Home Demonstration Clubs Exhibit Friday-Saturday

Winners to Compete at Amarillo Fair

Public Invited to Spect Displays Perryton Motor

Members of Ochiltree County Demonstration Clubs are setting everything in readiness for the annual exhibit of the clubs to be held Friday and Saturday, September 19-20, in the gym at the Perryton Motor Inn. The public is invited to visit the displays afternoons and Saturday.

Prizes will be given first, second and third place winners in products, flowers, potted plants and canned goods. Ribbons will be awarded first, second and third place in rug, embroidery or knitting quilts and novelties. Elizabeth Huffines, demonstrator, states that all club winners are eligible for the Tri-State Fair, Amarillo, winning education exhibit eligible to compete at the fair No. 2, Back Page.

Vict Defense Committee Meets Sept. 29

W. M. Singleton, Amarillo, president of the 18th Congressional District Defense Bond committee, announced that a luncheon for representatives and committee members will be held in Amarillo. The luncheon will be at the Hotel at 11:45 a. m. and will be discussed and for the intensification of defense bonds and throughout the Panhandle. Scofield of the Treasury at Austin will be the speaker at the meeting. The county representatives of the 18th District committee are W. M. Stewart and Fred A. W. Stewart, committee members. Ellis, chairman; Fred E. Woods, W. M. Boston, Coffey, H. T. Culler, C. and Mrs. A. P. Spicer, district and county committee members are urged to attend the luncheon. Reservations for the meal must be made in advance.

Allen Attended Judges Meeting

Judge Jack Allen who is court in Carson county at this week, returned Sunday a two day meeting of the district judges and appellate judges at Austin Friday and Saturday.

Team of Moose to Town

Traveling along the road near Chelmsford, Ont., and see a team of moose pulling a sleigh. Albert Vallancourt drives this team of moose to town. They're said to be the only moose ever brought to town.

Two Selectees Called For Duty on Sept. 25

Ochiltree county will send two young men to join the selective service army of the United States on September 25. They are Robert Glenn Sharpe and Robert Eli Martin. They will be inducted into the army at Fort Bliss on Sept. 26.

The next call will be in October when Texas boards will send 4,289 men into service. This county's quota is three. The names of the three who will be called has not been announced. The Ochiltree county quota of three will leave on Oct. 12.

PTA to Meet Monday Nite

The first meeting for this school term of the local Parent Teacher Association will be held Monday night, September 22, 7:30 o'clock in the high school auditorium.

The program theme for this year's meetings will be "In Defense of Childhood and Youth." Numbers arranged for this meeting will be presided over by Mrs. K. H. Crisp, president, are: prayer, Rev. J. E. Mullins, pastor of the Church of Christ; song, "God Bless America," assembly, led by Glenn Truax; reading, "I Am Proud," Miss Jane Rogers; talk, "Defense Begins at Home," Mrs. I. R. Buchanan; special music, Mrs. Ray Veale.

Young People of Perryton Vicinity Leave for College

Many Perryton mothers have been busy the past few weeks getting their daughters and sons ready to leave for college, some for the first time away from home. Several schools are represented in this partial list given below with Texas Tech, West Texas State College, and P.A.M.C., Goodwell having the preference in numbers.

Among those enrolled at West Texas State College, Canyon, are: Pauline Flowers, Carroll Mallett, Avonelle Hill, Lois Flowers, William Flowers, Guen Castle, Winifred Morris, Roger Tandy, Louise Pugh, Sammie Black, Kathryn McLarty, Onnie Grace Francis, Oren J. Black, Alvin Bruce Holmes, George Holman and Gwen (Spagetti) McWilliams.

Texas Tech is represented by Vernon Hergert, Bob Schuster, Jim Palmer, Warren Cudd, Henry La-Master, Billy Boston, Jimmie Lee Landrum, H. D. Hearn, Volney Skinner, Robert Werneburg, Kathleen Allen, Robert Howard Holt, Wilson Brillhart, and Wilma Holland.

Attending Panhandle A. and M. College, Goodwell, Okla., are Corvin Padgett, Jack Williams, Auden

Perryton Schools Offer Courses In Guidance and Visual Education

As a part of the Perryton school system, programs in personal guidance and visual education have been installed, announced Supt. C. Wedgeworth today. Both are new departments in the schools and will be of benefit to every child enrolled.

Guidance Program
"The purpose of a guidance program in our schools," stated Supt. Wedgeworth, "is to assist students in finding themselves and determining some definite course to pursue at the end of their senior year."

Guidance is being placed in the local schools as a new department whereby every child in school through an assigned counselor will be given personal guidance as to occupation, pursuant to courses.

The central guidance committee is composed of the superintendent, C. Wedgeworth, the principals, E. D. Kelley, Otis Burk and Hadley Reeve, and Miss Eugenia Mitchell, who will carry the title of Director of Guidance. Miss Mitchell as director of guidance will also be dean of girls. Individual student record cards will be kept in her office. All teachers will serve as counselors and will be furnished personal data and assistance thru the director's office.

The senior, junior and elementary schools will each have separate guidance committees. However, all three schools will work in conjunction with an integrated program formulated by the central committee.

Visual Education
The State Department of Education recommended as a part of the curriculum of all affiliated schools, a visual education program. Each department in the Perryton schools will be enabled to carry on a well organized visual education program by the use of the new Bell and Howell motion picture machine recently purchased by the school.

Teachers are now placing their orders for rent films and slides to be shown throughout the year. A darkened room has been provided for the showing of these pictures and slides.

This new teaching will be used by all grades. Statistics reveal that this teaching aid increases the process of learning 30 per cent.

Parents are invited to visit the school and observe this new visual aid process of teaching.

Lipscomb County Farm Loan Office Moved to Perryton

The Ochiltree National Farm Loan Association and the Lipscomb County Farm Loan Associations have combined their offices for administrative purposes and the county headquarters was moved to this city last Friday.

F. B. Sumpter, present secretary-treasurer of the local association, will serve in the same capacity for the Lipscomb association Mrs. Rufus Bolterjack is assistant secretary-treasurer of both loan bodies.

Under the plan for a central office for both counties in Perryton, each association will retain separate boards and the annual stockholders meeting of each association will be held in the home county of the association. They will continue to operate as two separate and distinct organizations, using the same general office.

Directors of the Lipscomb association are M. S. McKee, president; P. E. Hill, vice president; John L. Pundt, Gromer Lewis and Clint Scott, directors. Mr. Sumpter will be at the courthouse in Lipscomb every Thursday for the convenience of the members in that sector. The Lipscomb directors will meet there the first Thursday afternoon in each month.

With the combination of these two offices, approximately 1,000

See No. 4, Back Page

Army Recruiting Sergeant Coming

Sergeant Harvey M. Gist, U. S. Army Recruiting Sergeant from Pampa will be in Perryton, Saturday September 20. Set Gist will be prepared to answer any questions in regards to all arms of the service, and urges all young men with at least a high school education to get in touch with him at the post office if they are interested in getting in the Army Aviation as a pilot.

Rangers Make Debut In New Uniforms

Twenty-two new uniforms and 11 head gears have been received for the Perryton Rangers. The uniforms are made of heavy satin whip cord with jockey satin numbers on the jerseys. The uniforms are of the school colors, scarlet red and white.

The Rangers will first don the new uniforms tomorrow night, Friday, when the Perryton Squad tangles with the Lefors Pirates for the first game of the season. The Perryton-Lefors game will not be a conference game.

New Airport For Perryton

Due to the great interest in flying in Perryton at the present time by members of this city's two flying clubs, Perryton has at last secured an airport that when contemplated improvements are completed will amply serve present requirements.

A one-half mile square 160 acre site located two miles east of the city limits has been secured on a five year lease from Mrs. Harriet Long.

Run-ways are being prepared and plans made for the erection of a hangar.

With six planes locally owned and in active service interest in aviation is at its greatest peak in this city.

Saving Stamps Now on Sale In Perryton

Answering the recent call of Secretary of the Treasury, Morgenthau, Perryton retail stores have gone "all out" in the campaign to sell Federal Defense Stamps.

Stamps are being placed in local stores by a committee consisting of W. M. Boston, W. B. Reid and R. T. Shindler. Carl Ellis county chairman for Defense Bond and Stamp sales urges people to buy stamps with every purchase of merchandise.

Cooperating stores are doing more than simply stocking and selling Defense stamps. They are actively attempting to popularize and create interest in the stamps through window displays and store displays.

No effort will be made to force stamps on patrons, but it will be brought vividly to their attention that the stamps are a mighty sound investment, and that their purchase is one way every individual can help expedite the defense program.

All buyers who can afford it should take part of their change in Defense Stamps from now on. Systematic purchases will, in a surprisingly short time, reach a substantial total. A Defense Stamp or a Defense Bond amount to a personal stake in this nation's gigantic defense effort.

Enrollment Open In National Defense Classes

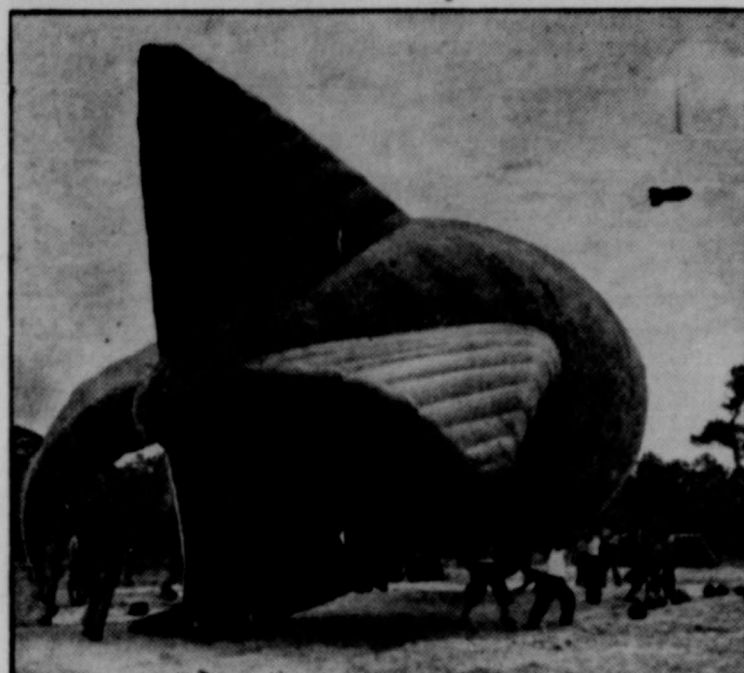

Any young man under 25 years of age, may enroll in the classes in National Defense Training offered at the Perryton schools. Regular class work in electricity, radio and woodwork courses will probably start Monday, September 22.

A government supervisor must check all equipment before classes start and to date this inspection had not been made, hence the delay in starting these classes. However, C. Wedgeworth, superintendent of the school, stated that an inspector is expected this week.

Supt. Wedgeworth announced that approximately 15 young men have signed for this instruction and training. He urges any eligible person that is interested to contact his office this week. Hours will be arranged for the convenience of those

Balloons Defend Camp Davis

Defending a vital camp area against a simulated dive bomber attack, six barrage balloons were sent up at Camp Davis, N. C., recently. Effectiveness of this type of defense has been proven in England.

Rangers to Lefors for First Football Game Friday Night

On the Lefors gridiron, the Perryton Rangers and the Lefors Pirates will meet Friday night for the first fight for "pig-skin paydirt" of the season. Although this is a non-conference game much interest has been aroused.

Coach Francis Smith of Lefors reports that 30 members make up his Pirate squad, eight of them lettermen. The Lefors team will average about 155 pounds. The Lefors starting line-up will probably include:

L. E.	Virgil Cole	140 lbs.
L. T.	Paul Barrick	160 lbs.
L. G.	Lynn Pite	155 lbs.
C.	Joe Gourlay	141 lbs.
R. G.	R. Matteson	145 lbs.
R. T.	Uel Hext	170 lbs.
R. E.	Marvin Bowman	155 lbs.
F. B.	M. Oldham	170 lbs.
H. B.	C. Nipper	165 lbs.
H. B.	Jr. Ammons	130 lbs.
Q. B.	R. Earhart	140 lbs.

Outstanding reserves for the Pirates are Glenn McCollum, V. Watkins, Jo D. Hamrick, B. Delver, J. Jackson, J. London, and Hubert Ayers.

Coaches Philbrick and Slack have been brushing up on last minute details in practice this week and will be prepared to meet the Pirates tomorrow night with all the speed and power of lightning. Probable starting team for the Rangers as follows:

L. E.	Jack Allen	150 lbs.
L. T.	A. J. Eudy	160 lbs.
L. G.	Tom Calhoun	160 lbs.
C.	Jimmy Hall	145 lbs.
R. G.	G. K. Rupperecht	130 lbs.
R. T.	Archie Correll	140 lbs.
R. E.	Wilbur Cotner	150 lbs.
P. B.	Emil Reimer	165 lbs.
H. B.	Kenneth Mullins	140 lbs.
H. B.	Thomas Carpenter	145 lbs.
Q. B.	Irvin Williams	140 lbs.

Four lettermen are in the Perryton lineup.

School Enrollment Exceeds Last Year

The school enrollment for this scholastic year is running ahead of last year for the same period. Wednesday, Supt. C. Wedgeworth, stated that he anticipated an enrollment this year of more than 900.

The enrollment in senior high school is slightly less than last year but the junior high and elementary grades exceed last year's enrollment. Senior high school enrollment for this year is 245 compared to 271 in 1940, and 247 in 1939. Junior high school has 250 students compared to 225 in 1940, and 236 in 1939. Elementary grades have 380 students at the present time, compared to 354 in 1940, and 329 in 1939.

Light Shower Tuesday Night Welcomed

Rain measuring 19 inch fell in Perryton Tuesday night. While there is no acute need for moisture at this time, a general rain would be of much benefit to crop prospects and put valuable top soil moisture in the ground for winter wheat pasture. A heavy rain fell north of Perryton Wednesday night.

'Sun Cooking'

By a process which he describes as "refrigeration in reverse," Sydney Payne, of Sacramento, Calif., prepares jams, jellies and preserves with sunlight in a "sun oven." Here are some of his prize winners.

Baptist WMU Sponsor Meet

Dr. and Mrs. J. H. Humphrey, returned missionaries from China, brought some inspiring message at an all day meeting Tuesday in the Baptist Church. Much information was given on the people, customs and diseases of interior China.

Dr. Humphrey, as superintendent of the hospital at Chingchow, China, for two and one-half years, had a staff of 90 persons under him. During his stay there, the city had 80 air raids, 30 bombs falling in the hospital grounds. It was nothing unusual for 500 or more wounded persons to be brought to the compound in one afternoon.

He showed slide pictures of beautiful China, of poor China, and of unusual diseases. He finished his evening with slides of sunsets in Oklahoma and a lecture on the "Sunset of Life." Mrs. Humphrey in native costume of China showed curios and told stories of what Christ is doing for China.

Dr. and Mrs. Humphrey and little daughter, Evelyn, were compelled to leave China last December. He was captured while returning from Shanghai with medical supplies. He lost all the supplies and \$1000 and was told to leave the country or he would be killed. With so many needs and the opportunity to witness Christ in a marvelous way, they were much disturbed and are awaiting an opportunity to return.

They have pictures and slides for five nights or more and the Church

Ernest Anderson Killed Sat. M. C. Martin Surrenders; Is Released on \$10,000 Bond

M. C. Martin, owner of Martin's Boot Shop, walked into Sheriff Sid Talley's office in the Ochiltree county courthouse, handed a 45 cal. revolver to the sheriff and surrendered a few minutes after Ernest Anderson was shot to death at his home on South Main street. The shooting was about 12:30 Saturday afternoon.

Ranger Band Places Second At Beaver

The Rangers, Perryton high school's fast stepping senior band directed by Glenn Truax, placed second at the Beaver celebration last Friday and were awarded a cash prize of \$25. Shattuck was first with 97 points, Perryton second with a score of 95. Liberal placed third with 75 points and followed fourth with a rating of 70. Other bands in the contest were Eureka and Laverne. The Beaver band did not contest.

Hundreds of people form this community attended the celebration which was a decided success. One of the outstanding features of the parade was the "pet" division of the parade in which there were 145 entries.

Cash prizes totaling more than \$300 were awarded to winners in the various divisions of the parade. Divisions were as follows: Ranch, Pets, Farm Clubs, Rural Schools, Town Schools, Civic Organizations and Bands. There was also an advertising division of the parade for business firms but they were not judged and no prizes awarded.

JUST HERE and THERE

There is a great need for a bridge across Wolf Creek on the road from Highway No. 83 to Lake Fryer. There is a narrow concrete dip at this crossing now with steep approaches on each side... an ideal place for accidents.

But probably the greatest danger at this point is in the times of high water with flood waters sweeping across the narrow dip. There have already been narrow escapes from death at this place. With traffic to the lake steadily growing heavier let's remove this hazard.

Sidney Jines, son of Mr. and Mrs. Sibley Jines has been honored at Texas University by being named to the "big brother-sister" committee of 200 to welcome freshmen to the campus, to acquaint them with their professors and to introduce them to University social life. Sidney is a Senior this year.

Public spirited citizens of Borger have underwritten the Indian Ceremonials to be held at Adobe Walls honoring the Indians who fell in this famous battle. The celebration will be Oct. 17-19. A letter from one of the men who is backing this fete says that the underwriters expect to lose from \$1,000 to \$1,500.

All of which convinces us more than ever that this is the way the

Three Fire Calls Over Week End

Firemen were routed out of bed shortly before midnight Saturday to extinguish a fire which partially destroyed a car belonging to Ray Johnson. It is reported that Johnson had driven his car into the debris of the burned Wheat Growers Elevator and in attempting to extricate the car from the mass of burned and twisted wreckage, it caught fire.

Johnson, who was uninjured, was rescued from the burning car by passerby who turned in the alarm. The blaze was extinguished by the firemen without turning on the city water.

The second and third calls over the week-end came about the noon hour Sunday when the wall between Stone's Barber Shop and Ralph Adams' Cafe was ignited from a water heater in the barber shop. The damage was slight.

Anderson, age 50, was shot twice in the face. He died instantly. Mrs. Pearl Colvin, daughter of Anderson, who recently moved to Perryton from LaJunta, Colo., was present at the time of the shooting.

Martin was held in jail until late Tuesday afternoon when he was released on a \$10,000 bond to await action of the grand jury at the November term of the district court. Elmer Anderson, son of the dead man, filed the complaint against Martin, charging him with "Murder with malice aforethought." He waived an examining trial. Amount of bond was set by Justice of Peace Dewey R. Allen after an agreement between District Attorney W. L. McConnell and Judge R. T. Correll, head of the counsel retained by Martin. Signers of the \$10,000 bond are J. H. Palmer, David Wilson, C. B. Riley, Spearman; and three brothers of the defendant, E. C. R. E. and J. H. Martin, all of Hansford county.

Mrs. Ernest Anderson, first wife of the victim, has been separated from Anderson for several years. She is a sister of Mrs. M. C. Martin, the defendant's wife. Mrs. Anderson and her two children live in Colorado.

R. T. Correll assisted by the law firm of Hoover, Hoover & Cussens, Canadian will defend Martin.

The defendant has been a resident of Perryton for about three years coming here from Hansford county. The Martin family settled in Ochiltree county in 1900 and have lived in the two counties since that time. His father, Bob Martin, was killed in line of duty while serving as sheriff of Hansford county in 1911. Martin, age 48, is married and the father of six children.

District Football Heads Meet Here

Coaches and teachers of Panhandle schools members of District 2, Class A, the Texas Interscholastic League, met in Perryton Monday morning to discuss rules and procedure for the coming football and basketball seasons. The meeting was held in Principal E. D. Kelley's offices in the high school building.

Mr. Kelley is district chairman. He was named as temporary basketball chairman for the district. Present were Kellus Turner, Panhandle superintendent; Chester Stricklen, superintendent, and Gene McCollum, coach, White Deer; A. P. Dameron, high school principal, and Bill Mack Gibson, coach, Canadian; C. Wedgeworth, superintendent, E. D. Kelley, high school principal, and George Philbrick, coach, Perryton.

After adjournment, the visitors were guests of the Perryton members at a luncheon at the Hotel Perryton.

Launch Cruiser

First ship to be launched since the Navy took over the shipyards at Kearny, N. J., the cruiser Atlanta slides down the ways. Weighing 6000 tons, the cruiser embodies many new features.

Army is Ready

Blue Mound

Mr. and Mrs. Raymond Ford and Mrs. Lina Sherrill and daughter, Mondola, all of Bloomington, Cal., are visiting in the home of their brother, Maryon Organ, and other relatives and friends.

Doyle Rorabaugh, who has been helping at the Equity in Enid, spent the week at his home here, before returning to college in Siloam Springs, Ark.

Mr. and Mrs. Jimmie Clark, Mr. and Mrs. Maryon Organ and children had Sunday dinner with Mr. and Mrs. Max Clark.

The threshing machine was at Andy Morris' Saturday. This week will finish up the threshing in this community.

Johnnie Presnell is home from Enid for a few days.—Mrs. H. E. Pattison, reporter.

Legion Auxiliary Rekindles Fire Of Patriotism

Rekindling America's patriotism and building better citizenship has been one of the American Legion Auxiliary's major undertakings this year, reports from the organization's 9,310 Units and 52 Department headquarters show. Mrs. E. W. Thomas, Americanism Chairman of the Pierce Johnson Unit, has directed this phase of the Auxiliary's work here the past year.

The Auxiliary's Americanism program has been divided into three parts—adult education, youth activities and conservation.

Adult education has been stressed throughout the organization, with thousands of Americanism meetings, public rallies, citizenship classes and naturalization programs being held. One or more Americanism meetings were reported held by 5,743 Units. State-wide Americanism conferences were held in 26 states. More than 6,000 public Americanism rallies were sponsored. Citizenship classes for aliens were sponsored by 1,500 Units, and 887 naturalization programs were conducted to welcome new citizens.

The two major youth activities were a national Americanism essay contest and the Girls' States. The essay contest was conducted in 46 states, with more than 45,000 school children competing. Girls' States were conducted in 24 states, giving practical experience in government processes to approximately 3,000 specially selected young women.

Auxiliary Units sponsored 4,038 Girl Scout troops, 339 Campfire Girl groups and 204 4-H clubs, all of which helped teach Americanism to young Americans. Units presented 7,008 flags to schools, Scout troops, churches and other organizations.

Auxiliary conservation work resulted in the planting of 21,960 acres of forest, with 2,026,022 additional single trees planted through the efforts of Auxiliary members.

Texas Fights Venereal Disease

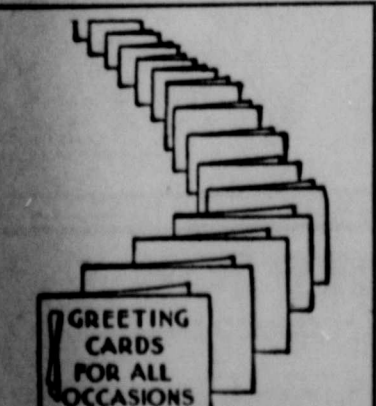

AUSTIN, Texas.—"The Venereal Disease Program of the Texas State Department of Health, in cooperation with the Texas State Medical Association composed of some five thousand Texas physicians, has rapidly expanded during the past two years," Dr. Geo. W. Cox, State Health Officer, declared here today.

"And at present it is reaching 90 per cent of the State's population."

This work is vital to National Defense and has been highly commended by those in charge of Selective Service. Young men infected with a venereal disease are not acceptable for training in the armed forces for the defense of this Nation. Every effort is being made, in cooperation with military authorities, to keep venereal disease infections to a minimum. The need of this work in National Defense and in civilian life is apparent when the records of the draft boards in Texas show that six out of every one hundred men examined are rejected for military service because of a syphilitic infection.

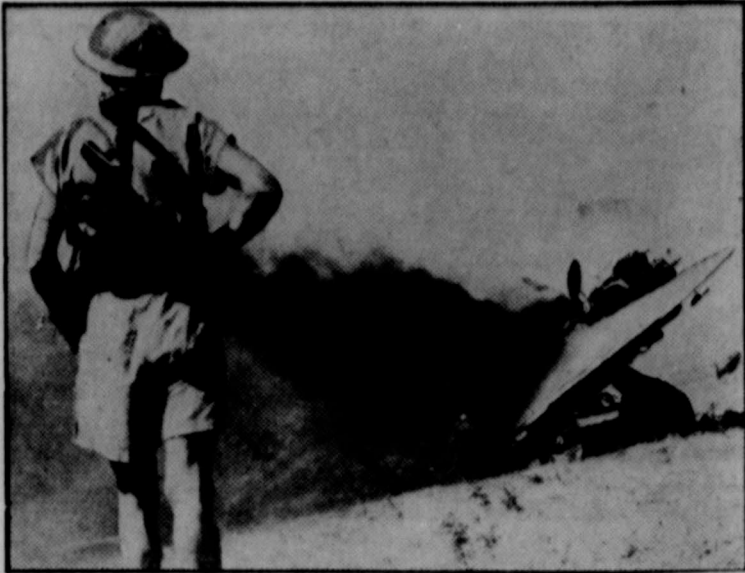

At the present time 90 venereal disease clinics are in operation in 62 counties and in an additional 130 counties treatment is available to the indigent patients through service given by the physicians of Texas. In this latter case, through plans worked out between the State Health Department and local medical societies, drugs are supplied through the State Health Department to assist the physicians in giving service to the indigent patients. Of the 44 cities in Texas with a population of over 10,000 only a few are without available treatments, and in these venereal disease services are being rapidly developed. When this is accomplished, Texas will be among the leading states in meeting its venereal disease problem.

Fire Strikes in Midst of Flood

At height of the flood in Salinas, Kans., when the Smoky Hill river flowed three feet deep through parts of the city, fire broke out in Clafin Hall, city park recreation building, burning it to the level of the water.

Yoga Nova Backs Guessers On Louis Fight Into Ropes

BY ART BRONSON

JOE LOUIS' 19th defense of his heavyweight title against Lou Nova—Yankee Stadium, Sept. 29—is a strange mixture of Horatio Algerism and hokum—cosmic and corny.

Other championship buildups—from the bohemian "Til-mor-dar-dat-bum" to the serio-comic "I know Louis' weakness"—have become outmoded. The current approach is positively ethereal.

Even the strange gentry of Jacobs Beach are confused. Words like "cosmic," "dynamic," "Yoga ritual" and "Hindu physio-religion"—all emanating from the Nova camp—are new to them. A few may recognize such rhetoric from the racing form tip sheet.

"Muscle" Nova may be one of three things. He may be a serious-minded, intelligent young Adonis who knows the value of a good buildup. Or he may be an incurable crackpot who thinks he can beat Louis with a lot of back-parlor gyrations that border on the ridiculous. And, of course, he may be the next heavyweight champion of the world.

LOU is good copy, goofy or not. He stands on his head obligingly, "eats" air every morning, goes up in the Maine woods and growls and grimaces through his beard. He rows at the Poughkeepsie workouts, dons a football suit for a practice set-to with the Eastern all-stars. But you can't laugh off the

California challenger as just another phony. In 1940, after beating Max Baer, he tackled Tony Galento and was knocked out in the 12th round after absorbing a terrific lacing.

There's where the Horatio Alger angle enters. It was discovered Nova was a victim of septic poisoning. It almost paralyzed him. He spent months in the hospital until he was cured.

LOU came back to knock out Pat Comiskey and Baer and won his Louis shot on the strength of these performances.

Fight experts claim Louis is near the end of his trail. They point to the Buddy Baer fiasco and his near-whipping at the hands of Billy Conn.

But Nova is no Conn. Louis won't be fighting a boxing whizz, Sept. 29. Nova is no cat in the ring. He is muscular, rather waddling, slow and plodding. He can hit, but he can't move. Louis loves a slow-moving target. Good hitters don't bother him as much as good boxers.

Joe can still hit, and he's got plenty of savvy inside the ropes. Too many mistake his off-stage sleepiness and dead-pan for disinterest. The fighter who beats Louis ought to be able to hit like Nova, but he also should be able to box like Conn.

Lou Nova may be the next world's heavyweight king. But it will take more than a repertoire of hocus-pocus and county fair mysticism to do it.

Adventures of THE TOTTIES

(READ THE STORY, THEN COLOR THE PICTURE AND PASTE IN YOUR SCRAPBOOK)

The blackbirds flew right to a limb. The Mystic Man said, "I'm in trim. The birds came out of Duncy's hat. What do you Totties think of that?"

Said Goldy, "Twas a clever thing! And now, can you make those birds sing?" The Mystic Man said, "You forget. That nothing's ever stopped me yet."

Once more he gave his hand a ring. And all the birds began to sing. The birds' strange singing soon died out.

And then they all heard Duncy shout— "I wish I was a blackbird. Say, I'd fly and sing the liveliest day. I wouldn't have to work a bit. Up in the tree I'd often sit."

The Mystic Man then said, "I'll do another little trick for you." He waved his hands with all his might. The four birds disappeared from sight.

But in their places came four men. The Mystic Man arose and then he said, "I will their eye attract. They're going to put on quite an act."

NEXT WEEK: Duncy has a trick played on him.

Itching Scalp May Be Head Lice On Children

The daily inspection of school children and the removal and isolation of those found with scabies (itch) or head lice is the most important factor in the control of these conditions, said Dr. Geo. W. Cox, State Health Officer. Reports received by the State Department of Health indicate that the opening of school will witness an increase in their occurrence.

The State law provides for the exclusion of children from school if found to be infected. To prevent loss of school time parents should see that their children do not have scabies or head lice.

All children who are scratching or have an irritation on the skin should be examined for the itch-mite. These parasites are usually contracted by personal contact, although they are sometimes conveyed by animals. It is important that all members of a family be treated until cured, otherwise the disease is passed back and forth from one to another. It is also important that all clothing, bedding, and towels be boiled each time they are washed.

No person should be blamed for having lice, only for keeping them. They are very common among children and are communicated directly and also from using each other's caps, combs or hair brushes. The condition may be suspected by the teacher in children who show indications of irritation of the scalp and the cause is easily detected by looking for the eggs which are small white objects adhering to the hair. Head lice are best treated by killing the living parasites. The eggs or nits must then be gotten rid of. With boys this is easy as a close hair cut is all that is needed. With girls, who do not want such a hair cut, a fine tooth comb wet in vinegar or alcohol, which dissolves the attachment of the eggs to the hair can be used. All combs, brushes, and caps or hats should be carefully washed and disinfected.

Social Security Number Is For Lifetime

In this part of the state there are men and women who spend most of their time working on farms or ranches, and then at odd periods during the year find jobs in the city which require each worker to obtain a social security account number, it was stated by Dewey Reed, manager of the Amarillo office of the Social Security Board.

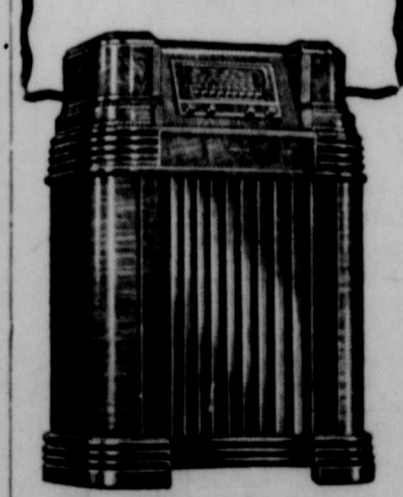

"Many a worker already has his social security account number, and there is no reason why he should obtain another. Each wage earner should have one—and only one—account number and that number is for his use during his entire lifetime. The Amarillo office of the Social Security Board will furnish a social security account number card to anyone who requests it. If a worker has had an account number card and lost it, he may obtain a duplicate card with the same number on it. There is no charge for this service, which may be obtained by calling or writing to the Amarillo office located in the new Post Office building."

It was further explained by Reed that the government cannot keep a complete record of a worker's wages unless he has a social security account number and gives that number to each employer for whom he works. Every three months an employer is required to report the wages of his employees to the Federal government. In his quarterly tax report, he includes the name and social security number of each employee.

Fox Farming

The most spectacular and important fur animal enterprise in the United States is silver-fox farming, which yielded 6,900 pelts in 1923 and increased the output to 350,000 pelts by 1940.

Those who feel warmer when they hear the faint hissing of a steam radiator can now purchase a portable electric steam radiator that can be carried "by a woman" from room to room and plugged into any wall socket. Another new heating device is asserted to convert "cheap kerosene" into the newly announced dortane gas. It is said to be adapted especially for installation in coal and wood stoves and furnaces in remote areas that are not yet served by gas mains.

"Benefits which may become payable to a worker or to the survivors of a deceased worker under the Federal old-age and survivors insurance law are based on the amount of wages received by the worker. It is important, therefore, that an employer have each employee's account number in order that he may record it on his books along with the name and amount of wages of each worker."

Women Work for America's Security

The American Legion Auxiliary's half million women have worked continuously and effectively for the security of America throughout the past year, according to Mrs. E. B. Gygger, president of the local Auxiliary Units. Reports being compiled at the Auxiliary's national headquarters show vast and varied contribution to national defense by the Auxiliary women.

Auxiliary Units everywhere have worked in the U. S. O. and aluminum drives, supplying leaders and workers who have contributed materially to the success of these campaigns.

Through nation-wide registration for voluntary emergency service, approximately one-fourth of the Auxiliary's members have themselves volunteered for service. The type of work each member is able to do has been listed and lists have been supplied to Legion Posts, Red Cross Chapters and civil authorities so that Auxiliary volunteers can be called immediately in case of need.

Thousands of Auxiliary women have engaged in Red Cross war work, in many communities taking over the responsibility for the Red

Cross work rooms. Hundreds of thousands of garments and other articles have been made for the Red Cross. More than 5,000 Auxiliary members have taken Red Cross first aid training, while others have trained as nurses' aids, radio operators and ambulance drivers.

Auxiliary volunteers aided in the selective service registration throughout the country. Thousands of books and magazines have been supplied to the camps. Units near army camps have taken an active part in arranging entertainment for soldiers.

The Auxiliary gave leadership to the annual Women's Patriotic Conference on National Defense, which brought delegates from forty organizations to Washington, D. C. to discuss patriotic work. Similar state and local conferences were widely held under Auxiliary sponsorship.

A national defense essay contest was conducted among the high school pupils of the country, and a national defense window display contest was sponsored.

"Matter" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, September 21.
The Golden Text is: "Love not the world, neither the things that are in the world" (1 John 2:15).
Among the citations which comprise the Lesson-Sermon is the following from the Bible: "I therefore the prisoner of the Lord, beseech you that ye walk worthy of the vocation wherewith ye are called, with all lowliness and meekness, with longsuffering, forbearing one another in love; endeavoring to keep the unity of the Spirit in the bond of peace" (Ephesians 4:1-3).
The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Emerge gently from matter into Spirit. Think not to thwart the spiritual growth" (page 485).

Methodist Church

William E. Fisher, Pastor
In the absence of the pastor the pulpit will be filled at the morning hour by W. C. Bryan, and at night by the District Superintendent, Rev. T. S. Barcus. The pastor makes a special request that the membership attend in full strength these preparatory services for the revival.
The church school has departments and classes for all age groups and you are invited to be one of us. The general superintendent of the school, W. H. Lance, and his splendid corps of workers will be on hand to give you a hearty welcome.

Defense Housekeeper Has Problem

Major problem for Mrs. Emily Hall, bride of five months, is the fly the new planes of the United States army air corps are no longer "flying cadets," they are now "aviation cadets."

This is due to the new war department order authorizing the training of enlisted men as pilots in the air corps. These enlisted men are called "aviation students" to distinguish them from the young men who will be commissioned officers upon their graduation from flying training.

The qualifications for aviation students are essentially the same as the qualifications for aviation cadets with the exception of the difference in the educational requirements. For the aviation student the young man needs only a high school education, while for the aviation cadet at least 60 hours of college work is required.

The aviation student upon graduation from flying training is not commissioned an officer but is rated a staff sergeant pilot with pay of \$108.00 a month while the aviation cadet upon completion of flying training is commissioned a 2nd lieutenant, air corps reserve.

In the absence of the pastor, arrangements for filling the pulpit are as follows: Sunday, September 21, morning hour, W. C. Bryan; at night, the District Superintendent, Rev. T. A. Barcus. On Sunday, September 22, at the morning hour, Rev. W. H. Hicks, pastor of the Methodist Church at Spearman, will fill the pulpit, and at night, Rev. Fisher, Perryton pastor, will have charge.

Important factors in the storage of many vegetables are control of light, temperature, ventilation and moisture.

Farm employment on August 1 was lowest for that month since the U. S. Department of Agriculture began making estimates in 1935.

DRAIN, REFILL, and POSTPONE

New oil lasted 5,683 miles longer than the runner-up in Death Valley Death-Test ...CERTIFIED

Your own engine gauge-stick can tell you best about Conoco Nth motor oil. Next best is to buttonhole the most frugal car owners you know around town. Some have never yet added a quart since changing to Conoco Nth. And you can see why right here—by the mileage figures from the Certified Death-Test of Conoco Nth oil vs. five other big brands.

The whole big success of Conoco Nth started down in Death Valley—so hot you can't sweat. Here 6 new stock cars, strictly alike, each got one 5-quart fill of some one oil being tested. Then the Official Referee clamped on the locks; never a drop of oil could be added.

Eyed by impartial officials every instant, the cars all reeled off their 57 miles hourly. Here and there on the desert a carcass lay bleaching—and desert death awaited these car engines, too. For none could finish till its oil hit bottom—finishing the engine beyond repair.

CONOCO Nth gave nearly twice the miles averaged by the others tested!

The 5-quart fill of Conoco Nth lasted 13,398 miles... Certified. Conoco Nth outlasted one big brand by 8,268 miles. Even the best of the five was outlasted 5,683 miles by Conoco Nth oil. Such a real difference must have a real source. And two real life-givers created by man... two modern synthetics... are in Conoco Nth motor oil.

You know of modern vitamin synthetics, making up for Nature's life-givers lost in some modern food processing. Similarly,

5 BIG-NAME OILS lost Referee. One 5-quart fill per car. One drop throughout the hot desert.

the extreme refining needed by oils for current cars has been destroying Nature's best life-givers! But in their place today Conoco Nth brings your engine the two patented Conoco synthetics.

One of these—man-made under the famed Germ Processed oil patent—will keep your engine OIL-PLATED with lubricant that can't all quickly drain off of inner surfaces. So OIL-PLATING is on guard against wear in advance!

And the latest Conoco synthetic—man-made under U.S. Pat. 2,218,132—will check "foaming" of oil that's encouraged by foul leftovers from every engine's normal firing. This common oil trouble is now checked or inhibited by the new man-made Conoco life-giver—Thialkane inhibitor.

You'll never Death-Test your Nth oil in sinister Death Valley than you repeat other past tortures. You'll still draw recommended intervals. You'll expect to stretch the distance, a quart, judging by the heavily advertised oil in the Death Valley Test were equal to 161% by Conoco Nth oil like that counts up into miles to Nth oil today at your Conoco station. Conoco Company—Pioneers in America's oil with Synthetics

CERTIFIED 1 barrel of the Death Valley Test was fairly conducted. Engines were cured in each case at the time.

The Varieties of Wheat Lacking Milling and Baking Qualities

Following bulletin from the U. S. Department of Agriculture, attention is called to the danger of certain varieties of wheat that do not have high milling and baking qualities. The production of certain varieties of wheat (Chiefkan and Chief) which are producing high grade but are lacking in some of the milling and baking qualities, is a serious problem. The varieties which now show low baking qualities may be improved through selection and breeding and milling and baking techniques may likewise be improved until they can move into commercial channels and become mingled with other varieties of wheat without affecting the baking qualities of the flour made therefrom. Until that time comes, however, we should give careful consideration to the quality of wheat which we produce.

Farm Business Analysis Sheet

COLLEGE STATION.—The Texas A. and M. College Extension Service has prepared a "Farm Business Analysis Sheet" for the convenience of farm families who desire a complete year-end analysis of their operations.

According to Tyrus R. Timm, extension economist in farm management, the sheet embodies a handy summarization of information necessary for quick reference in business transactions. It contains space for a check on field crops and feed, showing the several crops produced during the year and how they were used. Another division provides a breakdown of livestock and poultry on the farm, and presents a numerical picture of the farm's livestock program. Space is provided for analysis of the distribution of feed and livestock, and also for recording the varieties of seed, kinds and amount of fertilizer, spray, etc., used for comparisons with production results.

Under the heading "Capital Resources," is a classification of items banks will allow for collateral loans. A classified income and expense statement points out, when figures for the years business are filled in, where the farm income came from and where it went. Closely related to these two divisions is the space for landlord and tenant, if the farm is not owner-operated, in order that a fair basis for rent may be established.

Timm points out that if the Texas Farm Record Book is used, sources of all summary items are indexed. The "Farm Business Analysis

WASHINGTON WEEK Farm Machinery Gets Priority

BY RALPH HERBERT

WASHINGTON.—With all the talk about scarcity of raw materials and the necessity of conserving them for national defense purposes, one persistent nightmare of farmers all over the United States has been that they might not be able to buy new agricultural machinery and, perhaps more serious still, that they might not be able to secure parts for the necessary maintenance of the machinery they already have on hand.

A recent order of the Office of Production Management should allay all those fears. The Office of Agricultural Defense Relations has been in close touch with the Office of Production Management. It has convinced officials that an essential portion of national defense is the increased production of food and livestock. As a corollary to this, it naturally followed that there must be no interference with the machinery the farmers needed.

The consequence of all this is that OPM assigned a high defense rating to deliveries of materials necessary for the production of parts for the repair and maintenance of existing farm equipment. It also assigned the highest civilian rating to deliveries of materials on the priority critical list to manufacturers who need them for production of new farm equipment.

The order giving them the right to materials for new machinery will expire next Oct. 31. The manufacturer can obtain materials in amounts not exceeding 20 per cent more than he used in farm machinery production in August, September and October of 1939 or 1940, whichever was the higher.

The order giving manufacturers the right to materials for maintenance and repair parts for farm machinery will expire Feb. 14, 1942.

Hand tools do not fall within the scope of the orders issued. Sheet is on strong paper, and both sides are used for tabulating the classified information. Folded, the summary sheet will fit into a manila folder.

When buying blankets, select those with a maximum thickness and minimum weight, advise home economists at Oklahoma A. and M. College.

HOME DEMONSTRATION CLUB NEWS

McMillen Club

Mrs. Hollis Gosset, the yard demonstration of the McMillen Home Demonstration Club, entertained the club members, Miss Elizabeth Hoffines, county Demonstration and several visitors on Thursday, September 11.

While Mrs. Gosset is new in club work, this being her first year, her accomplishment in yard improvement will compare favorably with work done by club women with years of experience.

"The first thing I did," stated Mrs. Gosset, "was to plan my yard both to beauty and practicality. I began my improvements by moving shrubs from the front of the yard to the back and side, thus forming a background. Next, several corner flower beds were made and outlined with native rocks. In these beds were planted flowers that bloom from early spring until frost, the taller ones being planted in the back."

Mrs. Gosset had a lily pond so all needed was to plant tall flowers and shrubs for a background. The entire yard, which is enclosed by a white picket fence, is planted to blue grass, clover and bermuda. A wide cobble stone walk leads from the front gate to the house, and narrower one leads from the kitchen door to the back gate.

After a thorough inspection of the yard, the guests were taken to a shady corner where a table was piled high with watermelons raised in the Gosset garden. This shady corner will have yard furniture added next year and will serve as an outdoor living room.

One must visit the Gosset home to fully appreciate the fine work that has been done by both Mr. and Mrs. Gosset. Every farm woman realizes that without the cooperation of the men, many of their plans could not be realized. It is inspiring to visit this home and yard and see what can be accomplished by careful planning plus plenty of work and patience, as this is one of the most beautiful yards in the Panhandle.

Those present were Mesdames J. L. Flowers, Samuel McLain, James Hardy, Earl Schwaik, Guenn Blackwell, B. E. Plummer, B. L. Barnes, Paul Hardy, Ellis Matthews, Don Herring, Harvey Urban, R. E. Matthews, Hollis Gossett, and Misses Elizabeth Hoffines, Rosie Barnes, Paye Hardy, Leona Emmick, Gayle and Dora Lee Gossett.

An REA safety and job training course is being organized on a statewide basis in Texas.

Merry Workers Will Meet September 18

The Merry Workers Home Demonstration club of Beaver County will hold their regular meeting Thursday, September 17, in the home of Mrs. Alma Rorabaugh, Mrs. Maud Bull and Mrs. Clara Stubbfield will share the hostess duties with Mrs. Rorabaugh.

The club disbanded during the harvest season and this is the first meeting. All members are urged to be present and visitors are welcome.

—Mrs. Ethel Seago, secretary.

A Farm Planting

When Mrs. W. E. Tandy, president of the Notia Home Demonstration club, moved to her present home there was not a single shrub on the place. Fifteen years ago, she and her husband put out 1,000 honey locust trees and a two acre orchard. The orchard died several years ago and they have turned to more hardy trees and shrubs growing.

For the past two years, the Tandy's have been demonstrators for the Great Southern Plains Experiment Station of Woodward, Okla. Last spring the following trees and shrubs were added and are growing nicely: 28 desert willow; 1 crepe myrtle; 1 tamarix hispida; 1 vitex; 9 varieties of iris; 5 thornless honey locust; 21 juniperus virginiana; 5 pinus nigra; 100 chinensis elms; 20 pinus ponderosa; 2 winter honey-suckle; 2 red honeysuckle; 2 mahonia; 1 robina hispida; 2 rhus microphylla; 2 rhus cotinus; 5 symphoricarpos vulgaris; 4 amelopsis; 4 pussy willows; 3 red buds; 200 gladioli bulbs and a number of annuals.

At the present a wire, ten foot high and covered with Scarlet O'Hara morning glories is the loveliest thing in the yard.—Club Reporter.

Waka Club

"We especially enjoy pot plants in the winter time when we can't have cut flowers," stated Mrs. Dan Manning, on her part of the program on "Indoor Gardening," at the Waka Home Demonstration Club, Tuesday, in the home of Mrs. Jim Davis.

"Large plants, such as a rubber or century plant, should be placed in a hall or stair landing. An attractive way to display small plants such as cacti or ivy, is on glass shelves, across a window," further stated Mrs. Manning.

The highlights of the meeting was the interest shown in the "Consumption of Wheat" by demonstrating foods made from whole and cracked wheat. The hostess served whole wheat cakes and cookies. Other recipes tested were chili, sandwich loaf, griddle cakes, Spanish wheat stew, scalloped whole wheat and cheese, and raisin loaf. The club is using wheat for our educational exhibit.

Those present were Mesdames Dan Manning, J. R. Stump, C. B. Barber, H. N. Elledge, Fred Butler, T. E. Miller, Norman Crum, Allan Dennison, O. C. Rogers, Marvin Groves, P. W. Wernicke, Dan Teater, R. G. Burger, Walter Preston and the hostess.

—Mrs. J. R. Stump, reporter

Yard Demonstration

"I have given away 86 bouquets from my flower garden this year," stated Mrs. Fred Huston, yard demonstrator of the Missouri Avenue Home Demonstration club, in giving a report of her years accomplishments.

The total cost was around ten dollars and most of that amount was spent for 40 rose bushes, 32 of which are growing. The 27 perennials and 15 annuals were planted according to the yard plan drawn by Mrs. Huston with the help of Miss Elizabeth Hoffines, agent. There are spaces in this plan for foundation planting to be put in next year. A lawn has been started and swing and sandpile arranged in the recreation center. The lawn will be increased, recreation center completed and an outdoor living room planned for next year.

When asked by her son what she got out of all this work, Mrs. Huston replied "It satisfies a longing I have always had for flowers. Even my husband shows that he is proud to have bouquets of my flowers in his office. I believe the results are worth far more than the cost has been."

—Club Reporter

Missouri Ave. Club

"I would like to show you an interesting flower hobby," Miss Elizabeth Hoffines, agent, told the members of the Missouri Avenue Home Demonstration club at the meeting in the home of Mrs. John E. Johnson, September 12.

Mounting flowers can be a work of beauty was proven by the exhibit of the collection of wild flowers of Mrs. W. L. Philpaw, a member of the Perryton Home Demonstration club. An artistic spray of the flowers or grass had been pressed between magazine pages of slick paper. After a thorough pressing the article was mounted on a page of black paper and held in place by a small strip of cellophane tape. The names were printed in white ink. Then the entire sheet was covered with cello-

Perryton Club

To observe yard achievement day in Home Demonstration Club work, the Perryton Club met Wednesday, September 10, in the home of Mrs. Lake Patton. Several yards were visited and yard goals and achievements discussed.

Mrs. W. L. Philpaw displayed a collection of native flowers and grasses that she had mounted on cardboard. She gave the story of each as it was passed and a general discussion of native flowers followed the exhibit.

Miss Elizabeth Hoffines, county home demonstration agent, was present and brought out several interesting points on how to achieve yard goals.

Those present were Miss Hoffines, Mrs. D. K. Baumann, Mrs. B. B. Lee, Mrs. Ike Sharpe, Mrs. W. L. Philpaw, Mrs. W. M. Dull, Mrs. M. F. Hethcock and Mrs. Dora Keim, and the hostess.

—Mrs. Patton, reporter

Freight Rates On Stock Reduced

COLLEGE STATION.—According to information from Washington, railroads have granted a rate reduction designed to benefit livestock shippers. The rate concession, which became operative August 1, is experimental for one year. Sale-in-transit privileges will be accorded to shippers of stocker and feeder animals at the central markets at the through 85-percent stocker and feeder rates from origin to destination.

The rate adjustment is important to Texas cattlemen because this state is the largest shipper of livestock in the United States, said Paul G. Haines of the A. and M. College Extension Service.

"The privilege of sale in transit means that when a shopper finds a more favorable market during transit he can unload his cattle and sell them without rate penalty," Haines said. "This does not mean elimination of certain rate differentials affecting the southwest, but it is a step in the right direction."

The railroads announced that continuation of the new schedule would depend upon whether increased traffic justified it.

Cotton makes house cleaning easier if one wet mop, one dry mop three cleaning cloths for floor and baseboards, six dust cloths, and four washing and scouring cloths are kept on hand.

LETZ MIXED FEED MAKER

GREATER EARNING POWER—Through original, patented construction, Letz created and developed the modern hay chopper-silo filler-roughage mill. For 1) high capacity, 2) low-cost performance, 3) better quality feed and for 4) successful feed storage, no other feed-preparing machine can compare with a Letz!

Based on earning power, low price and outstanding value, dairymen and feeders will find the new Letz the one complete feed preparing machine they need and want. See it in operation—examine the quality of the feeds—study its construction—note its value. Get the facts and you'll get a Letz.

BIG CAPACITY — LIGHT RUNNING — All feed reduction accomplished by slow-speed cutting action, and cutting action only, explains Letz light draft and big capacity. Hook to your tractor—see it run! You'll be pleasantly surprised to see its fast low-cost performance.

Gradual reduction by slow speed cutting action explains too, why a Letz prepares feeds of distinctive storing and feeding quality on all jobs, 1) chopping and storing hay or fodder, 2) filling the silo, 3) separating or grinding grain.

GREATER VALUE—Built from fine materials and workmanship, with precision cutter-head, anti-friction bearings, cut reverse gears, alloy steels and of sturdier, heavier construction, you are assured of dependable performance and long life. You get more value for your money when you buy and use a Letz mill.

American Army has Moral Problems

According to a number of responsible authorities, there is a definite morale problem in the American Army. Such magazines as Life have sent qualified reporters into Army camps and they have returned to write that a substantial percentage of the conscripts now under arms don't like the Army and are eager to get out of it.

It is inevitable that when hundreds of thousands of men are drafted, a portion of them will remain permanently dissatisfied. However, the reporters state that at the present time there is a comparatively low state of morale among many men who entered the service in the expectation of benefiting from it and enjoying it. The principal causes of unrest are these:

1. There is a lack of martial spirit, due to the fact that we are not at war, and our emotions have not been stirred to the boiling point. As Ernest Lindley puts it, "It is like trying to infuse morale into a football team that has no games scheduled." Unless we actually go to war, this phase of the morale problem will probably remain unsolved.

2. Many conscript soldiers lack confidence in their officers. The Army has on its rolls many officers who have no concept of modern warfare, and who have little capacity for leadership or for instilling respect and admiration in the men they command. The General Staff, headed by energetic General Marshall, is said to recognize this, and is gradually weeding out incompetents in the commissioned personnel.

3. Lack of adequate weapons and other materials has been a sore point. Conscripts couldn't make sense out of maneuvers in which broomsticks were used for cannons, cans for shells, and in which ancient trucks were painted, "Tank." Now, however, this deficiency is being corrected as arms output increases. Troops are getting more and better equipment and by next year many divisions should possess everything that is needed for modern battle.

4. Most general cause of complaint, say many, is the pay given the soldiers. Conscripts get \$21 a month for the first three months, and \$30 thereafter. Under a new congressional bill, pay at the end of a year's service will advance to \$40. That amounts to next to nothing. The soldiers must pay for haircuts, razor blades, clothes pressing, etc. By the time necessary expenses are met, there is little left for recreation or even the simplest luxuries of life. As a result, soldiers have an extremely difficult time finding amusement. The cost of giving the privates a fair wage—\$50 to \$75 a month—would amount to relatively little, in the light of the gigantic costs the defense program involves. It is probable that laws to substantially raise the Army's wages will be introduced in Congress.

5. Tied in with inadequate pay is the lack of organized recreational facilities. Many major Army camps are located in areas where there are few communities. The United Service Organizations (USO) has raised considerable money through public subscription, but the total product is far from being sufficient to provide amusement on anything near the desired scale. All the reporters who have investigated Army conditions, tell of finding groups of soldiers loitering on street corners on their evenings off, broke, and with nothing to do.

It should be emphasized, in the interest of fairness, that a high proportion of the Army's enlisted personnel has excellent morale. Further, in the Navy, air corps and marine corps there is no morale problem whatsoever, as these branches of the fighting forces have no conscripts. Most of the conscripts have gone into the infantry, and it is there that the morale problem exists. Progress is being made in bettering the lot of the men, but it looks as if a good deal more must be done if the largest peace-time American Army in our history is to have the morale that is essential to an A-1 fighting force.

Six Million More

Six million Americans will pay federal income taxes next year for the first time if the lowered exemptions of \$750 for single persons and \$1,500 for married persons are retained in the tax bill now under consideration in Congress.

At the present time federal government expenditures average \$52,000,000 a day, and, as the defense program gains momentum, that figure will undoubtedly increase. To help meet such huge expenses, everyone must contribute his share. Rates on higher incomes are being sharply increased, but, even so, no one group can possibly pay the entire sum. There are not enough rich people in America for that. As a matter of fact, the total incomes for a year of all Americans earning \$10,000 a year and over would meet government expenditures for only two months.

While paying an income tax will be a new experience for low income group, actually they have paid direct federal taxes on cigarettes, gasoline, theatre admissions and other items in the past, and have also paid hidden taxes in connection with every loaf of bread, pair of shoes and almost every other article they buy. Such revenue, however, no longer produces sufficient funds for regular federal expenditures, plus defense, and so income taxes must be used to take care of the rising costs of government.

How much those costs have risen is evident from the fact that at the turn of the century a man with a wife and two children, earning \$100 a month, paid only \$5 of his salary in taxes, direct and indirect. Although he may earn \$150 a month now, even before the huge armament program was launched his taxes had risen to the equivalent of \$25 a month and they are still going up.

It is because of this rise that the demand is growing for greater economy in non-defense spending. Now that 6,000,000 more voters will have to pay an income tax, perhaps that demand will become even more insistent. In the past their taxes have been hidden to such an extent that many of them failed to realize how directly they were affected by federal expenditures. The income tax should serve to emphasize the fact that they pay a share of the cost of government and that, the lower that cost is, the lower their share will have to be.

Don't Blame Your Retailer

An authority on merchandising remarks that there is a growing tendency of labor and some consumers to blame price rises on retailers.

That tendency should be scotched in a hurry. For the plain truth is that the retailer trades, in all fields, including both the independents and the chains, have carried on an aggressive and successful campaign to keep living costs down.

Between June 15, 1939, and June 15, 1941, industrial wages rose 27 per cent on a weekly basis. Industrial real wages—which means wages interpreted in the light of purchasing power—rose 22 per cent. In those same two years, the cost of living increased but 6 per cent, and that includes rent and personal services as well as commodities.

It is retailing which has further cut overhead expense and passed the saving on to the consumer. It is retailing which has eliminated many unnecessary middlemen operations, and again passed the saving on to the consumer. It is retailing which, in many instances, is absorbing wholesale price rises, and voluntarily accepting lower unit profits in order to hold prices down. It is retailing which is helping educate the consumer to buy more scientifically, and make his dollar go farther.

Retailing raises prices when that is unavoidable—it has no way of picking money out of the air, and it can't hold retail prices at given levels when manufacturing prices go steadily up. But there is no doubt whatsoever that retailing has done wonders in keeping retail price increases to a minimum.

Mass Production Comes to Aircraft Industry

The above drawing of Vultee Aircraft's mechanized final assembly line shows the revolutionary production developments at the California plant in the last few months. It is the graphic story of how modern airplanes are made compared to the methods of but a year or two ago, and shows the first mechanized assembly line in the aircraft industry.

Instead of the old system of adding one part at a time to a framework and gradually building up a complete plane, Vultee breaks the ship down into five major units—fuselage, tail section, engine assembly, center wing section and outer wings. Each is completely put together in sub-assembly departments. Conveyor lines reach out finger-like to

bring all five together at the nerve center of production shown above where they are joined to make the plane ready for flight.

At the right of the picture, tail sections are assembled, complete with monocoque, stabilizers, rudders, elevators and control cables, and move around on tracks to the center. Meanwhile, at the left, skeleton fuselages travel through assembly stages on a long U-shaped conveyor rail, winding up close to their starting point, complete with instruments, controls, canopies, wiring, etc. A short rail section then moves them across to the finishing line where they join the completed tail sections.

The center wing section comes in at the right center of the picture from the fabricating and as-

sembly departments. Meanwhile, at the upper left of the picture, on a balcony, another assembly line is joining motor with engine mount and attaching controls, piping and other "plumbing." A chain-driven overhead conveyor carries the complete engine assemblies high overhead to the center of the picture where they drop from a hoist to the planes below. Farther down, outer wings come through the paint shop to be attached to the ships. Beyond that point controls are adjusted, final inspection made, and Vultee planes roll out of the shop and "into the blue."

This new mechanized conveyor line has increased Vultee production fourfold in the last few months.

For the Black-Gold-and-Red

Their uniforms are Canadian, but their sleeve tabs identify these five men as soldiers of free Belgium training in Canada for overseas service.

JOLIETTE, Quebec—There is a Belgian army contingent in training on North American soil today.

The main Belgian army, a valiant force of more than 600,000 was compelled to lay down its arms last year after a heroic, eighteen-day struggle against the mechanized German invaders.

But another Belgian force remained independent and gave its allegiance to the Belgian refugee government in London. These were the troops of the Belgian Congo, who have since helped in driving the Italians from Ethiopia.

A second free Belgian army was formed in Britain from Belgian soldiers who had been evacuated with British and French forces from Dunkirk, from Belgian residents of Britain and France, and from the hundreds of adventurous Belgians who have made good their escape from the continent one by one, often by devious and dangerous routes. It is a small force, but grimly determined to aid in wrest-

ling its homeland—and Europe—from Hitler's grasp.

Now there is a third force of free Belgians in our part of the world, at a military camp tucked away a few miles from this typical French-Canadian town. This, too, contains men who fought the Germans in Belgium last year and then escaped to neutral or Allied soil. One, now a corporal, reached Canada by way of France, Spain, Portugal and Brazil—a trip of 12,000 miles. But there are other men in this camp, men of Belgian descent, who have never been to Belgium themselves, yet felt impelled to serve under the black, gold and red banner of their father's native country.

These men wear Canadian uniforms, drill with Canadian equipment and even receive their commands in English. But the small, gold-lettered tabs on their tunic sleeves identify them as sons and descendants of free Belgium, voluntarily taking part in the Allied struggle against Axis world domination.

Hospital Notes

Mr. and Mrs. Wade Depew are the parents of an eight and one fourth pound daughter, born September 14 in the hospital. The little lady has been named Ruby Ann.

Lon Keith, Liberal, Kans., who was operated for a ruptured appendix September 6 is showing much improvement.

Ralph Wilson, who has a broken leg and collar bone received when he was run over by a plow September 6, is much improved and will probably be able to leave the hospital in a few days.

Oliver Martin underwent an appendectomy Saturday and is convalescing nicely.

Charles Barnum, Goodwell, who had a leg amputated following a car wreck August 22, underwent a second operation Monday. His condition is satisfactory.

Chandler Minton, who has been receiving hospital care, returned to the home of his parents, Mr. and Mrs. J. W. Moore, Monday.

Ted Slavin was able to be removed to his home Monday. He received hospital care a week for a broken arm injured in a car accident September 7.

Mrs. R. C. Allen, R. N., is assisting at the hospital a few weeks until a new supervisor has been secured to take the place of Miss Charlene McLarty, who joined Uncle Sam's army of nurses and is stationed at Camp Barkley, Abilene.

Dr. and Mrs. R. A. Webb and Mr.

Anderson Rites Monday Afternoon

Final rites for James Ernest Anderson who died in this city Saturday were held Monday afternoon at three o'clock at the First Baptist Church. Rev. S. R. McClung, pastor of the church, officiated at the services. The remains were laid to rest in the Ochiltree cemetery.

James Anderson was born June 26, 1891 in Perkins county, Oklahoma. He moved to Beaver county in 1902 with his parents. He was married January 1, 1912 to Miss Carrie Hilton. Two children, Mrs. Pearl Colvin and Elmer Anderson, and their mother, all of LaJunta, Colo. survive.

Other close relatives are the parents of the deceased, Mr. and Mrs. J. R. Anderson who live on a farm northwest of Perryton; six brothers: Lonnie, Walter, Jewell and Lawrence of Perryton and John and Bryant of Phoenix, Ariz.

The deceased joined the Church of the Latter Day Saints early in life. For the past 11 years he had been employed as a pipe line walker by the Texhoma Natural Gas Co. Fellow employees of this company were pallbearers at the funeral services.

Mr. and Mrs. Willard Witt and Kay, Mrs. J. B. Bennett and Mrs. Clyde Cofer were Beaver visitors Friday and enjoyed the funeral.

H. S. Grads Eligible Air Officers

Young men having a high school education with one and one-half mathematical units and a passing grade in written examinations to be given in five required and two optional subjects, even if no college work has been had; although exemption will be granted for applicable college work, or young men with 60 hours of college work, age 20 to 26, inclusive, unmarried and with no dependent now have the opportunity of training as aviation cadets in the U. S. Army Air Corps.

The new War Department training program of 38,000 pilots a year offers to the qualified young man the finest instruction in the world in the operation of aircraft.

Aviation is in its infancy and regardless whether one stays in the Service or returns to civil life there will always be a growing need for trained pilots. During their training period, young men, as aviation cadets, receive \$75 a month, board and room, clothing, medical attention and a \$10,000.00 life insurance policy with the premiums paid while undergoing training.

Graduating after seven and one-half months, they are commissioned 2nd Lieutenants. Air Corps Reserve, with the opportunity of three years active duty with the United States Army Air Corps. Pay while on active duty ranges from \$206 to \$245 a month, plus an initial uniform allowance of \$150. Upon completion of active duty, they will receive a cash bonus of \$500 a year for each year of such duty.

Should the young man not have 60 hours of college work but has a high school education with one and one-half mathematical units, he will be given the opportunity of pursuing a "Refresher Course" to be promoted as an aid to passing the mental test covering the subjects he should know to be an aviation cadet.

All eligible young men, who think they may be eligible, are asked to write or call at either of the U. S. Army recruiting stations located at Lubbock, Plainview, Amarillo, Pampa and Dalhart, and make immediate arrangements for physical examination.

An aviation cadet examining board will be called for the purpose of examining applicants as soon as the number of applications on file warrant same. All applications must be completed before the arrival of the board. Birth certificate, transcripts of school credits, and three letters of recommendation from well known business men of the community in which the applicant resides. Application blanks can be secured at the above named stations. All high school graduates are urged to investigate the "Refresher Course".

Mr. and Mrs. Joseph Underwood and Mrs. W. R. Underwood, all of Albuquerque, N. M., came in Friday for a week's visit in the home of Mr. Underwood's sister, Mrs. I. R. Buchanan. Mrs. W. R. Underwood, a sister-in-law, went to Spearman Saturday evening and will spend the remainder of the time with her parents, Mr. and Mrs. R. L. Bailey.

Mr. and Mrs. G. T. Leatherman left Friday for a trip to Missouri to visit with relatives.

Preparatory Plans For Revival Meet

The coming revival is the uppermost thought in the minds of the membership of the Methodist Church these days. The minister has asked that all business and social engagements be arranged and, if necessary, rearranged so as not to conflict in any way with the services of the revival.

The meeting is being well advertised with large window cards and other means. Visiting and phone calls will be at work leading up to and during the meeting.

The sermons last Sunday were an effort," said Rev. William E. Fisher, "to lead the thoughts of the congregation up to the realization of the church's supreme need and the one great need of the world in this awful hour." A season of special prayer was observed at the close of Sunday night's service. Special attention is to be given this week and next by the music committee in organizing a large chorus choir. New song books have been ordered for the meeting and congregational singing of the old familiar revival songs will be a special feature of the revival and, Rev. Fisher said, there will be a song book for every one.

Four day services will be held each week, Tuesday, Wednesday, Thursday and Friday from ten to eleven o'clock. The night services will be held at eight o'clock. Special services will be arranged for the young people and junior boys and girls.

"Christians of all denominations, and no denomination, are invited to attend all the services of the revival and take an active part," said Rev. Fisher.

Mrs. Ray Yeale Is Rotary Club Pianist

Mrs. Ray Yeale, prominent instructor of piano and speech with studio in the Perryton schools, is the new pianist for the Perryton Rotary Club. With Mrs. Yeale at the piano and Glenn Truax as song leader, Perryton Rotarians are on their way to becoming one of the best singing clubs in this region.

The program at last Thursday's luncheon was especially interesting. Program chairman Ronald Hendry had as his guest, Elmer Hammett, chief chemist of the Texhoma Natural Gas Co. plant at Fritch. Mr. Hammett gave a very enlightening and educational lecture and demonstration with laboratory equipment on liquid gas.

H. C. Pipkin, one of Amarillo's leading attorneys and a Rotarian for 27 years, was the guest of President Dan Archer. Mr. Pipkin gave a very good talk on the principles of Rotary, relating some of the great lessons gained from his many years of activity in the organization.

R. T. Correll Jr. who has been in training at Chanute Field, Rantoul, Ill., came in Tuesday on a ten day furlough with his parents, Attorney and Mrs. R. T. Correll. On his return he will be stationed in Boise City, Idaho.

China Relief Support Urged By Perrytonite

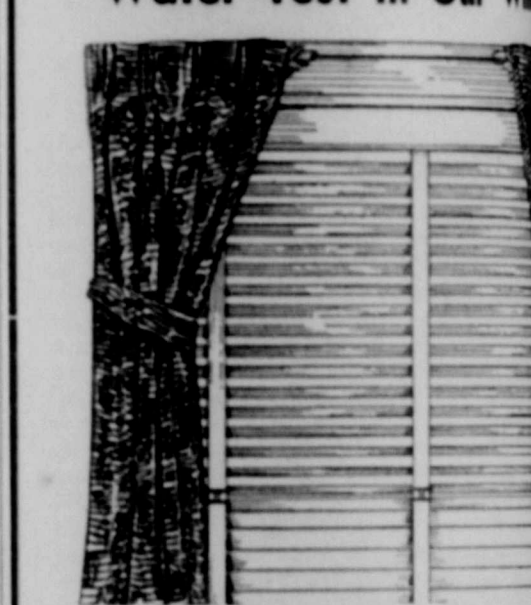

The greatest bargain in relief the world has ever known" is what Carl Ellis, president of the First National Bank of Perryton, said when he accepted the chairmanship of the Ochiltree County United China Relief and took the lead in raising funds in this county for the relief of the sixty million Chinese now refugees, homeless and destitute as the result of the Japanese bombing and invasion.

Mr. Ellis stated that the names of the county-wide committee for the local campaign will be announced next week. The drive is now on and it is hoped that the Texas quota of \$200,000 can be over subscribed by October 15. Voluntary donations are now being accepted at the First National Bank. Plans are being made for a gigantic benefit performance at the Ellis Theatre.

As the war with aggressor Japan drags into its fifth exhausting year 90 per cent of prewar Chinese in-

This Week's Birthdays

Sept. 20 to 27

Michael Faraday, discoverer of electrical generation, was born on Sept. 22, 1791. Thomas Mott Osborne, penologist, was born on Sept. 22, 1866.

Farewell Dinner For Jno Holland

The employees of the Sanford Drug gathered Monday night in the home of Mr. and Mrs. Joe Schollenbarger for a sumptuous chicken dinner as a farewell to Johnny Holland, who left the following day to make his home in California.

Mrs. Schollenbarger and Miss Lois Todd prepared the savory meal which was enjoyed by Mr. and Mrs. H. C. Sansford, Mr. and Mrs. Joe Schollenbarger, Miss Maxine May, Miss Nelda Rose Wright, Miss Lois Todd, Charles Linville and the honoree.

Third Birthday of Tommy LeMaster

Mrs. E. W. LeMaster entertained with a party for her son Tommy on his third birthday anniversary Monday afternoon, September 15.

Many guests dear to childhood were enjoyed before the hostess served birthday cake and ice cream to the following little guests: Ronnie Witt, Charlotte Ann Flowers, Archie Allan Brashears, Jimmy Todd, Margaret Ann Teague, Faye Marie, Lois and Bobby Beck, Jaynele Leatherman, Jimmy Teague, Carlo Sue and Peggy Blackmore, Kay Caylor, Connie Edwards and Barbara Kaye and Eddie LeMaster.

Farnsworth Club Held on Thursday

The Good Deeds club of the Farnsworth community met Thursday afternoon in the home of Mrs. H. R. Simpson and quilled.

Delicious refreshments were served to Mrs. J. M. Morgan, Ed Grebe, Extra Simpson, Lewis Hought, P. P. Rogers, Mary Fronk and the hostess. Next Thursdays meeting will be with Mrs. Simpson to continue the quilting.

Attend Parents 50th Anniversary

Mr. and Mrs. Joseph Bremmer and children Carrie Nellie, John, Edward and Josephine returned last week from a two weeks visit in Missouri. They were in Maryville, Mo., August 30 for the golden wedding anniversary of her parents, Mr. and Mrs. John Halasey.

Over one hundred relatives attended the anniversary celebration. All the children were together for the first time in twenty years. Later the Bremmers visited with his brothers and sisters in Hawkpoint, Mo.

Greeting Cards at Herald office!

CALL COMES TO COLLEGES

Passed by Censor

LOOKING like something out of a Buck Rogers thriller, four McGill University students, garbed in the kind of cap and gown that Nazism made necessary, get a lecture in bayonet fighting from an army instructor. For the period of the war all male students at Canadian universities must spend a definite number of hours training in the C.O.T.C. (Canadian Officers' Training Corps) during the college year. Women students are required to attend special lectures in first aid and similar subjects. As compulsory enlistment for national defense in Canada begins with the 21-year-old group, most students finish their university careers before being obliged to enter the army but many volunteers for service anywhere join up before that time and large numbers of university undergraduates are serving with the Dominion's armed forces overseas and elsewhere outside Canada.

Picnic Supper Held Wednesday

Miss Betty Jean Quick celebrated her thirteenth birthday anniversary Wednesday afternoon with a picnic supper at Lake Fryer.

Enjoying the occasion were Patsy Barlow, Kathleen Lee, Patsy Ruth Patton, Patsy Trooper, Ben Eita Plummer, Nettie McBrillhart, Carmen Keith and the hostess, Mrs. Audrey Quick and Mrs. Jerald Jones accompanied the girls.

Helpful Neighbors Have Wednesday Meet

After being discontinued during the summer months, the Helpful Neighbors club met Wednesday afternoon in the home of Mrs. Albert Ackley.

The time was spent piecing on a quilt. Cake and punch were served by the hostess to Mrs. Horace Hall, a visitor, and Mrs. Reese Taylor, Mrs. O. E. Carter, Mrs. Carl Carter, Mrs. C. J. Prantz and Mrs. Ivan Lovett.

Just-a-Club Met With Mrs. Garrett

Mrs. Charles Garrett entertained the Just-a-Club for bridge in her home, 1002 SW First street, Tuesday afternoon.

At the close of the games, a delicious refreshment plate was served to Mrs. Earl Miller, high score winner, Mrs. Oscar Flowers Mrs. Leroy Hartman and Mrs. Garrett.

Faculty Honored At Reception by Parent Teachers

Members of the Perryton faculty formed a receiving line and were greeted by patrons and friends at the Tuesday evening meeting in the Home Economics rooms of the high school. The Parent Teacher Association sponsored the get-acquainted gathering and a short program was enjoyed during the social hour.

Fall flowers were used in profusion about the rooms. The lace covered refreshment table was centered with a cut glass punch service. Mrs. W. B. LaMaster, Mrs. Max Boyer, Mrs. W. C. Herndon and Mrs. H. C. Brillhart presided and served punch and cakes to each guest. Music was played by Mrs. A. P. McCelvey.

Mrs. K. H. Crisp, PTA president, had charge of the following entertainment numbers: Piano solo, Mrs. McCelvey; reading, "Their First Quarrel," Winona Allen; violin solo, Glenn Truax accompanied by Mrs. Ray Veale. Superintendent C. Wedgeworth, speaking for the faculty, expressed appreciation for this worthwhile gesture by the local association.

Miss Mary Beth Johnson, teacher in the McLean school, visited Saturday and Sunday with her parents Mr. and Mrs. T. W. Johnson.

Kingdom Builders Have Picnic Supper

Members of the Kingdom Builders class of the Baptist Sunday school enjoyed a hamburger supper Friday evening, September 12, at the Stanley D. Key home.

Those present were Mr. and Mrs. Don Shockley, Mr. and Mrs. Mark Burton, Mr. and Mrs. Ford Hamker, Mr. and Mrs. Shirley Horan and children, Mr. and Mrs. Herman Morgan, Mrs. W. H. McClung and the Key family.

Dwight Drake, who has been on maneuvers with the United States army in Louisiana, returned home last Thursday. He was one of the first called from this county under the selective service act.

Delt-a-Deck Held With Mrs. Sib Jines

Mrs. Sibley Jines was hostess for the Friday meeting of the Delt-a-Deck club in her home, 1000 SW Fifth street.

Refreshments were served at the close of the play to Mrs. Tom Denman, high score winner, Mrs. D. D. Shanks, second high, Mrs. Roy Bell, low, Mrs. Claud Allen, Mrs. P. B. Sumpter, Mrs. Aldon Bell, Mrs. Ross Leatherman, Mrs. Lester Evans, Mrs. J. M. Anderson, Mrs. G. A. Ruppert, Mrs. Clifford Beck and Mrs. Lester Evans.

Wilcox Are Hosts For Supper Club

Mr. and Mrs. J. C. Wilcox entertained their club for dinner bridge Saturday evening in their home 701 SW Fourth street. This was the first meeting of the club since the summer disbandment.

High score prize for the ladies was won by Mrs. Max Boyer and high for the men went to Mr. Boyer. Others enjoying the games and the delightful pot luck supper were Mr. and Mrs. Cecil Dodd, Mr. and Mrs. Steiner Mason, Mr. and Mrs. LaRue Norris, Mr. and Mrs. Clifford Herndon and Mr. and Mrs. Wilcox.

Mrs. Allen Hostess Pick-up Breakfast

Another in the series of "come as you are" breakfasts sponsored by the Christian missionary society was held Friday morning with Mrs. Allen the delightful hostess.

Mrs. P. B. Sumpter and Mrs. Carl Ellis gathered in the guests for the delicious nine o'clock meal. The proceeds gathered by fines goes into the missionary treasury.

Those present were Mesdames Ross Leatherman, Tom Denman, Roy Bell, G. A. Ruppert, Emory Castle, J. M. Anderson, Aldon Bell, A. F. Schaff, Ray Nelson, Debs Riley, M. R. Todd, K. H. Crisp, Dewey Allen, Quentin Williams, Lester Evans, Tom Pritts, Ellis, Sumpter, and Allen.

Mrs. Richardson Has Chi Sigma Phi Club

The first fall meeting of the Chi Sigma Phi club was held Thursday evening in the Hotel Perryton with Mrs. Henry Richardson the charming hostess.

After the tasty three course dinner, progressive bridge was enjoyed with score prizes going to Mrs. Max Boyer, high, and Mrs. Kenneth Puelcher, second high.

Others playing were Mrs. Steiner, Mason, Mrs. Cecil Dodd, Mrs. La-

"A Job for Every Returning Soldier" Is Goal of Selective Service Boards

Urging the patriotic cooperation of every employer in Texas to see that every soldier has a job when he gets home, General J. Watt Page, State Selective Service Director, today announced the inauguration of a carefully studied and organized reemployment program which will function through the local boards of the System.

"Many of these returning soldiers must be cared for in this respect beginning this month when the first selectees, National Guardsmen and others to be relieved from active duty by the Army will be released," General Page said. The Selective Training and Service Act imposes the duty of carrying out its reemployment provisions upon the Selective Service System as well as upon the former employers of these men.

The reemployment program calls for the appointment of a Reemployment Committee member affiliated with each local board, the Director explained. This committee member will act as liaison agent between returning soldiers and employment.

The function of the local board Reemployment Committee member will be to get in touch with the former employer prior to the return of a soldier to see if his former job is still available, to transmit the records of returning soldiers who have no jobs awaiting them to the nearest State Employment Service and to act as liaison agent for the soldier in placing him in contact with available jobs.

In case where the State Employment Service is unable to find a job for a returning soldier, the local board Reemployment Committee member must look for local employment opportunities. For this purpose he should obtain the cooperation of local chambers of commerce and boards of trade, Rotary, Kiwanis, Lions Exchange and Optimist Clubs and like groups, labor unions, the American Legion, Veterans of Foreign Wars and similar organizations.

The war Department is cooperating with the Selective Service System in carrying out the obligation of the Government to obtain civilian jobs for returning soldiers. In every camp it is gathering the occupational and educational history of the soldiers together with all data concerning the military career of each that is pertinent to civilian employment. This data will be distributed to local board Reemployment Committees by National Selective Service Headquarters through State Headquarters.

Adobe Walls Monument to Honor Indians

BORGER, Texas — (Special) — Perhaps one of the most unique celebrations ever to be held in the Southwest will take place Oct. 17-19, when several hundred Indians migrate from the Anadarko, Okla., reservation to Borger, Texas, to honor their warriors who fell in the battle of Adobe Walls.

Never before in history have so many Indians been known to have trekked such a distance—about 300 miles—to stage their colorful ceremonies.

The pilgrimage of these Indians from Anadarko to Borger is perhaps the most significant thing about the celebration, according to C. R. Stahl, general chairman of the event.

The celebration will be known as the Adobe Walls Indian Ceremonials and will include a colorful two-day pageant, Friday and Saturday, Oct. 17-18, which will reenact the battle of Adobe Walls.

Other outstanding features of the celebration will be a big Indian parade on Saturday morning, Oct. 18, and the Indian battle site ceremonies, Sunday, Oct. 19, at which time a monument will be dedicated to the Indians who fell in the battle of Adobe Walls. Tribal dances, feasting and weird Indian ceremonials will also mark the dedication, which will be held at the battle site located about 15 miles northeast of Borger.

The celebration will be strictly an Indian affair with the Indians staging their own ceremonies in their own fashion. The Borger Chamber of Commerce, assisted by Hutchinson County civic clubs, is bearing all expenses of transporting and feeding the Indians at the request of Chief Yellowfish, lone survivor of the battle, who has asked the white men of this area to help the Indians honor their dead who fell while attempting to defend their rights and liberties.

A monument to the white buffalo hunters and trappers who died in battle was erected in 1924.

Tribal chiefs, squaws and papooses, attired in full Indian regalia and representing such tribes as Kiowa, Comanches and Cheyennes will be here for the ceremonials.

Like other big Indian events staged at Anadarko, Gallup, N. M., etc., the Borger celebration is expected to draw thousands of people from over Texas and neighboring states.

Mr. and Mrs. Geo. W. Cutter left Sunday for a week's visit with relatives in Kansas City, Mo.

E. J. Huddleston returned Sunday from a two weeks visit with his parents in Childress.

Mr. and Mrs. Claud Allen and children, JoLayne and Claud Jr., spent Sunday visiting in the Henry Allen home, Liberal, Kansas.

CURRENT Plymouth models are available in two lines, the Plymouth Deluxe and Special Deluxe. Above is the new Special Deluxe Club Coupe, with unusual room for 6 passengers provided by a longer body structure, lower floor and a comfortable, full-width rear seat. Fuel economy and road performance both are improved in all Plymouth models, through a new 95 Horsepower Engine that squeezes more miles from gasoline. Safer, more convenient and better looking is Plymouth's full-width running board (left) now entirely enclosed within the lower, wider body lines of all models, both Deluxe and Special Deluxe. Concealing them keeps them clean in wet weather, and in winter, free from ice and snow. The low floor now is level with the running board, and there is no raised sill to step over, making it easier than ever to step in or out of the car.

• Lake View Tattler

Captain B. Jarvis is home from Arlington, Va. for a few days visit before going to Albuquerque, N. M. Mr. and Mrs. Woods King were in Miami and Tampa on business last week and spent the night with their daughter while gone.

Mr. and Mrs. Dennis Reed and daughter Margaret motored to Sanderson, Texas, last week to visit Mrs. Reed's sister and family. Mr. and Mrs. Earl Pearson, Mrs. Pearson, the former Allene Beck, taught school in Spearman and at Woodrow before her marriage.

Mr. and Mrs. Geo. Gaze, Oklahoma City, spent Wednesday night in the Dennis Reed home. Mr. Gaze and Mr. Reed, pals when small boys living near Mountain View, Okla., talked into the wee hours of the morning.

Olan Williams, like many other farmers, is getting the sheep craze, and has gone to San Angelo to buy sheep. The first thing we know these farmers will be singing, black sheep, black sheep, have you any wool?

Mrs. W. Y. Williams spent several days last week with Mrs. W. M. Deck.

The writer called in the Dennis Reed home last week. Mrs. Arthur Swink was honored at a pink and blue shower last week in the Gilman Flowers home, with Mrs. Flowers and Mrs. Earl Waide as hostesses. Elma Pipkin played several piano selections during the afternoon. Tasty refreshments of homemade ice cream and cookies were served by the hostesses to Mrs. W. E. Dear of Perryton, J. G. Powell of Parnsworth, Mrs. Johnny King, Mrs. Hollis Gossett, Mrs. L. L. Swink, Mrs. N. P. Dear, Mrs. Clem Flowers, Mrs. S. J. Powell and the honoree.

Mr. and Mrs. John Sims shopped in Spearman Saturday afternoon. Mr. and Mrs. Hollis Gossett and daughters, Gayle and Dora Lee, were Perryton shoppers, Saturday.

Miss Leona Emmick visited in the Powell home Saturday.

Gayle Gossett gave a program of readings and a display of her work for P. T. A. Friday afternoon. Mr. and Mrs. Jake Regier spent the week-end with the Knox Pipkin family. Although Mr. Regier is a minister, when he saw Mr. Pipkin had so much work to be done, he pulled on a pair of overalls and is working at whatever needs to be done.

Merle Beck is threshing at the Dennis Reed place.

A couple of ladies loaded their groceries and bundles into what they thought was their car last Saturday afternoon in Perryton. Then made themselves comfortable in the car watching the crowds. To their chagrin, they discovered they were parked in the wrong car.

• Waka Items

Miss Jean Mullins of Perryton spent Sunday night with her sister, Lynn, who is the 5th and 6th grade teacher in the Waka school.

Mr. and Mrs. D. W. Hart and Wilbert left Monday morning for a vacation in California and to visit Mrs. Hart's mother and sister, who live there.

Winifred Butler came home Sunday from California for a visit with her parents, Mr. and Mrs. Fred Butler.

Roberta Burger spent Sunday visiting Imogene Stowe. Brother Rhyme of Liberal, Kan., preached at the Brethren church, Sunday evening.

Mr. and Mrs. Fred Ashley gave a six o'clock breakfast for the Harts Monday morning.

George Hohman left Monday for Canyon, Texas, where he will be in school this winter.

Oneta Phipps, Perryton, visited in the Homer Gurley home over the week-end.

Henry Buschman and family visited Mr. and Mrs. D. E. Butler, Sunday afternoon.

Mr. and Mrs. Chilion Igon, Jack and Delmar, Mr. and Mrs. D. W. Hart and Wilbert enjoyed a picnic supper in the home of Jerry Burger, Sunday evening.

Mr. and Mrs. I. S. Burger returned from Wichita, Kan., Sunday.

Tri-State Fair Opens Sept 29

AMARILLO, Sept. 17.—From Sept. 29, to finish, Oct. 4, The Tri-State Fair here will have top priority on entertainment and education for thousands of men, women and children.

Gov. Coke Stevenson of Texas will be here for the opening of the exposition; Gov. John E. Miles of New Mexico will be here for the closing.

Among distinguished visitors during the week will be Capt. Charles E. Rosendahl, noted naval officer and lighter-than-air craft expert. Arrangements are being made now for a defense display in addition to the regular exposition features, free shows afternoon and night in front of the grandstand and a mile long midway—the same midway booked for the Oklahoma State Fair.

When the Southwest's show window is unveiled Monday morning, Sept. 29, the importance of agriculture and livestock in national defense will be stressed anew.

"If food-agriculture and livestock—is to win the war and write the peace then the Southwest is better prepared than in any other period of Tri-State Fair history," declared Ray Pinkney, serving his third consecutive year as president of the exposition.

"There is no question about the various department exhibits being the best this year," he continued. "Last year's fair was most successful which gave the exposition more money to spend this year for entertainment."

Judge Jack and Don, have returned from McPherson, Kansas. Bonny Lou Elledge will attend college there this winter.

T. E. Miller has been on the sick list the past week.

Harry Miller returned for a visit with his parents over the week-end.

Mr. and Mrs. Lee Carter and Jerry Dean visited in Darrouzett, Saturday.

Jack Elledge had the misfortune of receiving an eye injury last week when the Ranger Band was in Beaver.

Friends and neighbors gathered at the home of D. W. Hart Friday evening and proved a much debated question of whether or not the Hart family could be surprised.

The Ray Burgers have been seen driving a shiny, red car.

Little Sandra Sue Stump and Karen Crum have been having a streak of bad luck. Sandra became badly choked when she swallowed some unknown object, and Karen was badly burned when she came in contact with a can of lye.

Mr. and Mrs. Troy Dendy and children were guests in the Wilson home, Sunday.

Mr. and Mrs. Abraham Wiebe and children visited relatives in Hooker, Okla., Sunday.

Mr. and Mrs. Jake Boese were called to Adams, Okla., last week because of the death of Mrs. Boese's mother.

Mr. and Mrs. Vester Chambers, Spearman, were guests in the Buster Ashley home, Sunday.

The people of the Waka Brethren Church enjoyed a bountiful dinner in the church basement, Sunday.

Mrs. Dan Blikenstaff is on the sick list.

J. R. Stump and C. B. Barber are in Colorado on a fishing trip. —Reporter.

A furrier will be at The Orchid Shop Saturday. 38-11-c

• Boyd, Oklahoma

Alvis Hilderbrand and Ed Claybrook had broomcorn hands last week.

Mr. and Mrs. O. H. Black were out from Perryton, Wednesday, making arrangements to move on their place.

Mrs. Ella Carter and Mrs. Emma Claybrook spent Thursday evening and night with Mrs. Springmeyer. Many Boyd residents attended Beaver's celebration Friday and Saturday. We were told that Boyd Farm Women's Club had one of the most beautiful displays of canned goods.

Mrs. W. A. George, Mrs. Ernest Jones, Mrs. Dick Gift, Mrs. Ernest Bowles and Emma Claybrook were shopping in Perryton, Saturday.

Mr. and Mrs. Alfred Pittman and daughters and Mrs. Pittman's mother, Mrs. E. R. Thurman, Perryton, were out Sunday for plums. The girls had the thrill of their lives riding to and from the creek behind a team of horses and we all enjoyed the visit and hayrack ride.

The Blacks are now located in their new home, Boyd, Oklahoma, R. 1, Box 13. We welcome them and wish we had more such neighbors.

DeVere Holland returned Friday from a two weeks visit with her sister, Mrs. Roland Ward, Enid, Okla.

Immunize Against Dread Diphtheria

Austin, Texas. — "The axiom, 'You can lead a horse to water but you can't make him drink,' perhaps has no more striking parallel in human conduct than a man's indifference or refusal to use the preventive methods that medical science has developed during the last forty years. Indeed, the lack of personal cooperation is the weak link in an otherwise strong chain against not only some of the infectious and influences that impair health or destroy life in middle-age and older groups but against a number of the communicable childhood diseases in which latter class diphtheria is an example," states Dr. Geo. W. Cook, State Health Officer.

"Toxoid immunization is available in Texas practically to all children, either through the family physician or at clinics arranged by physicians for those who are unable to pay the usual fee for this service. "While the number of Texas children who have the benefit of this protection is large, evidently there are many who, because of parental misconception or unconcern, have not been made invulnerable to an attack of diphtheria through this simple and practical procedure.

"Perhaps the decided drop shown in the diphtheria illnesses and death rates during the last thirty-five years has developed an unwarranted sense of security on the part of parents."

Pretty Shade Trees Don't Just Happen; Hard Work Required

STILLWATER, Okla., (Special)—Beautiful shade trees are not the result of a few minutes of haphazard work, but represent hours of painstaking effort, according to Michel Afanasiev of the Oklahoma A. and M. College horticulture staff. Sometimes trees will grow if they are merely placed in the ground, but for best results and the least risk, considerable care should be taken in transplanting.

Afanasiev advises fall planting for deciduous or broad-leaved species. They should be transplanted while dormant as soon as the available moisture is sufficient to facilitate the removal of the trees with a ball of dirt on the roots. When properly done, this causes little disturbance of the roots and prevents injury by the sun and wind. The less the roots are disturbed, the better is the chance of survival.

The hole should be somewhat larger than the entire ball of roots and dirt to facilitate setting of the tree and permit addition of good top soil around the roots.

Prune the Trees
For fertilization, Afanasiev suggests the use of a fork full of well rotted manure placed in the bottom of the pit mixed well with top soil. This will prevent the manure burning the roots.

Trees should be pruned back somewhat to compensate for the loss of roots in transplanting.

All broken and bruised or crowded branches should be removed, though Afanasiev warns that the main stem or leader should not be molested since it determines the ultimate height and shape of the tree. All broken and bruised roots should also be removed with a sharp knife.

Place the tree in the ground at the same depth or even a little deeper than it was found. Put rich top soil in the hole first, set the tree firmly, fill gradually with the soil and pack well. Before completely filling the hole, the soil in the hole should be well soaked and allowed to settle.

For best results, a small depression should be left around the trunk of the tree to catch the moisture and guide it directly to the ends of the roots. The common method of planting trees leaves a small mound there causing the water to be lost by runoff.

If the tree has a relatively thin bark, it is often advisable to wrap the trunk to prevent sun scald. Afanasiev pointed out, Burlap sacks or ribbons of wrapping paper make efficient wrapping material and protect the tree efficiently.

Trees should be braced by the use of guy wires passed through short pieces of hose to protect the tree from the wire. This bracing is necessary in the early stages of growth before the tree becomes well established to prevent wind disfiguring it.

A mulch of peat moss or litter two to three inches deep is suggested as a means of conserving moisture and controlling weeds. The problem of lack of moisture can be solved in the dry summer months by placing short pieces of drain tile in the ground at regular intervals around the tree about half-way between the trunk and outer circle of limbs. Allow water to run slowly into these until the ground is thoroughly soaked. One such watering each two weeks will be enough in dryest weather, according to Afanasiev.

Deciduous trees that can be successfully planted in the fall, such as Oaks, Elms, Honey Locust, Hackberry and Soapberry, are suggested as possibilities for planting this fall.

In areas of scant rainfall this grass will make a thin sod, but the sod can be improved by diverting water from adjacent areas to the lawn and allowing it to soak in. Among the advantages of using this kind of grass, Miss Hatfield lists its ability to withstand prolonged dry spells better than Bermuda, St. Augustine and other lawn grasses; the ease with which it is controlled by cultivation when it spreads to gardens and fields; it grows closer to the ground than other grasses and thus requires less mowing; it has a fine texture, and a pleasing, soft green color.

Buffalo grass can be started from seed, but that is expensive and slow. Miss Hatfield suggests that a better method is to plant pieces of the sod about three inches square with a depth of about five inches. It is necessary to cover the roots but avoid smothering it by covering the leaves and stems with soil. Placed two or three feet apart, these plantings will make a complete sod in one good growing season.

St. Augustine sometimes is combined with buffalo for a lawn covering, the buffalo growing well in sunny portions and St. Augustine thriving in densely shaded sections where buffalo not thrive.

Defense Design

Created for the working woman in defense industries, this suit can be dressed up with accessories. It's made of olive-drab wool, with dyed cotton stockings to match. "Irene" is the designer.

Because butterflies symbolize immortality in Chinese myth, says an article in the magazine Natural History, jade carvings of butterflies were often buried with the dead in old China.

Winter Wheat in Santa Fe States

As reported by the United States Department of Agriculture, showing production for last year, and month by month development of the 1941 crop up to the harvest period of July 1:

STATE	1940 Bushels (December 1 Final)	1941 Bushels (April 1 Estimate)	1941 Bushels (May 1 Estimate)	1941 Bushels (June 1 Estimate)	1941 Bushels (July 1 Estimate)
Illinois	39,555,000	30,772,000	31,896,000	33,668,000	36,326,000
Iowa	7,680,000	4,056,000	2,535,000	2,873,000	2,958,000
Missouri	31,690,000	17,461,000	16,731,000	18,018,000	17,589,000
Nebraska	33,696,000	28,500,000	30,780,000	33,060,000	33,666,000
Kansas	123,648,000	149,454,000	165,822,000	188,694,000	182,373,000
Oklahoma	56,332,000	62,959,000	62,384,000	71,296,000	53,472,000
Texas	29,355,000	41,420,000	47,614,000	56,116,000	45,914,000
Colorado	9,888,000	14,014,000	15,484,000	15,484,000	16,988,000
N. Mexico	1,410,000	1,172,000	1,262,000	1,616,000	1,695,000
Arizona	819,000	836,000	651,000	496,000	496,000
California	11,370,000	12,250,000	12,176,000	12,176,000	12,176,000
TOTALS	345,443,000	362,894,000	387,335,000	433,497,000	400,051,000
U. S. TOTALS	589,151,000	616,123,000	653,105,000	697,692,000	682,321,000

While the July 1 estimate bears out our former prediction that the 1941 winter wheat crop in Santa Fe territory would total at least 400,000,000 bushels, there is reason to believe the final figure will not be that high. No doubt that much grain was produced and in sight at the approach of harvest, but there was considerable late damage by rust and insects, also lodging, and other losses followed when cutting was hampered and delayed by wet weather. Based upon developments in Kansas, Oklahoma and Texas, the crop in Santa Fe states will not exceed 385,000,000 bushels, actually harvested.

Egg Drying Is a Fast-Growing Industry

Two plants, one in Springfield, Mo., and another in Fort Worth, Tex., separate eggs into powdered whites and yolks. Under the lend-lease act, 26,100,000 dozen eggs in powdered form are being shipped to Britain. After the war, when the product becomes available for home use, this industry will probably be one of the fastest growing in the United States. First step, left, is candling. Doris Cox, right, is one of the expert egg-breakers.

An immense pressure machine blows the egg yolks or whites (each is processed separately but in a similar manner) into a fine mist. When mist hits the conical chamber, left, which has carefully controlled temperature, it dries immediately to a very fine powder. A dozen eggs, right, are only a handful of powder after they've gone through the drying process, losing about seven-tenths of their volume. The powdered eggs will be sold in cans, and you can get dried eggs or just dried yolks or whites. Just add water and use as you would fresh eggs.

New Coach of Undefeated Boston Eleven Optimistic

Denny Myers, right, new football mentor of the Boston College Eagles, undefeated last year, discusses the coming season with Capt. Al Morris. The Eagles, winners of the Sugar Bowl game on New Year's Day, look forward to a successful season.

BY ART BRONSON
BOSTON COLLEGE, pride of eastern football in 1940, has a new coach and a tough schedule this year, but morale is high. The Eagles were unsullied in the gridiron wars last season. After a bruising schedule, they topped off the year with a neat victory over the vaunted Texas Aggies in the Sugar Bowl.

Boston's losses are not inconsiderable. Gone is wily Frank Leahy, their capable coach, who will sit in the big chair at Notre Dame this year. Also missing are chucking Charley O'Rourke, the aerial wizard, and ponderous Chet Gladchuck, a mountain of strength in the 1940 Boston forward wall.

HEAD of the Boston board of strategy this season is Denny Myers, who was imported from Brown, where he was line coach. Despite the gaps left by gradu-

ation, Myers is reasonably optimistic: "It would be foolhardy for me to predict another undefeated season, particularly in view of the tough opposition we face," says Myers. "We have plenty of good men on the squad, and I think we'll give our opponents some real competition." By opponents, Myers means such stalwarts as Tulane, Clemson, Georgetown, Tennessee, Temple, Wake Forest and Holy Cross—which will carry plenty of big guns. Among the softer touches on the Eagles' schedule are St. Anselm, Manhattan and Boston University. Keeping in step with the times, as are so many of his colleagues, Myers will use the "T" formation, the "Hut-and-the-rill-rah" of football this year. He will dovetail with the conventional single wing—which should mean deception, if not confusion, to all concerned.

They're An Eyeful of Champions

Miss America 1940, center, welcomes Miss New York and Miss California to Atlantic City for competition to select the nation's beauty queen. Left to right they are Grace DeWitt, Marie Buckle, and Rosemary...

Southern Farms Aided by FSA

BY RALPH HERBERT

THE old French monarch who expressed the pious desire to see his country so prosperous that every peasant would have a chicken stewing in the kitchen pot, is beaten all hollow by the United States Department of Agriculture, whose goal for the low-income farmers of the southeastern states is 100 chickens, one brood sow and one milch cow.

If they already have chickens, pigs and cows, then the department would like to see their number increased. The program has a threefold purpose: 1—To grow more food. 2—To give the low-income families a better table. 3—To increase their money returns.

In Florida, Alabama, Georgia and South Carolina there are at least 52,000 low-income families, largely tenant farmers on small farms or share-croppers. In the past their staple crop has been cotton.

For five years the Farm Security Administration has been trying to interest the 52,000 families in something besides cotton. It has especially hammered home the idea that chickens and their eggs would not only improve their very poor diet, but the surplus of what they raised would bring in needed cash.

Huge Army training camps were being established all over the south and enormous numbers of men had to be fed. FSA pointed out to the low-income farmers that they could raise chickens in the neighborhood of the camps and sell them and fresh eggs to the Army.

In the four southeastern states low-income farmers bought 5,000,000 May chicks. Average investment was \$85. These four states have already sold, as fryers and broilers, 1,800,000 chickens which brought in \$700,000, or more than the total cost of the original 5,000,000 plus their feed.

The Farm Security Administration is so encouraged by the success of the program up to date, that it will probably extend the experiment to other states where there are many low-income farmers.

Cover Crop Is the Initial Step in Regrassing Cultivated Land

AMARILLO, Texas.—Thousands of wind-swept acres of the old Dust Bowl today are in the process of being regressed and eventually will form a land reservoir to which the nation may turn for agricultural adjustment when peace finally comes to this war-torn world.

Much of this severely-eroded land never should have been cultivated, in the opinion of members of the Southern Great Plains Regional Agricultural Council's re-vegetation committee who recently made an inspection tour of the old Dust Bowl area which ended with a conference in Amarillo. Once such land is regressed it may be fitted into a grassland agricultural program, while areas suited for cultivation can be used as needed for the national defense or peace-time programs may require, the committee points out.

Aided by the best moisture conditions since soil blowing became a serious problem in the Plains and with improved seeding methods, the re-vegetation program has made its greatest progress during 1941, the committee reports. More than 90 per cent of seedings made last spring have been established successfully, while results from 1937 to date indicate that good grass stands are possible without excessive rainfall.

R. I. Throckmorton, of the Kansas State Experiment Station and who is chairman of the re-vegetation committee points out that in the past the re-vegetation program had been confronted by three obstacles that made progress extremely difficult. First was the fact that re-establishment of grass on cultivated land presented a new problem on which research and experiment stations had little data; second, native grass seed for extensive re-vegetation work was not available; and, third, the expense of carrying out such work was discouraging to the individual farmer.

The 1942 season will find the latter two obstacles practically eliminated, and rapid progress being made in meeting the first.

Development by Soil Conservation Service nurseries and other agencies of more efficient and practical methods of harvesting native grass seed has been a big factor in increasing the supply for re-vegetation work. Farmers have been encouraged to harvest grass seed for market and several now are finding this a profitable addition to their regular farming activities.

The biggest seed harvest of all times seems assured for this year, the committee reports. Farmers have found that they do not need special equipment for the job since the small combine available to practically every farmer can be used in efficiently harvesting grass seed. However, farmers are being warned to investigate the seed prospects before harvesting since in some areas the heads appear mature but the seed have been blighted because of certain moisture conditions.

Grass seed are available through commercial seed houses. Seed harvested or purchased by the Soil Conservation Service will be furnished to farmers cooperating with soil conservation districts and in other work areas of the Service. Members of the re-vegetation committee are confident that an ample supply of seed will be available for a big expansion of the regressing program in 1942.

The second obstacle, the cost of re-vegetation work to the individual farmer, has been eliminated to a great extent through the Agricultural Adjustment Administration's restoration program.

Under provisions of the Triple-A program, farmers now are paid for establishing a cover crop, which is the first step in regressing cultivated land, and also for seeding permanent pasture grasses. These payments usually are sufficient to take care of most re-vegetation expenses.

With the realization that every effort of federal and state agricultural agencies should be directed toward obtaining more complete information on methods of regressing cultivated land in the Dust Bowl region, the Southern Great Plains Regional Council set up a coordinated re-vegetation program in January, 1939.

Since that time efforts of the Bu-

reau of Plant Industry, State Experiment Stations of Texas, Oklahoma, Colorado, Kansas and New Mexico, and the Soil Conservation Service have been directed toward this goal. The cooperative effort of these agencies has resulted in a vast amount of data being obtained on methods of establishing cover crops and for reseeded grass.

Experiment stations are doing a lot of work in improving the native grasses. A few introduced grasses show promise of giving good results in re-vegetation work, but no recommendations will be made until the value of these has been proved thoroughly.

Pointing out that the establishment of a cover crop is the initial step in regressing cultivated land, the committee recommends that tillage of the land be started as soon as weeds appear. Any type of implement may be used that will kill weeds and place the land in condition to resist erosion and conserve moisture. Later cultivations are recommended as needed to control weed growth and to get the surface in condition for the drilling of the cover crop. Hummocks should be leveled before seeding.

Any adapted sorghum crop may be used as a cover crop, the committee states. Seeding should be done either with a shovel-type or disc drill at the community. In general, these seedings should be made during the latter part of June. Drill row spacings should not exceed 18 inches. Sorghums should be mowed before seed mature, leaving a 10 to 12-inch stubble, with the hay being allowed to remain on the ground. The second growth also should be mowed before seed are produced.

Small grains may be used for cover crops under exceptionally favorable conditions, the committee reports. Where there is a good supply of moisture and a lack of weeds and volunteer grain, grasses may be seeded in small grain stubble without previous preparation. Such seedings should be restricted to small areas unless a winter-growing grass is used.

Under certain conditions it may be necessary or desirable to seed grasses in weed cover. Such plantings should be made only after the land has had a weed cover for at least three years and where the soil has become firm and stable. Plantings in weed cover should be made with a minimum disturbance to the soil.

Excessive moisture this year has reduced the stand of Russian thistles, but there is an abundance of

sunflowers and pigweeds.

Results show, the committee reports, that better stands of grass have been obtained where the seed was drilled rather than being broadcast by hand.

In the seeding of grass the winter-growing species should be planted early in September, or during late February and early March. Summer-growing grasses should be planted early in the spring, preferably in April.

Blue grama should be the basis for seeding on most upland soils, particularly those of a heavy nature. Other grasses suited to such areas are side-oats grama, buffalo, galleta, black grama and sand dropseed.

Sandy or semi-sandy upland soils may be seeded with the following grasses in addition to blue grama; side-oats, sand bluestem, sand lovegrass, hairy grama, and sand dropseed.

Seeding should be at depths of one-half to one inch and insofar as possible, should be drilled. Grasses should not be seeded with nurse crops. Some form of packing is recommended.

Protection of young grass stands from grazing clipping for weed control during the first and probably the second growing season, and complete stabilization of surrounding areas are additional recommendations of the committee.

While a large portion of field-scale regressing activities in the past has been confined to Soil Conservation Service work areas and soil conservation districts, it is expected that many individual farmers outside these areas will attempt to regress cultivated land next year because of the favorable conditions now promised.

With excellent moisture conditions prevailing during 1941, the Soil Conservation Service and cooperating farmers and ranchers seeded grass on 13,000 acres with a

HEAT AS HEALTHFUL AS A SUNLIT SUMMER BREEZE!

Coleman GAS BURNING FLOOR FURNACES

WARM AIR

AIR RETURN

NO BASEMENT NEEDED

QUICK, EASY INSTALLATION

Like a soft summer breeze, fresh, clean, invigorating, healthful warmth flows from the Coleman Gas Burning Floor Furnace and circulates throughout your house. You have a pleasant, comfortable temperature even on the coldest days. You get more healthful wintertime comfort from the Coleman because of these...

6 BIG FEATURES

1. Keeps air in active circulation—keeps it fresh, clean and healthful. No odors or gases, no oxygen taken out of the rooms for combustion—no stagnant, dead air pockets.
2. Averages a complete change of thoroughly warmed air three times an hour.
3. Keeps the whole room cozy and warm. No frigid floors—no cold air layers.
4. No sweating of walls—no foggy windows; no open flame to condense moisture.
5. Gives clean, carefree heat. No dirt or ashes; no furnace tending; no fire building; no watching; no bother.
6. Low cost installation—low fuel cost.

Enjoy the economy and comfort of the Coleman Floor Furnace. Add to the health and happiness of your family this winter. It sets below the surface of the floor—no basement is needed, no space is wasted. Come in today and let us completely explain its many fine features. Buy your Coleman Furnace now while we have a good stock as the price will soon go up and they will be hard to get.

90 per cent success. Effective re-vegetation of large areas of severely eroded land was accomplished this year as a result of heavy rainfall. The Service plans to assist operators in seeding grass on 25,000 to 30,000 acres next year.

After data collected on the recent field tour of the committee, detailed recommendations for the re-vegetation program will be made for 1942, according to Throckmorton.

The best soybean meals contain nearly as much vitamin B as wheat germ does and nearly as much vitamin G as lean meat or milk. The comparison is made on a dry basis, the American Chemical Society reports.

Civilian Defense And Red Cross Make Statement

With a view to correct coordination, the Director of the Office of Civilian Defense and the Chairman of the American National Red Cross have issued the following joint statement.

1. The Office of Civilian Defense is the official government agency to assure effective coordination of Federal relations with State and local governments engaged in defense activities, to provide for necessary cooperation with State and local governments in respect to measures for adequate protection of the civilian population in emergency periods, to facilitate constructive civilian participation in the defense program, and to sustain national morale.

2. The American National Red Cross is the responsible agency for relief suffering caused by disaster both in peace time and in the national defense emergency, by providing food, clothing, shelter, medical and nursing care and other basic necessities. Therefore, Red Cross Disaster Relief Service, nationally and in local Chapters, will serve in emergency care and rehabilitation of individuals and families suffering from disaster caused by belligerent action during the national defense emergency in cooperation with governmental agencies—national, state and local. In rescue work and emergency medical service caused by belligerent action for which the Office of Civilian Defense assumes leadership and responsibility, the Red Cross will make its services available as needed.

3. The Red Cross "acts as a medium of communication between the people of the United States of America and their Army and Navy." Cases of active service and ex-service men and their families should be referred to the Red Cross which is responsible for providing or securing the services and assistance needed. In carrying out these services the Red Cross makes maximum use of other community resources.

4. Training of Office of Civilian Defense workers in first aid and nurse's aide service is provided by the Red Cross through its programs of training in first aid and nurse's aide courses. The recognized service of the Red Cross in training industrial workers and others in first aid is drawn upon.

5. The Red Cross, through its Chairman as a member of the Civilian Protection Board, has made available all of its services as needed by the Office of Civilian Defense, both national and local.

6. Councils of Defense and Red Cross Chapters in their civilian defense activities should develop their local plans of cooperation in accord with this joint statement of responsibility.

Signed: Fiorella LaGuardia, U. S. Director, Civilian Defense, and Norman H. Davis, Chairman, American National Red Cross.

Students Should Ascertain Date of Draft Call Before Entering School

Registrants who contemplate resuming attendance at school this month should first consult their local boards to ascertain approximately how soon they may be called for military training. General J. Watt Page, State Selective Service Director, announced today.

While deferments from military training are being granted students who are preparing to enter certain occupations in which shortage of manpower exists or are indicated. General Page said, there are no group or blanket deferments. Each case must be acted upon individually by the local board having jurisdiction, and unless a student can qualify as a "necessary man" under Selective Service Regulations he is liable to be called for induction when his order number is reached. He said:

"It is the policy of the Selective Service System to be as lenient as possible within the law in cases of young men who are earnestly pursuing educational opportunities, even though they are not seeking to qualify for an occupation that is exceptionally important for National Defense. My advice to these young men, therefore, is to consult with their local boards and find out when they probably will be called to qualify for military training. If the probability is more remote than three months or so, they may begin their studies with the understanding that they can at least complete one semester. In the same way it may seem probable, according to their order numbers, that they can complete a full year."

The general policy, General Page said, will be one of cooperation between the student and his local board with the object of not causing a sudden interruption of studies or financial loss to the student through inability to continue through a semester for which tuition has been paid. This, he said, can be accomplished by the student consulting with his local board before commencing a semester and by the local board granting a stay of induction until the end of such period to a student who is called for military training.

There are numbers of specialized professions, General Page pointed out, for which students who give

Survey Reveals More Tourists in Texas This Year

Austin, Sept. 16 — Tourists coming to Texas during this summer's vacation period apparently have been seeing more of the Lone Star State and driving more miles in Texas than did tourists last year. This is indicated by survey by the Texas Highway Department made at the 11 courtesy and information stations operated during the summer by the Department at the various points of entry into the state.

It is shown by a six week's summary of the station's operations, from June 17 to July 27 this year, that 13,272 out-of-state cars stopped at the 11 stations. Those cars covered 7,650,525 miles in Texas, it was estimated by checking their proposed routes. This was an average of 666 miles per car, as compared with an average of 493 miles in 1940. Thus it appears tourists are traveling about 25 per cent farther in Texas this year.

A number of other interesting features are revealed by facts compiled at the stations.

The figures show that only 11 stations were operated this summer as against 13 last summer. The 11 this year, however, will have served about as many cars during the 14 weeks they are open as the number for 1940, when a total of 31,012 stopped for information.

During the six week's period covered by the present summary (June 17 to July 27), 23,049 cars were served at the 11 stations operated by the Department this summer. Of these, 9,777 were Texas cars, and 12,272 were out-of-state automobiles.

California cars stopping at the stations outnumbered all others, totalling 2,354 vehicles, while only 7 cars from Rhode Island were listed.

A comparison of the estimated number of miles driven in Texas per car by states shows Maine led with 1,200 miles, and Oklahoma being lowest with 1,778, while only 12 cars from Maine stopped, indicated that the New Englanders who stopped for information really traveled over the state to see it after coming all the way from Maine to Texas, and that the neighboring Oklahomans journeyed many short tours, or trips, into Texas.

The Highway Department courtesy and information stations are operated this summer were located at Texarkana, Gainesville, Denison, Wichita Falls, Texline, Glenrio, Pecos, Canutillo (near El Paso), Laredo, Orange and Marshall.

Mr. and Mrs. Garland Redfern accompanied by her mother, Mrs. J. W. Chapman of Long Beach, Calif., returned Monday night from a two weeks vacation spent visiting in Georgia, Florida and other eastern points.

Safety Division Finds Defects in Buses

Austin, September 15 — With traffic fatalities on the increase and travel heavier than ever before, school bus drivers will feel the weight of tremendous responsibility in the coming school year, State Police director Homer Garrison warned today.

Urging bus drivers to be sure their vehicles are in tip-top shape, Garrison said that a recent inspection revealed mechanical defects in every one of twenty six buses tested. Twenty three had defective brakes, thirteen defective lights, thirteen no fire extinguishers, sixteen no first aid kits. Most of them were defective in at least three important items.

Although the safety lane for inspection of private vehicles has been temporarily discontinued, Garrison said the Safety Division will continue to assist school authorities in inspecting buses.

Lloyd George

David Lloyd George, England's World War I prime minister, inspects newly-cut barley on his farm at Churt, where local residents and evacuees help with crop-gathering.

Mrs. Milton Jacobs and son, Gary, left Saturday night to join Mr. Jacobs in Reno, Nevada, after four months visit with her mother, Mrs. Lela Keim.

Two Can't Land in One Space

It would have been all right for the two pilots at the controls of these ships to land at the Conway, Ark., Municipal Airport if they hadn't picked the same spot at the same time. Miraculously, neither was seriously injured.

Duck Robbers

Careful estimates show that 120,000 acres of former waterfowl habitat have been taken from use by agriculture, manufacturing and other industries. No wonder the duck shortage of recent years!

Milton Morris, teacher in WTSC Canyon, spent Sunday with his parents, Mr. and Mrs. Andy Morris of the Gray Okla. community. His sister, Miss Winifred and her house guest, Miss Beatriz Martinez, of Puerto Rico, both students at Canyon, returned with him.

Ray McWilliams, who has been on duty at Camp Pike, La., was home from Wednesday until Saturday visiting with his parents, Mr. and Mrs. J. A. McWilliams, other relatives and friends.

A furrier will be at The Orchid Shop Saturday. 38-11-c

Willards
COST LESS TO OWN
Because They Last Longer -- They Give Better Service!

—SEIBERLING SAFETY TIRES—

ALLEN TIRE SHOP

We maintain a complete battery service and also have service batteries for you to use while we are charging your battery.

If it is a new battery that you need we have a complete line of Willard Batteries that carry a guarantee. The Willard Batteries are the cheapest battery on the market because of the fact that they will outlast other batteries and give much better service while in use.

Activity Tickets Offered Students

In an effort to get the students of the Perryton schools to attend all school activities during the year, a season activities ticket is being offered every student at a great saving. Students may even pay for these tickets on the installment plan, thus making it possible for every child to purchase a ticket.

The senior high school activities tickets are good for all football games, all basketball games (except tournament), all gymnasium numbers (six during the year), band concerts, a copy of the school annual and a subscription to the school paper. The value of one of these tickets is approximately \$7.00. The price to the student is \$4.00.

For the Junior high and elementary grade students, the activities ticket will be only \$1.75. These tickets are good for all activities mentioned above, with the exception of a copy of the high school annual and the high school paper.

Alan Roy Sparks Died at Spearman

Alan Roy Sparks, a grandson of Mr. and Mrs. W. L. Philpott of this city, passed away early Saturday morning in the home of his grandparents, Mr. and Mrs. Roy Sparks of Spearman. Alan Roy had been ailing several months suffering with an incurable bone disease. He was 4 years and 7 months old.

Funeral services were held in the Spearman Union Church Sunday afternoon, 2:30 p. m. and burial in the Hanford County cemetery.

Besides the parents, Mr. and Mrs. Roy Sparks, who lived in Perryton several years, and the grandparents, Alan Roy leaves two brothers, Bobbie Lee, age 9 years, and William Gray, age 7 and one sister, Patricia Ann, 4 months.

BUILDING HEALTHIER AMERICANS

Selling foods of good wholesome quality. Foods that if prepared and supplied in the proper amount will nourish and make these young Americans, such as the one pictured here, sound and healthy. Foods that will build them stronger of mind and body.

We find that over the country many young men are being turned down for training in the defense of our country because of bad teeth, underweight, overweight, bad eyesight, etc. In a larger per cent of these cases the proper balanced diet would have corrected this.

In a series of advertisements that will appear in the Herald, each week, we are taking up the question of good foods and balanced diets. Foods that are most important to build every part of the body. Watch next week for "Food Elements the Body Needs."

WEST POINT IN EXILE

Future Officers of Free France at Their Studies in English Classroom

TO FIVE generations of French infantry and cavalry officers, the 133-year-old Military Academy of St. Cyr, a few miles south of Paris, was what West Point is to the officers of the United States Army.

Then, early last summer, invasion swept over Northern France, and ancient St. Cyr closed its doors. Already its corps of cadets had been halved by war-time emergency

graduations. The few hundred students remaining were called together and told to flee—to make their way to safety, to England. Some 170, nearly one-half of the entire reduced corps, succeeded in getting there.

Today, supported by Anglo-American refugee organizations, these students of St. Cyr are once more at work, learning to become officers of the free France of the future.

No. 8 Continued from Front Page

Perryton celebration should be handled. For a number of years, the annual celebration has been sponsored by the Perryton Chamber of Commerce and backed financially by the meager annual budget of this organization.

Underwrite the celebration with a back log of two or three thousand dollars collected in advance with the understanding that only as much of this sum as needed will be used to defray expenses and you'll have every single person who subscribed out working to put the celebration over from a financial and every other angle.

For a number of years the annual celebration has been financed entirely from the collection of annual dues to the Chamber of Commerce which does not exceed \$2,000 for the entire year. This does not provide sufficient funds for the Chamber of Commerce. In fact, it should be two or three times this sum. Then add the burden of underwriting the annual celebration and the result is a Chamber of Commerce with practically no operating funds.

Divorce the staging of the annual celebration from the regular Chamber of Commerce budget and give the directors a chance to do the things that a Chamber of Commerce should do for Perryton.

The many Ochiltree county folks who were in Beaver last Friday were certainly proud of the fine showing that the Perryton Ranger band made in the parade. Many and profuse were the praises showered on Glenn Truax and his fine aggregation of musicians. Shattuck won first place in the contest with Perryton only two points behind. And we want to add that it was no disgrace to lose to that Shattuck bunch for they were plenty good.

Beaver has a fine show, a big crowd, plenty of entertainment and fine exhibits at their fair. The school, crop, fruit, flower, poultry and club exhibits were exceptionally good. The livestock

Is Good Drummer

The fellow who says "monkeys is the cawziest peoples" has nothing on Jackie, the jitterbug gorilla recently brought to New York by a wild animal hunter. Says Jackie:

"Give a monkey a drum he can beat
With his head and his hands
And his feet,
And he'll be content
For he pays no rent.
His life at the zoo is a treat."

division was not as good as usual.

One of the most impressive things about the Beaver show was the splendid spirit of cooperation. Every place you turned, be it parade, exhibits, carnival or what-be-it, you saw a committee in its distinguishing official garb of dark red shirt and big white hat.

In the ranks of active workers, there were business and professional men of every type. Lawyers, merchants, doctors, bankers, school teachers, public officials, farmers, stockmen, government men; every single man in there pitching to make their fair and celebration a success.

That same spirit of cooperation and willingness of all to give a hand in doing the job is without question the reason why Beaver has forged ahead probably more than any other town in this part of the Southwest during these last years.

During the past few years Beaver has built a magnificent concrete grandstand at their fair grounds, they have a big new community gymnasium and auditorium and a beautiful new American Legion hall and community center. Those things just didn't happen. They came about as a result of a lot of hard work by a lot of united people.

No. 9 Continued from Front Page

Anderson's parents, Mr. and Mrs. J. R. Anderson, live northwest of Perryton just across the line in Beaver county. He has four brothers living in Perryton and two in Arizona. He had been employed by the Texhoma Natural Gas Co. as a pipe line walker for the past eleven years.

desiring to take either or both courses.

Diplomas will be issued at the end of the ten weeks course. This training will assist young men to obtain employment in National Defense work.

President Roosevelt bought the first Defense Stamp.

Mrs. Ida Garrett On State Payroll

Mrs. Ida Garrett, who for the past few years has been the Ochiltree county welfare worker, employed and paid by the Commissioners' Court, has been placed under a new set-up in which her salary will be paid by the state department of Public Welfare, so states County Judge Dave Shanks.

All case workers in the state are now under the new plan and all such employees were given an examination under the merit system. Mrs. Garrett took her examination at Pampa recently.

Dave Shanks says that the state will pay the salary of the county welfare worker and that the county will pay transportation and provide the office and expense of maintaining same.

Saturday Salary Is Forfeited

Jess Eason forfeited a \$75 salary in Saturday's election for a president for the Community Service Club by the non-payment of the weekly dues of ten cents.

The salary was carried over and there will be two payments at this week's election. The first name selected will be for the \$75. In case the person cannot qualify, a second election will be held for a \$25 salary.

Keith Curtis at Donley Hall Dance Tonight

T. O. Patton, manager of the Donley Dance Hall, announces a dance to be held there tonight, Thursday. Keith Curtis and his dance band will appear for their third engagement. Mr. Patton states that this dance orchestra is gaining much popularity here in Perryton and surrounding territory with their music.

Steal Wheat From Beaver County Farmer

C. E. Presnall, Beaver county farmer living near the Blue Mound church, was in Perryton, Wednesday to report the theft of wheat from his granary. Mr. Presnall said that the wheat was taken since last Friday. This was the second wheat loss he had had since this fall, two loads being missed several weeks ago. The total loss is about 300 bushels, Mr. Presnall estimates.

No. 2 Continued from Front Page

Amarillo fair.

Exhibits will be divided into divisions with each club in the county having charge of a division. Mrs. Earl McGarragh, council chairman, is the general chairman for all exhibits and details. Following is a list of the divisions, together with the club in charge and the chairman from that club:

Feed sacks and novelties, Waka club, Mrs. Dan Manning and Mrs. J. R. Stump; dairy and canning, McMillen club, Mrs. James Hardy; educational exhibits, Ochiltree club, Mrs. Ed Terhune and Mrs. James Blasingame; flowers, Missouri Avenue club, Mrs. Albert Ackley; fancy work and quilts, Nolia club, Mrs. Calvert Norris; decorations, Black club, Mrs. Edward Klein; clothing building, Perryton club, Mrs. W. R. Thomas.

To depict in detail some phase of work each club in the county will have an educational exhibit. The Waka club will show the uses of whole wheat. Other exhibits by clubs will be: Missouri Avenue, from food; Nolia, lighting the home grounds; Perryton, the cleaning closet; Ochiltree, a well dressed living room window; McMillen, the well-balanced school lunch.

Mrs. Chas. Walker, Panchard, newly elected vice president of the district No. 1, has been elected.

District Legion Meet Friona Sept. 24

J. M. Johnson, Canadian, 18th District American Legion Commander, announces that the next regular monthly meeting of Legion Posts and Auxiliary Units of the district will be held at Friona on the evening of Wednesday, Sept. 24.

Wallace P. Martin, past department commander of New Mexico, will be the principal speaker. Meeting opens at 7:30 o'clock with a fried chicken feed.
