higher.

Scowcroft had included the \$65 million in military equipment that Bush announced on Friday for Colombia.

Five killed in Colombia

BOGOTA, Colombia (AP) — Soldiers in northern Colombia killed five members of a paramilitary squad reportedly run by drug traffickers, and police today said more than 500 people were arrested for violating a curfew in Medellin.

American dependents of U.S. Embassy employees were advised by the State Department to leave the country.

The 10 p.m.-to-6 a.m. curfew was imposed in Medellin and eight other cities as part of a nationwide crackdown on cocaine traffickers who have waged a campaign of assassinations, bombings and arson in recent weeks.

Medellin is considered the headquarters of the cartels that supply 80 percent of the cocaine to the United

States.

National police said in a communique that 530 people were arrested for violating the first day of the curfew. All but two had been released by this morning, a police spokesman in Medellin told The Associated Press.

Meanwhile, a paramilitary band believed affiliated with drug traffickers clashed with an army patrol in a remote area of the northern state of Cesar, the Colombian radio chain RCN quoted military sources as saying.

Five of the attackers were killed, RCN quoted the army sources as saying.

## Labor Day weekend events could boost Midland's economy

By JULIE HILLRICHS  
Staff Writer

With a trio of major activities planned over the Labor Day weekend — a benefit concert for Texas Special Olympics, a slow-pitch softball tournament and a remote control car race — local businessmen are seeing dollar signs before their very eyes.

"It's definitely one of the largest weekends that we've had in a long time," said Mike Strotheide, interim director of the Midland Chamber of Commerce. "We're always out trying to seek opportunities like these and this time we're going to see some dividends as the result of our efforts."

Strotheide estimates that the three events initially will bring about \$1.7 million into the community. Rolled over four times that amount could reach \$6.9 million, he said.

Jane Wolf, chairman of the Midland Convention and Visitors Bureau's Advisory County, also believes that the economic impact from the three events will be immediate.

"The visitor's industry is really big business," she said. "For us in the Permian Basin it's especially nice because we don't have to drill a hole to feel the impact."

Ms. Wolf said the bureau's recent effort to capitalize on the tourism industry is a boon to hotel and motel operators and restaurateurs. It also will help drug stores, grocery stores, lawyers, doctors and every single person in the Midland-Odessa area, she said.

So far, the Convention and Visitors Bureau has doubled the number of conventions booked since 1988 with many more scheduled through 1992, said Ms. Wolf.

"We've really had to scramble to get convention bookings and we've had to compete with much larger cities that have quite a bit more to offer. But we believe that we have among the finest facilities in Texas for visitors."

"We have outstanding motels and hotels, restaurants and easy access to transportation," she said.

A traffic jam could result out at Twin Cities Speedway as crowds line

■ Softball tournament schedule explained. — 1C

up to see the six acts performing Saturday at West Texas' version of Randy Quaid's Miller Lite party.

Joining country greats William Lee Golden and Waylon Jennings at the benefit for Texas Special Olympics are T. Graham Brown, known for his soul-powered, traditional country vocals; the Ballamy Brothers; Augie Meyers and Ronna Reeves.

The extravaganza will be held from 11 a.m. to midnight at Twin Cities Speedway. Tickets are \$7.50 in advance, \$10 at the gate.

Golden, a former Oak Ridge Boy, chalked up 22 years and 65 awards with the group, including four Grammy awards, before releasing his 1986 solo album, "American Vagabond."

Jennings recorded Nashville's first million-selling album and has notched many hits over the years. In 1986, he began a new chapter in his long career of artistic achievement with the release of "New Classic Waylon," a collection of his four albums on RCA.

In addition to the music entertainment, the festival-type party will feature a classic car show, a chili cook-off, carnival rides, a sky-diver exhibition and a variety of other activities.

Among the other celebrities attending the event will be former rodeo star Jim Shoulders and his brahma bull sidekick Bufford T. Lite.

Tickets for the Midland-Odessa party are available July 27 at Lufkin's Western Wear, Harold's Electronics and KMD-TV.

Opening ceremonies for the 1989 National Class A Men's Slowpitch Softball Tournament are at 7 p.m. Friday at the Bill Williams Softball Complex, with games beginning at 7:30 p.m.

Stanley's Exxon of Midland will kick off play at 7:30 against an undisclosed opponent, with Coors to follow at 8:45, also against an undisclosed opponent.

T. Boone Pickens

## Pickens won't be candidate

DALLAS (AP) — Three Republican gubernatorial candidates expressed relief when oilman and corporate raider T. Boone Pickens said he would not run for governor in 1990.

"I'd be less than candid if I failed to state that my candidacy is strengthened by his withdrawal," Houston oilman Jack Rains said Wednesday. "He would have been formidable opposition. We share many friends and a common base of support in the business community."

Pickens, 61, ended weeks of speculation that culminated only as he announced his intentions. Pickens said he had prepared two versions of a speech for the Dallas Rotary luncheon — one announcing his candidacy and the one he delivered — just in case.

Pickens said the crush of his business would not allow him to commit totally to the needs of the state.

"Boone and I have been business associates and friends for many years," said Midland oilman Clayton Williams. "I am glad, however, that he is not in the race. He would have been a very formidable challenger."

Kent Hance, chairman of the Texas Railroad Commission, said, "Boone Pickens and I have been friends for many years. I certainly respect his decision not to run. He would have been a formidable opponent."

While the three gubernatorial candidates were lavish in their praise, Pickens handed out no endorsements.

"I really hadn't focused on that at all," he said. "We just reached this decision."

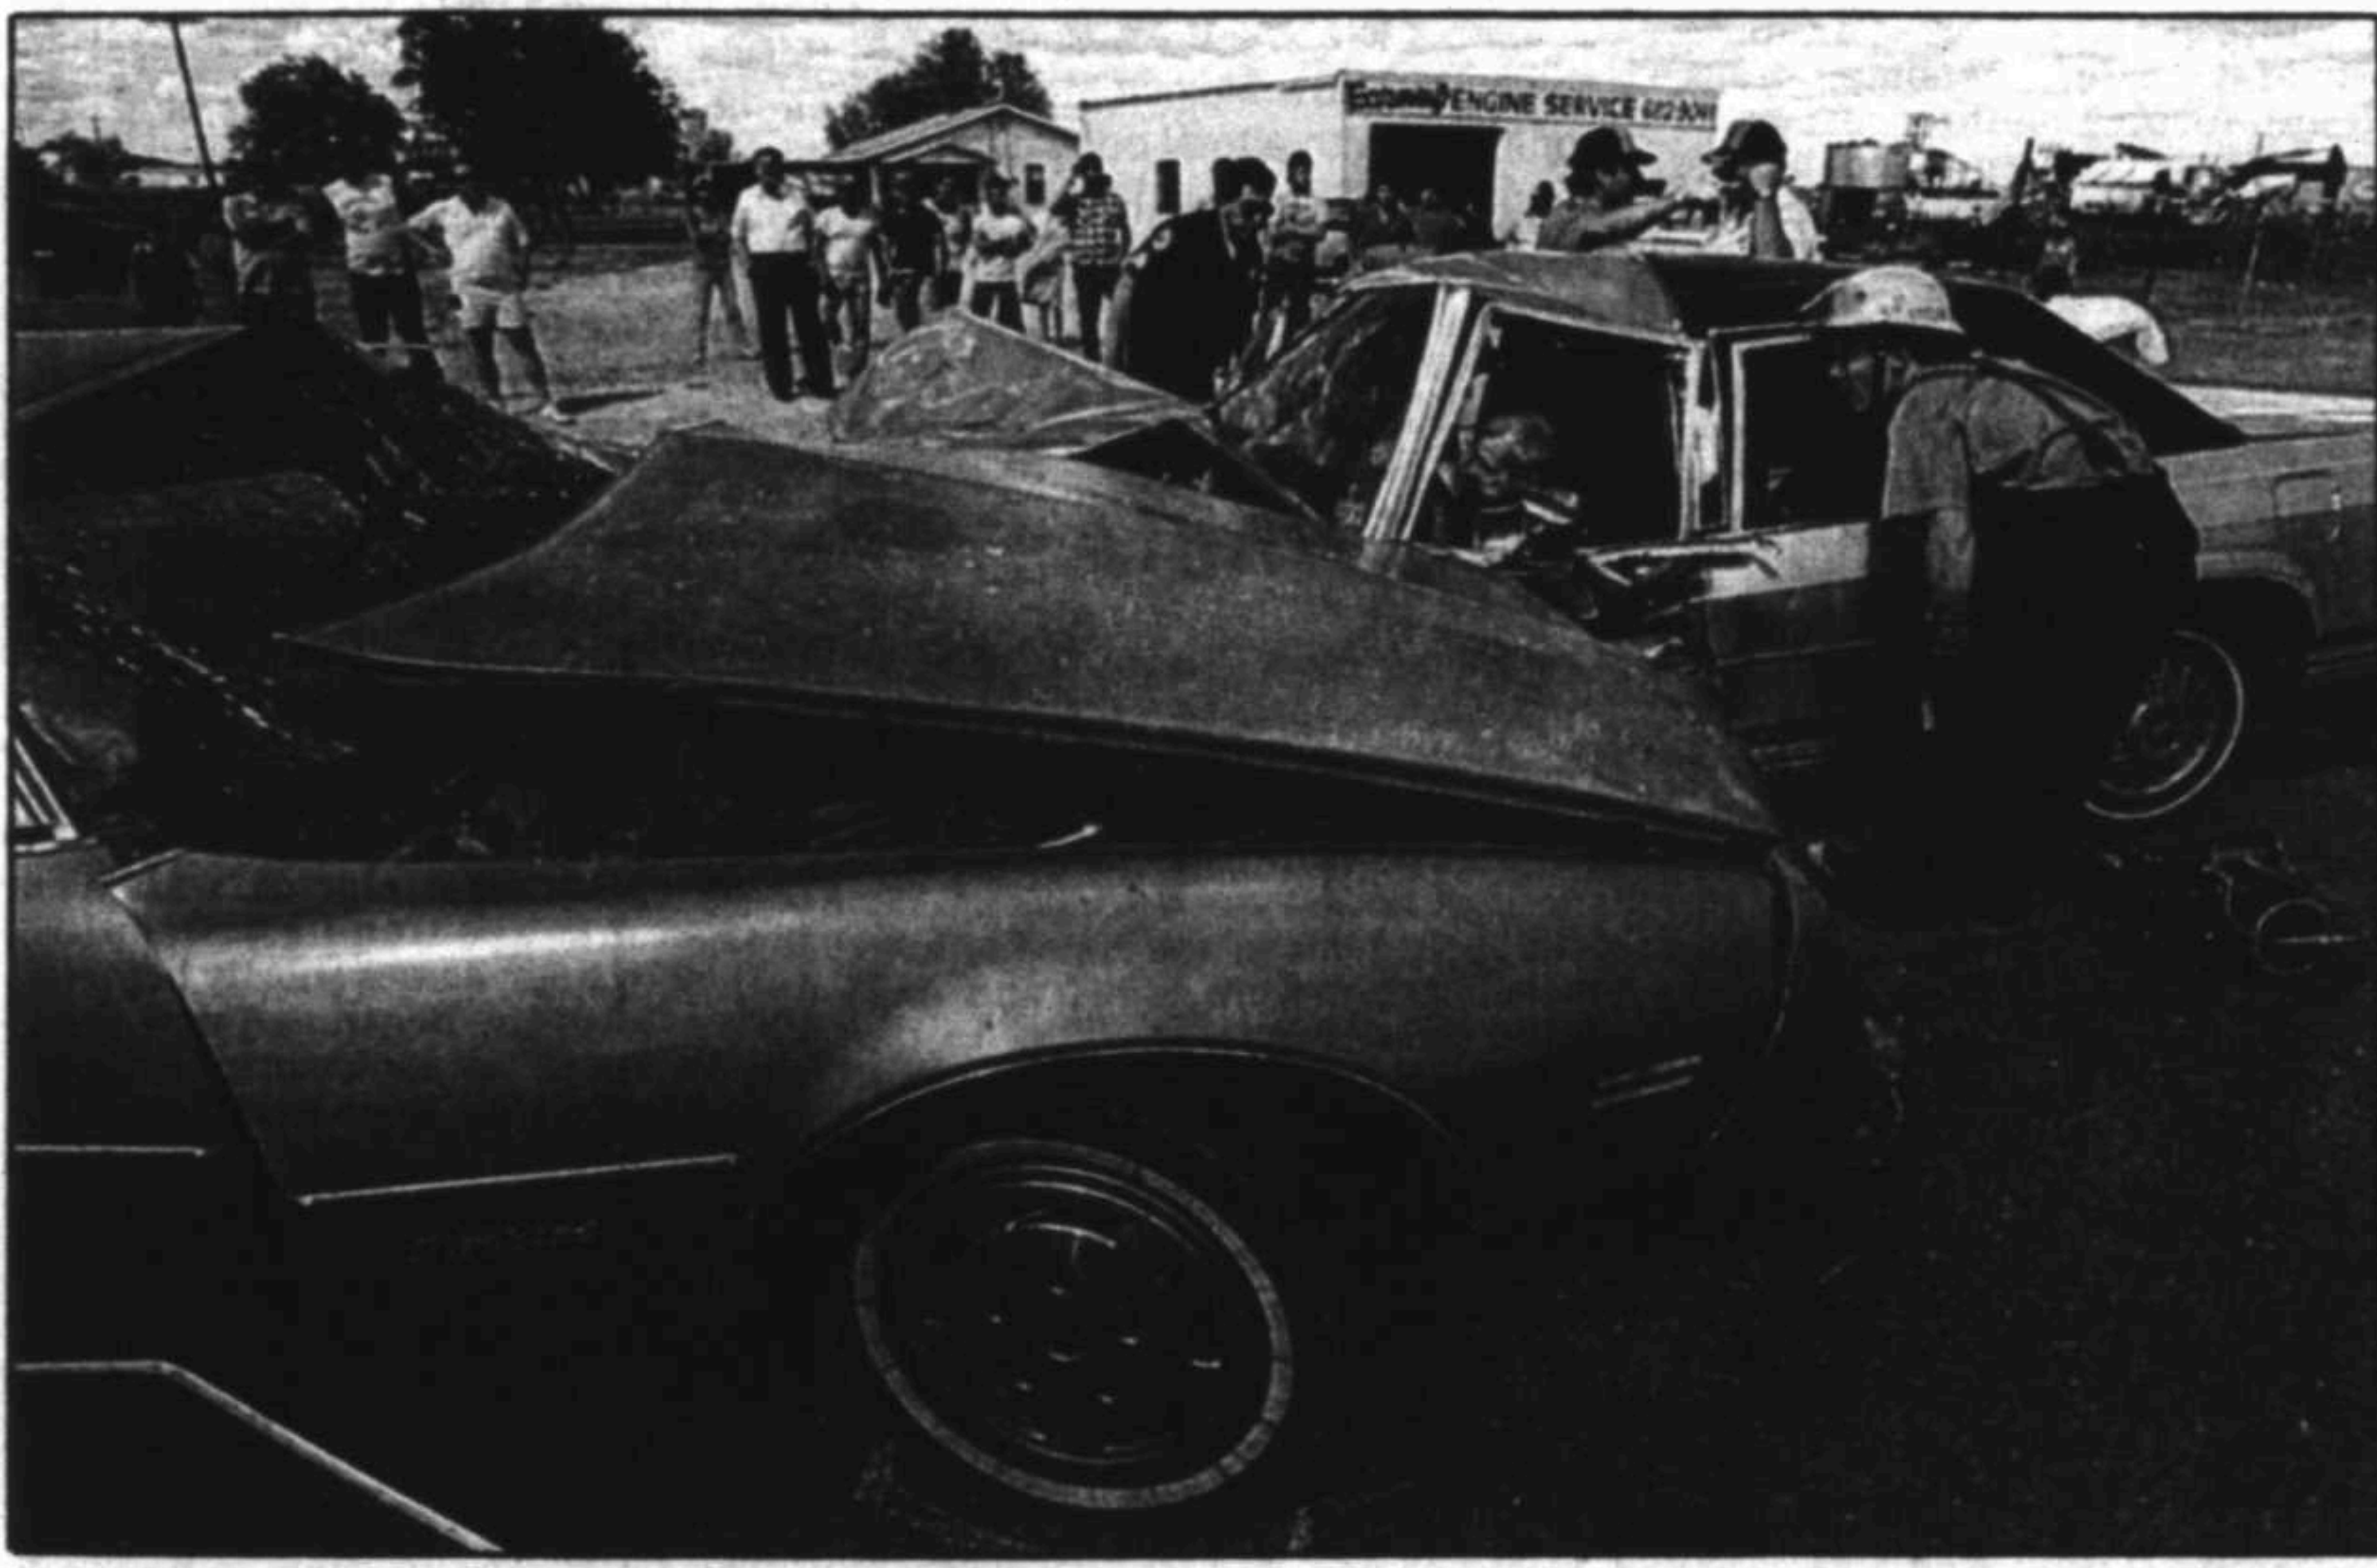

Pickens and his wife, Beatrice, decided against the GOP gubernatorial bid late Tuesday night at their hotel room in Dallas and were still discussing it Wednesday morning, Pickens said.

"We wanted to run," Pickens said later.

Mrs. Pickens said she was "disappointed for Boone, because it's something that he really did want to do. But our time just wasn't this time. Perhaps the next time."

Pickens did not rule out a run in 1994.

The decision, Pickens said, was based on his involvement in his Mesa Limited Partnership, Kotto Manufacturing and his United Shareholders Association.

Midland firefighters and paramedics work to free a 61-year-old Midland man who was injured in a two-vehicle accident Wednesday on the Garden City Highway. William Jones of Midland was

listed in satisfactory condition today at Midland Memorial Hospital. The driver of the Firebird on left and a passenger were killed in the accident.

## Two Midlanders killed, five others hurt in mishap blamed on speeding

By PATRICK CRIMMINS  
Staff Writer

Two people who "had no chance" were killed instantly in a two-vehicle accident Wednesday afternoon that police have blamed on speeding. Five persons were injured in the mishap, with three of them still hospitalized early today.

Peggy Walton, 21, 906 S. Mineola St., and 42-year-old Bobby Torres, 516 Holmes Ave., were pronounced dead at the scene of the 4:15 p.m. accident by Justice of the Peace Keith Jobe. Both suffered multiple injuries, police spokesman Cpl. Jim White said.

Witnesses at the scene said Ms. Walton was driving a 1977 Pontiac Firebird east in the 1600 block of Garden City Highway "at a high rate of speed," White said. She apparently lost control of the vehicle and slid sideways into the westbound lane,

and right into the path of a 1987 Mercury Marquis driven by William Jones, 61, of 2611 Cimarron of Midland, he added.

The Marquis collided with the Firebird on the left side, killing Ms. Walton and Torres, who was sitting in the front seat, White said. The driver was wearing a seat belt, "but an airbag wouldn't have helped her," White said.

"The Jaws of Life were used on both cars," he said. "Damage to both vehicles was tremendous."

A back seat passenger in the Walton vehicle, 18-year-old Shawna Faye Hickey, 401 S. Marshall St., escaped from the wreckage with only a broken hand. She was treated at Midland Memorial Hospital and released.

"I think it is unbelievable that little girl got out," White said. "That's really something. There just happened to be a little pocket there

where she was, with damage all around."

Jones was listed in satisfactory condition today at MMH. The front seat passenger in his vehicle, Jack Sarver, 50, of Humble, suffered facial and chest injuries and was listed in serious condition, spokeswoman Sue Ristom said.

Another passenger, 44-year-old Daniel Malaguid of Houston, suffered abdominal injuries and was also listed in serious condition. A third passenger in the Marquis, Antonio Fernandez, 45, of Houston was treated for lacerations at MMH and released, Ms. Ristom said.

A reconstruction team from the police traffic division was set to return today to the scene of the fatal accident, White said.

"They will measure at the scene and try to create as exact a picture of what happened as possible," he said.

## Psychiatric tests ordered for Bakker

CHARLOTTE, N.C. (AP) — PTL founder Jim Bakker was ordered to undergo psychiatric testing at a federal corrections facility today to see if he is competent to continue his trial on fraud and conspiracy charges.

U.S. District Judge Robert Potter ordered Bakker's trial suspended in its fourth day after a psychiatrist testified in a brief hearing that Bakker suffered hallucinations and was covering in his attorney's office this morning.

"He was lying in the corner of his attorney's office with his head under a couch, hiding," Dr. Basil Jackson testified in the brief competency hearing out of the jury's presence.

"He was expressing thoughts that someone was going to hurt him."

Jackson, who has been treating Bakker for nine months, said Bakker suffered hallucinations after breaking down Wednesday when a witness collapsed while being cross-examined.

"Mr. Bakker reported that when he left the courthouse, suddenly people outside took on the form of frightening animals which he felt were intent on destroying him, attacking him and hurting him," Jackson said.

Jackson, who sat behind the defense table during jury selection last week but has not been present for the trial, said he had not completed a

formal diagnosis. But he said his initial diagnosis was that Bakker suffers from "acute depression and confusional reaction with episode decomposition in which he loses the ability to adequately judge and relate to reality."

Jackson asked that Bakker, who was not in the courtroom, be sent to an unidentified private hospital in North Carolina, but Potter instead ordered marshals to deliver Bakker to the Federal Correctional Facility in Butner.

Jackson, a clinical psychologist from Milwaukee, said Bakker was not capable of appearing in court.

## WEATHER SUMMARY

The Accu-Weather® forecast for 8 a.m. Friday, September 1.

## Mostly clear skies anticipated

From Staff and Wire Reports

Mostly clear skies and a less than 20 percent chance of thunderstorms are in the forecast for tonight, according to the National Weather Service at Midland International Airport. The low will be near 70 and winds will be from the southwest at 5-15 mph.

Friday is expected to be mostly sunny with the high in the middle 90s and winds shifting to the south at 10-15 mph.

Wednesday's high of 97 was eight degrees cooler than the record high of 105 set for that date in 1954. The overnight low of 68 was 12 degrees warmer than the record low of 56 set for this date in 1944.

## STATE

There is a slight chance of thunderstorms over West Texas and along the coast, but a high pressure ridge is expected to keep skies clear and temperatures warm across most of the state for the first part of the Labor Day holiday weekend.

Forecasts called for a chance of thunderstorms over West Texas, the coast, Northeast Texas and extreme North Texas through tonight. The rest of the state will have clear to partly cloudy skies.

Lows tonight will be mostly in the 70s, ranging from the lower 60s in the mountains of Southwest Texas to around 80 along the coast.

A few isolated to widely scattered showers were reported early today in extreme West Texas and along the lower Texas coast, but expanding high pressure aloft kept skies over of the state clear to partly cloudy.

Early morning temperatures were mostly in the 70s, ranging from the 60s in the Panhandle, extreme West Texas and the mountains of the Trans-Pecos to the 80s in extreme South Texas. Extremes ranged from 63 at Guadalupe Pass to 85 at Corpus Christi.

## NATION

Thunderstorms unleashed torrential rains and hail from eastern Montana to northern Minnesota, while scattered showers also doused parts of the Southeast and Southwest.

Rain was continuing to fall today in several northern states.

In Minnesota, street flooding was reported at Moose Lake, where 9 inches of rain fell in the six hours ended at 3:30 a.m. EDT.

Several areas in North Dakota were pelted with hail the size of golfballs, and an inch of rain fell in 15 minutes near Fargo.

There were scattered showers and thunderstorms across southern New Mexico Wednesday evening, and lightning caused problems with some electrical transformers. Truth or Consequences received just under an inch of rain.

Scattered showers and thunderstorms also were along the southern Atlantic Coast, and a few showers were in the Kansas City, Mo., area. Charleston, S.C., recorded 1 1/4 inches of rain in the six hours ended at 2 a.m. EDT.

Dense fog formed this morning in parts of the Tennessee Valley. Visibility dropped to a few hundred feet or less at Crossville, Tenn.

## Midland statistics

**FORECAST**  
Tonight: Mostly clear, less than a 20 percent chance of thunderstorms, low near 70, southeast winds 5-15 mph. Friday: Mostly sunny, high in the middle 90s, southerly winds 10-15 mph.

**NATIONAL WEATHER SERVICE READINGS**

OTTAWA (AP)—A natural gas explosion today destroyed part of a three-story apartment building in downtown Ottawa.

Canadian Press said there were unconfirmed reports that the blast

## Do tougher anti-drug laws work?

**EDITOR'S NOTE:** President Bush next Tuesday announces a new national anti-drug plan, the latest counterattack against the surge of cocaine in U.S. society. Here is a survey of how state and federal laws have been thrown into the fight in recent years.

By MITCHELL LANDSBERG  
Associated Press Writer

Penalties against drug use in the United States have escalated dramatically since crack began infiltrating the nation's cities about five years ago.

During that time, Congress and nearly every legislature have overhauled drug laws to make them stronger, more consistent and—in a few cases—more creative.

All signs suggest that the tougher laws have been enough to discourage drug abuse from spreading, but there's little doubt that those who are caught are paying a higher price.

■ In Tallahassee, Fla., recently, a 30-year-old man was sentenced to life in prison without parole for dealing crack. It was his first conviction.

■ In Indianapolis, a 28-year-old co-

caine dealer was forbidden to marry or father children for four years.

■ Under a new law in Washington state, drug dealers can lose their homes and be banned from returning to their neighborhoods.

Statistics on convictions and sentences for drug crimes are scarce, but those that exist suggest that more people are going to prison for drug crimes than ever before.

In New York state, for instance, the number of people serving time for drug crimes has risen more than 400 percent during the past seven years.

Federal drug convictions jumped 161 percent during the 1980s, and the percentage of federal inmates serving time for drug crimes has more than doubled.

About half the inmates in federal prisons today were convicted of drug crimes, and by 1995 the Bureau of Prisons expects seven of every 10 to be a drug criminal. That's in addition to the high percentage of convicts who were under the influence of drugs when they committed non-drug crimes such as murder.

A decade ago, drug laws appeared to be in remission. The recreational

drug use that had become popular during the late 1960s had fostered a new sense of permissiveness.

Marijuana was decriminalized in some states, and laws against it went unenforced in others. Strong laws against cocaine, heroin and methamphetamine remained in place, but the judicial system was less eager than it once was to enforce them.

Crack, the highly addictive form of cocaine, ended that. It appeared on the scene just as public concern over cocaine use seemed to be reaching a peak, and pushed concern into panic. Lawmakers responded with much tougher laws.

Although the goal was a drug-free America, the only certain result so far has been overcrowded prisons and overburdened courts. But even critics acknowledge that courts have become less hospitable places for drug users and dealers than they were a few years ago.

"The laws have gotten tougher," said Hubert Williams, the former police chief of Newark, N.J., who now heads the Police Foundation in Washington. "They are good and strong and effective for our purposes."

The federal government has been a leader in the crackdown, with Congress passing anti-drug bills in 1984, 1986 and 1988. The laws established mandatory prison terms and fixed sentences for drug offenders, taking much of the sentencing discretion from judges.

Similar laws have been passed by most states, and some have gone much further.

"That's been the major outcry in the last decade—'Let's get tough on the manufacturers and sellers.' And now it's, 'Let's get tough on the users, too,'" said Bob Frohling, who follows drug issues for the National Conference of State Legislatures.

During the past few years, Frohling said, virtually every state has raised the penalties for drug crimes that occur in or around schools. More than half have established stronger penalties for crack than for plain cocaine. Some have extended the death penalty to include murders committed during drug transactions.

In the most recent wave of legislation, about two-thirds of the states have enacted laws allowing the seizure of drug dealers' property.

## DRUGS

(Continued from Page 1A)

That money comes from a discretionary fund available for fiscal 1990, which ends Sept. 30. The strategy covers fiscal 1990.

Although Bush met with his top lieutenants in the drug war Tuesday at his vacation home in Kennebunkport, Maine, to discuss the strategy, the focus of the meeting was Colombia, sources said Wednesday.

"The fundamental issues of the strategy... did not change," a third source said, noting that the final strategy had gone to the printer before the meeting occurred.

Colombia has been wracked with violence since President Virgilio Barco imposed emergency regulations allowing the immediate resumption of extraditions of alleged drug traffickers to the United States. The move came after the Aug. 18 assassination of a leading presidential candidate who was an outspoken foe of drug traffickers.

Colombian Justice Minister Monica de Greiff met for about 40 minutes Wednesday with Bennett, said Bennett spokesman Don Hamilton, who declined to say what Bush's final drug strategy provides for Colombia.

Mrs. de Greiff asked on Tuesday for \$19 million in aid for judicial protection. The United States has so far pledged \$25 million.

The crackdown on drug users called for in the strategy will start

early, with a program allowing judges to strip student loans and other federal benefits from drug offenders expected to begin Friday.

The program, required by the Anti-Drug Abuse Act of 1988, won't affect welfare, disability or Social Security benefits.

The decision to drop the plan for the National Drug Intelligence Center stemmed from Justice Department objections after the Treasury Department proposed combining it with a new money-laundering intelligence center, a source said.

The draft also had called for a 49 percent increase in treatment funds, \$925 million in 1990 compared with \$621 million in the current budget, as well as \$1.2 billion for new prisons, a 28 percent increase.

The draft sought 10 percent reductions in drug use in two years and a 50 percent reduction in a decade. It called for the same reductions in supply, as represented by estimates of illicit drugs coming into the country and estimates derived from reports of the ease of obtaining drugs.

It also focused on the street crime of the inner city spawned by the drug trade and the insidious nature of crack, the highly addictive, smokeable form of cocaine. The draft called for increasing justice assistance grants to states and cities from \$150 million to \$350 million.

Copies of the draft strategy were leaked to the media shortly after it was produced in late July.

## Colombia &amp; Drugs

AT-A-GLANCE

## The Medellin Cocaine Cartel

Medellin is the hometown for the world's biggest drug organization that reportedly is responsible for 80% of the cocaine sent to the U.S. The government has conducted raids on suspected drug dealers homes. According to police, the cartels have set off several bombs in the city in retaliation.

## The United States

The U.S. has pledged \$65 million in military aid and another \$5 million to protect the judges. Colombia has said that drug traffickers wanted in the U.S. would be extradited.

## The Country

Colombia is about the size of Texas and New Mexico combined with a total population of about 31.8 million people. Population of major cities: Bogota: 3,967,000, Medellin: 1,664,000, Cali: 1,450,000, Barranquilla: 924,000

## The Drugs

Colombia's major role is in the refining of the coca leaves from other countries like Peru and Bolivia. This is mostly done throughout the vast expanses of the remote Plains and Amazon regions in the southeast, areas accessible only by air or slow moving river transport.

## COLOMBIA

(Continued from Page 1A)

Leftist guerrillas seeking to topple the government have generally been inactive during the recent war with drug lords, but new political violence broke out on Wednesday.

Six insurgents of the National Liberation Army were killed and one soldier was wounded in a battle Wednesday in the state of Cesar, the Bogota morning daily El Tiempo said.

Two policemen also were killed in a guerrilla ambush in the northeast state of Arauca, El Tiempo said, quoting police in Arauca.

Meanwhile, 12 bodies were found in a shallow grave in the state of Cordoba, El Tiempo said. One of the victims reportedly was identified as a veterinarian kidnapped several months ago by leftist rebels.

Leftist guerrillas also executed 10 of their own ranks, apparently for suspicion of being traitors, El Tiempo said, quoting sources with the army's 2nd Division in the north.

## PARTY

(Continued from Page 1A)

The tournament continues all day Saturday and Sunday, before concluding Monday with championship game action at 1 p.m.

First-round pairings will be set during a manager's meeting at noon Friday at the Holiday Inn Country Villa.

Stanley's and Coors are the host teams, but two other local teams are also in the tournament—Low Buck and Lupe's Day Care.

Midland Softball Association officials are expecting 47 teams in this year's tournament, down from more than 80 last year in Savannah, Ga. and from 67 two years ago in Midland.

The Regional Off-Road 10th Scale Remote Control Car Championship, featuring 350 drivers from five

ern state of Sucre. In Medellin, a police force of 4,000 was on full alert and 18 special anti-terrorist units were stationed throughout the city.

"Everything has started with no major inconveniences. People rushed to their homes shortly before the curfew time began and now the city is quiet," a spokesman at the Medellin Police Office said by telephone Wednesday night.

He said a fragmentation grenade exploded in a country club but caused only minor damage.

Interior Minister Orlando Vasquez Velazquez said the government would extend the curfew, the first in Colombia in 18 years, "wherever it is required to prevent terrorism."

The U.S. Embassy gave no reason for ordering the dependents of its staff to leave, but it was clearly related to the Colombian campaign against drug traffickers and plans to extradite some suspects to the United States.

southwestern states, will get underway at 5:30 a.m. Saturday and continue through 9 p.m. Sunday.

The miniature stock car competition will kick off Saturday with three qualifying races and a final race. On Sunday the modified vehicles will compete in three qualifying races followed by the final.

The track is located about one quarter of a mile west of Midland Drive on Sinclair Avenue.

Earl Erdmann, one of 200 members of the Midland club, said competitors representing the states of Oklahoma, New Mexico, Texas, Arkansas and Louisiana are being assisted by local Boy Scouts, the Midland Chamber of Commerce and the city of Midland.

There is no charge for admission to the event.

## WORLD

## Israelis debate close relationship between officers, arms merchants

By NICOLAS B. TATRO

JERUSALEM (AP) — The cozy relationship between private arms sellers and the Defense Ministry is at the heart of a debate over the need for controls on arms merchants and Israeli officers who reportedly trained hitmen for Colombian drug lords.

"Israel is a small country. Everybody who was a colonel or brigadier general in the army has very intimate contacts with the defense establishment," said Ehud Olmert, minister of Arab affairs in the Cabinet and a right-wing Likud bloc member.

"The question is, what is the involvement of the defense ministry? It is one of the questions that will be investigated," Olmert said.

The left-leaning daily Davar newspaper in an editorial said it was "inconceivable that the security establishment didn't know what was going on in Colombia."

Defense Minister Yitzhak Rabin, however, told reporters the ministry did not learn of the training until April when it issued a written warning to the company involved.

"There are those who are not obeying the law. But I believe the number of people who have not obeyed the law ... is very, very limited. Israeli mercenaries are basically non-existent," Rabin said.

Prime Minister Yitzhak Shamir, once a senior official in the Mossad intelligence service, promised a thorough investigation but expressed skepticism about whether Israelis knowingly helped drug gangs.

"I know our officers, and I cannot believe that they would have been

involved in such crimes," Shamir said.

Conservatives in Parliament's Law Committee blocked a move by liberals to tighten existing controls that make it a crime punishable by six months in jail for a reservist to sell weapons or give training without authorization.

Urging more control, Labor Party lawmaker David Libai said on Israeli radio: "It cannot be that we train people to kill in the army for the sake of our country, and that later people use it for their own personal profit without any control."

However, Eli Landau, mayor of the Tel Aviv suburb Herzlia, defended the reservists accused of helping drug kingpins. "With a wave of their hands, they forgot the 20 years in which you and your friends risked your lives for us all," he wrote in an ad in Israeli newspapers.

Industry Minister Ariel Sharon, former defense minister and general, criticized the debate over the Colombian affair.

"There is certainly not one man among us who would want to see Israelis linked to drug deals. But nothing has been proven. Nobody has been tried. We with our own hands are turning Israel into the one responsible for drugs in Colombia," Sharon said today.

"We are talking about our army officers. We are talking about people who risked their lives for years, who served the army's best units. What has been proven about them to this day is that they are first-rate fighters. Nothing else," Sharon added.

The close-knit nature of the relationship between officialdom and private arms merchants shows up in

the "Israel Defense Sales Directory." The ministry's annual catalog lists government arms makers side-by-side with private companies that arrange sales of weapons or services.

Among the companies is Hod Ha-Hanit (Spearhead), which describes itself as "specializing in fighting terrorism by establishing and training anti-terror units, internal security and intelligence forces ... presidential guard units and VIP security."

The company is headed by reserve Lt. Col. Yair Klein, who associates say was once an instructor in a parachute course headed by Dan Shomron, now Israel's chief of staff.

Former commander of an elite anti-terror unit, Klein is the focus of a police probe of the Colombia affair in which six former officers have been questioned so far.

At one point, Klein threatened to blow the whistle on other high-ranking officers and at least one member of parliament who he suggested were involved in unauthorized arms dealings in Latin America.

Two right-wing members of parliament, Yehoshua Saguy and Rehavam Zeevi, said they had been in Colombia on arms-related business but only with government authorization.

Voram Perry, a military historian and journalist, said in an interview that the Colombia affair was an outgrowth of too close a relationship between those still in uniform and their retired army buddies.

"The crux of the issue is the social relationship between those who are now in power and those who do a job overseas. They are friends. They say, 'I know this guy. He's not going to deal in something to do with narcotics.' So they believe there is no need to formalize ways of control."

## Some U.S. citizens, edgy about threats of violence, leave Colombia

By KEVIN NOBLET

BOGOTA, Colombia (AP) — Americans in Colombia are edgy about the drug traffickers' retaliatory campaign against the government but few say they sense any imminent personal danger.

Nonetheless, some are packing their bags.

"I love Colombia, but I just can't live here right now," Martha Reyes, who has lived in the country 18 years, said Wednesday in a telephone interview.

She said other factors contributed to her decision to leave next week with her three daughters, but that the latest wave of violence "just topped it off."

The U.S. State Department Wednesday recommended that Americans in Colombia leave the country to avoid being caught up in the violence. The U.S. Embassy ordered the evacuation of all embassy dependents, apparently for fear of becoming the targets of the ruthless cocaine cartels.

Traffickers are lashing out because of a government anti-narcotics offensive that has included a nationwide manhunt and the confiscation of more than \$200 million in drug barons' property.

Part of the campaign, sparked by the Aug. 18 assassination of popular presidential candidate Sen. Luis Carlos Galan, included renewal of an extradition treaty with the United States. Traffickers are known to greatly fear extradition to the United States.

Mrs. Reyes, married to a Colombian, said she planned to spend a year in the United States with her daughters. Her husband, an economist with a private company in Bogota, plans to stay behind for now but will look into job possibilities in the States, she said.

She said she felt no direct threat, but admitted the tension of Colombia "gets really tiring."

A change of scene would also be welcome, she said.

"I'd like to see something different for a year," Mrs. Reyes said. "Who

knows? I may be back in a year. It may be too quiet for me over there."

At Bogota's American School, summer vacation ended Tuesday. On the first day of classes, all students were assembled and the headmaster told them to assure their parents special security measures were being taken.

One teacher said the measures included constant contact between the school, the U.S. Embassy and the Bogota mayor's office; strict measures to keep unauthorized people off

campus and checks on any cars parked on the school's perimeter. The school has always employed guards and watchmen.

"The teachers are all there working with confidence and calm and without fear," she said, asking not to be identified by name. "We don't feel any particular threat to Americans."

"On the other hand, there aren't many of us left," she added. Of the school's 1,400 students, less than 10 percent are U.S. citizens, she noted.

One person was killed and 27 were injured when two trains collided head-on early Wednesday in Bregenz, Austria.

## Austrian trains collide, killing one, injuring 27

VIENNA, Austria (AP) — A passenger train that switched to the wrong track collided head-on with another train Wednesday, killing one person and injuring at least 27 others, a railway official said.

Three cars derailed when the two trains crashed while traveling at a low rate of speed between Voralberg province's capital of Bregenz and the small town of Wolfurt, the railway official said.

Killed was Alfred Rainer Heller, 48, of West Germany. Rescuers found his body in the wreckage about two hours after the crash.

Sixteen people, including both train drivers, were hospitalized, and 11 other people were treated for minor injuries, the rail official said.

The injured included Austrian, West German and Swiss passengers, as well as two Japanese, the official said.

He said human error was probably to blame for the accident because one of the trains, an express traveling from Bregenz to Vienna, was switched onto the same track as the other train.

There were 72 passengers on the Bregenz-Vienna train and 75 on the other train, an express from Munich and Zurich, the spokesman said.

The crash occurred very close to the site of a train accident a year earlier in which five people were killed and 46 injured.

## Austria asked to transfer East Germans to West

VIENNA, Austria (AP) — West Germany asked the Austrian railroad today to begin preparing for the mass transfer of thousands of East German refugees in Hungary who are awaiting resettlement in the West, rail officials said.

One official, speaking on condition of anonymity, said the request to make an unspecified number of railway cars available for Sept. 6 came from officials in Bonn, the West German capital.

Another railway official said Sept. 6 was only one of several possible dates for such a mass movement of East Germans, and "I personally expect this to happen before that."

Thousands of East Germans have fled into Hungary since May, when that Communist country, which is experimenting with Western-style reforms, dismantled much of its border fortifications with Austria.

The border flood has created friction between the relatively liberal government in Hungary and hard-line leaders in Warsaw Pact neighbor East Germany. Many refugees say they are fleeing East Germany's stagnant economy.

An Austrian government source on Wednesday said at least 1,500 East Germans would be allowed to leave Hungary under a plan being drawn up by the International Red Cross.

But the second rail official, who also asked to remain anonymous, said German Federal Railways officials told the Austrians to prepare for between 15,000-20,000 East German refugees, adding, "This number is fairly official."

The rail official said Austrian Railways had promised the West German Embassy in Vienna to have 50 rail cars available within six hours at an unspecified border point with Hungary.

Neither Austrian railway officials nor their Hungarian counterparts had been asked to move East German refugees directly from Budapest, he said.

Asked how they would cross the border, the official speculated that they would either cross on foot or ride vans or buses.

## Chad, Libya sign peace accord to end fighting over desert strip

ALGIERS, Algeria (AP) — Chad and Libya signed a peace accord today that calls for an end to fighting over a disputed strip of desert that has been the focus of 16 years of bloodshed, diplomats said.

The agreement was signed in Algiers by Chadian Foreign Minister Achelkhech Oumar and his Libyan counterpart, Djadallah Azouzi Talhi.

Also at the signing was Algerian Foreign Minister Boualem Bessaïeh, who helped mediate the agreement. Details of the accord were worked out Aug. 21-25 in meetings outside Paris, the French foreign ministry in Paris confirmed.

The agreement calls for the parties to try to resolve their dispute through a political settlement within a year.

If that fails, they are to take the issue to the International Court of Justice in The Hague to rule on who holds sovereignty over the Aozou

strip, a 45,000-square-mile band of mineral-rich desert between the two countries.

According to the Chadian Embassy in Paris, which issued a copy of the accord, Chad and Libya agreed to:

- The withdrawal of all forces from the disputed region, leaving it under the administration of a group of African observers until the court renders its decision.
- The release of all prisoners of war held by both sides.
- The halting of all hostilities.
- The signing of a treaty of friendship.

Chad holds about 2,000 Libyan prisoners, while most of the Chadians held by Tripoli have been released.

The accord was signed one day before Libya celebrates the 20th anniversary of Col. Moammar Gadhafi's rule.

## China denies secret executions, mass arrests

BEIJING (AP) — China today denied Amnesty International's charges that authorities carried out secret executions and mass arrests following the military crackdown in June.

Foreign Ministry spokesman Li Zhaoxing, at a weekly briefing, also said U.S. sanctions had "infringed upon China's dignity" and that the United States must be held responsible for deteriorating ties between the countries.

Also today, the official press reported that the government is tightening control of the economy and cracking down on profiteering in scarce materials and income tax evasion.

Li said claims by Amnesty International that a "wave of repression" in China followed the June 3-4 military attack on student-led protesters in

Beijing "are entirely ungrounded and unreasonable."

He said that during the attack "an extremely small number of people used terrorist means and took violent actions in an attempt to overthrow the legitimate government. ... That the Chinese government according to law arrested those criminals and sentenced them to imprisonment is entirely legitimate and justified."

"No country or organization has the right to interfere in an issue that is purely another country's internal affair," Li said.

Amnesty said Wednesday it had sent Premier Li Peng a telex message urging the Chinese government to "stop using judicial killing as a political tool" and to release all "prisoners of conscience."

A statement released by the hu-

man rights group's headquarters in London said at least 1,000 people were killed in the military attack on Beijing.

The government has said about 200 died in the crackdown.

The statement added: "There was strong evidence that the authorities had taken a deliberate decision after the army massacres in early June to carry out secret executions but also to publicize certain death sentences in order to cow political opposition."

The report said the number of people arrested as a result of the protests may be much higher than the official figure of 4,000.

Asked whether China has any political prisoners, Foreign Ministry spokesman Li replied: "The Chinese government always attaches importance to human rights and protection of civil rights according to law."

There's no such thing as political persecution in China and therefore there is no such thing accordingly as political prisoners."

China says students and other pro-democracy activists who have been arrested were guilty of counterrevolutionary crimes.

Li said current tensions between China and the United States "have been caused by the deep involvement of the United States in China's internal affairs and by its taking the lead to impose sanctions against China which damaged China's interests and infringed upon China's dignity."

He said any improvement in bilateral relations "depends on the policies and actions of the United States."

Following the military crackdown, Washington stopped arms sales and other military exchanges with China.

Leah Tutu, center, wife of Anglican Archbishop Desmond Tutu, emerges from a Methodist church hall in Cape Town Wednesday to lead a United Women's Congress march to the British Embassy. More than 200 women were arrested during the march.

## Anti-apartheid activists continue defiance

JOHANNESBURG, South Africa (AP) — Despite a government crackdown, defiant anti-apartheid activists today confronted riot police at a university, announced nationwide protests against next week's elections, and called for a four-week consumer boycott.

Police raided the office of the largest black labor federation and confirmed the detention of numerous activists linked to the month-old national defiance campaign.

Acting President F.W. de Klerk said police arrested nine guerrillas who planned violent disruptions of the Sept. 6 parliamentary elections, which exclude blacks.

In Johannesburg, police banned a defiance rally at the University of the Witwatersrand, then fired repeated volleys of tear gas and rubber

### ■ Related stories, Page 2D

bullets at hundreds of students who reassembled each time they were dispersed. A dean said at least five youths were arrested, and police were seen charging through campus buildings in search of protesters.

An estimated 5,000 mixed-race high school students in the city boycotted classes to protest the elections.

Police searched the Johannesburg home and office of Jay Naidoo, general secretary of the militant Congress of South African Trade Unions, and later arrested about 10 members of the labor federation who protested the raids.

In Cape Town, about 25 black

squatters were arrested outside a government office where they were demanding improved services and an end to evictions.

In Durban, police detained five activists involved in planning a week-end protest by blacks on a whites-only beach. One of them, Curtick Ndlovu, is a senior official of the banned United Democratic Front.

The front, the trade union congress, and other major anti-apartheid organizations announced that national protests against the election would take place Tuesday and Wednesday. Emergency regulations prohibit calls for general strikes, but previous national protests have taken that form.

The groups also call for a month-long consumer boycott starting a week after the elections.

De Klerk, in a speech at a police college, said nine guerrillas of the African National Congress and 10 collaborators had been arrested in the past week. He said police seized a "big quantity" of Soviet-made mines, rifles and hand grenades which allegedly were to be used in terrorist attacks to disrupt the election.

A police spokesman, Gen. Herman Stadler, said "quite a number" of political activists had been detained without charge in the past two days, but he gave no details.

A Law and Order Ministry official, Brig. Leon Mellet, said the crackdown was aimed at activists who threatened public safety or planned to disrupt the elections, as well as former detainees who have defied restrictions imposed when they were released.

## WORLD IN BRIEF

### Israeli tax collector dies; Youths' killings backed

JERUSALEM (AP) — An Israeli tax collector died today of injuries suffered in a firebomb attack by Palestinian assailants in the occupied West Bank, a hospital spokeswoman said.

Industry Minister Ariel Sharon, meanwhile, suggested Israel consider legalizing the killing of masked Palestinians without checking whether they are armed. He said the masked youths are the ringleaders behind slayings in the 20-month-old uprising.

In another development, Arab reports said a Palestinian teen-ager died of wounds suffered in a clash four days ago with soldiers in the occupied Gaza Strip.

In the West Bank city of Nablus, the body of a 28-year-old Palestinian was found in a pushcart with stab wounds, Israel radio and Arab reports said.

The man, whose name was not given, was believed to have been slain as a suspected collaborator with the Israeli authorities, raising the number of such Arab deaths in the uprising to 101. The army said it was investigating the circumstances of the slaying.

An army spokesman said the military was investigating a possible link between a stoning attack in the Gaza two weeks ago and the death of a reservist soldier at his home on Wednesday.

In northern Israel, a Soviet-made Katyusha rocket fired from south-

ern Lebanon slammed into a home on Wednesday night, breaking most of its windows but causing no injury, the army said.

Northern Commander Gen. Yossi Peled said the attack appeared to be the work of the pro-Iranian Shiite Moslem movement Hezbollah, or Party of God. He said Israel would retaliate if the attacks continued.

### Beirut forces battling

BEIRUT, Lebanon (AP) — Syrian and Christian forces battled with artillery and tanks around Beirut today, killing two people and wounding 16, police said.

A pro-Iranian Moslem cleric was quoted as calling for the kidnapping of Pope John Paul II if the pontiff visits the beleaguered Christians.

The casualties raised the toll since March to at least 807 killed and 2,334 wounded. More than 90 percent of Beirut's 1.5 million population has fled the ravaged city since the latest round of fighting began.

Sheik Said Shaaban, leader of Lebanon's Sunni Moslem fundamentalists, was quoted as saying in Beirut's Ad-Diyar daily that Moslem zealots also should kidnap President Bush and French President Francois Mitterrand to halt alleged French aid to the Christians.

"If the pope comes to Lebanon and we manage to hold him for the sake of salvaging Palestine, I wouldn't be against such an act," said Shaaban, the only Sunni cleric in Lebanon to support Shiite Moslem Iran, Syria's

ally.

Shiite fanatics carried out suicide bombings against U.S., French and Israeli forces in Lebanon between 1983 and 1985, killing hundreds of servicemen, and have kidnapped scores of Westerners.

The pope said Aug. 19 that he intended to visit Lebanon to help end the country's 14-year-old civil war. The Vatican has said the final decision on a trip depends on security in Beirut.

### Honecker's surgery halted

BONN, West Germany (AP) — East German leader Erich Honecker underwent gall bladder surgery but doctors had to halt the operation because of the condition of the organ had deteriorated, West German security sources said Wednesday.

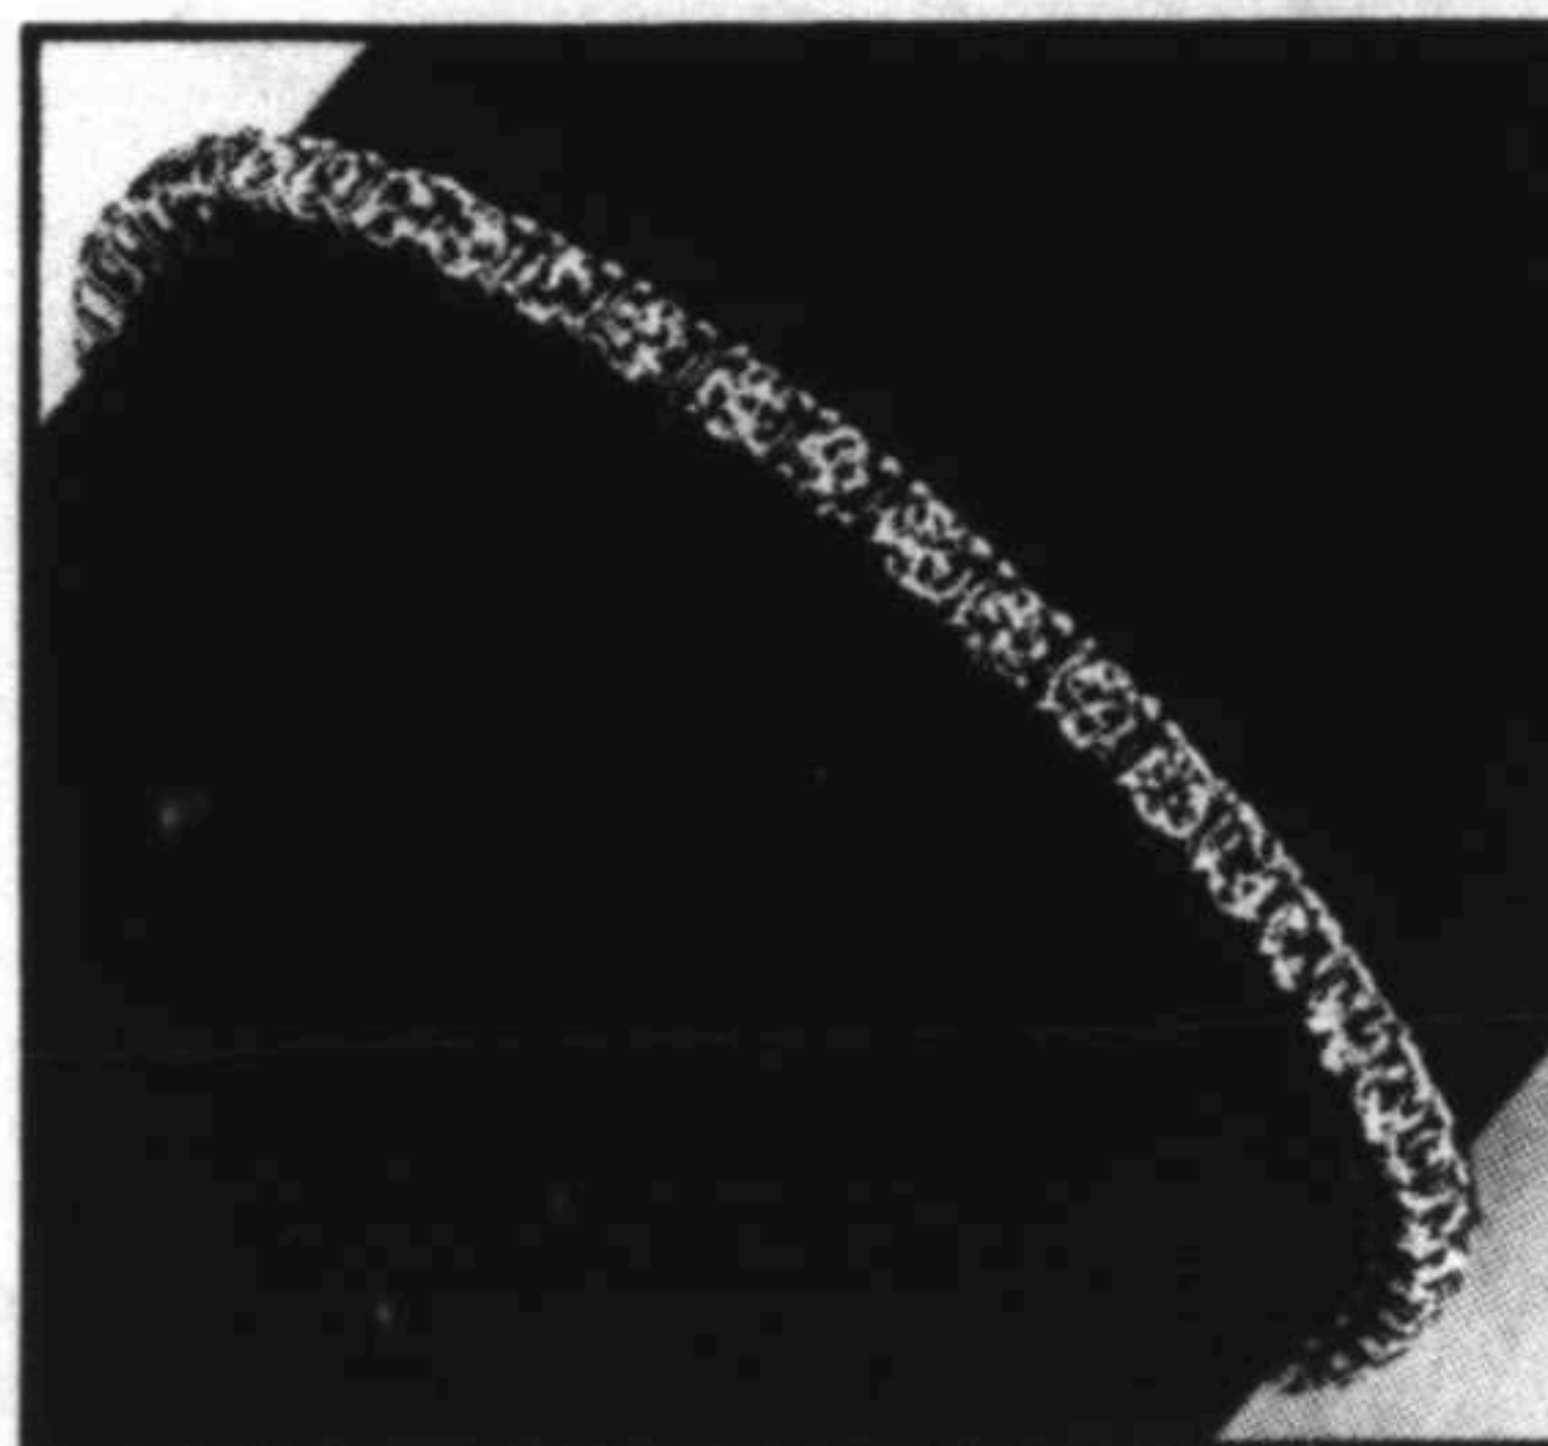

East Germany denied the reports about Honecker, 77. A Foreign Ministry spokesman in East Berlin, speaking on condition of anonymity, said he was "progressing toward recovery."

Honecker was reported to have undergone a gall bladder operation two weeks ago. The East German government said on Aug. 24 he was "continuing on the road to recovery."

But the Hessischer Rundfunk radio Wednesday said the West German government has received intelligence information indicating Honecker's condition is more serious than official East German reports suggest.

## Diabetes riddle stumps U.S., Mexican researchers

Hearst News Service

SAN ANTONIO — Mexico City residents apparently have a 50 percent lower rate of diabetes than Mexican-Americans of similar backgrounds do in San Antonio, a riddle that has led to a study involving Texan and Mexican researchers.

Unraveling the phenomenon may help researchers discover what dietary or other lifestyle factors trigger development of the chronic disease.

The result could mean more effective prevention programs with the potential of reducing devastating damage and high medical costs of diabetes in Mexico and San Antonio, researchers said.

"Diabetes in Mexico, as it is in most of the world, is a major killer," says Dr. Clicerio Gonzalez, a specialist in hormone-related disorders and a staff physician at ABC Hospital in Mexico City. He is director of the Mexico City Diabetes Study.

"Most of the beds in the hospitals in the specialized units are occupied by patients with diabetes or diabetes-related diseases," Gonzalez said last Friday. "It seems like now the problem is at the level of an epidemic."

Gonzalez and fellow researcher Joel Rodriguez, a professor of disease trends at the Universidad Nacional Autonoma de Mexico in Mexico City, were in San Antonio to complete a computer link with researchers here and in Mexico.

A preliminary study during the past two years by the Mexican doctors showed nearly 10 percent of Mexico City residents of lower socio-economic status had the blood-sugar disorder, which can lead to blindness, kidney failure, amputations and nerve damage.

But in San Antonio, 15 percent of Mexican-Americans from similar backgrounds had diabetes, said Dr. Michael P. Stern, chairman of the study of disease trends at the University of Texas health science center in San Antonio.

The differences appeared to be occurring, Stern said, despite strong similarities among Mexico City residents and San Antonio Mexican-Americans in their genetic predisposition to diabetes.

A key indicator of susceptibility to diabetes is Native American ancestry. Mexican-Americans living in lower-middle class neighborhoods in San Antonio are 40 percent to 45 percent Native American, Stern said. Among Mexico City residents the percentage is believed to be 50 percent or better.

Adding further mystery to the situation is that Mexico rates at the top of all nations for the consumption of sugar, and heavy sugar use has been suspected for many years to increase the likelihood of developing diabetes, Stern said.

## Ecuadoran boy to return home with new face

BROCKTON, Mass. (AP) — Taunts of "goat face" caused a 10-year-old boy to drop out of school in his Ecuador village, but he's returning to classes next month — with a new face.

Cesar Guachichulca was born with the left side of his face deformed as a result of a rare birth defect, Goldenhar's syndrome.

Recently, surgeons at Cardinal Cushing Hospital in Brockton corrected his deformed eye, ear and jaw, as well as the V-shaped patch of hair on his forehead that inspired his classmates' taunts.

"We have a saying among our people, 'Hope is the only thing you can't lose,'" the boy's father, Bolivar, said through an interpreter in Cesar's hospital room last week.

Then he began to cry and put his face down on a table.

"I believe in God and I kept hoping for a miracle. Happiness doesn't even say it. This is a miracle."

Cesar, who his father and doctors said is normally talkative and articulate, was subdued by the operation. Sitting in his room with bandages covering his swollen face, he pointed toward his father and said, "I look like my daddy now."

The boy's trip and surgery was sponsored in part by Por Cristo, a Brockton-based team of medical volunteers founded 10 years ago who have treated hundreds of children in Latin America. The Boston Red Sox baseball team also helped defray expenses.

Before he left Ecuador, Cesar spoke at length to reporters and thanked Por Cristo for "the opportunity they've given me to be a normal child."

AP Laserphoto

Cesar Guachichulca sits with his stuffed mouse as he waits for surgery to correct deformities in his face at Cardinal Cushing Hospital in Brockton, Mass., recently.

He had been the top student at his school in the mountain village of San

Pedro de la Bendita, but Cesar said he left "because the other children made fun of me." He will go back to the third grade next month.

Bolivar Guachichulca works seven days a week as a state public works employee, earning \$30 a month. He gets up at 4 a.m. every day to take a two-hour bus ride to his job site. He takes off one Sunday a month to spend with his wife and five sons, of whom Cesar is the eldest.

The couple at first blamed themselves for Cesar's condition, Guachichulca said. Their other sons have no facial deformities.

"The first question we had was why? Why did this happen to us? My wife was in tears at his birth," he said.

Some of the residents in the family's remote village thought Cesar's deformities were caused by the devil.

When Cesar was 2, his father brought him to doctors near their village.

"They told me there was nothing they could do," Guachichulca said. But he persisted for eight years to look for doctors who could help.

Cesar told reporters last month he wanted to be a priest. But now he says he will go back to Ecuador next month with new plans.

"I want to be a doctor now," he said. "I want to be able to help and operate on other children who have problems like I had."

# \$5 million reward for capture of drug kingpins considered

By KINGSBURY SMITH  
Hearst News Service

WASHINGTON — CIA Director William H. Webster says it might be worthwhile to explore the possibility of a private sector campaign to raise a large sum, perhaps \$5 million, which could be offered to anyone providing information that led to the apprehension and extradition to the United States of a Colombian drug kingpin.

President Bush has repeatedly urged that the public become more involved in helping to cope with the drug problem. When the question of the private sector, including foundations, making available funds for the capture of drug traffickers was put to Webster during an interview this week with editors and reporters of the Hearst Newspapers Washington bureau, he responded at first very cautiously.

During the course of his on-the-record comments, he said he thought such a reward could be "a useful tool" and was an "interesting idea."

## NATION

Following is the text of the Q-and-A on this subject with the CIA chief, a former FBI director who has been mentioned from time to time in the media as a possible choice of President Bush for a seat on the Supreme Court when a vacancy occurs:

Q: "Would you favor an offer by the private sector, including foundations and individuals, of a large sum, perhaps \$5 million, to anyone whose information led to the apprehension and extradition to the U.S. of a Colombian drug kingpin?"

A: "In the past — and I'm drawing on my experience at the bureau (FBI) — rewards were looked at very carefully. Whether it was time for a reward or not time for a reward."

"I overgeneralize, but I think re-

wards were not the first thing you offer because they tended to stimulate a great many leads, most of which were going to take up a lot of manpower and not be productive. When you had run your normal investigative leads and were struggling, a reward could be useful.

"Rewards offered by the public, public foundation type of thing, probably ought to stay in the private domain, in the private sector, and not be administered by the government."

"There have been a number of organizations, Crime Stoppers (for instance), where they raise money and offer rewards for information that is given anonymously, often to a newspaper, radio station or some other

place and then it's passed along to a law enforcement authority to use or not to use. I think that has a good track record on conventional crimes.

"When we talk about rewards, we have to distinguish between bounty hunting and information. There are risks to bounty hunters getting involved and getting in the way of those who are actually assigned professionally with the responsibility. So you have to be careful about that."

"I think it's an interesting idea and one that ought to be pursued with Bill Bennett (director of the Office of National Drug Control Policy) in terms of analyzing its place, in terms of intelligence, gathering information outside the United States about drug activity. We are, of course, in a position, budgeted to pay for information that is useful and helpful, and we do and will continue to do that."

Q: "Can you go as high as something like \$5 million?"

A: "I don't remember our having gone that high. I think some questions have to be asked at the policy level whether you're asking for in-

formation that leads to the apprehension and extradition (of a suspected drug trafficker) or on a dead-or-alive basis because that raises the question of whether we're going to modify our policy."

Q: "Maybe some of these fellows in Colombia involved in the drug business would be intrigued by getting \$5 million if they were able to give you information as to where the individual could be apprehended, and the payment would be made only if the kingpin was apprehended and extradited."

A: "I think it could be a useful tool. There are some legal issues involved, like appropriation enhancement, things that have to be worked out if the government gets involved in it. If it's handled through private channels, the only thing that you would have to deal with is whether it stimulates a lot of poor information that detracts from the effort to focus our investigative resources and intelligence resources."

Meanwhile, Attorney General Dick Thornburgh announced Tuesday that a "Dozen Most Wanted List" of

Colombian drug traffickers the United States wants to extradite to stand trial in this country was being given to the Bogota government. Although Colombia drug rings are considered responsible for 80 percent of the cocaine smuggled into the United States, the Colombian government has been unable to apprehend any kingpins because of the war of terrorism they are waging on the government and judicial system.

If a \$5 million offer were made for apprehension and extradition of a kingpin, the money would probably be placed in a Swiss bank and released to the informant only after the drug smuggling leader had been extradited to the United States.

Asked about the idea of a private sector reward, Bennett spokesman Donald Hamilton said, "We'd have to study that. I have not heard that discussed and don't have any immediate reaction to it. Stay tuned."

Hamilton noted that the Post Office, Customs Service and State Department have programs offering rewards for information.

Leona Helmsley is surrounded by members of her staff as a bodyguard waves a sweater to clear the way Wednesday in New York as they leave federal court. Helmsley was convicted of tax evasion.

## Helmsley acquitted on extortion charge

NEW YORK (AP) — Leona Helmsley, the queen of a \$5 billion empire who stood accused of even billing \$8 worth of underwear as a business expense, showed no emotion upon her conviction of evading \$1.2 million in federal income taxes.

After Wednesday's verdict, juror Michael Clark said the jury decided to acquit Mrs. Helmsley of the most serious charge, conspiracy to commit extortion, because they were unclear on what constituted extortion. "A lot of the people thought that you had to get your legs broken to get extorted and this sounded mild," Clark said. "There were a number of jurors who felt very uncomfortable with the definition."

The charge, which carried a 20-year sentence, alleged that the 69-year-old Mrs. Helmsley and her aide, Frank Turco, conspired to extort payoffs and goods from vendors doing business with the Helmsley organization — which has far-flung real estate holdings, including some of New York's most luxurious hotels.

After a two-month trial and five days of deliberation, the jurors convicted Mrs. Helmsley of 33 of 41 counts, including conspiracy to defraud the Internal Revenue Service, tax evasion and other tax fraud charges.

Her co-defendants, former aides Turco and Joseph Licari, were convicted of assisting in the tax-evasion scheme. Turco also was acquitted of extortion conspiracy. All three were acquitted on mail fraud charges.

Each of the 33 counts against Mrs. Helmsley carry a maximum prison term of three or five years. She also could be fined nearly \$8 million. Sentencing before U.S. District Judge John Walker Jr. was scheduled for Nov. 14.

Interviews of 15 prominent lawyers by Manhattan Lawyer magazine about Walker's sentencing reputation indicated that Mrs. Helmsley was unlikely to avoid prison.

Mrs. Helmsley, described as a pernickety "queen" in Helmsley hotel ads, was depicted at the trial as arrogant, penny-pinching and mean-spirited.

After listening to the litany of guilty verdicts, Mrs. Helmsley — a one-time Chesterfield cigarette girl and successful model — sat in the courtroom and conferred with lawyers and family for an hour.

She then left the courthouse by the front steps, where she was surrounded by hundreds of photographers, camera crews, reporters and bystanders. She got into a limousine and departed without comment, even as she was taunted by some.

"How do you feel, Leona?" one shouted. "Inquiring peasants want to know."

On ABC-TV's "Nightline," Clark called the hoopla surrounding the

trial "sickening" after he read newspapers a friend saved for him. "The whole thing has been a sickening experience — the press, the television, the people on the street," he said.

Mrs. Helmsley's lawyer, Gerald Feffer, said the conviction would be appealed.

U.S. Attorney Benito Romano said the convictions were a deterrent to anyone considering cheating on their taxes.

"It's an opportunity to remind the public, and we need reminding every now and then, that the law applies equally to everyone," he said.

Mrs. Helmsley and her husband, Harry, still face prosecution on a state indictment alleging evasion of state taxes. No trial date has been set.

Helmsley, 80, was charged in the April 1988 federal indictment but was not tried because the judge found him mentally incompetent.

## Suspect in shooting surrenders to police

NEW YORK (AP) — The white man accused of firing the shot that killed a black teenager, setting off a racial furor, surrendered to upstate police today, a day after the victim was laid to rest amid anger and anguish.

Police said Joseph Fama, 18, the subject of a weeklong manhunt, turned himself in to police in Oneonta at about 2:30 a.m. Police in the Otsego County town, about 175 miles northwest of New York City, said they expected to send Fama back to the city this afternoon.

Officials had said Fama was a member of a white mob that attacked Yusuf Hawkins, 16, and three other blacks in the predominantly white Bensonhurst section of Brooklyn on Aug. 23. Fama, they said, is believed to have drawn a gun and killed Hawkins.

Fama is the seventh person arrested in the attack. Two of them, including the man alleged to be the

ringleader of the mob, were indicted Wednesday.

Hawkins was mourned Wednesday by civil rights leaders, politicians and the parents of a black man killed in the 1986 Howard Beach racial attack.

"If as we lower him in the grave, we are raised in consciousness, then his living and dying will not be in vain," Black Muslim Minister Louis Farrakhan said to spirited applause inside and outside the Brooklyn church where the funeral was held.

"It seems like I'm burying my son again," said Jean Griffith Sandford, whose son Michael Griffith died after being chased by whites into the path of a car in the Howard Beach section of Queens.

Miles from the Brooklyn's predominantly white Bensonhurst section where Hawkins was killed, more than 300 people packed a small Baptist church. A thousand gathered outside, listening to the proceedings

over two speakers set up outside the building in a mainly black section of Brooklyn.

"The longer we waste time in frivolous divisions, this will happen again and again and again," Farrakhan told the crowd. "We say, as the

Jews say, 'Never again. Never again. Never again.'"

Gov. Mario Cuomo, Mayor Edward I. Koch, Police Commissioner Benjamin Ward and Republican mayoral hopeful Rudolph Giuliani were heckled outside the church.

# Spread of AIDS to test state resources, study finds

WASHINGTON (AP) — State and local governments face increasingly difficult budget choices as the growing AIDS epidemic siphons more of their resources, according to a privately financed survey.

Most states continue to rely heavily on federal money to support AIDS programs, but nine — including New York, California and Florida — are spending more of their own funds this year than they are getting in federal grants.

Additionally, states further down in the ranking of cumulative AIDS cases are increasing their spending to battle the disease by 10-fold or more, said the survey by the AIDS Policy Center at the George Washington University.

"AIDS is going to increase the budgetary tradeoffs the states must make," said Mona J. Rowe, who helped conduct the survey paid for by the American Foundation for AIDS Research.

In fiscal year 1989, states spent about \$495 million in non-Medicaid funds on AIDS education, prevention, testing, care, research and other related activities.

Of the total, states contributed \$252 million from their own resources and received \$233 million from the federal government to spend through state programs. The rest came from private sources.

Overall, the bulk of federal AIDS spending is handled directly by the federal government or is funneled through the National Institutes of

## Activists call for price reduction of AZT

WASHINGTON (AP) — Fourteen activist AIDS organizations are urging the company that makes AZT to cut the \$8,000-a-year cost of the only drug approved for use by AIDS patients.

In a letter Wednesday to Burroughs Wellcome Co., the groups said lowering the cost not only would benefit those patients and their insurers already paying for it, but would make it easier to persuade Congress to come up with the millions of dollars needed to supply AZT to those who cannot afford it.

"Without a price reduction, it is politically more difficult, if not impossible, to secure reauthorization and new funding to finance the program needed to provide treatment for all those who need it," the letter said.

AZT is marketed by Burroughs Wellcome under the brand name Retrovir.

Company spokeswoman Kathy Bartlett said the letter reflects "a failure to recognize how pharmaceutical companies operate."

"It is marketed drugs that help pay for all of your

research," she said, adding that development, marketing and research costs "are very, very high."

She said Burroughs Wellcome gave 30 million capsules, wholesale priced at \$1.50 each, to the federal government for the AZT trials and continues to conduct research on the drug.

The activist groups said they were heartened by recent trials that suggest hundreds of thousands of people infected with the AIDS virus but not yet showing symptoms can benefit from taking AZT.

"Now that the evidence suggests a vastly expanded need for the drug," the letter said, the problems of finding a way to pay for it are "greatly amplified."

It maintained that "a large portion" of the total cost in researching, developing and producing AZT was paid by taxpayers.

"In effect, we have been asked to pay for this drug three times: first in its initial development, next in financing many of the studies needed to permit its marketing, and finally to buy it from you," the letter said.

Health to private researchers.

The House of Representatives has approved \$1.6 billion for AIDS prevention, education and research during the fiscal year that begins Oct. 1. That is the level requested by the Bush administration.

However, there is growing emphasis on money for treatment — especially now that the expensive drug AZT has been recommended for hundreds of thousands of people

who carry the AIDS virus but don't show symptoms of the disease.

Patient care "is the next frontier" for state spending on AIDS, especially with new government recommendations encouraging early intervention with expensive drug therapies and patient follow-up.

Currently, 64 percent of all non-Medicaid funds for AIDS-related patient care come from state coffers, the survey said.

Public health officials believe that up to 1.5 million people in the United States are infected with the AIDS virus. As of July 31, AIDS had been diagnosed in 102,621 Americans, of whom 59,361 have died since June 1, 1981, according to the federal Centers for Disease Control.

Federal officials estimate that by the end of 1992, the number of reported AIDS cases in the United States will total 365,000.

## EPA issuing new controls on benzene production

WASHINGTON (AP) — The federal government is about to clamp tight controls on how the cancer-causing chemical benzene is to be handled and stored by industrial users in the hope of cutting releases into the air by 90 percent.

The new controls, a dozen years in the making, were being announced later today by the Environmental Protection Agency, agency officials said.

Benzene — a flammable, colorless liquid — is found widely in industry as a byproduct in steelmaking, in the production of styrofoam, as a component of gasoline and as an industrial solvent. It has many other uses.

According to one EPA official, as many as 100 million people across the country are exposed to some level of benzene pollution. Releases into the air can be found anywhere from steel mills and refineries to the corner service station.

In addition to cancer, federal authorities concluded in the 1970s that chronic exposure to benzene also causes leukemia and birth defects and damages blood-forming organs.

Details of the new benzene controls weren't disclosed in advance, but they are considered by the EPA to be among the most costly issued so far in curbing toxic emissions.

Initial capital investment costs are expected to exceed \$1 billion over the next two years. There was no immediate estimate on what additional operational costs companies might face.

"We think this is an expensive standard. We think it's worth it," said Gerald Emison, director of the EPA's office of air quality planning.

In 1987, industry users reported more than 32 million pounds of benzene was released into the air, but environmentalists say that doesn't count additional releases by small

companies and other facilities — such as gasoline stations — that were not required to make emission reports.

Benzene is only the seventh toxic chemical to be regulated by the EPA, which has been under criticism from Congress for not moving more quickly to curb releases of such substances from the nation's plants and factories.

There are more than 300 toxic chemicals for which industry must make annual reports of releases.

EPA officials have acknowledged that the task of developing comprehensive emission controls for benzene has taken too long, but blame much of the delay on the complex legal process they have been forced to follow.

As part of its planned tightening of federal air pollution laws, Congress is considering a revamping of how the EPA deals with toxic chemi-

cals, so the agency can issue broad regulations based on installation of technology that would curb emissions of many chemicals at the same time.

The agency now must deal with each chemical separately — as it has with benzene.

Although some benzene releases are already controlled by either federal or state regulations, the vast majority of the releases are not.

## Local air heritage supports CAF offer

Announcement that the Confederate Air Force's general staff has unanimously accepted an offer from Midland mayor Carroll Thomas and Chamber of Commerce representative Ed Jones to relocate its headquarters from Harlingen to Midland is an extremely welcome one. The acceptance, of course, is contingent upon approval by the organization's voting members, with those results to be announced in mid-November.

The CAF museum, which includes such renowned exhibits as the P-51 Mustang, the B-17 Flying Fortress and more than 140 other "warbirds," reputedly is the most popular museum in Texas and — with the Midland proposal — actually could become "a world-renowned museum."

That proposal includes \$6 million cash in the form of a 12-acre site at Midland International Airport with existing facilities plus \$4 million in grants from individuals and foundations; a 12-acre site bordering on the east-west runway at Midland International which offers 175,000 square feet of hangar, museum and office space which the city would lease to the CAF at the rates of \$1 a year for 50 years; and options for two additional 20-acre tracts adjoining the 12-acre tract that would be available to the CAF at no cost during the 50-year lease.

Those definitely are lucrative terms, but before skeptics start criticizing the Midland proposal they should study what the proposal could do for this community. In terms of its attraction, the

CAF museum without doubt is a "big draw." As a popular attraction, the museum feasibly could generate major tourist revenue for the Midland market. Major museums in other cities provide a good indicator of the potential. The Panhandle-Plains Historical Museum in Canyon, for example, is a regular stop for national travel tours.

But the CAF museum's economic potential also is the reason for the fight that may be ahead in order for Midland to gain final OK for the location change. Harlingen officials already have indicated they are preparing a counter-proposal to present to the CAF.

In addition to the attractive offer, Midland is in a good "crossroads" for tourist travel, what with Interstate 20 and good airline connections ready to serve the traveling public. Midland also has a heritage steeped in aviation history — from the early-day John Valentine Pliska airplane dating to the 1910-12 era to the establishment of Sloan Field and the Midland Army Air Field here in the 1940s and the recent air show popularity that attracted a crowd of 30,000 to Midland International. In fact, Midland's aviation heritage closely tracks that of the nation.

Mayor Thomas, Jones and all the others who've worked hard to put this tremendous offer together are to be praised for their efforts in Midland's interest. That's all the more reason for Midlanders to get behind the proposal to let it be known that Midland really wants the CAF headquarters located here.

JACK ANDERSON

## S&L bailout gives lie to no-tax rhetoric

WASHINGTON — The \$160 billion thrift bailout has been approved by George Bush, the same guy who said, "Read my lips, no new taxes." You may still

Jack Anderson

be trying to read his lips, but the savings and loan industry doesn't have to. It has his signature on the bottom of the law.

What happened here? One day Ronald Reagan and his minions were telling you that things could only get better if he deregulated the thrift industry and let it reach its full money-making potential.

Today each American man, woman and child is looking at a \$1,000 personal bill to pay the price of the free market run amok. We'll borrow from an old caveat: There ain't no

such thing as a free market, and the only check in the mail is the one you'll be writing to the IRS.

Eight years ago, no one would have imagined that the financial scandal of the century would begin at the corner savings and loan — that friendly place that handed out toasters and home mortgages.

Behind those familiar doors grew a bizarre industry that threw your life savings into wildly speculative deals. And then, one by one, as the deals fell through, the thrifts closed their doors until Reagan left the White House and Bush was left to apologize and clean up the mess.

Edwin Gray was the chief regulator of the savings and loan industry for most of the Reagan administration. He was a Reagan loyalist who followed his president into the deregulatory quagmire. But unlike Reagan, Gray was smart enough to realize when he was up to his knees in quicksand.

He couldn't get the Reagan administration to take the crisis seriously. He tried to crack the whip, propose regulations and refinance the depos-

itor insurance fund. But he found himself increasingly alienated from the administration. And now the entire country is up to its neck.

In an interview with our associate Michael Binstein, Gray recounted how it felt to be treading the crisis. "My one goal was to pass a FSLIC (Federal Savings and Loan Insurance Corp.) recapitalization bill. It was so damn critical," Gray said.

"We knew that Jim Wright (former Democratic Texas representative and Speaker of the House) had life and death power over this legislation. He was, in a sense, strong-arming me."

"He seemed to be far more interested in protecting his friends, who we knew were running massively insolvent institutions, to prevent them from being closed down. He didn't seem to have any concern for protecting depositors, only savings and loan operations."

Gray needed more regulators and more expertise to police the money brokers who were shifting the money around to whatever savings and loan was offering the best interest.

"The razzle-dazzle guys in the money brokering business sought to portray me as old-fashioned, out of step with the times," Gray recalled. "But these fellows knew what they were about. They were making big money off brokered funds transactions and taking no risk, none whatsoever."

"The only risk was to the FSLIC. The money brokers who were screaming the loudest were so damned hypocritical. They knew we were critically short of examiners."

Gray couldn't get any more money out of the Office of Management and Budget to hire more regulators, because that would fly in the face of deregulation.

In fact, Gray couldn't even get budget director David Stockman to talk to him. Instead, Gray was reduced to sending messages through Stockman's underling Connie Horner. He says she responded by telling him that he didn't understand deregulation and that government needed to get out of the pocket of big business.

Whose pocket are they in now?

**GOOD NEWS OR BAD** — The latest reports from Moscow describe a disturbing development. The Communist Party structure is eroding. That might sound like good news, but behind the Eastern Bloc where change happens slowly, there can be too much of a good thing.

The erosion has caused great alarm among top Soviet leaders who may feel compelled to take drastic action to stop the disintegration.

The Kremlin's secret polls show that the party's popularity has plunged. In the Baltic republics, the opposition parties are stronger than the communists. That has encouraged local politicians to call for independence from Moscow.

In Kuzbass, Siberia, political power has already passed from the communist leadership to rank-and-file workers' committees.

So, in the backrooms of the Kremlin, the hardliners are warning that Mikhail Gorbachev's reforms are destroying the party. They want to unleash the secret police to crack down again on opponents.

They're also talking about imposing martial law and using the Red Army to prevent a complete collapse of communist rule.

Jack Anderson and Dale Van Atta are columnists for United Feature Syndicate.

GEORGE F. WILL

## Jaruzelski ponders plight of tightrope walker

WARSAW — Poland's president, Gen. Wojciech Jaruzelski, is also Poland's sphinx. His eyes hidden behind tinted glasses, the usually stony set of

George F. Will

his mouth betraying no emotion, he certainly does not smile promiscuously. But at a recent meeting with five Americans, the stone cracked and he smiled, even laughed.

A man, he said musingly, is on a tightrope stretched high above a street, with no net below. It is raining, the wind is gusting. And he is playing a violin. Jaruzelski crooked his left arm and with his right he vigorously drew an imaginary bow across an imaginary violin. "And people say, 'He's no Paganini!'" The general laughed at his jest.

The tightrope metaphor is a tantalizing exercise in reticence, a quality essential to survival in the Soviet orbit. Toward what is the tightrope walker edging? Democracy?

The general, dressed like a banker, does not say that. But he sounds like a Polish patriot as he favors his American guests with a litany of the

difficulties — civil war, racial strife, depression — American democracy has experienced in 200 years.

Again, his message is — at most — implicit. It seems to be: We are doing, quickly and stealthily, what you have done with much turmoil when you were less constrained by time and circumstances.

Jaruzelski sounds like a conservative Republican when giving examples of excessive entitlements — long, paid pregnancy leaves, for example — that must be pruned if Poland is to become productive. The rascal system of controls must be dismantled and the thick fabric of subsidies must be unraveled.

But this means a blast of inflation. Because things must get worse before they can get better, Jaruzelski speaks like a Chicago alderman bent on assembling a broad social base for the government.

Poland is suffering shortages of almost everything — meat, machinery, poetry — but perhaps its most pressing need is a new, more inspiring metaphor to replace the medicinal metaphors. Everyone here talks about the coming doses of "bitter medicine."

When necessities such as milk and meat are, in a blink, four to ten times more expensive, it may seem unfeeling, even fatuous, to call for a more cheerful vocabulary. However, another name for the bitter medicine Poland has just begun to taste is: freedom. And over the long haul,

freedom is fun. It works.

A foreign-ministry official, pausing with a forkful of Baltic herring, reminds a visitor, "We are not alone in the world." Reticence about the Russian bear to the east comes naturally in a nation that has had the misfortune to exist (when it has existed) in a position between the European map from 1795 to 1918) near large, voracious neighbors.

Someone once said, rather hardheartedly, of Poland's history: If you pitch your tent in the middle of Fifth Avenue, you should expect to be hit by buses. Tanks, in Poland's case, Europe's northern plain is perfect for blitzkriegs.

But today East German's population is leaking westward through the porous papier-mache curtain between Hungary and Austria.

And between Poland and Russia, the Baltic states are in a rolling boil. They are reminding the world, at exactly the right moment, of this exquisitely embarrassing — to the Kremlin — fact: The Soviet Union is the only nation that was allied with Hitler when the war began but did not as a result suffer a rupture of its regime.

The Soviet regime, with all the troubles piled on its plate, probably cannot afford to think much about, let alone intervene in, Poland. But Soviet pressure need not come noisily, with clanking tanks. It could come silently, in reduced flows of iron, oil and cotton.

And Solidarity now faces an identity crisis. It cannot be both what it has been and what it now is: both a trade union and a government, a militant arm of an interest and a conciliating institution.

Poland's Communist Party has acquiesced, so far, in Solidarity exercising power.

Is Poland still a communist country? If by that phrase one means a country with a majority of convinced communists, there never has been a communist country, anywhere.

However, today the aims and values of Poland's government more closely resemble those of all the NATO governments than those of any Warsaw Pact government, with the possible exception of Hungary's. However, Poland's communist apparatchiks still control enough institutions to cause the new government to fall. Do the communists want it to? We come back to the sphinx, The Man Who Is Not Paganini.

One longs to insinuate this thought in among Jaruzelski's information about the United States: The eyes of visitors to Washington are drawn irresistibly to a towering monument to a general.

His greatest act was one of renunciation, a refusal to keep or receive powers that would have had a stunting effect on his nation's nascent democracy.

George Will is a columnist for Washington Post Writers Group.

### Another View:

## AIDS patients' profiles shift as numbers mount

Almost a decade into the AIDS era, the Centers for Disease Control has announced that the number of AIDS cases in the United States has topped 100,000. In spite of the grim implications, that is a milestone worth marking. For Americans can learn from measuring the epidemic's progress.

Much can be understood, for instance, by imagining how the 100,000th may differ from AIDS' earliest sufferers. The first were almost exclusively gay men, most of them white; the latest could very well be heterosexual, female and non-white — or even an infant. That possibility is reflected in the shifting composition of the AIDS-stricken population: A few years back heterosexually transmitted cases numbered only several hundred; by this year's end 3,500 Americans will have contracted the disease through heterosexual sex.

Needle-sharing drug abusers now account for 20 percent of AIDS victims, a proportion that is bound to grow: In 1988, the number of new AIDS cases among intravenous-drug users equaled the number of new cases in gay men. And since drug abuse is most prevalent in the inner cities, nearly 40 percent of AIDS victims are now black and Hispanic. Among children with

AIDS, 80 percent are non-white.

AIDS has thus increasingly become a disease of the downtrodden — of impoverished, drug-invested communities of color. As the Journal of the American Medical Association reported, the influx of AIDS patients already threatens to ravage inner-city hospitals — crippling their capacity to treat other patients and raising the prospect of health-care rationing. Yet the "high concentration of AIDS cases among gay men and the poor may make it difficult to stir up concern from the unaffected, more affluent majority."

But unless the majority musters concern, the 100,000th AIDS patient may someday be regarded as just one more early casualty of an interminable scourge. Only an aroused public can generate the will and the resources to halt the epidemic. The key is a federal master plan — initiated by President Bush — to coax high-risk individuals away from the habits that transmit AIDS, to assure compassionate care for the infected, to boost the quest for a vaccine and a cure. Americans should demand such a program. Without it, AIDS could virtually annihilate the nation's most troubled communities.

— The Minneapolis Star Tribune

### TODAY IN HISTORY

Today is Thursday, August 31, the 243rd day of 1989. There are 122 days left in the year.

Today's highlight in history: On August 31st, 1886, the first recorded major earthquake in U.S. history rocked Charleston, S.C., killing up to 110 people.

On this date: In 1688, preacher and novelist John Bunyan, author of "The Pilgrim's Progress," died in London. In 1881, the first U.S. tennis championships were played, in Newport, R.I.

In 1887, inventor Thomas A. Edison received a patent for his Kinetoscope, a device which produced moving pictures.

In 1888, Mary Ann Nichols was

found murdered in London's East End in what is generally regarded as the first slaying committed by "Jack the Ripper."

In 1954, Hurricane Carol hit the northeastern United States, causing nearly 70 deaths and millions of dollars in damage.

In 1962, the Caribbean nation of Trinidad and Tobago became independent within the British Commonwealth.

In 1965, the U.S. House of Representatives joined the Senate in voting to establish the Department of Housing and Urban Development.

In 1968, boxer Rocky Marciano died in the crash of a small airplane in Iowa, one day short of his 49th birthday.

ART BUCHWALD

## Colleges getting best students money can buy

College tuitions are going through the roof. Latest reports indicate it now costs \$21,000 to send your loved one for a year to any respectable institution in the United States.

Art Buchwald

It is not the end of high tuition raises but rather the beginning. Most educational experts predict that by 1995 the tariff for an average 150-pound male student or a 110-pound female student will be \$1 million a year, not counting admission to basketball games. Who will be the lucky students? Young people whose parents have made a killing in Time-Life-Warner Brothers stock or who own six or seven sky-

scrapers in a rezoned Central Park. I asked Meyer Daniloff, a Regis Professor of Matriculation at Ivy League Normal, why tuitions were rising so fast. He replied, "All the universities in America are looking for a better class of student, and the only way we can get it is to raise the price of admission. We're tired of the grungy, unkempt, badly mannered student of the past, and the only way to get rid of them is to raise the rates. As the midget who sat on J.P. Morgan's lap once said, 'If you have to ask what college costs, then you can't afford it.'"

"Won't schools become boring if only rich kids can attend them?"

"They will at first, but pretty soon the students will get used to being with their own kind, and you will have a country club atmosphere that most schools at the moment seem to lack."

"Is there any way that middle-class students can find the wherewithal to attend college?"

"Of course. You don't think our society would keep them out just because they can't afford to go?"

"How can they do it?" "They can buy a state lottery ticket, and if they win the lucky jackpot they can go to any school of their choice. But they have to pick all eight numbers before the registrar will accept them."

He continued, "The main advantage to the schools raising tuition is that they get a fat cat student who will eventually give to the alumni fund. The downside is that if it gets too expensive to go to college, fathers and mothers will not know what to do with their offspring when they reach 18 years of age. Parents in the past could get rid of their children without looking cruel by sending them to college. Now the children will have every excuse to stay in the house forever."

I said, "Without intending to, the colleges are making life miserable for the parents of middle- and lower-class kids."

"It's a difficult problem, but there is nothing you can do about it. There was always the fear that America would eventually price itself out of higher education. This is as good a time as ever."

"Will the students who pay the top-of-the-line fee get a better education?"

"I don't see why they should. We're not saying all parents have to come up with the tuition or else. All we're saying is that if a student chooses to become an airline pilot for a drug cartel just because he can't afford school we are not to blame."

"Will you guarantee tuition is not going to rise more in just a few years?"

"When it comes to education, nobody can predict the future. But I'll bet Pete Rose anything that it isn't going to go down."

## Hollywood stars seek new privacy statute

Hearst News Service

SACRAMENTO, Calif. — In the aftermath of actress Rebecca Schaeffer's murder by someone described as a deranged fan, Hollywood stars are leading a drive to protect people's privacy by making personal information on California driver's licenses inaccessible.

"I would like to be able to open my door without being afraid," actress Sharon Gless told state senators this week. "And I'd like the people who come to my house to be the ones I have invited."

Gless, who portrayed a tough-talking cop on the "Cagney and Lacy" television show, was testifying in support of legislation that would seal the personal information listed on driver's licenses.

As it stands now, anyone can obtain personal information — such as a home address — from a California driver's license simply by paying a \$3 fee to the state Division of Motor Vehicles.

Investigators say an obsessed fan was able to get the home address of Schaeffer, Pam Dawber's co-star on the TV series "My Sister Sam," before shooting her to death on July 18.

Schaeffer, 21, was slain when she opened the door to her Los Angeles apartment. Robert Bardo, 19, has been charged in her death. Police believe Bardo hired a private detective to find the actress's home address through a search of DMV records.

Also testifying on behalf of the bill introduced by Assemblyman Mike Roos, D-Los Angeles, were Dawber and Schaeffer's parents.

Roos' bill passed on a 7-0 vote Tuesday by the Senate Judiciary Committee. It would allow Californians to request confidentiality for their home addresses. An alternative address, such as a post office box, would be used for anyone other than courts, police, tax officials and other government agencies seeking information.

Craig Biddle, a lobbyist for the California Association of Licensed Investigators, told the committee his organization has concerns about the bill because "we feel there is a legitimate need for some individuals to get this information."

Dan Carson, president of the central California chapter of the Society of Professional Journalists, wrote to committee chairman Sen. Bill Lockyer that the bill "would harm legitimate users of Department of Motor Vehicle records ... (it) would move California a step closer to a closed society in which control of information and therefore freedom is in the hands of the government."

## Recycling to become part of capital paper chase

WASHINGTON (AP) — The capital paper chase begins in earnest Oct. 1. In a city where photocopying and paper-pushing have been elevated to art forms, recycling is about to become the norm.

"Newspaper and office paper, we can produce that in great numbers," said Tara Hamilton, a spokeswoman for the city's public works department. "We read a lot of newspapers, we write a lot of memos, we prepare a lot of reports."

In fact, the city estimates that 53 percent of the approximately 740,000 tons of trash collected each year is paper.

The new recycling law will require office workers, government employees and residents to separate paper from the rest of their garbage.

"Not to be melodramatic, but it's going to change the way we live," Hamilton said Wednesday. "Over the next five years, we are all going to have to change our definition of what we call trash."

While the rules governing paper recycling go into effect Oct. 1, the city has an ambitious plan to begin glass, aluminum and metal recycling programs by 1994, Hamilton said.

A set of proposed rules stipulates that most city residents will have their newspapers collected on the same day that trash is picked up, while businesses and government offices will be required to hire private haulers to take away their newspapers and office papers.

Condominiums and cooperative apartment groups, which pay for private trash collection, will be allowed to ask the city to pick up newspapers.

The rules, which will be reviewed by the City Council in the next three weeks, allow businesses to apply for

exemptions. However, Hamilton cautioned that small stores and offices, rather than paper-producing mon-

sters such as the federal government, are far more likely to avoid having to recycle.

"There are some businesses that are so small, use so little paper, that it doesn't make sense for them to enter into a contract to have paper hauled away," Hamilton said.

However, she said most of those businesses won't receive exemptions, but will be encouraged to pool their paper resources with small businesses nearby.

To help make the adjustment to recycling easier, Hamilton's office has produced an information sheet — printed on recycled paper — that will be sent to city residents and businesses.

The mailing spells out the rules, tells residents when their papers will be picked up and warns against mixing paper with regular garbage.

Residents violating the regulations can be fined \$25, while condominium groups and cooperative apartment organizations can be penalized between \$100 and \$400. Levies against businesses start at \$400.

In recent years, construction of new office buildings and the conversion of single-family homes to condominiums and apartments have contributed to a growth in Washington's trash rate, Hamilton said.

In 1981, according to district figures, the city collected 450,000 tons of trash. Last year, that figure swelled to 740,000 tons, and Hamilton estimated that without recycling, the city would be producing 1 million tons of trash a year by 2002.

The district, which has no landfill, must pay to cart its trash to neighboring Maryland and Virginia.

## Airports to get new explosives detectors

WASHINGTON (AP) — Devices to screen checked baggage for plastic explosives will be required at 40 of the world's busiest international airports under new Federal Aviation Administration rules.

The regulation issued Wednesday, made possible because of evolving technology that allows detection of chemicals in plastic explosives, has long been anticipated.

Since the deaths of 270 people in the crash of Pan Am Flight 103 over Lockerbie, Scotland, in December, federal officials have said they would require installation of the new detection devices once details were worked out.

The airlines, which would have to pay an estimated \$993 million over the next 10 years to install detection devices, have questioned the cost and effectiveness of the technology available to meet the FAA requirement.

"We cannot support the widespread deployment of this equipment in the near term because its capability has not yet been demonstrated," said Stephen D. Hayes of the Air Transport Association, an airline industry group.

The FAA, which can require airlines to follow certain procedures abroad as a condition for flying into U.S. airports, says it will continue to consider whether to require the new screening on all international flights by U.S. carriers — a move that could send the cost to airlines to an estimated \$896 million by 1990.

The FAA has acquired six prototype screening devices, the first already installed at New York's Kennedy International Airport.

The others are scheduled for installation by the end of the year at London's Gatwick Airport and airports in Frankfurt, Germany; Detroit; Miami, and San Francisco.

The FAA declined to identify the other 36 airports, citing security considerations and the possibility there could be some shifts in those affected.

Investigators have concluded that the bomb that exploded over Lockerbie was hidden in checked luggage loaded in the forward cargo compartment of the New York-bound Boeing 747.

The rule does not require a particular device but says one called Thermal Neutron Analysis has been "shown to have the highest degree of explosives detection currently possible for detecting known civilian and military explosives, manufactured here and abroad."

Any system used by the airlines must be approved by the FAA. The rule requires that the system be automated, detect specified quantities and configurations of explosives as defined by the FAA and be safe for operators and baggage.

The TNA units are estimated to cost \$750,000 each, the FAA said. It said this cost is expected to drop as production increases. The device was developed by Science Applications International Corp. of San Diego under an FAA contract. The agency said it has been tested successfully at several airports.

The system emits low-energy neutrons that pass through luggage and interact with the chemical elements in explosives, triggering an alarm. The detection is done by computer.

## NATION IN BRIEF

## Fourteen injured in bridge collapse

LAUREL, Md. (AP) — A bridge being built over a major roadway collapsed during rush hour this morning, raining debris on commuters and injuring at least 14 people, state police said.

One woman was critically injured in the collapse of the Route 198 overpass over the Baltimore-Washington Parkway, which came while workers were pouring concrete, said Maryland Police spokesman Chuck Jackson.

U.S. Park Police Deputy Chief Richard Kuskick said four of the injured were in a car that was crushed under the overpass. Another of the injured was in a second car that was hit by debris, while the other nine were construction workers.

Authorities were trying to determine if anyone else was trapped, he said.

"We're trying to coordinate the heavy equipment to get in here so we can try to get it," Kuskick said.

Earlier, Smith had said that one vehicle had been freed from the rubble, one vehicle was struck by debris but drove on and "there is one vehicle trapped, but there may be more."

The collapse occurred just before 7 a.m. as workers poured concrete, which they had been doing since 2 a.m.

The critically injured woman was taken by helicopter to the University of Maryland Shock Trauma Center in Baltimore, said state police spokesman Sgt. Joseph Iretton. The others were taken to various hospitals, he said.

One radio reporter on the scene described the bridge as a crumpled mess. The southbound parkway was closed at Route 32, and traffic was being detoured around the area. Jackson said the collapse caused tremendous traffic backups.

## Fire kills family members

PITTSBURGH (AP) — A fast, intense fire killed six members of a family Wednesday, including two children whose bodies were found only five feet from the front door, authorities said.

The 2½-story house was engulfed in flames when firefighters arrived after a 1:15 a.m. alarm, said Battalion Chief Frank Henry. The fire spread to an adjacent house and two behind it, causing an estimated \$100,000 damage in the Northside neighborhood, fire department officers said.

Relatives identified the victims as Wilbert Crowell, 47; his wife, Theresa, 27; her three children, Tina Sharpe, 10, Hope Lawrence, 5, and Bo Lawrence, 4; and the husband's mother, Sylvia Thompson, 72.

"A neighbor came up and said she heard people inside screaming but there was nothing she could do,"

said police Lt. Richard Dwyer. "When I got out of my car about 100 feet away I could feel the heat," he said. "There was no way anybody could get near the building."

Acting fire Chief Robert Kolenda said it was not immediately known how the fire began or in what part of the house. Kolenda said he saw no sign that the house was equipped with smoke detectors.

The two youngest children were found on the first floor near the door, the man and a woman were at the top of the stairs, the 10-year-old was on the stairwell to the third floor and the other woman was in a second-floor bedroom, Kolenda said.

## Bush, Mulroney go fishing

KENNEBUNKPORT, Maine (AP) — President Bush, his fishing reputation still on the line, is vowing to "murder" some fish today in a battle against the sea now joined by another vacationing leader, Canada's Brian Mulroney.

The president and the prime minister, old friends holding their third tete-a-tete this year, planned an informal mid-afternoon session with reporters before Mulroney and family take their leave this evening.

In Canadian parlance, the session was billed as a "scrum" — something short of a full news conference at Bush's scenic family compound overlooking the Atlantic.

Mulroney, wife Mila and their four children arrived by helicopter at Walker's Point Wednesday afternoon.

"We're going fishing," pronounced a merry Mulroney, who added when asked what he and Bush would talk about, "Probably fish ... and lobster."

## Harbor fish defects down

BOSTON (AP) — A recent study of Boston Harbor found fewer fish with bent fins, dwarfism or liver abnormalities associated with pollution, but researchers say the inlet is far from environmentally sound.

"We don't conclude from the study that in fact things are getting better," said William E. Robinson, senior scientist at the New England Aquarium's Edgerton Laboratory.

Nearly 200 winter flounder caught one day in mid-May showed fewer instances of cancerous lesions as well as other defects, compared to studies in the early 1980s.

However, Robinson said Wednesday, defects were markedly higher than the numbers found in cleaner environments further out in the sea. "No changes have gone on in Boston Harbor yet," he said, adding that partially treated sewage still is being dumped there.

The state plans to spend \$6.1 billion to clean up the pollution, which then-candidate George Bush frequently cited in running against Gov. Michael Dukakis in last year's presidential campaign.

## Judge grants woman's wish to be designated as black

DENVER (AP) — A light-skinned woman has won her battle to be designated black, even though her parents listed her as white on her birth certificate in an attempt to help her overcome racial bias.

A judge on Wednesday directed Kansas officials to issue a new birth certificate for 39-year-old Mary Christine Walker, who was born in Great Bend, Kan. "I'm glad it's over," said the former Denver Public School teacher, who always called herself black. "I'm very thrilled."

Her attorney, Penfield Tate II, said Kansas' current birth certificates do not designate race, so her new one will have no race on it at all. "But that is fine with us," he said.

The order came from U.S. District Judge John Brooks of Denver, who heard Walker's plea to stop the illusion that she was white, a well-intentioned deception she said her parents started.

Her father, who's black, and her mother, who had a white mother and a black father, endowed their daughter with a fair complexion, green eyes and a light brown hair that would allow perpetuation of the secret. "My parents wanted their kids to make it, and they picked the easiest way possible," Walker said. "They knew what it was to be black. They knew the problems."

At that time, passing for white was risky but financially rewarding for blacks who had the physical and emotional ability, she said. "Mom really stressed the white world on the kids — education, manners — and she was very paranoid about the secret getting out," Walker said.

But she said she couldn't blame her parents. "I resent that this society is set up in such a way that someone would have to pass (for another race). It's a disgrace that this country is so screwed up racially. Because it really is," she said.

Walker said that, living as a black, she never was bothered by the heritage of deception except when applying for work.

Walker

## Man freed after jailed for violating sodomy law

DECATUR, Ga. (AP) — A carpenter said he is bitter after spending 18 months in jail for having oral sex with his wife and maintaining his five-year sentence for violating Georgia's sodomy law was an unfair result of a domestic dispute.

James D. Moseley, 35, left the Metro Correctional Institution on Wednesday afternoon after DeKalb County Superior Court Judge Robert Castellani granted a motion to free him on his own recognizance pending appeal or dismissal of the charges.

Sodomy, even between consenting married adults, is a felony in Georgia under a 156-year-old law recently upheld by the U.S. Supreme Court. "Sure, I'm bitter," Moseley said after being released.

He said faith in humankind kept his spirits up, adding, "I knew someone would see this thing as it really was."

He said he will contact the carpenters' union about a job as soon as possible.

The state, he said, gave him \$25, "I guess to start my life over."

The case against Moseley began when Bette Roberts, his common-law wife of four years, complained to authorities in February 1988 that he had raped and forcibly sodomized

her. The couple has since divorced. Moseley denied ever using force to have sex, saying, "I only did what she wanted me to do and then she used it against me to get custody of the kids." He said he was granted no rights to visit his sons.

Moseley was acquitted of rape and forcible sodomy. But in testifying in his own defense, he admitted on the stand that he had had oral sex with Ms. Roberts. The jury found him guilty of sodomy without aggravation, a lesser charge that means oral or anal sex with consent.

Some jurors later expressed shock when Moseley was sentenced to five years in prison. He is believed to be the first person convicted under the sodomy law for conduct between marriage partners.

Clive Stafford Smith, an attorney with the American Civil Liberties Union, argued that the Georgia law violates constitutional rights to privacy. He accused prosecutors of hypocrisy for ignoring his request that they disqualify themselves if they ever had engaged in oral sex.

Mary Beth Westmoreland, a senior assistant attorney general representing the state, argued that privacy was not the issue because the wife made the criminal complaint.

# MISD, ECISD seek improved communication

By BRIAN PEARSON  
Staff Writer

A school district may only be as good as its communication networks between administrators, teachers and the community.

A district's communication system can determine the degree of acceptance of bond issues, tax hikes, teacher salary freezes and other difficult decisions school administrators and trustees face. Communication becomes an issue in almost every school board election.

Midland and Ector County superintendents and public relations administrators said Wednesday that improving their systems will be as big a focus this school year as in the past.

"Compared to most school districts our size, I think our communication is good," said Joe Baressi, Midland Independent School District superintendent. "There is certainly room for improvement."

Superintendent Gene Buinger of Ector County Independent School District is just getting his feel for communication lines in his district. He joined the ECISD staff this month.

Buinger said communication will be "one of the main things I'll be having to assess during the coming months."

"I think communication is a problem with all organizations," he said. "I see it at all levels of government and in the corporate world."

Despite all of MISD's efforts to disseminate information to the public, district surveys show that newspapers are the primary source of communication between a school district and the community, Baressi said.

"In any public institution of our size we don't have clear and accurate communication with everyone," he said.

He said the biggest gripe with MISD's system is its lack of adequate communication with those who

speaks only Spanish.

MISD newsletters sent to residents contain a paragraph in Spanish which encourages the readers to call a telephone number in the district's bilingual office. An interpreter there translates the English contents of the letter. Baressi said the service is seldom used.

Getting parents involved in their children's schools is an important means of improving district-community relations, Baressi said.

"Research shows over and over again that students perform better academically when their parents are actively involved in their education," he said.

MISD's PTA chapters have about 12,000 members, while 3,800 parents and other community members were involved last year with Volunteers in Public Schools. VIPS members donate time to assist teachers, principals and other campus officials during school hours.

In addition, thousands of other

adults get their irons in the MISD fire through a variety of booster clubs and other parent groups.

Baressi said positive community relations become vital when the district needs to raise taxes or have a bond issue passed for new facilities.

Poor communication could mean death of the bond issue at the voting booths or a board room full of irate taxpayers, Baressi said.

He said carefully explaining the district's needs and detailing the who, what, where, when and how in newsletters and at trustee meetings can soften the blow of additional costs to taxpayers.

"Without quality communication you can't have strong community support for the school system," Baressi said. "Most people value children and education so much that if you can provide them with accurate information to justify the cause, it could generate positive support in this community."

Community representatives have

helped guide MISD by joining a long-range planning committee, which also includes school officials. The committee outlines strategies for teacher recruiting, school discipline and facility renovations among other issues.

Ted Miller of MISD and Chuck Hornung of ECISD are major links between their school districts and communities. Their jobs include circulating information inside and outside their districts.

The two, who are the source of district newsletters, are the main media contacts. Usually they are the first to get called by reporters wanting more information about a story.

Baressi throws his hat into community circles by taking part in organizations such as the YMCA and United Way. He speaks at organization luncheons and other events and has even coached a little league baseball team.

But perhaps the most difficult feat is circulating information among

MISD's 2,000-plus employees, Baressi said. The task also includes listening to employee complaints, suggestions and problems, he said.

To gather and distribute information, MISD central administrators hold numerous meetings with supervisors, directors, building principals, other administrators and teacher representatives.

"It's important for our employees to take some ownership in their school system and in their job," Baressi said.

To increase employee participation further, Baressi said district officials are considering giving monetary rewards to staff members who come up with budget-saving ideas.

Teachers who create a "sound idea" for improving instruction may be given a district grant to develop the idea further, Baressi said.

## City Council, administrators to discuss budget

By JANE MARLER DEES  
Staff Writer

Midland City Council members and municipal administrators will hold a public hearing early this evening to discuss the proposed 1989-90 budget which includes a tax increase.

Earlier this month, the council approved a proposed 5.35 percent tax increase and a proposed \$28.7 million general fund budget.

The tax increase would raise the current 50.65-cent rate to 58-cents per \$100 of appraised valuation.

The owner of a \$50,000 home would see an increase of \$38.75 on his or her tax bill next year. The current annual tax on a \$50,000 home is \$253.25.

The city's tax base was decreased this year by \$2.94 million, according to statistics from the Midland County Appraisal District. Last year, the city's tax base was \$2.8 billion.

Because of the dwindling tax base, the city's effective tax rate is 56.63-cents per \$100 of valuation. The 1989-90 effective rate reflects an actual increase of 11.6 percent, statistics show.

The effective tax rate is the amount needed to collect the same amount of taxes as the prior year.

The city's 5.35 percent increase proposal is above and beyond the effective rate.

The proposed 1989-90 general fund budget reflects an increase of about \$163,000 over this year's, City Manager Fred Poe said today.

Although the general fund budget is scheduled to increase, the streets and public building maintenance allocations for next year will be decreased, Poe said.

A proposed 2 percent pay increase for the city's 900 employees will cost an estimated \$400,000.

Expenditures not included in the general fund budget include those relating to the airports, the water and sewer departments, sanitation, Hogan Park Golf Course and the hotel/motel tax.

Because the city's proposed 5.35 percent increase is not more than 8 percent above its 1988-89 effective tax rate, citizens do not have the option of petitioning for a tax rate rollback election which often can limit the increase.

Ad valorem tax revenues are used to fund the daily operations of the city and to help retire its debt obligations.

The meeting will be at 5 p.m. today in the City Hall Council chambers located at 300 N. Loraine St.

## Condo trial participants watching juror's pants

By HOLDEN LEWIS

LUBBOCK (AP) — Those awaiting a verdict in the 6-month-old Interstate-30 condo trial are going by the seat of a juror's pants.

If the lone male juror wears blue jeans to deliberations, then prosecutors, defendants and their attorneys don't expect a verdict that day. The day he walks into the courthouse wearing a suit, they figure, will be the day of the verdict.

The man has worn jeans to the courthouse every day since U.S. District Judge Sam Cummings sent the jury into deliberations Aug. 23. Jurors have been pondering the fates of Garland developer D.L. "Danny" Faulkner, former Garland Mayor James L. Toler and five others accused of stealing \$135 million from 1983 and 1984.

The jury has not indicated how close a verdict is. It could take a long time; they have to go through an 88-count indictment that accuses the defendants of bilking the S&Ls through sham real-estate transactions on condominium-zoned prop-

erty along I-30 in east Dallas County. Because Cummings has ordered attorneys and defendants to remain within 10 minutes of the courthouse, most of them spend their days in the eight-story building, playing cards, taking catnaps and napping.

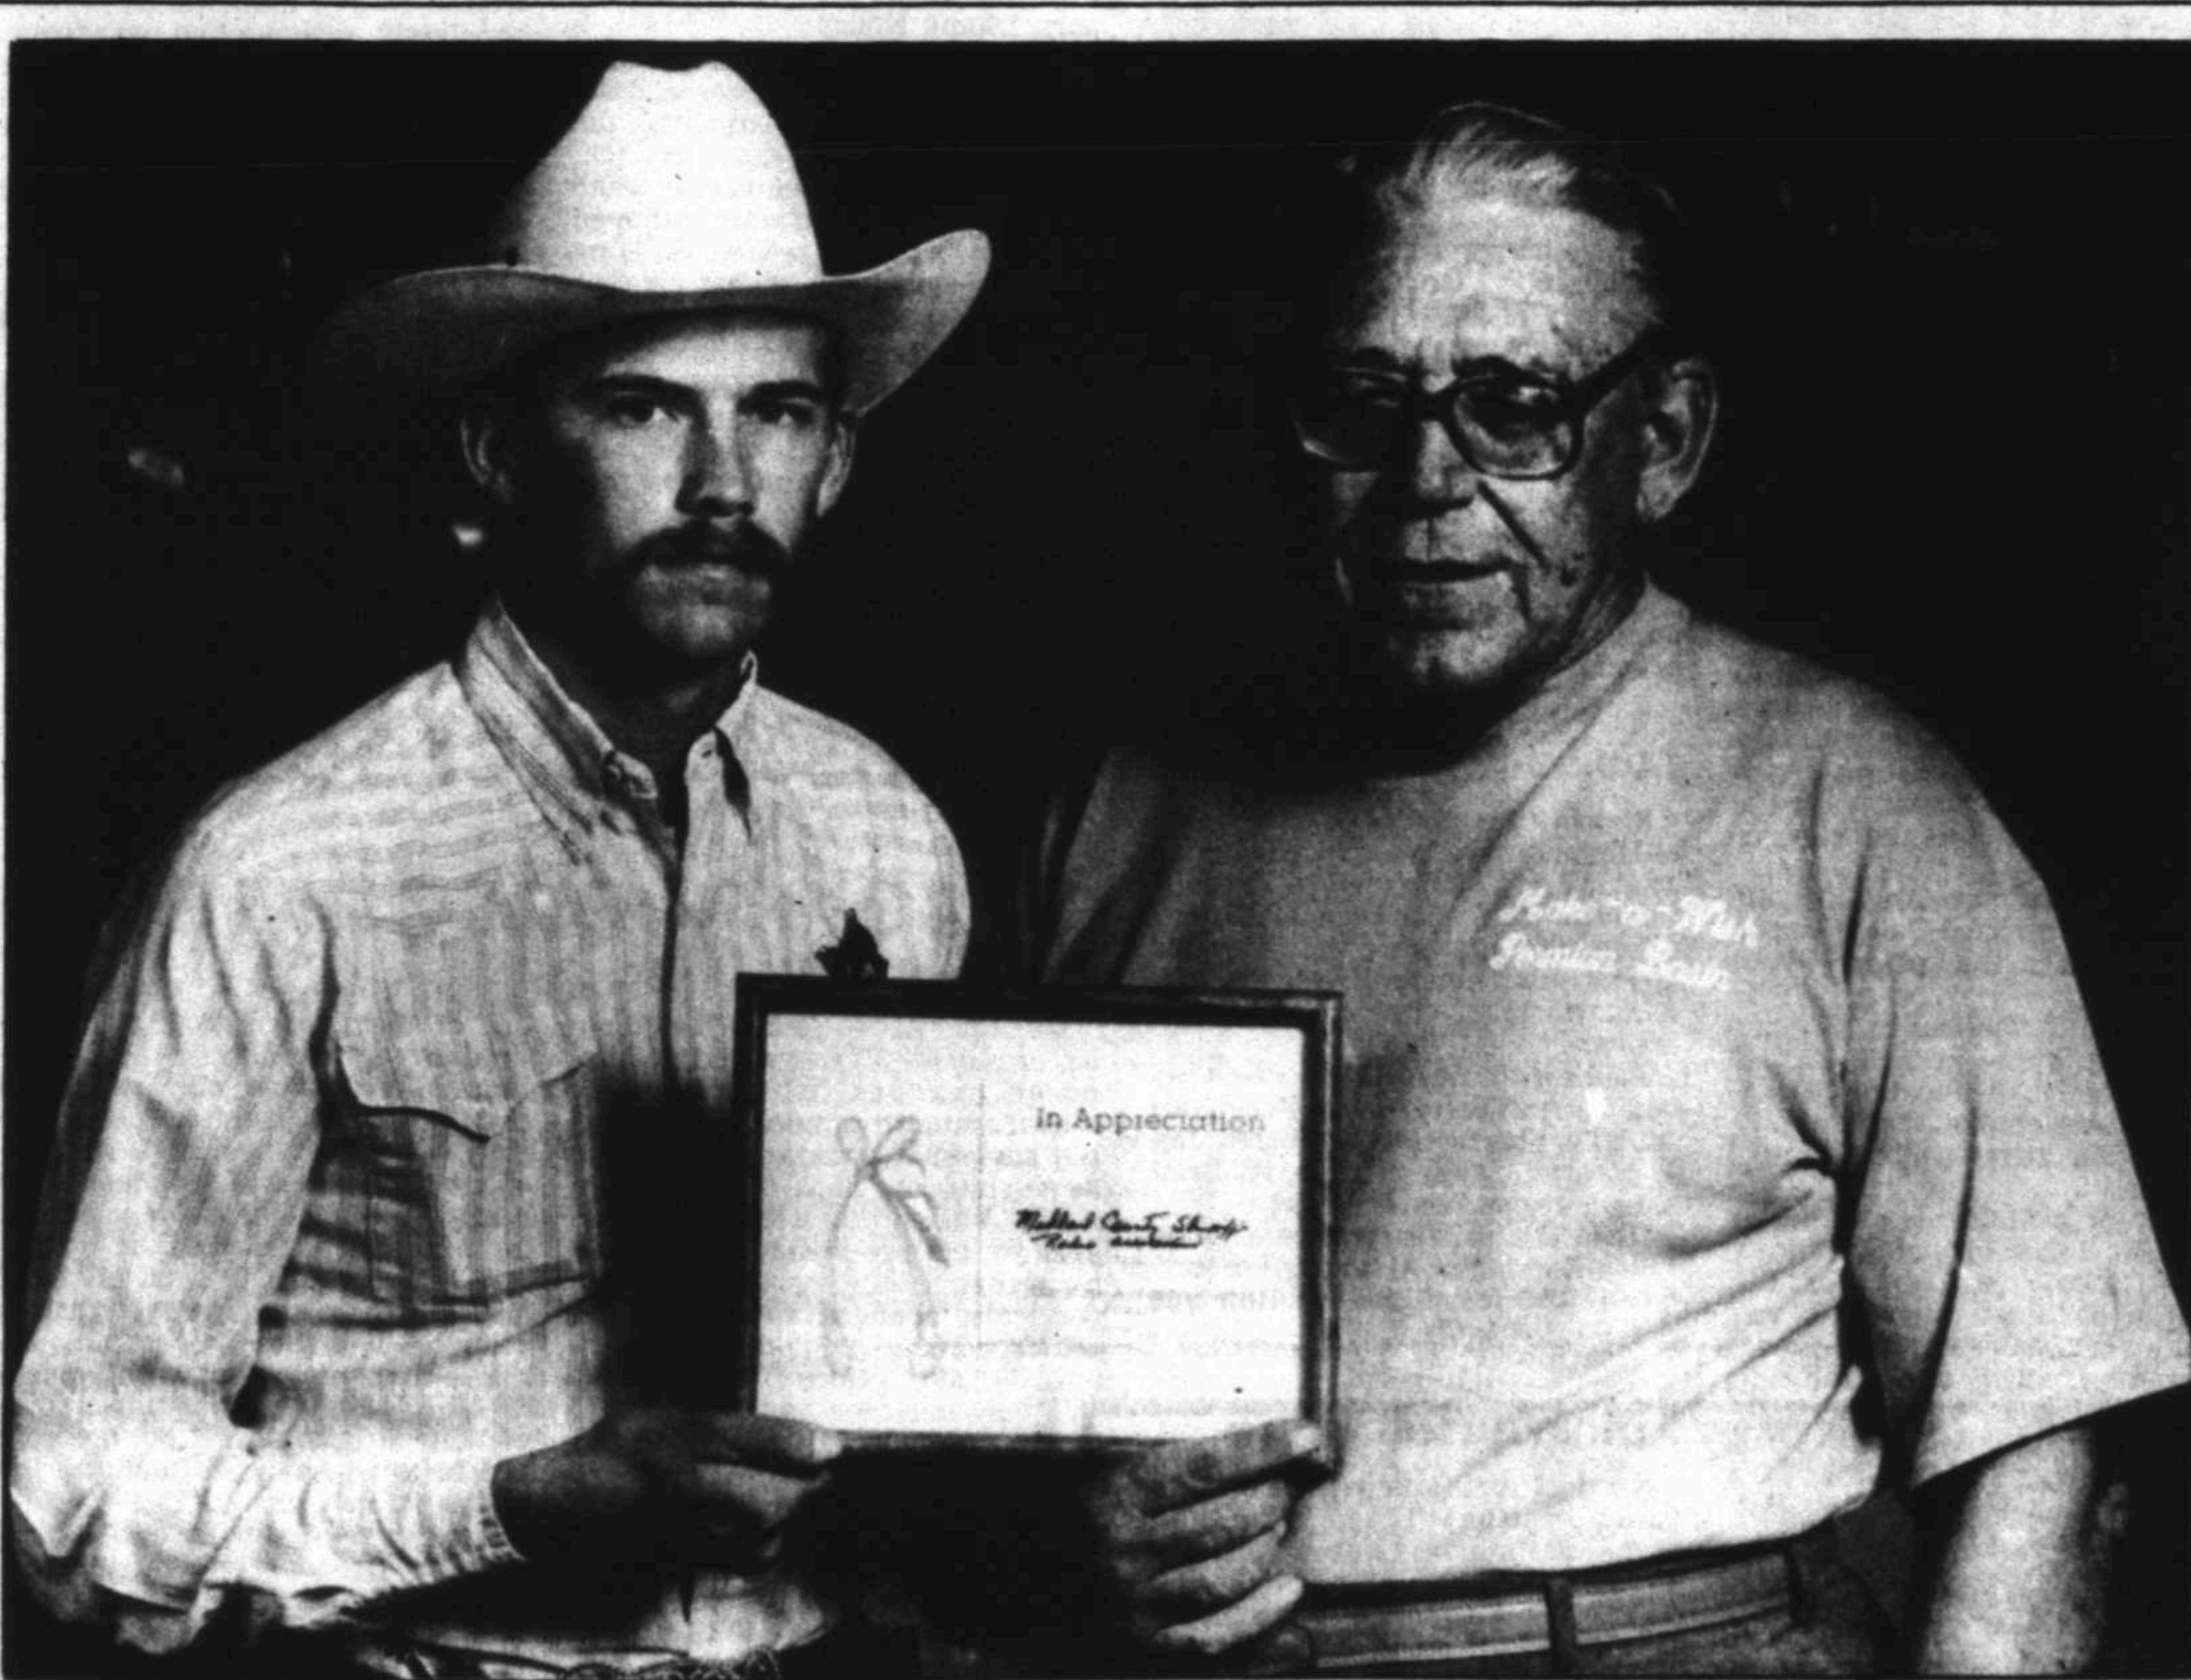

One defendant is whiling away the weeks by writing a family genealogy on a computer set up in the second-story courtroom.

The assistant U.S. attorney who prosecuted the case spends his days filing papers and reviewing his courtroom tactics, thinking of how he could have done better.

Many wear shorts or jeans; their courtroom wardrobes are pressed and ready to be donned at a moment's notice.

Everyone appears tired, bored and frustrated. Everyone, that is, except the jurors. They talked and smiled Wednesday as they took their afternoon walk around the courthouse. One woman even jogged a few steps, laughing when the bailiff ran after her.

Brian Adamczak/Reporter-Telegram

Midland County Sheriff's Deputy Gary McLaughlin, left, and Denton Hines of the Permian Basin Make-A-Wish Foundation

display a certificate of appreciation which the foundation gave the Midland Sheriff's Department Rodeo Association.

## Rodeo makes \$4,000 for Make-A-Wish

By ED TODD  
Staff Writer

Texas peace officers who rodeo for fun and for the thrill of conjuring up the Old West recently rodeoed for the Make-A-Wish children who suffer from life-threatening illnesses but who dream dreams, nonetheless.

The Midland Sheriff's Department Rodeo Association (MSDRA), which hosted a Texas Police Officers Rodeo Association rodeo earlier this month, donated more than \$4,000 to the Permian Basin Make-A-Wish Foundation.

"Our stars shine to make a wish come true," said Jerry Lee, president of the Midland Sheriff's Department Rodeo Association.

"Every penny of it will go to 'do' wishes for terminally ill kids," said Denton Hines, president of the foundation. "We don't have any salaries or office expenses. We pay our own tele-

phone bills."

"The money is channeled directly to the Make-A-Wish children," Hines said. "A child may want to go to the Swiss Alps, or one may want to go to Disney World. That's our most popular choice."

The rodeo association donated \$3,500 of the rodeo proceeds to the Make-A-Wish program, and other funds came from individual performers, such as Stanton's bull-fighting clown, Tommy "Hossfly" Atchison, who donated his fee to Make-A-Wish.

Hines said he was impressed with the caliber of the horses and the riders in the rodeo.

"I didn't expect they would have the outstanding horsemanship they did have," Hines said. "You bet. They are good. They are flat good. And the clowns were exceptional."

"Those horses are half the game," Hines said. "Of course, he (the rider) has got to have talent, too, but those horses have to be

good."

In putting on the benefit rodeo, the peace officers displayed a "show of compassion for kids with life-threatening diseases," he said.

Sheriff's Deputy Gary McLaughlin, MSDRA vice president, noted that rodeo clowns Tommy Atchison and Jimbo Atchison, who "did not charge a dime" for his performance, and "all of those boys did an outstanding job."

"It went fairly smooth for our first rodeo," McLaughlin said. "We made a few mistakes. We learn from them, and the next rodeo ought to be a much better show."

Jerry Lee termed the rodeo a "huge success." The rodeoing peace officers said the rodeo was "great" and, along with the Dallas rodeo, the Midland rodeo is a rodeo they want to put on their circuit.

The all-around cowboy in the rodeo was Tommy Tipton of Gal-

veston County; the all-around cowgirl was Debbie Guy of Houston.

All told, 180 cowboys and cowgirls participated. Results of the rodeo by first, second and third places in each event are:

Barrel Racing: 1. Billy Jarrett; 2. Mike Box; 3. Eric Smith.  
Calf Roping: 1. Butch Lewis; 2. Ray Moore; 3. B.T. Joseph.  
Cattle Doping: 1. Dale Littleton; 2. Bruce Koger; 3. Eric Smith.  
Goat Tying: 1. Roxanne Myers; 2. Debbie Guy; 3. Gary Rogers.  
Wild-horse Racing: 1. Dean Cunningham, Danny McGuire and Butch Bridges; 2. Tommy Tipton, Eric Smith and Stanley Holmes; 3. Jim Miesmash, Walter Mobley and Darryl Cross.  
Ribbon Roping: 1. Tommy Tipton and Mickey Leach; 2. Butch Lewis and Mandy Koger; 3. Ray Nichols and Debbie Guy.  
Calf Tying: 1. Tommy Tipton and Jack Mercer; 2. Butch Lewis and Bruce Koger; 3. Larry Guy and Ray Nichols.  
Wild-Cow Milking: 1. Jay Mullins, Bill Stone, John Lunsary, and Bobby Walker; 2. Don Brady, Russell Brady, Dean Bohannon, and Glen Smith; 3. Al Peck, Sandy Peck, Jimmy Myers, and Sam Voss.  
Barrel Racing: 1. Debbie Guy; 2. Kim Wilkinson of MPD; 3. Monette McDonald.  
Team Roping: 1. Jerry Lee and Jay Mullins; 2. Gary McLaughlin and Floyd Mullins; 3. Al Peck and Sam Voss.  
Bull Riding: 1. Randy Myrick; 2. Cliff Strickland; 3. Lee McDermott.

ED TODD

## Money often loses meaning, becomes just a tool

This bit about money has always been puzzling, somewhat perplexing, to this timid soul.

The world seems all caught up in money, money, money. What it, an idol for most times and places, can do is in history and beyond. Money — the greenbacks now often called "notes" — largely has replaced the bartering system. Only under desperate circumstances would a person take a goat in exchange for building a fence.

But if there were a profitable market for goats, then the fence builder who exchanged his labors for the goat might invest the critter and turn one goat into many goats. His fortune might come by way of mohair or cashmere. Or, he might slaughter his blood-and-flesh wages, barbecue the meat and have cabrito for lunch. He is satisfied until hunger sets in.

Money must be not much more than a matter of faith and hope. Of course, it is serious business. You mess with another person's money, legally or illegally, and you are in a world of trouble. Either the

courts will examine your motives and take you to task or a hit man will turn you into a target and never ask about your hopes and dreams. You are his.

Money in the bank. Certainly there is no gold and silver there, outside of what you may have stashed in the safety-deposit box. Strange deal. I suppose bankers understand how the monetary system works. But if they do, many have made a game out of it and ended up fined and in one of Uncle Sam's prisons, which is not exactly a country club, joke or no joke.

Too much money becomes too much money. After awhile, I suspect, money loses meaning and becomes only a tool. You throw money here and throw it there and get what you want. But after awhile, what you want that is attainable with money simply isn't enough. There must be more.

That, historically, is where power and manipulation take over. Spending money becomes a game until too much is spent, the game ends, and money again takes on a practical meaning.

You go to the bank and deposit a good-faith check or those greenback notes or clanging coins. Suddenly, money becomes only figures on paper. But it is somewhat startling, maybe comforting to the depos-

itors, that those figures on paper can be turned into cash and buying power. Or, more often in America's society, "money" in the legitimate areas doesn't physically move around. Figures do.

It's all faith. I suppose that there is not enough gold and silver, or sea shells and shiny pebbles, to go around as "money."

If enough people in officialdom agreed, cow chips could take on bargaining power. The problem with that is space. It is easier to stack \$100 bills or certificates of deposit than it is to stack up chips gathered up in the pasture or in feedlots.

Money, money, money. Scholarly sorts go on the academic quest for degrees as a license to "make" money. Some make a bunch; some not so much. Some go into medicine and law and the ministry for humanitarian reasons — causes based on higher planes. Others go after the greenback or, more likely, a combination of ideals and needs and wants and desires and who knows what.

Drug dealers, hardly operating on idealism, go after cash — laundered or not. Some universities and businesses "invest" in life-

insurance plans for their students, alumni and employees. When they die, the universities and businesses collect. Some churches solicit the benefits of wills.

Business is honest about its motives: making a profit. Businessmen, for example, go into the stock-market world to make money for their clients and for themselves. And their motivation, outside of making a living, may be most honorable: seeking excellence and integrity in their field.

Certainly, earning a living can be most honorable. For the most part, writers write for the same reasons: cooks cook, commercial pilots fly, cowboys cowboy, judges judge, bankers bank, physicians heal, counselors counsel, preacher preach, farmers sow, and goat ranchers herd: the joy they glean in their work in serving a higher calling and in making money to "keep things going."

It is like everything else: It is the attitude that determines the value and worth of deeds done for money or for goodwill or both. It is rarely as plain as black and white or as simple as exchanging fence-building for a goat.

Ed Todd is a staff writer for the Reporter-Telegram.

## DEATHS

## Martin Holder

Rosary for Martin "Shorty" Holder of Midland will be recited at 7 p.m. today at the Ellis Chapel. Funeral services will be held at 11 a.m. Friday at Ellis Chapel with Father Fred Nawarskas officiating. Interment will follow at the St. Joseph Catholic Cemetery in Stanton.

Holder

He died Tuesday in Lubbock. He was born Dec. 11, 1921 in Olin and was reared in Rowena where his family farmed. He entered the U.S. Army during World War II serving in the Air Corps. His tour of duty was in the United States. Following his discharge, he moved to the St. Lawrence community in 1947 where he worked as a farmer. In 1953 he became postmaster for two years. In 1968 he left St. Lawrence and moved to Missouri where he owned and operated a dairy farm. He returned to Midland in 1974 and worked for Roy Roy Dairy. He joined Thorne Exxon in 1980 and later was employed at Blaine Bushman Exxon at the corner of Big Spring and Cuthbert. He retired a year ago for health reasons. He married Louise Montgomery on Jan. 9, 1982. He was a member of St. Ann's Catholic Church.

Survivors include his wife; two sons, Lee Holder and Bill Holder, both of Midland; three step-sons, Bill Montgomery of Monahan, Jerry Montgomery of Odessa and Kent Montgomery of Austin; one daughter, Lillian Carroll of Midland; one step-daughter, Sheola Baker of Lubbock; two brothers, Fred Holder of San Antonio and Robert Lee Holder of Winters; one sister, Alberta Halfmann of St. Lawrence and 10 grandchildren.

## Richard Matthews

BIG SPRING — Richard E. (Rick) Matthews, 39, of Big Spring and formerly of Midland died Wednesday at a Big Spring hospital following a brief illness.

Services were to be at 11 a.m. today at the Nalley-Pickle-Welch Rosewood Chapel in Big Spring with Rev. Bob Underwood officiating. Additional services and burial will be at the Sparkman-Hillcrest Cemetery in Dallas.

Matthews was born Aug. 21, 1950 in Dallas and married Gail Peterson on Sept. 2, 1983 in Big Spring. He was a Baptist.

He moved to Midland in 1970 and later to Big Spring in 1982. He had worked for Mobil Pipeline for 20 years and was employed as an automatic station operator at the time of his death.

Survivors include his wife; four daughters, Renae Jobe of San Diego, Calif.; Nickole Matthews of Big Spring and Christi Matthews and LeAnne Matthews, both of Austin; his parents, Irving E. and Sarah Matthews of Dallas; three brothers, Michael Matthews, Ted Matthews and Gary Matthews, all of Dallas; and his paternal grandmother, Verneda Matthews of Dallas.

## Jack Steele

ODESSA — Jack Steele, 65, of Odessa died Tuesday at a local hospital.

Services will be at 10 a.m. Friday at the Hubbard-Kelly Funeral Home Chapel with the Rev. Robert Bratcher officiating. Burial will be in Sunset Memorial Gardens.

He was born Jan. 8, 1924 in Galveston. He married Billie Albertson July 25, 1942 in Levelland. An Odessa resident for 40 years, he was vice-president of John Drilling Co. for 42 years.

Steele was a member and past master of the McFarland Masonic Lodge Number 1338. He was a member of the El Paso Scottish Rite and a member of the Odessa Shrine Club. He was a World War II veteran and a member of the Crescent Park Baptist Church.

Survivors include his wife, Billie Steele of Odessa; three daughters, Carol Buchanan Dawn and Norma

Niece, both of Odessa, and Betty Steele Strickland of Lubbock; a brother, Norman Steele of Lake Buchanan; three sisters, Othel Caddell of Levelland, Patsy Blackwell of Levelland and LaJuana Jo Arrington of Pampa; 11 grandchildren and seven great-grandchildren.

## Jack Masters

ODESSA — Services for Jack R. Masters, 50, of Odessa will be held at 10 a.m. Saturday at the Hubbard-Kelly Funeral Home Chapel with the Rev. James Nugent officiating. Burial will be in Sunset Memorial Gardens.

He died Wednesday at a local hospital. Masters was born April 1, 1939 in Monahan. He married JoAnn Mueller on Dec. 8, 1959 in Imperial. He came to Odessa in 1963 and was a salesman for Reedy Manufacturing Co. He retired in 1988.

He was a member of the American Legion and the Ector County Sheriff's Posse. He was also an Army veteran and member of the Holy Redeemer Catholic Church.

Survivors include his wife JoAnn of Odessa; a daughter, Stephanie Harrison of Odessa; his mother, Lila Masters of Odessa; a brother, Robert Masters of Midland; a sister, Charlene Gunter of Lubbock; and numerous nieces and nephews.

The family has requested memorials be directed to the Allison Cancer Center at Midland Memorial Hospital.

## Mary Stevens

Mary D. Stevens, 88, of Midland died Wednesday afternoon at a local nursing home.

Graveside services will be at 2 p.m. Friday at the Grove Hill Memorial Cemetery in Dallas. Glen McNeill, pastor of Assembly in Christ Church of Midland will officiate.

Ellis Funeral Home is in charge of arrangements.

Mrs. Stevens was born Oct. 23, 1900 in Port Arthur and moved to Midland in 1958. She was a member of the Assembly in Christ Church. Survivors include one daughter, Jane Beck of Midland and one grandson.

## Louisa Rodriguez

Services for Louisa M. Rodriguez of Midland were to be at 2 p.m. today at Our Lady of Guadalupe Catholic Church with Father Michael Slattery officiating. Interment was to follow at Fairview Cemetery with Ellis Funeral Home in charge of arrangements.

Palbearers were to be Roy Chavez, Jerry Ybarra, Fred Rodriguez Jr., Mike Ybarra, George Ybarra, Jesse Ybarra, Dicky Ybarra, Wilfred Langeld and Victor Aguirre.

Honorary palbearers were to be Frank Rodriguez, Al Rodriguez, Raymond Rodriguez, Robert Ramirez and Danny Aguirre.

## Kathryn Hall

Services for Kathryn Hall of Midland were to be at 11 a.m. today at St. Stephens Catholic Church with the Rev. Robert Kelly officiating.

Interment will follow at Resthaven Memorial Park under the direction of Ellis Funeral Home.

Palbearers were to be Jack Brown, Jim Brown and Dick Ragan.

## Edward T. Smith

Funeral services for Edward Thomas Smith were to be held today at 2:30 p.m. at the Faith Temple Church of God in Christ.

He was born April 4, 1952 in Midland. Smith was a veteran of the U.S. Army.

Palbearers were to be Larry Lewis, Gregory Park, Eric Park, Freddie Smith, Charles Roseberry and Robert Doran.

## Annie Powers

Annie Powers of Midland died Wednesday in San Antonio. Services are pending with Ellis Funeral Home.

## Clowns committed to daffiness

By ALEXANDER KAFKA

CORPUS CHRISTI (AP) — U.S. Navy Capt. Jerry Vernon is in charge of the \$220 million construction of Homeport. He is tall, with ramrod-straight posture and a serious demeanor. And on his desk is a portrait of his friend, his love, his lifemate — Frinkles the Clown.

Frinkles boasts that "if it weren't for me, he'd have a very boring life," and she unceremoniously calls the captain the "Boy Scout of the world."

But then, she can get away with it. She's his wife.

Frinkles, otherwise known as Nancy Vernon, 46, is one of a hearty contingent of South Texas clowns, or "Joey's."

In the Corpus Christi area there are 17 members of Clown Alley, 23 of the Clowns of America International, as well as Shriner circus clowns and independent champions of the greasepaint.

Although Joey's share a deep commitment to daffiness and tomfoolery of all kinds, there are as many reasons for clowning as there are clowns. The experts — the reputable Frinkles, Dee Jay and Lanky — are cases in point.

Frinkles is an extension of Vernon's personality. But Dee Jay was developed in studied contrast to his creator, Mike Farrell. And in the world of pranks and mischief, Lanky is the envoy of his reserved counterpart, Danny Kollaja.

Vernon grew up in Houston cherishing circus performances and admiring the likes of Gargantua the Gorilla and Clyde Beatty the lion tamer. She started clowning when she and her husband were stationed in Guam, where a retired Ringling Brothers clown was giving classes.

For the past five years, the seventh grade Texas history teacher at Rockport-Fulton Junior High School has been a part-time professional clown, performing at conventions, birthday parties and charitable

Lanky the clown, alias Danny Kollaja

events. She said Frinkles' character traits are an exaggeration of her own.

Frinkles was named by Vernon's 12-year-old daughter for her wrinkles and her wrinkles. She is an august clown, characterized by flesh-colored makeup, a maniacal mien and a hopelessly mismatched wardrobe. You can't miss her. She's the one with bright-blue, curly hair, megaelashes, blue-and-white polka-dot suit with yellow suspenders, huge saddle oxfords with yellow and white socks, and a yellow beanie conveniently equipped with propeller.

"Frinkles is definitely on the screw-loose side," Vernon said. "I think that anybody who's into clowning has a split personality in a sense."

Vernon's other incarnations include the upbeat ghost tale-telling

witch, Hysterica Eccentrica, and the early-American Texas tall-tale raconteur, Antle Nan.

Vernon said she has a whole closet full of exotic costumes. Her family is moving to a new house, and Vernon said the Navy men charged with transporting her costumes "look at me like, 'Hey, this is pretty kinky.'"

Asked whether she ever confuses her three characters for four, depending how you look at it, Vernon said, "Oh, no. I can flip in and out so quickly. It's kind of scary. A psychiatrist would have a ball with me."

She adds, however, that her personality voyages are "very therapeutic, very rewarding. They're just extensions of myself, whoever that may be."

While Frinkles is an evolved caricature of Vernon, Mike Farrell's greasepaint persona was a conscious creation.

For example, when Farrell, midday DJ for country KOUL-FM, addresses his largely 30s female audience, his voice is, by his own reckoning, deep and mellifluous. But when he becomes Dee Jay the Clown, Farrell's voice becomes whiny and nasal. The two characters, Farrell said, "are not even close."

The 30-year-old Farrell said Dee Jay's physical mannerisms are "benevolent and friendly." After all, the hobo clown with the 6-foot-2-inch frame doesn't want to scare his kindergarten and elementary-age charges. And unlike some clowns, Farrell's Dee Jay never goes into a frenzy. As a hobo, he's subdued, like a tramp clown, but wears brighter colors and even smiles now and then.

Among Farrell's other selves are the ventriloquist figures Cousin Dilly and Nutty the dodo bird. Farrell explains that the former got his name:

"Cause'n when he tells a lie, it's a dilly." Nutty, however, is a wise guy ("Why do birds fly south in winter, Nutty?" "Cause it's too far to walk.")

If Dilly and Nutty's approach to

entertainment seems laid back, Farrell's is anything but.

He's been at his education in serious buffoonery for 2 1/2 years and credits one of the city's most popular clowns, Happy De Klown (Efrain Guerrero Jr.), with aiding in the formation of Dee Jay's character as well as his repertoire of magic tricks.

Farrell has invested a considerable amount of time and money in his hobby.

He said that during his first year of clowning, he spent about 10 hours a week practicing, but these days his practice takes about 18 to 24 hours a week. His costumes, magic equipment, ventriloquist dolls, books and videotapes cost about \$5,500, he said.

When clowns aren't talking, they're usually ballooning, not getting fat, mind you, but twisting balloons into animals and other shapes. And Farrell has learned to create a menagerie of balloon forms, among them the chihuahua, swan, floppy-eared dog, fancy poodle, parrot on a perch, flower and pirate saber.

If Frinkles is Vernon's amplified self and the dee jay's Dee Jay the Clown, Farrell's voice becomes whiny and nasal. The two characters, Farrell said, "are not even close."

Kollaja, assistant director of volunteer services for the Corpus Christi State School, is 30 years old. His clown counterpart, however, is 11 and acts his age.

"It's hard to get a straight answer from Lanky sometimes," said Kollaja. "When you think he's friendly, he'll come out with a snotty remark."

"Danny'll fall back on Lanky quite often to lose his inhibitions," said Kollaja, who estimated he spends a minimum of 10 hours a week as the boisterous orange-haired clown.

Lanky started as a whiteface clown but found the aloof dignity of whiteface hard to maintain. As Kollaja put it, Lanky wanted to "get down and dirty," so he became an august clown, who can be as childish and wisecracking as he pleases.

## President of SMU wants to increase minority enrollment

DALLAS (AP) — Southern Methodist president A. Kenneth Fye proposed changes to improve the school's minority student enrollment but suggested a major reduction to its engineering department.

Fye started the third academic year of his presidency Wednesday by recommending several dramatic curricular changes, many of which are expected to guide the university into the next century.

"I consider race and ethnicity to be the most significant issue on our campus," Fye said.

SMU has doubled its enrollment among African-American and Hispanic students over the last two years, said Andrew Bryant, admissions director. About 140 black and Hispanic freshmen are enrolled this semester, Bryant said.

"While we are pleased with that, we are not standing out here bragging about it because we think SMU is a university that even more minority students should be looking at," Bryant said.

The most sweeping change Fye proposed for the university of 9,000 students was the elimination of its Civil and Mechanical Engineering Department.

The department will be phased out over a four-year period, if Fye's recommendation is accepted by the SMU Board of Trustees in December.

"I regret the necessity of such a recommendation," Fye said. "Some of our best faculty will be affected adversely, some alumni will be disappointed, and students will be concerned."

Approximately 70 percent of the school's engineering majors are enrolled in electrical and computer science engineering, Fye said.

About 300 engineering students received undergraduate and graduate degrees last May, school officials said. However, less than 50 civil and mechanical engineering degrees were awarded.

Fye said SMU will honor the ten-

ure of the department's eight tenured professors and said the five untenured professors may stay until their contracts expire within the next three years. All civil and mechanical engineering students currently enrolled will be able to continue pursuing the degree, he noted.

"I have written to each of them, insuring them that we will remain committed to them," Fye said.

Fye said discussions with leaders of other small, private universities convinced him large engineering programs will have difficulty in the future at such institutions.

But Fye said he believes SMU can have an effective engineering program by limiting its scope. Electrical, space and computer engineering studies will still be offered at the school.

"The process in which SMU is engaged should be regarded as one of reallocation," Fye said. "The university must engage in selective pruning to produce more vigorous growth."

Fye said an academic task force also recommended eliminating the degree in public relations and cutting minors in social sciences, linguistics, criminal justice, engineering management and physical education.

## Gold plentiful in ancient Egypt

Egypt was regarded in antiquity as a land of gold.

"Gold is as plentiful as dust," said the Mitanni conquerors of Egypt in demanding gold from the pharaohs in the 14th century B.C. In the earlier dynasties, gold was dedicated to the gods as "the body of the gods."

Although Egypt's gold wealth has been confirmed in writing and archaeological discoveries, little is known about the origins of the gold or the mining techniques used.

## SCHOOLS

(Continued from Page 1B)

Sam Manning, a Lee High School teacher and president of a teachers' union, said the teachers' communication committee is often an ineffective way of relaying teacher concerns to central administration.

Committee issues are screened and are more public, making it difficult sometimes for administrators to say what they are really thinking, Manning said.

"A lot of teachers think the communication committee is basically a rubber stamp," Manning said. "I think we can communicate, but in any bureaucracy things sometimes get jumbled in the process."

But Manning said he has no complaints about Baresi's ability to listen to an individual teacher's needs and concerns.

"Generally speaking, I think he gives out valid information when he gives out the facts," Manning said. "It's the job of the superintendent to convey as much as he can about what is positive about the district, and I do that too."

There's nothing wrong with it. I

think we work effectively with Dr. Baresi."

Superintendents of ECISD and MISD each plan to visit every school in their district at least once during the coming school year.

Buinger said he will visit schools three days a week for the next four months, spending a half day in elementary schools and full days in secondary schools.

He will sit in on classes, visit with building supervisors and try to explain to students what his job is.

"I need to know what's going on out in these buildings," he said. "I need to listen to the building-level teachers and administrators."

"Just because I'm superintendent doesn't mean that people out there are going to jump and follow my lead. I have to communicate with them and present my vision."

Hornung said ECISD this fall also plans to take over a weekly 30 minute time slot on KOCV, the Public Broadcasting System television station. The shows will feature Buinger as well as other ECISD officials, he said.

The time and day of the show has not been determined yet, he added.

## Elementary school orientation set

From Staff Reports

The Midland Independent School District will hold an orientation for 4th, 5th and 6th-grade parents and students tonight at 7:30 p.m. at all elementary schools.

This is an opportunity for parents and students new to Midland and

new to an elementary school to learn about curriculum, tour the buildings and meet the principals.

A bus will be provided from 5th- and 6th-grade schools to the corresponding 4th-grade school. Parents going to 5th- and 6th-grade schools from the 4th-grade schools will have to provide their own transportation.

## LULAC Foundation official says he won't resign under pressure

SAN ANTONIO (AP) — The chairman of the LULAC Foundation board says he will not resign under pressure in the wake of an investigation into alleged financial irregularities and called the national president of the nation's largest Hispanic rights group a "young whippersnapper."

In an interview Wednesday with the San Antonio Express-News, Eduardo Morga called national League of United Latin American Citizens president Jose Garcia de Lara of San Antonio a "young whippersnapper."

Morga, of Los Angeles, made the remark in response to a call from de Lara that 10 former national presidents of the Hispanic organization should resign.

Others asked to resign their foundation board posts were Hector Godinez of Santa Anna, Calif.; Manuel Gonzales of Waco; Oscar Laurel of Laredo; Ed Pena of Washington, D.C.; Roberto Ornelas of Dallas; Pete Villa of Seattle; Paul Garza of Laredo; Mario Obledo of Sacramento, Calif.; and Oscar Moran of San Antonio.

If the board members do not resign within five days from Tuesday, de Lara has the authority to strip LULAC's name from the foundation. That would remove the non-profit status from the foundation.

Morga's claim that de Lara does not have authority to take that action was disputed by LULAC lawyer Ruben Sandoval.

"We certainly can remove the LULAC title from the foundation," Sandoval said. "The foundation is a creation of LULAC. We can and will contact the Internal Revenue Service and contact the corporate donors."

"We would show that the foundation is no longer a LULAC affiliate and no longer entitled to non-profit status as such. This, of course, would mean contributions to them would not be tax deductible."

Morga told the San Antonio newspaper by telephone that de Lara had denied him and other foundation board members due process under the LULAC constitution.

Sandoval disputed the claim, saying that Morga and the others had been invited to appear before the committee that conducted the investigation.

"They chose not to be there," Sandoval said.

The investigation into financial irregularities was prompted by news reports in May that Moran had a bank account in LULAC's name at Plaza National Bank in San Antonio, league officials said.

The account was maintained without the knowledge of de Lara and LULAC national treasurer Jose Botello of Dallas.

Bank records revealed Moran wrote checks on the account after he was national LULAC president and before he became foundation chairman, a position he resigned after the May disclosures.

## Highway commission OKs random drug tests

AUSTIN (NYT) — The state highway commission has approved random drug and alcohol testing for most employees in safety-related occupations, but a civil rights organization Wednesday said the new get-tough policy probably will be challenged in court.

The order, adopted Tuesday, will cover about 11,000 of the department's 15,400 employees and probably will be implemented by next spring, said Leslie Clark, director of the department's division of human resources.

"The commission objective is really to achieve an alcohol- and drug-free workplace," Clark said, "and obviously that is designed to protect the health and safety of the department's employees and the health and safety of the motoring public."

The drug-test order was attacked as political, wasteful and vulnerable to a court challenge by Jim Harrington, legal director of the Texas Civil Liberties Union.

Harrington said that while there is no plan to file a suit, he had no doubt the new policy would end up in court. "If they really intend to implement the policy to the extent they are talking, there undoubtedly will be several lawsuits," he said.

"Most state governments do not do testing," Harrington said. "When they do do it, they generally do it in police or safety-sensitive jobs, and they generally require some sort of cause" for believing a person's job performance is being impaired by drug or alcohol use.

"Texas once again has shown its uncanny ability to depart from mainstream America," he said.

"Where states have passed laws that do random testing, they have been struck down in state courts," Harrington said. In New York, he said, random drug-testing laws affecting teachers and police officers have been struck down.

FRIDAY, SEPTEMBER 1, 1989

**HAPPY BIRTHDAY! IN THE NEXT YEAR OF YOUR LIFE:** Your strong, positive attitude will have a profound effect on your loved ones. Fresh business opportunities abound in late fall. Improvements in your health or appearance boost your confidence. A new love relationship could lead to a permanent alliance by Christmas. Travel gives you valuable insights. A long-lost friend turns up, eager to play an important role in your professional or personal life.

**CELEBRITIES BORN ON THIS DATE:** conductor Seiji Ozawa, comedian Lily Tomlin, country singer Conway Twitty, boxer Rocky Marciano, actress Yvonne de Carlo.

**ARIES** (March 21-April 19): The emphasis today is on being more practical. Reappraise your priorities and obligations. Recycling old projects could increase profits. Meet partner halfway and your relationship will continue to grow.

**TAURUS** (April 20-May 20): Get to work early today and you will accomplish more. Stick to tried-and-true methods; newer ones proposed by others could prove longer on promise than performance. Show mate more consideration.

**GEMINI** (May 21-June 20): If

someone appears inclined to argue, find a reason to go elsewhere. With a little ingenuity, you can work things out. The presence of a dear one is sheer delight. Stay home tonight.

**CANCER** (June 21-July 22): You can expect your partner to occupy center stage this month. This arrangement should please you both. Follow up employment leads provided by experts. Update your resume before going on interviews.

**LEO** (July 23-Aug. 22): Adopt a "can do" attitude. Doing your share of the household chores will help restore domestic harmony. Teamwork is to everyone's advantage. Dig into the past to come up with the right answers.

**VIRGO** (Aug. 23-Sept. 22): Following your instincts now could lead to extraordinary accomplishments. The road ahead will be smoother. Excesses make you uncomfortable. Steer clear of someone who enjoys emotional scenes.

**LIBRA** (Sept. 23-Oct. 22): You discover something about your partner that you never expected. Now is not the right time to have things out. Voice your artistic ideas. Short business trips can be highly profitable.

**SCORPIO** (Oct. 23-Nov. 21): A legal affair comes to a startling con-

clusion. The outcome could have a ripple effect on your finances. Start a new savings program. A timely apology helps heal a wound. Be sincere.

**SAGITTARIUS** (Nov. 22-Dec. 21): Express your sincere thanks to those who have done so much for you. The details on an upcoming meeting may escape you. It is important you get them right. Romance holds new promise.

**CAPRICORN** (Dec. 22-Jan. 19): Discuss financial problems with the family. A young person has good ideas; follow through. Let bygones be bygones. A former competitor could become your strongest ally. Listen to constructive suggestions.

**AQUARIUS** (Jan. 20-Feb. 18): Your ability to influence others will impress those in authority. A promotion or raise is possible. Greater insight comes through a unique experience with a young person. Use insider knowledge wisely.

**PISCES** (Feb. 19-March 20): Progress is quicker when you show good judgment. Share any special problems with family members; you need to present a united front. A telephone call or letter brings wonderful financial news.

wrong with taking the ace of hearts at trick one. At trick two, however, declarer should have led a diamond to the king and then a diamond back to the ace. If the suit breaks, the king of clubs in dummy is an entry to cash the rest of the diamonds.

However, when West shows out on the second diamond, declarer is in the right place to change horses. After a club to the jack wins, it needs only a 3-2 club break for de-

clarer to get home with one heart trick, three diamonds and five clubs.

## PEOPLE

## Princess Anne separating from husband

LONDON (AP) — Princess Anne, the only daughter of Queen Elizabeth II, is separating from her husband Mark Phillips after 15 years of marriage, Buckingham Palace announced today.

The 39-year-old princess and her 40-year-old husband do not plan to divorce, the announcement said.

The queen, on holiday at Balmoral, Scotland, was described by royal sources to be "obviously saddened" but to understand the couple's decision, which was taken in principle earlier this year, according to Press Association, Britain's domestic news agency.

"Her Royal Highness, the Princess Royal, and Capt. Mark Phillips have decided to separate on terms agreed between them," the announcement said. "There are no plans for divorce proceedings."

The terms of the separation were not disclosed but Anne will continue to live at the couple's home, Gatcombe Park in Gloucestershire, about 80 miles west of London. Phillips will move to another house nearby, the palace said.

The palace press office could not say whether this would be Aston Farm on the Gatcombe estate.

The couple's children, Peter, 11, and Zara, 8, will live with their mother at Gatcombe and Phillips will have full access to them, the palace said.

The separation had been disclosed Wednesday night by Phillips' father, Maj. Peter Phillips. Rumors of trouble in the marriage date back to 1981. In recent years, Anne and Phillips have spent periods of up to six months apart.

Speculation that their marriage was on the rocks arose most recently in April, after personal letters written to Anne by a handsome 35-year-old aide to the queen, naval Cmdr. Timothy Laurence, were stolen and sent to the tabloid The Sun.

Phillips' name has been linked romantically with several women in British tabloid reports in recent years.

Princess Margaret, 59, the queen's only sister, was divorced in 1978 from photographer Lord Snowdon. He has remarried. She has not.

As in the case of Anne, who is sixth in line to the throne, the palace repeatedly denied that Margaret's marriage was in trouble.

A common view that has taken hold this century is that the royal family, as a symbol of national unity, is supposed to set an example for the nation.

Before Margaret's divorce, British news media often depicted the royals as the ideal family. But the divorce showed they could not meet that expectation and cost them some of the unquestioning respect they had enjoyed.

Anne, a former member of Britain's Olympic equestrian team, and Phillips, an ex-Army captain and Olympic equestrian gold medalist, met through their love of horses.

They married in London's Westminster Abbey Nov. 14, 1973, in a televised ceremony viewed by an estimated worldwide audience of 500 million.

Anne, who is head of the International Equestrian Federation, was attending an International Olympic Committee meeting in Puerto Rico today, and bodyguards and aides kept reporters away from her. She is due to return to Britain by mid-September after traveling to Belize, Honduras, Ecuador and Bolivia.

Phillips remained Wednesday at Gatcombe Park. His father's statement said Phillips, a commoner who farms and trains horses, "will go on managing the work on the estate and will continue to organize the horse trials and the stables."

Anne has become one of the busiest members of the royal family as president of the Save the Children Fund, a charity that helps poor children worldwide.

On April 6, The Sun, Britain's biggest-circulation

## Stars of 'Texasville'

Timothy Bottoms, from left, Jeff Bridges, Cybill Shepherd and director Peter Bogdanovich pose for photos at a press conference in Wichita Falls Wednesday for the film "Texasville." The film is the sequel to Bogdanovich's "The Last Picture Show," filmed in 1971. The crew has been filming on location in nearby Archer City.

paper with a daily sale of 4 million copies, reported it had been handed four stolen letters written to Anne by a man it did not identify.

It did not disclose the contents but said it passed them to police. On April 8, the palace identified Laurence as the writer to try to halt intense news media speculation.

Phillips told reporters at that time that his marriage was "fine and happy."

HIGHLAND PARK, Mich. (AP) — The high heels are there, as are the short skirt and the wild hair.

Singer Tina Turner of high-energy rock 'n' roll fame takes over center stage for Plymouth's new advertising campaign with an uncharacteristically subdued performance. She talks in a straight-forward manner about Plymouth Acclaim, Laser and Sundance cars and the Voyager minivan.

She ends each spot with a soft-spoken "That's right, Plymouth." But Turner fans expecting her throaty, hard-driving singing are going to be disappointed. In none of the commercials does she sing a note.

LOS ANGELES (AP) — Playboy founder Hugh Hefner and his new wife, Kimberley Conrad, are expecting a child in April, a spokesman says.

Hefner, 63, had hinted recently that he and his bride were going to have a child.

"If anybody wants to know what we did on our honeymoon, they'll find out in April," Hefner said, according to Playboy spokesman Bill Farley.

Hefner and the 26-year-old former Playmate of the Year were married July 1.

Hefner has two children from a previous marriage: daughter Christie, the head of Playboy Enterprises, and son David.

## Many supermarket items have colorful histories

By DONNA KATO  
New York Times News Service

LOS ANGELES — There was once a time when products acquired their names and identities in romantic, storybook ways.

Sometimes, the origins of items like cookies, breads and shoes can be traced to a setting that conjures visions of early Americans.

Often, the naming process involved a sentimental tale both imaginative and clever. Fortunes were made merely by having a good idea at the right time.

In the corporate, high-tech environment of the late 20th century, such decisions usually are made by savvy advertising agencies and dark-suited types with MBAs who study computer programs and consumer surveys.

They may come up with a much-in-demand specialty cake with a catchy name, but, alas, there's no celebrated history. No fanciful beginnings.

How, then, did many of today's products and company names come to be so established in the minds of consumers?

For those who have wondered why Cheerios aren't Happies, here are the explanations.

Even the most advanced trivia buffs may be surprised by the origins of the names of some of these items.

**CHEERIOS** — Records are sketchy, but the cereal was originally introduced in 1941, said Jean Toll, historian for General Mills. The Minneapolis-based company was about to launch a new, doughnut-shaped oat cereal and needed a name. General Mills polled college students and housewives, who thought the best-sounding name was "Cheery Oats."

In 1946, the name was changed to Cheerios because Quaker Oats objected to the use of the word "oats" in the cereal's name.

**FRITOS CORN CHIPS** — Elmer Doolin, a hungry and tired ice cream salesman, stopped in a small cafe in San Antonio, Texas, for lunch one

afternoon in 1932. He spotted a container of corn chips and ordered a basketful to eat with his sandwich.

Doolin liked the crunchy, salty, fried tortilla pieces so much that he bought the factory from the owner, a Mexican gentleman. He decided to call the chips "fritos," which means fried in Spanish.

He merged his company with Herman Lay's potato chip business in 1961.

**TWINKIES** — This cream-filled snack cake was invented in 1920 by James A. Dewar, a Chicago-based regional sales manager for the Continental Baking Co. of St. Louis.

Times were tough, and Dewar was looking for ways to boost company sales and his salary. He noted that Continental made a finger-shaped shortcake during the six-week strawberry season, but that the pans were idle the rest of the year.

It also was Dewar's idea to inject a banana-flavored filling into the cake and sell them for the low price of two for a nickel, said Randee Blum, a spokeswoman for the company.

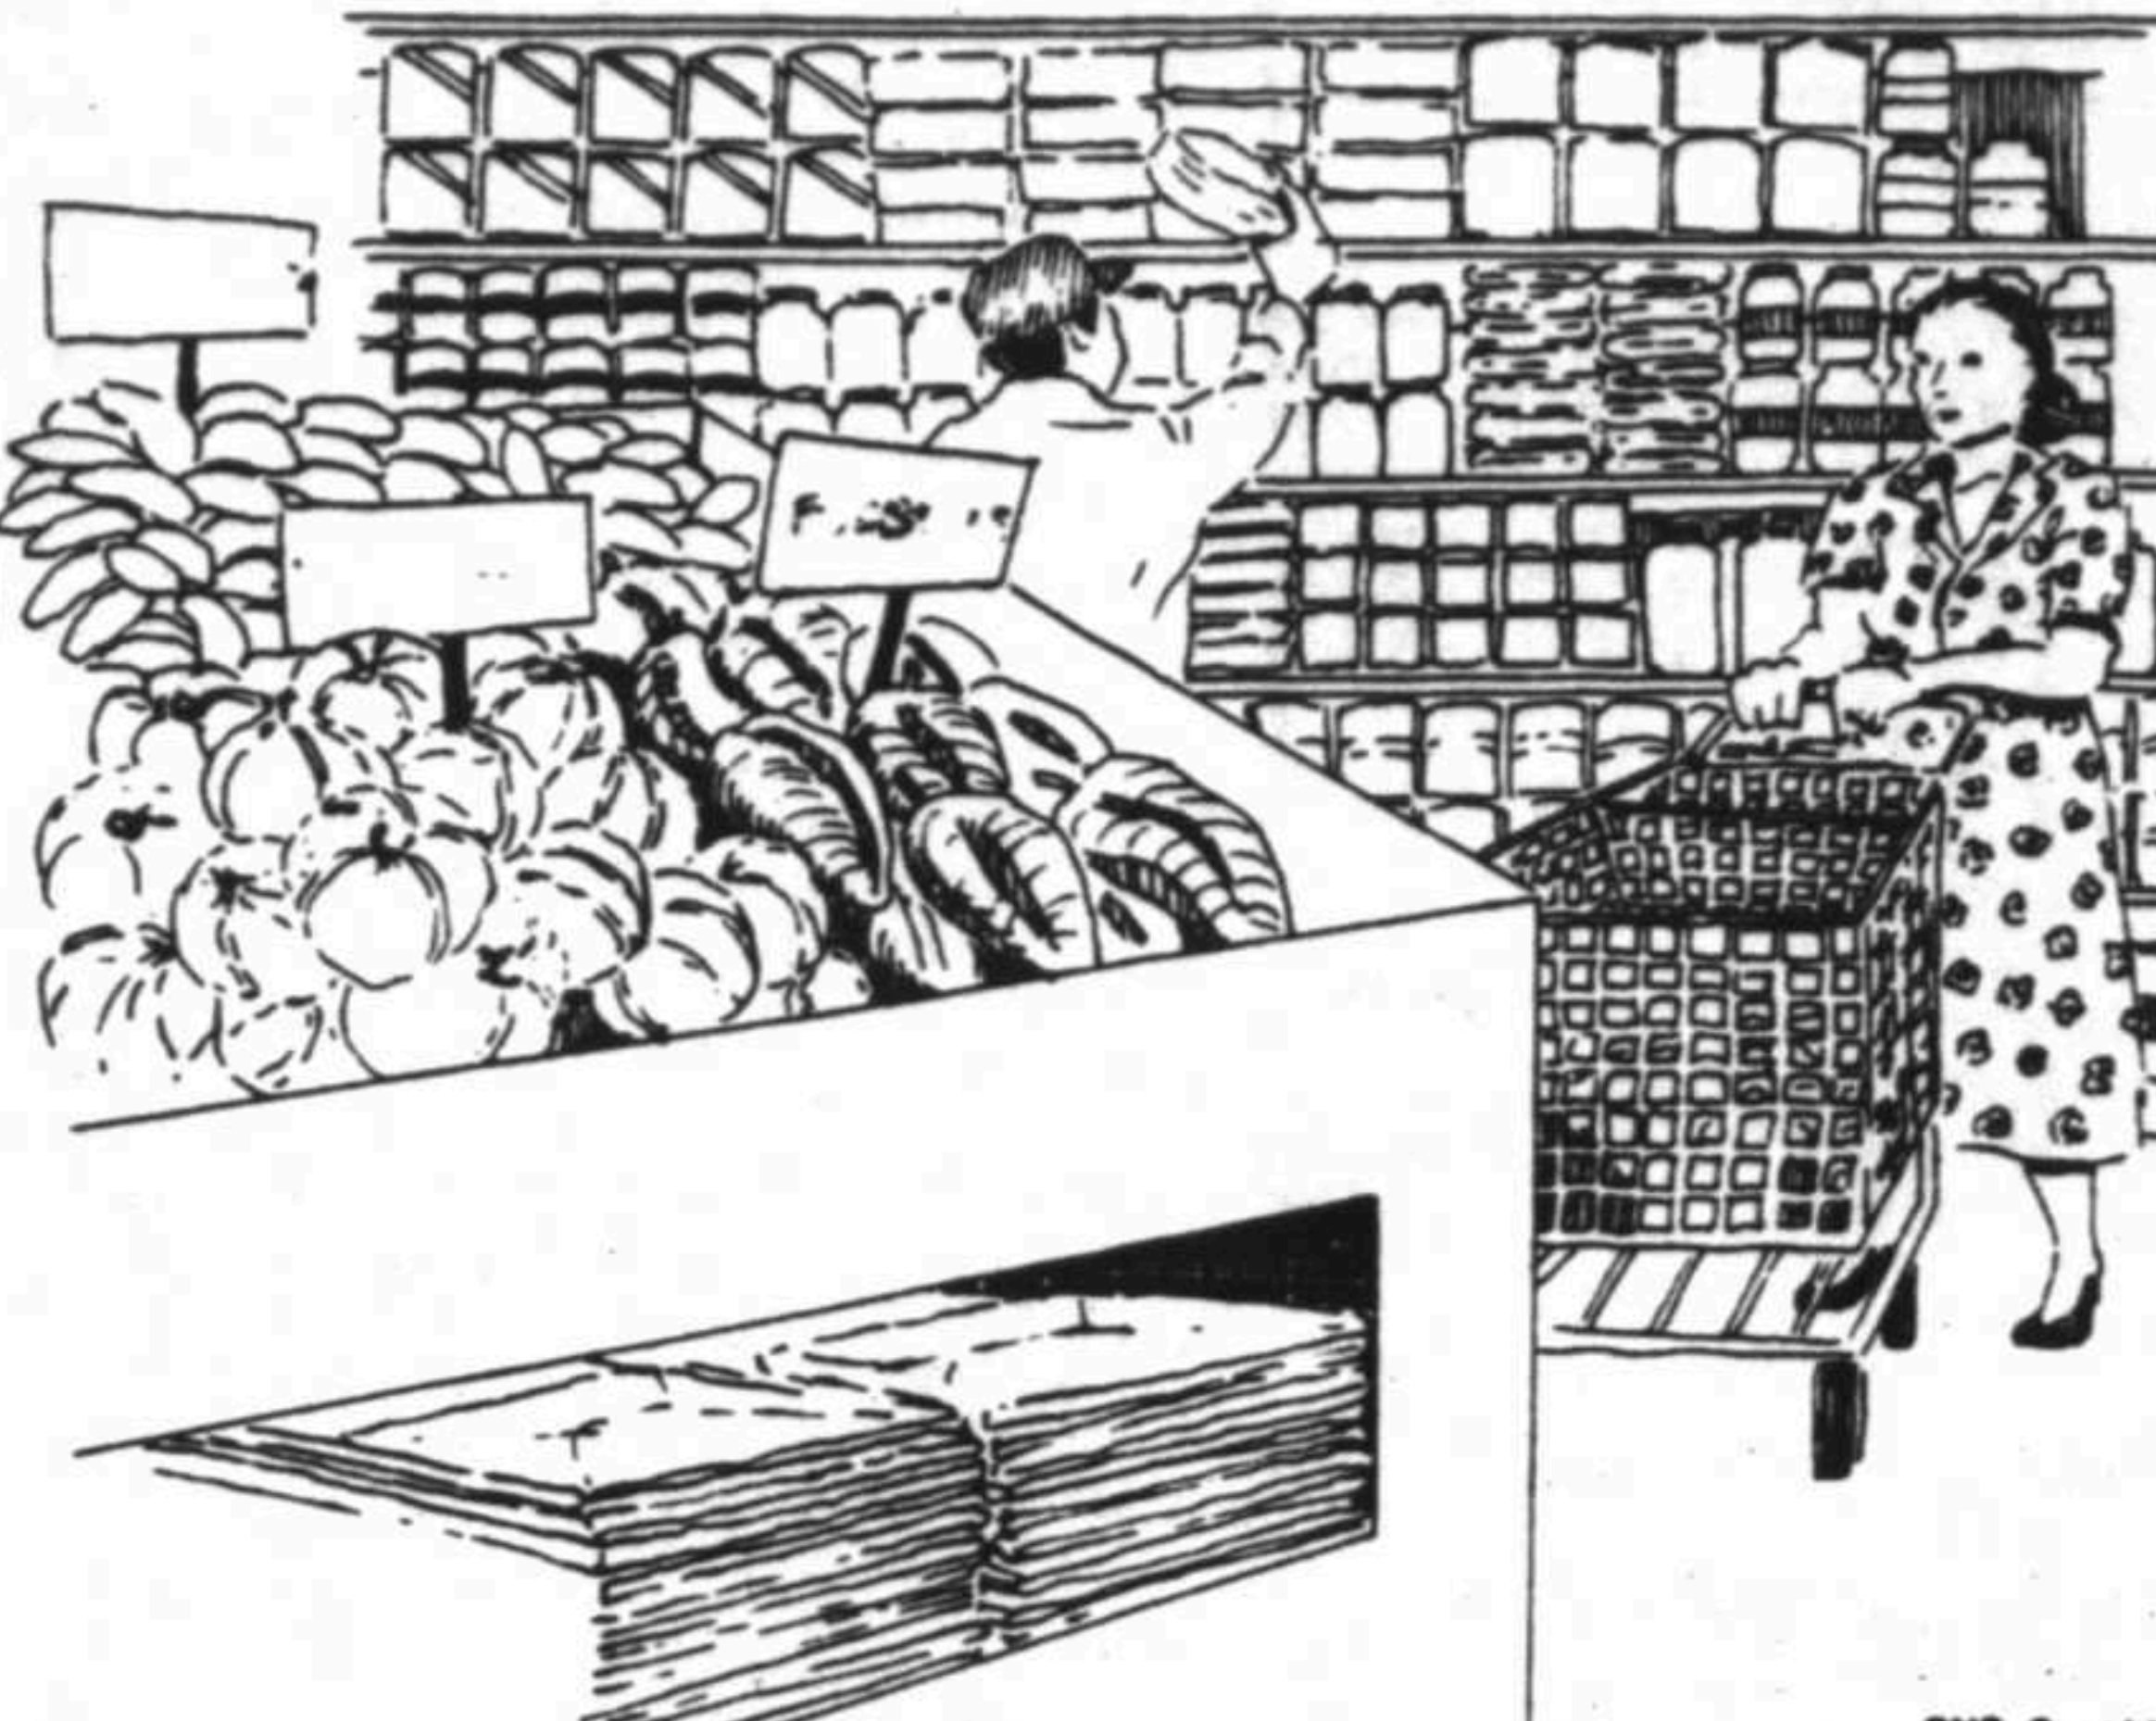

The inventor came up with the name after seeing a billboard advertising "Twinkle Toe Shoes." In 1940, the vanilla filling replaced the banana-flavored cream.

**FIG NEWTONS COOKIES** — According to Nabisco Brands, which now owns the trademark for this chewy cookie, the Fig Newton was invented in a Cambridgeport, Mass., baking plant with a newfangled machine that enabled the quick production of a jam-filled confection.

It was the late 1800s, and the jam was made from figs. The plant manager was fond of naming his new products after nearby towns — one of which was Newton, Mass.

**WONDER BREAD** — This soft, fluffy white bread was named after a balloon race by an executive of the Taggart Baking Co. of Indianapolis. (The company was bought by the Continental Baking Co. four years later.)

At the end of World War I, American bakeries began offering bigger

CNS Graphic

loaves of bread, Blum said. Elmer Cline, a Taggart vice president, was given the responsibility of merchandising the new, fatter loaf.

Cline was at the International Balloon Race when he was filled with inspiration and "wonder" at the sight of the sky filled with the colorful balloons.

Since then, the bread has been sliced and enriched, but the wrapper has always featured balloons in its design.

**BLUE BONNET MARGARINE** — This spread was named by an employee of Standard Brands of Texas who entered a "name the margarine" contest, said Caroline Fee of Nabisco Brands, its parent company.

The year was 1942, and a new margarine was introduced because the war had created a butter shortage. The contest was an effort to boost morale and find a name for this margarine. The winner submitted the name in honor of the Texas state flower, the bluebonnet.

The original logo was the flower, but when the margarine went na-

tional, the logo was changed to the young woman in a blue bonnet that seemed to have more consumer recognition than a state flower, Fee said.

**JELLO-O GELATIN** — The story of Jell-O is the story of neighbors in Leroy, N.Y.: Pearl and May Wait and Orator Francis Woodward.

The year was 1897. Woodward founded the Genesee Pure Food Co. to make a cereal beverage called Grain-O. As one could imagine, Grain-O wasn't very popular.

That same year, the Waits, who owned a cough-syrup factory, developed a gelatin dessert. May Wait decided to call it Jell-O after her neighbor's cereal product.

It wasn't very popular, either. Woodward, however, was intrigued. He bought the Jell-O factory from the Waits for \$450 in 1902. For some reason, the squiggly dessert's popularity took off at the turn of the century and reached sales of \$1 million in five years, said Cliff Sessions, a spokesman for General Foods, which now owns the trademark.

**KOOL-AID** — General Foods also owns the rights to this beverage, which had its start in 1927 in Hastings, Neb.

E.E. Perkins, an entrepreneur, was in the business of making flavorings, spices and other household products. He first developed a soft-drink syrup, then devised a recipe for a powdered beverage flavoring, selling it in an envelope as "Kool-ade."

However, a picky Food and Drug Administration regulation banned the use of "ade" in the drink because the suffix means "a drink made from ..." (as in lemonade).

Perkins simply changed the spelling to "Aid."

**BARNUM'S ANIMAL CRACKERS** — Quick — name all 17 animals represented in this favorite children's snack.

Named after circus operator P.T. Barnum, the animal crackers were introduced in 1902 by Nabisco, although several other baking companies also made similar cookies. The colorful box, resembling a circus cage filled with animals, came with an attached string so that it could be hung on Christmas trees.

The 17 animals are bear, bison, camel, cougar, elephant, giraffe, gorilla, hippopotamus, hyena, kangaroo, lion, monkey, rhinoceros, seal, sheep, tiger and zebra.

**OREO COOKIES** — Another Nabisco treasure, Oreos were invented in 1912 and is the best-selling cookie in the world, according to the company.

Although the origin of the name remains unclear, it is thought to have come from the company's attorney, Adolphus W. Green, who helped consolidate several baking companies to form what has become Nabisco today.

Green, who was a scholar of classics, may have thought of the name Oreo, which means "mountain" in Greek. The early Oreo was a mountain-shaped biscuit.

It may also have been derived from "or," the French word for gold. The original label had scrollwork in gold, and the product name also was

in gold, according to Nabisco.

The company logo, an oval with a cross and two horizontal lines, is stamped on the chocolate cookie. The unusual symbol was discovered by Green in a book of medieval Italian printers' marks. It was said to represent the triumph of the moral and spiritual over the evil and worldly.

**BETTY CROCKER** — Even as early as 1921, keen corporate types at General Mills saw an opportunity for promotion with the creation of a fictional, motherly figure to represent a line of bakery mixes and small home appliances.

The company offered a free flour sack-shaped pin cushion to customers who successfully completed and submitted a jigsaw puzzle of a flour milling scene in bags of Gold Medal flour.

General Mills received thousands of puzzles, and with them came letters from homemakers wanting recipes and answers to baking questions.

Company executives invented Betty Crocker to answer those letters. The name Betty was chosen because it was a "warm and friendly name," and Crocker was in honor of the company's recently retired director, said General Mills historian Toll. Since 1921, Betty Crocker has been revised six times to modernize her appearance.

**HELLMANN'S AND BEST FOOD'S MAYONNAISE** — Why is this salad dressing called Hellmann's on the East Coast and Best Foods on the West Coast?

In 1902, Richard Hellmann, a German immigrant, opened a deli on Columbus Avenue in New York. His customers loved his sandwiches and the mayo made by his wife. She experimented with several recipes, and Hellmann kept track of the most requested recipe by tying a blue ribbon around the jar that held the concoction.

Today, the jar's logo still is a blue ribbon. It is known as Best Foods in the West because the recipe was farmed out to be made by the Best Foods factory in Santa Fe Springs, Calif.

### CONSUMING INTERESTS

## Ice cream on-a-stick tasty but expensive

By LINDA ANDERSON

OK, I admit it — I can't resist any new ice-cream-on-a-stick that comes out. I can use my kids as a handy excuse for enjoying Walt Disney movies and shopping in toy departments, but when it comes to ice cream I sometimes have to talk them into trying it.

Taste-testing Fudge-tastics ice cream sundaes on a stick was entirely my idea (Of course, this time I didn't have to talk them into it very hard). This chocolate-coated, vanilla ice cream on-a-stick from Baker's (the baking chocolate people) is supposed to have a "twist" — a middle of fudge sauce. (Get it? "Sundae on-a-stick.") Now since I prefer chocolate sundaes to strawberry or butterscotch, it was lucky for me that chocolate is the flavor this "sundae" comes in. I guess that's why they named it "Fudge-tastics.")

We bought a box of Fudge-tastics to check it out for taste, price and advertising accuracy. And I even let the small taste-testers share in this test.

An 11-ounce box of four bars (2.75-ounces each) cost \$2.50, or about 85 cents each. Seemed a little steep to me.

Label advertising claims the product is a "Fudge Sundae" made with "vanilla ice cream with real fudge sauce," from Baker's, home of "fine chocolate since 1780."

Ingredients label lists skim milk as the first ingredient, and cream and sugar as the second and third. Ingredients for the fudge sauce are equally as unusual: skim milk, corn syrup and sugar are one, two and three. And the milk chocolate coating is not only made with, among other things, sugar, nonfat dry milk and butterfat, but it also contains that nutritional no-no, coconut oil.

If I had read the ingredients label first, I might not have wanted to try the product, but we tasted it first and read it second. And even if I had read the ingredients first, the picture on the box looked so wonderful, I might not have been able to resist it anyway.

Well, you know how looks can be deceiving? Here's another example. The photo on the box shows the perfect chocolate-coated vanilla ice cream bar ever made, but this one has a difference — smooth, creamy fudge sauce oozing out of the middle. Looks died-and-gone-to-heaven good.

Fact is, the ice cream bars look pretty, all right, but the fudge sauce is almost as frozen as the ice cream, and most of it has pooled in the top, making it look like chocolate ice cream on-a-stick when you first bite into it.

The kids thought the ice cream bars were "terrific!" I thought they weren't too bad, just not as wonderful as their advertising led me to believe. And for what we got, it was much too expensive.

Anderson

## Panel of experts pick best vanilla ice cream

By KAROLA SAEKEL  
New York Times News Service

SAN FRANCISCO — If you really wish to test the mettle of an ice cream company, vanilla is what you want to get. With no assertive flavors to hide behind, the essential quality of the ice cream is revealed.

Seven brands of vanilla ice cream were tasted by our five panelists. Each could earn 100 points — 20 from each panelist. Each brand was judged on taste, appearance, texture and whether tasters would buy it.

First place went to Steve's (\$2.29 a pint), which was considered creamy and full of good flavor, even if rather sweet. It received 82 points, and all five tasters would buy it.

Second was Haagen-Dazs (\$2.29 a pint), also found creamy and smooth. One person thought it tasted like rich ice milk, and another considered the flavor light. It received 81 points, and four panelists would buy

it. Double Rainbow (\$2.29 a pint) received 78 points and was praised for good flavor, but got some criticism for granular texture and a salty aftertaste. Again, four people would buy it.

Ben & Jerry's (\$2.19 to \$2.39 a pint) got good marks for smoothness. Oddly, one person found it too sweet while another would like more sugar in it. It had 66 points, and the vote on buying it was 3 to 2.

Dreyer's (\$2.69 a quart), with 64 points, was found to have a buttery taste. Two tasters would add it to their shopping lists.

The remaining entries, Breyers (\$2.69 a quart) and Bud's (\$1.79 a pint), were considered too airy and/or icy. Breyers had 43 points and Bud's 38 points.

The panel, which tasted all products blind, consisted of two caterers, a food writer, and two chef/owners of a restaurant.

## AT WIT'S END

Ask a stupid question,  
get a brilliant answer

By ERMA BOMBECK

The other night I climbed into bed and had just closed my eyes when my husband asked, "Is my light going to bother you?"

Every night of our married life he has asked this question, and every night of our married life I have replied, "Not unless I plan on sleeping." It's not important that I sleep with No. 30 sunblock on my eyelids. What is important here is that somewhere between civility and habit, we know the answers to most questions before we ask them.

My kids always like to remind me that when they were growing up, one of my favorite banalities was, "Are you going to go through life with a finger up your nose?" As my daughter points out, "Not only was it a stupid question, but you stood there insisting on an answer, like we had to think about it."

Why do we do it? Why do I stand in the emergency ward of a hospital and ask, "Would you take a personal check?" Get real! They'd take my car in hand if they thought I couldn't pay the bill any other way.

Waiters who stand at your table and ask, "Could I tempt you with dessert this evening?" know the answer before they ask the question. But first, they have to wait until everyone at the table looks at everyone else with just the right amount of hesitation before someone whines, "Why don't you bring us a whole cake and four forks ... just to taste."

"You don't really want to see our home movies, do you?" is another given. I don't know why people ask it. Nor can I figure out the speaker who asks, "Will you forgive me for digressing for a moment?" Especially if he is digressing at an hour when you should be undressing and going to bed!

Everyone is guilty at one time or another of throwing out questions that beg to be ignored, but mothers seem to have a market on the supply. "Do you want a spanking or do you want to go to bed?" "Are you going to let a little dog like that scare you?" "Do you want Mommy to go away and never come back?" "Don't you want to save some of the pizza for your brother?" "Didn't anyone see the dog scratching on the door to get out?" "Wasn't there any change?"

It's possible we live in hope that someone, someday, will give us the answer we want to hear. Then it's possible we just love to hear ourselves talk. You know what I'm saying?

Erma Bombeck is a columnist for Universal Press Syndicate.

## DEAR ABBY

## Unhappy man wants to become a woman

By ABIGAIL VAN BUREN

(EDITOR'S NOTE: Abby is off on a two-week vacation, but she left behind some of her favorite letters taken from her best-selling book, "The Best of Dear Abby.")

**DEAR ABBY:** I am a 23-year-old male nurse. I love sports and excel in track. I was saved by the grace of Jesus Christ two years ago. I read the Bible daily and sing in the gospel choir.

Even though I am a born-again Christian, I am miserable. All my life I have wanted to be a woman. I would love to be on the U.S. Women's Olympic Track Team. I can cook, sew and type. I have never cared anything about mechanics, engineering, or any of the so-called

masculine careers. I hate hunting and fishing. I could never kill a living thing.

Abby, this secret desire to be a woman is about to destroy me. I am not a homosexual, but I'd give anything to have a sex-change operation. Where is this done? Is it against the law? I will go anywhere. I'd rather be dead than continue living like this.

Abby, if the Lord really loves me, why did he give me a man's body when I feel and think like a woman? I have been this way all my life. Please help me! — SAVED BUT DIFFERENT

**DEAR SAVED:** The Lord created all of us, and why he made you "different" I do not know. Nature sometimes makes biological blunders, as is the case when one's body does not conform with his (or her) natural feelings. You are not alone. Don't feel guilty. One cannot help what he feels.

I believe that knowledge, skill and

talent are divinely inspired, and that those scientists, physicians and surgeons whose combined efforts have made sex-change operations possible do so with God's guidance. For information about sex-reassignment surgery and related problems, inquire at the nearest medical school that has a human sexuality program.

**DEAR ABBY:** Three years ago, my 58-year-old husband had a brief affair with his secretary. It was no secret, and all the tongues in this little town were wagging a mile a minute.

Once I found a motel key in his coat pocket, and he had the gall to tell me that he got tired driving so he checked into this motel to take a little nap. (Three miles from home!)

Well, last year he had an operation that left him practically impotent, and since then I couldn't ask for a more devoted husband. He phones me if he knows he's going to be half an hour late. He buys me presents, sends me flowers, and even takes me

on business trips, which he never did before.

Of course I'm enjoying all this, but why in your opinion has my husband suddenly turned over a new leaf? — WONDERING

**DEAR WONDERING:** Probably because there's not much left under the old one.

**DEAR ABBY:** I saw a man on the commuter train reading a book titled "Dear Abby," and he sure seemed to be enjoying it. I suppose you wrote it. Please send me the book, and if it's any good I'll send you a check. — RUSSELL

**DEAR RUSSELL:** Send me the check, and if it's any good I'll send you the book.

**DEAR ABBY:** I just found out I'm pregnant. Will you please send me a booklet on how to have a lovely wedding? — EXPECTING

## Retin-A scams bilk consumers

Associated Press

Each year millions of U.S. consumers are bilked by a huge variety of scams, according to an article in a recent Ladies' Home Journal. At base, they appeal to an ancient emotion: greed. Many successful scams, however, are based on real news, such as the latest breakthroughs in medicine.

It's no surprise the scam artists moved in quickly after doctors announced a new application for Retin-A. The prescription acne cream contains a derivative of vitamin A. It may help reduce wrinkles and improve sun-damaged skin.

Soon after the announcement, ads in magazines and newspapers touted creams that were supposedly related to Retin-A. These products promised to get rid of wrinkles at less cost than Retin-A and without a prescription.

But these potions are mere imitations, because they do not contain the active ingredient in Retin-A, tretinoin. According to Faye Peterson, of the U.S. Food and Drug Administration (FDA), there was "an explosion of these products last year." She

stresses that Retin-A is available only by prescription from a doctor; any cream without a prescription is not true Retin-A and has not been FDA-approved. Furthermore, because no one knows what these fake creams contain, they may be dangerous.

Contact the local FDA district office and ask them to investigate ads for Retin-A without a prescription before buying one of these creams.

To further assist consumers, the Journal also calls their attention to pamphlets published by the Federal Trade Commission. For information about today's most prevalent scams, write to the Public Reference Room, 130 Pennsylvania Avenue, Washington, D.C. 20580, or call 202-326-2222.

## 'Smallest pager' worn on wrist

New York Times News Service

James Bond has had toys like these for years, but in the real world, wristwatch communications systems are brand new. Motorola Inc. and the Timex Corp. have now introduced what they call the world's smallest pager.

It is the Motorola Wrist Watch Pager, weighing less than two ounces. It operates continuously for more than 40 days on one battery and stores up to six telephone numbers.

The wristwatch is designed to be compatible with existing pagers that use the Radio Common Carrier (RCC) service.

When the pager's number is dialed, the caller hears a beep.

The caller must then dial the number at which he or she can be reached. That number then appears on the liquid crystal display of the wristwatch pager, which has beeped a short tone to alert the wearer.

The liquid crystal display also shows the time a message is received.

The unit also accepts messages from two telephone numbers — for example, home and office — designated through the provider of the Radio Common Carrier service.

The pager emits a different tone for calls from each of those numbers.

The units will be available in December for about \$300 retail through RCC providers, and eventually in stores, distributed by Timex.

## STATE in brief

### Richards' chartered boat passes inspection

GALVESTON (AP) — The 60-foot yacht used by Democratic gubernatorial candidate Ann Richards on her tour of Gulf Coast passed inspection Wednesday by the U.S. Coast Guard after questions about the boat's licensing arose.

"It was inspected in Freeport," said Mark McKinnon, a spokesman for Ms. Richards. "They looked at the boat. There's no problem with the boat and no problem with our leasing arrangement with the boat."

"They have some questions about the owners of the boat and their licensing so we have proceeded with out those members of the crew. Now it's between them and the Coast Guard."

The Houston Post reported Wednesday that the vessel's owner and captain are the subject of Coast Guard charges that they have chartered the Miss Goco without a license.

Coast Guard officials said that because the yacht was the subject of a license hearing last week and is likely to be the subject of a future hearing, the agency is investigating the specifics of Ms. Richards' agreement to use the yacht.

The lease appears to be a legal use of the boat, said Coast Guard Lt. Cmdr. R.H. Arredondo.

Richards

### Crane collapses on workers

LA PORTE (AP) — Four workers were treated and released from an area hospital after being injured when a crane apparently collapsed on a bridge being built across the Houston Ship Channel.

The four injured workers — the most serious with a broken leg — were treated Wednesday and then released from Baytown Humana Hospital.

"There were no serious injuries," said Doug Pitcock, a spokesman for Williams Brothers Construction Co. Inc., which is building the bridge with Traylor Brothers Inc.

The accident occurred at about noon Wednesday when a crane fell about 330 feet from a derrick and landed on the ground, Pitcock said. The men were on the derrick when the crane fell.

Nobody fell, and the crane didn't land on anyone, Pitcock said.

The bridge will connect La Porte and Baytown. When completed, the two main piers of the bridge will each be 440 feet tall.

### Texas popular with Britons

AUSTIN (AP) — About 230,000 British visitors traveled to Texas in 1988, which surpassed by 63,200 the number of Canadian visitors, according to the Texas Department of Commerce.

The 230,000 tourists "now ranks second only to Texas' neighbor to the south, Mexico," said Bill Taylor, director of the department's tourism division.

The department, relaying figures from the U.S. Travel and Tourism Administration's annual survey, said Texas was the fourth most popular travel destination in the United States for British visitors in 1988.

### Law helps handicapped

AUSTIN (AP) — People driving automobiles with handicapped license plates, as of Friday, will be able to get full service at gas stations, yet pay lower self-service prices.

Rep. James Hury, sponsor of the legislation, said the benefits would be offered only at stations that provide full service.

Hury, D-Galveston, said the new law is patterned after a California statute.

### Proposal draws support

AUSTIN (AP) — A \$500 million water bond proposal on the November statewide ballot has something in for most everyone, not just residents in poorer pockets of the Texas-Mexico border, bond supporters say.

State elected officials joined religious and other organizations Wednesday in support of the proposed state constitutional amendment.

## Man to be charged in in-laws' murders

WACO (AP) — A Waco-area man was being held in lieu of \$500,000 bail today in connection with the fatal shooting of three in-laws, including a Waco police officer.

Billy Wayne Coble, 40, was arraigned Wednesday on a murder charge in the slaying of Waco Police Sgt. John Bobby Vicha, the brother of his estranged wife Karen. Coble was being held at the McLennan County Jail in lieu of \$500,000 bail, Justice of the Peace David Pareya said.

Authorities said he is expected to be charged in the shooting deaths of his wife's parents once the district attorney's office completes its investigation.

Officials say that after Coble shot the three Tuesday evening, he bound and gagged his three daughters and a nephew and then abducted his wife.

The children were later found by Chad Stanley, 16, a friend of one of the daughters.

"We got them out of the house because they said he was coming back, and he said he was going to kill himself," Stanley said.

The incident ended late Tuesday after Coble, in what officials called a suicide attempt, crashed the car he and his wife were traveling near Meridian, about 45 miles northwest of Waco.

"The chase didn't last very long," said Bosque County chief deputy Dewell Harper. "The guy sped up to

Coble

80, then intentionally ran into a truck that had pulled over to the side of the road."

"That's what he was trying to do — suicide and another murder," Harper said.

The Cobles were not living together, said Lt. Coy Jones.

Coble was released from Goodall-Wichter Hospital on Wednesday morning and was transferred to jail. Mrs. Coble remained in the hospital Wednesday after undergoing treatment for cuts and abrasions, according to a hospital spokesman.

The driver of the truck the Cobles' car hit also remained in stable condition in the hospital after undergoing treatment for cuts.

Law enforcement officials and friends of the Vichas said Wednesday that a series of disturbances relating to a pending divorce between Billy Wayne and Karen Coble preceded the killings.

Sgt. Roy Halsell of the Waco Police Department said Coble was arrested Aug. 4 and charged with false imprisonment. A McLennan County Grand Jury indicted Coble last Thursday on kidnapping, in relation to the incident.

The Cobles were married July 3, 1988. Karen Coble filed a petition for divorce on July 10, 1989, citing discord, according to records filed in the McLennan County Courthouse. She reported that there was "no reasonable expectation of reconciliation."

A hearing on the divorce was to be held Friday.

Vicha, an 18-year veteran of the police department, worked directly under Waco Police Chief Larry Scott, a police spokesman said.

## Some Dallas officials criticize patrolman union's billboards

DALLAS (AP) — Some city officials have denounced a Dallas Patrolmen's Union billboard designed to draw attention to a \$17.9 million pay and benefits proposal the union wants the City Council to approve.

"I don't know of anyone who supports police officers as much as I do, but they're getting almost into propaganda and coercion. I think it alienates people," said Mayor Pro Tem John Evans.

The billboards, at three downtown locations, depict a dead police officer lying face down next to a police car.

The message reads: "You wouldn't risk your life for a million dollars. A police officer does it for a lot less. Support the police for a pay increase."

Among the benefits the union is seeking is a 6 percent pay raise.

Council member Al Lipscomb, who supports the pay raise package,

said the billboard campaign "definitely will turn people off."

"It doesn't do that union any good, nor the police officers, nor the City Council, nor the city, to use those type of tactics," Lipscomb said.

Union President Robert Palmer said the billboard is dramatic but straightforward and honest. "We've gotten a lot of calls supporting us and the police pay raises," he said.

City Manager Richard Knight has recommended a \$10.3 million package of additional police spending for the fiscal year that begins Oct. 1. The package would pay for 150 more police officers and improve pay for officers in some jobs, but it does not include across-the-board raises.

Deputy Mayor Pro Tem Diane Ragdale said the billboards are intended not to support raises but to protest the Police Department's deadly force policy.

## Girl in 'Terms of Endearment' commits suicide

WILLIS (AP) — The death of a 15-year-old Willis High School girl who had a role in the Oscar-winning movie, "Terms of Endearment" was a suicide, a justice of the peace has ruled.

Justice of the Peace Carolyn Cox ruled Wednesday in the death last Saturday of Amanda Leah Watkins, who at age 8 played the role of Meg in the movie partially filmed in the Houston area.

Authorities said the ruling was made despite the lack of a suicide note or any indication that the girl had been contemplating suicide.

The girl, whose body was found beside a .410-gauge shotgun, died of a single shotgun blast to the head, authorities said.

The girl's stepfather, Charles Lyons, found the girl's body in the master bedroom of their Lake Conroe home, authorities said.

The death stunned the girl's classmates and officials at the high school, who said she had recently made the varsity tennis team and had been looking forward to starting her sophomore year this week.

## Bulldogs face scrimmage test

By BILL PRICE  
Sports Writer

Friday brings the first test against another team for the 1989 Midland High football squad as the Bulldogs travel to Monahans to scrimmage with the Lobos.

The junior varsities from the two camps will face off at 5 p.m. while varsity actions picks up at 7 p.m.

The matchup is a repeat of last year's opening scrimmage, which the Bulldogs claimed by a 2-1 touchdown tally in Memorial Stadium. Both schools fielded strong units last season, with MHS ending 1988 at 9-1 and in a three-way tie for the 4-5A title. Monahans was 8-2 in the regular season and advanced to the 4A quarterfinals before bowing out of the playoff picture.

[Both squads are similar this season in that both are in the midst of rebuilding with a lack of experience from last year. The Bulldogs return but one defensive and three offensive starters from a year ago while the Lobos claim four defensive and three offensive veterans.]

HOWEVER, MHS head coach Davis Corley has done a little research and said he is not misled by the number of inexperienced players at Monahans.

"I have talked to some people who think Monahans is going to be pretty good," Corley said. "They gave a tough scrimmage last year and I'm sure they will be a good test for us this year. They're not an extremely large 4A ball club but the have some exceptional athletes."

In his first season as head coach, Corley has instituted a few changes in the Purple Pack's veer offense and the scrimmage will give the MHS staff something of an opportunity to see where the Bulldog attack stands.

With an offensive line that averages 194 pounds per man, the Bulldogs have the size advantage up front. The Lobos have but one player (197-pound defensive tackle Reed Neff) near the 200-pound range. MHS will probably field Chris Spratt (215 pounds) and Joe Phillips (227) at the

guards, with 190-pound Stephen Beal at center and Cal Neatherlin (175) and John Braun (185) at the tackles.

Corley's new philosophy will implement the power game more than a year ago with plenty of straight ahead running between the tackles, especially early in the season when the offense has not fully developed.

"We want to try to get all of our defense and the kicking game in by the scrimmage. But on offense we just want to get the basic plays in. The first scrimmage comes up so soon after you begin workouts, that's just about all you can do."

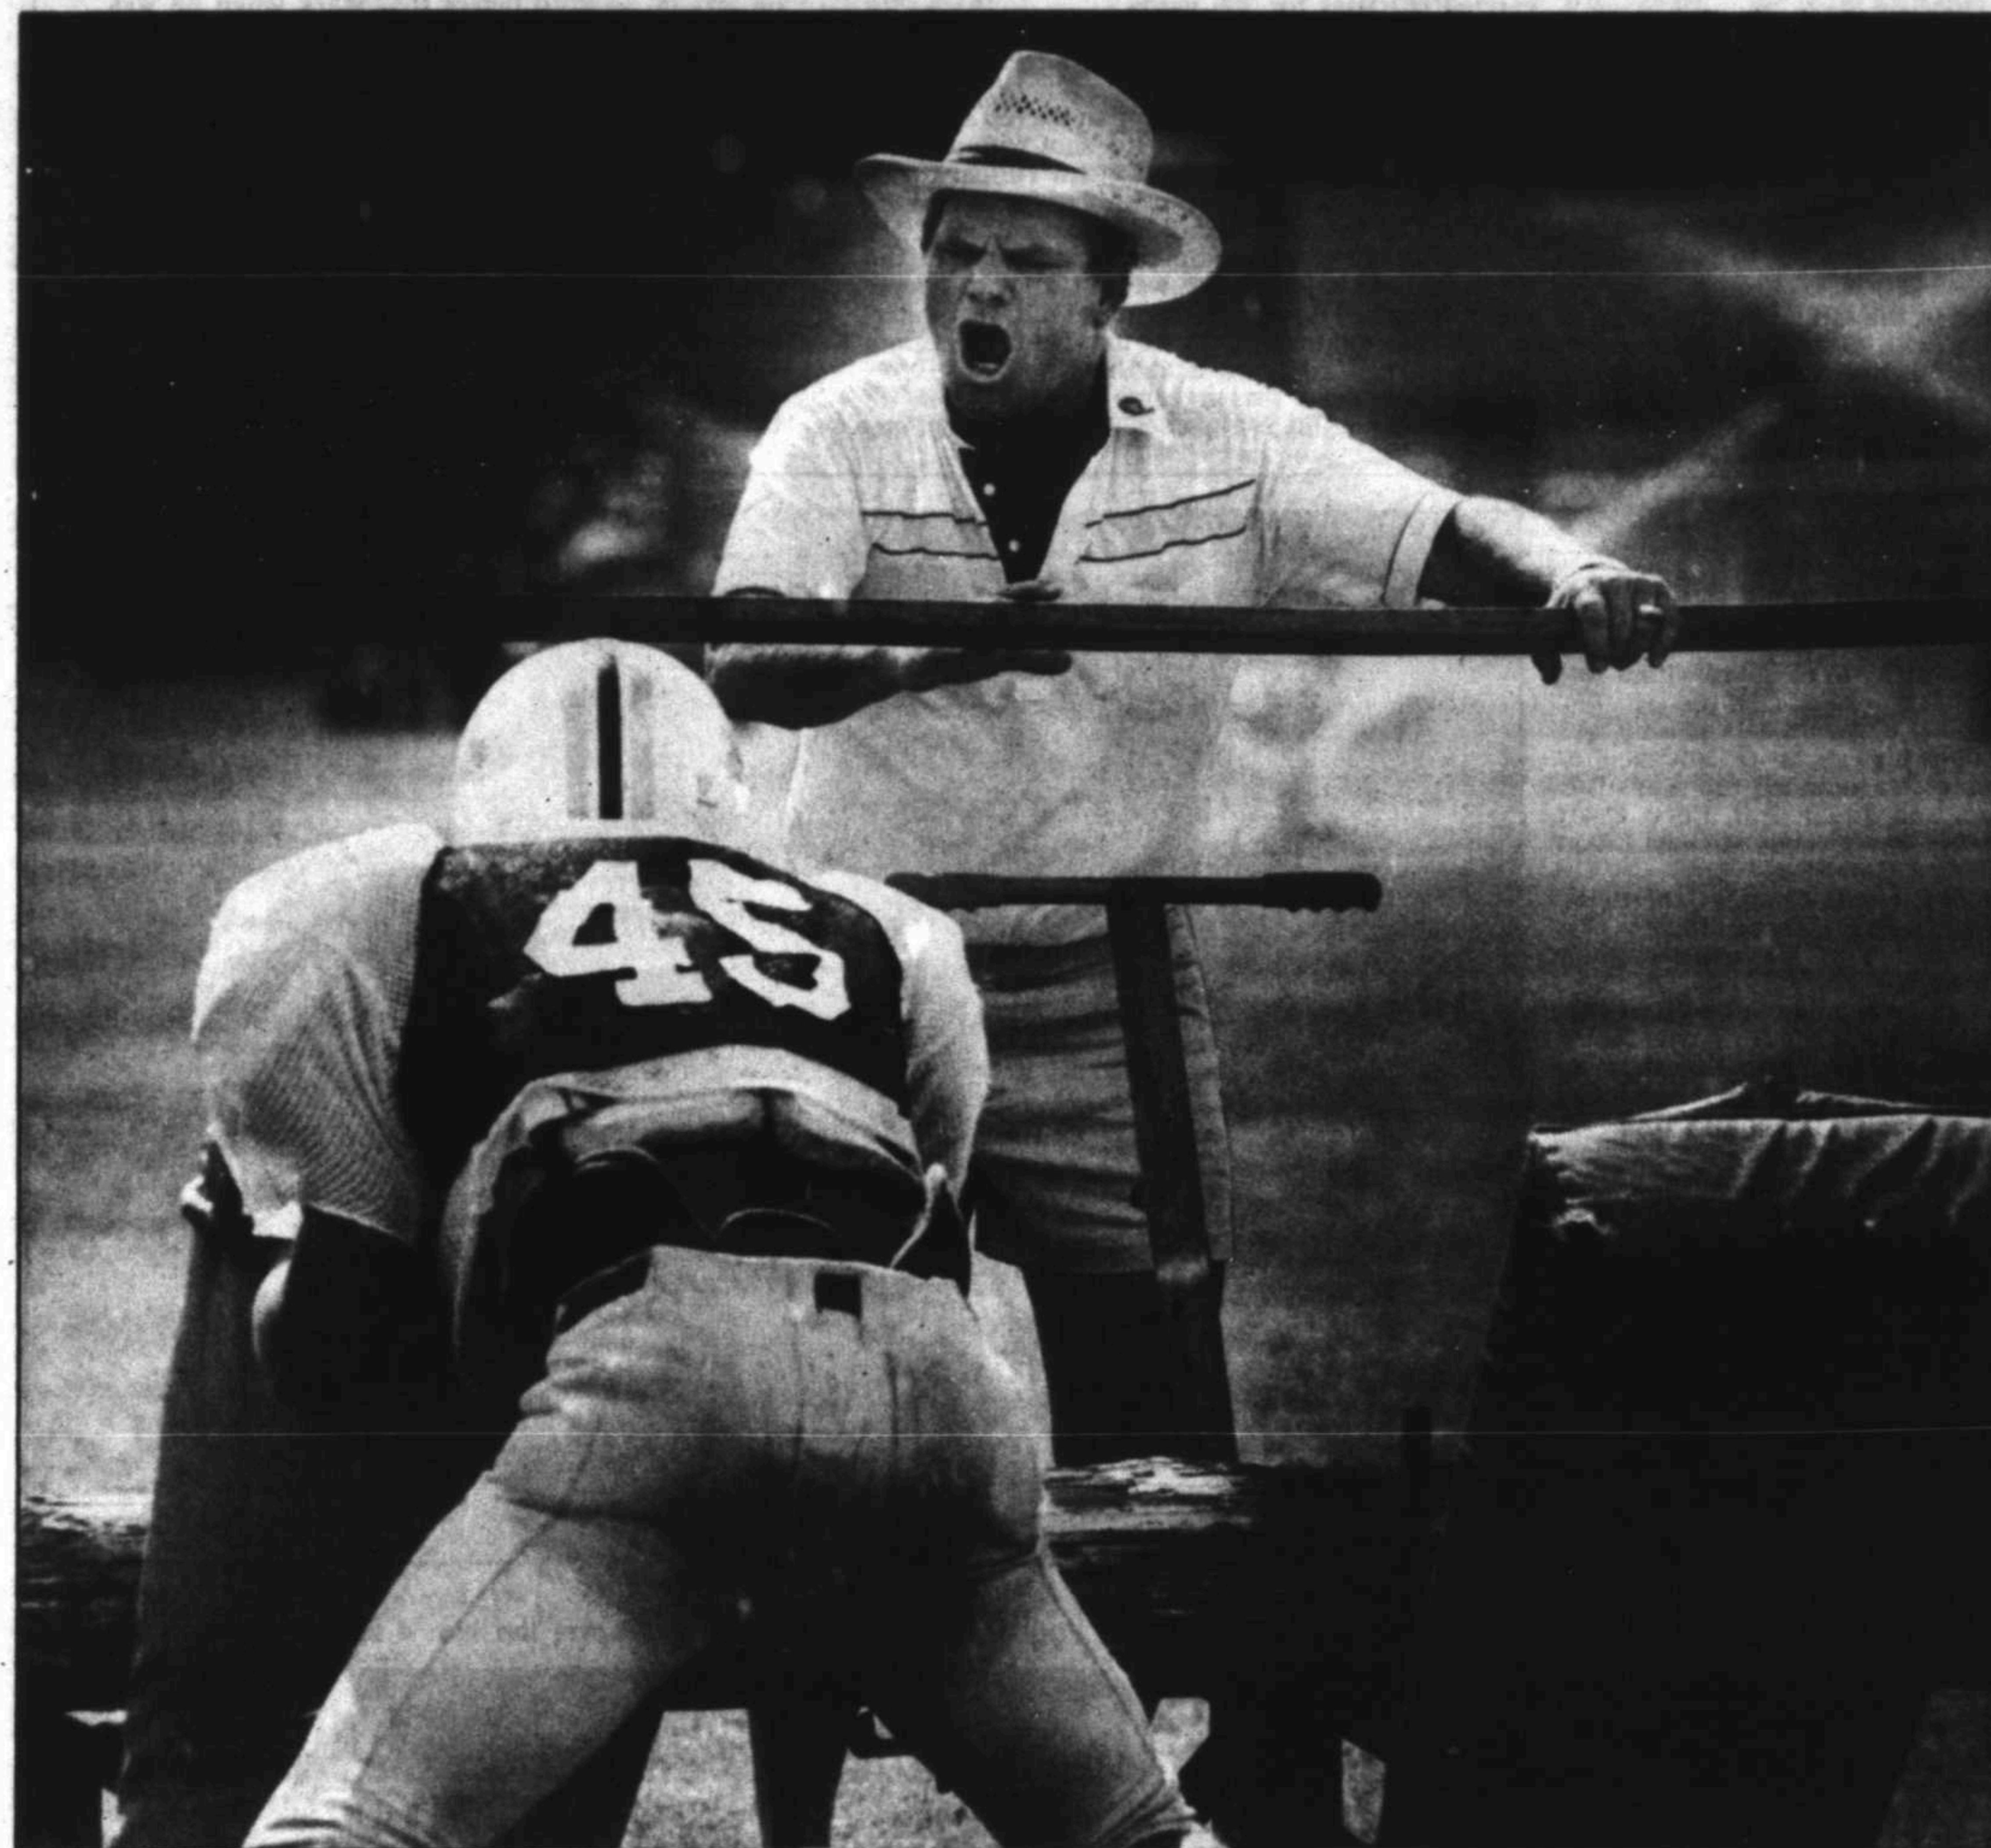

"We are going to keep the offense pretty base and just find out if we have all the kids at the right positions," Corley said.

Of course, an integral part of the veer offense is the option, and Corley said the both of his quarterbacks (seniors Jason Stone and Patrick Mowles) will get a chance to perform the triple option.

"We will still run the option and we want to pass some too. What we are striving for is a versatile offense that will fit our personnel," he said.

Defensively, MHS will field a plethora of newcomers in its 4-3 alignment and face a Bren Holland coached offense that boasts quickness as its main asset. But Corley said that his probable defensive lineup is also on the small side and might match the Lobos' quickness.

"I don't know if we're really that fast but we are quick in getting to the ball."

Midland Lee coach Earl Miller sends his Rebels through blocking drills in preparation for Friday's scrimmage with El Paso Jefferson.

## Rebels hit road for Van Horn

By TERRY WILLIAMSON  
Sports Editor

It's not exactly what Coach Earl Miller envisions as a positive situation, but his Midland Lee Rebels hit the road early Friday for a 2 p.m. football scrimmage date with El Paso Jefferson in lonely Van Horn.

"We didn't even have a scrimmage until I came up with this at coaching school this summer in Dallas," said Miller. "I understand that Jefferson is bringing only 30 players, so I don't know just how much we can get out of this thing."

The problem is that Miller has 70 kids he would like to look at and feels it will be impossible.

"I don't think we will be able to get everyone in the scrimmage, so we may scrimmage against ourselves after we get through with Jefferson," said Miller. "We definitely will have to work with the kids we know are going to be playing against Killeen because that is going to be a really big test for us."

Miller would like to play against a team with larger numbers than what Jefferson is bringing, but will take what he can get.

"This is like going to a dance. Everyone wants to dance with the pretty girl, but she won't dance with you. So, you dance with the ugly girl. It's better than not dancing at all. Well, this is better than not having a scrimmage."

Miller still likes what he sees in the Lee camp, despite the fact that Lee has had fewer preseason workout sessions than in years past.

"We had to give up some of our

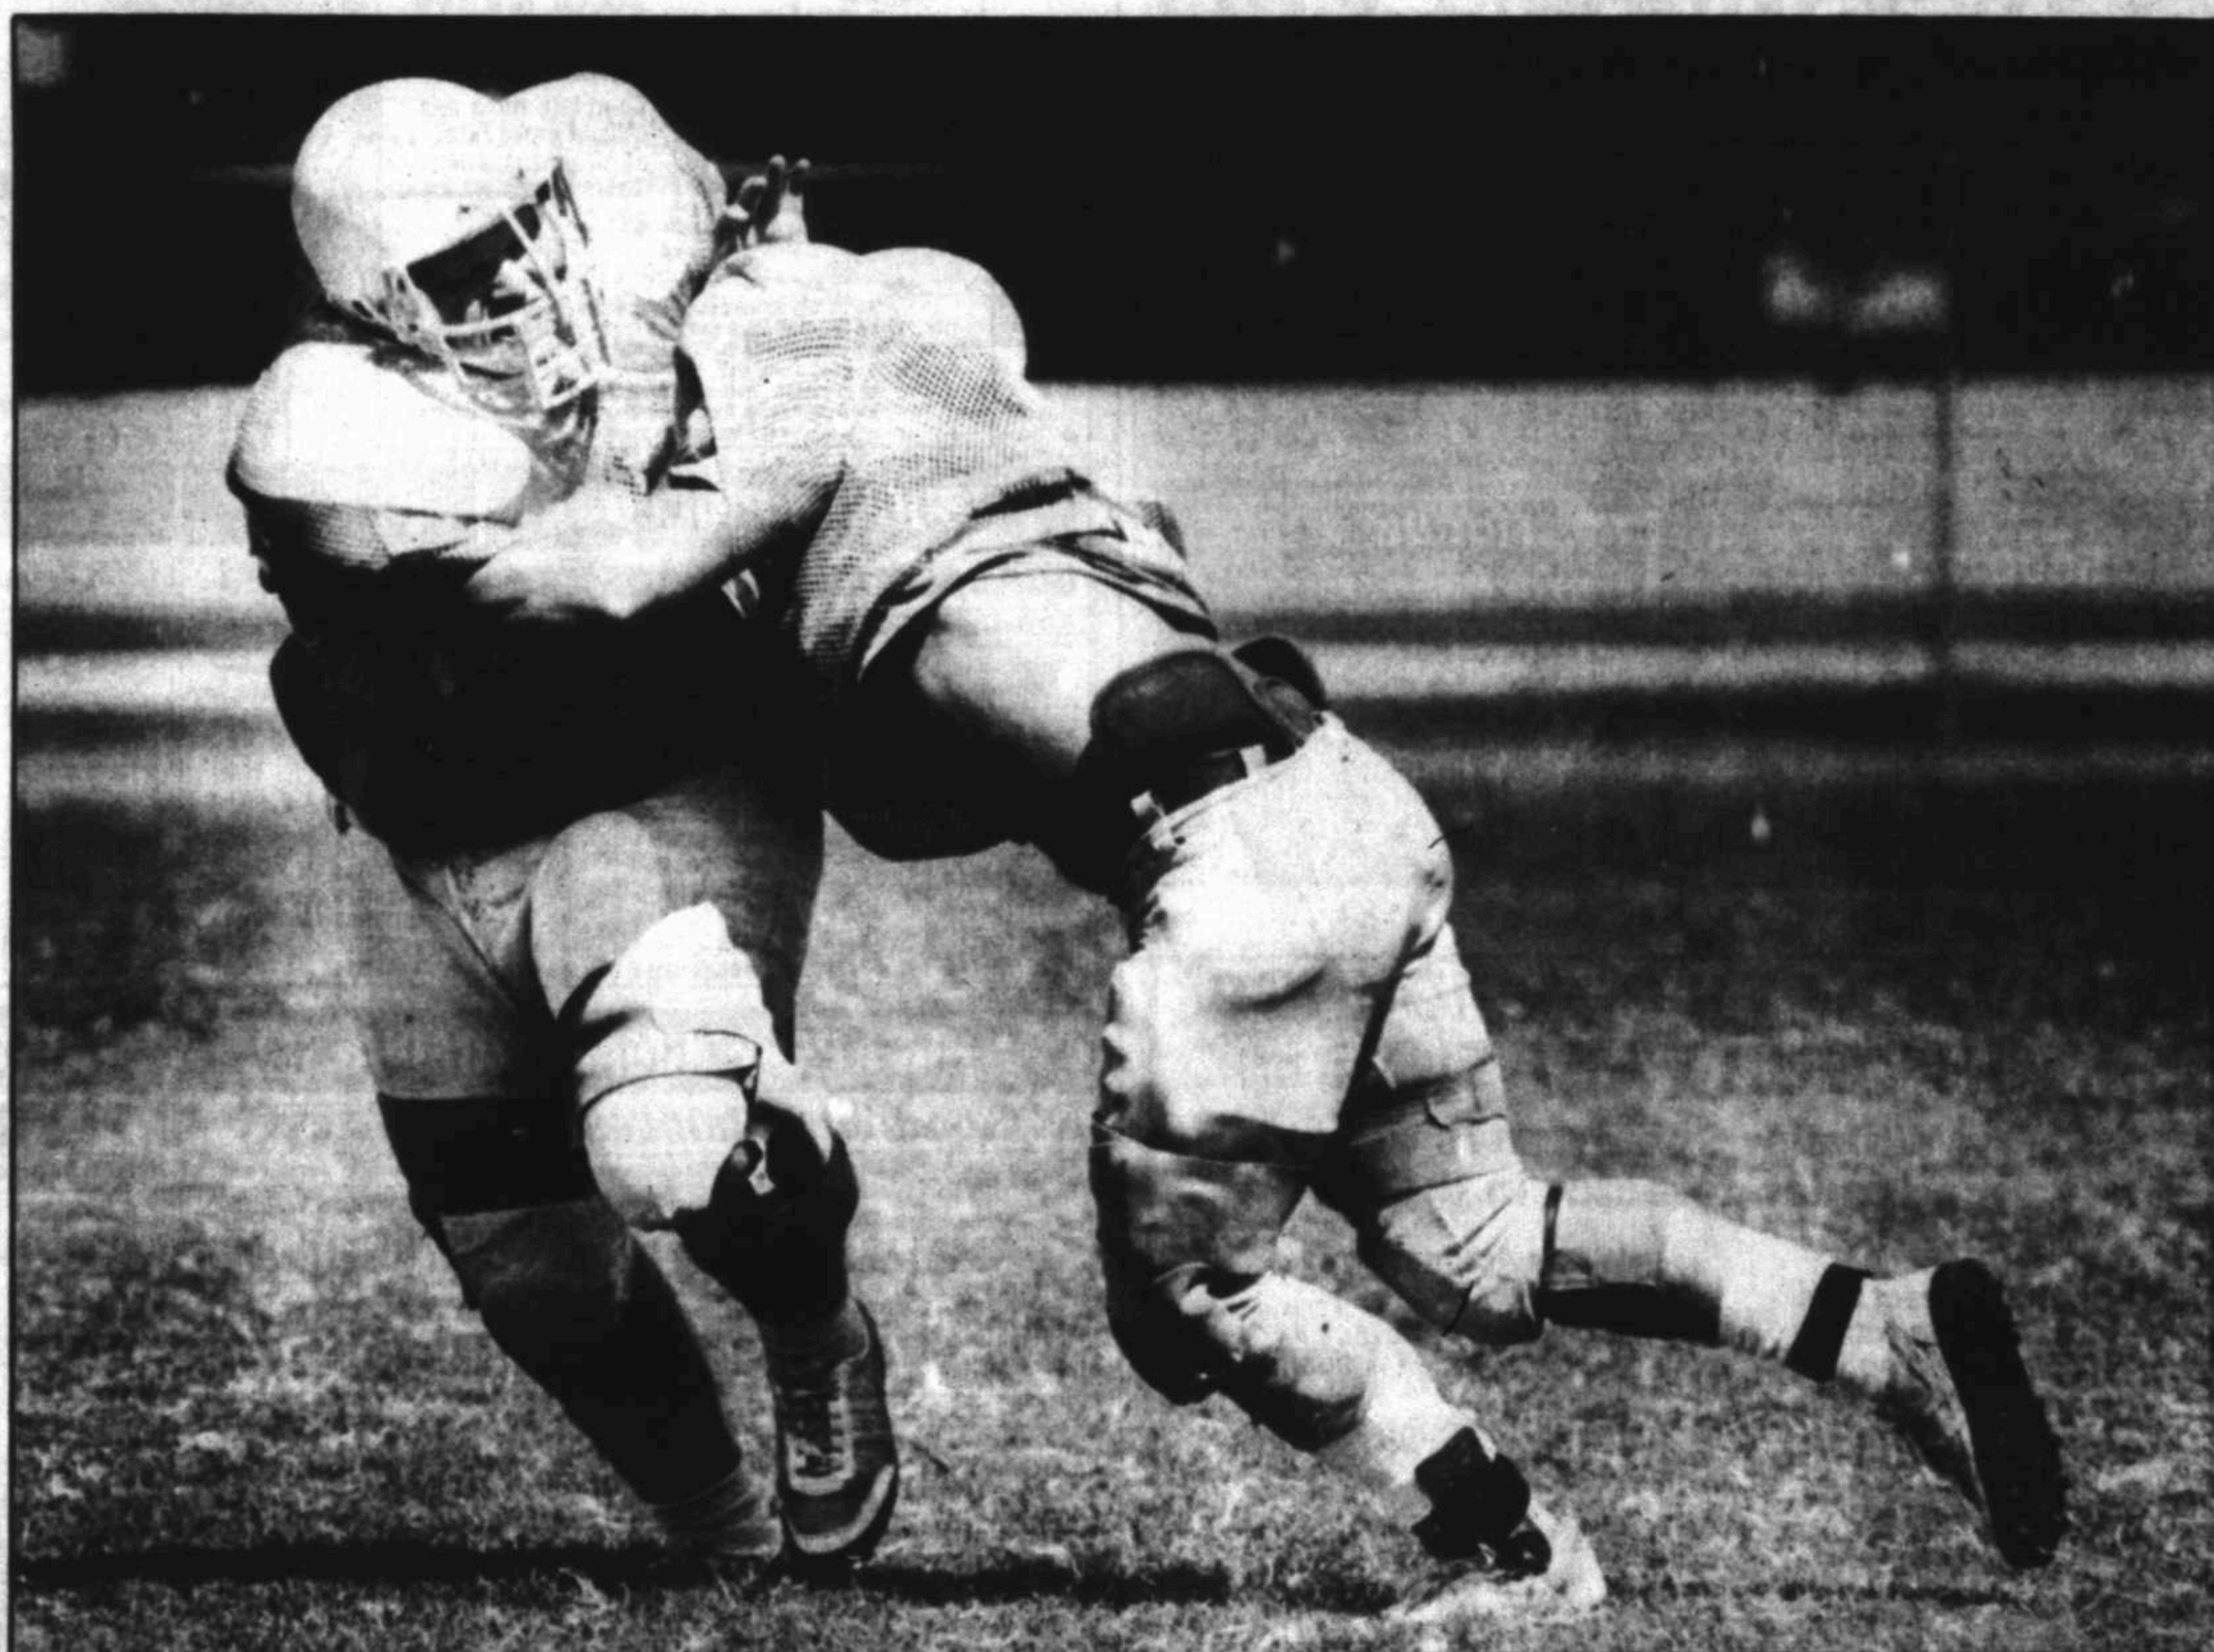

two-day workouts because we were told not to workout during the teacher in-service period," said Miller, "but I don't think that will hurt us as much as it would some other team without the overall experience we have."

"We have three good quarterbacks, a great running back and a three-year kicker back to go with a lot of other experience. We are an experienced ball club."

Miller will be using the Killeen game, Sept. 8 in Memorial Stadium, as the early season barometer for his squad.

"We've got a chance to be a good football team if we don't run into some bad luck along the way," said Miller. "We feel good about our situation, but there are still a lot of variables between now and the season. We still need to find out if we have a defense and we'll find out against Killeen."

"We've looked good so far. We scrimmaged Tuesday and I thought we looked really good."

Doug Shree/Reporter-Telegram

Midland High players work on defensive tackling techniques as the Bulldogs get set for Friday's scrimmage in Monahans.

## Serious teams eye national crown

By BILL GRIMES  
Sports Writer

Never mind, says Tommy Hawkins, that his Coors men's slow-pitch softball team has won eight of 12 tournaments this summer.

And never mind that Coors finished seventh in the 1987 national Class A tournament in Midland.

As much as he wants his team to do well, Hawkins is realistic about its chances in the upcoming national tournament at the Bill Williams Softball Complex.

Opening ceremonies for the tournament are at 7 p.m. Friday, with games to begin at 7:30. Stanley's Exxon of Midland will kick off play at 7:30 against an undisclosed opponent, with Coors to follow at 8:45, also against an undisclosed opponent.

The tournament continues all day Saturday and Sunday, before concluding Monday with championship game action at 1 p.m.

First-round pairings will be set during a manager's meeting at noon Friday at the Holiday Inn Country Villa.

Stanley's and Coors are the host teams, but two

other local teams are also in the tournament — Low Buck and Lupe's Day Care.

Midland Softball Association officials are only expecting 47 teams in this year's tournament, down from more than 80 last year in Savannah, Ga., and from 67 two years ago in Midland. National tournaments by competing associations — the United States Slowpitch Softball Association and the National Softball Association — are blamed for the drop in participating teams.

Hawkins said that will make things all that much tougher.

"The teams that are coming for this tournament aren't coming to play recreational softball," he said. "Some of these teams spend \$50-\$70,000 per year, and you don't spend that kind of money without expecting to win."

The 1988 and 1987 champions will be in town this weekend. Defending champion Smith Transport of Roaring Springs, Pa., and the 1987 Minneapolis (Minn.) Merchants are expected to be among the top teams, while other championship contenders should be Lemoyne Sleeper of Pennsylvania and Vernon's of Jacksonville, Fla.

Coors, 73-12, will take a run at the title with a

team that includes members of Midland's most storied sports dynasties. Former Texas Tech running back Jerry Zachery plays right field for Coors and bats .842, while Scott Shawn and Mike Mowles all contribute to the team's success.

Please see SOFTBALL, Page 5C

Here is a list of the remaining tournament teams:

Pala's Mobil Car Wash, Poughkeepsie, N.Y.; SSK Reds, North Hollywood, Calif.; Knight Derrill Painting, Midlothian, Va.; Roofing Consultants, Richmond, Va.; Dougherty's Seafood, Tazewell, Va.; Roy's Spaghetti House, Woonsocket, R.I.; Harbor Dock, Fort Walton Beach, Fla.; Texas Iron Works, Anchorage, Alaska; Whetstone's Seafood, Albuquerque, N.M.; Sonny's Bar, Casper, Wyo.; Brunswick Ford, Brunswick, Me.; U.S. Air Force; Miller-Premium Brands, Stevens Point, Wis.; Worth-Astoria Sports, Indianapolis, Ind.; Miller's Foot and Ankle Care, Kokomo, Ind.; Mailingers, Casper, Ind.; Hi-Ho Tavern, Great Falls, Mont.; Ruth Realty, Seattle, Wash.; Mid-NE Coors Light, Columbus, Neb.; Coffee Cup, St. Paul, Minn.; Viking-Coke, Elk River, Minn.; Orestona Eagles, Orestona, Minn.; Thompson Sporting Goods, Savannah, Ga.; Hargray Telephone Co., Savannah, Ga.; West U Inn, Hamilton, Ohio; Fry Fastening, Cincinnati, Ohio; Top Not Limousine, Bismarck, N.D.; R.C. Cola, Boise, Idaho; Deery Brothers, Cedar Falls, Ia.; Mossey's, Hammond, La.; Memphis Sox, Memphis, Tenn.; Mark Marino Construction, Peabody, Mass.; Conroy Construction, Topsham, Kans.; Tri-Guns Builders, Cedar Brook, N.J.; Crader-Huffman, Marble Hill, Mo.; Conrad Patterson, Wyoming, Mich.

STATS  
Robby Thompson of San Francisco leads the National League with 10 triples, and is the first Giant to have double figures in doubles (22), triples (10), homers (11) and stolen bases (10) since Gary Matthews and Gary Madrox in 1973.

SWINGS  
Greg Swindell lasted 4-innings and allowed four hits and six runs as the Indians lost to the Orioles, 7-4, Wednesday.

# Thurman, Newsome given release by Cowboys

From Staff and Wire Reports

IRVING — Wednesday was not a good day for Midland's Tyrone Thurman.

Thurman, the 5-3, 145-pound All-America return specialist from Texas Tech who was a former 1,000-yard rusher for Midland Lee, was trying to beat the odds against his size for a spot in the NFL with the Dallas Cowboys. However, on Wednesday, Thurman was given his release by Cowboys' Coach Jimmy Johnson.

Also, Johnson could not give 10-year fullback Timmy Newsome a starting job. So he gave the veteran player the next best thing — his walking papers.

In a meeting Wednesday morning with Coach Jimmy Johnson, Newsome requested his release if he

could not be a starter.

Cowboys officials tried to trade Newsome but found no interest. So they released him along with the rookie free agent Thurman.

Thurman earlier told the Reporter-Telegram that "it was my dream to play in the NFL, but if it doesn't work out, I can always play in the Canadian Football League."

It was not known Thursday if Thurman would investigate playing in Canada, or try to land with another NFL team.

Newsome, who played in the same backfield with Tony Dorsett and later with Herschel Walker, is ranked ninth overall and third among running backs on the Cowboys' career receiving list with 212 catches.

His best rushing season came in 1984 when he carried 66 times for 268 yards.

The development of free agent Broderick Sargent and rookie Daryl Johnston made Newsome expendable.

"They were performing better so we felt it was in Timmy's best interests to give it a shot with another club," Johnson said. "We're set at the fullback position. Timmy would have been 50-50 as far as making the team (if he hadn't requested his release)."

When asked if Newsome could still play in the NFL, Johnson said, "There weren't a lot of people jumping up and down wanting to get a 10-year veteran who was talking about retiring. I think Timmy's got talent and I'll leave it at that."

Newsome's best season came in 1986 when he caught a career-high 48 passes. With 32 receptions

last season through the Cowboys' first nine games, he was on pace to better that mark when he was sidelined.

Sargent said Newsome's departure came as a surprise.

"When you lose a veteran guy like that, it hurts," Sargent said. "He really helped me."

Center Tom Rafferty, a 14-year veteran, said he didn't believe Johnson was trying to rid the team of its long-time veterans in his first season since replacing Tom Landry as coach.

"I really don't read anything like that into it," Rafferty said.

Johnson also announced the signing of free agent wide receiver Jamie Dixon, formerly of the Detroit Lions and the University of Houston.

## Wilander, McEnroe fall

NEW YORK (AP) — Boris Becker used pluck and luck to survive in the U.S. Open. John McEnroe and Mats Wilander weren't as fierce or fortunate.

Becker saved two match points in the fourth set — one on a net cord that was the turning point of the second-round match — then dug down in the fifth to beat Derrick Rostagno 1-6, 6-7 (1-7), 6-3, 7-6 (6-6), 6-3.

Wilander, the defending champion who won three majors in 1988 and none this year, didn't make it to mid-night, losing 5-7, 6-3, 1-6, 6-1, 6-4 to 18-year-old Californian Pete Sampras.

And McEnroe, the four-time Open winner in the midst of an outstanding comeback, could not hang on against a player he'd never seen and knew nothing about.

"It's one thing if a guy plays really well. It's harder to take if I play as poorly as I did," McEnroe said after a 6-4, 4-6, 6-3, 7-5 loss to Paul Haarhuis of the Netherlands, the 115th-ranked player in the world and No. 3 in his country. "I can't think of the last time that I played that poorly throughout an entire match in terms of getting it going."

So McEnroe is gone. And Wilander, the fifth seed who was 14-1 in Grand Slam five-set matches, is out after what he called a "terrible match" against Sampras, ranked 91st.

"I think it was disappointing to be playing that badly," Wilander said. "I lost in all of them (the Grand Slam events), which is what matters. But it was worse the way I was playing tonight."

Becker would have been history,

too, if not for that net cord.

Rostagno, a 23-year-old from Brentwood, Calif., who is ranked 65th, held two match points in the fourth-set tiebreaker against the world's No. 2 player. He blew the first one with a forehand volley that went long.

On the second match point, Rostagno pinned Becker at the baseline. He rushed toward the net for Becker's return, ready to put away the biggest victory of his career.

The ball struck the tape, changed direction and Rostagno could do nothing with it. He returned the ball almost in self-defense and it went wide.

"I was thinking, 'If that didn't use up all his luck, nothing would,'" Rostagno said. "He must have had the feeling nothing could go wrong after that."

Becker certainly recognized how lucky he was. He also knew he had the fortitude to take advantage of the break.

"In a match like that, many shots sometimes go in your favor and sometimes against it," Becker said. "When you get a shot like that on match point, it is quite sweet."

"When you are at two match points in a tiebreaker and you get a shot like that, it could break his spirit. I figured his spirit was not that good at the beginning of the fifth set and I broke right away."

Rostagno couldn't recover. "I almost had it," said Rostagno, one of the true non-conformists on the tour — he once traveled the circuit in a minibus. "I felt I played two solid shots on the match points and

he was lucky to come up with a very big shot."

Seeded players who came up with enough big shots to advance on Wednesday included top seeds Ivan Lendl and Steffi Graf, Chris Evert, Martina Navratilova, Michael Chang and Zina Garrison.

Today, Lendl, Chang, Gabriela Sabatini, Stefan Edberg, Jimmy Connors and Tim Mayotte were in action.

McEnroe seemed to be primed for a serious run at the Open title for the first time since 1985. He lost in the first round in 1986 to Paul Annacone, fell to Lendl in the quarterfinals the next year and was beaten by Mark Woodforde in Round 2 last year.

The loss to Haarhuis, the first qualifier ever to beat McEnroe in a Grand Slam event, was hard for McEnroe to swallow.

"I played like a poor player, to be perfectly honest," McEnroe said. "I just didn't feel that great. Sometimes, you don't feel great and you play well. Sometimes, you play lousy."

"I worked myself into being No. 4 in the world. I had beaten Lendl twice and Edberg twice and Becker the whole year. Then to lose a match to a guy I hadn't even seen play before is pretty bad."

John McEnroe congratulates Paul Haarhuis after Haarhuis upset the No. 4 seed in the U.S. Open.

## Cubs trade with Padres

CHICAGO (AP) — The Chicago Cubs traded pitcher Calvin Schiraldi, outfielder Darrin Jackson and a minor league player to be named later to the San Diego Padres on Wednesday night for outfielder Marvell Wynne and infielder Luis Salazar.

The Cubs lead the National League East and are 2 1/2 games ahead of St. Louis and New York. San Diego is third in the NL West, seven games behind first-place San Francisco.

Wynne, 29, batted 252 with six home runs and 35 RBIs in 105 games this season. He began his major league career in 1983 with Pittsburgh and was traded to San Diego in 1988.

"I enjoyed my time while I was here but they had to make a trade and I was involved," said Wynne, a native of Chicago. "In a way I'm surprised. But I guess they needed another pitcher here for the rest of the way. They (the Cubs) needed me and Louie in return I guess. It had to be done. I'm excited to go there. I'm not depressed. I'm ready to go."

Salazar, 33, is a 10-year major league veteran who began with the Padres in 1980 and was reacquired by San Diego from Detroit prior to the start of this season. He was hitting .288 in 95 games with eight homers and 22 RBIs. Three of his homers came as a pinch-hitter.

"It's not a first time thing. I'm used to it," Salazar said. "Moving back and forth across the country is tough. This time it surprised me I've got to say that. On the other hand it's a business. I go where they send me and at least I'm going to a first-place team."

Schiraldi, 27, came to the Cubs in December 1987 from Boston in a deal for Lee Smith.

# Reds trip St. Louis in 13

Associated Press

It didn't take any of Whitey Herzog's managerial genius to figure out why the St. Louis Cardinals didn't beat the Cincinnati Reds.

"You can't win if you don't get a run," Herzog said. Cincinnati, held to one hit over 12 innings, snapped a scoreless tie in the 13th on pinch-hitter Dave Collins' RBI single, and the Reds beat the Cardinals 2-0 despite a brilliant pitching performance by Jose DeLeon.

Over 11 innings, DeLeon faced the minimum 33 batters, allowing one hit, striking out eight and walking none.

"DeLeon and Rick Mahler were amazing, and DeLeon can't pitch any better than that," Herzog said.

DeLeon retired Cincinnati's first 10 batters before Luis Quinones' one-out, line-drive single in the fourth. A double play erased Quinones, and DeLeon set down the next 22 batters.

"It was really sad we couldn't pull that one out," St. Louis rookie catcher Todd Zeile said. "DeLeon just put the ball where I had my glove all night. He had great control of his pitches."

The loss kept the Cardinals in second place in the National League East, tied with New York, 2 1/2 games behind first-place Chicago.

After Quinones' single in the fourth, The Reds did not get another hit until he doubled with one out in the 13th off Todd Worrell, 2-5.

Eric Davis, who was intentionally walked, stopped at second on Collins' RBI single and scored the Reds' second run when Zeile threw wildly on Davis' steal of third.

Rob Dibble, 8-4, pitched two innings and struck out five for the victory. John Franco pitched the 13th for his 29th save.

St. Louis, which stranded 16 baserunners, left the bases loaded in the 10th and 12th innings.

"I was throwing until my arm was going to fall off out there," Dibble said. "I didn't care how I did it, but I was going to try to get out of that (12th) inning. DeLeon threw a tremendous game and Rick Mahler threw a tremendous game. Either one of them should have got a win."

Mahler, who had lost five straight decisions, pitched 10 innings, allowing nine hits.

"It's a shame DeLeon pitched so well and got nothing for it, but that's the way it goes," Mahler said. "He really pitched a heck of a game. You've got to tip your hat to him."

### Astros 8, Cubs 4

Mike Scott pitched a four-hitter for his 18th victory, tying the major-league high, and added a run-scoring single as Houston rebounded to beat Chicago at Wrigley Field. On Tuesday, the Astros blew a 9-0 lead and lost to the Cubs 10-9.

Gerald Young had four hits, three RBIs and scored a run and Rafael Ramirez, who had seven RBIs on Tuesday, added three hits and scored twice.

Scott, 18-7, had failed in four previous attempts to match his career high of 18 victories.

## National League

Scott gave up home runs to Dwight Smith in the first inning, Ryne Sandberg in the fourth and a two-run shot to Mark Grace in the ninth. He struck out nine and walked one in his eighth complete game.

Rick Sutcliffe, 13-11, lasted only 3 1/2 innings and allowed eight hits and five runs.

### Giants 3, Phillies 2

Kelly Downs won for the first time since April 11 and San Francisco snapped a three-game losing streak by beating Philadelphia at Candlestick Park.

Downs, 3-5, pitched six strong innings to win for the first time in four starts since coming off the disabled list following a shoulder problem. He allowed one run and four hits in six innings before being lifted after Charlie Hayes led off the seventh with a homer.

Jeff Brantley, Craig Lefferts and Steve Bedrosian each pitched a scoreless inning, with Bedrosian getting the last three outs for his 18th save.

Will Clark doubled in two runs and scored on Dickie Thon's error in San Francisco's three-run fifth inning off ex-Giant Terry Mulholland, 4-6.

### Expos 5, Padres 1

Dennis Martinez pitched a six-hitter for his 15th victory and visiting Montreal beat San Diego, snapping the Padres' six-game winning streak.

The loss dropped the Padres seven games behind first-place San Francisco in the NL West, while the Expos moved within three games of Chicago in the East.

Martinez, 15-4, struck out eight and walked one for his fourth complete game. Ed Whitson, 15-10, allowed seven hits and three runs in five innings.

Dave Martinez had two hits and drove in two runs for the Expos.

### Mets 9, Dodgers 3

Kevin McReynolds hit New York's first grand slam of the season and Sid Fernandez won for the sixth time in his last seven decisions as the Mets beat Los Angeles at Dodger Stadium to complete a three-game sweep.

Fernandez, 10-3, pitched 7 1/2 innings and allowed five hits. Jeff Hamilton hit his 12th homer in the seventh to end the shutout and Mike Marshall added a two-run shot in the eighth, his 11th. Don Aase finished, allowing three hits.

McReynolds had nine homers and 23 RBIs in August. Rookie Ramon Martinez, 3-3, pitched five innings and allowed three runs.

### Pirates 7, Braves 5

Billy Hatcher's run-scoring pinch single snapped an eighth-inning tie as Pittsburgh beat Atlanta at Three Rivers Stadium.

With the score tied 5-5, Mike LaValliere led off with a single off reliever Joe Boever, 4-6. Pinch-runner Gary Redus moved to second on Jose Lind's sacrifice and scored on Hatcher's single. Hatcher moved to third on an infield out and scored on a wild pitch.

## Yankees trade Phelps to A's

NEW YORK (AP) — The New York Yankees traded designated hitter-first baseman Ken Phelps to the Oakland Athletics on Wednesday night for minor league pitcher Scott Holcomb.

The 35-year-old Phelps is batting .249 with seven homers and 20 RBIs in 86 games. He was 10-for-32 as a pinch-hitter with three homers and 13 RBIs.

The trade was announced after the Yankees beat Oakland 8-5 Wednesday night to salvage the final game of a three-game series.

"The last month will be pretty exciting now," Phelps said. "I think they've been talking about this since May. Dallas (former Yankees manager Dallas Green) told me back then that if we're not in the pennant race, I'll probably be traded late in the season."

# Angels' Jim Abbott continues to dominate Red Sox

Associated Press

After his teammates gave up 30 hits and 21 runs to the Boston Red Sox in a doubleheader the night before, California's Jim Abbott gave them nothing but grief.

"There's not too much you can do about that one," Boston manager Joe Morgan said after Abbott pitched a four-hitter to key the Angels' 4-0 victory Wednesday night. "We were hogtied all the way."

The rookie left-hander, born without a right hand, was given a standing ovation by Fenway Park fans after his third complete game and second shutout in 24 major league starts. The triumph stopped the Red Sox nine-game winning streak.

"I've been struggling, but the team has been patient with me," said Abbott, 11-9 overall but only 2-3 in the month of August. "The main key for me is to throw strikes. When I do that, I'm confident I can win."

With the victory, California moved to within two games of Oakland in the American League West. The division-leading Athletics lost an 8-5 decision to the New York Yankees.

Yankees 8, Athletics 5

Steve Balboni homered and drove in four runs and

## American League

Eric Plunk beat the team that traded him earlier this summer as the Yankees ended a six-game losing streak. The Yankees avoided their worst month since losing a club-record 24 games in July 1988. Still, their 21 defeats in August were the most in one month since July 1989.

Jose Canseco homered and drove in four runs for Oakland, which had a three-game winning string stopped.

The Yankees ended a seven-game losing streak against the Athletics and beat them for the first time in six tries at home this year.

Phil Bradley doubled twice during a seven-run first inning and Jeff Ballard won his fourth straight as the Orioles spoiled the return of Greg Swindell from the disabled list.

The win was the fifth in six games and ninth in the last 11 for the AL East-leading Orioles and kept them

one game ahead of Toronto.

Swindell had not pitched since July 25 because of a sore left elbow, but was rushed into the rotation so he could face Baltimore, a team he had dominated in the past.

Blue Jays 2, White Sox 1

Neison Liriano's two-out, run-scoring single in the sixth lifted the Blue Jays to their eighth win in nine games.

The victory was Toronto's 19th in August, a club record.

Jimmy Key, 10-13, allowed one run on four hits, and Duane Ward pitched the final two innings for his 14th save.

Twins 7, Rangers 3

Kirby Puckett singled home two runs and pinch-hitter John Moses doubled home two more in the eighth inning as the Twins rallied for six runs to defeat the Rangers.

Texas starter Mike Jeffcoat took a 3-1 lead into the inning before the Twins erupted. They did most of the damage off reliever Jeff Russell, who blew a save opportunity for the sixth time in 36 chances.

Puckett, who also doubled in the fourth inning for his 50th multiple-hit game, tied the score 3-3 with his single.

Geno Petralli knocked in the Texas runs with a bases-loaded double in the fourth.

Royals 6, Tigers 1

Jim Eisenreich doubled twice and had three hits and Mark Gubicza pitched a four-hitter over seven innings as the Royals handed the Tigers their 11th loss in a row.

Gubicza, 13-10, had a streak of 17 scoreless innings snapped when Detroit scored in the first. He then stopped the Tigers until Terry Leach came on to finish up.

Eisenreich has hit in 13 of his last 15 games and 11 of his last 24 hits have gone for extra bases.

Mariners 7, Brewers 3

Ken Griffey Jr. drove in three runs with a homer and a single and Randy Johnson and Mike Jackson combined on a six-hitter, leading Seattle over Milwaukee.

Griffey hit his 15th homer leading off the second inning against Brewers' starter Jeff Peterek, 0-2, to tie the score 1-1. He later singled home two runs to give the Mariners a 4-2 lead in the top of the third.

## Haskins suspends Melvin after cocaine case

EL PASO (AP) — The basketball coach at the University of Texas-El Paso has a change of heart and has decided to suspend a basketball player who pleaded guilty last week to selling cocaine from his mother's apartment.

Don Haskins said in a statement Wednesday that Johnny Melvin would be suspended from the team "for at least a year," but added that the sophomore guard would retain his four-year athletic scholarship.

Haskins scheduled a news conference for today to address the issue.

Officials originally had ruled that Melvin would be allowed to play this season, saying he had made a mistake but essentially was a good person.

"After careful and extensive review of all the facts now available to me in connection with Johnny Melvin's probationary sentence for selling a controlled substance — a review process that has occupied me since I received the news of his conviction and probation — it is my decision that Johnny Melvin not be permitted to represent the institution in intercollegiate athletics for

at least a year," Haskins said in the statement.

Melvin, 20, was found guilty of three counts of possession with intent to deliver less than 5 grams of a controlled substance last week by a Chicago judge. He was sentenced to three years probation.

In an earlier statement, Haskins said he learned of the charges against Melvin in December, after Melvin signed a letter of intent.

Haskins was not available Wednesday night to explain what facts he reviewed, but scheduled a news conference for 10 a.m. today.

A police officer testified at Melvin's sentencing that a packet containing more than 16 grams of cocaine was found in a shoe box, along with letters from colleges to the athlete, in the apartment of Melvin's mother on May 24, 1988.

But the judge presiding in the case declined to find Melvin guilty on more serious charges.

"I apologize to the city of El Paso, The University of Texas at El Paso, my teammates and my coaches. I understand the seriousness of my mistake," Melvin, a former all-city basketball player from Chicago, had said in a statement.

"I am here to attend class and play basketball.

I'll do whatever Coach Haskins asks of me." Melvin averaged 4.7 points and 3.4 rebounds as a part-time starter last season.

The UTEP records office said Melvin had not submitted a home phone number. His mother's phone number in Chicago is unlisted. UTEP officials said he would not attend today's news conference.

When UTEP announced Melvin would remain on the team, Haskins said he had been told by the officer who investigated the case that "Johnny had made a bad mistake but he thought Johnny was a good kid and hoped we would allow him to remain in school."

Haskins said Melvin passed UTEP and NCAA drug tests and was a B student.

UTEP athletic director Brad Hovious had agreed with Haskins' initial decision, saying, "I'm optimistic Johnny Melvin will learn from his mistake and will continue to be a fine college basketball player."

## New England's receiver has problems on, off field

Associated Press

Irving Fryar, the subject of allegations concerning his collegiate career, is also facing problems in the NFL.

New England Patriots coach Raymond Berry said Wednesday that Fryar, a wide receiver who has been a holdout throughout training camp, can continue to sit on the sidelines when the season begins.

"We are not counting on Irving Fryar in our plans for this year," Berry said, adding that veteran Stanley Morgan and rookie Hart Lee Dykes would be first and second on the depth

chart. Berry also said he felt comfortable with Sammy Martin, Cedric Jones and Mike Jones as backups.

Asked if Fryar would be welcomed if his contract impasse is settled, Berry said, "It would have to be a very fast decision on his part."

The allegations about Fryar and other members of the Nebraska football program are to appear in the book "Big Red Confidential" by Armen Keteyian, which has yet to be published.

Calls to Fryar through the Dallas office of his agent, Sherwood Blount, were not returned.

## SOFTBALL

(Continued from Page 1C)

Coors is led by third baseman Craig Schraub (.702) and catcher Bill Baker (.673). Schraub is a former major division player who dropped down a notch to spend more time with his family.

Still, Hawkins says Coors could have a long weekend.

"Unless we play at a higher level than we have been playing, I don't expect a repeat of two years," Hawkins said.

Stanley's Exxon manager Richard Candelaria said some of his team will be looking at nationals as a learning experience.

"Some of our players haven't played in the national tournament before," he said. "There's some very strong teams from other states."

Four players remain from the original Stanley's team formed in the late 1970s — outfielders Ed Stewart and Rick Stephens, catcher Lance Farris and pitcher-first baseman Candelaria.

## Wilkins expects \$14.5 million

By JEFFEREY DENBERG

New York Times News Service

ATLANTA — Dominique Wilkins plans to sign a five-year, \$14.5 million contract today, more than doubling his previous contract and making him one of the highest-paid players in the National Basketball Association.

The Atlanta Hawks all-star forward said Wednesday that differences had been resolved in summer-long contract talks, with team president Stan Kasten agreeing to set aside the final two years of Wilkins' current deal.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | P235/75R15 76.97                                    |                                                               |                                                               |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                               |                                                   |                  |                  |                  |                  |                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                     |                                                    |                                                      |                  |                  |                  |                  |                  |                  |                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                               |                                                   |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                      |                                              |                  |                  |                  |                  |                  | # Pete Rose, please save yourself

All right, Miss B., do me a favor. Take a letter to my friend, Pete Rose, the ex-baseball manager. I don't know where to send it - but not to Riverfront Stadium. Pete doesn't live there anymore.

Dear Pete, First of all, let me apologize for my colleagues, the knights of the keyboard, the poets of the press box. All the guys who laughed at all your jokes, filled their notebooks, chuckled at your swagger over the years. I know you're shocked as I am at the way they've turned on you. You probably always thought it was un-American to kick a man when he was down.

Hah! But don't worry. I don't belong to that had-it-coming clique. We participated in making you what you are today, Pete, a bloody media icon. But we're a vindictive society, Pete, and don't let anybody tell you different. Now we're criticizing the way you raised your family, the way you cut your hair. It's an American industry - build up and tear down heroes.

I can think of a hundred guys I'd rather find in your predicament, guys who never did me or the game five minutes good, but you're the one on the gibbet, Pete. Your neck's in the rope.

We're a nation of front-runners, Pete, and you're a loser. Bart Giamatti is the guy on the white horse now. He has saved baseball, it says here. He has preserved the integrity of the game. The office of the commissioner was instituted precisely to take care of situations like this. There's no other reason for it.

But you're no threat to baseball. You were a threat only to Pete Rose. Him, you clobbered up good.

You have to know, Pete, that society puts higher standards on its heroes, its celebrities, its successful. Someone called Watergate a third-rate burglary. And so it was. Only it had the President's fingerprints on it. And look what happened to him.

I don't know who got you, Pete. The bookies ratted on you because you owed them all that money or the word leaked out on the street. But, ultimately, it was Pete Rose who got you. I'd get rid of that guy if I were you, that gambling, swaggering, cocky, I-can-do-no-wrong guy. He's big trouble.

You have denied you're a compulsive gambler, Pete. Like a lot of people, it is hard for you to perceive addiction in what seems like just a simple pastime. It is hard for some people to think of it as an addiction. I mean, it's not a chemical dependency - on alcohol, heroin, cocaine, nicotine. That, they can understand. But a bet is just a bet. It's not a disease. Or so they think.

Well, lots of things are addictions, Pete. For instance - and the boys down on the corner will get a laugh at this one - did you know that sex can be an addiction? Eating can be an addiction. I'm not a doctor but any kind of destructive compulsive behavior can be an addiction.

You know, when they ask you a series of questions to spot alcohol or hard drug addiction, the first thing they ask you is if your usage has gotten you in trouble with the law, a drunk-driving arrest, a fight in a bar.

The second thing they ask you is if it interfered with your work - absenteeism, shoddy work, warnings from the boss. Has it interfered with your career?

The third thing they ask is whether it brought trouble to your home life - divorce, separation, domestic squabbles.

Then, they ask if you've taken to lying to protect your addiction ("Honey, I just had one beer," or "Honey, I was at the office all day, I didn't go to the track, I swear."). Then they want to know if you've been selling family possessions or raiding bank accounts to support your addiction.

Sound like anyone you know, Pete?

If I were you, Pete, I'd be worried. Gambling has brought the law down on you. Gambling has not only interfered with your work, it has cost you a job. I don't know about your home life, but if devotion to alcohol or drugs can lead to neglect of wife, children and families, I would have to think devotion to betting could, too.

People in the throes of addiction get money to feed it any way they can. Usually, they steal. But also, they hock things. Isn't that what you're doing at all these memorabilia sales, flying 900 miles to sell your autographs, your World Series bats, anything but the family refrigerator?

Once I knew a guy who went home and got his wife's fur coat and drove back to the golf course with it to cover a bet. I've known guys who sold \$6,000 automobiles for \$800 to get quick fixes. In both cases, they were addicts.

I heard a guy on television say gambling was a greater high than any chemical addictions. I don't know about that. But I do know that Nick the Greek once said that the next-best thing to gambling and winning was gambling and losing. He also said that when he wasn't in action - i.e., betting on something - he felt as if he were dead.

Pete, look at yourself. They tell me you're next to broke. I don't know about that - but you act like it. Pete, you made \$2 million a year in your heyday. You could have bought railroads, office buildings, rare coins. Instead, you collected betting slips.

I remember the World Series when they had the rain-outs and we writers were starving for copy and you came down to the mid-town hotel in Boston or wherever and we had all the copy we could use.

That's the Pete Rose I like to remember, Pete. I don't like to see you stood up against a wall and shot. I don't want to see you become a non-person.

But never mind saving baseball or the Hall of Fame. You got to save Pete Rose. Go into one of those gambler-anonymous centers and let them hold a mirror up in front of you and your compulsions and show you what they are and what they have done to that American hero who played 24 seasons and five World Series with the purity and dedication of a dirty-faced kid on a sandlot.

The count is 0-2, Pete, but you always were a good two-strike hitter. Besides, how tough can that be for a guy who beat out Ty Cobb?

## Court testimony says Rose involved in fraud

CINCINNATI (AP) — One week after Pete Rose was thrown out of baseball for gambling, three federal witnesses identified him as the central figure in an alleged tax-fraud scheme involving a \$47,846 race-track ticket.

The testimony in the drug and tax-evasion trial of former Rose housemate Thomas Gioiosa directly implicated Rose in a federal crime, and could be used against the former manager of the Cincinnati Reds.

A federal grand jury in Cincinnati is looking into whether Rose claimed all of his income from gambling, autograph appearances and memorabilia sales on his taxes. Rose hasn't been charged with any crimes.

The three witnesses who testified against him on Wednesday — former associates Paul Janszen and Danita Marcum and track oddsmaker Bruce Battaglia — said they have also been interviewed by the Internal Revenue Service.

Janszen, who was the main figure in baseball's investigation of Rose's gambling, said he hopes the federal court testimony helps Rose realize the seriousness of his situation. Rose has denied any role in the \$47,846 Pik Six ticket that the witnesses said he bought and told Gioiosa to cash.

Rose also denies Janszen's allegations that he bet on baseball games — the accusation that launched baseball's investigation of Rose and ultimately led to his lifetime ban.

"I'd be happier if the guy came forward and told the truth," Janszen told reporters

following his court appearance. "I don't think Pete Rose has hit rock bottom yet. This trial is going to force him to face up to some things."

Gioiosa, 31, is charged with conspiracy to distribute cocaine and tax evasion. If convicted of all charges, he would face up to 38 years in prison and \$2 million in fines.

Much of the testimony Wednesday centered on the taxes paid on a Jan. 16, 1987 Pik Six ticket that Gioiosa cashed at Turfway Park in northern Kentucky and later claimed on his 1987 tax return.

The government claims Gioiosa cashed the ticket because he was in a lower tax bracket than Rose. The three witnesses agreed that Rose owned the largest share of the ticket, which cost \$4,800.

Janszen said Rose bought the ticket and offered to sell him a 25 percent share when he arrived at the track that night. Janszen said he later sold Gioiosa half of his 25 percent share.

Bettors in a Pik Six must choose winners in six consecutive races to win the jackpot. When the ticket paid off in the eighth race, the three witnesses said Rose handed it to Gioiosa and told him to go cash it.

"He said something to the effect, 'Let Tommy cash the ticket because he needs to show some income,'" said Battaglia, who picked the six horses on the ticket for Rose.

Marcum said Rose "told Tommy to cash the ticket, he could use the write-off."

Janszen's version was the same.

## Travs nip Captains in Eastern playoff

LITTLE ROCK (AP) — Dennis Carter drove in the winning run with a pinch-hit single in the bottom of the 11th inning as Arkansas edged Shreveport 3-2 Wednesday night to take a 1-0 lead in the Texas League's Eastern Division playoffs.

The second game of the best-of-three series is scheduled for 7:30 p.m. Today. The series winner will play Western Division champion Wichita in the league championship series, which begins Saturday in Wichita, Kan.

The Captains, who forced the playoff by taking a doubleheader from the Travelers on Monday, tied the game at 2-2 in the seventh on Ted

Wood's pinch-hit home run, his first homer of the year.

Shreveport scored first in the fourth inning when David Patterson singled and scored on a double by Markus Owens.

Arkansas took a 2-1 lead in the sixth. Pitcher Mike Hinkle doubled and later scored on a double by Ray Lankford. Rod Brewer's single scored Lankford.

The Travelers won it in the 11th when Bernard Gilkey walked, stole second and scored on Carter's hit.

Craig Weissmann won in relief for the Travelers, while Shreveport reliever Doug Robertson was the loser.

## ROD 'N REEL

## Amistad tourney special

By BUD BAKER

West Texas' largest and oldest bass club, the Permian Bass Club, is celebrating its Silver Anniversary and is about to host its 25th annual invitational tournament.

The tournament, which has become one of the biggest and most respected in the state, will be held Sept. 23-24 at Lake Amistad. In each of the past two years, it has drawn more than 600 anglers to Del Rio.

Again this year, it will be headquartered at the Del Rio Civic Center. According to tournament director Karla Milson, Permian is going all out to make this year's tournament a memorable event. Club members will serve stew at the Friday night registration, and after the Saturday weigh-in, contestants will be treated to barbecue prepared by the Chuck Wagon Gang.

Afterward, a seminar will be held by Jerry Dean of "Honey Hole" magazine and "Honey Hole" TV producer and cameraman Floyd Yarbrough. Also on the agenda is Jerry Rogers of Texas Black Bass Unlimited, and possibly David Campbell, head of TP&W's Share-a-Lone-Star-Lunker program.

Contestants are given ribbons to attach to their vehicle antenna, and during the drive to the Civic Center for weigh-in, Del Rio policemen are stationed at every turn, directing traffic and helping fishermen get to the weigh-in on time.

It really gives an angler the feeling of being a part of a big event. A number of marine dealers and tackle manufacturers bring products to show at the Civic Center.

The first place grand prize is a Ranger 300V bass boat. With a minimum of 600 entries, Permian will award cash prizes to 20 places and merchandise prizes to 50th place. The tournament is open to all anglers who are a member in good standing in a bass club or sportsman club. Professional fishing guides and their families are not eligible to compete, however. Entry fee is \$65, or \$50 if paid before Sept. 3.

There is also a youth division for anglers under 17. Entry fee is \$15 at headquarters or \$10 for an early entry. Top prize for the youth is a two-man bass boat.

Texas Parks and Wildlife Department will have four self-contained aerated holding tank trailers at the weigh-in to assist with the live release. Permian urges all contestants to keep their fish in good condition prior to weigh-in. There will be a four-ounce penalty deducted from contestants' total for each dead fish weighed.

WEST TEXAS has a new bass club. The Tumbleweed Bass Club was formed Aug. 3 with 25 anglers and 21 of those members fishing the club's first tournament the following weekend. The club is family oriented and meets the first Thursday of each month at Caprock Electric Cooperative in Stanton.

Officers of the club are J.A. Luxton, president; Sam Norris, vice president; Ronnie Christian, secretary; Ron Algood, treasurer and Donnie Thompson, tournament director.

Tournament results are as follows:  
Tumbleweed Bass Club: 21 members at Lake Amistad. 1. Steve Caste, 3.7 lbs; 2. Bobby Phelps, 3.8 lbs; 3. Billy Lupton, 3.1 lbs. Big Bass: Caste, 3.5 lbs.  
Permian Bass Club: 62 members at Lake Amistad. 1. Richard Gray, 9.21 lbs; 2. Big Bass: Ronnie Burrows, 5.44 lbs; 3. Steve Mann, 16.88 lbs. Big Bass: Mann, 5.44 lbs. Open tournament: 1. Mann, 30.74 lbs; 2. Frank Whitley, 15.87 lbs; 3. Richard Gray, 14.78 lbs. Top Woman: Jane Thurmon, 8.77 lbs. Top Youth: Chris Earnest, 1.78 lbs.

High Sky Bass Club: (Oak Creek Lake, 18 members with eight bass for 18.21 lbs.) 1. Melvin Dunn, 5.42 lbs; 2. Claude Bass, 5.08 lbs; 3. Carl Herford, 3.94 lbs. Big Bass: Dunn, 5.42 lbs.

Midland Bassmasters: (7 members at Lake Amistad with six bass for 17.18 lbs.) 1. Mike Tyson, 5.65 lbs; 2. David Milburn, 3.75 lbs; 3. Bob Knox, 3.20 lbs. Big Bass: Milburn, 3.75 lbs.

September Calendar  
Sept. 7: Tumbleweed Bass Club meeting, 7:30 p.m. Caprock Electric Cooperative in Stanton. Midland Bassmasters Club meeting, 7:30 p.m., Big Three Tire.

Sept. 8: Colorado City Bass Club, open tournament, Colorado City Lake. Headquarters: Dixon's Family Barbecue.

Sept. 11: Silver Bullet Bass Busters Club meeting, 7:30 p.m., Coors hospitality room.

Sept. 14: Permian Bass Club general meeting, 7:30 p.m., Odessa American Legion.

Sept. 16-17: Tumbleweed Bass Club, club tournament, Oak Creek Lake.

Sept. 23-24: Permian Bass Club, 25th invitational open tournament, Lake Amistad. Headquarters: Del Rio Civic Center.

Sept. 23-24: High Sky Bass Club, club tournament, Amistad Lake. Headquarters: Amistad Lodge.

Sept. 23-24: Midland Bassmasters, club tournament, Amistad Lake. Headquarters: Amistad Lodge.

Sept. 28: High Sky Bass Club meeting, 7:30 p.m., Southside Lions Club.

## OU's Thompson sentenced to two-year prison term

OKLAHOMA CITY (AP) — Former Oklahoma quarterback Charles Thompson was sentenced to two years in prison and ordered to undergo supervised drug testing or drug counseling for three years after his release on a cocaine-related charge.

The former Sooners quarterback will report on Sept. 20 to an undetermined federal prison. Thompson, who would have been a junior this season, pleaded guilty April 26 to one count of conspiracy to distribute cocaine. He faced a maximum punishment of 27 months in prison and a minimum of 21 months. There is no parole.

Thompson was sentenced to two years in prison and ordered to undergo supervised drug testing or drug counseling for three years after his release on a cocaine-related charge.

Chevron's \$48 million recovery plant will recover 65 million cubic feet daily of produced gas in the North Ward Estes recovery project.

## Chevron head sees EOR future for Basin

By JOHN PAUL PITTS  
Business/Oil Editor

Enhanced oil recovery (EOR) will be the energy future of the Permian Basin and all the U.S., said Will Price, president of Chevron U.S.A., pledging that his company would continue to play a major role that future.

The major oil company head was in Wickett Wednesday to officially dedicate the company's \$68 million North Ward Estes CO<sub>2</sub> Project in Ward County. He said Chevron viewed such projects as an excellent means of finding new reserves in well explored areas.

"In a sense tertiary oil recovery is a frontier," said Price, who compared the project to a wildcat venture. He noted that the CO<sub>2</sub> project was a \$75 million gamble that would

carry the North Ward Estes field into the 21st century, calling it a major milestone for Chevron and a symbol of the industry's technical ability.

While Chevron inherited some preliminary EOR engineering when it acquired the field in its purchase of Gulf Oil Co. in 1986, Price said it was the sole determination of Chevron to go forward with a CO<sub>2</sub> flood of the field, noting that it was the first CO<sub>2</sub> project in the Yates formation.

Price said the North Ward Estes was a marriage Chevron and Gulf technologies. Price noted that the Chevron-Gulf marriage was now totally consummated and that it was a good match.

"If we had it to do all over again, we would not hesitate to acquire Gulf," said Price, who joined Chevron in 1953. He praised the people,

position and properties the match brought to Chevron.

"Gulf had a good reputation and excellent stature in the Permian Basin, but Chevron had only a few properties here. We gained position," Price said, noting that Chevron also gained some prize reserves.

He called Gulf personnel one of the biggest assets of the merger: "With such a large pool of people all of the talent has now floated to the top."

Despite having to sell some assets to pay down the enormous debt incurred with the Gulf purchase, Price says Chevron debt was now "imminently" manageable and he did not see the need to sell any other assets to pay down debt.

Please see EOR, Page 10C

Will Price

## Midland home sales slip

By JULIE JEROME  
Business/Oil Writer

Some 108 residences were sold in Midland in July, down 27.5 percent from the June total of 149 residences, according to the Midland Board of Realtors. In July 1988, Midland Realtors were responsible for the sale of 154 houses.

Dollar volume of these houses totaled \$9.9 million in July, compared to June's volume of \$10.6 million, and an \$11.0 million figure for July 1988. In July, the average sale price of a house was \$91,702, up a dramatic 27.8 percent from the June average price of \$71,700. In July 1988, the average sale price of a house in Midland was \$71,575.

Of the 108 residences sold, 14 were new, with a value totaling \$2.31 million. The average sale price of a new residence in July was \$165,331. This compares to July 1988 figures of 13 new residences sold valued at \$1.74 million for an average sale price of \$134,081.

The remaining 94 residences sold in July were valued at approximately \$7.58 million, for an average sale price of \$80,736.

New construction in Midland in July included 13 residences with a construction value of \$1.45 million. New commercial construction totaled \$19,000, and mobile home construction was valued at \$10,000 in July, according to the City of Midland.

## New rules let consumers shop credit card rates

WASHINGTON (AP) — Credit card disclosure rules taking effect today offer the nation's 107 million card holders a new opportunity to shop around for lower interest rates, consumer activists say.

Industry analysts, however, say they expect the new rules to have little impact — at least over the short haul.

The regulations, adopted by the Federal Reserve Board in April, require credit card issuers to disclose the interest rate, monthly fee, grace period and other terms in a chart on applications used to sign up customers.

Previously, the card's costs did not have to be disclosed until it arrived in the mail.

The new rules also require companies to notify existing customers in advance when their accounts are about to be renewed and another an-

nual fee charged. "Consumers should use the renewal notice as a reminder to switch cards and save," said Elgie Holstein, director of the Bankcard Holders of America, a consumer group. She advised cardholders to pay off their high-rate cards with a cash advance from a low-rate card.

The new rules apply to bank cards, such as Visa, MasterCard and Discover; to department store cards; and also to cards such as American Express and Diners Club, whose full balance must be paid monthly.

"I'm very hopeful that this will at least provide the edge to consumers to make better judgments," said Peggy Miller, a lobbyist for the Consumer Federation of America.

## Orders to U.S. factories fall in July

WASHINGTON (AP) — Orders to U.S. factories for manufactured goods fell 1.7 percent in July to the lowest level in eight months, the government said today.

The Commerce Department said orders for both durable and nondurable manufactured goods totaled a seasonally adjusted \$231.3 billion. It was the lowest level since November and the second decline in three months.

Orders rose 0.6 percent in June and fell 2.6 percent in May.

The latest decline was steeper than most analysts expected. Recently, a string of strong statistical reports have indicated that economists' fear of an imminent recession was overblown. However, today's report shows that the economy is still far from robust.

If weakness in manufacturing persisted, it could lead to layoffs and a rise in the unemployment rate.

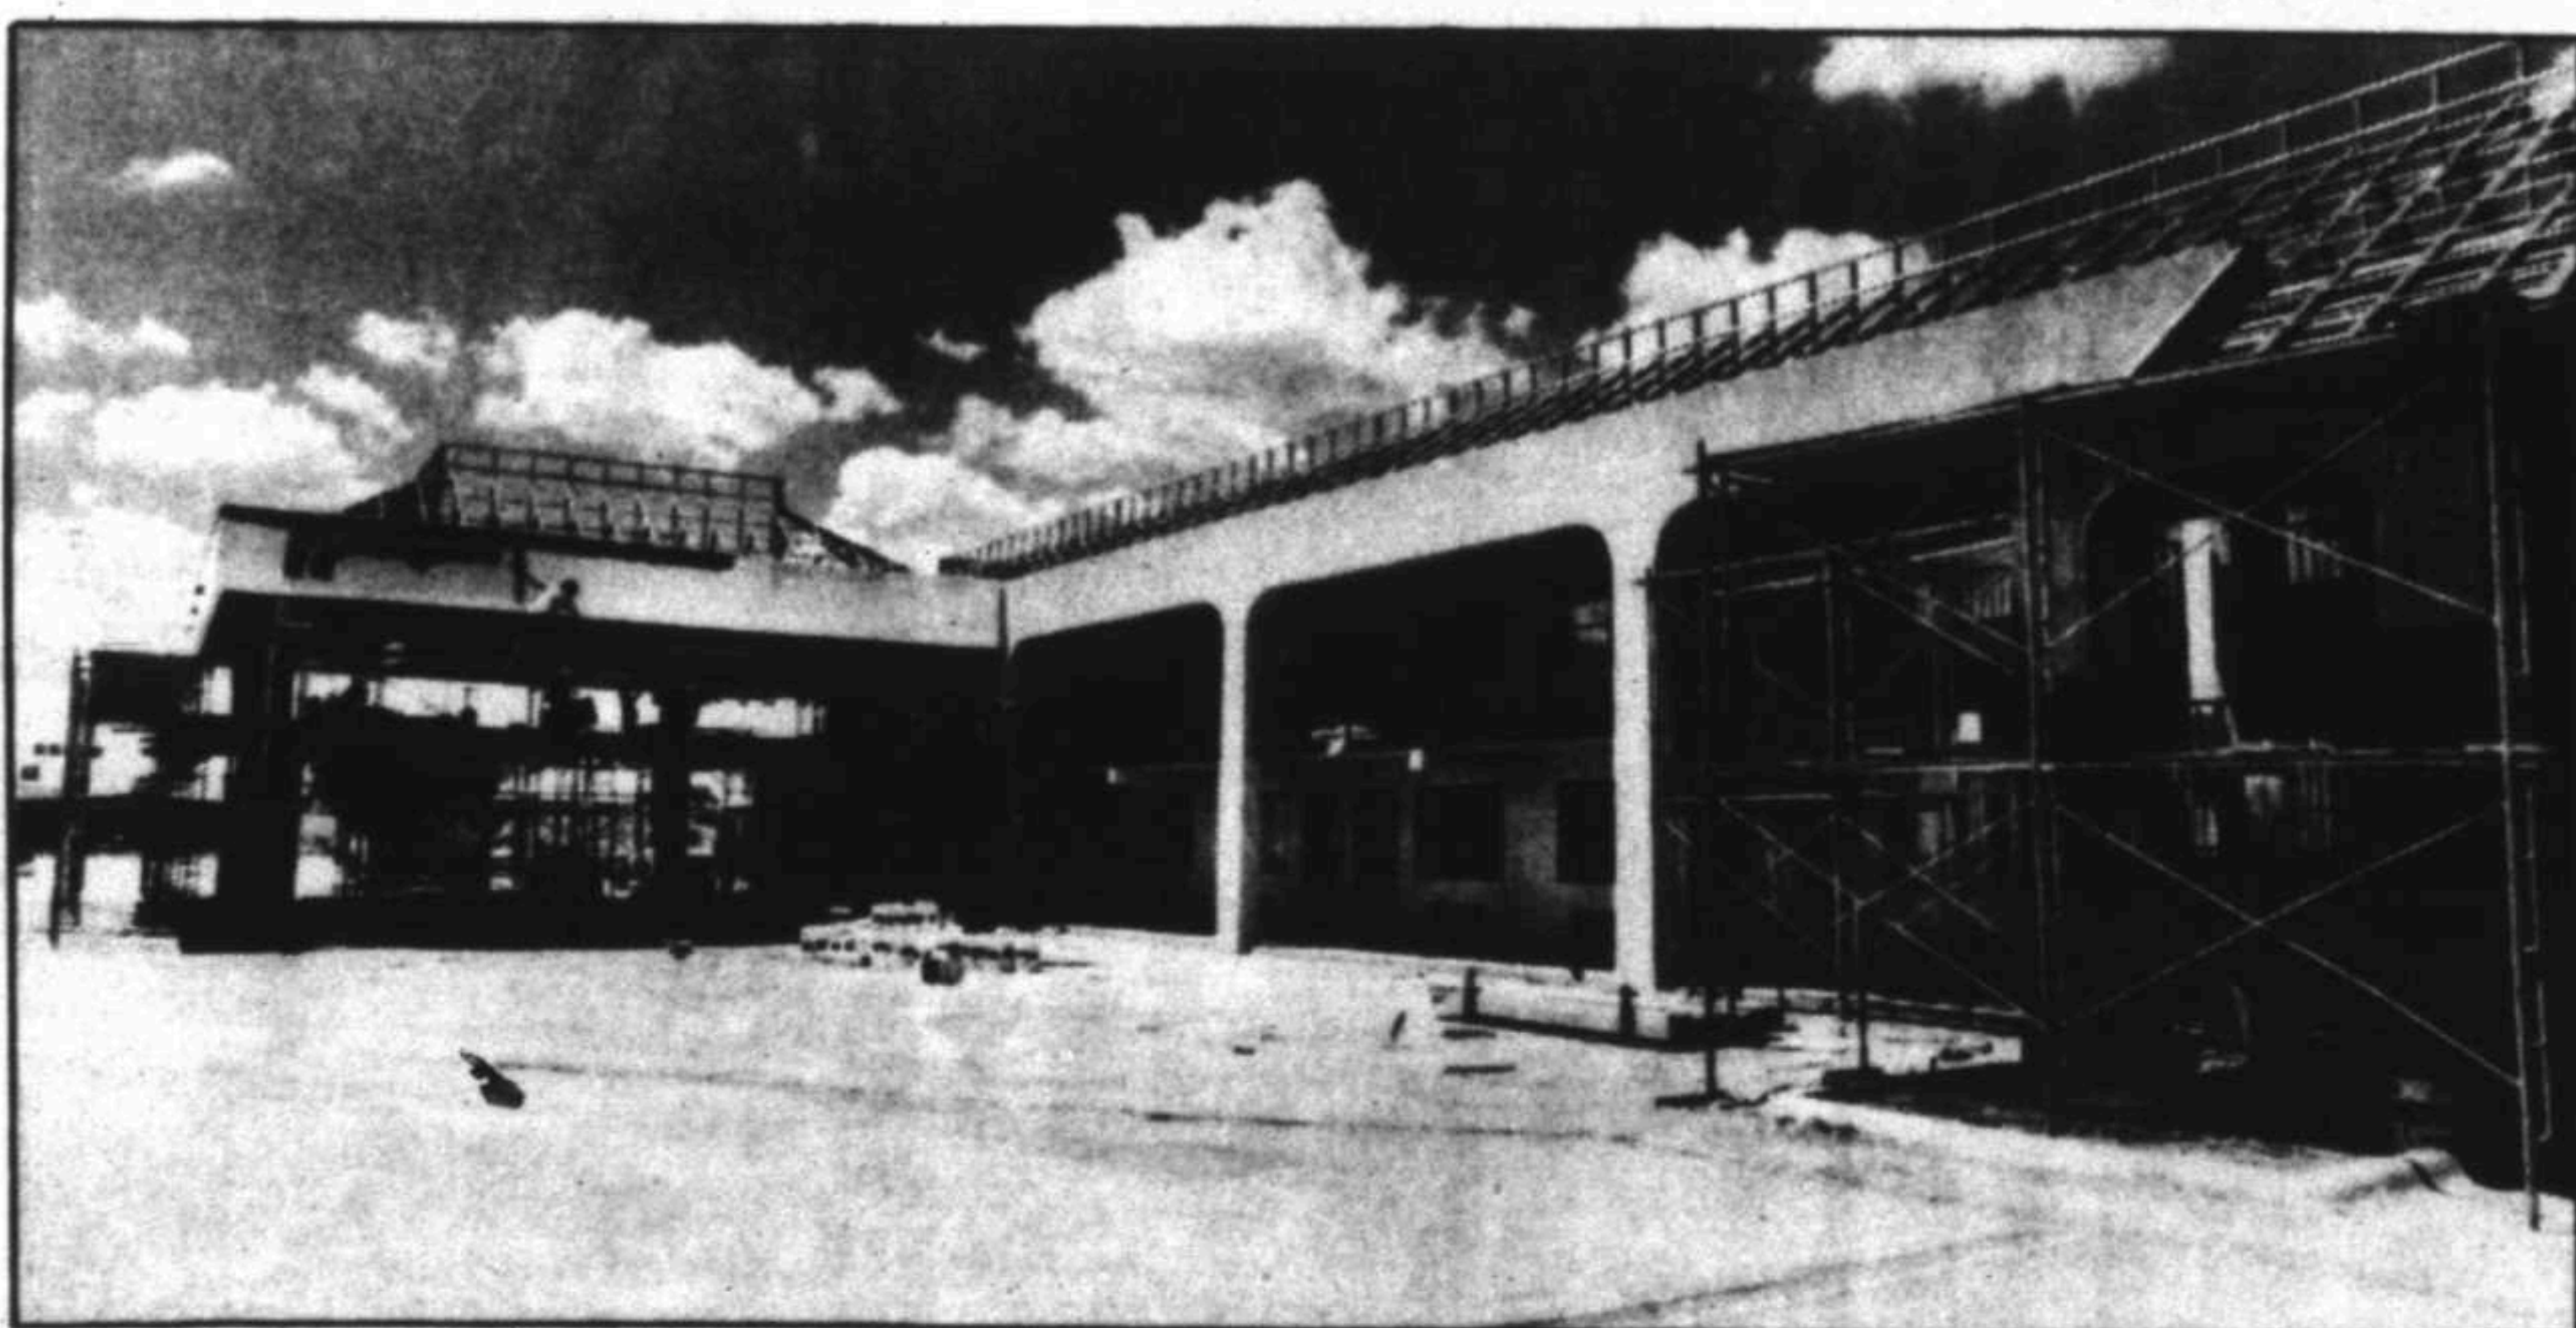

In two other signs of sluggishness, shipments of manufactured goods fell 1.9 percent, the sharpest fall since March 1986, and inventories shot up 1.1 percent, the biggest jump in five years.

A runup in inventories without a corresponding rise in new orders can signal production cutbacks in the future as factories attempt to get rid of goods and shelves and backlogs.

In July, orders for durable goods, items expected to last three or more years, fell 2.2 percent, a revision from last week's estimate of a 1.9 percent decline.

Orders for nondurable goods fell 1.1 percent.

In the key category of non-defense capital goods, a barometer of business investment plans, orders rose 5.7 percent in July after gaining 5.0 percent a month earlier. This was one of the few bright spots in an otherwise negative report.

Work is nearly complete, changing the Holiday Inn T-Dome into a Hampton Inn.

## Midland's newest hotel set to open

By MELLA McEWEN  
Business/Oil Writer

The Holiday Corp. — owner of Holiday Inns — hopes to build a successful new venture in Midland on the foundation of one of Midland's Holiday Inns.

The Holiday Inn T-Dome, 3804 W. Wall, has been converted into a Hampton Inn, set to open its doors Friday, making it the 205th hotel in the six-year-old chain.

Midlanders driving by may have a hard time recognizing the hotel after six months of renovations. Manager Jess Whitman estimates the renovations cost around \$1.5 million.

The renovations included tearing down the lobby portion of the T-Dome, adding a porte cochere and mansard roof, a new pool, and totally renovating all 110 rooms and the lobby. There is also a new AT&T phone system and computerized check-in system. The hotel is also linked to a nationwide Holiday Inn reservation system via a satellite dish.

While Hampton Inn has an in-house construction crew that oversees such renovations, some of the work such as plastering, was subcontracted to local workers.

Before joining Hampton two months ago, Whitman worked for Quality Inn in San Angelo for five years. He will be assisted in running the hotel by Keith Dial, guest

services manager, Nikki Dancy, sales manager, and Bea Ramirez, executive housekeeper.

Whitman explains that the decision to close the T-Dome six months ago and turn it into a Hampton Inn was so that it wouldn't have to compete with the Holiday Inn Country Villa a few blocks west. "Rather than competing Holiday Inn on Holiday Inn, we changed this one to go after a different market segment," he says.

Hampton Inn is geared toward the middle-range traveler and offers limited services in order to offer rates 20 to 40 percent lower than full-service hotels. "Limited services has a negative connotation, when all we're trying to say is that we don't have a restaurant and nightclub," notes Whitman.

Among the amenities the Midland Hampton Inn offers are:

- Half the rooms are non-smoking
- A spa area with wet and dry saunas, Jacuzzi, and exercise room;
- A free continental breakfast featuring coffee, pastries and juices supplied by local vendors;
- free local phone calls;
- free parking and ice; and
- free Showtime, and a pay-per-view movie channel.

## MARKETS

### Oil futures near \$19 mark

From Staff and Wire Reports

Oil prices continue their upward trend, begun Wednesday, nearing the \$19 mark.

At midmorning on the New York Mercantile Exchange, October contracts for West Texas Intermediate were up 12 cents to \$18.95.

The contract gained 19 cents to close at \$18.83 a barrel after closing unchanged Tuesday.

Prices across the board got a boost from increased demand for home heating oil as investors shrugged off reports of increased production by the Organization of Petroleum Exporting Countries (OPEC).

On the New York Mercantile Exchange, the September contract for heating oil rose 0.94 cent to close at 53.11 cents a gallon after rising 0.45 cent on Tuesday.

Demand for heating oil surged after an American Petroleum Institute supply report issued late Tuesday indicated that inventories of the fuel did not increase as expected, said Andrew Lebow, an analyst with E.D.&F. Man International Futures Inc.

Wholesale unleaded gasoline futures also rose, continuing the momentum begun in Tuesday's session. Gasoline for September

#### POSTED PRICE

- This Week \$17.75
- Previous Week \$17.75
- One Year Ago \$14.75

delivery picked up 0.39 cent to close at 55.00 cents a gallon, adding to a 0.96 cent advance Tuesday.

"The rising (refined) products market helped to bring crude up," Lebow said. More crude oil is needed when demand for heating oil and gasoline increases.

### Dollar up sharply against yen

LONDON (AP) — The U.S. dollar gained against major currencies in European trading this morning.

Gold prices were lower.

The dollar rose sharply against the yen in Tokyo trading, gaining 1.20 yen to close at 144.28 yen. Later in London, the dollar traded at 144.55 yen.

It was a quiet market, with traders in Frankfurt, West Germany saying they expected little more than end-of-the-month position squaring while traders awaited the release of U.S. unemployment figures on Friday. "It's going to be dead here today," said one trader.

The British pound sterling sold for \$1.5715 today, cheaper than the rate of \$1.5815 late Wednesday.

Gold opened in London at \$360 a troy ounce, down 75 cents from late Wednesday. At midmorning, the city's five major bullion dealers fixed a recommended price of \$359.60 a troy ounce.

In Zurich, gold traded at \$359.15 this morning after closing Wednesday at \$361.80.

Earlier in Hong Kong, gold dropped \$2.33 an ounce to close Wednesday at \$360.04.

Silver was quoted at \$5.08 per troy ounce, down 3 cents from late Wednesday.

### Stocks up slightly in seesaw session

NEW YORK (AP) — The stock market ended modestly higher Wednesday after a seesaw session in which prices were pushed up and down by program trading.

Continuing takeover speculation kept several airline stocks aloft and also benefited share prices of a few other companies.

The Dow Jones average of 30 industrials, which bounced between double-digit gains and losses, finished ahead by 1.52 points at 2,728.15. Advancing issues outnumbered declining ones by about 11 to 9 in nationwide trading of New York Stock Exchange-listed stocks, with 795 up, 650 down and 537 unchanged.

Volume on the floor of the Big Board came to 174.35 million shares, little different from the 175.21 million shares traded in the previous session.

The market sported moderate gains in the morning before rounds of futures-related program selling rocked stocks in the afternoon and temporarily knocked down share prices.

Stock prices bobbed back up, however, amid renewed buying when traders seized opportunities to profit from the price difference between stock-index futures and actual stocks.

A government report that furnished further evidence of economic health failed to have much impact on Wall Street. The Commerce Department said U.S. personal income rose 0.7 percent in July, the best gain in four months, while consumer spending climbed at its fastest pace since April, up 0.7 percent.

## BUSINESS IN BRIEF

### Personal income, spending up in July

WASHINGTON (AP) — Americans' personal incomes rose a brisk 0.7 percent in July while consumer spending also rose 0.7 percent, the fastest growth since April, the government says.

The Commerce Department also made significant revisions Wednesday to previous months' figures, showing that income growth and consumer spending were not as sluggish as previously believed.

The growth in income, fueled by rapid growth in wages and salaries, was the biggest monthly gain since March.

### New Exxon director marine scientist

NEW YORK (AP) — Exxon Corp. has named marine scientist John H. Steele as a director, in response to shareholder demands for the addition of an environmental expert following the nation's worst oil spill.

Steele, 62, is president and a senior scientist at Woods Hole Oceanographic Institution. He also will serve on the board's newly formed public issues committee, which will monitor the company's environmental policies, Exxon said Wednesday.

### Arby's franchisees bid for chain

ATLANTA (AP) — A group of franchisees operating more than 500 Arby's fast-food restaurants has offered over \$200 million for the chain, but the owner says it's not interested in selling.

Arby's Inc. is owned by a company controlled by DWG Corp., a Miami-based holding company controlled by industrialist Victor Posner.

The group of eight franchisees said Wednesday that Posner's legal and financial problems could threaten the stability of Arby's.

### Lawsuit shows dissension among KKR ranks

NEW YORK (AP) — A lawsuit filed by a founder of Kohlberg Kravis Roberts & Co. shows dissension in the ranks of the leveraged buyout firm, which has done some of the biggest corporate takeovers of all time.

Jerome Kohlberg Jr. filed suit Tuesday in state Supreme Court in Manhattan alleging that the firm reduced his stake in several companies that were acquired when he was one of its general partners.

The suit names as defendants Kohlberg Kravis, its KKR Associates arm and the firm's two other founders, Henry R. Kravis and George R. Roberts.

### Drexel announces management changes

NEW YORK (AP) — Drexel Burnham Lambert Inc., the Wall Street giant that recently settled federal securities fraud charges, has announced several senior management changes, including the appointment of a new president.

EXPLORATION HIGHLIGHTS

# Abandoned well yields gas strike

From Staff Reports

A reentry in Chaves County, N.M. has resulted in a rank Mississippi discovery, approximately five miles southeast of the Calumet field.

**HANAGAN PETROLEUM CORP.** reentered the No. 2 Long Arroyo, an abandoned well, testing it for a calculated absolute open flow of 1.2 Mmcfd. The well flowed from perforations 7,665 to 7,752 ft., which had been acidized with 2,250 gallons of acid.

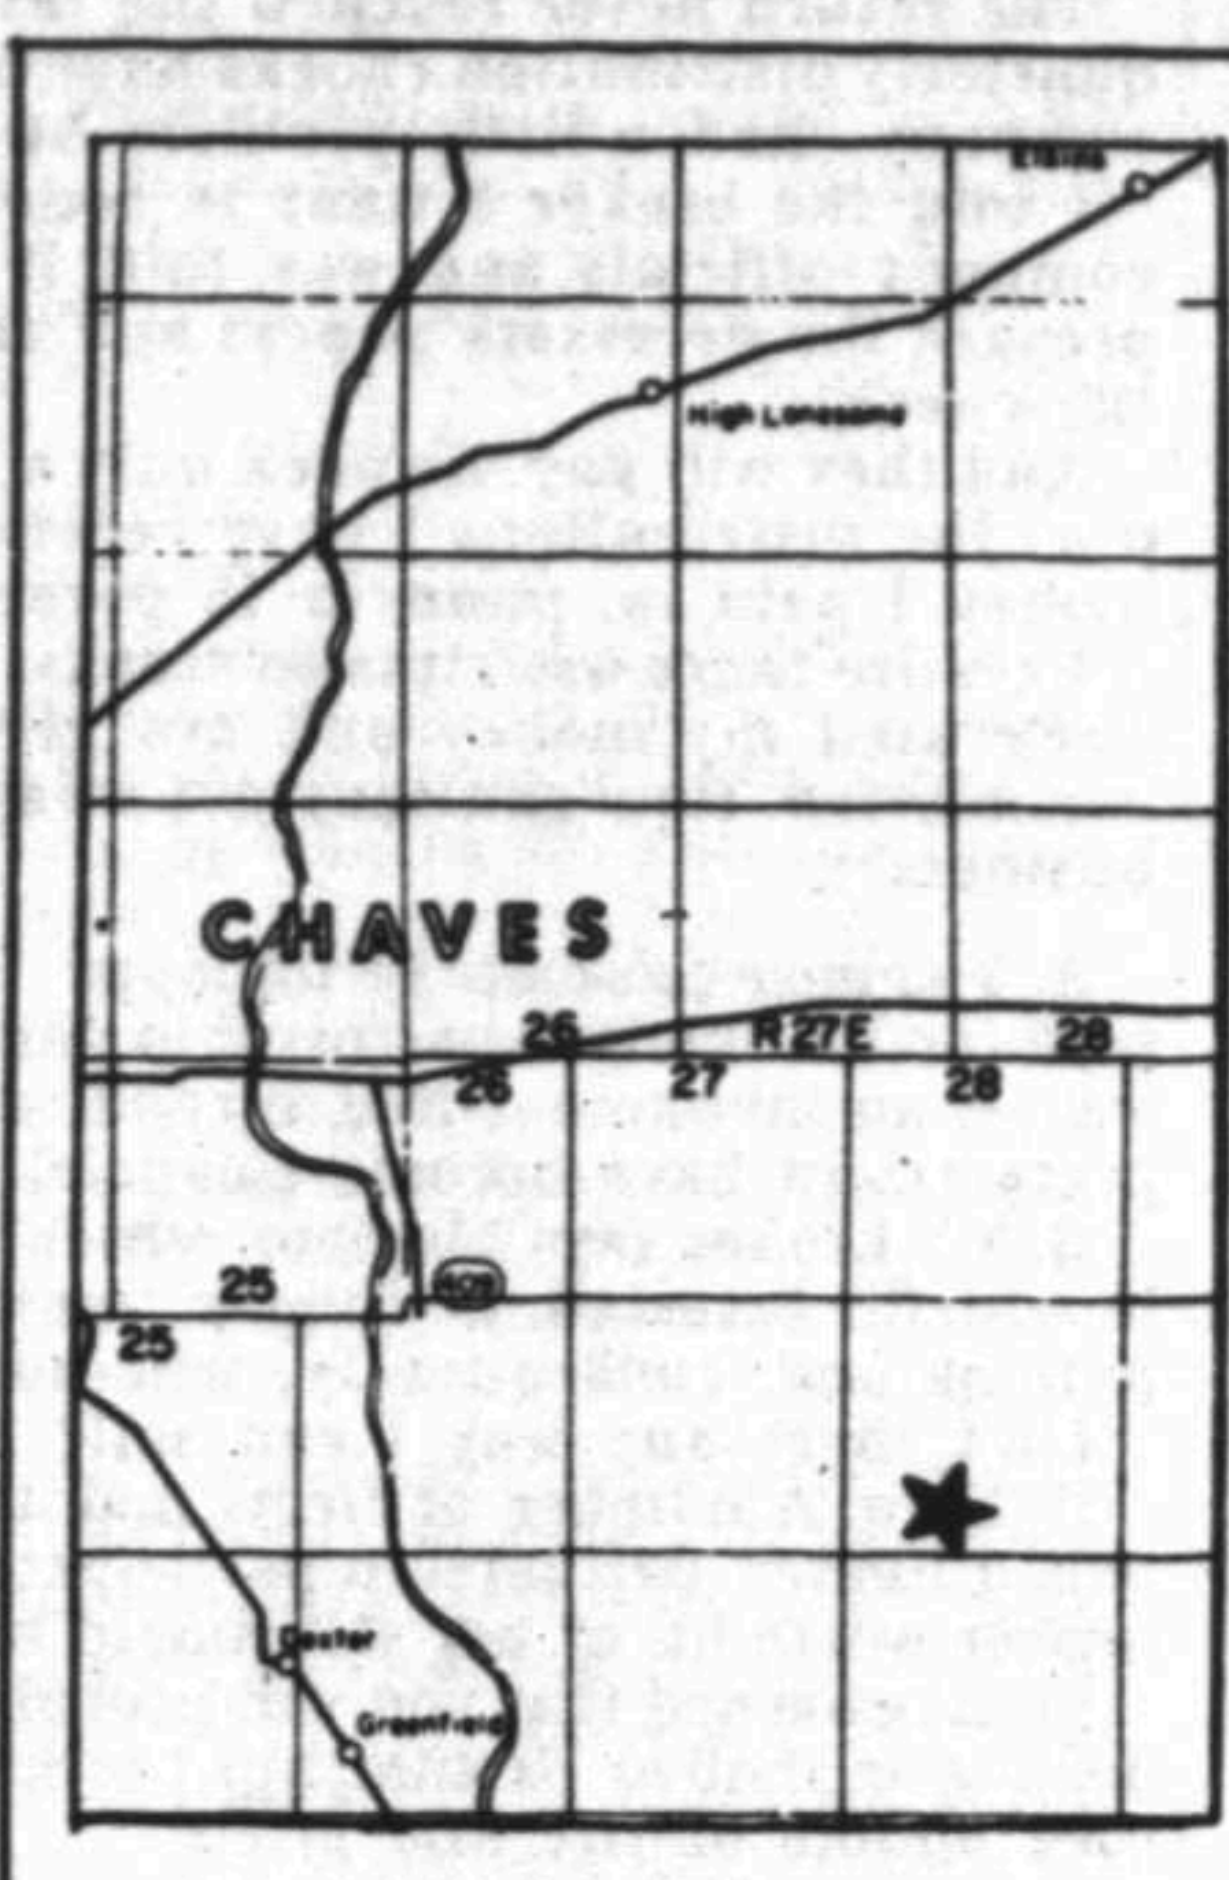

Originally drilled to 8,501 ft., the well was plugged back to 8,075 ft. with 5 1/2 inch casing set at 8,367 ft. Formation tops, on ground elevation of 3,601 ft., include the San Andres at 1580 ft., Golieta at 2910, Abo at 5134, Strawn at 7300, Mississippian at 7490, Devonian at 8166, Simpson at 8390, and Ellenburger at 8420 ft. Pay was topped at 7,665 ft. Location is 1,980 ft. from south and 2,310 ft. from west lines of Section 33, T12S, R28E.

## Chevron recompletes Pecos dual producer

A former dual McKee and Lower Leonard producer in the El Cinco field of Pecos County has been recompleated as a Dual producer in the Crosssett South field.

**CHEVRON U.S.A. INC.**, Midland, reentered the No. 1 Ruth Price et al "E" and completed for a calculated absolute open flow of 12 Mcd from perforations 4,870 to 5,145 ft. The interval was acidized with 10,000 gallons of 15 percent NeFce acid.

Originally drilled to 5,503 ft., the well was plugged back to 5,341 ft. with 5 1/2 inch casing set at 5,502 ft. Pay was topped at 4,870 ft. Location is 467 ft. from southeast

### ★Chaves discovery

An abandoned well in Chaves County, N.M. has been reentered and completed as a Mississippi gas discovery.

## Production added to Reeves gas field

New Delaware Sand gas production has been added to the Hamon (5270) field of Reeves County.

**GIBBEL PETROLEUM LTD.**, Midland, finished the No. 1 Waples Platter for a calculated absolute open flow of 1.75 Mmcfd. The well flowed from perforations 5,141 to 5,178 ft., which had been acidized with 28,000 gallons of acid and fractured with 24,000 gallons of gel and

64,000 lbs. 20/40 sand. Condensate gravity was 34.5 degrees API. Drilled to 5,188 ft., the well was plugged back to 5,181 ft. with 4 1/2 inch casing set at 5,187.5 ft. The well topped the Delaware Lime at 5,100 ft. and Delaware Sand at 5,140 ft. on ground elevation of 2,782 ft. Pay was topped at 5,140 ft. Location is 990 ft. from north and 467 ft. from west lines of Section 22, Block 50, T-8, T&P survey, 20 miles south of Pecos.

## Dallas operator adds five to Andrews field

**PETRUS OIL CO. L.P.**, Dallas, continues development in the

McFarland (Queen) field of Andrews County, adding five new wells to the field.

The No. 1241 McFarland Queen "A" Unit was completed to pump 70 barrels of 32 gravity crude, 25 Mcd and 20 barrels of water from perforations 4,904 to 4,920 ft.

The well is located 690 ft. from south and 4,631.1 ft. from east lines of Section 41, Block 4, ULS survey, eight miles northeast of Andrews.

On potential test, the No. 3532 McFarland Queen "A" Unit pumped 54 barrels of 31 gravity crude, 14 Mcd and 36 barrels of water from perforations 4,888 to 4,938 ft.

Location is 2,086 ft. from east and 1,881.3 ft. from north lines of Section 32, Block 4, ULS survey, eight miles northeast of Andrews.

Petrus tested the No. 4741 McFarland Queen "A" Unit to pump three barrels of 32 gravity crude, 1 Mcd and 139 barrels of water from perforations 4,904 to 4,954 ft.

The well is located 1,320 ft. from south and east lines of Section 41, Block 4, ULS survey, eight miles northeast of Andrews.

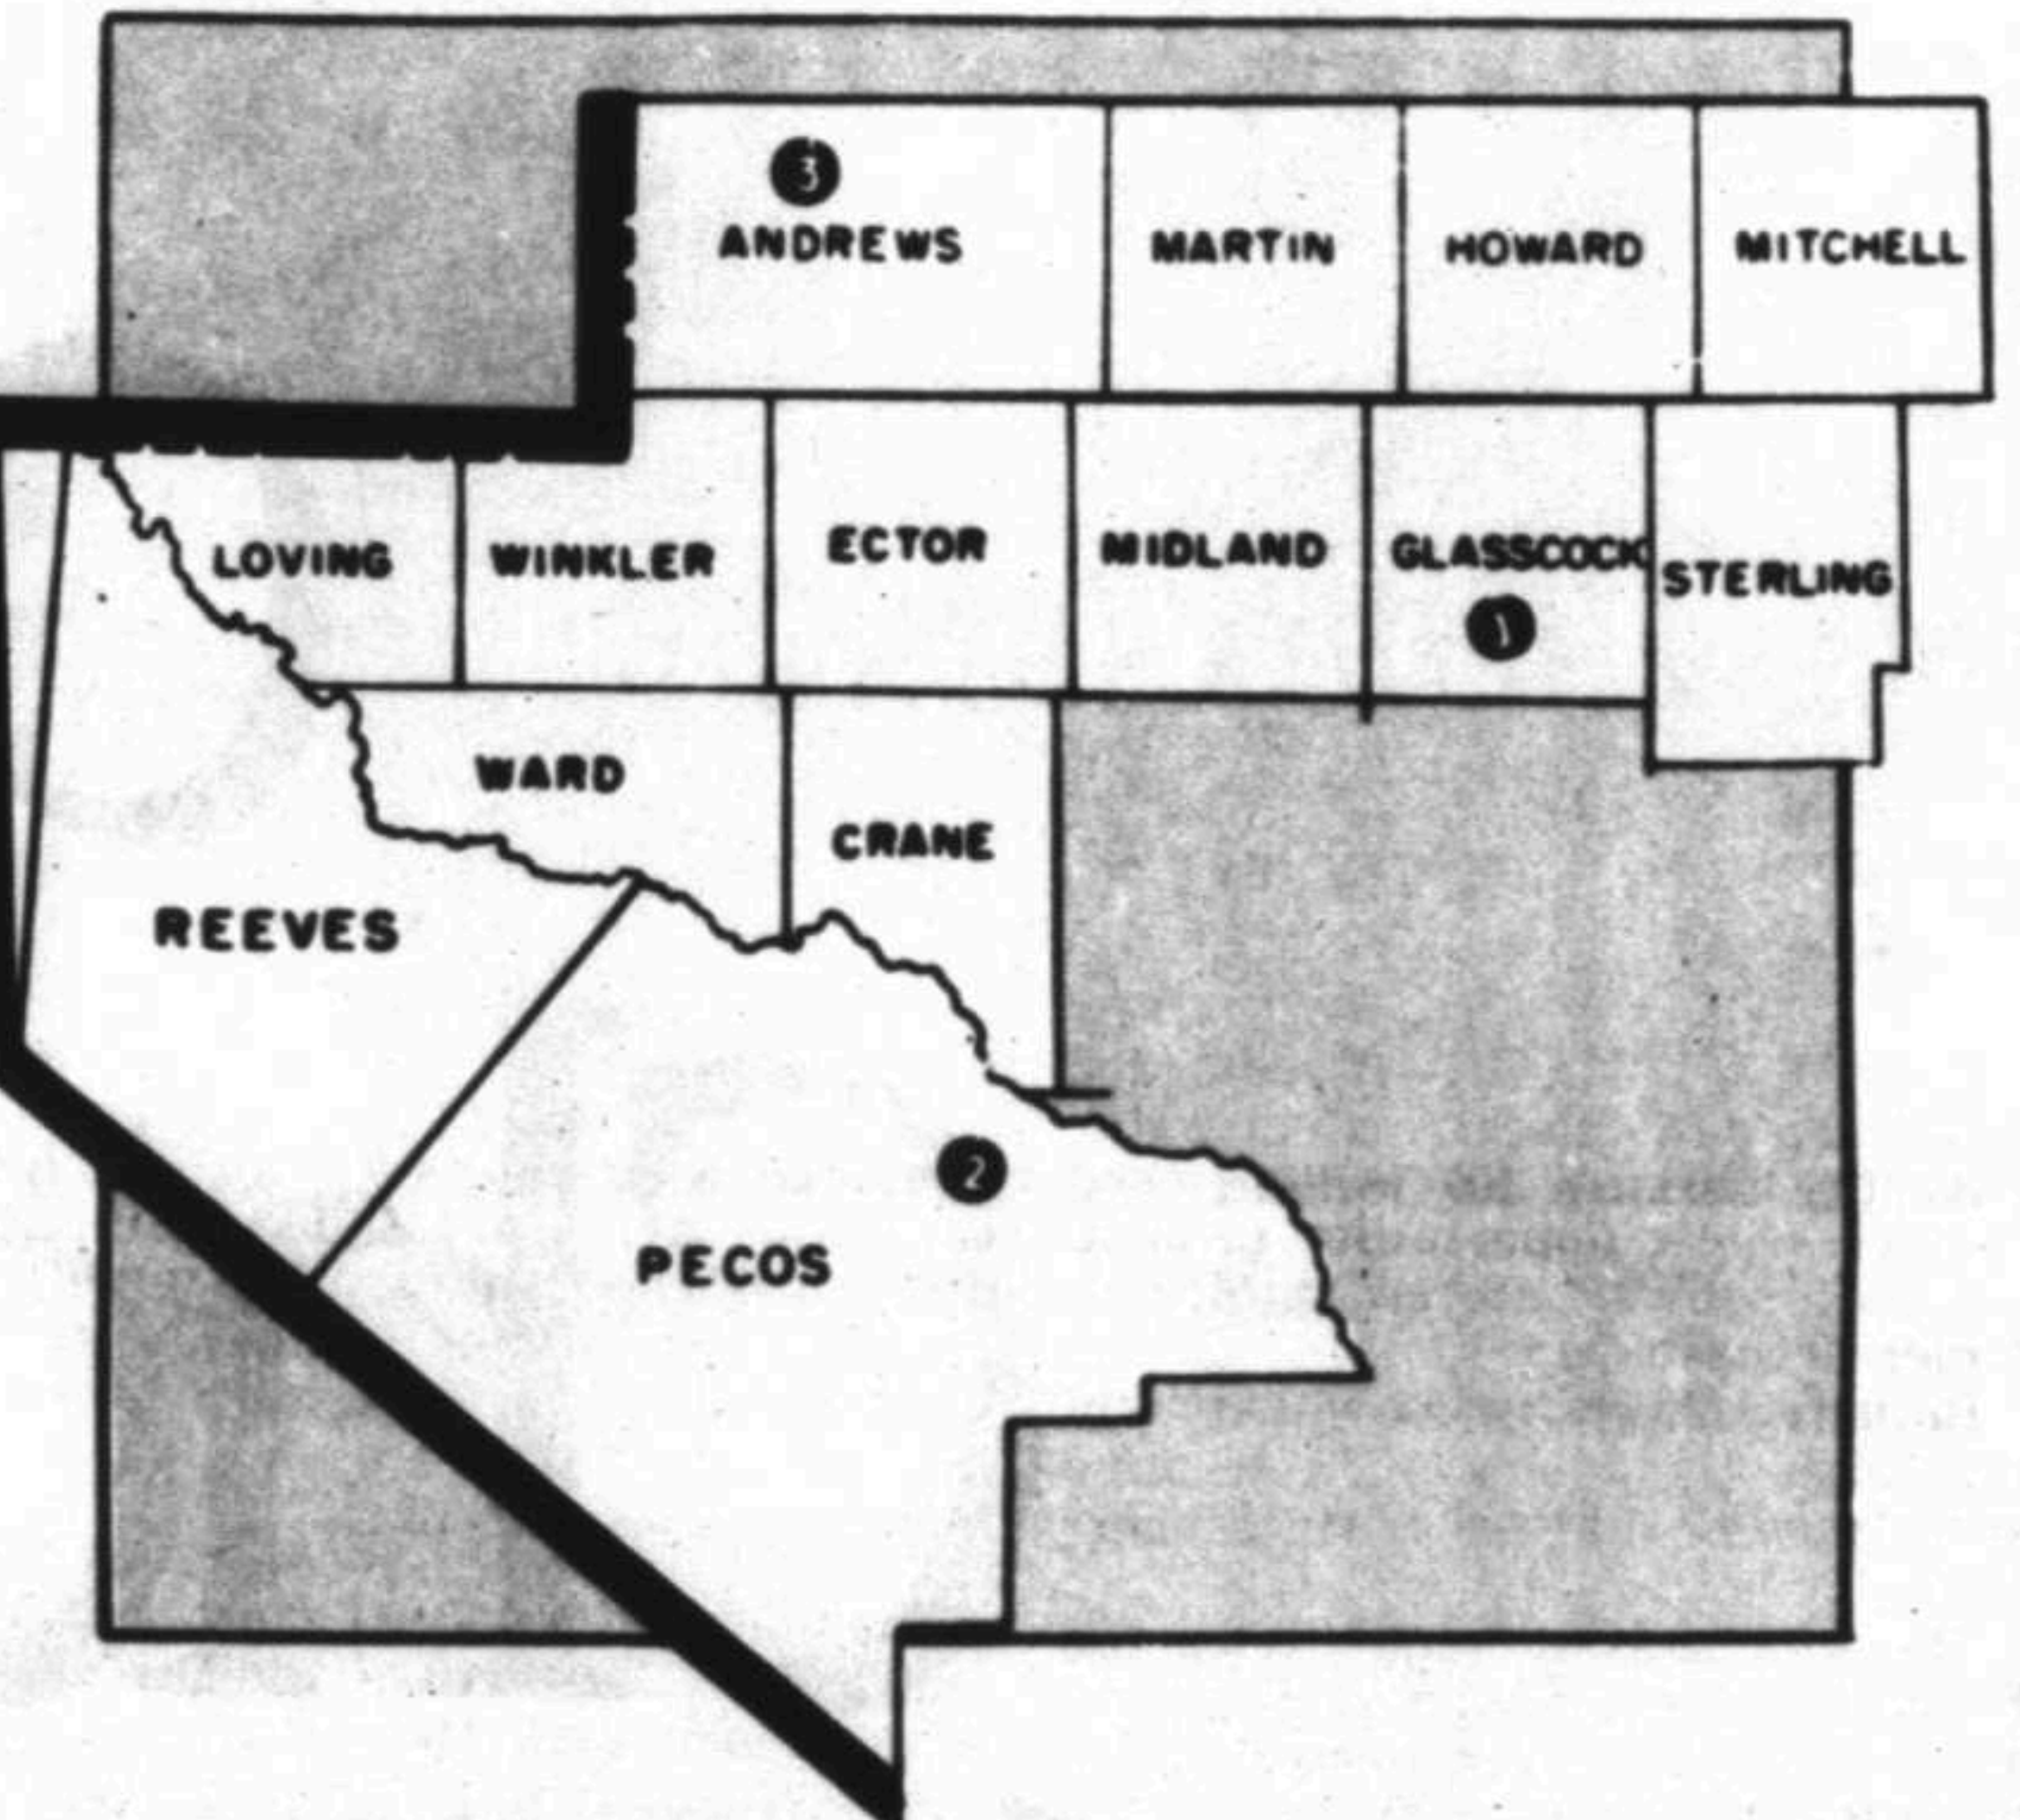

The No. 5142 McFarland Queen "A" Unit was finished for 34 barrels of 31 gravity crude, 8 Mcd and 50 barrels of water from perforations 4,888 to 4,898 ft.

Location is 1,320 ft. from north and 3,909.1 ft. from west lines of Section 42, Block 4, ULS survey, eight miles northeast of Andrews.

The No. 4941 McFarland Queen "A" Unit was potentially to pump 41 barrels of 32 gravity crude, 15 Mcd and 49 barrels of water. The well produced from perforations 4,860 to 4,914 ft.

Location is 1,320 ft. from south and 3,973.1 ft. from east lines of Section 41, Block 4, ULS survey, eight miles northeast of Andrews.

## WILDCATS

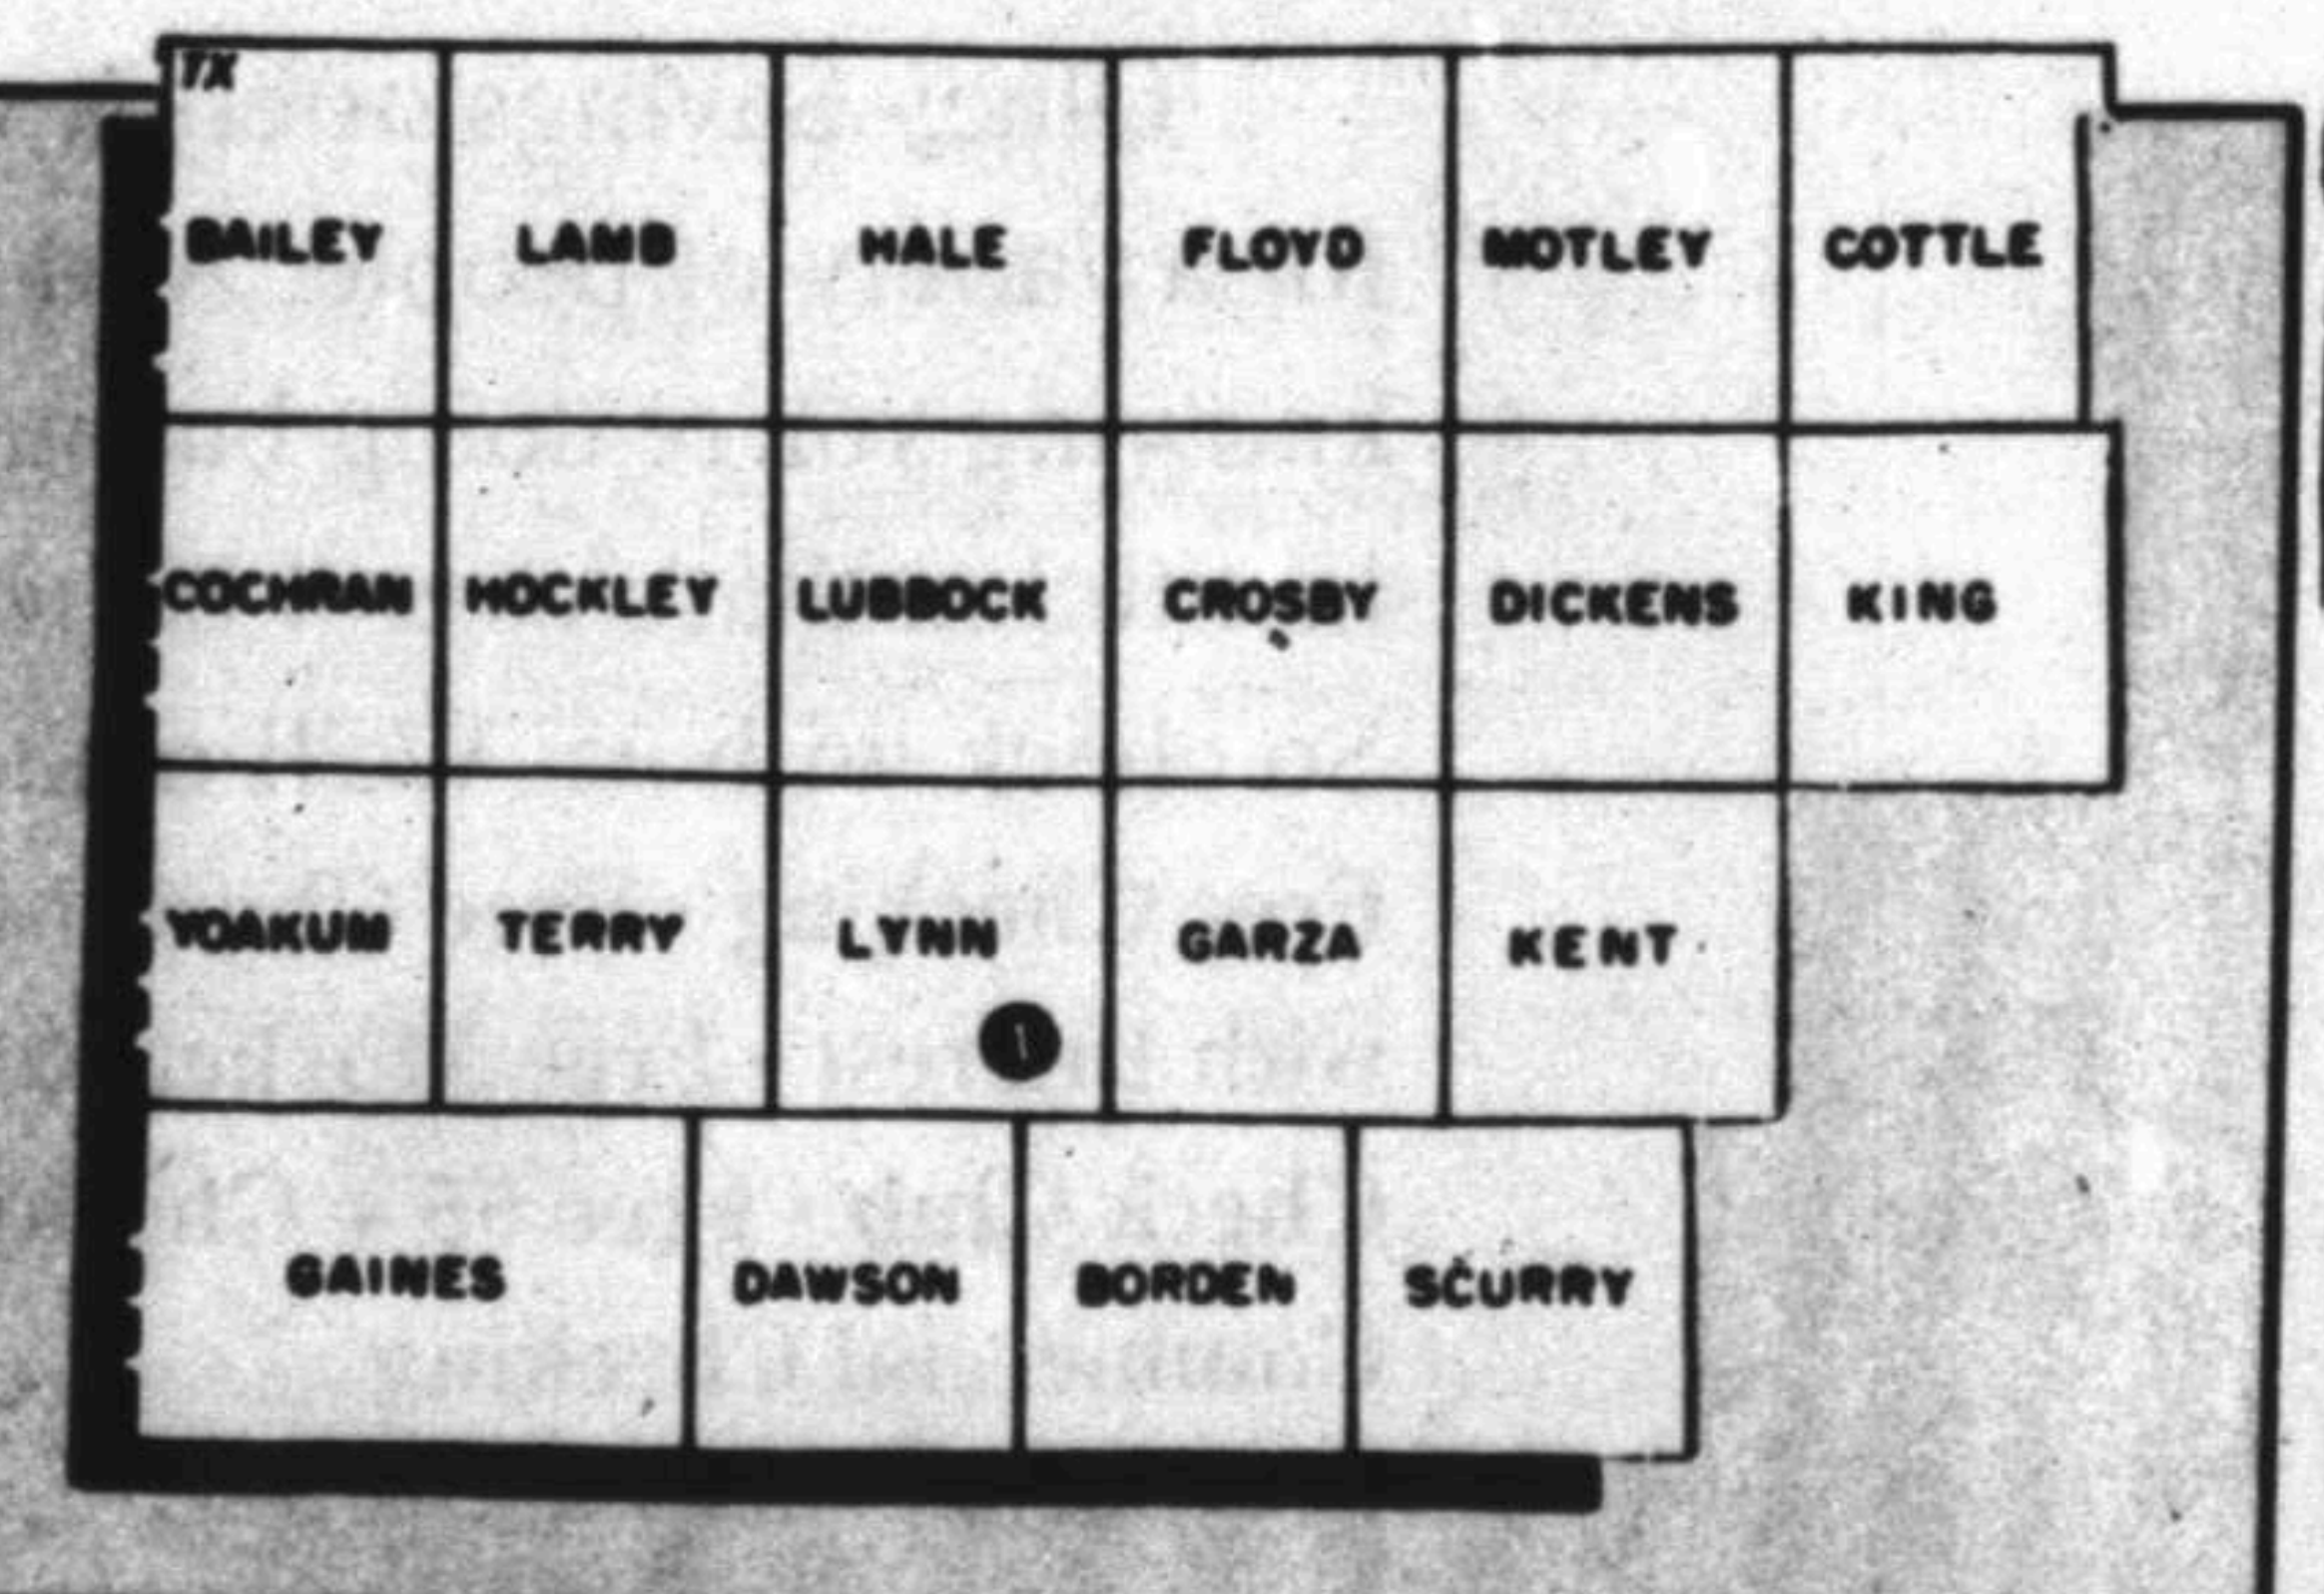

### TRC DISTRICT 8

**GLASSCOCK DRAWS WILDCAT LOCATION.** A 10,250 ft. wildcat is set for Glasscock County, eight miles southeast of Garden City. The well will also test the Tres Amigos (Fusselman) at 10,200 ft. Union Texas Petroleum Corp., Houston, will drill the No. 3 Neste Currie 550 ft. from west and 1,550 ft. from south lines of Section 44, Block 33, T-4S, T&P survey, Abst. 1021.

**2. TXO EYES PECOS PROSPECT.** TXO Production Corp., Midland, has applied to drill a 5,200 ft. prospect in Pecos County, six miles southeast of Girvin. The well will also test the Wantz (Clearfork) at 2,300 and Wantz (Wichita Albany) at 3,300 ft.

The No. 1 Woodward Estate "32" is 660 ft. from west and 467 ft. from south lines of Section 32, Block 11, H&GN survey.

**3. REENTRY SET IN ANDREWS.** A former Fullerton (Devonian) producer will be reentered and cleaned out to 7,515 ft. for wildcat tests in Andrews County, 15 miles northwest of Andrews. Marathon Oil Co., Midland, will reenter the No. 102 University, 874 ft. from north and 1,948 ft. from west lines of Section 5, Block 13, ULS survey.

### TRC DISTRICT 8A

**1. REENTRY SET IN LYNN.** A wellbore in Lynn County will be reentered and cleaned out to 7,300 ft. for wildcat tests, two miles northwest of Draw. Fina Oil & Chemical Co., Midland, will reenter the No. 1 Eagle, 467 ft. from north and 1,694 ft. from east lines of Section 406, Block 2, HE&WT survey.

## Kirby Exploration plans offering

**HOUSTON (SWN)** — Kirby Exploration Co. Inc. announced that it has filed with the securities and Exchange Commission a registration statement relating to a public offering of \$50,000,000 of convertible subordinated debentures. The offering, which is expected to commence in late September 1989, is being underwritten by FaineWebber Incorporated. The company said that the net proceeds of the offering will be used to repay indebtedness incurred in connection with a recent acquisition and for general corporate purposes.

Kirby is a diversified corporation engaged in marine transportation, marine diesel repair and property and casualty insurance. A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

## DEVELOPMENT WELLS

**DRILLING PROGRAM SET IN ANDREWS.** Three wells have been staked in the McFarland (Queen) field of Andrews County by Petrus Oil Co. L.P., Dallas. The three are in the McFarland Queen "B" Unit, Sections 15 and 22, Block 4, ULS survey, 10 miles northeast of Andrews. Contract depth is 5,200 ft.

**FINA TO ADD TO GAINES FIELD.** Fina Oil & Chemical Co., Midland, plans to add three wells to the Robertson North (Clearfork) field of Gaines County. All three are in the North Robertson Unit, eight miles southwest of Seminole. Two are in Sections 7 and 8, Block AX, PSL survey; the third is in Section 292, Block G, WTRR survey. Contract depth is 7,350 ft.

# Anadarko buys interests from Parker & Parsley

**HOUSTON (SWN)** — Anadarko Petroleum Corp. has completed the purchase of a 95-percent working interest in certain oil producing properties in West Texas for \$25.3 million. The properties were sold by Parker & Parsley Development Partners, L.P. and related parties. The purchase involves eight leases covering approximately 2,400 acres in Hockley County, Texas in the Levelland Field, which is considered one of Texas' largest proven secondary recovery (waterflood) oil fields with about 4,000 wells in the San Andres formation at 5,000 feet. During 1989, Anadarko will complete the installation of waterflood facilities and complete an infill drilling program which is currently underway. When the properties are fully developed in 1990, there will be approximately 100 oil wells (including injection wells) operating on the leases. Anadarko has tentatively agreed to purchase the remaining five percent working interest in the properties and expects to assume operations on October 1, 1989. Anadarko's Midland, Texas division office will be responsible for these and other secondary recovery oil properties operated by Anadarko in the area. This acquisition complements Anadarko's ongoing strategy of buying producing properties.

## SALES

(Continued from Page 8C)

This compares to July 1988, during which 17 new residences were reported for a construction value of \$1.88 million. There was no new commercial construction in July 1988, and mobile home construction totaled only \$5,000.

According to the F.W. Dodge Group of McGraw-Hill Information Services Co., July contracts for building in Midland County totaled \$3.2 million, up 2 percent from July 1988. Residential construction activity totaled \$2.69 million, down 3 percent from year ago, and non-residential construction activity totaled \$559,000, up 42 percent from July 1988.

Year-to-date in 1989, Midland County nonresidential construction activity totaled \$10.2 million, up 61 percent from the same period of 1988. Residential construction activity totaled \$19.8 million cumulatively, up 3 percent from the same period of 1988. Total construction activity throughout 1989 is valued at \$30.1 million, according to F.W. Dodge, up 17 percent from the 1988 cumulative value of \$25.7 million.

Nonresidential buildings include commercial, manufacturing, educational, religious, administrative, recreational and other buildings not designed for shelter.

Residential buildings include houses, apartments, motels, dormitories and other buildings designed for shelter.

## EOR

(Continued from Page 8C)

"We are also happy with our purchase of Tenneco properties in the Gulf, that gives us a stronger position there," Price said. Chevron purchased the Tenneco properties late last year for \$2.5 billion.

Price said Chevron, which initiated the first CO<sub>2</sub> project in the Permian Basin at the Scurry County Sarcoc Unit in 1972 was orientated to EOR and he expected a long future for the company in the Permian Basin as property after property is converted to CO<sub>2</sub>.

Both Price and Southern Region Vice President John Rowland praised the cooperation and support

of the Permian Basin in helping Chevron initiate its EOR project. "Imagine, that only 18 months ago," we had not started on this plant," said Rowland, pointing to the \$48 million Lo-Cat CO<sub>2</sub> Recovery Plant which was completed in less than half the normal time for projects of this size.

"There is still a lot of oil in place in the Permian Basin and I imagine that will keep us in the Permian Basin for an awful long time," said Price. "When this generation of recovery technology is finished, we will move on to something else."

Said Rowland: "I would bet that we will be here for the next 100 years."

## Regulators put five big thrifts on auction block

WASHINGTON (AP) — Federal regulators announced Wednesday they were selling five of the largest failed savings institutions under their control, including a Texas thrift once owned by the former owner of the Dallas Cowboys.

David C. Cooke, director of the Resolution Trust Corp., the new agency created earlier this month to dispose of bankrupt S&Ls, said the five, with assets totaling \$10.8 billion, will be the first major institutions returned to private ownership.

They are:

■ Bright Banc Savings Association, Dallas, with \$4 billion in assets, formerly owned by H.R. "Bum" Bright, once one of the nation's 50th wealthiest men and the former owner of the Dallas Cowboys of the National Football League.

■ San Antonio Savings Association, San Antonio, with assets of \$2.5 billion.

■ Baltimore Federal Financial, Baltimore, with \$1.6 billion in assets. It was one of the first three S&Ls seized by the government on Feb. 7, the day after President Bush announced his S&L proposal.

■ Broadview Federal Savings Bank, Independence, Ohio, with \$1.6 billion in assets.

■ Skokie Federal Savings and Loan Association, Skokie, Ill., with assets of \$961 million.

Together, the institutions serve 954,000 depositors. They are the first

transferred to the RTC's major transactions division, which will begin meeting with potential buyers.

Cooke said the institutions already have "attracted considerable investor interest nationwide."

Cooke's announcement came one day after his agency's overseers cleared the RTC to get started on large, complex deals. The RTC is run by the Federal Deposit Insurance Corp., the independent regulatory agency, but the \$50 billion in bailout spending authorized in this month's S&L bill is controlled by an administration oversight panel headed by Treasury Secretary Nicholas F. Brady.

The regulators and the administration overseers had been squabbling over the RTC's autonomy. Regulators had said they were ready to get to work, but could not because the oversight board had forbid the RTC from tackling any complex deals until the panel could settle on policies governing the transactions.

In a directive issued late Tuesday, the oversight board told the RTC it could get started, but the panel said it must be consulted before completion of transactions involving financing or loss guarantees.

Since it began operating on Aug. 9, the RTC has closed 11 small S&Ls, transferring their deposits to other institutions or paying off customers directly.

Beg Your Pardon ?

## INVESTOR'S GUIDE

## Limited partnerships aren't 'can't lose' investment

By BILL DOYLE

Q. A man I see most every Saturday, in the grill after playing golf, keeps trying to sell me "limited partnerships." He calls them "can't lose investments," because they are organized as limited partnerships. Is it true I could not possibly lose any of the money I invest in limited partnership?

A. No! If your Saturday afternoon companion is actually saying that, stuff a wood cover in his mouth and find a spot at the 19th hole away from him. Only a charlatan would make the claim that no money can be lost in limited partnerships. Let's be kind and assume you misunderstood what he said.

The "limited" in limited partnership means you can lose no more than the money you invest. However, you might lose every dollar you paid in.

A limited partnership is organized by one or more general partners, who run the business. Money is raised by selling "participations" or "units" to limited partners. The partnership can engage in virtually any kind of endeavor, including real estate, oil and gas exploration and drilling, equipment leasing, motion pictures and Broadway plays.

Not so many years ago, the great attraction of limited partnerships was their tax shelter. The Tax Reform Act of 1986 and other recent tax law changes took most of the bloom off that rose. Now, tax benefits from a partnership can be used only to offset income from that partnership and/or other partnerships. You cannot use the tax loss from a partnership to offset your salary and other ordinary taxable income.

Before you even think about investing in a limited partnership, obtain a copy of the prospectus or offering circular covering the particular issue. Study it yourself and take it to a good accountant for an opinion.

Q. I invested \$10,000 in an equipment leasing limited partnership four years ago. My broker told me the return would be 13 to 25 percent in two years and increase after that. He suggested keeping this for six years

and then pulling out.

The return never reached the level projected by the broker and my quarterly distribution checks have been decreasing. The broker said the company "had a little problem but is regrouping; not to worry."

I told the broker I want to redeem my investment. He phoned the company officials and was told it would take about three weeks to prepare the necessary papers and another four to six weeks to send me the check.

And they will pay me back only a fraction of my \$10,000. That amount, plus the distributions I have received will total only \$8,500. That's the money I paid in, minus a 15 percent commission.

I realize there are risks in stocks. But this wasn't even an investment. They used my money and are giving back what I paid, less a large commission. How can they get away with such a crooked way of doing business?

A. You have reason to be unhappy. But you're wrong about the \$10,000 you paid for that limited partnership participation not being an investment. It was — an investment that turned sour. That's not unusual. Many limited partnerships have become financial disasters in recent years.

Q. My broker says his firm, which "sponsored" the limited partnership in which I invested, no longer "makes a market" in partnership participations and, consequently, will not buy back mine.

Isn't there any way I can sell?

A. Sure. A number of firms maintain secondary markets for previously issued limited partnership participations — buying and selling them. Any broker worth his or her salt should be able to get price quotations for you.

Be forewarned that you will probably take a big loss by selling. The firms dealing in limited partnership participations usually offer to buy them at rock bottom or fire sale prices.

Miller and other consumer activists believe the regulations should force card companies to compete by lowering their interest rates and annual fees.

Bankers and analysts, however, say most cardholders probably won't see much decline.

"It's going to put some strain on banks charging above-market rates ... and some of the banks that have extremely low rates may see a little more business, but the vast majority are going to stay where they are," said Robert H. Burke, senior vice president of the Bank of New York. "I don't think it's going to do much of anything," agreed Robert B. McKinley, publisher and editor of RAM Research's Bankcard Update, a Frederick, Md., newsletter that follows the industry.

McKinley said competition has increased in the past several years, but rates are still high, even in the dozen or so states such as California and New York that have their own disclosure laws.

Nationally, cards offered by banks had average interest rates of 18.28 percent in August and an average annual fee of \$16.97, he said.

One reason interest rates are not lower is the growing concentration of the industry as large institutions buy out smaller credit card operations, said McKinley. Another is that

consumers don't appear to pay much attention to interest rates.

Economists attribute the indifference to interest rates in part to the fact that most people intend to pay off their entire bill each month, avoiding interest charges. But a substantial portion don't follow through on their good intentions.

Credit card rates became a political issue in the early 1980s when short-term interest rates soared above 20 percent. Consumer groups sought disclosure rules and federal caps on the rates, but made little headway until they dropped their demand for caps.

Although earlier disclosure of card terms should help card shoppers, McKinley said it still won't be easy to find cards with the lowest rates.

Big national operations, which do the most advertising and mail solicitation, generally charge higher rates and fees. The best bargains often come from banks and savings institutions that, at most, advertise only regionally.

McKinley said consumers should decide whether they will use it for convenience or to borrow. Cardholders who pay their entire balance monthly should look for a card with a low annual fee, or no fee. However, those who carry balances of \$1,000 or more may find it cheaper to pay a fee in exchange for a lower rate.

## Banks with credit card rates below 10 percent

WASHINGTON (AP) — Here is a list of 10 banks and savings institutions offering credit cards with interest rates below 16 percent in August, according to RAM Research's Bankcard List.

RAM Research, based in Frederick, Md., surveys 350 banks, representing 90 percent of the bank card market, according to editor and publisher Robert B. McKinley.

Nationally in August, rates averaged 18.28 percent and annual fees \$16.97.

1. Arkansas Federal, Little Rock, Ark. 11.88 percent annual interest, variable. \$35 annual fee. No grace period. Interest charged from date of purchase.

2. People's Bank, Bridgeport, Conn. 13.5 percent, but a higher rate charged for cash advances. \$25 annual fee. Twenty-five-day grace period.

3. NCNB Texas, Dallas. 13.9 percent, variable. No annual fee. Twenty-five-day grace period.

4. Republic Savings, Milwaukee. 13.92 percent. \$10 annual fee. No grace period. Interest charged from date of posting.

5. Horizon Savings, Austin, Texas. 14 percent. No annual fee. Twenty-five-day grace period.

6. First Atlanta, Wilmington, Del. 14.88 percent. \$24 annual fee. Twenty-eight-day grace period.

7. Connecticut Bank and Trust, Fairfield, Conn. 15 percent, but a higher rate for cash advances. \$25 annual fee. Twenty-five-day grace period.

8. USAA Federal, Tulsa, Okla. 15.32 percent, variable. No annual fee. Twenty-five-day grace period.

9. Mercantile, St. Louis. 15.9 percent. \$20 annual fee. Twenty-five-day grace period.

10. Champion Federal, Bloomington, Ill. 15.9 percent. \$20 annual fee. Thirty-day grace period.

Consumers should check with the credit card issuers to see whether any of the rates or fees shown here have changed and to obtain information about other terms.

## HOTEL

(Continued from Page 8C)

Rates range from \$34 for a single bed for one to \$45 for a room with a King-sized bed for two or more.

In addition to employing 20, many of whom had worked at the T-Dome, Hampton will be using local vendors for various supplies.

Besides being geared toward the family traveler, the Hampton Inn hopes to attract the business traveler. There is a meeting facility available that can seat 12 to 15. Whitman

points out that they don't have the facilities to host a large gathering, but would be suited for a seminar or meeting between visiting company leaders and local managers.

Midland's Hampton Inn is owned by Midland Hotel Inc. under a license from Hampton Inn Hotels, a division of Holiday Corp. Holiday Corp. announced last week that it has sold its Holiday Inn chain to Bass PLC, a British brewer with concerns in the restaurant and lodging industries.

## OSHA rules require power cutoff during repairs

WASHINGTON (AP) — The government today gave 631,000 business establishments two months to install locks to guarantee that power to machinery is cut off during maintenance and repairs, a step the Labor Department said would save 120 lives a year.

The department said the new rule would affect 39 million American workers, most of them in manufacturing and service industries, and estimated it would also prevent 60,000 injuries a year, 28,000 of them serious injuries such as loss of limbs or crushed bones.

It will cost the affected establishments \$214 million in the next year for the necessary equipment and training and \$135 million in subsequent years, the department's Occupational Safety and Health Administration said. Those costs will range from \$120 for small establishments — such as a small print shop — to \$28,000 for large plants with scores of machines, OSHA said.

The regulation, 10 years in the making, is tougher in its final form than when it was proposed. At first, the government proposed requiring that employers either install locks to prevent accidental activation of equipment during repairs or place warning tags on the power source to alert workers that the machinery

was being worked on and was not to be activated.

But the final rule released today places a far greater emphasis on locks, allowing tags only when an employer can prove that equipment cannot be "locked" off a power supply or that its tag program is as effective as using locks. Because of the additional training required to meet that threshold, it would actually cost employers more to use tags than it would to install locks, said Alan McMillan, acting chief of OSHA. He said 90 percent of electrically powered machinery is capable of being locked.

"We have so many fatalities, loss of fingers, crushed bones and other serious injuries because these precautions are not taken," McMillan

said in an interview this morning.

The provision allowing use of tags will not apply to new equipment or machines that are taken off line for major modifications, McMillan said. In those cases, locks must be used.

The rule, which takes effect Oct. 31, also requires extensive training and annual retraining of all workers exposed to moving machinery. Employers also must make an inventory of all equipment covered by the rule and establish a written plan for cutting off power during repairs.

Of the 39 million workers the department said would be affected, 3 million actually service the equipment and are at greatest risk, OSHA

said. McMillan said the standards should prevent 120 of the 140 deaths each year blamed on the lack of a power cutoff.

The standard applies to most machinery used in manufacturing and in services such as industrial laundries. OSHA data show that packaging and wrapping equipment, printing presses and conveyors account for a high proportion of accidents blamed on a failure to cut off power during major maintenance and repairs. Typical accidents in such situations include electrocution and shock and getting limbs caught in moving parts when a machine lurches on.

# THIS SEPTEMBER YOU CAN DRIVE 'EM WILD.

September 1989 may be the best time ever to buy a new car, truck or van. Several factors including prices, inventories, and the economy all contribute to creating the most significant buyers' market in years.

## HERE'S WHY:

**PRICES**-Sticker prices on the new 1990 models will jump 6%-8% higher than last year. Increased raw material and promotional costs have reduced car makers' profits and forced them to raise prices for the new model year.

**INVENTORIES**-Dealers anticipated better sales this year, and inventories are much higher than expected. When dealers say they are overstocked and have to move cars out, it isn't hype. Many cars on the lots came in before price hikes last May. Since dealers paid less for these cars, you can bargain harder, and save.

You'll find excellent automotive values on your dealer's lot.

**THE ECONOMY**-The Permian Basin is getting stronger every day. The Midland auto dealers are wanting to make it even better by offering better selections and better prices. And since interest rates have been fluctuating, you'll probably find financing rates in your favor.

**NEW REGULATIONS**-The new federal fuel economy regulations require cars to be more fuel efficient. If you're looking for luxury, power and roominess in a large car, you'll save money by buying now.

**DEALER COSTS**-Dealers pay expensive interest charges for every day a car sits on their lot. Current large inventories hurt the dealers' pocketbooks, and make them more eager to sell.

**TIMING**-The new 1990 models begin to arrive in September and October. To take delivery on new models, dealers need to clear '89 models off the books and off the lots.

**NEW MODELS**-1990 models introduced in 1989 are priced to sell now, and will keep blue book value as current models all the way to 1991.

If you're thinking about buying a car anytime in the next year, you can't afford to wait. Visit your favorite dealer, during September and take advantage of Drive 'Em Wild Sale savings.

## SEE THE FOLLOWING NEW CAR DEALERS FOR THEIR SPECIAL PRICES DURING THE "DRIVE'EM WILD SALE"

# 'Tough' election ahead in South Africa

## Conservatives calling for more apartheid

**EDITOR'S NOTE:** On Sept. 6, South Africa's governing National Party faces probably its toughest election since it took power in 1948 and formally imposed the system known as apartheid, or separation of the races. Some experts say the party could lose its outright majority in Parliament under a two-pronged assault from the left and right. Here are profiles of its two resurgent rivals, the far-right Conservative Party and the anti-apartheid Democratic Party.

By GREG MYRE

**BOKSBURG, South Africa (AP)** — The far-right Conservative Party's solution to South Africa's political and racial turmoil is simple: strengthen apartheid.

The blunt call for strict segregation at a time of political uncertainty earned the Conservatives 26 percent of the country's white vote in 1987, a figure almost certain to rise in the elections for a new Parliament on Sept. 6.

"We are not prepared to share power with blacks, coloreds or Indians," the party's leader, Andries Treurnicht, wrote recently. "That will undoubtedly lead to black majority government, a racially integrated South Africa, the further impoverishment of whites."

The Conservatives hold 23 of the 166 elected seats in the dominant white chamber of Parliament and could gain at least 20. They were given a boost by the resignation Aug. 14 of President P.W. Botha and his bitter criticism of his own National Party, which has held power since 1948.

The Conservatives control dozens of local governments where they have been reimposing hard-line apartheid measures despite controversy and stiff resistance.

The National Party has joined the chorus of critics attacking the return of "petty apartheid" measures, but the Conservatives say they are merely enforcing laws placed on the books by the Nationalists.

In Boksburg, an industrial town 12 miles southeast of Johannesburg, the Conservative-controlled city council re-segregated the town park, athletic fields, municipal halls and other facilities last year.

Blacks organized a consumer boycott in December that initially looked as if it would cripple the town economically. Political observ-

ers, both black and white, predicted Boksburg would produce an embarrassing failure for the Conservatives.

But the city council stood firm, and the boycott has weakened over time. On a recent weekday afternoon, black shoppers far outnumbered whites at the largest supermarket on the town's main street.

The Conservatives now point proudly to Boksburg as proof of its ability to withstand pressure.

"We are fighting for the white man's future and we don't mind a little pressure," said Sias Nothnagel, the Conservative candidate for Parliament in Boksburg.

In its pre-election newsletter, the Conservatives compare Boksburg with Hillbrow, a "whites-only" section of Johannesburg, into which thousands of blacks have moved illegally in recent years.

The National Party government has said it might legally open Hillbrow and a few other select neighborhoods to all races.

Boksburg's crime rate has been falling, while Hillbrow has one of the highest in the country, the Conservatives note. They say property values are rising and new businesses are opening in Boksburg, while housing prices are falling and shops are closing in Hillbrow.

"Your Choice: Hillbrow (National Party) or Boksburg (Conservative Party)," a Conservative ad says.

The message has strong appeal for many rural and blue-collar whites who see the National Party's limited race reforms as capitulation to the black majority.

"Why are so many people voting for the Conservative Party?" asked Acting President F.W. de Klerk, the leader of the National Party. "It's not because they think the policy can work. It's because they feel endangered."

Blacks are coming to the cities in increasing numbers and in many cases are getting jobs previously held by whites. Most public facilities have been integrated, especially in major cities.

"There is no way one can protect the white people in one undivided state juxtaposed with an ever-increasing and overwhelming number of blacks," said Treurnicht, who holds a doctorate in theology and was a National Party Cabinet minister before resigning in 1982 to organize the Conservatives.

The Conservatives want to parti-

Right-wing Conservative Party leader Andries Treurnicht addresses a meeting of his followers. The CP hold 23 of the 166 elected seats in Parliament and hopes to gain 20 more in September balloting.

The three leaders of the liberal Democratic Party, from left, Wynand Malan, Dr. Denis Worrall and Dr. Zac de Beer, address a meeting. The Democrats hold 19 of the 166 seats in Parliament. They are hoping to win 30 seats in the September general election.

tion South Africa into one white and several black "nations" as envisioned by Prime Minister Hendrik Verwoerd, a Nationalist, in the early 1960s.

The National Party government has created 10 black homelands, but only four have accepted nominal "independence" and none is recognized abroad. The government has given no indication it plans to dismantle the homelands but has acknowl-

ed that blacks living outside these tribal territories should have some degree of political rights.

Whites account for only 5 million of South Africa's 37 million people, but the Conservatives seek to claim all the major cities and the best farmland for whites.

"We believe it is not too late to implement partition," said Treurnicht.

## Liberals' new image could lead to gains

By DAVID CRARY

**JOHANNESBURG, South Africa (AP)** — With the help of Hollywood-style glitz, South Africa's white liberals are trying to shed their image as political amateurs and gain a power-broking role in the Sept. 6 elections for Parliament.

The theme song from "Chariots of Fire" blared from loudspeakers when the new Democratic Party was launched in April, welding three separate and sometimes squabbling factions into one.

Now, in the homestretch of the campaign, the Democrats have unveiled South Africa's first cinematic political advertisements, which appear amid film previews and cigarette commercials at movie theaters nationwide.

The films softpeddle the party's opposition to apartheid and its call for black voting rights. Instead the ads accuse the National Party government of economic mismanagement and corruption.

The Democrats' roadside posters proclaim, "We are the future." Ads in newspapers try to dispel the liberals' "soft on security" image by showing their candidates who were army or police officers.

Whether the imagery will convert to votes remains to be seen, but there is no question the Democrats have presented the National Party with its most serious election threat from the left since it took power in 1948.

The Democrats hold 19 of the 166 elected seats in Parliament's dominant white chamber. Party leaders hope to double this number, and 30 seats seem possible to independent analysts.

What the Democrats hope for is a hung Parliament, with the National Party losing its outright majority in a two-pronged squeeze from the left and from the far-right Conservative Party.

In that event, it is at least possible the National Party would form a coalition with the Democrats, agreeing to speed up reform in exchange for support on legislation.

For now, however, Nationalist candidates are contemptuous of the new party, saying it is manipulated by militant anti-apartheid organizations.

"Radicals and revolutionaries decide for them," said Law and Order Minister Adriaan Vlok.

The Democrats have three leaders,

who agreed to a truce after the unification of three anti-apartheid parties was completed in April.

According to opinion polls, the most widely favored of the three is Denis Worrall, a former ambassador to Britain who quit the National Party to protest the slow pace of reform. The other leaders are Zach de Beer, a former corporate executive, and Wynand Malan, a former National Party member of Parliament who now leads the Democrats' most left-wing faction.

"Ordinary South Africans are hungering for a change," Worrall said at a recent rally. "They want to vote for the Democratic Party because they know that in that way they are sending a message to our fellow black South Africans, and the international community, that we are ready to say goodbye and good riddance to apartheid."

On the key issue of black political rights, the Democratic Party platform calls for negotiations with all factions — including the outlawed African National Congress guerrilla movement — to draft a new constitution.

"The DP constitution will protect our nation's various cultures, religions and languages and will prevent majority domination," the platform says. "At the same time, it will allow every South African a vote of equal value."

It calls for creation of a decentralized federal system and the adoption of a bill of rights.

The National Party has scoffed at the Democrats' professed opposition to "majority domination."

"A federal system means majority rule in every federal state," said Acting President F.W. de Klerk, the National Party leader. "Minority interests couldn't be protected."

One problem for the Democratic Party is that militant anti-apartheid factions have little respect for it. Most black activists, and white militants who work with them, oppose the entire parliamentary structure because it excludes the black majority while offering token power to Asians and people of mixed race, classified as coloreds, who have their own separate chambers in Parliament.

The Mass Democratic Movement, a coalition of several major anti-apartheid groups, has been particularly critical of the Democrats' decision to field candidates in races for the Asian chamber.

# BUICK LESABRE.

## THE MOST TROUBLE FREE CAR BUILT IN AMERICA.

Until now, this kind of quality was known to only an elite group, Le Sabre owners.

Great selections of New fully loaded LeSabres in stock now!

Prices starting at \$15,295 (List \$18,341, Stock#9228)

The latest J.D. Power and Associates Initial Quality Survey\* states something Buick LeSabre owners can be proud to know and something all new-car buyers should know. The fact that Buick LeSabre is the most trouble free full-size car sold in America, import or domestic.

The Initial Quality Survey, which measures things gone wrong with new vehicles during the first 90 days of ownership, marks an improvement in Buick quality for the third year in a row. And

today, the Buick nameplate ranks as the most trouble free American brand. Higher than Lincoln. Higher than other prestige cars costing thousands more.

To our way of thinking, it all means that if you're looking for quality, you should just look down the Great American Road for the Buick tri-shield. The new symbol for quality. The sign of your Buick dealer.

\*J.D. Power & Associates 1989 Initial Quality Survey covering November and December, 1988. Based upon owner-reported problems during the first 90 days of ownership.

The Great American Road belongs to
