Farris A. Brown Achieves 20 Year Safety Record

Farris A. Brown, rural carrier at the U. S. Post Office in Talco, has earned an outstanding record of twenty years service without a chargeable motor vehicle accident, and has received the 20 year "Safe Driver Award and Pin," from the National Safety Council, according to information given by Postmaster Charlene Westbrook. For information she states "This award is the recognized trademark of professional drivers who have proved their skill in avoiding traffic accidents and is the nation's highest award for professional safe driving performance."

Rural carriers in the Dallas region drive approximately 40 million miles a year, a great percentage of which are on rural roads. In spite of the many built-in hazards of driving back country roads, the rural carriers of the Dallas Region have won five national awards in seven years. Mr. Brown is one of the carriers that has made this possible. She further states, "We are proud of this record in our community and post office." In a letter received from the Regional Office in Dallas, we quote, "The Regional Office is proud of Mr. Brown's outstanding record of 20 years service as a rural carrier without a chargeable motor vehicle accident. Please extend our congratulations to Mr. Brown for his outstanding vehicle safety record."

A native of Talco, he is the son of the late A. O. Brown, a former

Rural Carriers To Distribute Survey Cards

Postmaster Charlene Westbrook reminds rural patrons of the Talco Post Office to be on the lookout for June Livestock Survey cards. Next week, the mail carrier will leave survey cards in a sample of boxes along their routes.

"USDA bases livestock and poultry estimates on replies to this survey," Mrs. Westbrook explains. "It is important for everyone who gets a card to fill it out and return it to the carrier. This way, USDA gets a representative sample of the area's livestock and poultry holdings."

Carrier assisting with the survey is Farris A. Brown.

Survey cards will be forwarded to Cary D. Palmer, State Agricultural Statistician in Austin. After adding and analyzing these cards, USDA statisticians are able to estimate the State's milk production, calf and pig crops, lamb and wool crops, and the number of hens and pullets.

"Information from this survey will guide livestock and poultry producers in making important business decisions," Mrs. Westbrook concludes.

To prevent contamination by poison ivy, avoid touching it and wash any area that does come in contact with the plant. The smoke from burning poison ivy leaves can also cause characteristic dermatitis.
